<b>Context of and specific resources for assessment</b>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to develop a plant pest survey strategy.</p> <p>The candidate must also have access to a functioning control centre, or a control centre established for a plant pest response simulation exercise.</p>
<b>Method of assessment</b>	<p>Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest response simulation exercise or in responses to an emergency disease or plant pest incursion.</p>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to plan and oversee an emergency disease or plant pest control program must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work within control centres established for other emergency diseases or plant pest incursions.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Biological and dispersal characteristics may include:	<ul style="list-style-type: none"> <li>• intrinsic characteristics of pest</li> <li>• active flight</li> <li>• soil borne</li> <li>• water borne</li> <li>• wind borne</li> <li>• biological (mechanical) vectors that carry the pest such as:                             <ul style="list-style-type: none"> <li>• fruit, seed and plant material</li> <li>• insects, invertebrates and vertebrates</li> </ul> </li> <li>• non-biological means such as equipment, machinery, vehicles and clothing.</li> </ul>
Types of survey required may include:	<ul style="list-style-type: none"> <li>• area free</li> <li>• delimiting</li> <li>• distribution</li> <li>• prevalence.</li> </ul>
Standards and protocols that may apply include:	<ul style="list-style-type: none"> <li>• PLANTPLAN</li> <li>• Australian Veterinary Emergency Plan (AUSVETPLAN)</li> <li>• commonwealth, state and territory legislation defining legal powers in a disease emergency</li> <li>• damage minimisation policies</li> <li>• environmental policies</li> <li>• occupational health and safety requirements and policies</li> <li>• pest free area guidelines</li> <li>• standard operating procedures.</li> </ul>
Diagnostic tests selected may include:	<ul style="list-style-type: none"> <li>• biochemical tests</li> <li>• Enzyme-Linked Immunosorbent Assay (ELISA)</li> <li>• microscopy</li> <li>• Polymerase Chain Reaction (PCR).</li> </ul>
Instructions for survey teams may cover:	<ul style="list-style-type: none"> <li>• actions to take when suspect material is found</li> <li>• biosecurity measures for team and property owners</li> <li>• communication protocols for teams when briefing property owners, including</li> </ul>

<b>RANGE STATEMENT</b>	
	confidentiality requirements <ul style="list-style-type: none"> <li>• farm, district and regional requirements</li> <li>• sampling intensity</li> <li>• sampling protocols</li> <li>• specifying survey sites.</li> </ul>
Resources required may include:	<ul style="list-style-type: none"> <li>• equipment</li> <li>• illustrated guides</li> <li>• information technology and communications equipment</li> <li>• maps - topographical and aerial</li> <li>• personnel and their needs, including physical needs such as transport, accommodation and other requirements such as supervision and training</li> <li>• vehicles appropriate to area, site and terrain, including:                             <ul style="list-style-type: none"> <li>• four-wheel drive</li> <li>• all terrain vehicle (ATV)</li> <li>• forklift</li> <li>• helicopter.</li> </ul> </li> </ul>
Technical experts to consult may include:	<ul style="list-style-type: none"> <li>• those with appropriate diagnostic and biometric expertise.</li> </ul>
Appropriate authorities may include:	<ul style="list-style-type: none"> <li>• chief plant health manager</li> <li>• consultative committee on emergency plant pests</li> <li>• planning manager</li> <li>• survey manager.</li> </ul>

## AHCPMG602A Develop a plant pest destruction strategy

### Modification History

Not Applicable

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit covers developing a plant pest destruction strategy and specifies the outcomes required to develop a strategy for the destruction of plant pests for the purposes of eradication. The plant pest destruction strategy forms part of the Australian Emergency Plant Pest Response Plan (PLANTPLAN).</p>
-------------------------------	---

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>This unit applies to personnel who have been appointed or engaged to undertake a role within a plant pest incursion. The unit may also apply to personnel involved with planning responses to emergency animal diseases and aquatic animal diseases.</p>
---------------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<p><b>Prerequisite units</b></p>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Obtain and analyse information for inclusion in the plant pest destruction strategy	<p>1.1.Characteristics of plant pest that may determine best method of destruction are identified.</p> <p>1.2.Characteristics of host plants and/or plant products are identified.</p> <p>1.3.Possible destruction treatments are identified and estimated costs are obtained.</p>
2. Determine destruction methodology	<p>2.1.Pre-treatments that will limit organism's risk of escape are identified.</p> <p>2.2.Affected areas, including buffer areas, are identified.</p> <p>2.3.Occupational health and safety and environmental standards that will apply to all phases of destruction strategy are identified, incorporated into destruction methodology and documented.</p> <p>2.4.Most cost-effective, safe and effective method of destruction is selected as appropriate for circumstances.</p> <p>2.5.Contingencies for prevailing weather conditions are developed.</p> <p>2.6.Instructions for destruction teams are developed, including specific checklists on performance of operations.</p> <p>2.7.Need for approvals associated with destruction activities is identified and documented.</p> <p>2.8.Biosecurity issues are identified and contingency plans are prepared.</p>
3. Determine the required resources	<p>3.1.Resources required for implementation of destruction strategy are determined in conjunction</p>

ELEMENT	PERFORMANCE CRITERIA
	with technical experts and are documented.
4. Develop communication procedures	4.1. In conjunction with communications manager, procedures and protocols for communicating with contractors, emergency services, property owner/manager, government, media and other stakeholders are developed. 4.2. Plant pest destruction strategy is communicated to appropriate authorities.
5. Determine post-destruction processes	5.1. Review processes to evaluate effectiveness of plant pest destruction treatments are determined. 5.2. Surveillance needed to demonstrate pest-free areas is determined. 5.3. Review processes to evaluate effectiveness of plant pest destruction strategy are determined.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- costing alternative destruction treatments
- developing a budget
- planning biological strategies
- researching and analysing information
- supervising others working in a special purpose team
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
<ul style="list-style-type: none"> <li>• approvals required for such things as burning</li> <li>• communication procedures and protocols</li> <li>• crop destruction methods</li> <li>• equipment needed for plant pest destruction</li> <li>• government processes</li> <li>• group of organisms relevant to strategy being developed</li> <li>• legislation and regulations defining and affecting destruction of plant pests</li> <li>• logistics requirements</li> <li>• rates and methods of application of selected biocides</li> <li>• relevant guidelines, including PLANTPLAN.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The critical requirements for this unit of competency as a whole are listed below:</p> <ul style="list-style-type: none"> <li>• assessment must confirm one's ability to:                             <ul style="list-style-type: none"> <li>• plan pre-treatment, destruction and site clean-up</li> <li>• communicate plans to destruction teams, contractors and emergency services.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to develop a plant pest destruction strategy.</p> <p>The candidate must also have access to a functioning control centre, or a control centre established for a plant pest response simulation exercise.</p>
<b>Method of assessment</b>	<p>Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in a real or simulated plant pest incursion</p>

<b>EVIDENCE GUIDE</b>	
	response.
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to develop a plant pest destruction strategy must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work within urban, farming, forestry and natural environments.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Characteristics of plant pest to be analysed may include:	<ul style="list-style-type: none"> <li>• likely efficacy of treatment considering the susceptibility of pest and life form of organism, such as resistant spore forms in soil</li> <li>• means of organism dispersal, escape points and associated risks</li> <li>• position of pest in/on host organism:                             <ul style="list-style-type: none"> <li>• on or inside plants:                                     <ul style="list-style-type: none"> <li>• leaves</li> <li>• stems</li> <li>• fruit</li> <li>• seeds</li> <li>• roots</li> <li>• tuber bulbs</li> </ul> </li> <li>• in the soil:</li> </ul> </li> <li>• risks of survival post-treatment.</li> </ul>
Characteristics of host plants and/or plant products to be analysed may include:	<ul style="list-style-type: none"> <li>• analysis of morphological characteristics such as:                             <ul style="list-style-type: none"> <li>• cellulose or lignified</li> <li>• perennial or annual</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• size</li> <li>• extent of root system</li> <li>• presence of fruits or other materials that may be difficult to treat by usual destruction methods</li> <li>• identity, area, location and other important characteristics of host plants/plant products such as ownership.</li> </ul>
Pre-treatments may include:	<ul style="list-style-type: none"> <li>• application of pesticides to close down escape routes of organism, such as:                             <ul style="list-style-type: none"> <li>• spores</li> <li>• winged insects.</li> </ul> </li> </ul>
Approvals may be required for activities such as:	<ul style="list-style-type: none"> <li>• burial and/or disposal of affected plants and plant products</li> <li>• chemical use</li> <li>• destruction of vegetation on public land</li> <li>• environmental approvals</li> <li>• excessive noise</li> <li>• fires.</li> </ul>
Resources required for plant pest destruction treatments may include:	<ul style="list-style-type: none"> <li>• contractors</li> <li>• destruction teams</li> <li>• emergency services to control site access</li> <li>• equipment for affected host organism removal and transportation</li> <li>• equipment for site clean-up</li> <li>• equipment for application of treatments and biocides.</li> </ul>
Communication strategies with stakeholders may involve a range of methods such as:	<ul style="list-style-type: none"> <li>• liaison with technical experts</li> <li>• reporting to appropriate authorities</li> <li>• reporting to media.</li> </ul>
Appropriate authorities may include:	<ul style="list-style-type: none"> <li>• chief plant health manager</li> <li>• consultative committee on emergency plant pests</li> <li>• planning manager</li> <li>• survey manager.</li> </ul>
Review of effectiveness of plant pest destruction treatments may involve:	<ul style="list-style-type: none"> <li>• checks of biosecurity of routes for off-site disposal of affected material</li> <li>• integrity of disposal and burial areas</li> <li>• site inspection for signs of infected material and unacceptable debris.</li> </ul>

<b>RANGE STATEMENT</b>	
Review of effectiveness of plant pest destruction strategy may need to consider:	<ul style="list-style-type: none"> <li>• best timing for review</li> <li>• checks required on possible points of weakness of destruction program</li> <li>• detailed analysis of effectiveness</li> <li>• resources required for review.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Monitor and assess pig health and welfare	<p>1.1.Regular checks are taken to assess pig health and welfare according to the requirements of the organisation.</p> <p>1.2.Symptoms of ill health and common diseases or parasite infestations are recognised and reported.</p> <p>1.3.Pig health and welfare status is recorded in accordance with enterprise procedures.</p> <p>1.4.Where signs indicate an unusual disease immediate advice is sought from supervisors, veterinarian and appropriate authorities.</p>
2. Provide an optimal environment for pigs	<p>2.1.Optimal environment is correctly and safely provided for pigs according to organisation practice, the code of welfare and relevant regulations</p> <p>2.2.Temperature control equipment is correctly monitored, and operated to ensure optimal temperatures for pigs.</p> <p>2.3.Welfare of pigs is monitored and abnormalities are reported promptly.</p> <p>2.4.Information which is relevant, complete, legible and accurate is recorded on shed conditions, according to enterprise procedures.</p>
3. Establish and maintain shed hygiene	<p>3.1.Organisational Occupational Health and Safety (OHS) procedures, practices, policies and precautions are observed and followed, including the use of personal protective equipment.</p> <p>3.2.Cleanliness and hygiene are maintained by selecting and using appropriate methods according to</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>organisation practice.</p> <p>3.3. Quarantine procedures are maintained as instructed to minimise the risks of disease introduction to the shed.</p> <p>3.4. Thorough personal hygiene practices are maintained in all activities associated with handling pigs, including reducing risks from zoonotic diseases.</p> <p>3.5. Rooms, machines and surfaces are cleaned to industry standards.</p> <p>3.6. All waste and debris is placed in allocated containers and disposed of according to organisation hygiene standards.</p>
4. Administer medication to pigs	<p>4.1. Vaccines and veterinary chemicals appropriate to the operation are stored or frozen and labelled in controlled or refrigerated conditions.</p> <p>4.2. Routine prevention procedures for disease or parasite infestation are safely carried out.</p> <p>4.3. Quantities of medication are accurately measured for administration according to clear organisation instruction and manufacturer's instructions.</p> <p>4.4. Vaccination is carried out under instruction as required according to organisation procedures.</p> <p>4.5. Vaccinated and non-vaccinated pigs are identified in shed records.</p>
5. Remove non-viable pigs	<p>5.1. Sick pigs are safely treated and dead pig are removed and disposed of according to industry standards of health and hygiene and the quality assurance program.</p> <p>5.2. Disease incidence, pig losses, and treatments are recorded accurately according to organisation practice and relevant regulations.</p> <p>5.3. Unhealthy/non-viable pigs are recognised, reported and dealt with according to organisation policy and quality assurance program.</p> <p>5.4. Post-mortem assistance is provided where necessary according to organisation practice.</p>
6. Keep and maintain records	<p>6.1. Disease incidence, pig losses, and treatments are recorded accurately according to organisation practice and relevant regulations.</p> <p>6.2. Disease information is reported to the unit manager so that prevention strategies can be planned and implemented.</p>

ELEMENT	PERFORMANCE CRITERIA
	6.3. All records made, kept and maintained are clear, accurate, and follow the guidelines laid down by industry and the organisation.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe work practices
- accurately assess pig numbers
- complete worksheets clearly and accurately
- detect possibility of disease through pig behaviour and appetite
- recognise clinical symptoms (normal vs. abnormal)
- recognise symptoms of fear, aggression and stress
- survey workplace for hygiene and occupational health and safety issues
- observe, identify and react appropriately to environmental implications and occupational health and safety hazards
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- symptoms of ill-health in pigs
- the range of diseases affecting the class and age of pigs
- vaccination programs, vaccines and mode of action in use in the organisation
- zoonotic diseases and mode of transmission
- how to handle pigs
- signs of fear/aggression in pig
- signs of stress in pigs
- safe handling of sick and dead pigs
- euthanasia of pigs.

**REQUIRED SKILLS AND KNOWLEDGE**

- portability of water
- quality of feed
- environmental controls and codes of practice applicable to the enterprise
- relevant OHS and animal welfare legislation, codes of practice and enterprise procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Competence in maintaining health of pig in an intensive production environment requires evidence that pig remain at optimum health and that outbreaks of disease are minimised through the effective use of hygiene and quarantine procedures.

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- monitor pig health and welfare and remove sick animals
- ensure shed environment is within required temperature range
- maintain hygiene and quarantine procedures
- administer medications as and when necessary
- maintain clear and accurate records about the work undertaken.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Pigs may include:	<ul style="list-style-type: none"> <li>all commercial breeds and types of pigs.</li> </ul>

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare accommodation for weaners	<p>1.1. Appropriate accommodation is cleaned, disinfected and prepared for all classes of weaned pigs according to enterprise practice and instructions.</p> <p>1.2. Housing environment and conditions are checked and adjusted as required to ensure appropriate ventilation, temperature and humidity.</p> <p>1.3. Feeders and drinkers are filled or prepared according to supervisor's instructions.</p> <p>1.4. Problems with accommodation and/or environmental controls are noted and reported to the supervisor for appropriate action.</p> <p>1.5. All work is conducted safely and according to enterprise requirements, Occupational Health and Safety (OHS), industry and animal welfare regulations.</p>
2. Wean litter and form viable group	<p>2.1. Litter is weaned according to established schedules, enterprise practice and codes of welfare.</p> <p>2.2. Pigs are grouped from different litters to form viable groups based on body weight and sex at stocking densities to achieve optimal productivity.</p> <p>2.3. Behaviour and condition of weaners are regularly monitored and appropriate actions taken.</p> <p>2.4. Weaners are provided with water and appropriate feed according to the established feed schedule to meet nutritional and growth requirements.</p> <p>2.5. Weaner mortalities are recorded and/or reported to the supervisor and deceased stock is removed according to enterprise policy.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.6.Preventative treatments are administered according to schedules and the supervisor's instructions.
3. Prepare accommodation for growers	3.1.Accommodation is prepared and cleaned for new grower stock according to enterprise procedures. 3.2.Environment is controlled and monitored in line with established procedures. 3.3.Feeders and drinkers are filled or prepared according to instructions. 3.4.Problems with accommodation and/or environmental controls are noted and reported to the supervisor for appropriate action.
4. Monitor growers and finishers	4.1.Pig condition and health are regularly monitored as an integral part of daily routines. 4.2.Feeders and drinkers are regularly checked as a part of daily routines. 4.3.Pig groups are moved as required in line with growth and condition. 4.4.Poor performing pigs are removed from groups and reassigned in line with enterprise policy. 4.5.Sick, injured or unhealthy pigs are isolated in a quarantine area or noted for euthanasia according to enterprise policy animal welfare procedures. 4.6.Health treatments are applied when required and according to the supervisor's instructions and enterprise policy. 4.7.Grower mortalities are recorded and/or reported to the supervisor and deceased stock is removed according to enterprise policy.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe operating procedures
- handle and move pigs safely
- prepare accommodation for weaners and growers

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <ul style="list-style-type: none"> <li>• wean pigs</li> <li>• monitor pig health and welfare</li> <li>• maintain feeders and drinkers</li> <li>• follow and maintain site quarantine procedures</li> <li>• monitor and adjust environmental controls</li> <li>• undertake work as directed</li> <li>• handle materials and equipment</li> <li>• clean up on completion of work</li> <li>• use literacy skills to follow sequenced written instructions and record information accurately and legibly</li> <li>• use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor</li> <li>• use numeracy skills to estimate, calculate and record routine workplace measures</li> <li>• use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• safe work practices</li> <li>• risks to newly weaned piglets</li> <li>• nutrition, water and environmental needs of young pigs</li> <li>• typical diseases affecting young pigs and their treatment</li> <li>• animal welfare principles applying to intensive production</li> <li>• target growth rates of weaners and growers</li> <li>• dietary requirements of weaner and grower pigs</li> <li>• repair and maintenance of structures</li> <li>• OHS and environmental legislation and workplace requirements.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Control and direct pigs	1.1.Pigs are moved and handled with minimum force, applying the principles and practices of animal welfare and according to industry practice. 1.2.Positive behaviours of pigs are maximised in the movement of stock and the mental and physical well being of pigs considered. 1.3.Pigs are monitored continually for behaviour and condition as they are handled. 1.4.Pigs are moved with confidence, safely and with minimal stress, either singly or in groups. 1.5.Pigs are moved and handled in such a way as to avoid injury to the handler.
2. Restrain pigs	2.1.Industry accepted restraints are used to safely and securely restrain pigs as required. 2.2.Restraint procedures are carried out with minimal stress and discomfort to the animal, and within the relevant code of welfare and establishment practice.
3. Weigh/condition score pigs	3.1.Pigs are weighed accurately on an individual and on a group basis. 3.2.Condition score of individual pigs is accurately estimated to industry standards. 3.3.Weights/condition scores of pigs are recorded accurately and clearly on an individual and group basis. 3.4.Pigs are identified by reading ear tag, ear notch or pen number.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- control and direct pigs
- restrain pigs
- weigh and condition score pigs
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- pig behaviour and characteristics which can be used to facilitate handling
- handling and restraining techniques
- enterprise quality assurance policies including standard operating procedures
- techniques for moving different classes of pig, (e.g. moving groups of weaners, moving sows and boars)
- Occupational Health and Safety (OHS) and animal welfare requirements for handling pigs.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include

<b>EVIDENCE GUIDE</b>	
	achievement of the following: <ul style="list-style-type: none"> <li>• control and direct pigs</li> <li>• restrain pigs</li> <li>• weigh and condition score pigs.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Pigs may include:	<ul style="list-style-type: none"> <li>• all types and breeds of pigs.</li> </ul>
Piggeries may include:	<ul style="list-style-type: none"> <li>• intensive and free range piggeries.</li> </ul>

## Unit Sector(s)

## AHCPRK301A Pregnancy test pigs

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of testing pigs for pregnancy, and defines the standard required to: detect pregnancy through ultra sound; handle pigs in a manner that minimises the likelihood of stress; report on the health and welfare of the pigs.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to pregnancy testing pigs and is carried out independently under workplace direction.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for pregnancy diagnosis procedures	<p>1.1.Pregnancy testing preparations including the preparation of relevant documentation are completed according to organisation requirements and procedures.</p> <p>1.2.Pigs to be tested are identified according to the breeding or management program requirements.</p> <p>1.3.Physical and human resources for pregnancy testing are assembled according to organisation policy.</p> <p>1.4.Individual pigs are isolated for veterinary treatment or examination.</p> <p>1.5.All handling and testing of pigs is undertaken with strict adherence to the animal welfare code.</p>
2. Carry out manual pregnancy diagnosis procedures	<p>2.1.Individual pigs are handled in manner to minimise stress while testing and individual breeding records are checked.</p> <p>2.2.Personal protective equipment is fitted according to organisation policy.</p> <p>2.3.Occupational Health and Safety (OHS) hazards are continually identified, risks assessed and suitable controls implemented.</p> <p>2.4.Ultra sound equipment is applied for pregnancy diagnosis.</p> <p>2.5.Strict hygiene procedures are implemented between individual pigs in line with organisation and industry requirements.</p> <p>2.6.Records are kept and outcomes reported according to organisation requirements.</p> <p>2.7.Other indicators of pig health are observed and noted for input to herd health management.</p>
3. Carry out post pregnancy testing	<p>3.1.Pigs diagnosed as pregnant or not pregnant are accurately identified according to the requirements of</p>

ELEMENT	PERFORMANCE CRITERIA
clean up procedures	<p>the organisation.</p> <p>3.2.All pigs are consigned to their destination or returned to paddocks/pens in line with organisation needs.</p> <p>3.3.Debris and veterinary medicine containers from pregnancy testing operations are disposed of in full consideration of environmental considerations and controls.</p> <p>3.4.Regular monitoring of pigs post testing is carried out to ensure that no evidence of physical damage or injury is evident.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- handle pigs minimising the likelihood of stress
- report clearly, accurately and in a timely fashion on the health and welfare of the pigs
- accept advice and instruction
- work effectively and safely to accurately carry out manual pregnancy diagnosis with safety and nil damage to pigs or personnel.
- use ultra sound effectively to scan for pregnancy
- comply with animal welfare requirements
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the reproductive physiology of the pig
- indications of pregnancy

**REQUIRED SKILLS AND KNOWLEDGE**

- the stages of parturition in pigs
- pig reproductive systems
- pig embryological development
- relevant zoonoses
- the use of pregnancy/non-pregnancy diagnostic tools and equipment
- recording and reporting systems used in conjunction with pregnancy diagnosis and pig breeding programs.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- detect pregnancy through several manually determined key indicators
- handle pigs in a manner that minimises the likelihood of stress
- report on the health and welfare of the pigs.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Pigs may include:	<ul style="list-style-type: none"> <li>all types and breeds of pregnant sows to be pregnancy tested using ultra sound equipment.</li> </ul>

## AHCPRK302A Treat rectal prolapse in pigs

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of treating rectal prolapse in pigs and defines the standard required to: respond to signs of rectal prolapse; treat rectal prolapse; report on rectal prolapse.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	The treating of rectal prolapse in pigs is carried out independently under workplace direction.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Respond to signs of rectal prolapse	1.1.Symptoms of rectal prolapse are identified. 1.2.Pig is removed from pen. 1.3.Treatment required to repair prolapse is determined based on severity of injury and enterprise standard operating procedures. 1.4.Outbreaks of rectal prolapse in a herd are notified to management according to enterprise standard operating procedures.
2. Treat rectal prolapse	2.1.Minor prolapses are replaced and retained as directed by veterinary advice. 2.2.Large prolapses are reduced by gentle hand pressure before suturing. 2.3.Badly torn prolapses are replaced and pig is moved to hospital pen. 2.4.Rectal strictures are recognised and treated according to enterprise standard operating procedures. 2.5.Antibiotics are administered to pigs with rectal prolapse where required by enterprise standard operating procedures.
3. Report on rectal prolapse	3.1.Incidents and treatments are reported to supervisor according to enterprise standard operating procedures. 3.2.Possible mechanisms for prolapse are reported to supervisor. 3.3.Modifications to pig management are undertaken to reduce incidence of rectal prolapse.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- apply animal welfare practices
- respond to signs of rectal prolapse
- treat rectal prolapse
- report on rectal prolapse
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- pig health and physiology
- symptoms of prolapse and associated problems
- treatments for rectal prolapse
- post treatment requirements
- enterprise standard operating procedures in respect to rectal prolapse
- animal welfare code of practices.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy

<b>EVIDENCE GUIDE</b>	
<b>competency in this unit</b>	holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: <ul style="list-style-type: none"> <li>• respond to signs of rectal prolapse</li> <li>• treat rectal prolapse</li> <li>• report on rectal prolapse.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

## AHCPRK303A Artificially inseminate pigs

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of artificially inseminating pigs and defines the standard required to: prepare for insemination; time insemination to coincide with oestrus cycles; prepare equipment and worksites; correctly select and prepare semen for insemination; inseminate pigs; clean up and record data after insemination is complete.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working under routine supervision within enterprise guidelines.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise insemination process	<p>1.1. Hygiene factors are identified and appropriate procedures followed.</p> <p>1.2. Semen supplies and resources are accessed from enterprise stores.</p> <p>1.3. Artificial insemination program is followed according to enterprise standard operating procedures.</p>
2. Inseminate pigs	<p>2.1. Pigs are handled in a way that minimises stress.</p> <p>2.2. Pigs are prepared for artificial insemination.</p> <p>2.3. Suitable personal protective equipment is selected, used and maintained according to Occupational Health and Safety (OHS) and enterprise requirements.</p> <p>2.4. Pigs are inseminated at the correct stage of oestrus cycle.</p>
3. Clean work area and equipment	<p>3.1. Waste is disposed of according to recommended hygiene standards and environmental policy.</p> <p>3.2. Work area is cleaned to industry standards and returned to operating order.</p>
4. Document and record data	<p>4.1. Data on insemination process is accurate and recorded according to enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- sterilise equipment and prepare hygienic worksite prior to insemination procedures
- observe pigs to detect correct insemination timing
- employ safe work practices
- clean up worksite and safely dispose of waste
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- basic animal health and physiology
- preparation requirements for artificial insemination of pigs
- pig behavioural characteristics
- enterprise and industry identification system for livestock
- personal protective equipment and when and how it should be used
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS, environment and animal welfare
- enterprise policies with regard to artificial insemination and recording and reporting routines.

## Evidence Guide

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify pig condition	<p>1.1. Condition of pigs is accurately determined and scores are recorded according to recognised industry practices.</p> <p>1.2. Pigs are ranked according to scores and nutritional requirements adjusted to facilitate optimum condition.</p> <p>1.3. Feeding strategies are appropriate to the pig environment and seasonal conditions.</p> <p>1.4. Judgements on pig conditions are based on verifiable information.</p>
2. Facilitate mating	<p>2.1. Oestrus inducement and detection procedures are carried out according to established industry practice.</p> <p>2.2. Mating areas are secure and provide for access during joining.</p> <p>2.3. Mating procedures and handling techniques that minimise stress and discomfort to livestock and meet Occupational Health and Safety (OHS) requirements are used.</p> <p>2.4. Mating is supervised and intervention when required is undertaken to maximise conception rates.</p>
3. Complete mating procedure	<p>3.1. Regular post-mating heat detection is carried out to check sows returning to oestrus as per enterprise requirements.</p> <p>3.2. Records of mating are recorded accurately, legibly and according to enterprise and industry requirements.</p>
4. Monitor sows to	<p>4.1. Nutritional needs of pregnant sows are identified and</p>

ELEMENT	PERFORMANCE CRITERIA
parturition	confirmed against the enterprise feeding plan. 4.2. Feed and feed supplements are determined and provided in accordance with the feeding plan and local conditions.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safety directions
- accurately condition score dry sows
- supervise pig mating and assist as appropriate
- conduct return checks on sows
- administer preventative health treatments
- carry out post-mating heat detection
- read and interpret manufacturer's specifications, work and feeding plans, and material safety data sheets
- communicate abnormalities, workplace hazards and report and maintain animal records
- employ safe work practices
- communicate effectively with other team members, veterinarians and supervisors
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- sow conditioning
- oestrus cycles
- anatomy and physiology of male and female reproductive systems in pigs
- factors affecting conception
- pregnancy testing and oestrus detection procedures
- pig health and abnormalities, preventative health treatments, procedures and methods

## REQUIRED SKILLS AND KNOWLEDGE

- livestock movement and behavioural characteristics
- handling and assisted joining techniques
- hazards associated with handling animals and veterinarian medicines and chemicals
- physiological and behavioural signs of impending farrowing
- animal behaviour and nutritional requirements of sows
- feed and feed supplements for sows and when to provide them
- animal husbandry procedures
- enterprise and industry identification system for livestock
- personal protective equipment and when and how it should be used
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS and animal welfare
- enterprise and industry policies with regard to recording and reporting routines.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify appropriate mating plans and select appropriate dams and sires
- monitor sows condition
- revise feeding strategies
- detect oestrus cycles
- monitor mating and take remedial action where needed
- record data and report on the effectiveness of the mating program.

#### Context of and specific resources for

## AHCPRK401A Implement a feeding strategy for pig production

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers implementing a feeding strategy for pig production and defines the standard required to: effectively discuss feed and nutritional content with nutritionist and managers; assess adequacy of feed storage and distribution systems; identify a range of alternative available stockfeeds and suppliers; interpret laboratory result data to develop rations for different classes of pigs; operate and maintain a range of feeding equipment; complete the required records of feed use and pig performance.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to production unit supervisors who select the quantities of feed to be used and ensure that pigs receive adequate food on a regular and timely basis.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine feed rations and schedules	<p>1.1. Quantities of feed required for livestock are determined from the production program in conjunction with advice from other available information and expert advice.</p> <p>1.2. The results of any available laboratory testing are taken into consideration when determining the quantities and ration formulation of stockfeed to be used.</p> <p>1.3. Feeding is scheduled and responsibility for feeding allocated in line with the production program and other operations occurring within the shed.</p> <p>1.4. Method(s) of providing feed to livestock is identified from production plan and confirmed with supplier of ingredients and other expert advice.</p>
2. Supervise storage of feed	<p>2.1. Secure and hygienic storage of feed is organised to eliminate contamination and infestation.</p> <p>2.2. Storage location is selected to ensure safe access.</p> <p>2.3. Rotation of stock and replacements are organised to arrive at the appropriate time to ensure optimum freshness.</p> <p>2.4. Feed is organised to suit the needs of various classes and ages of livestock, the identified nutritional requirements, and the equipment available within the organisation.</p> <p>2.5. Samples of feed are taken, packaged and labelled, and forwarded to the laboratory for testing according</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>to the schedules described in the production program.</p> <p>2.6. Calibration of measuring equipment and calculation of quantities is supervised at regular intervals.</p> <p>2.7. Checks are made to ensure that suitable personal protective equipment is selected, used and maintained.</p> <p>2.8. Occupational Health and Safety (OHS) hazards are identified, assessed, and responsible action is taken throughout the preparation and feeding operations.</p>
3. Supervise feeding	<p>3.1. Rations are supplied to the livestock according to the production program and schedules devised.</p> <p>3.2. Potable water is available continuously to the livestock.</p> <p>3.3. The health and wellbeing of the livestock is monitored, and any reaction to a change in feed or schedules is noted and reported.</p> <p>3.4. Any change in production levels as a direct result of changes to feed types, ingredients or schedules is monitored and reported.</p> <p>3.5. Advice is given to operational staff during the feeding operation when requested, or when the need is observed. All waste materials and substances are removed from the site and stored, or disposed of responsibly.</p> <p>3.6. Documentation is collated and stored according to the requirements of the organisation.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and monitor safe work practices
- identify a range of alternative available stockfeeds and suppliers
- operate a range of feeding equipment
- assess adequacy of feed storage and distribution systems
- perform basic trouble shooting

**REQUIRED SKILLS AND KNOWLEDGE**

- recognise and rectify minor operational faults
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- control of common diseases and preventative measures including the placement of medications in feed
- growth and development in livestock
- feed delivery systems and equipment
- response to analysis of feed samples
- the organisations sampling requirements and techniques
- appropriate legislative requirements, manufacturers instructions and enterprise procedures/instructions
- silo operations and configuration, machinery and operating practices
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS, and the use and control of machinery and equipment
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures
- least-cost diet formulation.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and**

## AHCSAW301A Construct conservation earthworks

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the construction of conservation earthworks and defines the standard required to: determine job requirements from plans and specifications; assess machinery and equipment requirements; construct planned earthworks; apply final finishing techniques.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers who use specialised earthmoving techniques completed to fine tolerances. Construction is often carried out using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector. The use and operation of machinery and equipment used to construct these works is covered by separate units.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for construction	1.1. Confirm construction details and sequence. 1.2. Identify and locate worksite, site indicators and survey pegs. 1.3. Confirm work readiness of machinery and equipment. 1.4. Assess and minimise risks to others and the environment. 1.5. Select and use appropriate personal protective equipment. 1.6. Verify that equipment and attachments match terrain and program tasks.
2. Carry out work	2.1. Follow industry endorsed earthwork methods and patterns for specific machines. 2.2. Monitor and maintain optimum machinery loads in accordance with prevailing conditions. 2.3. Ensure that safe machinery operating techniques are deployed to match terrain, site conditions other operators and workers. 2.4. Ensure that excavation, transport, dumping and compaction of material is conducted in accordance with industry practice.
3. Apply finish techniques	3.1. Finish batters and surfaces in accordance with job requirements and industry practice. 3.2. Retain site features and vegetation in accordance with work plan/schedule.

ELEMENT	PERFORMANCE CRITERIA
	3.3. Clear site and remove debris in accordance with work plan/schedule. 3.4. Complete topsoiling of disturbed areas and surfaces in accordance with industry standards and plan/schedule.
4. Finalise work	4.1. Complete work records. 4.2. Clean and store Personal Protective Equipment (PPE) and application equipment in accordance with manufacturer's specification and Occupational Health and Safety (OHS) requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- prepare for construction
- carry out planned earthworks and minimise damage to natural areas
- apply finishing techniques
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- erosion and sediment control standards and principles
- erosion control and design principles
- natural area protection (particularly topsoil) and rehabilitation principles
- soils and soil formation
- principles of conservation earthwork construction including catchment management and soils

**REQUIRED SKILLS AND KNOWLEDGE**

- earthmoving principles
- levels and levelling
- natural area protection (including topsoil) and rehabilitation
- types and application of personal protective equipment
- legislation and regulations including Occupational Health and Safety (OHS) in relation to conservation earthwork construction
- risk factors including human health, environmental damage
- erosion and sedimentation control principles and practices
- environmental impacts and controls for constructing conservation earthworks
- OHS and environmental legislative and enterprise requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- determine job requirements from plans and specifications
- assess machinery and equipment requirements
- construct planned earthworks
- apply final finishing techniques.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Earthworks may include:	<ul style="list-style-type: none"> <li>• the range of conservation earthworks on rural lands including:                             <ul style="list-style-type: none"> <li>• contour banks</li> <li>• waterways</li> <li>• dams</li> <li>• drainage structures</li> </ul> </li> <li>• This unit does not include construction of access tracks or seismic lines, maintenance of fire breaks or land clearing.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for implementation and construction	1.1.Erosion and sediment control plan and schedule of works match site conditions. 1.2.Survey pegs and site indicators are identified on site. 1.3.Equipment and tools are matched to program works and terrain on site. 1.4.Work readiness of selected equipment and tools are verified in line with contractor policy. 1.5.Materials are selected to complete proposed works in line with construction schedule.
2. Carry out implementation and construction	2.1.Earthworks are constructed in accordance with details specified in the plan and to industry standards. 2.2.Erosion and sediment control products and materials are installed in accordance with manufacturer's recommendation and industry guidelines and plans.
3. Carry out repairs and maintenance procedures	3.1.Site works maintenance inspection schedule is applied to reinstate operating effectiveness of erosion and sediment control measures on site.

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- identify hazards and implement safe work procedures
- prepare for implementation and construction
- carry out implementation and construction
- carry out repairs and maintenance procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- materials cartage pollution control
- sequence of working and timing/duration
- Occupational Health and Safety (OHS) issues relating to the equipment and the site
- equipment used
- construct, install and maintain includes materials, quantity and where to source them on site
- construction/installation techniques for all measures on the plan
- limitations of structures including timing of maintenance, structure life cycle, specifications and standards
- environmental impacts and procedures for erosion and sediment control.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Interpret plans and specifications	<p>1.1. Overall plan is determined in consultation with landholder and surveyor.</p> <p>1.2. Earthworks specifications are established in consideration of desired outcome and prevailing conditions.</p> <p>1.3. Plan is accurately verified in line with job requirements.</p>
2. Relate plan to site	<p>2.1. Key plan points are located on site.</p> <p>2.2. Additional features identified on site plan.</p> <p>2.3. Site issues which affect survey and pegging are identified and recorded.</p>
3. Peg project	<p>3.1. Pegging sequence is established in consultation with the site surveyor.</p> <p>3.2. Site dimensions are measured in compliance with job specification.</p> <p>3.3. Peg locations are established using prescribed methods.</p> <p>3.4. Earthworks are pegged in line with project specification.</p> <p>3.5. All construction personnel are advised of pegging and the need for site integrity.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and ensure the safety of field operations on sites
- interpret plans and specifications
- relate plan to site
- peg project
- protect site
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- different types of survey equipment and staffs
- civil engineering and survey techniques
- erosion control and design principles
- principles of native topsoil conservation and protection
- levels and levelling
- earthmoving principles
- interpretation of plans and general and technical specifications
- Occupational Health and Safety (OHS) and environmental legislation, codes of practice and enterprise procedures.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan efficient implementation of works	<p>1.1.Plans and specifications are reviewed and related to the works site.</p> <p>1.2.Economics of operation are maximised through the deployment of trained personnel and equipment selection.</p> <p>1.3.Work sequences are planned and recorded in line with proposed work schedule.</p> <p>1.4.Materials are ordered to complete proposed works in line with construction schedule.</p> <p>1.5.Compliance with established regulatory planning and environmental legislation is maintained.</p>
2. Direct implementation of planned works	<p>2.1.Equipment and personnel deployment ensures structurally sound works in line with earthworks planned.</p> <p>2.2.Job specifications and regulatory requirements are achieved in accordance with the plan or necessary modification.</p> <p>2.3.Modified techniques are adopted to minimise the effect of site limitation in achieving job requirements.</p> <p>2.4.Safe machine operations are monitored to ensure they meet relevant Occupational Health and Safety (OHS) requirements.</p>
3. Monitor job specification	<p>3.1.Progressive job checking results in achieving job specifications, contracts and targets.</p> <p>3.2.Instructions to plant operators ensure high finishing standards to earthworks.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3.Modifications are made to job specifications in consultation with the landholder or works supervisor.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe systems of work
- plan efficient implementation of works
- protect natural areas from damage
- direct the implementation of planned works
- monitor job specifications
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- erosion and sediment control standards and principles
- natural areas topsoil protection and rehabilitation principles
- appropriate supervision techniques
- erosion control and design principles
- sediment control principles
- earthmoving principles
- principles for machine operation
- engagement of subcontractors/equipment, skills and expected outcomes
- work sequence knowledge
- equipment most suitable to the constructing of erosion and sediment control works
- quality assurance systems, processes and practices

**REQUIRED SKILLS AND KNOWLEDGE**

- staff deployment, supervision and training
- OHS and environmental legislation, codes of practice and enterprise requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- implement measures that will achieve the optimum efficiency of the earthmoving operation.
- put into practice measures that construct structurally sound earthworks.
- control construction to achieve specifications
- instigate measures that finish earthworks to specifications.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Types of project may include:

- earthworks required as part of erosion control

## AHCSAW501A Design control measures and structures

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers work functions associated with the formal engineering design of erosion and sediment control measures and structures including farm dams on land disturbing projects in both urban and rural environments and defines the standard required to: identify measures to be designed; apply design procedures; prepare specification schedule; cost and provide recommendations; collaborate with planner.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit is likely to be carried out independently within enterprise guidelines.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify measures to be designed	1.1. Plan or strategy is reviewed for technical accuracy and environmental impacts. 1.2. Adherence to regulations and legislation is confirmed and noted on works plans. 1.3. Design criteria are applied in line with industry standards.
2. Apply design procedures	2.1. Catchment characteristics are calculated to required accuracy in line with industry standards. 2.2. Methods to determine design specifications are in accordance with industry standards. 2.3. Measures are modified in response to applying design procedures and follow accepted industry practices.
3. Prepare specification schedule	3.1. Documentation provided aligns with the plan and follows industry standards. 3.2. Suitability of design specifications are confirmed to comply with the category of work.

## Required Skills and Knowledge

### **REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- identify measures to be designed
- apply design procedures
- prepare specification schedule
- cost and provide recommendations
- use computer design programs
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- relevant Occupational Health and Safety (OHS) environmental, planning and groundwater legislation.
- erosion control and design principles
- soils and soil formation
- levels and levelling
- earthmoving principles
- total catchment issues
- legal requirements - permits
- environmental issues
- managing peak water flows
- subsurface and surface drainage principles and systems
- awareness of the limitations of design aids provided for industry.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify measures to be designed</li> <li>• apply design procedures</li> <li>• prepare specification schedule</li> <li>• cost and provide recommendations</li> <li>• collaborate with planner.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Establish suitability of development proposal	<p>1.1.Data concerning suitability of development site is compiled using industry methodology.</p> <p>1.2.Alterations or modifications to the development plan are noted and reported to developer or consent authority.</p> <p>1.3.Compliance is established with relevant regulatory planning authority or environmental legislation following industry procedures.</p> <p>1.4.Concurrence is established relating to suitability of development proposal and conforms to erosion and sediment control guidelines.</p>
2. Develop erosion and sediment control strategy	<p>2.1.Erosion control measures are developed consistent with industry principles and selection criteria.</p> <p>2.2.Sediment control measures are developed consistent with industry principles and selection criteria.</p> <p>2.3.Erosion and sediment control strategies are established and documented in co-operation with the developer and relevant consent authority.</p>
3. Prepare an erosion and sediment control plan	<p>3.1.Selection criteria for earthwork structures or measures are checked against industry guidelines.</p> <p>3.2.Design specifications for structures incorporated in plan details.</p> <p>3.3.Erosion and sediment control plan and documentation supporting the plan follow industry guidelines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- establish suitability of development proposal
- prepare reports on erosion and sediment control plans
- develop erosion and sediment control strategy
- prepare an erosion and sediment control plan
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- relevant environmental, planning and groundwater legislation
- planning process for erosion and sediment control
- erosion control and design principles
- soils and soil formation
- levels and levelling
- earthmoving principles
- total catchment issues
- legal requirements - permits
- environmental issues
- country code
- managing peak water flows
- subsurface and surface drainage principles and systems
- awareness of the limitations of design aids provided for industry.

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• establish suitability of development proposal</li> <li>• prepare reports on erosion and sediment control plans</li> <li>• check selection criteria for earthwork structures or measures against industry guidelines</li> <li>• develop erosion and sediment control strategy</li> <li>• prepare an erosion and sediment control plan.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Earthworks may include:	<ul style="list-style-type: none"> <li>• the range of conservation earthworks on rural lands including: <ul style="list-style-type: none"> <li>• contour banks</li> <li>• waterways</li> <li>• dams</li> <li>• drainage structures.</li> </ul> </li> </ul>
Erosion control measures may include:	<ul style="list-style-type: none"> <li>• site management</li> <li>• land shaping</li> <li>• batter stabilisation</li> <li>• banks and channels</li> <li>• level spreader</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• revegetation</li> <li>• waterways</li> <li>• check dams</li> <li>• bank and channel linings</li> <li>• grade stabilising structures</li> <li>• outlet protection structures</li> <li>• stormwater detention measures</li> <li>• dust control</li> <li>• rural road&amp;track crossbank and crossfall.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Establish client needs	<p>1.1.The proposed land use is discussed and confirmed in writing with the landholder.</p> <p>1.2.The catchment characteristics are reviewed and discussed considering the proposed land use.</p> <p>1.3.Current impacting legislation and policies are explained to the landholder.</p> <p>1.4.Possible strategies are discussed with the landholder and the best option confirmed in writing.</p>
2. Develop the strategy to utilise earthworks	<p>2.1.Property ownership and boundary are confirmed by checking maps and titles.</p> <p>2.2.Profile of catchment is determined from survey and aerial photographs.</p> <p>2.3.Earthworks concept is developed consistent with industry principles and selection criteria.</p> <p>2.4.Final water disposal points are established in line with proposed strategy.</p> <p>2.5.Proposed location of structures are tested by survey and discussed with landholder.</p> <p>2.6.Preferred strategy is documented according to enterprise guidelines.</p>
3. Prepare a detailed works plan	<p>3.1.Plan is prepared according to enterprise guidelines and industry best practice.</p> <p>3.2.Selection criteria applied for earthwork structures or measures align with industry standards.</p> <p>3.3.Design of relevant structures are communicated with specific details to qualified designer.</p> <p>3.4.Relevant documentation is prepared and presented,</p>

ELEMENT	PERFORMANCE CRITERIA
	and is consistent with category of work and industry standards.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- establish client needs
- carry out site investigations including surveying
- develop a strategy to protect natural areas
- develop the strategy to utilise earthworks
- recommend appropriate construction equipment
- prepare detailed project costing
- prepare a detailed works plan
- negotiate agreed project outcome
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- relevant environmental, planning and groundwater legislation
- relevant environmental, planning and earthwork construction standards and Codes of Practice
- earthwork structures
- erosion control and design principles
- natural areas (particularly topsoil) protection and rehabilitation principles
- soils and soil formation
- levels and levelling survey plans and titles
- earthmoving principles

## REQUIRED SKILLS AND KNOWLEDGE

- total catchment issues
- land use and land development strategies
- legal issues
- environmental issues
- country code
- managing peak water flows
- subsurface and surface drainage principles and systems
- limitations of design aids provided for industry.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- establish client needs
- carry out site investigations including surveying
- develop a strategy to protect natural areas
- establish the purpose and specifications of earthworks
- prepare detailed project costing and works plan.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Conservation works may include:

- earthworks constructions -
  - dams
  - bank and drain
  - waterways
  - land rehabilitation
  - water ponding schemes
- dams -
  - gully embankment
  - hillside
  - excavated
  - ring
  - turkey nest
  - spread bank
- banks.

# AHCSDP301A Undertake preparation of land for seed crop production

## Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

## Unit Descriptor

This Unit covers the process of preparing land for seed crop production and defines the standard required to: interpret production/planting plans; produce standards, quality specifications and work procedure documents; measure materials and site plan specifications; service, operate, adjust and calibrate cultivation equipment safely; and complete pre- and post-operational checks on tools, vehicles and equipment.

## Application of the Unit

This Unit applies to farm workers operating under limited supervision from others with checking only related to overall progress. Preparing land for seed crop production is usually done within established routines, methods and procedures. Some discretion and judgement are required in the selection of equipment and materials, organisation of work and services. The outcomes should be achieved within specified timelines.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Nil.

## Employability Skills Information

This Unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

Unit of Competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for cultivation	<p>1.1 Requirements for the work to be undertaken are interpreted from the planting plan and confirmed with the manager.</p> <p>1.2 The method and order of cultivation is identified and interpreted from the planting plan.</p> <p>1.3 Occupational Health and Safety (OHS) hazards are identified; risks assessed and suitable controls implemented.</p> <p>1.4 Suitable personal protective equipment is selected, used and maintained.</p> <p>1.5 Environmental implications of cultivating the site are identified, likely outcomes assessed and, if necessary, responsible action taken.</p>
2. Prepare the cultivating equipment	<p>2.1 Vehicles, machinery and equipment required for cultivation are cleaned and inspected according to organisation guidelines and certified seed production procedures.</p> <p>2.2 Vehicles and equipment are serviced, adjusted for the conditions and worn parts are replaced to ensure reliability during cultivation.</p> <p>2.3 All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and appropriately.</p> <p>2.4 All maintenance and servicing is documented according to the requirements of the organisation's record keeping system.</p>
3. Cultivate soil	<p>3.1 Previous <i>crop</i> or land clearance debris is removed, incorporated or burnt according to the organisation's guidelines.</p> <p>3.2 The cultivation plan is followed and completed for each paddock.</p> <p>3.3 OHS hazards are identified, risks assessed and suitable controls implemented.</p> <p>3.4 Suitable personal protective equipment (PPE) is selected, used and maintained.</p> <p>3.5 Vehicles and equipment are operated in a safe, effective and efficient manner and at speeds to suit the conditions.</p>

- 3.6 The quality of cultivation is maximised by continually checking and adjusting the vehicles and equipment as necessary.
- 3.7 All timelines, resource and quality requirements of the planting plan are met.
4. Prepare site for planting
  - 4.1 The planting layout and soil profiles are completed as required by the planting plan.
  - 4.2 Weed and pest control measures are taken as required by the planting plan.
  - 4.3 Fertilisers, ameliorants, and/or other pre-planting treatments are applied as required by the planting plan.
  - 4.4 The environmental implications of site preparation are identified, likely outcomes assessed and, if necessary, responsible action is taken.
5. Complete land preparation operations
  - 5.1 Equipment is cleaned according to manufacturer specifications, organisational procedures and regulations.
  - 5.2 Vehicles and equipment are cleaned and stored to minimise damage according to manufacturer specifications, organisational procedures and regulations.
  - 5.3 All containers, leftover fluids, waste and debris from the cleaning and maintenance work are disposed of safely and appropriately.
  - 5.4 All required *records* and documentation are completed accurately and promptly according to organisational requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

### Required skills include:

---

#### Ability to:

- interpret production/planting plans, produce standards, quality specifications and work procedure documents
- measure materials and site plan specifications
- operate, adjust and calibrate cultivation equipment safely
- complete pre- and post-operational checks on tools, vehicles and equipment
- perform routine safety, service and maintenance procedures on tools, cultivator and equipment
- read and interpret manufacturer specifications, work and maintenance plans, and material safety data sheets (MSDS)

- interpret and apply task instructions
- communicate with work team and supervisor
- record and report faults, workplace hazards and accidents
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge includes:

#### Knowledge of:

- methods of cultivating a range of soil types
- environmental issues of cultivating soil for planting, such as drainage and irrigation systems, soil amelioration and waste disposal procedures
- a range of pre-planting treatments, their purpose and method of application
- operation and maintenance of planting equipment
- OHS guidelines, procedures and principles, including manual handling and exposure to hazardous substances
- procedures and standards for certified seed.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• interpret production/planting plans, produce standards, quality specifications and work procedure documents</li> <li>• measure materials and site plan specifications</li> <li>• service, operate, adjust and calibrate cultivation equipment safely</li> <li>• complete pre- and post-operational checks on tools, vehicles and equipment.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

	enterprise circumstances.
Method of assessment	This Unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Crops</i></b> may include:	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• temperate pastures</li> <li>• tropical pastures</li> <li>• vegetables and other horticultural seed crops.</li> </ul>
<b><i>Records</i></b> may include:	<ul style="list-style-type: none"> <li>• sowing date</li> <li>• application rate</li> <li>• seed line number</li> <li>• bag tags.</li> </ul>

## Unit Sector(s)

Seed Production

## AHCSDP302A Establish seed crops

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the process of establishing seed crops and defines the standard required to: prepare and service machinery and equipment; carry out tillage and apply pre-planting treatments; carry out sowing operation and fertiliser application; monitoring the environmental impacts of establishing the crop; clean, secure and store machinery and equipment; and, keep records of the sowing operation.

### Application of the Unit

This Unit applies to workers on cropping enterprises and involves the application of some judgement and discretion. Work is likely to be carried out under minimal supervision within enterprise guidelines.

### Licensing/Regulatory Information

Not applicable

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare machinery and equipment for use
  - 1.1 Machinery and equipment are selected and confirmed against the work plan and prepared to manufacturer specifications.
  - 1.2 Equipment is securely attached and calibrated for operation to manufacturer specifications.
  - 1.3 Existing and potential Occupational Health and Safety (OHS) hazards in the workplace are identified, risks assessed and controlled in line with enterprise requirements.
2. Prepare for seed *crop* establishment
  - 2.1 Soil and weather conditions are monitored for optimal seeding conditions.
  - 2.2 Soil conservation and sustainable land management practices and procedures are recognised and confirmed according to enterprise requirements.
  - 2.3 Seeding, fertiliser, and pest and weed control requirements are confirmed against the work plan and prepared to seed certification specifications.
  - 2.4 Contingency plans are prepared for unusual seasonal conditions.
3. Sow the *crop*
  - 3.1 Suitable personal protective equipment (PPE) is selected, used and maintained according to OHS requirements.
  - 3.2 Seeding and fertiliser applications are carried out in line with the work plan.
  - 3.4 Pest and weed control treatment is coordinated with seeding and fertiliser applications as required.
  - 3.5 Environmental implications associated with sowing operations are identified, impacts assessed and procedures adopted in line with enterprise requirements.
4. Complete seeding operations
  - 4.1 Seeding, machinery and equipment operation records are maintained according to enterprise requirements.
  - 4.2 Machinery and equipment damage, malfunctions or irregular performance are reported in line with enterprise requirements.
  - 4.3 Machinery and equipment is cleaned, secured and stored in line with manufacturer specifications and seed certification requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- identify hazards and implement safe operating procedures
- sow seed and apply fertiliser at the required placement and rate
- identify types of weeds and insects harmful to crop establishment
- perform pre-operational and safety checks, servicing and maintenance on machinery and equipment
- calibrate, operate machinery and attach/detach equipment
- demonstrate emergency operating procedures in normal and adverse conditions
- recognise and report machinery damage, faults or malfunctions and perform minor repairs
- demonstrate safe, environmentally responsible and sustainable land management practices
- monitor and minimise impacts to the environment associated with sowing operations
- read and interpret manufacturer specifications, work and maintenance plans, and MSDS
- obtain relevant licences and permits
- clean, secure and store machinery and equipment
- interpret and apply task instructions
- communicate with work team and supervisor
- record and report equipment faults, workplace hazards and accidents
- assess and calculate the application of fertiliser/pesticide requirements and application rates
- calibrate equipment and calculate volumes, consumption and servicing requirements
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge includes:

---

### Knowledge of:

- seed crop types, preparation of seeds, seeding methods and application techniques
- fertiliser types, rates of application and crop nutrient requirements
- effects of weather conditions (normal and adverse) on seeding and fertilising applications
- operating principles and operating methods for machinery and equipment
- pre-operational and safety checks, servicing and maintenance procedures for seeding machinery and equipment
- principles of weight distribution with regard to load shifting and vehicle movement
- sustainable land management and soil conservation techniques
- positive environmental practices, negative environmental impacts and minimisation measures associated with seeding operations

- procedures for cleaning, securing and storing machinery, equipment and materials
- enterprise policies with regard to seeding operations, and recording and reporting routines
- relevant state/territory legislation, regulations and codes of practice with regard to workplace OHS and the use and control of hazardous substances
- PPE and when and how it should be used
- relevant state/territory legislation and regulations with regard to licensing requirements and the use and control of machinery and equipment.
- record keeping for certified seed.

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>

## Unit Sector(s)

Seed Production

## AHCSDP303A Maintain seed crops

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the process of maintaining seed crops and defines the standard required to: monitor crops for levels of pests and diseases and moisture; implement pest and disease control strategies; monitor the health and maturity of the crop.

### Application of the Unit

This Unit applies to workers on cropping enterprises who operate under limited supervision from others with checking only related to overall progress. It is usually done within established routines, methods and procedures where some discretion and judgment is required in the selection of equipment and materials, organisation of work, services, actions and the achievement of outcomes within time and budgetary constraints.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Assess seed *crop* condition, growth and requirements
  - 1.1 Crops are monitored to assess their needs, and observations are recorded and reported.
  - 1.2 Pests and diseases are identified, monitored and reported at nominated threshold levels.
  - 1.3 Sites for regular measurement of soil moisture are established in consultation with directions.
  - 1.4 Soil probe is used to measure moisture levels and soil water percentage calculated.
2. Apply fertiliser and amendments
  - 2.1 Occupational Health and Safety (OHS) hazards are identified; risks assessed and suitable controls are implemented.
  - 2.2 Suitable personal protective equipment is selected, used and maintained.
  - 2.3 Specialist sprays are applied according to label directions and industry standards for growth stages, taking into account specialist advice if required.
  - 2.4 Chipping or spot spraying is carried out as required.
  - 2.5 Crop growth stages are assessed, recorded and reported.
  - 2.6 Water is applied according to the identified need and the directions of management.
  - 2.7 All applications are undertaken in the full consideration of adverse environmental impacts.
3. Monitor crop condition, growth and requirements
  - 3.1 Crop maturity is monitored and the possible need for further applications is reported to the manager.
  - 3.2 The health of the crop is continually monitored and deviation from expected growth and vigour is reported as required.
  - 3.3 Observations of crop ripening are reported for the timing of harvest to be determined by contractors and property manager.
4. Complete cleaning and hygiene operations
  - 4.1 Equipment is cleaned in accordance with manufacturer's specifications, organisational procedures and certified seed procedures.
  - 4.2 All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and appropriately.
  - 4.3 All required records and documentation are completed accurately and promptly in accordance with organisational requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- detect differences and variations in crop growth
- report/communicate such differences to the supervisor/farm owner
- observe and report on health and growth of the crop
- monitor pests and disease in crops
- assess crop maturity
- apply sprays and fertilizers as directed
- measure soil moisture and relate data to crop requirements
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge includes:

---

### Knowledge of:

- appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
- potential hazards associated with the operation of basic tools and equipment
- general machine maintenance procedures
- machinery operating principles and safe operating methods
- environmental impacts associated with the operation of machinery and equipment in a harvesting context
- organisation recording and reporting procedures
- symptoms of crop lacking health and vigour
- signs of pest and disease infestation (such as bacterial wilt in lucerne), moisture stress and nutrient deficiencies
- hygiene requirements for agricultural crops and equipment that comes into contact with the crop
- types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical)

- OHS and pesticides legislative and enterprise requirements
- contractor machinery cleanliness.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• monitor crops for levels of pests and diseases and moisture</li> <li>• implement pest and disease control strategies</li> <li>• monitor the health and maturity of the crop.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be

included.	
<i>Crops</i> may include:	<ul style="list-style-type: none"><li>• wheat and coarse grains</li><li>• cotton</li><li>• grain legumes</li><li>• oilseeds</li><li>• sugar</li><li>• temperate pastures</li><li>• tropical pastures</li><li>• vegetables and other horticultural seed crops.</li></ul>

## Unit Sector(s)

Seed Production

## AHCSDP304A Harvest seed crops

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the process of harvesting seed crops and defines the standard required to: complete pre and post operational checks on tools, harvesting machinery and equipment; perform routine safety; service and maintenance procedures on tools, harvesting machinery and equipment; sample crops to assess moisture content and maturity/ripeness of the crop; handle and manoeuvre harvesting equipment; monitor efficiency of harvesting equipment and make adjustments to height and other settings and transport; clean and store harvesting equipment.

### Application of the Unit

This Unit applies to workers on cropping enterprises or in harvesting contract teams and requires the ability to work as part of a team following set routines, methods and procedures. Some discretion and judgment is required in the maintenance and operation of equipment and machinery. The outcomes must be achieved at a rate that maintains the progress of the harvesting operation.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the                      Performance criteria describe the performance needed to

essential outcomes of a Unit of Competency.

demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |   |
|---|---|
| 1. Prepare to <i>harvest seed crops</i> | <p>1.1 Requirements for the work to be undertaken, method and order of harvesting is interpreted from the harvest strategy and confirmed with the supervisor.</p> <p>1.2 Occupational Health and Safety (OHS) hazards are identified, risks assessed and risk controls are implemented for the harvesting operation.</p> <p>1.3 Personal protective equipment is selected, used and maintained.</p> <p>1.4 The environmental impacts of harvesting the crop are identified and action taken where required.</p> <p>1.5 Windrowing/swathing is completed to the standard required.</p> <p>1.6 Crop is sampled for moisture content to assess timing of harvest.</p> <p>1.7 The hygiene standards for the crop and the paddock are identified from the harvest strategy and/or the crop storage plan.</p> |
| 2. Prepare the harvesting equipment     | <p>2.1 <b><i>Harvesting machinery and other equipment</i></b> are cleaned of pests and other contaminants to maintain crop and paddock hygiene standards, as required by the harvest strategy.</p> <p>2.2 All machinery and equipment are serviced, assessed for reliability, adjusted for harvesting conditions and appropriate parts are replaced to ensure reliability during the harvest.</p> <p>2.3 All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and in line with environmental guidelines.</p> <p>2.4 All maintenance and servicing is documented according to the requirements of the organisation.</p>  |
| 3. Harvest crops                        | <p>3.1 The harvest strategy is followed and completed for each paddock.</p> <p>3.2 Personal protective equipment is selected, used and maintained for harvesting.</p> <p>3.3 Harvesting machinery and ancillary equipment is operated in a safe manner and at speeds to suit crop conditions.</p> <p>3.4 Cleanliness and purity of the harvested product is</p>   |

- maximised by maintaining the hygiene of all surfaces that come into contact with the crop.
- 3.5 The quality of product is optimised by continually checking and, where necessary, adjusting the harvester and ancillary equipment, including their height and other settings.
- 3.6 Fire prevention measures are taken as outlined and described in the harvest strategy.
4. Complete harvesting operations
- 4.1 Equipment is cleaned in accordance with manufacturer's specifications, organisational procedures and regulations.
- 4.2 Attachments and other ancillary equipment are cleaned and stored to minimise damage and to maximise hygiene according to manufacturer's specifications, organisational procedures and regulations.
- 4.3 Insecticides are applied as required by the organisation and the harvest strategy.
- 4.4 All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and according to environmental requirements.
- 4.5 Harvesting equipment is moved between sites and on public roads in compliance with legislation including hygiene requirements.
- 4.6 All required records and documentation are completed accurately and promptly in accordance with enterprise requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

**Ability to:**

- handle and manoeuvre harvesting equipment
- operate crop harvesting machinery and equipment
- implement procedures for seed handling and hygiene
- identify hazards and implement OHS procedures for all harvest tasks
- complete pre- and post-operational checks on tools, harvesting machinery and equipment
- perform routine, service and maintenance procedures on tools, harvesting machinery and equipment
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge includes:

---

**Knowledge of:**

- appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- potential hazards and safe operating procedures for basic tools and equipment
- safe operating procedures and standards for harvesting and ancillary equipment
- seed quality and the impact of harvesting practices (such as on lucerne seed)
- general machine maintenance procedures
- machinery operating principles and operating methods
- environmental impacts associated with the operation of machinery and equipment in a harvesting context
- organisation recording and reporting procedures
- pests and signs of pest infestation in the crop
- hygiene procedures for harvesting machinery and equipment
- organisation moisture and hygiene requirements for the crop and equipment that comes into contact with the crop such as bins, augers, trucks and harvesters
- requirements for harvesting machinery and equipment transport
- fire prevention strategies
- certified seed procedures.

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• complete pre and post operational checks on tools, harvesting machinery and equipment</li> <li>• perform routine safety, service and maintenance procedures on tools, harvesting machinery and equipment</li> <li>• sample crops to assess moisture content and maturity/ripeness of the crop</li> <li>• handle and manoeuvre harvesting equipment</li> <li>• monitor efficiency of harvesting equipment and make adjustments to height and other settings</li> <li>• transport, clean and store harvesting equipment.</li> </ul>
Context of and specific resources for assessment	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>
Method of assessment	<p>This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may

be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Harvested crops* may include:

- wheat and coarse grains
- cotton
- grain legumes
- oilseeds
- temperate pastures
- tropical pastures
- vegetables and other horticultural seed crops.

*Harvesting machinery and equipment* may include:

- clover harvesters
- harvesters
- field bins
- augers
- trucks.

## Unit Sector(s)

Seed Production

## AHCSDP401A Plan a seed crop establishment program

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the planning of a seed crop establishment program and defines the standard required to: assess site factors; select suitable pasture species and cultivars; identify threats to pasture establishment including weeds, pests and diseases; determine resources and equipment for planting and post-planting care; prepare pasture establishment plans to meet livestock production plans and schedules.

### Application of the Unit

This Unit applies to farm enterprise managers.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |  |
|---|--|
| 1. Determine requirements of the seed <i>crop</i> establishment program | <p>1.1 Paddock history is considered for suitability for a seed crop.</p> <p>1.2 Species and cultivars that meet production needs are identified and the required quantity calculated, costed and availability confirmed with suppliers.</p> <p>1.3 Crop establishment procedures are selected consistent with seasonal factors, site and soil characteristics, production plans and the resources and equipment available.</p> <p>1.4 Post-planting care is planned according to production needs, enterprise standards and site capabilities.</p> <p>1.5 Plant germination and nutrient requirements are identified and planned for, taking into account soil characteristics.</p> <p>1.6 Resources, tools, equipment and machinery required for planting and post-planting care are identified, costed and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>1.7 Occupational Health and Safety (OHS) hazards associated with the crop establishment program are identified; risks assessed and controls developed according to enterprise guidelines.</p> |
| 2. Prepare and document the seed crop establishment program             | <p>2.1 Detailed plans are prepared based on the requirements of the crop establishment program and production requirements.</p> <p>2.2 Plan is produced which can be readily interpreted and understood by on-site personnel according to enterprise standards.</p> <p>2.3 On-site procedures and schedules required for the planting of the site and post-planting care of seed crop are developed and communicated to staff.</p> <p>2.4 Contingencies are planned for and alternative strategies identified if applicable.</p>   |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

### Ability to:

- determine requirements of the seed crop establishment program
- research suitable seed crop species for the site and proposed land use
- prepare and document the seed crop establishment program
- develop strategies for weed, pest and disease control

- assess seed crop for production potential
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities
- select suitable seed
- identify ‘off types’
- read and understand a seed statement.

Required knowledge includes:

**Knowledge of:**

- seed crop varieties and their characteristics, requirements and production potential
- establishment techniques of specific seed crop species and cultivars
- the advantages and disadvantages of a range of seed crop establishment procedures
- maintenance requirements and practices for specific seed crop species and cultivars after initial establishment
- planning process, including costing and scheduling of works
- plant identification of seed crops and weed species
- role of crops in sustainable land use
- environmental impacts of seed crop establishment
- seed production contracts.

**Evidence Guide**

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this Unit</p>	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• assess site factors</li> </ul>

	<ul style="list-style-type: none"> <li>• select suitable pasture species and cultivars</li> <li>• identify threats to pasture establishment including weeds, pests and diseases</li> <li>• determine resources and equipment for planting and post-planting care</li> <li>• use livestock to meet pasture production plans and schedules.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Crops</i></b> may include:	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• temperate pastures</li> <li>• tropical pastures</li> <li>• vegetables and other horticultural seed crops.</li> </ul>
----------------------------------	---

## Unit Sector(s)

Seed Production

## AHCSDP402A Supervise seed crop establishment

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the supervision of seed crop establishment and defines the standard required to: identify the seasonal conditions which affect crop establishment; plan the planting operation including timing and resources required; carry out pest, weed and disease control either pre or post planting if required; supervise staff and monitor the planting operation; recognise poor growth and lack of vigour and investigate causes.

### Application of the Unit

This Unit applies to cropping managers and supervisors.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Source information for input to planting plan
  - 1.1 Documents within the organisation that detail the requirements of the production plan are identified and obtained.
  - 1.2 Information regarding activities that will be occurring at a similar time to planting is gathered through discussion with colleagues and management, and by reading the production/management plan.
  - 1.3 The specific target area, or paddock, for planting is identified from the production/management plan.
  - 1.4 Trash levels and seedbed conditions are assessed and accounted for in planning.
2. Prepare planting plan
  - 2.1 The seed *crop* and method of planting to be used are determined from the organisations production plan.
  - 2.2 The resources required for the planting operations are assessed and calculated from the area to be sown, the method of planting to be used, and the available timelines.
  - 2.3 The target dates are set for planting, including the sequencing for planting across paddocks or crop areas, in line with the overall production/management planning for the organisation.
  - 2.4 The chemical applications that are required prior to and post planting are selected and organised to occur at an appropriate time.
  - 2.5 The plan is prepared to ensure that any potential detrimental environmental impacts are minimised or eliminated, including the proper disposal of containers, drums and other waste.
  - 2.6 Occupational Health and Safety (OHS) hazards are identified, assessed, and safe work practices for planting are implemented and overseen with staff.
  - 2.7 Any approvals that are required for the planting operations are identified, sought and obtained.
  - 2.8 Measurable indicators, specifications and targets are determined, based on the production/management plan and the method, resources, and seed to be used.
3. Determine scheduling and key responsibilities
  - 3.1 Scheduling for planting is determined taking the range of geographic and resourcing factors into consideration, as well as operations that will be occurring at the same time as the planting.
  - 3.2 Key responsibilities for specific preparatory processes that are required before planting are determined.
  - 3.3 Key responsibilities for specific implementation processes are determined.

- 3.4 Recordkeeping requirements are determined and procedures are put in place to ensure compliance with the range of applicable regulations.
  - 3.5 The plan, including scheduling and key responsibilities, is clearly documented.
  - 3.6 The plan includes the type, format, frequency and detail of any reporting required by both managers and operators.
4. Monitor and adjust the planting plan
- 4.1 Monitoring points outlined in the implementation plan are adhered to.
  - 4.2 Checks are made to ensure that OHS procedures are being observed and followed.
  - 4.3 Checks are made to ensure that the site environmental requirements are being observed and followed.
  - 4.4 Operational staff and any contractors are communicated with regularly to ensure smooth operation and progress.
  - 4.5 Checks are made to ensure that the documentation required by the organisation, or other regulating bodies, is completed clearly and accurately during the progress of the planting process.
  - 4.6 Where any corrective action or amendment to the planting plan is required, the action is initiated and taken.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- identify hazards and oversee safe operating procedures
- identify the seasonal conditions which affect crop establishment
- plan and schedule planting including amending plans during the operations
- recognise poor growth and lack of vigour caused by nutrient deficiency and incorrect planting depth
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex

workplace measures and data

- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge includes:

**Knowledge of:**

- the equipment that is required for a range of tillage methods, and pest and weed control prior to planting
- crop establishment requirements
- equipment servicing requirements
- integrated pest and weed management techniques
- environmental controls and codes of practice applicable to the enterprise
- Legislation, codes of practice and enterprise procedures for OHS and environmental management
- management practices and processes to minimise environmental impacts such as noise, soil degradation and debris from planting operations
- Plant Breeder’s Rights and open market seed.

**Evidence Guide**

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this Unit</p>	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify the seasonal conditions which affect crop establishment</li> <li>• plan the planting operation including timing and resources required</li> <li>• carry out pest, weed and disease control either pre or post planting if required</li> <li>• supervise staff and monitor the planting operation.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>

Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

### Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Crops</i> may include:</p>	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• temperate pastures</li> <li>• tropical pastures</li> <li>• vegetables and other horticultural seed crops.</li> </ul>

### Unit Sector(s)

Seed Production

## AHCSDP403A Plan and implement seed crop maintenance

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the planning and implementation of seed crop maintenance and defines the standard required to: accurately assess crop needs; carry out crop cultural practices and treatments; monitor and assess crop maturity; ascertain water requirements from survey advice and weather forecasts; accurately measure soil moisture and interpret data; determine time of harvest with specialist advice.

### Application of the Unit

This Unit applies to farm supervisors and cropping managers who maintain the health of agricultural crops.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Determine condition of seed crops
  - 1.1 Measurement and assessment of soil moisture is undertaken to calculate soil water percentage.
  - 1.2 Water requirements are calculated according to soil analysis data, standing crop, and forecast weather conditions.
  - 1.3 Nutrient requirements and availability for crops are assessed and deficiencies identified.
  - 1.4 Factors affecting crop capacity are identified.
  - 1.5 Sustainable land management is implemented according to enterprise requirements and environmental standards.
2. Determine pest control
  - 2.1 Evidence of pests and disease is assessed and integrated control measures appropriate to type and species of infestation are determined.
  - 2.2 Areas of weed infestation, which may be reduced or eradicated, are located and species identified.
  - 2.3 Integrated control methods are selected to control pests and weeds.
  - 2.4 Control methods are scheduled at the optimum time with minimal damage to the crop.
  - 2.5 Severity of infestations and records of treatments are maintained to provide essential data for future management programs.
3. Manage *crop* health
  - 3.1 Crop is planned and monitored to maintain water and nutritional requirements for optimal production.
  - 3.2 Weed and pest levels are monitored and the control program modified as required.
  - 3.3 Benefits from soil and plant inputs and treatments are assessed and documented for analysis in future management programs.
  - 3.4 Cropping programs are monitored for efficiency and effectiveness, and documented for future best practice.
  - 3.5 Relevant data is documented for continual analysis and effective crop management.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

**Ability to:**

- refer to records of, and assess, soil health and nutrient status
- dispatch soil samples to laboratories
- carry out a soil health appraisal
- identify likely threats to crop from pests, weeds and diseases
- recognise damage to crop caused by weeds, pests or diseases
- recognise poor growth and lack of vigour in crop caused by nutrient deficiency
- record monitoring results
- plan and implement integrated control strategies to address nutrient deficiencies, disease outbreaks, pest and weed infestations
- accurately measure soil moisture and estimate irrigation needs if required
- apply pesticides or fertility treatments as required
- communicate with industry, suppliers and other personnel
- read and interpret Material Safety Data Sheets (MSDSs), production plans and analysis results
- estimate and measure pest control treatments
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge includes:

---

**Knowledge of:**

- crop growth stages and keys
- crop growth requirements compared to soil nutrient status
- fertiliser and soil ameliorant types and application times, methods and rates
- chemical use if applicable
- factors leading to development of chemical resistance
- integrated pest management strategies
- life-cycles of pest, diseases and weeds
- Occupational Health and Safety (OHS) legislative requirements
- relevant codes of practice with regard to the use and control of hazardous substances
- legislation and codes of practice with regard to environmental protection.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• accurately assess crop needs</li> <li>• carry out crop cultural practices and treatments</li> <li>• monitor and assess crop maturity</li> <li>• ascertain water requirements from survey advice and weather forecasts</li> <li>• accurately measure soil moisture and interpret data</li> <li>• determine time of harvest with specialist advice.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Crops*** may include:

- wheat and coarse grains
- cotton
- grain legumes
- oilseeds
- temperate pastures

	<ul style="list-style-type: none"><li>• tropical pastures</li><li>• vegetables and other horticultural seed crops.</li></ul>

## Unit Sector(s)

Seed Production

## AHCSDP404A Supervise seed crop harvesting

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the supervision of seed crop harvesting and defines the standard required to: establish strategies, procedures and controls for crop harvesting, including fire prevention and control plans; negotiate and arrange contracts and agreements; estimate crop yields; maintain budgetary controls; assess crop maturity and quality in readiness for harvesting; arrange storage and delivery requirements and segregate grain for quality and monitor for moisture content.

### Application of the Unit

This Unit applies to farm managers and harvest supervisors whose work is likely to be carried out under broad supervision.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare for harvesting
  - 1.1 *Crop* maturity and quality is assessed in readiness for harvesting.
  - 1.2 Pre-harvest treatments for the control and eradication of pests are determined and carried out according to Occupational Health and Safety (OHS) requirements.
  - 1.3 Requirements for licences or permits for transporting or moving machinery are identified and complied with.
  - 1.4 Insurance requirements are assessed and risk management strategies planned and implemented as required.
2. Determine harvest strategy
  - 2.1 Optimum timing to carry out harvest is estimated and calculated according to crop maturity assessment.
  - 2.2 Resource requirements are assessed giving consideration to the size of the crop and estimated timing of harvest.
  - 2.3 Labour and equipment required to carry out harvesting operations is confirmed and arranged within budgetary constraint.
  - 2.4 Requirements for fire prevention and control are identified and arranged according to OHS requirements.
3. Coordinate the harvest strategy
  - 3.1 Effective communication strategies are implemented to ensure smooth workflow operations and personnel safety.
  - 3.2 Harvesting operations are implemented and adjusted as required according to weather, equipment and staff requirements.
  - 3.3 Equipment operation is coordinated for maximum efficiency and monitored for performance effectiveness.
  - 3.4 Existing and potential hazards are identified and controlled according to OHS and enterprise requirements.
4. Complete harvest operation
  - 4.1 Storage resources are located for efficient operations and strategies for drying grain are identified, if necessary, according to marketing initiatives.
  - 4.2 Quality of grain is monitored for moisture content according to classification standards.
  - 4.3 Harvesting operations and outcomes are evaluated against harvest strategy.
  - 4.4 Relevant information is documented for continual analysis and effective planning management.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- organise and schedule the maintenance of plant and equipment
- establish strategies, procedures and controls for crop harvesting
- negotiate and arrange contracts and agreements
- implement safe workplace and positive environmental practices
- deal with weather and other contingencies
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected, and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge includes:

---

### Knowledge of:

- crop maturity and yield potential
- grain or seed quality
- functions and limitations of harvesting equipment
- crop measurement techniques and parameters
- market information and sources
- location and relative skills and abilities of available contractors
- weather conditions which may affect the harvest
- relevant legislation, codes of practice and enterprise requirements for OHS, contractor engagement, environment and pesticides
- environmental controls and codes of practice applicable to harvesting operations
- supervisor responsibilities in managing the safety of a workplace
- hygiene requirements for certified seed.

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment</p>
--

Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• establish strategies, procedures and controls for crop harvesting, including fire prevention and control plans</li> <li>• negotiate and arrange contracts and agreements</li> <li>• estimate crop yields</li> <li>• maintain budgetary controls</li> <li>• assess crop maturity and quality in readiness for harvesting</li> <li>• arrange storage and delivery requirements</li> <li>• segregate grain for quality and monitor for moisture content.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Crops</i> may include:	<ul style="list-style-type: none"><li>• wheat and coarse grains</li><li>• cotton</li><li>• grain legumes</li><li>• oilseeds</li><li>• temperate pastures</li><li>• tropical pastures</li><li>• vegetables and other horticultural seed crops.</li></ul>
---------------------------	---

## Unit Sector(s)

Seed Production

## AHCSDP405A Inspect a seed crop for quality assurance purposes

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the skills and knowledge required to undertake a field inspection and prepare a report on crop for commercial seed production.

### Application of the Unit

This Unit applies to commercial seed crop field inspectors who undertake crop inspection activities and produce reports for the purpose of describing the quality and suitability of that crop for commercial seed production.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for field inspection	<p>1.1 Inspection date according to suitable crop growth stage and related activities is established.</p> <p>1.2 A suitable time for crop inspection is arranged with grower.</p> <p>1.3 Vehicle, machinery, equipment and recording materials are checked and prepared prior to undertaking crop inspection.</p> <p>1.4 Paddock history and crop type is researched prior to inspection.</p>
2. Undertake a visual analysis of a commercial seed crop	<p>2.1 Weed species are visually identified, and weed counts or density are recorded.</p> <p>2.2 Insect/disease damage is visually inspected and recorded.</p> <p>2.3 Varietal identity of crop is visually inspected and recorded.</p> <p>2.4 Varietal purity of crop (presence of off-types) is visually inspected and recorded.</p> <p>2.5 Quadrat or rule is used to count crop plants to estimate yield.</p>
3. Complete an inspection report	<p>3.1 Results of visual inspection are documented and analysed.</p> <p>3.2 A determination is made on the quality and suitability of the crop for commercial and/or regulatory production.</p> <p>3.3 Determination is recorded in a crop inspection report and is forwarded to relevant parties.</p>
4. Complete decontamination procedure prior to leaving site	<p>4.1 Vehicles, machinery and equipment are checked and cleaned of seeds, soil and other contaminants.</p> <p>4.2 Clothing and footwear is checked and cleaned of seeds, soil and other contaminants.</p> <p>4.3 Contaminants and other foreign materials are handled and disposed appropriately.</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

### Required skills include:

#### Ability to:

- visually analyse a crop
- identify available processes of literature searches, internet browsing, personal consultation with experts, specimen collections, field guides, workplace notes, and use of keys and charts to aid identification

- identify a range of commercial seed crops including morphology of plants grown for commercial seed, crop registration history and crop density
- measure crop density
- determine varietal purity (identifying off-types) including testing for and follow up audits
- identify weeds
- use research skills.

**Required knowledge includes:**

**Knowledge of:**

- requirements of Australian Quarantine Inspection service (AQIS) and AQIS Authorised Officers (AAO) phytosanitary reports
- hygiene requirements for crop inspectors
- plant breeders’ rights
- concepts of disease pressure
- concepts of pest pressure
- field inspectors reports
- crop sampling techniques and use of quadrats
- crop/seed certification systems for example Organisation for Economic Co-operation and Development (OECD), Australian Seed Authority (ASA)
- relevant health, safety and environment requirements.

**Evidence Guide**

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this Unit</p>	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• classification of seed to species and/or variety level</li> <li>• use of taxonomic terms to describe seed</li> <li>• updating of seed reference collection</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the</p>

	<p>regional or enterprise circumstances.</p>
<p>Method of assessment</p>	<ul style="list-style-type: none"> <li>• Assessment methods must satisfy the endorsed Assessment Guidelines of the AHC10 Training Package and can be assessed holistically with other Units.</li> <li>• Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge.</li> <li>• Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills.</li> <li>• Assessment methods must confirm the ability to access, interpret and apply the required knowledge.</li> <li>• Assessment may be applied under project-related conditions (real or simulated) and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• Assessment may be in conjunction with assessment of other Units of Competency.</li> <li>• The assessment environment should not disadvantage the candidate.</li> <li>• Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English.</li> <li>• Where the participant has a disability, reasonable adjustment may be applied during assessment.</li> <li>• Language and literacy demands of the assessment task should not be higher than those of the work role</li> </ul>
<p>Guidance information for assessment</p>	<p>To ensure consistency in performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Seed characteristics may include:	Trueness to type, varietal purity, morphology.
Machinery and equipment may include:	Vehicles, motor bikes, quadrats, metre rule.
Checking and preparation for inspection may include:	Cleaning and appropriate disposal of contaminants and other foreign materials.
Crops may include:	Grass, legume, oilseed and horticultural crops grown for resale as commercial seed.

## Unit Sector(s)

Seed Production

## AHCSDT301A Prepare a working sample

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the process of obtaining a working sample from a seed sample submitted for testing.

### Application of the Unit

This Unit applies to seed analysts working independently within enterprise guidelines. In general, they prepare samples for testing; conduct specified tests in accordance with enterprise requirements; maintain records and interpret results; and troubleshoot equipment problems.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |                                       |   |
|---------------------------------------|---|
| 1. Receive submitted sample           | <p>1.1 Submitted sample is received and verified with submitted documentation according to enterprise guidelines.</p> <p>1.2 Supervisor is notified if type, condition or quantity of sample is unsatisfactory.</p> <p>1.3 Required paperwork is checked and labelling and data entry is completed.</p> <p>1.4 Submitted sample is prepared for testing as soon as practicable.</p> <p>1.5 Submitted sample is handled and, if necessary, stored under optimum species specific conditions.</p> |
| 2. Reduce sample                      | <p>2.1 Working area and equipment are checked for cleanliness.</p> <p>2.2 Submitted sample is reduced to equal or greater than the size required for working sample.</p> <p>2.3 <i>Sample reduction</i> is undertaken using prescribed apparatus and methods.</p> <p>2.4 <i>Mechanical dividers</i> are used where appropriate.</p> <p>2.5 Working sample is presented for testing.</p> <p>2.6 Labelling and records are completed.</p>   |
| 3. Store working sample after testing | <p>3.1 Records and labels for tested samples are checked and verified before storing.</p> <p>3.2 Samples where live insects have been detected are handled according to enterprise guidelines before storage.</p> <p>3.3 Samples are stored after testing in environmental conditions that minimise changes in seed quality traits.</p>   |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

### Ability to:

- interpret enterprise procedures accurately
- check and prepare records and labels accurately and legibly
- prepare working samples within required timeline without sacrificing safety, accuracy or quality
- maintain security, integrity and traceability of all samples, data/results and documentation
- recognition of different types of seeds including treated and coated seeds

- clean and maintain equipment.

Required knowledge includes:

**Knowledge of:**

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- procedures for obtaining working samples for different tests
- seed handling and storage
- sample reduction methods and apparatus
- mechanical dividers and their applications
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• receiving submitted samples</li> <li>• reducing samples</li> <li>• storing of submitted and working samples after testing.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where

	possible, over a number of assessment activities.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• prepare replicates from working sample</li> <li>• assess seedlings using ultra violet light</li> <li>• counting and recording of results.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be

included.	
<i>Seed</i> may include:	bare seed; treated seed; and coated seed that has been prepared as required.

## Unit Sector(s)

Seed Testing

## AHCSDT304A Perform a seed purity analysis

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers testing the analytical purity of seed in a working sample to infer the composition of a seed lot. It also involves recognition of different species of seeds and inert particles that make up the sample.

### Application of the Unit

This Unit applies to seed analysts working independently within enterprise guidelines. In general, they prepare samples for testing; conduct specified tests in accordance with enterprise requirements; maintain records and interpret results; and troubleshoot equipment problems.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare for a purity test
  - 1.1 Samples, test methods and equipment to perform the test are identified.
  - 1.2 **Equipment** and working spaces are cleaned and calibrated to enterprise standards.
  - 1.3 A working sample is prepared using mixing and dividing processes according to enterprise guidelines.
  - 1.4 Sample details are checked and correctly recorded on worksheets and sample packets according to enterprise requirements.
2. Assess working sample/s
  - 2.1 The working sample is separated into its component parts using appropriate equipment.
  - 2.2 Pure **Seed** is separated using visual characteristics, mechanical or pressure aids appropriate to the type of seed and enterprise guidelines.
  - 2.3 Seeds are handled carefully so as not to impair their capacity for germination.
  - 2.4 Separated component parts and matter are weighed to the number of decimal places as required by enterprise guidelines.
  - 2.5 Contaminant seeds are identified.
3. Process and interpret data
  - 3.1 Weights of all components parts are added and compared with original weight of the working sample.
  - 3.2 A retest is carried out if required.
  - 3.3 Seeds of species that cannot be identified are referred to a supervisor.
  - 3.4 The percentage weight of various component parts is calculated to one decimal place.
  - 3.5 Percentages of all fractions are added together and rounded to 100% as required by enterprise guidelines.
  - 3.6 Results of test are reported according to enterprise guidelines.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- prepare working samples

- use mixing and dividing equipment
- separate component parts of a working sample using visual, mechanical or pressure techniques
- assess pure seed from damaged seed
- identify pure seed, other seed species and inert materials
- weigh and calculate percentages of component parts
- carryout rounding procedure with calculations
- record and communicate results in accordance with enterprise procedures
- maintain security, integrity, traceability of samples, sub-samples, test data, results and documentation.

Required knowledge includes:

**Knowledge of:**

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- seed biology
- seed identification
- materials and apparatus used in seed purity tests
- enterprise standard operating procedures (SOPs)
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements.

**Evidence Guide**

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this Unit</p>	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• preparation of a working sample</li> <li>• separation of a working sample into component parts</li> <li>• reporting of percentages of component parts</li> <li>• rounding of calculations to enterprise requirements.</li> </ul>

Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b><i>Equipment</i></b> for separating a working sample may include:	<ul style="list-style-type: none"> <li>• magnifiers; reflected light; sieves; blowers; and diaphanoscopes.</li> </ul>
<b><i>Seed</i></b> may include:	<ul style="list-style-type: none"> <li>• bare seed; treated seed; and coated seed that has been prepared as required.</li> </ul>
Inert matter may include:	<ul style="list-style-type: none"> <li>• seed units where no true seed is present; broken or damaged seed 50% or less of their original size; other matter as prescribed in the International Rules for Seed Testing.</li> </ul>

## Unit Sector(s)

Seed Testing

## AHCSDT305A Perform a seed moisture test

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the determination of the moisture content of seeds by an oven method for routine use.

### Application of the Unit

This Unit applies to seed analysts working independently or under limited supervision, within enterprise guidelines. In general, they prepare samples for testing; conduct specified tests in accordance with enterprise requirements; maintain records and interpret results; and troubleshoot equipment problems.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare for testing
  - 1.1 Submitted sample is checked to ensure it is in an intact, moisture-proof container with as much air as possible excluded.
  - 1.2 *Appropriate apparatus* are selected for seed moisture testing.
  - 1.3 Temperature of submitted sample in container is equilibrated to that of the testing laboratory.
  - 1.4 Exposure of sample to the atmosphere of the laboratory is reduced to an absolute minimum according to the species and ISTA requirements.
2. Prepare samples for drying
  - 2.1 Submitted sample is thoroughly mixed.
  - 2.2 A minimum three subsamples are taken and combined to form a working sample of the required size.
  - 2.3 Exposure to air during sample reduction is limited to thirty seconds.
  - 2.4 Where cutting or grinding is required, one working sample is prepared so that two replicates can be drawn from the cut/ground material.
  - 2.5 Pre-drying is carried out where moisture content exceeds ISTA requirements.
  - 2.6 Containers and lids are weighed before and after filling.
  - 2.7 Weighing procedures conform with ISTA requirements and weight is expressed in grams to at least three decimal places.
  - 2.8 Lids are kept on containers until samples are placed in oven.
3. Dry and weigh sample
  - 3.1 Working sample is evenly distributed over surface of the container.
  - 3.2 Open containers and their lids are placed rapidly into an oven that is maintained at the required temperature for the species being tested.
  - 3.3 Drying period commences once oven returns to the required temperature after placement of containers.
  - 3.4 At the end of prescribed drying period, containers have their lids replaced before cooling to ambient temperature in desiccators.
  - 3.5 After cooling, the containers with lids and dried contents are weighed.
4. Calculate results
  - 4.1 Moisture content is expressed as a percentage of the weight of the original sample.
  - 4.2 Result of test is reported according to enterprise guidelines.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

### Ability to:

- prepare working samples to ISTA rules
- weigh containers and seed samples
- calculate weights and percentages
- cut and grind seeds
- report results.

Required knowledge includes:

### Knowledge of:

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- apparatus used in seed moisture testing
- enterprise and/or legal traceability requirements
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• preparing working samples</li> <li>• weighing containers and seed samples</li> <li>• calculating weights and percentages</li> <li>• cutting and grinding seeds</li> <li>• calculating and reporting results.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Appropriate apparatus</i></b> may include:	Grinding mill; electrically heated oven; containers with lids; a dessicator; a balance; sieves; and cutting tools.

## Unit Sector(s)

Seed Testing

## AHCSDT306A Perform a seed germination test

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the process of performing testing the germination potential of a seed sample under laboratory conditions.

### Application of the Unit

This Unit applies to seed analysts working independently within enterprise guidelines. In general, they prepare samples for testing; conduct specified tests in accordance with enterprise requirements; maintain records and interpret results; and troubleshoot equipment problems.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Interpret and schedule test requirements
  - 1.1 Seeds to be germinated, test methods and equipment are identified.
  - 1.2 Hazards and enterprise control measures associated with the sample, seed pre-treatment, test methods, reagents and/or equipment are recognised.
  - 1.3 Work sequences are planned.
2. Prepare materials for test
  - 2.1 Prescribed number of replicates are drawn.
  - 2.2 **Growing media** is selected and prepared.
  - 2.3 Seed is **pre-treated** to break physiological dormancy where necessary.
  - 2.4 Water quality and pH is checked to ensure within required tolerances.
  - 2.5 Apparatus and/or equipment for germinating seeds is checked and prepared for the test.
3. Plant and maintain seeds
  - 3.1 Seed is planted on or into selected media according to enterprise guidelines.
  - 3.2 Temperature and light conditions of germination apparatus are monitored in accordance with test procedures.
4. Evaluate test results
  - 4.1 Seedlings are categorised and counted as **normal** or **abnormal**.
  - 4.2 **Un-germinated seed** is assessed as hard, fresh or dead.
  - 4.3 Other determinations for un-germinated seed are assessed if required.
  - 4.4 Results are recorded and reported in accordance with enterprise guidelines.
5. Maintain a safe work environment
  - 5.1 Safe work practices and personal protective equipment are used.
  - 5.2 Wastes and environmental impacts are minimised.
  - 5.3 Laboratory and hazardous waste are safely collected and disposed of.
  - 5.4 Equipment and reagents are cleaned and stored.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- prepare growing media
- pre-treat seed to break dormancy
- plant and maintain seeds in a controlled environment
- assess seed germination
- record and report results
- maintain a safe work environment
- maintain security, integrity, traceability of samples, sub-samples, test data, results and documentation.

Required knowledge includes:

**Knowledge of:**

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- assessment of germination and determining need for retesting
- seed biology
- enterprise standard operating procedures (SOPs)
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements
- calculations, tolerances and rounding results.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• prepare growing media</li> <li>• assess seed germination</li> <li>• recording and reporting of results.</li> </ul>
Context of and specific resources for	Competency requires the application of work practices under work conditions. Selection and use of resources

assessment	for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Growing media</i></b> may include:	paper substrates; sand; or organic growing media.
<b><i>Pre-treatment of seeds</i></b> may include:	Pre-chilling; preheating; pre-storage; light; gibberellic acid; potassium nitrate; acid scarification; or mechanical scarification.
<b><i>Normal seedlings</i></b> may include:	intact seedlings; seedlings with slight defects; or seedlings with secondary infection as applicable to the species being tested.
<b><i>Abnormal seedlings</i></b> may include:	damaged; deformed or unbalanced; or decayed seedlings as applicable to the species being tested.
<b><i>Un-germinated seeds</i></b> may include:	hard; fresh; dead; or other categories of seed.

## Unit Sector(s)

Seed Testing

## AHCSDT307A Perform a 'Determination of Other Seeds by Number' test

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the estimation of the number of seeds of other species either generally (e.g. all other species) or by reference to one category or species of seed.

### Application of the Unit

This Unit applies to seed analysts working independently or under limited supervision, within enterprise guidelines. In general, they prepare samples for testing; conduct specified tests in accordance with enterprise requirements; maintain records and interpret results; and troubleshoot equipment problems.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare a working sample
  - 1.1 Seed to be tested is identified and records completed.
  - 1.2 Working sample is prepared from submitted sample.
  - 1.3 Size of working sample conforms with that prescribed under ISTA rules.
  - 1.4 The *extent of determination of other species* is selected based on client requirements, seed quantity or seed characteristics.
2. Examine seeds in working sample
  - 2.1 Working sample is searched for seeds of all other species or of certain stated species as required.
  - 2.2 Number of seeds found for each species is counted.
3. Calculate results
  - 3.1 Result is expressed as the number of seeds belonging to each stated species or category found in the quantity examined.
  - 3.2 Number of seeds per unit weight is calculated.
  - 3.3 Where two or more tests are carried out, result is expressed as total number of seeds found in total weight examined.
  - 3.4 Comparison of result is made with other determinations in the same or in a different laboratory.
4. Report results
  - 4.1 Result is reported under 'Other determinations'.
  - 4.2 Actual weight of seed examined is recorded.
  - 4.3 The scientific name and number of seeds of each species sought and found in the actual weight of seed examined.
  - 4.4 Extent of determination of other species of seed is recorded.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- prepare a working sample to ISTA rules
- identify a range of species
- examine and count seeds
- calculate weights and percentages
- report results.

Required knowledge includes:

**Knowledge of:**

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- seed biology
- seed identification
- enterprise and/or legal traceability requirements
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• prepare a working sample</li> <li>• examine seeds in working sample</li> <li>• calculate results</li> <li>• report results.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Extent of determination of other species*** may include:

"complete test" if full prescribed weight of seed is tested for all other species; "limited test" if test was for a limited range of other species; "reduced test" if weight tested was less than prescribed weight; "reduced-limited test" where weight was under prescribed weight and a limited number of species was examined; "test based on 25,000 seeds" where a sample of 25,000 seeds was examined and this sample was below the prescribed weight.

## Unit Sector(s)

Seed Testing

## AHCSDT401A Maintain a quarantine approved laboratory

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the maintenance and monitoring of a quarantine approved laboratory to meet Australian Quarantine Inspection Services (AQIS) certification.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |  |  |
|--|--|
| 1. Interpret and communicate quarantine requirements | <ul style="list-style-type: none"> <li>1.1 Knowledge of <i>quarantine requirements</i> impacting on laboratory is maintained.</li> <li>1.2 Clear information is distributed on the responsibilities of individuals to maintain the laboratory's quarantine compliance.</li> <li>1.3 The implications of non-compliance are explained to all personnel within the laboratory.</li> </ul>  |
| 2. Ensure that work practices are compliant          | <ul style="list-style-type: none"> <li>2.1 Work practices are planned to ensure compliance.</li> <li>2.2 Testing procedures are implemented so that methods and <i>equipment</i> are fit for purpose.</li> <li>2.3 Systems to ensure the accuracy and/or efficiency of equipment are implemented.</li> <li>2.4 Team members are coached and mentored to manage their responsibilities.</li> </ul>  |
| 3. Monitor, analyse, adjust and report performance   | <ul style="list-style-type: none"> <li>3.1 Actual and potential problems with quarantine compliance are identified, rectified and reported promptly.</li> <li>3.2 Potential non-compliance is minimised through on-going analysis and supervision activities.</li> <li>3.3 Strategies to improve compliance are advised to laboratory personnel.</li> <li>3.4 New and improved procedures are communicated to laboratory personnel.</li> <li>3.5 Systems, records and reporting procedures are maintained according to AQIS requirements.</li> </ul> |
| 4. Investigate, rectify and report non-conformance   | <ul style="list-style-type: none"> <li>4.1 Incidents and occurrences of non-compliance are investigated and dealt with.</li> <li>4.2 On and/or off job training is provided for laboratory personnel to acquire and apply competencies to meet compliance.</li> <li>4.3 Workplace practices are re-designed or adjusted to ensure that non-compliance is not repeated.</li> </ul>  |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- monitor and analyse laboratory practices to ensure AQIS compliance
- initiate appropriate action to rectify potential problems or instances of non-compliance
- provide information to laboratory staff on AQIS compliance
- negotiate changes to work processes and procedures to meet AQIS compliance
- provide coaching and mentoring support to laboratory personnel to change work practices
- keep required records complete, current and secure as required by AQIS

Required knowledge includes:

**Knowledge of:**

- AQIS requirements for a quarantine approved laboratory
- compliant laboratory systems, records and reporting procedures
- enterprise standard operating procedures (SOPs)
- training and mentoring strategies
- statutory and legal compliance requirements
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<ul style="list-style-type: none"> <li>• maintain laboratory operations to meet AQIS requirements for a quarantine approved laboratory</li> <li>• monitor and analyse work practices to ensure compliance</li> <li>• negotiate changes to work processes and procedures</li> <li>• provide coaching and mentoring support to personnel</li> <li>• keep required records.</li> </ul>
Context of and specific resources for assessment	This Unit of competency should be assessed in a laboratory environment that is accredited by either ISTA or NATA, as appropriate.

Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• observation of the candidate's interactions with and instruction of, laboratory personnel</li> <li>• review of verified records and reports generated by the candidate</li> <li>• feedback from managers regarding the candidate's ability to implement relevant enterprise procedures</li> <li>• review of information developed by the candidate and provided to the workgroup</li> <li>• This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.</li> </ul>
Guidance information for assessment	<p>To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Quarantine requirements</i></b> may include:	hygiene; isolation; signage; record-keeping; waste disposal; security; calibration, certification and efficacy of equipment; and operational procedures.
<b><i>Equipment</i></b> may include:	balances; scales; sterilisers; refrigerators; freezers; and storage cabinets.

## Unit Sector(s)

Seed Testing

## AHCSDT402A Prepare and maintain a seed reference collection

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the preparation and maintenance of a seed reference collection that can be used in the identification of seeds and which enables the quality control of laboratory procedures. This Unit does not include the botanical identification of seeds.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Acquire responsibility for a seed reference collection
  - 1.1 Standard operating procedures for maintaining a seed reference collection are reviewed.
  - 1.2 Existing seed reference materials are checked to ensure labels and records are up to date.
  - 1.3 Seed collection complies with *industry protocols*.
  - 1.4 Procedures for introducing new seeds to the collection are confirmed.
  - 1.5 Record keeping and staff access arrangements are established.
2. Maintain a seed reference collection
  - 2.1 Storage conditions are reviewed to ensure that they comply with SOPs.
  - 2.2 Storage conditions are monitored to ensure seeds remain in good condition.
  - 2.3 Collection and records are updated as new seeds are added.
  - 2.4 Indicators of deterioration of seed in collection are advised to management.
3. Update the reference collection
  - 3.1 Information about seed is documented and added to the reference collection.
  - 3.2 Reference collection is updated as new seeds are identified according to enterprise guidelines.
  - 3.3 New materials are sourced as required to maintain currency and relevance of the collection.
4. Provide seed reference materials on request
  - 4.1 Seed reference material is provided, in accordance with enterprise policy, with action taken to prevent contamination.
  - 4.2 External requests for access to the seed reference collection are verified and approved by manager before being processed.
  - 4.3 Records of access to collection and removal of seeds from collection are maintained.
5. Maintain a safe work environment
  - 5.1 Safety and biosecurity protocols are observed when handling and processing seed reference materials.
  - 5.2 Redundant, diseased and outdated seed is disposed of safely and appropriately.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

### Ability to:

- maintain seed specimens so that the reference characteristics and attributes are stable in storage and retrieval
- keep and update records
- communicate appropriately with management, staff and external parties.

Required knowledge includes:

### Knowledge of:

- seed reference collections - what they are, when and why they should be used
- storage requirements of different seed varieties
- quarantine and isolation procedures
- taxonomic nomenclature
- seed biology
- enterprise Standard Operating Procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• maintain and update a seed collection</li> <li>• source new materials</li> <li>• keep records</li> <li>• communicate with others.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

	enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Industry protocols</i></b> may include:	ISTA's "Universal List of Species"; laboratory's scope of accreditation.
---	--

## Unit Sector(s)

Seed Testing

## AHCSDT403A Perform an Anguina test on annual ryegrass seed

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers testing seed of annual ryegrass for the presence of Nematode Gall (*Anguina tenuis*).

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare for *Anguina* testing
  - 1.1 Test request is reviewed to identify samples to be tested, required test methods, equipment, and staff to be involved in the test.
  - 1.2 Equipment and working space are cleaned and calibrated.
  - 1.3 The working sample or sub-samples are prepared using mixing and dividing processes.
  - 1.4 Sample details are correctly recorded on worksheets and sample packets.
2. Inspect seed samples
  - 2.1 A prescribed sample of ryegrass seed is prepared and inspected on a diaphanoscope for the presence of ***galls***.
  - 2.2 Any galls present, are separated into yellow and black galls, counted and reported separately.
  - 2.3 If galls are not present, then further samples of six grams (6gms) are inspected to a total of sixty grams (60gms) of seed.
3. Examine galls
  - 3.1 Galls are soaked in water for prescribed period.
  - 3.2 Galls are dissected and examined under a microscope for the presence of nematodes.
  - 3.3 The presence of nematodes is recorded.
4. Report results
  - 4.1 Testing procedures carried out by analysts are reviewed.
  - 4.2 Where no galls are found on the sixty grams (60gms) of seed, a report of no galls found is issued.
  - 4.3 Where galls have been detected containing nematodes, these are reported as number of galls per sample weight.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

### Required skills include:

---

#### Ability to:

- plan work sequences
- inspect seed using a diaphanoscope
- dissect galls and using a microscope
- identify nematodes

- record and reporting of results of tests
- follow enterprise guidelines and standard operating procedures.

### Required knowledge includes:

#### Knowledge of:

- seed biology
- basic identification of nematodes
- recording and reporting protocols
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and delegate testing tasks</li> <li>• inspect seed samples using a diaphanoscope</li> <li>• identify galls on ryegrass seed</li> <li>• use a microscope to detect nematodes.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

***Galls*** may include:

black and yellow galls.

## Unit Sector(s)

Seed Testing

# AHCSDT404A Develop and implement laboratory policy and procedures

## Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

## Unit Descriptor

This competency covers the outcomes required to develop and implement workplace policies and procedures in a seed testing laboratory including the modification of the policy to suit changed circumstances.

## Application of the Unit

This Unit applies to supervising analysts or managers of seed testing laboratories. In general, they manage personnel; monitor business performance and budgets; manage OHS processes; plan and monitor QA programs and maintain registration and statutory and legal compliances; develop and maintain laboratory documentation; and prepare for internal and external audits.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Nil.

## Employability Skills Information

This Unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Develop workplace *policy and procedures*
  - 1.1 Scope of policy and procedures is defined.
  - 1.2 Stakeholders are identified and consulted as a key component of the development process.
  - 1.3 Operational strategies relevant to all stages of work covered by the policy are reviewed.
  - 1.4 Recommendations for policy and procedures options based on likely effectiveness, timeframes and cost are proposed.
  - 1.5 The organisation's purpose and operational goals are reflected in the policy and procedures.
  - 1.6 *Implementation strategy* is agreed.
2. Communicate the policy
  - 2.1 The policy and procedures and the expected outcome are promoted to key stakeholders.
  - 2.2 The expected outcomes, activities to be undertaken and responsibilities are assigned and those involved in implementing the policy and procedures are informed.
3. Implement the policy
  - 3.1 Processes to help implement the policy and procedures are developed and communicated.
  - 3.2 Record system for tracking adoption of policy and procedures is established.
4. Review policy implementation
  - 4.1 Outcomes and feedback are provided to key personnel and stakeholders.
  - 4.2 Issues and non-conformances that may require remedial action are identified.
  - 4.3 Success or otherwise of policy and procedures is investigated.
  - 4.4 Policy and/or procedures are modified as required.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills includes:

---

### Ability to:

- develop and implement policies and procedures

- interpret business/strategic plans
- evaluate complex and formal documents such as policy, legislation and seed testing protocols
- research, analysing and presenting information
- prepare written reports
- communicate with a range of different workplace personnel
- deal with different points of view and dissenting stakeholders.

Required knowledge includes:

#### Knowledge of:

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- relevant policy and procedure development and implementation processes
- legislation, protocols and rules impacting on the laboratory workplace
- enterprise standard operating procedures (SOPs)
- equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy/s being developed.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<ul style="list-style-type: none"> <li>• develop workplace policy and procedures</li> <li>• prepare strategies for communicating and implementing policy and procedures</li> <li>• monitor and analyse effectiveness of policy and procedures.</li> </ul>
Context of and specific resources for assessment	This Unit of Competency should be assessed in a laboratory environment that is accredited by either ISTA or NATA, as appropriate.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• observation of the candidate's interactions with and instruction of, personnel</li> <li>• review of verified records and reports generated by the candidate</li> <li>• feedback from managers regarding the candidate's ability to implement relevant enterprise procedures</li> </ul>

	<ul style="list-style-type: none"> <li>review of information developed by the candidate and provided to the workgroup.</li> </ul>
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Policy and procedures</i></b> may include:	workplace operations; work instructions; temporary instructions; and compliance with industry and government codes and standards.
<b><i>Stakeholders</i></b> may include:	employees at all levels of the organisation; certifying agencies; customers; suppliers; regulators; other organisations.
<b><i>Implementation strategies</i></b> may include:	<ul style="list-style-type: none"> <li>awareness raising among stakeholders.</li> <li>training of staff in new/altered procedures</li> <li>marketing and promotional activities.</li> </ul>

## Unit Sector(s)

Seed Testing

## AHCSDT405A Handle & store quarantinable seeds

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the storage and handling of seeds subject to quarantine or isolation in accordance with laboratory procedures, and in compliance with AQIS or other regulatory requirements.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

Store quarantinable seeds                 | 2.1 AQIS and laboratory <i>requirements for storage facilities</i> and associated document processes are identified.<br>2.2 Quarantinable seeds are stored in accordance with AQIS requirements and documented procedures.<br>2.3 Stored quarantinable seed is secured to prevent unauthorised access.  |
| 3. Report non-compliance                     | 3.1 Incidents and occurrences of non-compliance with storage or handling of quarantinable seeds are reported to management.<br>3.2 Supervision and training is provided for laboratory personnel to meet compliance.<br>3.3 Workplace practices are re-designed or adjusted to prevent repetition of non-compliance.  |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- comply with AQIS and laboratory requirements when dealing with quarantinable seeds
- take appropriate action to rectify potential problems or instances of non-compliance
- provide information to laboratory staff on AQIS compliance
- suggest changes to laboratory procedures to meet AQIS compliance
- provide training and support to laboratory personnel to change work practices
- keep required records complete, current and secure as required by AQIS.

Required knowledge includes:

**Knowledge fo:**

- AQIS requirements required for handling and storing quarantinable seeds
- laboratory systems, records and reporting procedures for dealing with quarantinable seeds
- statutory and legal compliance requirements
- relevant health, safety and environment requirements.

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• handle and store quarantinable seeds</li> <li>• maintain records and documentation relating to AQIS compliance</li> <li>• report non-compliance</li> <li>• redesign work procedures to prevent reoccurrence of non-compliance.</li> </ul>
Context of and specific resources for assessment	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances<sup>0</sup></p>
Method of assessment	<p>This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Seed</i> may include:	<ul style="list-style-type: none"> <li>• bare seed; treated seed and coated seed that has been prepared as required.</li> </ul>
<i>AQIS requirements for storage</i> may include:	<ul style="list-style-type: none"> <li>• hygiene; isolation; signage; record-keeping; waste disposal; security; calibration, certification and efficacy of equipment and operational procedures.</li> </ul>

## Unit Sector(s)

Seed Testing

## AHCSDT406A Undertake internal audits in a seed laboratory

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit describes the performance outcomes, skills and knowledge required to carry out an internal audit in a seed testing laboratory.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare for internal audit
  - 1.1 Previous internal audits are reviewed.
  - 1.2 Relevant enterprise documents are sourced and reviewed.
  - 1.3 *Audit plan* is prepared to suit staff availability and laboratory operations.
  - 1.4 Appropriate checklists and audit related documentation are prepared.
  - 1.5 In consultation with management, specific *methods and techniques are agreed*.
2. Conduct audit
  - 2.1 *Seed testing techniques* are conducted by analysts and observed and reported on by auditor.
  - 2.2 Questioning strategies are used to obtain further information from analysts on testing techniques and approaches.
  - 2.3 Deviations to the SOPs observed during observations of testing are relayed to the analyst.
  - 2.4 Seed storage, chemical store and sampling areas are inspected.
  - 2.5 Work charts, schedules, reports and plans are scrutinized.
  - 2.6 The availability and currency of *laboratory documents* are reviewed.
  - 2.7 *Archived documents* are inspected to ensure they are complete and meet statutory holding period.
3. Report findings
  - 3.1 Staff meeting is held to discuss outcomes of audit.
  - 3.2 Continuous improvement forms are completed by auditor with suggested corrective actions.
  - 3.3 An Audit Report is prepared and provided to management for review.
  - 3.4 Continuous improvement forms are presented at future staff meetings until corrective action is completed.
  - 3.5 Data collected during audit is filed in laboratory information management system.
  - 3.6 Confidentiality and security of enterprise information and laboratory data is maintained.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

**Ability to:**

- communicate with laboratory staff and management to explain audit requirements and outcomes
- organise and manage time to sequence audit tasks, meet timelines and arrange meetings
- use problem-solving skills to identify any issues that have the potential to impact on the auditing process or outcome, and to develop options to resolve these issues when they arise.

Required knowledge includes:

**Knowledge of:**

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- auditing methods and techniques
- seed testing techniques, equipment and methodologies
- enterprise standard operating procedures (SOPs)
- relevant legislation affecting business operation.

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>Evidence of the following is required:</p> <ul style="list-style-type: none"> <li>• preparation of audit plan and strategy for a seed testing laboratory</li> <li>• gathering of data and information by a variety of methods</li> <li>• developing a continuous improvement report with suggested corrective actions</li> <li>• preparing an audit report for management review.</li> </ul>
Context of and specific resources for assessment	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>

Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Audit plan</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• audit requirements and/or identification of relevant quality system documentation</li> <li>• provision of personnel for audit</li> <li>• confidentiality requirements</li> <li>• reporting procedures</li> <li>• time lines and schedules.</li> </ul>
<p><b><i>Seed testing techniques</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• working sample preparation</li> <li>• purity tests</li> <li>• germination test</li> <li>• tetrazolium test</li> <li>• determination of other seed</li> <li>• seed identification</li> <li>• 1000 seed weight test</li> <li>• moisture content test.</li> </ul>
<p><b><i>Laboratory documentation</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOP's)</li> <li>• tolerance tables for analyst use</li> <li>• quality manual</li> <li>• quality policy manual</li> <li>• organisational chart</li> <li>• continuous improvement forms</li> <li>• customer complaint file</li> <li>• staff development and training records</li> <li>• seed reference collection</li> </ul>

<i>Archived documents</i> may include:	<ul style="list-style-type: none"><li>• ISTA Certificates</li><li>• Analysis Certificates (non-ISTA)</li><li>• audit reports</li><li>• request forms</li><li>• calibration records</li><li>• equipment log books.</li></ul>

## Unit Sector(s)

Seed Testing

## AHCSDT407A Perform an endophytic seed test

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the determination of the presence of fungal endophyte in certain grasses.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare for endophyte testing
  - 1.1 Test request is reviewed to identify samples to be tested and required test methods and equipment.
  - 1.2 Equipment and working space are cleaned and prepared for use.
  - 1.3 Endophyte staining solution is prepared.
  - 1.4 Working sample of seed is prepared from Pure Seed.
2. Test seed for endophyte presence
  - 2.1 Seed is softened in sodium hydroxide for recommended time period.
  - 2.2 Seed is rinsed thoroughly in running tap water.
  - 2.3 Seed is de-glumed, placed on a microscope slide in a drop of endophyte staining solution and slightly crushed.
  - 2.4 Cover glass is placed on seed and gentle pressure is applied.
  - 2.5 Seed is examined with compound microscope and scored as positive if endophytic hyphae are present.
3. Test seedlings for endophyte presence
  - 3.1 Seeds from working sample are selected at random and germinated.
  - 3.2 Seedlings from the sample germinated are examined after growing for a minimum of 48 days.
  - 3.3 Outermost sheath is removed from the seedling such that tissue to be examined should have no obvious discoloration from saprophytes and should have as little chlorophyll as possible.
  - 3.4 A longitudinal section of leaf sheath approximately 3–5 mm in width is isolated.
  - 3.5 Section is placed on a microscope slide with the epidermis side down.
  - 3.6 Section is stained immediately with the endophyte staining solution for prescribed time period.
  - 3.7 Excess dye is blotted off with tissue paper and a coverglass is placed over section and flooded with water.
  - 3.8 Section is examined with compound microscope and scored as positive if endophytic hyphae are present.
4. Record and report test results
  - 4.1 Results are entered under Other Determinations.
  - 4.2 The scientific name of the pathogen which has been tested for and the test method used is recorded in the test results.
  - 4.3 Sample size used for testing is recorded.
  - 4.4 In the case of a negative result where the pathogen was not detected, the results is reported in terms of the *tolerance standard*.
  - 4.5 In the case of a positive result the report should indicate percentage of infected seed.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

### Ability to:

- prepare endophyte stains
- inspect seed using a compound microscope
- detect endophyte presence in seeds and seedlings
- record and report test results.

Required knowledge includes:

### Knowledge of:

- seed biology
- identification of endophytes
- recording and reporting protocols
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	Evidence of the ability to: <ul style="list-style-type: none"> <li>• prepare endophyte stains</li> <li>• test seed for endophyte presence</li> <li>• test seedlings for endophyte presence</li> <li>• record and report results of tests.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units

	and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The *tolerance standard* may include:

an infection level less than 1% with 95% probability and depends on the total number of seeds tested,  $n$ , and is approximately  $3/n$  ( $P=0.95$ ) (see Roberts et al., 1993).

## Unit Sector(s)

Seed Testing

## AHCSDT408A Perform an electrophoresis test on a seed sample

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers testing seed by separating proteins of varying size and/or electric charge to get a banding pattern that can be used to identify or verify a particular variety.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare *seed* extraction and gel
  - 1.1 Working sample is prepared from submitted sample.
  - 1.2 Seed to be tested is identified and records completed.
  - 1.3 Single seeds are cut or crushed and transferred to centrifuge tubes.
  - 1.4 Extraction solution is added and mixed with crushed seeds and allowed to stand for prescribed period.
  - 1.5 Tubes are centrifuged and supernatants are collected and stored.
  - 1.6 Gel mixture is prepared and chemicals used to achieve required level of polymerisation.
2. Carry out electrophoresis
  - 2.1 Buffer solution is placed in tanks.
  - 2.2 Samples are loaded into wells and gel is placed in tanks.
  - 2.3 Electrophoresis is carried out at the prescribed voltage and duration.
  - 2.4 Temperature is maintained as required throughout the process
3. Fix and stain sample
  - 3.1 Gel is removed from tank and treated with chemicals as prescribed.
  - 3.2 Gel is washed and treated to enhance stain.
  - 3.3 Stain is examined and/or photographed.
4. Evaluate stain
  - 4.1 Banding pattern is compared with that of authentic variety or that of a known control sample.
  - 4.2 Records and reports are provided in accordance with enterprise procedures.
  - 4.3 Determine if obvious procedure or equipment problems have led to atypical data or results..
5. Maintain a safe work environment
  - 5.1 Established safe work practices and personal protective equipment are used to ensure personal safety and that of other laboratory personnel.
  - 5.2 The generation of wastes and environmental impacts are minimised.
  - 5.3 The safe collection of laboratory and hazardous waste for subsequent disposal is ensured.
  - 5.4 Equipment and reagents are cared for and stored as required
6. Maintain laboratory records
  - 6.1 Approved data is entered into laboratory information management system.
  - 6.2 Confidentiality and security of enterprise information and laboratory data is maintained.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

### Required skills include:

---

#### Ability to:

- analyse and report results
- evaluation stain banding
- fix and stain seed samples
- maintain security, integrity, traceability of samples, sub-samples, test data, results and documentation
- prepare seed extraction and gel
- record and communicate results in accordance with enterprise procedures
- select test methods and procedures
- use a centrifuge.

### Required knowledge includes:

---

#### Knowledge of:

- seed biology
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- principles of electrophoresis
- range of electrophoresis testing procedures
- materials and apparatus used in electrophoresis testing
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements
- using stain patterns and "fingerprints" to determine seed variety.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate	The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and

competency in this Unit	satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: <ul style="list-style-type: none"> <li>• extract seed and prepare gel</li> <li>• centrifuging seed and gel mixes</li> <li>• interpreting stain bands and patterns.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Seed</b> may include:	bare seed; treated seed; and coated seed that has been prepared as required.
--------------------------	--

## Unit Sector(s)

Seed Testing

## AHCSDT409A Perform a tetrazolium seed viability test

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers the process of staining seeds with a tetrazolium solution to assess seed viability or germination potential.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare *replicates* for testing
  - 1.1 Pure *Seed* is mixed thoroughly to reduce bias in results.
  - 1.2 Prescribed number of replicates are drawn from the Pure Seed fraction according to enterprise guidelines.
  - 1.3 Safe work practices and personal protective equipment are used to ensure personal safety and that of other laboratory personnel.
2. Pre-moisten replicates
  - 2.1 Seed is *pre-moistened* to reduce possibility of injury to seeds when puncturing or cutting and to enable penetration of the tetrazolium solution under prescribed temperature and light conditions.
  - 2.2 Sticky mucilage is removed from seeds as necessary.
  - 2.3 Seed *tissue is exposed* prior to staining according to enterprise guidelines.
  - 2.4 Seeds are kept moist prior to testing.
3. Stain with tetrazolium solution
  - 3.1 Seeds are completely immersed in tetrazolium solution according to enterprise guidelines.
  - 3.2 Fungicides and/or antibiotics may be added to solution according to enterprise guidelines.
  - 3.3 Low light levels are maintained as required by testing procedures to facilitate staining.
  - 3.4 At completion of staining period, the solution is decanted and seeds are rinsed with water.
4. Evaluate test results
  - 4.1 Each seed is examined and evaluated as viable or non-viable based on staining patterns applicable to the species being tested.
  - 4.2 The number of seeds considered viable in each replicate is counted.
  - 4.3 The percentage of viable seed in each replicate is calculated and average percentage of viable seed across all replicates is determined.
5. Finalise reporting and clean up
  - 5.1 Results of test are recorded and reported according to enterprise guidelines.
  - 5.2 Laboratory and hazardous waste are safely handled, collected and disposed of according to enterprise guidelines.
  - 5.3 Apparatus and equipment used in tetrazolium test is cleaned and used chemicals and solutions are disposed of safely in accordance with enterprise guidelines.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

### Ability to:

- calculate percentages and averages, rounding
- evaluate and report results
- expose seed tissue using recommended methods for particular seed types
- follow enterprise guidelines and standard operating procedures
- pre-moisten seed using a range of techniques
- prepare replicates for testing.

Required knowledge includes:

### Knowledge of:

- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- seed biology
- tetrazolium testing procedures
- concepts of metrology
- enterprise and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• preparation of replicates for testing</li> <li>• staining with tetrazolium</li> <li>• evaluation and reporting of test results.</li> </ul>

## Unit Sector(s)

Seed Testing

## AHCSDT410A Perform a seed vigour test

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers testing for seed vigour to provide information about the seeds' planting value in a wide range of environments and/or the storage potential of seed lots.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare for a *seed vigour* test
  - 1.1 Test request is reviewed to identify samples to be tested, required *test methods* and equipment.
  - 1.2 Equipment and working space are cleaned and calibrated to enterprise standards.
2. Receive and prepare samples
  - 2.1 Samples are logged using standard operating procedures (SOPs).
  - 2.2 Sample description is recorded, compared with specification and discrepancies reported to supervisor.
  - 2.3 Samples and standards are prepared in accordance with testing method requirements.
  - 2.4 Traceability of samples from receipt to reporting of results is maintained.
  - 2.5 If control samples are being used, ensure they are prepared according to enterprise guidelines (Reinstated MT).
3. Check equipment before use
  - 3.1 Equipment/instruments are set up in accordance with test method requirements.
  - 3.2 Pre-use and safety checks are performed in accordance with relevant enterprise and operating procedures.
  - 3.3 Faulty or unsafe components and equipment are identified and reported to appropriate personnel.
  - 3.4 Equipment calibration is checked using specified standards and procedures, if applicable.
  - 3.5 Out of calibration equipment/instruments is quarantined.
  - 3.6 Reagents required for the test are available and meet quality requirements.
4. Conduct test
  - 4.1 The test method to be used is determined according to the type of seed or as requested by the person requesting the test.
  - 4.2 Equipment is cleaned and maintained in a clean state as required by enterprise guidelines
  - 4.3 A working sample is prepared and replicates using mixing and dividing processes according to enterprise guidelines.
  - 4.4 Seed is prepared, placed and/or treated to suit test method requirements and enterprise guidelines.
  - 4.5 Measurements are made with equipment and/or counting and results are recorded as determined by test method and enterprise guidelines.
  - 4.6 A statement of specific variable is prepared and provided to accompany the results.

- |                                     |   |
|-------------------------------------|---|
| 5. Evaluate test results            | 5.1 The number of seeds or seedlings with required characteristics in each replicate is counted.  |
|                                     | 5.2 The percentage of seed or seedlings with required characteristics in each replicate is calculated and average percentage across all replicates is determined. |
|                                     | 5.3 Result of seed vigour test is reported to supervisor.   |
| 6. Process and interpret data       | 6.1 Test data is recorded noting atypical observations.   |
|                                     | 6.2 Results are recorded and reported in accordance with enterprise procedures.   |
|                                     | 6.3 Trends in data and/or results are interpreted and report out of specification or atypical results promptly to appropriate personnel.                          |
|                                     | 6.4 Determine if obvious procedure or equipment problems have led to atypical data or results   |
| 7. Maintain a safe work environment | 7.1 Established safe work practices and personal protective equipment are used to ensure personal safety and that of other laboratory personnel.                  |
|                                     | 7.2 The generation of wastes and environmental impacts are minimised.   |
|                                     | 7.3 The safe collection of laboratory and hazardous waste for subsequent disposal is carried out.   |
|                                     | 7.4 Equipment and store equipment and reagents are cleaned and cared for as required.   |
| 8. Maintain laboratory records      | 8.1 Approved data is entered into laboratory information management system.   |
|                                     | 8.2 Confidentiality and security of enterprise information and laboratory data is maintained.   |
|                                     | 8.3 Equipment and calibration logs are maintained in accordance with enterprise procedures.   |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- interpret test methods and procedures
- carry out sample preparation procedures
- perform calibration checks
- plan work sequences

- designate components of test to other staff
- use calculation methods, including appropriate units, uncertainties, balancing equations, and the concentration of the solution given the chemical reaction for the titration
- record and communicate results in accordance with enterprise procedures
- maintain security, integrity, traceability of samples, sub-samples, test data, results and documentation
- prepare and treat seed for testing
- follow enterprise guidelines and standard operating procedures
- calculate percentages, averages
- evaluate and report results.

Required knowledge includes:

### Knowledge of:

- role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- seed biology
- seed identification
- range of seed vigour testing procedures
- materials and apparatus used in seed vigour testing
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements
- enterprise standard operating procedures (SOPs)
- calculations, tolerances and rounding results.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• prepare and conduct a seed vigour test</li> <li>• record results</li> <li>• interpret and present results.</li> </ul>
Context of and specific resources for	Competency requires the application of work practices

assessment	under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Seed</i></b> may include:	<ul style="list-style-type: none"> <li>• bare seed; treated seed; and coated seed that has been prepared as required.</li> </ul>
<b><i>Seed vigour</i></b> may include:	<ul style="list-style-type: none"> <li>• rate and uniformity of seed germination and seedling growth;</li> <li>• emergence ability of seeds under unfavourable environmental conditions;</li> <li>• performance after storage including the retention of the ability to germinate.</li> </ul>
<b><i>Test methods</i></b> may include:	<ul style="list-style-type: none"> <li>• stress tests; seedling growth tests; and biochemical tests.</li> </ul>

## Unit Sector(s)

Seed Testing

## AHCSDT411A Perform a 1000 seed weight test

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Unit Descriptor

This Unit covers determining the weight per 1000 pure seeds from a submitted sample.

### Application of the Unit

This Unit applies to senior seed analysts working within enterprise guidelines. In general, they oversee the preparation of samples for testing; conduct and supervise specified tests in accordance with enterprise requirements; interpret and report results; maintain record-keeping systems; and have responsibility for overall laboratory operations, the supervision of staff, and implementation of quality assurance procedures.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Nil.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. Prepare a *working sample*
  - 1.1 *Pure seed* is obtained following a purity analysis or as a representative fraction of a submitted sample.
  - 1.2 Mechanical dividers are used where appropriate.
  - 1.3 Moisture content of working sample is maintained through storage in moisture proof containers prior to counting.
  - 1.4 Labelling and records are completed.
2. Count and weigh seed by machine
  - 2.1 The entire working sample is put through a counting machine and the total number of seeds indicated is recorded.
  - 2.2 Working sample is weighed to the required number of decimal places.
3. Count and weigh replicates by hand
  - 3.1 Eight replicates of 100 seeds are counted out randomly from the working sample.
  - 3.2 Each replicate is weighed to the required number of decimal places.
  - 3.3 Weights of each replicate are recorded.
  - 3.4 Variance, standard deviation and coefficient of variance are calculated according to enterprise guidelines.
  - 3.5 Where the coefficient of variance exceeds the prescribed value, a new set of replicates is tested.
  - 3.6 Where the coefficient of variance does not exceed the prescribed value, the average weight of 1000 seed is determined.
4. Report results
  - 4.1 Results of weight determination is reported under "other determinations" to the prescribed number of decimal places.
  - 4.2 The method used and the result as calculated is reported.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills include:

---

### Ability to:

- prepare working samples
- use mechanical dividers and counting machines
- weigh seed samples
- calculate variance, standard deviation and coefficient of variance
- follow enterprise guidelines and standard operating procedures.

Required knowledge includes:

**Knowledge of:**

- role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- concepts of metrology
- seed biology
- apparatus for weighing, counting and dividing seed samples
- calculations such as variance, standard deviation and coefficient of variance
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	Evidence of the ability to: <ul style="list-style-type: none"> <li>• prepare and weigh replicates</li> <li>• calculate variance, standard deviation and coefficient of variance</li> <li>• report results.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Set-up shearing handpiece as directed	1.1.Potential and existing hazards in the workplace are identified and reported to supervisor. 1.2.Shearing equipment is checked for correct operation. 1.3.Assemble comb and cutter on handpiece. 1.4.Set lead and throw 1.5.Set tension to enable comb and cutter to cut wool cleanly with minimum friction. 1.6.Lubricate working surfaces and moving parts in line with manufacturers requirements.
2. Follow health and fitness procedures	2.1.Prepare for exercises to warm-up the body. 2.2.Perform back, shoulder, leg, arm, and abdomen stretches. 2.3.Recognise the necessities of hydration, nutrition and rest periods.
3. Catch sheep for shearing	3.1.Suitable personal protective equipment is selected, used and maintained in line with the OHS and workplace. 3.2.Sheep are caught and moved in line with organisational, OHS, industry and animal welfare standards. 3.3.Sheep are moved from the catching pen to the shearing board using safe manual handling techniques. 3.4.Sheep are positioned for shearing/crutching in line with industry agreed method.
4. Remove wool	4.1.Handpiece is activated and positioned readiness for

ELEMENT	PERFORMANCE CRITERIA
	shearing/crutching operations. 4.2. Shear/crutch section of sheep as directed. 4.3. Release sheep safely from the board into the count-out pens.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- follow safety directions
- prepare materials, tools and equipment for work
- select and use equipment and materials appropriate for shearing sheep
- avoid contamination, second cuts and damage to wool, sheep and people
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing and crutching techniques, and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- anatomy of all types of sheep
- sheep diseases

**REQUIRED SKILLS AND KNOWLEDGE**

- animal welfare requirements in relation to sheep
- sheep behaviour
- personal protective clothing and equipment and when and how it should be used
- Federal Pastoral Industry Award, and/or State Shearing Award of Queensland, and/or Western Australian Shearing Contractors Award
- relevant State/Territory legislation and awards, regulations and codes of practice with regard to workplace OHS and animal welfare.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following under supervision:

- set-up a shearing handpiece,
- ensure health and fitness for shearing,
- catch and shear a sheep in line with organisational, OHS and animal welfare standards

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Shearing and crutching may include:	<ul style="list-style-type: none"> <li>the removal of fleece and or crutching wool from a range of breeds and types of sheep</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for crutching operations	<p>1.1. Crutching equipment is checked for correct operation prior to crutching session.</p> <p>1.2. Sheep to be crutched are identified, caught and moved in line with organisational, Occupational Health and Safety (OHS), industry, and animal welfare standards.</p> <p>1.3. Sheep are positioned for crutching in line with organisation determined and industry agreed crutching methods.</p> <p>1.4. Potential and existing hazards in the workplace are identified and reported to the supervisor.</p> <p>1.5. Suitable personal protective equipment is selected, used and maintained in line with OHS and workplace procedures.</p>
2. Perform crutching operations	<p>2.1. Handpiece is activated and positioned in readiness for crutching.</p> <p>2.2. Wool is shorn from face, crutch or belly as instructed and in line with industry standards.</p> <p>2.3. Crutching methods are used to ensure that injury to the sheep and damage to the fleece is avoided.</p> <p>2.4. Safe handling techniques are used at all times.</p>
3. Respond to complications	<p>3.1. Contamination is identified during crutching and reported to wool handlers in line with enterprise requirements.</p> <p>3.2. Cuts are treated in accordance with industry standards and animal welfare requirements.</p> <p>3.3. Flyblown sheep are identified and reported in line</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>with industry standards and animal welfare requirements.</p> <p>3.4. Problem sheep are identified and reported in line with enterprise and industry requirements.</p>
4. Complete crutching operations	<p>4.1. Wool is placed to avoid contamination and for wool handlers to collect in line with enterprise and industry requirements.</p> <p>4.2. Handpiece is switched off and re-positioned to non-operational position.</p> <p>4.3. Sheep are safely released from the board into the count out pens.</p> <p>4.4. Crutching grievances and difficulties are reported in line with enterprise and industry requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- select and use equipment and materials appropriate for crutching sheep
- avoid contamination, second cuts and damage to wool, animals and people
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain crutching equipment, site and facilities
- read and interpret manufacturers specifications, work and maintenance plans
- work in a team as a team member
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer
- tally crutched sheep count
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures

## REQUIRED SKILLS AND KNOWLEDGE

- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed crutching techniques, positions and methods of crutching
- safe handling techniques for catching, dragging, crutching and releasing sheep
- anatomy of all types of sheep
- sheep diseases
- animal welfare requirements in relation to sheep
- sheep behaviour
- personal protective clothing and equipment, and when and how it should be used
- Federal Pastoral Industry Award and/or State Shearing Award of Queensland or Western Australian Shearing Contractors Award
- relevant State/Territory legislation and awards, regulations and codes of practice with regard to workplace OHS and animal welfare.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- load and prepare handpiece and ensure combs and cutters are sharp
- catch sheep and move into position for crutching
- crutch wool from face, belly and crutch area as directed for the mob
- clear maggots and shear stained wool from fly blown sheep

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• avoid contamination in the wool and assist in keeping stained wool separate</li> <li>• disengage handpiece and release sheep after crutching.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Animals may include:	<ul style="list-style-type: none"> <li>• all breeds and types of sheep.</li> </ul>
Crutching may include:	<ul style="list-style-type: none"> <li>• all crutch patterns recognised in the industry.</li> </ul>
Sheds may include:	<ul style="list-style-type: none"> <li>• a shearing shed</li> <li>• or a mobile crutching plant.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare equipment	<p>1.1. Facilities are inspected with owner/classer to determine the degree of preparation required.</p> <p>1.2. Facilities and equipment are cleaned to industry standards and hazards are eliminated according to OHS requirements, and as directed.</p> <p>1.3. Contaminating substances are identified, removed and disposed of according to enterprise and environmental requirements, and as instructed.</p> <p>1.4. Equipment faults or malfunctions are reported to owner/classer.</p> <p>1.5. Suitable personal protective equipment is selected, used and maintained according to OHS requirements</p>
2. Arrange equipment and materials	<p>2.1. Equipment is positioned according to owner/classers requirements.</p> <p>2.2. Bins/wool packs are arranged according to instructions.</p> <p>2.3. Brooms/scrapers are positioned according to requirements.</p>
3. Identify hazards and dispose of contaminants	<p>3.1. Potential and existing hazards are identified and reported to owner/classer.</p> <p>3.2. Directions of owner/classer are followed in eliminating hazards.</p>
4. Pen sheep	<p>4.1. Work is undertaken in conjunction with shed</p>

ELEMENT	PERFORMANCE CRITERIA
	manager/other shed staff, to ensure sheep are penned for shearing or crutching.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- maintain contamination and hazard-free environment for shearing and wool handling
- recognise and report OHS hazards
- carry out minor maintenance and repairs to equipment and facilities as directed
- disposal of waste in an environmentally responsible manner as directed
- communicate verbally with owner/classer and follow instructions
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- OHS legislative requirements
- environmental procedures
- Quality Assurance (QA) procedures
- National codes of practice for the Shearing Industry (Health, Safety and Welfare standards).

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Set-up shearing handpiece	<p>1.1.Potential and existing hazards in the workplace are identified.</p> <p>1.2.Shearing equipment is checked for correct operation.</p> <p>1.3.Comb and cutter is assembled on handpiece.</p> <p>1.4.Lead and throw is set for comb and cutter.</p> <p>1.5.Tension is set to enable comb and cutter to cut wool cleanly with minimum friction.</p> <p>1.6.Working surfaces and moving parts are lubricated in line with manufacturer's requirements.</p>
2. Follow health and fitness procedures	<p>2.1.Exercises to warm-up the body are prepared for.</p> <p>2.2.Back, shoulder, leg, arm and abdomen stretches are performed.</p> <p>2.3.The necessities of hydration, nutrition and rest periods are recognised and complied with.</p>
3. Catch sheep for shearing	<p>3.1.Suitable personal protective equipment is selected, used and maintained in line with the Occupational Health and Safety (OHS) and workplace.</p> <p>3.2.Sheep are caught and moved in line with organisational, OHS, industry and animal welfare standards.</p> <p>3.3.Sheep are dragged from the catching pen to the shearing board using safe manual handling techniques.</p> <p>3.4.Sheep are positioned for shearing in line with industry agreed shearing method.</p>
4. Remove fleece	<p>4.1.Handpiece is activated and positioned readiness for</p>

ELEMENT	PERFORMANCE CRITERIA
	shearing operations. 4.2. Shear section of sheep in position suitable to the individual's competence. 4.3. Shear the six basic positions in sequence. 4.4. Minimise injury to sheep. 4.5. Release sheep safely from the board into the count-out pens. 4.6. Maintain shearing effort to achieve the required minimum rate per day to acceptable standard.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- follow safe work practices
- select and use equipment and materials appropriate for shearing sheep
- load a handpiece correctly
- avoid contamination, second cuts, and damage to wool, sheep and people
- shear sufficient sheep within eight hours to match novice skill level
- suturing
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, site and facilities
- work in a team as a team member
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer
- tally shorn sheep count
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- anatomy of all types of sheep
- sheep diseases
- animal welfare requirements in relation to sheep
- sheep behaviour
- personal protective clothing and equipment, and when and how it should be used
- Federal Pastoral Industry Award and/or State Shearing Award of Queensland and/or Western Australian Shearing Contractors Award
- relevant State/Territory legislation and awards, regulations and codes of practice with regard to workplace OHS and animal welfare.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances. Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

- catch sheep
- set-up shearing handpiece
- remove fleece
- apply health and safety procedures.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

## AHCSHG204A Shear sheep to improve level

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of selecting, handling and shearing of sheep to improve level and defines the standard required to: set up and adjust handpiece to the shearing conditions; operate shearing equipment safely; maintain position and control of the sheep while minimising stress on the shearer; avoid damage to sheep as well as second cuts and contaminants in fleece; handle and shear 70 to 80 sheep per day using industry accepted methods and procedures; recognise problem and diseased sheep and report accordingly.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working with the application of judgement and discretion and would be carried out with minimal supervision as part of a shearing operation.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for shearing	<p>1.1. Shearing equipment is checked for correct operation prior to shearing session.</p> <p>1.2. Potential and existing hazards in the workplace are identified, and reported to the supervisor.</p> <p>1.3. Suitable personal protective equipment is selected, used and maintained in line with Occupational Health and Safety (OHS) and workplace procedures.</p>
2. Perform shearing operations	<p>2.1. Sheep to be shorn are identified, caught and moved in line with organisational, OHS, industry and animal welfare standards.</p> <p>2.2. Sheep are positioned for shearing using identified positions in line with industry standards.</p> <p>2.3. Handpiece is activated and positioned in readiness for shearing operations.</p> <p>2.4. Sheep are shorn using identified method and positions in line with industry standards.</p> <p>2.5. Shearing methods ensure that injuries and damage to the sheep and fleece is avoided in meeting volume expectations.</p> <p>2.6. Safe and humane handling techniques are used at all times according to OHS and animal welfare requirements.</p>
3. Respond to complications	<p>3.1. Contamination is identified during shearing operations and reported to wool handlers in line with enterprise requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. Sheep cuts are sutured in line with industry standards and animal welfare requirements.</p> <p>3.3. Flyblown sheep are identified and reported in line with industry standards and animal welfare requirements.</p> <p>3.4. Problem sheep are identified and reported in line with industry and enterprise requirements.</p>
4. Complete shearing operation	<p>4.1. Wool is placed to avoid contamination and for wool handlers to collect in line with enterprise and industry requirements.</p> <p>4.2. Handpiece is set to non-operational position and stored in line with manufacturer's specifications and enterprise requirements.</p> <p>4.3. Sheep are safely released from the board into the count-out pens.</p> <p>4.4. Shearing grievances and difficulties are reported in line with enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safety directions
- select and use equipment and materials appropriate for shearing sheep
- avoid contamination, second cuts and damage to wool, sheep and people
- shear sufficient sheep within eight hours to match skill level as per industry award minimum rate of pay for learner shearers
- suturing
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, site and facilities
- read and interpret manufacturers specifications, work and maintenance plans
- work in a team as a team member
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer

## REQUIRED SKILLS AND KNOWLEDGE

- tally shorn sheep count
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep.
- anatomy of all types of sheep
- sheep diseases
- animal welfare requirements in relation to sheep
- sheep behaviour
- personal protective clothing and equipment, and when and how it should be used
- Federal Pastoral Industry Award and/or State Shearing Award of Queensland, and/or Western Australian Shearing Contractors Award
- relevant State/Territory legislation and awards, regulations and codes of practice with regard to workplace OHS, animal welfare.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• set up and adjust handpiece to the shearing conditions</li> <li>• operate shearing equipment safely</li> <li>• maintain position and control of the sheep while minimising stress on the shearer</li> <li>• avoid damage to sheep as well as second cuts and contaminants in fleece</li> <li>• handle and shear 70 to 80 sheep per day using industry accepted methods and procedures</li> <li>• recognise problem and diseased sheep and report accordingly.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Animals may include:	<ul style="list-style-type: none"> <li>• all types of woollen sheep as well as all ages and genders of sheep, including rams, ewes, wethers, lambs, hoggets, and stags.</li> </ul>
Shearing rate may include:	<ul style="list-style-type: none"> <li>• a rate that must be equivalent to the minimum rate of pay as set down by the industry award - between 70 and 80 sheep per day.</li> </ul>

## AHCSHG205A Grind combs and cutters for machine shearing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of grinding combs and cutters for machine shearing to ensure they are effective in the type of wool and shearing conditions and defines the standard required to: determine need for sharpening combs and cutters; prepare grinder and pendulum for use; wash combs and cutters ready for grinding; carry out grinding using Personal Protective Equipment (PPE) and being mindful of others safety; detect faults and unevenness in grinding and make adjustments.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the processes involved with the grinding of combs and cutters for machine shearing and is usually conducted within established routines, methods and procedures.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine need for sharpening combs and cutters	<p>1.1. Combs and cutters are checked for wear in line with supervisor's instructions.</p> <p>1.2. Combs and cutters are cleaned to enterprise and manufacturers recommendations prior to grinding.</p> <p>1.3. Potential and existing hazards are recognised, controlled and reported in line with Occupational Health and Safety (OHS) and organisational requirements.</p>
2. Prepare grinder and pendulum for use	<p>2.1. The grinder and its location are checked for serviceability.</p> <p>2.2. Grinder faults or malfunctions are identified and reported to supervisor for repair or replacement.</p> <p>2.3. Grinding papers are applied to grinder discs.</p> <p>2.4. Grinding papers are correctly stored and cared for.</p> <p>2.5. The bottom bar of the pendulum is checked, cleaned and adjusted to ensure it is true.</p> <p>2.6. The pressure bar and pins are set at the recommended distance in accordance with manufacturers guidelines.</p> <p>2.7. Height setting of pendulum is checked in line to manufacturer's guidelines.</p>
3. Carry out grinding	<p>3.1. Eye protection is worn while grinding is carried out.</p> <p>3.2. Comb or cutter is secured for grinding.</p> <p>3.3. Correct pressure is applied while grinding.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.4. Combs and cutters are ground according to manufacturer's specifications and/or supervisors instructions.</p> <p>3.5. Combs and cutters are visually checked for even grinding.</p> <p>3.6. Faults or unevenness in grinding are identified and rectified.</p> <p>3.7. Grinding wheel is not left running when unattended.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and apply safe work practices
- determine need for sharpening combs and cutters
- prepare grinder and pendulum for use
- carryout grinding
- clearly report any OHS hazards to the appropriate person
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- types of combs and cutters
- terminology, techniques and procedures for grinding combs and cutters
- setting of, storage and caring for grinding papers
- tools and equipment used in grinding combs and cutters
- OHS requirements for grinding combs and cutters.

## Evidence Guide

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- select and operate equipment appropriate to shearing tasks
- shear goats using industry accepted methods and procedures
- avoid contamination, second cuts and damage to fleece, goats and people
- appropriately treat injured goats
- handle goats with due care
- demonstrate safe and environmentally responsible workplace practices
- maintain safe and hazard-free equipment
- read and interpret Material Safety Data Sheets (MSDSs), manufacturer's specifications and shearing schedules
- effectively communicate with work teams and supervisor, and comprehend and apply task instructions
- use literacy skills to follow sequenced written instructions and record information

## REQUIRED SKILLS AND KNOWLEDGE

accurately and legibly

- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- types of shearing sheds, boards and catching pens
- components and functions of shearing equipment and machinery
- industry accepted handling and shearing techniques and positions
- goat anatomy and behavioural characteristics
- goat diseases and treatments
- environmental codes of practice with regard to livestock production
- OHS and animal welfare legislative requirements
- codes of practice for goat shearing
- relevant industry awards.

## Evidence Guide

### EVIDENCE GUIDE

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare materials, tools and equipment for alpaca shearing support activities	<p>1.1. Required materials, tools and equipment are identified according to lists provided and/or supervisor instructions.</p> <p>1.2. Checks are conducted on all materials, tools and equipment, and insufficient or faulty items are reported to supervisor.</p> <p>1.3. Suitable Personal Protective Equipment (PPE) and clothing are selected and checked prior to use.</p> <p>1.4. Occupational Health and Safety (OHS) hazards in the workplace are recognised and reported to supervisor, and actions are taken to minimise risks to self and others.</p>
2. Carry out alpaca shearing support duties	<p>2.1. Supervisor instructions are followed and clarification is sought when necessary.</p> <p>2.2. Work is undertaken in a safe and environmentally appropriate manner, using correct manual handling techniques and according to enterprise and OHS guidelines and animal welfare requirements.</p> <p>2.3. Interactions with others are carried out in a positive and professional manner.</p> <p>2.4. Problems or difficulties that may impact on completion of work to the required standards or achievement of timelines are reported to supervisor and remedial action is taken as directed.</p> <p>2.5. Site quarantine and other biosecurity protocols are observed.</p> <p>2.6. Waste material produced during alpaca shearing is stored in a designated area according to supervisor</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>instructions.</p> <p>2.7. Own work area is kept clean and tidy while working and assistance is provided as instructed to keep the general work area clean and tidy.</p>
3. Clean up on completion of alpaca shearing	<p>3.1. Materials are returned to store or disposed of according to supervisor instructions.</p> <p>3.2. Tools and equipment are cleaned, maintained and stored according to manufacturer specifications and supervisor instructions.</p> <p>3.3. Work outcomes are reported to supervisor, feedback on performance is sought and any required improvements are noted for future action.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and applying safe work practices
- cleaning up during and on completion of alpaca shearing
- handling, penning and working around alpacas
- preparing and handling materials, tools and equipment for alpaca shearing support tasks
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- alpaca fleece types
- basic fleece handling practices
- safe work practices associated with alpaca shearing activities
- shearing tools and equipment

**REQUIRED SKILLS AND KNOWLEDGE**

- OHS, environment and animal welfare requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare facilities for alpaca shearing
- handle animals safely and humanely while being shorn
- remove contaminants from shorn fleece and sort and pack according to enterprise requirements
- deal with shearing wounds or injuries if required
- monitor weather conditions post-shearing for risk of exposure for shorn animals.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Animals may include:

- all types and strains of alpacas and all fleece

**RANGE STATEMENT**

	types, including crossbred, huacaya, and suri.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Sort livestock for shearing	<p>1.1.Livestock are located, identified and confirmed according to enterprise shearing plan.</p> <p>1.2.Livestock are safely mustered and moved to shearing facilities, sorted and yarded according to shearing plan and enterprise requirements.</p> <p>1.3.Livestock with pigmented fleece are identified and culled for separate shearing operations.</p> <p>1.4.Potential and existing hazards are identified and controlled according to Occupational Health and Safety (OHS) and enterprise requirements.</p>
2. Prepare livestock for shearing	<p>2.1.Suitable personal protective equipment is selected, used and maintained according to OHS and enterprise requirements.</p> <p>2.2.Shearing, cleaning and drenching equipment is checked for correct operation according to manufacturer's specifications.</p> <p>2.3.Livestock are crutched, as required, according to industry and enterprise requirements.</p> <p>2.4.Contaminated and crushed wool is removed and disposed of according to enterprise requirements.</p> <p>2.5.Livestock are taken off feed to allow emptying out before shearing.</p>
3. Monitor livestock	<p>3.1.Feed and water supplies for livestock are provided and maintained according to enterprise requirements.</p> <p>3.2.Suitable shelter for livestock is provided and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>maintained according to animal welfare and enterprise requirements.</p> <p>3.3.Livestock condition and health status is monitored for evidence of sickness, and recorded or reported according to enterprise requirements.</p> <p>3.4.Environmental implications associated with shearing activities are monitored and controlled.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- select equipment appropriate to crutching and shearing tasks
- organise crutching and shearing operations
- detect disease or nutritional disorders and treat appropriately
- critically observe and monitor livestock health and condition
- organise feed and water supplies
- avoid and remove contamination of fleece
- handle livestock in compliance with animal welfare requirements
- demonstrate safe and environmentally responsible workplace practices
- read and interpret MSDS, manufacturers specifications and shearing plan requirements
- communicate verbally with work team and manager, comprehend and apply task instructions
- calculate livestock numbers, keep mobs separate
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- types and purposes of shearing boards, yards and catching pens
- components and functions of shearing, cleaning and drenching equipment
- handling, mustering and movement techniques
- livestock breeds, nutritional and hygiene requirements
- livestock diseases and treatments
- quality management systems for fleece/fibre

**REQUIRED SKILLS AND KNOWLEDGE**

- fleece contaminants and types of pigmentation faults
- environmental codes of practice with regard to livestock production
- OHS and animal welfare legislative requirements
- National codes of practice for the Shearing Industry (Health, Safety and Welfare standards).

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- select equipment appropriate to crutching and shearing tasks
- organise crutching and shearing operations
- muster, move and draft livestock to be crutched or shorn
- critically observe and monitor livestock health and condition
- organise feed and water supplies allowing for emptying out
- avoid and remove contamination carried in fleece or on site.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Grind combs and cutters	<p>1.1.Faulty components are identified and level of repair or replacement requirements are determined.</p> <p>1.2.Grinder is operated in a safe manner without risk of injury to operator or others or damage to equipment.</p> <p>1.3.Pendulum pin settings are adjusted and set and pendulum bar is clean and checked for level.</p> <p>1.4.Grinding plates are tested visually in terms of being balanced and true.</p> <p>1.5.Worn and incorrectly adhered papers are identified and replaced.</p> <p>1.6.Grinder is set.</p> <p>1.7.Even wear of combs and cutters is identified and combs and cutters are sharpened.</p>
2. Dress combs	<p>2.1.Bevel is selected and/or modified, appropriate to wool type.</p> <p>2.2.Factors affecting combs selection are described in terms of type of sheep and seasonal conditions.</p> <p>2.3.Comb teeth are dressed to uniform shape and length.</p> <p>2.4.Comb teeth are uniformly thinned along their length.</p> <p>2.5.Comb is polished leaving no rough or sharp points.</p>

## Required Skills and Knowledge

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
--------------------------------------

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- identify hazards and apply safe operating procedures to grinding
- determine need for sharpening combs and cutters
- determine need for dressing combs
- prepare grinder and pendulum for use
- carry out grinding
- set, store and care for grinding papers
- dress combs, including selecting bevels, teeth thinning and polishing
- report safety concerns to the appropriate person
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- types of combs and cutters
- terminology, techniques and procedures for grinding combs and cutters
- tools and equipment used in grinding combs, and cutters and dressing combs
- Occupational Health and Safety (OHS) policies and practices related to grinding combs and cutters.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify worn and faulty handpiece components and install minor repair kit components	<p>1.1.The performance of the handpiece is assessed.</p> <p>1.2.Comb bed, cups and fork yokes are checked and cleaned, and comb bed is visually checked for flatness.</p> <p>1.3.Worn and faulty handpiece components are determined in terms of manufacturer's specifications.</p> <p>1.4.Minor repair kit components are installed according to manufacturer's specifications and Occupational Health and Safety (OHS) requirements.</p> <p>1.5.Faulty comb beds are checked and the required scope of repairs is assessed.</p> <p>1.6.The need for a technician to repair the fault is determined.</p> <p>1.7.Repairs are carried out according to manufacturer's specifications and OHS requirements.</p> <p>1.8.Repairs by a technician are arranged as required.</p>
2. Service handpiece	<p>2.1.Handpiece components are adjusted to maintain operational performance.</p> <p>2.2.Handpiece is lubricated to manufacturer's specifications.</p> <p>2.3.Components requiring periodic replacement are installed according to manufacturer's specifications.</p> <p>2.4.Wear and tear on handpiece is identified in terms of effects on performance.</p> <p>2.5.Safety components are installed and checked before operation of the handpiece.</p> <p>2.6.Handpiece is run and checked prior to use to</p>

ELEMENT	PERFORMANCE CRITERIA
	determine safe operational performance.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify OHS hazards and implement safe work procedures
- identify worn and faulty handpiece components
- install minor repair kit components
- service handpieces
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- terminology and assembly procedures for handpieces
- maintenance and servicing requirements for shearing handpieces
- components of a shearing handpiece
- types of combs and cutters to use under different conditions
- OHS policies and practices in the wool shed before and during shearing and crutching
- enterprise procedures for disposal of waste.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Recognise and correct faults in shearing technique	1.1. Analyse shearing technique. 1.2. Recognise and correct faults in sheep position, footwork and free hand use. 1.3. Recognise and correct faults in the number of blows and their placement. 1.4. Improve co-ordination of footwork, free hand use, sheep control and blow placement.
2. Apply techniques to increase shearing speed and accuracy	2.1. Increase speed at which the handpiece is pushed forward and returned between blow placements. 2.2. Improve the power, direction and manoeuvrability applied at the increased speed. 2.3. Improve rhythm at the increased speed. 2.4. Maintain calm temperament for 8-hour working day. 2.5. Recognise the importance of stamina and fitness in improvement of output consistency.
3. Shear required number of sheep in an eight hour day working day to quality standard of the industry for both sheep and wool	3.1. Demonstrate safety procedures during shearing in relation to people and sheep. 3.2. Avoid excessive wool contamination and damage to the wool. 3.3. Shear 120 adult merino sheep or equivalent using identified method and positions in line with industry standards in a normal eight-hour working day. 3.4. Use correct movement of feet and hands, and maintain correct positioning to the downtube. 3.5. Release sheep at increased speed in line with industry and enterprise requirements. 3.6. Comply with Occupational Health and Safety

ELEMENT	PERFORMANCE CRITERIA
	(OHS), animal welfare and industry and enterprise quality requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- select use and maintain shearing equipment
- avoid contamination, second cuts and damage to animals
- shear sufficient sheep within eight hours to match skill level of a professional shearer
- analyse and improve on improver shearer level
- shear with co-ordination and rhythm
- stitch wounds
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, and sharpen combs and cutters
- work in a team as a team member
- review quality of own work
- tally shorn sheep count
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- types of shearing sheds, boards and catching pens
- service and maintenance of handpieces
- industry agreed shearing techniques and positions and method of shearing
- grinding procedures

**REQUIRED SKILLS AND KNOWLEDGE**

- safe handling techniques for catching, dragging, shearing and releasing sheep
- animal welfare requirements in relation to sheep
- sheep behaviour
- shearing clothing and equipment and when and how it should be used
- Federal Pastoral Industry Award and/or State Shearing Award of Queensland or Western Australian Shearing Contractors Award
- relevant State/Territory legislation and awards, regulations and codes of practice with regard to workplace OHS and animal welfare.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- select, use and maintain shearing equipment
- avoid contamination, second cuts and damage to wool and sheep
- recognise problem and diseased sheep and apply treatments accordingly
- shear sufficient sheep within eight hours to match skill level of a professional shearer
- analyse and build skills from improver shearer level.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Breeds of sheep may include:

all ages and genders including:

- rams
- ewes
- wethers
- lambs
- hoggets
- stags.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain shearing control, coordination and rhythm	1.1. Maintain consistent rhythm for 8-hour working day. 1.2. Maintain coordination of footwork to assist control and blows placement for 8-hour working day. 1.3. Analyse eye to hand coordination to optimise consistent blow placement.
2. Maintain shearing output	2.1. Shearing output and quality are maintained to meet expectation of the grower, contractor and self in terms of shearing conditions. 2.2. Shearing output and quality are maintained in terms of minimum industry output requirements and minimum industry quality requirements. 2.3. Evaluate current stamina/fitness program, including eating, exercise, back care, fluid intake and rest periods, for means of improvement maintaining shearing performance.

## Required Skills and Knowledge

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
This section describes the skills and knowledge required for this unit.
<b>Required skills</b>
<ul style="list-style-type: none"> <li>identify hazards and implement risk controls</li> <li>prepare and set up equipment to maintain optimum shearing output</li> </ul>

## REQUIRED SKILLS AND KNOWLEDGE

- maintain application of improved techniques
- maintain speed and accuracy
- assess and monitor the shearing conditions and environment
- maintain control, coordination, rhythm and output during shearing
- work in a team as a team member
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- anatomy of all types of sheep
- animal welfare requirements in relation to sheep
- sheep behaviour
- personal protective clothing and equipment and when and how it should be used
- Federal Pastoral Industry Award and/or State Shearing Award of Queensland or Western Australian Shearing Contractors Award.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Monitor weather conditions	<p>1.1. Weather is monitored during and post-shearing operations, and work programs revised in response to changing circumstances.</p> <p>1.2. Adverse weather conditions are identified and the likely impacts on livestock, feed and property assessed and reported according to enterprise requirements.</p> <p>1.3. Appropriate actions are determined to minimise loss or damage to livestock in/during adverse weather conditions according to enterprise requirements.</p>
2. Assess and monitor livestock condition	<p>2.1. Livestock condition and health status is assessed and recorded according to industry and enterprise requirements.</p> <p>2.2. Abnormal behaviour or evidence of sickness is identified and reported for remedial action according to enterprise requirements.</p> <p>2.3. Water and feed requirements for livestock are determined and provided, and supplementary feeding arranged as required.</p>
3. Maintain livestock environment	<p>3.1. Livestock yards and facilities are clean, secure and safe and maintained according to enterprise requirements.</p> <p>3.2. Suitable shelter for shorn livestock is maintained to prevent losses according to animal welfare requirements.</p> <p>3.3. Existing and potential hazards are recognised and controlled according to Occupational Health and Safety (OHS) and enterprise requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Complete post-shearing operations	4.1.Environmental implications associated with shearing activities are monitored and controlled. 4.2.Shearing facilities and equipment are cleaned and waste is disposed of according to enterprise environmental requirements. 4.3.Relevant information is recorded and reported according to enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- relate weather conditions to livestock requirements
- prepare contingency plan and anticipate emergency action
- handle livestock with due care
- weigh livestock and assess condition
- observe and monitor livestock behaviour, health and condition
- read and interpret weather information
- calculate livestock numbers and calculate and measure feed requirements
- provide feed and water
- rug animals where required
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- impacts of adverse weather conditions on shorn livestock
- physiological conditions brought on by stress, and treatment of same
- types and constructs of livestock shelter
- livestock handling techniques
- condition scoring
- appropriate types of feed for stressed livestock

**REQUIRED SKILLS AND KNOWLEDGE**

- environmental and animal welfare codes of practice with regard to livestock production
- OHS and animal welfare legislative requirements
- national codes of practice for the Shearing Industry (Health, Safety and Welfare standards).

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- determine livestock requirements for weather conditions
- prepare a contingency plan for bad weather and anticipate emergency action
- handle livestock with due care and provide feed and water
- observe and monitor livestock behaviour health and condition.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Shearing may include:	<ul style="list-style-type: none"> <li>shorn livestock of all breeds and types.</li> </ul>

## AHCSHG307A Plan and prepare for alpaca shearing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the preparation involved prior to alpaca shearing and defines the standard required to: develop a shearing work plan; ensure that all required planning and preparation for shearing are completed; set up facilities for alpaca shearing; arrange employment and communicate with shearers and shed staff; work safely with and around alpacas according to established work plan.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to an alpaca stud farm owner or employee who will either be shearing the stud's animal fleece or working with a specialist shearer. Work will be carried out under minimal or no supervision according to a work plan.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Complete work contracts for shearers and shed staff	<p>1.1. Arrangements are made in advance to obtain shearing services.</p> <p>1.2. Terms and conditions of employment or engagement are agreed and checked against the award or other accepted arrangements.</p> <p>1.3. Where employment is arranged, employment terms and conditions are written into an employment contract and are signed by employer and employees.</p>
2. Develop work plan for shearing day	<p>2.1. Shearing work plan is discussed, developed, agreed and documented with shearing team.</p> <p>2.2. Occupational Health and Safety (OHS) hazards relevant to the preparation and conduct of shearing are identified and documented in work plan and appropriate action is taken to minimise risks.</p> <p>2.3. Work is carried out according to work plan.</p> <p>2.4. Work plan is reviewed with shearing team and any required improvements are noted for future action.</p>
3. Check shearing equipment	<p>3.1. Work plan is used to identify and obtain all equipment and supplies necessary for shearing.</p> <p>3.2. Equipment required for shearing is checked and prepared according to enterprise procedures to ensure it is clean, set up and functioning correctly.</p>
4. Ensure shed and yards are prepared for shearing	<p>4.1. Shearing shed is checked and cleaned prior to commencement of shearing, ensuring enterprise quality standards.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2. Yards are checked and cleaned prior to commencement of shearing, ensuring enterprise quality standards.</p> <p>4.3. Sources of alpaca fibre contamination are removed according to enterprise and industry quality standards.</p> <p>4.4. Safety hazards are reported to fibre grower or shed manager.</p>
5. Pen up alpacas	<p>5.1. Alpacas are moved according to shearing sequence, and OHS, animal welfare and enterprise requirements.</p> <p>5.2. Alpacas are penned by mobs, according to work plan.</p> <p>5.3. Pen density is determined to avoid crushing, trampling or soiling of alpaca fibre.</p> <p>5.4. Gates are secured to prevent mixing of mobs or escape of alpacas.</p> <p>5.5. Alpaca numbers are monitored in holding pens to ensure continuous supply to shearer.</p> <p>5.6. Pens are monitored to maintain alpaca in standing position to avoid soiling of alpaca fibre.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- carrying out cleaning and decontamination of pens and shearing shed to industry standards
- moving alpacas according to OHS, animal welfare and enterprise requirements
- mustering and drafting alpacas into pens according to enterprise and industry standards
- operating any necessary equipment to industry standards
- using industry-accepted alpaca handling techniques
- using safe and environmentally responsible workplace practices
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible

**REQUIRED SKILLS AND KNOWLEDGE**

information collected and select and apply procedures for a range of tasks

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- Alpaca Industry Best Practice Standards for Harvesting of Alpaca Fibre
- elements of effective and appropriate alpaca shearing work plans
- equipment requirements for alpaca shearing
- how to clean and decontaminate sheds and pens
- industry-accepted alpaca handling and moving techniques
- personal protective equipment and when and how it should be used
- relevant industry awards and conditions
- relevant state and territory legislation regulations and codes of practice with regard to workplace OHS.
- animal welfare requirements under the code of practice.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- develop a shearing work plan
- ensure that all required planning and preparation for shearing are completed
- set up facilities for alpaca shearing
- arrange employment and communicate with shearers

<b>EVIDENCE GUIDE</b>	
	and shed staff <ul style="list-style-type: none"> <li>work safely with and around alpacas according to established work plan.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Shearing may include:	<ul style="list-style-type: none"> <li>all strains and classes of alpacas.</li> </ul>

## AHCSHG401A Apply advanced shearing techniques

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers applying advanced shearing techniques and defines the standard required to: prepare and set up equipment to optimise shearing output; assess and monitor a diverse range of shearing conditions and environments; maintain control, co-ordination, rhythm, high quality performance and output during shearing.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to shearers who demonstrate a high level of professional skill.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare and set up equipment to optimise shearing output	<p>1.1. Range and condition of equipment available for selection meets anticipated shearing conditions.</p> <p>1.2. Equipment is selected and set up based on the assessment of shearing conditions to ensure the optimum yield and shearing throughput within Occupational Health and Safety (OHS) requirements.</p> <p>1.3. Equipment performance is monitored and adjustments are initiated to maintain optimum shearing throughput.</p>
2. Assess and monitor the shearing conditions and environment	<p>2.1. The style and approach adopted for the shear are appropriate to the shearing conditions, and maintain the quality and throughput at a level that meets enterprise requirements.</p> <p>2.2. Approaches for mitigating adverse shearing conditions are adopted prior to and during the shearing.</p> <p>2.3. Monitoring and assessment of the shearing environment are undertaken with consideration of the whole wool harvesting operation.</p> <p>2.4. Potential and existing hazards are identified and resolved to ensure the quality and throughput are at a level that meets grower and contractor expectations.</p> <p>2.5. Opportunities to support and encourage the performance of other shearers are identified and constructively responded to while maintaining own output.</p>
3. Maintain control, rhythm and output	<p>3.1. Personal position and shearing method is adapted to accommodate limitations in equipment performance</p>

ELEMENT	PERFORMANCE CRITERIA
during shearing	<p>and set up.</p> <p>3.2. Timing, length and width of blows optimise selected shearing pattern.</p> <p>3.3. Blow commencement and finish positions are economical of effort and reflect the shortest route.</p> <p>3.4. Blow placement, body work and sheep positioning combine to represent sustainable shearing effort and output.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- prepare and set up equipment to optimise shearing output
- assess and monitor a diverse range of shearing conditions and environments
- maintain control, co-ordination, rhythm, high quality performance and output during shearing
- work in a team as a piece worker
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques, and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- anatomy of all types of sheep

**REQUIRED SKILLS AND KNOWLEDGE**

- sheep diseases
- animal welfare requirements in relation to sheep
- sheep behaviour
- personal protective clothing and equipment, and when and how it should be used
- Federal Pastoral Industry Award and/or State Shearing Award of Queensland, or Western Australian Shearing Contractors Award
- relevant State/Territory legislation and awards, regulations and codes of practice with regard to workplace OHS and animal welfare.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare and set up equipment to optimise shearing output
- assess and monitor a diverse range of shearing conditions and environments
- maintain control, co-ordination, rhythm, high quality performance and output during shearing.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## AHCSHG402A Conduct equipment experting for machine shearing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers conducting equipment experting for machine shearing and defines the standard required to: trim and finish combs; scallop combs.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to professional shearers.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Trim and finish combs	1.1. Signs of non-optimal equipment performance are identified and acted upon. 1.2. The trim and finish meet the requirements of the current shearing task. 1.3. Control of comb and tools is maintained throughout the experting process in accordance with Occupational Health and Safety (OHS) requirements. 1.4. Comb is adapted in a form that meets individual shearing style.
2. Scallop comb	2.1. The principles and method of scalloping are recognised and applied. 2.2. The interrelationship between correctly scalloped combs and shearing performance is determined in terms of density of wool, time of year, and breed. 2.3. Combs are scalloped to meet the shearing style of individual shearers.

## Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
<b>Required skills</b>
<ul style="list-style-type: none"> <li>• trim and finish combs</li> <li>• scallop combs</li> <li>• identify hazards and implement safe work practices</li> <li>• use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly</li> </ul>

**REQUIRED SKILLS AND KNOWLEDGE**

information collected and select and apply procedures to a range of tasks

- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- types of combs and cutters
- trimming and finishing techniques
- tools and equipment used in experting
- OHS legislation and enterprise procedures related to experting
- scalloping techniques
- assessing relationship of comb preparation to shearing performance.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- trim and finish combs
- scallop combs.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## AHCSHG404A Manage shearing and crutching operations

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the management of shearing and crutching operations and defines the standard required to: prepare for shearing; organise mobs into order of shearing; supervise clip preparation and pressing; identify and remove potential sources of contamination; organise mob cut outs and maintain supply of livestock; complete clip documentation and provide feedback to grower.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to professional wool classers or shed managers.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan and implement shearing and crutching operations	<p>1.1.Flock owner/manager is consulted about requirements and informed of planning issues.</p> <p>1.2.Order of mobs is determined for shearing and crutching according to enterprise requirements.</p> <p>1.3.Staffing needs are determined according to legislative requirements and negotiated with grower/contractor.</p> <p>1.4.Staff are allocated duties and given necessary directions. Shed equipment and materials are arranged in accordance with Occupational Health and Safety (OHS) requirements and quality management system.</p> <p>1.5.Shearing/crutching plan is implemented and adjusted as conditions change.</p>
2. Implement shearing plan and monitor work flow	<p>2.1.Board is kept clear and fleeces are thrown ready for skirting.</p> <p>2.2.Non-fleece wools are removed and packed as directed.</p> <p>2.3.Shed staff are given directions for skirting, and fleece to skirting ratio is monitored.</p> <p>2.4.Directions are issued for closing off bins and lines for mob cut-outs.</p> <p>2.5.Enterprise requirements with regard to safe workplace and positive environmental practices are complied with according to OHS and quality management system.</p>
3. Supervise wool	<p>3.1.Wool presser is directed on order for pressing and</p>

ELEMENT	PERFORMANCE CRITERIA
pressing	<p>procedures to minimise contamination.</p> <p>3.2. Wool presser is consulted to monitor the rate of build-up in lines.</p> <p>3.3. Pressing instructions are issued which reduce mixed bales, while meeting code of practice requirements for uniformity within lines.</p> <p>3.4. Bale weights are monitored to ensure efficiencies are achieved for the grower.</p> <p>3.5. Bales are branded in line with code of practice requirements.</p> <p>3.6. Wool book is monitored for accuracy, legibility and kept up to date at all times.</p>
4. Provide feedback to grower on clip performance and shearing and crutching operations	<p>4.1. Staff performance in clip preparation is reported on.</p> <p>4.2. Mob characteristics are related to work flow and clip preparation.</p> <p>4.3. Possible improvements to wool handling facilities are reported.</p> <p>4.4. Equipment effectiveness and maintenance requirements are reported to grower.</p> <p>4.5. Lines made and bale details are related to mob characteristics.</p> <p>4.6. Lotting advice is explained to grower/ manager.</p> <p>4.7. Wool clip documentation is completed and presented to grower for signature.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- plan and implement shearing operations
- organise and schedule staff and work tasks
- supervise staff and monitor productivity
- identify and remove potential workplace hazards
- implement risk management strategies
- monitor wool flow and clip preparation

**REQUIRED SKILLS AND KNOWLEDGE**

- press wool, record bale details and brand bales
- monitor environmental impacts and implement control measures
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- supervisory procedures with regard to operations and personnel
- staff management including team building and conflict resolution
- industry requirements with regard to hygiene and safety for shearing facilities and equipment
- planning and implementation processes
- completing workplace documentation
- employment agreements, processes and requirements
- OHS and environmental legislation, codes of practice and enterprise requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare for shearing

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>organise mobs into order of shearing</li> <li>supervise clip preparation and pressing</li> <li>identify and remove potential sources of contamination</li> <li>organise mob cut outs and maintain supply of livestock</li> <li>complete clip documentation and provide feedback to grower.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine staffing requirements	1.1. Assessments are made of the numbers and types of staff required for wool harvesting. 1.2. Lists of duties are drawn up for additional staff. 1.3. Required capabilities of staff are defined prior to selection.
2. Seek applicants	2.1. Informal enquiries are made and vacancies advertised. 2.2. Possible staff are followed up by telephone and in person.
3. Select staff	3.1. Potential staff are interviewed against selection criteria. 3.2. Staff are selected having due regard to equal employment opportunity.
4. Induct staff	4.1. New staff are briefed on relevant awards, enterprise agreements, pay rates and related administration. 4.2. New staff are advised of terms and conditions and signed on. 4.3. New staff are familiarised with the workplace and colleagues. 4.4. Occupational Health and Safety (OHS) legislation and requirements are outlined in detail to staff.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

## REQUIRED SKILLS AND KNOWLEDGE

- determine staff needs
- select and induct staff
- carry out induction processes
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- industry awards and conditions
- duty statements for each category of wool harvesting staff
- interviewing techniques
- advertising mechanisms for staff vacancies
- telephone techniques
- equal employment opportunity legislation
- staff selection process
- induction procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

ELEMENT	PERFORMANCE CRITERIA
1. Maintain staff records	1.1.All employees are signed on and declaration forms signed. 1.2.Employment agreements are arranged. 1.3.Work is recorded accurately. 1.4.Units of work are totalled for each employee. 1.5.Injury records are maintained. 1.6.Tax file and superannuation numbers and collected and maintained confidentially.
2. Calculate earnings	2.1.Relevant awards and current pay rates are obtained. 2.2.Employment contracts are followed. 2.3.Gross earnings are calculated for each employee.
3. Calculate deductions and nett pay	3.1.Taxation deductions are calculated. 3.2.Group certificates are completed. 3.3.Tax is forwarded to the Australian Taxation Office. 3.4.Occupational superannuation is calculated and documented.
4. Pay staff	4.1.Pays are prepared and staff paid in accordance with the relevant Award. 4.2.Cash advances are arranged on request.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- maintain staff records

## REQUIRED SKILLS AND KNOWLEDGE

- calculate earnings, deductions and nett pay
- prepare pays and pay slips
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- maintaining records
- contract duplicates
- group certificate copies
- work records
- books of account
- GST requirements
- PAYG.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- maintain staff records
- calculate earnings, deductions and nett pays
- prepare pays for workers.

<b>EVIDENCE GUIDE</b>	
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Payment of wages may include:	<ul style="list-style-type: none"> <li>all awards and legislation that deal with the payment of wages and withholding of taxation and superannuation.</li> </ul>

### Unit Sector(s)

## AHCSHG407A Oversee and instruct shed staff

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the overseeing and instructing of shed staff and defines the standard required to: assess levels of staff competency against job requirements; designate and communicate staff roles and responsibilities; provide training to undertake work activities and to develop competence in staff; implement strategies to foster teamwork; negotiate with staff and deal with conflict; implement environmental policies in the shearing workplace where appropriate; monitor team and individual work performance and provide feedback to staff.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies owner classer or wool classer to oversee and instruct shed staff in preparing their clip.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Define work shed roles	<p>1.1.Roles and responsibilities of shed staff are clearly defined.</p> <p>1.2.Skills of shed staff are accurately identified and matched with available tasks and duties.</p> <p>1.3.Requirements of job duties and the industry code of practice are clearly identified and communicated to shed staff.</p> <p>1.4.Occupational Health and Safety (OHS) policy and procedures are effectively communicated and implemented.</p>
2. Induct shed staff	<p>2.1.OHS hazards are identified, risks assessed and suitable controls are implemented.</p> <p>2.2.The details of shearing, including flock and mob details, are communicated to staff.</p> <p>2.3.New staff are briefed on relevant awards, enterprise agreements, pay rates and related administration.</p> <p>2.4.New staff are advised of terms and conditions and signed on.</p> <p>2.5.New staff are familiarised with the workplace and colleagues.</p>
3. Support on-the-job training	<p>3.1.Training needs are determined through skills analysis and monitoring work performance.</p> <p>3.2.Practical skills are explained and demonstrated where required Training is provided based on clear explanations and practical demonstration of skills</p> <p>3.3.Performance required is clearly indicated to the learner.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.4. Training is delivered in line with operational requirements.
4. Monitor work performance of shed staff	4.1. Board staff are allocated responsibilities and their performance is monitored. 4.2. Skirting procedures are explained and skirtings are monitored for compliance to instructions. 4.3. Requirements for separating specific parts of the fleece are clearly described to wool handlers and justified by Code of Practice or processor requirements. 4.4. Condition of wool room is monitored to minimise contamination of all wool lines. 4.5. All bending and lifting that is required is done according to safe working practices and using the available safety equipment.
5. Provide follow-up and support to shed staff	5.1. Staff responsibilities are adjusted to allow for practice and skills development where required. 5.2. Coaching is provided to assist learning. 5.3. Discussion and information sharing is routinely used to communicate requirements of work activities through a participative approach. 5.4. Feedback is clear, constructive and provided promptly to individuals to maintain high quality clip preparation. 5.5. Disagreements and conflicts are managed constructively using appropriate conflict management strategies.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- identify and provide training requirements
- plan and monitor ongoing training needs

## REQUIRED SKILLS AND KNOWLEDGE

- demonstrate effective time management
- demonstrate safe workplace and environmentally responsible practices
- solve problems (staffing, resources)
- pen sheep
- perform board person duties
- pick up fleeces
- handle non fleece wool
- skirt and roll fleeces
- operate the wool press
- weigh, brand and stack bales safely
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## Required knowledge

- industry awards and conditions
- duty statements for each category of wool harvesting staff
- shearing industry Awards and personnel processes
- principles of team work, negotiation and time management
- conflict management techniques
- enterprise training requirements and processes
- relevant State/Territory legislation, regulations and Codes of Practice
- the use and control of hazardous substances and machinery and equipment
- hazard identification, assessment and control
- sheep behaviour
- animal welfare
- board duties
- contamination
- parts of the fleece
- non fleece wool
- wool press operating procedures
- pressing requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>

## AHCSOL201A Determine basic properties of soil and/or growing media

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of determining the basic properties of soil or soil-less growing media and defines the standard required to: undertake basic soil/media analysis descriptive tests for soil texture, salinity and pH; use basic proprietary soil testing equipment for testing pH and salinity; determine basic soil structure with a view to using soil structure ameliorants.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to determining basic properties of soil/growing media and is usually conducted within established routines, methods and procedures.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Collect soil/media samples for testing	<p>1.1. Tools and materials for collecting soil/media samples are prepared.</p> <p>1.2. Area from which soil/media samples are to be collected is identified from workplace records or supervisors instructions.</p> <p>1.3. Services are located using site plans and in consultation with the supervisor.</p> <p>1.4. Occupational Health and Safety (OHS) hazards are identified, risks assessed and controls implemented and reported to the supervisor.</p> <p>1.5. Suitable safety equipment and Personal Protective Equipment (PPE) are selected, used and maintained.</p> <p>1.6. Samples are taken randomly from the designated area according to recognised sampling techniques and are prepared for on site or off site analysis</p> <p>1.7. Samples are labelled and recorded according to organisational procedures.</p>
2. Perform basic soil/media test	<p>2.1. Soil profile is determined, where appropriate.</p> <p>2.2. Soils/media are tested or inspected for physical properties.</p> <p>2.3. Soils/media is tested for chemical properties.</p> <p>2.4. Results are recorded according to organisational procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect soil/media samples
- perform basic soil/media tests
- interpret results from own or laboratory results
- record and store information
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- soil sampling techniques
- soil/media physical properties
- soil/media chemical properties
- soil/media plant relationships
- basic soil/media field tests
- interpreting laboratory results
- techniques to ameliorate soil properties.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

<b>EVIDENCE GUIDE</b>	
<b>competency in this unit</b>	<p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• undertake basic soil/media analysis descriptive tests for soil texture, salinity and pH</li> <li>• use basic proprietary soil testing equipment for testing pH and salinity</li> <li>• determine basic soil structure with a view to using soil structure ameliorants.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

## AHCSOL301A Prepare growing media

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of determining the requirements of a growing media for various plants and preparing and storing the media in accordance with the production specifications and defines the standard required to: confirm specifications of growing media; prepare growing media; store growing media.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the preparation of growing media for growing plants. The preparation of growing media and is likely to be undertaken without supervision. General guidance may be sought.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Confirm specifications of growing media	<p>1.1. Various media components are investigated for specific plant requirements.</p> <p>1.2. Components of a growing media are determined by plant requirements and accepted industry practice.</p> <p>1.3. Nutrient requirements are determined for growing period.</p> <p>1.4. Different sources of nutrients are investigated for their suitability.</p> <p>1.5. Growing media analysed for chemical, physical and biological characteristics to determine suitability for plants.</p> <p>1.6. Sterilisation methods of the growing media are determined.</p>
2. Prepare and store growing media	<p>2.1. Growing media composition established.</p> <p>2.2. Work is undertaken according to OHS legislation and codes of practice requirements.</p> <p>2.3. Required equipment is maintained in a safe, clean and effective condition.</p> <p>2.4. Components are stored in a safe and hygienic manner and in a non-contaminated environment.</p> <p>2.5. Components are identified and weighed, mixed and incorporated into the growing media in accordance with production requirements.</p> <p>2.6. Waste is handled and disposed of safely in accordance with relevant legislation and Occupational Health and Safety (OHS) requirements.</p> <p>2.7. Work is undertaken according to OHS legislation</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>and codes of practice requirements.</p> <p>2.8. Media is stored in safe and hygienic manner in accordance with enterprise standards.</p> <p>2.9. Records are kept in accordance with enterprise standards.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect and analyse data
- interpret published research and historical records to identify acceptable media parameters
- interpret chemical labels
- record and store information
- weigh and measure volumes
- operate machinery
- co-ordinate own activities
- determine requirements and schedules of contractors and other work colleagues
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- requirements of a growing media
- ingredients used in the preparation of growing media
- properties of the various ingredients used in the preparation of the growing media
- physical, chemical and biological characteristics required of the media
- plant nutrition
- hygiene in the preparation and storage of the media
- alternative methods of incorporating ingredients into a growing media
- volume and weight determination
- OHS requirements in relation to chemical use.

## Evidence Guide

# AHCSOL302A Construct a soil profile

## Modification History

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of constructing soil profiles and defines the standard required to: determine construction requirements from plans; survey and create working plans for construction sites; excavate earthworks and establish working and finished levels; install drainage and sub-surface irrigation components; install sustainable soils and growing media; implement a construction project.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	This unit applies to the construction of new soil profiles in residential, commercial and public recreational open space development and residential and rural property development in new projects and in the complete renovation of existing soil profiles in urban and regional areas.
--------------------------------	---

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Survey the construction site	<p>1.1. Surveying equipment is set up and used according to industry standards.</p> <p>1.2. Existing levels are surveyed and temporary benchmark established. Details are recorded accurately and legibly according to industry standards.</p> <p>1.3. New levels are set according to specifications and pegs placed according to industry convention.</p> <p>1.4. Contour map with reduced levels and a cross section is developed and drawn using accepted industry symbols and mapping conventions.</p>
2. Prepare for construction work	<p>2.1. Enterprise work team, contractors and design consultants are identified and, where required, engaged.</p> <p>2.2. Work tasks are scheduled in a logical, timely and effective manner in consultation with the supervisor.</p> <p>2.3. Materials required are estimated and costed according to accepted industry practice and ordered.</p> <p>2.4. Plans for the new construction profile are obtained or developed.</p>
3. Set out site for construction	<p>3.1. Soil profile construction requiring set out.</p>
4. Excavate the	<p>4.1. Excess soil is removed and the construction site cleared with the stockpile being placed in a</p>

ELEMENT	PERFORMANCE CRITERIA
construction site	<p>designated area according to enterprise work procedures.</p> <p>4.2. The base is graded to the level and slope specified in the base design.</p> <p>4.3. The base of the profile is prepared over the entire site according to the construction plan.</p> <p>4.4. Sub-surface irrigation system components and fittings are installed to the required depth and design specified in the construction plan.</p> <p>4.5. Install drainage system.</p>
5. Install soil profile	<p>5.1. Quantities of material required are calculated and measured according to the construction plan.</p> <p>5.2. Soils and growing media are selected for sustainable use and according to the construction plan.</p> <p>5.3. Each profile layer is installed and compacted to reflect the final contour.</p> <p>5.4. The interface between profile layers is uniform and unbroken according to the construction plan.</p> <p>5.5. Soil amendments are prepared and implemented.</p> <p>5.6. The finishing soil surface is given a final levelling and consolidated, ready for planting, according to the construction plan and enterprise work procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- draft basic working plans
- survey site levels and dimensions
- install drainage and irrigation systems
- measure materials, interpret , survey and assess site measurements, and interpret and apply test results
- coordinate work group, contractors and own activities to sequentially and effectively complete construction in a timely and cost effective manner
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <p>information collected and select and apply procedures for a range of tasks</p> <ul style="list-style-type: none"> <li>• use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required</li> <li>• use numeracy skills to estimate, calculate and record routine workplace measures</li> <li>• use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• practical understanding of the range and use of materials, tools, equipment and machinery available for construction of soil profiles, including soil amendments and base construction materials</li> <li>• soil and growing media types suitable for sustainable landscapes</li> <li>• practical understanding of the range of construction methods that may be used to construct soil profiles and the association of construction methods with site limitations, environmental implications, and end use of the site</li> <li>• practical understanding of surveying principles and techniques</li> <li>• soil testing techniques and the application of results to the construction process</li> <li>• awareness of the comparative environmental implications associated with construction and excavation activity, drainage and irrigations systems, soil amendments and waste disposal procedures</li> <li>• AS4419-2003 and AS4454-2003.</li> </ul>

## Evidence Guide

## AHCSOL401A Sample soils and interpret results

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers sampling of soils and interpreting of soil test results and defines the standard required to: collect soil/media samples using appropriate sampling methodology; prepare soil/media samples for dispatch to soil analysis laboratory; receive and interpret analytic results; file and record analytic results for future use; implement a nutrient/nutrition program.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to those whose job role includes undertaking soil or growing media sampling and interpreting the results as a foundation for further horticultural operations such as nutrition programs and irrigation scheduling.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for soil sampling	<p>1.1.The soils to be surveyed, surveying activity and contractors are identified according to site plans and enterprise work procedures.</p> <p>1.2.Tools, equipment and machinery are selected according to site conditions, testing agency requirements and enterprise work procedures.</p> <p>1.3.If required, pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise work procedures.</p> <p>1.4.Areas of homogeneous soil types are identified for sampling.</p> <p>1.5.Services are located using site plans and in consultation with the supervisor.</p> <p>1.6.Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</p> <p>1.7.Suitable safety equipment and Personal Protective Equipment (PPE) are selected, used and maintained.</p> <p>1.8.A clean and safe work area is maintained throughout and on completion of work.</p>
2. Determine soil characteristics by performing soil sampling	<p>2.1.The density and depth for a representative sampling of the area are determined according to enterprise work procedures.</p> <p>2.2.Holes are excavated at identified sampling sites according to enterprise work procedures, OHS requirements and with due consideration of the environmental implications.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3. Samples for off-site testing are collected and prepared, packaged, accurately labelled and dispatched according to testing agency requirements and enterprise work procedures.</p> <p>2.4. The physical and chemical characteristics of the soil are determined according to investigative requirements and best practice guidelines.</p> <p>2.5. Sampling and testing tools and equipment are cleaned of all residues and returned to storage according to manufacturer's specifications and enterprise work procedures.</p> <p>2.6. Results are recorded in an established format according to enterprise work procedures.</p>
3. Interpret results of soil analysis	<p>3.1. The soil types of the sample area are classified according to standards for soil classification.</p> <p>3.2. The acceptable soil physical and chemical parameters for a specified plant are determined from published data and historical records.</p> <p>3.3. Collected analytical results are compared with acceptable physical and chemical parameters for a specified plant.</p> <p>3.4. Soil characteristics are evaluated to determine whether they can be altered to meet plant needs.</p> <p>3.5. The Readily Available Water (RAW) values for irrigation sites are determined according to industry standards and enterprise work procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate with work team members, supervisors and contractors, interpret and apply soil surveying specifications, utilise proforma reporting, analysis and work procedure documents, and understand soil surveying data
- measure distance, depth and spacing, calculate area, volume and RAW values, calibrate tools and equipment, and interpret analytical results
- coordinate own activities with the requirements and schedules of contractors and

**REQUIRED SKILLS AND KNOWLEDGE**

other work teams to sequentially and effectively complete surveying activities in a timely and cost effective manner

- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- practical understanding of the range of sample collection, testing and analytical methods that may be used to perform soil surveys, and the association of surveying methods with site conditions, environmental implications and intended horticultural use of the surveyed site
- the physical and chemical properties of soils in relation to their ability to support specified horticultural production
- the capacity of soils to provide water to plants
- the importance of organic matter in soil in relation to the intended horticultural use
- awareness of ameliorants and soil improvement techniques for addressing site limitations identified through surveying
- awareness of the comparative environmental implications associated with soil surveying activities and the application of analytical results.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• collect soil/media samples using appropriate sampling methodology</li> <li>• prepare soil/media samples for dispatch to soil analysis laboratory</li> <li>• receive and interpret analytic results</li> <li>• file and record analytic results for future use</li> <li>• implement a nutrient/nutrition program.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Soils may include:	<ul style="list-style-type: none"> <li>• all soil types used for horticultural and agricultural production.</li> </ul>
Soil tests may include:	<ul style="list-style-type: none"> <li>• a range of chemical analyses</li> <li>• structure and texture analysis</li> <li>• soil biology analysis.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Collect information for soil mapping	<p>1.1. Confirm soil samples were collected for off-site assessment by soil testing agencies using recommended procedures.</p> <p>1.2. The information on the physical characteristics of the soil is collected.</p> <p>1.3. The information on the chemical characteristics of the soil is collected.</p> <p>1.4. The information about biological characteristics of the soil is collected.</p> <p>1.5. The acceptable soil parameters for specified plants are determined from published data and historical records.</p> <p>1.6. Information about areas of cultural significance and habitats of biodiversity on the property is collected.</p> <p>1.7. Research outcomes are collated in accordance with enterprise record keeping procedures.</p>
2. Analyse soil information	<p>2.1. The soil types of the sample area are classified according to standards for soil classification.</p> <p>2.2. Collected results are compared with established parameters for actual or proposed land use and production.</p> <p>2.3. Soil characteristics are evaluated to determine whether they can be altered to meet land use needs.</p> <p>2.4. The Readily Available Water (RAW) values for irrigation sites are determined in line with industry standards.</p>
3. Plot topography and	3.1. Interpreted results are mapped in an established

ELEMENT	PERFORMANCE CRITERIA
soil survey data on property map	<p>format according to enterprise guidelines.</p> <p>3.2.Potential uses of the soil for purposes of land classing, land capability, areas of cultural significance and habitats of biodiversity are identified.</p> <p>3.3.Property boundaries and property features are defined.</p> <p>3.4.Paddocks or irrigation areas are identified.</p> <p>3.5.Contour or spot level information is plotted.</p> <p>3.6.Soil sampling sites are plotted on map.</p> <p>3.7.Soil profile and irrigation characteristics for each sampling site and/or irrigation area are described and indexed to the map.</p> <p>3.8.The RAW values for irrigation sites are indexed to the map.</p> <p>3.9.Areas of specific concern are plotted on the map and descriptions are indexed to the map.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret soil analyses results
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- interpret published data and historical records to identify acceptable soil parameters
- plot information on a map
- use soil and water testing techniques
- follow relevant enterprise Occupational Health and Safety (OHS) and environmental procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <ul style="list-style-type: none"> <li>• use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data</li> <li>• use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• methods and techniques of soil sampling</li> <li>• OHS and environmental legislative requirements and enterprise procedures</li> <li>• environmental impacts of irrigation, using water from any ground or underground source</li> <li>• soil types and profiles</li> <li>• physical and chemical properties of soils</li> <li>• nutrient availability in soils</li> <li>• soil analyses results</li> <li>• biodiversity habitats</li> <li>• cultural sites</li> <li>• soil quality factors</li> <li>• soil water retention testing techniques</li> <li>• water table and salinity</li> <li>• RAW.</li> </ul>

## Evidence Guide

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Conduct desktop assessment of the land and groundwater disturbing activity for potential and actual ASS risk	<p>1.1. Current/proposed land use established and documented following discussions with landholder and relevant consent authority.</p> <p>1.2. Site data assessed following industry guidelines and relevant consent authority standards.</p> <p>1.3. Compliance issues established/checked with relevant regulatory authority or environmental legislation and/or industry procedures.</p> <p>1.4. Site investigations communicated to proponent/landholder and concurrence is established to develop a management plan in accordance with relevant consent authority requirements.</p>
2. Develop ASS remediation/management strategy	<p>2.1. Field investigation and laboratory test data reviewed and matched to strategy options consistent with industry principles and relevant consent authority standards.</p> <p>2.2. ASS management options identified consistent with industry guidelines and relevant consent authority requirements.</p> <p>2.3. Remediation/management strategies identified and documented in consultation with the landholder/developer and relevant consent authority.</p>
3. Prepare an ASS site	3.1. Remediation/management strategies are checked

ELEMENT	PERFORMANCE CRITERIA
management plan	<p>against industry guidelines and relevant consent authority requirements.</p> <p>3.2.Design specifications for structures incorporated in management plan details.</p> <p>3.3.Monitoring strategies for the site are detailed in line with prevailing site factors and industry guidelines and relevant consent authority standards.</p> <p>3.4.On site responsibilities listed following industry guidelines and relevant consent authority requirements.</p> <p>3.5.Contingency procedures in accordance with industry guidelines and relevant consent authority requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- ability to assess field and laboratory results from AASS and PASS sites
- collaborate with designers and relevant consent authority
- develop remediation and management strategies
- develop monitoring strategies
- prepare works action plans
- prepare ASS management plans
- prepare reports on materials management and remediation and site rehabilitation to implement approved ASS plans
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan implementation	<p>1.1.Plans and specifications are reviewed and related to the works site.</p> <p>1.2.Work sequences are planned and recorded in line with proposed work schedule.</p> <p>1.3.Compliance with established regulatory planning and environmental legislation is maintained.</p>
2. Carry out environmental site induction	<p>2.1.Specific site environmental and OHS issues are communicated to all stakeholders following relevant work schedule and special requirements.</p> <p>2.2.Overall objectives of the project are defined to all stakeholders noting individual responsibilities and duty of care.</p> <p>2.3.Equipment operators, contractors and other staff are briefed on special aspects of performance relating to specific equipment, and handling of hazardous materials for their specific function in accordance with the approved plan.</p> <p>2.4.Monitoring requirements for the site is defined and individual responsibilities identified in accordance with the works schedule as stated in the approved</p>

ELEMENT	PERFORMANCE CRITERIA
	plan.
3. Direct implementation of planned works	3.1. Equipment, materials and personnel deployment ensures works stages are completed in accordance with the approved plan. 3.2. Works specifications and regulatory requirements maintained in accordance with the approved plan. 3.3. Contingency procedures implemented in accordance with the approved plan.
4. Monitor works specifications and site environment	4.1. Continual review of works and site environment to ensure specifications, contracts and targets are in accordance with the approved plan. 4.2. Instructions to staff and contractors to ensure compliance with the approved plan. 4.3. Modifications are made to works in consultation with the approved plan provider.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- achieve efficient implementation of works
- protect natural areas from damage and pollution
- direct the implementation of planned works
- monitor work specifications and environmental requirements
- supervise staff in operations
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- relevant environmental, planning and groundwater legislation
- principles of duty of care and due diligence
- ASS and soil chemistry
- subsurface and surface drainage principles and systems
- appropriate supervision techniques
- OHS and environmental legislation, codes of practice and enterprise procedures
- work sequence knowledge
- equipment most suited to ASS site remediation and management
- Quality Assurance systems, processes and practices
- staff supervision.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- review ASS management plan and plan the work
- document and communicate objectives of the project, as well as environmental and OHS issues, to stakeholders and individual contractors
- carry out the works identified in the ASS management plan in compliance with regulatory requirements and work specifications
- monitor completed works and carry out modifications in consultation with the approved plan provider where necessary.

#### Context of and specific resources for

Competency requires the application of work practices under work conditions. Selection and use of resources

## AHCSOL501A Monitor and manage soils for production

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of monitoring and managing soils in an agricultural or horticultural production environment and defines the standard required to: interpret soil analytical data for the purposes of developing management or production plans; develop and conduct soil improvement programs; review and analyse ongoing soil monitoring programs; document the soil management plan or production plan.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit of competency applies to the role of land managers in agriculture and horticulture production systems and covers the improvement and ongoing management of soils.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Research information about soil	<p>1.1. Soil type, characteristics and properties are researched and analysed for relevance to enterprise requirements.</p> <p>1.2. Particular soil properties, identified as relevant to the enterprise, are researched for further enquiry.</p> <p>1.3. Acceptable soil physical and chemical parameters for a specified crop are determined from published data and historical records.</p> <p>1.4. Relevant properties of soils and areas of homogenous soils are identified for testing.</p> <p>1.5. Soil sampling is conducted across a representative sampling area of the whole production area.</p> <p>1.6. Soil samples are collected, packaged, accurately labelled and dispatched according to testing agency requirements.</p>
2. Apply information from soil testing to production and/or management plan	<p>2.1. Soil types of the sample area are classified according to standards for soil classification.</p> <p>2.2. Results from soil testing are compared with the identified soil physical and chemical parameters for the specified crop.</p> <p>2.3. Results from soil testing are compared with soil records and production history.</p> <p>2.4. The comparative results are reviewed and differences recorded and charted.</p> <p>2.5. Production or management plan is developed and testing results and comparative results are recorded.</p>
3. Develop soil	3.1. Soil properties capable of being ameliorated are

ELEMENT	PERFORMANCE CRITERIA
amendment practices	<p>identified for action.</p> <p>3.2.Relevant soil ameliorants or cultural practices are identified and included in production/management plan.</p> <p>3.3.Soil ameliorants are quantified and purchased.</p> <p>3.4.Soil ameliorating activities are costed and included in production/management plan.</p>
4. Monitor soil amendment practices	<p>4.1.Areas of ameliorant activities are sampled for testing across a representative sampling area.</p> <p>4.2.Results are analysed to measure the performance of soil amelioration activities.</p> <p>4.3.Monitoring program is recorded and included in the production/management plan.</p>
5. Review and document the soil management plan	<p>5.1.Analysis of the sampling methods is recorded and methods amended as required.</p> <p>5.2.Monitoring program is reviewed, amended for effectiveness and recorded.</p> <p>5.3.Production/management plan is documented incorporating reviews and reports.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research information
- prepare production/management plans for crops/plants
- collect soil/media samples
- interpret results from laboratory tests
- record and store information
- review methods and practices
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views

**REQUIRED SKILLS AND KNOWLEDGE**

- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- soil types
- soil physical properties
- soil chemical properties
- plant nutrition through soil management
- soil conservation strategies and sustainable production techniques
- basic soil field tests
- soil sampling techniques
- interpreting laboratory results
- techniques to ameliorate soil properties
- record keeping.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- interpret soil analytical data for the purposes of developing management or production plans
- develop and conduct soil improvement programs
- review and analyse ongoing soil monitoring programs
- document the soil management plan or production plan.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Select and prepare a screen cleaning machine for use</p>	<p>1.1. Specialised screen cleaning machinery and equipment is selected and prepared to job requirements and confirmed against work plan.</p> <p>1.2. Routine pre-operational checks of screen cleaning machinery and equipment are completed to manufacturer's specifications and enterprise requirements.</p> <p>1.3. Occupational Health and Safety (OHS) hazards in the workplace are recognised and risks assessed and minimised according to enterprise requirements.</p>
<p>2. Operate a screen cleaning machine</p>	<p>2.1. Machinery and equipment is operated in a safe and controlled manner and monitored for performance and efficiency.</p> <p>2.2. Risks to self, others and the environment are anticipated and minimisation strategies implemented accordingly.</p> <p>2.3. Suitable personal protective clothing and equipment is selected, used, maintained and stored according to OHS requirements.</p> <p>2.4. Environmental implications associated with machinery operation are identified, assessed and reported to the supervisor.</p>
<p>3. Complete and report on the seed cleaning operation</p>	<p>3.1. Shut-down procedures for screen cleaning machinery and equipment are completed to manufacturer's specifications and enterprise requirements.</p> <p>3.2. Screen cleaning machinery and equipment operational records are completed and maintained according to enterprise requirements.</p> <p>3.3. Malfunctions, faults, observation of irregular performance to screen cleaning machinery and equipment are detailed and reported according to</p>

ELEMENT	PERFORMANCE CRITERIA
	enterprise requirements. 3.4. Screen cleaning machinery and equipment is cleaned, secured and stored according to OHS and enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- define the processing requirements of a seed processing job
- determine the limitations of seed cleaning machinery and make adjustments to achieve a desired outcome
- disassemble a screen cleaner
- clean a screen cleaner
- assemble a screen cleaner for operation
- select and place screens appropriate for the cleaning task
- assess the input and outputs of the screen cleaner
- make adjustments to the screen cleaner settings to maximise the output
- operate the screen cleaner effectively
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the principles of a screen cleaner
- the different types of screen cleaners available for the task
- the adjustment and effect of airflow within each of the screen cleaner's chambers
- the correct clean down procedure
- possible contamination points
- screen types and designs

**REQUIRED SKILLS AND KNOWLEDGE**

- ball trays and their purpose
- required maintenance and usual wear points
- machinery safety
- types of impurities and the machine's ability to handle impurities
- documentation associated with seed cleaning.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- select screens and prepare machinery for use
- operate a screen cleaner
- complete and report on cleaning operation.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Use of screen cleaners may include:

- usage for a wide range of commercially grown seed and include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• aspirators</li> <li>• pre-cleaners</li> <li>• air screen cleaners</li> <li>• any variation of these machines, both reciprocating and rotary, with or without additions to enhance performance.</li> </ul>
Screen cleaning of seed may occur	<ul style="list-style-type: none"> <li>• on farms using mobile screen cleaners</li> <li>• in seed processing plants.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Select and prepare an indent cylinder seed processing machine for use	1.1. An indent shell or cylinder is selected and prepared to job requirements and confirmed against work plan. 1.2. Routine pre-operational checks of the machine are completed to manufacturers' specifications and enterprise requirements. 1.3. Occupational Health and Safety (OHS) hazards in the workplace are recognised, risk assessed and minimised according to enterprise requirements.
2. Operate an indent cylinder seed processing machine	2.1. The indent cylinder machine is operated in a safe and controlled manner and monitored for performance and efficiency. 2.2. Risks to self, others and the environment are anticipated and minimisation strategies implemented accordingly. 2.3. Suitable personal protective clothing and equipment is selected, used, maintained and stored according to OHS requirements. 2.4. Environmental implications associated with machinery operation are identified, assessed and reported to the supervisor.
3. Complete and report on seed cleaning machinery operation	3.1. Shut-down procedures for the machine are completed to manufacturer's specifications and enterprise requirements. 3.2. Operational records are completed and maintained according to enterprise requirements. 3.3. Malfunctions, faults, observation of irregular performance and damage to the machine are detailed

ELEMENT	PERFORMANCE CRITERIA
	<p>and reported according to enterprise requirements.</p> <p>3.4. The machine is cleaned and the shells or cylinder are stored according to OHS and enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- disassemble an indent cylinder length separator
- select the correct indent cylinder type and size required for the task
- assemble an indent cylinder length separator for operation
- assess the product input and outputs of the indent cylinder length separator
- determine the limitations of an indent cylinder machine and make adjustments to achieve a desired outcome
- operate the indent cylinder length separator effectively
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the principles of a indent cylinder length separator
- indent cylinder types and sizes
- machine design and configurations
- operation of a indent cylinder length separator
- machinery safety.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>In order to confer competency, evidence must prove that the candidate is able to:</p> <ul style="list-style-type: none"> <li>• select and prepare an indent cylinder seed processing machine for use</li> <li>• operate an indent cylinder seed processing machine</li> <li>• complete and report on seed cleaning machinery operations.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Indent cylinder seed processing may include:	<ul style="list-style-type: none"> <li>• any separator with the purpose of separating seed or seed contaminants by their length</li> <li>• any variation of these machines, with or without additions, to enhance performance.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set up and prepare gravity table for use	1.1. A gravity table is set up and prepared to job requirements and confirmed against work plan. 1.2. Routine pre-operational checks of the gravity table are completed to manufacturer's specifications and enterprise requirements. 1.3. Occupational Health and Safety (OHS) hazards in the workplace are recognised, risk assessed and minimised according to enterprise requirements.
2. Operate a gravity table to process seed	2.1. The gravity table is operated in a safe and controlled manner and monitored for performance and efficiency. 2.2. Risks to self, others and the environment are anticipated and minimisation strategies implemented accordingly. 2.3. Suitable personal protective clothing and equipment is selected, used, maintained and stored according to OHS requirements. 2.4. Environmental implications associated with machinery operation are identified, assessed and reported to the supervisor.
3. Complete and report on seed cleaning operation	3.1. Shut-down procedures for the gravity table are completed to manufacturers' specifications and enterprise requirements. 3.2. Operational records are completed and maintained according to enterprise requirements. 3.3. Malfunctions, faults, observation of irregular performance and damage to the gravity table are detailed and reported according to enterprise requirements. 3.4. The gravity table is cleaned according to OHS and enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assemble a gravity table for operation
- disassemble a gravity table after operation
- correctly set the air flow appropriate for the task
- assess the product input and outputs of the gravity table
- make adjustments to the gravity table settings to maximise the output
- operate the gravity table effectively
- perform basic maintenance of gravity table
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- seed biology and damage to seed by mechanical action
- the principles of gravity separation
- types of gravity tables available
- the adjustment and effect of airflow, oscillation and deck angle
- deck types and designs and their effects on operational effectiveness
- machinery safety
- machine capabilities and settings
- cleaning strategies.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify the need for a particular line of seed to be modified
- operate a seed de-awners/clippers
- operate seed scarifiers
- operate huskers and sifters
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- seed biology - coleoptiles
- the damage caused to seed by modification machinery
- the principles of operation and the expectations and limitations, maintenance and safety associated with an oats de-awner/clipper
- the principles of operation and the expectations and limitations, maintenance and safety associated with scarifiers
- the principles of operation and the expectations and limitations, maintenance and safety associated with rice huskers
- safe machinery operation.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>In order to confer competency, evidence must prove that the candidate is able to:</p> <ul style="list-style-type: none"> <li>• assessment of the seed for its requirement for modification and risk of potential damage</li> <li>• set up and prepare machinery for use</li> <li>• operate seed modification machinery, and</li> <li>• complete and report on seed modification machinery and equipment operation.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Mechanical modification of seed may include:	<ul style="list-style-type: none"> <li>• the range of machines which provides mechanical modification of seed to enhance its performance and any variation of these machines, with or without additions, to enhance performance.</li> </ul>
Machinery may include:	<ul style="list-style-type: none"> <li>• all machines and equipment other than standard seed grading equipment which modify the physical characteristics of the seed for the purpose of:</li> <li>• improving the seed's ability to germinate and grow</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• improving the seed's plantability</li> <li>• improving the seed's appearance</li> <li>• improving the seed's ability to be graded and or treated.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Select and prepare seed treatment machinery and equipment for use	<p>1.1. Seed treatment machinery and equipment is selected and prepared to job requirements and confirmed against work plan.</p> <p>1.2. Routine pre-operational checks of seed treatment machinery and equipment are completed to manufacturers' specifications and enterprise requirements.</p> <p>1.3. Occupational Health and Safety (OHS) hazards in the workplace are recognised, risk assessed and minimised according to enterprise requirements.</p>
2. Operate seed treatment machinery and equipment	<p>2.1. Seed treatment machinery and equipment is operated in a safe and controlled manner and monitored for performance and efficiency.</p> <p>2.2. Risks to self, others and the environment are anticipated and minimisation strategies implemented accordingly.</p> <p>2.3. Suitable personal protective clothing and equipment is selected, used, maintained and stored according to OHS requirements.</p> <p>2.4. Environmental implications associated with seed treatment machinery operation are identified, assessed and reported to the supervisor.</p>
3. Complete and report on seed treatment machinery and equipment operation	<p>3.1. Shut-down procedures for seed treatment machinery and equipment are completed to manufacturers' specifications and enterprise requirements.</p> <p>3.2. Seed treatment machinery and equipment operational records are completed and maintained according to enterprise requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Malfunctions, faults, observations of irregular performance and damage to seed treatment machinery and equipment are detailed and reported according to enterprise requirements.</p> <p>3.4. Seed treatment machinery and equipment is cleaned, secured and stored according to OHS and enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- operate seed treatment machinery and equipment
- formulate a chemical mix to achieve the best practice
- calculate, calibrate and measure dose rates
- apply powders and thickeners
- identify and understand seed dryers and their expectations and limitations
- identify different types of seed coating machines
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- difference between coating and pelleting [ $\leq 5\%$  weight gain film coating (insecticide/fungicide) or  $\gt 5\%$  weight gain is pelleting]
- chemical types and classes
- hazards of chemicals
- Personal Protective Equipment (PPE)
- the expectations and limitations of different types of seed coating machines
- the labelling requirements associated with coated seed.
- the use and differences in biological components in seed coatings
- the interaction of biological components and their effect on other chemicals,

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
<p>powders, polymers and heat</p> <ul style="list-style-type: none"> <li>• confined space working hazards</li> <li>• rules and regulations for storage, transportation and bunding</li> <li>• types of seed treatment machinery and equipment</li> <li>• basics of programmable logic controller / treatment control systems and electrical process.</li> <li>• methods of applying chemical and basic recipe formula</li> <li>• methods of applying powders and thickeners</li> <li>• disposal of waste chemical</li> <li>• procedures for drying, scalping and aspiration of treated seed.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>In order to confer competency, evidence must prove that the candidate is able to:</p> <ul style="list-style-type: none"> <li>• set up and prepare seed treatment machinery for use</li> <li>• operate seed treatment machinery, and</li> <li>• complete and report on seed treatment machinery and equipment operation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>

## Range Statement

<b>RANGE STATEMENT</b>
------------------------

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Seed treatments may include:	<ul style="list-style-type: none"> <li>• all forms of commercial seed treatment from very basic spray pack application of insecticide for stored grain pests through to all configurations of continuous, batch and rotary machines</li> <li>• for example:                             <ul style="list-style-type: none"> <li>• hand held spray packs</li> <li>• slurry treaters</li> <li>• spray pumps</li> <li>• direct seed coaters</li> <li>• mist-a-matic</li> <li>• batch treaters</li> <li>• Panagen</li> <li>• rotary coaters</li> <li>• coating pans</li> <li>• driers</li> <li>• cement mixers.</li> </ul> </li> </ul>
Machinery and equipment may include:	<ul style="list-style-type: none"> <li>• all machinery and equipment used to apply treatments to seed including but not exclusive to:                             <ul style="list-style-type: none"> <li>• fungicides</li> <li>• insecticides</li> <li>• biologicals</li> <li>• colours and polymers</li> <li>• powders and coating mediums</li> <li>• any variation of these machines, with or without additions to enhance performance.</li> </ul> </li> </ul>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- operate an airleg machine
- operate seed spirals machines
- operate seed dryers
- operate colour sorters
- operate seed sizing equipment
- operate velvet rollers
- operate magnetic rollers
- operate floatation tanks
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the legislative and legal requirements of information relating to domestic and international requirements
- the basic principles and operation of airlegs
- the basic principles and operation of seed spirals
- the basic principles and operation of seed dryers

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
<ul style="list-style-type: none"> <li>• the basic principles and operation of colour sorters</li> <li>• the basic principles and operation of seed sizing equipment</li> <li>• the basic principles and operation of velvet rollers</li> <li>• the basic principles and operation of magnetic rollers</li> <li>• the basic principles and operation of floatation tanks</li> <li>• safe operation of machinery.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Select and prepare seed packaging and labelling machinery and equipment for use	<p>1.1. Seed packaging and labelling machinery and equipment is selected and prepared to job requirements and confirmed against work plan.</p> <p>1.2. Routine pre-operational checks of machinery and equipment are completed to manufacturer's specifications and enterprise requirements.</p> <p>1.3. Information for labelling is checked against work orders and job descriptions.</p> <p>1.4. Performance, efficiency and irregularities are reported to the supervisor.</p> <p>1.5. Occupational Health and Safety (OHS) hazards in the workplace are recognised, risk assessed and minimised according to enterprise requirements.</p>
2. Operate seed packaging and labelling machinery and equipment	<p>2.1. Machinery and equipment is operated in a safe and controlled manner and monitored for performance, efficiency and irregularities are reported to the supervisor.</p> <p>2.2. Risks to self, others and the environment are anticipated and minimisation strategies implemented accordingly.</p> <p>2.3. Suitable personal protective clothing and equipment is selected, used, maintained and stored according to OHS requirements.</p> <p>2.4. Environmental implications associated with machinery operation are identified, assessed and reported to the supervisor.</p>
3. Complete and report on seed packaging	<p>3.1. Shut-down procedures for machinery and equipment are completed to manufacturers' specifications and</p>

ELEMENT	PERFORMANCE CRITERIA
and labelling machinery and equipment operation	<p>enterprise requirements.</p> <p>3.2. Machinery and equipment operational records are completed and maintained according to enterprise requirements.</p> <p>3.3. Malfunctions, faults, observation of irregular performance and damage to machinery and equipment are detailed and reported according to enterprise requirements.</p> <p>3.4. Machinery and equipment is cleaned, secured and stored according to OHS and enterprise requirements.</p>
4. Move and store packaged seed	<p>4.1. Packaged seed is handled with care and loaded onto pallets ready for moving and storage.</p> <p>4.2. Packaged seed is stored and retrieved according to enterprise storage plans.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- prepare bulk storage
- operate bulk seed transportation equipment
- prepare packaging
- operate industrial sewing machines
- identify alternative methods of bag sealing
- operate label printers and label and apply stickers and labels
- operate palletizing equipment
- operate a pallet wrapper / Shrink wrap palletised seed
- operate bag and pallet transportation systems
- perform basic machinery maintenance
- label and stencil seed bags
- seal seed packages
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening,

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
<p>clarifying information and consulting with supervisors as required</p> <ul style="list-style-type: none"> <li>• use numeracy skills to estimate, calculate and record routine workplace measures</li> <li>• use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<b>Required knowledge</b>
<ul style="list-style-type: none"> <li>• associated regulations and legislation that covers labelling of packaged seed</li> <li>• chemical warnings, the detail of the seed that must be put on the bag</li> <li>• alternative methods of bag sealing</li> <li>• bulk seed storage</li> <li>• seed packaging methods</li> <li>• seed packaging equipment</li> <li>• basic equipment maintenance</li> <li>• packaged product transport and storage</li> <li>• machinery and workplace safety</li> <li>• enterprise storage plans</li> <li>• enterprise labelling requirements</li> <li>• types of packaging.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• set up and prepare machinery for use</li> <li>• operate packaging and labelling machinery, and</li> <li>• move and store packaged seed.</li> </ul>
<b>Context of and specific resources for</b>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources</p>

## AHCSP0308A Sample seed before and after processing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of sampling seed before and after processing and defines the standard required to: take seed samples for testing by other agencies; package and label seed samples; record workplace information about seed samples.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to sampling seed both on arrival at a processing plant and after processing for quality and certification purposes.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Sample seed before cleaning or processing	1.1.The seed lot is prepared for sampling in accordance with job requirements. 1.2.Sampling equipment is selected for use in accordance with the type of seed and the job requirements. 1.3.Samples are inspected visually for contaminants. 1.4.Results of sampling are recorded or reported to supervisors. 1.5.Seed load is directed for storage as appropriate. 1.6.Samples are labelled, recorded and kept for future reference.
2. Sample seed after processing	2.1.The seed lot is prepared for sampling in accordance with job requirements. 2.2.Sampling equipment is selected for use in accordance with the type of seed and the job requirements. 2.3.Samples are taken according to specified sampling techniques. 2.4.Samples are batched and labelled. 2.5.Samples are packaged with accompanying notation and forwarded to relevant authorities.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- select and evaluate the equipment to be used to provide a representative sample within the guidelines of the relevant certification authority.
- sample seed from a truck on arrival at a processing plant using appropriate sampling techniques
- sample seed in bulk containers and/or sacks using appropriate sampling techniques
- sample graded and/or treated seed
- prepare samples for despatch
- use tools for sampling and prepare a sample for despatch.
- complete relevant sampling documentation
- recognise common weed seeds and other seed contaminants
- use appropriate recording and labelling techniques
- carry out moisture testing, temperature and seed density tests in accordance with enterprise requirements
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- personnel protective equipment used for sampling treated seed
- the principles of sampling
- what type of seed requires sampling
- correct methods of sampling
- the controlling bodies of seed movement - Australian Quarantine and Inspection Service (AQIS), the Organisation for Economic Co-operation and Development (OECD), the Association of Official Seed Certifying Agencies (AOSCA) and other certification agencies
- relevant workplace records and other documentation
- seed handling and the importance of seed moisture content at all stages of the cleaning process.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• take seed samples for testing by other agencies</li> <li>• package and label seed samples</li> <li>• record workplace information about seed samples.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Representative seed sampling may include:	<ul style="list-style-type: none"> <li>• drawing a representative seed sample for testing against relevant industry standards including the International Seed Testing Association (ISTA), OECD and AOSCA or for other industry quality standards.</li> </ul>
Use of sampling equipment may include:	<ul style="list-style-type: none"> <li>• equipment from the basic Nobbe trier and spike samplers through to inline automatic samplers.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan and prepare for installation of extra low voltage wiring	<p>1.1. Installation is planned and prepared to ensure OHS policies and procedures are followed, and the work is appropriately sequenced according to requirements.</p> <p>1.2. Appropriate personnel are consulted to ensure the work is co-ordinated effectively with others on the work site.</p> <p>1.3. Cables and wires are sized to suit calculated load.</p> <p>1.4. Wiring system components are checked against job requirements.</p> <p>1.5. Accessories are obtained according to established procedures and to comply with organisational and task requirements.</p> <p>1.6. Location in which specific items of accessories, apparatus and circuits are to be installed is determined from job requirements.</p> <p>1.7. Materials necessary to complete the work are obtained according to established procedures and checked against the job requirement.</p> <p>1.8. Tools, equipment and testing devices needed to carry out the installation work are obtained, following established procedures they are checked for correct</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>operation and safety.</p> <p>1.9.Preparatory work is checked to ensure that it complies with requirements and no unnecessary damage has occurred.</p>
2. Install wiring systems	<p>2.1.Occupational Health and Safety (OHS) policies and procedures for installing electrical wiring systems are followed.</p> <p>2.2.Wiring systems are installed to meet requirements, without damage or distortion to the surrounding environment or services.</p> <p>2.3.Accessories are terminated and wires are connected as required to solenoids and controllers, according to manufacturer and enterprise requirements.</p> <p>2.4.Unplanned events or conditions are responded to using established procedures.</p> <p>2.5.Approval is obtained from appropriate personnel according to established procedures before any contingencies are implemented.</p> <p>2.6.On-going checks of the quality of the work are undertaken according to established procedures.</p>
3. Check and notify completion of work	<p>3.1.Final checks are undertaken to ensure the installed wiring systems conforms to requirements.</p> <p>3.2.System is tested to ensure that it works.</p> <p>3.3.Work completion is notified according to established procedures.</p>

## Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
<b>Required skills</b>
<ul style="list-style-type: none"> <li>• read labels and signage to differentiate between extra low voltage and other electrical systems</li> <li>• read and follow enterprise procedures for irrigation system wiring</li> <li>• size cables and wires to suit calculated load</li> <li>• check and notify completed installation activities</li> <li>• follow enterprise OHS procedures and safely work with extra low voltage systems</li> </ul>

## REQUIRED SKILLS AND KNOWLEDGE

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- basic electricity and electrical principles relating to extra low voltage wiring
- milking equipment, garden lighting and/or irrigation system wiring materials and techniques
- isolation and tagging procedures
- computerised controller systems
- enterprise policies and procedures
- testing equipment and procedures
- OHS guidelines for installing extra low voltage wiring.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- plan, design and carry out installation of wiring enclosures, cable support systems, cables and accessories in electrical systems of 36 volts or less
- undertake checks that the system conforms to requirements and operates effectively
- read labels and signage to differentiate between extra low voltage and other electrical systems
- size cables and wires to suit calculated load

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• check and notify completed installation activities</li> <li>• follow enterprise OHS procedures and safely work with extra low voltage systems.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Types of low voltage wiring systems may include:	<ul style="list-style-type: none"> <li>• 36 volts or less.</li> </ul>
Applications include:	<ul style="list-style-type: none"> <li>• milking equipment systems such as pulsation systems</li> <li>• in irrigation systems between controllers and system components such as solenoid valves</li> <li>• in domestic garden lighting systems.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare materials, tools and equipment for turf work	<p>1.1.The required materials, tools and equipment are identified according to lists provided and/or supervisor's instructions.</p> <p>1.2.Checks are conducted on all materials, tools and equipment with insufficient or faulty items reported to the supervisor.</p> <p>1.3.Techniques used when loading and unloading materials demonstrate correct manual handling and minimise damage to the load and the vehicle.</p> <p>1.4.Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.5.Turf support is provided according to Occupational Health and Safety (OHS) requirements and according to workplace information.</p> <p>1.6.OHS hazards are identified and reported to the supervisor.</p>
2. Undertake turf work as directed	<p>2.1.Instructions and directions provided by supervisor are followed and clarification sought when necessary.</p> <p>2.2.Turf work is undertaken in a safe and environmentally appropriate manner according to enterprise guidelines.</p> <p>2.3.Interactions with other staff and turf users are carried out in a positive and professional manner.</p> <p>2.4.Enterprise policy and procedures in relation to workplace practices, handling and disposal of materials is observed.</p> <p>2.5.Problems or difficulties in completing work to</p>

ELEMENT	PERFORMANCE CRITERIA
	required standards or timelines are reported to supervisor.
3. Handle materials and equipment	3.1.Plant debris and waste material produced during turf work are stored in a designated area according to supervisor's instructions. 3.2.Materials, equipment and machinery are handled and transported according to supervisor's instructions and enterprise guidelines. 3.3.A clean and safe work site is maintained while completing turf activities.
4. Clean up on completion of turf work	4.1.Materials are returned to store or disposed of according to supervisor's instructions. 4.2.Tools and equipment are cleaned, maintained and stored according to manufacturer's specifications and supervisor's instructions. 4.3.Work outcomes are reported to the supervisor.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- safe work practices for turf production
- prepare materials, tools and equipment for turf work
- assist turf work as directed
- handle materials and equipment
- clean up on completion of turf work
- use literacy skills to read and follow a range of basic instructions
- use oral communication skills/language competence to communicate effectively with others
- use numeracy skills to complete basic calculations
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds.

#### Required knowledge

- safe work practices required at turf work sites
- mowing patterns and heights

<b>REQUIRED SKILLS AND KNOWLEDGE</b>

## AHCTRF201A Assist with turf construction

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of support a worker provides to others in a team who are constructing soil profiles for the establishment of turf and defines the standard required to: work in a team on a turf construction project; use a range of turf construction machinery and equipment; follow procedures and sequence work during the course of the construction; clean, maintain and store turf construction machinery and equipment.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the process of assisting with turf construction and is usually conducted within established routines, methods and procedures.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for soil profile construction	<p>1.1.Services are located using site and construction plans and in consultation with the supervisor.</p> <p>1.2.Occupational Health and Safety (OHS) hazards are identified, risks assessed and reported to the supervisor.</p> <p>1.3.Suitable safety equipment is selected for the soil profile construction program.</p> <p>1.4.The construction site is prepared according to enterprise work procedures and the construction plan.</p>
2. Prepare equipment for soil profile construction	<p>2.1.Construction tools, equipment and machinery are selected that are appropriate to the task being undertaken.</p> <p>2.2.Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise work procedures.</p> <p>2.3.Suitable Personal Protective Equipment (PPE) is selected, used and maintained.</p>
3. Undertake soil profile construction	<p>3.1.The base is graded to the specified level and on a consistent slope, and is consolidated to achieve uniform compaction over the entire site, according to enterprise work procedures.</p> <p>3.2.Trench lines are dug to the specified depth, width and fall, with all superfluous material evacuated and stored safely according to the construction plan and enterprise work procedures.</p> <p>3.3.Construction of the soil profile is undertaken</p>

ELEMENT	PERFORMANCE CRITERIA
	according to OHS requirements.
4. Restore the site after drainage and irrigation installation	<p>4.1. Trenches are back-filled with specified construction materials, consolidated and levelled according to the construction plan and enterprise work procedures.</p> <p>4.2. The construction site is levelled to visual satisfaction as each layer of the soil profile is installed.</p> <p>4.3. The construction site is hand watered thoroughly on completion according to enterprise work procedures.</p> <p>4.4. Waste material is removed from the construction site and disposed of in an environmentally aware and safe manner according to enterprise work procedures.</p> <p>4.5. Tools, equipment and machinery are cleaned, maintained and stored according to enterprise work procedures.</p> <p>4.6. A clean and safe area is maintained throughout and upon completion of work according to enterprise work procedures.</p> <p>4.7. Work outcomes are recorded or reported to the supervisor according to enterprise work procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- inspect and check machinery
- erect safety equipment
- handle manual loads correctly
- use turf construction machinery and equipment
- calibrate machinery
- interpret site plans and turf construction specifications
- measure quantities, area, volume, ratios and application rates
- measure distances and calculate depth
- calculate material requirements
- participate in teams and contribute to team objectives
- read and interpret instructions

**REQUIRED SKILLS AND KNOWLEDGE**

- communicate effectively with team members and supervisor
- utilise proforma recording, reporting and work procedure documents
- co-ordinate own activities with the work group
- minimise environmental disturbance
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- various requirements of turf species and their cultural requirements
- characteristics and growth rates of turf species and cultivars
- different soil preparations for construction
- effective and safe use of tools and machinery
- high performance uses of turf surfaces
- purpose of turf construction in maintaining turf presentation
- irrigation and/or drainage installation procedures and operational techniques
- principles and application of site and construction plans
- relationship between a well-constructed soil profile for the quality and appearance of the turf
- effect of adverse outdoor climatic conditions
- influences on the selection of tools, machinery and safety equipment
- potential public nature of turf renovation work sites
- hazards and responsibilities working near public access
- environmental impact of turf construction works.

**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

<b>EVIDENCE GUIDE</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• work in a team on a turf construction project</li> <li>• use a range of turf construction machinery and equipment</li> <li>• follow procedures and sequence work during the course of the construction</li> <li>• clean, maintain and store turf construction machinery and equipment.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare the site to be mown	<p>1.1. Services affecting the turf surface are located using site plans and in consultation with the supervisor.</p> <p>1.2. Permanent obstacles and Occupational Health and Safety (OHS) hazards are identified, risks assessed and controls implemented.</p> <p>1.3. Movable obstacles are removed before and replaced after mowing.</p> <p>1.4. Abnormal conditions or changes in the appearance of the site are reported to the supervisor.</p>
2. Prepare equipment for mowing	<p>2.1. Tools, equipment and machinery are selected that are appropriate to the task being undertaken.</p> <p>2.2. The mower is calibrated and adjusted to height according to the manufacturer's guidelines and documented work procedures.</p> <p>2.3. Pre-operational checks of tools, equipment and machinery are completed according to manufacturer's specifications and documented work procedures.</p> <p>2.4. Suitable Personal Protective Equipment (PPE) is selected, used and maintained.</p> <p>2.5. Suitable safety equipment is selected and erected at the work site during work periods.</p>
3. Mow playing surface	<p>3.1. Grass appearance is assessed against enterprise guidelines and changes in appearance are reported.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. The mower is matched to any implement attached to it according to manufacturer's guidelines and industry practice.</p> <p>3.3. Continuous oversight of mowing activities is maintained according to enterprise work procedures.</p>
4. Undertake final preparation of playing surface	<p>4.1. Mark out tools appropriate for the task being undertaken are selected.</p> <p>4.2. Lengths and angles are measured to locate markers and match play equipment according to enterprise work procedures and industry practice.</p> <p>4.3. Marking out is completed according to the intended playing surface use and enterprise work procedures.</p> <p>4.4. Markers and play equipment are placed where necessary according to enterprise work procedures.</p> <p>4.5. Work outcomes are recorded or reported to the supervisor according to enterprise work procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- inspect and check machinery
- erect safety equipment
- handle manual loads correctly
- use turf machinery and equipment
- calibrate machinery
- measure quantities, area, volume, ratios and application rates
- measure distances, angles and calculate areas
- calculate material requirements
- participate in teams and contribute to team objectives

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare turf area for renovation	<p>1.1. Services are located using site and construction plans and in consultation with the supervisor.</p> <p>1.2. Occupational Health and Safety (OHS) hazards are identified and reported to the supervisor.</p> <p>1.3. Suitable safety equipment is selected for the turf renovation program.</p> <p>1.4. The environmental implications of the turf renovation program are identified and reported.</p> <p>1.5. Preparation of turf area is carried out according to enterprise work procedures and site and construction plans.</p>
2. Prepare equipment for turf renovation	<p>2.1. Hand tools and renovation machinery are selected that are appropriate to the task being undertaken.</p> <p>2.2. Pre-operational and safety checks are carried out on hand tools and renovation machinery, according to manufacturers specifications and enterprise work procedures.</p> <p>2.3. Suitable Personal Protective Equipment (PPE) is selected, used and maintained.</p>
3. Undertake turf renovation	<p>3.1. Safety equipment is erected around trench lines, holes and other disturbed surfaces during and between work periods.</p> <p>3.2. Correct manual handling techniques are used when lifting or moving heavy loads.</p> <p>3.3. The turf renovation program is undertaken according</p>

ELEMENT	PERFORMANCE CRITERIA
	to OHS requirements. 3.4. Turf renovation tools and machinery are operated safely and effectively.
4. Complete turf renovation	4.1. Plant debris and waste material removed from the site are disposed of in an environmentally aware and safe manner according to enterprise work procedures. 4.2. Tools and machinery are cleaned, maintained and stored according to enterprise work procedures. 4.3. A clean and safe area is maintained throughout and on completion of work. 4.4. Work outcomes are recorded or reported to the supervisor according to enterprise work procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- inspect and check machinery
- erect safety equipment
- handle manual loads correctly
- use turf renovation machinery and equipment
- calibrate machinery
- measure quantities, area, volume, ratios and application rates
- measure distances and calculate depth
- calculate material requirements
- participate in teams and contribute to team objectives
- read and interpret instructions
- communicate effectively with team members and supervisor
- utilise proforma recording, reporting and work procedure documents
- co-ordinate own activities with the work group
- minimise environmental disturbance
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <p>specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor</p> <ul style="list-style-type: none"> <li>• use numeracy skills to estimate, calculate and record routine workplace measures</li> <li>• use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• various requirements of turf species and their cultural requirements</li> <li>• characteristics and growth rates of turf species and cultivars</li> <li>• different soil preparations for renovation</li> <li>• effective and safe use of tools and machinery</li> <li>• high performance uses of turf surfaces</li> <li>• purpose of turf renovation in maintaining turf presentation</li> <li>• principles and application of site and construction plans</li> <li>• irrigation and drainage system design and operational techniques</li> <li>• effect of adverse outdoor climatic conditions</li> <li>• influences on the selection of tools, machinery and safety equipment</li> <li>• potential public nature of turf renovation work sites</li> <li>• hazards and responsibilities working near public access</li> <li>• environmental impact of turf works.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to establish a planted area	1.1.The planting site , planting methods and turf plant species and cultivars are identified according to the site plan and enterprise work procedures. 1.2.Materials, tools, equipment and machinery are selected according to planted area design requirements and enterprise work procedures. 1.3.Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise work procedures. 1.4.The environmental implications of the turf establishment program are identified and the likely outcomes assessed and reported to the supervisor. 1.5.Occupational Health and Safety (OHS) hazards are identified, risks assessed and reported to the supervisor. 1.6.Suitable safety and Personal Protective Equipment (PPE) is selected, used and maintained.
2. Prepare the planting area	2.1.Layout of services is recognised, depths checked against the site plan and discrepancies are reported to the supervisor. 2.2.Earthworks are undertaken according to OHS requirements. 2.3.All competing plants are treated according to enterprise work procedures. 2.4.Soil is assessed for moisture, tilth, compactness, depth and decaying plant material according to enterprise work procedures.

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Soil additives are selected and applied according to enterprise work procedures.</p> <p>2.6. The entire surface is raked out evenly to achieve a consistent texture and the area is uniformly levelled to defined contour requirements according to enterprise work procedures.</p> <p>2.7. The planting site is watered according to the planting method and enterprise work procedures.</p> <p>2.8. Debris and pollutants are removed from the site and disposed of in an environmentally aware and safe manner according to enterprise work procedures.</p>
3. Plant turf	<p>3.1. All turf plant material is inspected prior to being planted and material with major defects is discarded according to enterprise work procedures.</p> <p>3.2. Hygiene practices with use of tools and equipment are clarified with supervisor and observed in establishment work.</p> <p>3.3. Turf plant material with minor defects is trimmed or treated to maintain health and vigour according to enterprise work procedures.</p> <p>3.4. Seed spread by hand and mechanically is evenly distributed over the whole planting area with no overlap and no areas missed according to enterprise work procedures.</p> <p>3.5. The entire sown surface is evenly raked and thoroughly watered according to enterprise work procedures.</p> <p>3.6. Sods are correctly oriented, rolled evenly onto a moist surface and interlocked in the pattern and area according to enterprise work procedures.</p> <p>3.7. Newly laid turf is watered thoroughly to encourage establishment according to enterprise work procedures.</p>
4. Provide post-planting care	<p>4.1. The planted site is protected from animals, pedestrian and vehicular traffic according to enterprise work procedures.</p> <p>4.2. The planted site is rolled to a work pattern planned to cover the area evenly and efficiently and rolling is even, flat and uniform with no disturbance according to enterprise work procedures.</p> <p>4.3. Turf is mown according to a pattern and height specified in enterprise work procedures.</p> <p>4.4. Top dressing is applied evenly to the required depth</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>over the whole area and is worked or rubbed into the surface according to enterprise work procedures.</p> <p>4.5. New turf is watered according to irrigation system manufacturer's specifications and enterprise work procedures.</p> <p>4.6. Water is applied by hand to dry or under-watered plants according to the requirements of the turf species and cultivar, and according to enterprise work procedures.</p> <p>4.7. Watering patterns are checked for dry spots and blockages and faults are rectified according to manufacturer's specifications and reported to the supervisor.</p>
5. Monitor turf health	<p>5.1. Turf structure is observed for quality according to published data, enterprise work procedures and industry standards.</p> <p>5.2. Damaged turf is identified according to published data, supplier's specifications, historical data and enterprise work procedures.</p> <p>5.3. Plants incorrectly planted or situations that will prevent plants from reaching their full potential are identified, recorded and reported to the supervisor according to enterprise work procedures.</p>
6. Complete establishment of the planted are	<p>6.1. Waste material is removed from the planting site and disposed of in an environmentally aware and safe manner according to enterprise work procedures.</p> <p>6.2. Tools, equipment and machinery are cleaned, maintained and stored according to enterprise work procedures.</p> <p>6.3. A clean and safe work area is maintained throughout and on completion of work.</p> <p>6.4. Work outcomes are recorded or reported to the supervisor according to enterprise work procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- inspect and check machinery
- erect safety equipment
- handle manual loads correctly
- use turf establishment machinery and equipment
- calibrate machinery
- interpret site plans and turf establishment specifications
- measure quantities, area, volume, ratios and application rates
- calculate material requirements
- participate in teams and contribute to team objectives
- read and interpret instructions
- communicate effectively with team members and supervisor
- utilise proforma recording, reporting and work procedure documents
- co-ordinate own activities with the work group
- minimise environmental disturbance
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- various requirements of turf species and their cultural requirements
- characteristics and growth rates of turf species and cultivars
- different soil preparations for establishment
- effective and safe use of tools and machinery
- high performance uses of turf surfaces
- purpose of turf establishment in maintaining turf presentation
- irrigation and drainage system design and operational techniques
- effect of adverse outdoor climatic conditions
- influences on the selection of tools, machinery and safety equipment
- potential public nature of turf renovation work sites
- hazards and responsibilities working near public access
- environmental impact of turf works.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• work in a team on a turf establishment project</li> <li>• use a range of turf establishment machinery and equipment</li> <li>• follow procedures and sequence work during the course of the growing-in period</li> <li>• transport, clean and maintain and store turf establishment machinery and equipment.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## AHCTRF301A Construct turf playing surfaces

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of constructing soil profiles for the establishment of high performance sports and recreational turf surfaces and defines the standard required to: determine turf construction requirements from plans; survey and create working plans for turf construction sites; excavate earthworks and establish working and finished levels; install drainage and irrigation systems; implement a turf construction project.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the construction of turf playing surfaces in new projects and in the complete renovation of existing soil profiles in sporting, commercial and public recreational open spaces such as golf greens and tees, cricket pitches and other turfed sporting surfaces in urban and regional areas.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan for construction activities	1.1.The construction site for high performance turf playing surfaces and the construction method are identified according to the site and construction plans and enterprise work procedures. 1.2.Soil tests of existing soil are undertaken using representative samples, and according to testing instrument instructions and enterprise work procedures. 1.3.Locations and layout of services and utilities are identified, depths checked against the site or construction plan, and discrepancies are reported to the supervisor and the relevant authorities. 1.4.History of site is determined and taken into account in planning construction details. 1.5.Likely consequences of site aspect, features and run-off from adjacent sites are determined and incorporated in site and construction plans. 1.6.Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor. 1.7.Suitable safety equipment and Personal Protective Equipment (PPE) are selected, used and maintained.
2. Survey the construction site	2.1.Surveying equipment is set up and used according to industry standards.

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2.Existing levels are surveyed and temporary benchmark established. Details are recorded accurately and legibly according to industry standards.</p> <p>2.3.New levels are set according to specifications and pegs placed according to industry convention.</p> <p>2.4.Contour map with reduced levels and a cross section is developed and drawn using accepted industry symbols and mapping conventions.</p>
<p>3. Prepare for construction work</p>	<p>3.1.Enterprise work team, contractors and design consultants are identified and, where required, engaged.</p> <p>3.2.Work tasks are scheduled in a logical, timely and effective manner in consultation with the supervisor.</p> <p>3.3.Materials required are estimated and costed according to accepted industry practice and ordered.</p> <p>3.4.Plans for the new construction profile are obtained or developed.</p>
<p>4. Set out site for construction</p>	<p>4.1.Symbols and terminology are interpreted to ensure the concept of the construction plan is clearly understood according to industry practice.</p> <p>4.2.Boundaries and features contained in the site and construction plans are checked and verified against the actual site and existing features.</p> <p>4.3.Finishing levels, provision for drainage and irrigation, and drainage head of the site are identified and checked against the construction plan to ensure nominated levels are workable.</p> <p>4.4.Measurements are checked against the construction plan, the construction area is pegged out, and variances are notified to the supervisor according to enterprise work procedures.</p>
<p>5. Excavate the construction site</p>	<p>5.1.Excess soil is removed and the construction site cleared with the stockpile being placed in a designated area according to enterprise work procedures.</p> <p>5.2.The base is graded to the level and slope specified in the base design.</p> <p>5.3.The base of the profile is consolidated to achieve uniform compaction over the entire site according to the construction plan.</p> <p>5.4.Sub-surface irrigation system components and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p> fittings are installed to the required depth and design specified in the construction plan.</p>
<p>6. Install drainage system</p>	<p>6.1.Drainage trenches are dug to the required depth and design specified in the construction plan.</p> <p>6.2.Drainage material is laid on the base of the trench, pipes are laid/installed, and trenches are covered according to industry standards.</p>
<p>7. Install soil profile</p>	<p>7.1.Quantities of material required to be spread over the designated area are calculated and measured according to the construction plan.</p> <p>7.2.Equipment is calibrated according to manufacturer's guidelines to distribute the required amount of material over the designated area.</p> <p>7.3.Each profile layer is compacted to reflect the final contour.</p> <p>7.4.The interface between profile layers is uniform and unbroken according to the construction plan and enterprise work procedures.</p> <p>7.5.Soil amendments are prepared according to enterprise work procedures, mixed thoroughly and applied evenly over the designated area.</p> <p>7.6.The finishing soil surface is given a final levelling and consolidated, ready for planting, according to the construction plan and enterprise work procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate effectively with work team members, supervisors, contractors and consultants
- interpret existing site and construction plans and specifications
- draft basic working plans
- survey site levels and dimensions
- install drainage and irrigation systems
- measure materials, interpret , survey and assess site measurements, and interpret

<b>REQUIRED SKILLS AND KNOWLEDGE</b>	
<p>and apply test results</p> <ul style="list-style-type: none"> <li>• coordinate work group, contractors and own activities to sequentially and effectively complete construction in a timely and cost effective manner</li> <li>• use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks</li> <li>• use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>	
<b>Required knowledge</b>	
<ul style="list-style-type: none"> <li>• practical understanding of the range and use of materials, tools, equipment and machinery available to the enterprise for construction of soil profiles, including soil amendments and base construction materials</li> <li>• practical understanding of the range of construction methods that may be used to construct soil profiles for high performance turf surfaces, and the association of construction methods with site limitations, environmental implications, and end use of the turf surface</li> <li>• practical understanding of surveying principles and techniques</li> <li>• soil testing techniques and the application of results to the construction process</li> <li>• awareness of the comparative environmental implications associated with construction and excavation activity, drainage and irrigations systems, soil amendments and waste disposal procedures.</li> </ul>	

## Evidence Guide

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Sample soil for testing	<p>1.1. Soil samples are taken from a representative area and packaged, labelled and sent for laboratory testing.</p> <p>1.2. Testing results are used to guide soil preparations for turf establishment.</p>
2. Plant turf	<p>2.1. Tools and equipment are chosen appropriate to the task being undertaken, used according to documented guidelines, and safe working practices are employed according to enterprise Occupational Health and Safety (OHS) guidelines.</p> <p>2.2. Planting site is prepared according to enterprise guidelines.</p> <p>2.3. Placement and planting method of the plant material are consistent with the turf type.</p> <p>2.4. Newly planted turf is watered and top-dressing is applied according to plan and supervisors instructions.</p>
3. Maintain newly established turf	<p>3.1. Newly established turf is watered and where advised the new turf is fertilised according to need and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>method of planting.</p> <p>3.2. Turf is mowed according to a specified pattern and height according to the requirements of the enterprise.</p> <p>3.3. Newly established turf is monitored, problems identified, and any changes are reported to supervisor according to enterprise policy.</p> <p>3.4. Top dressing is applied according to the establishment plan.</p> <p>3.5. Tools and equipment chosen are appropriate to the task being undertaken, used according to documented guidelines, and safe working practices are employed.</p>
<p>4. Report and repair areas of damaged turf</p>	<p>4.1. Plants are observed for health properties, specifications and historical data.</p> <p>4.2. Turf condition is observed for quality according to enterprise practice and guidelines.</p> <p>4.3. Reports and recommendations are written and presented to the client or appropriate supervisor.</p> <p>4.4. Tools and equipment chosen are appropriate to the task being undertaken, used according to documented guidelines, and safe working practices are employed.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect soil samples for analysis
- package, label and send soil samples for laboratory analysis
- implement turf establishment practices
- use turf establishment machinery and equipment
- use fertilisers and irrigation equipment
- repair areas of damaged turf
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <p>specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required</p> <ul style="list-style-type: none"> <li>• use numeracy skills to estimate, calculate and record routine workplace measures</li> <li>• use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• appropriate agricultural chemicals and concentrations</li> <li>• turf identification and growth characteristics</li> <li>• soils and turf nutrition</li> <li>• fertiliser use and application</li> <li>• watering practices</li> <li>• common weeds, pests and diseases</li> <li>• documented guidelines of enterprise.</li> </ul>

## Evidence Guide

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the process of implementing a grassed area maintenance program and defines the standard required to: determine the maintenance requirements for a turf area; conduct a risk assessment for work in a turf area; safely adjust and use turf maintenance machinery and equipment; write a report on the maintenance program activities.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the maintenance and repair of turf surfaces. This unit involves working under limited supervision, with checking only related to overall progress. It requires the application of horticultural knowledge and a broad range of grassed area maintenance skills. The work is usually done within routines, methods and procedures where some discretion and judgement is required in the selection of equipment, work organisation, services, actions and achieving outcomes within time constraints.

### Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for grassed area maintenance work	1.1. Requirements of the maintenance program are clarified with supervisor and enterprise guidelines. 1.2. Equipment and material resource requirements are identified according to the scope of the co-ordination work and supervisor's instructions. 1.3. The priorities for maintenance activities and time allocation is identified, documented and presented to the supervisor for verification. 1.4. The environmental implications of the proposed maintenance work are identified, and the likely outcomes assessed and reported to the supervisor. 1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed and reported to the supervisor. 1.6. Personal Protective Equipment (PPE) is selected, used, maintained and stored according to the type of work site activities to be undertaken.
2. Maintain and repair grassed areas	2.1. Grassed areas are maintained and repaired as authorised by the supervisor and according to enterprise guidelines and work place priorities.

ELEMENT	PERFORMANCE CRITERIA
	2.2. Materials to assist in maintenance works are purchased, stored and/or used as required. 2.3. Delivery of materials to site is organised according to workplace priorities. 2.4. Machinery and equipment is organised to be on site in good order when they are required. 2.5. Grassed areas requiring specialist attention and work are identified and organised.
3. Coordinate and report on grassed area maintenance activities	3.1. Resources are coordinated and timed to suit the maintenance activities and priority of work. 3.2. Machinery operators are informed of appropriate use and their responsibilities in respect to operational maintenance requirements of machinery and equipment. 3.3. Personnel, activities, timelines and materials usage are monitored and documented according to enterprise guidelines. 3.4. Contingency situations are recognised and reported to the supervisor, and corrective actions taken according to enterprise guidelines. 3.5. A simple report is written to inform management of maintenance activities undertaken and completed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify the turf
- apply appropriate maintenance activities for specific turf type
- read and interpret documentation associated with work site activities
- calculate material and resource requirements
- coordinate a team to achieve optimum performance
- communicate with personnel at all levels
- document results clearly and concisely
- conduct a risk assessment
- use interpersonal skills to work with and relate to people from a range of cultural,

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
social and religious backgrounds and with a range of physical and mental abilities.
<b>Required knowledge</b>
<ul style="list-style-type: none"> <li>• types of turf and specific maintenance requirements</li> <li>• growth rates and cultural requirements of specific turf types</li> <li>• methods and practices for maintaining grassed areas</li> <li>• turf grass physiology</li> <li>• work schedule programming</li> <li>• the range, use and availability of materials, equipment and machinery that may be required for the project.</li> <li>• environmental awareness associated with undertaking maintenance and repair work on grassed areas</li> <li>• OHS issues, legislative requirements and codes of practice.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• determine the maintenance requirements for a turf area</li> <li>• conduct a risk assessment for work in a turf area</li> <li>• safely adjust and use turf maintenance machinery and equipment</li> <li>• write a report on the maintenance program activities.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Maintenance activities may include:	<ul style="list-style-type: none"> <li>• mowing</li> <li>• slashing</li> <li>• minor weed control</li> <li>• watering</li> <li>• line marking</li> <li>• repairs to damaged/vandalised grassed areas</li> <li>• sourcing contractors for specialist turf renovation work.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for monitoring activities	<p>1.1. The turf site to be monitored, nature and regularity of monitoring, and time constraints for delivering reports are identified according to enterprise work procedures.</p> <p>1.2. Plant tissue and soil analysis consultants are identified and their sampling specifications determined in consultation with the supervisor and/or consultants.</p> <p>1.3. Monitoring tools and equipment are selected according to enterprise work procedures.</p> <p>1.4. Pre-operational and safety checks are carried out on tools and equipment according to manufacturers specifications and enterprise work procedures.</p> <p>1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</p> <p>1.6. Suitable Personal Protective Equipment (PPE) is selected, used and maintained.</p>
2. Collect soil and plant tissue samples	<p>2.1. Samples for off-site testing are collected from a representative area and prepared, packaged, accurately labelled and dispatched according to</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>consultant's requirements and enterprise work procedures.</p> <p>2.2. On-site soil tests are performed according to testing instrument instructions, industry codes of practice and enterprise work procedures.</p> <p>2.3. Divots are replaced from soil sampling sites and waste materials disposed of according to enterprise work procedures.</p> <p>2.4. Sampling tools and equipment are cleaned of all residues and returned to storage according to manufacturers' specifications and enterprise work procedures.</p> <p>2.5. Results of analysis are recorded and compared with acceptable parameters according to researched and experiential awareness.</p> <p>2.6. Recommendations are written to address identified deficiencies and to meet target chemical balances according to researched and experiential awareness.</p>
<p>3. Visually monitor turf health</p>	<p>3.1. Monitoring of turf health is undertaken according to OHS requirements.</p> <p>3.2. Health indicators of the turf are assessed visually with reference to researched and experiential awareness, site conditions, seasonal conditions, and according to enterprise work procedures.</p> <p>3.3. Deficiencies in turf quality and turf diseases are identified visually with reference to researched and experiential awareness, site conditions and seasonal conditions.</p> <p>3.4. Reports and recommendations are made to the supervisor according to the playing requirements and desired objectives of the enterprise.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate with work team members, supervisors and consultants

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <ul style="list-style-type: none"> <li>• utilise proforma reporting, analysis and work procedure documents</li> <li>• assess turf health</li> <li>• measure materials and interpret specifications and analytical results</li> <li>• perform soil sampling and analyse results</li> <li>• identify deficiencies and diseases in turf</li> <li>• make reports and recommendations</li> <li>• use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• botany and turf physiology</li> <li>• practical understanding of soil and plant tissue analysis as a monitoring and turf management tool, the main elements of analysis, and their significance as indicators of nutritional deficiency and toxicity</li> <li>• awareness of the role of trace elements and nutrients required by turf grass plants, and symptoms of toxicities and deficiencies</li> <li>• turf grass diseases, including commonly occurring regional diseases, seasonality, history of site and visual disease symptoms</li> <li>• main, simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, rates and cost</li> <li>• rates and regularity of recommended fertiliser and pesticide application to achieve optimum plant health objectives, while minimising external environment impact through leaching, excessive spraying and overuse.</li> </ul>

## Evidence Guide

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to renovate turf	<p>1.1.The turf renovation site and extent of works are identified according to the renovation program.</p> <p>1.2.Turf and renovation materials are selected according to enterprise work procedures.</p> <p>1.3.Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</p> <p>1.4.Suitable safety and Personal Protective Equipment (PPE) are selected, used and maintained.</p>
2. Prepare renovation equipment	<p>2.1.Tools, equipment and machinery are selected appropriate to the renovation works program.</p> <p>2.2.Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise work procedures.</p> <p>2.3.Tools, equipment and machinery are calibrated and adjusted according to manufacturer's guidelines and enterprise work procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Implement sports turf renovation	3.1. Renovation works are identified from the renovation program and schedule and work tasks are implemented in a sequential, timely and effective manner in consultation with the supervisor. 3.2. Renovation tasks are undertaken according to OHS requirements and with due consideration of the environmental implications. 3.3. Renovation tasks are reviewed and remedial action is undertaken where necessary. 3.4. A clean and safe work area is maintained throughout and on completion of work.
4. Complete renovation activities	4.1. Waste material is removed from the renovation site and disposed of in an environmentally aware and safe manner according to enterprise work procedures. 4.2. Tools, equipment and machinery are cleaned, maintained and stored according to enterprise work procedures. 4.3. Work outcomes are recorded and reported to the supervisor according to enterprise work procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate with work team members, supervisors and contractors
- interpret and apply site plans and renovation program specifications
- operate specialised turf renovation equipment
- utilise proforma reporting, analysis and work procedure documents
- measure materials
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- detailed physical structure of a sports turf soil profile
- specialist turf renovation practices to achieve high performance turf

**REQUIRED SKILLS AND KNOWLEDGE**

- Field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness, and turf sward height
- enterprise and industry standards for turf surface appearance and quality
- comparative environmental implications of renovation activities, turf and soil treatments and waste disposal procedures
- planting, care and renovation scheduling requirements of grass species and cultivars.
- nutrition and plant growth regulators.

**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- implement a sports turf renovation program
- conduct a site hazard identification and risk control assessment
- prepare check and calibrate turf renovation machinery and equipment
- use turf renovation machinery and equipment to restore turf health and condition
- renovate a sports turf for successful high performance use
- record outcomes of renovation works.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Renovate turf materials may include:	<ul style="list-style-type: none"> <li>• cool or warm season turf seed</li> <li>• plants of the species and cultivar specified by the supervisor and/or the turf renovation program.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine additives required by performing soil and plant testing	<p>1.1. Soil and plant tests are determined according to the requirements of the turf plant species and cultivars, climatic conditions, prevailing soil and plant conditions, enterprise guidelines and industry best practice.</p> <p>1.2. A soil and plant testing program is developed which defines field and off-site testing activities, task responsibilities, involvement of contractors, scheduling, and desired information outcomes.</p> <p>1.3. Testing tasks are implemented and monitored, liaison procedures with outside testing agencies are supervised and remedial action is undertaken where necessary.</p> <p>1.4. Data and readings are compiled and presented in a form that can be easily read and interpreted.</p> <p>1.5. Seasonal issues are determined from published data on the turf plant species and cultivars, historical records, own experience, and enterprise guidelines.</p> <p>1.6. Nutritional status of the turf plant species and cultivars is determined by analysing collected data and comparing to accepted standards.</p>
2. Identify the requirements of a sports turf maintenance program	<p>2.1. The standards for turf presentation are clearly defined according to client requirements, enterprise guidelines and industry best practice.</p> <p>2.2. The different maintenance requirements during a range of conditions over the growing cycle of the turf plant are identified according to published data on the species and cultivar, historical records, own</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>experience, and enterprise guidelines.</p> <p>2.3.Sports turf maintenance procedures are selected to achieve the appropriate plant condition according to the standards for turf presentation.</p> <p>2.4.Resources, tools, equipment and machinery required for the sports turf maintenance program are identified, costed, and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>2.5.The most cost-effective approach to maintaining the sports turf playing surface is determined.</p> <p>2.6.Occupational Health and Safety (OHS) hazards associated with the implementation of the sports turf maintenance program are identified, risks assessed and controls developed according to enterprise guidelines, costed and documented in the program.</p> <p>2.7.Environmental implications of sports turf maintenance activities are identified and documented in the program.</p>
<p>3. Prepare and document the sports turf maintenance program</p>	<p>3.1.Detailed plan, specifications and quotation are prepared based on the requirements of the program and presented to management for acceptance.</p> <p>3.2.Scaled site plan is produced which can be readily interpreted and understood by on-site personnel according to enterprise standards.</p> <p>3.3.Detailed on-site procedures and schedules required for the sports turf maintenance program are developed and documented.</p>
<p>4. Monitor the sports turf maintenance program</p>	<p>4.1.Implementation of the maintenance program is monitored to ensure enterprise standards for presentation of sports turf playing surfaces are achieved.</p> <p>4.2.The sports turf maintenance program is reviewed and monitored to ensure it remains responsive to changing conditions.</p> <p>4.3.Appropriate courses of action are implemented to alleviate or overcome identified shortcomings in the program.</p> <p>4.4.Remedial action undertaken is documented and reported to management according to enterprise policy.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and evaluate information
- assess site factors and evaluate their impact on the development of the sports turf maintenance program
- comply with legislative requirements
- document plans, specifications and work procedures, and write reports for the understanding of staff, managers and contractors
- calculate the cost and spatial and logistical requirements of components of the sports turf maintenance program
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the principles and practices of maintaining a range of sports turf playing surfaces in relation to client needs, and the standards required for the intended use of the surface
- growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
- maintenance requirements and practices for specific turf plant species and cultivars after initial establishment
- site evaluation techniques including analysis of the condition of soils, plants, and the site for turf maintenance activities
- nutrients required by specific turf plant species and cultivars and the affects of nutrient deficiency and toxicity on individual plant species and cultivars, including visual symptoms
- plant diseases of specific turf plant species and cultivars
- the characteristics of soil and other growth media types, uses and additives to enhance the available nutrition for specific turf plant species and cultivars
- soil ameliorants commonly required to treat the soil problems experienced by the enterprise
- the main simple and compound fertiliser products available to the enterprise
  - legislation and regulations relating to sports turf sites and turf maintenance

**REQUIRED SKILLS AND KNOWLEDGE**

activities.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- use existing information and records to determine a comprehensive maintenance program
- prepare an seasonal/annual program according to the requirements of the enterprise and the grounds maintenance budget
- communicate a sports turf maintenance program to staff.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Maintenance may include:

- soil and turf plant tissue testing
- applying nutrients

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• watering</li> <li>• rolling</li> <li>• mowing</li> <li>• monitoring turf plant health</li> <li>• renovating where necessary</li> <li>• preparing the sports turf playing surface to presentation standards.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare the turf renovation program	<p>1.1.The turf renovation site is identified and field measurements and tests undertaken.</p> <p>1.2.Site hazards are identified, risks assessed and controls implemented.</p> <p>1.3.Renovation materials and resource requirements are selected and calculated.</p> <p>1.4.Renovation costs are checked to be within budget levels and are verified by client/manager.</p> <p>1.5.Existing design plans and documentation are interpreted or new design plans are developed.</p> <p>1.6.A renovation program is developed containing the site assessment report, results of field measurements and tests, risk controls, and material and resource calculations.</p> <p>1.7.Schedule of works and specifications are developed and recorded in the program.</p>
2. Prepare renovation equipment	<p>2.1.Machinery maintenance logs, maintenance plans and schedules are checked and machinery prepared for the program.</p> <p>2.2.Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturer specifications and enterprise work procedures.</p> <p>2.3.Tools, equipment and machinery are calibrated and adjusted according to manufacturer guidelines and documented work method statements.</p> <p>2.4.Records of checks, calibrations and adjustments are</p>

ELEMENT	PERFORMANCE CRITERIA
	entered into workplace documentation.
3. Implement the renovation program	<p>3.1. Enterprise work team and contractors are identified and work tasks are coordinated in a sequential, timely and effective manner in consultation with the client, superintendent or board.</p> <p>3.2. Work pattern is organised and directed according to the schedule of works.</p> <p>3.3. Works are supervised and executed according to Occupational Health and Safety (OHS) requirements and environmental implications.</p> <p>3.4. Renovation tasks are monitored and remedial action is undertaken where necessary.</p> <p>3.5. A clean and safe work area is maintained throughout and on completion of work.</p>
4. Complete renovation activities	<p>4.1. Site and surrounds are reviewed for completion of works and disposal of waste material.</p> <p>4.2. Tools, equipment and machinery are inspected and repair and maintenance requirements logged.</p> <p>4.3. Expenses are recorded and reviewed against budget.</p> <p>4.4. The renovation program is reviewed for costs, scheduling, works procedures and quality of work.</p> <p>4.5. A works report is documented and presented to the client/manager or board.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret existing plans or develop new plans
- conduct a site hazard identification and risk control assessment
- apply renovation program specifications
- coordinate work group, contractors and own activities
- sequentially and effectively complete turf renovation in a timely and cost-effective manner
- develop and document a program of works
- use literacy skills to read, interpret and follow organisational policies and

**REQUIRED SKILLS AND KNOWLEDGE**

procedures, develop sequenced written instructions, record information collected accurately and legibly, and select and apply procedures to a range of tasks

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- specialist turf renovation practices to achieve high performance turf
- field measurements, such as infiltration rate, organic fines, hardness, traction, surface smoothness and turf sward height
- enterprise and industry standards for turf surface appearance and quality
- comparative environmental implications of renovation activities, turf and soil treatments, and waste disposal procedures
- planting, care and renovation scheduling requirements of grass species and cultivars.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- plan a sports turf renovation program
- conduct a site hazard identification and risk control assessment
- develop a schedule of works and specifications for a

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

### Elements and Performance Criteria Pre-Content

Not Applicable

### Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Carry out preliminary planning activities for turf establishment	1.1. Client preferences and requirements for the sports turf playing surface are understood and confirmed. 1.2. The site is assessed for biophysical factors, services and site modifications. 1.3. Research is conducted into turf plant species and cultivars, legal attributes and local by-laws and restrictions that may affect the plan for turf establishment. 1.4. Environmental implications of the planned turf establishment works are identified and, if necessary, reported to relevant personnel for further research. 1.5. A concept plan that reflects client preferences and requirements, and takes into account site factors and any identified environmental requirements is developed and presented to the client for discussion and approval.
2. Determine requirements of turf establishment works	2.1. Plants that are appropriate to the site and consistent with the agreed concept plan are identified and the required quantity calculated, costed and availability confirmed with the supplier. 2.2. Turf establishment procedures consistent with the

ELEMENT	PERFORMANCE CRITERIA
	<p>agreed concept plan are selected according to the characteristics of available plant materials, site factors, the resources and equipment available and the environmental factors affecting the success of the turf establishment works.</p> <p>2.3.Design of the soil profile to support the playing surface takes into account the turf use, soil characteristics and other site and local environmental factors, and includes irrigation and drainage systems that accord with enterprise irrigation and drainage plans.</p> <p>2.4.Management of juvenile turf is provided for according to client requirements, site capabilities and enterprise standards and encourages optimal growth.</p> <p>2.5.Resources, tools, equipment and machinery required for the construction of soil profiles, planting and ongoing maintenance of the sports turf playing surface are identified, costed and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>2.6.Occupational Health and Safety (OHS) hazards associated with the turf establishment works are identified, risks assessed and controls developed according to industry standards, and are costed and documented in the plan.</p> <p>2.7.Staged implementation and development are outlined where appropriate, with access for future works provided for according to client, enterprise and site requirements.</p> <p>2.8.Timelines for preparations, construction of soil profiles, planting and maintenance are determined taking into account the needs of the turf species and cultivars, the softscape and hardscape components, site conditions and any other planning requirements.</p>
<p>3. Prepare and document the turf establishment plan and specification</p>	<p>3.1.Designs of the soil profile and detailed plans of the scope of works, specifications and quotation are prepared based on horticultural conventions and the requirements of the turf establishment work and presented to the client for acceptance.</p> <p>3.2.Scaled site plan is produced which can be readily interpreted and understood by on-site personnel according to enterprise standards.</p> <p>3.3.Detailed on-site procedures and schedules required for the establishment of the sports turf playing</p>

ELEMENT	PERFORMANCE CRITERIA
	surface and its ongoing maintenance are developed and documented.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and evaluate information
- design plans and elevations of turf establishment works
- document the plan of scope of works and record all relevant information
- comply with legislative requirements
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the principles and practices of establishing and maintaining a range of sports turf playing surfaces in relation to client needs, and the standards required for the intended use of the surface
- construction procedures, plant selection and cultural practices for sports turf playing surfaces
- legislation and regulations relating to sports turf sites and turf establishment works
- site evaluation techniques including analysis of the condition of soils, plants and the site for turf establishment activities
- irrigation, drainage and the interrelationship of soil air, water and the physical structure of existing and manufactured soils and sports turf mixes
- growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
- maintenance requirements and practices for specific turf plant species and cultivars prior to and after initial establishment

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <ul style="list-style-type: none"> <li>• surveying principles and techniques</li> <li>• the role of project briefs and client consultation processes in planning turf establishment works.</li> </ul>
---

## Evidence Guide

<p><b>EVIDENCE GUIDE</b></p>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• develop or interpret construction documentation</li> <li>• develop specifications and prepare a bill of quantities</li> <li>• develop a schedule and a plan of the scope of works</li> <li>• design sectional and elevation plans of the turf establishment works</li> <li>• order and arrange for purchase and delivery of goods and services</li> <li>• identify and incorporate sub-contracted works into the turf establishment plan</li> <li>• prepare a maintenance program for turf establishment.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>

## AHCTRF502A Manage sports turf renovation programs

### Modification History

Not applicable.

### Unit Descriptor

This Unit describes the performance outcomes, skills and knowledge required to identify and implement turf renovation programs appropriate to site requirements.

### Application of the Unit

This Unit applies to sports turf managers, such as golf course superintendents, bowling greenkeepers, sports ground curators and turf contractors who are responsible for the coordination of turf renovation programs.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

AHCTRF305A Renovate sports turf

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify turf renovation needs	1.1 Turf surfaces are inspected and visually evaluated to determine their condition 1.2 Soil tests are undertaken to determine their need for amelioration 1.3 Compaction, visual, physical and chemical tests are performed 1.4 Water quality tests are undertaken where appropriate to determine its effect on turf growth and development
2 Select appropriate renovation techniques	2.1 A range of renovation techniques and practices are considered based on past practices and existing condition of turf 2.2 Renovation records are referred to for information about previous practices and timing 2.3 Turf renovation techniques are selected according to the condition of the turf and the intended outcome of the program 2.4 The timing of the renovation program is determined according to the requirements of the turf species, requirements of the practice and the needs of players and use of the turf facility 2.5 An on-going turf maintenance program is prepared
3 Organise staff and resources for turf renovation project	3.1 The turf renovation program is recorded and programmed into greenkeeping program of works 3.2 Machinery and equipment for the renovation program are determined and checked for availability and working condition 3.3 Consumable requirements are calculated and ordered 3.4 Contractors and machinery are contacted and hired, if necessary, according to the requirements of the program
4 Review renovation outcomes and complete associated record keeping	4.1 Soil testing and water quality test results are recorded for future reference 4.2 Direct costs of consumables and contractors are recorded for future reference 4.3 Indirect costs of staff involvement are recorded for future reference 4.4 Renovation practices and outcomes are recorded for future reference

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

### Required skills include:

#### Ability to:

- research industry turf renovation practices
- undertake a site assessment
- interpret existing soil conditions
- evaluate existing turf conditions
- interpret site water quality data
- recognise turf renovation requirements based on turf type and usage
- estimate and calculate quantities of materials and costs of renovation program resources
- read and interpret renovation product labels
- plan and schedule project works
- communicate in writing and verbally.

### Required knowledge includes:

#### Knowledge of:

- requirements of the turf's intended use
- soil physical and chemical properties for imported and existing soils
- schedule and intensity
- specialist turf renovation principles and practices
- field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness and turf sward height
- enterprise and industry standards for turf surface appearance and quality
- comparative environmental implications of renovation activities, turf and soil treatments and waste disposal procedures
- planting, care and renovation scheduling requirements of turf grass species and cultivars.
- turf nutrition and plant growth regulators
- impact of climatic conditions on turf recovery.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and	The evidence required to demonstrate competency in

evidence required to demonstrate competency in this Unit	<p>this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• development of renovation documentation</li> <li>• development of program specifications</li> <li>• development of a schedule and a plan of the scope of works</li> <li>• ordering and arranging purchase and delivery of goods and services</li> <li>• identifying and incorporating sub-contracted works into the turf renovation plan</li> <li>• preparation of an on-going turf maintenance program.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some workplaces may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

### Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

Turf

## AHCTRF503A Develop sports turf management programs

### Modification History

Not applicable.

### Unit Descriptor

This Unit describes the performance outcomes, skills and knowledge required to develop sports turf management programs including turf establishment programs, extension/redesign, turf surface upgrades and renovation programs based on the organisation's available resources.

### Application of the Unit

This Unit applies to sports turf managers, such as golf course superintendents, 'grow in' superintendents, project managers and turf contractors, who have a responsibility for developing short term, annual and on-going sports turf management and maintenance programs.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Research turf management principles and practices	1.1 Project briefs are established or developed 1.2 Principles underpinning sports turf growth and development are determined as appropriate for site conditions 1.3 Environmental impacts of the turf management programs are identified and considered
2 Determine turf management program scope and objectives	2.1 A site assessment is undertaken that includes the assessment of the turf growing environment, the resources available for on-going turf maintenance, the source of water and its quantity and quality, the type of turf and its condition, intended use and intensity 2.2 The program duration and resource requirements are estimated 2.3 A program schedule and budget are developed that reflects the approach taken to the turf management programs 2.4 The turf management program is reviewed and confirmed with others
3 Communicate turf management programs to others	3.1 Current turf management practices are identified and confirmed for the project requirements 3.2 The intended programs are recorded and communicated in an appropriate format to staff and management or client 3.3 Key parts of the turf management program that involve others are identified and communicated 3.4 Project schedules and timelines are developed
4 Record and review turf management programs for use by others	4.1 Turf is inspected regularly and changes to the management plan are implemented according to the monitoring process 4.2 The turf management program is monitored and changes to the program are considered and communicated 4.3 Information is recorded from team meetings 4.4 Information is reported and filed for future use

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

### Required skills include:

#### Ability to:

- undertake a site assessment

- evaluate short and long term climatic conditions
- interpret soils and water test data
- recognise turf maintenance required based on type and usage
- use written and verbal communication skills
- provide for turf and usage needs through program development including fertility, renovation and maintenance practices
- calculate water usage requirements
- provide irrigation scheduling and management
- develop monitoring program to assess impact of program
- manage project timelines.

**Required knowledge includes:**

**Knowledge of:**

- turf varieties and characteristics
- nutritional requirements for different stages of turf development
- turf establishment techniques and requirements
- soil type and characteristics
- water quality and its impacts on soils and turf
- impact of intended usage on turf
- impact of climatic conditions on turf varieties
- requirements of intended use of turf
- renovation requirements and techniques
- project programming.

**Evidence Guide**

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this Unit</p>	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• development of turf management programs</li> <li>• development of specifications and bills of quantity for turf management programs</li> <li>• development of a works schedule and a plan of the scope of works</li> </ul>

	<ul style="list-style-type: none"> <li>• preparation of a turf maintenance program.</li> </ul>
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some workplaces may differ due to the regional or enterprise circumstances.
Method of assessment	This Unit should be assessed together with core Units and other Units of Competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency of performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Turf management programs include:	<ul style="list-style-type: none"> <li>• watering volume and frequency</li> <li>• fertiliser amounts and frequency</li> <li>• organic management practices</li> <li>• weed control programs</li> <li>• pest and disease monitoring</li> <li>• mowing settings and frequency</li> <li>• coring, slicing and other renovation practices.</li> </ul>

## Unit Sector(s)

Turf

## AHCTRF504A Manage sports turf facility assets

### Modification History

Not applicable.

### Unit Descriptor

This Unit describes the performance outcomes, skills and knowledge required to manage infrastructure and other facilities at sports turf grounds.

### Application of the Unit

This Unit applies to sports turf managers, such as golf course superintendents, bowling greenkeepers and sports ground curators, who have a responsibility for the management of physical resources (other than the turf playing surfaces) at a sporting venue or club. The management of the turf machinery fleet and equipment is covered in AHCMOM501A Manage machinery and equipment.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This Unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Develop an asset database	<p>1.1 Physical resources and infrastructure are identified and recorded for management purposes</p> <p>1.2 Physical resources and infrastructure are classified according to their type and maintenance requirements</p>
2 Identify ongoing maintenance requirements for turf facilities	<p>2.1 Particular maintenance requirements of various resources are identified and programmed</p> <p>2.2 Resources and consumables for the maintenance of different types of facilities are purchased and stored</p> <p>2.3 User manuals and other operational or maintenance documents provided by suppliers are considered where necessary</p>
3 Schedule and monitor program of maintenance works	<p>3.1 Maintenance activities for enterprise's facilities are identified and programmed</p> <p>3.2 Staff responsible for maintenance activities are informed</p> <p>3.3 Record keeping requirements are developed and used to monitor ongoing maintenance and inform others</p> <p>3.4 Occupational Health and Safety issues associated with maintenance of turf facilities is considered and planned for</p> <p>3.5 Facilities that are unserviceable are dealt with accordingly</p> <p>3.6 Plans are made for replacement of facilities that are no longer serviceable</p>
4 Review maintenance works	<p>4.1 Maintenance schedules are reviewed in a timely manner and maintenance programs are updated accordingly</p> <p>4.2 Where appropriate, management is notified of status of turf facilities and plans for their upgrade or replacement are made</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

### Required skills include:

#### Ability to:

- use software application skills
- maintain turfed areas
- record workplace information
- use written and verbal communication skills.

**Required knowledge includes:****Knowledge of:**

- proprietary asset management software
- maintenance requirements of sports turf physical resources and infrastructure
- scheduling and programming of sports turf maintenance works
- staff management
- enterprise and industry standards for turf surface appearance and quality
- comparative environmental implications of turf and soil treatments and waste disposal procedures.

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>The evidence required to demonstrate competency in this Unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• use asset databases</li> <li>• identify maintenance requirements for a range of turf facilities</li> <li>• schedule and monitor programmed works</li> <li>• record and review programmed works.</li> </ul>

## AHCVPT201A Clear features that harbour pest animals

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of clearing features and destruction of habitats that harbour pest animals without damaging native animal habitats and flora and defines the standard required to: interpret instructions for pest animal destruction; identify the natural areas and features that are part of pest animal habitat; clear areas infested by pests and destroy pest habitat; check for areas that can be reinfested; avoid disturbing protected or endangered plant and animal species; leave cleared areas in required state of repatriation.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to clearing features that harbour pest animals and is usually conducted within established routines, methods and procedures.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine clearing work required	<p>1.1.Characteristics of the features that harbour the target pest are identified.</p> <p>1.2.Locations of the habitat of the target pest are identified.</p> <p>1.3.Approaches to work including estimated time required to clear features and destroy pest habitats are determined.</p> <p>1.4.Hazards associated with the job are identified in accordance with Occupational Health and Safety (OHS) standards.</p> <p>1.5.Environmental risks associated with the job are identified in accordance with statutory and local authority requirements.</p> <p>1.6.Vehicles, equipment and materials required to complete the habitat destruction are identified.</p>
2. Prepare for clearing and destruction work	<p>2.1.Location and boundaries for the clearing are mapped in accordance with the pest management strategy and monitoring program.</p> <p>2.2.Precautions to minimise hazards associated with the clearing are taken in accordance with OHS standards.</p> <p>2.3.Precautions to minimise environmental risks associated with the clearing are taken in accordance with statutory and local authority requirements.</p> <p>2.4.Vehicles, equipment and materials are checked for serviceability in accordance with manufacturer's</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>specifications and relevant policies.</p> <p>2.5.Actions to prevent interference with non-target species are taken as necessary.</p> <p>2.6.Appropriate licences, permits and clearances are obtained prior to commencement of work.</p>
3. Clear land and destroy pest habitats	<p>3.1.Areas containing pest habitat are dogged prior to commencing destruction procedures if required.</p> <p>3.2.Features and habitats which harbour target pest are cleared in accordance with industry practice.</p> <p>3.3.Habitats are destroyed using approved procedures and techniques in accordance with industry practice.</p> <p>3.4.Destroyed habitats are checked for remaining sites that can be accessed and restored by pest animals.</p> <p>3.5.Remaining sites that can be accessed and restored by pest animals are made inaccessible.</p> <p>3.6.Area is monitored over a prescribed period to detect signs of reinfestation.</p> <p>3.7.Native and other valued flora are protected as required in accordance with environmental statutory requirements.</p> <p>3.8.Debris is disposed of in accordance with industry practice.</p>
4. Clean and store equipment and material	<p>4.1.Equipment and materials are cleaned and stored in accordance with relevant standards and policies.</p> <p>4.2.Job completion is reported or recorded in accordance with relevant policies and procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate with work colleagues
- assess risks to environment and take measures to control them
- use and maintenance of tools and equipment
- record and report task completion and, where necessary, observations of property

## REQUIRED SKILLS AND KNOWLEDGE

status

- prepare for the clearing job
- destroy habitats that harbour pest animals
- clean and store equipment and materials
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- legislation&regulations relating to environmental protection
- legislation&regulations relating to pest animals
- legislation&regulations relating to activities in nature reserves and heritage areas
- OHS legislative and enterprise requirements
- common law principles relating to property, stock, duty of care and due diligence
- risks to land users' posed by pest animals including exotic diseases and zoonoses
- pest life cycles and behaviours
- harbours used by pest animals
- harbours used by non-target species.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• interpret instructions for pest animal destruction</li> <li>• identify the natural areas and features that are part of pest animal habitat</li> <li>• clear areas infested by pests and destroy pest habitat</li> <li>• check for areas that can be reinfested</li> <li>• avoid disturbing protected or endangered plant and animal species</li> <li>• leave cleared areas in required state of repatriation.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Features may include:	<ul style="list-style-type: none"> <li>• food and water sources</li> <li>• physical cover such as warren, surface logs, refuse and vegetation clumps.</li> </ul>

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assess the scope of the mustering job	<p>1.1.Target pest animal range and behaviour are confirmed.</p> <p>1.2.Location for the muster is determined.</p> <p>1.3.Time required to complete the muster is estimated.</p> <p>1.4.Hazards associated with the muster are identified according to Occupational Health and Safety (OHS) standards.</p> <p>1.5.Environmental risks associated with the mustering job are identified according to statutory and local authority requirements.</p> <p>1.6.Resources required to complete the muster are identified.</p>
2. Prepare for mustering	<p>2.1.Location and boundaries for the muster are mapped to be consistent with the target pest animal behaviour and according to the pest animal management strategy and monitoring program.</p> <p>2.2.Time and duration of the muster are checked and relevant personnel notified.</p> <p>2.3.Precautions to minimise hazards associated with muster are identified according to OHS standards.</p> <p>2.4.Precautions to minimise environmental risks associated with the muster job are identified according to statutory and local authority requirements.</p> <p>2.5.Vehicles, equipment and materials are checked for serviceability according to manufacturer specifications and relevant policies.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.6. Central point of muster is established and agreed with all participants. 2.7. Holding yards are set up. 2.8. Horses and dogs, where used in the muster, are checked for fitness.
3. Muster pest animals	3.1. Muster is conducted at the appropriate time of day. 3.2. Actions are taken to minimise stress to animals during the muster. 3.3. Water and feed are provided to mustered animals and horses and dogs where they have been used in the muster. 3.4. Animals are treated in accordance with the Code of Practice for Care, Handling and Capture of Feral Animals. 3.5. Mustered animals are held, transported or destroyed according to enterprise guidelines.
4. Clean and store equipment and material	4.1. Animals used during the muster are cared for according to industry practices. 4.2. Equipment and materials are cleaned and stored according to relevant standards and policies. 4.3. Job completion is reported or recorded according to relevant policies and procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and adopt safe work practices
- assess the scope of the mustering job
- prepare for mustering
- conduct mustering operations
- clean and store equipment and materials
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for

**REQUIRED SKILLS AND KNOWLEDGE**

- clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- OHS, environmental and pest management legislative and enterprise requirements
- common law principles relating to property, stock, duty of care and due diligence
- risks to land users posed by pest animals, including exotic diseases and zoonoses
- pest animal life cycles and behaviours
- animal welfare codes of practice
- emergency procedures related to work in isolated and remote areas.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- confirm the species and type of pest animals to be mustered
- plan the muster to optimise the catch and minimise stress and risk of breakouts of pest animals
- carry out safe mustering as part of a team
- handle and process mustered animals
- collect equipment and ensure environmental impacts of mustering are minimised.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

**EVIDENCE GUIDE**

enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Animals may include:

- kangaroos
- goats
- horses
- deer
- camels
- cattle
- water buffalos
- donkeys.

**Unit Sector(s)****Unit sector**

Vertebrate pests

**Co-requisite units**

## AHCVPT203A Use firearms to humanely destroy animals

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of destroying animals humanely by shooting and defines the standard required to: confirm the details of animals to be shot; prepare and handle ammunition and weapons safely; ensure the shooting area is clear and notifications have been made where necessary; shoot the animal in a body site that causes instant death; handle or dispose of dead animals as required.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to using firearms to humanely destroy animals and is usually conducted within established routines, methods and procedures.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assess the scope of the shooting job	<p>1.1. Anatomy and physical features identifying location of vulnerable organs of target animal are confirmed.</p> <p>1.2. Location of habitats, habits and range of movement of target animal is confirmed.</p> <p>1.3. Timing of the shoot is determined based on the activity patterns of the target animal.</p> <p>1.4. Time required to complete the shoot is estimated.</p> <p>1.5. Hazards associated with the shoot are identified in accordance with Occupational Health and Safety (OHS) standards.</p> <p>1.6. Environmental and public safety risks associated with the shoot are identified in accordance with statutory and local authority requirements.</p> <p>1.7. Vehicles, equipment and materials required to complete the shoot are prepared.</p>
2. Prepare for the shooting job	<p>2.1. Location and boundaries for the shoot are mapped in accordance with the animal management strategy and monitoring program.</p> <p>2.2. Time and duration of the shoot are checked and relevant personnel notified.</p> <p>2.3. Precautions to minimise hazards associated with the shoot are taken in accordance with OHS standards.</p> <p>2.4. Precautions to minimise environmental risks associated with the shoot are taken in accordance with statutory and local authority requirements.</p> <p>2.5. Vehicles, equipment and materials are checked for serviceability in accordance with manufacturer's</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>specifications and relevant policies.</p> <p>2.6.Firearm licences or exemptions are obtained or checked in accordance with statutory requirements.</p> <p>2.7.Firearm and ammunition types are selected to comply with those recommended for the target animal in accordance with industry practice and animal ethics guidelines.</p> <p>2.8.Firearm and ammunition are checked and prepared in accordance with statutory requirements and industry practice.</p> <p>2.9.Firearm is zeroed and test fired in accordance with industry practice.</p> <p>2.10. Firearm is stowed for transport unloaded and in safety mode.</p>
3. Shoot animals	<p>3.1.Personal protective and safety equipment is used in accordance with OHS standards and statutory requirements.</p> <p>3.2.Firearm is carried safely with muzzle pointing in safe direction at all times in accordance with statutory requirements and industry practice.</p> <p>3.3.Firearm is loaded, discharged and unloaded safely in accordance with statutory requirements and industry practice.</p> <p>3.4.Firearm is aimed at vulnerable sites, head or heart, on the animal.</p> <p>3.5.Each target animal is killed using a minimum of shots.</p> <p>3.6.Each target animal is checked to ensure it is dead prior to selecting the next target animal where possible.</p> <p>3.7.Target animals that have not been killed cleanly are destroyed in a humane manner in accordance with animal welfare regulations and statutory requirements.</p> <p>3.8.Carcases that are required for research or commercial use are handled as required in accordance with the animal management strategy and action plan.</p> <p>3.9.Animal carcasses that are not required for research or other purposes are disposed of as required in accordance with statutory requirements and industry practice.</p>
4. Clean and store	4.1.Carcases for research or commercial use are cleaned

ELEMENT	PERFORMANCE CRITERIA
equipment and material	<p>and stored in accordance with relevant policies and procedures and industry practice.</p> <p>4.2. Equipment and materials are cleaned and stored in accordance with relevant standards and policies.</p> <p>4.3. Firearms are cleaned, maintained and stored in accordance with manufacturer's instructions and statutory requirements.</p> <p>4.4. Ammunition is stored in accordance with statutory requirements.</p> <p>4.5. Job completion is reported or recorded in accordance with relevant policies and procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- plan own work activities
- manage own time
- maintain and store weapons
- handle weapons
- use weapons to shoot accurately
- minimise animal trauma
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- OHS, environment, public risk and animal welfare legislative and enterprise requirements
- common law principles relating to property, stock, duty of care and due diligence

**REQUIRED SKILLS AND KNOWLEDGE**

- risks to land users posed by animals including exotic diseases
- animal life cycles and behaviours
- anatomy and physical features of the animal
- firearms safety
- suitable firearms and ammunition for given pest problem
- emergency procedures appropriate to the firearms handling.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- confirm the details of animals to be shot
- prepare and handle ammunition and weapons safely
- ensure the shooting area is clear and notifications have been made where necessary
- shoot the animal in a body site that causes instant death
- handle or dispose of dead animals as required.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Animals may include:	<ul style="list-style-type: none"> <li>all species determined to be pests of primary production, the environment or public health and lifestyle</li> <li>those requiring destruction for humane reasons</li> </ul> <p>Note: Appropriate firearms licences are required for those involved in training and assessment against this standard.</p>

## AHCVPT302A Implement vertebrate pest control program

### Modification History

Not Applicable

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit covers the process of planning and implementing a strategy for the control of vertebrate pests in a rural environment and defines the standard required to: use and handle hazardous substances; carry out inspections to assess infestations; identify species and nature of vertebrate pest; calculate vertebrate pest numbers and estimate resources and materials appropriate to implement control program; determine and implement control methods with due care and humane treatment; and dispose of carcasses according to established industry standards.</p>
-------------------------------	--

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>This unit involves applying well-developed skills with some discretion and judgement under routine supervision. It requires taking responsibility for own work output.</p>
---------------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<p><b>Prerequisite units</b></p>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assess requirements for pest control	<p>1.1. Vertebrate pest control requirements are assessed and clarified according to enterprise objectives.</p> <p>1.2. Inspections are carried out to ascertain type and severity of pest infestations.</p> <p>1.3. Control agents and methods of application to prevent, control or manage vertebrate pests are determined.</p> <p>1.4. Control program is developed for implementation according to enterprise requirements.</p>
2. Prepare to implement control program	<p>2.1. Suitable personal protective equipment (PPE) is selected, used and maintained according to Occupational Health and Safety (OHS) requirements.</p> <p>2.2. Equipment and materials required to support the implementation of control program are arranged.</p> <p>2.3. Relevant licences and permits are obtained according to legislative requirements.</p> <p>2.4. Safe working practices are observed and followed according to OHS and enterprise requirements.</p>
3. Control vertebrate pests	<p>3.1. Control program is implemented according to OHS, legislative and enterprise requirements.</p> <p>3.2. Safeguards are employed to ensure that targeted pests are controlled and all other species remain unharmed.</p> <p>3.3. Integrated health management is considered and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>implemented as required.</p> <p>3.4.Environmental impacts are assessed and controlled according to legislative and enterprise requirements.</p>
4. Complete control program	<p>4.1.Carcasses and control agents are disposed of according to environmental and industry codes of practice.</p> <p>4.2.Control program and outcomes are reviewed and evaluated for future best practice and planning management.</p> <p>4.3.Equipment and work areas are cleaned and returned to operating order according to OHS and enterprise requirements.</p> <p>4.4.Relevant information is documented and maintained to industry standards and enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- use a first aid kit
- select and use agricultural chemicals safely
- communicate effectively in verbal and written form with enterprise personnel and suppliers
- read and interpret chemical labels, material safety data sheets (MSDS) and safety signage or decals
- calculate vertebrate pest numbers and estimate resources and materials appropriate to implement control program
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- legislative and industry requirements for the disposal of vertebrate pests and control agents
- types of vertebrate pests
- control methods and techniques

**REQUIRED SKILLS AND KNOWLEDGE**

- safety signage
- sustainable livestock management
- relevant provisions of Native Vegetation Acts with particular attention to potential soil degradation and destruction of flora and fauna
- relevant provisions of OHS and animal welfare legislation, codes of practice and enterprise procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- use and handle hazardous substances
- carry out inspections to assess infestations
- identify species and nature of vertebrate pest
- calculate vertebrate pest numbers and estimate resources and materials appropriate to implement control program
- determine control methods with due care and humane treatment
- dispose of carcasses according to established industry standards.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Vertebrate pests may include:

- animal species, such as wild birds
- rats and mice
- feral cats
- feral pigs
- foxes
- those identified in biosecurity codes of practice.

## Unit Sector(s)

<b>Unit sector</b>	Vertebrate pests

## AHCVPT303A Survey pest animals

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of surveying pest animal abundance by conducting ground and aerial counts and defines the standard required to: identify the target pest animal and its associated behaviours; define the geographical parameters for the count; apply survey principles and techniques; undertake accurate observations and recording.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit relates to surveying pest animals which requires some judgement and discretion, and would be normally carried out under minimal supervision within enterprise guidelines.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assess the scope of the count	<p>1.1.Target pest animal is confirmed.</p> <p>1.2.Location of habitats and range of movement of target pest animal is confirmed.</p> <p>1.3.Item(s) of direct evidence of pest animal to be counted are determined.</p> <p>1.4.Time required to complete the survey is estimated.</p> <p>1.5.Hazards associated with the survey are identified in accordance with Occupational Health and Safety (OHS) standards.</p> <p>1.6.Environmental risks associated with the survey are identified in accordance with statutory and local authority requirements.</p> <p>1.7.Resources required to complete the survey are identified.</p>
2. Prepare to conduct the count	<p>2.1.Location and boundaries for the count are mapped in accordance with the pest animal management strategy and monitoring program.</p> <p>2.2.Time and duration of the count are checked and relevant personnel notified.</p> <p>2.3.Precautions to minimise hazards associated with the count are taken in accordance with OHS standards.</p> <p>2.4.Precautions to minimise environmental risks associated with the count are taken in accordance with statutory and local authority requirements.</p> <p>2.5.Resources required to complete the count are checked for serviceability in accordance with manufacturer's specifications and relevant policies.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.6. Where the count involves aerial observation, precautions to minimise associated hazards are taken in accordance with industry practice.
3. Conduct count and record observations	3.1. Equipment is operated in accordance with the statutory requirements and industry practice. 3.2. Count is conducted within the boundaries of the specified location in accordance with the pest animal management strategy and monitoring program. 3.3. Precautions to minimise hazards associated with the count are implemented in accordance with OHS standards. 3.4. Precautions to minimise environmental risks associated with the count are implemented in accordance with statutory and local authority requirements. 3.5. Observations of direct evidence of target pest animal are recorded in accordance with the pest animal management strategy and monitoring program requirements.
4. Clean and store equipment and materials	4.1. Equipment and materials are cleaned and stored in accordance with relevant standards and policies. 4.2. Observation record documents are compiled and filed in accordance with relevant policies and procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- plan activities
- manage time
- count, add and record observations
- apply spotlighting techniques
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible

**REQUIRED SKILLS AND KNOWLEDGE**

information collected and select and apply procedures for a range of tasks

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- pest behaviour and habitats
- relevant legislative and regulatory requirements
- environmental protection legislation
- zoonoses and exotic diseases.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify the target pest animal and its associated behaviours
- define the geographical parameters for the count
- apply survey principles and techniques
- undertake accurate observations and recording.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Apply air safety procedures	<p>1.1. Location and boundaries for the activities are confirmed with the pilot.</p> <p>1.2. Time and duration of the flight are checked and relevant personnel notified.</p> <p>1.3. Flight plans and search and rescue operations are confirmed with the pilot and ground crew.</p> <p>1.4. On board emergency equipment is checked with pilot.</p> <p>1.5. Emergency landing procedures are checked with the pilot.</p> <p>1.6. Landing site requirements are checked.</p> <p>1.7. Intent to approach or leave the aircraft is confirmed with the pilot.</p> <p>1.8. Aircraft is approached in the recommended safe manner.</p>
2. Conduct activities from aircraft	<p>2.1. Equipment is stowed safely on the aircraft.</p> <p>2.2. Harnesses and helmet are worn as required during pest control activities.</p> <p>2.3. Route and location of activities are accurately plotted on property, local or regional map</p> <p>2.4. Vertebrate pest animals are shot according to legislative requirements and enterprise procedures if applicable</p> <p>2.5. Baits are distributed according to legislative requirements and enterprise procedures if applicable</p> <p>2.6. Observation and recording of pest numbers is carried out if applicable</p>

ELEMENT	PERFORMANCE CRITERIA
	2.7. Activities are documented and reported in accordance with enterprise procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- apply air safety principles
- read maps and plot locations
- use weapons in an aircraft
- shoot pest animals humanely
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- relevant Occupational Health and Safety (OHS), environmental and animal welfare legislation
- legislation dealing with pest control
- pest behaviour and physiology
- air safety principals and emergency procedures appropriate to the firearms and/or bait handling
- common law principles relating to property, stock, duty of care and due diligence
- risks to land users posed by pests
- emergency procedures appropriate to the firearms and/or bait handling.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• discuss arrangements with ground crew and pilot</li> <li>• safely handle and use weapons while on an aircraft</li> <li>• carry out shooting or baiting of nominated pests according to directions, if applicable</li> <li>• maintain a high degree of accuracy and accountability in actions.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for 'judas' animal operation	<p>1.1.Target pest animal range and behaviour are confirmed.</p> <p>1.2.Time required to complete the location of target animals is estimated.</p> <p>1.3.Hazards associated with the procedures are identified in accordance with Occupational Health and Safety (OHS) standards.</p> <p>1.4.Environmental risks associated with the procedures are identified in accordance with statutory and local authority requirements.</p> <p>1.5.Resources required to complete the procedures are identified.</p> <p>1.6.Permission to release pest animal is obtained as necessary.</p> <p>1.7.Operation of radio-telemetry equipment is checked in accordance with manufacturer's instructions.</p> <p>1.8.Assistance is provided as tranquillising drugs are prepared and administered in accordance with veterinary procedures by authorised person.</p> <p>1.9.Appropriate animal is selected and tagged with radio transmitting collar in accordance with humane animal handling techniques.</p>
2. Locate isolated herd	<p>2.1.'Judas' animal is released in targeted location.</p> <p>2.2.Reasonable time lapse is allowed for 'judas' animal to join mob of same species.</p> <p>2.3.Radio-telemetry equipment is operated in accordance with manufacturer's instructions.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4.Herd is located and approached to optimise effectiveness of control method.
3. Control target species	3.1.Isolated mob is mustered, harvested or destroyed in accordance with statutory requirements and industry practice. 3.2.'Judas' animal is released or allowed to escape to join other mobs as required.
4. Clean and store equipment and material	4.1.Equipment and materials are cleaned and stored in accordance with relevant standards and policies. 4.2.Job completion is recorded or reported according to enterprise procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- prepare 'judas' animals
- locate isolated herds
- control target species
- clean and store equipment and materials
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- common law principles relating to property, stock, duty of care and due diligence
- risks to land users posed by pest animals including exotic diseases and zoonoses
- pest animal life cycles and behaviours
- OHS legislation and enterprise requirements

**REQUIRED SKILLS AND KNOWLEDGE**

- environmental and pest control legislative and enterprise requirements
- animal welfare
- relevant emergency procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- confirm arrangements for using Judas animals as part of vertebrate pest control program
- use appropriate tagging techniques on Judas animals
- locate Judas animals and track to mob after tagging
- muster, harvest or destroy pest animals according to organisational requirements
- report on pest control activities.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

ELEMENT	PERFORMANCE CRITERIA
1. Plan animal capture	<p>1.1.Purpose of capture of animals is identified as determined from the management strategy and action plans.</p> <p>1.2.Target animal range and behaviour are confirmed.</p> <p>1.3.Trapping location and placement of equipment are determined.</p> <p>1.4.Time required to complete capture is estimated and trapping effort is determined.</p> <p>1.5.Materials and equipment for trapping are identified.</p> <p>1.6.Hazards associated with trapping are identified in accordance with Occupational Health and Safety (OHS) practices and procedures.</p> <p>1.7.Environmental risks associated with capturing animals are identified in accordance with statutory and local authority requirements.</p>
2. Prepare for trapping	<p>2.1.Locations for the trapping activity are mapped to be consistent with target animal behaviour and in accordance with the management strategy and relevant monitoring programs.</p> <p>2.2.Relevant licenses and permission to enter property are obtained.</p> <p>2.3.Precautions to minimise hazards are identified in accordance with OHS practices and procedures.</p> <p>2.4.Precautions to minimise environmental risks associated with capturing the target animal are identified.</p> <p>2.5.Precautions to minimise trapping of non-target</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>animals are considered.</p> <p>2.6.Vehicles, equipment and materials are checked for serviceability in accordance with manufacturer's specifications and relevant policies.</p>
3. Place and set traps	<p>3.1.Site for trapping is selected to maximise chance of trapping target animals and minimise chance of trapping non-target animals.</p> <p>3.2.Site for capturing animals is prepared in accordance with industry practice.</p> <p>3.3.Trapping equipment is constructed, positioned and secured in accordance with industry practice.</p> <p>3.4.Trapping equipment is set safely in accordance with manufacturer's instructions.</p> <p>3.5.Trapping equipment is checked for strength and security in accordance with industry practice.</p> <p>3.6.Trap mechanisms are set or calibrated in accordance with manufacturer's instructions.</p> <p>3.7.Lures or baits are applied in accordance with industry practice if required.</p> <p>3.8.Traps are camouflaged as required.</p> <p>3.9.Precautions to prevent trapping of non-target animals are applied in accordance with industry practice.</p>
4. Check and remove traps	<p>4.1.Traps are checked regularly in accordance with industry practice.</p> <p>4.2.Trapped animals are identified then released, killed or prepared for transport in accordance with industry practice.</p> <p>4.3.Captured animals are handled humanely according to enterprise requirements and animal welfare guidelines.</p> <p>4.4.Animals are checked according to supervisor instructions and enterprise guidelines.</p> <p>4.5.Animals are transported from site where required in a safe and appropriate manner according to legislative and enterprise requirements.</p> <p>4.6.OHS and public safety requirements are met prior to and during trapping activities.</p> <p>4.7.Trap mechanism is released safely and trap is removed in accordance with industry practice.</p> <p>4.8.Trap site is restored to prior condition.</p>
5. Report completion of	5.1.Results of trapping activities are reported according

ELEMENT	PERFORMANCE CRITERIA
work	<p>to enterprise guidelines.</p> <p>5.2. Incidents with animals are dealt with and reported according to legislative, enterprise, occupational health and safety and public safety requirements.</p>
6. Clean and store equipment and material	<p>6.1. Carcasses for research or other purposes are cleaned and stored in accordance with relevant policies and procedures and industry practice.</p> <p>6.2. Equipment and materials are cleaned and stored in accordance with relevant standards and policies.</p> <p>6.3. Target and non-target kills are recorded in accordance with statutory requirements and enterprise guidelines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- plan animal capture
- prepare for trapping
- place and set traps
- check and remove traps
- clean and store equipment and materials
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- OHS, environmental and pest control legislative and enterprise requirements
- common law principles relating to property, stock, duty of care and due diligence

**REQUIRED SKILLS AND KNOWLEDGE**

- animal life cycles and behaviours
- catching techniques, equipment and operation
- suitable traps for the given animal species
- animal welfare
- animal identification
- basic animal handling and care
- legislation applying to the capture and care of wildlife
- transportation methods of caught animals
- public welfare legislation, regulations, Codes of Practice and enterprise procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify the species, purpose and target area for trapping
- select trap sites and prepare traps
- check traps and examine, relocate or destroy trapped animals
- collect traps and ensure environmental impacts of trapping are minimised
- record and report details of trapped animals if required.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Animals may include:	<ul style="list-style-type: none"> <li>• native animals</li> <li>• domestic species</li> <li>• species determined to be pests of primary production, the environment or public health and lifestyle.</li> </ul>

## Unit Sector(s)

## AHCWAT201A Set up, operate and maintain water delivery systems for compost

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of setting up, operating and maintaining water delivery systems to maintain moisture levels in compost and defines the standard required to: establish the requirements for a water delivery system; set up and operate a water delivery system on a commercial-scale composting site; record water application data; observe faults and variations from required settings; observe and report any faults or variations from required settings.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to an employee of an enterprise engaged in commercial-scale composting operations. Tasks are likely to be performed by a yard hand or general hand under supervision of an operations team leader or site foreman. Work is likely to be performed as a part of a team. The work requires the application of basic operational knowledge and skills to a limited range of maintenance tasks and roles, most of which are routine and predictable.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Set up a water delivery system	<p>1.1. Requirements for set up of water delivery system and application methods to be used are obtained from supervisor and clarified if required.</p> <p>1.2. Details of location to which water is to be delivered are confirmed with supervisor and any regulations covering use of site are noted and observed.</p> <p>1.3. Hoses, tools and equipment and components appropriate to particular water delivery system being set up are selected and correctly used.</p> <p>1.4. Appropriate water sources on site are identified.</p> <p>1.5. Occupational Health and Safety (OHS) hazards associated with task are identified and appropriate action is taken to minimise risks to self and others.</p> <p>1.6. Water delivery lines, where required, are measured and marked out according to instructions.</p> <p>1.7. Water delivery system is set up according to instructions and enterprise procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
2. Operate a water delivery system	2.1. Water delivery is commenced as instructed. 2.2. Water application rate is set according to enterprise procedures. 2.3. Pipes, hoses and all joints are checked and confirmed to be secure and leak free. 2.4. Pumps are operated and checked according to manufacturer instructions and enterprise procedures. 2.5. Remedial action is taken if required and according to enterprise guidelines and supervisor instructions.
3. Check the efficiency of a water delivery system	3.1. Water application rate and distribution are checked according to enterprise procedures. 3.2. Water delivery system is visually inspected for operating faults and dry areas, and observations are recorded in maintenance log. 3.3. Variations from required rate or settings, or leaks, operating faults and dry areas observed at any stage in process are reported to supervisor. 3.4. Remedial action is carried out as directed by supervisor and according to enterprise procedures. 3.5. Amounts of water delivered to location are recorded according to enterprise procedures. 3.6. Work outcomes are reported to supervisor, feedback on performance is sought and any required improvements are noted for future action.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and adopt safe work practices
- interpret site water management plan and site operating plan or map
- use a tape measure
- observing faults and variations from required settings
- operating pumps
- recording water application data
- setting out and operating watering systems

## REQUIRED SKILLS AND KNOWLEDGE

- using Personal Protective Equipment (PPE) correctly
- using relevant equipment
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- characteristics and operation of joints, hoses, valves and sprinkler components
- components of water delivery system
- methods and techniques of water delivery
- procedures for safe use of equipment, such as powered and hand tools, as used in water delivery system maintenance
- standard industry risk-control measures to minimise risk associated with setting up and operating a water delivery system
- reporting and recording requirements
- OHS and environmental legislation and enterprise requirements.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- establish the requirements for a water delivery system
- set up and operate a water delivery system on a

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Monitor water treatment plant performance	<p>1.1. Routine inspections of treatment equipment are carried out in accordance with manufacturer's recommendations, Occupational Health and Safety (OHS) and enterprise policy and procedures.</p> <p>1.2. Water samples are collected and standard tests are conducted, or samples are sent for analysis in accordance with enterprise policy and procedures and where applicable, the biosecurity and food safety codes.</p> <p>1.3. Data on treatment process is collected, recorded and reported in accordance with enterprise policy and procedures.</p>
2. Control chemical use	<p>2.1. Chemicals are used/handled/stored in accordance with enterprise policy and procedures and statutory requirements.</p> <p>2.2. Chemical dosing is prepared in accordance with enterprise policy and procedures and statutory requirements.</p> <p>2.3. Information related to chemical supply and usage is maintained in accordance with enterprise policy and procedures and statutory requirements.</p>
3. Operate and control water treatment processes	<p>3.1. Water and/or waste water treatment processes are monitored to maintain parameters of operation.</p> <p>3.2. Process faults and operational conditions of treatment equipment are identified and reported in accordance with enterprise policy and procedures.</p> <p>3.3. Basic equipment and process adjustments are initiated to enhance performance in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	enterprise policy and procedures.
4. Compile records	4.1. Reports are compiled from equipment and water treatment processes to meet enterprise policy and procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- identify control system faults
- identify adverse environmental impacts of irrigation activities and appropriate remedial action, and use water sampling and testing techniques
- prepare and apply chemical dosing
- implement and follow relevant enterprise OHS and environmental policies and procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- water treatment and water filtration techniques
- water quality monitoring methods and techniques
- environmental impacts of irrigation, using water from any ground or underground source
- hazardous materials handling
- chemical dosing processes
- enterprise policies and procedures
- biosecurity and food safety codes of practice
- environmental issues associated with water treatment

**REQUIRED SKILLS AND KNOWLEDGE**

- OHS procedures relating to the operation of machinery and the use of chemicals.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out routine inspections and tests on water samples
- identify control system faults
- use water sampling and testing techniques
- control chemical use in a safe and environmentally responsible manner
- operate and control water treatment processes
- compile records and reports.

## AHCWAT501A Design water treatment systems

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of identifying design requirements, determining specifications for storage and treatment systems, and determining capital and operating expense budgets for the system designed and defines the standard required to: identify design requirements; determine specifications for suitable pumping and power systems; design treatment systems; determine capital and operating expense budgets for the system designed.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to water managers and involves a technical and self-directed role in developing and integrating resources and systems and covers the process of identifying design requirements, determining specifications for storage and treatment systems, and determining capital and operating expense budgets for the system designed.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine design requirements	<p>1.1. Quality of water to be treated and level of treatment is determined.</p> <p>1.2. Construction specifications define the work required to treat water for the enterprise in accordance with environmental and Occupational Health and Safety (OHS) requirements.</p> <p>1.3. Environmentally sensitive areas are identified and protected according to local, State and National legislation.</p> <p>1.4. Design calculations and decisions are documented to enterprise requirements.</p>
2. Define pumping and power systems	<p>2.1. Pumps are selected to treat water efficiently and effectively as required, to enable supply at the flow and the pressure required to operate the distribution system.</p> <p>2.2. The pump motor combinations are efficient and the pumps are reliable, functional, serviceable and flexible for the intended application.</p> <p>2.3. Energy requirements are determined and layout of electricity lines are determined and checked with local authority.</p> <p>2.4. The relationship between capital and operational costs are optimised including a comparison of energy sources.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Structures, valves and accessories are selected and integrated into a functional system that can be monitored and maintained according to enterprise guidelines.</p> <p>2.6. Performance indicators, design calculations and decisions are documented according to enterprise guidelines.</p> <p>2.7. Construction specifications define the work required to make a suitable pumping and power system available to enterprise.</p> <p>2.8. Power supply design specification is checked with power authorities</p>
3. Design an water treatment system	<p>3.1. Treatment systems are evaluated and designed with respect to a range of key variables.</p> <p>3.2. Pipes, valves and fittings are sized according to design system specifications so that capital cost is balanced against operation costs over the anticipated system life.</p> <p>3.3. Flows, water levels and pressures are calculated and documented to be within the acceptable tolerances for optimum performance.</p> <p>3.4. Flows, water levels and pressures are achievable by the pumps operating at optimum efficiency and according to enterprise standards.</p> <p>3.5. Mechanisms for controlling and adjusting pressure are included.</p>
4. Determine capital expense budget	<p>4.1. Design calculations and decisions are documented and relevant information is communicated clearly through plans, specifications and manuals.</p> <p>4.2. Design output is checked by a competent designer against enterprise objectives.</p> <p>4.3. Materials requirements are determined and documented from plans and specifications.</p> <p>4.4. Labour requirements are estimated based upon documented work schedule, with reasonable allowance for variances in work schedules.</p> <p>4.5. Costing attributed to each component is based upon quoted information from suppliers, or sound analysis of individual elements.</p>
5. Determine operating expense budget	<p>5.1. Operating expense budget indicates all expenses applicable to the completed irrigation system.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect and analyse information
- identify adverse environmental impacts of water treatment activities and appropriate remedial action
- identify design requirements
- develop specifications
- develop and implement relevant enterprise OHS and environmental procedures
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- design processes
- developments in water treatment technology
- automatic control and monitoring systems
- waste management and environmental issues
- budgeting, contractual development and obligations
- environmental protection agency regulations
- environmental impacts of water treatment
- cost/benefit analysis
- enterprise policies and procedures.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine the feasibility of using or up-grading irrigation system	<p>1.1. Water resources and drainage implications are assessed to determine suitability for irrigation.</p> <p>1.2. Water quality and treatment requirements are determined.</p> <p>1.3. Water requirements and most suitable application systems are determined for each crop/plant type and area, and for each soil type.</p> <p>1.4. Other water requirements, such as climate control, are determined.</p> <p>1.5. Soil types are assessed to determine suitability for irrigation and the range of crop/plant types that could be grown.</p> <p>1.6. Drainage requirements are determined in relation to each soil and crop/plant type and type of irrigation system.</p> <p>1.7. Performance data, audit reports, environmental and Occupational Health and Safety (OHS) data for existing systems are assessed if available.</p> <p>1.8. Information is obtained from irrigation specialists on all relevant aspects of irrigation design.</p> <p>1.9. Available irrigation system types and components are assessed and costed, and a decision is made on the particular system to be used or upgrades to existing system.</p>
2. Install or modify an irrigation and drainage system as necessary	<p>2.1. Materials and equipment making up the system are determined and acquired.</p> <p>2.2. Irrigation system is installed using advice, as</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>necessary, from irrigation specialists.</p> <p>2.3. Checking that irrigation and drainage systems are supervised to ensure there are no leaks or blockages; that the water is being evenly distributed; that drainage is effective and the system is in good working order.</p>
3. Evaluate irrigation system performance	<p>3.1. Plant growth /yield increases from irrigation are determined and valued.</p> <p>3.2. Costs of irrigation are calculated.</p> <p>3.3. Cost benefit of irrigation is determined and compared with alternative systems/approaches.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- analyse performance and audit data
- evaluate irrigation system performance
- strategically manage irrigated production systems
- develop and implement relevant enterprise OHS and environmental procedures
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- plant requirements
- water quality

**REQUIRED SKILLS AND KNOWLEDGE**

- environmental impacts of irrigation, using water from any ground or underground source
- cost/benefit analysis
- enterprise policies and procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- determine the feasibility of using or up-grading an irrigation system
- install or modify an irrigation and drainage system as necessary
- evaluate irrigation system outputs and performance
- strategically manage irrigated production systems.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare materials, tools and equipment for woolshed activities</p>	<p>1.1. The required materials, tools and equipment are identified according to lists provided and/or supervisor's instructions.</p> <p>1.2. Checks are conducted on all materials, tools and equipment with insufficient or faulty items reported to the supervisor.</p> <p>1.3. Techniques used when loading and unloading materials demonstrate correct manual handling and minimise damage to the load and the vehicle.</p> <p>1.4. Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.5. Support for woolshed activities is provided according to Occupational Health and Safety (OHS) requirements and according to workplace information.</p> <p>1.6. OHS hazards are identified and reported to the supervisor.</p>
<p>2. Undertake woolshed activities as directed</p>	<p>2.1. Instructions and directions provided by supervisor are followed and clarification sought when necessary.</p> <p>2.2. Work is undertaken in a safe and environmentally appropriate manner according to enterprise guidelines.</p> <p>2.3. Interactions with other workers and owner/classers are carried out in a positive and professional manner.</p> <p>2.4. Animals are moved into pens as directed.</p> <p>2.5. Board duties are undertaken as directed.</p> <p>2.6. Support is provided to wool sorting, replacing butts and wool pressing as directed.</p> <p>2.7. Enterprise policy and procedures in relation to workplace practices, handling and disposal of materials is observed.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.8. Problems or difficulties in completing work to required standards or timelines are reported to supervisor.
3. Handle materials and equipment	3.1. Waste material produced during woolshed activities is stored in a designated area according to supervisor's instructions. 3.2. Materials, equipment and machinery are handled and transported according to supervisor's instructions and enterprise guidelines. 3.3. A clean and safe work site is maintained while completing woolshed activities.
4. Clean up on completion of woolshed activities	4.1. Materials are returned to store or disposed of according to supervisor's instructions. 4.2. Tools and equipment are cleaned, maintained and stored according to manufacturer's specifications and supervisor's instructions. 4.3. Work outcomes are reported to the supervisor.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- follow safe work procedures
- prepare materials, tools and equipment for woolshed activities
- undertake woolshed activities as directed
- handle materials and equipment
- clean up on completion of woolshed activities
- use literacy skills to read and follow a range of basic instructions
- use oral communication skills/language competence to communicate effectively with others
- use numeracy skills to complete basic calculations
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds.

#### Required knowledge

- safe work practices

**REQUIRED SKILLS AND KNOWLEDGE**

- sheep breeds and wool types
- shearing tools and equipment
- basic wool handling practices
- relevant federal, state/territory industrial awards
- OHS, environmental protection and animal welfare legislative and enterprise requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare basic tools and equipment
- provide support to shearing and crutching
- assist with wool handling
- clean up woolshed.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

<b>RANGE STATEMENT</b>	
Woolshed activities may include:	<ul style="list-style-type: none"> <li>• assisting with crutching and shearing such as:               <ul style="list-style-type: none"> <li>• penning and catching sheep</li> <li>• cleaning up duties as directed by the shearer.</li> </ul> </li> </ul>
Wool handling may include:	<ul style="list-style-type: none"> <li>• assisting with wool handling and classing such as:               <ul style="list-style-type: none"> <li>• sorting crutchings</li> <li>• moving fleece</li> <li>• cleaning up duties as directed by the wool handler or classer.</li> </ul> </li> </ul>
General work may include:	<ul style="list-style-type: none"> <li>• assisting with general roustabout duties in a woolshed as directed.</li> </ul>
Tools and equipment may include:	<ul style="list-style-type: none"> <li>• brooms</li> <li>• knives</li> <li>• sack trucks.</li> </ul>
Hazards may include:	<ul style="list-style-type: none"> <li>• dust</li> <li>• noise</li> <li>• air -borne micro-organisms</li> <li>• sharp hand tools and equipment</li> <li>• manual handling</li> <li>• slippery surfaces</li> <li>• obstacles</li> <li>• tripping hazards</li> <li>• presses</li> <li>• overhead gear and other machinery</li> <li>• working shearers</li> <li>• electric leads and cables</li> <li>• changes in floor level</li> <li>• continual bending and reaching</li> <li>• fumes</li> <li>• smoke and exhaust gases from machinery</li> <li>• ammonia from animal urine</li> <li>• zoonoses.</li> </ul>

## AHCWOL201A Pen sheep

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of penning up sheep and defines the standard required to: observe differences between mobs of sheep; observe workflow and estimate rates for refilling the catching pens and for mob cutout; move sheep in a shed and pen them up; monitor sheep density and check for contaminants in wool.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit requires the application of some judgement and discretion, and would be carried out within enterprise guidelines and within specified timeframes. The continuous supply of sheep with uncontaminated wool to shearers is an essential factor towards the efficiency of a wool harvesting operation.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Provide continuous supply of sheep to shearers	<p>1.1.Potential and existing hazards in the workplace are identified and reported to the supervisor.</p> <p>1.2.Suitable personal protective equipment is selected, used and maintained in line with Occupational Health and Safety (OHS) and workplace procedures.</p> <p>1.3.Sheep are penned in their separate mobs according to the instructions of the supervisor.</p> <p>1.4.Gates are secured to prevent sheep escaping on to the board.</p> <p>1.5.The speed of shearers is observed and numbers of sheep in catching pens arranged so that shearers all complete shearing at or near mob cutout.</p> <p>1.6.Sheep numbers are checked in catching pens and pens are filled as they empty to ensure continuous supply to shearers.</p> <p>1.7.Other pens are refilled as required.</p>
2. Keep mobs separate	<p>2.1.Gates are secured to prevent mixing of mobs.</p> <p>2.2.Pens are filled with sheep from only one mob at any given time to avoid mixing mobs and wool types.</p> <p>2.3.Mob cutout is communicated to shed supervisor.</p> <p>2.4.Sheep are moved to other catching pens to ensure that mob cutout is simultaneous.</p> <p>2.5.Safe workplace practices with regard to livestock handling are observed and implemented in line with OHS, animal welfare and organisation requirements.</p>
3. Prevent contamination of	<p>3.1.Pen density is arranged and monitored to avoid crushing, trampling or soiling of wool.</p>

ELEMENT	PERFORMANCE CRITERIA
wool	3.2.Pens are monitored to maintain sheep in standing position to avoid soiling of wool. 3.3.Potential contaminants within pens are minimised and removed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe work procedures
- accept and interpret advice from the shed supervisor
- observe differences between mobs of sheep
- observe shearers workflow and estimate rates for refilling the catching pens and for mob cutout
- move sheep in a shed and pen them up
- use the accepted communications signals in the shed when shearing and sheep movement is in full force
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- types of shearing sheds, boards and catching pens
- gates and catches in shearing sheds
- safe handling techniques for catching, dragging, and releasing sheep
- animal welfare requirements in relation to sheep
- sheep behaviour in the shearing sheds and yards
- hazards associated with handling livestock
- personal protective equipment and clothing, and when and how it should be used
- industry awards and conditions
- relevant State/Territory legislation, regulations and codes of practice with regard to

**REQUIRED SKILLS AND KNOWLEDGE**

- workplace OHS, animal welfare, and the use and control of hazardous substances
- communication signals used in the particular shed when shearing and sheep movement is in operation.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- observe differences between mobs of sheep
- observe workflow and estimate rates for refilling the catching pens and for mob cutout
- move sheep in a shed and pen them up
- monitor sheep density and check for contaminants in wool.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Pens may include:

- front fill

## AHCWOL202A Perform board duties

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of handling wool from the board, throwing fleeces and placing wool into bins or press as directed, and defines the standard required to: remove fleeces and sweep board before the next sheep is dragged for shearing; pick up and throw fleeces; remove non-fleece wools from the board and place in correct bins; identify and accurately remove stain; use correct technique for skirting and rolling fleece; check quantities in bins; sweep floors and remove contamination; and work rapidly while meeting quality standards.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit is carried out within a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of options to be applied. The imperative is to work at the required rate and maintain attention to detail in handling wool and other duties.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Remove contamination from the fleece	<p>1.1. Stained wool, black wool and contamination are removed on the shearing board according to the instructions of the supervisor.</p> <p>1.2. Suitable personal protective equipment (PPE) is selected and used.</p> <p>1.3. Any bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p>
2. Remove fleeces and component parts from the shearing board	<p>2.1. Wool is picked up after the shearing handpiece has been disengaged and not before.</p> <p>2.2. Wet wool is identified and removed for drying.</p> <p>2.3. Belly wool is picked up and stained wool removed.</p> <p>2.4. Crutch wool is removed and the hind leg repositioned if necessary.</p> <p>2.5. The hind legs of the fleece are arranged to allow for the fleece to be picked up efficiently.</p> <p>2.6. Fleece is picked up in a controlled bundle and removed from shearing stand as soon as sheep is shorn.</p> <p>2.7. Fleece is carried to the wool table and thrown to</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>land flat and spread out ready for skirting.</p> <p>2.8. Loose wool remaining in the let-out chute is collected.</p> <p>2.9. All wool removed from the fleece and from the shearing board is placed in the correct bins or on the correct table.</p> <p>2.10. All bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p>
3. Handle non-fleece wool	<p>3.1. Locks are swept up and placed in correct bins.</p> <p>3.2. Board and table locks are kept separate, where directed.</p> <p>3.3. Shanks and jowls are removed, if directed, and placed in correct bin.</p> <p>3.4. Pizzle stain is removed from bellies and placed in stains line.</p> <p>3.5. Brisket wool is removed if directed by the wool classer.</p> <p>3.6. Crutchings are swept clear of the board, stain and dags are removed, and placed in correct bins.</p> <p>3.7. Lambs wool and prematurely shorn wools are carried to the wool table using boards or paddles, if required.</p> <p>3.8. Lambs wool is correctly placed on tables for sorting.</p>
4. Skirt fleeces under supervision	<p>4.1. Information is sought on wool classer requirements for mob.</p> <p>4.2. Fribs and sweats are removed and placed in correct bins.</p> <p>4.3. Short crutch wool and wiggings are removed and placed with locks.</p> <p>4.4. Wool carrying vegetable matter is removed under wool classer supervision.</p> <p>4.5. Feedback is sought on accuracy of skirting and fleece to skirtings ratio.</p> <p>4.6. Wool classer or wool roller is assisted in separating fleece wool, which has been identified as defective or lacking uniformity.</p>
5. Sweep the board and wool room	<p>5.1. Shearing boards, wool room and area beneath the wool table are swept regularly and when necessary during the shearing operation.</p> <p>5.2. The shearing boards and the wool room are kept free</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>of potential contamination.</p> <p>5.3. Waste is removed and appropriately placed in full consideration of environmental implications.</p> <p>5.4. All bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p>
6. Empty bins and other wool containers	<p>6.1. Bins and other wool containers are emptied, as necessary, and replaced as directed by the person in charge.</p> <p>6.2. Waste is removed and appropriately placed in full consideration of environmental implications.</p> <p>6.3. All bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p>
7. Perform cut-out duties	<p>7.1. All butts and bins are emptied and wool pressed.</p> <p>7.2. Bales are stacked.</p> <p>7.3. Wool working area is swept clean.</p> <p>7.4. Equipment is stored.</p> <p>7.5. Board is washed down and disinfected.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safety directions
- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up fleeces safely
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stains
- use correct technique for skirting and rolling fleece
- check quantities in bins
- sweep floors and remove contamination
- work rapidly within specified timeframes
- observe and report on adverse environmental impacts
- interpret verbal and visual signals within the woolshed given by the supervisor, the

**REQUIRED SKILLS AND KNOWLEDGE**

wool classer and the shearers

- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- the parts of a fleece and their names
- the shed layout
- duties and responsibilities of a board person
- sources of contamination of the fleece, and other aspects of the total quality management (TQM) systems in place for the clip
- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- remove fleeces and sweep board before the next sheep is dragged for shearing
- pick up and throw fleeces
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stains

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• use correct technique for skirting and rolling fleece</li> <li>• check quantities in bins</li> <li>• sweep floors and remove contamination</li> <li>• work rapidly while meeting quality standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

## AHCWOL203A Carry out wool pressing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of pressing wool into bales and related tasks such as branding the bales, recording bale weights and numbers, and subsequently storing the wool bales and defines the standard required to: operate different types of wool presses; operate the various types of scales and manual handling devices; maintain bale weights for each line to minimise selling costs; brand bales clearly and accurately; handle and stack wool bales efficiently and without risk to self, other people or machinery; record bale information clearly and accurately.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working under routine supervision with intermittent checking. It is usually within established routines, methods and procedures. Competency at this level requires the application of knowledge and skills to a range of wool handling and pressing duties.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for wool pressing	<p>1.1. The lines of wool to be pressed are identified and confirmed with the appropriate person.</p> <p>1.2. The wool press is checked for safe operation, with any required lubrication and maintenance carried out according to the manufacturer's instructions, and reported to the appropriate person.</p> <p>1.3. The work area is prepared in readiness for pressing as instructed.</p> <p>1.4. Scales to be used are checked for accuracy and calibrated if necessary, as instructed.</p> <p>1.5. The press and its location are checked for safety, and all other Occupational Health and Safety (OHS) requirements are adhered to.</p> <p>1.6. Any defective equipment is identified and reported to the appropriate person.</p>
2. Press wool	<p>2.1. All bending and lifting is done according to safe working practices and using the available safety equipment.</p> <p>2.2. Contamination is removed from the woolpack and placed in the appropriate location.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3. All wool is placed correctly and evenly in the press, as directed.</p> <p>2.4. Bales are pressed safely for weight and length according to industry standards and organisation requirements, as directed.</p> <p>2.5. Work area is kept in a condition that avoids contamination of the wool.</p>
3. Close and stack bales	<p>3.1. Approved bale dividers are used according to instructions and flaps are correctly fastened according to industry standards.</p> <p>3.2. Bales are identified for branding before removing them from the press.</p> <p>3.3. All lifting required is done according to safe working practices and using the available safety equipment.</p> <p>3.4. Bales are stored safely, avoiding injury to presser, risk to other workers, and damage to bales and equipment.</p>
4. Complete recording requirement	<p>4.1. Bales are branded according to industry standards and organisational procedures, as directed.</p> <p>4.2. Bales are weighed according to industry standards and organisational procedures and checked with the appropriate person/ supervisor.</p> <p>4.3. Bale weights, numbers and descriptions are clearly and accurately recorded using the appropriate recording system, as directed and checked with the appropriate person/ supervisor.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- observe and report on OHS hazards and risks
- apply standard operating procedures for the press and equipment
- operate different types of wool presses
- operate the various types of scales and manual handling devices
- maintain uniform bale weights for each line

## REQUIRED SKILLS AND KNOWLEDGE

- brand bales clearly and accurately
- handle and stack wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- the sources of contamination of the fleece and other aspects of the quality management systems in place in the organisation
- methods of handling fleece and bales that minimise risk to own health, including safe lifting and bending techniques
- industry standards for weight, length of bales and type of pack
- industry standards for bale branding
- the recording system for bale details in use in the organisation.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- operate different types of wool presses
- operate the various types of scales and manual handling devices

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• maintain bale weights for each line to minimise selling costs</li> <li>• brand bales clearly and accurately</li> <li>• handle and stack wool bales efficiently and without risk to self, other people or machinery</li> <li>• record bale information clearly and accurately.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## AHCWOL204A Undertake basic skirting of alpaca fleece

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of undertaking basic skirting of alpaca fleece during and after shearing and defines the standard required to: collect a fleece after shearing; throw a fleece ready for skirting; carrying out skirting of alpaca fleece to industry standards; place skirted and removed wool in required butts or bags.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working under supervision and according to enterprise procedures and industry guidelines for harvesting alpaca fleece.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for skirting	<p>1.1. Midside fleece samples are taken from each alpaca prior to shearing.</p> <p>1.2. All tools, equipment and materials required for basic skirting are assembled and checked for serviceability prior to beginning skirting and fleece handling.</p> <p>1.3. Existing and potential Occupational Health and Safety (OHS) hazards in the workplace are recognised and reported to supervisor, and actions are taken to minimise risks to self and others.</p> <p>1.4. Site quarantine and other biosecurity protocols are observed.</p>
2. Collect fleece during shearing	<p>2.1. Fleece is picked up as blanket, neck and pieces during shearing.</p> <p>2.2. Blanket, neck and pieces are kept and weighed separately, labelled and weight is recorded according to enterprise procedures.</p> <p>2.3. Severely contaminated fleece is discarded.</p> <p>2.4. Unavoidable bending, reaching and lifting are carried out in line with safe work practices.</p> <p>2.5. Blanket is carried to classing table to enable skirting.</p>
3. Skirt saddles under supervision and according to industry guidelines	<p>3.1. Blanket is lightly thrown onto classing table exposing entire fleece so as to enable loose sand or dirt to fall through without disturbing structure of saddle.</p> <p>3.2. Fleece with excessive medullation, or not consistent with general style, character, micron and length of staples, is removed and placed in pieces bag.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3.Fleece with major faults and of No Commercial Value (NCV) is discarded.
4. Process neck pieces and finalise operation	4.1.Individual pieces are separated into small bags. 4.2.Small bags containing pieces are placed into a larger bag regardless of colour, micron or length. 4.3.Neck pieces are placed in appropriate classing line. 4.4.Feedback on skirting outcomes and compliance with industry standards is sought from owner, classer or processor and any required improvements are noted for future action.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe work practices
- ability to lightly throw an entire fleece
- carrying out skirting of alpaca fleece to industry standards
- communicating faults, malfunctions and workplace hazards
- demonstrating safe and environmentally responsible workplace practices
- reporting and maintaining operational records
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- Alpaca Industry Best Practice Standards for Harvesting of Alpaca Fibre
- enterprise policies with regard to recording and reporting routines
- equipment and bag requirements for skirting and handling fleece to industry standards
- relevant state and territory legislation, regulations and codes of practice with regard

**REQUIRED SKILLS AND KNOWLEDGE**

to workplace OHS, environment and animal welfare.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Source and prepare information on wool to be appraised	<p>1.1.Sources of information on wool appraisal are identified and accessed.</p> <p>1.2.The industry description system is described.</p> <p>1.3.The visual characteristics to be appraised are identified and classified using the relevant descriptors.</p>
2. Apply the industry description to lines in a clip	<p>2.1.Wool clip classing lines are checked for compliance with the code of practice for the AWEX Quality System, Preparation of Australian Wool Clips.</p> <p>2.2.Wool clip classing lines are appraised and the AWEX-ID is recorded.</p> <p>2.3.The consistency of appraisal across a wool clip is evaluated against appraisals for the clip in the sale catalogue.</p>
3. Use the industry description to establish a market value for lines made	<p>3.1.Market information is accessed.</p> <p>3.2.Premiums and discounts for wool characteristics are identified.</p> <p>3.3.A value is determined for each line made.</p>
4. Review clip preparation strategies using an industry description	<p>4.1.Clip preparation strategies are checked and revised using the AWEX-ID descriptors, and the market value applied to the lines made.</p> <p>4.2.Feedback on market information, the effect of management on the wool clip and possible future selection strategies is provided to the woolgrower using the AWEX-ID descriptors applied to the lines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- source and prepare information on wool to be appraised for industry description (AWEX-ID)
- apply an industry description (AWEX-ID) to lines in a clip
- use an industry description (AWEX-ID) to establish a market value for lines made
- review clip preparation strategies using an industry description
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- code of practice for the AWEX Quality System, Preparation of Australian Wool Clips
- AWEX-ID Appraisal Guidelines
- Australian Wool Exchange Wool Selling Rules
- the wool sale catalogue
- interpreting wool testing data
- relevant sources of wool sale lot information
- subjective assessment of style, colour, type of vegetable matter fault, degree of stain and faults, and defects.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

<b>EVIDENCE GUIDE</b>	
Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• source and prepare information on wool to be appraised for industry description (AWEX-ID)</li> <li>• apply an industry description (AWEX-ID) to lines in a clip</li> <li>• use an industry description (AWEX-ID) to establish a market value for lines made</li> <li>• review clip preparation strategies using an industry description.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Wool types may include:	<ul style="list-style-type: none"> <li>• all types drawn from both merino and crossbred, covering all types of wool sold through the Australian auction system under the AWEX Code of Practice.</li> </ul>

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Separate wools with characteristics outside the uniformity requirements of the Code of Practice.	1.1. Assessment of sheep breed and wool type is made. 1.2. Wools are separated into different lines based on: <ul style="list-style-type: none"> <li>1.2.1. fibre diameter</li> <li>1.2.2. length and strength</li> <li>1.2.3. colour and character</li> <li>1.2.4. handle and style.</li> </ul> 1.3. Staple formation and tip is checked. 1.4. Wool is examined for medullation and/or pigmentation.
2. Separate wool showing faults that impact on processing or fabric quality.	2.1. Wool is examined for dogginess that will impact on fabric quality. 2.2. Wool is checked for cotts that will require extra processing. 2.3. Skin pieces are identified and removed. 2.4. Wool is checked for dermatitis and kept separate. 2.5. Wool with a level and type of vegetable matter contamination that requires different processing is kept separate. 2.6. Mobs with high pigmented fibre risk are recorded according to the Code of Practice and their wool kept completely separate from low risk wool. 2.7. Wool from sheep with shedding characteristics is identified and kept completely separate from non-shedding white woolled sheep, with any risk of exposure documented on the classer's report. 2.8. Fleeces containing pigmented fibre in a white

ELEMENT	PERFORMANCE CRITERIA
	woolled flock are kept separate. 2.9. Wool containing stain is kept separate.
3. Recognise impurities of greasy wool and their effect on processing and yield.	3.1. Wool is examined for natural impurities. 3.2. Applied impurities are identified and their effect on processing is assessed. 3.3. Acquired impurities are identified and their effect on processing and yield of clean fibre is assessed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assess key wool characteristics
- identify wool faults
- recognise impurities
- separate wool that does not meet Code of Practice requirements for uniform, predictable low risk lines of wool
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- breeds of sheep
- documentation of wool clips
- fleece measurement criteria - techniques used to measure wool characteristics
- Code of Practice for the Preparation of Australian Wool Clips
- processing methods - woollen and worsted, and stages of processing
- raw wool characteristics and their effect on processing and final product
- measurement of wool characteristics - diameter, length and strength, colour, yield, VM type, curvature and comfort factor

**REQUIRED SKILLS AND KNOWLEDGE**

- wool faults and their impact on processing and fabric quality
- impurities of wool and their impact on processing and yield of clean fibre after processing
- wool growth, skin and fibre biology, and effect of genetics and environment on fibre characteristics.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assess the key characteristics of wool
- separate wool that differs in processing performance
- remove all stained fibre from clean wool
- separate wool with differing levels and types of impurities with due regard to required knowledge and skill, potential risks to human and animal health and the environment.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Types of wool may include:

- all wools that can be sold through the auction system.

**Unit Sector(s)**

<b>Unit sector</b>	Wool

## AHCWOL304A Prepare fleece wool for classing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of preparing fleeces in preparation for classing and defines the standard required to: separate wool from the fleece that lacks uniformity; check fleeces for wool faults and impurities; skirt fleeces, removing those portions that significantly affect the uniformity and value of the remaining fleece; roll fleeces ready for the wool classer; work at the required pace to maintain wool flow at shearing.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the wool roller working under the direction of the wool classer. The wool classer provides the overall direction for the level of preparation and skirting required while the wool roller must allow for differences between individual fleeces. It includes the requirement for the wool roller to work as a team member with other shed hands, and to do so at the required pace.
--------------------------------	--

### Licensing/Regulatory Information

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Characteristics of greasy wool are identified and related to processor requirements	<p>1.1.Characteristics of wool important in processing are identified and uniformity within the fleece is assessed.</p> <p>1.2.The portion of fleece to be removed is determined to ensure uniformity of the fleece with the other fleeces from the mob.</p>
2. Fleeces are checked for impurities	<p>2.1.Natural impurities of wool are identified, and portion of fleece to be removed is determined.</p> <p>2.2.Vegetable matter types are identified, and portion of fleece to be removed is determined.</p> <p>2.3.Mineral impurities are identified and related to yield potential identified, and portion of fleece to be removed is determined.</p> <p>2.4.Any contamination of the fleece is removed.</p> <p>2.5.Work is checked regularly with the wool classer and procedures adjusted if required.</p>
3. Fleeces are checked for presence of wool faults	<p>3.1.Hairy breeches and cotted wool are identified and portion of fleece to be removed is determined.</p> <p>3.2.Unscourable colour, water stain and dermatitis are identified and handled as directed.</p> <p>3.3.Skin pieces are removed and placed where directed.</p> <p>3.4.Work is carried out at a rate appropriate to the enterprise.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Fleeces are skirted and rolled	4.1. Fleeces are skirted to remove those portions determined above that adversely affect the uniformity and value of the remaining fleece. 4.2. Fleeces containing clumpy vegetable matter are double skirted, or prepared as directed. 4.3. Necks and backs are assessed for soundness, dust and VM levels, and handled as directed. 4.4. Fleeces are rolled and presented to classer. 4.5. Skirtings are placed in the nominated bins. 4.6. Waste is removed and appropriately disposed of taking into account environmental implications. 4.7. All bending and lifting that is required is done according to safe working practices and using the available safety equipment.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- assess levels of vegetable matter and other impurities
- accurately skirt fleeces at commercial pace
- roll fleeces in preparation for classing
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- wool characteristics
- principles and requirements of wool processing

**REQUIRED SKILLS AND KNOWLEDGE**

- principles of wool growth
- identification of fleece parts
- diagnosing wool faults
- identification of impurities
- Occupational Health and Safety (OHS) legislative and enterprise requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- separate wool from the fleece that lacks uniformity
- check fleeces for wool faults and impurities
- skirt fleeces, removing those portions that significantly affect the uniformity and value of the remaining fleece
- roll fleeces ready for the wool classer
- work at pace to maintain wool flow at shearing

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Fleece wools may include:

- the preparation of merino and crossbred fleece wools to the standards set out in the industry code of practice.

## AHCWOL305A Prepare skirtings and oddments

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of preparing non-fleece wool to comply with the requirements of the industry code of practice and defines the standard required to: prepare skirtings, belly wool, lambs wool, locks, crutchings, stain and other oddments; place skirtings and oddments into butts or bins according to the wool classer's directions.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to shed hands and wool classers and is performed within a defined range of contexts in which the choice of actions required is usually clear, and there is some discretion in the range of options to be applied. It requires a speed and accuracy of work to maintain clip quality and work flow.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare skirtings	1.1. Identify types of skirtings and oddments. 1.2. Identify types of pieces and separate according to enterprise requirements, industry code of practice and quality procedures. 1.3. Prepare Merino skirtings in accordance with wool classer's directions. 1.4. Prepare Crossbred skirtings in accordance with wool classer's directions.
2. Prepare belly wool	2.1. Identify belly wool. 2.2. Separate belly wool according to enterprise requirements, code of practice and quality procedures. 2.3. Remove stains and briskets in accordance with wool classer's directions. 2.4. Prepare Crossbred and Merino belly wool in accordance with wool classer's directions.
3. Prepare lambs wool	3.1. Identify types of lambs' wool. 3.2. Separate lambs' wool according to enterprise requirements, code of practice and quality procedures. 3.3. Remove stains and trimmings in accordance with wool classer's directions. 3.4. Prepare Merino lambs wool in accordance with wool classer's directions. 3.5. Prepare Crossbred lambs wool in accordance with wool classer's directions.

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
4. Prepare locks	4.1. Identify types of locks. 4.2. Separate board and table locks in accordance with wool classer's directions. 4.3. Prepare Crossbred and Merino locks in accordance with wool classer's directions.
5. Prepare crutchings	5.1. Identify types of crutchings. 5.2. Remove stains and other impurities in accordance with wool classer's directions. 5.3. Prepare Merino and Crossbred crutchings in accordance with wool classer's directions.
6. Prepare stain	6.1. Identify types of stain. 6.2. Prepare Merino and Crossbred stain in accordance with wool classer's directions.
7. Prepare other oddments	7.1. Define and identify other oddments. 7.2. Describe the preparation of other oddments.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- accurately skirt fleeces at commercial rates
- skirt and roll fleeces safely
- interpret verbal and visual signals within the wool shed given by the supervisor, the wool classers and the shearers
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

- principles and requirements of wool processing
- principles of wool growth
- identification of fleece parts, skirtings, locks, crutchings, and stains
- recognition of contamination
- recognition of wool faults
- identification of impurities
- identification of stain
- identification of oddments
- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques
- requirements of the industry code of practice for preparation of skirtings and oddments
- Occupational Health and Safety (OHS) legislative and enterprise requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare skirtings, belly wool, lambs wool, locks, crutchings, stain and other oddments
- place skirtings and oddments into butts or bins according to the wool classer's directions.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## AHCWOL306A Supervise clip preparation

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the functions required to supervise board persons, wool handlers and the wool presser in preparing the wool clip, and defines the standard required to: perform shed staff roles including pen up, board person and wool handler; explain clip preparation requirements to shed staff and monitor their performance; ensure clip preparation produces stain free, uniform lines of wool that are of low risk to the processor; maintain wool flow and minimise the risk of contamination; provide training based on explanation and demonstration of work skills to staff; meet industry employment, award and legislative requirements.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to wool classer working in consultation with the grower or shed manager. Responsibility for the work of others is an important component. Supervising clip preparation requires a broad range of skills and knowledge and an ability to coordinate and monitor activities efficiently and effectively.
--------------------------------	--

### Licensing/Regulatory Information

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Explain organisation requirements for clip preparation	<p>1.1.The organisation's requirements for quality and standard of wool clip preparation are clearly explained to the wool handlers.</p> <p>1.2.The organisation's procedures for operating safely and for the use of personal protective equipment are clearly explained to the wool handlers.</p> <p>1.3.The impact of contamination in the wool is clearly explained to the wool handlers.</p> <p>1.4.The key personnel in the wool shed/room are introduced or indicated to the wool handlers.</p> <p>1.5.Responsibilities for specific functions or procedures are allocated and explained to wool handlers.</p> <p>1.6.Occupational Health and Safety (OHS) hazards are identified; risks assessed and suitable controls are implemented.</p>
2. Perform and supervise shed hand duties	<p>2.1.Board persons' duties are performed including picking up and throwing fleece, sweeping board and preparing non fleece wools.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2. Wool handlers are monitored to ensure they follow the set procedures for each of the clip preparation tasks.</p> <p>2.3. Pen up duties are performed including keeping mobs separate and monitoring and filling catching pens.</p> <p>2.4. Wool pressers' activities are performed including keeping wool press area clean, pressing, branding, weighing and recording bale details in the wool book.</p>
3. Oversee preparation of wool	<p>3.1. All personal protective equipment and clothing is selected, used and maintained appropriately by wool handlers.</p> <p>3.2. Shed staff are supervised to maintain a clear board and ensure fleeces are thrown correctly.</p> <p>3.3. Shed staff are supervised in removal and preparation of fleece wool.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- observe, identify and react appropriately to environmental implications and OHS hazards
- perform board and table duties
- perform wool presser duties
- perform penning up duties
- oversee shed staff to ensure quality clip preparation
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

- parts of fleece
- procedures for handling skirtings, bellies, lambs wool, premature shorn wool, locks and crutchings, and stained wool and oddments
- responsibilities of board and table staff
- characteristics of different wool types and parts of the fleece
- premiums and discounts for wool characteristics
- pressing and branding requirements
- skirting technique and appropriate skirting ratios for different clip types
- personal protective clothing and equipment requirements for shed staff
- training techniques
- staff supervision
- relevant State/Territory OHS and employment legislative and enterprise requirements.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- perform shed staff roles including pen up, board person and wool handler
- explain clip preparation requirements to shed staff and monitor their performance
- ensure clip preparation produces stain free, uniform lines of wool that are of low risk to the processor
- maintain wool flow and minimise the risk of contamination
- provide training based on explanation and demonstration of work skills to staff
- meet industry employment, award and legislative

## AHCWOL307A Document a wool clip

### Modification History

Not Applicable

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit covers the process of documenting a wool clip to national and organisational standards and defines the standard to: obtain signatures and/or registrations that are required and include on classers report; include details of wool bales with each consignment, and send the completed classers report to the appropriate authority at the conclusion of shearing; make suggestions for improved safety, conditions and fleece quality based on classers report, observations and discussions with operators within the wool shed; prepare and maintain records as required by enterprise or legislation.</p>
-------------------------------	--

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>This unit is likely to be conducted without supervision from others. It includes instructing others in the use of the system, maintaining the records, and advising the owner/manager of issues where appropriate. Documenting a wool clip is normally done within routines, methods and procedures where some discretion and judgement is required in the selection of equipment and materials, organisation of work, services, actions and the achievement of outcomes within time constraints. The documentation of a wool clip contributes to the wool harvesting operation by optimising efficiency for the grower.</p>
---------------------------------------	---

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Establish recording system and documentation	<p>1.1.The nature of documentation is selected according to the culture and facilities of the wool shed.</p> <p>1.2.Guidelines for the use of the recording system are established, including the type, frequency and format of recording.</p> <p>1.3.Those who are to use the recording system are clearly informed of their obligations and any specific instructions that are necessary.</p> <p>1.4.Checks are made regularly to ensure that documentation is accurately completed and updated at the proper times.</p>
2. Complete records for wool classing	<p>2.1.Documents and records required by the organisation and the market are completed clearly and accurately.</p> <p>2.2.The wool clip specification is completed prior to consignment, to ensure that the correct lotting advice is provided to the selling broker or buyer.</p> <p>2.3.Any additional notes or advice necessary on the</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>documents are made clearly and accurately.</p> <p>2.4.All signatures and/or registrations that are required are obtained and included on documentation.</p> <p>2.5.Wages statements for contractors are prepared according to the agreements reached in employment conditions.</p>
3. Provide information and advice to the woolgrower	<p>3.1.Suggestions for improved safety, conditions and fleece quality are derived from observations, smoothness of workflow, and discussions with operators within the wool shed.</p> <p>3.2.The wool clips specification is communicated to the appropriate authority at shed cutout.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- develop the recording system for wool clips and bales
- communicate recording requirements clearly to wool classers and pressers
- observe the work and identify area of the work or the facilities that could be improved
- prepare and maintain records as required by enterprise or legislation
- observe, identify and react appropriately to Occupational Health and Safety (OHS) hazards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- quality assurance schemes used in the organisation and in the industry, and their documentation requirements
- correct clip specification
- employment conditions and agreements for a range of workers
- relevant national codes of practice for the industry.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- ensure that all relevant details are recorded accurately and clearly in a timely manner
- communicate recording procedures and requirements clearly to wool presser
- obtain signatures and/or registrations that are required and include on classers report
- include details of wool bales with each consignment, and send the completed classers report to the appropriate authority at the conclusion of shearing
- make suggestions for improved safety, conditions and fleece quality based on classers report, observations and discussions with operators within the wool shed
- prepare and maintain records as required by enterprise or legislation.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Wool clip documentation may include:

- advice notes
- waybills
- classers specification
- wool clip specification and/or wool classer's wages statement.

**Unit Sector(s)**

## AHCWOL308A Prepare facilities for shearing and crutching

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of ensuring the safety and hygiene standards of facilities and equipment prior to shearing and crutching operations, and is undertaken by the growers with assistance from wool handlers, and defines the standard required to: maintain contamination free environment for shearing and wool handling; recognise and remedy health and safety hazards; carry out minor maintenance and repairs to equipment and facilities; pen sheep in preparation for shearing; communicate verbally with work team; supervise operations.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit is applies to a grower with assistance from shed staff.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Inspect facilities and equipment	<p>1.1. Facilities are inspected and assessed for hygiene and safety according to industry standards and Occupational Health and Safety (OHS) requirements.</p> <p>1.2. Equipment faults or malfunctions are identified and reported for repair or replacement according to enterprise requirements.</p> <p>1.3. Potential and existing hazards are identified, controlled and reported according to OHS requirements.</p>
2. Prepare facilities	<p>2.1. Suitable Personal Protective Equipment (PPE) is selected, used and maintained according to OHS requirements.</p> <p>2.2. Shed staff are engaged in the removal of contaminating substances according to industry Quality Assurance (QA) enterprise and environmental requirements.</p> <p>2.3. Shed staff are directed/assisted in the cleaning of facilities and equipment to industry standards and hazards are eliminated according to OHS requirements.</p>
3. Prepare equipment and materials	<p>3.1. Shed staff are directed/assisted in the positioning of tables and equipment.</p> <p>3.2. Bins/wool pack holders are placed in strategic positions.</p> <p>3.3. Shed staff are directed/assisted in the positioning of brooms/scrapers.</p> <p>3.4. Discussions are held with the presser in relation to</p>

ELEMENT	PERFORMANCE CRITERIA
	their understanding of the property requirements.
4. Organise the supply of sheep to shearers	4.1. Order of shearing and information on mob cut-outs is conveyed to staff. 4.2. Sheep to be shorn first are placed in catching pens. 4.3. Supply of sheep in monitored and co-ordinated throughout shearing.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- maintain contamination and hazard-free environment for shearing and wool handling
- recognise and remedy health and safety hazards
- carry out minor maintenance and repairs to equipment and facilities
- disposal of waste in an environmentally responsible manner
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- sources and types of contamination
- principles of moving and penning animals
- animal welfare
- shearing requirements
- shed and board layouts
- environmental codes of practice with regard to shearing
- OHS and animal welfare legislation, codes of practice and enterprise requirements

**REQUIRED SKILLS AND KNOWLEDGE**

- National codes of practice for the Shearing Industry (Health, Safety and Welfare standards).

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- maintain contamination free environment for shearing and wool handling
- recognise and remedy health and safety hazards
- carry out minor maintenance and repairs to equipment and facilities
- pen sheep in preparation for shearing
- communicate verbally with work team, and supervise operations.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

**RANGE STATEMENT**

The facilities may include:

- the shearing and wool handling area of the shearing shed
- sheep pens
- bins for fleece and non-fleece types.

**Unit Sector(s)**

<b>Unit sector</b>	Wool

## AHCWOL310A Press wool for a clip

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of pressing wool from large clips into bales and carrying out related tasks, such as branding the bales, recording bale weights and numbers, and subsequently storing the wool bales and defines the standard required to: check woolpacks and wool to ensure freedom from contamination; assess and monitor wool flow and build-up in bins; press and brand bales to industry requirements, maximising bale weights for each line; communicate with classer on order of pressing and mob cut-offs; handle and store wool bales efficiently and without risk to self or others; and record bale information in the wool book.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit is performed by wool pressers who work in close cooperation with the wool classer and maintain a rate of pressing that ensures wool flow can be maintained. The work is carried out within established routines, methods and procedures
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for wool pressing	<p>1.1.The lines of wool are identified and confirmed with the wool classer.</p> <p>1.2.The wool press is checked for safe operation, lubricated and maintained according to manufacturer instructions.</p> <p>1.3.The work area is assessed as free of all contaminants in readiness for pressing.</p> <p>1.4.Supplies of wool packs, bale fasteners and hooks, stencils and bale-branding inks are ascertained and located in appropriate place.</p> <p>1.5.Recording system required by the enterprise and wool classer is identified.</p> <p>1.6.Scales to be used are checked for accuracy and calibrated if necessary.</p> <p>1.7.The press and its location are checked for safety, and all other Occupational Health and Safety (OHS) requirements are adhered to.</p> <p>1.8.Any defective equipment is identified and reported to the appropriate person.</p>
2. Press wool	2.1.Wool classer is consulted to determine mob cut-outs

ELEMENT	PERFORMANCE CRITERIA
	<p>and pressing requirements.</p> <p>2.2. All bending and lifting is done according to safe working practices and using available safety equipment.</p> <p>2.3. Contamination is removed from the woolpack and placed in the appropriate location.</p> <p>2.4. Woolpacks are checked for conformity with current industry standards.</p> <p>2.5. Directions for order of pressing and any special requirements are sought from the wool classer.</p> <p>2.6. All wool is placed correctly and evenly in the press to produce even density bales.</p>
3. Carry out the role and responsibilities of the wool presser	<p>3.1. Bales are pressed to optimal weights to reduce selling costs and within weight and length dimensions specified in industry codes of practice.</p> <p>3.2. Lines are pressed to avoid mixed bales.</p> <p>3.3. Wool flow and build-up in bins is monitored.</p> <p>3.4. Work area is maintained in a condition that avoids contamination of wool.</p> <p>3.5. Pressing is carried out according to the time restrictions and workflow of the wool room.</p>
4. Close and store bales	<p>4.1. Approved bale dividers are used according to instructions, and flaps are correctly fastened according to industry standards.</p> <p>4.2. Bales are identified for branding before removing them from the press.</p> <p>4.3. All lifting required is done according to safe working practices and using the available safety equipment.</p> <p>4.4. Bales are stored safely, avoiding injury to presser, risk to other workers, and damage to bales and equipment.</p> <p>4.5. Bales are stored to maximise shed space and to avoid weather damage.</p>
5. Complete recording requirements	<p>5.1. Bales are branded according to industry standards and organisational procedures.</p> <p>5.2. Bales are weighed according to industry standards and organisational procedures.</p> <p>5.3. Bale weights, numbers and descriptions are clearly and accurately recorded using the appropriate recording system.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify OHS hazards and implement safe work practices
- operate different types of wool presses and carry out basic lubrication and maintenance according to manufacturer instructions
- operate the various types of scales and manual handling devices
- check woolpacks and wool to ensure freedom from contamination
- assess and monitor wool-flow and build-up in bins
- maintain uniform bale weights for each line
- brand bales clearly and accurately
- handle and store wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record information collected accurately and legibly, and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- sources of contamination of the fleece and other aspects of the quality management system in place in the organisation
- operating requirements for different types of wool presses
- methods of handling fleece and bales that minimise risk to own health, including safe lifting and bending techniques
- industry standards for weight, length of bales and type of pack
- industry standards for bale branding
- the recording system for bale details in use in the organisation
- OHS and employment legislative and enterprise requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• check woolpacks and wool to ensure freedom from contamination</li> <li>• assess and monitor wool flow and build-up in bins</li> <li>• press and brand bales to industry requirements, maximising bale weights for each line</li> <li>• communicate with classer on order of pressing and mob cut-offs</li> <li>• handle and store wool bales efficiently and without risk to self or others</li> <li>• record bale information in the wool book.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## AHCWOL311A Perform shed duties

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the functions required to perform shed duties covering the board and table, and to provide mentoring to less experienced staff, and defines the standard required to: monitor supply of sheep and fill pens; pick up and throw fleeces and sweep board; place non-fleece wool in correct bins and remove stain; use correct technique for skirting and rolling fleece; maintain wool flow and minimise the risk of contamination; provide mentoring and demonstration of work skills to less experienced staff.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers in shearing shed teams who are experienced in working on both the board and table and are able to provide some mentoring and direction to less experienced staff.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform board duties	<p>1.1. Stained wool, black wool, and contamination are removed on the shearing board.</p> <p>1.2. Belly wool is picked up, and stained wool is removed.</p> <p>1.3. Crutch wool is removed and the hind leg repositioned if necessary.</p> <p>1.4. Fleece is picked up and thrown, or parked and retrieved later if wool table is not clear.</p> <p>1.5. Removal of wool and maintenance of the board is monitored and extra support provided when needed.</p> <p>1.6. Mentoring and demonstration of work skills is provided to inexperienced board staff as required.</p> <p>1.7. All bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p>
2. Prepare wool	<p>2.1. Locks are swept up and board and table locks are kept separate where directed.</p> <p>2.2. Shanks and jowls are removed if directed and placed in correct bin.</p> <p>2.3. Pizzle stain is removed from bellies and placed in stains line.</p> <p>2.4. Brisket wool is removed if directed by the wool classer.</p> <p>2.5. Crutchings are swept clear of the board, stain and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>dags are removed, and placed in correct bins.</p> <p>2.6.Lambs wool and prematurely shorn wools are carried to the wool table using boards or paddles if required.</p> <p>2.7.Mentoring and support is provided in wool handling to inexperienced staff as part of the work team role.</p>
3. Skirt fleeces	<p>3.1.Information is sought on wool classer requirements for mob.</p> <p>3.2.Fribs and sweats are removed and placed in correct bins.</p> <p>3.3.Short crutch wool and wiggings are removed and placed with locks.</p> <p>3.4.Wool carrying clumpy vegetable matter is removed if directed by the wool classer.</p> <p>3.5.Feedback is sought on accuracy of skirting and fleece to skirtings ratio.</p> <p>3.6.Fleece wool which is defective or lacks uniformity is removed if directed by the wool classer.</p>
4. Maintain wool flow and minimise contamination risk	<p>4.1.The immediate shearing area is swept after each sheep is shorn.</p> <p>4.2.Shearing boards, wool room, and area beneath the wool table are swept as regularly as necessary during the shearing operation.</p> <p>4.3.The shearing boards and the wool room are kept free of potential contamination.</p> <p>4.4.Waste is removed and appropriately placed in full consideration of environmental implications.</p> <p>4.5.Risk of mixing wool between lines is minimised through regular sweeping and maintaining bins, other containers and the wool area.</p> <p>4.6.All tasks are completed and contingencies covered through a professional, team-based approach.</p> <p>4.7.All bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p>
5. Carry out tasks to support the shearing operation	<p>5.1.Rate of shearing is observed and frequency of refilling the catching pens and for mob cutout are estimated.</p> <p>5.2.Different mobs of sheep are kept separate.</p> <p>5.3.Directions from the wool classer are implemented and feedback provided on sheep supply and wool</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>flow.</p> <p>5.4.All butts and bins are emptied and wool pressed.</p> <p>5.5.Bales are stored as directed.</p> <p>5.6.Wool working area is swept clean.</p> <p>5.7.Equipment is stored at the end of shearing.</p> <p>5.8.Board is washed down and disinfected after shearing cutout.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up fleeces safely
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stain
- use correct technique for skirting and rolling fleece
- check quantities in bins
- sweep floors and remove contamination
- work rapidly within specified timeframes
- interpret verbal and visual signals within the wool shed given by the supervisor, the wool classer and the shearers.
- monitor sheep supply in pens and fill as necessary
- monitor wool flow and the wool working area to ensure risk of mixing between lines is minimised
- provide mentoring to less experienced staff
- anticipate tasks and apply forward planning
- deal with contingencies by supporting other staff in tasks as required
- observe and report on adverse environmental impacts
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures

**REQUIRED SKILLS AND KNOWLEDGE**

- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- sources and types of contamination
- principles of moving and penning animals
- animal welfare
- shearing requirements
- shed and board layouts
- environmental codes of practice with regard to shearing
- Occupational Health and Safety (OHS) and animal welfare legislation, codes of practice and enterprise requirements
- National codes of practice for the Shearing Industry (Health, Safety and Welfare standards).

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- monitor supply of sheep and fill pens
- pick up and throw fleeces and sweep board
- place non-fleece wool in correct bins and remove stain
- use correct technique for skirting and rolling fleece
- maintain wool flow and minimise the risk of contamination
- provide mentoring and demonstration of work skills to less experienced staff.

**EVIDENCE GUIDE****Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Duties may include:

- those associated with the range of clip types harvested and prepared including merino, crossbred and other breeds.

**Unit Sector(s)**

<b>Unit sector</b>	Wool

## AHCWOL312A Class goat fibre

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of preparing and carrying out the classing of goat fibre and defines the standard required to layout the shed and equipment for efficient operation; establish and maintain consistent methods of clip preparation to maximise returns; accurately assess fibre quality and types; maintain clean working conditions for clip preparation and classing procedures; identify and dispose of contaminated and wet fibre; communicate verbally with the work team.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit is carried out unsupervised after consultation with the grower or shed manager. Responsibility for the work of others is an important component. Classing goat fibre requires a broad range of skills and knowledge and an ability to coordinate and monitor activities efficiently and effectively.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for fibre classing	1.1.Clip preparation methods and classing criteria are confirmed according to enterprise requirements. 1.2.Shed layout, facilities and equipment are arranged for efficient fibre flow and pressing. 1.3.Contaminants and sources of contaminants, are identified, removed and disposed of in an environmentally responsible manner.
2. Class goat fibre	2.1.Suitable personal protective equipment is selected, used and maintained according to Occupational Health and Safety (OHS) requirements. 2.2.Clip is prepared according to enterprise requirements and checked for contamination. 2.3.Fibre is classed according to classing criteria, industry standards, and relevant national codes of practice.
3. Complete classing activities	3.1.Fibre is placed in the correct bins in readiness for pressing. 3.2.Wet fibre is identified and dried according to enterprise requirements. 3.3.Work area is cleaned and waste disposed of according to OHS and enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and apply safe work procedures
- establish and maintain consistent methods of clip preparation
- class fibre to industry standards
- layout the shed and equipment for efficient operation
- maintain clean working conditions for clip preparation and classing procedures
- accurately assess fibre quality and types
- measure goat fibre
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- fleece measurement criteria
- appraisal types
- fleece handling procedures
- clip analysis reports and comparisons
- classing specifications
- code of practice for Preparation of Australian Cashmere, Cashgora Fleece and Mohair
- sources of fleece contamination
- requirements of the code of practice for animal welfare
- OHS legislative requirements including the National code of practice for the Shearing Industry (Health, Safety and Welfare standards).

## AHCWOL313A Class alpaca fleece

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of classing alpaca fleece, and defines the standard required to: arrange the layout of bins and the fleece table; label bins and containers to ensure optimum operational efficiency; check and prepare fleece to ensure freedom from contamination and stain and optimum skirting ratios; appraise fleece characteristics and class fleece to the Alpaca Industry Best Practice Standards for harvesting of Alpaca Fibre; identify fleece of higher and lower market value; set and maintain consistency in lines.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to a classing specialist or an alpaca stud farm owner or employee who will be classing the stud's animal fleece. Work will be carried out under minimal or no supervision according to a predetermined classing strategy.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for classing of alpaca fleece	<p>1.1. Equipment, facilities and layout of shed are arranged according to predetermined classing strategy for efficient fleece flow, quality management and pressing.</p> <p>1.2. Personal Protective Equipment (PPE) and clothing are selected and used.</p> <p>1.3. Occupational Health and Safety (OHS) requirements and hazards associated with task are identified and appropriate action is taken to minimise risks to self and others.</p> <p>1.4. Site quarantine protocols and enterprise and personal hygiene requirements are applied, followed and monitored as required by enterprise procedures or owner/manager instructions.</p> <p>1.5. Bins and containers are placed correctly and are clearly labelled according to classing strategy, quality management system and enterprise requirements.</p>
2. Carry out classing of alpaca fleece	<p>2.1. Unavoidable required bending and lifting are done using available safety equipment and according to safe work practices.</p> <p>2.2. Fleece is handled and skirted to standards outlined in classing strategy.</p> <p>2.3. Fleece is checked to ensure freedom from contamination and stain.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4. Fleece is checked to ensure adequate and optimum skirting.</p> <p>2.5. Different classes of fleece are kept separate as required.</p> <p>2.6. Fleece is appraised for its characteristics.</p> <p>2.7. Fleece is classed to standards of the enterprise classing strategy suggested by appropriate authority.</p> <p>2.8. Fleece of higher and lower market value is identified and lines are made that maximise return to fleece owner.</p> <p>2.9. Data about fleece is recorded according to enterprise requirements.</p>
3. Dispose of fleece and report on wet fleece	<p>3.1. Fleece is consistently placed in correct bins ready for pressing, ensuring that cross-contamination does not occur.</p> <p>3.2. Wet fleece is identified according to requirements of classing strategy.</p> <p>3.3. Existence of wet fleece is brought to the attention of appropriate authority.</p> <p>3.4. Unavoidable required bending and lifting are done using available safety equipment and according to safe work practices.</p>
4. Follow up classing outcomes	<p>4.1. Feedback on classing outcomes and compliance with industry standards is sought from owner or processor and any required improvements are noted for future action.</p> <p>4.2. Action is taken to ensure awareness of changes in classing techniques, standards, and processor and market requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- arranging layout of bins and fleece table in a variety of sheds for optimum

## REQUIRED SKILLS AND KNOWLEDGE

- efficiency of fleece flow and pressing
- assessing pigmented fibre risk and separating fleece as required
- checking fleece to ensure freedom from contamination and stain
- checking fleece to ensure optimum and adequate skirting
- classing fleece to standards according to codes of practice or as required by alternative selling methods
- identifying and appraising fleece characteristics
- identifying fleece of higher and lower market value and ensuring lines are made that maximise return to grower
- labelling bins and containers correctly
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- classing requirements for the range of customers
- effect of genetics and environment on fibre characteristics
- fleece growth, skin and fibre biology
- fleece measurement criteria and techniques used to measure fleece characteristics
- inherent fleece characteristics (such as diameter, length and strength, colour, vegetable matter amount and type and yield)
- interpretation of test results
- preparation of documentation of fleece clips
- principles of classing
- raw fleece characteristics and their effect on processing and final product
- shed layouts that promote efficient fleece flow and handling.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

<b>EVIDENCE GUIDE</b>	
Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• arrange the layout of bins and the fleece table</li> <li>• label bins and containers to ensure optimum operational efficiency</li> <li>• check and prepare fleece to ensure freedom from contamination and stain and optimum skirting ratios</li> <li>• appraise fleece characteristics and class fleece to the Alpaca Industry Best Practice Standards for harvesting of Alpaca Fibre</li> <li>• identify fleece of higher and lower market value</li> <li>• set and maintain consistency in lines.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Classing alpaca fleece may include:	<ul style="list-style-type: none"> <li>• all fleece types according to the requirements of processors and the Alpaca Industry Best Practice Standards for Harvesting of Alpaca Fibre.</li> </ul>

## AHCWOL401A Determine wool classing strategies

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of developing classing strategies to be used for classing a wool clip and defines the standard required to: source market and client information on clip preparation requirements; lay out a wool room for efficient operation; accurately assess wool quality and types; develop classing strategies that meet the requirements of codes of practice and seek to optimise returns for the grower; communicate specific and detailed requirements for clip preparation to shed staff; and review strategies and implement plans for improvement.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to wool classers working independently within their own area of responsibility. This involves accessing all sources of relevant information to allow appropriate decision-making, developing the strategy, communicating the strategy to shed staff and grower/manager and then evaluating the strategy for the clip.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Source information for input to classing strategies	<p>1.1. Information on previous year's clip preparation and sale results is obtained, including classer's specification, test results, skirting ratios, AWEX-ID, sale prices, and any grower or processor feedback.</p> <p>1.2. Information on growing and management history for the mobs over the last twelve months is obtained from the grower.</p> <p>1.3. Current market trends and premiums and discounts are researched.</p> <p>1.4. Current recommendations appropriate to the specific wool clip are identified in the Code of Practice for Preparation of Australian Wool Clips.</p> <p>1.5. Current specific exporter and processor requirements and limitations are obtained and relevant details recorded.</p> <p>1.6. Marketing and selling methods and end uses for the wool are identified from the marketing plan and their implications on clip preparation are determined.</p> <p>1.7. Estimated prices for specific lines are identified from market information.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.8.Factors that will influence the classing process in the organisation are identified.
2. Develop strategies for classing this clip	<p>2.1.Fleece type is identified and suitable fleece, skirting and oddment lines are set up according to industry guidelines.</p> <p>2.2.Clip preparation methods and standards are selected to suit the fleece type and market requirements in consultation with the manager and other shed personnel.</p> <p>2.3.Operating procedures that eliminate contamination are selected and adopted.</p> <p>2.4.Wool classing procedures, methods and criteria are selected in line with fleece type, market requirements and industry standards.</p> <p>2.5.Shed layout and facilities are selected that will permit efficient workflow.</p> <p>2.6.Occupational Health and Safety (OHS) hazards are identified, risks assessed and suitable controls determined.</p> <p>2.7.Requirements for labelling and placement of bins and containers are selected.</p>
3. Communicate classing strategy	<p>3.1.The shed layout, equipment and facilities required are prepared and requirements for clip preparation are conveyed to shed staff.</p> <p>3.2.Clip preparation methods and classing procedures are clearly communicated to, and confirmed with, the wool handlers.</p>
4. Review the success of the strategies for the clip	<p>4.1.Classed clips are analysed and strategies reviewed based on lines made, AWEX-ID, test results, selling costs and prices obtained.</p> <p>4.2.Alternative clip preparation and classing strategies are compared for profitability of the clip.</p> <p>4.3.Conclusions and actions of review processes are incorporated into future classing decisions and instructions to shed staff.</p> <p>4.4.Review of classing and marketing alternatives is discussed with owner/manager.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- establish and maintain consistent methods of clip preparation
- analyse classed clips and test alternative classing strategies for profitability
- review classing strategies based on broker and buyer feedback
- adapt classing strategies for buyer requirements, marketing systems and owner manager
- value lines of wool using industry descriptions and test results
- incorporate review of classing strategies into instructions for shed staff
- discuss clip test results, prices and alternative classing strategies with owner/shed manager
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record information collected accurately and legibly, and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- industry descriptions (AWEX-ID)
- requirements of the organisation's wool marketing and production plans
- wool testing, broking and export organisations and practices
- clip preparation and analysis processes for the major wool types
- requirements and standards of the national wool processing industry
- methods used for processing wool and the impact on clip preparation and marketing
- marketing alternatives and implication for classing
- wool brokering services available
- efficient wool room layout
- sale catalogue and market reports
- specifications for classers
- industry description and premiums and discounts

**REQUIRED SKILLS AND KNOWLEDGE**

- relevant national codes of practice for the industry.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- source market and client information on clip preparation requirements
- lay out a wool room for efficient operation
- accurately assess wool quality and types
- develop classing strategies that meet the requirements of codes of practice and seek to optimise returns for the grower
- communicate specific and detailed requirements for clip preparation to shed staff
- review strategies and implement plans for improvement.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Clips may include:

- all types of merino and cross-bred clips that are to be sold through the Australian wool auction selling system.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Gather objectively measured data.	1.1. Available information is collated. 1.2. Tested sample is assessed to determine its appropriateness as a representative sample. 1.3. Requirements for additional information needed to validate measurements are determined.
2. Analyse collected data	2.1. Available data is reviewed and evaluated to determine possible lines. 2.2. Comparisons with previous measurements if available are undertaken.
3. Analyse market trends	3.1. Information produced by industry to determine market trends is reviewed. 3.2. Potential for movement in prices is evaluated against available data. 3.3. Extent to which discounts are applied is determined.
4. Prepare wool to meet requirements of the market	4.1. The impact on the market of variable quantities is analysed. 4.2. Available information is used to prepare the wool to

ELEMENT	PERFORMANCE CRITERIA
	<p>best advantage.</p> <p>4.3. Wool is packaged in the most appropriate manner.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- arrange wool room layout for efficient operation
- understand and interpret the individual fleece measurements
- class wool to standards in accordance with the Code of Practice, or as required by the enterprise classing strategy and marketing plan
- communicate specific and detailed requirements for wool preparation and classing to wool handling staff
- identify wool of higher and lower market value and make lines which maximise return to woolgrower
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- wool room layouts which promote efficient wool flow and handling
- breeds of sheep
- inherent wool characteristics , including fibre diameter, staple length and strength, colour, yield, VM type, curvature, comfort factor
- fleece measurement criteria - techniques used to measure wool characteristics.
- interpretation of test results
- principles of classing , including mob/flock concept, variability for fibre diameter and staple length, soundness, defects
- classing scenarios requiring detail of clip break-ups

**REQUIRED SKILLS AND KNOWLEDGE**

- clip analysis reports and comparisons
- Occupational Health and Safety (OHS) legislation, codes of practice and enterprise procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- arrange wool room layout for efficient testing and data retrieval
- understand and interpret the individual fleece measurements
- class wool to standards in accordance with the Code of Practice, or as required by the enterprise classing strategy and marketing plan
- communicate specific and detailed requirements for wool preparation and classing to wool handling staff
- identify wool of higher and lower market value and make lines which maximise return to woolgrower.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan and implement wool harvesting and preparation operations	<p>1.1.Flock owner/manager is consulted about their requirements and informed of any planning issues taking into account weather and environmental issues.</p> <p>1.2.Order of mobs is determined for wool harvesting and preparation according to enterprise requirements.</p> <p>1.3.Staffing needs are determined by negotiation with grower/contractor according to clip type, enterprise requirements, legislative requirements, employment agreements and awards.</p> <p>1.4.Staff duties are allocated and staff given directions where necessary.</p> <p>1.5.The shed equipment and materials are arranged in accordance with shearing plan, Occupational Health and Safety (OHS) requirements and the quality management system.</p> <p>1.6.Wool harvesting and preparation plan is implemented and adjusted as required.</p>
2. Implement plan and monitor work flows	<p>2.1.Sheep numbers, mob cut outs and shearing speeds are monitored to match wool preparation capacity.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2. Shed staff are supervised to maintain a clear board and throw fleeces correctly.</p> <p>2.3. Non fleece wool is removed and prepared as directed.</p> <p>2.4. Shed staff are directed to use appropriate skirting strategies, and fleece to skirting ratios is monitored.</p> <p>2.5. Directions are issued to staff to close off bins and lines for mob cut outs.</p> <p>2.6. Wool harvesting and preparation team is managed to comply with quality management system requirements.</p> <p>2.7. Compliance with enterprise and legislative requirements including OHS, animal welfare, industrial, and environmental practices are monitored.</p> <p>2.8. Staff performance is managed and direction is provided where necessary.</p>
<p>3. Supervise wool pressing</p>	<p>3.1. Presser is instructed on pressing strategies to reduce mixed bales while meeting code of practice requirements for uniformity in bales.</p> <p>3.2. Presser is informed of order for pressing and procedures to minimize contamination.</p> <p>3.3. Rate of build up in lines is monitored by consulting with wool presser.</p> <p>3.4. Bale weights are monitored to ensure efficiencies are achieved for the grower without creating overweight bales.</p> <p>3.5. Bales are branded in line with code of practice requirements.</p> <p>3.6. Wool book is monitored to ensure it is up to date, accurate and legible.</p>
<p>4. Provide feedback to grower on classing strategies, clip performance and wool harvesting and preparation operations</p>	<p>4.1. Staff performance in clip preparation is reviewed.</p> <p>4.2. Feedback is provided on classing strategies, clip preparation in relation to mob characteristics, skirting ratios, bale weights and any workflow issues.</p> <p>4.3. Possible improvements to wool handling facilities are reported.</p> <p>4.4. Equipment effectiveness and maintenance requirements are reported.</p> <p>4.5. Lines made and bale details are explained in relation to mob characteristics.</p>

ELEMENT	PERFORMANCE CRITERIA
	4.6. Feedback is provided on lotting advice. 4.7. Wool clip documentation is completed and presented to grower for signature.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- plan and implement wool harvesting and preparation operations
- organise and schedule staff and work tasks
- supervise staff and monitor productivity
- identify and remove potential workplace hazards
- implement risk management strategies
- monitor environmental impacts and implement control measures
- use written and oral information about workplace and legislative requirements
- calculate resources and bale weights for mob cut outs
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- supervisory procedures with regard to operations and personnel
- staff management including team building and conflict resolution
- wool industry codes of practice and quality systems
- industry requirements with regard to hygiene and safety for wool harvesting and preparation facilities and equipment
- weather conditions and its effect on wool harvesting
- planning and implementation processes
- completing workplace documentation
- employment agreements, awards, processes and requirements

## REQUIRED SKILLS AND KNOWLEDGE

- legislative requirements including OHS, industrial, animal welfare and environment.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

In order to confer competency, evidence must prove that the candidate is able to:

- determine and schedule staff and resources,
- implement relevant legislative requirements associated with the shearing industry including employment agreements and awards
- monitor the supply of sheep and wool flow
- review and evaluate operational performance and clip preparation standards
- provide feedback to grower on the shearing operation and the preparation and classing of the clip.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Clip types may include:

- those that are harvested and prepared including:
  - merino

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• crossbred</li> <li>• other breeds.</li> </ul>
Activities may include:	<ul style="list-style-type: none"> <li>• preparing for, implementing and reviewing wool harvesting</li> <li>• clip preparation and classing</li> <li>• the range of scale of operation may vary from one stand to greater than 10 stands and applies to all wool that can be offered through the auction system.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Define work roles for shed staff	<p>1.1.Roles and responsibilities of shed staff are clearly defined.</p> <p>1.2.Skills of shed staff are accurately identified and matched with available tasks and duties.</p> <p>1.3.Requirements of job duties and Code of Practice are clearly identified and communicated to shed staff.</p> <p>1.4.Occupational Health and Safety (OHS) policy and procedures are effectively communicated and implemented.</p>
2. Induct shed staff	<p>2.1.OHS hazards are identified, risks assessed and suitable controls are implemented.</p> <p>2.2.The details of shearing, including flock and mob details, are communicated to staff</p> <p>2.3.New staff are briefed on relevant awards, enterprise agreements, pay rates and related administration.</p> <p>2.4.New staff are advised of terms and conditions and signed on.</p> <p>2.5.New staff are familiarised with the workplace and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>colleagues.</p> <p>2.6. Enterprise environmental policy and procedures are effectively communicated and implemented.</p>
<p>3. Perform shed hand duties</p>	<p>3.1. Board persons' duties are performed including picking up and throwing fleece, sweeping board and preparing non fleece wools.</p> <p>3.2. Wool handlers' duties are performed including skirting and rolling a fleece, preparing non fleece wools and keeping wool area clean.</p> <p>3.3. Pen up duties are performed including keeping mobs separate and monitoring and filling catching pens.</p> <p>3.4. Wool pressers' activities are performed including keeping wool press area clean, pressing, branding, weighing and recording bale details in the wool book.</p>
<p>4. Support on-the-job training</p>	<p>4.1. Individuals are encouraged to self-evaluate performance and identify areas for improvement.</p> <p>4.2. Training needs are determined through appraisal of staff and the monitoring of work performance.</p> <p>4.3. Practical skills are analysed and then explained and/or demonstrated as required.</p> <p>4.4. Workplace learning opportunities are provided, with coaching and mentoring to support learning.</p> <p>4.5. Staff responsibilities are adjusted to allow for practice and skills development where required.</p>
<p>5. Performance manage shed staff</p>	<p>5.1. Performance standards for clip preparation are established and communicated to individuals and the team.</p> <p>5.2. Skirting requirements are explained, accurate and efficient technique demonstrated and skirtings ratio is monitored.</p> <p>5.3. Requirements for separating specific parts of the fleece are clearly described to wool handlers and justified by Code of Practice or processor requirements.</p> <p>5.4. Motivation strategies are used for shed staff to maintain a consistent focus on clip preparation standards and timing of operations.</p>
<p>6. Maintain effective working relations with the team</p>	<p>6.1. Problems are recognised and addressed through discussion with work group.</p> <p>6.2. Assistance is sought from work group members</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>when difficulties arise in achieving allocated tasks.</p> <p>6.3. Discussion and information sharing is routinely used to communicate requirements of work activities through a participative approach.</p> <p>6.4. Disagreements and conflicts are managed constructively using appropriate conflict management strategies.</p>
<p>7. Provide feedback to shed staff</p>	<p>7.1. Feedback is clear, constructive and provided promptly to individuals to maintain high quality clip preparation.</p> <p>7.2. Confirmatory feedback is provided to emphasise good performance and technique and its importance for clip quality.</p> <p>7.3. Corrective feedback is provided in a constructive way, including an explanation of the effects of poor performance or incorrect technique and strategies for improvement.</p> <p>7.4. Under performance is addressed both on an individual and team basis.</p> <p>7.5. Clip data is used to share feedback on clips prepared with team members.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- identify and provide training requirements
- plan and monitor ongoing training needs
- demonstrate effective time management
- demonstrate safe workplace and environmentally responsible practices
- solve problems (staffing, resources)
- motivate and performance manage staff
- pen up sheep
- monitor penned sheep

## **REQUIRED SKILLS AND KNOWLEDGE**

- identify contaminants
- pick up fleeces
- handle non fleece wools
- skirt fleeces
- operate the wool press
- weigh, brand and stack bales safely
- record bale details
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## **Required knowledge**

- shearing industry Awards and personnel processes
- principles of team work, negotiation and time management
- instruction and coaching techniques
- conflict management
- communication for feedback and motivation
- enterprise training requirements and processes.
- relevant State/Territory legislation, regulations and Codes of Practice with regard to workplace OHS, environmental protection, and the use and control of hazardous substances and machinery and equipment
- hazard identification, assessment and control
- maintaining records
- sheep behaviour
- animal welfare
- board duties
- contamination
- parts of the fleece
- non fleece wools
- wool press operating procedures
- bale requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• allocate and communicate staff roles and responsibilities</li> <li>• provide information on industrial arrangements to staff</li> <li>• perform shed staff duties including pen up, board person, wool handler</li> <li>• explain clip preparation requirements to shed staff</li> <li>• provide training to overcome capability shortfalls in individuals and the team</li> <li>• implement strategies to foster teamwork and trust and deal with conflict</li> <li>• monitor team and individual work performance and provide confirmatory or corrective feedback</li> <li>• implement environmental policies in the shearing workplace.</li> </ul>

## AHCWOL405A Class fleece wool

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of classing fleece wool from merino and crossbred sheep and defines the standard required to: arrange layout of bins and wool table; label bins and containers to ensure optimum operational efficiency and quality management; check and prepare wool to ensure freedom from contamination and stain and optimum skirting ratios; assess pigmented fibre risk; identify wool of higher and lower market value and different processing requirements; class fleece into lines that meet the requirements of the Code of Practice for the Preparation of Australian Wool.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to wool classers who class wool as a professional service after consultation with the grower or shed manager. Responsibility for the work of others is an important component. Classing fleece wool requires the ability to adjust strategies to different clip types and market requirements and to coordinate and monitor activities efficiently and effectively.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for wool classing	<p>1.1.The layout of the shed, equipment and facilities are arranged according to the determined classing strategy for efficient wool flow, quality management and pressing.</p> <p>1.2.All personal protective equipment and other safety requirements are selected, used and maintained according to Occupational Health and Safety (OHS) guidelines.</p> <p>1.3.Bins and containers are placed correctly and clearly labelled according to the classing strategy, quality management system and enterprise requirements.</p> <p>1.4.Ensure sufficient staffing ratio is established and maintained.</p>
2. Carry out classing of fleece wool	<p>2.1.Any bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p> <p>2.2.Fleece wool is handled and skirted to the standards outlined in the classing strategy.</p> <p>2.3.Wool is checked to ensure freedom from</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>contamination and stain.</p> <p>2.4. Wool is checked to ensure adequate and optimum skirting.</p> <p>2.5. Pigmented fibre risk is assessed and wool is kept separate as required.</p> <p>2.6. Wool is appraised for its characteristics.</p> <p>2.7. Wool is classed to standards of the enterprise classing strategy in accordance with codes of practice, or as required by alternative selling methods.</p> <p>2.8. Wool of higher and lower market value and processing requirements is identified and lines made, which maximise return to the wool owner.</p>
3. Place wool in bins for pressing	<p>3.1. Wool is correctly and consistently placed in the correct bins ready for pressing, ensuring that cross contamination does not occur.</p> <p>3.2. Wet wool, stain and coloured wool is identified and kept separate according to the requirements of the organisation and code of practice.</p> <p>3.3. Any bending and lifting that is required is done according to safe working practices and using the available safety equipment.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and apply safe work procedures
- arrange layout of bins and wool table for optimum efficient wool flow and pressing in a variety of sheds
- label bins and containers correctly
- monitor clip preparation and skirting
- assess pigmented fibre risk and separate wool as required
- identify and appraise wool characteristics
- class wool to standards in accordance to Code of Practice or as required by alternative selling methods

## REQUIRED SKILLS AND KNOWLEDGE

- identify wool of higher and lower market value and lines made which maximise return to grower.
- separate wools of different processing or end user requirements
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- shed layouts which promote efficient wool flow and handling
- breeds of sheep and their characteristics
- types and sources of contamination
- wool production areas of Australia and clip characteristics
- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor
- Fleece Measurement Criteria - techniques used to measure wool characteristics
- processing methods - woollen and worsted, stages of processing
- raw wool characteristics and their effect on processing and final product
- wool growth, skin and fibre biology, and effect of genetics and environment on fibre characteristics
- requirements for handling shedding and pigmented fibres
- interpretation of test results
- principles of classing (mob/flock concept, variability for fibre diameter and staple length, soundness, defects, etc.)
- classing scenarios requiring detail of clip break-ups
- clip feedback and reports
- understanding of and preparation of documentation of wool clips
- Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards.

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• arrange layout of bins and wool table</li> <li>• label bins and containers to ensure optimum operational efficiency and quality management</li> <li>• check and prepare wool to ensure freedom from contamination and stain and optimum skirting ratios</li> <li>• assess pigmented fibre risk</li> <li>• identify wool of higher and lower market value and different processing requirements</li> <li>• class fleece into lines that meet the requirements of the Code of Practice for the Preparation of Australian Wool.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competence requires evidence of the ability to apply work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Classing may include:	<ul style="list-style-type: none"> <li>• the classing of Merino and Crossbred wools to the standard required for the Australian auction system.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Use tools, equipment and machinery	<p>1.1. Maintenance tools, equipment and machinery are identified, collected and prepared for use according to supervisor's instructions.</p> <p>1.2. Unsafe or faulty tools, equipment and machinery are identified and segregated for repair or replacement according to supervisor's instructions.</p> <p>1.3. Tools, equipment and machinery are cleaned, maintained and stored according to manufacturers specifications, workplace procedures and supervisors instructions.</p>
2. Maintain a clean and safe workplace	<p>2.1. Services are located using site plans and in consultation with the supervisor.</p> <p>2.2. Occupational Health and Safety (OHS) hazards and environmental implications are identified and reported to the supervisor.</p> <p>2.3. Suitable Personal Protective Equipment (PPE) is selected, used, maintained and stored according to best practice.</p> <p>2.4. Floors, benches and other flat work surfaces are swept, washed and treated according to supervisor's instructions.</p> <p>2.5. Tools, equipment and materials not in use are stored neatly, and waste and used materials are removed and placed in disposal containers according to supervisor's instructions.</p> <p>2.6. Maintenance activities are undertaken according to OHS requirements.</p>
3. Maintain structures	3.1. Maintenance requirements of structures and

ELEMENT	PERFORMANCE CRITERIA
and workplace surroundings	<p>workplace surroundings are identified according to supervisor's instructions.</p> <p>3.2.Maintenance of structures and workplace surroundings is undertaken according to supervisor's instructions and OHS requirements.</p> <p>3.3.Structural damage and deterioration in the workplace are identified and reported to the supervisor.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels, site plan measurements and OHS symbols
- communicate effectively with team members and supervisor
- tally work hours, calibrate tools and equipment, measure volumes to apply cleaning agents, measure quantities of materials and estimate areas
- minimise noise, dust and water run-off to prevent nuisance-level environmental disturbance
- use literacy skills to read and follow a range of basic instructions
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds.

#### Required knowledge

- enterprise standards for presentation of buildings, structures and surroundings
- the effect of outdoor climatic conditions (e.g., rain, hail, extreme heat and/or wind, or very high ultraviolet radiation), which may prevent or impede maintenance activities, or influence the selection of tools, equipment and safety equipment to minimise the hazards presented
- awareness of the relationship between specific maintenance activities and the external environment, and reasons for procedures that help to minimise the impact that these activities may have on the environment
- workplace hazards, OHS legal rights and responsibilities, and OHS safety symbols and signs
- environmental protection and animal welfare legislative and workplace

**REQUIRED SKILLS AND KNOWLEDGE**

requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare and use maintenance tools and equipment
- clean and maintain the workplace
- identify and report problems
- record maintenance activities.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Type of work may include:

- assisting maintenance of workshops, depots, tool sheds, and planted areas.

Tools, equipment and machinery may include:

- hand tools
- pedestrian and ride-on rotary mowers
- cylinder mowers

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• blower vacs</li> <li>• ride-on sweepers</li> <li>• turf edging machines</li> <li>• brush-cutters</li> <li>• high pressure air and water cleaners.</li> </ul>
Hazards may include:	<ul style="list-style-type: none"> <li>• disturbance or interruption of services</li> <li>• solar radiation</li> <li>• dust</li> <li>• air and soil-borne organisms</li> <li>• noise</li> <li>• sharp tools and equipment</li> <li>• manual handling</li> <li>• moving vehicles</li> <li>• machinery and machinery parts</li> <li>• uneven surfaces</li> <li>• flying objects.</li> </ul>

## AHCWRK201A Observe and report on weather

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of observing and reporting on weather and climate conditions for an agricultural, horticultural or land management enterprise and defines the standard required to: monitor and interpret weather information; communicate warnings and concerns; identify weather and climate conditions and its impact upon farming and grazing activities; follow directions to minimise loss and damage to staff, livestock, crops, property; produce and review farm enterprises and operations for weather risk.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to all workers in agricultural, horticultural and land management industries. It is normally carried out while working with limited supervision, within enterprise guidelines.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Check weather and climate information	<p>1.1. Weather and climate information is checked to determine likely conditions.</p> <p>1.2. Changed weather and climate situations are recognised.</p> <p>1.3. Likely impact of changes in weather and climate are anticipated in respect to work tasks, safety of others, property, natural resources and local environment.</p> <p>1.4. Report is made to supervisor of anticipated impact of weather and climate.</p>
2. Carry out preventative action	<p>2.1. Information and advice is promptly disseminated to relevant personnel.</p> <p>2.2. Preventative action is determined according to the known effects on livestock, crops and work tasks.</p> <p>2.3. Actions to minimise loss and damage are implemented.</p> <p>2.4. Livestock, horticultural or crop management program or schedule of work tasks are adjusted and revised according to weather and climatic changes.</p>
3. Monitor weather and climate	<p>3.1. Regular updates are accessed to determine ongoing suitability of current programs.</p> <p>3.2. Viability of livestock, horticultural or crop management practices are reviewed to ensure suitability within meteorological conditions.</p> <p>3.3. Research on forecasting techniques is undertaken to</p>

ELEMENT	PERFORMANCE CRITERIA
	maintain currency of information. 3.4.Relevant information is documented and recorded according to enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- monitor physical signs of weather in the context of available information
- relate forecasts to impact on current operations and activities
- communicate information on weather and situations that may be impacted
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- effects of wind and rain on wind chill
- effects of wind shear and wind chill exposure
- enterprise and industry policies for monitoring weather and climate conditions, and recording and reporting weather and climate conditions.
- weather and climate conditions impact upon farming and grazing activities
- working knowledge of climate and weather
- effects of wind chill on metabolism of animals
- effects of prolonged dry periods on pastures and animal production, and natural resources
- effects of extreme heat on animals, including during birthing, and effects of heat stress on neonates
- relevant legislative health and OHS requirements, especially as they relate to weather and climate monitoring and preparations for hazardous weather.

## Evidence Guide

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Follow environmental workplace practices	<p>1.1. Workplace practices and work instructions relating to potential environmental impacts are recognised and followed, and clarification is sought where necessary.</p> <p>1.2. Changes to work practices and procedures are responded to positively and promptly in accordance with enterprise requirements.</p> <p>1.3. Relevant legislation, codes and national standards that impact on workplace environmental practices are recognised and followed.</p>
2. Contribute to improved environmental work practices	<p>2.1. Suggestions are made to designated personnel for improvements to workplace practices where possible.</p> <p>2.2. Information is gathered and improvements are suggested to support the development of improved workplace approaches to environmental practices.</p> <p>2.3. Environmental issues and their relationship to workplace practices are discussed in the workplace with colleagues and designated personnel.</p> <p>2.4. Contributions to the review of environmental practices and policies are made within limits of responsibility.</p>
3. Recognise and report on a potential environmental threat	<p>3.1. Signs or symptoms of the potential environmental threat are recognised.</p> <p>3.2. Information about or observations of a potential</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>environmental threat are reported to supervisors and/or appropriate authorities.</p> <p>3.3. Location and extent of the potential environmental threat is accurately recorded.</p> <p>3.4. Reports on the potential environmental threat are completed according to enterprise guidelines.</p>
4. Maintain environmental records	<p>4.1. Environmental records are accurately prepared as required according to enterprise policies and procedures.</p> <p>4.2. Environmental records are stored securely in a form accessible for reporting purposes.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate with supervisors and workplace colleagues
- recognise basic environmental hazards and threats
- follow workplace directions and instructions related to environment
- keep simple environmental records
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- relevant legislation from all levels of government on environmental issues
- relevant environmental policies and workplace/industry practices and procedures
- good practice approaches relevant to work area particularly in regard to minimising environment hazards and risks, and improving environmental performance
- environmental issues, especially in regard to water catchments, air, noise, ecosystems, habitat, efficient use of resources, sustainability and waste

**REQUIRED SKILLS AND KNOWLEDGE**

minimisation

- potential environmental threats and problems relevant to a given region and occupation
- general work place practices and their potential impact on the environment.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- follow workplace procedures to minimise environmental impacts
- minimise and dispose of waste in an environmentally responsible way
- use non renewable resources responsibly and reuse where possible
- record data relating to environmental risks, impacts and management if required.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

**RANGE STATEMENT**

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan for operating in remote environments	<p>1.1.Information relating to the operating environment and location is collated and recorded to meet established enterprise policy.</p> <p>1.2.Detailed operating and travel plans, including a disaster plan and fallback position requirements are established in consultation with supervising staff.</p> <p>1.3.Appropriate authorities are notified of the action plans and time schedules according to enterprise policy.</p> <p>1.4.Relevant maps are identified and sourced.</p>
2. Prepare for operating in remote environments	<p>2.1.Personal needs are prepared for activities or travel in remote areas.</p> <p>2.2.Transportation and equipment are prepared for use in prescribed work location or along prescribed routes.</p> <p>2.3.Relevant maps are obtained and studied prior to departure.</p> <p>2.4.Planned activities and itinerary are accurately reported and recorded prior to departure in accordance with enterprise requirements.</p>
3. Prepare for	3.1.Provisioning meets expected operational and

ELEMENT	PERFORMANCE CRITERIA
emergency situations	<p>possible emergency needs.</p> <p>3.2. Initial planning and regular monitoring ensures structured usage of available provisions and resources.</p> <p>3.3. Operating plan is structured to include training in remote area survival techniques prior to operating in remote situations.</p> <p>3.4. Emergency management procedures are included as an integral part of operating plans and enterprise policy.</p>
4. Operate in remote environment	<p>4.1. Activities are completed according to instructions and established time schedules.</p> <p>4.2. All activities carried out in remote situations are executed in accordance with prescribed procedures.</p> <p>4.3. Emergency situations are handled in accordance with prescribed procedures and enterprise policy.</p> <p>4.4. Established reporting procedures are followed on completion of planned activities and on return to base in line with enterprise policy.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- plan for operating in remote environments
- prepare for operating in remote environments
- prepare for emergency situations
- operate in remote environments
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- map reading and navigation skills including direction finding (e.g., GPS, use of compass, stars or watch)
- local topography, nearby inhabitants and locations within that area
- survival techniques and human needs relating to survival situations
- clothing requirements for sun or heat protection
- basic first aid
- bush craft including making a fire, cooking and wild food gathering
- water supplies, sources and generation methods
- emergency vehicle and mechanical equipment repair
- the operation of communication equipment (e.g., field communications by two-way, satellite telephony and HF radio), and distress signalling including use of signalling mirrors
- weather and weather indicators
- basic rope skills including useful knots (reef, clove hitch, truckie's hitch, bowline); simple lashings and tying down loads.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- develop and maintain operating and emergency plans for working remotely
- source and interpret maps of the area
- implement workplace procedures for notifying of location, activities and travel in remote areas
- prepare provisions to cover essential and emergency needs

## AHCWRK204A Work effectively in the industry

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the process of working effectively on an individual basis and with others and defines the standard required to: meet the standards required in the industry for dress and work practices; implement the quality standards for workplace products or services; interpret instructions and establish work tasks and priorities; demonstrate communication skills with supervisors and co workers.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working on an individual basis, and also includes the ability to work within a hierarchy of management and with others.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Obtain information about the industry	<p>1.1.Sources of information about the industry are correctly identified and accessed.</p> <p>1.2.Information to assist effective and safe work performance within the industry is collected.</p> <p>1.3.Specific information on sector of work is obtained and updated.</p> <p>1.4.Industry and Occupational Health and Safety (OHS) information is correctly applied to day-to-day work activities.</p> <p>1.5.Employment terms and conditions are defined.</p> <p>1.6.Career pathways within the industry are identified.</p>
2. Observe employment requirements	<p>2.1.Industry developments are used in workplace context to improve quality, productivity and conditions.</p> <p>2.2.Work practices comply with Codes of Practice and workplace expectations.</p> <p>2.3.Faults and abnormalities in workplace practices are recognised and remedial action is taken to enterprise requirements.</p> <p>2.4.Dress and personal requirements comply with workplace standards.</p> <p>2.5.Punctuality in work attendance is observed.</p> <p>2.6.Employer's expectations are met through completion of workplace routines and specific instructions within enterprise policies and procedures.</p>
3. Accept responsibility for quality of own work	<p>3.1.Personal work space is kept in a well organised and safe condition, and is in accordance with relevant standards and policies.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. Workplace code of conduct is adhered to.</p> <p>3.3. Variations in the quality of service and/or products from required standards are detected and reported in accordance with workplace procedures.</p>
4. Plan and conduct own work	<p>4.1. Instructions are interpreted correctly and observed.</p> <p>4.2. Factors affecting work requirements are identified and appropriate action is taken.</p> <p>4.3. Work load is assessed and prioritised within allocated timeframes.</p> <p>4.4. The need for assistance to improve performance is communicated clearly to the appropriate person.</p>
5. Promote workplace cooperation	<p>5.1. Responsibilities and duties are undertaken in a positive manner to promote co-operation and good relationships.</p> <p>5.2. Co-operation with others is conducted in a courteous manner and is appropriate to culture, special needs and linguistic background and position in the organisation.</p> <p>5.3. Problems and conflict are recognised and resolved, where possible, through personal communication and/or are referred to a supervisor, manager or employer for resolution.</p>
6. Contribute to a productive work environment	<p>6.1. Commitments to undertake work or assist colleagues/co-workers are fulfilled.</p> <p>6.2. Information relevant to work is shared with colleagues/co-workers to ensure designated work goals are met.</p> <p>6.3. Knowledge and skills are shared with colleagues/co-workers through conversations and meetings.</p> <p>6.4. Contribution of individuals of different gender and social and cultural backgrounds is recognised and sought.</p> <p>6.5. The principles of equal employment opportunity are observed and implemented.</p> <p>6.6. Work is consistent with workplace standards relating to anti-discrimination and workplace harassment.</p>
7. Undertake an activity to workplace requirements	<p>7.1. Interpretation of work schedules is consistent with the schedule and tasks defined.</p> <p>7.2. Knowledge and skills required for task are discussed with supervisors and co-workers.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>7.3. Availability of materials and equipment are checked to ensure they are consistent with work schedules and the requirements of the tasks.</p> <p>7.4. A daily schedule for completing workplace activities and allocated tasks including priorities, allocated start times, estimation of completion times and materials, equipment and assistance required for completion is decided upon.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collate information on the industry
- observe employment requirements
- accept responsibility for quality of own work
- manage own work
- maintain safety of others
- contribute to a productive work environment
- interpret work schedules
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- industry/workplace awards and conditions
- employer's expectations
- relevant legislation and Codes of Practice applying to the industry
- OHS policies and procedures
- workplace policies and procedures including those relating to quality systems
- emergency procedures

**REQUIRED SKILLS AND KNOWLEDGE**

- organisational structure
- workplace communication channels.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- meet the standards required in the industry for dress and work practices
- implement the quality standards for workplace products or services
- interpret instructions and establish work tasks and priorities
- demonstrate communication skills with supervisors and co workers.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

<b>RANGE STATEMENT</b>	
Work may include:	<ul style="list-style-type: none"> <li>all aspects of individual performance in the workplace.</li> </ul>

**Unit Sector(s)**

<b>Unit sector</b>	Work

## AHCWRK205A Participate in workplace communications

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of effectively participating in workplace communications and defines the standard required to: follow routine spoken messages; perform workplace duties by following routine written notices; obtain and provide information in response to workplace requirements; complete relevant work related documents; participate in workplace meetings and discussions.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the process of effectively participating in workplace communications and applies to all occupational roles and levels in the workplace.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Follow routine spoken messages	<p>1.1.Required information is gathered by listening and is correctly interpreted.</p> <p>1.2.Instructions and procedures are followed in an appropriate sequence for the task and in accordance with the information received.</p> <p>1.3.Clarification is sought from the workplace supervisor on all occasions when any instruction or procedure is not understood.</p>
2. Perform workplace duties following routine written notices	<p>2.1.Written notices and instructions are read and interpreted correctly.</p> <p>2.2.Routine written instructions and procedures are followed in sequence.</p> <p>2.3.Clarification is sought from the workplace supervisor on all occasions when any instruction or procedure is not understood.</p>
3. Obtain and provide information in response to workplace requirements	<p>3.1.Specific, relevant information is obtained.</p> <p>3.2.Information is interpreted correctly.</p> <p>3.3.Information is written completely, accurately and legibly.</p> <p>3.4.Sources of required information are identified and appropriate contact is established.</p> <p>3.5.Personal interaction is courteous and enquiries are made clearly and concisely.</p> <p>3.6.Defined procedures for the location and storage of information are used.</p>
4. Complete relevant work-related	<p>4.1.A range of forms relating to conditions of employment is completed accurately and legibly.</p>

ELEMENT	PERFORMANCE CRITERIA
documents	<p>4.2. Workplace data is recorded manually or electronically using standard workplace forms and documents.</p> <p>4.3. Basic mathematical processes are used for routine calculations.</p> <p>4.4. Errors in recording information on forms and documents are identified and rectified.</p> <p>4.5. Reporting requirements to supervisor are completed according to organisational guidelines.</p>
5. Participate in workplace meetings and discussion	<p>5.1. Team meetings are attended on time.</p> <p>5.2. Own opinions are clearly expressed and those of others are listened to without interruption.</p> <p>5.3. Meeting inputs are consistent with the meeting purpose and established protocols.</p> <p>5.4. Workplace interactions are conducted in a courteous manner.</p> <p>5.5. Questions about routine workplace procedures and matters concerning conditions of employment are asked and responded to.</p> <p>5.6. Meeting outcomes are interpreted and implemented.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- ability to follow simple spoken messages
- ability to perform routine workplace duties following simple written instructions
- ability to gather and provide information in response to workplace requirements
- ability to complete relevant work-related documents
- ability to estimate, calculate and record routine workplace measures
- ability to use basic mathematical processes of addition, subtraction, division, multiplication, percentages, decimal points and ratios
- ability to participate in workplace meetings and discussions literacy skills to read, select and follow organisational policies and procedures including Occupational Health and Safety (OHS); follow sequenced written instructions; and record the information accurately and legibly

**REQUIRED SKILLS AND KNOWLEDGE**

- interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- oral communication skills / language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- numeracy skills to complete basic arithmetic calculations and measure volumes
- problem-solving skills to use available resources and prioritise daily tasks.

**Required knowledge**

- effective communication, including the role of body language
- different modes of communication (e.g. written and non-verbal)
- effective communication in a work team
- communication procedures and systems, and technology relevant to the organisation and the individual's work responsibilities
- OHS legislative requirements and codes of practice.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- follow routine spoken messages
- perform workplace duties by following routine written notices
- obtain and provide information in response to workplace requirements
- complete relevant work related documents
- participate in workplace meetings and discussions.

**Context of and specific resources for**

Competency requires the application of work practices under work conditions. Selection and use of resources

**EVIDENCE GUIDE****assessment**

for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Communications may include:

- all modes and methods of communication relevant to the place of work.

**Unit Sector(s)****Unit sector**

Work

## AHCWRK206A Observe enterprise quality assurance procedures

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of observing enterprise quality assurance procedures in agricultural production and defines the standard required to: identify critical control points in the production process; implement quality assurance procedures; check quality of own work against standards; keep records that are required under enterprise quality assurance.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit is carried out under supervision, within enterprise guidelines.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Apply basic quality assurance practices	<p>1.1.Elements of the enterprise quality assurance system in relation to food safety and quality, Occupational Health and Safety (OHS), animal welfare and biosecurity are recognised.</p> <p>1.2.Information about quality or problems is communicated to appropriate personnel.</p> <p>1.3.Hazards to food safety and quality are identified for work area according to enterprise guidelines.</p> <p>1.4.Steps in producing eggs or meat or harvesting milk are identified.</p> <p>1.5.Critical control points for immediate work area are identified according to workplace procedures.</p> <p>1.6.Basic record-keeping is completed according to enterprise guidelines.</p>
2. Follow work instructions	<p>2.1.Work instructions related to the immediate work areas are identified and followed in accordance with workplace requirements.</p> <p>2.2.Work instructions are followed for documenting the quality process.</p>
3. Check quality of product	<p>3.1.The quality of the product is checked as prescribed in work instructions.</p> <p>3.2.Problems that affect or could potentially affect quality are reported to supervisor.</p> <p>3.3.Actions are taken to correct the problem under supervision or workplace instruction.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply basic quality assurance practices
- follow work instructions
- check quality of work
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- animal production processes
- HACCP (Hazard Analysis Critical Control Point) approach to Quality Assurance (QA)
- enterprise QA policies, guidelines and standard operating procedures relating to food safety and quality, animal welfare and biosecurity
- enterprise OHS requirements.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

<b>EVIDENCE GUIDE</b>	
	<p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify critical control points in the production process</li> <li>• implement quality assurance procedures</li> <li>• check quality of own work against standards</li> <li>• keep records that are required under enterprise quality assurance.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.

## AHCWRK207A Collect and record production data

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of collecting and recording agricultural or horticultural production data obtained from a variety of sources, such as stock counts, vaccination or medication records, germination rates, quantities harvested and defines the standard required to: implement requirements to collect data as part of the work role or job function; enter data accurately into specified written or electronic/ computerised formats; store data in the prescribed location; format and refer to data to complete work duties if necessary.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working under routine supervision with intermittent checking. Responsibility for some roles and coordination within a team may be required. Data collection and recording activities are usually carried out within established routines, methods and procedures.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify data to be collected	<p>1.1. Specific requirements of the data to be collected are determined by discussion with the supervisor or by reading work instructions.</p> <p>1.2. Materials or tools required for data collected are obtained, and where necessary, calibrated.</p> <p>1.3. Difficulties that may be encountered in collecting the data are identified and advice sought from the supervisor if needed.</p> <p>1.4. Advice about proposed data collection is communicated to others as required.</p> <p>1.5. Suitable Personal Protective Equipment (PPE) is selected, used and maintained where required.</p> <p>1.6. Checks are made to determine whether notices relating to site quarantine are in effect and, where required, site quarantine procedures are followed.</p>
2. Record production data	<p>2.1. Production data is recorded in the correct format and to meet specific requirements.</p> <p>2.2. Records are legible, accurate and complete.</p>
3. Present and store production data	<p>3.1. Production data is presented in the correct format and to meet specific requirements.</p> <p>3.2. Production data sheets are stored according to enterprise procedures.</p> <p>3.3. Production data is downloaded or entered into a computer where required, using specified formats</p>

ELEMENT	PERFORMANCE CRITERIA
	and applications.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- enterprise recording methods
- purposes for which the recorded data might be used
- software programs used for recording or storing data
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- counting moving animals in paddocks, pens or in races
- operating data loggers
- entering data accurately into specified written or electronic/computerised formats
- calibrating tools and equipment.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

<b>EVIDENCE GUIDE</b>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify information requirements	<p>1.1.Appropriate interpersonal skills are used to accurately identify customer's information needs.</p> <p>1.2.Initial customer enquiries are handled courteously and promptly in accordance with enterprise and industry requirements.</p> <p>1.3.Knowledge and understanding of products and services are actively updated via authoritative sources and appropriate personnel.</p> <p>1.4.Personal and professional limitations in addressing customer information needs are identified, and assistance is sought from appropriate personnel when required.</p>
2. Provide information	<p>2.1.Information that addresses customer requirements is provided to customers in a timely and professional manner.</p> <p>2.2.Product and services that may meet customer requirements are appropriately exhibited to customer as required.</p> <p>2.3.Enquiries that fall outside own areas of responsibility/knowledge are appropriately referred within enterprise for follow up and completion.</p>

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- engage customer, especially in relation to giving and receiving information
- handle equipment and small machinery
- relate to people from a range of social, cultural and ethnic backgrounds, and of varying physical and mental abilities
- assess initial customer needs
- calculate quantities and prices
- access and research product information
- seek assistance as required
- recommend products
- encourage repeat business
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- customer service techniques
- how to effectively engage and communicate with a range of customers from culturally diverse backgrounds, and of varying physical and mental abilities
- legal requirements in sales environments, particularly Fair Trading, Trade Practices and Sale of Goods legislation, and public liability
- customer requirements in various rural and horticultural settings
- enterprises business values, structure, products and services
- basic working knowledge of products and services.

## AHCWRK209A Participate in environmentally sustainable work practices

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the performance outcomes, skills and knowledge required to effectively measure current resource use and to carry out improvements including reducing the negative environmental impact of work practices. This unit requires the ability to access industry information, and applicable legislative and Occupational Health and Safety (OHS) guidelines.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to operators/team members under supervision or guidance, who are required to follow workplace procedures and instructions, and to work in an environmentally sustainable manner. It covers efficient resource use; potential environmental hazards; regulatory compliance; improving environmental performance (within the scope of competency, authority and own level of responsibility). It addresses the knowledge, processes and techniques necessary to participate in environmentally sustainable work practices.
--------------------------------	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify current resource use	1.1. Identify workplace environmental and resource efficiency issues. 1.2. Identify resources used in own work role. 1.3. Document and measure current usage of resources using appropriate techniques. 1.4. Record and file documentation measuring current usage, using technology (such as software systems) where applicable. 1.5. Identify and report workplace environmental hazards to appropriate personnel.
2. Comply with environmental regulations	2.1. Follow workplace procedures to ensure compliance. 2.2. Report breaches or potential breaches to appropriate personnel.
3. Seek opportunities to improve resource efficiency	3.1. Follow organisational plans to improve environmental practices and resource efficiency. 3.2. Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area.

ELEMENT	PERFORMANCE CRITERIA
	3.3. Make suggestions for improvements to workplace practices in own work area.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to comply with all relevant legislation associated with job specifications and procedures
- communication and problem-solving skills to question, seek clarification and make suggestions relating to work requirements and efficiency
- communication and teamwork skills to recognise procedures; to follow instructions; to respond to change, such as current workplace environmental/sustainability frameworks; and to support team work and participation in a sustainable organisation
- literacy, numeracy and technology skills to interpret workplace information in relation to work role, and to document and measure resource use
- technology skills to select and use technology appropriate for a task
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- environmental and resource hazards/risks
- environmental or sustainability legislation, regulations and codes of practice applicable to own work role
- OHS issues and requirements
- organisational structure, and reporting channels and procedures
- relevant environmental and resource efficiency systems and procedures
- sustainability in the workplace
- terms and conditions of employment including policies and procedures, such as daily tasks, employee and employer rights, equal opportunity.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• accessing, interpreting and complying with a range of environment/sustainability legislation and procedural requirements relevant to daily responsibilities</li> <li>• accurately following organisational information to participate in and support an improved resource efficiency process and reporting as required</li> <li>• developing and/or using tools such as inspection checklists, to collect and measure relevant information on organisation resource consumption, within work role</li> <li>• identifying organisational improvements by applying efficient resource use to daily activities</li> <li>• knowledge of environmental and resource hazards/risks.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Environmental and resource efficiency issues may include:	<ul style="list-style-type: none"> <li>• maximising opportunities to improve business environmental performance</li> <li>• minimising environmental risks</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• promoting more efficient production and consumption of natural resources, for example minimising waste by participating in or using a waste management system</li> <li>• using resources efficiently such as material usage, energy usage (seeking alternative sources of energy or energy conservation) or efficient water usage.</li> </ul>
Appropriate techniques may include:	<ul style="list-style-type: none"> <li>• examining and documenting resources in work area</li> <li>• examining invoices from suppliers</li> <li>• examining relevant information and data</li> <li>• measuring resource usage under different conditions</li> <li>• reports from other parties involved in the process of identifying and implementing improvements.</li> </ul>
Compliance may include:	<ul style="list-style-type: none"> <li>• meeting relevant laws, by-laws and regulations or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act): <ul style="list-style-type: none"> <li>• international</li> <li>• commonwealth</li> <li>• state/territory</li> <li>• local government</li> <li>• industry</li> <li>• organisation.</li> </ul> </li> </ul>

## AHCWRK301A Collect samples for a rural production or horticulture monitoring program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of collecting samples as part of a rural production or horticulture monitoring program or while conducting post-mortem examination of livestock or other animals and defines the standard required to: plan to collect samples and move equipment to the site; collect and preserve samples for a given site according to prescribed enterprise procedures, standards and principles; collecting schedules and industry best practice; record sampling results and observations accurately on data sheets.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to collecting samples for a rural production or horticulture monitoring program. Samples collected will usually be analysed by laboratory staff, although collection staff may undertake some tests.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan for collection of samples	<p>1.1.Purpose and scope of sample collection activity is confirmed from discussion with supervisor or work instructions.</p> <p>1.2.Sample collection schedule is read/heard and confirmed with supervisor.</p> <p>1.3.Sampling site location is confirmed and, where required, approval obtained for site access following enterprise guidelines.</p> <p>1.4.Samples to be collected and preserved are identified in conjunction with supervisor or by reference to enterprise guidelines.</p> <p>1.5.Range of likely operating conditions, hazards and difficult/sensitive environments are assessed for impact on sampling and testing.</p>
2. Prepare equipment and resources	<p>2.1.Equipment required for sampling and preserving is sourced according to sampling procedures.</p> <p>2.2.Equipment is checked for availability and serviceability in accordance with enterprise procedures.</p> <p>2.3.Data or record sheets/books are collected for use.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4. Equipment, data sheets and personnel are moved to sampling sites without injury or damage and readied for use.</p>
<p>3. Carry out sampling and preserving procedures</p>	<p>3.1. Samples are collected in accordance with sampling plan and enterprise procedures and industry protocols/guidelines.</p> <p>3.2. Samples are preserved and recorded in accordance with sampling standards and guidelines.</p> <p>3.3. Samples for external analysis are prepared, packaged and sent to laboratory in accordance with sampling schedule and laboratory standards.</p> <p>3.4. Hazardous materials are packaged and transported in accordance with legislative requirements.</p> <p>3.5. Observations including information on the surrounding area and environmental conditions are made in accordance with monitoring schedule.</p> <p>3.6. Equipment operation and work practices conform to Occupational Health and Safety (OHS) requirements.</p> <p>3.7. Collection outcomes including presentation of samples are reported and delivered in accordance to enterprise guidelines.</p>
<p>4. Complete sample collection activities</p>	<p>4.1. Equipment and clothing is cleaned, sanitised, repaired and stored in accordance with enterprise procedures.</p> <p>4.2. Damaged or malfunctioning equipment is repaired on site or sent to manufacturer or specialist.</p> <p>4.3. Sampling results and observations are accurately recorded on data sheets and forwarded in accordance with enterprise procedures.</p> <p>4.4. Changes in field conditions and equipment are conveyed to supervisor according to enterprise procedures.</p>

## AHCWRK302A Monitor weather conditions

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of monitoring and interpreting weather and climate conditions and assessing its likely impact on staff, crops, livestock, produce, property, natural resources, equipment and work tasks and defines the standard required to: monitor and interpret weather and climate information; communicate warnings and concerns; identify resource requirements and dangers; minimise loss and damage to staff, livestock, crops, natural resources, property, and produce; implement alternative livestock or other programs; continue to monitor weather changes.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers in agricultural, horticultural and land management industries. The work is likely to be carried out with limited or minimal supervision within enterprise guidelines.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Interpret weather and climate information	<p>1.1. Weather and climate information and warnings are regularly monitored to determine likely conditions.</p> <p>1.2. Potential variations in weather and climate conditions are anticipated and assessed according to warnings, weather patterns and historical experience.</p> <p>1.3. Possible impacts of weather and climate on crops, livestock and work tasks are identified to determine appropriate preventative action.</p> <p>1.4. Suitable preventative actions are reviewed to ensure availability of appropriate resources and responses.</p>
2. Carry out preventative action	<p>2.1. Information and advice is promptly disseminated to relevant personnel.</p> <p>2.2. Preventative action is determined according to the known effects on livestock, crops and work tasks.</p> <p>2.3. Actions to minimise loss and damage are implemented.</p> <p>2.4. Livestock or crop management program and work schedules are adjusted and revised according to climatic changes.</p>
3. Monitor weather and climate	<p>3.1. Regular updates are accessed to determine the ongoing suitability of current programs.</p> <p>3.2. Viability of livestock and crop management practices and scheduling of work tasks are reviewed to ensure suitability within meteorological conditions.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. Research on forecasting techniques is undertaken to maintain currency of information. 3.4. Relevant information is documented and recorded according to enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- relate forecasts to impact on current operations and activities
- relate weather and climate conditions and changes to decision-making and prevention of loss and damage
- monitor physical signs in the context of available information
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- working knowledge of climate and weather
- weather and climate conditions and its impact upon farming and grazing activities
- effects of wind and rain on wind chill
- relevant legislative health and Occupational Health and Safety (OHS) requirements especially as they relate to weather and climate monitoring and preparations for hazardous weather
- enterprise and industry policies for monitoring weather and climate conditions and recording and reporting weather and climate conditions
- if applicable, effects of shearing and/or parturition and wind chill exposure
- if applicable, effects of wind chill on metabolism of animals
- if applicable, effects of prolonged dry periods on pastures and animal production and natural resources.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• monitor and interpret weather and climate information</li> <li>• communicate warnings and concerns</li> <li>• identify resource requirements and dangers</li> <li>• minimise loss and damage to staff, livestock, crops, natural resources, property, and produce</li> <li>• implement alternative livestock or other programs and continue to monitor weather changes.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Interpreting weather and climate conditions may include:	<ul style="list-style-type: none"> <li>• all situations, techniques and sources of evidence for monitoring and assessing its likely impact.</li> </ul>

## AHCWRK303A Respond to emergencies

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of recognising and responding to emergencies and defines the standard required to: implement emergency preparation procedures; put in place and maintain safety equipment and aids for emergencies; report and record near misses and hazards; document and distribute procedures for evacuation; follow directions in the threat or event of an emergency; apply essential first aid techniques.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to all workers in agricultural, horticultural and land management industries. It may have to be performed independently but as part of a workplace emergency plan.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for emergency situations	<p>1.1.Appropriate actions are taken to maximise safety and minimise health hazards in the workplace.</p> <p>1.2.Options for action in cases of emergency are identified and evaluated.</p> <p>1.3.Organisational emergency procedures and policies are correctly implemented as part of the workplace procedures.</p> <p>1.4.Occupational Health and Safety (OHS) procedures and safe working practices are applied including the selection of Personal Protective Equipment (PPE) to suit the emergency situation.</p> <p>1.5.Regular checks of the workplace are carried out to minimise potential hazards.</p> <p>1.6.Emergency procedures are carried out as required by established workplace procedures.</p> <p>1.7.Safety equipment and aids required for emergencies are selected, used, maintained and stored in good order.</p> <p>1.8.Near misses and potential hazards are reported to supervisor and/or documented according to enterprise guidelines.</p>
2. Implement fire prevention and control on site and in the workshop	<p>2.1.Fire hazards are minimised as specified in workplace and/or fuelling procedures.</p> <p>2.2.Appropriate fire extinguishers and fire fighting equipment are used in fire situations, and appropriate authority notified according to established procedures.</p> <p>2.3.Evacuation procedures are followed according to</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>enterprise policy and plan including nominated assembly points.</p> <p>2.4. Where required, specific safety procedures for the handling and use of industrial gases are carried out in line with standard industry practice and regulations.</p>
3. Evaluate the emergency	<p>3.1. Emergency and potential emergency situation reports and signals are promptly recognised and assessed.</p> <p>3.2. Advice is sought from relevant people in evaluating the emergency.</p> <p>3.3. The possible development of the emergency situation is assessed and further potential hazards to staff and/or clients are evaluated.</p> <p>3.4. Needs, including those for assistance, are prioritised promptly and accurately.</p>
4. Act in an emergency	<p>4.1. The plan of action is implemented using techniques appropriate to the situation and available resources and abilities.</p> <p>4.2. Equipment is operated safely and, where necessary, equipment and techniques are improvised.</p> <p>4.3. Strategies for group control are identified and implemented, and clients and other individuals are removed from danger.</p> <p>4.4. The condition of all staff and others assisting is constantly monitored.</p> <p>4.5. The information required to assist emergency services, where relevant, is acquired and documented.</p> <p>4.6. Emergency services are notified as necessary.</p> <p>4.7. The plan of action is changed to accommodate changes in the situation variables.</p> <p>4.8. Casualty evacuation methods are demonstrated where relevant to the context.</p> <p>4.9. Organisational procedures and policies and legal requirements are correctly implemented in the event of a major injury or death.</p>
5. Apply essential first aid techniques	<p>5.1. Immediate risk to self and casualty's health and safety are minimised by isolating the hazard.</p> <p>5.2. The casualty's injuries and vital signs are assessed.</p> <p>5.3. Casualty is reassured in a caring and calm manner and made comfortable using available resources.</p>

ELEMENT	PERFORMANCE CRITERIA
	5.4. First aid care is provided in accordance with established first aid procedures. 5.5. First aid assistance is sought from others as appropriate.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- accurately evaluate the emergency
- avoid/control escalation of the emergency
- develop a plan of action decisively
- efficiently implement a plan of action
- render first aid care
- deal with contingencies
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the use of safe working practices
- the emergency network and contacts
- enterprise plan and evacuation procedures
- OHS legislative requirements and Codes of Practice
- legal responsibilities and duty of care
- use of communications equipment
- organisational and legal policies and procedures in the event of an accident/incident
- local call out procedures to access emergency services personnel
- practical first aid skills using prepared and improvised materials

**REQUIRED SKILLS AND KNOWLEDGE**

- hazard identification, risk assessment and control.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- implement emergency preparation procedures
- put in place and maintain safety equipment and aids for emergencies
- report and record near misses and hazards
- document and distribute procedures for evacuation
- follow directions in the threat or event of an emergency
- apply essential first aid techniques
- Element 5 and First Aid components of the underpinning knowledge in the Evidence Guide of this competency standard can be satisfied through successful completion of St Johns Basic Life Support (Level 2) Certificate, the Australian Red Cross Senior First Aid Certificate or equivalent.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Emergencies may include:

- fire
- hazardous releases
- fuel spillage
- gases
- chemical spills
- injury from machinery and equipment
- climbing accident
- snake bite or poisoning
- respiratory or cardiac arrest
- electrocution
- injuries
- equipment failure.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for response	1.1. Equipment checked to ensure availability and serviceability. 1.2. Task and operational instructions are obtained in accordance with enterprise procedures. 1.3. Location details of incident is obtained in accordance with enterprise procedures.
2. Respond to incident	2.1. Travel to incident location is undertaken in a safe and efficient manner. 2.2. Communication with base station and other personnel is maintained at all times in accordance with enterprise procedures. 2.3. On site search activities are carried out as necessary in accordance with enterprise procedures and Occupational Health and Safety (OHS) requirements.
3. Rescue is effected	3.1. Incident scene is assessed and monitored for hazards and appropriateness of planned procedures. 3.2. Planned procedures are modified where necessary in response to local circumstances in accordance with enterprise procedures, safety and OHS requirements. 3.3. Support to other rescue services is provided as appropriate in accordance with enterprise procedures. 3.4. Access to casualties is gained safely in accordance with enterprise procedures and OHS requirements. 3.5. Protective equipment and clothing is used as appropriate in accordance with enterprise procedures, manufacturer's guidelines and OHS requirements. 3.6. Equipment is operated safely and appropriately in

ELEMENT	PERFORMANCE CRITERIA
	<p>accordance with enterprise procedures, manufacturer's guidelines and OHS requirements.</p> <p>3.7. Progress of rescue is communicated in accordance with enterprise procedures.</p> <p>3.8. Casualties are treated, monitored and moved to safety in accordance with first aid and OHS procedures.</p>
4. Implement post incident responses	<p>4.1. Equipment recovered, cleaned and serviced in accordance with enterprise procedures, manufacturer's guidelines and OHS requirements.</p> <p>4.2. Documentation is completed in accordance with enterprise requirements.</p> <p>4.3. Incidents are reported in accordance with enterprise procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- prepare for response
- respond to incident
- effect the rescue
- implement post-incident responses
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- local environmental conditions
- search and rescue methods

## REQUIRED SKILLS AND KNOWLEDGE

- operation and characteristics of rescue equipment, tools and vehicles
- environmental, public health and safety issues
- types of hazards and how they should be handled
- enterprise procedures, legislative and OHS requirements
- first aid, life preservation.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- investigate the circumstances and logistics for the emergency
- carry out preparation and move to the rescue site
- assess the situation and establish communication with additional or specialist help
- carry out the required rescue or response to emergency
- implement post incident responses.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Rescue incidents may include:

- fires
- drowning
- accidents
- vehicle
- boating
- accidents
- exposure to hazardous materials
- injury
- damage to equipment
- environment
- significant sites
- stranding
- exposure
- lost persons
- vehicle, boating and aircraft accidents.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for work site activities	<p>1.1. Requirements of the work are clarified with supervisor of the project.</p> <p>1.2. Personnel, equipment and material resource requirements are identified according to the scope of the project and supervisors instructions.</p> <p>1.3. The order of activities and time allocation is identified, documented and presented to the supervisor for verification.</p> <p>1.4. The environmental implications of the proposed work site activities are identified and the likely outcomes assessed and reported to the supervisor.</p> <p>1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed and risk controls are implemented.</p> <p>1.6. Personal Protective Equipment (PPE) is selected, used, maintained and stored according to the type of work site activities to be undertaken.</p>
2. Organise resources	<p>2.1. Materials are purchased and equipment/machinery is hired as authorised by the supervisor and according to enterprise guidelines.</p> <p>2.2. External agency permits are gained in the correct order as necessary.</p> <p>2.3. Neighbours and affected parties are notified of works to be undertaken as necessary.</p> <p>2.4. Delivery of materials and equipment/machinery to site is organised according to documented order of activities.</p> <p>2.5. Personnel are organised to be on site when they are</p>

ELEMENT	PERFORMANCE CRITERIA
	required.
3. Coordinate and report on activities	3.1.All resources are coordinated and timed to suit the scope of the project and order of activities. 3.2.Personnel are directed in activities for each period of work. 3.3.Personnel, activities, timelines and resource usage are monitored and documented according to enterprise guidelines. 3.4.Contingency situations are recognised and reported to the supervisor, and corrective actions taken according to enterprise guidelines. 3.5.A simple project report is written to inform management of work site activities undertaken and completed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- read and interpret documentation associated with work site activities
- calculate material and resource requirements
- coordinate a team to achieve optimum performance
- communicate with personnel at all levels
- document results clearly and concisely
- perform an OHS risk assessment
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- environmental awareness associated with undertaking project works to ensure the impact on the environment is minimal
- work schedule programming
- hiring and subcontracting of labour
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for obtaining external agency permits as

**REQUIRED SKILLS AND KNOWLEDGE**

necessary

- the range, use and availability of materials, equipment and machinery that may be required for the project
- OHS issues, legislative requirements and Codes of Practice.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare and plan worksite activities
- identify and allocate resources required
- schedule activities and allocate tasks and responsibilities
- use communication and team supervision strategies
- monitor activities and record costs and production levels
- convey issues and suggested improvements to management.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Follow quality assurance practices on food safety and quality, biosecurity and animal welfare	<p>1.1.Elements of the industry quality assurance requirements are determined.</p> <p>1.2.Hazards to food safety and quality are identified for work area according to enterprise guidelines and standard operating procedures.</p> <p>1.3.Critical control points for work area are determined according to workplace procedures.</p> <p>1.4.Record keeping is completed according to industry quality assurance requirements.</p>
2. Implement standard operating procedures	<p>2.1.Standard operating procedures are implemented according to enterprise requirements.</p> <p>2.2.Non-conforming or defective product reported to supervisor according to enterprise/industry requirements.</p> <p>2.3.Corrective action is taken according to enterprise policy and procedures.</p>
3. Report problems that affect quality	<p>3.1.Potential or existing quality problems are recognised.</p> <p>3.2.Instances of variation in quality from specifications or work instructions are identified.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. Variations and potential problems are reported to supervisor/manager according to enterprise guidelines.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- implement quality assurance practices on food safety and quality, biosecurity and animal welfare
- implement standard operating procedures
- report problems that affect quality
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record information collected accurately and legibly, and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- industry quality assurance requirements, such as the Australian Pig Industry Quality Program (APIQ)
- animal production processes
- Hazard Analysis and Critical Control Point (HACCP) approach to quality assurance
- enterprise policies, guidelines and standard operating procedures relating to food safety and quality, biosecurity and animal welfare
- enterprise Occupational Health and Safety (OHS) requirements and environmental procedures.

## AHCWRK307A Develop and apply fertiliser and soil ameliorant product knowledge

### Modification History

Not Applicable

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit covers the process of developing and applying fertiliser and soil ameliorant product knowledge and defines the standard required to: identify fertiliser and soil ameliorant products using information about their characteristics; provide information to customers about fertiliser and soil ameliorant products; refer customers to other appropriate sources of information about products.</p>
-------------------------------	---

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>This unit is carried out for the purpose of accurately identifying products and providing accurate information to customers about products and services. The unit includes providing information on environmentally responsible application and use of products. The standard applies to contractors and employees working in a number of roles within the fertiliser and soil ameliorant industry, including those involved in fertiliser and soil ameliorant spreading or application, warehousing, wholesale and retail sales and transport, and the storage of fertiliser and soil ameliorants. The functions may also be performed by people engaged in other agriculture, horticulture and land management activities.</p>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify fertiliser and soil ameliorant products and associated Occupational Health and Safety (OHS), food safety and environmental issues	1.1.Information about fertiliser and soil ameliorant product is provided to customers. 1.2.OHS, food safety and environmental issues relating to particular products are explained to customers, with particular reference to their safe storage, handling and application according to industry code of practice. 1.3.Bulk fertiliser and soil ameliorant product is identified using a combination of visual and physical examination of product characteristics. 1.4.Correct terminology is used when distinguishing between different products and services.
2. Work with fertiliser and soil ameliorant products	2.1.Storage and handling requirements of products are identified and applied consistently and according to industry codes of practice, enterprise quality assurance requirements, OHS procedures, environmental best practice and other relevant

ELEMENT	PERFORMANCE CRITERIA
	<p>legislative and regulatory requirements.</p> <p>2.2.OHS hazards associated with particular products are identified and appropriate action is taken to minimise risks to self and others.</p> <p>2.3.Environmental risks associated with particular products are identified and appropriate action is taken to minimise any likely risks to self and others.</p> <p>2.4.Suitable Personal Protective Equipment (PPE) is used and maintained in good condition.</p> <p>2.5.Inventory and labelling systems are used to locate products within the workplace or store.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- observing product characteristics
- working safely with products
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- characteristics and key label components (e.g. product analysis, impurities and warnings) of the range of fertiliser and soil ameliorants sold or handled in the workplace
- key environmental, OHS and food safety risks associated with the use, spreading, storage, handling and transport of fertilisers and soil ameliorants.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify fertiliser and soil ameliorant products using information about their characteristics</li> <li>• provide information to customers about fertiliser and soil ameliorant products</li> <li>• refer customers to other appropriate sources of information about products.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Fertiliser and soil ameliorants may include:	<ul style="list-style-type: none"> <li>• chemical and organic fertilisers, composts, lime, gypsum and dolomite.</li> </ul>

## AHCWRK308A Handle bulk materials in storage area

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of receiving, moving and sampling bulk materials in a storage area and defines the standard required to: check equipment and storage facilities and identify current or impending faults; test bulk materials for moisture, contamination and quality; conduct silo readings; identify bulk materials pests and damage; handle and manoeuvre equipment; record bulk materials stocks and movements.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit is likely to be carried out under limited supervision. It includes the use of safety equipment and procedures, and the repair of the facility and equipment used to store the bulk materials. Bulk materials are handled to industry standards in relation to segregation and storage conditions ensuring minimum loss or damage and optimum returns. Overall progress may be checked periodically. The handling of bulk materials in storage areas will usually follow set routines, methods and procedures. Some discretion and judgement is required in the selection of equipment and materials, organisation of work, and services. The outcomes should be achieved within specified timelines.
--------------------------------	--

### Licensing/Regulatory Information

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to work in bulk materials storage area	<p>1.1. Work undertaken is interpreted from the work program where necessary, and confirmed with the management.</p> <p>1.2. Occupational Health and Safety (OHS) hazards are identified, risks assessed and suitable controls implemented.</p> <p>1.3. Suitable personal protective clothing and equipment is selected, used and maintained.</p> <p>1.4. Tools and equipment suitable for the work to be undertaken are selected, checked, and maintained if necessary.</p> <p>1.5. Environmental implications of undertaking work in the bulk materials storage area are identified, likely outcomes assessed and if necessary responsible action taken.</p>
2. Sample bulk materials for testing	2.1. Representative samples of bulk materials are taken for testing in line with the requirements of the bulk

ELEMENT	PERFORMANCE CRITERIA
	<p>materials storage program.</p> <p>2.2.Sampling is undertaken safely, following the prescribed guidelines for the activity.</p> <p>2.3.Representative bulk materials samples are prepared for dispatch, accurately and clearly labelled, and packaged according to the guidelines of the organisation and the analysing body.</p> <p>2.4.Samples are dispatched to the analysing body, according to the requirements of the bulk materials storage program.</p>
3. Move bulk materials into and out of storage	<p>3.1.Bulk materials for handling and storage are correctly identified from the written or verbal instructions.</p> <p>3.2.Bulk materials are segregated according to type, variety and quality characteristics according to the requirements of the organisation as stated in the bulk materials storage program.</p> <p>3.3.Measures are taken to minimise insect and weed infestation and contamination during the movement of the bulk materials.</p> <p>3.4.Bulk materials are regularly checked for insect infestation and contamination during movement according to enterprise requirements.</p> <p>3.5.Any storage and handling equipment that is used is thoroughly cleaned after emptying, and dismantled if necessary, according to the procedures of the organisation and the nature of the equipment.</p> <p>3.6.Bulk materials are moved into and out of storage according to the procedures of the organisation, and following the prescribed OHS procedures.</p> <p>3.7.Silo types and handling equipment are selected for each bulk material type in relation to their storage characteristics and flow properties and according to the requirements of the bulk materials storage program.</p> <p>3.8.Suitable measures are implemented to minimise the affect of desiccant dusts on the flow properties of bulk materials.</p> <p>3.9.Records are clearly and accurately updated and stored as and when required by the bulk materials storage program.</p>
4. Repair and maintain storage facility	<p>4.1.The need for repairs to the facility is identified through observation or instruction.</p> <p>4.2.Maintenance and repairs are conducted according to</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>the requirements of the organisation and following the prescribed OHS procedures and taking into account environmental considerations.</p> <p>4.3. Completed maintenance records and other appropriate information are documented in accordance with enterprise requirements.</p> <p>4.4. Workshop and work areas are cleaned and maintained to OHS and enterprise requirements.</p> <p>4.5. Maintenance and repairs, damage, malfunctions or irregular performance in machinery, tools and equipment are reported in line with organisational requirements.</p> <p>4.6. Tools and equipment are cleaned, secured and stored in line with OHS and organisational requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- record bulk materials stocks and movements
- conduct silo readings
- identify bulk materials pests and damage
- use communication systems
- sample and conduct a simple analysis of bulk materials
- check equipment and storage facilities and identify current or impending faults
- handle and manoeuvre equipment
- test bulk materials for moisture, contamination and quality
- complete pre-operational checks on basic tools and equipment
- perform routine safety, service and maintenance procedures on tools, equipment and machinery
- operate hand and independently powered tools and cleaning equipment to industry standards
- clean, secure and store machinery and equipment
- perform basic trouble shooting
- recognise and rectify minor operational faults
- handle hazardous substances (fuels) safely

## REQUIRED SKILLS AND KNOWLEDGE

- read and interpret manufacturers specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- interpret and apply task instructions, communicate with work team and supervisor, and record and report faults, workplace hazards and accidents
- measure and calculate volumes, consumption and lubrication requirements
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- the client's sampling and classification requirements
- bulk materials types and characteristics
- common bulk materials pests and problems
- appropriate legislative requirements, manufacturers instructions and enterprise procedures/instructions
- appropriate action in contingency situations
- silo operations and configuration, machinery and operating practices
- organisation requirements for protective equipment and safe practices in relation to OHS
- organisation and industry guidelines for segregation of bulk materials quality assurance principles
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- potential hazards associated with the operation of basic tools and equipment
- general machine maintenance procedures
- machinery operating principles and operating methods
- machinery storage and protection methods
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS, and the use and control of machinery and equipment
- environmental impacts associated with the operation of machinery and equipment
- personal protective clothing and equipment and when and how it should be used
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

<b>EVIDENCE GUIDE</b>	
Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• check equipment and storage facilities and identify current or impending faults</li> <li>• test bulk materials for moisture, contamination and quality</li> <li>• conduct silo readings</li> <li>• identify bulk materials pests and damage</li> <li>• handle and manoeuvre equipment</li> <li>• record bulk materials stocks and movements.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Handling may include:	<ul style="list-style-type: none"> <li>• bulk materials from any crop harvested in the organization (e.g., cereals, legumes, pulse crops, oilseeds and pasture seeds)</li> <li>• animal feed or fertilisers</li> <li>• safety equipment and procedures</li> <li>• the repair of the facility and equipment used to store the bulk materials.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify needs for on-the-job training support	1.1. Training needs are determined in consultation with supervisor and employee/trainee. 1.2. Extent and scope of training support to be provided is agreed with the supervisor. 1.3. Outcomes from training are defined prior to commencement. 1.4. Methods of providing on-job training support is clarified and agreed with supervisor.
2. Support on-the-job training	2.1. Training outcomes are clearly indicated to the learner. 2.2. Training is delivered as directed and in accordance with workplace procedures and relevant legislation. 2.3. Practice opportunities are provided to re-enforce the training.
3. Provide follow-up and support to learner	3.1. Opportunities to apply competencies on-the-job are provided. 3.2. Constructive feedback and coaching are provided to assist learning. 3.3. Feedback of employee's progress is given to the supervisor in the workplace.

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- identify hazards and provide a safe learning environment
- determine training needs and required outcomes
- deliver training in work skills
- identify needs for on-the-job training support
- provide follow-up and support to learner
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- adult learning principles
- setting up on-job training support
- approaches to on-job training support
- resources required for on-job training support
- reviewing and reporting on on-job training support
- Occupational Health and Safety (OHS) issues related to on-job training support.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

<b>EVIDENCE GUIDE</b>	
	<p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify needs for on-the-job training support</li> <li>• set up on-job training support</li> <li>• provide follow-up and support to learner</li> <li>• apply a range of approaches to on-job training support</li> <li>• provide support in an enterprise successfully and appropriately.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Collect information	<p>1.1.Site location and relevant details are provided or acquired.</p> <p>1.2.Site maps and plans are sourced where available and reviewed.</p> <p>1.3.Scope of inspection is identified in line with client-stakeholder needs and local regulations.</p> <p>1.4.Climate and weather conditions are ascertained from historical data.</p> <p>1.5.Where required, formal approval is sought to visit site.</p> <p>1.6.Covenants are identified and recorded.</p> <p>1.7.Remote sensing systems are checked for status.</p>
2. Prepare for a site visit	<p>2.1.All requirements for inspection are identified and prepared.</p> <p>2.2.Methods and forms for recording inspection are planned and available for use.</p> <p>2.3.Scope of proposed work is evaluated and field notes prepared to checklist specific concerns.</p> <p>2.4.Environmental conditions are evaluated in</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>preparation for likely site conditions.</p> <p>2.5. Traffic management requirements are considered where required.</p>
3. Conduct site inspection	<p>3.1. Site orientation is undertaken and ownership and site boundaries are verified.</p> <p>3.2. Site hazards for a site inspection are identified, risk assessed and appropriate controls implemented.</p> <p>3.3. Site dimensions and gradients are identified, estimated and recorded.</p> <p>3.4. Soil types are identified from soil identification reference chart guidelines.</p> <p>3.5. Soil samples are field tested and detailed notes recorded for analysis of potential problems.</p> <p>3.6. Relevant vegetation is inspected to determine the identity, health, condition and location.</p> <p>3.7. Observable signs of fauna are investigated.</p> <p>3.8. Existing on-site services and adjacent site features are identified and recorded.</p>
4. Document information	<p>4.1. Base plan is prepared of the site.</p> <p>4.2. Site inspection information is documented in an inspection/site inventory report and/or on the base plan.</p> <p>4.3. Documents are completed and forwarded to client/supervisor/manager.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify a wide range of vegetation common to the region
- recognise plant health problems and defects
- perform hazard identification and risk control procedures
- conduct soil field tests
- estimate dimensions and gradients
- advise client-stakeholder

## REQUIRED SKILLS AND KNOWLEDGE

- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- plan and map interpretation
- soil pH, texture, structure and type
- plant identification and plant physiology
- basic measuring and estimating methods
- current land use and environmental threats to site hazards associated with undertaking site inspections
- protocols of accessing and visiting a site
- relevant legislative and regulatory requirements including environmental protection legislation
- local government regulations relating to the proximity of trees to buildings, services and roads
- local tree protection and preservation regulations
- relevant Code of Practice.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- verify details of the location, ownership, orientation

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>and boundaries of a site</li> <li>• perform hazard identification and risk control procedures</li> <li>• observe and record site information details and features</li> <li>• inspect vegetation and soil types, health, condition and location</li> <li>• carry out a site inspection</li> <li>• develop and document a site inspection report and/or a base plan.</li> </ul>

# AHCWRK313A Implement and monitor environmentally sustainable work practices

## Modification History

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the performance outcomes, skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.</p> <p>This unit requires the ability to access industry information, applicable legislative and Occupational Health and Safety (OHS) guidelines.</p> <p>While no licensing, legislative, regulatory or certification requirements apply holistically to this unit at the time of publication, relevant national, state and territory legislation, regulations and codes of practice impact upon this unit.</p>
------------------------	---

## Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to those with responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools, such as: identifying areas for improvement; developing plans to make improvements; implementing and monitoring improvements in environmental performance.</p> <p>A person who demonstrates competence in this unit must be able to provide evidence of the ability to implement and monitor integrated environmental and resource efficiency management policies and procedures within an organisation. Evidence must be strictly relevant to the particular workplace role.</p>
--------------------------------	--

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage	1.1. Identify environmental regulations applying to the enterprise. 1.2. Analyse procedures for assessing compliance with environmental/sustainability regulations. 1.3. Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate. 1.4. Collect, analyse and organise information from a range of sources to provide information/advice and tools/resources for improvement opportunities. 1.5. Measure and document current resource usage of

ELEMENT	PERFORMANCE CRITERIA
	<p>members of the work group.</p> <p>1.6. Analyse and document current purchasing strategies.</p> <p>1.7. Analyse current work processes to access information and data to assist in identifying areas for improvement.</p>
<p>2. Set targets for improvements</p>	<p>2.1. Seek input from stakeholders, key personnel and specialists.</p> <p>2.2. Access external sources of information and data as required.</p> <p>2.3. Evaluate alternative solutions to workplace environmental issues.</p> <p>2.4. Set efficiency targets.</p>
<p>3. Implement performance improvement strategies</p>	<p>3.1. Source and use appropriate techniques and tools to assist in achieving efficiency targets.</p> <p>3.2. Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management.</p> <p>3.3. Implement and integrate environmental and resource efficiency improvement plans for own work group with other operational activities.</p> <p>3.4. Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area.</p> <p>3.5. Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate.</p> <p>3.6. Implement costing strategies to fully value environmental assets.</p>
<p>4. Monitor performance</p>	<p>4.1. Use and/or develop evaluation and monitoring, tools and technology.</p> <p>4.2. Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders.</p> <p>4.3. Evaluate strategies and improvement plans.</p> <p>4.4. Set new efficiency targets, and investigate and apply new tools and strategies.</p> <p>4.5. Promote successful strategies and reward participants where possible.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to analyse problems, to devise solutions and to reflect on approaches taken
- change management skills
- communication skills to answer questions, clarify and acknowledge suggestions relating to work requirements and efficiency
- communication/consultation skills to support information flow from stakeholders to the work group
- innovation skills to identify improvements, to apply knowledge about resource use to organisational activities and to develop tools
- literacy skills to comprehend documentation, to interpret environmental and energy efficiency requirements, to create tools to measure and monitor improvements and to report outcomes
- numeracy skills to analyse data on organisational resource consumption and waste product volumes
- planning and organising skills to implement environmental and energy efficiency management policies and procedures relevant to own work area
- problem solving skills to devise approaches to improved environmental sustainability and to develop alternative approaches as required
- technology skills to operate and shut down equipment; where relevant, to use software systems for recording and filing documentation to measure current usage; and to use word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information
- supervisory skills to work effectively with a team.

#### Required knowledge

- best practice approaches relevant to own area of responsibility and industry
- compliance requirements within work area for all relevant environmental/sustainability legislation, regulations and codes of practice including resource hazards/risks associated with work area, job specifications and procedures
- environmental and energy efficiency issues, systems and procedures specific to industry practice
- external benchmarks and support for particular benchmarks to be used within organisation, including approaches to improving resource use for work area and expected outcomes
- OHS issues and requirements
- organisational structure and reporting channels and procedures
- quality assurance systems relevant to own work area
- strategies to maximise opportunities and to minimise impact relevant to own work

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
<p>area</p> <ul style="list-style-type: none"> <li>• supply chain procedures</li> <li>• terms and conditions of employment including policies and procedures, such as daily tasks, work area responsibilities, employee, supervisor and employer rights, equal opportunity.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• knowledge of relevant compliance requirements within work area</li> <li>• developing plans to make improvements</li> <li>• planning and organising work group activities in relation to measuring current use and devising strategies to improve usage</li> <li>• monitoring resource use and improvements for environmental performance relative to work area and supervision</li> <li>• ensuring appropriate action is taken within work area in relation to environmental/sustainability compliance and potential hazards</li> <li>• implementing new approaches to work area in an effort to resolve and improve environmental and resource efficiency issues and reporting as required.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Compliance may include:	<ul style="list-style-type: none"> <li>• meeting relevant laws, by laws and regulations or best practice or codes of practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):                             <ul style="list-style-type: none"> <li>• international</li> <li>• commonwealth</li> <li>• state/territory</li> <li>• industry</li> <li>• organisation.</li> </ul> </li> </ul>
Sources may include:	<ul style="list-style-type: none"> <li>• organisation specifications</li> <li>• regulatory sources</li> <li>• relevant stakeholders</li> <li>• resource use.</li> </ul>
Purchasing strategies may include:	<ul style="list-style-type: none"> <li>• influencing suppliers to take up environmental sustainability approaches</li> <li>• researching and participating in programs such as a supply chain program to purchase sustainable products.</li> </ul>
Stakeholders, key personnel and specialists may include:	<ul style="list-style-type: none"> <li>• individuals and groups both inside and outside the organisation who have direct or indirect interest in the organisation's conduct, actions, products and services, including:                             <ul style="list-style-type: none"> <li>• customers</li> <li>• employees at all levels of the organisation</li> <li>• government</li> <li>• investors</li> <li>• local community</li> <li>• other organisations</li> <li>• suppliers</li> </ul> </li> <li>• key personnel within the organisation, and specialists outside the organisation who may have particular technical expertise.</li> </ul>

<b>RANGE STATEMENT</b>	
Techniques and tools may include:	<ul style="list-style-type: none"> <li>• examination of invoices from suppliers</li> <li>• examination of relevant information and data</li> <li>• measurements made under different conditions</li> <li>• others as appropriate to the specific industry context.</li> </ul>
Environmental and resource efficiency improvement plans may include:	<ul style="list-style-type: none"> <li>• addressing environmental and resource sustainability initiatives such as: environmental management systems, action plans, green office programs, surveys and audits</li> <li>• applying the waste management hierarchy in the workplace</li> <li>• determining organisation's most appropriate waste treatment including waste to landfill, recycling, re use, recoverable resources and wastewater treatment</li> <li>• initiating and/or maintaining appropriate organisational procedures for operational energy consumption, including stationary energy and non stationary (transport)</li> <li>• preventing and minimising risks, and maximising opportunities such as:                             <ul style="list-style-type: none"> <li>• improving resource/energy efficiency</li> <li>• reducing emissions of greenhouse gases</li> <li>• reducing use of non renewable resources</li> </ul> </li> <li>• referencing standards, guidelines and approaches such as:                             <ul style="list-style-type: none"> <li>• ecological foot printing</li> <li>• Energy Efficiency Opportunities Bill 2005</li> <li>• Global Reporting Initiative</li> <li>• green office program - a cultural change program</li> <li>• green purchasing</li> <li>• Greenhouse Challenge Plus (Australian government initiative)</li> <li>• ISO 14001:1996 Environmental management systems life cycle analyses</li> <li>• product stewardship</li> <li>• supply chain management</li> <li>• sustainability covenants/compacts</li> <li>• triple bottom line reporting.</li> </ul> </li> </ul>
Suggestions may include ideas	<ul style="list-style-type: none"> <li>• prevent and minimise risks and maximise</li> </ul>

<b>RANGE STATEMENT</b>	
that help to:	<p>opportunities such as:</p> <ul style="list-style-type: none"> <li>• usage of solar or renewable energies where appropriate</li> <li>• reducing emissions of greenhouse gases</li> <li>• reducing use of non renewable resources</li> <li>• making more efficient use of resources, energy and water</li> <li>• maximising opportunities to re use, recycle and reclaim materials</li> <li>• identifying strategies to offset or mitigate environmental impacts:</li> <li>• purchasing carbon credits</li> <li>• energy conservation</li> <li>• reducing chemical use</li> <li>• reducing material consumption</li> <li>• expressing purchasing power through the selection of suppliers with improved environmental performance e.g. purchasing renewable energy</li> <li>• eliminating the use of hazardous and toxic materials.</li> </ul>

## AHCWRK401A Implement and monitor quality assurance procedures

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the implementation and monitoring of quality assurance procedures and defines the standard required to: establish quality specifications for product; assist in planning of quality assurance procedures; implement, monitor and record quality assurance procedures; provide supervision and training of staff in quality processes.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to production managers and workplace supervisors in agricultural and production horticulture enterprises who implementing and monitoring quality assurance procedures.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Establish quality specifications for product	1.1. Market specifications are sourced. 1.2. Legislated requirements are identified.
2. Identify hazards and critical control points in the production of quality product	2.1. Critical control points impacting on quality are identified. 2.2. Degree of risk for each hazard is determined.
3. Assist in planning of quality assurance procedures	3.1. Procedures for each identified control point are developed to ensure optimum quality. 3.2. Hazards and risks are minimised through application of appropriate controls. 3.3. Processes to monitor the effectiveness of quality assurance procedures are developed.
4. Implement quality assurance procedure	4.1. Responsibilities for carrying out procedures are allocated to staff and contractors. 4.2. Instructions are prepared in accordance with the enterprise the quality assurance program. 4.3. Staff and contractors are given induction training on the quality assurance policy. 4.4. Staff and contractors are given in-service training relevant to their allocated procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and critical control points in the production of quality product
- assist in planning of quality assurance procedures
- provide induction and in-service staff training
- implement quality assurance procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- market requirements for product
- definition of quality
- quality specifications for product
- enterprise and industry quality assurance systems
- Hazard Analysis and Critical Control Points (HACCP) techniques
- strategies for control of hazards to quality
- work place training strategies
- delegation and empowerment
- contingency management.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• establish quality specifications for product</li> <li>• assist in planning of quality assurance procedures</li> <li>• implement, monitor and record quality assurance procedures</li> <li>• provide supervision and training of staff in quality processes.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
System may include:	<ul style="list-style-type: none"> <li>• those relevant across agricultural sectors and products.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Process a request for information on issues and policies	<p>1.1. Request is documented using the appropriate recording system.</p> <p>1.2. Relevant notes are recorded from dialogue with the client and from correspondence.</p> <p>1.3. Approval to access information is sought and obtained and requests forwarded where appropriate.</p> <p>1.4. Client is actively listened to and questioned appropriately to clarify and elicit information provided.</p>
2. Identify sources and extract information	<p>2.1. Relevant sources and locations of information are identified, accessed and researched.</p> <p>2.2. Clear sequenced oral instructions are provided to colleagues required for assistance.</p> <p>2.3. Workplace policies and documentation relevant to the request are evaluated.</p> <p>2.4. Information relevant to the particular request is located and extracted and copied.</p> <p>2.5. Alternative methods to locate identified gaps in information.</p>
3. Evaluate information for meeting client request	<p>3.1. Information is evaluated for its validity and reliability and appropriateness to the client request.</p> <p>3.2. Client is engaged in effective dialogue to clarify indistinct or incorrect information.</p> <p>3.3. Additional information is obtained if available information is inadequate, unclear, conflicting or incorrect.</p>
4. Prepare and finalise	4.1. Report is developed, written, formatted and proofed

ELEMENT	PERFORMANCE CRITERIA
report	<p>according to enterprise policies and procedures.</p> <p>4.2. Report is checked for accuracy and intention.</p> <p>4.3. Review and sign off of report is arranged with designated person where required.</p> <p>4.4. Record of report/correspondence is made.</p> <p>4.5. Report/correspondence is forwarded to client.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- workplace policies and documentation on local, regional, state and national issues
- relevant workplace documentation on international treaties, agreements and charters
- types of information sources
- methods and means of accessing and extracting the required information
- methods of validating information
- types of reports and their uses.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate work roles	<p>1.1.Roles and responsibilities of staff are clearly defined and documented.</p> <p>1.2.Skills of staff are accurately identified and matched with available tasks and duties.</p> <p>1.3.Requirements of jobs are clearly identified and communicated to personnel.</p> <p>1.4.Information on activities is developed and provided to personnel.</p> <p>1.5.Occupational Health and Safety (OHS) policy and procedural requirements for supervisors are effectively implemented.</p>
2. Coordinate activities	<p>2.1.Work activities are prioritised to ensure completion of tasks in accordance with available timelines.</p> <p>2.2.Work plans are developed to establish targets and objectives of activities, and to define tasks and timelines.</p> <p>2.3.Training and learning opportunities are identified and incorporated into work activities.</p> <p>2.4.Supervisory and reporting responsibilities are clarified and maintained in line with organisational requirements.</p> <p>2.5.Enterprise environmental policy and procedures for supervisors are effectively implemented.</p>
3. Maintain effective working relations	<p>3.1.Problems are recognised and addressed through discussion with work group.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. Assistance is sought from work group members when difficulties arise in achieving allocated tasks</p> <p>3.3. Discussion and information sharing is routinely used to communicate requirements of work activities through a participative approach.</p> <p>3.4. Disagreements and conflicts are managed constructively using appropriate conflict management strategies.</p>
4. Provide feedback	<p>4.1. Feedback is clear, constructive and provided promptly to individuals to support achievement of outcomes.</p> <p>4.2. Difficult situations are identified and negotiated to achieve results in line with organisational requirements.</p> <p>4.3. Team and individual performances are monitored regularly to ensure personnel are able to achieve goals.</p> <p>4.4. Supervisory structures and lines of reporting are maintained in accordance with organisational requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- assess and evaluate staff capability
- identify and provide training requirements
- plan timesheets and timetables to meet deadlines
- demonstrate safe workplace and environmentally responsible practices
- solve problems (staffing, resources)
- evaluate performance, provide feedback and prepare reports and performance appraisals
- promote and maintain effective relationships between staff
- monitor productivity and maintain staff records as required

## REQUIRED SKILLS AND KNOWLEDGE

- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- enterprise personnel processes
- enterprise organisational structure and responsibilities
- techniques for building trust and relationships
- principles of team work and negotiation
- leadership for the work team
- performance appraisal systems and procedures
- principles of time management
- conflict management techniques
- enterprise training requirements and processes
- relevant State/Territory legislation, regulations and Codes of Practice with regard to workplace OHS, environmental protection and employment
- OHS hazard identification, risk assessment and development of risk controls.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine quality assurance objectives for the enterprise	1.1.Future market requirements for quality assured products are assessed. 1.2.Premiums for quality assurance products are determined. 1.3.Strategic benefits of a quality assurance program are assessed.
2. Plan the quality assurance program and develop implementation strategies	2.1.Product quality standards are defined. 2.2.Current status of products and operations is audited. 2.3.Industry quality assurance programs are evaluated and costed. 2.4.Required processes and practices are documented in the quality assurance program manual and an implementation plan is prepared.
3. Implement the quality assurance program	3.1.Instructions are documented defining task and process requirements. 3.2.Contractor and staff training is established and implemented. 3.3.Communication takes account of social, cultural and ethnic backgrounds. 3.4.Changes to processes and practices are introduced. 3.5.Processes to monitor and verify product quality are established. 3.6.Recording systems are introduced. 3.7.Operating instructions are validated under conditions

ELEMENT	PERFORMANCE CRITERIA
	<p>to verify their suitability.</p> <p>3.8.Problems and issues are analysed and resolved appropriately, promptly and decisively.</p>
4. Review the quality assurance program	<p>4.1.Reporting formats are established.</p> <p>4.2.Mechanisms for gaining feedback information are implemented.</p> <p>4.3.Preparation is made for quality assurance audits.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- determine quality assurance objectives for the enterprise
- plan the quality assurance program and develop implementation strategies
- implement the quality assurance program
- review the quality assurance program
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- market projections and customer requirements
- cost/benefit of quality assurance implementation
- system analysis, HAACCP or related processes
- enterprise culture and values
- leadership and administrative skills
- human resources induction practices
- human resources performance monitoring practices.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine the type and extent of data to be collected	<p>1.1.Data requirements are clearly defined and communicated to all staff involved in data collection.</p> <p>1.2.Relevant data sources are identified.</p> <p>1.3.Type and extent of data required is clearly defined.</p> <p>1.4.Occupational Health and Safety (OHS) hazards associated with data collecting are identified.</p> <p>1.5.Data collection methods and techniques are clearly defined relative to data requirements.</p>
2. Access and collate data	<p>2.1.Data collection sheets are formatted to assist collection.</p> <p>2.2.Data is researched and/or collected from field sources according to enterprise guidelines and with standard research approaches.</p> <p>2.3.Data is collated by appropriate electronic means.</p> <p>2.4.Appropriateness of data is monitored and recorded during collection.</p> <p>2.5.Information is researched using appropriate methods and technologies.</p> <p>2.6.Sources of information are regularly reviewed for</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>usefulness, validity, reliability and cost.</p> <p>2.7.Channels and sources of information are used effectively.</p> <p>2.8.Opportunities are taken to establish and maintain contacts with those who may provide useful information.</p> <p>2.9.Appropriate OHS requirements and work practices are followed.</p>
3. Evaluate data	<p>3.1.Data collected is relevant, valid and sufficient.</p> <p>3.2.Where data is unclear or difficult to interpret, clarification and assistance is sought.</p> <p>3.3.Where data is inadequate, additional data is obtained.</p> <p>3.4.Information is analysed for its validity and reliability.</p>
4. Manage and retrieve data	<p>4.1.Data is stored by appropriate electronic means.</p> <p>4.2.Data is presented using appropriate graphical aids and techniques.</p> <p>4.3.Data is assembled and provided to the manager/client as required and in accordance with standard research approaches.</p> <p>4.4.Data is retrieved as required.</p> <p>4.5.New methods of recording and storing data are suggested/introduced as needed.</p>
5. Analyse and interpret data	<p>5.1.Data is analysed using appropriate statistical and analytical techniques.</p> <p>5.2.Data is interpreted to determine its significance, validity and reliability.</p> <p>5.3.Findings based on the analysis and interpretation of the data is reported.</p> <p>5.4.Data is organised into a suitable report format to aid decision-making.</p> <p>5.5.Conclusions drawn are based on reasoned argument and appropriate evidence.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- determine the type and extent of data to be collected
- access and collate data
- evaluate data
- manage and retrieve data
- analyse the data
- interpret the data
- follow safe work practices
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- data collection techniques and procedures
- data recording and evaluation techniques
- data analysis and interpretive techniques
- data storage and retrieval methods
- data reporting methods.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and

The evidence required to demonstrate competency in this

<b>EVIDENCE GUIDE</b>	
<b>evidence required to demonstrate competency in this unit</b>	<p>unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify data requirements and establish sampling and data collection techniques</li> <li>• collect and collate data using standardised recording sheets and systems</li> <li>• review sampling and data collection techniques based on validity and reliability of the data</li> <li>• manage data to facilitate retrieval and analysis</li> <li>• analyse data using appropriate statistical and analytical techniques</li> <li>• draw conclusions based on reasoned argument and appropriate evidence</li> <li>• produce a report in required format with information and data presented to support decision making.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Data may include:	<ul style="list-style-type: none"> <li>• primary and secondary sources including: <ul style="list-style-type: none"> <li>• field work and trials</li> <li>• research materials</li> <li>• published books</li> <li>• academic reports</li> <li>• industry reports</li> <li>• colleagues</li> <li>• computer software</li> <li>• internet</li> <li>• newspapers</li> <li>• photographic data</li> </ul> </li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Research material	1.1. Topic of the report is identified and described. 1.2. Sources of information are determined. 1.3. Information appropriate to the task is collected and organised according to enterprise standards.
2. Evaluate information	2.1. Information collected is relevant and sufficient to provide a full report. 2.2. Where information is unclear or difficult to understand, clarification and assistance is sought. 2.3. Where available information is inadequate, additional information is obtained. 2.4. Information is assessed for its validity and reliability, and is organised into a suitable form to aid decision-making. 2.5. Conclusions drawn from relevant information are based on reasoned argument and appropriate evidence.
3. Produce a document	3.1. Language is applicable to the task and audience. 3.2. The document is organised logically, is structured and balanced according to purpose, audience and

ELEMENT	PERFORMANCE CRITERIA
	<p>context.</p> <p>3.3.The document is formatted and presented according to business and enterprise standards.</p> <p>3.4.Conclusions reached reflect the stated objectives of the report.</p> <p>3.5.Preparation is completed within the specified timeframe.</p> <p>3.6.Enterprise and Occupational Health and Safety (OHS) requirements and procedures are followed.</p>
4. Deliver an oral presentation	<p>4.1.Language is applicable to the task and audience.</p> <p>4.2.Presentation is organised logically, is structured and balanced according to purpose, audience and context.</p> <p>4.3.Concise and well presented support materials are used in oral presentations to reflect industry standards.</p> <p>4.4.Efficient time use allows clear presentation of the desired topic.</p> <p>4.5.Oral presentation is delivered within a specified time.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research material
- evaluate information
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**REQUIRED SKILLS AND KNOWLEDGE****Required knowledge**

- information and research sources
- report structure and presentation
- public presentation techniques and approaches.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify the purpose of the report and verify it with the client
- conduct research and compile information
- draw conclusions from research supported by reasoned argument and supporting information
- make recommendations if required and reference to information and conclusions
- produce a correctly formatted report document that uses appropriate language and terminology, is arranged in a logical order, and provides details on information sources and consultation.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Reports may include:

- a range of sources of information that reports may be based on including:
  - field work
  - research materials
  - published books
  - academic reports
  - industry reports
  - colleagues
  - computer software
  - internet
  - newspapers
  - journals
  - industry publications
  - industry specialists and experts.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Analyse the industry sector	<p>1.1. Knowledge of one's own and related industry sectors, products, equipment, supply chain, organisations, people, resource management processes and policies, work practices, legislation and regulations is developed and maintained.</p> <p>1.2. Opportunities for participation in relevant organisations are identified and undertaken.</p> <p>1.3. Likely sources of credible information are identified and accessed as required.</p> <p>1.4. Relevant historical events, sensitivities and positions of people involved are recalled and applied.</p> <p>1.5. State, territory, national and international issues are analysed for their relevance to the industry and impact on one's own enterprise.</p>
2. Assess new developments for impact on enterprises and industry sector	<p>2.1. Industry research and development information is sourced and evaluated for relevance to enterprises and to industry sector.</p> <p>2.2. Risks and opportunities of new developments in industry processes, technologies and quality/environmental requirements are evaluated.</p> <p>2.3. Emerging stakeholders and interest groups are identified and assessed for their potential benefit or impact on one's own enterprise and industry sector as a whole.</p> <p>2.4. Trends in production, marketing, resource management and research are analysed.</p> <p>2.5. Potential impacts of proposed government initiatives are identified and assessed for significance.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.6.Success and failure of relevant or related initiatives in other industries or enterprises are assessed for their relevance.</p> <p>2.7.Changing community and customer beliefs, attitudes and expectations are monitored.</p>
3. Report on new developments	<p>3.1.Evaluated research information is integrated in the enterprise/industry sector planning processes.</p> <p>3.2.Research information is shared with others and opportunities for cooperative approaches are explored and encouraged.</p> <p>3.3.Implications for use of research information are considered in a wider context with other producers, associates or colleagues.</p> <p>3.4.Document a report on new industry developments.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and analyse industry developments
- working with others to trial and implement R and D outcomes
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- appropriate avenues to disseminate industry sector information to a range of stakeholders
- correct names and terminology relevant to one's industry sector

**REQUIRED SKILLS AND KNOWLEDGE**

- credible sources of information
- key industry development and promotion programs relevant to one's industry sector
- roles and responsibilities of stakeholders and organisation's relevant to own industry sector
- supply chain for industry sector enterprises.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- critically evaluate information and research findings of relevance to enterprises and industry sector
- integrate research and development into enterprise planning
- evaluate the potential of research proposals with other producers, associates or colleagues
- document a report on new industry developments.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify scope and extent of work	<p>1.1.Trial/research hypothesis and parameters are identified according to researchers' requirements.</p> <p>1.2.Trial/research is planned to meet research objectives.</p> <p>1.3.Data relevant to managing trial/research materials is assessed according to research parameters.</p> <p>1.4.Data relevant to managing trial/research materials is assessed according to enterprise policy.</p> <p>1.5.Occupational Health and Safety (OHS) hazards associated with managing trial/research materials are identified, risks assessed, and controls developed according to enterprise guidelines, costed and documented in the survey design.</p> <p>1.6.Tools, equipment and machinery required for managing trial/research materials are identified, costed, and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>1.7.Research design is determined according to the trial/research plan.</p>
2. Oversee management of trial/research materials	<p>2.1.Trial/research is prepared, maintained and monitored according to project parameters.</p> <p>2.2.Field work is conducted to verify and collect data according to the trial/research design and research parameters.</p> <p>2.3.Work activities are monitored for accuracy, validity and compliance to the parameters of the trial/research design.</p> <p>2.4.Staged data collection is undertaken according to trial/research design, scheduling and access</p>

ELEMENT	PERFORMANCE CRITERIA
	requirements. 2.5. Monitoring and data is recorded faithfully, promptly and accurately according to the specifications of the trial/research design.
3. Prepare reports on work complete	3.1. Collected data is recorded according to trial/research requirements and guidelines. 3.2. Data is statistically analysed to determine significance of research results. 3.3. Hypothesis is accepted or rejected based on data collected. 3.4. Reports are produced which conform to the structure and content required by the researcher.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- define the purpose of the trial
- identify scope and extent of work
- collate data
- oversee management of trial/research materials
- comply with legislative and enterprise requirements
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- scheduling and programming work within timelines
- ecological principles and terminology

**REQUIRED SKILLS AND KNOWLEDGE**

- data collection and reporting
- research procedures and best practice techniques
- enterprise work team management guidelines
- data analysis techniques
- research planning and design
- research methodologies.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- define the purpose of the trial and the scope and extent of the work
- oversee management of trial/research materials
- collate data from trials or research
- draw conclusions and apply findings of trials and/or research.

**Context of and specific resources for assessment**

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Investigate and analyse business structures and working practices	1.1. Discuss the roles and responsibilities of the job role. 1.2. Define the roles of various personnel working in a business practice or organisation. 1.3. Formulate a range of management approaches and methodologies suitable for business development.
2. Develop legal, professional and ethical responsibilities working in industry	2.1. Develop methods of sourcing policies, regulations and standards relevant to a project. 2.2. Observe the legal and ethical responsibilities of the job role. 2.3. Identify and describe legislation governing protection of intellectual property in Australia and internationally. 2.4. Identify issues that need to be addressed when entering into a client / practitioner agreement. 2.5. Undertake a range of contracts / agreements used in the industry and demonstrate their application. 2.6. Implement the ethical and legal responsibilities in expert witness roles, provision of legal evidence and provision of expert advice.
3. Evaluate & reflect upon own practice	3.1. Demonstrate and promote sustainable practices in own work and the work of others. 3.2. Analyse own work to identify influences, style, market relevance and quality in conjunction with supervisors and/or peers. 3.3. Feedback is actively sought and accepted non defensively.

ELEMENT	PERFORMANCE CRITERIA
4. Develop a professional practice plan to meet professional goals	4.1. Develop personal and professional goals and objectives. 4.2. Identify strengths and weaknesses in relation to goals and objectives. 4.3. Evaluate own capacity to meet goals and objectives. 4.4. Develop a professional development plan to enhance professional capabilities. 4.5. Document a professional practice plan designed to support the achievement of goals.
5. Operate within an agreed ethical code of practice/ethics	5.1. Own practice is assessed against identified objectives or code of ethics using a range of valid evidence. 5.2. The effect of values, beliefs and behaviour in work with clients is recognised. 5.3. Build client relationships in accordance with identified objectives or code of ethics. 5.4. Realistic goals and targets for self development are established.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assess the effectiveness of own skills development
- develop job and time based costing and pricing
- developing marketing strategies
- monitoring research trends related to roles and responsibilities
- organisation, planning and personal management skills
- professional practice skills
- self evaluation
- provide legal evidence and expert advice
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for

## REQUIRED SKILLS AND KNOWLEDGE

- clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- typical business management structures
- issues of professional practice for the job role
- team roles, responsibilities and accountabilities
- legislation, ethical and financial considerations
- legislation covering protection of copyright and intellectual property
- local and international professional organisations relevant to the industry
- workplace occupational health and safety policies and procedures
- understanding of relevant theories, principles, practices and their application and other aspects of knowledge, desirable or necessary in order to practise effectively within the industry
- expert witness roles and processes
- personal goal setting
- measuring performance
- time management
- marketing principles
- professional practice considerations
- communication principles
- strategies for promoting awareness of a product.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine applicable legal framework	<p>1.1. Identify and access current legislation, regulations, organisational procedures, standards and/or codes of practice affecting the workplace, industry, occupation or client.</p> <p>1.2. Determine legal accountability obligations in relation to workplace, industry, occupation or client.</p> <p>1.3. Identify consequences of non-compliance with legislation, regulations, organisational procedures, standards and/or codes of practice.</p>
2. Research, interpret and apply appropriate legislation	<p>2.1. Monitor sources of information for changes to the legal framework.</p> <p>2.2. Regularly update and communicate information and changes to legal framework components which impact on work activities.</p>
3. Promote compliance with relevant legislation	<p>3.1. Access current information about the range of legislation &amp; other legally binding policies &amp; protocols relating to own work.</p> <p>3.2. Clarify compliance requirements to confirm understanding and ensure consistency of interpretation and application.</p> <p>3.3. Obtain advice to assist in applying relevant legislation to own work and identifying compliance requirements.</p> <p>3.4. Identify areas of uncertainty in own work related to compliance requirements and take action to clarify</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>issues.</p> <p>3.5. Identify possible implications of non-compliance and use these to guide own work practices.</p>
<p>4. Assess situations which may potentially present legal problems/issues</p>	<p>4.1. Identify and document details of suspected or actual incidences of illegal conduct by self or others in the workplace.</p> <p>4.2. Contribute to ongoing monitoring and compliance with legal framework.</p> <p>4.3. Ensure that work is undertaken in a legally compliant manner.</p> <p>4.4. Recognise limits of own expertise, legal accountability obligations and access appropriate sources of expertise as required.</p> <p>4.5. Assess conduct of self and others in the workplace against specific components of the legal framework applicable to the workplace.</p> <p>4.6. Take appropriate actions to resolve/report illegal conduct, as required by applicable legislation, regulations, organisational procedures, standards and/or codes of practice.</p>
<p>5. Maintain knowledge of legal framework &amp; relevant legislation</p>	<p>5.1. Monitor sources of information for changes to the legal framework.</p> <p>5.2. Regularly update and communicate information and changes to legal framework components which impact on work activities.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify compliance requirements
- address compliance issues
- develop and implement strategies to manage compliance with appropriate legislation
- provide advice & documentation regarding applicable legislation, regulations, organisational procedures and/or codes of practice

## REQUIRED SKILLS AND KNOWLEDGE

- maintain knowledge of changes to compliance legislation and requirements
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- understanding and overview of the provisions contained in key relevant legislation, & other legally binding legal policies & protocols from all levels of government that affect the relevant industry.
- relevant Australian Standards
- organisational policies and procedures relating to legislation in organisation's functional area
- penalties for non-compliance with legislative requirements
- auditing requirements
- Occupational Health and Safety (OHS) requirements applicable to own work and functional area.
- scope of legal practitioner/support role and own responsibilities and obligations to provide legal advice, complete or sign off on legal work and/or appear in court as described by relevant jurisdiction/s
- encourage and support own compliance and that of others in the workplace
- relevant conventions, treaties, agreements, guidelines, declarations, recommendations, laws and rules.
- identification and access legislation, regulations, organisational procedures, standards and/or codes of practice
- application of legal information to the workplace
- monitoring compliance and identification of illegal conduct
- referral to appropriate sources of information and specialist personnel when limits of own expertise are reached in determining applicable legislation
- maintenance of ongoing knowledge of legal framework by monitoring changes from appropriate information sources
- Accepted codes of practice relevant to the workplace including those relating to:
  - Privacy and confidentiality
  - Use of company property
  - Duty of care
  - Ethical behaviour

**REQUIRED SKILLS AND KNOWLEDGE**

- Non-discriminatory practice
- Conflict of interest
- Compliance with reasonable direction
- Relevant general legal terminology.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- determine legislation&legal framework applicable to task
- research, interpret and apply appropriate legislation; promote compliance with relevant legislation
- assess situations which may potentially present legal problems/issues
- maintain knowledge of legal framework&relevant legislation.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Resources required are the relevant legislations regulations and policies covering Federal Acts, State Acts and local government regulations. State based legislation covers but is not limited to relevant Acts, regulations and policies in state and local jurisdictions, for example, such as in NSW:

- Heritage Act(NSW)

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• Environmental Planning and Assessment Act (NSW) 1979</li> <li>• Native Vegetation Act (NSW) 2003</li> <li>• Threatened Species Conservation Act (NSW) 1995</li> <li>• Nature Conservation Trust Act (NSW) 2001</li> <li>• Noxious Weeds Act (NSW) 1993</li> <li>• Dividing Fences Act</li> <li>• Civil Liability Act 2002 (NSW)</li> <li>• Rural Fires Act</li> <li>• Protection of the Environment Operations Act</li> <li>• Civil procedures Act 2005 (NSW)</li> <li>• Inclosed Lands Act 1901</li> <li>• Tree Preservation Orders</li> <li>• Development Control Plan(s)</li> <li>• Local Environment Plan(s)</li> <li>• Landscape Policy</li> <li>• State Environmental Planning Policies (SEPP)</li> <li>• Regional Environment Plans (REP)</li> <li>• Contract law.</li> </ul>

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Legislation may include:	<ul style="list-style-type: none"> <li>• Federal, State and Territory laws</li> <li>• local government and statutory authority regulations relevant to the area</li> <li>• worksite or job role.</li> </ul>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Develop and maintain specialist knowledge	<p>1.1.A comprehensive knowledge and understanding of specialist information is actively and regularly researched from industry and other sources.</p> <p>1.2.Characteristics of industry practices, products and services are identified and understood using available documentation.</p> <p>1.3.Information is accurately documented and maintained in a format consistent with enterprise requirements.</p> <p>1.4.Acquired knowledge is applied to improve quality within personal work areas.</p>
2. Consult with clients	<p>2.1.Consultation with clients is conducted in a professional and courteous manner according to enterprise requirements.</p> <p>2.2.Appropriate interpersonal skills are used to facilitate accurate and relevant exchange of information.</p> <p>2.3.Work practices reflect sensitivity to client's requirements, specific needs and cultural, family and individual differences.</p>
3. Provide a response to client enquiries and need	<p>3.1.Information relevant to client's needs is prepared in line with enterprise requirements.</p> <p>3.2.Information emphasises issues relevant to client needs.</p> <p>3.3.Information is based on sound research practices and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>preparation is achievable within enterprise resources.</p> <p>3.4.Evidence in support of information is researched, shown to be verifiable and documented in a suitable format.</p> <p>3.5.Information is structured to identify clear benefits to clients and the organisation.</p> <p>3.6.Information is documented and presented in a professional format and style to the client for consideration and discussion.</p> <p>3.7.Client feedback is evaluated by survey to improve future provision of technical information and professional services.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- develop and maintain industry wide specialist knowledge
- provide a professional service to client enquiries and needs
- demonstrate discretion and judgement in stakeholder interaction
- maintain a current and documented interpretation of the legislative, environmental and financial implications for industry
- implement professional practice in stakeholder consultation and report documentation
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- products, treatments and/or services

**REQUIRED SKILLS AND KNOWLEDGE**

- environmental sustainability and land use issues relevant to the industry
- enterprise policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- strategies for planning and monitoring activities
- consultation methods, techniques and protocols
- current enterprise, government and local council policy, legislation and regulations
- mechanisms to obtain and analyse customer feedback.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- maintain technical currency for specialist knowledge
- maintain a current and documented interpretation of the legislative, environmental and financial implications for industry
- cultivate and maintain industry wide sources of information and advice
- determine client needs by professional consultation
- provide information with comprehensive advice and recommendations detailing implications for the client
- document financial and implementation issues for the individual client
- evaluate the relevance, applicability and timeliness of advice by client survey and review of financial benefits.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine the scope of the audit	1.1.Objectives and scope of the audit is prepared. 1.2.Expectations of client or organisation are described. 1.3.Pattern of random or non random audit events is determined. 1.4.Individual and personal actions are identified for audit requirements. 1.5.Groups and processes are identified for audit for audit requirements. 1.6.List of audit items is prepared.
2. Specify the audit requirements	2.1.Precise parameters of acceptable conditions / results are identified and documented. 2.2.Relevant sections of Codes of Practice and specific clauses in Australian Standards are described. 2.3.Written guidelines are communicated to the audited group and individual staff members. 2.4.Detailed information is provided to audit groups in a durable format for working conditions.
3. Define the audit process	3.1.Responsibilities for audit implementation and evaluation are determined and assigned. 3.2.The timing and frequency of the audit events of audit events are determined. 3.3.Schedules and logistical arrangements are confirmed and contingency arrangements planned. 3.4.Expectations are confirmed with the audited group

ELEMENT	PERFORMANCE CRITERIA
	<p>and individual staff members.</p> <p>3.5. Audit process is documented and communicated.</p>
4. Manage the audit implementation	<p>4.1. Audit meeting is organised in advance at a mutually agreed time.</p> <p>4.2. Activities of audited group and individual staff members are examined.</p> <p>4.3. Items of compliance and non compliance are identified and recorded.</p> <p>4.4. Appropriate persons are interviewed for detailed information, clarification and feedback.</p> <p>4.5. Relevant information and sample documentation is gathered and recorded.</p> <p>4.6. Contingency actions are taken as required and recorded.</p>
5. Evaluate and document the audit findings into a report	<p>5.1. Results and findings are examined against audit objectives and presented to the audited group or individual.</p> <p>5.2. Agreement is sought and reached on corrective action reports.</p> <p>5.3. Context and consequences of audit are explained and discussed during follow-up meetings.</p> <p>5.4. Feedback on results is provided to client or organisation.</p> <p>5.5. Document the final audit report and present to client or organisation.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify client or organisation expectations
- determine the scope of items for audit
- specify parameters of audit requirements
- define the audit process
- identify compliance and non compliance items

## REQUIRED SKILLS AND KNOWLEDGE

- implement an audit
- manage the implementation of audits
- plan for and act on contingencies
- evaluate audit findings
- organise scheduling and meetings
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- audit methodology and techniques
- product and/or service knowledge
- quality principles and techniques
- interview techniques
- workplace documentation and policies
- logistics of operations of organisation
- legal issues and terminology relating to quality auditing
- award and enterprise agreements and relevant industrial instruments
- relevant legislation and regulations from all levels of government
- relevant codes of practice, regulations and standards, for example ISO 9000:2000: Quality Management Systems - Fundamentals and Vocabulary, ISO 19011:2003: Guidelines for Quality and/or Environmental Management Systems Auditing.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Develop workplace sustainability policy	1.1. Define scope of sustainability policy. 1.2. Gather information from a range of sources to plan and develop policy. 1.3. Identify and consult stakeholders as a key component of the policy development process. 1.4. Include appropriate strategies in policy at all stages of work for minimising resource use, reducing toxic material and hazardous chemical use, and employing life cycle management approaches. 1.5. Make recommendations for policy options based on likely effectiveness, timeframes and cost. 1.6. Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity. 1.7. Agree to appropriate methods of implementation.
2. Communicate workplace sustainability policy	2.1. Promote workplace sustainability policy, including its expected outcome to key stakeholders. 2.2. Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned.
3. Implement workplace sustainability policy	3.1. Develop and communicate procedures to help implement workplace sustainability policy. 3.2. Implement strategies for continuous improvement in resource efficiency. 3.3. Establish and assign responsibility to use recording systems for tracking continuous improvements in sustainability approaches.

ELEMENT	PERFORMANCE CRITERIA
4. Review workplace sustainability policy implementation	4.1.Document outcomes and provide feedback to key personnel and stakeholders. 4.2.Investigate successes or otherwise of policy. 4.3.Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance. 4.4.Modify policy and or procedures as required to ensure improvements are made.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to adjust communication to suit different audiences; to respond effectively to diversity; to work as a member of a team to consult on and validate policy
- literacy skills to read and evaluate complex and formal documents such as policy and legislation
- problem skills to effectively manage different points of view and dissenting stakeholders
- research, analytical and writing skills to research, analyse and present information; to prepare written reports requiring precision of expression and language and structures suited to the intended audience
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- best practice approaches relevant to own work area
- environmental or sustainability legislation, regulations and codes of practice

**REQUIRED SKILLS AND KNOWLEDGE**

applicable to industry and organisation

- equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy being developed
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context
- quality assurance systems relevant to own organisation
- relevant industry competency
- relevant organisational policies, procedures and protocols
- relevant systems and procedures to aid in the achievement of workplace sustainability.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- candidate's involvement as a key person in planning, developing and implementing organisational policy and that the developed policy complies with legislative requirements
- implementation strategy, as part of the policy, that has been devised, implemented and reviewed showing a measurable improvement utilising the chosen benchmark indicators
- communicating with stakeholders to discuss possible approaches to policy development and implementation, and contributing to the resolution of disputes among stakeholders
- developing and monitoring policies for analysing

<b>EVIDENCE GUIDE</b>	
	<p>data on enterprise resource consumption</p> <ul style="list-style-type: none"> <li>• using software systems for recording and filing documentation for measurement of current usage and using word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information</li> <li>• reviewing and improving policies by identifying improvements and benchmarking against industry best practice and attempting new approaches continuously over time.</li> </ul>
<b>Context of and specific resources for assessment</b>	The context of the unit applies to all sectors of the Agrifood industry. It may be applied to all sections of an organisation, including the office, the factory floor, or work area. With such a broad application, the unit will need to be contextualised as it is applied across an organisation and across different industry sectors.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Scope of workplace sustainability policy may include:	<ul style="list-style-type: none"> <li>• addressing sustainability initiatives through reference to standards, guidelines and approaches such as:</li> <li>• ecological footprinting</li> <li>• Energy Efficiency Opportunities Bill 20051</li> <li>• Global Reporting Initiative</li> <li>• green office program</li> <li>• green purchasing</li> <li>• Greenhouse Challenge Plus (Australian government initiative)</li> <li>• ISO 14001:1996 Environmental management systems life cycle analyses</li> <li>• life cycle analyses</li> <li>• product stewardship</li> <li>• supply chain management</li> <li>• sustainability covenants/compacts</li> <li>• triple bottom line reporting</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• integrated approach to sustainability which includes environmental, economic and social aspects, or a specific approach that focuses on each aspect individually</li> <li>• investigating particular business and market context of the industry/organisation</li> <li>• meeting relevant laws, by laws and regulations or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):                             <ul style="list-style-type: none"> <li>• international</li> <li>• commonwealth</li> <li>• state/territory</li> <li>• industry</li> <li>• organisation</li> </ul> </li> <li>• parts of the organisation to which it is to apply, including whether it is for the whole organisation, one site, one work area or a combination of these.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review project milestones	<p>1.1. Project milestones for approved projects within the program are logged for monitoring.</p> <p>1.2. Negotiated and approved changes to milestones are used to adjust the monitoring records.</p>
2. Check progress against milestones	<p>2.1. Contact is maintained with groups and coordinators to monitor project progress against agreed timelines.</p> <p>2.2. Records are kept of progress for reporting purposes.</p> <p>2.3. Variations from agreed progress are identified for reporting and response purpose.</p> <p>2.4. Requests for change in project milestones and timelines are submitted for approval according to program and agency requirements.</p>
3. Summarise progress	<p>3.1. Regular progress reports are prepared according to program and agency requirements.</p> <p>3.2. Progress reports are discussed with groups, coordinators and others according to program and agency procedures.</p> <p>3.3. Project reports are consolidated into program reports as required according to program and agency requirements.</p>
4. Assist groups maintain project timeline	<p>4.1. Group activities and resources are reviewed where required achievement may not or has not been met.</p> <p>4.2. Strategies to place the project back onto required plan are developed with coordinator and community group leaders.</p> <p>4.3. Proposed changes in project are documented and submitted for approval by group initially, and then to</p>

ELEMENT	PERFORMANCE CRITERIA
	program and agency requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- review project milestones.
- check progress against milestones.
- summarise progress.
- assist groups maintain project timelines
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- group and regional cultures including diverse groups of people.
- program and agency reporting requirements.
- reporting formats.
- project management.
- financial reporting.
- project management computer applications.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Guide the organisation in the achievement of its aims	<p>1.1.The strategic direction of the organisation is examined and confirmed.</p> <p>1.2.A leadership role is undertaken in the strategic planning, goal setting and action planning of the organisation.</p> <p>1.3.A clear understanding of organisational purpose is promoted with stakeholders.</p> <p>1.4.Clear roles and responsibilities for those in the organisation are defined and documented.</p>
2. Design and implement communication	<p>2.1.The organisations policies and directions are communicated through documents and presentations.</p> <p>2.2.Reporting mechanisms are clearly defined and reports are produced in line with organisational policy and guidelines.</p> <p>2.3.Protocols for communication are defined.</p>
3. Establish and maintain effective relationships	<p>3.1.Code of behaviour covering disagreements and negotiation is established in consultation with others in organisation.</p> <p>3.2.Different strategies are employed to deal with a variety of personality types.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. Conflict is managed to seek mutually beneficial solutions. 3.4. Consensus is achieved in decision-making within the organisation where appropriate. 3.5. Stakeholder relationships are maintained and promoted. 3.6. Effective meeting procedures are promoted and applied within the organisation.
4. Establish and manage professional and business networks	4.1. Decision-making in other relevant forums is influenced to align with organisations best interests. 4.2. Views for consideration and representation are gathered and acknowledged. 4.3. Win-win outcomes are achieved through lobbying and negotiations. 4.4. Contemporary knowledge of issues and political factors is maintained.
5. Build effective teams in the organisation	5.1. Ethical behaviour and appropriate inter-personal skills are demonstrated and maintained in all dealings. 5.2. Leadership style is adapted to suit a range of differing contexts. 5.3. Opinion leaders are canvassed and institutional support is gained for the organisation. 5.4. New members for the organisation are recruited. 5.5. Relevant information is provided to new and potential members.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- guide the organisation in the achievement of its aims
- design and implement communication
- establish and maintain effective relationships
- establish and manage professional and business networks

## REQUIRED SKILLS AND KNOWLEDGE

- team building
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- leadership styles, roles and responsibilities
- strategic planning
- development and implementation of organisational policy and procedures
- ethics and codes of behaviour
- conflict management
- meeting procedures and protocols
- negotiation and consensus in decision-making.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- guide the organisation in the achievement of its aims
- design and implement communication
- establish and maintain effective relationships and professional and business networks

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• build effective teams in the organisation</li> <li>• demonstrate active and effective participation and leadership in community or industry organisations.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
People may include:	<ul style="list-style-type: none"> <li>• those in external funding bodies</li> <li>• members of the organisation</li> <li>• employees of the organisation</li> <li>• patrons</li> <li>• clients or purchasers/recipients of services.</li> </ul>

## AHCWRK603A Design and conduct a field-based research trial

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of designing and conducting field-based research trials and defines the standard to: establish sound research parameters that enables achievable results; conduct research consistent with recognised scientific practice; analysis and reporting reflects the scope and consequences of the project.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to designing and conducting field-based research trials.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Design the trial	<p>1.1. Problems and/or opportunities that support undertaking a trial are identified and the trial subject and projected outcomes are defined according to enterprise guidelines, market research, client requirements, cost analysis and cost benefits to the enterprise.</p> <p>1.2. Research into available evidence is undertaken to establish the performance criteria of the subject, product or treatment to be trialled and the trial design.</p> <p>1.3. Trial sites are located according to trial design requirements and enterprise capabilities, and site factors are identified and incorporated into the trial design.</p> <p>1.4. Approvals and/or permits required to conduct the trial are identified and obtained.</p> <p>1.5. Data collection and recording specifications are established according to the trial design, and proper conventions and controls are followed to satisfy statistical audit requirements and eliminate variables according to sound clinical practice.</p>
2. Prepare to conduct the trial	<p>2.1. Occupational Health and Safety (OHS) hazards associated with the implementation of the trial are identified, risks assessed and controls developed according to enterprise guidelines, costed and documented in the trial design.</p> <p>2.2. Environmental implications associated with implementation of the trial are identified and documented in the trial design.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3. Materials, tools, equipment and machinery required for the trial are identified, costed, and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>2.4. Trial sites are established and prepared for implementation of the trial according to the specifications of the trial design.</p> <p>2.5. Detailed trial site plans, trial specifications and trial procedures are documented clearly and comprehensively in the trial design.</p>
3. Conduct the trial	<p>3.1. Staged data collection is undertaken throughout the course of the trial according to the specifications of the trial design.</p> <p>3.2. Trial implementation is monitored for accuracy, compliance to the trial design and out-of-specification procedures or events.</p> <p>3.3. All monitoring and trial data is recorded faithfully, promptly and accurately according to the specifications of the trial design.</p>
4. Assess practical application of trial outcome	<p>4.1. Statistical auditing is undertaken for the trial outcomes, and proper conventions and controls are followed to eliminate variables according to sound clinical practice.</p> <p>4.2. Conclusions are drawn from relevant information and are based on appropriate evidence and reasoned arguments.</p> <p>4.3. Trial outcomes are assessed for practical application, based on conclusions drawn from the trial and according to enterprise guidelines and industry best practice.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and evaluate information
- calculate the cost and spatial and logistical requirements of components of the trial

**REQUIRED SKILLS AND KNOWLEDGE**

- enter, analyse and organise data in a mathematically sound and accurately graphed, charted or tabled representation, consistent with the trial design
- comply with legislative requirements
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- growth habits, physiological properties and taxonomic specification of animals/plants involved in the trial
- physical and biochemical properties of products involved in the trial
- properties and current, best practice application of treatments involved in the trial
- scientific and mathematical trialling, data collection, processing and analytical techniques and procedures
- auditing and reporting procedures
- the enterprise business and marketing plans
- enterprise work team management guidelines
- bio-ethics (where animals are involved in the trial).

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• establish sound research parameters that enables achievable results</li> <li>• conduct research consistent with recognised scientific practice</li> <li>• analysis and reporting reflects the scope and consequences of the project.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trial subjects may include:	<ul style="list-style-type: none"> <li>• individual animal or plant species or cultivars</li> <li>• specified products, and treatments or applications whose performance or responses are measured in relation to defined performance criteria.</li> </ul> <p>Note: The involvement of animals in a research trial may be covered by duty of care provisions in Animal Welfare Acts and codes of practices dealing with animal ethics.</p>

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan or review administration systems	<p>1.1. Identify <i>requirements</i> of, or modifications to, <i>administration system</i> through consultation with <i>system users</i> and other stakeholders in accordance with organisational and budgetary requirements</p> <p>1.2. Obtain quotations from <i>suppliers/developers</i> of system in accordance with organisational policy and procedures</p> <p>1.3. Make selection of supplier or developer in accordance with organisational policy and procedures</p>
2. Implement new or modified administration system	<p>2.1. Identify and develop <i>implementation strategies</i> in consultation with staff</p> <p>2.2. Encourage staff to participate in all stages of the implementation process</p> <p>2.3. Implement system in accordance with organisational requirements</p> <p>2.4. Define and <i>communicate</i> procedures for using the system to staff</p> <p>2.5. Provide <i>training and support for staff</i> on the use of the new or modified system</p> <p>2.6. Deal with <i>contingencies</i> to ensure minimal impact on users</p>
3. Monitor	3.1. <i>Monitor</i> system for usage, <i>security</i> and output in

ELEMENT	PERFORMANCE CRITERIA
administration system	<p>accordance with organisational requirements</p> <p>3.2. Modify system to meet <i>changing needs</i> in accordance with organisational requirements</p> <p>3.3. Clearly identify <i>further modifications</i> and notify users</p> <p>3.4. <i>Monitor staff training needs</i> and train new staff on administration system</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to recommend alternative ways of completing tasks, to discuss changes in routines and procedures, and to monitor and define objectives
- literacy skills to write detailed procedural text, including alternative courses of action
- planning and organising skills to implement system smoothly with a minimum of disruption, to anticipate modifications, to plan system overhauls and to allow sufficient time for training
- problem-solving skills to choose appropriate solutions from a range of possible solutions, to use processes flexibly and interchangeably, and to anticipate problems and modify systems accordingly
- research skills to assemble evidence and to evaluate information for accuracy and relevance.

#### Required knowledge

- key provisions of relevant legislation from all forms of government, standards and codes that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - copyright
  - occupational health and safety
- organisational policies and procedures relating to the tasks required.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>documenting requirements or modifications to administration system</li> <li>developing appropriate activities to support system implementation</li> <li>working with staff to identify system improvements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to organisational policy and procedure manuals, reference materials and appropriate equipment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>review of authenticated documents from the workplace or training environment</li> <li>demonstration of techniques.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>other general administration units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

<b>RANGE STATEMENT</b>	
situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
System <i>requirements</i> may include:	<ul style="list-style-type: none"> <li>• components of the system</li> <li>• number and type of users</li> <li>• organisation/staff requirements</li> <li>• purpose and nature of system</li> <li>• purpose and nature of organisation</li> <li>• size of system</li> <li>• skills of existing staff</li> <li>• staff training needs</li> <li>• type of system</li> <li>• work practices</li> </ul>
<i>Administration system</i> may include:	<ul style="list-style-type: none"> <li>• electronic system</li> <li>• paper-based system</li> </ul>
<i>System users</i> may include:	<ul style="list-style-type: none"> <li>• casual personnel</li> <li>• external clients</li> <li>• organisation's personnel</li> </ul>
<i>Suppliers/developers</i> may include:	<ul style="list-style-type: none"> <li>• administration system consultants</li> <li>• computer/software suppliers</li> <li>• efficiency consultants</li> <li>• equipment suppliers</li> <li>• information technology technicians</li> <li>• information technology trainers</li> <li>• internal staff/clients</li> <li>• office equipment suppliers</li> </ul>
<i>Implementation strategies</i> may include:	<ul style="list-style-type: none"> <li>• boosting staff confidence</li> <li>• change management strategies</li> <li>• changing team/organisational culture</li> <li>• ensuring system functions correctly</li> <li>• external consultants</li> <li>• informing relevant persons</li> <li>• modifying system</li> <li>• providing staff training/information sessions</li> <li>• re-defining staff roles</li> <li>• re-distributing office tasks</li> <li>• team goal setting</li> <li>• temporary reduction of workload</li> <li>• testing</li> <li>• trialling</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Communicating</i> procedures may include:	<ul style="list-style-type: none"> <li>• email messages</li> <li>• facsimile messages</li> <li>• internal newsletter</li> <li>• meetings</li> <li>• office memorandum</li> <li>• photocopied instructions</li> <li>• professional development time</li> <li>• training days</li> </ul>
<i>Training and support for staff</i> may include:	<ul style="list-style-type: none"> <li>• coach, mentor and/or buddy systems</li> <li>• online tutorials</li> <li>• on-the-job trainers</li> <li>• professional development</li> <li>• skills assessment</li> <li>• training handbooks</li> <li>• videos</li> </ul>
<i>Contingencies</i> may include:	<ul style="list-style-type: none"> <li>• loss of staff confidence</li> <li>• need for additional training</li> <li>• need to modify system</li> <li>• temporary reduction of work output</li> </ul>
<i>Monitoring</i> of system may include:	<ul style="list-style-type: none"> <li>• extra administrative support and back-up</li> <li>• feedback from internal/external client/s</li> <li>• observation by trained technician/s</li> <li>• utilising monitoring tools and processes</li> </ul>
<i>Security</i> may include:	<ul style="list-style-type: none"> <li>• confidentiality agreements</li> <li>• passwords</li> <li>• safeguards against computer viruses</li> </ul>
<i>Changing needs</i> may include:	<ul style="list-style-type: none"> <li>• change in the nature and purpose of the system/organisation</li> <li>• change in user requirements</li> <li>• growth or decline in system size</li> <li>• technological advances in administration systems</li> </ul>
<i>Further modifications</i> may relate to:	<ul style="list-style-type: none"> <li>• additional equipment, training</li> <li>• negotiation of timeframes for system implementation</li> <li>• redefinition of administrative roles and duties</li> <li>• specialised software</li> </ul>

## BSBCMM401A Make a presentation

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit covers the performance outcomes, skills and knowledge required to prepare, deliver and review a presentation to a target audience.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training, promotions, etc. They contribute well developed communication skills in presenting a range of concepts and ideas.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare a presentation	<p>1.1. Plan and document presentation approach and intended outcomes</p> <p>1.2. Choose <i>presentation strategies, format and delivery methods</i> that match the <i>characteristics</i> of the target audience, location, resources and personnel needed</p> <p>1.3. Select <i>presentation aids, materials and techniques</i> that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas</p> <p>1.4. Brief others involved in the presentation on their roles/responsibilities within the presentation</p> <p>1.5. Select <i>techniques to evaluate presentation effectiveness</i></p>
2. Deliver a presentation	<p>2.1. Explain and discuss desired outcomes of the presentation with the target audience</p> <p>2.2. Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas</p> <p>2.3. Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes</p> <p>2.4. Use persuasive communication techniques to secure audience interest</p> <p>2.5. Provide opportunities for participants to seek</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences</p> <p>2.6. Summarise key concepts and ideas at strategic points to facilitate participant understanding</p>
3. Review the presentation	<p>3.1. Implement <i>techniques to review the effectiveness</i> of the presentation</p> <p>3.2. Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation</p> <p>3.3. Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- facilitation and presentation skills to communicate central ideas of a message in an informative and engaging manner, and to utilise verbal and non-verbal techniques to sustain participant engagement
- literacy skills to prepare presentation information and to write in a range of styles for different target audiences.

#### Required knowledge

- data collection methods that will support review of presentations
- industry, product/service
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety

**REQUIRED SKILLS AND KNOWLEDGE**

- principles of effective communication
- range of presentation aids and materials available to support presentations.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- preparation, delivery and evaluation of the effectiveness of at least two presentations related to the candidate's occupation or area of interest
- knowledge of the principles of effective communication.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment, documentation and resources.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- demonstration of preparation, delivery and evaluation of a presentation
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of presentations
- review of selected presentation aids, materials and techniques
- review of briefing provided for others involved in the presentation
- evaluation of techniques implemented to review the effectiveness of the presentation.

**Guidance information for**

Holistic assessment with other units relevant to the

<b>EVIDENCE GUIDE</b>	
<b>assessment</b>	industry sector, workplace and job role is recommended, for example: <ul style="list-style-type: none"> <li>• other general administration units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Presentation strategies</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• case studies</li> <li>• demonstration</li> <li>• discussion</li> <li>• group and/or pair work</li> <li>• oral presentations</li> <li>• questioning</li> <li>• simulations and role-play</li> </ul>
<p><b><i>Presentation format and delivery methods</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• advertising copy</li> <li>• audio</li> <li>• direct marketing copy</li> <li>• individual presentation</li> <li>• public relations copy</li> <li>• scripts</li> <li>• storyboards</li> <li>• team presentation</li> <li>• verbal presentation</li> <li>• video</li> <li>• visuals</li> </ul>
<p><b><i>Characteristics</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• age</li> <li>• cultural and language background</li> <li>• educational background or general knowledge</li> <li>• gender</li> <li>• language, literacy and numeracy needs</li> <li>• physical ability</li> <li>• previous experience with the topic</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Presentation aids and materials</i> may include:	<ul style="list-style-type: none"> <li>• computer simulations and presentations</li> <li>• diagrams, charts and posters</li> <li>• models</li> <li>• overhead projector</li> <li>• paper-based materials</li> <li>• video and audio recordings</li> <li>• whiteboard</li> </ul>
<i>Presentation techniques</i> may include:	<ul style="list-style-type: none"> <li>• animation</li> <li>• comparative advertising</li> <li>• live action</li> <li>• music</li> <li>• signature elements such as:               <ul style="list-style-type: none"> <li>• slogans</li> <li>• logotypes</li> <li>• packaging</li> </ul> </li> <li>• sound effects</li> <li>• use of a guest speaker</li> <li>• use of black and white</li> <li>• use of colour</li> <li>• use of humour</li> </ul>
<i>Techniques to evaluate presentation effectiveness</i> may include:	<ul style="list-style-type: none"> <li>• action research</li> <li>• critical friends</li> <li>• focus group interviews</li> <li>• one-on-one interviews with participants and other personnel involved in the presentation</li> <li>• written feedback provided by participants</li> </ul>

## BSBCUS301B Deliver and monitor a service to customers

### Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Performance criteria amended so that the learner is not required to 'incorporate evidence of customer satisfaction in decision to modify products or services'. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBCUS301A Deliver and monitor a service to customers</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify customer needs and monitor service provided to customers. Operators may exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over either a short or long term interaction.

### Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify customer needs	<p>1.1 Use <b><i>appropriate interpersonal skills</i></b> to accurately identify and clarify <b><i>customer needs and expectations</i></b></p> <p>1.2 Assess customer needs for urgency to determine priorities for service delivery according to <b><i>organisational requirements</i></b></p> <p>1.3 Use <b><i>effective communication</i></b> to inform customers about available choices for meeting their needs and assist in the selection of preferred options</p> <p>1.4 Identify limitations in addressing customer needs and seek appropriate assistance from <b><i>designated individuals</i></b></p>
2. Deliver a service to customers	<p>2.1 Provide prompt service to customers to meet identified needs in accordance with organisational requirements</p> <p>2.2 Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery</p> <p>2.3 Sensitively and courteously handle <b><i>customer complaints</i></b> in accordance with organisational requirements</p> <p>2.4 Provide assistance or respond to customers with <b><i>specific needs</i></b> according to organisational requirements</p> <p>2.5 Identify and use available <b><i>opportunities</i></b> to promote and enhance services and products to customers</p>
3. Monitor and report on service delivery	<p>3.1 Regularly review customer satisfaction with service delivery using <b><i>verifiable evidence</i></b> according to organisational requirements</p> <p>3.2 Identify opportunities to enhance the quality of service and products, and pursue within organisational requirements</p> <p>3.3 Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements</p>

	<p>3.4 Regularly seek customer feedback and use to improve the provision of products and services</p> <p>3.5 Ensure reports are clear, detailed and contain recommendations focused on critical aspects of service delivery</p>
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to monitor and advise on customer service strategies
- literacy skills to:
  - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
  - prepare general information and papers according to target audience
  - read and understand a variety of texts
- problem-solving skills to deal with customer enquiries or complaints
- technology skills to select and use technology appropriate to a task
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - financial legislation
  - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• identifying needs and priorities of customers</li> <li>• distinguishing between different levels of customer satisfaction</li> <li>• treating customers with courtesy and respect</li> <li>• responding to and reporting on, customer feedback</li> <li>• knowledge of organisational policy and procedures for customer service.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of customer complaints</li> <li>• examples of documents relating to customer service standards and policies.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of reports on customer service delivery</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of customer service strategies.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Appropriate interpersonal skills</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• listening actively to what the customer is communicating</li> <li>• providing an opportunity for the customer to confirm their request</li> <li>• questioning to clarify and confirm customer needs</li> <li>• seeking feedback from the customer to confirm understanding of needs</li> <li>• summarising and paraphrasing to check understanding of customer message</li> <li>• using appropriate body language.</li> </ul>
<p><b><i>Customers</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• corporate customers</li> <li>• individual members of the organisation</li> <li>• individual members of the public</li> <li>• internal or external</li> <li>• other agencies.</li> </ul>
<p><b><i>Customer needs and expectations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• accuracy of information</li> <li>• advice or general information</li> <li>• complaints</li> <li>• fairness/politeness</li> <li>• further information</li> <li>• making an appointment</li> <li>• prices/value</li> <li>• purchasing organisation's products and services</li> <li>• returning organisation's products and services</li> <li>• specific information.</li> </ul>
<p><b><i>Organisational requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• anti-discrimination and related policy</li> <li>• defined resource parameters</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• payment and delivery options</li> <li>• pricing and discount policies</li> <li>• quality and continuous improvement processes and</li> </ul>

	<p>standards</p> <ul style="list-style-type: none"> <li>• quality assurance and/or procedures manuals</li> <li>• replacement and refund policy and procedures</li> <li>• who is responsible for products or services.</li> </ul>
<b>Effective communication</b> may include:	<ul style="list-style-type: none"> <li>• giving customers full attention</li> <li>• maintaining eye contact, except where eye contact may be culturally inappropriate</li> <li>• speaking clearly and concisely</li> <li>• using active listening techniques</li> <li>• using appropriate language and tone of voice</li> <li>• using clear written information/communication</li> <li>• using non-verbal communication e.g. body language, personal presentation (for face-to-face interactions)</li> <li>• using open and/or closed questions.</li> </ul>
<b>Designated individuals</b> may include:	<ul style="list-style-type: none"> <li>• colleagues</li> <li>• customers</li> <li>• line management</li> <li>• supervisor.</li> </ul>
<b>Customer complaints</b> may include:	<ul style="list-style-type: none"> <li>• administrative errors such as incorrect invoices or prices</li> <li>• customer satisfaction with service quality</li> <li>• damaged goods or goods not delivered</li> <li>• delivery errors</li> <li>• product not delivered on time</li> <li>• service errors</li> <li>• warehouse or store room errors such as incorrect product delivered.</li> </ul>
<b>Specific needs</b> of customers may relate to:	<ul style="list-style-type: none"> <li>• age</li> <li>• beliefs/values</li> <li>• culture</li> <li>• disability</li> <li>• gender</li> <li>• language</li> <li>• religious/spiritual observances.</li> </ul>
<b>Opportunities</b> to promote and enhance services and products may include:	<ul style="list-style-type: none"> <li>• extending time lines</li> <li>• packaging procedures</li> <li>• procedures for delivery of goods</li> <li>• returns policy</li> <li>• system for recording complaints</li> <li>• updating customer service charter.</li> </ul>
<b>Verifiable evidence</b> may include:	<ul style="list-style-type: none"> <li>• customer satisfaction questionnaires</li> <li>• audit documentation and reports</li> </ul>

	<ul style="list-style-type: none"><li>• quality assurance data</li><li>• returned goods</li><li>• lapsed customers</li><li>• service calls</li><li>• complaints.</li></ul>

## BSBCUS501C Manage quality customer service

### Modification History

Release	Comments
Release 1	<p>New release of this Qualification released with <i>version 6 of BSB07 Business Services Training Package</i>.</p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

Operators may have staff involved in delivering customer service and are responsible for the quality of their work. In many instances the work will occur within the organisation's policies and procedures framework. At this level, the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies, will be required.

### Application of the Unit

Many managers are involved in ensuring that products and services are delivered and maintained to standards agreed by the organisation.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Plan to meet internal and external customer requirements	<p>1.1 Investigate, identify, assess, and include the needs of <b>customers</b> in planning processes</p> <p>1.2 Ensure plans achieve the <b>quality</b>, time and cost specifications agreed with customers</p>
2. Ensure delivery of quality products and services	<p>2.1 Deliver <b>products and services</b> to customer specifications within organisation's business plan</p> <p>2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards</p> <p>2.3 Assist colleagues to overcome difficulty in meeting customer service standards</p>
3. Monitor, adjust and review customer service	<p>3.1 Develop and use <b>strategies</b> to monitor progress in achieving product and/or service targets and standards</p> <p>3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services</p> <p>3.3. Develop, procure and use <b>resources</b> effectively to provide quality products and services to customers</p> <p>3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups</p> <p>3.5 Manage records, reports and recommendations within the organisation's systems and processes</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

## Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to:
  - coach and mentor staff and colleagues
  - monitor and advise on customer service strategies
- literacy skills to:
  - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
  - prepare general information and papers according to target audience
  - read and understand a variety of texts
- problem-solving skills to:
  - deal with customer enquiries or complaints
  - deal with complex and non-routine difficulties
- technology skills to select and use technology appropriate to a task
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

## Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - Australian consumer law
  - ethical principles
  - codes of practice
  - privacy laws
  - financial legislation
  - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs
- techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality

- problem identification and resolution
- quality customer service delivery
- record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• plans, policies or procedures for delivering quality customer service</li> <li>• demonstrated techniques in solving complex customer complaints and system problems that lead to poor customer service</li> <li>• knowledge of techniques for solving complaints.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• assessment of written reports</li> <li>• demonstration of techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of performance in role plays</li> <li>• evaluation of leadership, supervision, coaching and mentoring used to assist colleagues to overcome difficulty in meeting customer service standards</li> <li>• review of strategies developed and used to monitor progress in achieving product and/or service targets and standards</li> <li>• review of records, reports and recommendations about managing customer service.</li> </ul>

<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Customers</i></b> may be:	<ul style="list-style-type: none"> <li>• Board members</li> <li>• clients, purchasers of services</li> <li>• co-workers, peers and fellow frontline managers</li> <li>• members of the general public who make contact with the organisation, such as prospective purchasers of services</li> <li>• potential funding bodies</li> <li>• supervisors</li> <li>• suppliers of goods and services and contractors providing goods and services.</li> </ul>
<b><i>Quality</i></b> may refer to:	<ul style="list-style-type: none"> <li>• characteristics of a product, system, service or process that meet the requirements of customers and interested parties.</li> </ul>
<b><i>Products and services</i></b> may include:	<ul style="list-style-type: none"> <li>• either products or services</li> <li>• goods</li> <li>• ideas</li> <li>• infrastructure</li> <li>• private or public sets of benefits.</li> </ul>
<b><i>Strategies</i></b> may refer to:	<ul style="list-style-type: none"> <li>• databases and other controls to record and compare data over time</li> <li>• electronic feedback mechanisms using intranet, internet and email</li> <li>• feedback forms and other devices to enable communication from customers</li> <li>• long-term or short-term plans for monitoring achievement and evaluating effectiveness</li> <li>• policies and procedures</li> <li>• questionnaires, survey and interviews</li> <li>• training and development activities.</li> </ul>

<i>Resources</i> may include:	<ul style="list-style-type: none"><li>• buildings/facilities</li><li>• equipment</li><li>• finance</li><li>• information</li><li>• people</li><li>• power/energy</li><li>• technology</li><li>• time.</li></ul>

## BSBDES403A Develop and extend design skills and practice

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to develop and extend skills as a practising designer.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to any individual who works as a designer in any industry context. Designers may work independently or be employed by an organisation.</p> <p>Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Acquire and develop technical skills	1.1. Plan <i>strategies</i> to ensure the development of appropriate <i>technical skills</i> in design practice 1.2. Plan and use opportunities to develop and assess technical skills 1.3. Identify and use practice, feedback, discussion and evaluation opportunities to continuously improve technical skills 1.4. Develop and extend technical skills through <i>testing capabilities</i> of materials, tools and equipment 1.5. Identify and use <i>relevant media</i> to stimulate technical and professional development
2. Develop conceptual skills and ideas	2.1. Engage in ongoing experimentation and exploration of different ideas and techniques 2.2. Discuss ideas with others and apply knowledge gained to inform own work 2.3. Use work practice to gain experience in a range of genres and interpretations 2.4. Study the work of others to stimulate conceptual and technical skills development 2.5. Research and share ideas across a range of design disciplines 2.6. Identify and use a range of <i>opportunities to develop own skills</i> and keep informed about current design

ELEMENT	PERFORMANCE CRITERIA
	practice
3. Develop own voice	3.1. Explore and experiment with new ideas in making and/or interpreting design work 3.2. Explore and use technology, where appropriate, to develop <i>own voice</i> and expand practice 3.3. Demonstrate own voice through design project realisation
4. Evaluate own work	4.1. Seek and apply constructive criticism from others to improve own work 4.2. Evaluate own work against planned strategy for own practice 4.3. Evaluate own work in the context of work by others in order to extend own practice 4.4. Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes
5. Research work opportunities	5.1. Correctly identify <i>sources of information</i> relating to work opportunities for designers 5.2. Identify <i>networks</i> and <i>promotional opportunities</i> for designers which may be helpful in developing career opportunities 5.3. Incorporate research results and information into own work and career planning

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to discuss potentially complex ideas and concepts with others and to engage in critical discourse about own work
- creative thinking skills to explore and generate new ideas for design work
- comprehension skills to interpret and communicate a wide range of potentially complex information about design concepts and technologies
- problem-solving skills to explore and develop strategies and solutions to new design challenges and opportunities
- self-management skills to take pro-active responsibility for own professional

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
development.
<b>Required knowledge</b>
<ul style="list-style-type: none"> <li>• current and emerging copyright, moral rights and intellectual property issues and legislation, and their impact on designers</li> <li>• current and emerging designers in the relevant design discipline</li> <li>• current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent</li> <li>• professional development information and resources available to designers</li> <li>• sources of information relating to work opportunities and career planning.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• development of own voice through exploring and experimenting with new ideas in making and/or interpreting work</li> <li>• application of planned strategies to develop appropriate skills in design practice</li> <li>• use of discussion and evaluation opportunities to inform and develop technical and conceptual skills.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to the materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• evaluation of candidate diary or log detailing the</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>ways in which different experiences and opportunities have been used to develop and extend skills</p> <ul style="list-style-type: none"> <li>• evaluation of bodies of work that demonstrate the progressive development of skills</li> <li>• evaluation of a presentation by the candidate addressing the ways in which a pro-active approach to skills development has been taken.</li> </ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Strategies</i></b> for developing self as a designer may include:</p>	<ul style="list-style-type: none"> <li>• being involved in a range of relevant design activities</li> <li>• communicating with peers</li> <li>• experimenting</li> <li>• participating in professional development and other learning opportunities</li> <li>• participating in relevant groups or associations</li> <li>• practising</li> <li>• undertaking training courses</li> <li>• working effectively with supervisor</li> <li>• working with a mentor or coach</li> </ul>
<p><b><i>Technical skills</i></b> may include skills in:</p>	<ul style="list-style-type: none"> <li>• animation</li> <li>• digital/electronic design</li> <li>• entertainment design</li> <li>• fashion/clothing/accessories design</li> <li>• furnishings</li> <li>• furniture design</li> <li>• graphic design</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• illustration/technical drawing</li> <li>• interior design</li> <li>• jewellery design</li> <li>• object design</li> <li>• photoimaging</li> <li>• tableware design</li> <li>• other design disciplines</li> </ul>
<i>Testing capabilities</i> refers to:	<ul style="list-style-type: none"> <li>• experimenting with innovative applications</li> <li>• extending the possibilities of materials, tools and equipment towards their full potential</li> </ul>
<i>Relevant media</i> may include:	<ul style="list-style-type: none"> <li>• catalogues</li> <li>• journals</li> <li>• magazines</li> </ul>
<i>Opportunities to develop own skills</i> may include participation in and/or attendance at, some of the following:	<ul style="list-style-type: none"> <li>• competitions</li> <li>• exhibitions</li> <li>• floor talks at galleries</li> <li>• laboratories</li> <li>• lectures, seminars, conferences, symposiums</li> <li>• manufacturing sites</li> <li>• master classes</li> <li>• professional organisations</li> <li>• trade fairs, expositions</li> </ul>
Developing <i>own voice</i> includes:	<ul style="list-style-type: none"> <li>• analysing and researching the work of others relevant to selected area of specialisation</li> <li>• analysing conventions, practices and customs in design practice</li> <li>• developing repertoire and knowledge</li> <li>• exploring elements and principles of design</li> </ul>
<i>Sources of information</i> may include:	<ul style="list-style-type: none"> <li>• design journals</li> <li>• employer listings</li> <li>• exhibition catalogues and programs</li> <li>• job advertisements</li> <li>• websites</li> <li>• word of mouth</li> </ul>
<i>Networks</i> may include:	<ul style="list-style-type: none"> <li>• alumni organisations</li> <li>• colleagues and teachers</li> <li>• consumer organisations</li> <li>• professional associations</li> </ul>
<i>Promotional opportunities</i> may	<ul style="list-style-type: none"> <li>• applications to funding bodies</li> </ul>

## BSBDES501A Implement design solutions

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to take a design concept or solution to the implementation stage.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who implement concepts and solutions in response to a design challenge in any industry context. It takes BSBDES401A Generate design solutions, to the next stage focusing on the resourcing and testing of a design concept.</p> <p>The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design.</p> <p>The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>	
---------------------------	--

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Organise resources for realising the design solution	1.1. Confirm the nature and scope of the proposed design solution 1.2. Research <i>resources</i> required for developing the design concept to <i>implementation stage</i> 1.3. Investigate different <i>factors that impact on the selection and use of resources</i> 1.4. Select and prepare resources based on research and other <i>legislative or organisational requirements</i>
2. Test the design solution	2.1. Experiment with a range of different <i>techniques and processes to test the design solution</i> 2.2. Evaluate, challenge and refine testing processes 2.3. Gain input and feedback from <i>key stakeholders</i> during the testing process 2.4. Accurately document outcomes of testing 2.5. Select final design solution based on outcomes of

ELEMENT	PERFORMANCE CRITERIA
	testing and input from others
3. Develop the prototype or model	3.1. Create prototype or model based on agreed approaches 3.2. Where appropriate, select and organise materials, tools and equipment according to chosen design solution 3.3. Expose model or prototype to quality checks and ongoing analysis, enhancement and refinement 3.4. Compare completed prototype or model against <i>identified needs and other considerations</i> and make adjustments as required
4. Present the prototype or model	4.1. Identify key stakeholders to whom design should be presented 4.2. Select <i>appropriate format</i> for presentation based on nature of the audience and design 4.3. Present prototype or model in a way that optimises clarity, conciseness and appeal

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to consult with others on testing and refinement of the design solution
- creative thinking skills to develop and adapt responses to experimentation and testing processes
- literacy skills to interpret and develop a wide range of visual and written information sources
- planning and organisational skills to organise resources and to coordinate a testing process, including liaison and consultation with others during the design process
- problem-solving skills to respond to unpredictable issues and challenges that arise during the testing process.

#### Required knowledge

- copyright, moral rights and intellectual property issues and legislation that impact on design in the relevant context
- elements and principles of design and their application in the relevant design

**REQUIRED SKILLS AND KNOWLEDGE**

context

- features of the wider industry, economic, social and historical context for the design solution
- other designs and the work of other design practitioners in the relevant context
- sources of information that support the development of technical and other knowledge
- technical knowledge of the area for which design solutions are being implemented - in terms of relevant resources, materials, tools, equipment, techniques and industry processes and procedures.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need
- knowledge of design trends and technologies in the relevant industry context.

**Context of and specific resources for assessment**

Assessment must ensure:

- interaction with others to reflect the collaborative nature of the design process
- access to resources required to test a design solution in a given industry context (e.g. finance, materials, tools, equipment, expertise).

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- evaluation of a design solution implemented by the candidate against an original brief, set of criteria or

<b>EVIDENCE GUIDE</b>	
	<p>guiding objectives</p> <ul style="list-style-type: none"> <li>• evaluation of the processes used to test and refine the solution</li> <li>• oral or written questioning to assess knowledge of technical and context issues that impact on design in a given industry context.</li> </ul>
<b>Guidance information for assessment</b>	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p> <p>Combined assessment with the following unit is appropriate:</p> <ul style="list-style-type: none"> <li>• BSBDES401A Generate design solutions.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Resources</i></b> will depend on the nature of the design, but may be:</p>	<ul style="list-style-type: none"> <li>• financial: <ul style="list-style-type: none"> <li>• budget allocation</li> <li>• grants</li> <li>• in kind contributions</li> <li>• sponsorship</li> </ul> </li> <li>• human expertise: <ul style="list-style-type: none"> <li>• creative</li> <li>• financial</li> <li>• management</li> <li>• technical</li> </ul> </li> <li>• physical: <ul style="list-style-type: none"> <li>• hardware or software</li> <li>• materials</li> <li>• tools</li> <li>• workspaces</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
<b><i>Implementation stage</i></b> could be the point at which:	<ul style="list-style-type: none"> <li>• marketing can commence</li> <li>• production can commence</li> <li>• production is confirmed</li> <li>• staff can be employed</li> </ul>
<b><i>Factors that impact on the selection and use of resources</i></b> may relate to:	<ul style="list-style-type: none"> <li>• environmental considerations</li> <li>• industry context</li> <li>• social or ethical issues</li> <li>• sustainability</li> <li>• technologies</li> </ul>
<b><i>Legislative or organisational requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• commonwealth or state/territory legislation</li> <li>• licensing requirements</li> <li>• local regulations and standards</li> <li>• policies or procedures</li> </ul>
<b><i>Techniques and processes to test the design solution</i></b> will depend on the nature of the design, and may include:	<ul style="list-style-type: none"> <li>• colour tests</li> <li>• mock ups</li> <li>• models</li> <li>• practice pieces</li> <li>• samples</li> <li>• scenario testing</li> <li>• stress tests</li> </ul>
<b><i>Key stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• client</li> <li>• employer</li> <li>• end user</li> <li>• peers</li> <li>• supervisor</li> <li>• technical experts</li> <li>• work colleagues</li> </ul>
<b><i>Identified needs and other considerations</i></b> may relate to:	<ul style="list-style-type: none"> <li>• access to and availability of resources</li> <li>• aesthetic considerations</li> <li>• budgetary constraints</li> <li>• ease of manufacture</li> <li>• opportunities for innovation</li> <li>• specifications of a brief</li> <li>• wider industry trends</li> </ul>
<b><i>Appropriate format</i></b> may include:	<ul style="list-style-type: none"> <li>• drawings or sketches - manual or computer aided design and drafting (CADD)</li> <li>• electronic presentation</li> <li>• verbal presentation</li> <li>• written notes with rationale or description</li> </ul>

### Unit Sector(s)

<b>Unit sector</b>	
--------------------	--

### Competency field

<b>Competency field</b>	Design - Design Process
-------------------------	-------------------------

### Co-requisite units

<b>Co-requisite units</b>		

## BSBDES502A Establish, negotiate and refine a design brief

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to work pro actively with a client or commissioning organisation to develop and negotiate a design brief.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. This unit builds on BSBDES402A Interpret and respond to a design brief, which focuses on working with an established brief.</p> <p>Establishment, negotiation and refinement of a design brief requires the integration of highly developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective response to change and new ideas is crucial.</p> <p>In practice, this unit supports and is supported by other units describing the specialist skills and knowledge required by specific design disciplines.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Establish design requirements	<p>1.1. Identify and make appropriate contact with <b><i>relevant stakeholders</i></b> for the design project, in addition to the client</p> <p>1.2. Identify and source <b><i>information and references relevant to the design project</i></b></p> <p>1.3. Undertake <b><i>critical analysis</i></b> of sources and extract key information to inform the design project</p> <p>1.4. Liaise with client and other key stakeholders to determine <b><i>overall objectives and parameters</i></b> for the design project</p> <p>1.5. Pro-actively seek, review and act upon information needed to inform constructive communication with client</p> <p>1.6. Build trust and respect between self and client</p>

ELEMENT	PERFORMANCE CRITERIA
	through effective use of communication skills and demonstration of professional integrity
2. Develop and refine design brief	2.1. Develop concepts and ideas for inclusion in design brief that take account of overall objectives and parameters 2.2. Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs 2.3. Present ideas in an <i>appropriate format/medium</i> and seek feedback from key stakeholders 2.4. Use effective communication techniques to generate discussion, debate and critical analysis 2.5. Re-evaluate and refine options based on own analysis and discourse with others 2.6. Establish and agree on final nature and scope of design brief with client and accurately document details
3. Negotiate terms and conditions	3.1. Negotiate and agree <i>terms and conditions</i> of the brief in accordance with relevant <i>organisational and professional standards</i> 3.2. Clarify, agree and document roles and responsibilities of those involved in the project 3.3. Confirm agreements in writing in accordance with <i>organisational requirements</i> 3.4. Identify the need for and seek specialist advice in developing, formal agreements or contracts where appropriate

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication, presentation and negotiation skills to work with clients to establish and refine design briefs
- creative thinking skills to generate and develop concepts and ideas for the design brief, including responses to situations where parameters may be quite broad and open or very restrictive

**REQUIRED SKILLS AND KNOWLEDGE**

- literacy skills to research and evaluate a wide range of source materials for the development of ideas and concepts
- numeracy skills to develop realistic costings for realisation of design concept
- planning and organisational skills to guide and coordinate the process of negotiating and finalising a design brief
- problem-solving skills to pro-actively identify and develop effective solutions to complex challenges of a varied and unpredictable nature
- self-management skills to take responsibility for driving and guiding the brief negotiation process.

**Required knowledge**

- copyright, moral rights and intellectual property issues and legislation that impact on design in the relevant work context
- legal issues that affect negotiations and contracts in the relevant work context
- scope, nature and potential variations within design briefs relevant to a specific context
- sources of information that inform the development of design concepts within a specific industry context.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- practical demonstration of skills through the development and finalisation of at least two design briefs for a specific industry purpose
- effective collaboration and communication skills to work with others to develop and refine a design brief
- knowledge of the design process within the specific industry context/design discipline.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to appropriate equipment and media to communicate and present ideas and concepts
- access to sources of information relevant to the

<b>EVIDENCE GUIDE</b>	
	<p>industry context</p> <ul style="list-style-type: none"> <li>interaction with and involvement of others to reflect the collaborative nature of the work, and the communication and negotiation skills required.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>evaluation of a design brief in which the candidate has played a significant development role</li> <li>evaluation of reports prepared by the candidate detailing the processes undertaken for establishing and refining the design brief, including challenges faced and lessons learned for the future</li> <li>observation of discussions and negotiations with client and other stakeholders</li> <li>oral or written questioning to assess knowledge of the process and issues surrounding legislation, industry context, sources of information</li> <li>evaluation of candidate response to different scenarios to assess ability to adapt approach to different client requirements and contexts.</li> </ul>
<b>Guidance information for assessment</b>	<p>The design process does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>any specialised design unit.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b><i>Relevant stakeholders</i></b> in addition to the client may include:	<ul style="list-style-type: none"> <li>• authorities such as local council for outdoor event design</li> <li>• creative specialists</li> <li>• other designers</li> <li>• others involved in the project</li> <li>• production teams</li> <li>• technical specialists</li> <li>• venue managers</li> </ul>
<b><i>Information and references relevant to the design project</i></b> may include:	<ul style="list-style-type: none"> <li>• environment</li> <li>• financial information</li> <li>• legislative and regulatory requirements</li> <li>• music and/or film/video</li> <li>• oral history</li> <li>• organisational information</li> <li>• photographs and other artworks</li> <li>• project team members</li> <li>• promotional material</li> <li>• technical reports/data</li> <li>• texts and other written references</li> <li>• work of other designers/artists</li> </ul>
<b><i>Critical analysis</i></b> may involve:	<ul style="list-style-type: none"> <li>• considering how ideas may be adapted</li> <li>• considering how ideas may be challenged</li> <li>• drawing links between references and potential designs</li> <li>• evaluating work of other designers</li> <li>• making judgements about potential ideas in relation to the budget and available resources</li> <li>• making judgements about relevance of information and ideas</li> </ul>
<b><i>Overall objectives and parameters</i></b> may relate to:	<ul style="list-style-type: none"> <li>• audience</li> <li>• availability of materials, tools, equipment and human resources</li> <li>• budget constraints</li> <li>• conflicting competing demands</li> <li>• environmental sustainability</li> <li>• organisational vision</li> <li>• presentation venue/context</li> <li>• sponsorship</li> <li>• timeframe</li> <li>• triple bottom line (people, planet, profit)</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Appropriate format/medium</i> for presentation of ideas may include:	<ul style="list-style-type: none"> <li>• checklists</li> <li>• digital presentation</li> <li>• drawings</li> <li>• electronic presentations</li> <li>• graphic formats</li> <li>• models</li> <li>• paintings</li> <li>• photographs</li> <li>• plans</li> <li>• prototypes</li> <li>• verbal description/oral presentation</li> <li>• video</li> <li>• visual diagrams</li> </ul>
<i>Terms and conditions</i> may relate to:	<ul style="list-style-type: none"> <li>• conceptual parameters</li> <li>• contracts</li> <li>• deliverables</li> <li>• legal and financial issues such as processes to be used</li> <li>• ownership and copyright</li> <li>• reporting</li> <li>• technical requirements</li> <li>• time lines</li> </ul>
<i>Organisational and professional standards</i> may include:	<ul style="list-style-type: none"> <li>• industry-accepted fee schedules</li> <li>• industry standards for written agreements</li> <li>• requirements for written agreements</li> </ul>
<i>Organisational requirements</i> for confirming agreements may include:	<ul style="list-style-type: none"> <li>• approval and ongoing communication processes</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain daily financial records	<p>1.1. Correctly maintain daily financial records and in accordance with <b><i>organisational requirements</i></b> for accounting purposes</p> <p>1.2. Identify and rectify or refer <b><i>discrepancies</i></b> or errors in <b><i>documentation</i></b> or transactions to <b><i>designated persons</i></b> in accordance with organisational requirements</p> <p>1.3. Accurately credit and debit transactions and promptly enter into <b><i>journals</i></b> in accordance with organisational requirements</p>
2. Maintain general ledger	<p>2.1. Maintain general ledger in accordance with organisational requirements</p> <p>2.2. Post <b><i>transactions</i></b> into general ledger in accordance with organisational reporting requirements</p> <p>2.3. <b><i>Reconcile systems for accounts payable and receivable</i></b> with general ledger</p> <p>2.4. Accurately prepare trial balance from general ledger in accordance with organisational requirements</p>
3. Monitor cash control	<p>3.1. Ensure cash flow is accurately accounted for in accordance with organisational requirements</p> <p>3.2. Make and receive <b><i>payments</i></b> in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements 3.3. Collect or follow-up outstanding accounts within designated time lines 3.4. Check payment documentation for accuracy of information and despatch to creditors within <i>designated time line</i>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to identify financial information; to read and understand the organisation's accounting procedures; and to edit and proofread documents to ensure conformity and consistency of information
- communication skills to clarify information and to refer errors or discrepancies to appropriate people
- numeracy skills to read and interpret financial data and to prepare cash analysis sheets
- problem-solving skills to reconcile figures.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - financial legislation
  - occupational health and safety (OHS)
- organisational policies and procedures relating to maintaining financial records
- definition of credits/creditors and debits/debtors
- principles of double entry bookkeeping and accrual accounting
- methods of presenting financial data.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• identifying and responding to discrepancies and errors</li> <li>• transferring and recording financial data accurately</li> <li>• reconciling expenditures and revenue</li> <li>• knowledge of organisational policies and procedures relating to maintaining financial records.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of source documents relating to financial record keeping.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of identification and rectification or referral of discrepancies or errors in documentation or transactions</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of financial record keeping</li> <li>• examples of financial documentation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• general administration units</li> <li>• other financial administration units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Organisational requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• designated time lines</li> <li>• guidelines for reconciling journals</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• procedures for totalling adjusted journals</li> <li>• quality assurance and/or procedures manuals</li> <li>• resolution procedures</li> <li>• security procedures</li> </ul>
<p><b><i>Discrepancies</i></b> may relate to:</p>	<ul style="list-style-type: none"> <li>• bank charges</li> <li>• dishonoured cheques</li> <li>• errors in transposing between source documents and journals</li> <li>• interest</li> </ul>
<p><b><i>Documentation</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• purchase credit notes</li> <li>• purchase invoices</li> <li>• sales credit notes</li> <li>• sales invoices</li> </ul>
<p><b><i>Designated persons</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• bank</li> <li>• line management</li> <li>• organisation's authorisations department</li> <li>• statutory body</li> <li>• supervisor</li> </ul>
<p><b><i>Journals</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• cash payments</li> <li>• cash receipts</li> <li>• purchases and purchase returns</li> <li>• sales and sales returns</li> </ul>
<p><b><i>Transactions</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• commencing business entries</li> <li>• correction of posting errors</li> <li>• interest expense</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• interest receivable</li> <li>• non-cash transactions (e.g. writing-off depreciation, stock losses)</li> <li>• purchase of a fixed asset on credit</li> <li>• sale of a fixed asset on credit</li> <li>• withdrawal of stock/assets by owner</li> <li>• write-off a bad debt</li> </ul>
<i>Reconciling systems for accounts payable and receivable</i> may include:	<ul style="list-style-type: none"> <li>• checking accuracy of creditor account balances (e.g. cash payments journal, purchases journal, purchases returns journal, general journal)</li> <li>• checking accuracy of debtor account balances (e.g. cash receipts journal, sales return journal, general journal)</li> <li>• checking cash payments and receipt journals against bank statement</li> <li>• checking the total of the creditor's schedule equals the balance of the creditor's control account</li> <li>• checking the total of the debtor's schedule equals the balance of the debtor's control account</li> </ul>
<i>Payments</i> may include:	<ul style="list-style-type: none"> <li>• cash</li> <li>• cheque</li> <li>• credit card</li> <li>• direct debit</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Compile financial information and data	<p>1.1. Collect, evaluate and code current <i>financial data</i> to ensure consistency, quality and accuracy in accordance with <i>organisational requirements</i></p> <p>1.2. Use <i>conversion and consolidation procedures</i> to compile analysis in accordance with organisational requirements</p> <p>1.3. Make, record and disclose asset and liability valuations in accordance with organisational requirements</p> <p>1.4. Ensure that <i>discrepancies</i>, unusual features or queries are identified, resolved or referred to the appropriate authority</p>
2. Prepare statutory requirement reports	<p>2.1. Correctly record income and expenditure to ensure compliance with <i>statutory requirements</i></p> <p>2.2. Calculate liabilities for tax in accordance with current legislation and <i>revenue gathering practices</i></p> <p>2.3. Correctly identify relevant receipts, <i>revenue documentation</i> and payments</p> <p>2.4. Ensure that statements and claims take full advantage of <i>available benefits and allowances</i> in accordance with statutory requirements</p> <p>2.5. Submit statutory requirement reports to appropriate authorities within <i>stated deadlines</i></p>

ELEMENT	PERFORMANCE CRITERIA
3. Provide financial business recommendations	3.1.Ensure that <i>recommendations</i> are logically derived and supported by <i>evidence</i> in report 3.2.Provide recommendations to propose constructive actions to enhance the effectiveness and efficacy of functions and services 3.3.Ensure recommendations are concise and facilitate direction and control of organisation's operations 3.4.Identify and prioritise <i>significant issues</i> in statements including comparative financial performances for review and decision making 3.5.Ensure structure and <i>format of reports</i> are clear and conform to organisational and statutory requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to identify financial information and the organisation's accounting procedures, and to create financial reports
- problem-solving skills to deal with a defined range of predictable problems
- decision making skills to make routine decisions
- numeracy skills to calculate data and to reconcile figures.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - financial legislation
  - occupational health and safety (OHS)
- principles of double entry bookkeeping and accrual accounting
- techniques for forecasting and analysis
- Federal government taxes and charges

**REQUIRED SKILLS AND KNOWLEDGE**

- options, methods and practices for deductions, benefits and depreciations.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- organising financial data to highlight relevant features
- presenting financial data in comprehensive format
- completing Business Activity Statements
- knowledge of relevant legislation.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of financial data, reports and documents.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of income and expenditure records
- analysis of responses to case studies and scenarios
- demonstration of techniques
- review of tax liabilities calculations
- oral or written questioning to assess knowledge of principles of double entry bookkeeping and accrual accounting
- assessment of recommendations provided proposing constructive actions to enhance the effectiveness and efficacy of functions and services.

**EVIDENCE GUIDE****Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- general administration units
- other financial administration units.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Financial data*** may include:

- Australian Bureau of Statistics (ABS) economic data
- budget variances
- budgets and forecasts
- cash flow/profit reports
- financial markets monitoring services (e.g. Reuters)
- financial/operational statements and reports (e.g. expenditures and receipts, profit and loss statements)
- market valuations

***Organisational requirements*** may include:

- financial analysis assessments
- financial management manuals
- legal and organisational policies, guidelines and requirements
- OHS policies, procedures and programs
- price and exchange parameters
- quality assurance and/or procedures manuals
- recording and filing systems
- reporting requirements
- standard financial analysis techniques

***Conversion and consolidation procedures*** may include:

- moving averages
- spreadsheets

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• standardised variables</li> <li>• trend analysis</li> <li>• unit costs</li> </ul>
<i>Discrepancies</i> may include:	<ul style="list-style-type: none"> <li>• absence of auditable trail</li> <li>• expenditure report mismatches</li> <li>• inappropriate authorisations</li> <li>• incorrect payments</li> <li>• incorrect report formats</li> <li>• unreconciled cash flows and operating statements</li> <li>• variances from budget and phasings</li> </ul>
<i>Statutory requirements</i> may include:	<ul style="list-style-type: none"> <li>• delegated authorities</li> <li>• internal control procedures</li> <li>• reporting periods</li> <li>• taxation payment timings</li> </ul>
<i>Revenue gathering practices</i> may include:	<ul style="list-style-type: none"> <li>• billing schedules</li> <li>• fees and charges</li> <li>• investments</li> <li>• leasing</li> <li>• lending and financing</li> <li>• sales</li> </ul>
<i>Revenue documentation</i> may include:	<ul style="list-style-type: none"> <li>• bills</li> <li>• cash received</li> <li>• debit notes</li> <li>• declarations</li> <li>• invoices</li> <li>• sales proceeds</li> </ul>
<i>Available benefits and allowances</i> may include:	<ul style="list-style-type: none"> <li>• depreciation</li> <li>• donations</li> <li>• interest payments</li> <li>• sales tax deductions</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan financial management approaches	1.1. Access <b><i>budget/financial plans</i></b> for the work team 1.2. Clarify budget/financial plans with <b><i>relevant personnel</i></b> within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3. Negotiate any changes required to be made to budget/financial plans with relevant personnel within the organisation 1.4. Prepare <b><i>contingency plans</i></b> in the event that initial plans need to be varied
2. Implement financial management approaches	2.1. Disseminate relevant details of the agreed budget/financial plans to team members 2.2. Provide <b><i>support</i></b> to ensure that team members can competently perform <b><i>required roles</i></b> associated with the management of finances 2.3. Determine and access <b><i>resources and systems</i></b> to manage financial management processes within the

ELEMENT	PERFORMANCE CRITERIA
	work team
3. Monitor and control finances	<p>3.1. Implement <i>processes</i> to monitor actual expenditure and to control costs across the work team</p> <p>3.2. Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns</p> <p>3.3. Implement, monitor and modify contingency plans as required to maintain financial objectives</p> <p>3.4. <b>Report</b> on budget and expenditure in accordance with organisational protocols</p>
4. Review and evaluate financial management processes	<p>4.1. Collect and collate for analysis, <i>data and information on the effectiveness of financial management processes</i> within the work team</p> <p>4.2. Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes</p> <p>4.3. Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- numeracy skills to read and understand a budget and to update a budget
- technology skills to use software associated with financial record keeping.

#### Required knowledge

- basic accounting principles
- organisational requirements related to financial management
- relevant legislation and current requirements of the Australian Taxation Office, including GST
- requirements for organisational record keeping and auditing
- principles and techniques involved in:
  - budgeting

**REQUIRED SKILLS AND KNOWLEDGE**

- cash flows
- electronic spreadsheets
- GST
- ledgers and financial statements
- profit and loss statements.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- financial skills required to work with and interpret budgets, ageing summaries, cash flow, petty cash, GST, and profit and loss statements
- knowledge of the record keeping requirements for the ATO and for auditing purposes.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- assessment of written reports indicating broad knowledge of managing budgets and managing financial resources in the organisation
- demonstration of techniques using financial record keeping software
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- oral or written questioning to assess knowledge of requirements for organisational record keeping and auditing

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• review of contingency plans</li> <li>• review of identification of cost variations and expenditure overruns</li> <li>• evaluation of documentation reporting on budget and expenditure</li> <li>• review of documentation identifying and recommending improvements to financial management processes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units from the Diploma of Management.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Budget/financial plans</i></b> may include:	<ul style="list-style-type: none"> <li>• cash flow projections</li> <li>• long-term budgets/plans</li> <li>• operational plans</li> <li>• short-term budgets/plans</li> <li>• spreadsheet-based financial projections</li> <li>• targets or key performance indicators for production, productivity, wastage, sales, income and expenditure</li> </ul>
<b><i>Relevant personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• financial managers, accountants or financial controllers</li> <li>• supervisors, other frontline managers</li> </ul>
<b><i>Contingency plans</i></b> may include:	<ul style="list-style-type: none"> <li>• contracting out or outsourcing human resources and other functions or tasks</li> <li>• diversification of outcomes</li> <li>• finding cheaper or lower quality raw materials and consumables</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• increasing sales or production</li> <li>• recycling and re-using</li> <li>• rental, hire purchase or alternative means of procurement of required materials, equipment and stock</li> <li>• restructuring of organisation to reduce labour costs</li> <li>• risk identification, assessment and management processes</li> <li>• seeking further funding</li> <li>• strategies for reducing costs, wastage, stock or consumables</li> <li>• succession planning</li> </ul>
<i>Support</i> may include:	<ul style="list-style-type: none"> <li>• access to specialist advice</li> <li>• documentation of procedures</li> <li>• help desk or identified experts within the organisation</li> <li>• information briefings or sessions</li> <li>• intranet-based information</li> <li>• training including mentoring, coaching and shadowing</li> </ul>
<i>Required roles</i> may include:	<ul style="list-style-type: none"> <li>• arranging for use of corporate credit cards</li> <li>• banking</li> <li>• debt collection</li> <li>• ensuring security, accuracy and currency of financial operations</li> <li>• invoicing clients, customers and consumers</li> <li>• maintaining journals, ledgers and other record keeping systems</li> <li>• maintaining petty cash system</li> <li>• purchasing and procurement</li> <li>• wages and salaries payments and record keeping</li> </ul>
<i>Resources and systems</i> may include:	<ul style="list-style-type: none"> <li>• hardware and software</li> <li>• human, physical or financial resources</li> <li>• record keeping systems (electronic and paper-based)</li> <li>• specialist advice or support</li> </ul>
<i>Processes</i> to monitor actual expenditure and to control costs across the work team include:	<ul style="list-style-type: none"> <li>• reporting of: <ul style="list-style-type: none"> <li>• assets</li> <li>• consumables</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• equipment</li> <li>• expenditure</li> <li>• income</li> <li>• stock</li> <li>• wastage</li> </ul>
<i>Reporting</i> may include data from:	<ul style="list-style-type: none"> <li>• bank statements</li> <li>• credit card statements</li> <li>• financial reports</li> <li>• invoices and receipts</li> <li>• ledgers and journals</li> <li>• logs</li> <li>• petty cash records</li> <li>• spreadsheet-based records</li> </ul>
<i>Data and information on the effectiveness of financial management processes</i> may include records (paper-based and electronic) related to:	<ul style="list-style-type: none"> <li>• bank account records</li> <li>• cash flow data</li> <li>• contracts</li> <li>• credit card receipts</li> <li>• employee timesheets</li> <li>• files of paid purchase and service invoices</li> <li>• income and expenditure</li> <li>• insurance reports</li> <li>• invoices</li> <li>• job costings</li> <li>• petty cash receipts</li> <li>• quotations</li> <li>• taxation records</li> <li>• wages/salaries books</li> </ul>

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine job descriptions	1.1. Clarify time lines and requirement for appointment 1.2. Assist with preparation of <i>job descriptions</i> which accurately reflect the role requirements in accordance with organisational procedures and <i>legislation, codes and national standards</i> and <i>occupational health and safety (OHS) considerations</i> 1.3. Consult with relevant personnel about job descriptions 1.4. Ensure that job descriptions do not contravene legislative requirements 1.5. Obtain approvals to advertise position
2. Plan for selection	2.1. <i>Advertise</i> vacancies for <i>staffing requirements</i> in accordance with organisational policies and procedures 2.2. Consult with relevant personnel to convene selection panel and to develop interview questions

ELEMENT	PERFORMANCE CRITERIA
	2.3.Short list applicants 2.4.Ensure that interview questions do not breach legislative requirements 2.5.Schedule interviews and advise relevant personnel of times, dates and venues
3. Assess and select applicants	3.1.Participate in interview process and assess candidates against agreed selection criteria 3.2.Discuss assessment with other selection panel members 3.3.Correct any biases or deviations from agreed procedures and negotiate for preferred candidate 3.4.Contact referees for referee reports 3.5.Prepare selection report and make recommendations to senior personnel for appointment 3.6.Advise unsuccessful candidates of outcomes and respond to any queries 3.7.Complete all necessary documentation in accordance with organisational procedures 3.8.Secure agreement of preferred candidate
4. Appoint and induct successful candidate	4.1.Provide successful candidate with employment contract and other documentation 4.2.Advise managers and staff of starting date and make necessary administrative arrangements for pay and employee record keeping 4.3.Advise manager and work team of new appointment 4.4.Arrange induction in accordance with organisational policy

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to use networks to source suitable applicants, to listen to and understand what is being said in interviews, and to advise on the outcomes of the selection process
- literacy skills to work with job descriptions to devise suitable questions for

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
interviews, to prepare letters for unsuccessful applicants and to make job offers
<ul style="list-style-type: none"> <li>organising and scheduling skills to arrange interviews and venues.</li> </ul>
<b>Required knowledge</b>
<ul style="list-style-type: none"> <li>documentation required for recruitment and selection</li> <li>human resource functions, human resource life cycle and the place of recruitment and selection in that life cycle</li> <li>principles of equity, diversity and relevant legislation.</li> <li>range of interviewing techniques and other selection processes and their application.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>demonstrated ability to work with job descriptions to source and select suitable staff</li> <li>interviewing and other selection techniques that demonstrate awareness of equal opportunity and anti-discrimination requirements</li> <li>knowledge of the human resource life cycle.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to an appropriate range of documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>analysis of responses to case studies and scenarios</li> <li>assessment of written reports on recruitment and selection</li> <li>demonstration of selection techniques</li> <li>direct questioning combined with review of portfolios of evidence and third party workplace</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>reports of on-the-job performance by the candidate</p> <ul style="list-style-type: none"> <li>• observation of interviewing techniques</li> <li>• review of advertisements for staffing vacancies</li> <li>• review of documentation provided to successful candidate</li> <li>• oral or written questioning to assess knowledge of selection processes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units from the Certificate IV in Human Resources.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Job descriptions</i></b> may include:	<ul style="list-style-type: none"> <li>• attributes</li> <li>• competencies required by staff</li> <li>• job or person specifications</li> <li>• job title and purpose of position</li> <li>• necessary skills and knowledge</li> <li>• qualifications</li> <li>• selection criteria</li> <li>• tasks or duties associated with the position</li> </ul>
<b><i>Legislation, codes and national standards</i></b> may include:	<ul style="list-style-type: none"> <li>• award and enterprise agreements, and relevant industrial instruments</li> <li>• relevant industry codes of practice</li> <li>• relevant legislation from all levels of government that affects business operation, especially in regard to OHS and environmental issues, equal opportunity, industrial relations and anti-discrimination</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Occupational health and safety (OHS) considerations</i> may include:	<ul style="list-style-type: none"> <li>• establishment and maintenance of OHS training, records, induction processes</li> <li>• performance against OHS legislation and organisation's OHS system, especially policies, procedures and work instructions</li> </ul>
<i>Advertising</i> may include:	<ul style="list-style-type: none"> <li>• electronic or print</li> <li>• internal or external</li> <li>• outsourcing</li> </ul>
<i>Staffing requirements</i> may include:	<ul style="list-style-type: none"> <li>• permanent, temporary, full-time, part-time or casual</li> </ul>

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Develop recruitment, selection and induction policies and procedures	1.1. Analyse strategic and operational plans and policies to identify relevant policies and objectives 1.2. Develop <b><i>recruitment, selection and induction policies and procedures</i></b> and supporting documents 1.3. Review options for technology to improve the efficiency and effectiveness of the recruitment and selection process 1.4. Obtain support for policies and procedures from senior managers 1.5. Trial forms and documents that support policies and procedures and make necessary adjustments 1.6. Communicate policies and procedures to relevant staff and provide training if required
2. Recruit and select staff	2.1. Determine future human resources needs in collaboration with <b><i>relevant managers and sections</i></b> 2.2. Ensure current position descriptors and person specifications for vacancies are used by managers

ELEMENT	PERFORMANCE CRITERIA
	<p>and others involved in the recruitment, selection and induction processes</p> <p>2.3. Provide access to training and other forms of support to all persons involved in the recruitment and selection process</p> <p>2.4. Ensure that <i>advertising</i> of vacant positions complies with organisational policy and legal requirements</p> <p>2.5. Utilise <i>specialists</i> where necessary</p> <p>2.6. Ensure that <i>selection procedures</i> are in accordance with organisational policy and legal requirements</p> <p>2.7. Ensure that processes for advising applicants of selection outcome are followed</p> <p>2.8. Ensure that job offers and contracts of employment are executed promptly and that new appointments are provided with advice about salary, terms and conditions</p>
3. Manage staff induction	<p>3.1. Provide access to training and ongoing support for all persons engaged in staff induction</p> <p>3.2. Check that induction processes are followed across the organisation</p> <p>3.3. Oversee the management of probationary employees and provide them with feedback until their employment is confirmed or terminated</p> <p>3.4. Obtain feedback from participants and relevant managers on the extent to which the induction process is meeting its objectives</p> <p>3.5. Make refinements to induction policies and procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to liaise across the organisation and to ensure that policies and procedures are well supported
- leadership skills to engage others and to ensure that good processes are followed and supported

## REQUIRED SKILLS AND KNOWLEDGE

- literacy skills to document clear policies and procedures and to develop proformas to support recruitment, selection and induction.

### Required knowledge

- concept of outsourcing
- diversity, equal employment opportunity and anti-discrimination principles and associated legislation
- employee contracts
- industrial relations
- recruitment and selection methods, including assessment centres
- relevant legislation on equal opportunity, industrial relations and anti-discrimination
- relevant terms and conditions of employment
- understanding of psychometric and skills testing programs
- workplace relations regulations, workplace relations legislation and other relevant legislation.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- development of a policy and procedures framework for recruitment, selection and induction OR critical analysis of an existing policy and procedures framework for recruitment, selection and induction
- knowledge of relevant legislation.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- assessment of written reports on recruitment,

<b>EVIDENCE GUIDE</b>	
	<p>selection and induction processes</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of training and other forms of support provided to all persons involved in the recruitment and selection process</li> <li>• evaluation of trialling of forms and documents that support policies and procedures</li> <li>• review of documentation outlining feedback obtained from participants and relevant managers on the extent to which the induction process is meeting its objectives</li> <li>• oral or written questioning to assess knowledge of relevant legislation and selection processes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units form the Diploma of Human Resource Management.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement employee relations strategy and policies for own work area	<p>1.1.Ensure <b><i>employee relations</i></b> strategy is consistent with organisational strategic objectives</p> <p>1.2.Develop <b><i>strategies and policies</i></b> through the application of a risk management approach and extensive consultation and participation by relevant groups and individuals</p> <p>1.3.Ensure strategy and policies take account of equal opportunity, family/work relationships and promote the absence of discrimination and/or harassment</p> <p>1.4.Develop <b><i>risk management</i></b> strategies which take account of the withdrawal of labour and other potential outcomes of disputes</p> <p>1.5.Identify potential areas of conflict (if any) and ensure strategies and policies take account of the objectives of relevant groups and individuals</p>
2. Build and maintain a productive culture	<p>2.1.Negotiate awards, agreements, and contracts which balance organisational objectives and <b><i>employee rights and obligations</i></b></p> <p>2.2.Identify and meet all legal and organisational requirements within the <b><i>conditions of employment</i></b></p> <p>2.3.Undertake regular and timely consultation and communication with individuals and relevant groups</p> <p>2.4.Develop policies and practices to facilitate employee recruitment, retention and satisfaction</p> <p>2.5.Provide induction programs and training to develop competence and confidence, and to ensure work is performed safely and effectively</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.6. Provide opportunities for employees to understand their role and how it contributes to the achievement of organisational objectives</p> <p>2.7. Develop, regularly review and update individual and team development plans</p> <p>2.8. Evaluate and revise employee relations policies regularly</p>
3. Resolve employee relations problems	<p>3.1. Establish processes for early intervention to identify and minimise problems or grievances</p> <p>3.2. Communicate <i>problem solving processes</i> to, and obtain support from, all relevant groups and individuals</p> <p>3.3. Provide training to develop competence in conflict management, negotiation and dispute resolution</p> <p>3.4. Obtain <i>specialist</i> advice where appropriate or where formal hearings are required</p> <p>3.5. Ensure processes are fair, equitable and consistent with all relevant awards agreements and legislation</p> <p>3.6. Ensure problem solving processes provide for external mediation and conciliation, and arbitration where appropriate</p>
4. Manage diversity	<p>4.1. Develop plans for the promotion of <i>diversity</i> within the organisation</p> <p>4.2. Openly promote diversity and its benefits within the organisation</p> <p>4.3. Develop <i>education and communication plans</i> to promote and encourage diversity</p> <p>4.4. Develop and implement processes to deal with events which inhibit the organisation from meeting its diversity objectives</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

## REQUIRED SKILLS AND KNOWLEDGE

- communication/consultation skills to ensure all relevant groups and individuals are advised of what is occurring and are provided with an opportunity for input
- conflict management skills to mediate, negotiate and/or attempt to obtain consensus between individuals/groups in conflict situations which are dysfunctional in relation to the organisation's performance
- networking skills to ensure support from key groups and individuals for concepts/ideas/products/services
- risk management skills to analyse, identify and develop mitigation strategies for identified risks.

## Required knowledge

- human resource planning
- human resource specialist assistance available
- industrial agreements
- key result areas of the organisation
- organisational plans and objectives (strategic, tactical and operational)
- organisational policies relating to balancing family/work relationships
- organisational support services for employees (external and internal)
- performance measurement systems utilised within the organisation
- relevant legislation from all levels of government that affects business operation such as:
  - award and enterprise agreements and relevant industrial instruments
  - Occupational Health and Safety
  - environmental issues
  - equal opportunity
  - industrial relations
  - anti-discrimination
  - relevant industry codes of practice
- staff development strategies
- unfair dismissal rules and due process.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<b>EVIDENCE GUIDE</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• While the unit is designed for non-specialist HR managers, there is an expectation that competence will be demonstrated in the implementation of the full range of employee relations activities</li> <li>• Negotiation of employment agreements/contracts and the maintenance of high standards of performance in respect to equal opportunity and the management of diversity are key areas of assessment</li> <li>• Conflict management and early intervention in respect to employee grievances/problems are also key elements of the evidence to be presented during assessment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• assessment of written reports on employee relations</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of presentations on employee relations management</li> <li>• oral or written questioning to assess knowledge of human resources function/s being reviewed and policy frameworks</li> <li>• evaluation of research undertaken</li> <li>• review of documentation analysing the strengths and weaknesses of employee relations' policies and strategies</li> <li>• review of documentation of behaviours associated with managing diversity and, resolving employee problems and grievances.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Employee relations includes:	<ul style="list-style-type: none"> <li>all of the activities in an organisation which impact on the employees' terms and conditions of employment and their personal well-being and satisfaction with their work environment</li> </ul>
<i>Strategies and policies</i> may include:	<ul style="list-style-type: none"> <li>discipline</li> <li>equal opportunity</li> <li>human resource strategy</li> <li>induction and training</li> <li>industrial/labour relations</li> <li>organisational values statement</li> <li>performance management</li> <li>racial discrimination/vilification</li> <li>remuneration and benefits</li> <li>selection/recruitment</li> <li>sexual harassment</li> </ul>
<i>Risk management</i> means:	<ul style="list-style-type: none"> <li>the process of identification of potential negative events and the development of plans to mitigate or minimise the likelihood of the negative event occurring and/or the consequences in the event it does occur</li> </ul>
<i>Employee rights and obligations</i> refers to:	<ul style="list-style-type: none"> <li>those contained within any award agreement or contract of employment, or implied terms of those agreements, together with all rights and obligations under the laws of the Commonwealth and the relevant state/territory</li> </ul>
<i>Conditions of employment</i> may include:	<ul style="list-style-type: none"> <li>grievance procedures</li> <li>holidays and leave entitlements</li> <li>hours of work</li> <li>penalty rates</li> <li>salary/wages</li> <li>superannuation</li> </ul>
<i>Problem solving processes</i> may include:	<ul style="list-style-type: none"> <li>arbitration</li> <li>conciliation</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>dispute resolution procedures</li> <li>grievance procedures</li> <li>mediation</li> </ul>
<i>Specialist</i> means:	<ul style="list-style-type: none"> <li>person expert in the conduct of formal hearings in the relevant jurisdiction</li> </ul>
<i>Diversity</i> refers to:	<ul style="list-style-type: none"> <li>any difference between individuals and groups, and includes age, gender, race, nationality, political and philosophical beliefs, or any other different individual or group characteristic</li> </ul>
<i>Education and communication plans</i> refers to:	<ul style="list-style-type: none"> <li>a structured program for the dissemination of information, and the receipt of feedback information from individuals, relevant to the process or activity</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect information	1.1. Collect <i>information</i> in a timely manner and ensure that it is relevant to organisational needs 1.2. Use <i>business equipment/technology</i> available in the work area to effectively obtain information 1.3. Apply <i>organisational requirements</i> relating to security and confidentiality in handling information
2. Process workplace information	2.1. Use business equipment/technology to process information in accordance with organisational requirements 2.2. Process information in accordance with defined timeframes, guidelines and procedures 2.3. Update, modify and file information in accordance with organisational requirements 2.4. Collate and despatch information in accordance with specified timeframes and organisational requirements
3. Maintain information systems	3.1. Maintain information and filing systems in accordance with organisational requirements 3.2. Identify, <i>remove</i> and/or <i>relocate inactive or dead files</i> in accordance with organisational requirements 3.3. Establish and assemble new files in accordance with organisational requirements 3.4. Update reference and index systems in accordance with organisational requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to read and understand organisation's recordkeeping and information systems(including classification systems), to follow sequenced written instructions and to comprehend/interpret nature of record content
- numeracy skills to sequence and index files
- planning skills to organise work priorities and arrangements
- problem-solving skills to solve routine problems
- technology skills to select and use technology appropriate to maintaining workplace information.

#### Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety
- organisational policies and procedures relating to collecting and processing workplace information
- organisational recordkeeping/filing systems and security procedures
- organisation's business and structure
- range of filing systems including paper-based and software-based.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

<b>EVIDENCE GUIDE</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• applying organisational policies and procedures for collecting and processing workplace information</li> <li>• accuracy in recording and documenting information</li> <li>• correctly storing, classifying and maintaining documents and records.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of workplace information systems.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of maintenance of information and filing systems</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of the management of information in the workplace.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• general administration units</li> <li>• other information management units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. <b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify and source information needs	1.1. Determine and locate <b><i>information</i></b> required by teams 1.2. Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to <b><i>organisational policies</i></b>
2. Collect, analyse and report information	2.1. Collect information, which is adequate and relevant to the needs of teams, in a timely manner 2.2. Ensure information is in a format suitable for analysis, interpretation and dissemination 2.3. Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired
3. Implement information systems	3.1. Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes 3.2. Use <b><i>technology</i></b> available in the work area to manage information effectively

ELEMENT	PERFORMANCE CRITERIA
	3.3. Submit recommendations for improving the information system to <i>designated persons and/or groups</i>
4. Prepare for information system changes	4.1. Collect information about information system future needs in consultation with <i>colleagues</i> , including those who have a specialist role in resource management 4.2. Ensure estimates of information system future needs reflect the organisation's <i>business plans</i> , and customer and supplier requirements 4.3. Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes 4.4. Prepare team members to work with new technology and information system changes

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to work with information, and to research and present information in ways that are appropriate to the work team
- technology skills to work with a range of information systems.

#### Required knowledge

- information management systems and technology that would be associated with the workplace such as:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>analysis of the information that is required for the effective functioning of the team's work together</li> <li>knowledge of the range of information systems that are, or should be, available in the workplace</li> <li>ability to recognise what information system changes and improvements will be required in the future.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>demonstration of techniques in working with information management systems</li> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>oral or written questioning to assess knowledge of relevant technology</li> <li>review of documentation analysing information trends and developments</li> <li>written reports on future information system needs</li> <li>review of preparation undertaken for team members to work with new technology and information system changes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>other units from the Certificate IV in Frontline Management.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Information</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• archived, filed and historical background data</li> <li>• continuous improvement and quality assurance data</li> <li>• data available internally or externally</li> <li>• data shared and retrieved in various forms such as in writing or verbally, electronically or manually</li> <li>• financial and contractual data</li> <li>• marketing and customer-related data</li> <li>• organisational performance data</li> <li>• planning and organisational documents</li> <li>• policies and procedures</li> </ul>
<p><b><i>Organisational policies</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• guidelines for decision making throughout the organisation that link the formulation of strategy with its implementation</li> <li>• sets of accepted actions approved by the organisation</li> <li>• Standard Operating Procedures</li> </ul>
<p><b><i>Technology</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• computerised systems and software such as databases, project management and word processing</li> <li>• telecommunications devices</li> <li>• any other technology used to carry out work roles and responsibilities</li> </ul>
<p><b><i>Designated persons and/or groups</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• groups designated in workplace policies and procedures</li> <li>• managers or supervisors with management roles and responsibilities concerning information systems</li> <li>• other stakeholders accessing the information system such as customers and service providers</li> <li>• other work groups or teams whose work will be affected by the system</li> </ul>

<b>RANGE STATEMENT</b>	
<i>Colleagues</i> may include:	<ul style="list-style-type: none"> <li>• employees at the same level or more senior managers</li> <li>• occupational health and safety committee members and other specialists</li> <li>• people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities</li> <li>• team members</li> </ul>
<i>Business plans</i> may include:	<ul style="list-style-type: none"> <li>• cash flow projections</li> <li>• long-term budgets/plans</li> <li>• operational plans</li> <li>• short-term budgets/plans</li> <li>• spreadsheet-based financial projections</li> <li>• targets or key performance indicators for production, productivity, wastage, sales, income and expenditure</li> </ul>

## BSBITU306A Design and produce business documents

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and prepare resources	1.1. Select and use appropriate <i>technology</i> and <i>software</i> applications to produce required <i>business documents</i> 1.2. Select layout and style of publication according to information and <i>organisational requirements</i> 1.3. Ensure document design is consistent with company and/or client requirements, using basic design principles 1.4. Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1. Identify, open and generate files and records according to task and organisational requirements 2.2. Design document to ensure efficient entry of information and to maximise the presentation and appearance of information 2.3. Use a range of <i>functions</i> to ensure consistency of design and layout 2.4. Operate <i>input devices</i> within designated requirements
3. Produce document	3.1. Complete document production within designated time lines according to organisational requirements 3.2. Check document produced to ensure it meets task requirements for style and layout 3.3. Store document appropriately and save document to

ELEMENT	PERFORMANCE CRITERIA
	avoid loss of data 3.4. Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1. Proofread document for readability, accuracy and consistency in language, style and layout prior to final output 4.2. Make any modifications to document to meet requirements 4.3. <i>Name</i> and <i>store</i> document in accordance with organisational requirements and exit the application without data/loss damage 4.4. Print and present document according to requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- keyboarding and computer skills to complete a range of formatting and layout tasks
- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread documents to ensure clarity of meaning and conformity to organisational requirements
- numeracy skills to access and retrieve data
- problem-solving skills to determine document design and production processes.

#### Required knowledge

- appropriate technology for production requirements
- functions and features of contemporary computer applications
- organisational policies, plans and procedures
- organisational requirements for document design e.g. style guide.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>designing and producing a minimum of 3 completed business documents, using at least 2 software applications in the production of each document</li> <li>using appropriate data storage options</li> <li>knowledge of the functions and features of contemporary computer applications.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to an actual workplace or simulated environment</li> <li>access to office equipment and resources</li> <li>access to examples of style guides and organisational procedures.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>review of final printed documents</li> <li>demonstration of techniques</li> <li>observation of presentations</li> <li>oral or written questioning to assess knowledge of software applications.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>general administration units</li> <li>other IT use units.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Technology</i></b> may include:	<ul style="list-style-type: none"> <li>• computers</li> <li>• photocopiers</li> <li>• printers</li> <li>• scanners</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• accounting packages</li> <li>• database packages</li> <li>• presentation packages</li> <li>• spreadsheet packages</li> <li>• word processing packages</li> </ul>
<b><i>Business documents</i></b> may include:	<ul style="list-style-type: none"> <li>• accounts statements</li> <li>• client databases</li> <li>• newsletters</li> <li>• project reviews</li> <li>• proposals</li> <li>• reports</li> <li>• web pages</li> </ul>
<b><i>Organisational requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• budgets</li> <li>• correctly identifying and opening files</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• locating data</li> <li>• log-on procedures</li> <li>• manufacturers' guidelines</li> <li>• occupational health and safety policies, procedures and programs</li> <li>• quality assurance and/or procedures manuals</li> <li>• saving and closing files</li> <li>• security</li> <li>• storing data</li> </ul>
<b><i>Functions</i></b> may include:	<ul style="list-style-type: none"> <li>• alternating headers and footers</li> <li>• editing</li> <li>• merging documents</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• spell checking</li> <li>• table formatting</li> <li>• using columns</li> <li>• using styles</li> </ul>
<i>Input devices</i> may include:	<ul style="list-style-type: none"> <li>• keyboard</li> <li>• mouse</li> <li>• numerical key pad</li> <li>• scanner</li> </ul>
<i>Naming</i> documents may include:	<ul style="list-style-type: none"> <li>• appropriate file type</li> <li>• authorised access</li> <li>• file names according to organisational procedure e.g. numbers rather than names</li> <li>• file names which are easily identifiable in relation to the content</li> <li>• file/directory names which identify the operator, author, section, date etc.</li> <li>• filing locations</li> <li>• organisational policy for backing up files</li> <li>• organisational policy for filing hard copies of documents</li> <li>• security</li> </ul>
<i>Storing</i> documents may include:	<ul style="list-style-type: none"> <li>• storage in directories and sub-directories</li> <li>• storage on CD-ROMs, disk drives or back-up systems</li> <li>• storing/filing hard copies of computer generated documents</li> <li>• storing/filing hard copies of incoming and outgoing facsimiles</li> <li>• storing/filing incoming and outgoing correspondence</li> </ul>

## BSBITU404A Produce complex desktop published documents

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to design and produce complex desktop published documents.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals employed in a range of work environments who require well developed skills in desktop publishing. They may be individuals providing administrative support within an enterprise, or others responsible for the production of their own documents.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to produce desktop published documents	1.1. Use safe work practices including addressing <i>ergonomic requirements</i> and using <i>work organisation strategies</i> 1.2. Use <i>energy and resource conservation techniques</i> 1.3. Identify <i>document purpose</i> , audience, presentation and <i>final output</i> requirements, and clarify with relevant personnel as required 1.4. Identify <i>organisational and task requirements</i> for desktop published documents to ensure consistency of style and image
2. Design desktop published documents	2.1. <i>Design</i> document to enhance readability and appearance, according to organisational and task requirements 2.2. Determine document type and assess production and design requirements 2.3. Set up and use master pages, templates and styles to ensure <i>consistency of design and layout</i> 2.4. Set up colour palettes according to organisational and task requirements
3. Create desktop published documents	3.1. Prepare, format and enter required text 3.2. Import text from other applications and resolve any formatting issues 3.3. Scan or import graphics from other applications and

ELEMENT	PERFORMANCE CRITERIA
	resolve any formatting issues 3.4. Use <i>complex software functions</i> to arrange text and graphics on page, according to organisational and task requirements
4. Finalise desktop published documents	4.1. Ensure pages, and combined graphics and text are composed correctly, to suit organisational and task requirements 4.2. Check that numerical sequencing and laydown of document is correct, to meet binding and finishing requirements 4.3. Incorporate bleed allowance in margins and borders
5. Produce desktop published documents	5.1. Review text for possible errors and omissions, and resolve any issues 5.2. Produce completed document in line with required final output 5.3. <i>Name and store text documents</i> , in accordance with organisational requirements and exit the application without information loss/damage 5.4. Prepare text documents within <i>designated time lines</i> and organisational requirements for speed and accuracy 5.5. Use manuals, user documentation and online help to overcome problems with document design and production

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to clarify requirements of documents
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- editing and proofreading skills to check own work for accuracy against original
- keyboarding skills to enter text and numerical data
- literacy skills to read and understand organisation's procedures and to use models or exemplars to produce a range of documents
- problem-solving skills to edit documents and to resolve issues of consistency of

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
design.
<b>Required knowledge</b>
<ul style="list-style-type: none"> <li>• formatting styles and their effect on formatting, readability and appearance of documents</li> <li>• organisational requirements for ergonomics, work periods and breaks, and energy and resource conservation techniques</li> <li>• purposes, uses and functions of desktop publishing software</li> <li>• organisational style guide.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• applying document design and layout principles</li> <li>• producing complex desktop published documents.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to office equipment and resources</li> <li>• access to samples of desktop published documents.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of authenticated documents from the workplace or training environment</li> <li>• demonstration of techniques in a workplace or simulated environment</li> <li>• oral or written questioning to assess knowledge of desktop publishing software functions.</li> </ul>
<b>Guidance information for</b>	Holistic assessment with other units relevant to the

<b>EVIDENCE GUIDE</b>	
<b>assessment</b>	<p>industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other information and communications technology units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Ergonomic requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• avoiding radiation from computer screens</li> <li>• chair height, seat and back adjustment</li> <li>• document holder</li> <li>• footrest</li> <li>• keyboard and mouse position</li> <li>• lighting</li> <li>• noise minimisation</li> <li>• posture</li> <li>• screen position</li> <li>• workstation height and layout</li> </ul>
<p><b><i>Work organisation strategies</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• exercise breaks</li> <li>• mix of repetitive and other activities</li> <li>• rest periods</li> </ul>
<p><b><i>Energy and resource conservation techniques</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• double-sided paper use</li> <li>• recycling used and shredded paper</li> <li>• re-using paper for rough drafts (observing confidentiality requirements)</li> <li>• utilising power-save options for equipment</li> </ul>
<p><b><i>Document purpose</i></b> may include using:</p>	<ul style="list-style-type: none"> <li>• call outs</li> <li>• captions</li> <li>• concordance files</li> <li>• different odd and even pages</li> <li>• document protection</li> <li>• drawing</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• forms with fields</li> <li>• hyperlinks</li> <li>• long documents</li> <li>• linked or embedded objects</li> <li>• mail merge data documents</li> <li>• master documents</li> <li>• MS WordArt</li> <li>• multiple headers and footers</li> <li>• multiple sections</li> <li>• multiple users</li> <li>• primary mail merge documents</li> <li>• subdocuments</li> <li>• templates</li> </ul>

-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement operational plan	<p>1.1. Collate, analyse and organise details of <b><i>resource requirements</i></b> in consultation with <b><i>relevant personnel, colleagues and specialist resource managers</i></b></p> <p>1.2. Implement <b><i>operational plans</i></b> to contribute to the achievement of organisation's performance/business plan</p> <p>1.3. Identify and use <b><i>key performance indicators</i></b> (KPIs) to monitor operational performance</p> <p>1.4. Undertake <b><i>contingency planning</i></b> and <b><i>consultation processes</i></b></p> <p>1.5. Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes</p>
2. Implement resource acquisition	<p>2.1. Recruit and induct employees within <b><i>organisation's policies, practices and procedures</i></b></p> <p>2.2. Implement plans for acquisition of physical</p>

ELEMENT	PERFORMANCE CRITERIA
	resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	<p>3.1. Monitor <i>performance systems and processes</i> to assess progress in achieving profit/productivity plans and targets</p> <p>3.2. Analyse and use budget and actual financial information to monitor profit/productivity performance</p> <p>3.3. Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies</p> <p>3.4. Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely</p> <p>3.5. Present recommendations for variation to operational plans to the <i>designated persons/groups</i> and gain approval</p> <p>3.6. Implement <i>systems, procedures and records</i> associated with performance in accordance with organisation's requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

#### Required knowledge

- principles and techniques associated with:
  - contingency planning
  - methods for monitoring and reporting on performance
  - monitoring and implementing operations and procedures
  - problem identification and methods of resolution

## REQUIRED SKILLS AND KNOWLEDGE

- relevant budgeting and financial analysis, interpretation and reporting requirements
- resource management systems at the tactical implementation level
- resource planning and acquisition
- tactical risk analysis including identification and reporting requirements.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to monitor and adjust operational performance, produce short-term plans for the department or section, plan and acquire resources, and provide reports on performance as required
- knowledge of principles and techniques associated with monitoring and implementing operations and procedures.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of documentation outlining contingency planning and consultation processes undertaken
- demonstration of techniques in managing performance
- evaluation of mentoring, coaching and supervision provided to support individuals and teams to use resources effectively, economically and safely.

**EVIDENCE GUIDE****Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other units from the Certificate IV in Frontline Management.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Resource requirements*** may refer to:

- goods and services to be purchased and ordered
- human, physical and financial resources - both current and projected
- stock requirements and requisitions

***Relevant personnel, colleagues and specialist resource managers*** may include:

- colleagues and specialist resource managers
- managers
- occupational health and safety committees and other people with specialist responsibilities
- other employees
- people from a wide range of social, cultural and ethnic backgrounds, and people with a range of physical and mental abilities
- supervisors

***Operational plans*** may refer to:

- organisational plans
- tactical plans developed by the department or section to detail product and service performance

***Key performance indicators*** may refer to:

- measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and to identify areas for improvements

<b>RANGE STATEMENT</b>	
<b><i>Contingency planning</i></b> may refer to:	<ul style="list-style-type: none"> <li>• contracting out or outsourcing human resources and other functions or tasks</li> <li>• diversification of outcomes</li> <li>• finding cheaper or lower quality raw materials and consumables</li> <li>• increasing sales or production</li> <li>• recycling and re-use</li> <li>• rental, hire purchase or alternative means of procurement of required materials, equipment and stock</li> <li>• restructuring of organisation to reduce labour costs</li> <li>• risk identification, assessment and management processes</li> <li>• seeking further funding</li> <li>• strategies for reducing costs, wastage, stock or consumables</li> <li>• succession planning</li> </ul>
<b><i>Consultation processes</i></b> may refer to:	<ul style="list-style-type: none"> <li>• mechanisms used to provide feedback to the work team in relation to outcomes of consultation</li> <li>• meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans</li> </ul>
<b><i>Organisation's policies, practices and procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• organisational culture</li> <li>• Standard Operating Procedures</li> <li>• organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources</li> <li>• undocumented practices in line with organisational operations</li> </ul>
<b><i>Performance systems and processes</i></b> may refer to:	<ul style="list-style-type: none"> <li>• informal systems used by frontline managers for the work team in the place of existing organisation-wide systems</li> <li>• formal processes within the organisation to measure performance, such as: <ul style="list-style-type: none"> <li>• feedback arrangements</li> <li>• individual and teamwork plans</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• KPIs</li> <li>• specified work outcomes</li> </ul>
<i>Designated persons/groups</i> may include:	<ul style="list-style-type: none"> <li>• other affected work groups or teams and groups designated in workplace policies and procedures</li> <li>• those who have the authority to make decisions and/or recommendations about operations such as workplace supervisors, other managers</li> </ul>
<i>Systems, procedures and records</i> may include:	<ul style="list-style-type: none"> <li>• databases and other recording mechanisms for ensuring records are kept in accordance with organisational requirements</li> <li>• individual and team performance plans</li> <li>• organisational policies and procedures relative to performance</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop business plan	1.1. Review and evaluate pre-existing <i>strategic, business and operational plan</i> , if available 1.2. Analyse and interpret business vision, mission, values and objectives 1.3. Consult with <i>key stakeholders</i> 1.4. Review market requirements for the product or service, profile customer needs and research pricing options 1.5. Develop <i>performance objectives and measures</i> through consultation with key stakeholders 1.6. Identify financial, human and physical resource requirements for the business 1.7. Consider any permits or licences that may be required for new activity 1.8. Write <i>business plan</i>

ELEMENT	PERFORMANCE CRITERIA
2. Monitor performance	2.1. Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2. Ensure skilled labour is available to implement plan 2.3. Test performance measurement systems and refine, if necessary 2.4. Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5. Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1. Analyse performance reports against planned objectives 3.2. Review performance indicators and refine if necessary 3.3. Ensure groups and individuals contributing to under-performance are <i>coached</i> , and provide training where appropriate 3.4. Review system processes and work methods regularly as part of continuous improvement

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical and research skills to review the market, to research competitors and to review pricing structures
- coaching and communication skills to remediate any under-performance in the work group or individuals
- planning and organising skills to sequence activities and to develop a logical structure.

#### Required knowledge

- performance measurement approaches and benchmarking
- options for developing business plans.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>analysis of the strengths and weaknesses of a range of business plans</li> <li>implementation of a business plan including evaluation of performance against documented indicators in key results areas</li> <li>knowledge of performance measurement approaches and benchmarking.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>assessment of written reports/examples of business plans and their outcomes</li> <li>direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>oral or written questioning to assess knowledge of options for developing business plans</li> <li>review of development of performance objectives and measures</li> <li>review of how business plan was communicated to all relevant parties.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>other units from the Advanced Diploma of Management.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Strategic, business and operational plan</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• previously formulated:             <ul style="list-style-type: none"> <li>• action plan</li> <li>• business goals</li> <li>• competitor analysis</li> <li>• financing arrangements or financial targets</li> <li>• management arrangements and/or personnel requirements</li> <li>• marketing approaches</li> <li>• product or service research or analysis</li> </ul> </li> </ul>
<p><b><i>Key stakeholders</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• business partners or financiers</li> <li>• customers</li> <li>• shareholders</li> <li>• staff</li> <li>• technical experts or advisers</li> </ul>
<p><b><i>Performance objectives and measures</i></b> may relate to:</p>	<ul style="list-style-type: none"> <li>• efficiency measures</li> <li>• input measures such as staff time or dollars allocated</li> <li>• outcomes measures</li> <li>• qualitative indicators such as feedback from customers, effect on the wider market or competitors, staff reports</li> <li>• quantitative indicators, such as numbers produced and sold, turnover, customer satisfaction ranking, lower staff turnover</li> </ul>
<p><b><i>Business plan</i></b> includes:</p>	<ul style="list-style-type: none"> <li>• description of the business</li> <li>• business products and services</li> <li>• marketing activity</li> <li>• financial indicators</li> <li>• productivity and performance targets for key result areas such as:             <ul style="list-style-type: none"> <li>• community awareness or branding</li> <li>• environmental impact</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• governance or management</li> <li>• quality</li> <li>• sales</li> <li>• triple bottom line</li> <li>• workforce</li> </ul>
<i>Coaching</i> refers to:	<ul style="list-style-type: none"> <li>• informal on-the-job and off-the-job advice and training to improve performance</li> </ul>

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and maintain knowledge of products and services	<p>1.1. Actively and regularly research knowledge and understanding of <i>industry products and services</i> using <i>authoritative sources</i></p> <p>1.2. Use available <i>product and service documentation</i> to identify and understand characteristics of products and services, and to make comparisons with other products and services</p> <p>1.3. Accurately document and maintain <i>information</i> on products and services in a format consistent with <i>organisational requirements</i></p> <p>1.4. Apply acquired knowledge to improve quality within personal work areas</p>
2. Recommend products and services	<p>2.1. Ensure that recommendations on products and services are in line with organisational requirements</p> <p>2.2. Provide recommendations that emphasise <i>product and service issues</i> relevant to client needs</p> <p>2.3. Ensure that evidence in support of recommendations is verifiable and presented in a suitable format</p> <p>2.4. Structure recommendations to identify clear benefits to clients and the organisation</p>
3. Advise on promotional activities	<p>3.1. Provide advice that is clear, is supported by verifiable evidence and is compatible with organisational requirements</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2.Ensure that promotional documentation and materials are appropriate to presentation of the organisation's products and services</p> <p>3.3.Ensure that costs of promotional activities conform to budget resources</p> <p>3.4.Estimate impact of <i>promotional activities</i> from <i>verifiable customer feedback sources</i></p> <p>3.5.Evaluate the benefits of promotional activities and incorporate in plans for future promotional activities</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread texts to ensure clarity of meaning, and accuracy of grammar and punctuation
- technology skills to select and use technology appropriate to a task
- communication skills to monitor and advise on customer service strategies
- problem-solving skills to deal with customer enquiries or complaints
- analytical skills to identify trends and positions of products and services.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisation's products and services
- organisational policies and procedures for customer service including handling customer complaints
- product and service standards and best practice models
- principles and techniques of public relations and product promotion
- mechanisms to obtain and analyse customer feedback.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• assessing and reporting on customer satisfaction</li> <li>• identifying commercial characteristics of products and services</li> <li>• knowledge of product and service standards and best practice models.</li> <li>• preparing and structuring advice on products and services</li> <li>• researching market availability of products and services.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of promotional strategies</li> <li>• examples of documents relating to customer service standards and policies.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• assessment of written reports</li> <li>• demonstration of techniques</li> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• evaluation of promotional activities plans</li> <li>• observation of performance in role plays</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of promotional strategies and sources of product</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>information</p> <ul style="list-style-type: none"> <li>• review of documentation outlining information on products and services</li> <li>• review of products and services recommendations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• sales and/or customer service units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Industry products and services</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• competitor products and services</li> <li>• complementary products and services</li> <li>• emerging products and services</li> <li>• historical products and services</li> <li>• organisation's products</li> <li>• specified range of products and services within an organisation's offerings</li> </ul>
<p><b><i>Authoritative sources</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• authorised suppliers</li> <li>• industry associations</li> <li>• industry conferences</li> <li>• recognised industry media sources</li> </ul>
<p><b><i>Product and service documentation</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• colleagues' knowledge</li> <li>• consumer reports</li> <li>• industry reports</li> <li>• marketing data</li> <li>• operational guidelines</li> <li>• sales figures</li> </ul>
<p><b><i>Information</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• competitive features of products or services</li> <li>• cost and production data</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• distribution processes</li> <li>• innovations</li> <li>• problems with products or services</li> <li>• product trends</li> <li>• sales records (monthly forecasts, targets achieved)</li> <li>• sales trends</li> </ul>
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• confidentiality and security requirements</li> <li>• defined resource parameters</li> <li>• ethical standards</li> <li>• filing and documentation storage processes</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• payment and delivery options</li> <li>• pricing and discount policies</li> <li>• quality and continuous improvement processes and standards</li> <li>• quality assurance and/or procedures manuals</li> <li>• replacement and refund policy and procedures</li> <li>• who is responsible for products or services</li> </ul>
<i>Product and service issues</i> may include:	<ul style="list-style-type: none"> <li>• customer delivery</li> <li>• faults</li> <li>• market share data</li> <li>• organisational product knowledge</li> <li>• production down-time</li> <li>• sales figures</li> </ul>
<i>Promotional activities</i> may include:	<ul style="list-style-type: none"> <li>• advertisements</li> <li>• client functions</li> <li>• employee functions</li> <li>• media announcements</li> <li>• product launches</li> <li>• web pages</li> </ul>

## BSBREL402A Build client relationships and business networks

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to establish, maintain and improve client relationships, and to actively participate in networks to support attainment of key business outcomes.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals in a variety of roles who are required to establish, maintain and improve client relationships to facilitate organisational objectives.</p> <p>This unit primarily applies to marketing and sales professionals who depend on excellent interpersonal relationships and communication skills to achieve outcomes, but may also apply to other individuals working in any industry.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Initiate interpersonal communication with clients	1.1. Identify and use <i>preferred client communication styles and methods</i> 1.2. Establish rapport with clients using <i>verbal</i> and <i>non-verbal communication</i> processes 1.3. Investigate and act upon opportunities to offer positive feedback to clients 1.4. Use open questions to promote two-way communication 1.5. Identify and act upon potential <i>barriers to effective communication</i> with clients 1.6. Initiate communication processes which relate to client needs, preferences and expectations
2. Establish client relationship management strategies	2.1. Develop client loyalty objectives focussing on the development of long term business partnerships 2.2. Assess client profile information to determine approach 2.3. Develop <i>client loyalty strategies</i> to attract and retain

ELEMENT	PERFORMANCE CRITERIA
	clients in accordance with the business strategy 2.4. Identify and apply <i>client care and client service standards</i>
3. Maintain and improve ongoing relationships with clients	3.1. Develop <i>strategies to obtain ongoing feedback</i> from clients to monitor satisfaction levels 3.2. Develop strategies to elicit feedback which provide information in a form that can be used to improve relationships with clients 3.3. Obtain feedback to develop and implement strategies which maintain and improve relationships with clients
4. Build and maintain networks	4.1. Allocate time to establish and maintain business contacts 4.2. Participate in <i>business associations</i> and/or <i>professional development activities</i> to establish and maintain a <i>network</i> of support for the business and to enhance personal knowledge of the market 4.3. Establish communication channels to exchange <i>information and ideas</i> 4.4. Provide, seek and verify information to the network

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to determine client needs and preferences through active listening and presenting ideas clearly and precisely
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- interpersonal skills to establish rapport, and to build and maintain relationships with clients.

#### Required knowledge

- key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects business operations, such as:
  - anti-discrimination legislation
  - consumer laws including appropriate state/territory legislation

**REQUIRED SKILLS AND KNOWLEDGE**

- ethical principles
- marketing code of practice
- privacy laws
- Trade Practices Act
- marketing communications concepts and processes
- principles and techniques for effective communication and networking
- sources of business related networks.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- establishing and maintaining relationships with a range of clients related to the candidate's business
- participating in and providing, an active contribution to a business related network.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to office equipment and resources.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- assessment of written reports or journals on client relationship activities
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of the candidate communicating with clients
- observation of presentations made to business networks
- oral or written questioning to assess knowledge and understanding

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• review of authenticated documents from the workplace or training environment</li> <li>• review of testimony from team members, colleagues, supervisors or managers.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other relationship management units</li> <li>• marketing units.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather and organise information	<p>1.1. Gather and organise <b><i>information</i></b> in a format suitable for analysis, interpretation and dissemination in accordance with <b><i>organisational requirements</i></b></p> <p>1.2. Access information held by the organisation ensuring accuracy and relevance in line with established organisational requirements</p> <p>1.3. Ensure that <b><i>methods of collecting information</i></b> are reliable and make efficient use of resources in accordance with organisational requirements</p> <p>1.4. Identify research requirements for combining online research with non-electronic sources of information</p> <p>1.5. Use <b><i>business technology</i></b> to access, organise and monitor information in accordance with organisational requirements</p> <p>1.6. Update, modify, maintain and store information, in accordance with organisational requirements</p>
2. Research and analyse information	<p>2.1. Clearly define <b><i>objectives of research</i></b> ensuring consistency with organisational requirements</p> <p>2.2. Ensure that data and <b><i>research strategies</i></b> used are valid and relevant to the requirements of the research and make efficient use of available resources</p> <p>2.3. Identify <b><i>key words and phrases</i></b> for use as part of any online search strategy, including the use of <b><i>Boolean operators</i></b> and other search tools</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4. Use reliable <i>methods of data analysis</i> that are suitable to research purposes 2.5. Ensure that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and <i>business objectives</i>
3. Present information	3.1. Present recommendations and issues in an appropriate format, style and structure using suitable business technology 3.2. Structure and format reports in a clear manner that conforms to organisational requirements 3.3. Report and distribute research findings in accordance with organisational requirements 3.4. Obtain <i>feedback</i> and comments on suitability and sufficiency of findings in accordance with organisational requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- problem-solving skills to deal with information which is contradictory, ambiguous, inconsistent or inadequate
- technology skills to select and use technology appropriate to a task
- research skills to identify and access information.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational record keeping/filing systems, security procedures and safe

**REQUIRED SKILLS AND KNOWLEDGE**

recording practices

- organisational policies and procedures relating to distribution of workplace information, and legal and ethical obligations
- research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- presenting information and data
- maintaining and handling data and documents systematically
- analysing and interpreting data to support organisational activities
- knowledge of research processes and strategies to identify new sources of information.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of research tasks and resources.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- analysis of responses to case studies and scenarios
- demonstration of techniques
- observation of presentations
- review of documentation outlining recommendations and issues

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• review of reports outlining research findings.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• general administration units</li> <li>• IT use units</li> <li>• Governance units</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• demographic data</li> <li>• service delivery records</li> <li>• computer databases (library catalogue, customer records, subscription database, internet)</li> <li>• computer files (letters, memos and other documents)</li> <li>• correspondence (faxes, memos, letters, email)</li> <li>• financial figures</li> <li>• forms (insurance forms, membership forms)</li> <li>• information on training needs</li> <li>• invoices (from suppliers, to debtors)</li> <li>• marketing reports/plans/budgets</li> <li>• personnel records (personal details, salary rates)</li> <li>• production targets</li> <li>• sales records (monthly forecasts, targets achieved)</li> </ul>
<b><i>Organisational requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• anti-discrimination and related policy</li> <li>• business and performance plans</li> <li>• Code of Conduct/Code of Ethics</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• defined resource parameters</li> <li>• ethical standards</li> <li>• goals, objectives, plans, systems and processes</li> <li>• information protocols</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• management and accountability channels</li> <li>• OHS policies, procedures and programs</li> <li>• procedures for updating records</li> <li>• quality assurance and/or procedures manuals</li> <li>• security and confidentiality requirements</li> </ul>
<b>Methods of collecting information</b> may include:	<ul style="list-style-type: none"> <li>• checking research provided by others</li> <li>• checking written material including referrals and client files</li> <li>• individual research</li> <li>• information from other organisations</li> <li>• interviews with community members, colleagues/customers</li> <li>• observation and listening</li> <li>• previous file records</li> <li>• questioning (in person or indirect)</li> <li>• recruitment applications and other forms</li> </ul>
<b>Business technology</b> may include:	<ul style="list-style-type: none"> <li>• answering machine</li> <li>• computer</li> <li>• fax machine</li> <li>• photocopier</li> <li>• telephone</li> </ul>
<b>Objectives of research</b> may include:	<ul style="list-style-type: none"> <li>• comparative analysis</li> <li>• hypothesis testing</li> <li>• identification of trends</li> <li>• industry pricing policies</li> <li>• process mapping</li> <li>• situational diagnosis</li> </ul>
<b>Research strategies</b> may include:	<ul style="list-style-type: none"> <li>• data analysis</li> <li>• documentation reviews</li> <li>• focus groups</li> <li>• interviewing colleagues and clients</li> <li>• online searching</li> <li>• product sampling</li> <li>• subscription databases</li> </ul>

<b>RANGE STATEMENT</b>	
<b><i>Key words and phrases</i></b> may include:	<ul style="list-style-type: none"> <li>• American spellings when searching online</li> <li>• cultural or geographic terms</li> <li>• using different thesauri in different databases</li> </ul>
<b><i>Boolean operators</i></b> may include:	<ul style="list-style-type: none"> <li>• exclude - / NOT</li> <li>• include + / AND</li> <li>• or</li> <li>• phrase searching " "( )</li> <li>• variations, depending on the resource being used</li> </ul>
<b><i>Methods of data analysis</i></b> may include:	<ul style="list-style-type: none"> <li>• data sampling</li> <li>• feedback on results</li> <li>• peer review</li> <li>• review of previous research</li> <li>• statistical analysis</li> </ul>
<b><i>Business objectives</i></b> may include:	<ul style="list-style-type: none"> <li>• community capacity building</li> <li>• community development</li> <li>• service provision</li> <li>• business planning</li> <li>• financial performance</li> <li>• flexibility, responsiveness</li> <li>• interpersonal communication</li> <li>• marketing and customer service</li> <li>• organisational values and behaviours</li> <li>• people management</li> <li>• work procedures and quality assurance manuals</li> </ul>
<b><i>Feedback</i></b> may include:	<ul style="list-style-type: none"> <li>• audit documentation and reports</li> <li>• comments from community, board members, clients and colleagues</li> <li>• customer satisfaction questionnaires</li> <li>• quality assurance data</li> <li>• returned goods</li> </ul>

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify risks	1.1. Identify the <i>context</i> for risk management 1.2. Identify <i>risks</i> using <i>tools</i> , ensuring all reasonable steps have been taken to identify all risks 1.3. Document identified risks in accordance with relevant policies, procedures and legislation
2. Analyse and evaluate risks	2.1. Analyse and document risks in consultation with relevant <i>stakeholders</i> 2.2. Undertake <i>risk categorisation</i> and determine <i>level of risk</i> 2.3. Document analysis processes and outcomes
3. Treat risks	3.1. Determine appropriate <i>control measures</i> for risks and assess for strengths and weaknesses 3.2. Identify control measures for all risks

ELEMENT	PERFORMANCE CRITERIA
	3.3.Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures 3.4.Choose and implement control measures for own area of operation and/or responsibilities 3.5.Prepare and implement treatment plans
4. Monitor and review effectiveness of risk treatment/s	4.1.Regularly review implemented treatment/s against <i>measures of success</i> 4.2.Use review results to improve the treatment of risks 4.3.Provide assistance to auditing risk in own area of operation 4.4.Monitor and review management of risk in own area of operation

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills sufficient to read and understand a variety of texts; and to write, edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- research and data collection skills to monitor and evaluate risks
- problem-solving skills to appropriately address identified risks.

#### Required knowledge

- Australian and international standards for risk management
- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety
- organisational policies and procedures relating to risk management processes and

**REQUIRED SKILLS AND KNOWLEDGE**

strategies

- auditing requirements relating to risk management.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- identification, analysis and evaluation of risks
- demonstrated understanding of personal role in relation to wider organisational or project context
- demonstrated understanding of risk management processes and procedures.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to workplace documentation relating to risk management
- access to risk management tools and frameworks.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of documentation outlining risk analysis processes and outcomes
- analysis of responses to case studies and scenarios
- oral or written questioning to assess knowledge of Australian and international standards for risk management
- review of implementation of treatment plans.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

**EVIDENCE GUIDE**

- general administration units
- other risk management units.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Context*** may include:

- any related projects or organisations
- any resources, including physical assets, which are vital to operations
- key operational elements and service of the organisation
- organisation or project, how it is organised and its capabilities
- own role and responsibilities in relation to overall project or organisation design

***Risks*** may include:

- commercial and legal relationships
- economic circumstances and scenarios
- human behaviour
- individual activities
- management activities and controls
- natural events
- political circumstances
- positive risk
- technology - technological issues

***Tools*** may include:

- documentation to assist in process of identifying risk, and assessing impact and likelihood of occurrence
- standard instruments developed for the organisation and contextualised for sections of the workplace's operations, such as checklists and testing procedures
- tools to prioritise risks, including where relevant, numerical scoring systems for risks

<b>RANGE STATEMENT</b>	
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• contractors</li> <li>• employees</li> <li>• financial managers</li> <li>• insurance agents</li> <li>• managers</li> <li>• public</li> <li>• service providers</li> <li>• suppliers</li> <li>• unions</li> <li>• volunteers</li> </ul>
<i>Risk categorisation</i> may include:	<ul style="list-style-type: none"> <li>• likelihood of risks: <ul style="list-style-type: none"> <li>• almost certain</li> <li>• likely</li> <li>• possible</li> <li>• unlikely</li> <li>• rare</li> </ul> </li> <li>• consequences of risks: <ul style="list-style-type: none"> <li>• insignificant</li> <li>• minor</li> <li>• moderate</li> <li>• major</li> <li>• catastrophic</li> <li>• current control measures</li> </ul> </li> </ul>
<i>Level of risk</i> may include:	<ul style="list-style-type: none"> <li>• low, treated with routine procedures</li> <li>• moderate, with specific responsibility allocated for the risk, and monitoring and response procedures implemented</li> <li>• high, requiring action, as it has potential to be damaging to the organisation or project</li> <li>• extreme, requiring immediate action, as it has potential to be devastating to the organisation or project</li> </ul>
<i>Control measures</i> may include:	<ul style="list-style-type: none"> <li>• hierarchy of controls: <ul style="list-style-type: none"> <li>• reduction in likelihood of risks</li> <li>• reduction of consequences of risks</li> <li>• retention of risks</li> <li>• risk aversion</li> <li>• transfer of responsibility of risks</li> </ul> </li> </ul>

**RANGE STATEMENT**

<i>Measures of success</i> may include:	<ul style="list-style-type: none"> <li>• costs</li> <li>• reductions in impact</li> <li>• reductions in likelihood</li> <li>• reductions in occurrence</li> </ul>

## BSBRSK501B Manage risk

### Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i>.</p> <p>Revised unit. Required knowledge updated to incorporate current Australian Standards.</p> <p>Replaces BSBRSK501A Manage risk</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage risks in a range of contexts across the organisation or for a specific business unit or area.

### Application of the Unit

This unit addresses the management of the risk across the organisation or within a business unit or area. It does not assume any given industry setting.

This unit applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish risk context	<p>1.1 Review organisational processes, procedures and requirements for undertaking <b>risk</b> management</p> <p>1.2 Determine <b>scope</b> for risk management process</p> <p>1.3 Identify internal and external stakeholders and their issues</p> <p>1.4 Review political, economic, social, legal, technological and policy context</p> <p>1.5 Review strengths and weaknesses of existing arrangements</p> <p>1.6 Document critical success factors, goals or objectives for area included in scope</p> <p>1.7 Obtain support for risk management activities</p> <p>1.8 Communicate with <b>relevant parties</b> about the risk management process and invite participation</p>
2. Identify risks	<p>2.1 Invite relevant parties to assist in the identification of risks</p> <p>2.2 <b>Research</b> risks that may apply to scope</p> <p>2.3 Use <b>tools and techniques</b> to generate a list of risks that apply to the scope, in consultation with relevant parties</p>
3. Analyse risks	<p>3.1 Assess <b>likelihood</b> of risks occurring</p> <p>3.2 Assess <b>impact or consequence</b> if risks occur</p> <p>3.3 <b>Evaluate</b> and prioritise risks for treatment</p>
4. Select and implement treatments	<p>4.1 Determine and select most appropriate <b>options</b> for treating risks</p> <p>4.2 Develop an <b>action plan</b> for implementing risk treatment</p> <p>4.3 Communicate risk management processes to relevant parties</p> <p>4.4 Ensure all documentation is in order and appropriately stored</p>

	4.5 Implement and monitor action plan 4.6 Evaluate risk management process
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication and literacy skills to consult and negotiate, to prepare communications about risk management, and to encourage stakeholder involvement
- organisational and management skills to plan and implement risk management processes
- problem-solving and innovation skills to find practical ways to manage identified risks.

### Required knowledge

- AS/NZS ISO 31000:2009 Risk Management - Principles and Guidelines
- legislation, codes of practice and national standards, for example:
  - duty of care
  - company law
  - contract law
  - environmental law
  - freedom of information
  - industrial relations law
  - privacy and confidentiality
  - legislation relevant to organisation's operations
  - legislation relevant to operation as a business entity
- organisational policies and procedures, including:
  - risk management strategy
  - policies and procedures for risk management
- overall operations of organisation
- reasonable adjustment in the workplace for people with a disability
- types of available insurance and insurance providers.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• risk management plan which includes a detailed stakeholder analysis, explanation of the risk context, critical success factors, identified and analysed risks, and treatments for prioritised risks</li> <li>• details of monitoring arrangements for risk management plan and an evaluation of the risk management plan's efficacy in treating risks</li> <li>• knowledge of relevant legislation, codes of practice and national standards.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to workplace documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of risk management policies and procedures</li> <li>• review of documented critical success factors, and goals or objectives for area</li> <li>• review of risks prioritised for treatment</li> <li>• evaluation of action plan for implementing risk treatment</li> <li>• evaluation of documentation communicating risk management processes to relevant parties.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• financial management units, governance units, human resource management units, or technology units.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b>Risks</b> may include those relating to:</p>	<ul style="list-style-type: none"> <li>• commercial relationships</li> <li>• economic circumstances and scenarios</li> <li>• human behaviour</li> <li>• individual activities</li> <li>• legislation</li> <li>• management activities and controls</li> <li>• natural events</li> <li>• political circumstances</li> <li>• technology.</li> </ul>
<p><b>Scope</b> may apply to:</p>	<ul style="list-style-type: none"> <li>• given project</li> <li>• specific business unit or area</li> <li>• specific functional such as:             <ul style="list-style-type: none"> <li>• financial management</li> <li>• OHS</li> <li>• governance</li> </ul> </li> <li>• external environment</li> <li>• internal environment</li> <li>• whole organisation.</li> </ul>
<p><b>Relevant parties</b> may include:</p>	<ul style="list-style-type: none"> <li>• all staff</li> <li>• internal and external stakeholders</li> <li>• senior management</li> <li>• specific teams or business units</li> <li>• technical experts.</li> </ul>
<p><b>Research</b> may include:</p>	<ul style="list-style-type: none"> <li>• data or statistical information</li> <li>• information from other business areas</li> <li>• lessons learned from other projects or activities</li> <li>• market research</li> <li>• previous experience</li> <li>• public consultation</li> <li>• review of literature and other information sources.</li> </ul>
<p><b>Tools and techniques</b> may include:</p>	<ul style="list-style-type: none"> <li>• brainstorming</li> <li>• checklists</li> <li>• fishbone diagrams</li> </ul>

	<ul style="list-style-type: none"> <li>• flowcharts</li> <li>• scenario analysis.</li> </ul>
<b>Likelihood</b> may refer to:	<ul style="list-style-type: none"> <li>• probability of a given risk occurring, such as: <ul style="list-style-type: none"> <li>• very likely</li> <li>• likely</li> <li>• possible</li> <li>• unlikely</li> <li>• rare.</li> </ul> </li> </ul>
<b>Impact or consequence</b> may refer to:	<ul style="list-style-type: none"> <li>• significance of outcomes if the risk occurs, such as: <ul style="list-style-type: none"> <li>• disastrous</li> <li>• severe</li> <li>• moderate impact</li> <li>• minimal impact.</li> </ul> </li> </ul>
<b>Evaluation</b> of risks includes:	<ul style="list-style-type: none"> <li>• considering the likelihood of the risk occurring</li> <li>• considering the impact of the risk</li> <li>• determining which risks are most significant and are therefore priorities for treatment.</li> </ul>
<b>Options</b> may include:	<ul style="list-style-type: none"> <li>• avoiding the risk</li> <li>• changing the consequences</li> <li>• changing the likelihood</li> <li>• retaining the risk</li> <li>• sharing the risk with a third party.</li> </ul>
<b>Action plans</b> should include:	<ul style="list-style-type: none"> <li>• what actions are required</li> <li>• who is taking responsibility</li> <li>• time lines</li> <li>• monitoring processes.</li> </ul>

Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### Elements and Performance Criteria

Element	Performance Criteria
1 Employ prospecting methods	<p>1.1 Identify a range of <b>prospecting methods</b></p> <p>1.2 Consider and evaluate the strengths and limitations of primary and secondary <b>prospecting methods</b></p> <p>1.3 Select prospecting methods to match the market to which the <b>product</b> is targeted</p> <p>1.4 Target present, previous and new <b>clients</b> through chosen prospecting methods</p>
2 Qualify prospects	<p>2.1 Research and establish criteria for qualifying leads</p> <p>2.2 Ensure criteria are established according to buyer accessibility, <b>buyer motives</b>, product affordability, purchase authority, legal compliance and return for the seller</p> <p>2.3 Ensure the established criteria represent a standard against which the buying potential of individuals and groups is gauged</p>
3 Manage prospect information	<p>3.1 Develop a system to record prospect information</p> <p>3.2 Implement the system for recording prospect information</p> <p>3.3 Monitor the system for recording prospect information for effectiveness</p> <p>3.4 Evaluate the system for recording prospect information</p>

### 3.5 Refine the system for recording prospect information based on evaluation of system

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

literacy skills to interpret legal requirements, company policies and procedures

research and data analysis skills to determine prospect requirements

technology skills to design and record formats to facilitate information storage and retrieval.

### Required knowledge

principles of buyer motives

identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:

anti-discrimination

ethical principles

consumer protection

contract law

privacy laws

Trade Practices Act

benefits and key features of own organisation's and competitors' products

information management strategies used to manage prospect data

prospecting methods used in the sales process.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- demonstration of the use and management of different prospecting methods targeting a present, previous and new client
- research and establishment of criteria used in qualifying leads identified through prospecting methods
- recording, storage and retrieval of prospect information.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to organisational sales prospect information, databases and records.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- assessment of criteria developed to qualify sales leads
- demonstration of prospecting methods
- direct questioning combined with portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of use of prospecting methods
- oral or written questioning to assess knowledge of principles of buyer motives
- review of research undertaken to establish criteria for qualifying leads
- evaluation of the system developed to record prospect information.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

customer service units

other sales units.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Prospecting methods** may include:

brokers

cold canvassing

databases

direct mail

internet

intra organisational leads

journals

magazines

media advertising

networking

newspapers

personal observation

public records

referrals

spotters

telemarketing

**Products** may include:

goods

ideas

services

**Clients** may include:

consumers  
customers  
members  
patients  
members of other business units within an organisation  
other work teams within an organisation  
person or organisation who receives or has the potential to receive products, services or ideas supplied by the organisation

**Buyer motives** may include:

browsing  
buying for unqualified prospect e.g. dependant  
gift  
housekeeping  
replacement item  
self reward  
self-gratification

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop marketing strategies	<p>1.1. Analyse the business and its key products or services to determine the focus of marketing activities, in accordance with the objectives of the business plan</p> <p>1.2. Evaluate the customer base and target market for the small business as a basis for the <b><i>marketing objectives and strategies</i></b></p> <p>1.3. Determine marketing objectives and strategies that are ethically and culturally appropriate, in consultation with <b><i>relevant people</i></b> and in accordance with the business plan</p>
2. Determine a marketing mix for the business	<p>2.1. Balance product mix, volumes and pricing to optimise sales and profit</p> <p>2.2. Evaluate the costs and benefits of using different <b><i>distribution channels</i></b> and/or providing different <b><i>levels of customer service</i></b> and consider the results in determining the <b><i>marketing mix</i></b></p> <p>2.3. Determine promotional activities to suit the target market</p> <p>2.4. Consider customer needs and preferences in determining the marketing mix</p> <p>2.5. Determine the marketing mix according to market and business needs</p>
3. Implement marketing	<p>3.1. Brief persons involved in the marketing effort on their roles and responsibilities, to ensure the success</p>

ELEMENT	PERFORMANCE CRITERIA
strategies	of marketing strategies 3.2. Plan and implement <i>promotional activities</i> , in accordance with marketing objectives and budgetary requirements
4. Monitor and improve marketing performance	4.1. Monitor marketing activities and evaluate business performance according to the objectives and targets of the business plan 4.2. Analyse <i>performance gaps</i> and take corrective action or set new targets 4.3. Encourage all relevant people to propose ways to improve marketing performance 4.4. Seek and analyse <i>customer reaction</i> to all aspects of the marketing mix, using culturally appropriate processes, to improve targeting and outcomes 4.5. Conduct ongoing research of customer requirements to identify opportunities for change and improvement 4.6. Monitor and investigate changes in the market for new opportunities to aid business development

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to question, clarify and report
- literacy and numeracy skills to research information, to analyse data and to interpret market data.

#### Required knowledge

- industry market trends
- methods of analysing costs and benefits of marketing strategies
- methods of developing marketing objectives and marketing mix
- methods of monitoring customer satisfaction
- relevant market analysis and research
- relevant marketing concepts and methods.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>developing a marketing strategy and choosing a marketing mix for the small business that are culturally appropriate and that complement the business plan</li> <li>implementing and monitoring the marketing strategy/plan to optimise the chances of small business success</li> <li>knowledge of relevant marketing concepts and methods.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>access to relevant documentation</li> <li>candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>portfolio of evidence including marketing strategy and monitoring of marketing performance</li> <li>oral or written questioning to assess knowledge of industry market trends</li> <li>review of analysis of performance gaps and corrective action taken or new targets set</li> <li>review of promotional activities implemented.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>BSBSMB404A Undertake small business planning.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Marketing objectives and strategies</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• achieving lower costs of production and distribution than competitors</li> <li>• creating a very different product line or service so that the business becomes a class leader in the industry</li> <li>• distribution</li> <li>• pricing, presentation and display of products/services</li> <li>• product design and packaging</li> <li>• product range and mix</li> <li>• promotion and advertising</li> <li>• pursuing cost leadership and/or product differentiation within a specialist market segment</li> </ul>
<p><b><i>Relevant people</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• accountant or other specialist services</li> <li>• family members, work team members, sub-contractors, community members</li> <li>• franchise agency</li> <li>• financial backers, clients</li> <li>• owner/operator, partners, directors, shareholders</li> <li>• regulatory bodies</li> <li>• trade or industry associations</li> </ul>
<p><b><i>Distribution channels</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• dealer, re-seller, franchisee</li> <li>• distributor, delivery service, mail order, telesales</li> <li>• self-access, wholesale, retail</li> </ul>
<p><b><i>Levels of customer service</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• after sales service</li> <li>• one-on-one personal service</li> <li>• sales assistance for problems/queries only</li> </ul>
<p><b><i>Marketing mix</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• distribution</li> <li>• level of service</li> <li>• pricing</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• promotion</li> <li>• quality, range</li> <li>• safety features</li> <li>• technical features, design</li> </ul>
<i>Promotional activities</i> may include:	<ul style="list-style-type: none"> <li>• advertising in national, suburban or local newspapers</li> <li>• advertising on radio or television</li> <li>• canvassing</li> <li>• development of networks and strategic alliances</li> <li>• display posters</li> <li>• exhibitions, in-store promotions</li> <li>• involvement in community projects</li> <li>• mail drops</li> <li>• professional/industry journals</li> <li>• sponsorship</li> <li>• staff development programs to enhance customer service orientation</li> <li>• website</li> <li>• word of mouth, referral, testimonials</li> </ul>
<i>Performance gaps</i> may include:	<ul style="list-style-type: none"> <li>• over achievement of performance targets</li> <li>• under achievement of performance targets</li> </ul>
<i>Customer reaction</i> may be determined through:	<ul style="list-style-type: none"> <li>• customer meetings, focus groups</li> <li>• identification of new business opportunities</li> <li>• informal discussion</li> <li>• sales to contact ratio</li> <li>• survey/other feedback mechanisms</li> <li>• trend analysis</li> </ul>

# BSBSMB405B Monitor and manage small business operations

## Modification History

Release	Comments
Release 1	<p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Required knowledge and Range Statement changed to include environmentally sustainable practices</p> <p>Replaces BSBSMB405A Monitor and manage small business operations</p>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate a small business and to implement a business plan. The strategies involve monitoring, managing and reviewing operational procedures.

Specific legal requirements apply to the management of a small business.

## Application of the Unit

This work is undertaken by individuals who operate a small business.

The unit is suitable for existing micro and small businesses or a department in a larger organisation.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop <i>operational strategies and procedures</i>	<p>1.1 Develop an action plan to provide a clear and coherent direction, in accordance with the <i>business goals and objectives</i></p> <p>1.2 Identify <i>occupational health and safety (OHS) and environmental issues</i> and implement strategies to minimise risk factors</p> <p>1.3 Develop a <i>quality system</i> for the business in line with industry standards, compliance requirements and cultural criteria</p> <p>1.4 Develop performance measures and <i>operational targets</i> to conform with the business plan</p> <p>1.5 Develop strategies for innovation, including the utilisation of existing, new or emerging technologies, where practicable, to optimise business performance</p>
2. Implement operational strategies and procedures	<p>2.1 Implement systems and key performance indicators/targets to monitor business performance and customer satisfaction</p> <p>2.2 Implement systems to control stock, expenditure/cost, wastage/shrinkage and risks to health and safety in accordance with the business plan</p> <p>2.3 Maintain staffing requirements, where applicable, within budget to maximise productivity</p> <p>2.4 Carry out the provision of goods/services in accordance with established legal, ethical cultural and <i>technical standards</i></p> <p>2.5 Provide goods/services in accordance with time, cost and quality specifications, and customer requirements</p> <p>2.6 Apply quality procedures to address product/service and customer requirements</p>
3. Monitor business performance	3.1 Regularly monitor/review the achievement of operational targets to ensure optimum business performance, in accordance

	<p>with the business plan goals and objectives</p> <p>3.2 Review systems and structures, with a view to more effectively supporting business performance</p> <p>3.3 Investigate and analyse operating problems to establish causes and implement changes as required as part of the business quality system</p> <p>3.4 Amend operational policies and procedures to incorporate corrective action</p>
4. Review business operations	<p>4.1 Review and adjust business plan, as required, to maintain business viability, in accordance with business goals and objectives</p> <p>4.2 Clearly record proposed changes to aid future planning and evaluation</p> <p>4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to develop criteria and targets for the business plan
- communication skills to question, clarify and report
- literacy skills to interpret legal requirements, company policies and procedures
- numeracy skills to manage performance information and to control the finances
- technology skills to use relevant business equipment.

### Required knowledge

- methods for developing and maintaining networks
- methods for implementing operation and revenue control systems
- methods for monitoring performance and implementing improvements
- OHS responsibilities and procedures for managing hazards
- principles of risk management relevant to the business, including risk assessment
- quality system principles and methods
- relevant industry codes of practice
- relevant marketing, sales and financial concepts
- relevant performance measures

- role of innovation
- systems to manage staff, stock, expenditure, services and customer service
- environmentally sustainable business practice and operation
- technical or specialist skills relevant to the business operation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• developing strategies and procedures to successfully manage the operation of the business</li> <li>• making appropriate adjustments to the business operations as required</li> <li>• knowledge of quality system principles and methods.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to relevant documentation</li> <li>• candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• portfolio of evidence including operational strategies and procedures</li> <li>• oral or written questioning to assess knowledge of principles of risk management relevant to the business, including risk assessment</li> <li>• review of analysis of operating problems (establishing causes and implementing changes as required as part of the business quality system)</li> <li>• review of records proposing changes to the business operations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• BSBSMB406A Manage small business finances</li> </ul>

	<ul style="list-style-type: none"> <li>• BSBSMB407A Manage a small team.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement financial plan	<p>1.1. Identify <i>financial information</i> requirements and obtain <i>specialist services</i>, as required, to profitably operate and extend the business in accordance with the business plan</p> <p>1.2. Produce financial budgets/projections, including <i>cash flow</i> estimates, as required for each forward period, and distribute to <i>relevant people</i> in accordance with legal requirements</p> <p>1.3. Negotiate, secure and manage business capital to best enable implementation of the business plan and to meet the requirements of <i>financial backers</i></p> <p>1.4. Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements</p> <p>1.5. Develop, monitor and maintain client <i>credit policies</i>, including contingencies for debtors in default, to maximise cash flow</p> <p>1.6. Select key performance indicators to enable ongoing monitoring of financial performance</p> <p>1.7. Record and communicate financial procedures to relevant people to facilitate implementation of the business plan</p>
2. Monitor financial performance	2.1. Regularly monitor and report on financial performance targets and analyse data to establish the

ELEMENT	PERFORMANCE CRITERIA
	<p>extent to which the <i>financial plan</i> has been met</p> <p>2.2. Monitor marketing and operational strategies for their effects on the financial plan</p> <p>2.3. Calculate and evaluate <i>financial ratios</i> according to own/industry benchmarks</p> <p>2.4. Assess financial plan to determine whether variations or alternative plans are needed, and change as required</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to interpret financial data
- communication skills to negotiate capital and to report on performance
- literacy skills to interpret legal requirements and financial reports
- numeracy skills to calculate costs, prices, profit and other financial information.

#### Required knowledge

The following knowledge must be assessed as part of this unit:

- benchmarking
- financial decision making relevant to the business
- financial indicators
- purpose of financial reports
- preparation and interpretation of budget/actual reports
- principles for preparation of balance sheets and their interpretation
- principles for preparation of profit and loss statements and their interpretation
- stock records/stock control relevant to the business.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

<b>EVIDENCE GUIDE</b>	
Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• development, implementation and review of strategies for the ongoing management of finance</li> <li>• maintenance of day-to-day financial management of the business as well as implementation of broad financial strategies</li> <li>• knowledge of purpose of financial reports.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to relevant documentation</li> <li>• candidate's individual circumstances and work in the context of establishing or running a small business, are the basis for assessment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• portfolio of evidence including financial reports</li> <li>• preparation and review of financial ratios</li> <li>• review of cash flow projections</li> <li>• analysis of development, monitoring and maintenance of client credit policies</li> <li>• oral or written questioning to assess knowledge of principles for preparation of balance sheets and their interpretation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• BSBSMB402A Plan small business finances</li> <li>• BSBSMB405A Monitor and manage small business operations.</li> </ul>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different

**RANGE STATEMENT**

work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Financial plan*** may include:

- analysis of sales by product/service, identifying where they were sold and to whom
- cash flow estimates for each forward period
- current financial state of the enterprise (or owner/operator)
- estimates of profit and loss projections for each forward period
- financial performance to date (if applicable)
- likely return on investment
- monthly, quarterly or annual returns
- non-recurrent assets calculations
- profit, turnover, capital and equity targets
- projected profit targets, pricing strategies, margins
- projections of likely financial results (budgeting)
- projections, which may vary depending on the importance of such information and the stage in the life of the business
- resources required to implement the proposed marketing and production strategies (staff, materials, plant and equipment)
- review of financial inputs required (sources and forms of finance)
- risks and measures to manage or minimise risks
- working, fixed, debt and equity capital
- working in conjunction with external consultants e.g. investment analysts, accountants, financiers

***Financial information*** may include:

- accrual of staff leave/entitlements
- asset management strategies which may include:
  - owning, leasing, sharing, syndicating
  - maintaining and deploying assets
- asset registers
- balance sheets
- bookkeeping/accounting/stock/job costing records
- business activity statements
- business capital
- cash book

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• cash flow forecasts</li> <li>• financial budgets</li> <li>• financial indicators, which may be short-, medium- and/or long-term</li> <li>• payroll records, superannuation entitlements</li> <li>• profit and loss statements</li> <li>• ratios for profitability, liquidity/efficiency/financial structure</li> <li>• risk management</li> <li>• statements/forecasts</li> <li>• taxation returns including goods and services tax</li> </ul>
<i>Specialist services</i> may include:	<ul style="list-style-type: none"> <li>• accountants</li> <li>• business brokers/business consultants</li> <li>• government agencies</li> <li>• industry/trade associations</li> <li>• lawyers and providers of legal advice</li> <li>• mentors</li> <li>• online gateways</li> <li>• providers of training in accounting software</li> </ul>
<i>Cash flow</i> may include:	<ul style="list-style-type: none"> <li>• anticipated payments</li> <li>• anticipated receipts</li> <li>• customer credit policy/debt recovery</li> <li>• taxation provisions</li> </ul>
<i>Relevant people</i> may include:	<ul style="list-style-type: none"> <li>• family members</li> <li>• financial backers</li> <li>• franchise agency</li> <li>• owner/operator</li> <li>• partners</li> <li>• regulatory bodies</li> <li>• trade or industry associations</li> </ul>
<i>Financial backers</i> may include:	<ul style="list-style-type: none"> <li>• financiers/banks/lending institutions</li> <li>• leasing and hire purchase financiers</li> <li>• providers of venture capital</li> <li>• shareholders/partners/owners/family/friends</li> </ul>
<i>Credit policies</i> may include:	<ul style="list-style-type: none"> <li>• collateral</li> <li>• credit limits</li> <li>• credit references</li> <li>• debt collection</li> <li>• payment options</li> <li>• proof of Indigenous identity</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• trading terms</li> </ul>
<i>Financial ratios</i> may include:	<ul style="list-style-type: none"> <li>• current ratio</li> <li>• days debtors outstanding</li> <li>• days stock on hand</li> <li>• expense percentages</li> <li>• gross profit percentage</li> <li>• liquid ratio</li> <li>• net profit percentage</li> <li>• proprietary/debt ratio</li> <li>• return on investment/return on total assets</li> <li>• staff productivity measures</li> <li>• stock turn rates</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage	1.1. Identify environmental regulations applying to the enterprise 1.2. Analyse procedures for assessing <i>compliance</i> with environmental/sustainability regulations 1.3. Collect information on environmental and resource

ELEMENT	PERFORMANCE CRITERIA
	<p>efficiency systems and procedures, and provide to the work group where appropriate</p> <p>1.4. Collect, analyse and organise information from a range of <i>sources</i> to provide information/advice and tools/resources for improvement opportunities</p> <p>1.5. Measure and document current resource usage of members of the work group</p> <p>1.6. Analyse and document current <i>purchasing strategies</i></p> <p>1.7. Analyse current work processes to access information and data to assist in identifying areas for improvement</p>
2. Set targets for improvements	<p>2.1. Seek input from <i>stakeholders, key personnel and specialists</i></p> <p>2.2. Access external sources of information and data as required</p> <p>2.3. Evaluate alternative solutions to workplace environmental issues</p> <p>2.4. Set efficiency targets</p>
3. Implement performance improvement strategies	<p>3.1. Source and use appropriate <i>techniques and tools</i> to assist in achieving efficiency targets</p> <p>3.2. Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management</p> <p>3.3. Implement and integrate <i>environmental and resource efficiency improvement plans</i> for own work group with other operational activities</p> <p>3.4. Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area</p> <p>3.5. Seek <i>suggestions</i> and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate</p> <p>3.6. Implement costing strategies to fully value environmental assets</p>
4. Monitor performance	<p>4.1. Use and/or develop evaluation and monitoring, tools and technology</p> <p>4.2. Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders</p> <p>4.3. Evaluate strategies and improvement plans</p>

ELEMENT	PERFORMANCE CRITERIA
	4.4. Set new efficiency targets, and investigate and apply new tools and strategies 4.5. Promote successful strategies and reward participants where possible

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analytical skills to analyse problems, to devise solutions and to reflect on approaches taken
- change management skills
- communication skills to answer questions, clarify and acknowledge suggestions relating to work requirements and efficiency
- communication/consultation skills to support information flow from stakeholders to the work group
- innovation skills to identify improvements, to apply knowledge about resource use to organisational activities and to develop tools
- literacy skills to comprehend documentation, to interpret environmental and energy efficiency requirements, to create tools to measure and monitor improvements and to report outcomes
- numeracy skills to analyse data on organisational resource consumption and waste product volumes
- planning and organising skills to implement environmental and energy efficiency management policies and procedures relevant to own work area
- problem-solving skills to devise approaches to improved environmental sustainability and to develop alternative approaches as required
- technology skills to operate and shut down equipment; where relevant, to use software systems for recording and filing documentation to measure current usage; and to use word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information
- supervisory skills to work effectively with a team

#### Required knowledge

- best practice approaches relevant to own area of responsibility and industry
- compliance requirements within work area for all relevant environmental/sustainability legislation, regulations and codes of practice including resource hazards/risks associated with work area, job specifications and procedures

## REQUIRED SKILLS AND KNOWLEDGE

- environmental and energy efficiency issues, systems and procedures specific to industry practice
- external benchmarks and support for particular benchmarks to be used within organisation, including approaches to improving resource use for work area and expected outcomes
- OHS issues and requirements
- organisational structure and reporting channels and procedures
- quality assurance systems relevant to own work area
- strategies to maximise opportunities and to minimise impact relevant to own work area
- supply chain procedures
- terms and conditions of employment including policies and procedures, such as daily tasks, work area responsibilities, employee, supervisor and employer rights, equal opportunity

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- knowledge of relevant compliance requirements within work area
- developing plans to make improvements
- planning and organising work group activities in relation to measuring current use and devising strategies to improve usage
- monitoring resource use and improvements for environmental performance relative to work area and supervision
- ensuring appropriate action is taken within work area in relation to environmental/sustainability compliance and potential hazards
- implementing new approaches to work area in an effort to resolve and improve environmental and resource efficiency issues and reporting as required.

<b>EVIDENCE GUIDE</b>	
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to a range of environment/sustainability legislation, standards, guidelines and procedural requirements relevant to specific work area, daily responsibilities and supervision</li> <li>• access to a range of information, workplace documentation and resources such as compliance obligations, organisation plans, work supervision and responsibilities</li> <li>• access to reports from other parties involved in the process of identifying and implementing improvements</li> <li>• evidence is relevant to the particular workplace role, including work area, staff, stakeholders, equipment, systems and documentation.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• response to case studies</li> <li>• review of reports of activities of work group in relation to measuring resource use and developing improvement strategies</li> <li>• review of work plans outlining approaches to improved practices with documented benchmarks</li> <li>• analysis of the way in which advice is sought and suggestions are made about improvements</li> <li>• observation over time and in a range of situations in relation to review of overall work area and staff, to assess and measure resource use, hazards and compliance</li> <li>• review of checklists to identify and assess resource usage at the beginning and end of the unit; reports on meetings around procedures and improvement processes and monitoring within the workplace; lists of environmental hazards/risks or inefficiencies or opportunities for improvements identified in the workplace</li> <li>• analysis of implementation of programs such as a</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>green office program, supply chain program for purchasing sustainable products, or an environmental management framework</p> <ul style="list-style-type: none"> <li>oral or written questioning to assess knowledge of environmental and energy efficiency issues, systems and procedures specific to industry practice.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>BSBATSIC411C Communicate with the community</li> <li>BSBINN301A Promote innovation in a team environment</li> <li>BSBLED401A Develop teams and individuals</li> <li>BSBMGT402A Implement operational plan</li> <li>BSBMGT403A Implement continuous improvement</li> <li>BSBRSK401A Identify risk and apply risk management processes.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Compliance</i></b> may include:	<ul style="list-style-type: none"> <li>meeting relevant laws, by-laws and regulations or best practice or codes of practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act): <ul style="list-style-type: none"> <li>international</li> <li>commonwealth</li> <li>state/territory</li> <li>industry</li> <li>organisation.</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
<i>Sources</i> may include:	<ul style="list-style-type: none"> <li>• organisation specifications</li> <li>• regulatory sources</li> <li>• relevant stakeholders</li> <li>• resource use.</li> </ul>
<i>Purchasing strategies</i> may include:	<ul style="list-style-type: none"> <li>• influencing suppliers to take up environmental sustainability approaches</li> <li>• researching and participating in programs such as a supply chain program to purchase sustainable products.</li> </ul>
<i>Stakeholders, key personnel and specialists</i> may include:	<ul style="list-style-type: none"> <li>• individuals and groups both inside and outside the organisation who have direct or indirect interest in the organisation's conduct, actions, products and services, including: <ul style="list-style-type: none"> <li>• customers</li> <li>• employees at all levels of the organisation</li> <li>• government</li> <li>• investors</li> <li>• local community</li> <li>• other organisations</li> <li>• suppliers</li> </ul> </li> <li>• key personnel within the organisation, and specialists outside the organisation who may have particular technical expertise.</li> </ul>
<i>Techniques and tools</i> may include:	<ul style="list-style-type: none"> <li>• examination of invoices from suppliers</li> <li>• examination of relevant information and data</li> <li>• measurements made under different conditions</li> <li>• others as appropriate to the specific industry context.</li> </ul>
<i>Environmental and resource efficiency improvement plans</i> may include:	<ul style="list-style-type: none"> <li>• addressing environmental and resource sustainability initiatives such as environmental management systems, action plans, green office programs, surveys and audits</li> <li>• applying the waste management hierarchy in the workplace</li> <li>• determining organisation's most appropriate waste treatment including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment</li> <li>• initiating and/or maintaining appropriate organisational procedures for operational energy consumption, including stationary</li> </ul>

<b>RANGE STATEMENT</b>	
	<p>energy and non-stationary (transport)</p> <ul style="list-style-type: none"> <li>• preventing and minimising risks, and maximising opportunities such as: <ul style="list-style-type: none"> <li>• improving resource/energy efficiency</li> <li>• reducing emissions of greenhouse gases</li> </ul> </li> <li>• reducing use of non-renewable resources</li> <li>• referencing standards, guidelines and approaches such as: <ul style="list-style-type: none"> <li>• ecological footprinting</li> <li>• Energy Efficiency Opportunities Bill 2005</li> <li>• Global Reporting Initiative</li> <li>• green office program - a cultural change program</li> <li>• green purchasing</li> <li>• Greenhouse Challenge Plus (Australian government initiative)</li> <li>• ISO 14001:1996 Environmental management systems life cycle analyses</li> <li>• product stewardship</li> <li>• supply chain management</li> <li>• sustainability covenants/compacts</li> <li>• triple bottom line reporting.</li> </ul> </li> </ul>
<p><i>Suggestions</i> may include ideas that help to:</p>	<ul style="list-style-type: none"> <li>• prevent and minimise risks and maximise opportunities such as: <ul style="list-style-type: none"> <li>• usage of solar or renewable energies where appropriate</li> <li>• reducing emissions of greenhouse gases</li> <li>• reducing use of non-renewable resources</li> <li>• making more efficient use of resources, energy and water</li> </ul> </li> <li>• maximising opportunities to re-use, recycle and reclaim materials</li> <li>• identifying strategies to offset or mitigate environmental impacts: <ul style="list-style-type: none"> <li>• purchasing carbon credits</li> <li>• energy conservation</li> <li>• reducing chemical use</li> <li>• reducing material consumption</li> </ul> </li> <li>• expressing purchasing power through the selection of suppliers with improved</li> </ul>

**RANGE STATEMENT**

	<p>environmental performance e.g. purchasing renewable energy</p> <ul style="list-style-type: none"> <li>eliminating the use of hazardous and toxic materials.</li> </ul>

## BSBWHS302A Apply knowledge of WHS legislation in the workplace

### Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces and is equivalent to BSBOHS301B Apply knowledge of OHS legislation in the workplace.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to understand work health and safety (WHS) Acts, regulations and codes of practice, and to contribute to actions to achieve compliance with WHS legislation in the workplace.

### Application of the Unit

This unit applies to individuals who contribute to achieving compliance with WHS legislation in the workplace as part of their WHS responsibilities, which are in addition to their main duties.

*NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

### Elements and Performance Criteria

1. Determine the legal framework for WHS in the workplace	<p>1.1 Identify and access <b><i>current WHS legislation and related documentation</i></b> relevant to the workplace, occupation and industry</p> <p>1.2 Apply knowledge of the relationship between WHS Acts, regulations and codes of practice to assist in identifying WHS legislative requirements in the workplace</p> <p>1.3 Identify <b><i>duty holders</i></b></p> <p>1.4 Identify legal obligations and duties for consultation with and training of workers, health and safety representatives, and others</p> <p>1.5 Identify consequences of <b><i>non-compliance</i></b> with WHS Acts, regulations, codes of practice, standards and organisational WHS policies, procedures, processes and systems</p>
2. Contribute to activity that reflects WHS legislative requirements	<p>2.1 Contribute to monitoring compliance with legislation</p> <p>2.2 Contribute to ensuring that workplace complies with legislation</p> <p>2.3 Identify and take <b><i>appropriate action</i></b> on non-compliance with legislation</p> <p>2.4 Recognise limits of own expertise and legal duties, and access help and advice when required</p>
3. Keep up-to-date with legislation and relevant publications	<p>3.1 Use relevant <b><i>sources</i></b> to keep up-to-date with legislation and <b><i>relevant publications</i></b></p> <p>3.2 Communicate information on relevant legislative changes and relevant publications to others</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to contribute effectively to formal and informal WHS meetings
- computer skills to search for, access and download electronic documents and software
- literacy skills to read and understand documents and publications.

### Required knowledge

- legislative duties of self and others
- organisational WHS policies, procedures, processes and systems
- relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- ways to get information about compliance with legislation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• current knowledge of relevant WHS Acts, regulations and codes of practice</li> <li>• identifying and applying WHS legislative requirements applicable to the workplace, occupation and industry</li> <li>• referring issues of non-compliance to responsible persons or authorities</li> <li>• seeking advice from appropriate sources.</li> </ul>
<b>Context of and specific resources</b>	Assessment must ensure access to:

<b>for assessment</b>	<ul style="list-style-type: none"> <li>• relevant information and documentation on compliance requirements, such as:             <ul style="list-style-type: none"> <li>• organisational policies, procedures, plans and standard operating procedures</li> <li>• relevant Acts, regulations, codes of practice, licensing requirements and standards</li> </ul> </li> <li>• relevant internal and external data files</li> <li>• appropriate office equipment and resources used in the identification and rectification of WHS compliance breaches.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate</li> <li>• review of documents on WHS Acts, regulations, codes of practice, standards, policies and procedures developed and communicated to workers</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of applying WHS legislation in conducting work safely</li> <li>• oral or written questioning to assess knowledge of research and data-collection methods to obtain evidence of compliance with WHS legislation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other BSB07 WHS units.</li> </ul>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Current WHS legislation and related documentation</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• current applicable commonwealth and relevant state or territory WHS Acts, regulations and codes of practice</li> <li>• organisational WHS policies, procedures, processes and systems</li> <li>• other documents, such as standards, guidance material and alerts issued by the relevant WHS regulator</li> <li>• other legislation relevant to WHS.</li> </ul>
<p><b><i>Duty holders</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• as specified in WHS Acts:             <ul style="list-style-type: none"> <li>• persons conducting businesses or undertakings (PCBUs) or their officers</li> <li>• workers</li> <li>• other persons at a workplace.</li> </ul> </li> </ul>
<p><b><i>Non-compliance</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• failure to meet legal requirements</li> <li>• inadequate systems of information, instruction, training or supervision</li> <li>• plant, equipment or substances not maintained, or used or stored in an unsafe condition</li> <li>• poor consultation practices</li> <li>• poor design</li> <li>• workplace hazards not identified or controlled</li> <li>• workplace systems not in place or inadequate.</li> </ul>
<p><b><i>Appropriate action</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• contributing to a WHS audit</li> <li>• contributing to a WHS inspection</li> <li>• contributing to engaging external specialists and consultants</li> <li>• contributing to identifying non-compliance with WHS legislation</li> <li>• contributing to implementing, monitoring and evaluating actions to ensure compliance with WHS legislation</li> <li>• making recommendations about how compliance with WHS legislation could be achieved</li> </ul>

	<ul style="list-style-type: none"> <li>• reporting breaches of compliance to responsible persons or authorities</li> <li>• where required, carrying out roles or functions specified in legislation or workplace policies and procedures.</li> </ul>
<i>Sources</i> may include:	<ul style="list-style-type: none"> <li>• audits</li> <li>• Australian and international standards</li> <li>• hazard, incident and investigation reports</li> <li>• industry bodies or groups</li> <li>• manufacturer manuals and specifications</li> <li>• regulatory authorities</li> <li>• training or information sessions and forums</li> <li>• unions</li> <li>• websites, journals and newsletters</li> <li>• WHS professional bodies</li> <li>• WHS specialists.</li> </ul>
<i>Relevant publications</i> may include:	<ul style="list-style-type: none"> <li>• Australian, international, union and industry standards</li> <li>• computer software</li> <li>• electronic or paper documents</li> <li>• WHS guidance notes, fact sheets, guidelines, alerts and other publications issued by commonwealth and state or territory governments, WHS regulators, other bodies and organisations.</li> </ul>

## Unit Sector(s)

Regulation, Licensing and Risk – Work Health and Safety

# BSBWHS503A Contribute to the systematic management of WHS risk

## Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces and is equivalent to BSBOHS504B Apply principles of OHS risk management.</p>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the systematic management of work health and safety (WHS) risk. It addresses the processes and techniques necessary to contribute to the systematic management of WHS risk.

## Application of the Unit

This unit applies to people who work in a range of WHS roles across all industries and who apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

*NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

### Elements and Performance Criteria

1. Access information and data to contribute to the systematic management of WHS risk	1.1 Identify <i>sources of information and data</i> 1.2 Obtain information and data to determine the purposes, objectives, principles and framework of a systematic approach to managing WHS risk
2. Contribute to effective consultation and participation during all stages of the risk-management process	2.1 Identify <i>individuals and parties</i> who need to participate and be consulted 2.2 Apply knowledge of effective consultation and participation to contribute to ensuring effective consultation and participation processes occur
3. Contribute to establishing the context for risk management	3.1 Apply knowledge of <i>WHS legislation</i> to identify <i>duty holders</i> and legislative requirements for WHS risk management 3.2 Identify individuals and parties impacting on risk management 3.3 Apply knowledge of organisation to identify factors that will impact on risk control 3.4 Contribute to establishing the <i>context of the risk-management process</i> 3.5 Contribute to defining <i>risk criteria</i>
4. Contribute to risk assessment	4.1 Apply knowledge of workplace hazards and risks to contribute to <i>risk identification</i> 4.2 Apply knowledge of WHS legislation, risk assessment and workplace WHS information and data to contribute to <i>risk</i>

	<i>analysis and evaluation</i>
5. Contribute to risk treatment	<p>5.1 Apply knowledge of WHS hazard and risk control, and WHS legislation to contribute to the selection of <i>risk treatment options</i></p> <p>5.2 Apply knowledge of the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to prepare and implement risk treatments</p>
6. Contribute to monitoring, reviewing and recording risk-management process	<p>6.1 Apply knowledge of the organisation's WHSMS to contribute to monitoring and reviewing risk-management process</p> <p>6.2 Apply knowledge of the organisation's WHSIS to contribute to recording risk-management process</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to read and interpret relevant workplace information and data
- communication skills to:
  - conduct effective formal and informal meetings and communicate effectively with personnel at all levels of the organisation, and with external parties and individuals
  - use language appropriate to the work team and the task
- consultation and negotiation skills to:
  - develop plans
  - implement and monitor designated actions
- information technology skills to:
  - access and download internal and external information and data on WHS
  - use a range of communication media
- literacy skills to write policies, procedures and plans
- numeracy skills to:
  - analyse workplace information and data
  - carry out calculations
  - identify trends
- organisational skills to manage own tasks within a timeframe
- project-management skills to:
  - achieve continuous improvement
  - action processes about WHS matters

- research skills to:
  - access relevant WHS information and data
  - identify areas for improvement
  - interpret information and data.

## Required knowledge

- difference between hazard and risk
- formal and informal communication and consultation processes, and key personnel related to communication
- how the characteristics and composition of the workforce impact on WHS risk and the management of WHS, including:
  - communication skills
  - cultural background and diversity
  - gender
  - labour market changes
  - language, literacy and numeracy levels of the workforce
  - structure and organisation of the workforce, including part time, casual and contract workers; shift rosters; and geographical location
  - workers with specific needs and limitations
  - workplace culture towards alcohol and other drug use
- internal and external sources of WHS information and data, and how to access them
- limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- organisational behaviour and culture as they impact on WHS and on change
- organisational culture as it impacts on the work team
- organisational WHS policies, procedures, processes and systems
- other functional areas that impact on the management of WHS
- pertinent sections of relevant Australian standards and publications, including:
  - AS/NZS ISO 31000–2009 Risk Management – Principles and Guidelines
  - Standards Australia publication HB 327:2010 Communicating and consulting about risk (Companion to AS/NZS ISO 31000:2009)
  - Standards Australia publication HB 158-2010 Delivering assurance based on ISO 31000:2009 – Risk management – Principles and guidelines
- principles and practices of a systematic approach to managing WHS
- principles of duty of care, including concepts of causation, foreseeability and preventability
- principles of incident causation and injury processes

- range of risk analysis and assessment techniques and tools, and their application and limitations
- relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks
- risk as the effect of uncertainty on objectives
- risk management as a duty of persons conducting businesses or undertakings (PCBUs) or their officers under WHS legislation
- roles and responsibilities of individuals and parties under WHS legislation
- sources of occupational disease and their prevention
- standard industry controls for a range of hazards
- techniques, tools and processes for identifying and controlling health and safety hazards and risks, including:
  - hazard and risk checklists
  - hazard hunts
  - job safety analyses
  - manifests and registers, including for dangerous goods, hazardous chemicals and plant
  - safe work method statements
  - surveys using questionnaires, interviews and other survey techniques
  - workplace inspections and walk throughs
- toxicology of hazardous chemicals and potential health effects in the workplace.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• contributing to the development, implementation and evaluation of a systematic approach to WHS risk management</li> <li>• knowledge of pertinent sections of relevant Australian standards and WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks</li> <li>• preparing an action plan to implement a systematic approach to WHS risk management</li> <li>• preparing positive performance indicators for</li> </ul>

	evaluation of a systematic approach to WHS risk management.
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• actual workplaces and stakeholder groups</li> <li>• office equipment and resources</li> <li>• relevant legislation, standards and guidelines</li> <li>• workplace documentation</li> <li>• reports from other parties consulted during the approach to WHS risk management.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques used to identify, analyse, evaluate, control and monitor risks</li> <li>• direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate</li> <li>• observation of performance in role plays</li> <li>• observation of presentations</li> <li>• review of information and data communicated to stakeholders about the WHS risk process</li> <li>• assessment of comparison of outcomes of WHS risk analysis with criteria</li> <li>• review of documentation of process and outcomes of analysis and evaluation of WHS risk of a task or process.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• BSBWHS502A Manage effective WHS consultation and participation processes</li> <li>• BSBWHS504A Manage WHS hazards and risks</li> <li>• BSBWHS506A Contribute to developing, implementing and maintaining WHS management systems</li> <li>• BSBWHS507A Contribute to managing WHS information systems</li> </ul>

	<ul style="list-style-type: none"> <li>• BSBWHS508A Manage WHS hazards associated with plant.</li> </ul>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Sources of information and data</b> may include:	<ul style="list-style-type: none"> <li>• Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines</li> <li>• Standards Australia publication HB 327:2010 Communicating and consulting about risk (Companion to AS/NZS ISO 31000:2009)</li> <li>• Standards Australia publication HB 158-2010 Delivering assurance based on ISO 31000:2009 – Risk management – Principles and guidelines</li> <li>• industry associations</li> <li>• Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks</li> <li>• unions</li> <li>• WHS professionals</li> <li>• WHS professional associations</li> <li>• WHS specialists.</li> </ul>
<b>Individuals and parties</b> may include:	<ul style="list-style-type: none"> <li>• contractors and suppliers</li> <li>• health and safety committees</li> <li>• health and safety representatives</li> <li>• industry associations</li> <li>• managers and supervisors</li> <li>• PCBUs or their officers</li> <li>• unions</li> <li>• WHS inspectors</li> <li>• WHS professionals</li> <li>• WHS professional associations</li> <li>• WHS regulators</li> <li>• WHS specialists</li> <li>• workers.</li> </ul>
<b>WHS legislation</b> may include:	<ul style="list-style-type: none"> <li>• WHS Acts, regulations and codes of practice,</li> </ul>

	including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks.
<b><i>Duty holders</i></b> may include:	<ul style="list-style-type: none"> <li>• as specified in WHS Acts: <ul style="list-style-type: none"> <li>• PCBUs or their officers</li> <li>• workers</li> <li>• other persons at a workplace.</li> </ul> </li> </ul>
<b><i>Context of the risk-management process</i></b> may include:	<ul style="list-style-type: none"> <li>• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines</li> <li>• as specified in WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks</li> <li>• organisational requirements, such as integration with work processes, and other organisational systems, for example information technology, human resources, quality, management and environment.</li> </ul>
<b><i>Risk criteria</i></b> may include:	<ul style="list-style-type: none"> <li>• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines</li> <li>• as specified in WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks.</li> </ul>
<b><i>Risk identification</i></b> may include:	<ul style="list-style-type: none"> <li>• analysing existing WHS information – desktop identification</li> <li>• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines</li> <li>• as specified in the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks</li> <li>• incident investigations</li> <li>• using hazard registers</li> <li>• workplace inspections.</li> </ul>
<b><i>Risk analysis and evaluation</i></b> may include:	<ul style="list-style-type: none"> <li>• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines</li> <li>• meeting requirements of WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks</li> </ul>

	<ul style="list-style-type: none"> <li>• gathering information on hazards to see what harms they may cause</li> <li>• assessing who and how many may be harmed by a hazard</li> <li>• examining acceptability of a risk</li> <li>• examining severity and likelihood of harm occurring</li> <li>• using risk level matrices to rate and prioritise risks.</li> </ul>
<p><i>Risk treatment options</i> may include:</p>	<ul style="list-style-type: none"> <li>• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines</li> <li>• options based on the hierarchy of control</li> <li>• options based on the as low as reasonably practicable (ALARP) principle</li> <li>• options that meet the requirements of WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks.</li> </ul>

## Unit Sector(s)

Regulation, Licensing and Risk – Work Health and Safety

## BSBWHS508A Manage WHS hazards associated with plant

### Modification History

Release	Comments
Release 1	<p>This Unit first released with <i>BSB07 Business Training Package version 7.0</i>.</p> <p>Replaces and is equivalent to BSBOHS506B Monitor and facilitate the management of hazards associated with plant.</p>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage work health and safety (WHS) hazards associated with plant and to comply with WHS legislation as it applies to plant.

### Application of the Unit

This unit applies to individuals with responsibility for managing WHS hazards associated with plant and eliminating, or where this is not practicable, minimising the risks associated with plant.

The focus is on businesses or undertakings involving management or control of plant.

The focus is not on businesses or undertakings associated with the design of plant; manufacture of plant; supply of plant; installation, construction or commissioning of plant; or issuing of licences associated with plant.

The unit applies to people who work in a range of WHS roles across all industries and who apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

*NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Comply with WHS legislation as it applies to plant	<p>1.1 Apply knowledge of <b>WHS legislation</b> to advise <b>individuals and parties</b> of their duties, rights and obligations with regard to plant as appropriate to their <b>job roles and the nature of the organisation</b></p> <p>1.2 Ensure the management of <b>hazards</b> associated with plant, complies with relevant WHS legislation and organisational policies, procedures, processes and systems</p>
2. Ensure organisational policies, procedures, processes and systems incorporate management of hazards associated with plant	<p>2.1 Apply knowledge of organisational policies, procedures, processes and systems to determine if they effectively manage hazards associated with plant</p> <p>2.2 Develop and implement modifications to organisational policies, procedures, processes and systems as necessary to ensure hazards associated with plant are effectively managed</p> <p>2.3 Follow organisational policies, procedures, processes and systems when managing hazards associated with plant</p>
3. Identify WHS hazards	3.1 Access <b>sources of information, data and advice</b> to assist with

associated with plant	<p>identifying hazards associated with plant</p> <p>3.2 Identify and consult with <i>others</i>, as necessary, as part of hazard identification</p> <p>3.3 <b>Record and report</b> on hazard identification</p>
4. Assess WHS risks associated with plant	<p>4.1 Access sources of information, data and advice to assist with assessing WHS risks associated with plant hazards</p> <p>4.2 Identify and consult with others, as necessary, as part of WHS risk assessments</p> <p>4.3 Record and report on WHS risk assessments</p>
5. Control WHS risks associated with maintenance and continued safe use of plant	<p>5.1 Access sources of information, data and advice, including the outcomes of risk assessments, to assist with developing risk-control options for hazards associated with the maintenance and continued safe use of plant</p> <p>5.2 Identify, consult with and report to others as necessary during all stages of risk control</p> <p>5.3 Develop <b>risk control options</b> and determine which options will be implemented</p> <p>5.4 Implement, evaluate and monitor risk controls</p> <p>5.5 Record and report on risk controls</p> <p>5.6 Review implemented risk controls and recommend improvements, where necessary</p>
6. Advise on registration, licensing and certification issues associated with plant	<p>6.1 Identify types of plant requiring registration and tasks requiring operator licensing and/or certification, according to legislative requirements</p> <p>6.2 Document registration, licensing and certification requirements and communicate them to individuals and parties</p> <p>6.3 Identify, document and communicate training requirements to individuals and parties to meet registration, licensing and certification, according to legislative requirements</p> <p>6.4 Determine training needs required for new plant and/or new operating methods</p> <p>6.5 Ensure training is undertaken and completed prior to commencement of work using new plant and/or new operating methods</p> <p>6.6 Monitor and report compliance with regulatory requirements for registration, licensing and certification</p> <p>6.7 Identify, document and maintain appropriate records for plant and operator skill requirements</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse relevant workplace information and data
  - contribute to the assessment of resources needed to manage WHS and where appropriate access these resources
  - identify areas for risk control
  - make observations of workplace tasks and interactions between people, their activities, equipment, environment and systems
- communication skills to:
  - conduct effective formal and informal meetings and communicate effectively with personnel at all levels of the organisation and WHS specialists
  - prepare reports for a range of target groups, including health and safety committees, health and safety representatives, managers, supervisors, and persons conducting businesses or undertakings (PCBUs) or their officers
- consultation and negotiation skills to:
  - develop plans
  - implement and monitor designated actions
- information technology skills to:
  - access and download internal and external information and data on WHS
  - use a range of communication media
- organisational skills to manage own tasks within a timeframe
- project-management skills to achieve change in WHS matters
- research skills to:
  - access relevant WHS information and data
  - identify areas for improvement
  - interpret information and data
- technical skills to use basic measuring equipment, such as scales and dials applicable to specific hazards.

### Required knowledge

- basic principles of incident causation and injury processes
- difference between hazard and risk

- factors that impact on risk
- hierarchy of control and considerations for choosing between different risk controls
- high-risk work licences required for specific plant
- internal and external sources of WHS information and data, and how to access them
- language, literacy and cultural profile of the work team
- management of risk associated with plant as a duty of PCBUs or their officers under WHS legislation
- methods for providing evidence of compliance with WHS legislation
- nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- organisational behaviour and culture as they impact on WHS and on change
- organisational culture as it impacts on the work team
- organisational WHS policies, procedures, processes and systems
- other functional areas that impact on the management of WHS
- plant-specific knowledge:
  - basic physics of fluids under pressure and pressure vessels, and the behaviour of pressurised fluid when pressure is released
  - duties, rights and obligations of individuals and parties specified in WHS legislation
  - hazards associated with plant and systems of work associated with plant
  - industry practices related to permit to work, and isolation and tag out systems
  - registration requirements of plant, licensing and certification competencies
- principles and practices of a systematic approach to managing WHS
- strategies for guarding moving parts in machinery; human factors related to machine guarding; and safe design principles, features and limitations
- WHS Acts, regulations, codes of practice and other instruments issued by WHS regulators.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• managing effective identification of hazards and developing risk control options for a range of plant, as defined in WHS legislation</li> <li>• knowledge of relevant WHS Acts, regulations and codes of practice</li> </ul>

	<ul style="list-style-type: none"> <li>• using relevant procedures and systems in the maintenance of plant</li> <li>• implementing general licensing and training requirements associated with plant</li> <li>• using machinery safety control measures to control plant risks.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• manufacturer manuals, including specifications and operational information and data</li> <li>• relevant WHS Acts, regulations, codes of practice, standards and guidelines</li> <li>• sources of information, data and advice</li> <li>• workplace equipment and resources</li> <li>• workplace or simulated workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• analysis of case studies and scenarios</li> <li>• assessment of written reports on the effectiveness of hazard identification, risk assessment, and control and management actions taken</li> <li>• demonstration of techniques used to identify hazards; assess associated risks; and determine, implement, monitor and evaluate risk control options</li> <li>• direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate</li> <li>• observation of performance in role plays</li> <li>• presentations</li> <li>• review of recording and reporting on hazards associated with plant</li> <li>• review of the system for managing WHS associated with plant.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other BSB07 WHS units.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>WHS legislation</b> may include:	<ul style="list-style-type: none"> <li>• Acts</li> <li>• regulations</li> <li>• codes of practice.</li> </ul>
<b>Individuals and parties</b> may include:	<ul style="list-style-type: none"> <li>• contractors and subcontractors</li> <li>• duty holders as specified in WHS Acts: <ul style="list-style-type: none"> <li>• PCBUs or their officers</li> <li>• workers</li> <li>• other persons at a workplace</li> </ul> </li> <li>• WHS entry permit holders</li> <li>• WHS inspectors.</li> </ul>
<b>Plant</b> may include:	<ul style="list-style-type: none"> <li>• any machinery, equipment (including scaffolding), or appliance</li> <li>• electrical installation and plant, such as wiring, accessories, fittings, consuming devices, control and protective gear, converters and generators</li> <li>• mobile plant and load-shifting equipment</li> <li>• pressure equipment, such as boilers, pressure vessels and pressure piping.</li> </ul>
<b>Job roles and the nature of the organisation</b> may include:	<ul style="list-style-type: none"> <li>• job roles associated with plant in the organisation</li> <li>• how the organisation is involved with one or more of the following: <ul style="list-style-type: none"> <li>• management or control of plant</li> <li>• design of plant</li> <li>• manufacture of plant</li> <li>• supply of plant</li> <li>• installation, construction or commissioning of plant</li> <li>• plant training</li> <li>• issuing of licences associated with plant.</li> </ul> </li> </ul>
<b>Hazards</b> may include:	<ul style="list-style-type: none"> <li>• source of potential harm in relation to:</li> </ul>

	<ul style="list-style-type: none"> <li>• human injury or ill health</li> <li>• damage to property</li> <li>• damage to the environment</li> <li>• a combination of the above.</li> </ul>
<b>Sources of information, data and advice</b> may include:	<ul style="list-style-type: none"> <li>• accident and incident reports</li> <li>• audits</li> <li>• Australian and international standards</li> <li>• commonwealth and state or territory WHS regulators</li> <li>• industry bodies and groups</li> <li>• internet and the organisation's intranet</li> <li>• manufacturer and supplier manuals, specifications and other forms of advice and information</li> <li>• minutes of organisational WHS and other meetings, and other in-house information</li> <li>• Safe Work Australia</li> <li>• unions</li> <li>• WHS legislation</li> <li>• workplace inspections.</li> </ul>
<b>Others</b> may include:	<ul style="list-style-type: none"> <li>• experts in different aspects of the management of hazards associated with plant</li> <li>• individuals and parties as specified above</li> <li>• plant manufacturers, suppliers and designers</li> <li>• WHS inspectors</li> <li>• WHS regulators.</li> </ul>
<b>Recording and reporting</b> may include:	<ul style="list-style-type: none"> <li>• documents describing how tasks, projects, inspections, jobs and processes are undertaken</li> <li>• job and task statements</li> <li>• job safety analysis worksheets</li> <li>• maintenance and service logs, sheets, cards and diaries</li> <li>• standard operating procedures.</li> </ul>
<b>Risk control options</b> may include:	<ul style="list-style-type: none"> <li>• controls for access and egress risks, such as: <ul style="list-style-type: none"> <li>• to parts of plant that require cleaning or maintenance</li> <li>• to operator's workstation for normal and emergency conditions</li> <li>• systems that enable safe access and egress, such as emergency lighting, safety doors and alarm systems</li> </ul> </li> <li>• controls for dangerous part risks, such as potential contact or entrapment points to which the operator</li> </ul>

	<p>may be exposed during adjustment, examination, lubrication, maintenance and operation</p> <ul style="list-style-type: none"><li>• controls for guarding risks, such as:<ul style="list-style-type: none"><li>• permanently fixed physical barriers where no access of any part of a person is required</li><li>• interlocking physical barriers where access to dangerous areas is required during operation</li><li>• fixing physical barriers securely by means of fasteners or devices</li><li>• sensing safeguarding systems</li></ul></li><li>• controls for operational control risks, such as:<ul style="list-style-type: none"><li>• being capable of locking in 'off' position to enable disconnection of all motive power and forces</li><li>• being guarded to prevent unintentional activation</li><li>• being of fail-safe type</li><li>• being readily and conveniently located</li><li>• being suitability identified</li><li>• having nature and function clearly indicated</li></ul></li><li>• controls for emergency stops and warning devices, such as:<ul style="list-style-type: none"><li>• being able to avoid electrical or electronic circuit malfunction</li><li>• colouring push buttons, bars or handles red</li><li>• prominent, clear and durable markings</li></ul></li><li>• controls for registrations and design of plant</li><li>• controls for operator certification risks</li><li>• developing, documenting and communicating maintenance procedures to ensure plant is safe for use</li><li>• ensuring modifications to plant are safe and suitable for the task and are appropriately documented, and modifying work practices as required for safe operation of plant</li><li>• ensuring purchasing procedures include actions to address WHS implications of plant</li><li>• identifying when permit to work procedures or certification are required to assist in ensuring a safe work environment</li><li>• implementing and monitoring isolation procedures in liaison with individuals and parties to ensure continued safety of maintenance and other</li></ul>
--	---

	<p>personnel</p> <ul style="list-style-type: none"><li>• monitoring and evaluating maintenance systems for effectiveness, suitability and accuracy to ensure safe operation of plant, and taking action as appropriate</li><li>• responding to and monitoring implementation of permit to work procedures or certification in liaison with individuals and parties.</li></ul>
--	---

## Unit Sector(s)

Regulation, Licensing and Risk – Work Health and Safety

## BSBWOR204A Use business technology

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to select, use and maintain a range of business technology. This technology includes the effective use of computer software to organise information and data.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to individuals who use business technology to perform a range of routine tasks. They use a limited range of practical skills and fundamental knowledge of equipment use and the organisation of data or files in a defined context, under direct supervision or with limited individual responsibility.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	<p>1.1. Select appropriate <b><i>technology</i></b> and <b><i>software applications</i></b> to achieve the requirements of the task</p> <p>1.2. Adjust workspace, furniture and equipment to suit user ergonomic requirements</p> <p>1.3. Use technology according to <b><i>organisational requirements</i></b> and in a way which promotes a safe work environment</p>
2. Process and organise data	<p>2.1. Identify, open, generate or amend files and records according to task and organisational requirements</p> <p>2.2. Operate <b><i>input devices</i></b> according to organisational requirements</p> <p>2.3. <b><i>Store data</i></b> appropriately and exit applications without damage to or loss of, data</p> <p>2.4. Use manuals, training booklets and/or online help or help-desks to overcome basic difficulties with applications</p>
3. Maintain technology	<p>3.1. Identify and replace used <b><i>technology consumables</i></b> in accordance with manufacturer's instructions and organisational requirements</p> <p>3.2. Carry out and/or arrange <b><i>routine maintenance</i></b> to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. <i>Identify equipment faults</i> accurately and take action in accordance with manufacturer's instructions or report fault to designated person

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy skills to identify work requirements; to understand and process basic, relevant workplace information; and to follow written instructions
- communication skills to request advice, to receive feedback and to work with a team
- problem-solving skills to solve routine technology problems.

#### Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
- ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies, plans and procedures, especially in regard to file-naming and storage conventions
- organisational IT procedures including back-up and virus protection procedures
- basic technical terminology in relation to reading help-files and manuals.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• selection and application of appropriate equipment and software applications in relation to assigned task/s</li> <li>• access, retrieval and storage of required data</li> <li>• performance of basic maintenance on a range of office equipment</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of files and data for storage</li> <li>• manuals and training booklets for equipment.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of office equipment</li> <li>• evaluation of maintaining technology.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• IT use units</li> <li>• other industry capability units.</li> </ul>

## Range Statement

### **RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised**

<b>RANGE STATEMENT</b>	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Technology</b> may include:	<ul style="list-style-type: none"> <li>• computer technology, such as laptops and personal computers</li> <li>• digital cameras</li> <li>• modems</li> <li>• printers</li> <li>• scanners</li> <li>• zip drives</li> <li>• photocopiers</li> <li>• shredders</li> <li>• binders</li> <li>• laminators</li> <li>• cutters</li> </ul>
<b>Software applications</b> may include:	<ul style="list-style-type: none"> <li>• email, internet</li> <li>• word processing, spreadsheet, database, accounting or presentation packages</li> </ul>
<b>Organisational requirements</b> may include:	<ul style="list-style-type: none"> <li>• correctly identifying and opening files</li> <li>• legal and organisation policies, guidelines and requirements</li> <li>• locating data</li> <li>• log-on procedures</li> <li>• manufacturer's guidelines</li> <li>• OHS policies, procedures and programs</li> <li>• saving and closing files</li> <li>• storing data</li> </ul>
<b>Input devices</b> may include:	<ul style="list-style-type: none"> <li>• keyboard</li> <li>• mouse</li> <li>• numerical key pad</li> <li>• scanner</li> </ul>
<b>Storage of data</b> may include:	<ul style="list-style-type: none"> <li>• appropriate storage/filing of hard copies of computer generated documents</li> <li>• storage in directories and sub-directories</li> <li>• storage on CD-ROMs, hard and floppy disk drives or back-up systems</li> </ul>
<b>Technology consumables</b> may include:	<ul style="list-style-type: none"> <li>• back-up tapes</li> <li>• CD-ROM</li> <li>• floppy disks</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• print heads</li> <li>• printer ribbons and cartridges</li> <li>• toner cartridges</li> <li>• zip disks</li> </ul>
<i>Routine maintenance</i> may include:	<ul style="list-style-type: none"> <li>• in-house cleaning and servicing of equipment according to manufacturer's guidelines</li> <li>• periodic servicing by qualified or manufacturer approved, technician</li> <li>• regular checking of equipment</li> <li>• replacing consumables</li> </ul>
<i>Identifying equipment faults</i> may include:	<ul style="list-style-type: none"> <li>• checking repairs have been carried out</li> <li>• encouraging feedback from work colleagues</li> <li>• keeping a log book of detected faults</li> <li>• preparing a maintenance program</li> <li>• regular back-ups of data</li> <li>• regular OHS inspections</li> <li>• routine checking of equipment</li> </ul>

## BSBWOR402A Promote team effectiveness

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit describes the performance outcomes, skills and knowledge required to promote teamwork. It involves developing team plans to meet expected outcomes, leading the work team, and proactively working with the management of the organisation.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.</p>
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>Frontline managers have an important leadership role in the development of efficient and effective work teams. They play a prominent part in team planning, supervising the performance of the team and developing team cohesion. They provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan to achieve team outcomes	<p>1.1. Identify, establish and document <b><i>team purpose, roles, responsibilities, goals, plans and objectives</i></b> in <b><i>consultation</i></b> with team members</p> <p>1.2. Support team members in meeting expected outcomes</p>
2. Develop team cohesion	<p>2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team</p> <p>2.2. Encourage and support team members to take <b><i>responsibility for own work</i></b> and to assist each other in undertaking required roles and responsibilities</p> <p>2.3. Provide <b><i>feedback</i></b> to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4. Recognise and address issues, concerns and problems identified by team members or refer to <b><i>relevant persons</i></b> as required</p>

ELEMENT	PERFORMANCE CRITERIA
3. Participate in and facilitate work team	3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2. Give the team support to identify and resolve problems which impede its performance 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1. Maintain open <i>communication</i> with <i>line manager/management</i> at all times 4.2. Communicate information from line manager/management to the team 4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - boost team morale
  - deal with team conflict
  - deliver messages from management
  - facilitate discussion
  - mentor and coach
- leadership skills
- planning and organising skills.

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

- organisational goals, objectives and plans
- organisational policy and procedures framework
- organisational structure, including organisational chart
- principles and techniques associated with:
  - delegation and work allocation
  - goal setting
  - group dynamics and processes
  - individual behaviour and difference
  - leadership
  - motivation
  - negotiation
  - planning.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- teamwork plan with details of how it was generated and how it will be monitored so that team goals can be met
- techniques in communicating information, dealing with team conflict and resolving issues
- knowledge of organisational goals, objectives and plans.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to appropriate documentation and resources normally used in the workplace.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• observation of demonstrated techniques in working with team dynamics</li> <li>• observation of performance in role plays</li> <li>• oral or written questioning to assess knowledge of principles and techniques associated with group dynamics and processes</li> <li>• evaluation of opportunities provided for input of team members into planning, decision making and operational aspects of work team</li> <li>• review of feedback provided to team members</li> <li>• review of teamwork plan.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other units from the Certificate IV in Frontline Management.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Team purpose, roles, responsibilities, goals, plans and objectives</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• action plans, business plans and operational plans linked to strategic plans</li> <li>• expected outcomes and outputs</li> <li>• goals for individuals and the work team</li> <li>• individual and team performance plans and key performance indicators</li> <li>• occupational health and safety (OHS) responsibilities</li> </ul>
<p><b><i>Consultation</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• attending meetings, interviews, brainstorming sessions</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• using email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual effectiveness</li> <li>• using mechanisms to provide feedback to the work team in relation to consultation outcomes</li> </ul>
<i>Responsibility for own work</i> may involve:	<ul style="list-style-type: none"> <li>• individual and joint actions</li> <li>• individuals and teams</li> </ul>
<i>Feedback</i> may refer to:	<ul style="list-style-type: none"> <li>• formal/informal gatherings between team members where there is communication on work related matters</li> <li>• informal communication of ideas and thoughts on specific tasks, outcomes, decisions, issues or behaviours</li> </ul>
<i>Relevant persons</i> may include:	<ul style="list-style-type: none"> <li>• colleagues</li> <li>• direct superior or other management representatives</li> <li>• OHS committees and other people with specialist responsibilities</li> </ul>
<i>Communication</i> may include:	<ul style="list-style-type: none"> <li>• face-to-face</li> <li>• formal/informal interaction</li> <li>• verbal, written or electronic communication</li> </ul>
<i>Line manager/management</i> may refer to:	<ul style="list-style-type: none"> <li>• direct superior or other management representatives</li> </ul>

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and complete own work schedule	<p>1.1. Prepare <b>Workgroup</b> plans which reflect consideration of resources, client needs and workgroup targets</p> <p>1.2. Analyse and incorporate <b>Work objectives</b> and priorities into personal schedules and responsibilities</p> <p>1.3. Identify <b>Factors affecting the achievement of work objectives</b> and establish contingencies and incorporate them into work plans</p> <p>1.4. Efficiently and effectively use <b>Business technology</b> to manage and monitor planning completion and scheduling of tasks</p>
2. Monitor own work performance	<p>2.1. Identify and analysed personal performance through self-assessment and feedback from others on the achievement of work objectives</p> <p>2.2. Seek and evaluate <b>Feedback on performance</b> from colleagues and clients in the context of individual and group requirements</p> <p>2.3. Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements</p>
3. Coordinate	3.1. Assess personal knowledge and skills against

ELEMENT	PERFORMANCE CRITERIA
professional development	<p>organisational benchmarks to determine development needs and priorities</p> <p>3.2. Research and identify sources and plan for opportunities for improvement in consultation with colleagues</p> <p>3.3. Use <i>Feedback</i> to identify and develop ways to improve competence within available opportunities</p> <p>3.4. Identify, access and complete <i>professional development activities</i> to assist career development</p> <p>3.5. Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- learning skills to recognise and develop new and necessary skills and knowledge
- literacy skills to understand the organisation's policies, procedures and communications, to write personal work plans and professional development plans, and to request and receive feedback about performance
- organising skills to prioritise, manage time and meet deadlines
- problem solving skills to develop contingency plans

#### Required knowledge

- knowledge of relevant business technology applications to schedule tasks and plan work
- knowledge of techniques to prepare personal plans and establish priorities
- methods to identify and prioritise personal learning needs
- understanding of a range of professional development options
- understanding of methods to elicit, analyse and interpret feedback
- understanding of methods to evaluate own performance

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish personal work goals	<p>1.1. Serve as a positive role model in the workplace through personal work planning and organisation</p> <p>1.2. Ensure personal work goals, plans and activities reflect the organisation's plans, and <b><i>own responsibilities and accountabilities</i></b></p> <p>1.3. Measure and maintain personal performance in varying work conditions, work contexts and contingencies</p>
2. Set and meet own work priorities	<p>2.1. Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives</p> <p>2.2. Use <b><i>technology</i></b> efficiently and effectively to manage work priorities and commitments</p> <p>2.3. Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to</p>
3. Develop and maintain professional competence	<p>3.1. Assess personal knowledge and skills against <b><i>competency standards</i></b> to determine development needs, priorities and plans</p> <p>3.2. Seek feedback from employees, <b><i>clients and colleagues</i></b> and use this feedback to identify and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>develop ways to improve competence</p> <p>3.3. Identify, evaluate, select and use <i>development opportunities</i> suitable to personal learning style/s to develop competence</p> <p>3.4. Undertake participation in networks to enhance personal knowledge, skills and work relationships</p> <p>3.5. Identify and develop new skills to achieve and maintain a competitive edge</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to receive, analyse and report on feedback
- literacy skills to interpret written and verbal information about workplace requirements
- organisational skills to set and achieve priorities.

#### Required knowledge

- principles and techniques involved in the management and organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - personal development plan
  - personal goal setting
  - time management
- management development opportunities and options for self
- organisation's policies, plans and procedures
- types of learning style/s and how they relate to the individual
- types of work methods and practices that can improve personal performance.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the

<b>EVIDENCE GUIDE</b>	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• systems and processes (electronic or paper-based) used to organise and prioritise tasks, which show how work is managed</li> <li>• personal development plan, with career objectives and an action plan</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to appropriate documentation and resources normally used in the workplace.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. CHCCD404D Develop and implement community programs	CHCCD404E Develop and implement community programs	ISC upgrade changes to remove references to old OHS legislation and replace with references to new WHS legislation. Formatting and grammatical corrections. No change to competency outcome.

### Unit Descriptor

#### Descriptor

This unit describes the knowledge and skills required to develop community programs to ensure maximum participation

### Application of the Unit

#### Application

This unit is intended for application within a community work or community development work context

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

Not Applicable

### Employability Skills Information

#### Employability Skills

This unit contains Employability Skills

## Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |  |   |
|--|---|
| 1. Develop program parameters                | <p>1.1 Analyse issues of wide community concern to develop an agency position and to ascertain the need for new program /s</p> <p>1.2 Undertake appropriate work to ascertain support, capacity for a coordinated effort and factors which will effect provision of services</p> <p>1.3 Undertake research to identify key people, issues to be addressed, possible <i>strategies and options for action</i></p> <p>1.4 Undertake appropriate planning and liaison including developing concept plans in consultation with relevant communities and <i>stakeholders</i></p> |
| 2. Design programs with the <i>community</i> | <p>2.1 Develop a program plan which reflects identified parameters and incorporates an <i>evaluation of a range of program options</i></p> <p>2.2 Undertake consultation to determine preferred program options particularly in areas of high need or with targeted communities</p> <p>2.3 Seek help from participating agencies for implementation arrangements</p> <p>2.4 Identify and seek <i>resources</i></p>  |
| 3. Implement programs                        | <p>3.1 Where appropriate, conduct and evaluate pilots and make adjustments to ensure the program achieves its objectives</p> <p>3.2 Implement programs in accordance with the development plan</p> <p>3.3 Develop and implement <i>promotion and marketing</i></p>  |

**ELEMENT****PERFORMANCE CRITERIA**

*strategies*

3.4 Develop and maintain systems and resources for administrative support of *community programs*

3.5 Encourage target group to participate fully in the program

4. Evaluate programs

4.1 Evaluate program design and outcomes according to criteria and specifications identified in the program plan

4.2 Use results of evaluation for revision and ongoing development

4.3 Involve interested and/or relevant people in program evaluation

**Required Skills and Knowledge****REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

*Essential knowledge:*

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- The cultures, concerns, beliefs and aspirations of the community in question
- The impact of cultural or community attitudes on appropriate roles, relationships and approaches of the worker
- The impact of cultural and community attitudes within that community
- The implications of differences in attitudes and values
- Community development as a social change strategy
- Decision-making structures and processes at organisation, community, regional and system level
- Relevant legislation and public policies

## REQUIRED SKILLS AND KNOWLEDGE

- Social, community and youth issues
- Nature of community development work
- Definitions of community
- 'Community' as ideological tool
- Personal values and community development
- Emergence of community development
- Contemporary community development practice
- Social movements
- Sociology
- Social theories
- Social inequality
- Sociology of class
- Sociology of gender
- Contemporary economics and politics and their impact on community development

### *Essential skills:*

It is critical that the candidate demonstrate the ability to:

- Demonstrate effective management of community programs through the application of current accepted best practice

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Undertake research and consultation
- Apply a range of community development approaches
- Coordinate people, processes and information
- Analyse data, information and relationships
- Provide support to a diverse range of people/organisations
- Analyse complex issues
- Work with and through community leaders
- Demonstrate application of skills in:
  - advocacy
  - conflict resolution/negotiation and mediation
  - cross cultural communication and negotiation
  - verbal and written communication
  - literacy adequate to prepare a range of resource material appropriate to the target group

## REQUIRED SKILLS AND KNOWLEDGE

- Maintain documentation as required, including effective use of relevant information technology in line with work health and safety (WHS) guidelines

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

*Critical aspects for assessment and evidence required to demonstrate this unit of competency:*

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- This unit can be assessed in the community or in a simulation which related closely to the experience of the workplace and the community
- Consistency in performance should consider specific program and community requirements

*Access and equity considerations:*

- All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

*Context of and specific resources for assessment:*

- This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged
- Resources required for assessment include access to

## EVIDENCE GUIDE

an appropriate workplace or an environment that effectively simulates workplace and community conditions

### *Method of assessment:*

- In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios
- Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes
- Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

### *Community may be:*

- Individuals and groups defined by organisation programs and services
- Other agencies providing services to the designated individuals and groups
- People with specified needs and interests
- People using the organisation's services/programs
- Geographic

## RANGE STATEMENT

*Community programs may include:*

- Community development activities and strategies
- Education and information projects

*Stakeholders may include:*

- Residents within a community
- Businesses within or related to a community
- Advocacy and special interest groups
- Decision-makers and community leaders
- Individuals, groups and communities affected by issues or strategies
- Owners or managers of resources required
- Grants/funding agencies
- Government and non government organisations
- Peak bodies
- Colleagues and collaborators

*Strategies and options for action may include:*

- Community/public education, awareness raising
- Lobbying and advocacy
- Development of new services, opportunities
- Developing the capacity of individuals, groups and communities to meet their own needs and objectives
- Non violent direct action
- Participatory action research
- Development of new businesses or employment opportunities
- Health promotion, development of healthy communities/attitudes and environmental causes of ill health
- Development of community resources and facilities
- Development of recreational/entertainment
- Adjustments to existing programs/services to make them more accessible to young people
- Strategies to increase access to facilities, services
- Decision-making including cost, physical, information
- Public processes

*Resources may include:*

- Information
- Knowledge/skills

## RANGE STATEMENT

- Equipment and materials
- Facilities, buildings, transport
- Organisation structures, networks
- Sector/regional networks
- Access to decision-makers
- Management support
- Personnel
- Money

*Evaluation of a range of program options may include:*

- Projected outcomes to achieve objectives
- Cost efficiency and effectiveness
- Relevance to high needs and priorities
- Scope and coverage
- Capacity to evaluate
- Availability of resources/skills
- Consistency of philosophy
- Ethical considerations
- Impact on organisation/other services/programs
- Personnel/industrial/employment implications
- Legislative/statutory/accountability implications

*Promotion and marketing strategies may include:*

- Letters (by fax, mail, or any other means of transmission)
- Newsletters/journals
- Internal organisation communication (e.g. Internal memos, minutes of meetings)
- Artwork, graphics
- Reports, discussion papers, briefing papers
- Brochures, fliers and written advertisements
- Posters
- Audio and audio visual productions
- Performing arts presentations
- Verbal/public presentations
- Meetings, seminars, workshops and forums
- Print or telecommunications media

*Consultation strategies may include:*

- Meetings, seminars, workshops or other forums
- Interviews (formal and informal)

## **RANGE STATEMENT**

- Written surveys (questionnaires, letters, submissions)
- Suggestion boxes
- Alternative communication such as graffiti walls
- Networks
- Professional associations
- Call for submissions

## **Unit Sector(s)**

Not Applicable

# CPCCCM2010B Work safely at heights

## Modification History

Photovoltaic (solar) panels added to range statement

Equivalent to CPCCCM2010A

## Unit Descriptor

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

## Application of the Unit

Construction work is undertaken on domestic and commercial work sites within new construction, renovation or refurbishment, and maintenance.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

CPCCOHS2001A      Apply OHS requirements, policies and procedures in the construction industry

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |                                  |     |   |
|---|----------------------------------|-----|---|
| 1 | Identify work area requirements. | 1.1 | Site of proposed <i>work at heights</i> is identified from relevant <i>information</i> .  |
|   |                                  | 1.2 | Method of accessing work area is identified.  |
|   |                                  | 1.3 | Tasks to be completed are identified from work orders and supervisor instructions.  |
|   |                                  | 1.4 | Fall protection equipment is identified if required by site job <i>workplace health and safety (WHS)</i> analysis and <i>statutory and regulatory</i> requirements.   |
|   |                                  | 1.5 | Approved methods of moving tools and equipment to work area are identified to minimise potential of falling objects, removal of scaffold components, inappropriate carrying of materials on ladders, and excessive bending or twisting in pass-up situations. |
| 2 | Access work area.                | 2.1 | Fall protection equipment where required is correctly fitted, adjusted and anchored.  |
|   |                                  | 2.2 | Arrangements are made to appropriately install required equipment taking account of all potential <i>hazards</i> .  |
|   |                                  | 2.3 | Appropriate methods are used to access work area for self, <i>tools and equipment</i> , and <i>materials</i> .  |
|   |                                  | 2.4 | Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down.  |
| 3 | Conduct work tasks.              | 3.1 | Work is conducted following workplace approved procedures.  |
|   |                                  | 3.2 | Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work.  |
|   |                                  | 3.3 | Scaffold components and fall barriers are kept in place during work.  |
|   |                                  | 3.4 | Egress from work area is completed following work site supervisor approved methods for self, tools, materials   |

and *environmental requirements*.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology
  - voice and hand signals to access and understand site-specific instructions.

### Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

---

Guidelines for the Training Package.

**Overview of assessment**

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement

- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

## Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning

experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Work at heights*** includes:

- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

***Information*** includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

***Workplace health and safety*** is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control

and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
  - AS6001 - 1999 Working platforms for domestic application
  - AS1576 - Scaffolding
  - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

***Statutory and regulatory*** authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

***Hazards*** include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials

- light
- manual handling
- moisture
- noise
- photovoltaic (solar) panels
- stationary and moving plant
- work at heights.

**Tools and equipment** include:

- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

**Materials** include:

- materials used on the construction work site.

**Environmental requirements** include:

- clean-up management
- noise and dust
- vibration
- waste management.

## Unit Sector(s)

### Functional area

Unit sector                      Construction

## Custom Content Section

Not applicable.

# CPCCCM3001C Operate elevated work platforms

## Modification History

Prerequisite unit identifier code updated

Equivalent to CPCCCM3001B

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to safely and effectively operate some types of elevated work platforms (EWPs) in a variety of different terrains and situations to access isolated work areas. The unit includes locating, setting up, operating and shutting down EWPs.

In addition to achievement of this competency, an EWP operator may need to obtain additional certification of training and experience before being allowed to operate the equipment.

## Application of the Unit

### Application of the unit

This unit of competency assists in the safe and effective operation of electrical, hydraulic or mechanical EWPs. The unit does not cover powered telescoping devices, hinged devices or articulated devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more. An OHS authority Certificate of Competency may be required to operate boom type EWPs of 11 metres or more in some jurisdictions.

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

CPCCCM2010B	Work safely at heights
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. <b><i>Work planning and preparation</i></b> are conducted using plans, specifications, quality requirements and operational details, obtained, confirmed and applied from relevant <b><i>information</i></b>.</p> <p>1.2. <b><i>Safety (OHS)</i></b> requirements for the <b><i>types of EWP</i></b> to be operated are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. Plant, <b><i>tools and equipment</i></b> and <b><i>personal protective equipment</i></b> are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.6. <b>Environmental requirements</b> are identified for the project in accordance with environmental plans and <b>statutory and regulatory authority</b> obligations, and are applied.</p>
2. Conduct routine checks of platform.	<p>2.1. Power source is determined and connected to platform equipment according to manufacturer specifications.</p> <p>2.2. Routine pre-operational equipment checks are carried out in accordance with checklist from operator's manual or manufacturer specifications.</p> <p>2.3. Equipment is switched on in accordance with start up procedures and controls are checked for correct operation and ease of movement.</p> <p>2.4. <b>Emergency safety devices</b> are checked to comply with instructions from operator's manual and checked for manual operation.</p> <p>2.5. Work location is checked for level ground or floor surface to determine stabilising and safe working area requirements.</p>
3. Locate equipment in place for work application.	<p>3.1. Platform is positioned for work application and stabilisers are engaged to set equipment base level into place according to <b>safe operating procedures</b>.</p> <p>3.2. Tools, equipment and materials are placed into bucket or on platform according to job application requirements.</p>
4. Elevate platform to work location.	<p>4.1. <b>Harness</b> is fitted securely and lanyard connected to attachment point.</p> <p>4.2. <b>EWP operation</b> and controls are operated to manufacturer recommendations and platform is elevated to work position.</p> <p>4.3. Power is switched off where specified and locking devices are engaged according to operator's manual.</p> <p>4.4. Work is carried out to job specification and safety (OHS) requirements of operator's manual.</p>
5. Lower platform and shut down.	<p>5.1. Controls are operated to manufacturer recommendations and platform is lowered to down position.</p> <p>5.2. Shut down procedures are carried out to operator's manual and equipment is switched off.</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
6. Clean up.	<p>6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.</p> <p>6.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p> <p>6.3. Work completion procedures are applied and relevant personnel notified that work is finished.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to complete inspection log and handover
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:

## REQUIRED SKILLS AND KNOWLEDGE

- use a range of mobile technology, such as two-way radio and mobile phones
- voice and hand signals to access and understand site-specific instructions.

### Required knowledge

Required knowledge for this unit is:

- designs, functions and operational limitations of EWP equipment
- EWP equipment types and OHS authority certification of competency requirements
- EWP techniques
- fault finding and identification
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of load mass requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- safe working at heights
- signalling methods and communications
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

## Evidence Guide

### EVIDENCE GUIDE

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Work planning and preparation*** include:

- assessment of conditions and hazards
- consideration that EWPs must not be operated anywhere with overhead powerlines above, or within specified clearance distances set out in documentation such as Electrical Safety - Power line NO GO Zones, unless permission has been obtained from the power authority and a JSA has been developed
- determination of work requirements
- equipment defect identification
- work site inspection.
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to EWPs
- relevant Australian standards
- safe work procedures related to operating EWPs, including the safe working load written on the EWP which must be checked to ensure it is not exceeded
- signage
- verbal or written and graphical instructions
- work bulletins

***Information*** includes:

---

**Safety (OHS)** is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- work schedules, plans and specifications.
- procedures related to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- organisational first aid
- personal protective clothing and equipment
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

**Types of EWP:**

- EWPs include scissor lifts, boom and knuckle boom lifts with a boom length under 11 metres
- EWPs are classified as:
  - trailer mounted boom lift (TL)
  - self-propelled boom lift (BL)
  - vertical lift (VL)
  - scissor lift (SL)
  - truck-mounted boom lift (TM), which is not covered by this unit of competency.

**Tools and equipment** include:

- EWPs, extension leads, logbooks, service manuals, operation manuals, safety harnesses and lanyards
- special attachments, which may have to be installed if equipment is to be shifted with the EWP, as lifting loads via cables and ropes from an EWP is not permitted.

**Personal protective equipment** includes:

- that prescribed under legislation, regulations, codes of practice and workplace policies and practices.

**Environmental requirements** include:

- clean-up protection
- noise and dust
- sedimentation control
- vibration
- waste management.

**Statutory and regulatory authorities** include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

## RANGE STATEMENT

---

- Emergency safety devices*** include:
- bleed valves
  - electronic override
  - emergency descent devices
  - ground controls
  - hydraulic accumulators.
- Safe operating procedures*** include:
- conduct of operational risk assessment and treatments associated with:
    - earth leakage boxes
    - lighting
    - power cables, including overhead service trays, cables and conduits
    - restricted access barriers
    - surrounding structures
    - traffic control
    - trip hazards
    - work site visitors and the public
    - working at heights
    - working in confined spaces
    - working in proximity to others
    - working with dangerous materials
  - not using slab terrain EWP's on any surface other than concrete or level asphalt.
- Harnesses*** include:
- energy or shock absorbers that must be used with all fall arrest lanyard, harness and inertia reel systems
  - full body rescue harness
  - lanyards and inertia reels, which should be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is 2 metres.
- EWP operation*** includes:
- boom up and down
  - operate attachments
  - operate outriggers
  - slew left and right
  - telescope in and out.

# CPCCCM3003A Work safely around power sources, services and assets

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to work with or operate plant in or around close proximity of power sources, services and assets for the general safety of personnel and equipment. It includes all occupational areas that may require working near electricity.

## Application of the Unit

**Application of the unit** This unit of competency supports achievement of skills and knowledge to work safely around power sources when undertaking construction tasks.

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

### Prerequisite units

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
--------------	--

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. Plan and prepare.	<p>1.1. Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant <b><i>information</i></b> for <b><i>planning and preparation</i></b>.</p> <p>1.2. <b><i>Safety (OHS)</i></b> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. <b><i>Plant, tools and equipment</i></b> are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.</p> <p>1.5. <b><i>Environmental requirements</i></b> are identified for the project in accordance with environmental plans and <b><i>statutory and regulatory authority</i></b> obligations, and are applied.</p>
2. Apply safe work practices.	<p>2.1. Relevant authorities are contacted to identify <b><i>electrical sources</i></b> and type.</p> <p>2.2. Plant is positioned according to work method statement and job safety analyses (JSAs).</p> <p>2.3. Plant procedures are followed to comply with work method statement and JSAs.</p> <p>2.4. Work is conducted in or around the power source,</p>

ELEMENT	PERFORMANCE CRITERIA
3. Clean up.	<p>service or asset.</p> <p>2.5. Personnel, plant and equipment are retracted from powered area following safe work method statement and JSAs.</p> <p>3.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.</p> <p>3.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p> <p>3.3. Work completion procedures are applied and relevant personnel are notified that work is finished.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - identify electrical source and type from relevant authorities
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work

## REQUIRED SKILLS AND KNOWLEDGE

- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

### Required knowledge

Required knowledge for this unit is:

- construction terminology
- electrical safety on construction work sites
- first aid including cardiopulmonary resuscitation (CPR)
- JSA and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- quality requirements
- site specific emergency procedures
- types, characteristics, uses and limitations of plant, tools and equipment
- working at heights
- working with electrical power techniques
- workplace and equipment safety requirements.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

#### Critical aspects for assessment

A person who demonstrates competency in this

## EVIDENCE GUIDE

**and evidence required to demonstrate competency in this unit**

unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- contact relevant authorities
- apply work method statements and JSAs to oversee plant positioning and operation for one project, including erection and/or placement of barriers and safeguards.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes

## EVIDENCE GUIDE

---

where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

### Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated

## EVIDENCE GUIDE

---

documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Information*** includes:

- verbal or written and graphical instructions
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to working safely around power
- relevant Australian standards
- safe work procedures related to working safely around power
- signage
- work bulletins
- work schedules.
- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.
- emergency procedures, including extinguishing fires, organisational first aid

***Planning and preparation*** include:

***Safety (OHS)*** is to be in accordance with legislation,

## RANGE STATEMENT

---

regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.
- barricades
- isolation
- other physical barriers
- site safety signage.
- back hoes
- booms
- cranes
- EWPs
- excavators
- scaffold.
- those associated with the task at hand.
- clean-up protection

***Signage and barricade requirements*** include:

***Plant*** includes:

***Tools and equipment*** include:

***Environmental requirements***

## RANGE STATEMENT

---

include:

- noise and dust
- vibration
- waste management.

*Statutory and regulatory authorities:*

- include federal, state and local authorities administering applicable Acts, regulations and codes of practice
- must include federal, state and local electrical authorities.

*Electrical sources* include:

- distribution towers
- generators
- poles
- sub-stations
- temporary services
- train and tram assets
- transmission towers
- underground and overhead wires
- underground conductors
- all other services, sources and assets.

### Elements and Performance Criteria

Element	Performance Criteria
1 Plan and prepare.	<p>1.1 Work instructions and operational details are obtained using relevant <b>information</b> , confirmed and applied for <b>planning and preparation</b> purposes.</p> <p>1.2 <b>Safety (OHS)</b> requirements are followed in accordance with safety plans and policies.</p> <p>1.3 Signage and barricade requirements are identified and implemented.</p> <p>1.4 <b>Tools and equipment</b> selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement.</p> <p>1.5 Materials quantity requirements are calculated in accordance with plans, specifications and <b>quality requirements</b> .</p> <p>1.6 Materials appropriate to the work application are identified, obtained, prepared, safely handled and</p>

located ready for use.

- 1.7 **Environmental requirements** are identified for the project in accordance with environmental plans and regulatory obligations and applied.
- 2 Select dogging equipment.
  - 2.1 Resources, materials and equipment are selected and inspected for compliance with job specifications.
  - 2.2 Job sequencing schedule is communicated with team members and others to ensure coordination.
  - 2.3 Load mass is **calculated** and confirmed using load charts and standard calculations.
  - 2.4 Loads in **slings** and equipment are calculated to suit job requirements.
- 3 Sling loads.
  - 3.1 **Lifting devices** are assembled and erected for the movement of load.
  - 3.2 Using appropriate **load slinging method**, loads are slung to **crane** ready for lifting.
- 4 Shift loads.
  - 4.1 Loads are shifted ensuring stability and in compliance with work method statement.
  - 4.2 Load is directed to landing position using communications in compliance with Australian standards and recognised work practices.
  - 4.3 Load is landed in required position on packing or bearers.
- 5 Remove dogging equipment.
  - 5.1 Load shifting equipment is dismantled and inspected for wear.
  - 5.2 Logbook and site records are completed to company requirements.
- 6 Clean up.
  - 6.1 Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
  - 6.2 Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

- 6.3 Work completion procedures are applied and relevant personnel notified that work is finished.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

communication skills to:

evaluating own actions and making judgments about performance and necessary improvements

identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

organisational skills, including the ability to plan and set out work

recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems

teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

technological skills to:

determine requirements

enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

follow instructions

read and interpret:

report faults

use language and concepts appropriate to cultural differences

use and interpret non-verbal communication, such as hand signals

documentation from a variety of sources

drawings and specifications

use a range of mobile technology, such as two-way radio and mobile phones

voice and hand signals to access and understand site-specific instructions.

## Required knowledge

Required knowledge for this unit is:

crane operations and limitations

designs and functions of lifting equipment

dogging equipment

dogging techniques

elevated work platforms

general construction terminology

job safety analysis (JSA) and safe work method statements

logbooks

material safety data sheets (MSDS)

materials storage and environmentally friendly waste management

plans, drawings and specifications

processes for the calculation of material requirements

quality requirements

relevant Acts, regulations and codes of practice

safe working at heights and fall arrest

safe working load tags

signalling methods and communications

types, characteristics, uses and limitations of plant, tools and equipment

weather and ground considerations

workplace and equipment safety requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction

Critical aspects for assessment and evidence required to demonstrate competency in this unit

workplace conditions, materials, activities, responsibilities and procedures.

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

locate, interpret and apply relevant information, standards and specifications

comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations

comply with organisational policies and procedures including quality requirements

safely and effectively operate and use tools, plant and equipment

communicate and work effectively and safely with others

as a minimum, read tags, sling, load, direct and land loads in conjunction with a slewing mobile crane with a telescopic boom and a winch, out of sight for:

rigid heavy loads to two thirds capacity of the crane

luff movements, boom retract and boom extend, slew right and slew left, winch up and down in combination

a flexible load with a minimum of three lifting points

using hand signals and whistle from minimum radius to maximum radius.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment

include:

an induction procedure and requirement  
realistic tasks or simulated tasks covering the  
mandatory task requirements

relevant specifications and work instructions  
tools and equipment appropriate to applying  
safe work practices

support materials appropriate to activity

workplace instructions relating to safe work  
practices and addressing hazards and  
emergencies

material safety data sheets

research resources, including industry related  
systems information.

Reasonable adjustments for people with  
disabilities must be made to assessment  
processes where required. This could include  
access to modified equipment and other  
physical resources, and the provision of  
appropriate assessment support.

#### Method of assessment

Assessment methods must:

satisfy the endorsed Assessment Guidelines  
of the Construction, Plumbing and Services  
Integrated Framework Training Package

include direct observation of tasks in real or  
simulated work conditions, with questioning  
to confirm the ability to consistently identify  
and correctly interpret the essential  
underpinning knowledge required for  
practical application

reinforce the integration of employability  
skills with workplace tasks and job roles

confirm that competency is verified and able  
to be transferred to other circumstances and  
environments.

Validity and sufficiency of evidence requires  
that:

competency will need to be demonstrated  
over a period of time reflecting the scope of  
the role and the practical requirements of the

workplace

where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Information** includes:

diagrams or sketches

instructions issued by authorised organisational or external personnel

manufacturer specifications and instructions, where specified

MSDS

memos  
regulatory and legislative requirements  
pertaining to performing dogging  
relevant Australian standards  
safe work procedures relating to performing  
dogging  
signage  
verbal, written and graphical instructions  
work bulletins  
work schedules, plans and specifications.

**Planning and preparation** include:

assessment of conditions and hazards  
determination of work requirements and  
safety plans and policies  
equipment defect identification  
work site inspection.

**Safety (OHS)** is to be in accordance with  
state and territory legislation and regulations  
and project safety plan and may include:

emergency procedures, including  
extinguishing fires, organisational first aid  
requirements and evacuation  
handling activities that may require the  
assistance of others or the use of manual or  
mechanical lifting devices where size, weight  
or other issues, such as a disability are a  
factor  
hazard control  
hazardous materials and substances  
organisational first aid  
PPE prescribed under legislation, regulations  
and workplace policies and practices  
safe operating procedures, including the  
conduct of operational risk assessment and  
treatments associated with:  
use of firefighting equipment  
use of tools and equipment  
workplace environmental requirements and  
safety.  
earth leakage boxes  
lighting

power cables, including overhead service trays, cables and conduits  
restricted access barriers  
surrounding structures  
traffic control  
trip hazards  
work site visitors and the public  
working at heights  
working in confined spaces  
working in proximity to others

**Tools and equipment** include:

brick cages  
kibbles  
personnel cages  
rescue cages  
rubbish bins  
spreader bars and beams.

**Quality requirements** include:

internal company quality policy and standards  
manufacturer specifications, where specified  
relevant regulations, including Australian standards  
workplace operations and procedures.

**Environmental requirements** include:

clean-up management  
noise  
vibration  
waste management.

**Calculations** include:

delivery dockets  
load charts  
load share  
pre-cast compliance charts  
safe working loads  
standard calculations.

**Slings** include:

chain

flexible steel wire rope  
natural or synthetic fibre.

## **CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry**

### **Modification History**

Not Applicable

### **Unit Descriptor**

**Unit descriptor** This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

### **Application of the Unit**

**Application of the unit** This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

### **Licensing/Regulatory Information**

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

- |   |   |
|---|---|
| 1. Identify and assess risks.             | 1.1. <b><i>Hazards</i></b> in the work area are identified, assessed and reported to <b><i>designated personnel</i></b> .<br>1.2. Safety risks in the work area are identified, assessed and reported to designated personnel.<br>1.3. <b><i>Safe work practices, duty of care</i></b> requirements and safe work instructions are followed for controlling risks.<br>1.4. OHS, hazard, accident or <b><i>incident</i></b> reports are contributed to according to workplace procedures and <b><i>Australian government and state or territory OHS legislation</i></b> and relevant <b><i>information</i></b> . |
| 2. Identify hazardous materials and other | 2.1. <b><i>Hazardous materials</i></b> on a work site are correctly identified and, if appropriate, handled and used  |

## ELEMENT

## PERFORMANCE CRITERIA

---

hazards on work sites.	according to company and legislated procedures. 2.2. <b>Measures for controlling risks</b> and construction hazards are applied effectively and immediately. 2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate <b>signs and symbols</b> . 2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.
3. Plan and prepare for safe work practices.	3.1. Correct <b>personal protective equipment</b> and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures. 3.2. Selection of <b>tools, equipment and materials</b> , and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures. 3.3. Required barricades and signage are determined and erected at the appropriate site location. 3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.
4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. <b>Prohibited tools and equipment</b> in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet <b>environmental requirements</b> .
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

## ELEMENT

## PERFORMANCE CRITERIA

---

various *types of fire* and other emergencies are followed, including identification or use, if appropriate, of *fire equipment* within scope of responsibilities.

5.3. *Emergency response and evacuation procedures* are known, practised and carried out effectively when required.

5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
  - determine and report hazards and risks
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - MSDS, JSA and safe work method statements
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

## REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

### Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

#### Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

## EVIDENCE GUIDE

---

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

### Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

## EVIDENCE GUIDE

---

indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Hazards* include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

## RANGE STATEMENT

---

**Designated personnel** to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:

- working at heights.
- designated safety officers, determined by the enterprise, who have undertaken specific safety response training
- managers or other senior personnel
- personnel competent and/or licensed in the safe handling of asbestos
- supervisors.

**Safe work practices:**

- include:
  - day to day observation of OHS policies and procedures
  - emergency procedures
  - risk assessment
  - use of basic firefighting equipment
- relate to:
  - access to site amenities, such as drinking water and toilets
  - general requirements for safe use of plant and equipment
  - general requirements for use of personal protective equipment and clothing
  - housekeeping to ensure a clean, tidy and safer work area
  - no drugs and alcohol at work
  - preventing bullying and harassment
  - smoking in designated areas
  - storage and removal of debris.

**Duty of care** requirements:

- relate to:
  - legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
  - relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
- may relate to:
  - own responsibilities to comply with safe work practices, including activities that

## RANGE STATEMENT

---

require licences, tickets or certificates of competency.

*Incidents* include:

- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
  - breathing apparatus malfunctioning to the extent that the user's health is in danger
  - collapse of the floor, wall or ceiling of a building being used as a workplace
  - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
  - collapse or partial collapse of a building or structure
  - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
  - damage to or malfunction of any other major plant
  - electric shock
  - electrical short circuit, malfunction or explosion
  - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
  - any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

*Australian government and state or territory OHS legislative requirements* include:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- JSA and safe work method statements
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards

## RANGE STATEMENT

---

**Information** includes:

- OHS and welfare Acts and regulations
- safety codes of practice.
- diagrams or sketches
- emergency situation contacts
- evacuation plans
- instructions issued by authorised organisational or external personnel
- labels
- manufacturer specifications and instructions
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements, such as Acts, regulations and codes of practice
- relevant Australian standards
- reports of near misses or accidents
- safe work procedures or equivalent documentation
- safety meeting minutes
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

**Hazardous materials** include:

- ACM
- cleaning chemicals, including those in pressurised containers
- glues
- insulation materials
- solvents
- treated timber products.

**Measures for controlling risk** or minimising hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

**Signs and symbols** include:

- emergency information signs (exits, equipment, first aid)
- fire signs (location of fire alarms and

## RANGE STATEMENT

---

	<ul style="list-style-type: none"><li>firefighting equipment)</li><li>hazard identification, facility or location signs</li><li>regulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning)</li><li>safety tags and lockout (danger tags, out of service tags)</li><li>site safety, directional, traffic and warning signs and symbols.</li></ul>
<b><i>Asbestos-containing materials are identified:</i></b>	<ul style="list-style-type: none"><li>includes recognising common types of ACM that may be found in construction materials and buildings</li><li>covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.</li></ul>
Asbestos-containing materials are <b><i>reported</i></b> to:	<ul style="list-style-type: none"><li>person in control of the workplace as set out in the relevant Asbestos Management Code.</li></ul>

<b><i>Prohibited tools and equipment</i></b> that cannot be used near identified	<ul style="list-style-type: none"><li>high-speed abrasive power and pneumatic tools, high pressure water cleaners, compressed</li></ul>

## RANGE STATEMENT

---

ACM include:

air or abrasive blasting

- any vacuum cleaning equipment not specifically designed for safe work with asbestos.

*Environmental requirements* are to cover workplace quality management and include:

- clean-up protection
- stormwater protection
- waste management.

*Types of fire* includes:

- electrical, chemical, gas, mechanical, paper, wood or natural fire.

*Fire equipment* includes:

- breathing apparatus
- fire extinguishers
- fire hydrant and hoses
- fire reel
- fire truck
- manual firefighting instruments, such as fire blankets.

*Emergency response and evacuation procedures* include:

- emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel
- extinguishing fires, organisational first aid requirements and evacuation.

Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for work.	<p>1.1 Requirements of the job are determined and various levels are obtained.</p> <p>1.2 <b>Safety (OHS)</b> requirements associated with levelling activities and workplace <b>environmental requirements</b> are adhered to throughout the work.</p> <p>1.3 <b>Quality assurance</b> requirements are identified and adhered to in accordance with workplace requirements.</p> <p>1.4 <b>Tools and equipment</b>, including personal protective equipment, are selected and checked for serviceability.</p>
2 Perform levelling.	<p>2.1 Height to be transferred is identified from drawings, plans or instructions.</p> <p>2.2 <b>Levelling equipment</b> is set up in accordance with manufacturer instructions and workplace procedures.</p>

- 2.3 Laser levels are operated in accordance with the relevant Australian standards.
  - 2.4 Levels are shot, recorded and marked in accordance with job requirements and workplace procedures within the required tolerance and specifications.
- 3 Clean up.
  - 3.1 Work area is cleared and materials are disposed of or recycled in accordance with state or territory **statutory and regulatory authority** legislation and workplace procedures.
  - 3.2 Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and workplace procedures.
  - 3.3 **Information** is accessed and documentation completed in accordance with workplace requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

communication skills to:

identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

numeracy skills to apply measurements and calculations

operating levelling equipment to read, record, establish and check:

organisational skills, including the ability to plan and set out work

teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

technological skills to:

complete workplace documentation

determine requirements, follow instructions and access information

enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

read and interpret:

use language and concepts appropriate to cultural differences

use and interpret non-verbal communication, such as hand signals

drawings and specifications

documentation from a variety of sources

levels, both horizontal and vertical used for the placement of pipe and piping

recording levels at specific points along a set out

recording and checking levels in drainage and sanitary excavations and plumbing operations

access and understand site-specific instructions in a variety of media

use a range of mobile technology, such as two-way radio.

Required knowledge

Required knowledge for this unit is:

different types of levelling equipment, their applications and their method of operation

how to access relevant information, including codes and technical standards

job safety analysis (JSA) and safe work method statements

process of establishing, recording and checking levels and alignment

relevant statutory and authority requirements related to establishing, recording and checking levels

SI system of measurements

workplace and equipment safety requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials,

Critical aspects for assessment and evidence required to demonstrate competency in this unit

activities, responsibilities and procedures.

A person who demonstrates competency in this unit must be able to provide evidence of:

locating, interpreting and applying relevant information, standards and specifications for the establishment, recording and checking of levels

applying safety requirements throughout the work sequence, including the use of personal protective clothing and equipment

as a minimum, the ability to:

use either a pipe or rotary laser and either a boning rod or string line

grade a pipe (or equivalent) over 10 metres on a grade to a tolerance of + and - 5mm, ensuring:

correctly identifying, recording and checking level

correctly selecting and using appropriate processes, tools and equipment

completing all work to specification

complying with regulations, standards and organisational quality procedures and processes

communicating and working effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

an induction procedure and requirement

realistic tasks or simulated tasks covering the

mandatory task requirements  
relevant specifications and work instructions  
tools and equipment appropriate to applying safe work practices  
support materials appropriate to activity  
workplace instructions relating to safe working practices and addressing hazards and emergencies  
material safety data sheets  
research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

#### Method of assessment

Assessment methods must:

satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Integrated Framework Training Package

include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

reinforce the integration of employability skills with workplace tasks and job roles

confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances

assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for work.	1.1 Job requirements are determined and various levels are obtained.
	1.2 <b>Safety (OHS)</b> requirements associated with levelling activities and workplace <b>environmental requirements</b> are adhered to throughout the work.
	1.3 <b>Quality assurance</b> requirements are identified and adhered to in accordance with workplace requirements.
	1.4 <b>Tools and equipment</b> , including personal protective equipment, are selected and checked for serviceability.
2 Place concrete.	2.1 Concrete mixture is prepared to meet manufacturer requirements.
	2.2 Formwork or excavation area is cleaned of excess material and debris prior to concrete placement.
	2.3 Concrete is safely transported by an approved method.
	2.4 Concrete is placed in formwork or placement site to specified depth ensuring all cavities are filled.

- 2.5 Concrete is screeded to the alignment of formwork and project specified datums.
- 2.6 Surface of concrete is finished according to specifications.
- 3 Place rendering.
  - 3.1 Render mixture is prepared to meet manufacturer requirements.
  - 3.2 Render is safely transported by an approved method.
  - 3.3 Render is applied in the required location.
  - 3.4 Surface of render is finished in accordance with specifications.
- 4 Clean up.
  - 4.1 Work area is cleared and materials disposed of or recycled in accordance with state or territory **statutory and regulatory authority** legislation and workplace procedures.
  - 4.2 Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and workplace procedures.
  - 4.3 **Information** is accessed and documentation completed in accordance with workplace requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

communication skills to:

contributing to workplace responsibilities, such as current work site environmental or sustainability frameworks, or management systems

evaluating own actions and making judgements about performance and necessary improvements

identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

organisational skills, including the ability to plan and set out work

recognising procedures

responding to change

teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

technological skills to:

complete workplace documentation

enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

follow instructions

report hazards

use and interpret non-verbal communication, such as hand signals

use language and concepts appropriate to cultural differences

access and understand site-specific instructions in a variety of media

use a range of mobile technology, such as two-way radio.

Required knowledge

Required knowledge for this unit is:

basic levelling techniques

categories of materials and their safe handling, storage and transport requirements

concrete and plastering materials

concreting and plastering techniques

job safety analysis (JSA) and safe work method statements

material safety data sheets (MSDS)

OHS and environmental legislation and requirements

plans, drawings and specifications

processes for the calculation of material requirements

simple formwork and reinforcing componentry

types of waste and their disposal, including an awareness only of the requirements for asbestos handling and disposal

workplace safety requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

locating, interpreting and applying relevant information, standards and specifications as required to carry out concreting and rendering to a simple form

applying safety requirements throughout the work sequence, including the use of personal protective clothing and equipment

as a minimum the ability to, given the plans and specifications, carry out one of the following:

all activities carried out should ensure:

bench an access chamber

install thrust blocks

pipe penetration through a floor or wall

place concrete as required within AS/NZS3500 National plumbing and drainage set: Part 1.2 Water supply - acceptable solutions

pour a concrete slab up to 600mm square

repair concrete up to 600mm square

repair pipe chases in a brick wall

correct identification of location, design and details of proposed tasks

correct selection and use of appropriate processes, tools and equipment

Context of and specific resources for assessment

completing all work to plans and specification

compliance with regulations, standards and organisational quality procedures and processes

communicating and working effectively and safely with others.

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

an induction procedure and requirement

realistic tasks or simulated tasks covering the mandatory task requirements

relevant specifications and work instructions

tools and equipment appropriate to applying safe work practices

support materials appropriate to activity

workplace instructions relating to safe working practices and addressing hazards and emergencies

material safety data sheets

research resources, including industry related systems information.

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- | ELEMENT                           | PERFORMANCE CRITERIA  |
|-----------------------------------|---|
| 1. Prepare for work.              | <p>1.1. Site survey is conducted of proposed irrigation area in accordance with client requirements.</p> <p>1.2. <b>Safety (OHS)</b> requirements associated with design of domestic irrigation systems, and workplace <b>environmental requirements</b>, are adhered to throughout the work.</p> <p>1.3. <b>Quality assurance</b> requirements are identified and adhered to in accordance with workplace requirements.</p> <p>1.4. Tasks are planned and sequenced in conjunction with others involved in or affected by the work and <b>statutory and regulatory authority</b> requirements.</p> <p>1.5. <b>Tools and equipment</b> for preparing basic irrigation designs and drawings, including personal protective equipment, are selected and checked for serviceability.</p> <p>1.6. Work area is prepared to support efficient design of domestic irrigation systems.</p> |
| 2. Identify drawing requirements. | <p>2.1. Areas requiring irrigation and <b>system design components</b> are identified.</p> <p>2.2. <b>Information</b> is obtained on the soil type, ground slope, contours and prevailing wind.</p> <p>2.3. Underground cables and services, buildings, paths and other permanent structures are located and noted.</p> <p>2.4. Water supply is located and its influence on design requirements is determined.</p> <p>2.5. Appropriate emitters are selected to suit function and</p>  |

ELEMENT	PERFORMANCE CRITERIA
3. Install and commission irrigation system.	<p>design requirements.</p> <p>3.1.Site plan is drawn to include structures, paths and property boundaries.</p> <p>3.2.Garden areas are sketched to include locations of lawns, garden beds, trees, vegetable patches or ferneries.</p> <p>3.3.Pipe runs and water emitters are sketched to design requirements.</p> <p>3.4.Sizes of pipes are calculated using standard data and information is recorded in required format.</p> <p>3.5.List of <i>materials</i> is compiled to include number and type of water emitters, control valves, quantities of pipes, fittings and components.</p> <p>3.6.Drawing and design are submitted to client for approval and adjusted.</p>
4. Clean up.	<p>4.1.Work area is cleared and materials disposed of or recycled in accordance with state and territory legislation and workplace procedures.</p> <p>4.2.Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and workplace procedures.</p> <p>4.3.Documentation is completed in accordance with workplace requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- communication skills to:
  - access information
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

## REQUIRED SKILLS AND KNOWLEDGE

- follow instructions
- plan and sequence tasks with others
- read and interpret:
  - documentation from a variety of sources
  - drawings and specifications
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- written skills to:
  - compile list of materials
  - complete workplace documentation
  - record information
- designing and drawing a domestic urban irrigation system, including:
  - identifying material requirements
  - selecting and locating components
  - site layout
  - site requirements and structures
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology.

### Required knowledge

Required knowledge for this unit is:

- accessing information and the processes for calculating material requirements
- job safety analysis (JSA) and safe work method statements (SWMS)
- process and workplace requirements for basic irrigation design
- properties of water, including pressure and flow rates
- relevant statutory and authority requirements related to drawing and installing irrigation systems
- SI system of measurement
- specifications of the range of irrigation products available
- standards applicable to the installation
- technologies for irrigation measurement and drawings
- various types of irrigation systems, including types of materials and components

## REQUIRED SKILLS AND KNOWLEDGE

used

- workplace and equipment safety requirements.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, standards and specifications to the design of domestic irrigation systems
- applying safety requirements throughout the work sequence, including the use of personal protective clothing and equipment
- as a minimum the ability to, given the site plan and customer requirements for the irrigation of a 500m<sup>2</sup> garden (of lawn, shrubs, trees and flowers), design and prepare a drawing of the system, incorporating automatic timers and controls, varying sprinkler heads and zones, and indicating the materials required (by number and type), ensuring:
  - correct identification of location, design and details of proposed system
  - correct selection and use of appropriate processes, tools and equipment
  - completing all work to specification
  - compliance with regulations, standards and

## EVIDENCE GUIDE

---

with workplace tasks and job roles

- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

## RANGE STATEMENT

---

regional contexts) may also be included.

**Safety (OHS)** is to be in accordance with commonwealth, state and territory legislation and regulations and may include:

- handling of materials, including hazardous materials and substances
- hazard control
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
- workplace environment and safety.
- clean-up protection
- stormwater protection
- waste management.

**Environmental requirements** cover water quality management and may include:

- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- site safety plan
- workplace operations and procedures.
- state or territory statutory authority
- statutory plumbing authority.

**Quality assurance** requirements may include:

**Statutory and regulatory authorities** include:

**Tools and equipment** may include:

- calculator
- computer design software
- drawing and drafting equipment
- laser measuring devices
- measuring equipment.
- backflow prevention devices
- controls
- pipework
- valves
- water emitters, which may include:
  - hear drive
  - impact
  - in-line turbo drippers
  - mist sprays
  - oscillating
  - pop up (full circle, half, quarter)
  - pulsating

**System design components** include:

## RANGE STATEMENT

---

*Information* may include:

- selection of water emitters, based on:
    - automatic control systems
    - manufacturer specifications
    - physical site conditions
    - site requirements
    - types of plants requiring irrigated water.
  - charts and hand drawings
  - diagrams or sketches
  - instructions issued by authorised organisational or external personnel
  - job drawings
  - manufacturer specifications and instructions
  - material safety data sheets (MSDS)
  - memos
  - maps
  - organisation work specifications and requirements
  - regulatory and legislative requirements, particularly those pertaining to:
    - building codes
    - OHS and environmental requirements
    - plumbing regulations
  - relevant Australian standards
  - safe work procedures relating to the design of domestic irrigation systems
  - signage
  - verbal, written and graphical instructions
  - work bulletins
  - work schedules, plans and specifications.
- Materials* may include:
- drafting and drawing materials
  - plans.

Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for work.	<p>1.1 Plans and specifications are obtained.</p> <p>1.2 <b>Safety (OHS)</b> requirements associated with connecting irrigation systems from a drinking water supply, and workplace <b>environmental requirements</b> , are adhered to throughout the work.</p> <p>1.3 <b>Quality assurance</b> requirements are identified and adhered to in accordance with workplace requirements.</p> <p>1.4 Tasks are planned and sequenced in conjunction with others involved in or affected by the work and <b>statutory and regulatory authority</b> requirements.</p> <p>1.5 <b>Tools and equipment</b> for connecting irrigation systems, including personal protective equipment, are selected and checked for serviceability.</p> <p>1.6 Work area is prepared to support efficient connection of irrigation systems from a drinking water supply.</p>
2 Identify installation requirements.	<p>2.1 Connection size and hazard rating are determined from plans, specification, standards and/or site inspection using relevant <b>information</b> .</p>

- 2.2 Valve is sized in accordance with plans and specification.
  - 2.3 Back flow prevention devices are confirmed as being in accordance with hazard rating.
  - 2.4 **Materials** and equipment are identified, ordered and collected in accordance with workplace procedures.
  - 2.5 Materials and equipment are checked for compliance with standards, docket and order form, and for acceptable condition.
- 3 Connect and test system.
    - 3.1 Excavation is set out and made in accordance with plans and specifications and undertaken with consideration to existing structures and services.
    - 3.2 Service pipe is isolated and cut to accommodate take off branch in accordance with authorities' requirements.
    - 3.3 Back flow prevention device is fitted in accordance with standards and manufacturer specifications.
    - 3.4 System is connected and flushed to required standard.
    - 3.5 Water supply is restored and system tested in accordance with standards.
    - 3.6 Ground surface is restored.
- 4 Clean up.
    - 4.1 Work area is cleared and materials disposed of or recycled in accordance with state and territory legislation and workplace procedures.
    - 4.2 Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and workplace procedures.
    - 4.3 Documentation is completed in accordance with workplace requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

communication skills to:

cutting into a water supply and installing a take off branch and fitting valves and backflow prevention devices for an irrigation or watering system.

identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

numeracy skills to apply measurements and calculations

organisational skills, including the ability to plan and set out work

teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

technological skills to:

access information

complete workplace documentation

enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

follow instructions

identify requirements

plan and sequence tasks with others

read and interpret:

use language and concepts appropriate to cultural differences

use and interpret non-verbal communication, such as hand signals

documentation from a variety of sources

drawings and specifications

access and understand site-specific instructions in a variety of media

use a range of mobile technology, such as two-way radio.

### Required knowledge

Required knowledge for this unit is:

accessing information and the processes for calculating material requirements

characteristics and application of different pipes and fittings, including fixing and joining

techniques and methods  
drinking water supplies and protection measures  
implications of cross connections and air gaps  
job safety analysis (JSA) and safe work method statements  
process of connecting irrigation systems from a drinking water supply  
properties of water, including pressure and flow rates  
relevant statutory and authority requirements related to connecting irrigation systems from a drinking water supply  
SI system of measurement  
standards applicable to the connection  
use of test equipment and procedures  
various types of irrigation systems and types of materials used  
workplace and equipment safety requirements.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, standards and specifications to connect an irrigation system from a drinking water supply
- applying safety requirements throughout the work sequence, including the use of personal protective clothing and equipment
- as a minimum the ability to, given the plans

and specifications, connect an irrigation system to a drinking water supply, ensuring:

- correct identification of location, design and details of proposed installations
- correct selection and use of appropriate processes, tools and equipment
- completing all work to specification
- compliance with regulations, standards and organisational quality procedures and processes
- communicating and working effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include

access to modified equipment and other physical resources, and the provision of appropriate assessment support.

## Method of assessment

Assessment methods must:

satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Integrated Framework Training Package

include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

reinforce the integration of employability skills with workplace tasks and job roles

confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may

be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Safety (OHS)** is to be in accordance with state and territory legislation and regulations and may include:

handling of materials  
hazard control  
personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices  
safe operating procedures, including recognising and preventing hazards associated with:  
use of firefighting equipment  
use of first aid equipment  
workplace environment and safety.  
hazardous materials and substances  
other machines  
surrounding structure and facilities  
trees  
trip hazards  
underground services  
uneven and unstable terrain  
use of tools and equipment  
work site visitors and the public  
working at heights  
working in confined spaces

	working in proximity to others
<b>Environmental requirements</b> cover water quality management and may include:	clean-up protection waste management.
<b>Quality assurance</b> requirements include:	Environment Protection Authority (EPA) internal company quality assurance policy and risk management strategy International Standards Organisation site safety plan workplace operations and procedures.
<b>Statutory and regulatory authorities</b> shall include:	state or territory statutory authority statutory plumbing authority.
<b>Tools and equipment</b> can include:	chain blocks electrical bonding and bridging strap elevated work platforms forklifts hand and power tools hand excavation equipment hand trolleys hoists and jacks lifting and load shifting equipment measuring equipment mechanical excavation equipment rollers scaffolding silver solder and brazing equipment trench shoring equipment.
<b>Information</b> includes:	charts and hand drawings diagrams or sketches instructions issued by authorised organisational or external personnel job drawings manufacturer specifications and instructions material safety data sheets (MSDS)

# CPPFES2005A Demonstrate first attack firefighting equipment

## Modification History

Revised unit

Unit updated and equivalent to PRMPFES05B Use portable fire fighting equipment

## Unit Descriptor

This unit of competency specifies the outcomes required to demonstrate the use of portable fire extinguishers, fire hose reels and fire blankets.

## Application of the Unit

This unit of competency supports fire protection equipment service technicians responsible for demonstrating to customers how to interpret and follow manufacturers' instructions on various first attack firefighting equipment in emergency situations.

## Licensing/Regulatory Information

Work in this area must be completed according to relevant legislative, industry, customer and organisational requirements, including occupational health and safety (OHS) policies and procedures.

Different states and territories may have regulatory mechanisms that apply to this unit. Candidates are advised to check for regulatory limitations.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1	Demonstrate correct use of portable fire extinguishers to extinguish simulated fires.	1.1	<i>Fire type and classification</i> are determined.
		1.2	<i>Fire extinguishers</i> are selected to attack different fires.
		1.3	Safe use of fire extinguishers is demonstrated according to manufacturers' instructions and relevant <i>OHS and workplace policies and procedures</i> .
2	Demonstrate correct use of fire hose reels.	2.1	Safe use of <i>hose reels</i> is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.
		2.2	Water is turned off in the approved sequence and hose reel is checked for leaks.
		2.3	Hose reel is rewound correctly after use.
3	Demonstrate correct use of fire blanket.	3.1	Safe use of fire blankets is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- decision-making skills to select correct first attack firefighting equipment for different types of fires
- effective customer service
- language, literacy and numeracy skills to:
  - communicate with others in a clear and concise manner
  - read and comply with work instructions and specifications

- interpersonal skills to relate to people from a range of social and cultural backgrounds
- skills to work safely when:
  - applying recommended manufacturers’ techniques for operating equipment and fire fighting
  - using firefighting equipment

**Required knowledge**

- basic methods of locating a fire
- correct use of fire extinguishers and hose reels on different classes of fire and implications of incorrect use
- how fire can be spread by conduction, convection, radiation and direct burning
- how water pressure influences the discharge distance for hose reels
- key actions in a fire emergency, commonly known by the acronym RACE:
  - rescue
  - activate alarm
  - confine fire
  - evacuate or extinguish
- meaning of secondary damage
- reasons for cooking oil and fat fires requiring special attention
- theory of fire, including the triangle of combustion
- types and operation of fire protection equipment classified as first attack equipment

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p><b>Overview of assessment</b></p>	<p>This unit of competency could be assessed by practical demonstration, using simulated fire situations. Due to safety and cost factors, methods of extinguishing class D, E and F fires are confined to oral explanations and role play or simulations only.</p> <p>All practical demonstrations involving the use of simulated fires must adhere to the safety and environmental regulations relevant to each state or territory.</p>
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.</p> <p>In particular the person should demonstrate the ability to:</p> <ul style="list-style-type: none"> <li>• select correct portable firefighting equipment for a particular type of fire</li> </ul>

	<ul style="list-style-type: none"> <li>• demonstrate the use of portable firefighting equipment</li> <li>• use portable firefighting equipment safely and correctly.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> <li>• actual or simulated work environment</li> <li>• portable firefighting equipment.</li> </ul>
<b>Method of assessment</b>	<p>Assessment methods must:</p> <ul style="list-style-type: none"> <li>• satisfy the endorsed Assessment Guidelines of the Property Services Training Package</li> <li>• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application</li> <li>• reinforce the integration of employability skills with workplace tasks and job roles</li> <li>• confirm that competency is verified and able to be transferred to other circumstances and environments.</li> </ul>
<b>Guidance information for assessment</b>	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>This unit could be assessed on its own or in combination with other units relevant to the job function, for example:</p> <ul style="list-style-type: none"> <li>• CPPFES2004A Identify types of installed fire safety equipment and systems</li> <li>• CPPFES2006A Prepare for installation and servicing operations.</li> </ul>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Fire types</b> may include:	<ul style="list-style-type: none"> <li>• combustible metals</li> <li>• cooking oils and fats</li> <li>• energised electrical equipment</li> <li>• flammable and combustible liquids</li> <li>• flammable gases</li> <li>• ordinary combustibles.</li> </ul>
<b>Classifications</b> of fires include:	<ul style="list-style-type: none"> <li>• classes A, B, C, D, E and F.</li> </ul>
<b>Fire extinguishers</b> may include:	<ul style="list-style-type: none"> <li>• carbon dioxide</li> <li>• foam</li> <li>• powder</li> <li>• vaporising liquid</li> <li>• water</li> <li>• wet chemical.</li> </ul>
<b>OHS and workplace policies and procedures</b> may be located in quality assurance and/or procedures manuals relating to:	<ul style="list-style-type: none"> <li>• appropriate techniques to use in relation to emergency management of fires</li> <li>• assessing work site for hazards and risks prior to preparing the work site for the work procedure</li> <li>• displaying signs and using barriers in the work area</li> <li>• OHS policies, procedures and programs, including: <ul style="list-style-type: none"> <li>• risk and hazard recognition</li> <li>• emergency procedures</li> <li>• awareness of electrical hazards</li> <li>• following confined spaces procedures</li> <li>• first aid</li> </ul> </li> <li>• personnel practices and guidelines outlining work roles, responsibilities and delegations</li> <li>• safety procedures, including those for working safely: <ul style="list-style-type: none"> <li>• around electrical wiring, cables and overhead powerlines</li> <li>• around tools and equipment</li> <li>• on ladders and raised platforms</li> </ul> </li> <li>• using personal protective equipment, including: <ul style="list-style-type: none"> <li>• safety glasses or goggles</li> <li>• safety boots or shoes</li> <li>• hard hats</li> <li>• earmuffs or plugs.</li> </ul> </li> </ul>
<b>Hose reel</b> types may be:	<ul style="list-style-type: none"> <li>• swing-hinged</li> <li>• vehicle-mounted</li> <li>• wall-mounted.</li> </ul>

## **Unit Sector(s)**

Fire protection equipment

## **Custom Content Section**

Not applicable.

## CPPSIS4005A Collect basic GPS data

### Modification History

Not Applicable

### Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to collect data using basic global positioning system (GPS) equipment and to be able to use suitable software to communicate with a GPS receiver. It requires the ability to combine technical application in a team environment with sound communication skills. Functions would be carried out under limited supervision and within organisational guidelines.

### Application of the Unit

**Application of the unit** This unit of competency supports the application of basic planning, organising and communication skills, the use of technology, and technical understanding in interpreting specifications. The skills and knowledge acquired upon completion of this unit would apply to the needs of employees in supporting positions for surveying, town planning, cartography, mapping and geographic information systems.

While no licensing, legislative, regulatory or certification requirements apply holistically to this unit at the time of publication, relevant federal, and state or territory legislation, regulations and codes of practice impact upon this unit (see unit performance criteria and range statement).

### Licensing/Regulatory Information

Refer to Application of the Unit

## Pre-Requisites

Prerequisite units Nil

## Employability Skills Information

**Employability skills** The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged, will assist in identifying employability skills requirements.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Prepare for GPS data collection.</b>	<p>1.1 A data collection plan is developed, detailing key activities and timelines, which are scheduled with full consideration of the <i>specifications</i> and team activity.</p> <p>1.2 <i>Organisational GPS survey requirements</i> are complied with and recorded.</p> <p>1.3 <i>Equipment</i> is prepared for the survey with consideration of the specific <i>project parameters and requirements</i>.</p> <p>1.4 Designated responsibilities are communicated to and by <i>relevant personnel</i> to ensure clarity of understanding of the work and to provide a basis for ongoing data assessment.</p> <p>1.5 Skills and knowledge are updated to accommodate changes in GPS equipment.</p>

ELEMENT	PERFORMANCE CRITERIA
<b>2 Collect GPS data.</b>	<p>2.1 GPS equipment is operated according to <i>manufacturer specifications</i> and <i>organisational guidelines</i>.</p> <p>2.2 <i>Point positional data</i> is collected and related to a reference system based on specifications.</p> <p>2.3 GPS data is collected using methodologies detailed in the data collection plan.</p> <p>2.4 Conditions for obtaining optimum GPS positions are determined.</p> <p>2.5 Basic methods to improve the accuracy of GPS point positioning are recognised and used.</p> <p>2.6 GPS measurements are <i>validated</i> and recorded on the <i>reference system</i> according to the project specifications.</p> <p>2.7 Any discrepancies between specifications and actual activities are identified and addressed.</p> <p>2.8 <i>OHS</i> requirements are adhered to.</p> <p>2.9 GPS equipment is operated according to manufacturer specifications and organisational guidelines.</p>
<b>3 Finalise the collection process.</b>	<p>3.1 Basic <i>GPS software</i> is used to communicate with basic GPS receivers.</p> <p>3.2 GPS software is used to determine <i>required information</i>.</p> <p>3.3 Measured GPS data is compared against design.</p> <p>3.4 Checks are completed according to organisational requirements.</p> <p>3.5 All <i>required documentation</i> is completed according to organisational guidelines.</p> <p>3.6 Appropriate software is used to process the data in order to determine required information, according to organisational guidelines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

#### Required skills:

## REQUIRED SKILLS AND KNOWLEDGE

- ability to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- analytical skills (high level)
- communication skills to:
  - discuss vocational issues effectively with colleagues
  - impart knowledge and ideas through oral, written and visual means
- computer skills (technical user level) to complete business documentation
- literacy skills to:
  - assess and use workplace information
  - interpret and understand legal, financial and procedural requirements
  - process workplace documentation
  - read, record data and write technical reports
  - research and access routine sources of spatial data
- negotiation skills
- numeracy skills to:
  - analyse errors
  - record with accuracy and precision
  - undertake computations
- organisational skills to:
  - prepare and administer documentation
  - prioritise activities to meet contractual requirements
- project management skills
- spatial skills to:
  - perform GPS data archival and retrieval
  - perform GPS data management and manipulation
  - perform file management
  - solve basic problems relating to height, depth, breadth, dimension, direction and position in actual operational activity and virtual representation
  - understand implications of height, depth, breadth, dimension and position to actual operational activity and virtual representation
- team leadership.

### Required knowledge and understanding:

- abilities of work teams
- accuracy and precision requirements related to GPS data
- data formats
- data management
- errors, accuracy and precision in collection techniques
- GPS data processing and data manipulation
- GPS equipment

## REQUIRED SKILLS AND KNOWLEDGE

- industry standards
- limitations of equipment
- organisational policies and guidelines, such as OHS guidelines
- planning and control processes
- safe work practices
- relevant industry requirements and standards
- spatial reference systems (basic)
- surveying computation skills (basic).

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

#### Overview of assessment

This unit of competency could be assessed on its own or in combination with other units relevant to the job function, for example units CPPSIS4001A Maintain spatial systems, CPPSIS4002A Store and retrieve spatial data, and CPPSIS4004A Collect and set out basic spatial data.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- matching objectives with resources to ensure collection proceeds in an organised and timely manner
- ensuring that achievement of required accuracy has been attempted by:
  - accessing and interpreting basic design information to identify the components to be measured and monitored
  - performing basic measurements
  - planning basic resources
  - applying solutions to a range of problems
  - basic documenting and reporting
  - reducing and manipulating GPS data
- ensuring that non-conformity aspects are recorded and reported
- taking responsibility for outputs in work and learning.

**Specific resources for assessment**

Resource implications for assessment include access to:

- assessment instruments, including personal planner and assessment record book
- assignment instructions, work plans and schedules, policy documents and duty statements
- registered training provider of assessment services
- relevant guidelines, regulations and codes of practice
- suitable venue and equipment.

Access must be provided to appropriate learning and assessment support when required.

Where applicable, physical resources should include equipment modified for people with disabilities.

**Context of assessment**

Holistic: based on the performance criteria, evidence guide, range statement, and required skills and knowledge.

**Method of assessment**

Demonstrated over a period of time and observed by the assessor (or assessment team working together to conduct the assessment).

Demonstrated competency in a range of situations, that may include customer/workplace interruptions and involvement in related activities normally experienced in the workplace.

Obtained by observing activities in the field and reviewing induction information. If this is not practicable, observation in realistic simulated environments may be substituted.

**Guidance information for assessment**

Assessment requires that the clients' objectives and industry expectations are met. If the clients' objectives are narrowly defined or not representative of industry needs, it may be necessary to refer to portfolio case studies of a variety of spatial information services requirements to assess competency.

Oral questioning or written assessment and hypothetical situations (scenarios) may be used to assess underpinning knowledge (in assessment situations where the candidate is offered a preference between oral questioning or written assessment, questions are to be identical).

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

All practical demonstration must adhere to the safety and environmental regulations relevant to each State or

Territory.

Where assessment is for the purpose of recognition (recognition of current competencies [RCC] or recognition of prior learning [RPL]), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge.

Assessment processes will be appropriate to the language and literacy levels of the candidate and any cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Specifications*** may include:

- detailed technical descriptions of survey data and its requirements
- preparation of cross-sections and plans with all information included.

***Organisational GPS survey requirements*** may include:

- administration (e.g. postcodes, suburbs, and federal and state electoral counties)
- analysis of environmental, land and geographic information
- asset management
- cartographic services
- civil engineering
- digital imagery
- electricity
- emergency services management
- environmental datasets
- geographic information systems

- integrated services - environmental, land and geographic related datasets
- land ownership tenure system
- local government
- location-based services
- global positioning
- mapping facilities
- programming GPS
- site analysis
- survey marks
- sewerage
- telecommunications
- town planning
- utility services, such as water.

***Equipment*** may include:

- any geodetic GPS receiver
- associated equipment capable of differential and real time modes of operations.

***Project parameters and requirements*** may include:

- coordinate systems
- datum
- display formats
- information displays
- outputs.

***Relevant personnel*** may include:

- colleagues
- registered surveyors
- site personnel
- staff or employee representatives
- supervisors or line managers
- suppliers
- users.

***Manufacturer specifications*** may include:

- equipment specifications
- operator manuals.

***Organisational guidelines*** may include:

- appropriate timelines
- code of ethics
- company policy
- final product formats
- formal design parameters
- legislation relevant to the work or service function, including equal employment opportunity (EEO)
- manuals
- OHS policies and procedures
- personnel practices and guidelines outlining teamwork, work roles and responsibilities

- Point positional data*** may include:
- requirements for data processing.
  - basic GPS positions, not including differential methods.
- Validated*** means reflecting the true state of a test result, including tests for systematic distortions such as:
- confounding bias
  - information/data bias
  - observational bias
  - recall bias
  - selection bias.
- Reference system*** refers to:
- projection and datum parameters required for GPS equipment and processing software.
- OHS*** may include:
- Australian standards
  - development of site safety plan
  - identification of potential hazards
  - inspection of work sites
  - training staff in OHS requirements
  - use of personal protective clothing
  - use of safety equipment and signage.
- GPS software*** refers to:
- GPS software package designed to process GPS data and output required information.
- Required information*** may include:
- calculated information
  - metadata
  - positional data
  - set out positional accuracy.
- Required documentation*** may include:
- electronic or paper-based correspondence with client
  - field records
  - final report
  - records of conversation
  - survey plots
  - organisational work activity sheets.

## Unit Sector(s)

Unit sector

Spatial information services

# CPPWMT5043A Develop and implement an environmental management strategy

## Modification History

Revised unit

Unit updated and equivalent to PRMWM43A Develop an environmental management strategy

## Unit Descriptor

This unit of competency specifies the outcomes required to develop and implement an environmental management strategy. It requires the ability to analyse practices and develop environmental management strategies by working effectively with stakeholders.

## Application of the Unit

This unit of competency supports individuals with supervisory responsibilities for developing waste management strategies. It includes contributing to the development of strategies, systems and plans, as well as recognising the need for expert advice.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1	Define scope of environmental management strategy.	1.1	Needs and expectations for development of <i>environmental management strategy</i> are identified.
		1.2	<i>Constraints</i> under which environmental strategy can be developed are identified.
		1.3	Clear and concise statement of environmental objectives is prepared and <i>feasibility of environmental management options</i> is evaluated.
2	Determine environmental management strategy development process.	2.1	<i>Process models</i> applicable to scope of environmental management strategy are identified.
		2.2	Process models are assessed and a suitable model for achieving the strategy's objectives is selected.
		2.3	Principal <i>stakeholders</i> are identified to maximise their participation in development process.
		2.4	Stakeholders are consulted regarding acceptance of proposed strategy development process.
3	Identify resources required for environmental management strategy.	3.1	Resource requirements of the strategy are determined in an accurate and comprehensive manner.
		3.2	Financial budget required for management strategy is prepared.
		3.3	<i>Human resource</i> and skill requirements for strategy are identified.
		3.4	Facility and equipment needs for strategy are identified to ensure all requirements can be met on time.
4	Identify and prioritise	4.1	Existing <i>data</i> is collated in a comprehensive manner relevant to the scope and strategy.

- environmental assets, problems and opportunities.
- 4.2 Existing data is evaluated to identify need for further data collection.
- 4.3 Additional data is obtained to ensure a comprehensive database for effective analysis.
- 4.4 Available data is assessed against scientifically established criteria and community expectations within ***applicable legislation and codes***.
- 4.5 Common problems and opportunities are grouped to formulate environmental issues that can be actioned by stakeholders.
- 4.6 ***Criteria to prioritise*** environmental issues are established.
- 5 Prepare environmental management strategy.
- 5.1 Practical actions that enable a resolution of environmental issues in line with strategy objectives are determined.
- 5.2 Clear and concise draft documentation is prepared for the strategy to obtain feedback from stakeholders.
- 5.3 Feedback is evaluated and a response is formed.
- 5.4 Local approval of the environmental management strategy is obtained.
- 6 Prepare implementation plan for environmental management strategy.
- 6.1 Actions are prioritised to provide the most effective resolution of issues within available resources.
- 6.2 Resources are allocated to match action priorities.
- 6.3 Processes are monitored and modified as required to ensure the strategy is achieving objectives.
- 6.4 Responsible parties with the capacity to carry out strategy actions are identified.
- 6.5 Achievable timelines, schedules and targets that enable strategy objectives to be met within required timeframes are established.
- 6.6 ***Supervisory processes*** and checks and measures are implemented to ensure work is completed within ***time***

*available.*

- |   |  |     |  |
|---|--|-----|--|
| 7 | Monitor and review effectiveness of environmental management strategy. | 7.1 | Regular data to provide accurate measures of performance are collected and analysed.   |
|   |  | 7.2 | Outcomes of strategy objectives are compared to assess respective effectiveness.   |
|   |  | 7.3 | Changes are made to strategy as required in a timely manner to ensure outcomes are achieved.                                       |
|   |  | 7.4 | Information obtained during monitoring and review is used to develop new strategies based on accumulated knowledge and experience. |

## Required Skills and Knowledge

- This section describes the skills and knowledge required for this unit.

### Required skills

- analytical skills to:
  - determine appropriate waste management service
  - review operations
  - conduct feasibility tests
- interpersonal skills to:
  - manage consultation processes
  - present strategy
- management skills to:
  - apply change management techniques
  - conduct budgeting
  - organise work practices safely and efficiently
  - conduct strategic problem solving
  - plan work practices
  - identify and minimise hazards and risks
  - organise work methodically
  - monitor performance
  - apply quality assurance practices
  - use information technology to complete tasks
- oral communication skills to:

- ask questions
- listen actively
- consult
- give instructions
- provide strategic information
- reading skills to interpret:
  - plans
  - complex documentation
- written communication skills to:
  - write reports
  - prepare complex strategic documentation

### **Required knowledge**

- environmental issues relating to:
  - life cycle of products: re-new, re-use and recycle
  - environmental regulations
  - renewable energy
- features required for an environmental management strategy, including:
  - site contract requirements
  - reclamation
  - training outline
  - waste minimisation
  - waste prevention
  - work procedures
  - environmental education
  - past and future reviews and audits relating to environmental management
  - recycling requirements
  - internal and external audits
  - monitoring personnel performance following training
  - quality control checks relating to environmental management
  - review of effectiveness of new procedures and processes
  - targets, such as:
    - carbon emissions reduction
    - cleaner production
    - lean management
    - recycling rates
    - waste minimisation
- identification and strategic knowledge of:
  - waste types, streams and characteristics
  - waste non-conformances

- unanticipated waste
- waste non-conformance procedures
- waste containment
- waste disposal and recovery routes
- occupational health and safety (OHS) requirements relating to:
  - dangerous goods and hazardous substances
  - OHS hierarchy of control
- resource recovery options relating to:
  - valuable resources within materials
  - potential resources to be recovered
- waste assessment to identify:
  - resource needs
  - hazards and risks
- waste audit, including:
  - analysing waste practices
  - analysing previous audit plans and audit processes
  - outlining possible benefits and outcomes from conducting a waste assessment
  - types of client waste management surveys and their uses
  - sampling techniques
- waste management provision, including:
  - organisational requirements and structure, including workplace communication channels and procedures
  - legislation, regulations and codes of practice applicable to specific waste management functions
  - waste management options
  - nature and significance of waste minimisation hierarchy life cycle assessment
  - organisational pricing schedules
  - duty of care

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observation of practical demonstration of the development and implementation of an environmental management strategy.
Critical aspects for	A person who demonstrates competency in this unit must be able to

<p>assessment and evidence required to demonstrate competency in this unit</p>	<p>provide evidence of the required skills and knowledge specified in this unit.</p> <p>In particular the person should demonstrate the ability to:</p> <ul style="list-style-type: none"> <li>• identify environmental management objectives</li> <li>• consult stakeholders consulted in development strategy</li> <li>• prioritise environmental issues by level of importance and impact</li> <li>• amalgamate issues in order to develop environmental management strategy.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> <li>• work plans and approved specifications</li> <li>• forms and procedures manuals.</li> </ul>
<p>Method of assessment</p>	<p>The process of developing an environmental management strategy must comply with the objectives of the client as well as with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of environmental management strategy.</p> <p>Assessment methods must:</p> <ul style="list-style-type: none"> <li>• satisfy the endorsed Assessment Guidelines of the Property Services Training Package</li> <li>• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application</li> <li>• reinforce the integration of employability skills with workplace tasks and job roles</li> <li>• confirm that competency is verified and able to be transferred to other circumstances and environments.</li> </ul>
<p>Guidance information for assessment</p>	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>This unit could be assessed on its own or in combination with other</p>

	<p>units of competency relevant to the job function, for example:</p> <ul style="list-style-type: none"> <li>• CPPCMN4001B Develop workplace policies and procedures for sustainability</li> <li>• CPPWMT5004A Develop waste management strategies.</li> </ul>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Environmental management strategy</i></b> may include:	<ul style="list-style-type: none"> <li>• <b>air and water</b> pollution</li> <li>• biodiversity protection and protection of natural resources</li> <li>• carbon emission</li> <li>• ecosystem management</li> <li>• wildlife and endangered species.</li> </ul>
<b><i>Constraints</i></b> may include:	<ul style="list-style-type: none"> <li>• budgets</li> <li>• knowledge</li> <li>• resources</li> <li>• time.</li> </ul>
<b><i>Feasibility of environmental management options</i></b> must include:	<ul style="list-style-type: none"> <li>• commitment to environmental management strategies</li> <li>• compliance with legislation</li> <li>• cost-benefit analysis</li> <li>• costs</li> <li>• lead time</li> <li>• process constraints</li> <li>• resource requirements, including equipment and personnel</li> <li>• resources available.</li> </ul>
<b><i>Process models</i></b> may include:	<ul style="list-style-type: none"> <li>• implementation strategies, including: <ul style="list-style-type: none"> <li>• material safety data sheets (MSDS)</li> <li>• measurement and recording</li> <li>• OHS procedures</li> <li>• personal protective equipment (PPE)</li> <li>• legislation and codes</li> <li>• site contract requirements</li> <li>• work procedures</li> </ul> </li> <li>• objectives pertaining to: <ul style="list-style-type: none"> <li>• changes to processes and procedures</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• environmental issues</li> <li>• education and training</li> <li>• past and future reviews and audits</li> <li>• recycling requirements</li> <li>• reduction of waste</li> <li>• review strategies, including:             <ul style="list-style-type: none"> <li>• internal and external audits</li> <li>• monitoring statistics</li> <li>• monitoring personnel performance following training</li> <li>• undertaking quality control checks</li> <li>• reviewing effectiveness of new procedures and processes</li> <li>• formalising review strategies via re-planning</li> <li>• sampling</li> <li>• counting waste</li> </ul> </li> <li>• targets, such as:             <ul style="list-style-type: none"> <li>• carbon emissions reduction</li> <li>• lean management</li> <li>• recycling rates</li> <li>• waste minimisation.</li> </ul> </li> </ul>
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> <li>• business</li> <li>• community</li> <li>• council</li> <li>• funding bodies</li> <li>• government</li> <li>• industry</li> <li>• interest groups</li> <li>• land management agencies</li> <li>• local authorities</li> <li>• statutory authorities.</li> </ul>
<p><i>Human resource</i> may include:</p>	<ul style="list-style-type: none"> <li>• community experts</li> <li>• consultants</li> <li>• government agencies</li> <li>• internal staff</li> <li>• project officers</li> <li>• volunteers.</li> </ul>
<p><i>Data</i> may include:</p>	<ul style="list-style-type: none"> <li>• existing reports or programs</li> <li>• questionnaires</li> <li>• references</li> <li>• stakeholder input</li> <li>• surveys.</li> </ul>

<p><b><i>Applicable legislation and codes</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• codes, including:             <ul style="list-style-type: none"> <li>• Australian Code for the Transport of Dangerous Goods by Road and Rail</li> <li>• industry</li> </ul> </li> <li>• commonwealth, state and territory legislation, including:             <ul style="list-style-type: none"> <li>• anti-discrimination</li> <li>• environmental protection</li> <li>• equal employment opportunity</li> <li>• freedom of information</li> <li>• industrial</li> <li>• OHS</li> <li>• trade practices</li> </ul> </li> <li>• road laws.</li> </ul>
<p><b><i>Criteria to prioritise</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• benefit</li> <li>• budget constraints</li> <li>• business objectives</li> <li>• community preferences</li> <li>• environmental issues:             <ul style="list-style-type: none"> <li>• impact</li> <li>• legislative provisions</li> </ul> </li> <li>• resources</li> <li>• timeframes.</li> </ul>
<p><b><i>Supervisory processes</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• delegating</li> <li>• implementing</li> <li>• monitoring</li> <li>• overseeing</li> <li>• planning</li> <li>• reviewing</li> <li>• targeting practices to meet deadlines.</li> </ul>
<p><b><i>Time available</i></b> may include considering:</p>	<ul style="list-style-type: none"> <li>• client instructions</li> <li>• contingencies</li> <li>• past experiences</li> <li>• skills and experience of operatives</li> <li>• location of project</li> <li>• methods to be employed</li> <li>• resources and equipment to be used.</li> </ul>

## **Unit Sector(s)**

Waste management

## **Custom Content Section**

Not applicable.

# CPPWMT5045A Develop site safety plans

## Modification History

Revised unit

Unit updated and equivalent to PRMWM45B Develop site safety plan

## Unit Descriptor

This unit of competency specifies the outcomes required to develop an on-site safety plan for a waste management environment. It requires the ability to plan activity for safe work practices.

## Application of the Unit

This unit of competency supports individuals responsible for developing on-site safety plans. It includes contributing to the development of operational procedures, in addition to safety principles.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |   |     |   |
|---|---|-----|---|
| 1 | Review site safety requirements.              | 1.1 | <i>Details of site and site requirements</i> are obtained and reviewed to determine specific safety requirements.   |
|   |   | 1.2 | <i>Organisational requirements</i> , occupational health and safety (OHS) regulations and <i>legislation and codes</i> are identified.                                      |
|   |   | 1.3 | <i>Site safety requirements</i> are identified according to organisational requirements.  |
| 2 | Determine site safety requirements.           | 2.1 | Safety information necessary to ensure safety of personnel and general public is included in the on-site safety plan.   |
|   |   | 2.2 | <i>Site areas</i> are identified and classified in safety plan.   |
|   |   | 2.3 | Exact locations of <i>first aid and emergency facilities</i> are identified in on-site safety plan.   |
|   |   | 2.4 | <i>Wastes on site</i> are clearly identified in on-site safety plan by location and type.   |
|   |   | 2.5 | <i>Emergency and personal protective equipment (PPE)</i> requirements and <i>potential hazards and risks</i> are identified for specific site areas in on-site safety plan. |
|   |   | 2.6 | <i>Emergency response action or procedures</i> are identified according to on-site safety plan.   |
|   |   | 2.7 | On-site safety plan is reviewed following feedback from stakeholders.   |
| 3 | Communicate on-site safety plan to personnel. | 3.1 | On-site safety plan is communicated promptly and clearly to relevant personnel according to organisational requirements, OHS regulations and legislation and codes.         |
|   |   | 3.2 | Personnel's understanding of all aspects of on-site safety plan is confirmed through questioning and observation.   |
|   |   | 3.3 | Feedback from personnel is obtained and integrated into on-site safety plan.  |

- 3.4 On-site safety plan is kept in an accessible place, according to organisational requirements, OHS regulations and legislation and codes.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- analytical skills to:
  - determine site safety options
  - review operations
- basic illustration skills for drawing simple site maps
- interpersonal skills to:
  - manage consultation processes
  - present safety plan
- management skills to:
  - apply change management techniques
  - conduct strategic problem solving
  - plan work practices
  - identify and minimise hazards and risks
  - organise work methodically
  - apply quality assurance practices
  - use information technology to complete tasks
  - use emergency and personal protective equipment
- reading skills to interpret:
  - work or material requirements
  - materials safety data sheets (MSDS)
- written communication skills to:
  - write reports
  - prepare complex strategic documentation
- critical thinking skills to develop on-site safety plan, identifying:
  - resource needs
  - hazards and risks
- oral communication skills to:
  - ask and answer questions
  - explain on-site safety plan to personnel

- give instructions
- seek feedback
- listen actively

### Required knowledge

- environmental issues relating to:
  - life cycle of products: re-new, re-use and recycle
  - environmental regulations
- features required for on-site safety plan pertaining to:
  - site contract requirements
  - waste disposal methods
  - waste minimisation
  - waste prevention
  - waste segregation
  - work procedures
  - environmental issues
  - education and training outline
  - recycling and recovery requirements
  - monitoring personnel performance following safety training
  - quality control checks
  - review of effectiveness of new procedures and processes
- identification of safety issues pertaining to:
  - waste types, streams and characteristics and level of associated danger
  - waste non-conformances
  - unanticipated waste
  - waste non-conformance procedures
  - waste contaminants
  - hazardous waste
  - waste containment
  - waste disposal and recovery routes
- OHS requirements relating to:
  - dangerous goods and hazardous substances
  - OHS hierarchy of control
- waste audit, including:
  - analysing waste safety practices
  - analysing previous audit plans and audit processes pertaining to safety
- waste management provision, including:
  - organisational requirements in relation to safety
  - organisational structure and reporting requirements
  - legislation, regulations and codes of practice applicable to specific waste management

functions

- waste management safety options

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by demonstration of site safety plans developed.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.</p> <p>In particular the person should demonstrate the ability to:</p> <ul style="list-style-type: none"> <li>• identify site safety requirements</li> <li>• specify all necessary PPE required to undertake work safely in each site area</li> <li>• gather necessary information to develop on-site safety plan following consultation with stakeholders</li> <li>• apply OHS requirements and duty of care to provide safe environment for personnel and general public.</li> </ul>
Context of and specific resources for assessment	<p>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> <li>• work plans and approved specifications</li> <li>• forms and procedures manuals.</li> </ul>
Method of assessment	<p>An on-site safety plan must be developed in line with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of the plan.</p> <p>Assessment methods must:</p> <ul style="list-style-type: none"> <li>• satisfy the endorsed Assessment Guidelines of the Property Services Training Package</li> <li>• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application</li> </ul>

	<ul style="list-style-type: none"> <li>reinforce the integration of employability skills with workplace tasks and job roles</li> <li>confirm that competency is verified and able to be transferred to other circumstances and environments.</li> </ul>
Guidance information for assessment	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>This unit could be assessed on its own or in combination with other units of competency relevant to the job function, for example:</p> <ul style="list-style-type: none"> <li>CPPCMN3001B Participate in environmentally sustainable work practices</li> <li>CPPCMN4007A Manage workplace safety arrangements.</li> </ul>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Details of site and site requirements</i></b> may include:	<ul style="list-style-type: none"> <li>areas allowing access to general public</li> <li>organisational and site OHS requirements</li> <li>number of personnel on site</li> <li>potential hazards and risks, including level of risk</li> <li>waste incoming</li> <li>waste present at site.</li> </ul>
<b><i>Organisational requirements</i></b> may include information found in:	<ul style="list-style-type: none"> <li>briefing papers</li> <li>job sheets</li> <li>letters</li> <li>memos</li> <li>operations manuals</li> <li>quality assurance documents</li> <li>tender and contract documents</li> <li>verbal or written instructions</li> <li>work procedures.</li> </ul>
<b><i>Legislation and codes</i></b>	<ul style="list-style-type: none"> <li>codes, including:</li> </ul>

<p>may include:</p>	<ul style="list-style-type: none"> <li>• Australian Code for the Transport of Dangerous Goods by Road and Rail</li> <li>• industry</li> <li>• commonwealth, state and territory legislation, including:             <ul style="list-style-type: none"> <li>• anti-discrimination</li> <li>• environmental protection</li> <li>• equal employment opportunity</li> <li>• freedom of information</li> <li>• industrial</li> <li>• OHS</li> <li>• trade practices</li> </ul> </li> <li>• road laws.</li> </ul>
<p><i>Site safety requirements</i> must include:</p>	<ul style="list-style-type: none"> <li>• all necessary requirements to ensure the safety of:             <ul style="list-style-type: none"> <li>• environment</li> <li>• equipment</li> <li>• general public</li> <li>• personnel</li> <li>• structures.</li> </ul> </li> </ul>
<p><i>Site safety requirements</i> may also include:</p>	<ul style="list-style-type: none"> <li>• awareness of potential hazards and risks</li> <li>• communication requirements</li> <li>• confined space awareness</li> <li>• emergency procedure guides</li> <li>• emergency response equipment</li> <li>• emergency shut-down and lock-out procedures</li> <li>• evacuation area</li> <li>• first aid</li> <li>• induction</li> <li>• PPE requirements</li> <li>• site security</li> <li>• training</li> <li>• warning signs and barriers.</li> </ul>
<p><i>Site areas</i> may include:</p>	<ul style="list-style-type: none"> <li>• evacuation areas</li> <li>• first aid bays</li> <li>• general public access areas</li> <li>• restricted areas.</li> </ul>
<p><i>First aid and emergency facilities</i> may include:</p>	<ul style="list-style-type: none"> <li>• breathing apparatus</li> <li>• eye baths</li> <li>• fire extinguishers</li> <li>• first aid kits.</li> </ul>
<p><i>Wastes on site</i> may</p>	<ul style="list-style-type: none"> <li>• solid (non-hazardous), e.g. construction and demolition</li> </ul>

<p>include:</p>	<ul style="list-style-type: none"> <li>• liquid (non-hazardous), e.g. chemical and aqueous</li> <li>• hazardous – regulated, prescribed, quarantined, medical and clinical</li> <li>• recoverable resources, e.g. recyclable and green waste.</li> </ul>
<p><b><i>Emergency and personal protective equipment</i></b> must include:</p>	<ul style="list-style-type: none"> <li>• communications equipment</li> <li>• eye protection, such as goggles and protective glasses</li> <li>• eyewash kit</li> <li>• fire extinguishers</li> <li>• first aid kit</li> <li>• footwear</li> <li>• gloves</li> <li>• overalls and protective clothing.</li> </ul>
<p><b><i>Emergency and personal protective equipment</i></b> could also include:</p>	<ul style="list-style-type: none"> <li>• breathing apparatus</li> <li>• emergency procedure guides</li> <li>• face shields or masks</li> <li>• hard hats</li> <li>• hearing protection</li> <li>• MSDS</li> <li>• spill kit.</li> </ul>
<p><b><i>Personal protective equipment</i></b> must be:</p>	<ul style="list-style-type: none"> <li>• cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements</li> <li>• worn when required according to organisational requirements</li> <li>• stored according to organisational requirements.</li> </ul>
<p><b><i>Potential hazards and risks</i></b> are those identified by the organisation that may lead to:</p>	<ul style="list-style-type: none"> <li>• damage to plant, vehicle or property</li> <li>• harm to the environment</li> <li>• illness or injury to employees, contractors or the public</li> <li>• injuries resulting from manual handling and repetitive work.</li> </ul>
<p><b><i>Potential hazards and risks</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• broken glass</li> <li>• broken metal</li> <li>• compaction equipment</li> <li>• contamination</li> <li>• dust</li> <li>• fire</li> <li>• gases and fumes</li> <li>• hazardous waste (e.g. sharps)</li> <li>• narrow driveways</li> <li>• other vehicles and equipment</li> <li>• overhanging signs</li> <li>• projectiles</li> <li>• spark-producing equipment</li> <li>• unguarded conveyor belts</li> </ul>

	<ul style="list-style-type: none"><li>• weather.</li></ul>
<i>Emergency response action or procedures</i> may include:	<ul style="list-style-type: none"><li>• cleaning up</li><li>• containing emergency</li><li>• isolating or shutting down equipment or plant</li><li>• evacuation</li><li>• first aid</li><li>• making site safe</li><li>• notifying authorities</li><li>• using PPE.</li></ul>

# CULATS501A Work with Aboriginal and Torres Strait Islander cultural material

## Modification History

Release	Comments
Release 1	This unit of competency first released with <i>CUL11 Library, Information and Cultural Services Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to work with Aboriginal and Torres Strait Islander cultural material in a culturally appropriate manner.

## Application of the Unit

This unit applies particularly to Aboriginal and Torres Strait Islander people and focuses on the specific cultural and consultative requirements for sourcing, handling, interpreting and exhibiting Aboriginal or Torres Strait Islander cultural material.

The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander people. This unit also reflects that there is no single Aboriginal or Torres Strait Islander culture.

The unit deals with complex and interrelated elements of Aboriginal and Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities across the continent and islands of Australia. These may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

### Elements and Performance Criteria

1. Source Aboriginal or Torres Strait Islander cultural material	<p>1.1 Identify and locate <b><i>cultural material</i></b> that may be appropriate for exhibition or display in <b><i>museum collections</i></b></p> <p>1.2 Confirm traditional ownership of cultural material and consult with appropriate communities</p> <p>1.3 Consult with traditional custodians to determine suitable keeping place for materials not authorised for general exhibition</p> <p>1.4 Negotiate permission and advice for the use of cultural material according to <b><i>cultural protocols</i></b></p> <p>1.5 Complete records according to cultural protocols</p> <p>1.6 Research <b><i>issues and protocols</i></b> in relation to the return of cultural material to local Aboriginal or Torres Strait Islander communities</p>
2. Handle Aboriginal or Torres Strait Islander cultural material	<p>2.1 Describe, move, store, maintain and return cultural material according to <b><i>cultural requirements</i></b></p> <p>2.2 Note aspects of objects that need repair or attention and take action within scope of own job role or refer to relevant personnel as required</p> <p>2.3 Communicate specific cultural requirements to colleagues</p>
3. Prepare Aboriginal or Torres Strait Islander cultural material for exhibition	<p>3.1 Consult with custodians to determine culturally appropriate approaches to promote, exhibit and display material, and <b><i>limitations</i></b> to mode of exhibit</p> <p>3.2 Develop culturally appropriate <b><i>interpretive approaches</i></b></p> <p>3.3 Develop <b><i>exhibition support materials</i></b> that take account of</p>

	cultural protocols in consultation with custodians 3.4 Communicate <i>requirements for exhibition</i> of cultural material to colleagues
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication and teamwork skills to:
  - liaise and consult with community members and custodians in a culturally sensitive manner
  - share information with colleagues
- cultural sensitivity skills to be:
  - sensitive to cultural issues
  - respectful of different cultural practices
- initiative and enterprise skills to develop:
  - culturally appropriate ways of displaying materials
  - interpretive approaches that showcase objects in a culturally respectful way
- literacy skills to:
  - describe cultural material
  - develop agreements
  - complete organisational records
- planning and organising skills to undertake activities in preparation for exhibitions in a logical and efficient manner
- problem-solving skills to determine traditional ownership
- research skills to source material for the collection
- technical skills to move, store and maintain cultural material.

### Required knowledge

- scope of Aboriginal or Torres Strait Islander cultural material appropriate for exhibition or display
- appropriate keeping places for cultural material not suitable/forbidden for exhibition or display
- issues and protocols relating to the return of cultural material to Aboriginal or Torres Strait Islander communities
- copyright, moral rights and intellectual property issues and legislation with particular reference to Aboriginal or Torres Strait Islander cultural material

- sources of support for the development of Aboriginal and Torres Strait Islander collections
- current conventions of collection management, including appropriate consultations and respect for traditional custodianship when working with Aboriginal or Torres Strait Islander cultural material, including non-western concepts of collecting
- cultural protocols and appropriate consultations for the identification, movement, storage, maintenance and exhibition of cultural material in the relevant community context
- current industry policy on the acquisition and management of Aboriginal and Torres Strait Islander cultural material.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply knowledge of cultural protocols and practices when working with Aboriginal or Torres Strait Islander cultural material</li> <li>• consult with Aboriginal or Torres Strait Islander people about the display of cultural material</li> <li>• observe cultural protocols when moving, storing, displaying, maintaining and returning cultural material.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant Aboriginal or Torres Strait Islander community</li> <li>• access to: <ul style="list-style-type: none"> <li>• Aboriginal or Torres Strait Islander cultural material or information on material when access is not available</li> <li>• information about cultural protocols.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of a project undertaken by the candidate to develop and exhibit a collection within an Aboriginal or Torres Strait</li> </ul>

	<p>Islander community</p> <ul style="list-style-type: none"> <li>• evaluation of a project undertaken by the candidate to research and document the cultural significance of particular cultural materials</li> <li>• verbal or written questioning to assess knowledge of appropriate protocols and consultation processes.</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<b>Guidance information for assessment</b>	<p>Any organisation or individual planning to train or assess this unit would be expected to work in a culturally appropriate manner with the appropriate Aboriginal or Torres Strait Islander community, for example through the establishment of a local Aboriginal or Torres Strait Islander reference group. In particular, it is vital to ensure respectful integration of local cultural knowledge or protocols that will inform the implementation of the unit.</p> <p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CULEVP402A Design and develop interpretive displays.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Cultural material</i></b> is defined as objects, collections, artworks, specimens, structures or sites, and includes:</p>	<ul style="list-style-type: none"> <li>• archaeological material</li> <li>• books and manuscripts</li> <li>• cultural sites and buildings</li> <li>• ethnographic material</li> <li>• film and audiovisual material</li> <li>• flora and fauna</li> <li>• furniture</li> <li>• photographs</li> <li>• technological and industry items</li> </ul>
--	---

	<ul style="list-style-type: none"> <li>• textiles</li> <li>• works on paper and canvas.</li> </ul>
<b><i>Museum collections</i></b> may relate to:	<ul style="list-style-type: none"> <li>• art</li> <li>• aspects of the natural environment</li> <li>• ceremony, such as: <ul style="list-style-type: none"> <li>• dance</li> <li>• music</li> </ul> </li> <li>• cultural heritage</li> <li>• heritage resources</li> <li>• history</li> <li>• living styles</li> <li>• materials with a cultural or spiritual significance</li> <li>• plants and animals</li> <li>• science.</li> </ul>
<b><i>Cultural protocols</i></b> may relate to:	<ul style="list-style-type: none"> <li>• acknowledging participation and ownership</li> <li>• awareness of occasions when consultation is required</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• storing cultural material</li> <li>• ways in which consultations should be conducted.</li> </ul>
<b><i>Issues and protocols</i></b> may relate to:	<ul style="list-style-type: none"> <li>• how and where to return cultural material</li> <li>• identification and representation of recipients and custodians</li> <li>• local consultations and agreements on return of material</li> <li>• negotiation with current holders of material</li> <li>• return of human skeletal remains where a specific set of cultural consultations and requirements must be observed.</li> </ul>
<b><i>Cultural requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• access to material and associated research</li> <li>• storage of material</li> <li>• process for transporting the material</li> <li>• use of equipment or tools</li> <li>• who can describe or handle material</li> <li>• who can view material.</li> </ul>
<b><i>Limitations</i></b> may relate to:	<ul style="list-style-type: none"> <li>• access issues, such as: <ul style="list-style-type: none"> <li>• men's business</li> <li>• sacred material</li> <li>• secret material</li> <li>• women's business</li> </ul> </li> <li>• consultation with and involvement of appropriate Aboriginal and Torres Strait Islander community members</li> </ul>

	<ul style="list-style-type: none"> <li>• descriptive or explanatory writing</li> <li>• fragility of material</li> <li>• identification process</li> <li>• interpretation method.</li> </ul>
<i>Interpretive approaches</i> may relate to:	<ul style="list-style-type: none"> <li>• Aboriginal or Torres Strait Islander community wishes for the way material should be interpreted</li> <li>• consultation with and involvement of appropriate Aboriginal or Torres Strait Islander community members</li> <li>• knowledge of existing collections.</li> </ul>
<i>Exhibition support materials</i> may include:	<ul style="list-style-type: none"> <li>• advertising materials</li> <li>• approvals and permissions</li> <li>• interpretive documents</li> <li>• merchandising</li> <li>• online information</li> <li>• photographs</li> <li>• publications.</li> </ul>
<i>Requirements for exhibition</i> may relate to:	<ul style="list-style-type: none"> <li>• access restrictions</li> <li>• environmental requirements</li> <li>• placement of items within collections</li> <li>• restrictions on those able to interpret material for visitors</li> <li>• special handling requirements and restrictions.</li> </ul>

## Unit Sector(s)

Cultural services - Aboriginal and Torres Strait Islander cultural heritage

## CULCNM303A Move and store collection material

### Modification History

Release	Comments
Release 1	This unit of competency first released with <i>CUL11 Library, Information and Cultural Services Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to handle, pack and unpack collection material for movement and storage.

### Application of the Unit

This unit applies to individuals who require knowledge of techniques and materials that may be used to handle, move and store different types of collection material.

Work would generally be undertaken under supervision, within established guidelines.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills</i>

Element	Performance Criteria
<i>unit of competency.</i>	<i>and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine movement and storage requirements	<p>1.1 Assess <b>documentation</b> to determine scope of work required for <b>movement and storage of collection material</b></p> <p>1.2 Identify and confirm <b>organisational procedures and guidelines</b> and <b>specific requirements</b> with <b>relevant personnel</b></p> <p>1.3 Assess collections to estimate projected current and future storage requirements with relevant personnel</p> <p>1.4 Seek specialist advice or assistance where required</p>
2. Pack and unpack collection material	<p>2.1 Select appropriate <b>packing materials, tools and equipment</b> and use safely</p> <p>2.2 Handle collection material safely and in a manner that maintains integrity of collection material</p> <p>2.3 Observe conservation and sustainability principles in use of packaging materials</p> <p>2.4 Label packaging to facilitate easy identification by others during <b>transportation</b> and within storage facilities</p> <p>2.5 Recycle and dispose of waste responsibly</p>
3. Move collection material	<p>3.1 Select appropriate handling and moving equipment, and use safely</p> <p>3.2 Handle collection material in a manner that protects individual items and assists efficient loading and unloading processes</p> <p>3.3 Identify hazardous items and load them in a manner that minimises health and safety risk</p> <p>3.4 Inspect load prior to transportation to ensure that items are loaded and secured appropriately, and make adjustments as required</p> <p>3.5 Prepare <b>transportation documentation</b></p>
4. Arrange collection material and update records	<p>4.1 Install, position or store collection material as required</p> <p>4.2 Clear and clean work areas according to organisational procedures</p> <p>4.3 Refer problems to relevant personnel as required</p>

	4.4 Update existing movement and storage <i>records</i> and prepare new records as required 4.5 Store records according to organisational policies and procedures
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - make arrangements with stakeholders, transport personnel and customs agents
  - refer problems to relevant personnel
- learning skills to seek expert advice
- literacy skills to:
  - read and complete documentation
  - read and interpret procedures and specific requirements for movement and storage
- numeracy skills to:
  - count items
  - estimate storage requirements
  - calculate and check costs
  - take basic measurements
- planning and organising skills to:
  - pack and unpack collection material in a logical order
  - select appropriate transportation and packing methods and storage techniques to maintain the integrity of collection material
- safety awareness skills to:
  - handle collection material safely
  - use transport equipment and packaging materials safely
  - minimise hazards
- self-management skills to:
  - prioritise work tasks and meet deadlines
  - follow workplace procedures.

### Required knowledge

- basic conservation issues to be considered when moving or storing collection material
- cultural protocols to be observed for different types of material, including those for Aboriginal or Torres Strait Islander material

- differences in approach for short and long-term movement and storage
- organisational procedures and guidelines relating to:
  - storage and transport documentation and records
  - use of materials, tools and equipment, including labelling
  - material handling and work health and safety (WHS) procedures and requirements
- packing and storage techniques for different types of collection material
- record-keeping procedures for collection movement and storage
- safe work and manual-handling procedures
- security issues to be considered when moving or storing collection material
- sources of specialist advice for moving or storing collection material.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• handle, move and store collection items using appropriate tools, equipment, techniques and organisational procedures</li> <li>• use safe work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• a collection</li> <li>• materials, tools and equipment for packing, moving and storing collection items</li> <li>• organisational procedures</li> <li>• specialist advisers.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• direct observation of the candidate handling, packing and unpacking collection material</li> <li>• inspection of items packed, unpacked or stored by the candidate</li> <li>• inspection of documentation and records completed by the candidate</li> </ul>

	<ul style="list-style-type: none"> <li>verbal or written questioning to assess knowledge of handling and packing techniques for different types of collection material and safety requirements.</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>CULCNM201A Monitor collections for changes in condition.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"> <li>collection records</li> <li>facilities reports</li> <li>lending or borrowing documentation</li> <li>storage details</li> <li>transportation documentation</li> <li>work instructions.</li> </ul>
<b><i>Movement and storage</i></b> may be:	<ul style="list-style-type: none"> <li>externally</li> <li>internally (within organisation or same building)</li> <li>short and long distance</li> <li>short and long-term storage.</li> </ul>
<b><i>Collection material</i></b> is defined as objects, collections, artworks, specimens, structures or sites, and includes:	<ul style="list-style-type: none"> <li>archaeological material</li> <li>books and manuscripts</li> <li>digital media</li> <li>ethnographic material</li> <li>film and audiovisual material</li> <li>flora and fauna</li> <li>furniture</li> <li>photographs</li> <li>technological or industry items</li> </ul>

	<ul style="list-style-type: none"> <li>• textiles</li> <li>• works on paper and canvas.</li> </ul>
<b>Organisational procedures and guidelines</b> may relate to:	<ul style="list-style-type: none"> <li>• cleaning</li> <li>• conservation</li> <li>• environment</li> <li>• handling methods</li> <li>• national and international standards for moving and storing materials</li> <li>• purchasing</li> <li>• security</li> <li>• storage arrangements</li> <li>• storage of packaging materials</li> <li>• waste disposal.</li> </ul>
<b>Specific requirements</b> may relate to:	<ul style="list-style-type: none"> <li>• additional protection</li> <li>• cultural protocols, including Indigenous protocols</li> <li>• de-acclimatisation periods for sensitive items</li> <li>• environmentally controlled packaging</li> <li>• object moving equipment</li> <li>• object support systems for moving or transfer</li> <li>• preventive pest management processes</li> <li>• use or non-use of certain items.</li> </ul>
<b>Relevant personnel</b> may include:	<ul style="list-style-type: none"> <li>• couriers</li> <li>• destination personnel</li> <li>• owners of collection material</li> <li>• specialist advisers</li> <li>• store staff</li> <li>• transportation personnel.</li> </ul>
<b>Packaging materials, tools and equipment</b> may include:	<ul style="list-style-type: none"> <li>• acid-free interleaving or wrapping</li> <li>• CD and DVD cases</li> <li>• containers</li> <li>• coverings</li> <li>• cushioning material</li> <li>• enclosures</li> <li>• folders</li> <li>• gloves</li> <li>• negative sleeves</li> <li>• packing/cotton tape and dispenser</li> <li>• protective enclosures, such as: <ul style="list-style-type: none"> <li>• boxes</li> <li>• canisters</li> <li>• crates</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• tubing</li> <li>• protective wrapping, such as: <ul style="list-style-type: none"> <li>• bubble wrap</li> <li>• cardboard</li> <li>• foam packaging</li> </ul> </li> <li>• scissors</li> <li>• trolleys</li> <li>• trucks</li> <li>• tools, such as: <ul style="list-style-type: none"> <li>• hammers</li> <li>• screw drivers</li> <li>• utility knives.</li> </ul> </li> </ul>

## Unit Sector(s)

Cultural services - Collection management

## CULCNM503A Manage the development of collections

### Modification History

Release	Comments
Release 1	This unit of competency first released with <i>CUL11 Library, Information and Cultural Services Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to determine collection needs and to accession and deaccession collection material.

### Application of the Unit

This unit applies to individuals who apply judgement and specialised knowledge in relation to the assessment of collection needs for accessioning and deaccessioning collection material, galleries and collecting bodies.

In larger organisations, specialised curatorial staff may undertake this role. In smaller organisations, the role may be undertaken by individuals with broader management responsibilities, by committees and boards of management, or combinations of different personnel.

Work is undertaken autonomously but in consultation with stakeholders.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine collection needs	<p>1.1 Review <b><i>collection material</i></b> against <b><i>organisational objectives</i></b> and <b><i>collection requirements</i></b></p> <p>1.2 Determine priorities in consultation with <b><i>key stakeholders</i></b></p>
2. Assess collection material to be accessioned	<p>2.1 Use <b><i>options</i></b> to identify material that could be accessioned to meet collection needs</p> <p>2.2 Assess <b><i>key internal and external factors</i></b> that impact on options</p> <p>2.3 Obtain expert advice on material and its relevance to collections</p> <p>2.4 Assess potential material for significance and relevance to collections according to organisational <b><i>collection management policies</i></b></p> <p>2.5 Examine records to establish provenance and confirm significance</p> <p>2.6 Identify <b><i>resources</i></b> required for accessioning collection material</p> <p>2.7 Develop recommendations for accessioning collection material according to collection needs</p>
3. Coordinate accessioning of collection material	<p>3.1 Seek approval for accessioning collection material</p> <p>3.2 Establish clear conditions for accessioning collection material according to <b><i>organisational procedures and guidelines</i></b></p> <p>3.3 Organise appropriate resources to accession collection material according to approval and conditions</p> <p>3.4 Comply with legal, ethical and financial requirements and <b><i>cultural protocols</i></b> in the accession process</p> <p>3.5 Negotiate <b><i>terms</i></b> and organise transfer of rights according to</p>

	<p>organisational procedures</p> <p>3.6 Document agreements and terms according to organisational procedures and guidelines</p>
4. Coordinate deaccessioning of collection material	<p>4.1 Identify material to be deaccessioned from collections</p> <p>4.2 Consult with experts on the material to determine the impact of deaccessioning on the collection</p> <p>4.3 Select options to deaccession material</p> <p>4.4 Develop and implement recommendations for deaccessioning collection material according to organisational policies and strategies</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret and link strategies to collection needs and priorities
- communication skills to:
  - consult with a broad range of internal and external stakeholders
  - negotiate terms and conditions for accessioning and deaccessioning collection material
  - seek and interpret expert advice
- literacy skills to:
  - develop written agreements
  - interpret procedures
  - review and apply terms and conditions
- numeracy skills to:
  - assess and manage costs
  - interpret and apply budgets
- planning and organising skills to coordinate interrelated aspects of accessioning and deaccessioning collection material
- problem-solving skills to anticipate and mitigate problems and risks associated with developing collections
- self-management skills to:
  - prioritise work tasks and meet deadlines
  - follow workplace procedures and guidelines
- teamwork skills to work collaboratively with others in developing collections
- technical skills to:
  - use record-keeping systems

- undertake research related to the development of collections.

### Required knowledge

- organisational procedures and guidelines regarding managing specific items and whole collections
- subject matter expertise, including curatorial and conservation
- sources for accessioning and deaccessioning options
- information regarding comparable collections and their importance
- legal, ethical and financial requirements for accessioning and deaccessioning
- cultural protocols that impact on accessioning and deaccessioning of cultural material, including those for Aboriginal or Torres Strait Islander material
- protocols in relation to collection management
- security issues associated with collection material.

### Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• make and justify decisions regarding accessioning and deaccessioning collection material to meet collection needs</li> <li>• apply organisational procedures and guidelines in managing the development of collections</li> <li>• negotiate and document processes and agreements in relation to collection material.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to: <ul style="list-style-type: none"> <li>• an established or proposed collection as the basis of decision making</li> <li>• organisational objectives, procedures and guidelines</li> </ul> </li> <li>• engagement with others to reflect the communication and negotiation aspects of the unit.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of</li> </ul>

	<p>evidence and third-party workplace reports of on-the-job performance</p> <ul style="list-style-type: none"> <li>• evaluation of candidate’s ability to develop recommendations for the development of collections</li> <li>• evaluation of records and documentation</li> <li>• verbal or written questioning to assess knowledge of organisational procedures and policies for the development of collections</li> <li>• case study on addressing a collection need.</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• CULCNM502A Manage lending and borrowing processes for collections.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Collection material</i></b> is defined as objects, collections, artworks, specimens, structures or sites, and includes:</p>	<ul style="list-style-type: none"> <li>• archaeological material</li> <li>• books and manuscripts</li> <li>• cultural sites and buildings</li> <li>• ethnographic material</li> <li>• film and audiovisual material</li> <li>• flora and fauna</li> <li>• furniture</li> <li>• photographs</li> <li>• technological and industry items</li> <li>• textiles</li> <li>• works on paper and canvas.</li> </ul>
<p><b><i>Organisational</i></b></p>	<ul style="list-style-type: none"> <li>• comprehensiveness of collections</li> </ul>

<i>objectives</i> may relate to:	<ul style="list-style-type: none"> <li>• future direction of the organisation</li> <li>• marketing initiatives</li> <li>• relationship between collection and site</li> <li>• resource constraints</li> <li>• special exhibition needs</li> <li>• strategic plan</li> <li>• visitor needs and trends.</li> </ul>
<i>Collection requirements</i> may relate to:	<ul style="list-style-type: none"> <li>• addressing cultural or moral issues</li> <li>• complying with a will, statute or other legal requirement</li> <li>• improving or rationalising collections</li> <li>• meeting the request of an organisation or person</li> <li>• mounting an exhibition</li> <li>• rationalising loans.</li> </ul>
<i>Key stakeholders</i> may include:	<ul style="list-style-type: none"> <li>• boards and committees</li> <li>• commercial partners</li> <li>• cultural groups</li> <li>• local community members</li> <li>• other cultural service organisations</li> <li>• other management</li> <li>• subject matter experts</li> <li>• visitors.</li> </ul>
<i>Options</i> may take place between or by means of:	<ul style="list-style-type: none"> <li>• auction</li> <li>• bequest</li> <li>• different sections of the same institution</li> <li>• exchange</li> <li>• gift</li> <li>• institution and commercial enterprises</li> <li>• institution and individuals or groups</li> <li>• loan</li> <li>• purchase</li> <li>• tender</li> <li>• transfer</li> <li>• two institutions.</li> </ul>
<i>Key internal and external factors</i> may relate to:	<ul style="list-style-type: none"> <li>• availability of expertise</li> <li>• competitive environment</li> <li>• economic considerations</li> <li>• marketing considerations</li> <li>• organisational priorities</li> <li>• resource constraints</li> <li>• social or political issues.</li> </ul>
<i>Collection management</i>	<ul style="list-style-type: none"> <li>• accession policy</li> </ul>

<i>policies</i> may include:	<ul style="list-style-type: none"> <li>• collection policy</li> <li>• deaccession policy</li> <li>• guidelines for review of policies, including who is authorised to review them and the scope and frequency of reviews</li> <li>• limit of responsibility.</li> </ul>
<i>Resources</i> may include:	<ul style="list-style-type: none"> <li>• conservation experts</li> <li>• construction of new displays or other infrastructure</li> <li>• finance</li> <li>• financial advice</li> <li>• funding and grants</li> <li>• legal expertise</li> <li>• replacement objects</li> <li>• space</li> <li>• special equipment and machinery</li> <li>• storage materials and facilities</li> <li>• subject matter experts</li> <li>• transport</li> <li>• valuation advice.</li> </ul>
<i>Organisational procedures and guidelines</i> may relate to:	<ul style="list-style-type: none"> <li>• acquisitions</li> <li>• borrowings</li> <li>• disposal</li> <li>• handling collection materials</li> <li>• loans</li> <li>• recordkeeping</li> <li>• risk assessment.</li> </ul>
<i>Cultural protocols</i> may relate to:	<ul style="list-style-type: none"> <li>• access</li> <li>• display</li> <li>• financial transactions</li> <li>• obtaining permission</li> <li>• special handling of items</li> <li>• storage</li> <li>• timing of acquisition or disposal.</li> </ul>
<i>Terms</i> may relate to:	<ul style="list-style-type: none"> <li>• care</li> <li>• copyright</li> <li>• cost</li> <li>• cultural considerations</li> <li>• display</li> <li>• duration</li> <li>• environmental considerations</li> <li>• ethical considerations</li> <li>• insurance</li> </ul>

	<ul style="list-style-type: none"><li>• location</li><li>• recordkeeping</li><li>• security</li><li>• usage.</li></ul>

## Unit Sector(s)

Cultural services - Collection management

## CULCNM602A Develop and monitor procedures for the movement and storage of collection material

### Modification History

Release	Comments
Release 1	This unit of competency first released with <i>CUL11 Library, Information and Cultural Services Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and monitor procedures for the movement and storage of collection material.

### Application of the Unit

This unit applies to individuals responsible for the movement and storage of collection material. Depending on the size of the organisation, this role may be undertaken by collection management personnel, or by individuals with broader management responsibilities.

Work is undertaken autonomously within organisational guidelines, often as the leader of a team.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Element	Performance Criteria
---------	----------------------

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish procedures for handling, moving and storing collection material	1.1 Assess <b>key information</b> about <b>collection material</b> 1.2 Assess <b>internal and external factors</b> that impact on <b>moving and storing</b> collection material 1.3 Integrate current industry best practice into the development of procedures 1.4 Locate and consult with stakeholders on complex matters of movement and storage 1.5 Identify and address legal, insurance and other administrative requirements impacting on handling, moving and storing collection material 1.6 Identify and assess work health and safety issues and legislative requirements 1.7 Document <b>procedures</b> for moving and storing collection material
2. Manage operations	2.1 Organise and monitor movement and storage arrangements according to agreed procedures and work requirements 2.2 Check movement and storage of collection material against schedules and allocated budgets and take action to address problems 2.3 Evaluate <b>information records</b> to ensure completeness, currency, accuracy and compliance with legal, ethical and cultural constraints 2.4 Make adjustments and enhancements to <b>record-keeping formats</b> and systems based on ongoing review of records and feedback from users
3. Maintain procedures for moving and storing collection material	3.1 Consult with colleagues to obtain feedback on movement and storage procedures 3.2 Update procedures based on feedback and industry practice

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication and teamwork skills to:
  - articulate concerns to colleagues
  - consult with work colleagues and other stakeholders on requirements and constraints for moving and storing collection material
- initiative and enterprise skills to anticipate and address problems that might arise in the context of managing the movement and storage of collection material
- learning skills to improve procedures based on continuous review of their effectiveness
- literacy skills to:
  - develop procedures
  - interpret a wide range of information
  - present detailed procedures and systems clearly and concisely
- numeracy skills to:
  - interpret and use budgets
  - work with numerical record-keeping systems
- planning and organising skills to:
  - develop logical procedures
  - establish and implement a range of interrelated processes
- research skills to:
  - identify legal, insurance and safety requirements
  - locate industry best practice
- self-management skills to:
  - follow workplace procedures and systems
  - meet deadlines
  - prioritise tasks for self and others.

### Required knowledge

- copyright, moral rights and intellectual property legislation and issues that impact on moving and storing collection material
- cultural protocols that affect the movement and storage of material, including those for Aboriginal or Torres Strait Islander material
- legal and administrative requirements for moving and storing collection material
- procedures and practices for the protection, transportation, storage and security of collection material

- safety legislation and requirements that impact on moving and storing collection material
- technical and conservation issues associated with moving and storing collection material.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop procedures for moving and storing collection material</li> <li>• implement and monitor procedures for moving and storing collection material</li> <li>• integrate into procedures internal, external and technical issues that impact on the movement and storage of collection material.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• involvement of and interaction with others to reflect consultation and team leadership</li> <li>• assessment over a period of time to reflect the ongoing implementation and monitoring aspects of the unit</li> <li>• access to: <ul style="list-style-type: none"> <li>• relevant policies and procedures manuals</li> <li>• a collection for which procedures can be planned.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• evaluation of procedures developed by the candidate and the processes used</li> <li>• evaluation of records</li> <li>• verbal or written questioning to assess knowledge of technical and other considerations in the movement and storage of cultural material.</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a</p>

	second language, clients with disabilities, remote library users, etc.).
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: <ul style="list-style-type: none"> <li>• CULCNM503A Manage the development of collections.</li> </ul>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Key information</b> may include:	<ul style="list-style-type: none"> <li>• climate</li> <li>• condition of material</li> <li>• cultural considerations</li> <li>• dimensions</li> <li>• intended use</li> <li>• length and mode of journey</li> <li>• nature of material</li> <li>• ownership details</li> <li>• planned duration of storage</li> <li>• propensity for pest infestation</li> <li>• type of storage facility</li> <li>• weight.</li> </ul>
<b>Collection material</b> is defined as objects, collections, artworks, specimens, structures or sites, and includes:	<ul style="list-style-type: none"> <li>• archaeological material</li> <li>• books and manuscripts</li> <li>• ethnographic material</li> <li>• film and audiovisual material</li> <li>• flora and fauna</li> <li>• furniture</li> <li>• photographs</li> <li>• technological and industry items</li> <li>• textiles</li> <li>• works on paper and canvas.</li> </ul>

## **Unit Sector(s)**

Cultural services - Collection management

## CULMS002B Research and evaluate Aboriginal or Torres Strait Islander cultural material

### Modification History

Not applicable.

### Unit Descriptor

#### Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to research the context and interpretation of Aboriginal or Torres Strait cultural material. As such, the unit focuses on the skills to analyse cultural material, including current collections and the impact of post-colonial history. These skills then form the basis for appropriate treatment and interpretation of cultural material. The unit includes a focus on appropriate consultation with the traditional custodians of cultural material.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Application of the Unit

#### Application of the unit

This unit has particular application to Aboriginal or Torres Strait Islander peoples.

The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander peoples. This unit also recognises that there is no single Aboriginal or Torres Strait Islander culture.

The unit deals with complex and interrelated elements of Aboriginal or Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities across the continent and islands of Australia. These may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

Any organisation or individual planning to train or assess this unit would be expected to work in a culturally appropriate manner with the appropriate Aboriginal or

Torres Strait Islander community, for example through the establishment of a local Aboriginal or Torres Strait Islander reference group. In particular, it is vital to ensure respectful integration of any local cultural knowledge or protocols that will inform the implementation of the unit.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Prerequisite units Nil

## Employability Skills Information

**Employability Skills** The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

**1 Research the context** 1.1 Identify *relevant sources of information* on *cultural*

ELEMENT	PERFORMANCE CRITERIA
of Aboriginal or Torres Strait Islander cultural material	<p><i>material</i> and the <i>context</i> for its interpretation</p> <p>1.2 Use <i>formal and informal research techniques</i> in a culturally appropriate manner to access <i>information</i></p> <p>1.3 Critically evaluate the validity of the range of interpretations of cultural material and the cultural relevance to its traditional custodians</p>
2 Assess post-colonial interpretation of Aboriginal or Torres Strait Islander cultural material	<p>2.1 Critically evaluate the ways in which different aspects of post-colonisation history have affected the interpretation of Aboriginal or Torres Strait Islander cultural material</p> <p>2.2 Critically evaluate collections in relation to the <i>context</i> in which materials were collected and interpreted and the respect shown for <i>cultural protocols</i> in sourcing, handling and exhibiting cultural material</p> <p>2.3 Assess ways in which interpretations by those other than traditional custodians may have impacted on communities and/or individuals</p>
3 Develop approaches to the interpretation of Aboriginal or Torres Strait Islander cultural material	<p>3.1 Identify and explore potential <i>new and appropriate approaches to the interpretation</i> of <i>cultural material</i> based on knowledge and understanding of consultation with traditional custodians and respect for their wishes</p> <p>3.2 Integrate the concept and practice of community consultation within interpretive approaches</p> <p>3.3 Develop substantiated positions for interpretive approaches</p> <p>3.4 Enhance interpretative approaches <i>by challenging and adapting</i> own ideas</p>
4 Communicate new approaches to stakeholders	<p>4.1 Identify <i>key stakeholders</i> in the interpretation and exhibition of cultural material, including traditional custodians</p>

## ELEMENT

## PERFORMANCE CRITERIA

- 4.2 Consult and negotiate ways with stakeholders in culturally appropriate ways to interpret Aboriginal or Torres Strait *Islander cultural material* in accordance with wishes of traditional custodians

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and critical-thinking skills to analyse, interpret and present complex and varied references for application to cultural material
- literacy skills to critically evaluate and communicate ideas and concepts surrounding cultural material.

#### Required knowledge

- broad range of sources of information about post-colonial history, theory and cultural practice relating to Aboriginal or Torres Strait Islander cultural material
- key aspects of post-colonial history and its impact on the collection and interpretation of Aboriginal or Torres Strait Islander cultural material
- copyright, moral rights and intellectual property issues and legislation with particular reference to Aboriginal or Torres Strait Islander cultural material
- cultural protocols and appropriate consultations for the movement, storage and maintenance of cultural material in the relevant context/type of display
- cultural protocols for the exhibition of cultural material in the relevant community context.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction

## EVIDENCE GUIDE

with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- sound knowledge of information sources for Aboriginal or Torres Strait Islander cultural material
- knowledge of cultural protocols and practices as well as appropriate consultative processes in seeking information
- application of research and analytical skills to evaluate Aboriginal or Torres Strait Islander cultural material and its context.

### **Context of and specific resources for assessment**

Assessment must ensure:

- involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant community
- access to sources of information on Aboriginal or Torres Strait Islander cultural material.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- project to research a specific collection of Aboriginal or Torres Strait Islander cultural material
- project to research and document the cultural significance of particular objects
- case studies to assess ability to research and use different types of information in the analysis of cultural material
- oral or written questioning to assess knowledge of cultural material.

Holistic assessment with other units relevant to the industry sector, workplace and job role is

## EVIDENCE GUIDE

recommended, for example:

- CULMS001B Work with Aboriginal or Torres Strait Islander cultural material
- other collection and exhibition management units.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Relevant sources of information*** may include:

- community members (family groups, cultural educators, Elders)
- libraries
- museums
- archives
- cultural centres
- community organisations
- Indigenous units within local, state or national bodies

***Cultural material*** may be:

- part of an existing collection (public or private)
- not yet part of a collection
- held by the local Aboriginal or Torres Strait Islander community or broader community
- held by an organisation external to the community
- held by individuals
- in the care of traditional custodians

The ***context*** of cultural material may relate to:

- pre-colonisation cultural practices
- post-colonisation collection and interpretive practices
- cultural/spiritual significance of cultural material to community
- the way material was acquired and historical view

## RANGE STATEMENT

- of Indigenous collections
  - treatment of collection materials
  - dispersal of skeletal remains and cultural materials within and outside of Australia
  - men's or women's business
  - secret or non-secret business
  - rarity
  - locality
- Formal and informal research techniques* may include:
- discussion
  - note taking, listing
  - interviews
  - questionnaires
  - critical discourse
  - analysis
  - reflection
  - comparing information
  - summation
  - judgement
  - observation
- Information* may relate to:
- philosophy
  - Indigenous world views
  - effects of colonisation on Indigenous lives and cultures
  - dreaming stories
  - world histories
  - cultural issues
  - spiritual beliefs
  - aesthetics
  - politics
  - gender and identity issues
  - land and place - traditional custodians of Country
  - signs and symbols in cultural practice
  - evaluative criticism in relation to interpretations made by post-colonial interpreters
  - oral histories

## RANGE STATEMENT

*Cultural protocols* may relate to:

- acquisition of material
- transportation
- storage
- written documentation on cultural materials
- exhibition
- geographic location
- degree of consultation with traditional custodians
- respect for the wishes of traditional custodians

*New and appropriate approaches to interpretation* may relate to:

- local Aboriginal or Torres Strait Islander community involvement
- different perceptions of both pre and post-colonial history
- interpretation in the context of post-colonial effects and behaviours
- local history
- oral histories
- appropriate consultation with traditional custodians
- respect for the wishes of traditional custodians
- industry/sector debate

*Challenging and adapting* ideas may include:

- comparing
- contrasting
- reflecting
- critiquing
- judging
- considering merit
- discussing and debating

*Key stakeholders* may include:

- Indigenous communities, including traditional custodians
- current holders of collections (private and public)
- cultural centres
- Indigenous units within local, state and national bodies
- museum/heritage organisations

## **Unit Sector(s)**

Not applicable.

## **Competency field**

**Competency field**            Aboriginal or Torres Strait Islander Museum Practice

## CULMS010B Contribute to the preservation of cultural material

### Modification History

Not applicable.

### Unit Descriptor

#### Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the preservation of cultural material through a sound knowledge of conservation principles, practices and ethics and the application of basic preservation activities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Application of the Unit

#### Application of the unit

This unit applies to individuals who have significant knowledge of preservation issues and may be involved in the application of basic preservation techniques with the involvement of a professional conservator.

The content of this unit relates to work that has a significant impact on Australia's cultural heritage and care must be taken to ensure appropriate implementation of the unit.

Any individual or organisation planning to undertake training and/or assessment of this unit must therefore consult with an appropriately qualified conservator or conservation organisation. The Australian Institute for the Conservation of Cultural Material is the recognised professional body in this area.

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Prerequisite units Nil

## Employability Skills Information

**Employability Skills** The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Develop preservation skills and knowledge</b>	1.1 Seek and access <i>opportunities to develop, update and maintain knowledge of preservation</i> issues and concepts
	1.2 Integrate knowledge into work activities within scope of individual responsibility
<b>2 Undertake basic preservation activities</b>	2.1 Undertake <i>basic preservation activities</i> within scope of responsibility as agreed with a conservator and in accordance with <i>organisational plans and policies</i>
	2.2 Correctly apply techniques in a manner which maintains the integrity of the <i>cultural material</i>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	2.3 Record data generated in the course of activities clearly and accurately in the appropriate format
	2.4 Follow <i>health, safety and environmental requirements</i> at all times
	2.5 Ensure that ethical and <i>cultural protocols</i> are adhered to at all times

## Required Skills and Knowledge

### Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- learning skills to undertake ongoing professional development and acquisition of knowledge around preservation issues and concepts
- literacy skills to interpret conservation plans, to research conservation information, document and to report on condition of cultural material.

#### Required knowledge

- distinction between preservation, conservation and restoration
- basic preservation principles and methods
- principles and methods for handling cultural material
- available sources of appropriate expert advice
- AICCM Code of Ethics and Code of Practice
- copyright, moral rights and intellectual property legislation and issues that impact on conservation
- cultural protocols that impact on conservation of cultural material, including those for Aboriginal or Torres Strait Islander material
- role of a conservator and of a person working under the guidance of a conservator, including the scope of work undertaken by each and rationale for this
- requirements for safe work and manual handling
- formats and features of conservation plans, object condition reports.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- sound general knowledge of preservation techniques relevant to the collection/industry sector
- understanding of conservation ethics and cultural protocols, including limitations on the scope of work to be undertaken
- practical demonstration of competent and safe techniques working on one or more items under the guidance of a conservator.

#### **Context of and specific resources for assessment**

Assessment must ensure:

- access to cultural material
- access to equipment, materials and tools used in basic preservation activities.

#### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- assessment of cultural material on which the candidate has worked
- direct observation of the candidate using techniques
- evaluation of candidate's responses to different collection scenarios to assess ability to develop approaches for different preservation needs and articulate different challenges and issues to be considered
- oral or written questioning to assess knowledge of different techniques and procedures.

Holistic assessment with other units relevant to the industry sector, workplace and job role is

## EVIDENCE GUIDE

recommended, for example:

- CULMS009B Implement preventive conservation activities.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Opportunities to develop, update and maintain knowledge of preservation***

issues and concepts may include:

- research
- attendance at seminars, workshops
- membership of professional organisations
- using conservator as a mentor
- reading current journals, newsletters and electronic discussion lists

***Basic preservation activities***

will vary depending on the type of cultural material, but may include:

- surface cleaning
- designing/making storage enclosures and display supports
- attaching backboards to paintings
- creating hanging systems for paintings
- mounting and framing

**Activities must be undertaken in accordance with advice from a specialist conservator to avoid potential damage to cultural material.**

***Organisational plans and policies*** vary in structure and name but may include:

- preservation plans
- conservation plans
- collection management policies
- disaster preparedness policies

## RANGE STATEMENT

*Cultural material* is defined as 'objects, collections, artworks, specimens, structures or sites' and includes:

- archaeological material
- books and manuscripts
- cultural sites/buildings
- ethnographic material
- flora and fauna
- film/audiovisual material
- furniture
- photographs
- technological/industry items
- textiles
- works on paper/canvas

*Health, safety and environmental requirements* may relate to:

- use of chemicals or other toxic substances
- storage of chemicals
- provision and use of safety equipment
- safe manual handling
- safe use of tools and equipment
- reporting of occupational health and safety issues, including events and near misses
- impact on other parts of the collection
- toxic and hazardous materials in a collection
- condition/stability of item (dirt, mould, dust and pesticides)

*Cultural protocols* may relate to:

- who can handle the cultural material
- where an item may be handled
- when an item may be handled
- consultation on potential treatments
- storage requirements
- appearance of the item
- relationship between item and other material in the collection
- methods and approaches to display

## Unit Sector(s)

Not applicable.

Competency field      Preventive Conservation

## CUVACD302A Produce computer-aided drawings

### Modification History

Version	Comments
CUVACD302A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use a range of computer-aided design and drafting (CADD) program functions to produce drawings.

The focus of this unit is on the technical skills required to operate CADD, not on design skills which are covered in other units in CUV11 Visual Arts, Craft and Design Training Package.

### Application of the Unit

People working in many industries apply the skills and knowledge outlined in this unit.

In the cultural industries, computer-aided drawing skills are required in many design disciplines, and in contexts such as stage and set design. In the visual arts, computer-aided drawings could be used to develop concepts for artworks or for mounting installations and exhibitions.

At this level, work is undertaken independently but within established parameters. Supervision or guidance is available as required.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare for computer-aided drawing work	1.1 Clarify drawing requirements with reference to concept or project <b>information</b> 1.2 Identify hardware, software, tools and equipment required for <b>computer-aided design</b> and drafting projects 1.3 Set up hardware and software according to operating instructions and organisational procedures 1.4 Identify and retrieve digitised information relevant to projects
2. Gather object parameters and/or measurements	2.1 Establish and record critical dimensions and data for required designs 2.2 Identify requirements in relation to accuracy, tolerances and other critical information
3. Prepare plots or drawings	3.1 Access and use <b>CADD functions and features</b> according to operating instructions 3.2 Access and use <b>peripheral equipment</b> required for projects 3.3 Prepare and review preliminary drawings in consultation with relevant colleagues as required
4. Finalise drawings	4.1 Check designs against project objectives and specifications according to organisational procedures 4.2 Identify and make required adjustments to designs based on review and consultation with relevant colleagues as required 4.3 Store data files according to operating instructions and organisational procedures 4.4 Submit final drawings within agreed time parameters

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- learning skills to improve own skills through feedback and review
- literacy skills to interpret and use digital information, including instructions required for the production of computer-aided drawings
- numeracy skills to interpret and correctly apply calculations and measurements required for the production of computer-aided drawings
- planning and organising skills to plan work tasks in a logical sequence
- problem-solving skills to identify and respond to the need for adjustments in drawings
- self-management skills to complete work within agreed timeframes
- technology skills to use a range of features of CADD software.

### Required knowledge

- ways in which CADD is used within specific industry contexts
- basic principles of CADD
- typical features and functions of CADD programs, including drawing tools, view displays, edit functions, working with layers, plotting and printing
- intellectual property issues and legislation associated with the use of CADD
- OHS issues associated with the use of computers.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use the standard features and functions of a CADD program to produce drawings for a specific workplace purpose</li> <li>• apply knowledge of CADD capabilities and uses in a specific industry context.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• CADD equipment and software.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are</p>

	<p>appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of drawings produced by the candidate</li> <li>• oral or written questioning to assess knowledge of CADD features and functions</li> <li>• direct observation of the candidate undertaking CADD work</li> <li>• review of portfolios of evidence</li> <li>• review of third-party reports from experienced practitioners.</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b>Information</b> may relate to:</p>	<ul style="list-style-type: none"> <li>• creative objectives</li> <li>• measurements/dimensions of objects or space</li> <li>• scope for making adjustments</li> <li>• statutory requirements</li> <li>• technical objectives</li> <li>• timelines.</li> </ul>
<p><b>Computer-aided design</b> may be required for a wide range of work situations which may include:</p>	<ul style="list-style-type: none"> <li>• costume or fashion design</li> <li>• layouts:             <ul style="list-style-type: none"> <li>• rooms</li> <li>• sites</li> <li>• stage</li> </ul> </li> <li>• lighting plots</li> <li>• object or product design</li> <li>• set design</li> <li>• visual arts projects:</li> </ul>

	<ul style="list-style-type: none"> <li>• artworks in any form</li> <li>• community installations</li> <li>• public art.</li> </ul>
<b><i>CADD functions and features</i></b> must include:	<ul style="list-style-type: none"> <li>• drawing tools to support methods for drawing: <ul style="list-style-type: none"> <li>• lines</li> <li>• arcs</li> <li>• polylines</li> <li>• texts</li> <li>• dimensions</li> </ul> </li> <li>• edit functions</li> <li>• plotting and printing</li> <li>• view displays</li> <li>• working with layers.</li> </ul>
<b><i>CADD functions and features</i></b> may include:	<ul style="list-style-type: none"> <li>• three-dimensional (3-D) techniques: <ul style="list-style-type: none"> <li>• displaying 3-D views</li> <li>• entering coordinates</li> </ul> </li> <li>• how CADD works in an integrated environment</li> <li>• isometrics and perspectives</li> <li>• macros</li> <li>• use of attributes to make project reports.</li> </ul>
<b><i>Peripheral equipment</i></b> may include:	<ul style="list-style-type: none"> <li>• plotters</li> <li>• printers</li> <li>• scanners.</li> </ul>

# CUVACD303A Produce technical drawings

## Modification History

Version	Comments
CUVACD303A	This version first released with <i>CUV11 Visual Arts, Craft and Design Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply a range of techniques to produce technical drawings that meet required standards and conventions.

## Application of the Unit

People working in many industries apply the skills and knowledge outlined in this unit.

In the cultural industries, technical drawing skills to produce visual representations of objects, processes or spaces are required in sectors such as stage and set design for live theatre and events, as well as film and television productions. In the visual arts, technical drawings could be required in preparation for exhibitions, or as part of the process for designing artworks.

At this level, work is undertaken independently but within established parameters. Supervision or guidance is available as required.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare for technical drawing work	1.1 Clarify <b><i>technical drawing requirements</i></b> with reference to relevant <b><i>documentation</i></b> and in consultation with <b><i>appropriate people</i></b> 1.2 Identify <b><i>factors</i></b> that may impact on technical drawing work 1.3 Review the <b><i>purpose</i></b> of drawings and select appropriate <b><i>techniques</i></b> 1.4 Prepare <b><i>equipment</i></b> and <b><i>materials</i></b> according to relevant <b><i>workplace procedures</i></b> and safety requirements
2. Create technical drawings	2.1 Apply appropriate conventions and standards to technical drawings 2.2 Prepare and review preliminary drawings in consultation with relevant people and confirm required amendments 2.3 Produce technical drawings that are consistent with concept and purpose of drawings 2.4 Finalise and submit technical drawings within agreed timeframes

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- learning skills to improve own skills in technical drawing
- literacy skills to interpret material required to produce technical drawings
- numeracy skills to interpret and apply calculations and measurements in technical drawing
- planning and organising skills to plan work tasks in a logical sequence
- problem-solving skills to select technical drawing techniques that best suit the purpose and make adjustments as required

- self-management skills to complete work within agreed timeframes.

**Required knowledge**

- physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- technical drawing techniques and their application to a range of contexts and subject matter
- technical drawing practices, history and theory, including current standards and conventions
- intellectual property issues and legislation associated with technical drawing work
- OHS procedures for technical drawing work.

**Evidence Guide**

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• produce a number of technical drawings which:             <ul style="list-style-type: none"> <li>• show a command of selected techniques</li> <li>• adhere to technical drawing standards and conventions</li> </ul> </li> <li>• apply knowledge of technical drawing practice, history and theory.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• equipment and materials required to produce technical drawings.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of technical drawing in progress</li> <li>• evaluation of technical drawings produced by the candidate</li> <li>• questioning and discussion to determine candidate’s understanding of technical drawing techniques</li> <li>• review of portfolios of evidence</li> <li>• review of third-party reports from experienced practitioners.</li> </ul> <p>Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy</p>

	difficulties, such as speakers of languages other than English, remote communities and those with interrupted schooling).
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Technical drawing requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• circuits</li> <li>• diagrams</li> <li>• elevations</li> <li>• flow charts</li> <li>• illustrations</li> <li>• plans</li> <li>• sections</li> <li>• sketches.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Implement the food safety program	<p>1.1. Food handling requirements are identified</p> <p>1.2. Food handling is carried out according to the food safety program</p> <p>1.3. Food safety hazards are controlled as required by the food safety program</p> <p>1.4. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken</p> <p>1.5. Food safety information is recorded to meet requirements of the food safety program</p> <p>1.6. The workplace is maintained in a clean and tidy order to meet workplace standards</p> <p>1.7. Work is conducted in accordance with workplace environmental guidelines</p>
2. Participate in maintaining and improving food safety	<p>2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements</p> <p>2.2. Processes, practices or conditions which could result in a food safety breach are identified and reported according to workplace reporting requirements</p> <p>2.3. Corrective action is taken in accordance with the food safety program</p> <p>2.4. Food safety issues are raised with designated</p>

ELEMENT	PERFORMANCE CRITERIA
	personnel
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- locate and follow workplace information relating to food safety responsibilities
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- monitor food safety hazards as required by the food safety program, including methods such as visual inspection, sampling and testing
- record results of monitoring, and maintain records as required by the food safety program
- identify and report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- take corrective action as required by food safety program within level of responsibility
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and dispose of out-of-specification or contaminated food, waste and

recyclable material according to food safety program as this requirement relates to own work responsibility

- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- record food safety information in appropriate format
- clean and sanitise equipment according to enterprise procedures
- collect samples and conduct tests according to the food safety program according to enterprise procedures
- participate in investigating food safety breaches according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### **Required knowledge**

#### ***Knowledge of:***

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of HACCP-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
- awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work
- methods used to monitor that food safety is under control, including the purpose of sampling and taking measurements, such as temperature and pH, and conducting inspections and tests
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records and the recording requirements of the food safety

- program
- methods used in the workplace to isolate or quarantine food which may be unsafe
  - product and ingredient traceability procedures, such as product recall where required by work responsibilities
  - clothing and footwear requirements for working in and/or moving between food handling areas
  - personal clothing maintenance, laundering and storage requirements
  - appropriate bandages and dressings to be used when undertaking food handling
  - housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
  - procedures to follow in the event of pest sighting or discovery of infestation
  - purpose and importance of cleaning and sanitation procedures
  - waste collection, recycling and handling procedures relevant to own work responsibilities
  - cleaning and sanitation procedures where relevant
  - impact of rework handling/addition on food safety where relevant
  - sampling and test methods where relevant
- 

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Overview of assessment</b></p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• identify own responsibilities with regard to food safety</li> <li>• identify food safety risks in the workplace and the control measures used to manage them</li> <li>• apply control measures in own work</li> <li>• monitor compliance with food safety standards</li> <li>• identify and act on non-compliances and participate in improving safety</li> <li>• maintain required standards of personal hygiene</li> <li>• complete workplace records as required</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• apply safe work practices and identify OHS hazards and controls</li> <li>• apply food safety procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as: <ul style="list-style-type: none"> <li>• Good Manufacturing Practice (GMP)</li> <li>• related work instructions and procedures</li> <li>• work tasks and responsibilities</li> <li>• appropriate clothing and related apparatus</li> <li>• reporting and monitoring systems</li> <li>• cleaning and sanitation policies and procedures as required</li> <li>• sampling and test procedures and related equipment as required.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<p>This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> <li>• FDFOP2004A Clean and sanitise equipment</li> <li>• FDFOP2013A Apply sampling procedures</li> <li>• FDFOP2063A Apply quality systems and procedures</li> <li>• MSL973001A Perform basic tests.</li> </ul>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

<b>RANGE STATEMENT</b>	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>A food safety program</b>	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures
<b>Workplace information</b>	Workplace information may be provided in: <ul style="list-style-type: none"> <li>• food safety program</li> <li>• standard operating procedures (SOPs)</li> <li>• specifications</li> <li>• log sheets</li> <li>• written or verbal instruction</li> </ul>
<b>Food handling</b>	Food handling refers to: <ul style="list-style-type: none"> <li>• food receipt and storage</li> <li>• food preparation</li> <li>• cooking, holding, cooling, chilling and reheating</li> <li>• packaging, disposal</li> </ul>
<b>Products/materials handled and stored</b>	Products/materials handled and stored can include: <ul style="list-style-type: none"> <li>• raw materials</li> <li>• ingredients</li> <li>• consumables</li> <li>• part-processed product</li> <li>• finished product</li> <li>• cleaning materials</li> </ul>
<b>Examples of a breach of food safety procedures</b>	Examples of a breach of food safety procedures could include: <ul style="list-style-type: none"> <li>• failure to check delivery temperatures of potentially hazardous chilled food</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• failure to place temperature-sensitive food in temperature controlled storage conditions promptly</li> <li>• failure to wash hands when required</li> <li>• use of cloths for unsuitable purposes</li> </ul>
<b>Responsibility for monitoring food safety</b>	Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace
<b>Monitoring</b>	<p>Monitoring describes the methods used to confirm that a food safety hazard is in control, such as:</p> <ul style="list-style-type: none"> <li>• taking temperatures</li> <li>• collecting samples</li> <li>• conducting visual inspections</li> <li>• conducting other tests as required</li> </ul>
<b>Food safety hazard</b>	A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect
<b>Hygiene requirements</b>	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations
<b>Reporting of health conditions and illnesses requirements</b>	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
<b>Appropriate clothing and footwear</b>	<p>Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include:</p> <ul style="list-style-type: none"> <li>• purpose designed overalls or uniforms</li> <li>• hair-nets</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• beard snoods</li> <li>• gloves</li> <li>• overshoes</li> </ul>

<b>Co-requisite units</b>		

# FDFFS3001A Monitor the implementation of quality and food safety programs

## Modification History

November 2011: minor typographical error corrected.

## Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the skills and knowledge required to provide a leadership role in supporting day-to-day implementation of the food safety/quality programs in a work area. It also involves supporting others to implement the requirements of the food safety/quality procedures.
------------------------	---

## Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to those with formal responsibility for others, and to those required to model workplace policies and procedures but who have no formal management role.</p> <p>This unit is based on and equivalent to the guideline food safety unit GFSOFSA Oversee the day-to-day implementation of food safety in the workplace.</p> <p>Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH3001A Monitor and maintain Good Manufacturing Practice procedures.</p>
--------------------------------	---

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>	
---------------------------	--

<b>Prerequisite units</b>		
	FDFFS2001A	Implement the food safety program and procedures

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Ensure others in the work area are able to meet quality and food safety requirements	<p>1.1. Hazard control and clothing and equipment appropriate to work requirements are available, functional and correctly fitted</p> <p>1.2. Information on food safety/quality responsibilities and procedures is current, accessible and communicated to others in the work area</p> <p>1.3. Information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area</p> <p>1.4. Food safety/quality hazards and control measures used in the work area can be identified by those in the work area</p> <p>1.5. Mentoring and coaching support is available to support individuals/groups to implement quality and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>safe food handling procedures</p> <p>1.6.Training needs are identified and addressed within level of responsibility</p>
<p>2. Monitor observance of quality standards and food safety programs in the work area</p>	<p>2.1.Work procedures in the work area are clearly defined, documented and followed</p> <p>2.2.Deviation from identified procedures is identified, reported and addressed within level of responsibility</p> <p>2.3.Personal behaviour is consistent with workplace policies and procedures that support food safety and quality</p> <p>2.4.Food safety and/or quality hazards are identified and reported according to workplace procedures</p> <p>2.5.Food safety and quality information is recorded to meet workplace reporting requirements</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p>
<p>3. Take corrective action in response to quality and food safety non-compliance</p>	<p>3.1.Workplace procedures for responding to quality and food safety non-compliance are promptly implemented</p> <p>3.2.Hazardous events are investigated to identify cause</p> <p>3.3.Control measures to prevent recurrence and minimise risks of hazardous events are implemented</p>
<p>4. Maintain and improve quality and food safety in the work area</p>	<p>4.1.Processes or conditions which could result in a breach of food safety procedures or quality specifications are identified, assessed, removed or and/reported within level of responsibility and according to workplace procedure</p> <p>4.2.Risk assessments are conducted and appropriate control measures are identified and implemented in the work area</p> <p>4.3.Recommendations arising from risk assessments are implemented within level of responsibility</p> <p>4.4.Inadequacies in control measures are identified and reported according to company reporting requirements</p> <p>4.5.Matters raised relating to quality/food safety are promptly resolved and/or referred to appropriate personnel</p> <p>4.6.The work group is consulted and advised of</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>quality/food safety matters relevant to work role</p> <p>4.7. Opportunities for improving food safety and quality are identified and raised with relevant personnel</p> <p>4.8. Procedures are developed or revised to support effective control of quality and food safety hazards</p> <p>4.9. Quality/food safety records are reviewed to ensure they are complete and meet the quality system, food safety program and legal requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access, interpret and communicate information about the food safety program, quality requirements and related procedures to others in the work area
- demonstrate two-way communication, including active listening and responding constructively to feedback
- provide access to and maintain current food safety/quality documentation
- model safe food handling and quality practices and procedures to achieve required outcomes, including demonstrating:
  - work procedures that meet the requirements of quality and food safety
  - cleaning and sanitising equipment
  - sampling and testing as appropriate according to quality and food safety requirements
  - maintaining personal hygiene
  - wearing appropriate clothing and footwear as required by the work task
  - following procedures when moving within and between work areas
  - reporting health conditions and illnesses according to workplace procedures
  - handling, cleaning and storing equipment, utensils and packaging materials as appropriate
- identify control points in the work area and demonstrate monitoring techniques used (control points include critical, quality and regulatory control points)
- support others to meet quality standards and follow food safety procedures by ensuring that all personnel in the work area receive the information required and have the necessary skills and equipment to carry out their responsibilities

## REQUIRED SKILLS AND KNOWLEDGE

- identify, report and/or address food safety/quality non-compliance in an appropriate and timely manner within level of responsibility
- determine when and how to make adjustments to maintain output within level of responsibility
- identify, report and/or address food safety/quality training and development needs of others in the work area
- ensure that appropriate and timely action is taken in response to non-compliance
- handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
- participate in investigations of non-compliance and risk assessment processes
- participate in consultation processes to improve quality and food safety outcomes in the workplace
- review practice and procedures to implement recommendations arising from risk assessments and/or improvement proposals within level of responsibility, such as collecting and analysing food safety/quality records, reviewing operating procedures and communicating changes to others in the work area
- ensure that housekeeping standards are maintained and that equipment is in operational order, such as participating in the management of equipment calibration
- monitor the recording of quality and food safety information to confirm that records accurately reflect performance and meet the requirements of the food safety and quality programs
- participate in food recall procedures as required, within level of responsibility
- facilitate consultation processes according to enterprise procedures
- lead investigations of quality and food safety incidents according to enterprise procedures
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- sources of information and expertise on procedures and responsibilities for food safety relevant to the workplace
- principles of a HACCP-based approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- basic concepts of quality assurance including hazards, risk assessment and control methods
- company programs and systems in place to manage and support quality and food safety in the workplace, which may involve separate or integrated programs, including systems for maintaining and updating documents, such as operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food

## REQUIRED SKILLS AND KNOWLEDGE

handling areas, including personal clothing maintenance, laundering and storage requirements

- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, where relevant this includes use and storage of housekeeping/cleaning equipment
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- legal obligations for food safety and quality, including an awareness of government legislation and customer requirements
- food safety and quality responsibilities and requirements relating to the work area
- awareness of common micro biological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents within level of responsibility, including an understanding of common micro biological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes
- procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials
- sampling procedures, test methods and inspections
- options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses and level of responsibility for decision making
- methods used in the workplace to isolate or quarantine food which may be unsafe
- waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, such as hazardous waste where relevant
- traceability and recall procedures within level of responsibility
- documentation system and procedures, including record keeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
- auditing arrangements, roles and responsibilities as they relate to own work responsibilities, such as internal and external audit processes
- appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace
- cleaning and sanitation procedures where relevant
- impact of rework handling/addition on food safety where relevant
- sampling and test methods where relevant

**REQUIRED SKILLS AND KNOWLEDGE**

- facilitation and consultation techniques where relevant

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of ability to:

- describe quality and food safety program, risks and control measures of the work area
- confirm that control measures are in place and that personnel in the work area are equipped and informed to implement programs
- identify, address and follow up on non-compliances
- identify causes of non compliances
- conduct risk assessments and recommend responsive action
- provide support to others to implement the programs
- complete and maintain documentation.

**Context of and specific resources for assessment**

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety program for the work area which identifies critical control points, control measures and corrective action
- quality policy, system and procedures
- work area or system in which quality and food safety practices and procedures are to be monitored
- personal protective clothing and equipment as required
- review/audit arrangements
- reporting and monitoring systems.

<b>EVIDENCE GUIDE</b>	
<b>Method of assessment</b>	<p>This unit should be assessed together with other units of competence relevant to the function or work role.</p> <p>Examples could be:</p> <ul style="list-style-type: none"> <li>• FDFPPL3001A Participate in improvement processes</li> <li>• FDFPPL3004A Lead work teams and groups</li> <li>• BSBRES401A Analyse and present research information.</li> </ul>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Work responsibilities</b>	<p>Work responsibilities may include formal or informal responsibility for modelling appropriate quality/food safety policies and procedures and providing a support role to others in the work area</p>
<b>Food safety program</b>	<p>A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures</p>

<b>RANGE STATEMENT</b>	
<b>Quality systems</b>	Quality systems may be externally accredited, such as an ISO system, or internally designed and managed
<b>Workplace information</b>	Workplace information may be provided in: <ul style="list-style-type: none"> <li>• food safety and quality policies and programs</li> <li>• standard operating procedures (SOPs)</li> <li>• specifications</li> <li>• log sheets</li> <li>• written or verbal instruction incorporating food safety and quality requirements</li> </ul>
<b>Incidents</b>	A food safety incident is: <ul style="list-style-type: none"> <li>• a situation where the safe limits or parameters identified by the food safety program are not met</li> </ul> A quality incident is: <ul style="list-style-type: none"> <li>• a situation where the quality limits or parameters identified in specifications or processing instructions are not met</li> </ul>
<b>Monitoring</b>	Monitoring describes the methods used to confirm that a food safety or quality hazard is in control, such as: <ul style="list-style-type: none"> <li>• taking temperatures</li> <li>• collecting samples</li> <li>• conducting visual inspections</li> <li>• additional testing as required</li> </ul>
<b>Responsibility for identifying breaches of food safety procedures</b>	Responsibility for identifying breaches of food safety procedures and taking corrective action occurs in the context of the food safety program and within scope of responsibility
<b>Responsibility for identifying non-compliance against quality standards</b>	Responsibility for identifying non-compliance against quality standards occurs within the context of defined standards or specifications and relates to work area
<b>Personal hygiene requirements</b>	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory

<b>RANGE STATEMENT</b>	
	legislation/regulations
<b>Reporting of health conditions and illnesses</b>	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
<b>Operator responsibilities</b>	<p>The operator at this level may not have direct responsibility for overseeing the training/development of team members. At a minimum they must be able to identify development needs of others in the work area and refer this information to the relevant personnel.</p> <p>The operator at this level may not have responsibility for independently assessing risks and determining the effectiveness of control measures. However, they would be expected to observe day-to-day effectiveness and participate in assessment and review processes. Responsibilities at this level may include facilitating consultation processes within level of responsibility</p>
<b>Record keeping</b>	Record keeping complies with customer, legal and food safety program requirements

Co-requisite units		

## FDFGPS2011A Operate a creamed honey manufacture process

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the skills and knowledge required to set up, monitor, and adjust a process to produce creamed honey.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit has application in a production environment within the honey processing industry. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of machines and equipment used to cream honey.</p> <p>When operators are required to perform batch or product changeover procedures as part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be selected.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare the equipment and process for operation	<p>1.1.Liquid and seed honey is confirmed and available to meet production requirements</p> <p>1.2.Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3.Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4.Processing/operating parameters are set to meet safety and production requirements</p> <p>1.5.Equipment performance is checked and adjusted as required</p> <p>1.6.Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the creamed honey manufacture process	<p>2.1.The process is started and operated according to workplace procedures</p> <p>2.2.Equipment is monitored to identify variation in operating conditions</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the creamed honey manufacture process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including selecting appropriate seed honey (it may also require selection of more than one liquid honey to meet required product characteristics)
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters (temperature and agitation settings), cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

## REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate batch/product changeovers according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- basic principles of crystallisation, including an understanding of crystal structure and where appropriate, methods used to reduce crystal size, the effects of temperature and agitation on crystal formation, appropriate ratio of seed to liquid honey and factors that influence the crystallisation process including moisture content and crystal size
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- quality and organoleptic characteristics of different types of honey processed
- quality characteristics to be achieved by the final product and related test methods used to confirm quality
- quality requirements of seed and liquid honey used and the effect of variation on the final product
- operating requirements, parameters and corrective action required where the process is outside specified operating parameters (typical operating parameters include ambient and processing temperatures, agitation speeds and holding times and temperatures)
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor each stage of the production process, such as inspecting, measuring and testing as required
- inspection or test points (control points) in the process and the related procedures and recording requirements

## REQUIRED SKILLS AND KNOWLEDGE

- contamination/food safety risks associated with the process and related control measures (this relates specifically to air inclusion and moisture content and related methods of control)
- common causes of variation and corrective action required
- factors that affect the stability and shelf-life of the finished product and options to extend shelf-life, including storage conditions for packed product
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for creaming honey
- start, operate, monitor and adjust process equipment

<b>EVIDENCE GUIDE</b>	
	<p>to achieve required quality outcomes</p> <ul style="list-style-type: none"> <li>• take corrective action in response to typical faults and inconsistencies</li> <li>• complete workplace records as required</li> <li>• apply safe work practices and identify OHS hazards and controls</li> <li>• safely shut down equipment</li> <li>• apply food safety procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• work procedures, including advice on safe work practices, food safety, quality and environmental requirements</li> <li>• information on equipment capacity and operating parameters</li> <li>• production schedule/batch instructions</li> <li>• specifications, control points and processing parameters</li> <li>• process and related equipment and services</li> <li>• seed and liquid honey</li> <li>• sampling schedules and test procedures and equipment as required</li> <li>• documentation and recording requirements and procedures</li> <li>• cleaning procedures, materials and equipment as required.</li> </ul>
<b>Method of assessment</b>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> <li>• FDFOP2003A Clean equipment in place</li> <li>• FDFOP2004A Clean and sanitise equipment</li> <li>• FDFOP2011A Conduct routine maintenance</li> <li>• FDFOP2013A Apply sampling procedures</li> <li>• FDFOP2030A Operate a process control interface</li> <li>• MSL973001A Perform basic tests.</li> </ul>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

**EVIDENCE GUIDE**

	possible, over a number of assessment activities.
--	---

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Policies and procedures**

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements

**Legislative requirements**

Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:

- the Food Standards Code, including labelling, weights and measures legislation
- legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

**Workplace information**

Workplace information may include:

- standard operating procedures (SOPs)
- specifications/recipes
- production schedules and instructions
- manufacturers' advice
- standard forms and reports

**Production processes**

Production processes may be partly or fully automated. While processes vary, typical stages include:

- addition of seed honey
- holding
- mixing/working
- temperature control

<b>RANGE STATEMENT</b>	
<b>Operation of equipment and processes</b>	Operation of equipment and processes may require: <ul style="list-style-type: none"> <li>the use of process control panels and systems</li> </ul>
<b>Equipment</b>	Equipment may include: <ul style="list-style-type: none"> <li>jacketed tanks/vats</li> <li>buffer tanks</li> <li>mixers/homogenisers</li> <li>scraped surface heat exchangers</li> <li>agitators and pumps</li> </ul>
<b>Services</b>	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: <ul style="list-style-type: none"> <li>power</li> <li>water</li> <li>compressed and instrumentation air</li> </ul>

### Co-requisite units

<b>Co-requisite units</b>	

## FDFGR3002A Demonstrate knowledge of animal nutrition principles

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the animal nutrition knowledge required by stockfeed milling operators who are required to liaise with nutritionists, other technical and professional staff and customers.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to stockfeed operators who are required to have knowledge of animal nutrition principles and the effect of stockfeed on animal performance. This knowledge would be applied in liaison with professional and technical staff on customer requirements and in liaison directly with customers.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify nutrition purpose of stockfeed product	<p>1.1. Target species, animal type and phase of animal growth supported by stockfeed product are identified</p> <p>1.2. Production purpose of animal raising and range of desired products are identified</p> <p>1.3. Particle size, pellet quality and other factors affecting palatability for target animals are identified</p> <p>1.4. Impact of stockfeed on animal performance is identified</p>
2. Identify key quality factors affecting stockfeed performance	<p>2.1. Feed safety requirements for target species and phase of animal production are identified</p> <p>2.2. Type and proportion of raw materials in stockfeed and their effect on animal performance are identified</p> <p>2.3. The purpose of additives on animal performance and stockfeed quality are identified</p> <p>2.4. Effects of processing on stockfeed nutrition quality and animal performance are identified</p> <p>2.5. Substitution guidelines, including the effect of substitution on stockfeed performance, are understood</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access and interpret workplace information, including standard operating procedures (SOPs), labels, recipes, customer supplied information and material data safety sheets (MSDS)
- use and application of workplace terminology
- sequence information against production processes
- assess quality standards
- identify resources in the enterprise for further information, including nutritionists, other technical and professional specialist and reference materials

#### Required knowledge

##### *Knowledge of:*

- typical nutrition requirements of animals supported by stockfeed, including horses, beef cattle, dairy cattle, pigs, sheep, poultry (both meat and egg production) and marine animals (aquaculture). Knowledge would be restricted to standard daily requirements of main food groups (proteins, carbohydrates etc), typical daily volume of feed required and type of feed (e.g. solid, liquid, plant or animal based)
- how nutritional needs of target animal may vary according to species, gender, health, pregnancy, lactation, age, season, geography, production purpose and form of production and feeding, e.g. feedlot, free range, use of stock feed for supplementary or full feeding
- factors affecting animal acceptance of stockfeed, including palatability and presentation
- range of raw materials typically used in stockfeed, including grains, molasses/liquids, proteins (vegetables and animal), additives (vitamins, minerals and medications) and fibre
- impact of operator controlled factors on stockfeed quality, including temperatures, moisture, sizing, sieving and liquid additions
- impacts of stockfeed on animal performance, including positive effects on animal performance and effects of incorrect feed on animal safety, animal performance and export contamination

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	Evidence is required of animal nutrition and performance requirements that are affected by stockfeed related factors, such as ingredients, recipe, processing and presentation.  Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Evidence of ability to: <ul style="list-style-type: none"> <li>• identify and interpret customer requirements from stockfeed</li> <li>• relate stockfeed type to animal nutrition and production requirements</li> <li>• liaise with nutritionist and other professional and technical staff on animal nutrition requirements of stockfeed.</li> </ul>
<b>Context of and specific resources for assessment</b>	The candidate is to be assessed on animal nutrition and production knowledge relevant to the stockfeed products and processes in the workplace.
<b>Method of assessment</b>	Evidence may include third party report, portfolio, work documentation, response to questions, and so on, that address the performance criteria and critical aspects for assessment.
<b>Guidance information for assessment</b>	Performance against this standard must be assessed in an industry context. For valid and reliable assessment the activity should closely replicate the work environment, circumstances and equipment likely to be encountered in a workplace.

## Range Statement

<b>RANGE STATEMENT</b>
The range statement relates to the unit of competency as a whole. It allows for different

<b>RANGE STATEMENT</b>	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Stockfeed production</b>	<p>Stockfeeds commercially produced by enterprises as well as customer provided formulations.</p> <p>The range of stockfeed can include:</p> <ul style="list-style-type: none"> <li>• pellets</li> <li>• liquids</li> <li>• mashes</li> <li>• blocks</li> </ul>
<b>Target species</b>	<p>Target species may include:</p> <ul style="list-style-type: none"> <li>• land and marine animals raised commercially for meat, skin products and milk</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for cleaning	1.1. Chemical stocks are available to meet cleaning and sanitation requirements 1.2. Services are confirmed as available and ready for operation 1.3. Equipment shutdown is planned and equipment is taken off-line for cleaning 1.4. Equipment and related valves and pipework are configured to confirm readiness for cleaning 1.5. The plant is set for the cleaning cycle
2. Operate and monitor the cleaning process	2.1. The cleaning cycle is undertaken according to company policies and procedures 2.2. The cleaning process is monitored to confirm cleaning meets company requirements 2.3. Cleaning data is recorded according to workplace reporting requirements 2.4. Out-of-specification process and equipment performance is identified, rectified and/or reported
3. Dispose of waste and return plant to operating condition	3.1. Cleaning chemicals are flushed from plant and disposed of according to company policies and procedures

ELEMENT	PERFORMANCE CRITERIA
	3.2. Work is conducted according to environmental requirements 3.3. Plant is set up to meet operational requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access workplace information, such as the cleaning schedule to identify cleaning requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- handle and prepare cleaning and sanitation agents safely, including following correct handling and preparation procedures and use of appropriate protective clothing and equipment as required
- schedule cleaning and/or liaise with related work areas to take equipment and area off-line with minimal disruption to production
- prepare equipment and area for cleaning, such as rendering equipment safe to clean, removing obstacles and unnecessary equipment, correctly positioning equipment (e.g. valves, pipes, vents and taps), selecting appropriate cleaning cycle, removing waste and/or dismantling equipment
- clean equipment according to cleaning process cycle and procedures, such as starting up and operating the CIP process in both automatic and manual modes
- monitor the process and equipment operation to maintain the cleaning process within the required parameters
- locate emergency stop functions on equipment
- return plant to operating order
- return area to working order
- take corrective action in response to out-of-specification results
- advise affected work areas of cleaning schedule and progress
- maintain and store chemicals and related equipment as required
- carry out relevant checks and inspections to confirm effectiveness of cleaning
- sort, collect, treat, recycle or dispose of waste
- record cleaning information
- maintain work area to meet housekeeping standards

## REQUIRED SKILLS AND KNOWLEDGE

- conduct routine maintenance according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- purpose and basic principles of CIP, including the use and functions of caustic and acid solutions, and cleaning sequence and stages as required in the workplace
- purpose and use of cleaning equipment and chemicals used
- terminology relating to the chemical solutions used
- safe work procedures, including appropriate signage of cleaning activities and safe handling and storage of cleaners and sanitisers used
- purpose and limitations of protective clothing and equipment
- cleaning and sanitation requirements, including different levels of cleaning requirements depending on the reason for cleaning
- characteristics of cleaning and sanitising chemicals used, including basic composition as well as compatibility of chemicals with types of equipment
- methods used to render equipment safe to clean, including the status and purpose of equipment guards, relevant lock out/tagout and isolation procedures
- equipment settings required for cleaning and for operating respectively
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- inspection points for cleaning and sanitation
- consequences of contamination of process flows by cleaning solutions and related safeguards
- types of waste generated by both the production and the cleaning process and related collection, treatment and disposal requirements
- environmental consequences of incorrect cleaning waste disposal procedures
- requirements to liaise/advise related work areas
- reporting and recording systems
- routine maintenance procedures where relevant
- sampling methods and test procedures where relevant

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Evidence of ability to: <ul style="list-style-type: none"> <li>• shut down equipment and prepare for cleaning</li> <li>• prepare and use chemicals according to safe work requirements</li> <li>• clean equipment to meet work standards</li> <li>• monitor cleaning and report or address any non-compliances</li> <li>• flush equipment and dispose of waste according to environmental guidelines</li> <li>• complete required documentation</li> <li>• apply safe work practices and identify OHS hazards and controls</li> <li>• apply food safety procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> <li>• cleaning procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements</li> <li>• personal protective clothing and equipment</li> <li>• equipment to be cleaned, and related CIP system</li> <li>• chemicals and/or automated chemical addition system</li> <li>• services as required</li> <li>• MSDS where appropriate</li> <li>• cleaning schedule or advice and related standard operating procedures</li> <li>• housekeeping standards and procedures</li> <li>• advice on environmental management issues relevant to work responsibilities</li> <li>• workplace information recording systems, requirements and procedures</li> <li>• sampling and testing schedules and procedures as</li> </ul>

<b>EVIDENCE GUIDE</b>	
	relevant to cleaning requirements in the workplace.
<b>Method of assessment</b>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> <li>• FDFOP2011A Conduct routine maintenance</li> <li>• FDFOP2013A Apply sampling procedures</li> <li>• MSL973001A Perform basic tests.</li> </ul>
<b>Guidance information for assessment</b>	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	<p>Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP</p>
<b>Workplace information</b>	<p>Workplace information may include:</p> <ul style="list-style-type: none"> <li>• standard operating procedures (SOPs)</li> <li>• specifications</li> <li>• production cleaning schedules and instructions</li> <li>• signs and symbols</li> <li>• materials safety data sheets (MSDS)</li> <li>• manufacturers' advice</li> <li>• standard forms and reports</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Dosing of cleaning chemicals</b>	Dosing of cleaning chemicals may be: <ul style="list-style-type: none"> <li>• automatically controlled or manually dosed</li> </ul>
<b>Services</b>	Services may include: <ul style="list-style-type: none"> <li>• power</li> <li>• water</li> <li>• Steam</li> <li>• compressed and instrumentation air</li> </ul>
<b>Testing</b>	Where tests are conducted as part of operation, a typical requirement is measurement of pH
<b>Monitoring the process</b>	Monitoring the process is dependent on the nature of equipment. Examples of monitoring include: <ul style="list-style-type: none"> <li>• chemical strength</li> <li>• cycle time</li> <li>• temperatures</li> <li>• time</li> <li>• storage tank levels</li> <li>• condensate quality</li> </ul>
<b>Operation and monitoring of equipment and processes</b>	Operation and monitoring of equipment and processes typically requires the use of control panels and systems

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for cleaning	1.1.Cleaning/sanitising agents and services are available and ready for use 1.2.Equipment is cleared of product and/or packaging consumables in preparation for cleaning 1.3.Equipment is rendered safe to clean
2. Clean and sanitise equipment to meet workplace requirements	2.1.Equipment is cleaned and sanitised according to workplace procedure and requirements 2.2.Equipment is inspected to confirm operating condition and cleanliness 2.3.Unacceptable equipment condition is identified and reported according to workplace procedures 2.4.Cleaning equipment and chemicals are stored according to workplace procedure 2.5.Waste from cleaning process is disposed of according to workplace procedures 2.6.Work is conducted in accordance with workplace environmental guidelines 2.7.Equipment is restored to operating order

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access workplace information, such as the cleaning schedule to identify cleaning requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary cleaning and sanitising equipment and services
- select and prepare cleaners and sanitisers as required according to workplace procedures
- prepare equipment for cleaning, such as rendering equipment safe to clean, clearing product and waste materials, covering motors and instrumentation where steam or water hoses are used, and simple dismantling of equipment parts
- advise any affected work areas/operators of cleaning progress to coordinate timely completion with minimal disruption to production
- clean and sanitise equipment as required according to workplace procedures and cleaning schedule
- return equipment to operating order (this may involve basic assembly of equipment parts)
- inspect equipment to identify equipment condition and cleanliness
- locate emergency stop functions on equipment
- report and/or correct unacceptable equipment condition
- maintain housekeeping standards
- prepare cleaners and sanitisers as required
- store cleaners, sanitisers and related equipment as required
- carry out relevant checks and inspections
- maintain work area to meet housekeeping standards
- conduct routine maintenance according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- record cleaning and sanitation information according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

#### Required knowledge

##### *Knowledge of:*

- the purpose of cleaning and sanitation and importance in maintaining food safety
- functions of cleaners, sanitisers and related equipment

## REQUIRED SKILLS AND KNOWLEDGE

- safe work procedures, including appropriate signage of cleaning activities, safe handling and storage of cleaners and sanitisers used, safety when using cleaning methods, such as hot water and steam hoses, and status and purpose of safety guards
- purpose and limitations of protective clothing and equipment
- cleaning and sanitation requirements relating to work responsibilities, including the need for different levels of cleaning where relevant
- procedures for preparing cleaners and sanitizers as required
- cleaning method/s to be followed relating to work responsibilities
- other work areas/operators who need to be consulted/advised on timing of cleaning
- methods used to render equipment safe to clean, including understanding the status and purpose of equipment guards, relevant lock out/tagout and isolation procedures and related equipment settings for both cleaning and operating as required
- procedures for conducting cleaning and sanitising
- types of waste generated by the cleaning process and related collection, treatment and disposal requirements
- potential environmental impact of incorrect waste handling
- inspection, cleaning and storage requirements of cleaning equipment used
- inspection points and methods for confirming the effectiveness of cleaning and sanitation, including visual inspection, and where required, recording of cleaning conducted
- inspection requirements to confirm equipment condition, including acceptable equipment condition, ability to identify faulty or unacceptable equipment and take required corrective action
- recording requirements and responsibilities
- routine maintenance procedures where relevant
- sampling methods and test procedures where relevant

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

<b>EVIDENCE GUIDE</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• prepare equipment for cleaning</li> <li>• prepare and use chemicals according to safe work requirements</li> <li>• clean and sanitise equipment to meet work standards</li> <li>• monitor cleaning and report or address any non-compliances</li> <li>• dispose of waste according to environmental guidelines</li> <li>• complete required documentation</li> <li>• apply safe work practices and identify OHS hazards and controls</li> <li>• apply food safety procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• cleaning procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements</li> <li>• personal protective clothing and equipment</li> <li>• cleaning schedule and related procedures, including OHS advice</li> <li>• equipment/items to be cleaned</li> <li>• chemicals, cleaning equipment and services as required</li> <li>• MSDS where appropriate</li> <li>• housekeeping standards and procedures</li> <li>• cleaning/sanitising information recording system and procedures</li> <li>• advice on environmental management issues relevant to work responsibilities.</li> </ul>
<b>Method of assessment</b>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> <li>• FDFOP2011A Conduct routine maintenance</li> <li>• FDFOP2013A Apply sampling procedures</li> <li>• MSL973001A Perform basic tests.</li> </ul>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

**EVIDENCE GUIDE**

	possible, over a number of assessment activities.

# FDPOP2012A Maintain food safety when loading, unloading and transporting food

## Modification History

Not applicable.

## Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the skills and knowledge required to load and transport temperature-sensitive ingredients and products.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>This unit describes the food safety aspects of loading and transporting food where the transport operator does not have direct physical contact with food. Where food is directly handled by the transport operator, the relevant food handling unit also applies.</p> <p>This unit does not address competencies related to vehicle inspection and operation.</p> <p>This unit is based on and equivalent to the guideline food safety unit GFSTFA Transport food.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to transport food	1.1. Food storage vehicles and containers/receptacles are appropriate for use 1.2. Food storage vehicles and containers/receptacles are prepared for use 1.3. Food is loaded and secured as required to meet transportation and temperature control requirements 1.4. Hand washing and disinfecting procedures are followed to meet workplace requirements 1.5. Work is conducted in accordance with workplace environmental guidelines
2. Load, unload and transport food safely	2.1. Food safety control measures are monitored to ensure that food safety is maintained during transport 2.2. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken 2.3. Food is unloaded as required according to transportation and temperature control requirements 2.4. Food safety information is recorded to meet workplace requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access workplace information to determine food handling and transport requirements
- select, fit and use personal protective clothing and/or equipment
- confirm that the vehicle and associated equipment are appropriate and ready for use, including confirming that vehicle type is capable of maintaining the required temperature range for product
- prepare transport containers (this will vary depending on the type of food and transport method), such as checking cleaning records, and where required, confirming product compatibility to ascertain that appropriate level of cleaning has occurred
- prepare the storage/holding environment as required, including confirming that temperature parameters for the loading and unloading areas are met
- follow procedures to load/unload food to ensure that materials/product is loaded/unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food or non-food items that can cause contamination (osmosis)
- monitor temperature parameters and related food safety control points before, during and after transporting food and record information in the required format
- take appropriate corrective action in response to failure to meet temperature parameters or other food safety requirements as required by workplace procedures
- clean and sanitise food containers according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

#### Required knowledge

##### *Knowledge of:*

- food safety control points in the loading/unloading and transportation of food materials and product and related methods of control
- characteristics of food transported and related transport environment requirements
- micro-biological, physical and chemical hazards that can occur when loading, transporting and unloading food, appropriate to nature and method of food transported, including the types of hazards likely to occur, the conditions under which they occur, and possible consequences
- methods and procedures used to control food safety hazards (this depends on the

**REQUIRED SKILLS AND KNOWLEDGE**

type of controls and equipment used), including the purpose and operation of equipment, procedures in place to maintain food safety and workplace records, such as temperature control charts and cleaning and sanitation records

- procedures used to confirm that transportation and related food safety equipment is appropriate for use and operational, such as equipment capacity to maintain a given temperature environment appropriate to the food product
- cleaning and sanitation requirements for food containers where relevant
- where contamination by osmosis is a possibility, the potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of ability to:

- ensure readiness of transport in accordance with product requirements
- identify risks associated with transporting food products
- identify and apply control measures for ensuring safety of food
- load and unload goods according to requirements
- identify and act on non-compliances
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- apply food safety procedures.

**Context of and specific resources for assessment**

Assessment must occur in a real or simulated workplace where the assessee has access to:

- loading/unloading and transport advice/schedules

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• food safety information (this may be included in a food safety plan and/or integrated into work procedures)</li> <li>• work procedures relevant to loading/unloading and transportation, including advice on required temperature parameters to be maintained</li> <li>• workplace information, such as temperature charts and cleaning records as appropriate</li> <li>• food materials and product to be loaded/unloaded and transported</li> <li>• documentation and recording requirements and procedures .</li> </ul>
<b>Method of assessment</b>	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
<b>Guidance information for assessment</b>	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out according to company policies and procedures, licensing requirements, legislative requirements and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP
<b>Workplace information</b>	Workplace information may include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• standard operating procedures (SOPs)</li> <li>• food safety program</li> <li>• product handling specifications</li> <li>• transport schedules and instructions</li> <li>• transport vehicle manufacturers' advice</li> <li>• standard forms and reports</li> </ul>
<b>Transport vehicles</b>	Transport vehicles are appropriate for the transportation of food and capable of maintaining the required environment for the food type transported
<b>Food safety controls</b>	Food safety controls refer to the methods used to control food safety hazards. Control methods, requirements and record keeping are specified in workplace food safety procedures which typically form part of a workplace food safety program
<b>Safe food transport parameters</b>	Safe food transport parameters depend on the type of food transported. Industry guidelines and codes, such as Cold Chain guidelines should be used as a basis for setting these parameters where available
<b>Confirming readiness for use of food transport vehicle</b>	<p>Confirming readiness for use of food transport vehicle and containers/receptacles can include:</p> <ul style="list-style-type: none"> <li>• confirming that the vehicle is in good operating order and that containers/receptacles used to store food meet the relevant cleaning and sanitation requirements</li> </ul> <p>It may also include:</p> <ul style="list-style-type: none"> <li>• bringing the food handling area and storage container/receptacle to within the required temperature range before loading/unloading and confirming that equipment required to maintain temperature is operational</li> </ul>
<b>Food safety incidents</b>	A food safety incident is a situation where the safe limits or parameters identified by the food safety program are not met

<b>Co-requisite units</b>		

# FDFOP2013A Apply sampling procedures

## Modification History

Not applicable.

## Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the skills and knowledge required to understand the requirements of sampling plans, and to collect and transfer samples to retain sample integrity.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	<p>This unit has application in a food production environment. Operators requiring this competency would typically be required to follow specific sampling procedures, such as aseptic sampling.</p> <p>When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for sampling	<p>1.1.Sampling requirements are identified in accordance with the sampling plan</p> <p>1.2.Sampling equipment, containers and labels are prepared</p>
2. Collect samples	<p>2.1.Samples are collected according to sampling procedures and the requirements of the sampling plan</p> <p>2.2.Samples are handled and prepared to preserve sample and source integrity</p> <p>2.3.Defects or abnormalities in source material and/or sample are identified and reported</p> <p>2.4.Sample information is recorded according to workplace sample recording requirements</p> <p>2.5.The work area is maintained according to housekeeping standards</p> <p>2.6.Work is conducted in accordance with workplace environmental guidelines</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

#### *Ability to:*

- access and interpret sampling plan to identify sampling requirements
- select, fit and use personal protective clothing and/or equipment
- prepare for sampling to ensure required tools, containers and labels are available
- follow sampling procedures and the sampling plan to collect samples from the points, in the quantities and at the times specified
- identify atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules as required
- complete sample records according to workplace requirements, such as labelling samples as required
- transfer samples for testing
- maintain work area to meet housekeeping standards
- prepare samples according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples and related handling and preparation requirements and responsibilities
- characteristics of materials sampled and common contaminants and related conditions under which contamination is likely to occur
- sampling techniques relevant to samples collected, such as sterilisation methods and procedures
- the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
- procedures and responsibility for reporting and recording sampling information, such as legislative requirements
- procedures for preparing samples where relevant

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• conduct pre-start checks on equipment used for collecting and handling samples</li> <li>• collect, handle and store samples according to sampling requirements and standards</li> <li>• take corrective action in response to typical defects and inconsistencies</li> <li>• complete workplace records as required</li> <li>• apply safe work practices and identify OHS hazards and controls</li> <li>• apply food safety procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• sampling plan</li> <li>• documentation, including specifications, work instruction and other advice on sampling requirements</li> <li>• recording and reporting system</li> <li>• sampling instrumentation and containers as required</li> <li>• product/source material to be sampled.</li> </ul>
<b>Method of assessment</b>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Example could be:</p> <ul style="list-style-type: none"> <li>• MSL973001A Perform basic tests</li> </ul>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

**EVIDENCE GUIDE**

	possible, over a number of assessment activities.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Policies and procedures**

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements

**Workplace information**

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production schedules and instructions
- manufacturers' advice
- sampling plans

**Sampling requirements**

Sampling requirements include:

- sampling under standard conditions
- sampling after processes are adjusted in response to variation or non-conformance

**Sampling**

Sampling typically occurs at a number of points and using a range of techniques

**Maintenance of sample integrity**

Maintenance of sample integrity may be achieved by:

- use of appropriate personal protective clothing
- use of clean sampling tools and containers (sterilised tools/containers for aseptic sampling)
- temperature control
- addition of preservatives as required

**RANGE STATEMENT**

<b>Sampling techniques</b>	Sampling techniques may include: <ul style="list-style-type: none"> <li>• sub-sampling</li> </ul>
----------------------------	---

# FDOP2016A Work in a food handling area for non-food handlers

## Modification History

Not applicable.

## Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the skills and knowledge required to conduct work in a food handling area where the work does not involve direct food contact.
------------------------	---

## Application of the Unit

<b>Application of the unit</b>	<p>Typical applications for this unit include stores/warehousing, cleaning and maintenance workers. This unit is not appropriate for a person who has direct contact with food and/or raw materials or ingredients. Where this is a requirement, refer to relevant core food safety units.</p> <p>This unit is based on and equivalent to the guideline food safety unit GFSWFHAA Carry out work in a food handling area.</p>
--------------------------------	---

## Licensing/Regulatory Information
