## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Maintain food safety while working in a food handling area	<p>1.1. Food safety requirements related to work tasks are identified and followed</p> <p>1.2. Work responsibilities are carried out so that the safety of food is maintained</p> <p>1.3. Procedures or practices which are not consistent with workplace food safety program are identified and reported</p>
2. Maintain food handling area in clean and orderly state	<p>2.1. Equipment and the food handling area meet the cleaning and sanitation requirements of workplace food safety program</p> <p>2.2. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.3. Waste is collected and disposed of according to workplace procedures</p>

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

#### *Ability to:*

- access and apply workplace information on food safety policies and procedures relating to own work
- fit and use appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- maintain personal conduct consistent with workplace requirements
- check own work area to identify food safety hazards
- carry out work responsibilities to ensure that food safety is not compromised
- take necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognise and report situations or procedures that could compromise food safety according to workplace procedure, including following procedures in own work and related work area to report to the appropriate personnel, in required detail and in a timely manner
- take corrective or preventative action within level of responsibility
- report health conditions and illness as required by workplace food safety procedures
- sort and dispose of waste as required by work responsibility according to workplace procedure
- maintain housekeeping standards in work area
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non food-handling areas
- suitable standard for materials and equipment used in the food handling area, including materials that are unsuitable for use, such as breakable or dirty equipment/materials
- methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised (this will depend on the nature of work responsibilities and food safety requirements as

**REQUIRED SKILLS AND KNOWLEDGE**

specified by the workplace)

- the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring
- cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area
- waste collection, recycling and handling procedures
- housekeeping standards to be maintained in the work area

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of ability to:

- identify food handling procedures and food safety issues for work
- apply food safety procedures when handling food products
- identify and act on non-conformances
- ensure cleaning standards are met
- follow environmental and waste management procedures.

**Context of and specific resources for assessment**

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety policies and procedures relevant to work function
- work procedures, including procedures for entering and exiting food handling areas
- work process and related services/resources
- work area and related equipment to undertake work function

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>waste collection, treatment, recycling and/or disposal methods</li> <li>monitoring and reporting system.</li> </ul>
<b>Method of assessment</b>	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
<b>Guidance information for assessment</b>	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements, site licences and industrial awards and agreements
<b>Workplace information</b>	<p>Workplace information may include:</p> <ul style="list-style-type: none"> <li>standard operating procedures (SOPs)</li> <li>advice on food safety requirements related to work function</li> <li>standard forms</li> <li>written or verbal instructions</li> </ul>
<b>Food handling area</b>	Food handling area can refer to any work area where receiving, handling and inspecting, preparing, processing, packaging, storing and/or despatching occur
<b>Examples of contamination that</b>	Examples of contamination that can result from

<b>RANGE STATEMENT</b>	
<b>can result from work activities</b>	work activities include: <ul style="list-style-type: none"> <li>chemical contamination which could be caused by lubricants, resins and cleaning and sanitation chemicals</li> <li>physical contamination which could be caused by metal, glass, plastic and cloths</li> </ul>
<b>Personal hygiene, clothing and footwear and requirements</b>	Personal hygiene, clothing and footwear and requirements to report health conditions or illness must meet workplace requirements and procedures. At a minimum such procedures must ensure that any person in a food premises does not contaminate food, does not have unnecessary contact with ready-to-eat food and does not spit, smoke or use tobacco or similar in a food handling area. Refer to Food Safety Standard 3.2.2, Clause 17:3 and relevant state and territory regulations/legislation

<b>Co-requisite units</b>	

## FDFOP2023A Operate a packaging process

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a packaging process or sub-system.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit has application in a food processing packing environment. It typically targets the worker responsible for applying basic operating principles to the operation and monitoring of a packing process and associated equipment. This unit is generic and should be customised for a given process. It should only be selected where no specific packaging unit is available.</p> <p>A packaging process may relate to primary and/or secondary packaging activities. It typically requires the operation of a series of related items of equipment to achieve the required outcome.</p> <p>Where a single item of packaging equipment is operated, refer to FDFOP1005A Operate basic equipment.</p> <p>When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare the equipment and process for operation	<p>1.1.Packaging components/consumables, materials and items to be packaged are confirmed and available to meet operating requirements</p> <p>1.2.Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3.Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4.Operating parameters are entered as required to meet safety and production requirements</p> <p>1.5.Materials, product and packaging components/consumables are loaded or positioned as required to meet packaging requirements</p> <p>1.6.Equipment performance is checked and adjusted as required</p>

ELEMENT	PERFORMANCE CRITERIA
	1.7.Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the process	2.1.The process is started and operated according to workplace procedures 2.2.Equipment is monitored to identify variation in operating conditions 2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4.The process is monitored to confirm that specifications are met 2.5.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6.The work area is maintained according to housekeeping standards 2.7.Work is conducted in accordance with workplace environmental guidelines 2.8.Workplace records are maintained according to workplace recording requirements
3. Shut down the process	3.1.The appropriate shutdown procedure is identified 3.2.The process is shut down according to workplace procedures 3.3.Maintenance requirements are identified and reported according to workplace reporting requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access workplace information to identify packaging requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary packaging components/consumables, materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any

## REQUIRED SKILLS AND KNOWLEDGE

signs of wear, setting coders and printers, selecting appropriate equipment settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational

- start, operate, monitor and adjust packaging equipment to achieve required outcomes., such as packaging components/consumables and/or product, and monitoring control points (e.g. weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity) as required to confirm process remains within specification
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take packaging equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/process changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- integrity testing of packaging according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- purpose and basic principles of the packaging process, including the purpose and characteristics required of packaging materials used and the principles of the packaging process used (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available

## REQUIRED SKILLS AND KNOWLEDGE

- the flow of processes supplying the packaging process and the effect of outputs on downstream processes
- quality characteristics required of the packaging process, such as seal integrity requirements
- effect of variation in inputs, such as packaging components/consumables, materials and/or services, on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the packaging process, such as visual inspecting, and measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks related to stages in the packaging process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the packaging process, including emergency and routine shutdowns and procedures to follow in the event of a power outage, and conducting basic equipment referencing where required
- product/packaging changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- packaging integrity testing where relevant
- cleaning and sanitation procedures where relevant

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
<b>Overview of assessment</b>	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Evidence of ability to: <ul style="list-style-type: none"> <li>• conduct pre-start checks on machinery used for packing</li> <li>• start, operate, monitor and adjust process equipment to achieve required quality outcomes</li> <li>• take corrective action in response to typical faults and inconsistencies</li> <li>• complete workplace records as required</li> <li>• apply safe work practices and identify OHS hazards and controls</li> <li>• safely shut down equipment</li> <li>• apply food safety procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• work procedures, including advice on safe work practices, food safety, quality and environmental requirements</li> <li>• information on equipment capacity and operating parameters</li> <li>• specifications, control points and operating parameters</li> <li>• packaging and related equipment and services</li> <li>• materials to be packaged and packaging components/consumables as required</li> <li>• sampling schedules and test procedures and equipment as required</li> <li>• documentation and recording requirements and procedures</li> <li>• cleaning procedures, materials and equipment as required.</li> </ul>
<b>Method of assessment</b>	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: <ul style="list-style-type: none"> <li>• FDFOP2004A Clean and sanitise equipment</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• FDFOP2011A Conduct routine maintenance</li> <li>• FDFOP2013A Apply sampling procedures</li> <li>• FDFOP2030A Operate a process control interface</li> <li>• MSL973001A Perform basic tests.</li> </ul>
<b>Guidance information for assessment</b>	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
<b>Legislative requirements</b>	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> <li>• the Food Standards Code, including labelling, weights and measures legislation</li> <li>• legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity</li> </ul> <p>When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP</p>
<b>Workplace information</b>	Workplace information may include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• standard operating procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules and instructions</li> <li>• manufacturers' advice</li> <li>• standard forms and reports</li> </ul>
<b>Typical equipment</b>	<p>Typical equipment that may form a packaging sub-system includes:</p> <ul style="list-style-type: none"> <li>• conveyor systems</li> <li>• filling</li> <li>• sealing</li> <li>• wrapping</li> <li>• thermo-form equipment</li> <li>• case packers</li> <li>• bundlers</li> <li>• ink jet coders</li> <li>• labellers</li> <li>• palletisers</li> <li>• shrink wrappers</li> <li>• strappers</li> </ul>
<b>Packaging</b>	<p>Packaging may include:</p> <ul style="list-style-type: none"> <li>• vacuum packing</li> <li>• modified atmosphere packaging (MAP)</li> <li>• blister packaging or over wrapping</li> </ul>
<b>Operation of equipment and processes</b>	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> <li>• the use of process control panels and systems</li> </ul>
<b>Shutdown procedures</b>	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> <li>• cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare the grinding equipment and process for operation	<p>1.1. Materials are confirmed and available to meet production requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the grinding process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted according to environmental standards</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the grinding process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services to the grinding process
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- operate stockfeed control panel to transfer and grind product
- monitor and adjust the grinding process and equipment operation to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, and running adjustments to hammer mills and roller mills
- monitor supply and flow of materials to and from the grinding process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

## REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- demonstrate batch/product changeovers
- sort, collect, treat, recycle or dispose of waste
- maintain work area to meet housekeeping standards
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- purpose and basic principles of the grinding process, including the characteristics of materials, which can be reduced to a suitable form for product such as stockfeed
- basic operating principles of equipment, such as main equipment components, bulk materials transfer systems and equipment, dust collection equipment, grinding equipment operating capacities and applications, and the purpose and location of magnets, sensors and related feedback instrumentation
- services required and action to take if services are not available
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- the flow of the grinding process and the effect of product output on downstream processes
- quality characteristics and uses of grinding process outputs
- effect of the grinding process on the end product
- effect of raw material characteristics on grinding process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the grinding process and related control measures

## REQUIRED SKILLS AND KNOWLEDGE

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the risk of dust explosion and an understanding of the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for grinding
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards

<b>EVIDENCE GUIDE</b>	
	<p>and controls</p> <ul style="list-style-type: none"> <li>• safely shut down equipment</li> <li>• apply food safety procedures to work practices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment</li> <li>• work procedures including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions</li> <li>• specifications, control points and processing parameters</li> <li>• production schedule/batch instructions</li> <li>• information on equipment capacity and operating parameters</li> <li>• grinding and related equipment and services</li> <li>• stock required for the grinding process</li> <li>• sampling schedules and test procedures and equipment as required</li> <li>• documentation and recording requirements and procedures</li> <li>• cleaning procedures, materials and equipment as required.</li> </ul>
<b>Method of assessment</b>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> <li>• FDFOP2004A Clean and sanitise equipment</li> <li>• FDFOP2011A Conduct routine maintenance</li> <li>• FDFOP2013A Apply sampling procedures</li> <li>• FDFOP2030A Operate a process control interface</li> <li>• MSL973001A Perform basic tests.</li> </ul>

------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit is appropriate where the operator requires a detailed understanding of the steps and techniques used to develop and review a HACCP-based food safety program.</p> <p>This unit can be aligned at either AQF 3 or 4. When aligned at AQF 3 the person would typically participate in the development of the food safety program as part of a group. The scope of contribution would typically be limited to their immediate work area. When this unit is applied at AQF 4 the person may take a lead role in facilitating the development of the food safety program and would apply an understanding of food safety across more diverse operations or work areas.</p> <p>This unit is based on and achieves part of the guideline food safety unit GFSDFSPA Develop food safety programs.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

<b>Prerequisite units</b>		
	FDFFS2001A	Implement the food safety program and procedures

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to develop and/or review a food safety program	<p>1.1.Roles and responsibilities for participating in, developing or reviewing a food safety program are identified</p> <p>1.2.The scope of the food safety program is identified</p>
2. Identify and/or review food safety hazards	<p>2.1.Processes to be covered by the food safety program are identified and steps within each process are described</p> <p>2.2.Food safety hazards that are reasonably expected to occur are identified for each process</p> <p>2.3.Handling methods, processing techniques and existing support programs used in the workplace are identified</p>
3. Establish and/or	3.1.Acceptable methods of control are established for

ELEMENT	PERFORMANCE CRITERIA
review methods to monitor and control food safety hazards	<p>each food safety hazard that is reasonably expected to occur</p> <p>3.2. Control methods are validated</p> <p>3.3. Procedures for taking preventative action are established</p> <p>3.4. Appropriate methods for monitoring that processes remain within control are established</p> <p>3.5. Required corrective action to respond to situations where hazards are not effectively controlled is established</p> <p>3.6. Work is conducted in accordance with workplace environmental guidelines</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

##### *Ability to:*

- identify personal roles and responsibilities for participating in the development or review of a food safety program
- identify processes and steps to be covered
- identify hazards that are reasonably expected to occur and establish appropriate methods of control, such as participating in validating existing control methods and where there is no adequate control method in place, establishing an appropriate method
- establish or review procedures for implementing preventative action, such as revision of materials, processes and/or food handling procedures, and where required, the revision of workplace practices and documentation, such as specifications, operating procedures and approved supplier programs
- describe the appropriate monitoring requirements for each food safety hazard, including the method or procedure to be followed, the frequency and timing, the person responsible, and the information to be recorded (procedures to be followed would typically be specified in the form of a standard operating procedure or work instruction)
- describe corrective action requirements in the event that acceptable limits or

## REQUIRED SKILLS AND KNOWLEDGE

requirements of support programs are not met

- develop or review documentation relating to the design and maintenance of the food safety program, such as flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- develop or review documentation to communicate food safety responsibilities, such as standard operating procedures (SOPs), processing parameters and recording devices (e.g. log sheets)
- communicate food safety responsibilities within level of responsibility using techniques and presentation styles appropriate to the audience
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

#### *Knowledge of:*

- the purpose and intent of food safety legislation
- purpose and responsibilities for maintaining records as required by legislation and workplace procedures
- roles and responsibilities for development and maintenance of the food safety program, including roles of internal and external auditors and of authorised officers
- techniques for applying HACCP-based principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredient and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards/contamination likely to occur given the type of

## REQUIRED SKILLS AND KNOWLEDGE

- product and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition, time and temperature as relevant to food handled
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability and personal hygiene, and how they can be used as part of a food safety program
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- validation and verification processes and techniques and responsibilities

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify components and parameters of a food safety program
- identify food safety hazards in production processes
- establish and validate control standards and methods for each hazard
- establish procedures for unpredicted hazards
- communicate and document hazards and control procedures
- complete workplace records
- apply safe work practices and identify occupational health and safety (OHS) hazards and controls
- apply food safety procedures.

#### Context of and specific resources for

Assessment must occur in a real or simulated workplace

<b>EVIDENCE GUIDE</b>	
<b>assessment</b>	<p>where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• workplace food safety program documentation</li> <li>• advice on quality and food safety legislation</li> <li>• procedures for developing or modifying specifications and other advice on food safety requirements</li> <li>• procedures for developing or modifying documentation, such as work instructions and procedures, log sheets and other recording requirements</li> <li>• review/audit arrangements</li> <li>• consultative mechanisms</li> <li>• communication systems</li> <li>• training system</li> <li>• reporting/recording system.</li> </ul>
<b>Method of assessment</b>	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
<b>Guidance information for assessment</b>	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Food safety programs</b>	A food safety program is a written document that specifies how a business will control all food safety hazards that are reasonably expected to occur in the food business. The food safety program must provide for the systematic

<b>RANGE STATEMENT</b>	
	<p>monitoring of the controls as well as appropriate corrective action if a hazard is found not to be under control. Records must be kept to demonstrate action in relation to, or in compliance with, the food safety program. A food safety program may be developed as a stand-alone program or may be integrated with the quality program in a workplace</p>
<b>Methods used to control hazards</b>	<p>Methods used to control hazards include:</p> <ul style="list-style-type: none"> <li>• both support programs and specific hazard control limits or requirements</li> </ul> <p>Typical examples of support programs include:</p> <ul style="list-style-type: none"> <li>• product recall</li> <li>• cleaning schedules</li> <li>• pest control programs</li> <li>• personal hygiene practices</li> <li>• calibration procedures and related operating procedures</li> </ul>
<b>Food safety hazards</b>	<p>Food safety hazards include:</p> <ul style="list-style-type: none"> <li>• microbiological</li> <li>• chemical</li> <li>• physical hazards</li> </ul>
<b>Validation</b>	<p>Validation refers to:</p> <ul style="list-style-type: none"> <li>• the use of objective evidence in order to prove that materials, processes, procedures or equipment used are capable of delivering the intended result</li> </ul>
<b>Verification</b>	<p>Verification refers to:</p> <ul style="list-style-type: none"> <li>• reviewing all aspects of the food safety program and related records to determine compliance with and adequacy of the food safety program</li> </ul> <p>At a minimum, food safety programs must be verified annually</p>
<b>Scope of the HACCP based plans</b>	<p>The scope of the HACCP-based plan depends on workplace requirements and may extend outside the direct area of responsibility of the team participants</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to bench graft vines	1.1 Materials are confirmed as available to meet grafting requirements 1.2 Cuttings are selected and prepared for grafting 1.3 Equipment is checked to confirm readiness for use 1.4 Equipment is set to meet grafting needs as required
2. Bench graft vines	2.1 Cuttings are disbudded according to workplace procedures 2.2 Cuttings are bench grafted according to workplace procedures 2.3 Graft is treated and/or taped according to workplace procedures 2.4 Grafting process and equipment are monitored to ensure results are maintained within specifications 2.5 Out-of-specification process and equipment performance are identified, rectified and/or reported
3. Complete bench grafting activities	3.1 Equipment is shut down, cleaned and maintained as required 3.2 Grafted vines are packed, labelled and stored according to instructions 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

---

**Required skills include:**

---

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify grafting requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- confirm supply of necessary materials
- select appropriate vine material for grafting. This may include consideration of:
  - variety and clone
  - matching cambium
  - matching bevels and sizes
  - wood diameters
  - customer or workplace requirements
- prepare vine material for grafting. This may include:
  - removal from cold storage
  - soaking
  - heat treatment
  - disbudding
  - hydration
  - grading
- select, prepare and set equipment as required
- operate equipment
- disbud vines according to instructions
- bench graft vines to match specifications
- treat vines after grafting. This may include:
  - packing into callusing boxes
  - hormonal treatment
  - careful handling
  - following hygiene procedures
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may include monitoring:
  - tightness of graft union
  - progress (e.g. number per day)
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste as required
- maintain work area to meet housekeeping standards. This should include hygiene requirements to prevent cross-infection

- clean equipment as required
- pack, label and store grafted vines. This may include consideration of:
  - cold room layout
  - cold room temperature variations
  - customer requirements
  - storage time requirements
  - care of vine material (e.g. moisture and disease)
- identify, rectify and/or report environmental non-compliance
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

---

**Required knowledge includes:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose of grafting and various methods of budding and grafting
- purpose and methods of disbudding
- criteria for successful grafting
- importance of selection and use of rootstock and Vinifera
- advantages of using clonal and registered vine improvement rootstock material
- criteria for selecting parent vines for scion material
- procedures and optimum conditions for the storage of material until required for grafting
- stages of the grafting procedure and their purpose
- common problems and corrective action required
- hygiene requirements and procedures
- purpose and components of grafting equipment
- operating procedures for grafting equipment
- methods of callusing vine cuttings and the criteria for best callus development
- procedures and responsibility for reporting problems
- environmental issues and controls
- cleaning requirements and procedures for work area and equipment
- reporting and recording requirements and procedures
- routine maintenance procedures for equipment where relevant.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• select and prepare appropriate vine material for grafting including disbudding</li> <li>• undertake bench grafting of vines to instructions</li> <li>• post-grafting treatment and packing of vines is to instructions</li> <li>• monitor grafted vines and out of specification grafted vines identified and rectified or reported</li> <li>• follow personal and work area hygiene procedures</li> <li>• dispose of waste correctly</li> <li>• record and report results of grafting according to procedures.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>

<b>EVIDENCE GUIDE</b>	
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for potting operations	1.1 Work instructions on potting operations are confirmed and understood 1.2 Materials are confirmed as available and ready to meet potting requirements 1.3 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures 1.4 Potting media is blended to according to workplace procedures 1.5 Pots and work areas are cleaned and sterilised to minimise risk of contamination 1.6 Grafted cuttings are prepared according to instructions
2. Pot on propagated material	2.1 Callused cuttings requiring potting are identified and collected according to instructions 2.2 Soil is placed in pots according to workplace procedures 2.3 Cuttings are planted according to instructions 2.4 Trays are labelled according to instructions 2.5 Safe work practices are implemented to minimise risk of hazards
3. Carry out post-potting treatments	3.1 Potted cuttings are transferred to the glasshouse according to instructions 3.2 Potted cuttings are watered according to instructions 3.3 Waste is collected and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

---

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify potting requirements
- confirm supply of necessary materials
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- implement safe work practices to minimise risk of hazard
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- prepare chemical treatments to required concentration and ensure a homogenous mix
- prepare cuttings as instructed. This may include:
  - grading
  - waxing
  - dipping in hormones
  - hydrating
- plant cuttings as instructed. This may include:
  - putting correct amount of media into the pots
  - placing cuttings with nodes facing upwards
- label trays as instructed
- transfer potted cuttings as instructed
- water potted cuttings as instructed
- collect and dispose of waste as instructed
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

### Required knowledge includes:

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- Occupational health and safety (OHS) hazards and controls
- purpose and application of protective clothing and/or equipment
- correct operating procedures of equipment
- safe and effective handling of equipment
- safe preparation and handling of potting media
- cleaning requirements and procedures for work area and equipment
- eEnvironmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- safe preparation and handling of chemicals
- commonly occurring problems with potted cuttings
- principles of nursery hygiene.

**Evidence Guide**

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective equipment, MSDS and follow other specified OHS procedures</li> <li>• correctly handle potting media and chemicals and disinfectants</li> <li>• select and mix chemical treatments to required concentrations</li> <li>• sterilise posts and work surfaces to instructions</li> <li>• select or blend potting media according to instructions and placed into pots</li> <li>• correctly carry out grading, waxing or other preparations of cuttings before potting</li> <li>• plant cuttings correctly and label trays</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• dispose of waste according to procedures</li> <li>• complete records correctly.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real <b>or simulated workplace where the assessee has</b> access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

<b>RANGE STATEMENT</b>	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	Workplace information can include: <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Equipment</b>	Equipment may include: <ul style="list-style-type: none"> <li>• potting machines</li> <li>• front-end loader</li> <li>• forklift</li> </ul>
<b>Materials</b>	Materials may include: <ul style="list-style-type: none"> <li>• potting mix</li> <li>• pots</li> <li>• cuttings</li> <li>• trays</li> <li>• pallets</li> </ul>
<b>Waste</b>	Waste may include: <ul style="list-style-type: none"> <li>• rejected cuttings</li> <li>• spilled potting media</li> <li>• damaged pots</li> <li>• boxes</li> </ul>

## FDFWGG2003A Hand prune vines

### Modification History

This unit supersedes and is equivalent to FDFWGGHPVB Hand prune vines.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to hand prune vines under regular supervision.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit covers the pruning of vines used in winemaking using a variety of hand operated or handheld equipment. Pruning methods may include spur pruning, cane pruning, rod and spur pruning. Pruning includes the ability to recognise problems and anomalies with vines and to select the best spurs, canes and buds according to instructions. The unit also covers the use of sharpening equipment and air compressors used for power pruning and sharpening equipment.
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare equipment for hand pruning	1.1 Pruning equipment is checked to confirm readiness for use
2. Hand prune vines	2.1 Pruning equipment is started up and operated according to instructions as required 2.2 Equipment performance is monitored to confirm performance is maintained within specification as required 2.3 Vines are pruned in accordance with instructions 2.4 Anomalies and problems are recognised, rectified and/or reported 2.5 Equipment is maintained in good working order
3. Complete hand pruning operations	3.1 Equipment is shut down according to instructions as required 3.2 Equipment is cleaned and stored according to instructions 3.3 Vine cuttings are disposed of according to instructions 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify pruning requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- handle pruning equipment safely. This includes following the correct handling and sharpening procedures
- start up and operate automatic pruning equipment as required
- monitor and recognise performance problems with pruning equipment and correct or report them as instructed. This includes oiling moving parts and sharpening blades
- identify different parts of the grape vine. This should include identifying:
  - vine trunk and permanent framework
  - canes and/or cordons
  - tendrils and buds
- prune vines according to instructions. This may include:
  - selecting the best possible spurs and canes
  - positioning spurs or canes
  - cleanly removing sucker shoots
  - leaving the correct quantity of spurs, rods and buds
  - making cuts correctly and cleanly
  - recognising and removing unwanted growth
  - rolling and securing extension canes onto trellis wire as required
- use appropriate cleaning techniques
- recognise and report problems and anomalies
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- clean and store equipment according to instructions
- identify, rectify and/or report environmental non-compliance
- maintain work area to meet housekeeping standards
- dispose of vine cuttings according to instructions
- carry out routine preventive maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose of pruning vines
- basic components of the vine
- basic difference between cane and spur pruning

- pruning requirements
- safe handling of pruning equipment
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for pruning equipment
- shutdown sequence
- tag-out and lock-out sequence and methods
- cleaning and storage requirements of pruning equipment
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- basic problems and anomalies
- procedures and responsibility for reporting problems and anomalies
- disposal requirements of vine cuttings
- routine preventive maintenance procedures for equipment where relevant.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment where required</li> <li>• follow pruning equipment safety procedures</li> <li>• start and operate pruning equipment correctly</li> <li>• select best spurs and canes</li> <li>• prune correctly and according to instructions</li> <li>• perform routine and emergency shut downs</li> <li>• follow environmental instructions</li> <li>• dispose of cuttings according to instructions</li> <li>• maintain records as required.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	Workplace information can include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Equipment</b>	<p>Equipment may include:</p> <ul style="list-style-type: none"> <li>• electronic, hydraulic, pneumatic and hand secateurs</li> <li>• sharpening stone</li> <li>• file</li> <li>• scabbard or pouch</li> <li>• choppers (two-handed snips)</li> <li>• petrol air compressors</li> </ul>
<b>Methods of pruning</b>	<p>Methods of pruning may include:</p> <ul style="list-style-type: none"> <li>• spur pruning</li> <li>• cane pruning</li> <li>• rod and spur pruning</li> <li>• hand clean up after machine pruning</li> </ul>
<b>Problems and anomalies</b>	<p>Problems and anomalies may include:</p> <ul style="list-style-type: none"> <li>• signs of common pests and diseases, such as mildew, eutypa, phomopsis, boring insects, dying arm, crown gall, diseased wood, dead vines, damaged trellis or irrigation system, and faulty, stiff or blunt equipment</li> </ul>

### Unit Sector(s)

--------------------	-----------------

## FDFWGG2005A Maintain callusing environment

### Modification History

This unit supersedes and is equivalent to FDFWGGMCEB Maintain callusing environment.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to maintain a callusing environment under supervision.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to wine grape nursery staff who work with vine cuttings that are to be callused in preparation for planting. The unit covers the maintenance of the callusing environment, preparation of callusing boxes, pre- and post-callusing treatments and monitoring of callusing process. All work is done to specifications and knowledge of occupational health and safety (OHS), environmental and hygiene requirements is required.
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare callusing environment	1.1 Work instructions on callusing are confirmed and understood 1.2 Materials required for callusing are confirmed as available and ready to meet requirements 1.3 Equipment is selected and used according to workplace procedures 1.4 Work area, equipment and boxes are cleaned and sterilised to minimise risk of contamination 1.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures 1.6 Pre-mixed callusing media is prepared as instructed 1.7 Callusing environment is prepared according to workplace procedures 1.8 Callusing boxes are prepared according to workplace procedures
2. Prepare cuttings for callusing	2.1 Cuttings are prepared for callusing according to instructions 2.2 Pre-callusing treatments are applied as instructed 2.3 Cuttings are counted, bundled and labelled according to instructions 2.4 Cuttings are placed into boxes according to instructions
3. Maintain cuttings in callusing room	3.1 Cuttings are placed into callusing environment according to workplace procedures 3.2 Callusing environment is maintained within specifications 3.3 Cuttings are monitored for potential health problems according to workplace procedures 3.4 Post-callusing treatments are applied to maintain plant health according to workplace procedures
4. Carry out post-callusing operations	4.1 Callused cuttings are removed from callusing room as instructed 4.2 Waste is collected and disposed of according to workplace procedures 4.3 Facilities are cleaned and sterilised according to workplace

ELEMENT	PERFORMANCE CRITERIA
	procedures 4.4 Work is conducted in accordance with workplace environmental guidelines
5. Record information	5.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify callusing requirements
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store the required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- prepare callusing media to specified moisture levels
- prepare callusing environment. This may include:
  - turning on heaters and fans
  - setting and monitoring temperature and relative humidity
- prepare callusing boxes. This may include:
  - filling boxes with sand or vermiculite
  - lining boxes
  - storing excess media
- prepare chemical treatments to required concentration and ensure homogenous mix
- prepare cuttings for callusing. This may include:
  - taking cuttings out of storage
  - cutting just below basal bud
- apply pre-callusing treatment. This may include:

- hydrating cuttings
- applying fungicide treatments
- applying root promoter treatment
- prepare labels in a clear and legible manner with waterproof ink
- place cuttings into boxes. This may include:
  - feeling into media
  - watering in
  - placing correct number of cuttings per box
  - placing basal end at bottom
  - dipping into hormone mixes
  - arranging cuttings according to variety, clone and source
  - labelling and mapping of beds
- maintain callusing environment. This may include consideration of:
  - temperature
  - relative humidity
  - moisture levels of growing medium
- monitor cuttings for potential health problems. This may include identifying:
  - uneven callusing
  - dehydration
  - presence of pests and diseases
- apply post-callusing treatments. This may include:
  - hydrating cuttings
  - applying fungicides
- remove callused cuttings. This may include:
  - loading cuttings onto trucks or trailers
  - potting or planting cuttings
- dispose of waste as instructed. This may include:
  - pasteurising callusing media
  - spreading waste material through the vineyard
  - placing waste in bins for removal by disposal company
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- OHS hazards and controls

- purpose of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- cleaning requirements and procedures for work area and equipment
- environmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- safe preparation and handling of chemicals
- purpose and benefit of pre- and post-callusing treatments
- pre-callusing treatment procedures
- post-callusing treatment procedures
- principles of nursery hygiene
- procedures for preparing pre-mixed callusing media
- factors in a controlled callusing environment that affect the vine cutting
- procedures for maintaining callusing environment
- common problems that occur during callusing and how they should be resolved (e.g. uneven callusing or evidence of dehydrated cuttings on arrival)
- quality control process in the callusing environment.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment where required</li> <li>• observe hygiene and housekeeping standards including correct cleaning and sterilisation of work area, equipment and boxes</li> <li>• prepare callusing media and boxes to specification</li> <li>• prepare cuttings and apply pre-callusing treatment</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>correctly</p> <ul style="list-style-type: none"> <li>• place cuttings into callusing boxes correctly</li> <li>• monitor and maintain callusing environment to specification</li> <li>• monitor cuttings for correct callusing and report problems according to procedures</li> <li>• apply post-callusing treatment correctly</li> <li>• remove callused cuttings correctly</li> <li>• record information appropriately.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation, recording requirements and procedures.</li> </ul>
Method of assessment	<p>This unit should be assessed together with other units of competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### **Policies and procedures**

Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements

#### **Workplace information**

Workplace information can include:

- Standard Operating Procedures (SOPs)
- specifications
- production schedules
- instructions
- routine maintenance schedules
- work notes
- Material Safety Data Sheets (MSDSs)
- manufacturer instructions
- verbal direction from manager, supervisor or senior operator

#### **Equipment**

Equipment may include:

- thermometer
- hydrothermometer
- hydraulic bin
- trolley or trailer
- personal protective clothing and/or equipment
- forklift

#### **Materials**

Materials may include:

- cuttings
- callusing media
- rooting hormone
- boxes
- pallets

#### **Contamination**

Contamination may include:

- pests
- diseases
- viruses

<b>RANGE STATEMENT</b>	
<b>Waste</b>	Waste may include: <ul style="list-style-type: none"> <li>• callusing media</li> <li>• damaged cuttings</li> <li>• callusing containers</li> </ul>
<b>Hazards</b>	Hazards may include: <ul style="list-style-type: none"> <li>• obstacles</li> <li>• inhaling callusing media</li> <li>• operating equipment</li> <li>• using chemicals and disinfectants</li> </ul>
<b>Label information</b>	Label information may include: <ul style="list-style-type: none"> <li>• clone</li> <li>• variety</li> <li>• rootstock</li> <li>• date placed into callusing room</li> <li>• date to be removed</li> <li>• treatments applied</li> <li>• source of rootstock and scion</li> </ul>
<b>Problems and anomalies</b>	Problems and anomalies may include: <ul style="list-style-type: none"> <li>• evidence of crown gall</li> <li>• dehydration</li> <li>• fungal infection</li> <li>• physical damage</li> <li>• graft union failure</li> <li>• excessive galling</li> </ul>
<b>Records</b>	Records will include: <ul style="list-style-type: none"> <li>• treatments applied</li> <li>• clones</li> <li>• variety</li> <li>• source</li> <li>• batch numbers</li> <li>• numbers of vines in callus boxes</li> <li>• numbers of boxes packed</li> <li>• date of callusing</li> </ul>

## FDFWGG2006A Obtain and process rootlings

### Modification History

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the processing of vine rootlings in wine grape nurseries including, where required, digging of rootlings from field nurseries.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to wine grape growing and covers the processing of rootlings. Rootlings may include those developed from cuttings in a sand bed or callusing room, or those freshly dug from a field nursery.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to process rootlings	1.1 Work instructions for the processing of rootlings are confirmed and understood 1.2 Facilities are cleaned and sterilised to minimise risk of contamination 1.3 Materials are confirmed as available and ready to meet requirements 1.4 Equipment is collected and checked for serviceability and sterilised as required by workplace procedures 1.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures
2. Obtain rootlings	2.1 Requirement for rootlings from field nurseries, sand beds or callusing are checked against instructions 2.2 Rootlings if required are dug from field nurseries using tractor mounted or trailed digging machines or hand-held tools 2.3 Rootlings are obtained from sand beds or callusing room according to requirements
3. Process rootlings	3.1 Rootlings are treated and bundled according to instructions 3.2 Bundles are labelled, packed and stored according to instructions 3.3 Waste is collected and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines 3.5 Problems and anomalies are identified, rectified and/or reported according to workplace procedures 3.6 Safe work practices are employed to minimise work hazards
4. Prepare rootlings for dispatch	4.1 Bundles of rootlings are assembled according to instructions 4.2 Rootlings are prepared and packed for dispatch according to instructions 4.3 Stock is loaded for dispatch according to instructions

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	4.4 Orders are checked against goods being dispatched according to workplace procedures
	4.5 Safe work practices are employed to minimise work hazards
5. Record information	5.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify rootling processing requirements
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping and hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- select and use materials as required
- prepare chemical treatments to required concentration and ensure a homogenous mix
- handle rootlings correctly
- treat rootlings as instructed. This may include:
  - complete hydration of all rootlings
  - complete chemical treatment of all rootlings
  - removal of unwanted plant material
- monitor the standard of rootlings and grade them as instructed. This may include sorting for:
  - diameter of stem
  - appearance
  - length and number of shoots
  - strength of graft union
- bundle and label rootlings as instructed. This may include:
  - ensure correct numbers per bundle

- lay rootlings all the same way in bundles
- tie bundles securely
- labell legibly and accurately
- pack and store rootlings as instructed. This may include meeting instructions for:
  - cold room layout
  - cold room temperature variations
  - customer requirements
  - storage time requirements
- collect and dispose of waste as required to minimise risk of environmental damage
- check stock against orders. This may include checking order requirements for:
  - quantity of stock
  - varieties and clones
  - quality of stock is within specifications
- dispatch stock as instructed. This may include:
  - correct manual handling
  - correct use of mechanical transfer equipment
- liaise with customers. This may include:
  - taking orders
  - notifying customers about availability of stock
  - notifying customers about dispatch dates
  - identifying specific treatments of stock
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- occupational health and safety (OHS) hazards and controls
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- principles of nursery hygiene
- cleaning requirements and procedures for work area and equipment
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- environmental issues and controls

- equipment operation and maintenance requirements and procedures
- safe preparation and handling of chemicals
- common features of healthy vine rootlings
- common features of unhealthy vine rootlings
- factors that influence how a rootling should be graded and why
- package, storage requirements and procedures for rootlings ready for sale
- rootling preparation requirements and procedures for sales or transfers to customers.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>

<b>Packing</b>	Packing may include: <ul style="list-style-type: none"> <li>• packing, venting and sealing cuttings into polythene film bags</li> <li>• wrapping cuttings in wet hessian</li> <li>• packing in woven polypropylene wool packs</li> </ul>
<b>Loading of rootlings</b>	Loading of rootlings may be: <ul style="list-style-type: none"> <li>• done manually or with the use of a forklift</li> </ul>
<b>Records</b>	Records will include: <ul style="list-style-type: none"> <li>• number of rootlings per bundle</li> <li>• number of bundles</li> <li>• treatments</li> <li>• date</li> </ul>

### Unit Sector(s)

<b>Unit sector</b>	Wine operations
--------------------	-----------------

## FDFWGG2008A Train vines

### Modification History

This unit supersedes and is equivalent to FDFWGGTVB Train vines.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to train growing vines by hand.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit covers the training of vines used in winemaking using a variety of handheld hand or operated equipment. The unit requires knowledge of the different parts of a grape vine, the ability to detect problems and anomalies, and to use techniques for selection and training of laterals.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for training	1.1 Equipment is confirmed as available and ready for use 1.2 Materials are confirmed as available to meet training requirements
2. Train vines	2.1 Vines are trained according to instructions 2.2 Anomalies and problems are recognised, rectified and/or reported 2.3 Equipment is maintained in good working order
3. Complete training activities	3.1 Equipment is cleaned and stored according to workplace procedures 3.2 Waste generated by both the process and cleaning procedures is collected, treated, disposed of or recycled according to workplace procedures 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### Ability to:

- access workplace information to identify training requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- set up and operate equipment as required according to instructions

- identify different parts of the grapevine. This should include identifying:
  - vine trunk and permanent framework
  - canes and/or cordons
  - tendrils and buds
  - fruit
- recognise and rectify or report problems and anomalies
- identify, rectify and/or report environmental non-compliance
- train vines according to instructions. This may include:
  - heading height
  - selection of appropriate laterals
  - positioning of laterals
  - securing of laterals
  - removing unwanted laterals from trunk and crown
- maintain work area to meet housekeeping standards
- clean and store equipment according to instructions
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

---

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- safe and effective handling of equipment
- correct operating procedures for equipment
- basic maintenance requirements and procedures for equipment
- purpose and application of personal protective clothing and/or equipment
- Occupational health and safety (OHS) hazards and controls
- procedures and responsibility for reporting problems and anomalies
- range of vine training techniques, features and benefits
- basic components of the vine
- training requirements and procedures
- common vineyard pests and diseases and other common vine problems
- environmental issues and controls
- cleaning and storage requirements and procedures for equipment
- reporting responsibilities and procedures.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective equipment, MSDS and follow other specified OHS procedures</li> <li>• identify parts of vines, including laterals, canes, cordons and buds</li> <li>• train vines to instructions</li> <li>• recognise faults and anomalies</li> <li>• keep records according to procedures.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over

<b>EVIDENCE GUIDE</b>	
	a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	<p>Workplace information can include:</p> <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Equipment</b>	<p>Equipment may include:</p> <ul style="list-style-type: none"> <li>• snips</li> <li>• tape guns</li> </ul>
<b>Materials</b>	<p>Materials may include:</p> <ul style="list-style-type: none"> <li>• strings</li> <li>• stakes</li> <li>• wires</li> <li>• tape</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Method of training</b>	Method of training may vary according to workplace need, but may include: <ul style="list-style-type: none"> <li>• unilateral or bilateral techniques</li> </ul>
<b>Problems and anomalies</b>	Problems and anomalies may include: <ul style="list-style-type: none"> <li>• uneven growth</li> <li>• pests and diseases</li> <li>• dead vines</li> <li>• broken trellis or wires</li> </ul>
<b>Waste</b>	Waste may include: <ul style="list-style-type: none"> <li>• vine trimmings</li> <li>• faulty materials</li> <li>• packaging</li> </ul>

### **Unit Sector(s)**

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for canopy management activities	1.1 Canopy management requirements are identified and planned 1.2 Canopy management equipment is confirmed as available and ready for use 1.3 Equipment is set up to meet requirements
2. Operate canopy management equipment	2.1 Equipment is started up according to workplace procedures 2.2 Canopy management techniques are applied to vines according to their vigour, capacity and manager's instructions 2.3 Equipment performance is monitored to confirm performance is maintained within specifications 2.4 Canopy management activities are monitored to confirm performance is maintained within specifications 2.5 Out-of-specification performance is identified, rectified and/or reported
3. Shut down canopy management equipment	3.1 Canopy management equipment is shut down according to workplace procedures 3.2 Equipment is cleaned and stored according to workplace procedures 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills include:**

---

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify canopy management requirements
- select, fit and use personal protective clothing and/or equipment
- liaise with other work areas
- identify canopy management requirements. Factors to be considered include:
  - grape variety
  - vine vigour
  - end use of fruit, quality and yield requirements
  - climate
  - operating conditions
  - workplace procedures, manager's instructions
- attach equipment to tractor
- set up equipment to meet requirements
- confirm equipment status and condition
- operate equipment to meet requirements
- recognise equipment performance problems and rectify and/or report according to workplace procedures
- monitor canopy management activities. This will include monitoring:
  - width of canopy
  - speed of tractor and power take-off rpm
  - density of foliage
  - air circulation
  - light penetration or shade
  - bud numbers, spur length
  - vine damage
  - progress
  - problems and anomalies
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- clean and store equipment
- detach equipment from tractor
- use appropriate cleaning techniques
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- maintain work area to meet housekeeping standards

- carry out routine maintenance of equipment according to enterprise procedures
- use hand tools according to enterprise procedures
- use power tools according to enterprise procedures
- interpret mechanical drawings according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

### **Required knowledge includes:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### **Knowledge of:**

- key factors affecting the canopy management technique adopted. These may include:
  - climate, forecast and current weather conditions
  - vineyard aspect and terrain
  - grape variety and vigour
  - grape quality and characteristics required
  - trellis design
  - harvesting techniques
  - disease risk and occurrence
  - stage of maturity and development
- operating parameters and procedures
- recognition of correct vine growth stages at which to carry out canopy management activities
- factors influencing vine vigour, including:
  - grape variety
  - trellis design
  - vine spacing
  - fertilisers
  - irrigation
  - rootstock
- features and benefits of a range of canopy management styles and techniques and their respective affect on grape quality, cropping yield and wine production requirements. This should include techniques to manage:
  - light penetration and shading
  - air circulation and disease reduction
  - annual growth stages of vine development
  - crop quality and quantity
- significance and method of monitoring canopy management activities
- purpose and basic components of canopy management equipment
- operational procedures for equipment

- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- basic vine canopy problems or anomalies
- procedures and responsibility for reporting problems
- cleaning and storage requirements and procedures for equipment
- shutdown sequence
- routine maintenance procedures for equipment where relevant
- procedures for using hand tools where relevant
- procedures for using power tools where relevant
- interpretation of mechanical drawings where relevant.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment</li> <li>• select and confirm availability of equipment and prepare according to instructions</li> <li>• attach, set up equipment to meet requirements</li> <li>• start and operate equipment in accordance with operation instructions and requirements of workplace and task</li> <li>• perform emergency and routine shutdowns</li> <li>• take corrective action in response to out-of-specification results or non-compliance</li> <li>• demonstrate knowledge of OHS hazards, controls and emergency procedures</li> <li>• sort, collect, treat, recycle or dispose of waste</li> <li>• record information appropriately.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Polices and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	Workplace information may include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal directions from manager, supervisor or senior operator</li> </ul>
<b>Equipment</b>	<p>Equipment may include:</p> <ul style="list-style-type: none"> <li>• tractor</li> <li>• circular saws</li> <li>• cutter bars</li> <li>• blades</li> <li>• knives</li> <li>• drum pruners</li> <li>• mechanical leaf pluckers</li> <li>• wire lifters</li> </ul>
<b>Terrain</b>	<p>Terrain must enable safe and effective operation of equipment. It may include:</p> <ul style="list-style-type: none"> <li>• tracks</li> <li>• access roads</li> <li>• vineyard rows</li> <li>• open paddocks</li> <li>• flat, undulating, steep, hilly or terraced land</li> <li>• and on- and off-road environments</li> </ul>

## FDFWGG2010A Field graft vines

### Modification History

This unit supersedes and is equivalent to FDFWGGFGVB Field graft vines.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. This unit covers the skills and knowledge required to select appropriate vine material and field graft vines.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to work conducted in the field to select and prepare vines for grafting and complete grafting activities. It includes application of treatment as required.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to field graft vines	1.1 Materials are confirmed and available to meet grafting requirements 1.2 Vine material is selected and prepared for grafting 1.3 Equipment is checked to confirm readiness for use
2. Field graft vines	2.1 Vines are field grafted according to instructions 2.2 Vine graft is treated and taped according to instructions 2.3 Grafting process and equipment are monitored to ensure results are maintained within specifications 2.4 Out-of-specification process and equipment performance are identified, rectified and/or reported
3. Complete field grafting activities	3.1 Equipment is cleaned as required 3.2 Unused grafting material is disposed of or stored according to workplace procedures 3.3 Waste generated by both the grafting and cleaning procedures is collected, treated, disposed of or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines 3.5 Required documentation is completed

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify grafting requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- confirm supply of necessary materials
- select appropriate vine material for grafting. This may include consideration of:
  - variety and clone
  - matching cambium
  - matching bevels and sizes
  - viable buds
  - achievement of tight unions
- prepare vine material for grafting. This may include:
  - soaking buds
  - working appropriate incisions
  - hot water treatment of cuttings
  - virus tests
  - compatibility tests
  - hydration of cuttings
  - cutting to size
- select and prepare equipment as required
- graft vines in the field according to instructions. This should include:
  - selecting appropriate bud location to graft
  - ensuring cohesion of graft union
- operate equipment safely
- treat vines after grafting. This may include:
  - applying fungicide
  - securing with tape
  - painting
  - waxing
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may include monitoring:
  - percentage take
  - weather conditions
  - pests and diseases (e.g. weevils)
- store unused grafting material
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste as required
- maintain work area to meet housekeeping standards
- Clean equipment after use

- identify, rectify and/or report environmental non-compliance
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose of grafting and various methods of budding and grafting
- criteria for successful grafting
- advantages of using clonal rootstock material
- criteria for selecting parent vines for scion material
- correct procedure and optimum conditions for the storage and handling of material until required for grafting
- advantages of using clonal and registered vine improvement material
- importance of selection and use of rootstock
- stages of the grafting procedure and their purpose
- common problems and corrective action required
- purpose, components and operation of grafting equipment
- methods of callusing vine cuttings and the criteria for best callus development
- procedures and responsibilities for reporting problems
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- cleaning requirements for work area and equipment
- recording requirements and procedures
- routine maintenance procedures for equipment where relevant.

**Evidence Guide**

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance

<b>EVIDENCE GUIDE</b>	
	with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• select and prepare appropriate vine material for grafting, including disbudding</li> <li>• field graft vines to instructions</li> <li>• conduct post-grafting treatment and packing of vines</li> <li>• monitor grafted vines and identify and rectify or report out-of-specification grafted vines</li> <li>• follow personal and work area hygiene procedures</li> <li>• dispose of waste correctly</li> <li>• record and report results of grafting according to procedures.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>

## FDFWGG2013A Deliver injection requirements

### Modification History

This unit supersedes and is equivalent to FDFWGGIRB Deliver injection requirements.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to deliver injection requirements via an irrigation system according to instructions
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to employees who inject various materials for delivery via equipment used to irrigate vines. Material to be injected may be wet or dry and includes fertilisers, chlorine, acid and cleaning agents. Identification of and calculation of the amount to be injected is included. The unit covers injection into various types of irrigation equipment, including flood, dripper, microjet, sprinkler, overhead and water winch. Injection of materials must be consistent with environmental and occupational health and safety (OHS) requirements.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare equipment for operation	1.1 Materials and services are confirmed as available and ready for operation 1.2 Materials are prepared to meet injection requirements 1.3 Equipment is checked to confirm readiness for use 1.4 Equipment is set to meet injection requirements
2. Operate the injection process	2.1 The injection process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Out-of-specification equipment performance is identified, rectified and/or reported 2.4 Injection requirements are delivered according to instructions 2.5 Equipment is maintained in good working order
3. Shut down injection equipment	3.1 Injection equipment is shut down according to workplace procedures 3.2 Injection equipment is cleaned according to workplace procedures 3.3 Waste generated by both the process and cleaning procedures is collected, treated, disposed of or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify injection requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary services and materials
- liaise with other work areas
- identify, rectify and/or report environmental non-compliance
- delect and prepare injection materials as required. This may include the accurate completion of calculations, such as dilution rates
- confirm equipment status and condition
- set up and start up the process. This can involve the use of process control systems
- monitor the process and system operation to identify out-of-specification results or non-compliance. This can involve monitoring:
  - usage rates
  - dilution
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- maintain work area to meet housekeeping standards
- demonstrate safe handling of hazardous chemicals
- implement routine maintenance and minor repairs of the system
- implement routine system cleaning requirements
- apply information technology systems according to enterprise procedures
- apply sampling techniques according to enterprise procedures
- conduct routine tests according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge include:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose and principles of chemicals used and their effect on irrigation system or vine performance. This should include the effect of miscalculations and inaccurate deliveries
- purpose and operation of equipment and instrumentation components
- basic operating principles and process control systems where relevant
- services required
- control points and significance and methods of monitoring
- common causes of variation and corrective action required
- process specifications, procedures and operating parameters
- correct chemical handling techniques
- OHS hazards and controls
- lock-out and tag-out procedures
- environmental issues and controls
- procedures and responsibility for reporting problems
- cleaning requirements of system
- maintenance requirements of system
- shutdown sequence
- recording requirements and procedures
- cleaning procedures
- information technology systems where relevant
- sampling techniques and procedures where relevant
- routine testing procedures where relevant.

**Evidence Guide**

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

<b>EVIDENCE GUIDE</b>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment where required</li> <li>• correctly select and prepare injection materials</li> <li>• correctly pre-start checks of equipment</li> <li>• start injection process correctly</li> <li>• monitor injection process control points and equipment, including checking for environmental compliance, usage rates and dilution</li> <li>• take corrective action in response to out-of-specification results or non-compliance</li> <li>• perform routine and emergency shutdowns</li> <li>• handle and/or remove waste in accordance with specified procedures</li> <li>• record information appropriately.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
<p>Method of assessment</p>	<p>This unit should be assessed together with other units of competency relevant to the function or work role.</p>
<p>Guidance information for assessment</p>	<p>To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	<p>Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements</p>
<b>Workplace information</b>	<p>Workplace information can include:</p> <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal directions from manager, supervisor or senior operator</li> </ul>
<b>Confirming equipment status</b>	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> <li>• checking that all safety standards and pre-start requirements are met and equipment is operational</li> <li>• checking the operation and/or calibration of measuring instrumentation</li> </ul>
<b>Services</b>	<p>Services may include:</p> <ul style="list-style-type: none"> <li>• water and power</li> </ul>
<b>Monitoring the process</b>	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> <li>• the use of production data, such as performance control charts</li> </ul>
<b>Process operation and monitoring functions</b>	<p>Process operation and monitoring functions may be:</p> <ul style="list-style-type: none"> <li>• manual or involve the use of a process control system</li> </ul>
<b>Control points</b>	<p>Control points refer to those key points in a work process</p>

<b>RANGE STATEMENT</b>	
	that must be monitored and controlled. This includes: <ul style="list-style-type: none"> <li>• quality and regulatory control points</li> <li>• inspection points</li> </ul>
<b>Irrigation systems</b>	Irrigation systems may include: <ul style="list-style-type: none"> <li>• flood</li> <li>• dripper</li> <li>• microjet</li> <li>• sprinkler</li> <li>• overhead</li> <li>• water winch</li> </ul>
<b>Materials to be injected</b>	Materials to be injected may be wet or dry and may include, but are not restricted to: <ul style="list-style-type: none"> <li>• fertilisers</li> <li>• chlorine</li> <li>• acid</li> <li>• cleaning agents</li> </ul>
<b>Equipment</b>	Equipment may include: <ul style="list-style-type: none"> <li>• injection pump</li> <li>• injection point</li> <li>• chemical holding tank</li> </ul>
<b>Information systems</b>	Information systems may be: <ul style="list-style-type: none"> <li>• print or screen based and may include information technology for injection scheduling systems, recording and reporting systems</li> </ul>
<b>Work hazards</b>	Work may involve exposure to: <ul style="list-style-type: none"> <li>• chemical, dangerous or hazardous substances</li> </ul>

### Unit Sector(s)

## FDFWGG2015A Support mechanical harvesting operations

### Modification History

This unit supersedes and is equivalent to FDFWGGMHSB Support mechanical harvesting operations.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of wine sector. It covers the skills and knowledge required to collect grapes from a mechanical harvester and deliver them to the receival point.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit includes the ability to attach, set up and detach equipment as required, and the support of activities from harvesting to preparation for receival.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		
	AHCMOM202A	Operate tractors
	FDFWGG2018A	Operate vineyard equipment

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for harvest support activities	1.1 Work requirements are identified 1.2 Equipment is checked to confirm readiness for use 1.3 Equipment is set up to meet harvest support requirements
2. Collect grapes from harvester	2.1 Tractor towing trailer or gondola is driven alongside mechanical harvester according to instructions 2.2 Collection activities are monitored to confirm performance is maintained within specification 2.3 Out-of-specification performance is recognised, rectified and/or reported 2.4 Problems and anomalies are recognised, rectified and/or reported 2.5 Equipment is maintained in good working order
3. Transfer grapes to receival point	3.1 Chemicals are added to grapes according to instructions 3.2 Grapes are delivered to receival point according to instructions
4. Complete harvest support activities	4.1 Equipment is cleaned according to workplace procedures 4.2 Waste generated by the process or cleaning procedures is collected, sorted and disposed of or recycled, according to workplace procedures 4.3 Work is conducted in accordance with workplace environmental guidelines
5. Record information	5.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

---

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify harvest support requirements
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, attach and set up appropriate equipment
- carry out pre-operational checks of equipment according to workplace procedures
- operate equipment safely
- identify and rectify, remove and/or report potential occupational health and safety (OHS) hazards
- collect grapes from the discharge conveyer. This should include:
  - avoiding all contact with or damage to other machinery and equipment, vines, trellises or fences
  - safe handling of equipment
  - maintaining appropriate speed and distance
  - starting off and swapping over
  - changing rows
  - day-time and night-time harvesting
  - variety of harvesting conditions and varieties
- monitor grape collection activities. This may include monitoring:
  - equipment breakages or malfunction
  - vine or trellis damage
  - grape quality and quantity
  - matter other than grapes (MOG) collected
  - load weight
  - chemical application to fruit loads
  - collection accuracy of grapes
  - tipping accuracy of grapes at receival point
  - progress
  - congestion or backlog at receival point
  - performance according to specifications
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements

- handle, prepare and add chemicals according to instructions
- take the necessary action to protect fruit quality where possible. This may include parking fruit carriers in a shaded area
- deliver grapes to receipt point according to instructions. This may include tipping the trailer or gondola
- maintain workplace records according to workplace standards
- maintain work area to meet housekeeping standards
- use appropriate cleaning techniques
- carry out routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

---

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- key factors that will affect grape and/or wine quality. This may include:
  - temperature
  - oxidation
  - MOG collected
  - speed of processing
  - chemical addition
- features and benefits of methods to preserve grape and/or wine quality
- common problems and anomalies
- procedures and operating parameters
- significance and methods of monitoring performance
- common faults and corrective action required
- OHS hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems
- recording requirements and procedures
- cleaning requirements associated with changeovers
- shutdown sequence of equipment
- cleaning procedures
- routine maintenance procedures for equipment where relevant.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- use personal protective clothing and equipment
- confirm availability of specified materials and prepare according to instructions
- select and confirm status and suitability of equipment
- start and operate equipment in accordance with operation instructions and requirements of workplace and task
- monitor harvesting operation to achieve specified result
- take corrective action in response to out-of-specification results or non-compliance
- demonstrate knowledge of OHS hazards, controls and emergency procedures
- sort, collect, treat, recycle or dispose of waste
- record information appropriately.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment as required
- work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
- instructions, information, specifications and schedules as required
- equipment, services and corresponding information as required
- products and materials as required
- internal and external customers and suppliers as required
- cleaning procedures, materials and equipment as

<b>EVIDENCE GUIDE</b>	
	<p>required</p> <ul style="list-style-type: none"> <li>documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. <b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for trellising activities	1.1 Existing trellises are checked for signs of disrepair 1.2 Equipment is prepared and checked to confirm readiness for use 1.3 Materials are selected according to instructions 1.4 Posts and supports are laid out according to instructions 1.5 Wire is run out according to instructions
2. Erect and maintain trellises	2.1 Equipment is started up and operated according to workplace procedures 2.2 Trellis ends and posts are erected and assemblies strained according to instructions 2.3 Foliage and trellis wires are attached and tensioned according to instructions 2.4 Trellis maintenance is carried out according to workplace procedures 2.5 Problems and anomalies are recognised, rectified and/or reported
3. Complete trellising activities	3.1 Equipment is shut down according to workplace procedures as required 3.2 Equipment is cleaned and stored according to workplace procedures 3.3 Materials are stored according to workplace procedures 3.4 Waste is collected and disposed of or recycled according to workplace procedures 3.5 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify trellis requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- select appropriate materials. This will include type and quantity
- check equipment and complete pre-start checks as required
- repair trellis according to workplace standards. This may include:
  - positioning and depth of posts and strainers
  - positioning and number of wires
  - tightness and grade of wire
- lay out posts and supports according to instructions. This may include:
  - spacing
  - type
  - numbers
  - positioning
  - safe handling procedures
- run out wire according to instructions. This will include:
  - securing of ends
  - safe handling procedures
  - cutting correct length
  - positioning
- operate equipment according to instructions
- erect trellis ends and assemblies according to instructions
- attach foliage and trellis wires according to instructions. This includes:
  - spacing
  - alignment
  - height
  - tension
  - fixing method
  - joining systems (e.g. wire knots)
- recognise, rectify and/or report problems and anomalies of trellis installation
- use hand tools
- collect, sort, treat, dispose of and/or recycle waste
- identify, rectify and/or report environmental non-compliance

- clean and store equipment according to instructions
- use appropriate cleaning techniques
- implement appropriate occupational health and safety (OHS) procedures
- store unused materials
- maintain work area to meet housekeeping standards
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose, features and components of the trellis system
- trellis installation process and procedures
- common maintenance requirements of vineyard trellising and how to repair them
- common faults, problems and how to solve them
- safe handling of materials and equipment
- purpose and application of personal protective clothing and/or equipment
- OHS hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems and anomalies
- cleaning and storage requirements and procedures for equipment
- storage requirements and procedures for materials
- maintenance procedures for equipment where relevant.

## Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

<b>EVIDENCE GUIDE</b>	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment where required</li> <li>• carry out trellis repairs according to instructions</li> <li>• lay out posts and supports according to instructions</li> <li>• cut, cure, position and tension wires according to instructions</li> <li>• store unused materials correctly</li> <li>• collect and recycle or dispose of waste according to procedures.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare equipment for operation	1.1 Requirements are interpreted and confirmed 1.2 Equipment is selected and checked to confirm readiness for use 1.3 Equipment is attached and set up according to instructions as required
2. Operate equipment	2.1 Equipment is started up according to workplace procedures 2.2 Equipment is operated according to workplace procedures 2.3 Equipment performance is monitored to confirm performance is maintained within specification 2.4 Out-of-specification equipment performance is identified, rectified and/or reported 2.5 Problems and anomalies are recognised and/or reported
3. Complete operation of equipment	3.1 Equipment is shut down according to workplace procedures 3.2 Equipment is prepared for cleaning and storage 3.3 Equipment is cleaned according to workplace procedures 3.4 Waste generated by both the activities and cleaning procedure is collected, treated and disposed of, or recycled according to workplace procedures 3.5 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and

processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas
- select appropriate equipment for the task
- confirm equipment status and condition. This may include checking:
  - fuel
  - water
  - oil (e.g. engine, gearbox and hydraulics)
  - belts
  - air intake
  - tyre pressure
  - metal fatigue or wear and tear
- attach equipment to towing vehicle as required
- set up equipment as required to meet operating instructions
- start up equipment
- operate equipment to meet operating instructions. This should include:
  - driving forward and reversing
  - operating in confined spaces
  - operating amongst other vineyard activities and a variety of conditions as required
- monitor equipment performance. This may include monitoring:
  - status and condition
  - handling and stopping ability
  - operating depth of equipment
  - blockages
  - ground speed or power take-off speed
  - width and/or coverage
  - environmental operating conditions
- recognise equipment performance problems and amend and/or report as instructed
- shut down equipment in response to emergency situations
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning and storage
- clean equipment
- store equipment according to instructions
- maintain work area to meet housekeeping standards
- collect, treat, recycle or dispose of waste according to workplace procedures
- identify, rectify and/or report environmental non-compliance
- use appropriate cleaning techniques
- maintain workplace records

- carry out routine maintenance of equipment according to enterprise procedures.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose, features and components of equipment
- equipment pre-start checks
- equipment operating procedures
- process specifications, procedures and operating parameters
- common causes of variation or malfunction and the corrective action required
- required weather conditions for equipment operation
- Occupational health and safety (OHS) hazards and controls in all operating conditions
- significance and methods of monitoring equipment performance
- lock-out and tag-out procedures
- recording requirements and procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- cleaning requirements of equipment associated with changeovers and types of shutdown
- cleaning procedures
- storage requirements
- shutdown sequence
- routine maintenance procedures for equipment where relevant.

**Evidence Guide**

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment</li> <li>• select and confirm availability of equipment and</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>prepare according to instructions</p> <ul style="list-style-type: none"> <li>• attach and set up equipment to meet requirements</li> <li>• start and operate equipment in accordance with operation instructions and requirements of workplace and task</li> <li>• perform emergency and routine shutdowns</li> <li>• take corrective action in response to out-of-specification results or non-compliance</li> <li>• demonstrate knowledge of OHS hazards, controls and emergency procedures</li> <li>• sort, collect, treat, recycle or dispose of waste</li> <li>• record information appropriately.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	<p>This unit should be assessed together with other units of competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	<p>Workplace information can include:</p> <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Vineyard equipment</b>	<p>Vineyard equipment may include, but is not limited to:</p> <ul style="list-style-type: none"> <li>• all terrain vehicles</li> <li>• tractor mounted forklift</li> <li>• front-end loader</li> <li>• towed equipment (e.g. gondola)</li> <li>• three point linkage equipment (e.g. discs)</li> <li>• power take-off driven equipment (e.g. slasher)</li> <li>• equipment with hydraulics (e.g. tipping trailer)</li> <li>• stationary equipment (e.g. pumps and generators)</li> </ul>
<b>Terrain</b>	<p>Terrain, where applicable, must enable safe and effective operation of the equipment. It may include:</p> <ul style="list-style-type: none"> <li>• tracks</li> <li>• access roads</li> <li>• vineyard rows</li> <li>• open paddocks</li> <li>• flat, undulating, steep, hilly or terraced land</li> <li>• on- and off road environments</li> </ul>
<b>Conditions</b>	Conditions, where applicable, must enable safe and

<b>RANGE STATEMENT</b>	
	<p>effective operation of the equipment. These may include:</p> <ul style="list-style-type: none"> <li>• dry</li> <li>• wet</li> <li>• slippery</li> <li>• boggy</li> <li>• icy</li> <li>• foggy</li> <li>• windy</li> <li>• day and night conditions</li> </ul>
<b>Loads</b>	<p>Loads, where applicable, may range from:</p> <ul style="list-style-type: none"> <li>• full to empty as required</li> </ul>
<b>Confirming equipment status</b>	<p>Confirming equipment status will include:</p> <ul style="list-style-type: none"> <li>• checking that all safety standards and pre- start requirements are met and equipment is operational</li> </ul>
<b>Information systems</b>	<p>Information systems may be:</p> <ul style="list-style-type: none"> <li>• print or screen based</li> </ul>

## Unit Sector(s)

<b>Unit sector</b>	Wine operations
--------------------	-----------------

## FDFWGG2020A Carry out hot water treatment

### Modification History

This unit supersedes and is equivalent to FDFWGGHWTB Carry out hot water treatment.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to carry out hot water treatment of grape vine cuttings.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	Working with vine cuttings includes the ability to recognise problems and anomalies with vines. People undertaking this unit of competency in the workplace will require accreditation by the <i>Australian Vine Improvement Association (AVIA)</i> .
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for hot water treatment	<p>1.1 Work instructions on hot water treatments are confirmed and understood</p> <p>1.2 Materials are confirmed as available and ready to meet requirements</p> <p>1.3 Equipment is set up according to specifications</p> <p>1.4 Water is prepared for cool down, hot water treatment and hydration according to specifications</p> <p>1.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures</p>
2. Treat cuttings	<p>2.1 Cuttings are dipped in the hot water according to AVIA protocols</p> <p>2.2 The dipping process is monitored for compliance with AVIA specifications</p> <p>2.3 Safe work procedures are followed to minimise risk of hazards</p>
3. Carry out post-treatment procedures	<p>3.1 Cuttings are cooled down according to AVIA protocols</p> <p>3.2 Treated cuttings are stored according to AVIA and workplace procedures</p> <p>3.3 Waste is collected and disposed of according to workplace procedures</p> <p>3.4 Work is conducted in accordance with workplace environmental guidelines</p>
4. Record information	<p>4.1 Treatment information is recorded according to AVIA requirements</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills include:**

---

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information required to carry out hot water treatments
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- set up equipment for hot water treatment. This will include:
  - placing correct volumes of water in the tanks
  - calibrating data loggers
  - calibrating temperature sensors against a certified thermometer
  - calibrating thermometers
- prepare water for cool down, hot water treatment and hydration. This will include:
  - testing and adjusting chlorination levels
  - checking and adjusting temperature levels
- prepare cuttings for treatment. This may include re-hydration
- dip cuttings, fully submersing for the specified amount of time, at the specified temperature in prepared hot water
- monitor the dipping process to ensure compliance with required specifications. This will include:
  - monitoring critical control points for compliance with specifications
  - analysing readouts from data logging devices
  - maintaining level of agitation in the tanks
  - maintaining chlorine level
  - recalibrating thermometers
- cool down cuttings in prepared cooling water immediately following hot water treatment. this is already mentioned above
- store treated cuttings. This will include:
  - separating from untreated cuttings to prevent contamination
  - covering with clean covers
  - placing cuttings in vented plastic bags to prevent dehydration
  - placing cuttings in the cold room

- dispose of waste. This may include:
  - settling the water
  - racking off clean water
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose of hot water treatment
- importance of precise treatment
- consequences of mistreatment
- AVIA and workplace specifications for hot water treatments
- reasons for using different specifications for hot water treatments
- monitoring techniques to ensure temperature and water quality are within specifications
- quality assurance process for the hot water treatment process
- Occupational health and safety (OHS) hazards and controls when undertaking hot water treatments
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- principles of nursery hygiene
- cleaning requirements and procedures for work area and equipment
- environmental issues and controls
- waste disposal requirements and procedures
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies.

**Evidence Guide**

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare cold room for storage	1.1 Work instructions are confirmed and understood 1.2 Cold room facilities are cleaned and sanitised according to workplace procedures 1.3 Cold room specifications are set according to workplace procedures 1.4 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures
2. Operate cold room	2.1 Environmental specifications are monitored according to workplace procedures 2.2 Movement of stock is monitored according to cold room plan and workplace procedures 2.3 Problems and anomalies are identified, rectified and/or reported according to workplace procedures 2.4 Safe work practices are employed to minimise work hazards
3. Shut down cold room	3.1 Cold room is shut down according to workplace procedures 3.2 Cold room is cleaned and secured according to workplace procedures 3.3 Waste is collected and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

---

**Required skills include:**

---

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information required to operate cold storage facilities
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- identify, rectify and/or report environmental non-compliance
- maintain work area and equipment to meet workplace housekeeping and hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- follow safe work procedures to minimise hazards
- collect, treat and dispose of waste according to workplace procedures
- maintain workplace records
- interpret and apply cold room plan
- confirm equipment status and condition. This may include:
  - checking all safety standards
  - conducting pre-start checks
- move material in and out of cold room. This may include:
  - transferring stock manually
  - using a mechanical transfer device
- recognise equipment performance problems and amend and/or report as instructed
- monitor the health of cuttings during storage. This may include identifying:
  - signs of dehydration
  - signs of fungal infection
- monitor cold room facilities according to workplace procedures. This may include identifying:
  - temperature variations
  - humidity variations
  - air flow
- shut down equipment in response to emergency situations
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

---

**Required knowledge includes:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- OHS hazards and controls when working in a cold room
- environmental issues and controls
- principles of nursery hygiene
- purpose and application of personal protective clothing and/or equipment
- procedures and responsibility for reporting problems
- lock-out and tag-out procedures
- cleaning requirements and procedures
- reporting and recording requirements and procedures
- waste disposal requirements and procedures
- principles of cold room planning
- principles of cold room operation
- purpose and use of components of a cold room
- cold room equipment operating procedures
- shutdown sequence
- principles of maintaining cold room performance
- methods of maintaining cold room performance
- methods of monitoring a cold room
- methods of packing a cold room
- common causes of variation or malfunction and the corrective action required
- effect of cold storage on cuttings
- post-storage treatment of cuttings.

**Evidence Guide**

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment where required</li> <li>• observe housekeeping standards</li> <li>• monitor cold storage and stock conditions and make</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<p>required adjustments</p> <ul style="list-style-type: none"> <li>• shut down, clean and secure cold storage facilities</li> <li>• recognise and act upon out-of-specification conditions</li> <li>• record information appropriately.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Take vine cuttings	1.1 Cutting requirements are confirmed and understood 1.2 Equipment is checked to confirm readiness for use 1.3 Vine cuttings are taken according to instructions 1.4 Vine anomalies and problems are recognised, rectified and/or reported 1.5 Equipment is maintained in good working order
2. Complete vine cutting operations	2.1 Vine cuttings are collected according to instructions 2.2 Equipment is cleaned and stored according to instructions 2.3 Waste is collected and disposed of according to instructions
3. Prepare to process cuttings	3.1 Work instructions on the processing of cuttings are confirmed and understood 3.2 Facilities are cleaned and sterilised to minimise risk of contamination 3.3 Materials are confirmed as available and ready to meet requirements 3.4 Equipment is collected and checked for serviceability and sterilised as required by workplace procedures 3.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures 3.6 Work is conducted in accordance with workplace environmental guidelines
4. Process cuttings	4.1 Cuttings are treated and bundled according to instructions 4.2 Bundles are labelled, packed and stored according to instructions 4.3 Waste is collected and disposed of according to workplace procedures 4.4 Problems and anomalies are identified, rectified and/or reported according to workplace procedures 4.5 Safe work practices are employed to minimise work hazards
5. Record information	5.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

---

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify cutting processing requirements
- confirm supply of necessary materials
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- handle pruning secateurs safely. This includes following the correct handling and sharpening procedures
- recognise performance problems with secateurs and correct or report them as instructed. This includes oiling moving parts and sharpening blades
- identify different parts of the grapevine. This should include identifying:
  - vine trunk and permanent framework
  - canes and/or cordons
  - tendrils and buds
- select and take vine cuttings according to instructions. This may include:
  - correct length and diameter
  - correct number of buds on the cutting
  - degree of straightness
  - cuts made correctly and cleanly
  - top cut at 45° angle or bottom bud flat, 1-2 cm from nearest bud
  - number of buds left on the vine
- collect and store vine cuttings according to instructions. This may include:
  - numbers per bundle
  - all lying the same way in the bundle (basal and distal ends)
  - secure tying of bundles

- labelling
- maintaining hydration of cuttings
- prepare chemical treatments to required concentration and ensure homogenous mix
- treat cuttings as instructed. This may include:
  - completing hydration of all cuttings
  - completing chemical treatment of all cuttings
  - removing unwanted plant material
- monitor the standard of cuttings and grade them as instructed
- bundle and label cuttings as instructed. This may include:
  - including correct numbers per bundle
  - cuttings all lying the same way in the bundle
  - tying bundles securely
  - labelling legibly and accurately
- pack and store cuttings as instructed. This may include:
  - cold room layout
  - cold room temperature variations
  - customer requirements
  - storage time requirements
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

#### Required knowledge

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### **Knowledge of:**

- occupational health and safety (OHS) hazards and controls
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- cleaning requirements and procedures for work area and equipment
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- environmental issues and controls
- principles of nursery hygiene
- basic components of the vine
- basic vine problems and anomalies
- cutting requirements and procedures
- cutting collection and storage requirements, including hydration

- specifications of vine cuttings
- factors that influence how a cutting should be graded and why
- common features of healthy vine cuttings
- common features of unhealthy vine cuttings
- safe preparation and handling of chemicals.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment where required</li> <li>• follow cutting equipment safety procedures</li> <li>• select cuttings and cut according to instructions</li> <li>• handle, bundle, and label cuttings according to instructions</li> <li>• recognise vine problems</li> <li>• dispose of waste according to instructions</li> <li>• maintain required records.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	<p>Workplace information can include:</p> <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Facilities</b>	<p>Facilities may include:</p> <ul style="list-style-type: none"> <li>• cold storage</li> <li>• fungicide treatment areas</li> <li>• storage bins or tanks</li> <li>• soakage tanks</li> </ul>
<b>Equipment</b>	<p>Equipment may include:</p> <ul style="list-style-type: none"> <li>• secateurs</li> <li>• personal protective clothing and/or equipment</li> <li>• bins</li> <li>• boxes</li> <li>• packing machine</li> <li>• counting machine</li> <li>• forklift</li> </ul>
<b>Materials</b>	<p>Materials may include:</p> <ul style="list-style-type: none"> <li>• string</li> <li>• labels</li> <li>• chemicals</li> <li>• sand</li> <li>• water</li> <li>• pallets</li> </ul>
<b>Waste</b>	<p>Waste may include:</p> <ul style="list-style-type: none"> <li>• off-cuts</li> <li>• dropped or rejected cuttings</li> <li>• packaging materials</li> <li>• chinisol</li> <li>• chemical containers</li> </ul>
<b>Work hazards</b>	<p>Hazards may include:</p> <ul style="list-style-type: none"> <li>• damaging fingers or eyes from use of tools and equipment</li> <li>• manual handling</li> <li>• lifting bundles</li> <li>• falling over in an untidy work area</li> <li>• using chemicals and disinfectants</li> </ul>
<b>Problems and anomalies</b>	<p>Problems and anomalies may include:</p> <ul style="list-style-type: none"> <li>• physical damage or signs of common pests and diseases, such as eutypa, phomopsis, nematodes, crown gall, diseased wood, dehydration, infection,</li> </ul>

<b>RANGE STATEMENT</b>	
	physical damage, damaged buds, immature wood <ul style="list-style-type: none"> <li>• different wood characteristics indicative of a different vine variety</li> </ul>
<b>Records</b>	Records will include: <ul style="list-style-type: none"> <li>• type of cuttings</li> <li>• quantity of cuttings</li> <li>• the count per bundle</li> <li>• number of bundles</li> <li>• treatments carried out</li> <li>• source identification code</li> </ul>
<b>Treatments</b>	Treatments may include: <ul style="list-style-type: none"> <li>• hydration</li> <li>• chemical treatment</li> <li>• trimming</li> <li>• grading</li> </ul>
<b>Grading</b>	Grading cuttings may include: <ul style="list-style-type: none"> <li>• sorting for length, diameter, appearance and number of viable buds</li> </ul>
<b>Label information</b>	Label information may include: <ul style="list-style-type: none"> <li>• class of the material</li> <li>• variety and clone</li> <li>• grade of cutting</li> <li>• the source identification code</li> </ul>
<b>Packing</b>	Packing may include: <ul style="list-style-type: none"> <li>• packing, venting and sealing cuttings into polythene film bags or packing bins</li> <li>• wrapping cuttings in wet hessian</li> <li>• packing in woven polypropylene wool packs</li> </ul>

## Unit Sector(s)

<b>Unit sector</b>	Wine operations
--------------------	-----------------

## FDFWGG3002A Coordinate canopy management activities

### Modification History

This unit supersedes and is equivalent to FDFWGGCCMA Coordinate canopy management activities.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to identify and implement manual and automated canopy management activities.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	Coordination skills required in applying this unit involve facilitating a team.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for canopy management activities	1.1 Canopy management requirements are identified 1.2 Vine vigour and growth are assessed according to workplace procedures 1.3 Appropriate manual and/or automated canopy management techniques are selected 1.4 Equipment is confirmed as available and ready for use 1.5 Operators are instructed as required
2. Implement canopy management requirements	2.1 Canopy management activities are carried out according to vine vigour, growth guidelines and manager's instructions 2.2 Canopy management activities are monitored to confirm that performance is maintained within specification 2.3 Out-of-specification performance is identified, rectified and/or reported 2.4 Problems and anomalies are identified, corrected and/or reported
3. Record information	3.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### Ability to:

- access workplace information to identify canopy management requirements
- select, fit and use appropriate personal protective clothing and/or equipment

- identify, rectify and/or report environmental non-compliance
- implement canopy management requirements. This may include consideration of:
  - equipment and materials required
  - personnel required
  - location
  - transport
  - timing
  - environmental operating conditions
  - other vineyard activities (e.g. spraying)
- select appropriate canopy management techniques. This will include consideration of:
  - vine vigour
  - trellis design
  - grape variety
  - quality requirements
  - climate, current and forecast weather conditions
  - vineyard terrain and aspect
  - phenological development
  - workplace procedures and manager's instructions
- monitor canopy management activities. This may include monitoring:
  - removal of unwanted growth
  - positioning of vine shoots
  - cutting procedure and quality
  - manipulation and securing of vine
  - vine damage
  - exposure of crop to sunlight
  - addition and positioning of foliage wires or shade cloth
  - correct disposal of waste
  - cleaning and storage of equipment
  - problems and anomalies
  - equipment performance and maintenance
  - team performance and progress
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective actions
- maintain canopy management records according to workplace standards
- facilitate and train teams and individuals
- conduct routine maintenance of equipment according to enterprise procedures
- apply information technology systems according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce.

**Required knowledge include:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- basic vine physiology as it applies to:
  - water intake
  - nutrient uptake
  - photosynthesis
  - respiration, transpiration
  - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality, including:
  - buds, nodes and tendrils
  - cambium, epidermis, phloem and xylem
  - leaf blade, bract and petiole
  - bunches, berries and flowers
- vine types, their characteristics and uses, including:
  - family, genus and species
  - *Vitis vinifera* and commercial varieties
  - native species and hybrids (e.g. *labrusca*)
  - rootstocks and scion stock
- industry processes for new variety development
- annual grapevine growth stages, including:
  - budburst
  - flowering
  - veraison
  - maturity
- key grape varieties and their distinguishing features. This may include factors, such as:
  - berry and bunch characteristics
  - frost and disease resistance
  - flavour and style
- effects of vine canopy reduction and grape exposure on fruit and wine quality
- features and benefits of a range of manual and/or automated canopy management styles and techniques and their respective affect on grape quality, cropping yield and wine production requirements. This should include techniques to manage:
  - light penetration and shading
  - air circulation and disease reduction
  - phenological stages of vine development

- crop quality and quantity
- factors influencing vine vigour, including:
  - grape variety
  - trellis design
  - vine spacing
  - fertilisers
  - irrigation
  - rootstock
- key factors affecting the canopy management technique adopted. These may include:
  - climate, forecast and current weather conditions
  - vineyard aspect and terrain
  - grape variety and vigour
  - grape quality and characteristics required
  - trellis design
  - harvesting techniques
  - disease risk and occurrence
  - stage of maturity and development
- recognition of correct vine growth stages at which to carry out canopy management activities
- significance and method of monitoring canopy management activities
- safe handling of equipment
- correct operating procedures for equipment
- purpose and application of personal protective clothing and/or equipment
- Occupational health and safety (OHS) hazards and controls
- identification of common problems and anomalies
- procedures and responsibility for reporting problems
- environmental issues and controls
- cleaning and storage requirements of equipment
- Reporting and recording requirements and procedures
- team facilitation and training techniques
- routine maintenance procedures for equipment where relevant
- information technology systems where relevant.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> <li>• use personal protective clothing and equipment</li> <li>• determine requirements for canopy management according to vine vigour, growth guidelines and manager's instructions</li> <li>• select canopy management techniques</li> <li>• coordinate team activities to implement determined canopy management techniques</li> <li>• address problems and anomalies</li> <li>• complete workplace records.</li> </ul>
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	<p>Workplace information can include:</p> <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Equipment</b>	<p>Equipment may include:</p> <ul style="list-style-type: none"> <li>• hydraulic or pneumatic pruners</li> <li>• a range of secateurs</li> <li>• knives</li> <li>• tractor</li> <li>• circular and hand saws</li> <li>• cutter bars</li> <li>• blades</li> <li>• drum pruners</li> <li>• mechanical leaf pluckers and wire lifters</li> <li>• bare hands</li> <li>• maintenance tools and team support equipment (e.g. toilet facilities, first aid box and spare equipment)</li> </ul>
<b>Unwanted growth</b>	Unwanted growth may include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• suckers</li> <li>• water shoots</li> <li>• congested shoots</li> <li>• excess bunches</li> </ul>
<b>Canopy management systems</b>	<p>Canopy management systems will vary with workplace requirements, but may include:</p> <ul style="list-style-type: none"> <li>• vertically shoot positioned (VSP)</li> <li>• wide T</li> <li>• Scott Henry</li> <li>• single wire</li> </ul>
<b>Canopy management activities</b>	<p>Canopy management activities may include:</p> <ul style="list-style-type: none"> <li>• leaf removal</li> <li>• shoot removal</li> <li>• applying or removing shade cloth</li> <li>• lifting or lowering foliage wires</li> <li>• positioning shoots</li> <li>• trimming shoots</li> <li>• bunch thinning</li> </ul>
<b>Problems and anomalies</b>	<p>Problems and anomalies include:</p> <ul style="list-style-type: none"> <li>• signs of common pests and diseases, such as mildew, eutypa, phomopsis, boring insects, dying arm, crown gall, and diseased wood or berries</li> <li>• signs of trellis and/or irrigation disrepair or problems</li> <li>• machinery breakdown</li> <li>• team performance</li> </ul>
<b>Information systems</b>	<p>Information systems may be:</p> <ul style="list-style-type: none"> <li>• screen or print based and may include information technology systems, such as recording and reporting, weather forecasting, rainfall maps and infrared canopy monitoring</li> </ul>

## Unit Sector(s)

<b>Unit sector</b>	Wine operations
--------------------	-----------------

## FDFWGG3004A Coordinate nursery activities

### Modification History

This unit supersedes and is equivalent to FDFWGGCNAB Coordinate nursery activities.

September 2012: clarified pre-requisite information.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to coordinate nursery personnel in a range of day-to-day activities.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit includes allocation and monitoring of individual performance targets and requirements.
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Pre requisite units</b>		
	FDFWGG2002A	Carry out potting operations
	FDFWGG2006A	Obtain and process rootlings
	FDFWGG3009A	Monitor and maintain nursery plants* <i>FDFWGG2007A Tend containerised nursery plants</i> <i>FDFWGG2012A Identify and treat nursery plant disorders</i>

## Employability Skills Information

Employability skills	This unit contains employability skills.
----------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. Prepare to coordinate nursery activities	1.1 Activity goals and performance requirements are identified and clarified 1.2 Tasks required to achieve performance requirements are identified 1.3 Personnel required are confirmed as available and having the appropriate competence 1.4 Equipment is confirmed as available and ready for use 1.5 Materials are confirmed as available and ready to meet requirements
---	--

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Coordinate nursery activities	<p>2.1 Individual work tasks and roles are allocated to ensure activity goals and performance requirements are met</p> <p>2.2 Work targets and timelines are negotiated to achieve activity goals and performance requirements</p> <p>2.3 Activities are monitored to ensure compliance with workplace procedures on occupational health and safety (OHS), environmental and quality issues</p> <p>2.4 Activities are monitored against timelines and performance requirements</p> <p>2.5 Potential barriers to achieving targets and performance requirements are identified, rectified and/or reported</p>
3. Complete coordination of nursery activities	<p>3.1 Activities are monitored to ensure compliance with relevant workplace procedures on completion, shutdown and waste disposal</p> <p>3.2 Work is conducted in accordance with workplace environmental guidelines</p> <p>3.3 Personnel are debriefed as appropriate</p>
4. Record information	<p>4.1 Workplace information is recorded in the appropriate format</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information to identify nursery activity requirements
- confirm supply of necessary resources
- select, fit and use appropriate personal protective clothing and/or equipment
- identify, rectify and/or report environmental non-compliance
- liaise with other work areas and customers
- plan nursery activities. This may include considering:
  - personnel requirements
  - equipment and materials required
  - location

- transport
- timing
- environmental conditions
- other nursery activities
- quality and quantity requirements
- instruct individuals and/or a group
- provide feedback to individuals and/or a group
- monitor nursery activities. This may include monitoring:
  - compliance with OHS, environmental and quality procedures
  - individual and/or team performance
  - achievement of targets, timelines and performance requirements
  - own and other team members' learning needs
  - compliance with completion, shutdown and waste disposal procedures
- resolve conflicts
- take corrective action in response to out-of-specification results or non-compliance
- recognise, correct and/or report problems and anomalies
- maintain workplace records
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

---

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

***Knowledge of:***

- workplace planning processes
- workplace activity scheduling processes
- OHS hazards and controls
- environmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibility for reporting problems and anomalies
- communication principles and strategies
- procedures for monitoring and reporting on individual and team performance
- competency identification and training arrangements
- conflict resolution, negotiation and problem-solving strategies.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for field nursery planting	1.1 Field nursery bed is prepared according to instructions 1.2 Field nursery maintenance infrastructure is checked to confirm readiness for use as required
2. Maintain field nursery vines	2.1 Appropriate vine protection methods are applied 2.2 Field nursery activities are carried out as instructed 2.3 Young vine growth and health are monitored according to instructions 2.4 Problems and anomalies are recognised, rectified and/or reported
3. Process field nursery rootlings for removal from nursery	3.1 Vine rootlings are undercut and lifted according to instructions 3.2 Rootlings are prepared for transport according to instructions 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### Ability to:

- access workplace information to identify nursery requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- prepare field nursery bed for planting. This may include:
  - herbicide treatment
  - soil cultivations
  - fertiliser additions

- planning vine planting (e.g. number of vines, area size, varietal lots, row spacing for mechanical operations and row orientation)
- application of weed matting
- positioning irrigation pipes and points
- checking readiness of maintenance infrastructure
- select and apply appropriate vine protection methods. This should include consideration of:
  - climate, weather and prevailing wind
  - vineyard pests (e.g. rabbits)
  - aspect, orientation of vineyard
  - irrigation or fertilisation schedule
  - frost incidence
- maintain and care for young vines
- monitor the health and growth of young vines. This may involve monitoring:
  - soil moisture
  - signs of disease and pests
  - water stress
  - signs of nutrient deficiency
  - growth rate
- take corrective action in response to out-of-specification growth or appearance, or non-compliance
- report and/or record corrective action as required
- identify, rectify and/or report environmental non-compliance
- use appropriate cleaning techniques
- maintain work area to meet housekeeping standards
- lift rootlings from the beds whilst ensuring minimal plant damage. This may include:
  - roots undercut adequately
  - gentle handling
- prepare rootlings for transport. This may include:
  - trimming
  - counting and bundling
  - labelling
  - grading
  - packing
- plant vines according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose, requirements and procedures for nursery bed preparation
- protection and maintenance requirements of young vines
- requirements of growing vines
- common causes and signs of young vine growth disorders and corrective action required
- Occupational health and safety (OHS) hazards and controls
- correct procedures and requirements for lifting vine rootlings from the nursery bed
- preparation requirements and procedures for transporting rootlings
- storage requirements of rootlings
- procedures and responsibility for reporting problems
- environmental issues and controls
- reporting and recording requirements and procedures
- planting procedures where relevant
- sampling and testing procedures where relevant
- routine maintenance procedures for equipment where relevant.

**Evidence Guide**

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective equipment, MSDS and follow other specified OHS procedures</li> <li>• follow vine protection procedures</li> <li>• prepare for, implement and monitor nursery activities</li> <li>• prepare vine rootlings for transport</li> <li>• monitor the health of rootlings.</li> </ul>

<b>EVIDENCE GUIDE</b>	
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements

<b>RANGE STATEMENT</b>	
<b>Workplace information</b>	Workplace information can include: <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Bed preparation</b>	Bed preparation may include, but is not limited to: <ul style="list-style-type: none"> <li>• cultivating</li> <li>• fertilising</li> <li>• planning layout</li> </ul>
<b>Maintenance infrastructure</b>	Maintenance infrastructure may include: <ul style="list-style-type: none"> <li>• irrigation or fertilisation equipment and components</li> <li>• windbreaks</li> </ul>
<b>Vine protection methods</b>	Vine protection methods include: <ul style="list-style-type: none"> <li>• waxing</li> <li>• windbreaks</li> <li>• row orientation</li> <li>• pest control</li> </ul>
<b>Maintenance activities</b>	Maintenance activities include: <ul style="list-style-type: none"> <li>• irrigation</li> <li>• fertilising</li> <li>• mulching</li> <li>• weed and pest control</li> </ul>
<b>Problems and anomalies</b>	Problems and anomalies include: <ul style="list-style-type: none"> <li>• signs of pests and diseases</li> <li>• equipment malfunction</li> <li>• rogue vines</li> </ul>
<b>Information systems</b>	Information systems may be: <ul style="list-style-type: none"> <li>• screen or print based</li> </ul>
<b>Work hazards</b>	Work may involve exposure to:

**RANGE STATEMENT**

- chemical, dangerous or hazardous substances

Wine operations

## FDFWGG3006A Coordinate hand pruning activities

### Modification History

This unit supersedes and is equivalent to FDFWGGHPB Coordinate hand pruning activities.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. This unit covers the skills and knowledge required to identify and implement hand pruning requirements, including supervising a team of casual hand pruners.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	Coordination skills required in the application of this unit will involve facilitating others.
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Pre requisite units</b>		
	FDFWGG2003A	Hand prune vines

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for hand pruning activities	1.1 Pruning requirements are identified 1.2 Appropriate pruning techniques are selected 1.3 Pruning equipment is confirmed as available and ready for use 1.4 Pruning equipment is set up to meet requirements 1.5 Operators are instructed as required
2. Implement hand pruning requirements	2.1 Pruning activities are monitored to confirm performance is maintained within specification 2.2 Out-of-specification performance is identified, rectified and/or reported 2.3 Vines are pruned according to crop levels, vine vigour and workplace procedures 2.4 Anomalies and problems are identified, corrected and/or reported 2.5 Work is conducted in accordance with workplace environmental guidelines
3. Record information	3.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### Ability to:

- access workplace information to identify pruning requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- train and/or facilitate a team of hand pruners
- implement hand pruning requirements. This may include consideration of:
  - equipment and materials required
  - personnel required
  - location
  - transport
  - timing
  - environmental conditions
  - other vineyard activities (e.g. spraying)
- select appropriate pruning techniques. This will include consideration of:
  - grape variety
  - vine vigour
  - quality and yield requirements
  - climate
  - workplace procedures and manager's instructions
- monitor pruning activities. This will include monitoring:
  - selection of best possible spurs and canes
  - positioning of spurs and canes
  - clean removal of sucker shoots
  - correct quantity of spurs, rods, canes and buds left
  - cuts made correctly and cleanly
  - recognition and removal of unwanted growth
  - rolling and securing extension canes onto trellis wire as required
  - correct disposal of pruned material
  - equipment performance
  - cleaning and storage of equipment
  - team performance and progress
- identify problems and anomalies
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain work area to meet housekeeping standards
- maintain pruning records according to workplace standards
- conduct routine maintenance of equipment according to enterprise procedures
- apply information technology systems according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- basic vine physiology, as it applies to:
  - water intake
  - nutrient uptake
  - photosynthesis
  - respiration, transpiration
  - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality, including:
  - buds, nodes and tendrils
  - cambium, epidermis, phloem and xylem
  - leaf blade, bract and petiole
  - bunch, berries and flowers
- vine types, their characteristics and uses, including:
  - family, genus and species
  - *Vitis Vinifera* and commercial varieties
  - native species and hybrids (e.g. *labrusca*)
  - rootstocks and scion stock
- industry processes for new variety development
- annual vine growth stages, including:
  - budburst
  - flowering
  - veraison
  - maturity
- key grape varieties and their distinguishing features. This may include factors, such as:
  - berry and bunch characteristics
  - frost and disease resistance
  - flavour and style
- different types of pruning and their features, benefits and effects on grape quality
- relationship between bud numbers and cropping levels and the effect on wine quality
- effects of different pruning levels on wine quality
- concept of pruning to vine vigour
- safe handling of pruning equipment
- correct operating procedures for pruning equipment
- Occupational health and safety (OHS) hazards and controls
- common problems and anomalies associated with hand pruning activities

- procedures and responsibility for reporting problems
- cleaning and storage requirements of pruning equipment
- recording requirements and procedures
- team facilitation and training techniques
- environmental issues and controls
- routine maintenance procedures for equipment where relevant
- information technology systems where relevant.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• ensure use of personal protective clothing and equipment</li> <li>• determine requirements for hand pruning according to crop levels, vine vigour and workplace procedures</li> <li>• select hand pruning techniques</li> <li>• coordinate activities to implement determined hand pruning techniques</li> <li>• address problems and anomalies</li> <li>• complete workplace records.</li> </ul>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information</li> </ul>

<b>EVIDENCE GUIDE</b>	
	as required <ul style="list-style-type: none"> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	Workplace information can include: <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Equipment</b>	<p>Equipment may include:</p> <ul style="list-style-type: none"> <li>• pneumatic secateurs</li> <li>• petrol air compressors</li> <li>• hydraulic snips</li> <li>• electronic secateurs</li> <li>• knives</li> <li>• saws</li> <li>• hand secateurs</li> <li>• maintenance tools</li> <li>• team support equipment (e.g. toilet facilities, first aid box, spare pruning equipment)</li> </ul>
<b>Pruning methods</b>	<p>Pruning methods may include:</p> <ul style="list-style-type: none"> <li>• spur pruning</li> <li>• cane pruning</li> <li>• rod and spur pruning</li> <li>• hand clean up after machine pruning</li> </ul>
<b>Information systems</b>	<p>Information systems may be:</p> <ul style="list-style-type: none"> <li>• screen or print based and may include information technology systems, such as reporting, monitoring and recording, weather forecasting and rainfall mapping systems</li> </ul>
<b>Problems and anomalies</b>	<p>Problems and anomalies may include:</p> <ul style="list-style-type: none"> <li>• dead vines</li> <li>• split cordon</li> <li>• extending cordon</li> <li>• poor bud position</li> <li>• signs of common pests and diseases, such as mildew, eutypa, phomopsis, boring insects, dying arm, crown gall or diseased wood</li> </ul>

## FDFWGG3009A Monitor and maintain nursery plants

### Modification History

This unit supersedes and is equivalent to FDFWGGMNPB Monitor and maintain nursery plants.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to monitor and maintain containerised nursery plants.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit includes maintaining the plant environment to ensure it supports optimum growth and health and meets stock requirements.
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Pre requisite units</b>		
	FDFWGG2007A	Tend containerised plants
	FDFWGG2012A	Identify and treat nursery plant disorders

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. Monitor environmental parameters	1.1 Environmental parameters are monitored against the production plan and according to workplace procedures 1.2 Environmental parameters are altered to meet the needs of the plants and according to workplace procedures
2. Determine daily water requirements	2.1 Plant water needs are determined according to workplace procedures 2.2 Water is applied according to the needs of the plants and workplace procedures 2.3 Water requirements are monitored according to workplace procedures
3. Implement treatments to promote plant growth	3.1 Potting media is tested to ensure specifications are met 3.2 Overall health of plants is monitored according to workplace procedures 3.3 Plant treatments are implemented according to production plans and workplace procedures 3.4 Problems and anomalies are identified, rectified and/or reported according to workplace procedures
4. Monitor the dispatch of stock	4.15 Availability of stock and timing of dispatch is confirmed with customers according to workplace procedures 4.2 Plants are prepared for dispatch in line with customer requirements 4.3 Stock is checked to ensure it meets quality specifications 4.4 Orders are checked against stock being dispatched to ensure

ELEMENT	PERFORMANCE CRITERIA
	compliance
5. Record information	5. Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

#### Ability to:

- access workplace information required to monitor and maintain nursery plants
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- identify potential and existing hazards in the work area
- identify, rectify and/or report environmental non-compliance
- monitor work areas to ensure they meet workplace housekeeping standards
- monitor work area to ensure they meet workplace hygiene standards. This may include:
  - removing weeds
  - removing dead or diseased plant materials
  - washing work area on transfer of plants
  - disinfecting tools, equipment and work areas
  - using foot baths on entry to different work areas
- identify, rectify and/or report problems and anomalies
- implement safe work procedures to minimise hazards
- maintain workplace records
- maintain irrigation systems. This may include:
  - fixing blockages
  - servicing irrigation system components
  - identifying and reporting faults in the irrigation system
  - fixing leaking heads and hoses
- monitor water requirements. This may include:
  - using soil moisture devices
  - checking plants for physical signs of water stress or waterlogging
- test potting media. This may include identifying:
  - pH
  - drainage

- aeration
- salinity
- nitrate levels
- water repellence
- monitor health of the vines
- apply treatments to vines. These may include:
  - fungicides
  - fertilisers
  - insecticides
  - hormones
  - pruning
  - hardening off
  - irrigation
- monitor and/or prepare stock for dispatch. This may include:
  - labelling containers
  - checking orders against stock prepared
  - hydrating stock
- prepare, mix and use chemicals as required
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

---

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- basic vine physiology, as it applies to:
  - transpiration
  - water intake
  - nutrient uptake
  - photosynthesis
  - respiration
  - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality, including:
  - buds, nodes and tendrils
  - cambium, epidermis, phloem and xylem
  - leaf blade, bract and petiole
  - bunch, berries and flowers

- industry processes for new variety development
- key grape varieties and their distinguishing features. This may include factors, such as:
  - berry and bunch characteristics
  - frost and disease resistance
  - flavour and style
- annual grapevine growth stages, including:
  - budburst
  - flowering
  - veraison
  - maturity
- methods of calculating daily water needs
- methods for monitoring water use
- relationship between water needs of nursery plants and environmental parameters
- characteristics of various types of potting media
- tests to determine quality of potting media
- principles of nursery hygiene
- optimum growing conditions for plants in a nursery
- quality parameters for a range of nursery plants
- symptoms of unhealthy plants
- treatments required by plants at different growth stages and environmental parameters
- packing, dispatch and handling techniques of nursery plants
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibility for reporting problems and anomalies

## FDFWGG3010A Implement a soil management program

### Modification History

This unit supersedes but is not equivalent to FDFWGG3010B Implement a soil management program.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. This unit covers the skills and knowledge required to monitor soil requirements and implement and evaluate a soil management program.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	The application of this unit involves consultation with the manager and may require supervision of others in the implementation process.
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		
	FDFWGG2018A	Operate vineyard equipment
	FDFWGG3001A	Apply chemicals and biological agents

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Monitor vineyard soil management requirements	1.1 Vineyard soil is monitored according to workplace procedures 1.2 Results are interpreted correctly 1.3 Appropriate soil management activities are identified and recommended
2. Implement soil management program	2.1 Resources are coordinated and personnel briefed to deliver requirements 2.2 Agreed soil management program is implemented
3. Evaluate effectiveness of soil management activities	3.1 Vineyard is monitored to evaluate effectiveness of activities 3.2 Surrounding areas are monitored to evaluate environmental impact of soil management activities
4. Record information	4.1 Workplace information is recorded in the appropriate format

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### Ability to:

- access workplace information to identify soil management requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas
- consult with appropriate senior personnel
- apply sampling techniques
- conduct routine tests
- monitor the vineyard and interpret the results to identify vineyard soil management requirements. This may include monitoring:
  - soil moisture content
  - watertable level
  - weed population
  - signs of vine nutrient deficiencies
  - climatic conditions
  - cover crop practices
  - soil analyses (e.g. pH and salinity)
  - evidence of hard pans
  - soil texture
  - vine root distribution
  - nutrient levels in plant and soil
  - irrigation water quality
  - climatic conditions
  - erosion risk
  - soil management history
  - growth of mid-row sward
- calculate application rates for soil addition requirements (e.g. fertilisers and ameliorants)
- present and justify recommendations to senior personnel
- implement the soil management program. This will include consideration of:
  - resources, including operators with appropriate skills
  - equipment availability and capability
  - materials and chemicals
  - maintenance programs and supplies
  - specific needs of individual blocks
  - environmental conditions
  - other vineyard activities
- instruct operators as required
- monitor soil management activities. This will include monitoring:
  - operator performance
  - operating conditions
  - operating results
  - material supplies

- equipment performance
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- maintain work area to meet housekeeping standards
- report and/or record problems according to instructions
- plan and organise
- supervise operators according to enterprise procedures
- apply information technology systems according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

### **Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### **Knowledge of:**

- ideal soil environment for vines plus specific requirements of grapes grown
- soil management techniques and their affect on soil, vine growth, cropping levels and wine quality
- visual signs of vine nutrient deficiencies
- sampling techniques and procedures
- routine testing techniques and procedures
- interpretation of routine tests
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems
- resource requirements and availability
- reporting and recording requirements and procedures
- consultation requirements and procedures
- supervision techniques where relevant
- information technology systems where relevant
- resources required for assessment where relevant

## **Evidence Guide**

### **RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work

<b>RANGE STATEMENT</b>	
environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	Workplace information may include: <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• soil management programs</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal directions from manager or supervisor</li> </ul>
<b>Monitoring activities</b>	Monitoring activities may include: <ul style="list-style-type: none"> <li>• drainage</li> <li>• soil moisture, pH and texture</li> <li>• watertable levels</li> <li>• rainfall</li> <li>• vine and soil nutrient deficiencies</li> <li>• weeds</li> <li>• air temperatures</li> </ul>
<b>Area management</b>	Area managed may not be limited to the area under vines. Adjacent or ecologically linked landscapes may require management or consideration, and may include: <ul style="list-style-type: none"> <li>• woodlots</li> <li>• seepage areas</li> <li>• waterways</li> <li>• landcare sites</li> <li>• revegetation sites</li> <li>• windbreaks</li> <li>• neighbouring vineyards and other primary production</li> </ul>
<b>Soil management activities</b>	Soil management activities may include, but are not limited to: <ul style="list-style-type: none"> <li>• the addition of ameliorants and fertilisers</li> </ul>

<b>RANGE STATEMENT</b>

## Unit Sector(s)

<b>Unit sector</b>	Wine operations
--------------------	-----------------

## FDFWGG3011A Perform shed nursery activities

### Modification History

This unit supersedes and is equivalent to FDFWGGSNAB Perform shed nursery activities.

April 2012: Minor typographical corrections.

### Unit Descriptor

<b>Unit descriptor</b>	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to treat and prepare vine cuttings and freshly dug rootlings for sale or planting in the vineyard.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit includes preparation for plantings, treating and callusing cuttings, care of rootlings and preparation for transfer and transportation.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare cuttings for callusing	<p>1.1 Cuttings are counted, bundled and labelled according to instructions as required</p> <p>1.2 Cuttings are chemically treated according to instructions</p> <p>1.3 Cuttings are stored according to instructions</p>
2. Prepare and maintain callusing environment	<p>2.1 Sand bed or callusing room is prepared according to workplace procedures</p> <p>2.2 Cuttings are placed into callusing environment according to instructions</p> <p>2.3 Optimum callusing environment is maintained</p>
3. Prepare rootlings for customer or planting	<p>3.1 Rootlings are trimmed, graded, packed and stored according to instructions</p> <p>3.2 Waste is collected and disposed of according to workplace procedures</p> <p>3.3 Problems and anomalies are recognised, rectified and/or reported</p> <p>3.4 Work is conducted in accordance with workplace environmental guidelines</p>
4. Record information	<p>4.1 Workplace information is recorded in the appropriate format</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### Ability to:

- access workplace information to identify nursery requirements

- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- count, bundle and label cuttings as required
- treat cuttings as required prior to callusing. This may include:
  - fungicide treatment
  - re-hydration
  - scoring
  - root promoter treatment
  - cutting just below basal bud
  - assimilation after cool storage
- store cuttings. This may include maintaining and monitoring cold storage facilities
- prepare sand bed or callusing room. This may include:
  - packing sand or vermiculite
  - lining boxes
  - ensuring heaters and ventilators are working correctly to required temperature
- plant or place cuttings in callusing environment. This may include:
  - feeling into ground or sand
  - packing into boxes with vermiculite
  - watering in
  - correct number of cuttings per box
  - spacing (e.g. not too tight)
  - correct way up (e.g. basal end at bottom)
  - arranging according to variety, clone and source
  - labelling and mapping of beds
  - adding hormone mixes
- maintain optimum callusing environment. This will include consideration of:
  - temperature
  - relative humidity
  - moisture levels of growing medium
  - weed and pest prevention
- trim rootlings (top growth and roots) ready for planting
- grade rootlings according to workplace or customer requirements and standards
- pack rootlings. This should include consideration of:
  - customer requirements
  - maintenance of rootling health
  - minimisation of vine damage
  - mode of transport
  - destination time
  - storage time and method
  - prevention of dehydration

- recognise problems and anomalies with vines, equipment and materials
- take corrective action in response to out-of-specification results, activity or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- collect, sort, grade, treat and/or dispose of waste as required
- handle cuttings or rootlings to minimise damage
- select and operate equipment as required
- select and use materials as required
- maintain work area to meet housekeeping standards
- clean equipment as required
- prepare and mix chemicals as required
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

---

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- common features of healthy vine cuttings or rootlings. This may include:
  - thickness of original cane
  - no evidence of pests and diseases
  - number, strength and distribution of new roots
  - number, maturity and distribution of shoots
  - visually complete and robust graft union
- common features of unhealthy vine cuttings or rootlings. This may include:
  - galls on stem (e.g. crown gall)
  - galls on roots (e.g. nematodes)
  - no shoots or roots
  - damaged or destroyed buds
  - excessive disease staining or spots on canes
  - immature wood
  - shoots on incorrect nodes
  - faulty or broken graft unions
  - too few or unevenly distributed root development
- pre-callusing treatment requirements
- purpose and benefit of treatments
- storage requirements of cuttings prior to callusing
- preparation requirements of callusing environment

- callusing options (e.g. features, pros and cons)
- optimum callusing environment and its effect on the vine cutting
- common problems that occur during callusing and how they should be resolved (e.g. uneven callusing or evidence of dehydrated cuttings on arrival)
- preparation requirements for rootlings and procedures for sales or transfer to vineyard
- package or storage requirements and procedures for rootlings ready for sale or transfer
- factors that influence how a cutting should be graded and why
- reasons for specific requirements, for example:
  - rootling preparation
  - packing preparation
  - packaging and storage requirements
- waste disposal requirements and procedures
- reporting and recording requirements and procedures
- safe handling of chemicals
- equipment operation requirements and procedures
- Occupational health and safety (OHS) hazards and controls
- procedures and responsibilities for reporting problems
- environmental issues and controls
- cleaning requirements and procedures for work area and equipment. This should include additional considerations when cleaning between batches and varieties
- safe preparation and mixing of chemicals
- routine maintenance procedures for equipment where relevant.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• use personal protective equipment, MSDS and follow other specified OHS procedures</li> <li>• conduct cutting and callusing activities</li> <li>• monitor the health of and tend rootlings</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• prepare for, implement and monitor nursery activities</li> <li>• prepare vine rootlings for transport</li> <li>• maintain nursery environment to optimise plant health</li> <li>• complete documentation.</li> </ul>
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> <li>• personal protective clothing and equipment as required</li> <li>• work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements</li> <li>• instructions, information, specifications and schedules as required</li> <li>• equipment, services and corresponding information as required</li> <li>• products and materials as required</li> <li>• internal and external customers and suppliers as required</li> <li>• cleaning procedures, materials and equipment as required</li> <li>• documentation and recording requirements and procedures.</li> </ul>
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with</p>

<b>RANGE STATEMENT</b>	
training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Policies and procedures</b>	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
<b>Workplace information</b>	Workplace information can include: <ul style="list-style-type: none"> <li>• Standard Operating Procedures (SOPs)</li> <li>• specifications</li> <li>• production schedules</li> <li>• instructions</li> <li>• routine maintenance schedules</li> <li>• work notes</li> <li>• Material Safety Data Sheets (MSDS)</li> <li>• manufacturer instructions</li> <li>• verbal direction from manager, supervisor or senior operator</li> </ul>
<b>Rootlings</b>	Rootlings may include: <ul style="list-style-type: none"> <li>• those developed from cuttings in a sand bed or callusing room</li> <li>• those freshly dug from a field nursery</li> </ul>
<b>Equipment</b>	Equipment may include: <ul style="list-style-type: none"> <li>• secateurs</li> <li>• personal protective clothing and/or equipment</li> <li>• bins</li> <li>• boxes</li> <li>• spades</li> <li>• trowels</li> <li>• watering or irrigating equipment</li> <li>• heating equipment</li> <li>• packing machine</li> <li>• counting machine</li> </ul>
<b>Materials</b>	Materials may include: <ul style="list-style-type: none"> <li>• string</li> <li>• labels</li> <li>• chemicals</li> <li>• sand</li> <li>• wax</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Problems and anomalies</b>	Problems and anomalies may include: <ul style="list-style-type: none"> <li>• evidence of nematodes, crown gall, dehydration, infection, physical damage and graft union failure</li> </ul>
<b>Facilities</b>	Facilities may include: <ul style="list-style-type: none"> <li>• cold storage</li> <li>• callusing room</li> <li>• hot beds</li> <li>• sand storage bins</li> <li>• water</li> <li>• fungicide treatment areas</li> <li>• storage bins or tanks</li> <li>• soakage tanks</li> <li>• glasshouses</li> </ul>
<b>Work hazards</b>	Work may involve exposure to: <ul style="list-style-type: none"> <li>• chemical, dangerous or hazardous substances</li> </ul>

### Unit Sector(s)

# FNSFMK512A Apply knowledge of emissions markets

## Modification History

Version	Comments
Release 1	This version first released with <i>FNS10 Financial Services Training Package v4.0</i>

## Unit Descriptor

This unit describes the background knowledge and understanding required and performance outcomes expected of a market participant in the emissions markets.

This unit is intended, to address the specialist knowledge requirements of those intending to operate in the emissions marketplace. This embodies that mandatory knowledge outlined in ASIC RG146 Appendix A2.11.

**Note:** this competency **does not** address the skills or the generic knowledge requirements in ASIC RG 146

## Application of the Unit

This unit applies to individuals who are engaged in the financial services industry, including advisers who provide advice on defined financial products in the emissions markets or other emissions market participants

## Licensing/Regulatory Information

This unit may apply to job roles subject to licensing, legislative, regulatory or certification requirements; Commonwealth, State or Territory requirements should be confirmed with the relevant body.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

<p><i>Elements describe the essential outcomes of a unit of competency.</i></p>	<p><i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i></p>
---	--

### Elements and Performance Criteria

<p>1. Comply with the regulatory framework unique to emissions markets</p>	<p>1.1 Identify the domestic and international regulatory framework within which emissions reduction schemes are placed</p> <p>1.2 Identify the key legislation, regulation and industry codes of practice relevant to operating within Australian <b><i>emissions markets</i></b></p> <p>1.3 Comply with relevant legal and regulatory principles when operating in emissions markets</p> <p>1.4 Discuss regulatory risk for both voluntary and regulated emissions markets and determine possible impacts of pending regulatory or legislative change</p>
<p>2. Evaluate the scope and impact of the emissions market</p>	<p>2.1 Identify regulated and voluntary carbon markets and outline how they operate</p> <p>2.2 Distinguish the respective supply and demand drivers for voluntary and regulated markets</p> <p>2.3 Describe price drivers for emissions products</p> <p>2.4 Differentiate participants in carbon markets and the motivations for their participation</p> <p>2.5 Distinguish the functions of the primary and secondary emissions markets</p> <p>2.6 Discuss auction types and processes</p> <p>2.7 Describe the functions, requirements and rules for registries</p>
<p>3. Identify the types of emissions products, their characteristics and</p>	<p>3.1 Compare the different types of <b><i>emissions products</i></b> available of emissions instruments traded in the compliance and voluntary markets</p>

liabilities	<p>3.2 Identify the key features of compliance market products</p> <p>3.3 Describe the risks inherent within each product and their potential impact in a given context.</p> <p>3.4 Describe <b>transactional processes</b> for each product, including acquiring, transferring and surrendering</p> <p>3.5 Describe the tax treatment of emissions products, including deductibility of costs where relevant</p>
4. Apply knowledge of emissions products	<p>4.1 Determine relevant <b>market information</b> influencing the market</p> <p>4.2 Analyse relevant information when selecting products for an emissions <b>markets transaction</b></p> <p>4.3 Devise strategies for using emissions market products</p> <p>4.4 Seek advice and guidance of specialist expertise where required</p> <p>4.5 Apply knowledge of financial market transactional processes when operating in emissions markets</p> <p>4.6 Complete relevant documentation and complete any additional organisational processes</p>
5. Maintain emissions market knowledge	<p>5.1 Relevant emissions trading markets sources are reviewed regularly and any changes are applied in daily work</p> <p>5.2 Maintain professional competence in market knowledge in accordance with codes of conduct and/or organisational requirements</p> <p>5.2 Processes for maintaining up-to-date knowledge about relevant aspects of emissions trading markets are implemented</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

communication skills to:

- liaise with others, share information, seek advice and guidance
- learning skills to maintain knowledge of changes to regulation, markets and emissions
- research and analysis skills to:
  - identify economic influences, operations of emissions markets and characteristics of

- financial products traded in the regulated and voluntary markets
- access and interpret legislation and regulation impacting on emissions markets and market operations
  - identify and interpret relevant information
  - analyse information and data relative to carbon markets
  - maintain currency of products and services knowledge
  - self-management skills to:
    - monitor and adapt to changes in compliance issues

### Required knowledge

- Understanding of the types of products and their characteristics:
  - analysis of the types of emissions units, and their characteristics (encompassing carbon units, Australian carbon credit units, and eligible international emissions units)
  - characteristics of emissions units including their status as personal property, and how they are typically derived from inception to the point of acquiring status as a financial product
  - risks associated with each type of emission unit, including rating, restrictions on their use, transfer, and bankability for future use
  - processes for acquiring, transferring and surrendering emissions units, including compliance with the requirements of the Australian National Registry of Emissions Units
- Knowledge of the operation of regulated and voluntary carbon markets
  - geopolitical context of carbon markets including the influence of political and economic factors and corporate social responsibility
  - main participants in carbon markets, and their key objectives and participation behaviours as factors influencing market activity
  - emissions unit supply and demand factors and regulated price factors influencing market activity and prices
  - issue of carbon units via auction, and auction types
  - types of transactions in carbon markets, including transactions relating to the carbon pricing mechanism and in voluntary markets, and the function of financial markets facilitating such trading (including internationally)
  - potential trading strategies and their implementation in carbon markets (e.g. hedging and investment strategies)
  - risks associated with carbon markets, including liquidity, pricing, credit, operational, and regulatory risks
  - carbon market transaction documentation, including the types used for different types of counterparties and transactions, their key terms and conditions and advantages and disadvantages
- Understanding of the regulated emissions legal environment—disclosure and compliance
  - domestic regulatory framework for the carbon pricing mechanism, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units
  - domestic regulatory framework for the Carbon Farming Initiative, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units

- international regulatory framework for carbon trading, including the Clean Development Mechanism
- relevant legal principles (e.g. Corporations Act, ASIC Act, Privacy Amendment (Private Sector) Act, Australian National Registry of Emissions Units Act 2011, National Greenhouse and Energy Reporting Act 2007, Carbon Credits (Carbon Farming Initiative) Act 2011, Clean Energy Act 2011)
- the relationship between ethical and regulatory requirements (e.g. good faith, utmost good faith, full disclosure of remuneration/fees and any other conflicts of interest that may influence the adviser's recommendation), and the application of these requirements in professional practice
- relevant industry standards and codes of conduct
- regulators' guidelines, including our requirements in this policy
- dispute resolution procedures (external and internal)
- Understanding of the taxation obligations in the emissions market
  - taxation treatment of emissions units and taxation issues relating to emissions units
  - deductibility of costs associated with emissions units

## Evidence Guide

Not applicable.

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Emissions markets include:</i></b>	<ul style="list-style-type: none"> <li>• Domestic and international carbon markets           <ul style="list-style-type: none"> <li>• Voluntary markets</li> <li>• Compliance markets</li> </ul> </li> </ul>
<b><i>Emissions products include:</i></b>	<ul style="list-style-type: none"> <li>• carbon units (issued by the Clean Energy Regulator under the Clean Energy Act) (ACUs);</li> <li>• Australian carbon credit units (issued by the Clean Energy Regulatory under the Carbon Farming Initiative) (ACCU); and</li> <li>• eligible international emissions units (EIEUs).</li> <li>• voluntary environmental schemes</li> </ul>
<b><i>Participants include:</i></b>	<ul style="list-style-type: none"> <li>• Liable entities</li> </ul>

	<ul style="list-style-type: none"> <li>• Financial intermediaries</li> <li>• Carbon farming project proponents</li> <li>• Speculators</li> </ul>
<i>Transactional processes</i> include	<ul style="list-style-type: none"> <li>• Acquiring emissions units</li> <li>• Transferring emissions units</li> <li>• Auction processes</li> <li>• Registry processes</li> <li>• Surrendering emissions units</li> <li>• Transaction documentation <ul style="list-style-type: none"> <li>• Regulatory</li> <li>• Organisation</li> <li>• Exchange-required</li> </ul> </li> </ul>
<i>Market information</i> includes:	<ul style="list-style-type: none"> <li>• Economic statistics and data</li> <li>• Government policy changes</li> <li>• Trading data, including pricing, liquidity and limits (market and credit)</li> <li>• Market standards and conventions affecting transaction sizes</li> </ul>
<i>Emissions market transaction purpose</i> includes:	<ul style="list-style-type: none"> <li>• Hedging</li> <li>• Acquitting liability</li> <li>• Trading</li> <li>• Advising</li> <li>• speculating</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |                               |   |
|-------------------------------|---|
| 1. Prepare for 4x4 operations | <p>1.1. Applicable <i>occupational health and safety</i> (OHS), <i>environmental, legislative</i> and <i>organisational requirements</i> relevant to operating a 4x4 <i>vehicle</i> are identified and followed</p> <p>1.2. <i>Pre-start checks</i> of 4x4 vehicle and equipment are carried out in line with <i>manufacturer specifications</i> and roadworthy requirements</p> <p>1.3. Tyres are checked for pressure suitable for terrain and changed as required in line with organisational procedures</p> <p>1.4. Loads are secured in line with organisational and legislative requirements</p> <p>1.5. <i>Communication</i> with others is established and maintained in line with OHS requirements</p> |
| 2. Operate 4x4 vehicle        | <p>2.1. Intended vehicle path is inspected for potential <i>hazards and risks</i> prior to negotiation in line with OHS and environmental requirements</p> <p>2.2. 4x4 vehicle is driven on and off-road at speeds appropriate for <i>conditions</i> in line with organisational and legislative requirements, and environmental regulations</p> <p>2.3. 4x4 vehicle is parked and shut down in line with manufacturer specifications and organisational requirements</p> <p>2.4. 4x4 vehicle and equipment are cleaned and stored after use in line with manufacturer specifications and organisational procedures</p>   |

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
3. Operate 4x4 vehicle on a steep slope	<p>3.1. Intended 4x4 vehicle path is inspected prior to negotiation of slope</p> <p>3.2. Appropriate gear is selected to negotiate grade and engine revolutions are maintained to ensure constant traction</p> <p>3.3. Airconditioning unit is turned off to avoid engine acceleration</p> <p>3.4. Braking is used to control descent/ascent and skidding is avoided through application of brakes to emulate ABS</p> <p>3.5. Traction is maintained in line with requirements of 4x4 vehicle and surrounding terrain</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

#### Required skills

- Technical skills sufficient to use and maintain relevant tools, machinery and equipment; efficiently and safely operate a 4x4 vehicle; safely negotiate steep slopes; clean and store 4x4 vehicle and equipment; attach equipment to 4x4 vehicle; operate a jack
- Communication skills sufficient to follow legislation, regulations, standards, codes of practice and established safe practices and procedures for operating a 4x4 vehicle; use appropriate communication and interpersonal techniques with colleagues and others; record and report workplace information; maintain documentation
- Literacy skills sufficient to follow legislation, regulations, standards, codes of practice and established safe practices and procedures for operating a 4x4 vehicle
- Numeracy skills sufficient to measure, estimate and calculate time required to complete a task
- Problem solving skills sufficient to identify problems and equipment faults; demonstrate appropriate response procedures; identify potential hazards and operational faults

#### Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for operating a 4x4 vehicle

## REQUIRED SKILLS AND KNOWLEDGE

- Environmental protection requirements, including the safe disposal of waste material, and the minimisation of carbon emissions
- Environmental risks and hazards
- Using energy effectively and efficiently
- Operational knowledge of 4x4 vehicle, including controls, instruments and indicators and their use
- Road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently operate a 4x4 vehicle

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of:

- following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to operating a 4x4 vehicle
- following organisational policies and procedures relevant to operating a 4x4 vehicle
- communicating and working safely with others in rough terrain or water crossing location
- performing pre-start checks of vehicle and equipment
- safely operating a 4x4 vehicle in a range of on and

## EVIDENCE GUIDE

- off-road conditions, including negotiating steep slopes
- Context of and specific resources for assessment**
- Competency is to be assessed in the workplace or realistically simulated workplace
  - Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
  - Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
  - Assessment is to follow relevant regulatory or Australian Standards requirements
  - The following resources should be made available:
    - workplace location or simulated workplace
    - materials and equipment relevant to undertaking work applicable to this unit
    - specifications and work instructions
- Method of assessment**
- Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package
  - Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge
  - Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills
  - Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
  - Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
  - Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
  - Assessment may be in conjunction with assessment of other units of competency
  - The assessment environment should not disadvantage the candidate
  - Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other

## EVIDENCE GUIDE

than English

- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### **OHS requirements:**

are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing
- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe forest practices, including required actions relating to forest fire
- manual handling including shifting, lifting and carrying
- legislation
- organisational policies and procedures
- workplace practices

#### **Environmental requirements may include:**

#### **Legislative requirements:**

are to be in line with applicable commonwealth, state or territory legislation, regulations, certification requirements and codes of practice and may include:

## RANGE STATEMENT

- award and enterprise agreements
  - industrial relations
  - Australian Standards
  - confidentiality and privacy
  - OHS
  - the environment
  - equal opportunity
  - anti-discrimination
  - relevant industry codes of practice
  - duty of care
- Organisational requirements** may include:
- legal
  - organisational and site guidelines
  - policies and procedures relating to own role and responsibility
  - quality assurance
  - procedural manuals
  - quality and continuous improvement processes and standards
  - OHS, emergency and evacuation procedures
  - ethical standards
  - recording and reporting requirements
  - equipment use, maintenance and storage requirements
  - environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)
- Vehicles** may include:
- all terrain vehicles
  - cars
  - utilities
  - trailers
  - light trucks
- Pre-start checks** may include:
- fuel
  - water
  - oil
  - brake and transmission fluid levels
  - battery water levels and electrolyte checks
  - tyres
  - belts
  - leads
  - hydraulic lines and connections
  - aircleaners

## RANGE STATEMENT

- Manufacturer specifications** may include:
- airconditioners
  - brakes
  - off-road safety equipment
  - engine characteristics
  - systems warning function
  - four wheel drive operation
  - radius of turning circle
  - safety procedures
- Communication** may include:
- verbal and non-verbal language
  - constructive feedback
  - active listening
  - questioning to clarify and confirm understanding
  - use of positive, confident and cooperative language
  - use of language and concepts appropriate to individual social and cultural differences
  - control of tone of voice
- Hazards and risks** may include:
- rocks and other unexpected obstacles
  - damage to vehicle
  - wet and iced terrain
  - flooded terrain
  - fire in vehicle
  - faulty brakes
  - leaking fuel
  - faulty steering mechanism on vehicle
  - animals and objects in vehicle path
  - windy or foggy sections of terrain
  - steep slopes
  - oil on road
  - parked vehicles on road
  - pedestrians crossing the road
  - poor visibility
  - on and off-road conditions
- Conditions** are to include:
- which may include:
- smooth
  - rough
  - uneven
  - slippery
  - boggy

**RANGE STATEMENT**

- sandy
- steep or hilly terrain
- rock
- ice
- snow
- mud
- adverse weather conditions
- speed limits for non-response operation
- legal parking
- traffic pattern and density
- visibility
- effects of weather on roads

## FPICOT3202B Navigate in remote or trackless areas

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit describes the outcomes required to navigate in untracked, remote areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids

General workplace legislative and regulatory requirements apply to this unit; however there are no specific licensing or certification requirements at the time of publication

This unit replaces FPICOT3202A Navigate in remote or trackless areas

### Application of the Unit

#### Application of the unit

The unit involves navigating in a remote or trackless area in a forest environment setting

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for navigation	<p>1.1.Applicable <b><i>occupational health and safety</i></b> (OHS), <b><i>environmental, legislative</i></b> and <b><i>organisational requirements</i></b> relevant to navigating in a remote or trackless areas are identified and followed</p> <p>1.2.<b><i>Information</i></b> is gathered and <b><i>relevant factors</i></b> are identified and checked with <b><i>appropriate personnel</i></b></p> <p>1.3.Suitable <b><i>maps, equipment</i></b> and <b><i>navigation aids</i></b> are selected and checked for accuracy, currency and operational effectiveness in line with manufacturer recommendations</p> <p>1.4.Faults or errors in maps and equipment are detected and corrected</p> <p>1.5.<b><i>Communication</i></b> with others is established and maintained in line with OHS requirements</p>
2. Plan the route	<p>2.1.Route is planned in line with assignment instructions and OHS requirements</p> <p>2.2.Maps are examined to identify relevant <b><i>symbols, information, navigation data and environmental requirements</i></b></p> <p>2.3.Accurate grid and magnetic bearings are calculated using maps and equipment in line with assignment instructions</p> <p>2.4.Emergency or contingency exit routes are planned</p>

ELEMENT	PERFORMANCE CRITERIA
3. Conduct navigation	<p>and other <i>risks</i> are planned for</p> <p>2.5. <i>Limitations</i> in planning are specified and assistance is sought in line with organisational requirements</p> <p>3.1. Navigation is undertaken in line with planned route and schedule</p> <p>3.2. Maps are correctly orientated to <i>surroundings</i> in line with planned route</p> <p>3.3. Equipment and navigation aids are used in line with manufacturer recommendations</p> <p>3.4. Alternative routes are navigated to bypass <i>obstacles</i> and improve efficiency of route or course</p> <p>3.5. Impact on the environment as a result of navigation is minimised</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

#### Required skills

- Technical skills sufficient to use and maintain relevant tools and equipment
- Communication skills sufficient to use appropriate communication and interpersonal techniques and methods with colleagues and others
- Literacy skills sufficient to follow legislation, regulations, standards, codes of practice and established safe practices and procedures for navigating in remote or trackless areas; record and report workplace information; maintain documentation
- Numeracy skills sufficient to calculate bearings using maps and compass correctly
- Problem solving skills sufficient to identify problems and equipment faults; demonstrate appropriate response procedures; interpret maps, charts, distances, grid references, relevant symbols, map meaning and line types; estimate resource and equipment requirements; solve problems and bypass obstacles; locate own position on a map

#### Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for navigating in a remote or trackless area
- Environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition

## REQUIRED SKILLS AND KNOWLEDGE

on completion of activity

- Organisational and site standards, requirements, policies and procedures for navigating in a remote or trackless areas
- Environmental risks and hazards
- Types of maps and charts, and their uses
- Representation of topographic features on maps and plans
- Common scales used on maps and plans
- Features and use of a compass and factors that affect its accuracy
- Advantages and disadvantages of different map and chart types and sources of error
- Techniques for estimating distance travelled within a particular activity context
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently navigate in a remote or trackless area, demonstrating the correct orientation and use of maps, plans and compass

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of:

- following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to navigating in a remote or

## EVIDENCE GUIDE

trackless area

- following organisational policies and procedures relevant to navigating in a remote or trackless area
- selecting, interpreting, and applying maps and other relevant information in written, diagrammatic and verbal form
- using maps, compass and navigation aids to navigate in remote or trackless area, confirming factors affecting the use of navigation equipment
- planning and conducting an efficient navigation, effectively bypassing obstacles within designated timeframes

### Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to follow relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to undertaking work applicable to this unit
  - specifications and work instructions

### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge
- Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that

## EVIDENCE GUIDE

competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances

- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### **OHS requirements:**

are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing
- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe forest practices, including required actions relating to forest fire

## RANGE STATEMENT

- Environmental requirements may include:**
- manual handling including shifting, lifting and carrying
  - legislation
  - organisational policies and procedures
  - workplace practices

**Legislative requirements:** are to be in line with applicable commonwealth, state or territory legislation, regulations, certification requirements and codes of practice and may include:

- award and enterprise agreements
  - industrial relations
  - Australian Standards
  - confidentiality and privacy
  - OHS
  - the environment
  - equal opportunity
  - anti-discrimination
  - relevant industry codes of practice
  - duty of care
- Organisational requirements may include:**
- legal
  - organisational and site guidelines
  - policies and procedures relating to own role and responsibility
  - quality assurance
  - procedural manuals
  - quality and continuous improvement processes and standards
  - OHS, emergency and evacuation procedures
  - ethical standards
  - recording and reporting requirements
  - equipment use, maintenance and storage requirements
  - environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)

- Information may relate to:**
- local inhabitants
  - type of terrain or features of the route
  - access and exit routes
  - natural protection or shelter
  - land management and legislative requirements
  - guide books

## RANGE STATEMENT

**Relevant factors** may relate to:

- types of terrain and gradient
- weather conditions
- obstacles
- hazards and access to required resources and facilities
- distance
- estimated travelling time
- magnetic bearings

**Appropriate personnel** may include:

- supervisors
- clients
- colleagues
- line management

**Maps** may include:

- cadastral and topographic maps
- charts
- guide books
- aerial photographs
- sketches and cave maps
- diagrams

**Equipment** may include:

- compass
- track and survey markers
- beacons
- personal protective equipment and clothing
- global positioning system (GPS) units

**Navigation aids** may include:

- track and creek junctions and crossings
- survey markers
- beacons
- track markers
- cairns
- paths
- signs
- arrows
- compass

**Communication** may include:

- verbal and non-verbal language
- constructive feedback
- active listening
- questioning to clarify and confirm understanding
- use of positive, confident and cooperative language

## RANGE STATEMENT

- Symbols and information** may include:
- use of language and concepts appropriate to individual social and cultural differences
  - control of tone of voice
  - grid lines and numbers
  - contour lines
  - magnetic variation
  - scale
  - map legend
  - topographic features
  - markers and beacons
  - water depth
- Navigation data** may include:
- grid reference points
  - grid and magnetic bearings
  - distances
  - estimated travelling times
  - height gain and loss
  - gradient
  - identifiable features
  - exit routes
- Risks** may include:
- weather
  - obstacles
  - availability of resources, such as:
    - water
    - camp sites
    - rest stops
  - type of terrain
  - access and exit routes
  - natural protection or shelter
- Limitations** may relate to:
- job role and responsibilities
  - own competency level
  - industry requirements
  - own understanding of risk identification processes
  - own interpretation of maps
  - legislation
  - regulations and procedures
  - legal responsibilities
  - OHS and environmental requirements
- Surroundings** may include:
- ground/terrain
  - bodies of water

**RANGE STATEMENT****Obstacles may include:**

- beacons and markers
- natural formations
- landmarks
- man-made features
- thick vegetation
- drops and climbs
- marshes and bogs
- fog
- rivers
- lakes and dams
- tides
- hazards, such as rocks

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to collect seed	<p>1.1. Applicable <i>occupational health and safety</i> (OHS), <i>environmental</i>, <i>legislative</i> and <i>organisational requirements</i> relevant to collecting seed are identified and followed</p> <p>1.2. <i>Work order</i> is reviewed and clarified with <i>appropriate personnel</i></p> <p>1.3. Site <i>environmental protection measures</i> are followed in line with relevant legislation and regulations</p> <p>1.4. Potential locations for the collection of required seeds are identified and required <i>approvals</i> are sought and obtained from <i>relevant authorities</i></p> <p>1.5. <i>Equipment and resources</i> appropriate to work requirements are selected and checked for operational effectiveness in line with manufacturer recommendations</p> <p>1.6. Seed collecting operations are checked to ensure safe working conditions and <i>planned</i> in line with site procedures</p> <p>1.7. <i>Communication</i> with others is established and maintained in line with OHS requirements</p>
2. Select and assess seed	<p>2.1. Plant species and condition are visually assessed and checked to ensure the collection of healthy seeds</p> <p>2.2. <b>Method of seed collection</b> is selected and applied without causing damage to <i>health of parent plant</i></p> <p>2.3. Seed is collected from a range of plants and from different areas of plants to maintain genetic diversity</p> <p>2.4. Seed is placed in clean containers and accurately</p>

ELEMENT	PERFORMANCE CRITERIA
3. Clean and store seed	<p data-bbox="619 293 1307 365"><i>labelled</i> in line with industry, site and organisational requirements</p> <p data-bbox="572 383 1307 495">3.1. Seed is <i>separated</i> from other materials, weighed and stored in line with species requirements and site procedures</p> <p data-bbox="572 501 1307 573">3.2. <i>Seed treatment</i> is applied to prevent deterioration in line with seed species and site procedures</p> <p data-bbox="572 580 1307 651">3.3. <i>Seed information</i> is accurately recorded in line with site procedures</p> <p data-bbox="572 658 1307 730">3.4. Seed is <i>packaged</i> for storage in line with industry, legislative and organisational requirements</p> <p data-bbox="572 736 1307 819">3.5. Seed collection information and results are <i>recorded and reported</i> in line with site procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

#### Required skills

- Technical skills sufficient to use and maintain relevant equipment and resources; efficiently and safely carry out seed collecting procedures; identify a range of seed species and apply accurate identifying information; use a range of seed collection methods and related equipment
- Communication skills sufficient to use appropriate communication and interpersonal techniques with colleagues and others
- Literacy skills sufficient to record and maintain information, including details of seed species, weight and place of origin
- Numeracy skills sufficient to apply appropriate mathematical techniques to calculate seed weights and quantities
- Problem solving skills sufficient to review and identify work requirements; identify problems and equipment faults; demonstrate appropriate response procedures

#### Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for collecting seed
- Environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition

## REQUIRED SKILLS AND KNOWLEDGE

on completion of activity

- Organisational and site standards, requirements, policies and procedures for collecting seed
- Environmental risks and hazards
- Procedures for minimising environmental impact
- Range of seed species and appropriate collection, treatment and packaging processes, including storage requirements for different seed species
- Types of diseases and pests likely to infect a range of seed species
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can apply safe and efficient techniques to collect, treat and store a range of seed species in line with species requirements and organisational guidelines

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of:

- following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to collecting seed
- following organisational policies and procedures relevant to collecting seed
- safely and efficiently using and maintaining seed collecting equipment and resources

## EVIDENCE GUIDE

### Context of and specific resources for assessment

- treating and storing seed in line with site and industry specifications
- recording seed collection information and results, and maintaining workplace information
- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to follow relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to undertaking work applicable to this unit
  - specifications and work instructions

### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge
- Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any

## EVIDENCE GUIDE

relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English

- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### **OHS requirements:**

are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing
- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe forest practices, including required actions relating to forest fire
- manual handling including shifting, lifting and carrying
- legislation
- organisational policies and procedures
- workplace practices

#### **Environmental requirements** may include:

#### **Legislative requirements:**

are to be in line with applicable commonwealth, state or territory legislation, regulations,

## RANGE STATEMENT

certification requirements and codes of practice and may include:

- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- OHS
- the environment
- equal opportunity
- anti-discrimination
- relevant industry codes of practice
- duty of care

### **Organisational requirements**

may include:

- legal
- organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- OHS, emergency and evacuation procedures
- ethical standards
- recording and reporting requirements
- equipment use, maintenance and storage requirements
- environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)

**Work order** is to include:

- information and instructions for collecting, treating and storing seed

and may also include:

- instructions for the environmental monitoring of work and procedures
- environmental care requirements relevant to the work

**Appropriate personnel** may include:

- supervisors
- suppliers
- clients
- colleagues
- managers

## RANGE STATEMENT

**Environmental protection measures** may include:

- ground growth
- canopy
- general forest lean
- wind speed and direction
- fallen trees
- density of trees
- ground slope
- soil and water protection
- ground hazards
- obstacles

**Approvals** may include:

- licences and permits required for commercial and non-commercial seed collection
- government permits
- landholder permits

**Relevant authorities** may include:

- local governments
- parks and reserves managers
- forestry managers
- relevant government departments and agencies/ authorities, such as those involved in sustainability and environmental issues
- relevant Indigenous organisations and agencies

**Equipment and resources** may include:

- personnel
- vehicles
- pruning and shaking equipment
- sheets
- tarpaulins
- clean containers for holding seeds
- vacuum seed collecting machines
- ladders or elevated work platforms
- personal protective equipment

**Planning** includes:

consideration of:

- seed collection seasons
- when the required species have fruit at optimal condition

**Communication** may include:

- verbal and non-verbal language
- constructive feedback
- active listening
- questioning to clarify and confirm understanding

## RANGE STATEMENT

- use of positive, confident and cooperative language
  - use of language and concepts appropriate to individual social and cultural differences
  - control of tone of voice
  - collecting after falling or felling
  - using ladders
  - climbing
  - shaking
  - high-powered rifles
  - cherry-pickers
  - hand picking
  - careful and selective pruning
- Method of seed collection** may include:
- Health of parent plant** may require:
- Labelling** may include:
- Separation** methods may include:
- seed location
  - genetic identity
  - hand selection
  - wind separation/winnowing
  - sieving
  - vibrating
  - flotation
  - drying
  - crumbling of husks
- Seed treatment** may include:
- heat
  - mechanical
  - chemical protection against pests
- Seed information** may include:
- time and date of harvest
  - time and date of receipt into store
  - weight
  - species
  - place or origin of seed
  - container identifier
- Packaging** may include:
- vacuum sealing
  - use of inert atmospheres, such as nitrogen and carbon dioxide
  - control of packing environment, including temperature, light and moisture
- Records and reports** may be maintained by:
- electronic database
  - card index

**RANGE STATEMENT**

- data sheets
- filing systems

and may be:

- manual
- a computer-based system
- other appropriate organisational communication system

**Unit Sector(s)**

## **FPIFGM2208A Fall trees manually (basic)**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit specifies the outcomes required to assess, plan and safely carry out manual tree falling operations using a chainsaw. This unit is intended for use in situations where the production of timber is not the primary focus of the activity. Compliance with licensing, legislative, regulatory or certification requirements may be required in various jurisdictions

This unit replaces FPIFGM110A Fall trees manually - basic (non-commercial/non production)

### **Application of the Unit**

#### **Application of the Unit**

This unit supports the attainment of skills and knowledge required for competent workplace performance in forest and forest products operations of all sizes. The unit applies to a forest environment and involves application of skills and knowledge at a production worker level. These skills and knowledge are to be used within the scope of the person's job and authority

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## Employability Skills Information

Not Applicable

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |  |  |
|--|--|
| 1 Prepare and maintain falling equipment | <p>1.1 Applicable <b><i>Occupational Health and Safety (OHS)</i></b>, <b><i>legislative</i></b> and <b><i>organisational</i></b> requirements relevant to falling <b><i>trees</i></b> are identified and complied with</p> <p>1.2 Site <b><i>environmental protection measures</i></b> are adhered to in accordance with relevant legislation and regulations</p> <p>1.3 <b><i>Work plan</i></b> is reviewed and checked as required with <b><i>appropriate personnel</i></b></p> <p>1.4 <b><i>Tools and equipment</i></b> are selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer's recommendations</p> <p>1.5 Blunt or damaged chainsaw is detected, rectified and reported in accordance with workplace procedures</p> <p>1.6 Operational effectiveness of chainsaw is monitored to <b><i>maintain</i></b> falling safety and productivity</p> <p>1.7 <b><i>Communication</i></b> with others is established and maintained in accordance with OHS requirements</p> |
| 2 Assess conditions and surroundings     | <p>2.1 Site environmental concerns are identified and complied with in accordance with relevant national, state, and local legislation or regulations</p> <p>2.2 <b><i>Environmental conditions</i></b> are identified and assessed in accordance with work plan requirements</p> <p>2.3 Awareness of environmental conditions and other personnel activity in the work area is maintained and falling activity modified</p>   |

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	2.4 General factors affecting falling requirements are assessed and specific forest or site risks and hazards are detected and controlled
3 Assess tree and plan falling	<p>3.1 Tree is located and visually assessed for falling characteristics</p> <p>3.2 Required falling direction and degree of allowable error is assessed and checked</p> <p>3.3 Sequence of cuts to fall tree is planned in accordance with standard falling procedures</p> <p>3.4 Suitable escape route is selected and cleared of growth and other obstacles in accordance with environmental care principles and statutory requirements</p> <p>3.5 Personal <i>limitations</i> in safely falling trees with own skills are assessed and <i>assistance</i> sought from appropriate personnel</p> <p>3.6 Location and activity of other personnel in the work area is noted and monitored</p>
4 Fall tree	<p>4.1 All work is conducted using established safe operating practices and in accordance with workplace procedures</p> <p>4.2 Tree falling <i>operations</i> are safely undertaken appropriate to site conditions and at a safe distance from other personnel in the work area</p> <p>4.3 Unexpected characteristics of tree and other problems are identified, assistance sought and planning reviewed</p> <p>4.4 Planned escape route is used when tree starts to fall and the fall and movement of tree on ground is monitored until determined stable</p> <p>4.5 Chainsaw is monitored for operational effectiveness and any faults, malfunctions or problems are recorded and reported in accordance with workplace procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit

- Required skills include:**
- comply with legislation, regulations, standards, codes of practice and established safe practices and procedures relating to basic manual tree falling

operations

- review and accurately identify work requirements
- use and maintain relevant tools, machinery and equipment
- identify problems and equipment faults and demonstrate appropriate response procedures
- use appropriate communication and interpersonal techniques and methods with colleagues and others
- accurately locate, record and report information
- safely operate and maintain a chainsaw
- use hand signals with other operators to maintain effective and safe tree falling
- recognise own limitations in conditions and trees for falling
- assess, plan and carry out tree falling operations appropriate to site conditions
- recognise common diseases, pests and nutrition deficiencies
- read and interpret written material
- basic knowledge and understanding of applicable Commonwealth, State or Territory licensing, legislative, regulatory or certification requirements and codes of practice relevant to basic manual tree falling operations
- organisational and site standards, requirements, policies and procedures relating to basic manual tree falling operations
- principles of cultural diversity and access and equity
- environmental protection requirements, including the safe disposal of waste material
- established communication channels and protocols
- problem identification and resolution
- types of tools and equipment and procedures for their safe use, operation and maintenance
- identification and evaluation of structural defects in trees
- types and purposes of a range of cuts to fall trees
- hazards of operating a chainsaw and falling trees
- types of tools and equipment and procedures for their use, operation and maintenance
- operational principles and limitations of a chainsaw
- procedures for recording and reporting workplace information
- appropriate mathematical procedures for estimating

**Required knowledge and understanding includes:**

and measuring, including calculating time to complete tasks

## KEY COMPETENCIES

The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace

Performance Level 1 - at this level, the candidate is required to undertake tasks effectively

Performance Level 2 - at this level, the candidate is required to manage tasks

Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping tasks

Key Competency	Example of Application	Performance Level
How are ideas and information communicated?	By communicating in simple language to confirm work requirements, convey information to colleagues, and report outcomes relating to falling trees	1
How can information be collected, analysed and organised?	By collecting, organising and understanding information required to plan and undertake tree falling	2
How are activities planned and organised?	By organising and conducting tree falling activities in the correct sequence to complete within the designated timeframes	2
How is team work used?	By using effective communication and interpersonal techniques with colleagues and others to maximise confidence, satisfaction and productivity during tree falling operations	1
How are mathematical ideas and techniques used?	By calculating slopes, wind speed and direction time to complete tasks	2
How are problem solving skills applied?	By establishing safe and effective tree falling procedures and processes which anticipate likely problems to avoid wastage and downtime	2
How is the use of technology applied?	By accessing and locating applicable legislative, regulatory and environmental guidelines relevant to	1

	tree falling operations	
--	-------------------------	--

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package

#### Overview of assessment

- A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently assess, plan and conduct basic manual tree falling operations in accordance with environmental and organisational requirements

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to basic manual falling of trees
- Comply with applicable licensing or certification requirements
- Effectively communicate and work safely with others including maintaining an awareness of other personnel activity in the work area
- Contribute to a tree assessment, plan and fall trees within the range of variables for trees and conditions
- Select, use and maintain appropriate tools and equipment and recognise faults, problems or malfunctions
- Safely operate and maintain a chainsaw

#### Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to comply with relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to basic manual falling of trees

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package

### Method of assessment

- specifications and work instructions
- Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies.
- Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

## RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

- OHS requirements are to be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:**
- the use of personal protective equipment and clothing
  - safety equipment
  - first aid equipment
  - fire fighting equipment
  - hazard and risk control
  - elimination of hazardous materials and substances
  - safe forest practices including required actions relating to forest fire
  - manual handling including shifting, lifting and carrying
- Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:**
- award and enterprise agreements
  - industrial relations
  - Australian Standards
  - confidentiality and privacy
  - OHS
  - the environment
  - equal opportunity
  - anti-discrimination
  - relevant industry codes of practice
  - duty of care
  - heritage and traditional land owner issues
- Organisational requirements**
- may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)
- Trees**
- for falling will have the following characteristics: diameter not more than 50 centimetres at position of cut, height not more than 20 metres, lean and weight distribution consistent with falling direction, single leader, sound wood condition in barrel, species and growth conditions not prone to twisting or splitting, ground slope not excessive
- Environmental protection**
- may include ground growth, canopy, general forest lean, wind speed and direction, fallen trees, density

## RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

<b>measures</b>	of trees, ground slope, soil and water protection, ground hazards, obstacles. Measures may also include contingencies for modifying operations during wet or other adverse weather conditions
<b>Work plan</b>	<ul style="list-style-type: none"> <li>is to include information and instructions relevant to tree falling operations including processing location details and trees to be felled and retained. Information may also include general environmental requirements, site plan and environmental features</li> </ul>
<b>Appropriate personnel</b>	<ul style="list-style-type: none"> <li>may include supervisors, clients, colleagues, line management</li> </ul>
<b>Tools and equipment</b>	<ul style="list-style-type: none"> <li>may include warning signs, chainsaw and components, personal protective equipment and clothing, first aid equipment, maintenance requirements, fuel</li> </ul>
<b>Maintenance</b>	<ul style="list-style-type: none"> <li>of chainsaw and components may include sharpening and making adjustments</li> </ul>
<b>Communication</b>	<ul style="list-style-type: none"> <li>may include verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language, hand signals</li> </ul>
<b>Environmental conditions</b>	<ul style="list-style-type: none"> <li>may relate to ground growth, canopy, general forest lean, ground slope, ground hazards, wind speed and direction</li> </ul>
<b>Conditions</b>	<ul style="list-style-type: none"> <li>in which falling will be undertaken include minimal canopy affecting free fall, ground slope not excessive, wind not significantly affecting falling characteristics, absence of ground growth or fallen trees preventing free movement around stump or preventing complete fall, absence of stags and hazardous ground features in falling radius, clear falling or sparse tree density</li> </ul>
<b>Limitations</b>	<ul style="list-style-type: none"> <li>may relate to job role and responsibilities, own competency level, industry requirements, own understanding of risk identification processes, own interpretation of legislation, regulations and procedures, complying with OHS requirements</li> </ul>

## RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

### Assistance

- may be required in situations where cuts made may lead to loss of control of tree in falling, to confirm and adjust cutting techniques in response to movement and condition of tree, to help clear trees that hang up during falling

### Operations

- may include scarf-cutting to plan, backcutting to provide planned hinge-wood and maintain control of tree, using wedges to assist in controlling falling direction

## Unit Sector(s)

Not Applicable

## Competency Field

### Competency Field

Forest Growing and Management

## FPIFGM3201B Manage seed collection

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit describes the outcomes required to plan and monitor the implementation of seed collection or sowing programs. The unit includes collection of native and non-native species

Compliance with licensing, legislative, regulatory or certification requirements may be required in various jurisdictions

This unit replaces FPIFGM3201A Manage seed collection

### Application of the Unit

#### Application of the unit

The unit involves managing seed collection in a variety of work settings, including:

- forest environments
- farms
- agriculture
- nurseries
- local councils

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. Plan seed collection

- 1.1. Applicable ***occupational health and safety*** (OHS), ***environmental, legislative*** and ***organisational requirements*** relevant to managing ***seed collection*** are identified and followed
- 1.2. Site ***environmental protection measures*** are identified and adhered to in line with relevant legislation and regulations
- 1.3. Seeding and/or planting program is analysed and required ***seed characteristics*** and ***implementation issues*** are identified
- 1.4. Seed collection ***opportunities*** are identified and a suitable area for seed collection is determined and documented
- 1.5. ***Method of seed collection*** is selected and quantity, cost and ***impacts*** on provenances and species to be collected are determined and documented
- 1.6. Required ***approvals*** are identified, sought and obtained from relevant authorities
- 1.7. Measurable performance indicators, specifications

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	and targets are determined and documented
	1.8. Seed collection <i>plan</i> and its performance indicators are clearly documented and communicated to <i>appropriate personnel</i>
2. Implement and monitor seed collection	2.1. <i>Resources</i> required for seed collection are coordinated and scheduled and required <i>documentation</i> is completed clearly and accurately
	2.2. Relevant <i>individuals, bodies and groups</i> are consulted as required using appropriate interpersonal techniques
	2.3. Seed collection plan is implemented and monitored in line with quality standards for seed collection
	2.4. Systematic <i>checks</i> are carried out to ensure compliance requirements relevant to seed collection activities are adhered to
	2.5. Adjustments to seed collection activities are made as required and communicated to appropriate personnel
	2.6. <i>Communication</i> with others is established and maintained in line with OHS requirements
	2.7. <i>Limitations</i> are identified and assistance is sought as required in line with workplace procedures
3. Review seed collection	3.1. Data and documentation from seed collection are assessed and evaluated to confirm techniques, methodologies and budgets are in line with plan
	3.2. Issues and impediments to seed collection activities and program costs are identified and documented
	3.3. Cost benefit analysis is prepared and recommendations are made, based on the analysis of data and identified issues
	3.4. Results of seed collection are clearly communicated and disseminated to appropriate personnel
	3.5. Seed collection process is <i>recorded and reported</i> to the appropriate personnel

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- Technical skills sufficient to use and maintain relevant tools, machinery and equipment; collate and assess information against specified criteria; supervise operational staff and contractors to achieve specific outcomes; recognise common diseases, pests and nutritional deficiencies; efficiently and safely manage the extraction of collected material
- Communication skills sufficient to use appropriate communication and interpersonal techniques with colleagues and others, including landholders, and internal and external bodies and groups
- Literacy skills sufficient to record and report workplace information; maintain documentation; write reports and submissions in appropriate style and format
- Numeracy skills sufficient to interpret numerical data; identify quantities and costings
- Problem solving skills sufficient to identify problems and equipment faults; demonstrate appropriate response procedures

### Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for managing seed collection
- Environmental protection requirements, including the safe disposal of waste material
- Organisational and site standards, requirements, policies and procedures for managing seed collection
- Environmental risks and hazards
- Flowering biology of the target species
- Biological signs that indicate that the seed crop is ready to be collected
- Procedures to extract and handle seed from collected material, including handling procedures of the seed crop after picking
- Treatment and documentation requirements of extracted seed
- Seed collection methods
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently plan and supervise the implementation of seed collection activities within applicable environmental, legislative and organisational guidelines

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of:

- following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to managing seed collection
- following organisational policies and procedures relevant to managing seed collection
- developing measurable performance indicators, specifications and targets and a seed collection plan within specified budgetary guidelines
- coordinating and scheduling resources, and managing the work of others to achieve specific outcomes
- monitoring seed collection operations, ensuring that relevant quality standards are followed
- documenting results from seed collection activities and preparing a report for dissemination to relevant personnel

### Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to follow relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace

## EVIDENCE GUIDE

### Method of assessment

- materials and equipment relevant to undertaking work applicable to this unit
- specifications and work instructions
- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge
- Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised**

## RANGE STATEMENT

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- OHS requirements:** are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:
- personal protective equipment and clothing
  - safety equipment
  - first aid equipment
  - fire fighting equipment
  - hazard and risk control
  - fatigue management
  - elimination of hazardous materials and substances
  - safe forest practices, including required actions relating to forest fire
  - manual handling including shifting, lifting and carrying
- Environmental requirements** may include:
- legislation
  - organisational policies and procedures
  - workplace practices
- Legislative requirements:** are to be in line with applicable commonwealth, state or territory legislation, regulations, certification requirements and codes of practice and may include:
- award and enterprise agreements
  - industrial relations
  - Australian Standards
  - confidentiality and privacy
  - OHS
  - the environment
  - equal opportunity
  - anti-discrimination
  - relevant industry codes of practice
  - duty of care
- Organisational requirements** may include:
- legal
  - organisational and site guidelines
  - policies and procedures relating to own role

## RANGE STATEMENT

and responsibility

- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- OHS, emergency and evacuation procedures
- ethical standards
- recording and reporting requirements
- equipment use, maintenance and storage requirements
- environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)

**Seed** may include:

- native species
- non-native species

**Seed collection** may include:

- seed orchards
- forests
- softwoods and hardwoods
- rainforest
- understorey plants

**Environmental protection measures** may include:

- ground growth
- canopy
- general forest lean
- wind speed and direction
- fallen trees
- density of trees
- ground slope
- soil and water protection
- ground hazards and obstacles
- contingencies for modifying operations during wet or other adverse weather conditions
- hygiene of the area
- relevant commonwealth, state or territory, and local legislation and regulations

**Seed characteristics** may include:

- provenance
- potential growth characteristics
- forest types
- optimum time to collect
- physiology and biology
- dormancy
- species

## RANGE STATEMENT

**Implementation issues** may include:

- scheduling
- people and skills involved
- materials
- hazards
- seed quantities
- selection

**Opportunities** may include:

- field observation
- organisational and other relevant information

**Method of seed collection** may include:

- climbing
- removal of branches with rifle
- elevated platform vehicles

consideration of the:

- geography of the local area
- size and type of trees
- available resources
- organisational guidelines

and may also include:

- collecting after falling or felling
- ladders
- shaking
- high-powered rifles
- cherry pickers

**Impacts** may include:

- requirements for genetic diversity
- frost
- heat
- salt hardiness
- potential growth characteristics

**Approvals** may include:

- heritage requirements
- environmental sustainability requirements
- other issues applying to seed collection operation

**Plan** may include:

- organisational terminology
- guidelines
- budgets
- policies and timelines
- internal memos
- resources, including people, material and equipment

**Appropriate personnel** may

- clients

**RANGE STATEMENT**

include:

- colleagues
- line management

those collecting the seed, such as:

- organisational employees
- contractors
- community groups

**Resources** may include:

- people
- material
- equipment

**Documentation** may include:

- provenance
- seed species and location
- identity of collector
- weight of seed collected

**Individuals, bodies and groups** may include:

- landholders
- commonwealth, state or territory, and local government authorities
- private individuals

**Checks** may include:

ensuring:

- relevant organisational OHS procedures, practices, policies and precautions are observed and followed
- site environmental requirements follow relevant commonwealth, state or territory, and local legislation and regulations
- performance indicators, targets and specifications are met
- quantity, cost and provenances collected are in line with plan specifications
- required organisational documentation is completed clearly and accurately

**Communication** may include:

- verbal and non-verbal language
- constructive feedback
- active listening
- questioning to clarify and confirm understanding
- use of positive, confident and cooperative language
- use of language and concepts appropriate to individual social and cultural differences
- control of tone of voice

## RANGE STATEMENT

**Limitations** may include:

- job role and responsibilities
- own competency level
- industry requirements
- own understanding of risk identification processes
- own interpretation of legislation, regulations and procedures
- OHS and environmental requirements
- difficulties or issues faced
- recommendations for future work, results and costs
- collation of information or documentation
- interpreting information in a way relevant to workplace requirements
- organising and maintaining records accurately
- using a full range of information media, including written, printed, verbal, electronic, visual display units and personal computers

**Records and reports** may include:

and may be:

- manual
- computer-based system
- other appropriate organisational communication system

## Unit Sector(s)

Not Applicable

## Competency field

**Competency field**

Forest Growing and Management

## FPIFGM3202B Extract seed

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit describes the outcomes required to extract and process native or non-native seed using an extraction unit. It includes seed storage requirements and extraction unit maintenance

General workplace legislative and regulatory requirements apply to this unit; however there are no specific licensing or certification requirements at the time of publication

This unit replaces FPIFGM3202A Extract seed

### Application of the Unit

#### Application of the unit

The unit involves extracting seed in a variety of work settings, including forest environment settings such as farms, agriculture, workshops, domestic, nurseries and local councils

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability skills** This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive seed-bearing material into store	<p>1.1.Applicable <i>occupational health and safety</i> (OHS), <i>environmental, legislative</i> and <i>organisational requirements</i> relevant to extracting <i>seed</i> are identified and followed</p> <p>1.2.<i>Work order</i> is reviewed and checked with <i>appropriate personnel</i></p> <p>1.3.Seed bearing material is received, visually assessed, and species are identified and checked with container label</p> <p>1.4.Received containers are <i>weighed</i> and <i>identified</i> in line with site procedures</p> <p>1.5.Material is stored in dry and well-ventilated <i>conditions</i> in line with site procedures</p> <p>1.6.<i>Communication</i> with others is established and maintained in line with OHS requirements</p>
2. Extract seed	<p>2.1.Seed is extracted in line with work order, and environmental and OHS requirements</p> <p>2.2.Seed extraction processes are planned and checked for safe working conditions</p> <p>2.3.<i>Extraction units and equipment</i> are selected appropriate to work requirements and checked for operational effectiveness in line with manufacturer recommendations</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	2.4. Seed extraction <i>systems</i> are operated and monitored in line with manufacturer recommendations
	2.5. Seed-bearing material is placed in or on extraction unit and agitation is undertaken as required to maximise yield
	2.6. Seed capsules are inspected and unextracted seed is reprocessed as required to ensure maximum yield
3. Clean and store seed	3.1. Seed is separated from other material, weighed and stored in line with species requirements and site procedures
	3.2. <i>Seed information</i> is accurately recorded in line with site procedures
	3.3. Seed is <i>packaged</i> for storage in line with industry, legislative, organisational and environmental requirements
4. Clean and maintain extraction unit	4.1. Residue and other waste material is disposed of in line with site environmental management guidelines
	4.2. Extraction units and equipment are cleaned, maintained and calibrated in line with manufacturer recommendations, site procedures and environmental requirements
	4.3. Abnormal operation or faults with extraction units and equipment are reported for corrective action in line with site procedures
	4.4. Work areas are cleaned and maintained in line with site procedures, and organisational and environmental requirements
	4.5. Seed extraction information and results are <i>recorded and reported</i> in line with site procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

#### Required skills

- Technical skills sufficient to use and maintain seed extraction units; efficiently and safely carry out seed extraction techniques; identify a range of seed species from capsules and apply accurate identifying information

## REQUIRED SKILLS AND KNOWLEDGE

- Communication skills sufficient to use appropriate communication and interpersonal techniques with colleagues and others
- Literacy skills sufficient to record and report workplace information; maintain documentation
- Numeracy skills sufficient to apply appropriate mathematical techniques to calculate seed weights
- Problem solving skills sufficient to identify problems and equipment faults; demonstrate appropriate response procedures

### Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for extracting seed
- Environmental protection requirements, including the safe disposal of waste material, the minimisation of environmental impact, and the cleaning of plant, tools and equipment
- Organisational and site standards, requirements, policies and procedures for extracting seed
- Environmental risks and hazards
- Hazards associated with seed extraction, processing and storage
- Range of seed species, including native and non-native
- Seed extraction processes for native and non-native species
- Storage procedures and requirements for different seed species
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must

## EVIDENCE GUIDE

be able to provide evidence that they can apply safe and efficient techniques to identify, extract, clean and store seed in line with species requirements and organisational guidelines

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of:

- following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to extracting seed
- following organisational policies and procedures relevant to extracting seed
- applying seed extraction and storage techniques in line with work order instructions and within prescribed organisational tolerances
- operating, cleaning and maintaining seed extraction units and equipment
- recording seed species information and extraction results, and maintaining workplace information

### Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to follow relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to undertaking work applicable to this unit
  - specifications and work instructions

### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge
- Assessment must be by direct observation of tasks,

## EVIDENCE GUIDE

with questioning on required knowledge and it must also reinforce the integration of employability skills

- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### **OHS requirements:**

are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing

## RANGE STATEMENT

- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe forest practices, including required actions relating to forest fire
- manual handling including shifting, lifting and carrying
- legislation
- organisational policies and procedures
- workplace practices

**Environmental requirements**  
may include:

**Legislative requirements:**

are to be in line with applicable commonwealth, state or territory legislation, regulations, certification requirements and codes of practice and may include:

- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- OHS
- the environment
- equal opportunity
- anti-discrimination
- relevant industry codes of practice
- duty of care

**Organisational requirements**  
may include:

- legal
- organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- OHS, emergency and evacuation procedures
- ethical standards
- recording and reporting requirements
- equipment use, maintenance and storage requirements

**RANGE STATEMENT**

- environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)
- Seed** may include:
- native species
  - non-native species
- Work order** is to include:
- information and instructions on material to be extracted
  - site seed extraction requirements
- and may also include:
- instructions for the environmental monitoring of work and procedures
  - environmental care requirements relevant to the work
- Appropriate personnel** may include:
- supervisors
  - suppliers
  - clients
  - colleagues
  - managers
- Weight** may include:
- properly calibrating and maintaining scales
  - using scales for weighing under licence from the weights and measures authority
- Identifiers** may include:
- alphanumeric
  - bar codes
  - colour codes
  - symbols
- Conditions** for storage of material must be free of humidity or wetness to protect against incidence of fungus
- Communication** may include:
- verbal and non-verbal language
  - constructive feedback
  - active listening
  - questioning to clarify and confirm understanding
  - use of positive, confident and cooperative language
  - use of language and concepts appropriate to individual social and cultural differences
  - control of tone of voice
- Extraction units and equipment** may include:
- kilns operated by gas, solar energy, oil or electricity
  - sieves of various sizes

## RANGE STATEMENT

- air-drying racks and trays
  - lifting devices, such as overhead gantry, fork lift and conveyor belt
  - electronic and manual scales
- Systems** may include:
- electronic
  - manual
- Seed information** includes details of:
- species
  - weight
  - place or origin
  - container identifier
- Packaging** must:
- ensure protection of seeds
  - maintain traceability to collection source
- Records and reports may include:**
- seed species information
  - seed extraction processes and results
  - storage procedures
- and may be:
- manual
  - a computer-based system
  - other appropriate organisational communication system

## Unit Sector(s)

Not Applicable

## Competency field

**Competency field** Forest Growing and Management

## **FPIFGM3204A Fall trees manually (intermediate)**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit specifies the outcomes required to assess, plan and safely carry out intermediate manual tree falling operations. This unit is intended for use in situations where the production of timber is not the primary focus of the activity. Compliance with licensing, legislative, regulatory or certification requirements may be required in various jurisdictions

This unit replaces FPIFGM111A Fall trees manually - intermediate (non-commercial/non-production)

### **Application of the Unit**

#### **Application of the Unit**

This unit supports the attainment of skills and knowledge required for competent workplace performance in forest and forest products operations of all sizes. The unit applies to a forest environment and involves application of skills and knowledge at a tradesperson level. These skills and knowledge are to be used within the scope of the person's job and authority

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## Employability Skills Information

Not Applicable

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |  |  |
|--|--|
| 1 Prepare and maintain falling equipment | <p>1.1 Applicable <i>Occupational Health and Safety (OHS)</i>, <i>legislative</i> and <i>organisational</i> requirements relevant to <i>falling trees</i> are identified and complied with</p> <p>1.2 Site <i>environmental protection measures</i> are adhered to in accordance with relevant legislation and regulations</p> <p>1.3 <i>Work plan</i> is reviewed and checked as required with <i>appropriate personnel</i></p> <p>1.4 <i>Tools and equipment</i> are selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer's recommendations</p> <p>1.5 Blunt or damaged chainsaw is detected, rectified and reported in accordance with workplace procedures</p> <p>1.6 Operational effectiveness of chainsaw is monitored to <i>maintain</i> falling safety and productivity</p> <p>1.7 <i>Communication</i> with others is established and maintained in accordance with OHS requirements</p> |
| 2 Assess conditions and surroundings     | <p>2.1 Site environmental concerns are identified and complied with in accordance with relevant national, state, and local legislation and/or regulations</p> <p>2.2 <i>Environmental conditions</i> are identified and assessed in accordance with work order requirements</p> <p>2.3 Awareness of environmental conditions and other personnel activity in the work area is maintained and</p>   |

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	falling activity modified
	2.4 General factors affecting falling requirements are determined and specific forest or site risks and hazards are assessed and controlled
3 Assess tree and plan falling	3.1 Tree falling sequence for individual trees is assessed and progressively planned
	3.2 Tree to be felled is located and growth is cleared to enable a <i>visual assessment</i> of falling characteristics
	3.3 Required falling direction is assessed and checked in accordance with planned falling
	3.4 Sequence of cuts to fall tree is planned in accordance with standard falling procedures
	3.5 Suitable escape route is selected and cleared of growth and other obstacles in accordance with environmental care principles and statutory requirements
	3.6 Personal <i>limitations</i> in safely falling trees with own skills are assessed and <i>assistance</i> sought from appropriate personnel
	3.7 Location and activity of other personnel in the work area is noted and monitored
4 Fall tree	4.1 All work is conducted using established safe operating practices and in accordance with workplace procedures
	4.2 Tree falling operations are safely undertaken appropriate to site conditions and at a safe distance from other personnel in the work area
	4.3 Unexpected characteristics of tree and other problems are identified, assistance sought and planning reviewed
	4.4 Planned escape route is used when tree starts to fall and the fall and movement of tree on ground is monitored until stability is determined
	4.5 Chainsaw is monitored for operational effectiveness and any faults, malfunctions or problems are reported in accordance with workplace procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this

**unit**

- Required skills include:**
- comply with legislation, regulations, standards, codes of practice and established safe practices and procedures relating to intermediate manual tree falling operations
  - use and maintain relevant tools, machinery and equipment
  - identify problems and equipment faults and demonstrate appropriate response procedures
  - use appropriate communication and interpersonal techniques and methods with colleagues and others
  - accurately record and report workplace information, and maintain documentation
  - use hand signals with other operators to maintain effective and safe tree falling
  - recognise own limitations in conditions and trees for falling
  - contribute to a tree assessment and plan and fall trees within the range of variables for trees and conditions
  - recognise common diseases, pests and nutrition deficiencies
  - calculate slopes and weights in the metric system
- Required knowledge and understanding includes:**
- applicable Commonwealth, State or Territory licensing, legislative, regulatory or certification requirements and codes of practice relevant to intermediate manual tree falling operations
  - organisational and site standards, requirements, policies and procedures relating to intermediate manual tree falling operations
  - principles of cultural diversity and access and equity
  - environmental protection requirements, including the safe disposal of waste material
  - established communication channels and protocols
  - problem identification and resolution
  - types of tools and equipment and procedures for their safe use, operation and maintenance
  - identification and evaluation of structural defects in trees
  - types and purposes of a range of cuts to fall trees
  - hazards of operating a chainsaw and falling trees
  - operational principles and limitations of a chainsaw
  - procedures for recording, reporting and maintaining workplace records and information
  - appropriate mathematical procedures for estimation

and measurement

## KEY COMPETENCIES

The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace

Performance Level 1 - at this level, the candidate is required to undertake tasks effectively

Performance Level 2 - at this level, the candidate is required to manage tasks

Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping tasks

Key Competency	Example of Application	Performance Level
How are ideas and information communicated?	By communicating in simple language to confirm work requirements, convey information to colleagues, and report outcomes relating to falling trees	2
How can information be collected, analysed and organised?	By collecting, organising and understanding information required to plan and undertake tree falling	2
How are activities planned and organised?	By organising and conducting tree falling activities in the correct sequence to complete within the designated timeframes	2
How is team work used?	By using effective communication and interpersonal techniques with colleagues and others to maximise confidence, satisfaction and productivity during tree falling operations	1
How are mathematical ideas and techniques used?	By calculating slopes, wind speed and direction time to complete tasks	3
How are problem solving skills applied?	By establishing safe and effective tree falling procedures and processes which anticipate likely problems to avoid wastage and downtime	2
How is the use of technology applied?	By selecting and using equipment to fall trees	1

## Evidence Guide

### EVIDENCE GUIDE

**The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package**

#### Overview of assessment

- A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently assess, plan and conduct tree falling operations in accordance with environmental and organisational requirements

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to falling trees manually (intermediate)
- Comply with applicable licensing or certification requirements
- Communicate effectively and work safely with others including maintaining an awareness of other personnel activity in the work area
- Contribute to a tree assessment, plan and fall trees within the range of variables for trees and conditions
- Visually assess trees and determine falling characteristics
- Select, use and maintain appropriate tools and equipment and recognise faults, problems or malfunctions
- Safely operate and maintain a chainsaw

#### Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to comply with relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to manual falling of trees (intermediate)
  - specifications and work instructions

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package

### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies
- Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

**OHS requirements are to** • the use of personal protective equipment and clothing

## RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

- be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:**
- safety equipment
  - first aid equipment
  - fire fighting equipment
  - hazard and risk control
  - elimination of hazardous materials and substances
  - safe forest practices including required actions relating to forest fire
  - manual handling including shifting, lifting and carrying
- Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:**
- award and enterprise agreements
  - industrial relations
  - Australian Standards
  - confidentiality and privacy
  - OHS
  - the environment
  - equal opportunity
  - anti-discrimination
  - relevant industry codes of practice
  - duty of care
  - heritage and traditional land owner issues
- Organisational requirements**
- may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)
- Falling**
- may require the use of multiple back-cuts
- Trees**
- for falling will have the following characteristics: height not more than 40 metres, lean and weight distribution which can be adapted to falling direction with the use of wedges and or control with hinge wood, single leader, sound wood condition in barrel
- Environmental protection measures**
- may include noise, ground growth, canopy, general forest lean, wind speed and direction, fallen trees, density of trees, ground slope, soil and water protection, ground hazards, obstacles. Measures may

## RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

- Work plan**

  - also include contingencies for modifying operations during wet or other adverse weather conditions
  - is to include information and instructions relevant to tree falling operations including processing location details and trees to be felled and retained. Information may also include general environmental requirements, site plan and environmental features
- Appropriate personnel**

  - may include supervisors, clients, colleagues, line management
- Tools and equipment**

  - may include warning signs, chainsaw and components, personal protective equipment and clothing, first aid equipment, maintenance requirements, fuel
- Maintenance**

  - of chainsaw and components may include sharpening and making adjustments as required
- Communication**

  - may include verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language, hand signals
- Environmental conditions**

  - may relate to ground growth, canopy, general forest lean, ground slope, ground hazards, wind speed and direction, wet weather including ice and snow
- Conditions**

  - in which falling will be undertaken include ground slope not more than 15 degrees, moderate wind speed, absence in growth of fallen trees preventing complete fall, works with general supervision available to provide assistance related to planning, falling
- Limitations**

  - may relate to job role and responsibilities, own competency level, industry requirements, own understanding of risk identification processes, own interpretation of legislation, regulations and procedures, complying with OHS requirements
- Assistance**

  - may be required in situations where cuts made may lead to loss of control of tree in falling, to confirm and adjust cutting techniques in response to movement and condition of tree, to help clear trees

## RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

- Visual assessment**
- that hang up during falling
  - may cover size, weight distribution, lean, species, multi leaders, soundness of timber, growth characteristics and stresses

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
3 Assess tree and plan falling	<p>2.4 General factors affecting falling requirements are assessed and specific forest or site risks and hazards identified and controlled</p> <p>3.1 General falling direction and working face are planned to minimise danger and damage to self, others and the environment</p> <p>3.2 Tree falling sequence for individual trees is assessed and progressively planned</p> <p>3.3 Tree to be felled is located and growth is cleared to enable a <i>visual assessment</i> of falling characteristics</p> <p>3.4 Required falling direction and degree of allowable error is assessed and checked</p> <p>3.5 Sequence of cuts to fall tree is planned in accordance with standard falling procedures</p> <p>3.6 Suitable <i>escape route</i> is selected and cleared of growth and other obstacles in accordance with environmental care principles and statutory requirements</p> <p>3.7 Personal <i>limitations</i> in safely falling trees with own skills are assessed and <i>assistance</i> sought from appropriate personnel</p>
4 Fall tree	<p>4.1 All work is conducted using established safe operating practices and in accordance with site procedures</p> <p>4.2 Location and activity of other personnel in the work area is noted and monitored</p> <p>4.3 Cutting techniques used are appropriate for advanced tree falling operations</p> <p>4.4 Unexpected characteristics of tree and other problems are assessed, assistance sought and planning reviewed</p> <p>4.5 Planned escape route is used when tree starts to fall and the fall and movement of tree on ground is monitored until stability is determined</p> <p>4.6 Chainsaw is monitored for operational effectiveness and any faults, malfunctions or problems are reported in accordance with site procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this

**unit**

- Required skills include:**
- comply with legislation, regulations, standards, codes of practice and established safe practices and procedures relating to advanced tree falling operations
  - use and maintain relevant tools, machinery and equipment including chainsaws
  - identify problems and equipment faults and demonstrate appropriate response procedures
  - use appropriate communication and interpersonal techniques and methods with colleagues and others
  - accurately record and report workplace information, and maintain documentation
  - use hand signals with other operators to maintain effective and safe tree falling
  - recognise own limitations in assessing conditions and trees for falling
  - contribute to a tree assessment and plan and fall trees within the range of variables for trees and conditions including techniques for control of falling direction consistent with this range
  - recognise common diseases, pests and nutrition deficiencies
  - calculate slopes and weights in the metric system
- Required knowledge and understanding includes:**
- applicable Commonwealth, State or Territory licensing, legislative, regulatory or certification requirements and codes of practice relevant to advanced tree falling operations
  - organisational and site standards, requirements, policies and procedures relating to advanced tree falling operations
  - principles of cultural diversity and access and equity
  - environmental protection requirements, including the safe disposal of waste material
  - established communication channels and protocols
  - problem identification and resolution
  - types of tools and equipment and procedures for their safe use, operation and maintenance
  - identification and evaluation of structural defects in trees
  - types and purposes of a range of cuts to fall trees
  - hazards of operating a chainsaw and falling trees
  - operational principles and limitations of a chainsaw
  - procedures for the recording, reporting and

- maintenance of workplace records and information
- appropriate mathematical procedures for estimation and measurement

## KEY COMPETENCIES

The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace

Performance Level 1 - at this level, the candidate is required to undertake tasks effectively

Performance Level 2 - at this level, the candidate is required to manage tasks

Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping tasks

Key Competency	Example of Application	Performance Level
How are ideas and information communicated?	By communicating in simple language to confirm work requirements, convey information to colleagues, and report outcomes relating to falling trees	2
How can information be collected, analysed and organised?	By collecting, organising and understanding information required to plan and undertake tree falling	2
How are activities planned and organised?	By organising and conducting tree falling activities in the correct sequence to complete within the designated timeframes	2
How is team work used?	By using effective communication and interpersonal techniques with colleagues and others to maximise confidence, satisfaction and productivity during tree falling operations	2
How are mathematical ideas and techniques used?	By calculating slopes, wind speed and direction time to complete tasks	2

## Evidence Guide

### EVIDENCE GUIDE

**The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package**

#### Overview of assessment

- A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently assess, plan and conduct advanced tree falling operations in accordance with environmental and organisational requirements

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to advanced tree falling operations
- Comply with applicable licensing or certification requirements
- Communicate effectively and work safely with others including maintaining an awareness of other personnel activity in the work area
- Contribute to a tree assessment, plan and undertake advanced tree falling within the range of variables for trees and conditions
- Visually assess trees and determine falling characteristics
- Determine and plan falling sequence for individual trees
- Select and maintain appropriate tools and equipment and recognise faults, problems or malfunctions
- Safely operate and maintain a chainsaw
- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to comply with relevant regulatory or Australian Standards requirements

#### Context of and specific resources for assessment

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package

### Method of assessment

- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to advanced tree falling operations
  - specifications and work instructions
- Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies
- Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

- OHS requirements are to be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:**
- the use of personal protective equipment and clothing
  - safety equipment
  - first aid equipment
  - fire fighting equipment
  - hazard and risk control
  - elimination of hazardous materials and substances
  - safe forest practices including required actions relating to forest fire
  - manual handling including shifting, lifting and carrying
- Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:**
- award and enterprise agreements
  - industrial relations
  - Australian Standards
  - confidentiality and privacy
  - OHS
  - the environment
  - equal opportunity
  - anti-discrimination
  - relevant industry codes of practice
  - duty of care
  - heritage and traditional land owner issues
- Organisational requirements**
- may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)
- Falling**
- may require the use of multiple back-cuts and/or boring techniques and will be undertaken in all conditions for which it is safe including slopes up to the maximum allowed by relevant regulations
- Trees**
- selected for falling include those of any size and condition that are determined can be safely fallen
- Environmental protection**
- may include noise, ground growth, canopy, general

## RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

<b>measures</b>	forest lean, wind speed and direction, fallen trees, density of trees, ground slope, soil and water protection, ground hazards, obstacles. Measures may also include contingencies for modifying operations during wet or other adverse weather conditions
<b>Work plan</b>	<ul style="list-style-type: none"> <li>• is to include information and instructions relevant to tree falling operations including processing location details and trees to be felled and retained. Information may also include general environmental requirements, site plan and environmental features</li> </ul>
<b>Tools and equipment</b>	<ul style="list-style-type: none"> <li>• may include warning signs, chainsaw and components, personal protective equipment and clothing, first aid equipment, maintenance requirements, fuel</li> </ul>
<b>Maintenance</b>	<ul style="list-style-type: none"> <li>• of chainsaw and components may include sharpening and making adjustments as required</li> </ul>
<b>Communication</b>	<ul style="list-style-type: none"> <li>• may include verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language, hand signals</li> </ul>
<b>Environmental conditions</b>	<ul style="list-style-type: none"> <li>• may relate to ground growth, canopy, general forest lean, ground slope, ground hazards, wind speed and direction</li> </ul>

<b>Escape route</b>	<ul style="list-style-type: none"> <li>• clearance may require the assistance from a dozer or</li> </ul>

**RANGE STATEMENT**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

other machine

**Unit Sector(s)**

Not Applicable

**Competency Field**

**Competency Field**                      Forest Growing and Management

# FPIHAR2206B Operate a mobile chipper/mulcher

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit describes the outcomes required to operate a mobile chipping/mulching unit to clean up after felling operations and chip excess branches and timber refuse

General workplace legislative and regulatory requirements apply to this unit; however there are no specific licensing or certification requirements at the time of publication

This unit replaces FPIHAR2206A Operate a mobile chipper/mulcher

## Application of the Unit

**Application of the unit** The unit involves operating a mobile chipper/mulcher in a forest and forest products setting

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

**Prerequisite units**

## Employability Skills Information

**Employability skills** This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. Prepare for mobile chipping/mulching

- 1.1. Applicable *Occupational Health and Safety* (OHS), *environmental*, *legislative* and *organisational requirements* relevant to operating a mobile chipper/mulcher are identified and followed
- 1.2. *Work order* is reviewed and checked with *appropriate personnel*
- 1.3. Type and quantity of *timber refuse* to be *chipped/mulched* are identified and assessed for safe working conditions
- 1.4. Timber refuse assessed as not suitable for chipping/mulching is set aside for recycling or re-use in line with site procedures
- 1.5. *Equipment* is selected appropriate to work requirements and checked for operational effectiveness in line with manufacturer's recommendations
- 1.6. Chipping/mulching activities are planned in line with site procedures, environmental requirements
- 1.7. *Communication* with others is established and maintained in line with OHS requirements

ELEMENT	PERFORMANCE CRITERIA
2. Chip/mulch timber	2.1. <b>Chipping/mulching unit</b> is positioned, secured and set up in line with manufacturer's specifications 2.2. <b>Pre start-up checks</b> are carried out on equipment in line with site requirements 2.3. Timber refuse is fed into the chipper/mulcher at a rate applicable to the <b>capacity</b> of the machinery in line with applicable safe handling techniques 2.4. Timber refuse is chipped to the <b>chip sizes</b> set on the chipping unit and in line with the work order 2.5. Chipping/mulching processes and equipment faults are <b>recorded and reported</b> to the appropriate personnel
3. Conduct operator maintenance	3.1. Equipment lock-out procedures are followed in line with OHS legislation and site procedures 3.2. Chipper/mulcher is checked for blunt or damaged condition 3.3. Components are removed, maintained, adjusted and replaced in line with manufacturer's recommendations 3.4. Chipper/mulcher set-up is assessed and adjusted to suit chipping conditions 3.5. Chipper/mulcher is kept clear of <b>foreign matter</b> and checked to ensure it meets relevant standards prior to use

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit

#### Required skills

- Technical skills sufficient to use and maintain relevant tools, machinery and equipment; efficiently and safely operating a mobile chipper/mulcher
- Communication skills and interpersonal techniques sufficient to interact appropriately with colleagues and others in the workplace
- Literacy skills sufficient to accurately locate, record and report information
- Numeracy skills sufficient to estimate measure and calculate time required to complete a task
- Problem solving skills sufficient to review and accurately identify work

## REQUIRED SKILLS AND KNOWLEDGE

requirements; identify problems and equipment faults and demonstrate appropriate response procedures

### Required knowledge

- Applicable Commonwealth, State or Territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for operating a mobile chipper/mulcher
- Environmental protection requirements, including the safe disposal of waste material and the cleaning of plant, tools and equipment
- Organisational and site standards, requirements, policies and procedures for operating a mobile chipper/mulcher
- Characteristics of trees and timber defects
- Chipping/mulching procedures
- Mobile chipper/mulcher operation and safety
- Chipper/mulcher condition assessment
- Social/community benefit of uses for chipped/mulched timber
- Established communication channels and protocols
- Problem identification and resolution strategies and common fault finding techniques
- Types of tools and equipment and procedures for their use, operation and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace records and information

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently operate a mobile chipper/mulcher within organisational requirements

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include

## EVIDENCE GUIDE

demonstration of:

- following applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice relevant to operating a mobile chipper/mulcher
- following organisational policies and procedures relevant to operating a mobile chipper/mulcher
- operating a mobile chipper/mulcher in line with the work order and within prescribed organisational tolerances
- conducting operator maintenance on a mobile chipping unit

### Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to follow relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to undertaking work applicable to this unit
  - specifications and work instructions

### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge
- Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that

## EVIDENCE GUIDE

competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances

- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### OHS requirements:

are to be in line with applicable Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing
- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe forest practices including required actions relating to forest fire

## RANGE STATEMENT

- Environmental requirements** may include:
- manual handling including shifting, lifting and carrying
  - legislation
  - organisational policies and procedures
  - workplace practices
- Legislative requirements:** are to be in line with applicable Commonwealth, State or Territory legislation, regulations, certification requirements and codes of practice and may include:
- award and enterprise agreements
  - industrial relations
  - Australian Standards
  - confidentiality and privacy
  - OHS
  - the environment
  - equal opportunity
  - anti-discrimination
  - relevant industry codes of practice
  - duty of care
- Organisational requirements** may include:
- legal
  - organisational and site guidelines
  - policies and procedures relating to own role and responsibility
  - quality assurance
  - procedural manuals
  - quality and continuous improvement processes and standards
  - OHS, emergency and evacuation procedures
  - ethical standards
  - recording and reporting requirements
  - equipment use and maintenance and storage requirements
  - environmental management requirements (waste disposal, recycling and re-use guidelines)
- Work order** is to include:
- instructions for the chipping/mulching and despatch of chipped/mulched timber refuse from the work site
- and may include:
- type

## RANGE STATEMENT

- size
- length
- quantity
- grade

and may also include:

- instructions for the environmental monitoring of work and procedures
- environmental care requirements relevant to the work

**Appropriate personnel** may include:

- supervisors
- suppliers
- clients
- colleagues
- managers

**Timber refuse** may include:

- branches
- tree heads
- bark
- other timber waste

**Chipping/mulching**

is the process of converting timber refuse into varying chip sizes using mechanised chipping/mulching units

**Equipment** may include:

- mobile chipping/mulching units
- specific safety attire
- maintenance tools and equipment

and is to include procedures for equipment lock-out, such as protecting operators and co-workers from accidental injury by isolating the machine

**Communication** may include:

- verbal and non-verbal language
- hand or other agreed signals
- eye contact with other operators or personnel
- active listening
- questioning to clarify and confirm understanding
- use of electronic communication devices

**Chipping/mulching unit** may include:

- a truck mounted chipping/mulching unit or trailer mounted chipping/mulching unit feeding into a truck or other form of transportation

## RANGE STATEMENT

and is usually petrol driven, with high powered spinning cutters which shred timber refuse into chips/mulch

### Pre start-up checks

are conducted to ensure:

- equipment has been set-up correctly
- systems are performing accurately and operating to optimum performance

### Capacity may include:

- the capacity of the machinery to cope with certain size diameters of branch
- the speed by which waste is fed into the chipper/mulcher

### Chip sizes

may vary in size, dependent on the customer or work order and the capability of the chipper/mulcher to set chip sizes

### Records and reports may include:

- timber type
- size
- outcomes
- storage locations
- quality outcomes
- hazards
- incidents
- equipment malfunctions

and may be compiled manually or by using a computer-based system or another appropriate organisational communication system

### Foreign matter may include:

- contamination of chip
- stones
- rocks
- metal
- other foreign matter which may blunt the cutters or affect operation of the chipper/mulcher

## Unit Sector(s)

### Unit sector

No sector assigned

## Co-requisite units

Co-requisite units

## Competency field

Competency field      Harvesting and Haulage

# HLTFA201A Provide basic emergency life support

## Modification History

## Unit Descriptor

This unit of competency describes the skills and knowledge required to recognise and respond to life threatening emergencies using basic life support measures only

## Application of the Unit

The skills and knowledge described here enable a first aider to provide an initial response to an emergency in line with practised actions and Australian Resuscitation Council (ARC) Guidelines and/or state/territory regulations, legislation and policies and accepted industry guidelines

Application should be contextualised as required to reflect workplace and community requirements relating to specific risks and hazards and associated injuries

## Licensing/Regulatory Information

## Pre-Requisites

## Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

## Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in *italics* are elaborated in the Range Statement.

## Elements and Performance Criteria

### Elements and Performance Criteria

#### Element

#### Performance Criteria

- 1 Respond in an emergency situation
  - 1.1 Recognise emergency situation and identify **hazards** to health and safety of self and others
  - 1.2 Minimise immediate risk to health and safety of self, casualty and others by isolating any hazard(s)
  - 1.3 Assess casualty and identify injuries, illnesses and conditions
  - 1.4 Assess the need for assistance
- 2 Apply identified first aid procedures
  - 2.1 Reassure casualty in a caring and calm manner and make comfortable using available resources
  - 2.2 Determine and explain the nature of **casualty's injury/condition** and relevant first aid procedures to provide comfort
  - 2.3 Seek consent from casualty or significant other prior to applying first aid management
  - 2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner
  - 2.5 Use **identified first aid procedures** as required in accordance with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements
  - 2.6 Use safe manual handling techniques as required
- 3 Communicate details of the incident
  - 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances and using available means of communication
  - 3.2 Accurately convey assessment of casualty's condition and first aid procedures undertaken to emergency services/relieving personnel
  - 3.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness
  - 3.4 Provide reports, where applicable, in a timely manner, presenting all relevant facts according to established procedures

- 3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
- 4 Evaluate own performance
  - 4.1 Seek feedback from **appropriate clinical expert**
  - 4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents
  - 4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

### Essential knowledge:

Basic anatomy and physiology relating to:

severe bleeding

absence of signs of life:

unconscious

unresponsive

not moving

not breathing normally

choking/airway obstruction

shock

First aid procedures for:

bleeding control

care of unconscious

infection control as it relates to standard precautions

airway management

chest pain  
casualty with no signs of life  
shock  
respiratory distress, including asthma  
severe allergic reaction

#### Chain of survival

How to access emergency response support services/personnel  
Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to  
State/territory regulations, legislation and policies, ARC Guidelines and accepted industry practice relating to currency of skill and knowledge  
Privacy and confidentiality requirements  
Duty of care requirements  
Need to be culturally aware, sensitive and respectful  
Relevant workplace hazards  
Own skills and limitations  
Awareness of stress management techniques and available support

#### **Essential skills:**

Ability to:

Demonstrate first aid casualty management principles:  
assess and minimise danger  
check for response  
maintain casualty's airway, breathing and circulation.

Assess vital signs and responses of casualty

Demonstrate:

safe manual handling of casualty.  
consideration of the welfare of the casualty  
correct procedures for CPR on a resuscitation manikin  
implementation of standard precautions

Plan an appropriate first aid response in line with established first aid principles, policies

and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own level of skills and knowledge

Call an ambulance and/or medical assistance, according to circumstances and report casualty's condition

Identify and minimise hazards to health and safety of self and others in the immediate workplace or community environment

Report details of emergency incident and first aid provided

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

### Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team.

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of CPR knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

### Context and resources required for assessment:

For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

**Access and equity considerations:**

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

**Range Statement****RANGE STATEMENT**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Condition of the casualty must include, but is not limited to:**

Severe bleeding

Absence of signs of life:

unconscious

unresponsive

not moving

not breathing normally

Choking/airway obstruction

Severe allergic reaction

**Identified first aid procedures must include:**

Cardiopulmonary Resuscitation (CPR)

Control severe bleeding

Airway management

Provide assistance with self-administered medications, such as auto-injector, puffer/inhaler in line with state/territory regulations, legislation and policies and any available medical/pharmaceutical instructions

Care of the unconscious person

**Resources and equipment may include:**

First aid kit

Resuscitation mask or barrier

Casualty's medication

Manikin

AED (if available)

Auto-injector

Puffer/inhaler

**A hazard is:**

A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

**Appropriate clinical expert may include:**

Supervisor/manager

Ambulance officer/paramedic

Other medical/health worker

## Unit Sector(s)

## HLTFA301C Apply first aid

### Modification History

Not Applicable

### Unit Descriptor

#### Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

### Application of the Unit

#### Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability Skills** This unit contains Employability Skills

## Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. Assess the situation

1.1 Identify assess and minimise *hazards* in the situation that may pose a risk of injury or illness to self and others

1.2 Minimise immediate *risk* to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements

1.3 Assess casualty and identify injuries, illnesses and conditions

2. Apply first aid procedures

2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness

2.2 Use available *resources and equipment* to make the casualty as comfortable as possible

**ELEMENT****PERFORMANCE CRITERIA**

- 2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner
- 2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort
- 2.5 Seek consent from casualty prior to applying first aid management
- 2.6 Provide *first aid management* in accordance with *established first aid principles* and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements
- 2.7 Seek first aid assistance from others in a timely manner and as appropriate
- 2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures
- 2.9 Use safe manual handling techniques as required
- 2.10 Monitor *casualty's condition* and respond in accordance with effective first aid principles and procedures
- 2.11 Finalise casualty management according to casualty's needs and first aid principles
3. Communicate details of the incident
- 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant *communication media and equipment*
- 3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
- 3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
- 3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
- 3.5 Maintain confidentiality of records and

**ELEMENT****PERFORMANCE CRITERIA**

information in line with privacy principles and statutory and/or organisation policies

## 4. Evaluate own performance

4.1 Seek feedback from *appropriate clinical expert*

4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents

4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

**Required Skills and Knowledge****REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

*Essential knowledge:*

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- ARC Guidelines relating to provision of first aid as outlined
- Awareness of stress management techniques and available support
- First aid management of:
  - abdominal injuries
  - allergic reactions
  - altered and loss of consciousness
  - bleeding
  - burns - thermal, chemical, friction, electrical
  - cardiac arrest
  - casualty with no signs of life
  - chest pain
  - choking/airway obstruction
  - injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries;

## REQUIRED SKILLS AND KNOWLEDGE

- minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- envenomation - snake, spider, insect and marine bites
- environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
- fractures
- medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- near drowning
- poisoning and toxic substances (including chemical contamination)
- respiratory distress
- seizures
- shock
- stroke
- substance misuse - common drugs and alcohol, including illicit drugs
- Social/legal issues:
  - duty of care
  - need to be culturally aware, sensitive and respectful
  - importance of debriefing
  - confidentiality
  - own skills and limitations
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

*continued ...*

### *Essential knowledge (contd):*

- Working knowledge of:
  - basic occupational health and safety requirements in the provision of first aid
  - basic principles and concepts underlying the practice of first aid
  - chain of survival
  - first aiders' skills and limitations
  - infection control principles and procedures, including use of standard precautions
  - priorities of management in first aid when dealing with life threatening conditions
  - procedures for dealing with major and minor injury and illness

### *Essential skills:*

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

## REQUIRED SKILLS AND KNOWLEDGE

This includes the ability to:

- Administer medication in line with state/territory regulations, legislation and policies
- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively in an incident
- Conduct an initial casualty assessment
- Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit *HLTCPR201A Perform CPR*)
- Demonstrate:
  - ability to call an ambulance
  - consideration of the welfare of the casualty
  - safe manual handling
  - site management to prevent further injury
- Evaluate own response and identify appropriate improvements where required
- Follow OH&S guidelines
- Infection control, including use of standard precautions
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this

## EVIDENCE GUIDE

evidence guide should first read the package's assessment guidelines.

### *Critical aspects of assessment:*

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

### *Context and resources required for assessment:*

- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

### *Access and equity considerations:*

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

### *Related units:*

This unit incorporates the content of units:

- HLTCPR201B Perform CPR
- HLTFA201B Provide basic emergency life support

## EVIDENCE GUIDE

### Range Statement

#### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

*Contextualisation to address specific requirements may include:*

- Focus on first aid management of specific types of injury
- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

*Established first aid principles include:*

- Preserve life
- Prevent illness, injury and condition(s) becoming worse
- Promote recovery
- Protect the unconscious casualty

*Vital signs include:*

- Consciousness
- Breathing
- Circulation

*A hazard is:*

- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

## RANGE STATEMENT

*Hazards may include:*

- Physical hazards
- Biological hazards
- Chemical hazards
- Hazards associated with manual handling

*Risks may include:*

- Risks from equipment, machinery and substances
- Risks from first aid equipment
- Environmental risks
- Exposure to blood and other body substances
- Risk of further injury to the casualty
- Risks associated with the proximity of other workers and bystanders
- Risks from vehicles

*Casualty's condition is managed for:*

- Abdominal injuries
- Airway obstruction
- Allergic reactions
- Altered and loss of consciousness
- Bleeding
- Burns - thermal, chemical, friction, electrical
- Chest pain/cardiac arrest
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- Near drowning
- Envenomation - snake, spider, insect and marine bites
- Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
- Fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- No signs of life
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress/arrest
- Seizures
- Shock
- Stroke

## RANGE STATEMENT

- Substance misuse - common drugs and alcohol, including illicit drugs.
- First aid management must take into account applicable aspects of:*
- The setting in which first aid is provided, including:
    - workplace policies and procedures
    - industry/site specific regulations, codes etc.
    - OHS requirements
    - state and territory workplace health and safety legislative requirements
    - location and nature of the incident
    - situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
    - location of emergency services personnel.
  - The use and availability of first aid equipment and resources
  - Infection control
  - Legal and social responsibilities of first aider
- Resources and equipment are used appropriate to the risk to be met and may include:*
- AED
  - First aid kit
  - Auto-injector
  - Puffer/inhaler
  - Resuscitation mask or barrier
  - Spacer device
- Communication media and equipment may include but are not limited to:*
- Telephones, including landline, mobile and satellite phones
  - HF/VHF radio
  - Flags
  - Flares
  - Two way radio
  - Email
  - Electronic equipment
  - Hand signals
- Appropriate clinical expert may*
- Supervisor/manager
  - Ambulance officer/paramedic

**RANGE STATEMENT**

*include:*

- Other medical/health worker

*Documentation may include:*

- Injury report forms
- Workplace documents as per organisation requirements

*Documentation may include recording:*

- Time
- Location
- Description of injury
- First aid management
- Fluid intake/output, including fluid loss via:
  - blood
  - vomit
  - faeces
  - urine
- Administration of medication including:
  - time
  - date
  - person administering
  - dose
- Vital signs

## HLTFA302C Provide first aid in remote situation

### Modification History

HLT07 Version 4	HLT07 Version 5	Comments
HLTFA302B Provide first aid in remote situation	HLTFA302C Provide first aid in remote situation	ISC upgrade changes to remove references to old OHS legislation and replace with references to new WHS legislation. Updated unit codes to First Aid references.

### Unit Descriptor

#### Descriptor

This unit of competency describes the skills and knowledge required to provide first aid to a casualty in a remote and/or isolated situation

### Application of the Unit

#### Application

This unit is appropriate for those undertaking first aid work in remote or isolated workplace situations

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

Not Applicable

## Employability Skills Information

### Employability Skills

This unit contains Employability Skills

## Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. Prepare to respond to emergency in a remote situation

1.1 *Prepare for isolated travel* or work, accounting for expected contingencies

1.2 Assess casualty's condition and determine appropriate response in order to minimise hazards and determine need for medical assistance

1.3 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, transport availability and casualty's condition

2. Provide first aid in a remote situation

2.1 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort

2.2 Seek consent from casualty prior to applying first aid management

2.3 Provide first aid response to address casualty's condition and in accordance with effective first aid principles

2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner

2.5 Monitor casualty's condition and undertake ongoing first aid procedures as required

**ELEMENT****PERFORMANCE CRITERIA**

- 2.6 Calmly provide information to reassure casualty during the wait for medical assistance, adopting a communication style to match the casualty's level of consciousness
- 2.7 Provide shelter from elements in accordance with environmental conditions
- 2.8 Document condition of casualty over time to assist in on-going management
3. Work in conjunction with medical and emergency services support
- 3.1 Establish communication links to medical services, using relevant communication equipment to ensure prompt control action is undertaken
- 3.2 Request ambulance support or appropriate medical assistance according to relevant circumstances
- 3.3 Administer medication under direct instruction from an *authorised health worker* as required
- 3.4 Assist in the evacuation of the casualty by following directions given by emergency services as required
4. Evaluate the incident
- 4.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties
- 4.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs
- 4.3 Formulate and review contingency planning to identify and select improved or alternative management principles and procedures as required

**Required Skills and Knowledge****REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### *Essential knowledge:*

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- Awareness of stress management techniques and available support
- Infection control principles and procedures, including use of standard precautions
- Principles for evaluating management options relating to transporting casualty and/or waiting for assistance
- Principles of identifying and preparing area for safe evacuation (including aero-medical evacuation)
- Principles of preparing for providing first aid in an area remote from ready assistance, including identifying and preparing supplies to address contingencies specific to different types of situation
- Understanding of WHS principles
- Working knowledge of communication systems, equipment and methods as available in the remote situation

### *Essential skills:*

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Accurately listen to, clarify and apply medical instructions
- Administer medication under direct instruction from an authorised health worker and in accordance with State/Territory regulations, legislation and policies
- Communicate effectively and assertively and show leadership in an incident
- Conduct an initial casualty assessment in a remote situation
- Demonstrate:
  - adequate infection control procedures, including standard precautions
  - identification and preparation of area for safe evacuation (including aero-medical evacuation)
  - safe manual handling
- Evaluate available options for transporting or maintaining condition of casualty
- Improvise treatment and associated resources
- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in a remote

## REQUIRED SKILLS AND KNOWLEDGE

situation

- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own level of skills and knowledge
- Prepare a written incident report or provide information to enable preparation of an incident report
- Transport casualty safely using available methods
- Undertake contingency planning in relation to providing a first aid response in a remote situation
- Use available communication methods and equipment to access medical assistance
- Use available resources effectively to manage pain
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

*Critical aspects of assessment:*

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, Australian Resuscitation Council and industry guidelines
- Assessment should utilise aspects of actual or simulated remote situation relevant to work or community context

*Method of assessment may*

- Skills in performing first aid procedures are to be

## EVIDENCE GUIDE

*include:*

assessed through demonstration, with questioning to confirm essential knowledge

- Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre

*Access and equity considerations:*

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

*Related unit:*

This unit should be assessed either after or in conjunction with achievement of the following related competency unit:

- HLTFA311A Apply first aid

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

*Contextualisation to address*

- Focus on first aid management of specific types of

## RANGE STATEMENT

*specific requirements may include:*

injury

- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

*Preparation for isolated/remote travel may include:*

- Selection of relevant communication equipment
- Accessing relevant first aid supplies and resources to cater for environmental conditions
- Considering access/egress opportunities
- Notifying relevant authorities of travel plans

*In remote/isolated situations consideration to travel or wait would depend upon:*

- Severity of injury
- Time required for medical assistance to arrive
- Whether movement might hinder rescue
- Advice given by authorised health worker
- Whether contact with medical and/or emergency services has been achieved

*Documentation, especially in remote/isolated situations may include recording:*

- Time
- Location
- Description of injury
- First aid management
- Fluid/oral intake/output, including fluid loss via:
  - blood
  - vomit
  - faeces
  - urine
- Administration of medication including time, date, person administering, dose
- Vital signs

*Authorised health worker may include:*

- Paramedic/ambulance officer
- General practitioner
- Nurse practitioner

## Unit Sector(s)

Not Applicable

## **LGACOM502B Devise and conduct community consultations**

### **Modification History**

Not applicable.

### **Unit Descriptor**

#### **Unit Descriptor**

This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

### **Application of the Unit**

#### **Application of the Unit**

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

### **Licensing/Regulatory Information**

Not applicable.

### **Pre-Requisites**

#### **Prerequisite Unit/s**

### **Employability Skills Information**

#### **Employability Skills**

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1. **Devise consultation strategies**

- 1.1. A range of consultation strategies is identified and assessed for suitability.
- 1.2. Interested and affected parties are identified.
- 1.3. Resources required to conduct consultation are assessed.
- 1.4. Consultation strategies are chosen that enable and encourage relevant groups or individuals to be involved.
- 1.5. Legislative and council requirements are reviewed to ensure strategies meet all criteria.

#### 2. **Conduct consultations**

- 2.1. Information is prepared that is clear, accurate and appropriate to the needs of all parties.
- 2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved.
- 2.3. Information is presented to affected parties at an appropriate time and place.
- 2.4. Access and equity requirements are implemented in the consultations.
- 2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame.
- 2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.

#### 3. **Record, analyse and report on results**

- 3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed.
- 3.2. Appropriate suggestions for improvement are

## ELEMENT

## PERFORMANCE CRITERIA

incorporated into design parameters.

3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised.

3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern.

3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.

3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

## Evidence Guide

### EVIDENCE GUIDE

<b>Overview of assessment requirements</b>	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
<b>Critical aspects of evidence to be considered</b>	The demonstrated ability to devise and conduct community consultations where: <ul style="list-style-type: none"> <li>• consultation ensures council's image or reputation is maintained or enhanced</li> <li>• community consultation produces valid and useful information.</li> </ul>
<b>Context of assessment</b>	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
<b>Relationship to other units(prerequisite or co-requisite units)</b>	Prerequisite units: nil. Co-requisite units: nil.
<b>Method of assessment</b>	The following assessment methods are suggested: <ul style="list-style-type: none"> <li>• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies</li> <li>• written and/or oral questioning to assess knowledge and understanding</li> <li>• completion of workplace documentation</li> <li>• third-party reports from experienced practitioners</li> <li>• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.</li> </ul>
<b>Evidence required for demonstration of consistent performance</b>	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
<b>Resource implications</b>	Access to a range of real or simulated consultation processes including:

## EVIDENCE GUIDE

- public and community meetings and forums
- surveys and door knocks
- appropriate communications equipment and aids such as overhead projectors and computer-based presentations.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

#### Access and equity may include:

- subject matter
- manner in which consultations are conducted
- physical accessibility
- community profile.

#### Enabling and encouraging relevant groups to be involved may include:

- physical accessibility
- diverse language needs
- culture, including Indigenous, youth and non-English speaking background
- physical environment
- number of people.

#### Information may include:

- written and oral records
- anecdotes
- reports
- instructions
- directions from supervisor or management
- interviews
- formal and informal team meetings.

#### Interested and affected parties may include:

- community groups
- other authorities
- individuals
- emergency authorities (police, fire and ambulance)
- private sector business interests
- special interest groups
- experts.

#### Resources may include:

- human
- financial
- locations.

## RANGE STATEMENT

**Consultation strategies may include:**

- public meetings
- phone-ins
- questionnaires
- informal gatherings
- door knocks
- council meetings.

**Legislation may include:**

- local government
- anti-discrimination
- planning.

**Presentation of information may include:**

- graphics
- models
- computer animations
- video displays
- overhead transparencies
- handouts
- display plans
- interpreter service.

# LGALAND504A Undertake effective consultation with Indigenous people on matters of cultural heritage

## Modification History

LGALAND504A Release 2: Layout adjusted.

LGAGLAND504A Release 1: Primary release.

## Unit Descriptor

This unit covers undertaking effective consultation with Aboriginal or Torres Strait Islander people on matters relating to their cultural heritage.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 <b>Conduct background research</b>	<p>1.1 Previous Indigenous cultural heritage and resource surveys are identified and reviewed.</p> <p>1.2 Relevant commonwealth and state or territory legislation and peak local government associations and council policies are researched and documented.</p> <p>1.3 Extent to which cultural heritage of other non-Indigenous cultures should be acknowledged is identified and taken into consideration.</p>
2 <b>Identify the correct Indigenous people that are authorised to speak for a place</b>	<p>2.1 <i>Indigenous people with rights and interests in a place</i> are identified through the traditional owners, especially those authorised to speak for a place.</p> <p>2.2 Both men and women with rights and interests in an area or place are identified because men and women may be responsible for different heritage places and values and may need to be consulted separately.</p> <p>2.3 Other Indigenous people are identified who may not necessarily be traditional owners but who have interests in a place.</p> <p>2.4 Indigenous people from surrounding areas who may be affected by a project or activity are identified and consulted.</p> <p>2.5 <i>Protocols</i> that Indigenous people have established for consultation are identified and adhered to throughout the process.</p> <p>2.6 Consultation on each new project is undertaken, unless traditional owners and other Indigenous people agree that this is not necessary.</p> <p>2.7 Non-Indigenous people with rights or interests in the place are identified and consulted.</p>
3 <b>Consult with relevant Indigenous people to discuss the project or activity</b>	<p>3.1 <i>Potential implications of the project or activity</i> are outlined factually and clearly.</p> <p>3.2 All <i>relevant documentation and information</i> are provided to the traditional owners and all other Indigenous people with rights and interests in a place.</p> <p>3.3 Sufficient time is allowed for all Indigenous people to decide whether they wish to become involved in the activity or project and to provide informed consent.</p> <p>3.4 All Indigenous groups with an interest in a place are provided with the same information and given sufficient time to provide informed consent.</p> <p>3.5 Where groups are in dispute, a process for developing</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	separate but consistent and similar agreements is established.
<b>4 Establish a process for addressing Indigenous cultural heritage matters</b>	<p>4.1 Manner, timing and level of consultation and involvement with the project or activity are agreed.</p> <p>4.2 The copyright holders of any work undertaken with Indigenous people and the management regime for Indigenous heritage places are identified.</p> <p>4.3 Need for separate reports for male and female traditional owners and a further report that is publicly available is established.</p> <p>4.4 Dissemination of reports is carried out effectively.</p> <p>4.5 The process for obtaining informed consent for displaying any gathered information is identified and agreed.</p> <p>4.6 Protocols and agreements are formalised and documented.</p> <p>4.7 Indigenous people are involved in the development of any terms of reference for, and selection of, consultants.</p> <p>4.8 Resources required to maintain community involvement are identified and secured.</p> <p>4.9 Relevant documentation for council is prepared, including presentation of alternative options.</p>
<b>5 Consult with relevant Indigenous people in identifying their cultural heritage places and values</b>	<p>5.1 Commonwealth and state or territory laws relating to Aboriginal and Torres Strait heritage are complied with by obtaining necessary permits for surveys and other activities required to identify Indigenous heritage values.</p> <p>5.2 Sensitive information collected in the course of identifying Indigenous heritage places and values is protected from further unnecessary disclosure.</p> <p>5.3 Details relating to custodians of information are recorded and protected from further unnecessary disclosure.</p>
<b>6 Implement project or activity</b>	<p>6.1 Meetings are held with identified stakeholders that enable Indigenous people to explain issues relating to Indigenous heritage to non-Indigenous stakeholders.</p> <p>6.2 Processes for mediation and dispute resolution are identified and established.</p> <p>6.3 A precautionary approach is identified in cases where Indigenous people refuse to be involved in a project.</p> <p>6.4 A process to prevent damage or desecration to any Indigenous heritage place is identified and established.</p> <p>6.5 Proposal or activity is revised or rejected in light of Indigenous people not agreeing because of unacceptable impact on their cultural heritage.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- oral and written communication
- cross-cultural competence
- gender and disability
- evaluation
- decision making
- research
- networking
- negotiation and dispute resolution

### Required Knowledge

- cultural context
- community controls
- location and resources
- organisational processes
- equity and diversity principles
- legal requirements

## Evidence Guide

**Overview of assessment requirements** A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

**Critical aspects of evidence to be considered** The demonstrated ability to:

- conduct research into cultural heritage and protect any sensitive information collected in the course of the research process
- identify Indigenous people with rights and interests in a place
- meet with Indigenous people to discuss a project or activity

and reach agreement about involvement and consent to their involvement in the project or activity

- establish a process for addressing Indigenous cultural heritage matters in relation to a project or activity.

### **Context of assessment**

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

### **Relationship to other units (prerequisite or co-requisite units)**

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

### **Method of assessment**

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

### **Evidence required for demonstration of consistent performance**

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

### **Resource implications**

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

## **Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in

the Performance Criteria is detailed below.

- Indigenous people with rights and interests in a place*** may include:
- traditional owners
  - men
  - women
  - Indigenous people authorised to speak for a place
- Protocols*** may include:
- use of interpreters
  - talking to the appropriate people
  - laws and customs relating to places
  - respecting family, kinship and clan relationships
- Non-Indigenous people with rights or interests in a place*** may include:
- landholders
  - lessees
  - tourists and recreational users
  - state or territory government agencies
  - commonwealth departments and agencies
- Potential implications of the project or activity*** may include:
- economic or financial
  - cultural
  - social
  - environmental
  - educational
  - others
- Relevant documentation and information*** may include:
- maps
  - reports

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. **Capture animals or reptiles**
2. **Assess transport or care needs**
3. **Impound animals or reptiles**
4. **Monitor or care for animals or reptiles**
5. **Release animals or reptiles to owners/carers or**

- 1.1. Response to request for assistance is timely and efficient use of resources is observed.
- 1.2. Traffic control precautions are used and access to incident site is controlled to ensure safety of public.
- 1.3. Safe and humane methods of handling animals or reptiles are observed.
- 1.4. Where appropriate, animals or reptiles are disposed of in accordance with legislative and council requirements and relevant statutes.
- 2.1. Transport or intermediate care is provided according to protocols or legislation.
- 2.2. Containment and loading are secure and safe.
- 2.3. Temporary holding facilities are arranged or negotiated with landowners where necessary.
- 3.1. Impounding decision is consistent with legislative and council requirements.
- 3.2. Ownership of animals is determined using council records or stock brands.
- 3.3. Advisory/penalty notices are issued according to council regulations.
- 4.1. Feeding and handling of animals during care is undertaken in accordance with pound procedures and legislative and council requirements.
- 4.2. Safe work practices, procedures and environmental conditions are observed during handling, monitoring and care duties.
- 5.1. Decision to release or restore animal to environment is in accordance with relevant legislation and procedures.
- 5.2. Auction of unclaimed stock is performed according to

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<p><b>return to environment</b></p> <p>6. <b>Report on animals or reptiles that are captured, impounded or disposed of</b></p>	<p>council procedures.</p> <p>5.3.Recovery of costs and revenue is assessed and enforced according to relevant legislation and procedures.</p> <p>6.1.Reports containing accurate information drawn from council registers are forwarded to relevant officers or authorities.</p>

Hidden text

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit

#### Required Skills

- computers
- video, voice recorders and radio communication
- preparing and issuing instructions and/or explanations to the public
- reporting to council.

#### Required Knowledge

- animal and reptile behaviour
- predators
- dominance
- fear
- aggression
- applicable impounding techniques
- animal and reptile handling and disabling techniques
- animal and reptile dietary and impounding needs
- routine medicinal, chemical and dipping application
- animal health treatment
- humane disposal techniques
- safe and effective use of firearms
- stock brands
- identification tags
- microchip reading
- local area geography
- terrain

## REQUIRED SKILLS AND KNOWLEDGE

- urban and rural navigation
- relevant statutes
- notice-serving process
- court evidence
- traffic control licensing requirements and direction.

Hidden text

## Evidence Guide

### EVIDENCE GUIDE

#### Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

#### Critical aspects of evidence to be considered

Impounding techniques used are appropriate to animal or reptile species and the condition of the animal or reptile.

Assessments of animal or reptile health and condition, and the appropriate disposal of animals or reptiles, are in accordance with council policies and procedures.

Traffic control is in accordance with relevant licensing requirements.

Use of firearms is in accordance with relevant licensing requirements.

Notices are served in accordance with council regulations.

Safe work practices and concern for public safety are displayed by care and control staff.

#### Context of assessment

On the job or in a simulated work environment.

Written or oral testing.

#### Relationship to other units (prerequisite or co-requisite units)

Prerequisite units: nil.

Co-requisite units: nil.

## EVIDENCE GUIDE

### Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

### Evidence required for demonstration of consistent performance

Competency in duties may be displayed with domestic animals, livestock, wildlife or reptiles.

### Resource implications

Access to a workplace or simulated environment that encompasses impounding processes, techniques and equipment.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

### Animals or reptiles may include:

- domestic pets
- livestock
- feral animals
- native animals
- reptiles.

### Capture or control may include:

- traps
- poles and ropes
- tongs
- tranquilliser guns
- firearms
- vehicles
- loading and yarding
- health, condition and behaviour of animal or reptile from

## RANGE STATEMENT

**Transport may include:**

**Ownership issues may include:**

- observation or reports
- supervision of, or communication to, other staff or agency personnel
- disposal of deceased animals or reptiles
- dedicated or contracted transport
- appropriate for care and human safety.
- verification of claims to ownership by such things as tags or microchips
- recovery of costs relating to transport, sustenance and penalties.

## MEM05004C Perform routine oxy acetylene welding

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers preparing materials and performing routine oxy acetylene welding.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels.</p> <p>Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, OHS regulations and/or licensing requirements, Unit MEM05022C (Perform advanced welding using oxy acetylene process) should be selected.</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 2</b></p>
--------------------------------	---

### Licensing/Regulatory Information

Refer to Application of the Unit

### Pre-Requisites

<b>Prerequisite units</b>	

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected.
4. Perform routine welding using <i>oxy acetylene</i>	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

#### Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

<b>EVIDENCE GUIDE</b>	
Guidelines for the Training Package.	
<b>Overview of assessment</b>	A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
<b>Context of and specific resources for assessment</b>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
<b>Method of assessment</b>	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
<b>Guidance information for assessment</b>	

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Materials</b>	Mild and low carbon steel and cast iron
<b>Prepared</b>	Preheating, setting up jigs, fixtures, clamps, joint preparation
<b>Equipment</b>	Hoses, blowpipes, regulators
<b>Consumables</b>	Filler rods, fluxes
<b>Oxy acetylene</b>	The term 'oxy-acetylene' is used here to describe a range of fuel gases, including acetylene, LPG, hydrogen etc.
<b>Cleaned</b>	Fluxes

## MEM05007C Perform manual heating and thermal cutting

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers performing manual heating, thermal cutting and gouging including the assembly and disassembly and operation of the equipment on a range of materials (ferrous, non-ferrous and non-metallic) using a variety of methods.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to manual, straight line cutting standards. Manual or automatic processes are used to cut and heat to specifications. Cutting may include flame gouging by hand. All work is carried out to legislative and regulatory requirements. Predetermined standards of quality and safety are observed and work is carried out following standard operating procedures.</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 2</b></p>
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assemble/disassemble plant and equipment	1.1. Accessories and equipment are correctly selected and assembled for manual heating and thermal cutting.
2. Operate heating and thermal cutting equipment	2.1. Cutting process and/or procedure appropriate for material is selected. 2.2. All safety procedures are observed. 2.3. Equipment start-up procedures are followed correctly to standard operating procedures. 2.4. Equipment adjustments are made correctly using standard operating procedures. 2.5. Appropriate cutting allowances are made. 2.6. Material is used in the most economical way. 2.7. Defects are identified and corrective action is taken to standard operating procedures. 2.8. Material is heated and cut to specification.

ELEMENT	PERFORMANCE CRITERIA
	2.9.Shape/size/length is to accepted workplace standards.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings
- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

#### Required knowledge

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment

## REQUIRED SKILLS AND KNOWLEDGE

- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to perform manual heating and thermal cutting.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with manual heating/thermal cutting or other units requiring the exercise of the skills and knowledge covered by this unit.

<b>EVIDENCE GUIDE</b>	
<b>Method of assessment</b>	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questions should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Cutting</b>	Use of hand held and self-propelled straight line cutters
<b>Process</b>	Fuel gas, oxy fuel gas and air fuel gas
<b>Material</b>	Various thicknesses and types including ferrous, non-ferrous and non-metallic materials

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Correct electrodes are selected to suit application and settings.
4. Perform routine welding using MMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- preparing materials and electrodes
- setting up welding equipment
- welding with MMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- performing measurements for joint preparation and routine MMAW

#### Required knowledge

Look for evidence that confirms knowledge of:

- material and equipment preparation
- properties and characteristics of materials and consumables
- weld characteristics
- equipment set-up and settings
- MMAW processes and properties
- post-welding treatments
- safe welding practices
- use and application of personal protective equipment

## MEM05015D Weld using manual metal arc welding process

### Modification History

Not Applicable

### Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit of competency covers the preparation, positioning, fixing, and manual welding techniques associated with general trade level welding using manual metal arc welding (MMAW) equipment including the selection and set up of the equipment appropriate to both the material and the weld to be performed, carrying out the MMAW to prescribed standards, and examining for and correcting defects, in a range of welded fabrications.</p>
-------------------------------	--

### Application of the Unit

<p><b>Application of the unit</b></p>	<p>This unit of competency applies to welds associated with heavy or light metal fabrications. Welds are fillet and butt welds in all positions on a range of ferrous and non-ferrous materials that may include carbon steel or stainless steel. Weld quality would conform to Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent.</p> <p>This unit has been primarily developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade level skills in MMAW. It may also apply to other trade occupations requiring higher level MMAW welding skills.</p> <p>Where manual thermal processes associated with preparation, pre-heat and/or post-heat are required, MEM05007C Perform manual heating and thermal cutting and/or MEM05008C Perform advanced manual thermal cutting, gouging and shaping should be considered for selection.</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 4</b></p>
---------------------------------------	--

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

Prerequisite units		
<b>Path 1</b>	MEM05012C	Perform routine manual metal arc welding
	MEM05051A	Select welding processes
	MEM05052A	Apply safe welding practices
	MEM12023A	Perform engineering measurements
	MEM18001C	Use hand tools
	MEM18002B	Use power tools/hand held operations

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials for manual metal arc welding (MMAW)	1.1. Weld requirements are identified from specifications and/or drawings 1.2. Materials are correctly prepared 1.3. Materials are assembled/aligned to specification, where required
2. Select welding equipment and consumables	2.1. Welding equipment and electrodes appropriate to the material and the weld are identified and selected
3. Assemble and set up welding equipment	3.1. Welding equipment is assembled and set up
4. Minimise and rectify distortion	4.1. Appropriate distortion prevention measures are selected and applied 4.2. Distortion is rectified
5. Weld to job specification using MMAW	5.1. Weld deposit is to specification 5.2. Joints are cleaned to specifications
6. Ensure weld conformance	6.1. Defects are rectified with minimum loss of sound metal using correct techniques and tools 6.2. Weld joints are visually inspected for conformance to specifications
7. Where required, maintain weld records	7.1. Where required, weld records are completed correctly

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent
- selecting and using appropriate tools and equipment

## REQUIRED SKILLS AND KNOWLEDGE

- using a variety of welding machines and electrodes
- identifying and rectifying weld defects
- applying techniques for distortion prevention and rectification
- cleaning welds
- reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings
- recording routine information including routine weld records related to MMAW onto proformas and standard workplace forms
- following oral instructions
- measurement skills relating to joint preparation and MMAW

### Required knowledge

Required knowledge includes:

- material preparation
- joint preparations
- electrode classification
- causes of distortion for materials within the scope of this unit
- causes of defects and methods of rectification
- the relationships between amperage, electrode and material
- safe welding practices
- use and application of personal protective equipment for MMAW

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials, select and set up the welding equipment, carry out MMAW and examine for and correct defects, in a range of welding activities associated with MMAW. Competency in this unit cannot be awarded until all prerequisites have been satisfied.

#### Critical aspects for assessment and evidence required to demonstrate

Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in

<b>EVIDENCE GUIDE</b>	
<b>competency in this unit</b>	<p>this unit of competency in new and different workplace situations and contexts. Critical aspects of assessment and evidence include:</p> <ul style="list-style-type: none"> <li>• following all safety procedures to protect self, other workers and members of the public</li> <li>• identifying and interpreting specifications for MMA welding including Australian Standard 1554 General Purpose</li> <li>• interpreting welding specifications including standard welding symbols used to show weld procedure</li> <li>• selecting appropriate weld preparation methods for material and position of welds.</li> <li>• preparing materials, setting up of jigs, fixtures, clamps, etc. and joint preparation including bevelling</li> <li>• consistently welding different ferrous and non-ferrous materials to AS 1554 General Purpose or equivalent</li> <li>• identifying defects as described in the range statement across a range of welded materials</li> <li>• rectifying defects.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Welding to AS 1554 General Purpose or equivalent requires both theoretical knowledge and high level practical skills. The assessment process must be designed to identify consistent performance to the standard and the specifications across a range of materials and positions. The assessment must also identify a level of workplace performance in terms of defect rates and weld failure rates. It is recommended that assessment involve demonstrations of competency under both workshop and site conditions. This means that the ideal assessment environment is either on the job or a combination of both on and off the job.</p> <p>The competencies covered by this unit may be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p>
<b>Method of assessment</b>	<p>Typically an Engineering Tradesperson - Fabrication and other tradespersons engaged in welding are required to exercise MMAW skills and techniques across a range of jobs and specifications.</p> <p>A single assessment event is not appropriate. On the job assessment should be included as part of the assessment</p>

<b>EVIDENCE GUIDE</b>	
	<p>process wherever possible. Where assessment occurs off the job, judgement must consider evidence of the candidate's performance in a productive work environment that includes a sufficient range of appropriate tasks and materials to cover the scope of application for this unit.</p> <p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
<b>Guidance information for assessment</b>	<p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with welding using MMAW process or other units requiring the exercise of the skills and knowledge covered by this unit.</p> <p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

<b>RANGE STATEMENT</b>	
<b>Welds</b>	Welds include fillet and butt welds carried out in all positions
<b>Materials</b>	Materials may include ferrous materials including carbon or stainless steel, as well as non-ferrous metals and alloys suitable for MMA welding
<b>Prepared</b>	Preparation of materials may include: <ul style="list-style-type: none"> <li>• pre-heating</li> <li>• setting up of jigs, fixtures and clamps</li> <li>• joint preparation (e.g. bevelling)</li> </ul>
<b>Equipment</b>	Equipment may include AC or DC welding machines
<b>Distortion prevention measures</b>	Distortion prevention measures may include: <ul style="list-style-type: none"> <li>• pre heating</li> <li>• setting up of jigs, fixtures and clamps</li> </ul>
<b>Rectified</b>	Rectified refers to oxy acetylene, air arc equipment and grinding devices
<b>Defects</b>	Defects may include: <ul style="list-style-type: none"> <li>• porosity</li> <li>• slag inclusions</li> <li>• discontinuities</li> <li>• lack of penetration</li> <li>• undercut</li> </ul>

## MEM05017D Weld using gas metal arc welding process

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the preparation, positioning, fixing, and manual welding techniques associated with general trade level welding using gas metal arc welding (GMAW) equipment including the selection and set up of the equipment appropriate to both the material and the weld to be performed, carrying out the GMAW to prescribed standards, and examining for and correcting defects, in a range of welded fabrications.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit of competency applies to welds associated with heavy or light metal fabrications. Welds are fillet and butt welds in all positions on a range of ferrous and non-ferrous materials that may include carbon steel or stainless steel. Weld quality would conform to Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent.</p> <p>This unit has been primarily developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade level skills in GMAW. It may also apply to other trade occupations requiring higher level GMAW welding skills.</p> <p>Where manual thermal processes associated with preparation, pre-heat and/or post-heat are required, MEM05007C Perform manual heating and thermal cutting and/or MEM05008C Perform advanced manual thermal cutting, gouging and shaping should be considered for selection.</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 4</b></p>
--------------------------------	--

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

Prerequisite units		
<b>Path 1</b>	MEM05050B	Perform routine gas metal arc welding
	MEM05051A	Select welding processes
	MEM05052A	Apply safe welding practices
	MEM12023A	Perform engineering measurements
	MEM18001C	Use hand tools
	MEM18002B	Use power tools/hand held operations

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials for gas metal arc welding (GMAW)	1.1. Weld requirements are identified from specifications and/or drawings 1.2. Material is correctly prepared 1.3. Materials are assembled/aligned to specification where required
2. Select welding components and consumables	2.1. Welding machine settings, accessories and consumables are identified and selected
3. Assemble and set up welding equipment	3.1. Welding equipment is assembled and set up
4. Minimise and rectify distortion	4.1. Appropriate distortion prevention measures are selected and applied 4.2. Distortion is rectified
5. Weld to job specification using GMAW	5.1. Weld deposit is to specifications 5.2. Joints are cleaned to specifications
6. Ensure weld conformance	6.1. Weld joints are visually inspected for conformance to specifications 6.2. Defects are removed with minimum loss of sound metal using correct and appropriate techniques and tools
7. Maintain weld records as required	7.1. Weld records are completed correctly

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent
- selecting and using appropriate tools and equipment

## REQUIRED SKILLS AND KNOWLEDGE

- using a variety of welding machines and electrodes
- identifying and rectifying weld defects
- applying techniques for distortion prevention and rectification
- cleaning welds
- reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings
- recording routine information including routine weld records related to GMAW onto proformas and standard workplace forms
- following oral instructions
- measurement skills relating to joint preparation and GMAW

### Required knowledge

Required knowledge includes:

- types of gases and their uses
- the relationships between amperage/wire feed, voltage, gas flow, electrode and material
- the application of weld metal transfer (short arc, spray etc.)
- correct welding machine, leads, hand pieces and electrodes
- material preparation
- joint preparations
- electrode classification
- causes of distortion for materials within the scope of this unit
- safe welding practices
- use and application of personal protective equipment for GMAW

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials, select and set up the welding equipment, carry out GMAW and examine for and correct defects, in a range of welding activities associated with GMAW. Competency in this unit cannot be awarded until all prerequisites have been satisfied.

<b>EVIDENCE GUIDE</b>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different workplace situations and contexts. Critical aspects of assessment and evidence include:</p> <ul style="list-style-type: none"> <li>• following all safety procedures to protect self, other workers and members of the public</li> <li>• identifying and interpreting specifications for GMAW including Australian Standard 1554 General Purpose</li> <li>• interpreting welding specifications including standard welding symbols used to show weld procedure</li> <li>• selecting appropriate weld preparation methods for material and position of welds.</li> <li>• preparing materials, setting up of jigs, fixtures, clamps, etc. and joint preparation including bevelling</li> <li>• consistently welding different ferrous and non-ferrous materials to AS 1554 General Purpose or equivalent</li> <li>• identifying defects as described in the range statement across a range of welded materials</li> <li>• rectifying defects.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Welding to AS 1554 General Purpose or equivalent requires both theoretical knowledge and high level practical skills. The assessment process must be designed to identify consistent performance to the standard and the specifications across a range of materials and positions. The assessment must also identify a level of workplace performance in terms of defect rates and weld failure rates. It is recommended that assessment involve demonstrations of competency under both workshop and site conditions. This means that the ideal assessment environment is either on the job or a combination of both on and off the job.</p> <p>The competencies covered by this unit may be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p>
<p><b>Method of assessment</b></p>	<p>Typically an Engineering Tradesperson - Fabrication and other tradespersons engaged in welding are required to exercise GMAW skills and techniques across a range of jobs and specifications.</p>

<b>EVIDENCE GUIDE</b>	
	<p>A single assessment event is not appropriate. On the job assessment should be included as part of the assessment process wherever possible. Where assessment occurs off the job, judgement must consider evidence of the candidate's performance in a productive work environment that includes a sufficient range of appropriate tasks and materials to cover the scope of application for this unit.</p> <p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
<b>Guidance information for assessment</b>	<p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with welding using GMAW process or other units requiring the exercise of the skills and knowledge covered by this unit.</p> <p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>

## Range Statement

<b>RANGE STATEMENT</b>
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work</p>

<b>RANGE STATEMENT</b>	
situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Weld</b>	Welds include fillet and butt welds carried out in all positions
<b>Materials</b>	Materials may include ferrous materials including carbon or stainless steel, as well as non-ferrous metals and alloys suitable for GMAW
<b>Prepared</b>	Preparation of materials may include: <ul style="list-style-type: none"> <li>• pre-heating</li> <li>• setting up of jigs, fixtures and clamps</li> <li>• joint preparation (e.g. bevelling)</li> </ul>
<b>Equipment</b>	Equipment may include AC or DC welding machines
<b>Distortion prevention measures</b>	Distortion prevention measures may include: <ul style="list-style-type: none"> <li>• pre-heating</li> <li>• setting up of jigs, fixtures and clamps</li> </ul>
<b>Rectified</b>	Rectified refers to oxy acetylene, air arc equipment and grinding devices
<b>Defects</b>	Defects may include: <ul style="list-style-type: none"> <li>• porosity</li> <li>• slag inclusions</li> <li>• discontinuities</li> <li>• lack of penetration</li> <li>• undercut</li> </ul>

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. The locations of welds are identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected to suit application.
4. Perform routine welding using GTAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned to standard operating procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with GTAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- using measurement skills for joint preparation and routine GTAW

#### Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- properties and characteristics of materials and consumables
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- safe welding practices
- use and application of personal protective equipment for routine GTAW

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to perform routine gas tungsten arc welding (GTAW).

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify properties of commonly used metals	1.1. Materials to be welded are identified. 1.2. Characteristics and properties of commonly used materials are identified. 1.3. Uses and purposes of commonly used materials are identified. 1.4. Basic metallurgical characteristics are considered.
2. Identify and provide for welding contingencies	2.1. Information relevant to welding processes is sourced as required. 2.2. Potential contingencies are identified and solutions are considered.
3. Identify appropriate welding processes	3.1. Welding processes are identified and selected to achieve specified outcomes with selected metals. 3.2. Effects of welding processes on materials are identified. 3.3. Distortion prevention measures are identified. 3.4. Alternative joining methods for job are identified and assessed for relevancy.
4. Identify cleaning and preparation requirements	4.1. Processes for cleaning and preparing metals are identified. 4.2. Role of contaminants in welding flaws is explained. 4.3. Safety requirements for chemicals and other

ELEMENT	PERFORMANCE CRITERIA
	materials are identified and utilised in accordance with manufacturers' specifications and legislative requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task-related information

#### Required knowledge

Look for evidence that confirms knowledge of:

- hazards and control measures associated with welding practices, including housekeeping
- safe work practices and procedures
- properties and characteristics of commonly used metals and materials
- basic metallurgy principles
- information resources
- chemical content of fumes emitted by welding processes
- uses and purposes of various metals
- distortion prevention measures for various metals

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

<b>EVIDENCE GUIDE</b>	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	A person who demonstrates competency in this unit must be able to select welding processes.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
<b>Context of and specific resources for assessment</b>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with selecting welding processes or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
<b>Method of assessment</b>	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Characteristics</b>	Tensile strength, grade, heat resistance, density
<b>Properties</b>	Physical properties, flammable limits, melting point
<b>Basic metallurgical characteristics</b>	Alloys and grades of metals and different types of electrodes
<b>Information</b>	Steel suppliers handbooks, welding company materials, standard operating procedures, safety documentation
<b>Welding processes</b>	<ul style="list-style-type: none"> <li>• Fusion:               <ul style="list-style-type: none"> <li>• electric arc welding</li> <li>• gas (oxy-fuel) welding</li> <li>• thermit welding</li> </ul> </li> <li>• Pressure welding processes:               <ul style="list-style-type: none"> <li>• resistance welding</li> <li>• fire or forge welding</li> <li>• friction welding</li> <li>• explosive welding</li> </ul> </li> <li>• Low temperature processes:               <ul style="list-style-type: none"> <li>• soldering</li> <li>• brazing</li> </ul> </li> <li>• Other:               <ul style="list-style-type: none"> <li>• ultrasonic welding</li> <li>• electron beam welding</li> </ul> </li> </ul>
<b>Effects</b>	Thermal expansion, heat affected zones, fume emissions, altered density, distortion
<b>Distortion prevention measures</b>	Heat treatments, consolidations
<b>Processes for cleaning and weld preparation</b>	Etching, grinding, arc gouging, thermal cutting, chemical additives, anti-corrosion treatments

**RANGE STATEMENT****Safety requirements**

- Dry and ventilated areas
- In accordance with workplace procedures
- Location away from heat risks
- Location away from incompatible substances
- Requirements for hazardous substances
- Adequate signage and labelling
- Appropriate sealing
- Routine inspections
- Emergency procedures
- Regulatory notification requirements

Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and interpret OH&S information	1.1.OH&S information is obtained and interpreted. 1.2.Relevant OH&S legislation is identified. 1.3.Work related safety information is obtained and interpreted.
2. Identify risks associated with welding	2.1.Pollutants formed by welding processes are identified. 2.2.Occupational diseases and injuries which may be associated with welding are identified. 2.3.Factors associated with increased risk are identified. 2.4.Exposure levels for pollutants are identified. 2.5.Risks and potential health effects associated with specific metals are identified. 2.6.Risks and potential health effects associated with gases in welding are identified. 2.7.Other hazards of welding are identified.
3. Reduce risks associated with welding	3.1.Manual handling techniques are used. 3.2.Personal protective equipment is used correctly. 3.3.Procedures to control hazards are implemented. 3.4.Workplace safety procedures are implemented. 3.5.Workplace safety non-compliances are reported in accordance with workplace procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- sourcing and interpreting safety-related information and Material Safety Data Sheets (MSDS)
- planning and sequencing operations
- identifying workplace risks and nonconformances
- reporting workplace risks and nonconformances
- checking and clarifying task-related information

#### Required knowledge

Look for evidence that confirms knowledge of:

- characteristics and properties of common metals and welding materials
- effect of gas and electrical welding operations on metals
- hazards and control measures associated with gas and electrical welding, including housekeeping
- welding safety practices and procedures
- effect of various treatments on a range of commonly used metals
- use and application of personal protective equipment

## Evidence Guide

## MEM12023A Perform engineering measurements

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers performing measurement skills requiring straightforward use of mechanical measuring devices and associated calculations.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit covers straightforward measurement using devices which incorporate visual indications representing units of measurement.</p> <p>It applies to the use of measuring devices in a range of manufacturing, engineering and related environments. It includes, where required, adjustment of measuring devices through simple means and typically includes zeroing or scale adjustment.</p> <p>Measurements may be expressed in metric or imperial units. All measurements are undertaken to standard operating procedures. Electrical/electronic devices used are those not requiring the connection or disconnection of circuitry.</p> <p>Work is undertaken autonomously or part of team environment, in the field, work station or workshops.</p> <p>For straightforward use of comparison or pre-set measuring devices, Unit MEM12001B (Use comparison and basic measuring devices) should be accessed.</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 5</b></p>

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Select appropriate device or equipment	1.1.Measurement requirements are determined from specifications. 1.2.Appropriate device or equipment is selected according to standard operating procedures, to achieve required outcome.
2. Obtain measurements using a range of measuring devices	2.1.Correct and appropriate measuring technique is used. 2.2.Measurements are accurately obtained .

ELEMENT	PERFORMANCE CRITERIA
	2.3. Dimensions are determined or verified using basic calculations, where required.
3. Maintain measuring devices	3.1. Routine care and storage of devices is undertaken to manufacturers' specifications or standard operating procedures. 3.2. Routine adjustments to devices are made and checked.
4. Communicate measurements as required	4.1. Measurements are accurately recorded, where required. 4.2. Freehand sketch which depicts required information is prepared, as required.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- selecting the appropriate measuring device for given measuring tasks
- using appropriate measuring technique
- reading all measurements taken accurately to the finest graduation of the selected measuring device
- handling and storing measuring devices in accordance with manufacturers' specifications or standard operating procedures
- verifying all measuring devices before use
- making, where appropriate, routine adjustments to measuring devices
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations involving addition, subtraction, multiplication, division, fractions and decimals within the scope of this unit
- preparing drawings as required

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

Look for evidence that confirms knowledge of:

- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- addition, subtraction, multiplication, division, fractions, decimals to the scope required by this unit
- procedures for handling and storing a range of measuring devices
- procedures for adjusting and zeroing a range of measuring devices
- methods of communicating measurements by drawings, as required
- safe work practices and procedures

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to perform engineering measurements.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication,

<b>EVIDENCE GUIDE</b>	
	materials handling, recording and reporting associated with performing engineering measurements or other units requiring the exercise of the skills and knowledge covered by this unit.
<b>Method of assessment</b>	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Specifications</b>	Drawings, sketches, job instructions, schematics, diagrams, technical manuals
<b>Range of measuring devices</b>	Protractors, combination squares, set squares, dial indicators, thermometers, tapes, rules, micrometers, vernier-scaled measuring equipment
<b>Basic calculations</b>	Calculations needed to assist in determining measurements where a reading of the graduated device is not sufficient, for example subtracting one measurement from another to give a third

<b>RANGE STATEMENT</b>	
	measurement. Examples of calculations needed are addition, subtraction, multiplication, division, fractions and decimals. Calculations may be made using a calculator
<b>Routine adjustments</b>	Validating the device using simple zeroing or scale adjustment
<b>Measurements</b>	Measuring length, squareness, flatness, angle, roundness, clearances or any other measurements that can be read off analog, digital or other measuring device
<b>Information</b>	Dimensions, instructions, base line or datum points

---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Use hand tools	1.1. Hand tools are selected appropriate to the task requirements. 1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape. 1.3. All safety requirements are adhered to before, during and after use. 1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use. 1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard

ELEMENT	PERFORMANCE CRITERIA
	<p>operational procedures, principles and techniques.</p> <p>1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

#### Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use power tools	<p>1.1. Power tools are selected appropriate to the task requirements.</p> <p>1.2. Power tools are used for a determined sequence of operations - which may include clamping, alignment and adjustment to produce desired outcomes - to job specifications which may include finish, size or shape.</p> <p>1.3. All safety requirements are adhered to before, during and after use.</p> <p>1.4. Unsafe or faulty tools are identified and marked for repair before, during and after use according to designated procedures.</p> <p>1.5. Operational maintenance of tools, including hand sharpening, is undertaken according to standard</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>workplace procedures, principles and techniques.</p> <p>1.6. Power tools are stored safely in appropriate location according to standard workshop procedures and manufacturers' recommendations.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting power tools appropriate to the task
- using power tools safely
- using clamping/securing devices
- identifying power tool defects
- maintaining power tools using appropriate techniques
- sharpening tools/tool bits within the scope of this unit
- storing power tools according to manufacturers'/ standard operating procedures.

#### Required knowledge

Look for evidence that confirms knowledge of:

- application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements of a range of power tools
- tool sharpening techniques for a range of power tools
- storage location and procedures of a range of power tools
- hazards/control measures associated with power tools
- use and application of personal protective equipment
- safe work practices and procedures

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	<p>A person who demonstrates competency in this unit must be able to use power tools/hand held operations.</p>
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
<b>Context of and specific resources for assessment</b>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using power tools/hand held operations or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
<b>Method of assessment</b>	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>

**EVIDENCE GUIDE**

<b>Guidance information for assessment</b>	
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Power tools**

Electric or pneumatic/hydraulic drills, grinders, jigsaws, nibblers, cutting saws, sanders, planers, routers, pedestal drills and pedestal grinders

**Clamping**

Multigrips, vices, jigs and fixtures, clamps etc.

**Job specifications**

Finish, size or shape etc.

**Operational maintenance**

Hand sharpening, cleaning, lubricating, tightening  
Simple tool repairs and adjustments using engineering principles, tools, equipment and procedures to statutory and regulatory requirements

**Unit Sector(s)**

<b>Unit sector</b>

## MSL904001A Perform standard calibrations

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>
--------------------------------	--

## Licensing/Regulatory Information

Not applicable.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare items for calibration	1.1. Select the authorised calibration procedure in accordance with enterprise procedures 1.2. Identify hazards and use appropriate personal protective equipment, safety equipment and procedures 1.3. Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure 1.4. Assemble and set up specified reference standards and associated equipment prior to testing

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>1.5. Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary</p> <p>1.6. Identify and minimise potential sources of measurement error</p>
2. Perform calibration	<p>2.1. Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement</p> <p>2.2. Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment)</p> <p>2.3. Adjust device under test to bring readings within specification and record data (as-left or after adjustment) if required</p> <p>2.4. Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results</p> <p>2.5. Seek appropriate advice when interpretation of results is outside authorised scope of approval</p>
3. Document results	<p>3.1. Document compliance/non-compliance with requirements of test and/or specifications</p> <p>3.2. Estimate and document uncertainty of measurement in accordance with enterprise procedures, if required</p> <p>3.3. Record the results of each test/calibration accurately, unambiguously and objectively</p> <p>3.4. Ensure confidentiality of enterprise information</p>
4. Finalise calibration	<p>4.1. Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information as required</p> <p>4.2. Report any non-compliance and verify next course of action with supervisor</p> <p>4.3. Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in enterprise procedures</p> <p>4.4. Store test equipment/measurement standards and results in accordance with enterprise procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- selecting and applying appropriate test methods and calibration procedures
- maintaining close attention to procedures, accuracy and precision of measurement to ensure the integrity of test/calibration results
- using calibration and correction charts
- calculating to give results in appropriate accuracy, precision and units
- preparing test/calibration documentation that is accurate and complies with requirements
- operating equipment correctly and safely
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and report opportunities for improvements to procedures

#### Required knowledge

Required knowledge includes:

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures, and applications
- National Association of Testing Authority's (NATA) and National Measurements Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- methods for statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement (may include the use of software)
- reporting procedures and legislative requirements
- handling, transport, storage and operation of reference and working standards
- laboratory environmental control requirements
- relevant health, safety and environmental requirements
- layout of the enterprise, divisions and laboratory
- organisational structure of the enterprise
- lines of communication
- role of laboratory services for the enterprise and customers

## REQUIRED SKILLS AND KNOWLEDGE

### Specific calibration fields

Additional knowledge requirements may apply for different calibration fields. For example, testing and calibrations conducted in the following:

- acoustic and vibration measurement
- chemical testing
- construction materials testing
- electrical testing
- heat and temperature measurement
- mechanical testing
- metrology
- non-destructive testing
- optics and radiometry
- pressure measurements

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors should ensure that candidates can:

- maintain very close attention to procedures, accuracy and precision of measurement to ensure integrity of test/calibration results (especially during lengthy tests)
- critically examine each calibration step to ensure repeatability and validity of data
- apply all relevant procedures and regulatory requirements to ensure the quality and integrity of the services or data provided
- prepare test/calibration documentation that is accurate and complies with requirements
- operate equipment correctly and safely
- recognise problems or departures in systems and documentation and initiate actions to prevent or minimise them

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>recognise and report opportunities for improvements to procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <li><i>MSL924001 Process and interpret data</i></li> <li><i>relevant MSL974000 series unit of competency</i></li> <li><i>relevant MSL975000 series unit of competency.</i></li> </ul> <p>Resources may include:</p> <ul style="list-style-type: none"> <li>specialised calibration/test equipment, reference standards and laboratory facilities</li> <li>access to a library of calibration methods, procedures and equipment specifications</li> <li>enterprise quality manual and procedures.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>review of calibration results, uncertainty calculations and workplace documentation completed by the candidate</li> <li>feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate</li> <li>observation of the candidate performing standard calibrations</li> <li>oral or written questioning to check underpinning knowledge of standard calibration procedures.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>

**EVIDENCE GUIDE****This competency in practice**

Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.

**Background**

Calibration work may be simple or highly complex depending upon the type of equipment being calibrated and the accuracy or uncertainties required. Manual calibrations may involve interconnecting equipment and setting the stimulus devices to the settings listed in the procedure. At each setting, the technician must verify that the response or output of the unit under test (UUT) is within the tolerances specified in the procedure. In addition, many procedures require that 'as-found' (before adjustment) and 'as-left' (after adjustment) results are recorded for maintaining the UUT documentation history.

Often calibration technicians must assess and document the total uncertainties for a given measurement by analysing equipment specifications and methodology during calibration. They have to interpret specifications and technical information and demonstrate initiative when adjusting and repairing instruments.

The calibration technician's workload can be routine and repetitive. A perpetual backlog of work and the constant need to reduce turn-around-time to meet client demands, coupled with enterprise productivity goals, can induce stress and mental fatigue if not carefully managed. However, it is essential that all personnel are able to perform tests and associated work tasks without undue pressure that might influence technical judgement if 'integrity of measurement' is to be retained. Errors arising from items incorrectly calibrated will, at best, have to be recalled which wastes time, resources and destabilises enterprise credibility. At worst, if undetected, they may have severe safety implications to personnel or equipment, depending on the nature of the item.

**Calibration (1)**

A customer delivers a test pressure gauge and requires certification that the gauge conforms to manufacturer's specifications. Personnel in the item reception area log the job and the laboratory supervisor assigns it to a calibration technician. He/she reads the work order and

**EVIDENCE GUIDE**

retrieves the approved calibration procedure. The procedure requires the customer's gauge to be tested to 1000 kPa using a hydraulic test station. The technician assembles the required apparatus and personal protective equipment. The gauge is visually inspected for defects and contamination. The temperature of the environment is checked and the hydraulic test station confirmed as fully operational. The required pressures are applied to the gauge and the indicated readings are transcribed onto the test report. The technician notes that some readings are outside the allowable tolerance and adjustments will have to be made. He/she takes another set of readings after making the necessary adjustments and records them on the report. The technician applies the required labels to the gauge, updates the database, produces a test report and places the item on the quality assurance bench for inspection by the supervisor. The supervisor visually inspects the item and checks the readings on the report. The job has taken two hours to complete.

**Calibration (2)**

A client has asked the laboratory to calibrate a spectrum analyser to manufacturer's specification. The supervisor assigns the job to a calibration technician who reads the job sheet and locates the appropriate calibration procedure. Although this spectrum analyser will be calibrated partly with the aid of automated technology, the technician estimates that the calibration will still take about nine hours to complete. The technician reads the procedure and assembles the equipment and allows for the required warm-up time for instrument stabilisation. Possible sources of error are minimised by cleaning connectors and tensioning them with the torque spanner. The technician performs the manual phase of the test and manually records 12 pages of results. The equipment is reconnected for the automated part of the procedure the test recommenced. The technician produces a further six pages of results. These are assessed for errors and non-conformances and all calculations are carefully checked. A final report is produced which accompanies the spectrum analyser to the quality assurance bench for checking by the supervisor. All cables and equipment used for the calibration are returned to the store.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Codes of practice

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

#### Standards, codes, procedures and/or enterprise requirements

Standards, codes, procedures and/or enterprise procedures may include:

- Australian and international standards, such as:
  - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
  - AS/NZS ISO 9001:2008 Quality management systems - Requirements
  - AS/NZS ISO 10005:2006 Quality management systems - Guidelines for quality plans
  - AS/NZS ISO 10012:2004 Quality assurance requirements for measurement equipment
  - ISO 5725 Accuracy (trueness and precision) of measurement methods and results
  - ISO/IEC Guide 98-3:2008 Uncertainty of measurement - Part 3 Guide to the expression of uncertainty in measurement (GUM)
- Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
- material safety data sheets (MSDS)
- enterprise recording and reporting procedures and standard operating procedures (SOPs)
- quality manuals, equipment and operating/technical manuals
- test methods and calibration procedures (validated and authorised)
- test methods and calibration procedures

<b>RANGE STATEMENT</b>	
	<p>published by international, national or regional standards, reputable technical organisations, scientific texts or journals and equipment manufacturers</p> <ul style="list-style-type: none"> <li>• incident and accident/injury reports</li> <li>• schematics, work flows, laboratory layouts and production and laboratory schedules</li> </ul>
<b>Standard calibrations</b>	<p>Standard calibrations may include testing and/or calibrating the following equipment and reference materials using standard methods and procedures:</p> <ul style="list-style-type: none"> <li>• test equipment, such as anemometers, balances, barometers, calipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments</li> <li>• electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references</li> <li>• working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers</li> </ul>
<b>Hazards</b>	<p>Hazards may include:</p> <ul style="list-style-type: none"> <li>• electric shock</li> <li>• disturbance or interruption of services</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• manual handling of heavy equipment boxes</li> <li>• sources of electromagnetic radiation (lasers and RF generators/transmitters)</li> <li>• fluids under pressure</li> <li>• heat sources, such as ovens</li> </ul>
<b>Safety procedures</b>	<p>Safety procedures may include:</p> <ul style="list-style-type: none"> <li>• use of personal protective equipment, such as hearing protection, gloves, safety glasses and coveralls</li> <li>• ensuring access to service shut-off points</li> <li>• handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations</li> <li>• regular cleaning of equipment and work areas</li> </ul>
<b>Reference materials</b>	<p>Reference materials may include:</p> <ul style="list-style-type: none"> <li>• colour standards</li> <li>• graded granular materials</li> <li>• hardness blocks</li> </ul>
<b>Communication</b>	<p>Communication may be with:</p> <ul style="list-style-type: none"> <li>• supervisors and managers (laboratory, quality and customer service)</li> <li>• peers and other laboratory or relevant technical personnel</li> <li>• clients and end users of equipment</li> <li>• external auditors, or accreditation agency for example, NATA</li> <li>• manufacturers of equipment and suppliers of spare parts and materials</li> </ul>
<b>Working environment</b>	<p>The working environment will have a controlled environment but may include:</p> <ul style="list-style-type: none"> <li>• purpose-built designed facility</li> <li>• mobile facility in the field</li> </ul>
<b>Occupational health and safety (OHS) and environmental management requirements</b>	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> <li>• all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these</li> </ul>

**RANGE STATEMENT**

	<p>requirements must not be compromised at any time</p> <ul style="list-style-type: none"> <li>• all operations assume the potentially hazardous nature of samples and require standard precautions to be applied</li> <li>• where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health</li> </ul>

## MSL913002A Plan and conduct laboratory/field work

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the ability to plan and complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available guidelines and advice. Work plans may need to be modified with supervisor agreement to suit changing conditions and priorities.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit of competency is applicable to instrument operators, laboratory assistants and technical assistants working in all industry sectors.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>
--------------------------------	--

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan and organise daily work activities	1.1. Clarify allocated work activities and required resources if necessary 1.2. Prioritise work activities as directed 1.3. Break down work activities into small achievable components and efficient sequences 1.4. Review work plan in response to new information, urgent requests, changed situations or instructions from appropriate personnel 1.5. Update work plan and communicate changes to appropriate personnel
2. Complete allocated work	2.1. Locate relevant workplace procedures for required tasks 2.2. Undertake tasks following prescribed and routine work related sequences 2.3. Seek assistance from relevant personnel when difficulties cannot be handled 2.4. Record completion of activities to confirm outputs in accordance with plan
3. Identify and resolve work problems	3.1. Recognise problems or opportunities for improved work performance

ELEMENT	PERFORMANCE CRITERIA
	3.2. Apply agreed problem solving strategies to consider possible causes and solutions 3.3. Identify and access appropriate sources of help 3.4. Consider available alternatives and keep them open before agreeing on the most appropriate action
4. Work in a team environment	4.1. Cooperate with team members to negotiate and achieve agreed outcomes, timelines and priorities 4.2. Recognise personal abilities and limitations when undertaking team tasks 4.3. Confirm personal role and responsibility within the team for particular outputs 4.4. Demonstrate sensitivity to the diversity of other team members' backgrounds and beliefs
5. Update knowledge and skills as required	5.1. Recognise own strengths and weaknesses and take advantage of skill development opportunities

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- conducting work based on ethical values and principles
- clarifying tasks and recognising resource needs
- following relevant procedures consistently
- recognising potential disruptions or changed circumstances and modifying work plan in conjunction with relevant personnel
- ability to adjust to a variety of working environments (indoor, outdoor and night)
- seeking assistance from relevant personnel when difficulties arise
- achieving quality outcomes within timelines
- working effectively with team members who may have diverse work styles, cultures and perspectives
- promoting cooperation and good relations in the team
- assisting team members to organise and manage its workload

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

Required knowledge includes:

- enterprise procedures:
  - customer service
  - quality
  - occupational health and safety (OHS) and environmental legislative requirements
  - technical work that the candidate routinely performs
- workplace agreements and employment conditions:
  - workers compensation
  - industrial awards enterprise agreements
  - equal employment opportunity
  - anti-discrimination and anti-harassment
- ethical background relevant to the nature of the work:
  - use of animals for research
  - genetic modification, gene therapy, cloning and stem cells
  - invitro fertilisation
  - forensic testing of populations
  - importance of commercial confidentiality
- problem solving strategies
- interpersonal communication and conflict resolution techniques
- relevant health, safety and environment requirements

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors should ensure that candidates can:

- follow workplace procedures to achieve quality outcomes within timelines
- identify and resolve work problems
- work effectively with team members and promote cooperation and good relations

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• prioritise activities and recognise potential disruptions or changed circumstances and modify the work plan in conjunction with relevant personnel.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <li>• <i>MSL913001A Communicate with other people</i></li> <li>• <i>MSL943002A Participate in laboratory/field workplace safety</i></li> <li>• technical units related to the tasks undertaken.</li> </ul> <p>Resources may include:</p> <ul style="list-style-type: none"> <li>• enterprise procedures, equipment and materials for relevant technical tasks.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• review of a flowchart prepared by the candidate to show efficient sequencing of tasks</li> <li>• observation of the candidate performing a range of technical tasks over sufficient time to demonstrate their handling of a variety of contingencies</li> <li>• review of documents detailing completed tasks, such as completed job cards, a report or suggestions for quality improvement</li> <li>• feedback from peers and team members</li> <li>• feedback from supervisors</li> <li>• written or oral questions to partly assess the candidate's ability to handle a range of contingencies and work in a team environment.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like</p>

<b>EVIDENCE GUIDE</b>	
	environment.
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p><b>Manufacturing</b></p> <p>A plastic processing plant had to halt production because of a suspect raw material. The plant manager immediately requested the polymer testing laboratory to test and identify all batches of polypropylene additives and colouring agents. The laboratory team of three assistants and one technical officer allocated the workload amongst themselves to conduct the twelve different tests within a period of four hours to identify the 'out of specification' materials and report them to the production supervisor. All laboratory assistants had to reschedule their workplan, perform the required tests and assist each other to solve the production problem.</p> <p><b>Biomedical</b></p> <p>As part of a routine sequence, a technical officer is required to perform a series of tasks, including the calibration of instruments required for testing of blood samples. These tasks are to be completed within a specified timeframe to meet the output requirements of the enterprise. During the calibration of one of the instruments, the technician experiences difficulties that require expert technical assistance. The problem is referred to the appropriate person and is quickly resolved. Consequently, the officer is able to complete all necessary tasks within the prescribed timeframe and the required output is maintained.</p> <p><b>Food processing</b></p> <p>Each of the technical assistants working in the laboratory of a food processing company was dedicated to performing specific analyses. As a result, they often alternated between periods of inactivity and excessive workload (the latter case had the potential to compromise their health and safety and the accuracy of their food analyses). One of the contributing factors to the periods of intense activity was the need to quickly prepare standard solutions and reagents. The team discussed this problem and agreed that while it was not appropriate for each assistant to become competent to perform every</p>

**EVIDENCE GUIDE**

	<p>analytical procedure, it was feasible for each person to be able to prepare solutions and reagents used by others. The team developed a central register in which impending shortages of these materials was noted. Each assistant referred to this register when no other work was due and prepared the materials on a 'first in, first out' basis unless a task was given a priority rating. The team found that this strategy more evenly distributed the workload over their shift, improved safety in the laboratory and reduced the risk of error.</p>
--	---

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Codes of practice**

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

**Standards, codes, procedures and/or enterprise requirements**

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
  - AS/NZS 2243 Set:2006 Safety in laboratories set
  - AS/NZS ISO 14000 Set:2005 Environmental management standards set
  - AS/NZS ISO 9000 Set:2008 Quality management systems set
- OHS national standards and codes of practice

**Ethical and professional work performance**

Ethical and professional work performance includes:

- following enterprise policy and procedures, regulations and legislation
- behaving honestly and openly

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• respecting others and treating them with courtesy and impartiality</li> <li>• working diligently and responsibly</li> <li>• ensuring confidentiality of information, including client identification and test results</li> <li>• ensuring proprietary rights, intellectual property and copyright are protected</li> <li>• clarifying personal values and ethics and analysing how they impinge on actions in the workplace</li> </ul>
<b>Workplace activities</b>	<p>Workplace activities may include:</p> <ul style="list-style-type: none"> <li>• setup and pre-use checks of laboratory equipment</li> <li>• calibration status checks</li> <li>• sampling and testing following standard procedures</li> <li>• maintenance and cleaning tasks</li> </ul>
<b>Workplace procedures</b>	<p>Workplace procedures may include:</p> <ul style="list-style-type: none"> <li>• standard operating procedures (SOPs)</li> <li>• job cards, batch cards and production schedules</li> <li>• job descriptions</li> <li>• methods, recipes, procedures and protocols</li> </ul>
<b>Problem solving</b>	<p>Problem solving may include:</p> <ul style="list-style-type: none"> <li>• accessing relevant documentation</li> <li>• identifying inputs and outputs</li> <li>• sequencing a process</li> <li>• identifying and rectifying a problem step</li> <li>• obtaining timely help</li> <li>• implementing preventative strategies wherever possible</li> </ul>
<b>Teams</b>	<p>Teams may:</p> <ul style="list-style-type: none"> <li>• be ongoing with responsibility for particular services or functions</li> <li>• be project based</li> <li>• have a mixture of full and part-time employees and contractors, laboratory, construction and production personnel</li> <li>• be separated by distance and work at sites</li> </ul>

<b>RANGE STATEMENT</b>	
	outside laboratory facilities
<b>Team operation</b>	<p>Team operation may occur within:</p> <ul style="list-style-type: none"> <li>• small, medium and large contexts</li> <li>• internal and external environments</li> <li>• enterprise guidelines covering access and equity principles and practices, licensing requirements, industrial awards, enterprise bargaining agreements and codes of practice</li> <li>• agreed responsibility and accountability requirements</li> <li>• appropriate goals, objectives</li> <li>• given resource parameters</li> </ul>
<b>Team tasks</b>	<p>Team tasks may vary according to:</p> <ul style="list-style-type: none"> <li>• the size of enterprise</li> <li>• the scope of the laboratory</li> <li>• their level of responsibility</li> </ul>
<b>Strategies to maintain work flow</b>	<p>Strategies to maintain work flow may include:</p> <ul style="list-style-type: none"> <li>• communicating critical events on shift</li> <li>• recognising shortages in reagents and problems with equipment</li> <li>• communicating quality breakdowns</li> <li>• recognising urgent and abnormal results to be processed</li> <li>• communicating and behaving in a courteous manner</li> <li>• being punctual</li> </ul>
<b>Occupational health and safety (OHS) and environmental management requirements</b>	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> <li>• all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time</li> <li>• all operations assume the potentially hazardous nature of samples and require standard precautions to be applied</li> <li>• where relevant, users should access and apply current industry understanding of infection control issued by the National Health and</li> </ul>

## MSL922001A Record and present data

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the ability to record and store data, perform simple calculations of scientific quantities and present information in tables and graphs. The unit of competency requires personnel to solve predictable problems using clear information or known solutions. Where alternatives exist, they are limited or apparent.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit of competency is applicable to production operators, field assistants and laboratory assistants working in all industry sectors.  Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Record and check data	1.1. Enter data into laboratory information system or record sheets as directed 1.2. Check data to identify transcription errors or atypical entries 1.3. Rectify errors in data using enterprise procedures
2. Calculate simple scientific quantities	2.1. Calculate simple scientific quantities using given formulae and data 2.2. Ensure calculated quantities are consistent with estimations and expectations 2.3. Report all calculated quantities with appropriate precision and units
3. Present data in tables, charts and graphs	3.1. Present data accurately in tables and charts using given formats and scales 3.2. Recognise and report obvious features and trends in data
4. Store and retrieve	4.1. File and store data in accordance with enterprise

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
data	procedures 4.2.Maintain enterprise confidentiality standards

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- performing simple calculations
- preparing and interpreting straightforward tables, graphs and charts
- applying calculations in the workplace
- coding, recording and checking data accurately
- presenting accurate results in the required format
- recognising obvious trends in data
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements

#### Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- relevant scientific and technical terminology
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- conversion of units involving multiples and submultiples
- significant figures, estimation, approximation, rounding off
- substitution of data in formulae
- calculations involving fractions, decimals, proportions and percentages
- procedures for maintaining and filing records, security of data

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> <li>• accurately code, check and record data in the required format</li> <li>• calculate simple scientific quantities</li> <li>• recognise obvious trends in data</li> <li>• maintain the confidentiality of data.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit may be assessed with technical units, such as:</p> <ul style="list-style-type: none"> <li>• <i>MSL973001A Perform basic tests</i></li> <li>• <i>MSL973002A Prepare working solutions</i></li> <li>• <i>MSL973007A Perform microscopic examination.</i></li> </ul> <p>Resources may include:</p> <ul style="list-style-type: none"> <li>• data sets and records</li> <li>• computer and relevant software or laboratory information system</li> <li>• relevant enterprise procedures.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• review of data worksheets, calculations, graphs and tables prepared by the candidate</li> <li>• review of records transcribed, maintained or stored by the candidate</li> <li>• feedback from supervisors and peers</li> <li>• observation of the candidate as they record data and perform calculations</li> <li>• questions to assess understanding of relevant procedures and trends in data.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and</p>

<b>EVIDENCE GUIDE</b>	
	<p>disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p><b>Construction materials</b></p> <p>A laboratory assistant is given 20 soil samples and asked to test their moisture content by weighing each sample, placing them in an oven for 24 hours and then reweighing them. The assistant performs the tests in accordance with the standard method and then calculates the % water content by dividing the weight loss by the wet weight and multiplying by 100. He/she checks the results. After entering them into the laboratory information management system (LIMS), they notice that they are consistently less than the previous results recorded for soils at the same site. The assistant reports the discrepancy to the supervisor who checks whether the oven was operated at the required temperature. The supervisor then discovers that the assistant has calculated the moisture content by dividing the weight loss by the wet weight instead of the dry weight. The assistant recalculates the moisture content for the 20 samples and notes that the results are now consistent with previous results.</p> <p><b>Manufacturing</b></p> <p>On Friday, a laboratory assistant performs the routine set of temperature, pressure and humidity measurements at 10 sites in a refinery. They enter the data on a pre-prepared data sheet that also contains the data recorded for the previous days of that week. The assistant checks the data for any significant variations to that recorded previously. They notice that for site #5, the temperature reading is 250(C which is 100(C below the expected value. The assistant repeats the measurement and gets the same result. After returning to the laboratory, the assistant enters the data into the LIMS</p>

**EVIDENCE GUIDE**

	and reports the odd result to their supervisor. The supervisor contacts the site manager and finds out that the pipeline at site #5 has been isolated as part of unscheduled maintenance in that part of the site.
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Codes of practice**

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

**Standards, codes, procedures and/or enterprise requirements**

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
  - AS ISO 1000-1998 The international system of units (SI) and its application
- national measurement regulations and guidelines

**Concepts of metrology**

Concepts of metrology may include:

- that all measurements are estimates
- measurements belong to a population of measurements of the measured parameters
- repeatability
- precision
- accuracy
- significant figures
- sources of error
- uncertainty
- traceability

**Data**

Data may be recorded on:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• worksheets</li> <li>• spreadsheets or databases linked to information management systems</li> </ul> <p>Data may include results of:</p> <ul style="list-style-type: none"> <li>• observations</li> <li>• tests and measurements</li> <li>• surveys</li> </ul> <p>Data may be presented in the form of:</p> <ul style="list-style-type: none"> <li>• graphs</li> <li>• tables</li> <li>• control charts</li> <li>• semi-quantitative observations expressed on a scale (for example, 1 to 4 or + to +++)</li> </ul>
<b>Simple calculations</b>	<p>Simple calculations may be performed with or without a calculator or computer software and may include scientific quantities such as:</p> <ul style="list-style-type: none"> <li>• decimals, fractions, ratios, proportions and percentages</li> <li>• perimeters, areas, volumes and angles</li> <li>• concentration</li> <li>• unit conversion, multiples and submultiples</li> <li>• use of significant figures, rounding off, estimation and approximation</li> <li>• substitution of data in formulae</li> <li>• conversions between SI units</li> <li>• areas (m<sup>2</sup>) and volumes (mL, L, m<sup>3</sup>) of regular shapes (e.g. packaging and moulds)</li> <li>• average mass, mass %, density, specific gravity, moisture, relative and absolute humidity</li> <li>• ratios, such as mass to mass, mass to volume and volume to volume percentages</li> <li>• industry specific ratios, such as g/cm<sup>2</sup>, kg/m<sup>2</sup></li> <li>• concentration (for example, g/100mL, mg/L, mg/(L, dilution mL/L)</li> <li>• statistical values such as mean, median, mode and standard deviation</li> <li>• average count, colonies per swab surface and cell counts (live and dead/total)</li> <li>• process variables, such as pressure, velocity</li> </ul>

<b>RANGE STATEMENT</b>	
	<p>and flow rates</p> <ul style="list-style-type: none"> <li>• % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc</li> <li>• food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability</li> </ul>
<b>Obvious features and trends in data</b>	<p>Obvious features and trends in data could include:</p> <ul style="list-style-type: none"> <li>• maximum and minimum values</li> <li>• spread of data</li> <li>• increasing/decreasing data, rate of change</li> <li>• outliers, data beyond control limits or normal range</li> </ul>
<b>Occupational health and safety (OHS) and environmental management requirements</b>	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> <li>• all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time</li> <li>• all operations assume the potentially hazardous nature of samples and require standard precautions to be applied</li> <li>• where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Retrieve and check data	1.1.Store and retrieve data using appropriate files and/or application software 1.2.Verify the quality of data using enterprise procedures 1.3.Rectify errors in data using enterprise procedures
2. Calculate scientific quantities	2.1.Calculate statistical values for given data 2.2.Calculate scientific quantities using given formulae and data and estimate uncertainties 2.3.Ensure calculated quantities are consistent with estimations and expectations 2.4.Report all calculated quantities using the appropriate units and correct number of significant figures
3. Present data in tables, charts and graphs	3.1.Present data in clearly labelled tables and charts 3.2.Graph data using appropriate scales to span the range of data or display trends 3.3.Report all data using the appropriate units and

ELEMENT	PERFORMANCE CRITERIA
	number of significant figures
4. Interpret data in tables, charts and graphs	4.1. Interpret significant features of graphs, such as gradients, intercepts, maximum and minimum values, and limit lines 4.2. Recognise and report trends in data
5. Keep accurate records and maintain confidentiality	5.1. Transcribe information accurately 5.2. Verify the accuracy of records following enterprise procedures 5.3. File and store workplace records in accordance with enterprise procedures 5.4. File all reference documents logically and keep them up-to-date and secured 5.5. Observe enterprise confidentiality standards

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- performing calculations of scientific quantities
- using scientific notation
- applying the concepts of metrology
- applying calculations to the workplace
- coding, recording and checking of data accurately
- presenting accurate results in the required format
- preparing graphs, tables and charts (pie, bar, histogram) and interpreting trends
- preparing and interpreting process control charts
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements

#### Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- relevant scientific and technical terminology

**REQUIRED SKILLS AND KNOWLEDGE**

- uncertainty associated with measurement steps
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- converting units involving multiples and submultiples
- significant figures, rounding off, estimating, approximating
- transposing and evaluating formulae
- calculations involving fractions, decimals, proportions and percent
- determining statistical values of data such as mean, median, mode and standard deviation
- procedures for maintaining and filing records, and maintaining security of data

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure that candidates can:

- code, record and check the documentation of data
- calculate scientific and statistical quantities relevant to the workplace and present accurate results in the required format
- recognise anomalies and trends in data
- maintain the confidentiality of data in accordance with workplace and regulatory requirements
- keep records up-to-date and secure.

**Context of and specific resources for assessment**

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- *MSL924002A Use laboratory application software*
- technical units, such as:
  - *relevant MSL973000 series units of competency*
  - *relevant MSL974000 series units of competency.*

Resources may include:

- data sets and records

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• computer and relevant software or laboratory information system</li> <li>• relevant workplace procedures.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• review of data worksheets, calculations, computer files (such as spreadsheets, databases, statistical analysis), graphs, tables and/or charts prepared by the candidate</li> <li>• review of records transcribed, maintained or stored by the candidate</li> <li>• feedback from supervisors and peers</li> <li>• questions to assess understanding of relevant procedures and trends in data</li> <li>• observation of the candidate as they process data, file and store records.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p><b>Manufacturing</b></p> <p>A laboratory assistant in a materials testing laboratory was performing routine tensile tests on samples of vinyl sheet. The assistant converted the readings from the machine to appropriate units using a simple calculation and recorded them in the logbook for that test method. After comparing these test results with previous results for the same type of vinyl material, the assistant found</p>

**EVIDENCE GUIDE**

that the tensile strength was within the required range. However, it was at the lower rather than the upper end of the range as in previous testing. The assistant discussed the results with the laboratory supervisor. The calibration file for that machine showed that it had been calibrated four months previously and had not needed adjustment. Test results for the same period showed that the machine was giving lower than normal tensile strength readings for the few higher strength materials tested over the last two months. The assistant did some more checks and confirmed this trend. The machine was re-calibrated by the instrument company and the frequency of internal calibration checks by the laboratory assistant was increased. This problem would not have been detected or corrected as quickly without the assistant's initiative and competent recording and retrieval of test results and calibration information.

**Biomedical**

A technical assistant works in a team with laboratory scientists and technical officers. Analyses of electrolytes are routine and occur in large volume throughput even in this small diagnostic laboratory. The assistant is assigned tasks that contribute to the overall production of results, their reporting and the quality control evaluation of the results. One task is the daily collection of the electrolyte analyses from the internal quality control area. In this case, the technical assistant plots the results on a Levy-Jennings graph and computes the mean value. The assistant reports immediately to the supervisor if the plots show deviations which indicate out-of-control results.

**Food processing**

Cooking and holding temperatures greatly affect the nutrient composition of processed foods. The CSIRO provides documentation of nutrient losses with temperature variations. For cooked foods, there is the added problem of microbial growth in the so called 'danger zone'. In one laboratory, the technical assistant conducts simple testing of foods using a temperature probe and also measures the temperature of the storage areas, holding trays or bainmaries and individual tray units. Careful documentation of the temperatures of the foods and times of measurement must be kept. The technical assistant supplies the data as tables and a plot

**EVIDENCE GUIDE**

	of temperature versus time. For quality control purposes, the assistant is directed to use a cross reference of mercury thermometer readings versus probe measurements for ambient temperature. The assistant plots the thermometer readings against the probe readings and reports to the supervisor if the plot shows a slope other than the defined value.
--	---

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Codes of practice**

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

**Standards, codes, procedures and/or enterprise requirements**

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
  - AS ISO 1000-1998 The international system of units (SI) and its application
  - ISO 5725 Accuracy (trueness and precision) of measurement methods and results
  - ISO/IEC Guide 98-3:2008 Uncertainty of measurement - Part 3 Guide to the expression of uncertainty in measurement (GUM)
- Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
- national measurement regulations and guidelines
- National Association of Testing Authorities (NATA) Technical notes
- material safety data sheets (MSDS)

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• equipment manuals and warranty, supplier catalogues and handbooks</li> <li>• sampling and test procedures and standard operating procedures (SOPs)</li> <li>• enterprise quality manual and customer quality plan</li> <li>• validation of the equipment and associated software where applicable</li> <li>• validation of spreadsheets developed in-house for assay and process calculations</li> </ul>

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the ability to use and apply computer application software in the laboratory, field and production plants for analysis and reporting.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit of competency is applicable to technical officers and laboratory technicians in all industry sectors. It describes the application and use of software packages in the context of laboratory or field work. Typically this software would be for the storage, retrieval, analysis and display of information. There is no expectation that candidates would be able to customise the software to meet specific needs.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These can be found at the end of this unit of competency under the section 'This competency in practice'.</p>

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Access application software	1.1. Identify software required for the task 1.2. Open software from a personal computer or network terminal
2. Use software for specified purposes	2.1. Input a range of scientific data into a computing system 2.2. Conduct searches for the retrieval of required data 2.3. Use application features for efficient computation 2.4. Construct data sets and databases for numerical and graphical analyses
3. Produce reports of retrieved data and/or processed data	3.1. Analyse data using features of the software package 3.2. Select options for constructing data reports 3.3. Print the results of data analyses using features of the software package 3.4. Integrate data from diverse application software

ELEMENT	PERFORMANCE CRITERIA
	units in a report 3.5. Report the outcomes and rationale for computerised database searches where appropriate 3.6. Reference computerised data sources according to the style requirements of the enterprise
4. Perform simple record housekeeping	4.1. Backup worked data according to enterprise standard procedures 4.2. Maintain archive data according to enterprise standard procedures 4.3. Maintain hard copy data according to standard enterprise operating procedures 4.4. Apply approved antivirus software and general standard quarantine procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- using software application features and instructions to input, save, analyse, sort, retrieve and display the records or data
- using software for the analysis, reporting and management of laboratory and field data and information
- using in-house software manuals to augment skills and solve operational problems
- selecting the most appropriate software package for the task
- backing up electronic storage
- using scanning software to protect in-house software and data

#### Required knowledge

Required knowledge includes:

- applications of the software package
- terminology associated with the software packages
- basic knowledge of the types of spreadsheet, database, data analysis packages that are available
- application of specific software package features to relevant laboratory tasks

**REQUIRED SKILLS AND KNOWLEDGE**

- relationship between the protocol for data input and file storage of the data
- general file and record maintenance
- relevant health, safety and environment requirements

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure that candidates can:

- select the most appropriate software package for the task from the suite of software applications available
- use routine instruction sets of the software package to complete the task
- use software to analyse data such as quality control and instrument performance characteristics
- back up electronic storage
- use scanning software to protect in-house software and data.

**Context of and specific resources for assessment**

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- *MSL925001A Analyse data and report results*
- *relevant MSL974000 series units of competency*
- *relevant MSL975000 series units of competency.*

Resources may include:

- access to a computer network or a personal computer
- software packages that include a database package, spreadsheet, statistical analysis and simple graphics output
- input and output data.

**Method of assessment**

The following assessment methods are suggested:

- review of analysis tasks linking test results to the

**EVIDENCE GUIDE**

	<p>generation of meaningful reports by the candidate</p> <ul style="list-style-type: none"> <li>• review of simple statistical and/or graphical analysis of quality control data completed by the candidate</li> <li>• oral and written exercises in preparation for keyboard activities.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p><b>Manufacturing</b></p> <p>A laboratory technician performs tests on starting materials, such as appearance, identity, melting point, moisture content, trace elements, sulfated ash and assay. The results are entered in a computer database that allows trend analysis to be carried out on the test results for materials from each supplier. As a result, the technician may recognise when a supplier is experiencing potential problems with their production process. The technician would then notify the supervisor and/or supplier that there is a high probability that future supplies may be out of specification and that constant monitoring of starting materials will be required.</p> <p><b>Biomedical</b></p> <p>An important task of the technical officer in a pathology laboratory is to perform statistical analysis for quality control purposes. The software package provides for the input of data, analysis of mean value and variance as well</p>

**EVIDENCE GUIDE**

	<p>as graphical reporting. The technical officer uses a dedicated software package or a package within the customised pathology data management system in order to assess the validity of the results produced from the analytical instrument.</p> <p><b>Food processing</b></p> <p>A technical officer is required to perform a nutrient analysis of a food product, the results of which will be displayed on the food container. The output from the nutrient analysis is fed into a software program that calculates the levels of these components 'per portion' and 'per 100g' and displays the information in the correct tabular format. The software package is designed so that the technical officer can input new data or access existing data and manipulate that data to provide a full and accurate nutrient display or report.</p>
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Codes of practice</b>	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
<b>Information sources</b>	<p>Information sources may include:</p> <ul style="list-style-type: none"> <li>• manuals of enterprise standard instructions</li> <li>• hardware manuals</li> <li>• software manuals</li> <li>• training materials to orient software to enterprise needs</li> <li>• on-screen instructions embedded in the software</li> </ul>
<b>Software packages</b>	Software packages may include:

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• word processing</li> <li>• spreadsheets</li> <li>• databases</li> <li>• graphical and statistical analysis</li> <li>• laboratory information systems</li> </ul>
<b>Occupational health and safety (OHS) and environmental management requirements</b>	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> <li>• all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time</li> <li>• all operations assume the potentially hazardous nature of samples and require standard precautions to be applied</li> <li>• where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health</li> </ul>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Clean work preparation areas	1.1.Clean preparation areas using appropriate cleaning agents and equipment according to enterprise procedures 1.2.Remove spillages, if they occur, using appropriate agents, personal protective equipment and enterprise procedures 1.3.Collect and segregate wastes in accordance with enterprise procedures, relevant codes and regulations
2. Clean and store equipment	2.1.Collect used equipment, inspect for faults and, where necessary, remove from service 2.2.Use appropriate agents, apparatus and techniques to clean equipment 2.3.Store clean equipment in the designated locations and manner

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
3. Monitor stocks of materials and equipment	3.1. Perform stock checks and maintain records of usage as directed 3.2. Store labelled stocks for safe and efficient retrieval 3.3. Inform appropriate personnel of impending stock shortages to maintain continuity of supply
4. Maintain a safe work environment	4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other personnel 4.2. Report potential hazards and/or maintenance issues in own work area to designated personnel 4.3. Minimise the generation of wastes and environmental impacts 4.4. Dispose of wastes in accordance with enterprise procedures, relevant codes and regulations

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
- safely removing spillages and disposing of wastes
- minimising the exposure to hazards of self, others and the laboratory
- safely storing equipment and materials using enterprise procedures, relevant codes and guidelines
- monitoring and reporting stock levels and the condition of laboratory materials and equipment
- keeping accurate, up-to-date records
- reporting potential hazards and maintenance issues using enterprise procedures

#### Required knowledge

Required knowledge includes:

- enterprise procedures for the cleaning of work preparation areas, materials and equipment

**REQUIRED SKILLS AND KNOWLEDGE**

- storage requirements for specific materials and equipment
- enterprise procedures for minimisation and disposal of waste
- enterprise procedures for monitoring of laboratory stocks
- information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
- relevant health, safety and environment requirements

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors should ensure that candidates can:

- follow enterprise procedures, relevant codes and guidelines when maintaining the laboratory/field workplace
- work safely and minimise exposure of hazards to self, others and the laboratory
- keep accurate up-to-date records and report potential hazards and maintenance issues.

**Context of and specific resources for assessment**

This unit of competency is to be assessed in the workplace or simulated workplace environment.

This unit of competency may be assessed with:

- *MSL943002A Participate in laboratory/field workplace safety.*

Resources may include:

- access to work preparation areas, stocks, materials and equipment
- cleaning, decontamination and/or disinfection agents and equipment
- personal protective equipment
- stock order forms, labels and records/forms.

**Method of assessment**

The following assessment methods are suggested:

- observation of the candidate's techniques for cleaning

<b>EVIDENCE GUIDE</b>	
	<p>and/or removal of spillages and waste disposal</p> <ul style="list-style-type: none"> <li>• review of stock records completed by the candidate</li> <li>• feedback from supervisors and peers</li> <li>• questioning to assess underpinning knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p><b>Manufacturing</b></p> <p>On receipt of a bulk container of cleaning or sanitising agent, a laboratory assistant always attached to the container a description of its method of use. The assistant also attached a list of the surfaces, apparatus, utensils and machines that could be safely treated with that chemical agent as outlined in the company's quality manual. This practice reduced the likelihood of misuse of the chemical, wastage, damage to equipment and inadequate cleaning and sanitation.</p> <p><b>Biomedical and environmental</b></p> <p>Laboratory assistants and technical officers routinely examine fluids for micro-organisms using a microscope. They examine fluids, such as urine, seawater, chlorinated pool water, water from catchment areas and bottled water. To maintain microscopes in working order, they</p>

**EVIDENCE GUIDE**

	<p>thoroughly clean the stage, oculars and each objective after use and sometimes between samples. The 100X objective requires particular care since this is the oil immersion objective. The oil is slightly acidic and will slowly corrode the objective if it is not cleaned thoroughly and regularly. After using the 100X objective they also take care not to drag the other objectives through the oil.</p> <p><b>Food processing</b></p> <p>A laboratory assistant regularly uses standard pH solutions to calibrate the laboratory's pH meters. The assistant is aware from the label that the shelf life of these solutions after opening is two months and records the opening and disposal dates on the container. The assistant is also aware that the shelf life of unopened buffer solutions is twelve months from the date of manufacture and monitors this by noting the production date on the bottle. Requests for stock replacement take into account the normal rate of use of these buffer solutions so that unopened bottles have not reached their expiry date before use.</p>
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Codes of practice**

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

**Standards, codes, procedures and/or enterprise requirements**

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
  - AS 1678 Emergency procedure guide - Transport

**RANGE STATEMENT**

- AS 1940-2004 Storage and handling of flammable and combustible liquids
- AS 2252 Biological safety cabinets
- AS 3780-2008 The storage and handling of corrosive substances
- AS 4332-2004 The storage and handling of gases in cylinders

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Perform setup and pre-use checks of laboratory equipment	1.1. Perform laboratory equipment setup and pre-use checks in accordance with enterprise procedures 1.2. Perform safety checks in accordance with relevant enterprise and instrumental procedures 1.3. Identify faulty or unsafe components and equipment and report to appropriate personnel 1.4. Complete instrument log books/records to meet enterprise requirements
2. Perform calibration checks	2.1. Start up equipment according to operating procedures 2.2. Use specified standards for calibration check 2.3. Check equipment as per calibration procedures and schedules 2.4. Record all calibration data accurately and legibly 2.5. Compare data with specifications and/or previous records to identify non-compliant equipment 2.6. Quarantine out of calibration equipment
3. Assist with equipment maintenance	3.1. Ensure all equipment work areas are clean during and after equipment use 3.2. Perform basic maintenance in accordance with enterprise procedures 3.3. Clean and store equipment according to enterprise

ELEMENT	PERFORMANCE CRITERIA
	and/or manufacturer's specifications/procedures 3.4. Identify and replace, repair or dispose of damaged/worn equipment as appropriate
4. Maintain records	4.1. Record and report information on unsafe or faulty equipment according to enterprise procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- performing setup, pre-use checks and shutdown procedures
- performing calibration checks of basic equipment using standard procedures
- obtaining readings of the required accuracy and precision
- identifying non-compliant equipment from specifications and/or previous checks
- recognising non-standard behaviour of instruments
- assisting with maintaining equipment in working order by performing basic maintenance tasks
- following all relevant occupational health and safety (OHS) requirements
- following enterprise recording and reporting procedures

#### Required knowledge

Required knowledge includes:

- operational principles and methods for equipment use
- basic sources of error in equipment operation and their control
- role and importance of correct calibration
- basic equipment maintenance procedures
- enterprise communication and reporting procedures
- relevant OHS and environment requirements

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> <li>• perform setup pre-use checks and shutdown procedures</li> <li>• perform calibration checks of basic equipment using standard procedures</li> <li>• obtain readings of the required accuracy and precision</li> <li>• recognise non-standard behaviour of instruments</li> <li>• assist with maintaining equipment in working order by performing basic maintenance tasks</li> <li>• follow all relevant OHS requirements</li> <li>• follow enterprise recording and reporting procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <li>• <i>MSL973001A Perform basic tests.</i></li> </ul> <p>Resources may include:</p> <ul style="list-style-type: none"> <li>• standard laboratory equipped with appropriate equipment and reference materials</li> <li>• enterprise procedures and standard methods, equipment manuals</li> <li>• calibration check standards and procedures</li> <li>• maintenance procedures.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• review of the quality of test data/results achieved by the candidate over time</li> <li>• inspection of records and workplace documentation completed by the candidate</li> <li>• feedback from peers and supervisors</li> <li>• observation of the candidate performing calibration checks and basic maintenance tasks</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess</p>

**EVIDENCE GUIDE**

	<p>directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p><b>Manufacturing and construction materials testing</b></p> <p>Laboratory assistants perform calibration checks and operate a range of laboratory equipment to ensure the quality of products. For example, the labelling on fertilisers specifies the total percentage of nitrogen [N or N(t)], the total percentage of phosphorus [P or P(t)] in all forms and the total percentage of potassium [K]. A 5-10-5 fertiliser contains 5% N, 10% P and 5% K. During the manufacture of fertiliser, an assistant in a quality control laboratory measures the concentration of nitrogen, phosphorus and potassium using standard analytical methods to ensure that the final products are within prescribed specifications. The assistant must pay particular attention to the equipment calibration check. If the equipment is out of calibration no amount of testing skill will result in accurate results. Selling out of specification fertiliser could result in a product recall or claims from users against the manufacturer.</p> <p><b>Biomedical and environmental services</b></p> <p>Laboratory assistants are quite often involved in routine collections and culturing of cells. Bacterial cells are often cultured and grown to large populations in order to provide material from which to extract biological materials. A quick method of determining when the cell growth has yielded enough cells is to determine the absorbance of the cell culture by measuring absorbance at 600 nm. An absorbance of 1 to 1.5 will give a good</p>

**EVIDENCE GUIDE**

	<p>cell harvest. This method relies on the assistant being able to perform calibration checks on an ultraviolet-visible (UV-VIS) spectrometer.</p> <p><b>Food and beverage processing</b></p> <p>A laboratory assistant in the quality control laboratory of a fruit canning company is required to perform calibration checks and maintain and operate a range of equipment, including a pH meter. Canned pears, for example, are routinely checked for pH to ensure safe heat processing. While checking the calibration of the pH meter with the standard buffer solutions, the laboratory assistant found that stable pH readings could not be obtained. On closer inspection, it was found that the pH probe was damaged. This was reported to the supervisor. The probe was replaced and the meter was re-checked for calibration in readiness for routine testing.</p> <p><b>Construction Materials Testing</b></p> <p>A laboratory assistant has been allocated the task of performing in-house calibration checks on the laboratory's equipment. He/she has previously prepared a wall chart for the year that shows when the required calibration checks fall due in accordance with the NATA Field Application Document (FAD) for construction materials testing. The assistant consults the wall chart and notes that this month's calibration checks include checking the:</p> <ul style="list-style-type: none"> <li>• ice points of the liquid-in-glass thermometers</li> <li>• working sieves against the reference set</li> <li>• compaction hammers for compliance with specifications</li> <li>• repeatability of the balances.</li> </ul> <p>A full calibration of one of the laboratory's nuclear density gauges is also required. He/she then telephones the local calibration authority to book the nuclear gauge in for calibration and prepares to perform the other in-house checks.</p>
--	--

**Range Statement**

**RANGE STATEMENT**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Codes of practice**

Where reference is made to Industry codes of practice and Australian/international standards, it is expected the latest version will be used

**Standards, codes, procedures and/or enterprise requirements**

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards such as:
  - AS/NZS 2243 Set:2006 Safety in laboratories set
  - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
- Australian code of good manufacturing practice for medicinal products (GMP)
- National Association of Testing Authorities (NATA) Field Application Documents (FADs)
- calibration check and maintenance schedules
- enterprise recording and reporting procedures
- equipment manuals
- equipment start up, operation and shutdown procedures
- material safety data sheets (MSDS)
- material, production and product specifications
- national measurement regulations and guidelines
- OHS national standards and codes of practice
- principles of good laboratory practice (GLP)
- production and laboratory schedules
- quality manuals
- standard operating procedures (SOPs)

**Typical equipment and instruments**

Typical equipment and instruments may include:

- balances, pipettes, burettes and volumetric glassware
- colorimeters/spectrometers and polarimeters
- compaction rammers and soil classification

<b>RANGE STATEMENT</b>	
	<p>equipment</p> <ul style="list-style-type: none"> <li>• conductivity meters and pH meters</li> <li>• disintegration apparatus, thermometers, incubators and water baths</li> <li>• instrument chart recorders, penetrometers, force measuring equipment and tensiometer</li> <li>• melting point apparatus, viscometers and hardness testing equipment</li> <li>• mixing and separating equipment such as centrifuges, riffers and splitters, and mixers</li> <li>• noise meters and blasting meters</li> <li>• optical microscopes</li> </ul>
<b>Occupational health and safety (OHS) and environmental management requirements</b>	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> <li>• all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time</li> <li>• all operations assume the potentially hazardous nature of samples and require standard precautions to be applied</li> <li>• where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health</li> </ul>

## Co-requisite units

Co-requisite units		

## MSL934002A Apply quality system and continuous improvement processes

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the exercise of good laboratory practice and effective participation in quality improvement teams. Personnel are required to ensure the quality and integrity of their own work, detect non-conformances and work with others to suggest improvements in productivity and quality.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit of competency is applicable to laboratory technicians working in all industry sectors who contribute to quality improvements in areas or processes associated with their own job function and/or specialisation. This unit of competency is relevant to experienced technical officers who may work individually or as part of a team.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Satisfy quality system requirements in daily work	1.1. Access information on quality system requirements for own job function 1.2. Record and report quality control data in accordance with quality system 1.3. Follow quality control procedures to ensure products, or data, are of a defined quality as an aid to acceptance or rejection 1.4. Recognise and report non-conformances or problems 1.5. Conduct work in accordance with sustainable energy work practices 1.6. Promote sustainable energy principles and work practices to other workers
2. Analyse opportunities	2.1. Compare current work practices, procedures and

ELEMENT	PERFORMANCE CRITERIA
for corrective and/or optimisation action	<p>process or equipment performance with requirements and/or historical data or records</p> <p>2.2. Recognise variances that indicate abnormal or sub-optimal performance</p> <p>2.3. Collect and/or evaluate batch and/or historical records to determine possible causes for sub-optimal performance</p> <p>2.4. Use appropriate quality improvement techniques to rank the probabilities of possible causes</p>
3. Recommend corrective and/or optimisation actions	<p>3.1. Analyse causes to predict likely impacts of changes and decide on the appropriate actions</p> <p>3.2. Identify required changes to standards and procedures and training</p> <p>3.3. Report recommendations to designated personnel</p>
4. Participate in the implementation of recommended actions	<p>4.1. Implement approved actions and monitor performance following changes to evaluate results</p> <p>4.2. Implement changes to systems and procedures to eliminate possible causes</p> <p>4.3. Document outcomes of actions and communicate them to relevant personnel</p>
5. Participate in the development of continuous improvement strategies	<p>5.1. Review all relevant features of work practice to identify possible contributing factors leading to sub-optimal performance</p> <p>5.2. Identify options for removing or controlling the risk of sub-optimal performance</p> <p>5.3. Assess the adequacy of current controls, quality methods and systems</p> <p>5.4. Identify opportunities to continuously improve performance</p> <p>5.5. Develop recommendations for continual improvements of work practices, methods, procedures and equipment effectiveness</p> <p>5.6. Consult with appropriate personnel to refine recommendations before implementation of approved improvement strategies</p> <p>5.7. Document outcomes of strategies and communicate them to relevant personnel</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- applying problem solving techniques and strategies
- applying statistical analysis and statistical sampling procedures
- detecting non-conforming products or services in the work area
- documenting and reporting information about quality
- contributing effectively within a team to recognise and recommend improvements in productivity and quality
- implementing and monitoring improved practices and procedures

#### Required knowledge

Required knowledge includes:

- specifications for laboratory products and services in the candidate's work area
- quality requirements associated with the individual's job function and/or work area
- scientific and technical knowledge underpinning the processes, procedures, equipment and instrumentation associated with the candidate's work tasks and duties
- workplace procedures associated with the candidate's regular technical duties
- sustainable energy principles
- relevant health, safety and environment requirements
- layout of the enterprise, divisions and laboratory
- organisational structure of the enterprise
- lines of communication
- role of laboratory services to the enterprise and customers

#### Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Biomedical sector:

- ethical requirements dealing with patient confidentiality
- animal welfare legislation and codes of practice
- guidelines for pre-transfusion testing
- gene technology regulations for large scale, small scale and planned release of genetically manipulated organisms

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> <li>• use the enterprise's quality systems and business goals as a basis for decision making and action</li> <li>• apply all relevant procedures and regulatory requirements to ensure the quality and integrity of the products/services or data provided</li> <li>• apply and promote sustainable energy principles and work practices</li> <li>• detect non-conforming products or services in the work area</li> <li>• follow enterprise procedures for documenting and reporting information about quality</li> <li>• contribute effectively within a team to recognise and recommend improvements in productivity and quality</li> <li>• apply effective problem solving strategies</li> <li>• implement and monitor improved practices and procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <li>• <i>MSL924001A Process and interpret data</i></li> <li>• <i>MSL954001A Obtain representative samples in accordance with sampling plan</i></li> <li>• <i>relevant MSL974000 series units of competency</i></li> <li>• <i>relevant MSL975000 series units of competency.</i></li> </ul> <p>Resources may include:</p> <ul style="list-style-type: none"> <li>• enterprise quality manual and procedures</li> <li>• quality control data/records</li> <li>• customer complaints and rectifications</li> <li>• candidate's supervisors and peers.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• review of documentation completed by the candidate</li> </ul>

**EVIDENCE GUIDE**

	<p>as part of regular quality control</p> <ul style="list-style-type: none"> <li>• feedback from supervisors and/or customers regarding quality of products/services and/or data regularly provided by the candidate</li> <li>• observation of the candidate's performance and participation in quality improvement teams over time in the workplace</li> <li>• review of reports from quality improvement teams where the candidate's role is clearly outlined and verified</li> <li>• verified reports of improvements suggested and implemented by the candidate individually.</li> </ul> <p>Those aspects of competency dealing with improvement processes could be assessed by the use of suitable simulations and/or a pilot plant and/or a range of case studies and scenarios.</p> <p>In all cases, practical assessment should be supported by questions to assess essential knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p><b>Manufacturing</b></p> <p>A quality improvement team at a chemical manufacturing plant was asked to propose a way of minimising the cost of disposing of chromium rich waste. Using appropriate techniques, the team narrowed the alternatives down to the option of burning the waste stream. An experienced technician agreed that this was feasible, but suggested that because the waste was petroleum high in chromium the team should consider</p>

**EVIDENCE GUIDE**

the environmental implications. Subsequent research indicated that the permitted chromium levels in the incinerated air waste stream would not exceed 10 ppm, which was less than the air emission standards for the plant. The technician analysed samples of the air waste stream and determined that the chromium levels were below the regulatory standards. He/she then supported the team's suggestion.

**Environmental**

The manager of an environmental testing laboratory believed that the team of laboratory technicians relied too much on external direction. As a result, the manager requested that whenever technicians asked for assistance they should also be ready to suggest a solution to the problem if at all possible. This strategy was implemented in a non-threatening manner and was accepted by the team. In time, the manager noted that many of the suggestions for solving problems and improving work practices that came from the team were effective and reasonable. Their skill in making realistic recommendations came from their familiarity with many of the issues that needed to be considered. It became the norm that the laboratory technicians were given public credit for suggesting successful strategies that improved safety, productivity and staff morale.

**Food processing**

A company that produces apple juice uses 30-35% hydrogen peroxide ( $H_2O_2$ ) to sterilise packaging. A mist of atomised  $H_2O_2$  is sprayed into pre-formed cartons and later removed with a jet of hot sterile air. The laboratory manager was concerned that some batches of product were not sterile after standing at room temperature for several days. The cause of the failure in the sterilisation procedure was not apparent and a technical officer was asked to investigate this problem.

The technical officer examined each unit operation of juice manufacture and determined that the application of  $H_2O_2$  was a critical sterilisation point where failure could occur. The concentration of  $H_2O_2$  in the atomiser and in opened containers was unpredictable and several problems were found to contribute to this.  $H_2O_2$  was left in the atomiser for up to several days between packaging runs. Containers of  $H_2O_2$  were not always used sequentially, some being opened and then not used for a

**EVIDENCE GUIDE**

	<p>long time. The containers were stored at room temperature after opening and some may have become contaminated with atmospheric particulates that catalyse the breakdown of H<sub>2</sub>O<sub>2</sub>.</p> <p>The recommendations that emerged from the investigation were that:</p> <ul style="list-style-type: none"> <li>• fresh H<sub>2</sub>O<sub>2</sub> should be used at the beginning of each packaging run</li> <li>• only one stock container of H<sub>2</sub>O<sub>2</sub> should be open at any one time and stored chilled, with residuals discarded after 14 days</li> <li>• care should be taken to exclude foreign material from the opened vessels of H<sub>2</sub>O<sub>2</sub> and the atomiser.</li> </ul> <p>In summary, the intolerance of the company to even low incidences of faulty product and the competency of the technical officer to investigate the processing stream resulted in increased product quality without significant cost.</p>
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Codes of practice**

Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

**Standards, codes, procedures and/or enterprise requirements**

Standards, codes, procedures and/or enterprise requirements may include:

- Australian and international standards, such as:
  - AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
  - AS/NZS ISO 10005:2006 Quality

<b>RANGE STATEMENT</b>	
	<p>management systems - Guidelines for quality plans</p> <ul style="list-style-type: none"> <li>• AS/NZS ISO 10012:2004 Measurement management systems - Requirements for measurement processes and measuring equipment</li> <li>• AS/NZS ISO 9000 Set:2008 Quality management systems set</li> <li>• AS 1199 Sampling procedures and tables for inspection by attributes</li> <li>• BS 5750 Quality systems</li> <li>• Australia New Zealand Food Standards (ANZFS) Code</li> <li>• Australian code of good manufacturing practice for medicinal products (GMP)</li> <li>• customer specific requirements/standards</li> <li>• enterprise and customer product specifications</li> <li>• National Association of Testing Authorities (NATA) Accreditation programs requirements</li> <li>• National Health and Medical Research Council (NHMRC) Guidelines</li> <li>• national measurement regulations and guidelines</li> <li>• principles of good laboratory practice (GLP)</li> <li>• quality manuals and procedures</li> <li>• Therapeutic Goods Regulations 1009</li> </ul>
<b>Quality control procedures</b>	<p>Quality control procedures may include:</p> <ul style="list-style-type: none"> <li>• standards imposed by regulatory and licensing bodies</li> <li>• enterprise quality procedures</li> <li>• working to a customer brief or batch card and associated quality procedures</li> <li>• checklists to monitor job progress against agreed time, costs and quality standards</li> <li>• preparation of sampling plans</li> <li>• the use of hold points to evaluate conformance</li> <li>• the use of inspection and test plans to check compliance</li> </ul>

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Maintain and control stocks of materials or equipment	1.1. Label, document and store stocks in accordance with relevant standards and specific safety requirements 1.2. Follow stock rotation procedures to maximise use of stocks within permitted shelf life 1.3. Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level 1.4. Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate 1.5. Initiate quality control sampling and testing procedures when appropriate 1.6. Report stock problems outside own knowledge and authority limitations to relevant personnel
2. Order and receive materials and equipment	2.1. Determine requirements of customers and suppliers using appropriate communication and interpersonal skills 2.2. Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions 2.3. Place and/or follow up approved orders using enterprise systems and procedures 2.4. Check condition of received goods and take appropriate action
3. Maintain stock	3.1. Record all relevant details accurately using the

ELEMENT	PERFORMANCE CRITERIA
records	specified forms/computer system 3.2.Ensure that written information is legible and indelible 3.3.File all records in the designated place
4. Maintain a safe work environment	4.1.Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 4.2.Minimise the generation of wastes and environmental impacts 4.3.Ensure the safe collection of redundant/outdated stocks for subsequent disposal

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- maintaining and controlling stocks or materials and equipment
- ordering and receiving materials and equipment
- maintaining stock records
- maintaining a safe work environment

#### Required knowledge

Required knowledge includes:

- technical terminology relating to ordering and storage of stocks
- laboratory stock, product and service information
- types of chemical reactions and rationale for recommended storage systems
- enterprise procedures and quality system requirements for stock control
- codes of practice and regulations concerning the handling, storage and transport of the stock involved
- relevant health, safety and environment requirements

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> <li>• confirm customer requirements with senior personnel where there is doubt</li> <li>• access online databases and/or catalogues efficiently</li> <li>• interpret labelling information (lot number, batch and date) and MSDS correctly</li> <li>• apply procedures for safe handling, storage and transport of stocks</li> <li>• use required safety and manual handling equipment and procedures</li> <li>• perform quality control sampling and testing and rotate stock in accordance with SOPs</li> <li>• follow workplace procedures for predicting and/or determining demand for stock</li> <li>• maintain stock at prescribed levels for their work area, through regular inspections, timely ordering of replacement items and followup of late orders</li> <li>• cope with peak and seasonal variations in stock usage and production conditions</li> <li>• follow workplace procedures for researching, ordering and receipt of stock</li> <li>• complete and record all documentation accurately</li> <li>• demonstrate effective and appropriate communication and interpersonal skills when dealing with customers and suppliers.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <li>• <i>MSL935004A Maintain instruments and equipment.</i></li> </ul> <p>Resources may include:</p> <ul style="list-style-type: none"> <li>• stocks of materials and equipment</li> <li>• stock order forms and documentation</li> <li>• sampling and testing equipment.</li> </ul>

<b>EVIDENCE GUIDE</b>	
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• review of documentation for orders prepared by the candidate</li> <li>• examination of stock records maintained by the candidate</li> <li>• observation of the candidate handling stock and conducting quality control sampling and testing</li> <li>• feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers</li> <li>• explanation by the candidate of the labelling and storage requirements of a selection of stock items.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting.</p> <p><b>Biotechnology</b></p> <p>A technical officer arrived at work on Monday morning and discovered that the freezer had been turned off over the weekend and the restriction nucleases had thawed. These enzymes were to be used that morning. The technician needed to check the enzyme activity to determine whether the enzymes had been denatured by the rise in temperature. The technician quickly set up a digestion mix of affected enzyme with some viral DNA of known sequence. The digest produced DNA fragments of expected length, showing the enzyme still had activity.</p>

**EVIDENCE GUIDE**

The technician reported the incident along with the results to the supervisor, who decided that the enzymes could be used for that day.

**Manufacturing**

Neglected chemicals may deteriorate on the shelf and turn into a completely different entity. Not only can this change in identity damage a chemical manufacturing process, it can also present an immediate hazard. For example, this occurred in a storeroom where stored ether built up high levels of peroxides. When it was used in an extraction process to make a starting material in a manufacturing process, the peroxides were concentrated and exploded. The company was fortunate that loss of life didn't occur. The company revised enterprise procedures to ensure that in the future, redundant or outdated stocks are identified and removed.

**Food processing**

The staff in a confectionary company laboratory use enzyme based methods to routinely analyse sugars (glucose, fructose, sucrose and lactose) in products. Although the enzymes are stored as directed by the manufacturer, typically at -20(C in the dark, they do not retain their activity indefinitely. To avoid using inactive enzyme in an analytical procedure and obtaining a reduced or false negative result, several features of each enzyme preparation are routinely noted. These include the date of purchase, the number of times the enzyme has been thawed and refrozen and its initial activity. Periodically, the enzyme activity is verified and stock is discarded where its activity has fallen to a less than acceptable value. These practices ensure that the analytical methods that use enzymes are performed with functional reagents and give accurate results.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

<b>RANGE STATEMENT</b>	
situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<b>Codes of practice</b>	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
<b>Standards, codes, procedures and/or enterprise requirements</b>	<p>Standards, codes, procedures and/or enterprise requirements may include:</p> <ul style="list-style-type: none"> <li>• Australian and international standards such as: <ul style="list-style-type: none"> <li>• AS 1678 Emergency procedure guide - Transport</li> <li>• AS 1940-2004 Storage and handling of flammable and combustible liquids</li> <li>• AS 3780-2008 The storage and handling of corrosive substances</li> <li>• AS 4332-2004 The storage and handling of gases in cylinders</li> <li>• AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories</li> <li>• AS/NZS 1269 Set:2005 Occupational noise management set</li> </ul> </li> <li>• AS/NZS 2243 Set:2006 Safety in laboratories set <ul style="list-style-type: none"> <li>• AS/NZS 2982.1:1997 Laboratory design and construction - General requirements</li> <li>• AS/NZS 4452:1997 The storage and handling of toxic substances</li> <li>• AS/NZS ISO 14000 Set:2005 Environmental management standards set</li> </ul> </li> <li>• animal welfare legislation and codes of practice</li> <li>• Australian code of good manufacturing practice for medicinal products (GMP)</li> <li>• Australian Dangerous Goods Code</li> <li>• Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations 1982</li> <li>• Australian Quarantine and Inspection Service (AQIS) Import Guidelines</li> <li>• Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• customer database and supplier catalogues</li> <li>• enterprise or standard operating procedures (SOPs)</li> <li>• equipment manuals and warranty, supplier catalogues and handbooks</li> <li>• gene technology regulations</li> <li>• internal/external stock orders and overdue actions</li> <li>• material safety data sheets (MSDS)</li> <li>• National Code of Practice for the labelling of workplace substances (NOHSC:2012 (1994))</li> <li>• National Environment Protection Measures</li> <li>• National Health and Medical Research Council (NHMRC) Guidelines</li> <li>• national measurement regulations and guidelines</li> <li>• occupational health and safety (OHS) national standards and codes of practice</li> <li>• principles of good laboratory practice (GLP)</li> <li>• Therapeutic Goods Regulations 1009</li> </ul>
<b>Workplace procedures</b>	<p>Workplace procedures may include:</p> <ul style="list-style-type: none"> <li>• ordering, purchase and receipt of stocks</li> <li>• verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes)</li> <li>• organisation of compatible batch or lot numbers</li> <li>• storage of stocks, stock control and rotation of stock</li> <li>• quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins)</li> <li>• reporting non-conformances</li> </ul>
<b>Records</b>	<p>Records could include:</p> <ul style="list-style-type: none"> <li>• stock usage</li> <li>• orders and progress of orders</li> <li>• equipment servicing and repairs</li> <li>• current inventories</li> <li>• quality control sampling, testing and stock rotation</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Communication</b>	<p>Communication may require the use of equipment or systems, such as:</p> <ul style="list-style-type: none"> <li>• telephone, fax, email and mail</li> <li>• online information systems, inventories, print records, databases and catalogues</li> <li>• filing systems</li> </ul> <p>Communication may involve::</p> <ul style="list-style-type: none"> <li>• suppliers</li> <li>• freight companies</li> <li>• internal customers</li> <li>• external customers</li> </ul>
<b>Hazards</b>	<p>Hazards may include:</p> <ul style="list-style-type: none"> <li>• electric shock</li> <li>• chemicals, such as acids and hydrocarbons</li> <li>• microbiological organisms associated with blood and blood products</li> <li>• radioisotopes</li> <li>• sharps, such as broken glassware</li> <li>• disturbance or interruption of services</li> <li>• manual handling of heavy boxes</li> <li>• fluids under pressure and industrial gas bottles</li> </ul>
<b>Safety procedures</b>	<p>Safety procedures may include:</p> <ul style="list-style-type: none"> <li>• use of personal protective equipment, such as hearing protection, gloves, safety glasses, coveralls and safety boots</li> <li>• ensuring access to service shut-off points</li> <li>• handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and enterprise procedures and regulations</li> <li>• regular cleaning of equipment and work areas</li> </ul>
<b>Occupational health and safety (OHS) and environmental management requirements</b>	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> <li>• all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time</li> </ul>

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>• all operations assume the potentially hazardous nature of samples and require standard precautions to be applied</li> <li>• where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health</li> </ul>

## MSL973007A Perform microscopic examination

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the ability to set up a light microscope for optimum resolution, to prepare routine samples and to observe, identify and report sample characteristics.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	<p>This unit of competency is applicable to laboratory or technical assistants in all industry sectors. The unit of competency covers limited interpretation and analysis of results. Troubleshooting of equipment and procedures is not required.</p> <p>Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.</p>
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Interpret test requirements	<p>1.1. Review test request to identify samples to be tested, test method and equipment involved</p> <p>1.2. Identify hazards associated with the sample, preparation methods and equipment and implement enterprise control measures</p>
2. Set up work area for preparation and examination of samples	<p>2.1. Collect equipment and arrange the workspace so that equipment can be used safely and efficiently</p> <p>2.2. Perform pre-use and safety checks to ensure equipment is fit for purpose and report faulty or unsafe equipment to appropriate personnel</p>
3. Prepare samples for examination	<p>3.1. Log and label samples according to enterprise procedures to ensure traceability</p> <p>3.2. Check suitability of the original and prepared sample for the examination and report unsuitable samples to appropriate personnel</p> <p>3.3. Prepare and store the sample for examination following enterprise methods</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
4. Set up and use a light microscope	4.1. Set up the light path to optimise resolution 4.2. Select the appropriate objectives and filter for the sample being examined 4.3. Ensure that the lenses are clean 4.4. Adjust settings and alignment of the light path to optimise performance 4.5. Place sample correctly on the stage
5. Observe, identify and report sample characteristics	5.1. Recognise and identify significant sample characteristics 5.2. Perform required calculations accurately 5.3. Prepare and view control samples and check that results are consistent with expected values 5.4. Identify and report out of specification or atypical results promptly to appropriate personnel 5.5. Record and report data in accordance with enterprise procedures
6. Maintain a safe work environment	6.1. Ensure safety and minimise cross-contamination through the use of personal protective clothing and safety equipment 6.2. Handle all samples and equipment in accordance with enterprise safety protocols 6.3. Clean up spills using appropriate techniques to protect personnel, work area and environment 6.4. Minimise generation of waste and environmental impacts 6.5. Collect and dispose of all wastes safely 6.6. Report hazards and incidents to designated personnel using enterprise procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- setting up the workbench and microscope ergonomically

## REQUIRED SKILLS AND KNOWLEDGE

- setting up, cleaning and using a light microscope to achieve optimum resolution of the specimen
- using personal protective clothing and other safety equipment correctly
- performing counts on samples
- performing basic measurements using grids
- logging and tracking samples through all steps from receiving a sample through to completion of a procedure and reporting
- interpreting and recording test results, including simple calculations
- correctly handling and storing samples and equipment

### Required knowledge

Required knowledge includes:

- parts and functions of a light microscope
- importance and appropriate use of controls and certified reference materials
- hazards and risks in laboratories associated with performing microscopic examination
- enterprise and/or legal traceability requirements
- relevant health, safety and environment requirements

### Specific industry

Additional knowledge requirements may apply for different industry sectors. For example:

Biological industry:

- basic structure and function of cells and organelles
- basic classes and classification of organisms of organisms, such as prokaryotes, eukaryotes, plants, animals, bacteria, viruses and prions
- cell physiology and processes, such as simple and facilitated diffusion, plasmolysis, osmosis, tonicity, active transport, energy production, mitosis, motility, phagocytosis and pinocytosis
- purposes and mechanisms of staining (e.g. Gram +ve and -ve)

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<b>EVIDENCE GUIDE</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> <li>• follow enterprise standards, procedures and practices</li> <li>• prepare suitable samples</li> <li>• recognise, identify and document significant sample characteristics</li> <li>• set up a light microscope for optimal resolution</li> <li>• maintain personal safety and that of others</li> <li>• minimise cross-contamination and contamination of the laboratory and environment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>This unit of competency is to be assessed in the workplace or simulated workplace environment.</p> <p>This unit of competency may be assessed with:</p> <ul style="list-style-type: none"> <li>• <i>MSL922001A Record and present data</i></li> <li>• <i>MSL933002A Contribute to the achievement of quality objectives</i></li> <li>• <i>MSL943002A Participate in laboratory/field workplace safety</i></li> <li>• <i>MSL953001A Receive and prepare samples for testing.</i></li> </ul> <p>Resources may include:</p> <ul style="list-style-type: none"> <li>• standard laboratory equipped with appropriate equipment, such as light microscopes and samples</li> <li>• enterprise procedures, standard methods and materials.</li> </ul>
<b>Method of assessment</b>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> <li>• observation of the candidate performing microscopic examinations</li> <li>• review of data records prepared by the candidate, such as counts, observations and results</li> <li>• feedback from supervisors and peers about adherence to enterprise/technical procedures</li> <li>• questioning to assess underpinning knowledge.</li> </ul> <p>In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and</p>

<b>EVIDENCE GUIDE</b>	
	<p>disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required.</p> <p>The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.</p>
<b>This competency in practice</b>	<p>Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting.</p> <p><b>Construction materials testing</b></p> <p>The supply of river sand is running out and quarries are accessing alternative sources of sand for use in concrete mixes in construction. The sand should not be an aggregate that is likely to break down into smaller particles. A technician in a quarry company is required to analyse samples of crushed rock using a light microscope. The technician looks for characteristics of the sample, such as angularities, roundness, sharpness, cracks, presence of organic matter, mineral structure and whether the particles are a conglomerate. If the sample does not meet the characteristics, the company will need to treat it to make it suitable for use in concrete mixes (for example by washing, crushing and sieving).</p> <p><b>Food processing</b></p> <p>A customer complaint is received about the baking properties of a flour delivery. The laboratory assistant at the flour mill is given the task of testing the starch content of the suspect flour. He/she prepares iodine stained samples of the returned flour and a range of baked and partially baked products prepared from it. First, the assistant makes up fresh iodine staining solution and then prepares slides of each sample for microscopic examination. He/she identifies the characteristic starch granules of the flour sample and records the degree of gelatinisation in the starch granules in the baked samples. He/she discusses the results with the supervisor and prepares a report for the customer.</p> <p><b>Biomedical</b></p> <p>A laboratory assistant works in the microbiology laboratory of a public hospital and is responsible for</p>

**EVIDENCE GUIDE**

preparing and staining sputum smears from patients for micro and culture. The assistant puts on a clean gown and gloves before collecting the specimens from the reception area of the laboratory. The assistant prepares cultures of the sputum specimens on simple and selective media before preparing, fixing and staining smears for microscopic examination. The results are checked by the supervisor, entered into the laboratory information management system (LIMS) and sent to the appropriate section of the hospital.

**Environmental**

A laboratory assistant prepares media for plant tissue culture. There has been some contamination of Gram-positive bacteria in the last two batches and the supervisor has initiated an overhaul of the preparation and aliquotting procedure. The laboratory assistant has been asked to follow the new procedure exactly and to remove samples at each stage of ingredient addition for microscopic examination. The laboratory assistant records the exact addition amounts, batch numbers and brands of the reagents, the location of the addition (which biohazard cabinet), the equipment used and the pre-sterilisation records of all equipment.

The laboratory assistant then prepares slides, fixes them and performs a Gram stain on each of the aliquots removed from the new preparation run. Microscopic analysis of each aliquot reveals nil contamination. The supervisor decides that there has been a breach in the old procedure and the laboratory assistant is asked to follow the new procedure and to perform a routine microscopic check on all batches for the next month.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>RANGE STATEMENT</b>	
<b>Codes of practice</b>	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
<b>Standards, codes, procedures and/or enterprise requirements</b>	Standards, codes, procedures and/or enterprise requirements may include: <ul style="list-style-type: none"> <li>• Australian and international standards, such as: <ul style="list-style-type: none"> <li>• AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories</li> <li>• AS/NZS ISO 9000 Set:2008 Quality management systems set</li> <li>• AS/NZS 2243 Set:2006 Safety in laboratories set</li> </ul> </li> <li>• principles of good laboratory practice (GLP)</li> <li>• Australian code of good manufacturing practice for medicinal products (GMP)</li> <li>• safety manuals</li> <li>• quality manuals and equipment and procedure manuals</li> <li>• standard operating procedures (SOPs)</li> <li>• material safety data sheets (MSDS)</li> <li>• enterprise recording and reporting procedures</li> <li>• production and laboratory schedules</li> <li>• material, production and product specifications</li> </ul>
<b>Preparation of samples</b>	Preparation of samples may include: <ul style="list-style-type: none"> <li>• aseptic transfer of specimen</li> <li>• centrifugation</li> <li>• cooling</li> <li>• drying</li> <li>• filling a counting chamber in one continuous flow without bubbles or overflow</li> <li>• filtration</li> <li>• fixing of films to minimise cell damage and the production of artefacts</li> <li>• labelling</li> <li>• mounting of stained films, sections and whole mounts to ensure long term preservation</li> <li>• permanent labels for smears, films and sections for presentation, storage and retrieval</li> <li>• physical or chemical separation</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• selection of diluent to preserve or enhance visibility of the cells to be counted</li> <li>• selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling</li> <li>• serial dilution to enable individual cells to be reliably counted</li> <li>• staining of fixed material to illustrate required characteristics</li> <li>• sub-sampling</li> <li>• thin film or smear on a slide</li> </ul>
<b>Checking sample condition</b>	<p>Checking sample condition may include:</p> <ul style="list-style-type: none"> <li>• labelling</li> <li>• spillage</li> <li>• spoilage due to incorrect storage and transport conditions</li> <li>• temperature control</li> <li>• suitability for the examination</li> </ul>
<b>Pre-use checks</b>	<p>Pre-use checks may include:</p> <ul style="list-style-type: none"> <li>• calibration</li> <li>• cleaning/checking use by dates of reagents</li> <li>• routine maintenance</li> </ul>
<b>Equipment</b>	<p>Equipment may include:</p> <ul style="list-style-type: none"> <li>• glass slides</li> <li>• counting chambers (e.g. haemocytometer)</li> <li>• optical graticules and stage micrometers</li> <li>• tissue culture flasks</li> </ul>
<b>Light microscopes</b>	<p>Light microscopes may include:</p> <ul style="list-style-type: none"> <li>• bright field illumination microscopic examination up to 1000x magnification</li> <li>• stereomicroscopes and dissection microscopes</li> <li>• compound microscopes</li> <li>• phase contrast microscopes</li> <li>• inverted microscopes</li> </ul>
<b>Biological samples</b>	<p>Biological samples may include:</p> <ul style="list-style-type: none"> <li>• smears, impression smears, sections, squashes, films and whole mounts</li> <li>• a monolayer of cells in smears and films</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques</li> <li>• blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes</li> <li>• stained sections of animal tissues using regressive haematoxylin and eosin to differentiate cytoplasmic and nuclear detail</li> <li>• differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium)</li> <li>• stained whole mounts of helminths</li> <li>• whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae</li> <li>• pond water organisms</li> <li>• onion root tip squash</li> <li>• midstream sample of urine</li> </ul>
<b>Physical samples</b>	<p>Physical samples may include:</p> <ul style="list-style-type: none"> <li>• sand</li> <li>• asbestos fibres</li> <li>• coal samples</li> <li>• construction testing materials</li> <li>• geological specimens</li> </ul>
<b>Checking prepared samples</b>	<p>Checking prepared samples may include looking for:</p> <ul style="list-style-type: none"> <li>• clean and scratch-free microscope slides to reduce artefacts</li> <li>• preparation according to SOPs</li> <li>• a homogeneous suspension of sample</li> <li>• films and smears that have been fixed rapidly</li> <li>• thin films with a monolayer of cells</li> <li>• appropriate whole mounts for intact organisms</li> <li>• correct sample identification during and after processing</li> </ul>
<b>Sample characteristics</b>	<p>Sample characteristics are restricted to what can be viewed by bright light microscopy and may include:</p>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• shape and size of particles</li> <li>• presence of contamination</li> <li>• colour</li> <li>• consistency and variability</li> <li>• number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains)</li> <li>• type of cells, percentage of atypical cells, presence/absence of cells, size of cells, viable and non-viable cells and trajectory</li> <li>• presence of stained material, such as starch</li> <li>• colour/staining and morphology</li> <li>• motility</li> </ul>
<b>Calculations</b>	<p>Calculations may include:</p> <ul style="list-style-type: none"> <li>• dilutions</li> <li>• percentage viability</li> <li>• number of cells in original sample after dilution</li> <li>• calculation of cells/ml in a number of squares of a counting chamber</li> </ul>
<b>Hazards</b>	<p>Hazards may include:</p> <ul style="list-style-type: none"> <li>• micro-organisms and agents associated with soil, air, water, blood and blood products and human or animal tissue and fluids</li> <li>• chemicals and stains</li> <li>• sharps and broken glassware</li> <li>• aerosols</li> </ul>
<b>Safety practices and personal protective equipment</b>	<p>Safety practices and personal protective equipment may include:</p> <ul style="list-style-type: none"> <li>• use of MSDS</li> <li>• use of personal protective equipment, such as safety glasses, gloves and coveralls</li> <li>• use of biohazard containers and laminar flow cabinet</li> <li>• correct labelling of reagents and hazardous materials</li> <li>• handling and storing hazardous materials and equipment in accordance with labels, MSDS and manufacturer's instructions</li> <li>• ergonomic layout, correct illumination and</li> </ul>

<b>RANGE STATEMENT</b>	
	<p>organisation of workbench</p> <ul style="list-style-type: none"> <li>regular cleaning and/or decontamination of equipment and work areas</li> </ul>
<b>Occupational health and safety (OHS) and environmental management requirements</b>	<p>OHS and environmental management requirements:</p> <ul style="list-style-type: none"> <li>all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time</li> <li>all operations assume the potentially hazardous nature of samples and require standard precautions to be applied</li> <li>where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health</li> </ul>

# NWP203B Plan and organise personal work activities

## Modification History

NWP203B Release 2: Layout adjusted. No changes to content.

NWP203B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to plan and organise personal work activities to meet specified outcomes, including identifying and using resources and equipment and applying customer service policies.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff who work under supervision but who are required to exercise responsibility for their own effective work performance.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit of competency contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and conduct assigned work activities.</b>	1.1 Identify work activities and relevant <i>legislation and organisational procedures</i> . 1.2 Organise and <i>plan work activities</i> to achieve agreed outcomes. 1.3 Identify and obtain resources to complete planned work activities.
<b>2 Monitor quality of work.</b>	2.1 Interpret and check instructions against relevant organisational standards of work. 2.2 Seek clarification of work instructions as required. 2.3 Monitor and adjust work according to requirements for job quality, customer service, public responsibility and resource use.
<b>3 Provide and obtain feedback and information on work activities.</b>	3.1 <i>Record and report</i> work activities according to organisational requirements. 3.2 Access appropriate avenues to provide suggestions for improvement to personal work performance.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- prepare, identify and respond to operational problems
- complete basic reports, records and logs
- follow work instructions
- follow policies, procedures and standards
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- communicate such things as work requirements effectively
- assertiveness
- time management

### Required knowledge:

- organisational reporting and communication systems
- work planning processes
- legislative and organisational policies, procedures and standards
- administrative procedures
- quality systems
- organisational procedures for contractors
- reporting procedures

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to plan and organise personal work activities to meet specified outcomes, including:

- identifying and using resources and equipment
- applying customer service policies
- identifying, prioritising and planning work tasks
- identifying and applying appropriate quality standards
- monitoring work performance and seeking feedback

### Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be

authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Legislation and organisational procedures*** include:

- by-laws and organisational policies
- standard operating procedures
- equal employment opportunity
- OHS

***Plan work activities*** will require:

- interpretation of instructions and directions
- assessment and prioritisation of workload
- adherence to timelines
- interaction and communication with team members and individuals
- interpretation of legislation and organisational procedures
- reference to:
  - productivity requirements
  - total quality management principles
  - customer service requirements

***Record and report*** information relating to work activities, including:

- completion of time sheets
- requisitions
- work sheets and job cards
- basic workplace records and verbal or written reports

**Unit Sector(s)**

Not applicable.

**Competency field**

Common

# NWP209B Use maps, plans, drawings and specifications

## Modification History

NWP209B Release 2: Layout adjusted. No changes to content.

NWP209B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to read and interpret maps, plans, drawings and specifications.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff involved in the location, construction and maintenance or repair of assets, such as plants, pump stations and infrastructure.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit of competency contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Interpret maps, plans and drawings.</b>	1.1 Identify main <i>types of maps, plans, drawings and specifications</i> used to support work tasks. 1.2 Identify parts of water systems and their interrelationship on a range of drawing types. 1.3 Interpret commonly used symbols and abbreviations. 1.4 Interpret function of the legend. 1.5 Verify latest version of map, plan or drawing.
<b>2 Use maps and site plans to support work activities.</b>	2.1 Apply organisation's <i>system for managing maps and plans</i> . 2.2 Apply relevant <i>technologies</i> used to gather, record and monitor, map and plan data. 2.3 Identify function and <i>key features of maps and site plans</i> in the planning of work. 2.4 Identify <i>orientation of the site</i> . 2.5 Identify and isolate access from roadways to work site. 2.6 Determine materials and distances from plans and drawings.
<b>3 Read and interpret specifications.</b>	3.1 Relate specifications to particular maps and plans and identify quality standards. 3.2 Identify and determine types of details from works specifications.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- read and interpret maps, plans, drawings and specifications
- measure accurately
- communicate effectively
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- use information provided in maps, plans and drawings to complete a job and in different work situations

### Required knowledge:

- measurements and calculations
- contours
- datum points
- planes

- gradients
- sections
- orthographic projection
- symbols
- dimensions
- terminology

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to read and interpret maps, plans, drawings and specifications including:

- locating correct maps, plans, drawings and specifications for work tasks
- interpreting correctly all relevant information in maps, plans, drawings and specifications to enable the work to be performed correctly, effectively and according to organisational quality standards

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the

assessor has complete confidence in the person's competence over time and in various contexts

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Types of maps, plans, drawings and specifications*** may include:

- urban and rural topographical maps
- site plans and elevations
- process flow sheets
- survey plans
- sectional plans and elevations
- channel drainage plans
- pipe system plans
- location of assets plans
- details and specifications providing illustrations and dimensions

***System for managing maps and plans*** used within organisation may be:

- geographic information systems
- electronic plans management systems
- manual systems
- hard copy systems

***Technologies*** used to gather,

- vary across organisations

record and monitor map and plan data may:

*Key features of maps and site plans* will include combinations of:

- include use of global positioning system (GPS) technology and require the use of portable navigation devices by operators
- shape and orientation of site
- roads
- railways
- easements
- existing buildings and structures
- services, including:
  - drainage
  - sewerage
  - gas
  - water
  - electricity and telecommunications
- dimensions
- grades of pipelines and channels
- tree preservation orders
- geographical features
- power and transmission lines
- heritage and cultural features
- types of structure, including:
  - buildings
  - bridges
  - fabricated towers
  - fences
  - pipelines
  - regulators
  - poles
- environmental barriers
- environmental features, including:
  - fauna and flora habitats
  - cultural features
  - heritage features
  - water catchments
- shape of structure and building
- service requirements
- location of plant and equipment
- vertical and horizontal measurements
- clearance distance
- geological features
- service layouts

***Orientation of the site*** may include:

- bore and casing details
- relationship to north
- currency of plan
- relationship between plan and site

## **Unit Sector(s)**

Not applicable.

Common.

# NWP210B Perform basic water quality tests

## Modification History

NWP210B Release 2: Layout adjusted. No changes to content.

NWP210B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to perform basic water quality tests.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff with responsibility for preparing for, conducting and reporting on basic water quality tests in general water industry and water treatment operations.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit of competency contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Prepare for basic water quality tests.</b>	<p>1.1 Receive instructions for conducting and recording <i>basic water quality tests</i> and confirm with appropriate personnel.</p> <p>1.2 Confirm <i>testing details</i> and <i>plan testing work</i> according to <i>legislative and organisational requirements</i>.</p> <p>1.3 Select, fit and use personal protective equipment specified for routine water tests.</p> <p>1.4 Prepare and check <i>testing equipment</i> according to organisational requirements.</p>
<b>2 Conduct basic water quality tests.</b>	<p>2.1 Identify and check correct samples for testing and report <i>abnormal sample characteristics</i>.</p> <p>2.2 Conduct basic water quality tests according to organisational requirements.</p> <p>2.3 <i>Maintain integrity of samples</i> during testing.</p> <p>2.4 Identify <i>atypical data</i> and take appropriate action.</p>
<b>3 Finalise work.</b>	<p>3.1 Record relevant <i>information</i> according to organisational requirements.</p> <p>3.2 Dispose of samples and clean and store test equipment according to organisational procedures.</p> <p>3.3 Clear and restore work area according to organisational requirements.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- conduct basic water quality tests
- calibrate testing equipment
- operate testing equipment
- conduct sub-sampling
- dispose of samples and waste
- communicate effectively
- produce reports and logs
- perform relevant work-related calculations
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- interpret work requirements

### **Required knowledge:**

- range and purpose of basic water quality testing
- test procedures
- abnormal characteristics of water samples
- atypical test result data
- relevant work-related calculations
- maintenance and storage of reagents
- requirements for maintaining sample integrity
- documentation procedures for test results
- sample and waste disposal procedures
- relevant legislative and organisational requirements

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to perform basic water quality tests by:

- interpreting testing requirements and procedures
- preparing, checking and using equipment correctly
- conducting at least three different types of test safely while maintaining the integrity of samples
- recording all relevant information

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical

- requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
  - a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
  - all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
  - where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
  - assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Basic water quality tests*** include:

- range of tests required for competent performance of work tasks in the organisational context
- should comprise at least three of the following types of test:
  - pH
  - temperature
  - electrical conductivity
  - microscopy
  - turbidity

- colour
  - chlorine residual
  - jar testing
  - hardness
  - dissolved oxygen
- Testing details** may include:
- locations, including:
    - on-site testing
    - field-based testing
    - laboratory
  - range of testing procedures and techniques that apply to organisational, plant or field sites
  - variety of samples to be tested
  - testing equipment to be used
  - test reporting systems
- Plan testing work** may include:
- interpretation of instructions and directions
  - timelines
  - interaction and communication with team members and individuals
  - interpretation of legislative and organisational requirements
- Legislative and organisational requirements** may include:
- relevant federal and state or territory legislation and regulations
  - codes of practice, associated standards and guidance material
  - documented organisational policies, manuals and induction programs
  - relevant community planning and development agreements, such as land care agreements
- Testing equipment** may include:
- portable meters, such as:
    - pH meters
    - electrical conductivity meter
    - thermistors
    - comparators
    - pocket colorimeters
    - dissolved oxygen meters
  - test kits
  - microscopes
  - thermometers
- Abnormal sample characteristics** may include:
- insufficient sample volume
  - odour
  - visible contaminants, such as:

- scum
  - debris
  - discolouration
- Maintaining integrity of samples*** may include:
- application of correct:
    - holding time
    - storage procedures
    - sub-sampling procedures
- Atypical data*** may include:
- results that fall outside organisational range requirements
  - results that fall outside legislated range requirements
- Information*** may include:
- time and logging of sample receipt and testing
  - visual observations
  - equipment identification
  - atypical results
  - test results

# NWP215B Install and replace basic volumetric metering equipment

## Modification History

NWP215B Release 2: Layout adjusted. No changes to content.

NWP215B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to install and replace basic volumetric metering equipment for domestic, industrial and commercial premises. The unit also includes the identification of defects and the reporting, replacement and adjustment of metering equipment.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for staff responsible for the effective and accurate operation of water metering equipment as a vital component of service delivery and compliance reporting.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit of competency contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and prepare to install or replace basic volumetric metering equipment.</b>	<p>1.1 Determine work requirements and work site boundaries from specifications or instructions.</p> <p>1.2 Plan work according to job and <i>safety requirements</i> using relevant plans, drawings, standards and technical data.</p> <p>1.3 Select and use electrical safety equipment according to <i>legislative and organisational requirements</i>.</p> <p>1.4 Check coordination issues, including permission to access third-party sites, isolations and permits to work with relevant personnel.</p> <p>1.5 Identify, check and prepare materials, equipment and resources required to satisfy job plan according to organisational requirements.</p> <p>1.6 Identify <i>basic metering equipment</i> and recognise specifications for operation.</p> <p>1.7 Select, fit and use personal protective equipment.</p>
<b>2 Read metering equipment.</b>	<p>2.1 Read meters according to the organisation's operational requirements.</p> <p>2.2 Report readings outside normal parameters and faulty meters and apply organisational procedures for estimating consumption.</p> <p>2.3 Collect and report information on performance metering equipment according to organisational requirements.</p>
<b>3 Finalise work and complete documentation.</b>	<p>3.1 Check, maintain and store equipment, tools and materials according to manufacturer guidelines and organisational requirements.</p> <p>3.2 Restore work site to meet environmental and organisational requirements.</p> <p>3.3 Maintain compliance reports and relevant workplace records as required.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- identify and respond to operational problems
- produce reports and logs

- operate communications equipment
- give and receive instructions
- follow plans, charts and instructions
- perform work-related calculations
- use safety equipment and personal protective equipment
- communicate with customers and other employees
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- secure metering devices

### **Required knowledge:**

- relevant utilities and service bodies
- organisation's communication systems
- materials handling
- environmental, landscape and ground structure of water and wastewater systems
- risk factors and potential hazards involved with water systems
- equipment operation, capacity and limitations
- effects of weather and conditions on site
- meter types
- equipment placement and operation
- metering measurement procedures
- data collection and recording system
- lock-out procedures for mechanical and electrical installations

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to install and replace basic volumetric metering equipment for domestic, industrial and commercial premises including:

- planning and preparing for installation or replacement of basic volumetric metering equipment
- installing or replacing meters
- reading meters and report faults
- completing reports

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation

- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts.

***Safety requirements*** to be considered in planning work include:

- where relevant, meeting requirements to work in confined spaces and at heights
- use of appropriate personal protective equipment
- organisational electrical safety procedures
- adherence to OHS policies, and statutory and regulatory requirements

***Legislative and organisational requirements*** may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

***Basic metering equipment*** may include:

- domestic
- industrial
- commercial
- volumetric metering equipment

# **NWP222A Operate basic flow control and regulating devices in irrigation systems**

## **Modification History**

NWP222A Release 2: Layout adjusted. No changes to content.

NWP222A Release 1: Primary release.

## **Unit Descriptor**

This unit of competency describes the outcomes required to operate basic flow control and regulating devices in irrigation systems.

## **Application of the Unit**

This unit supports the attainment of skills and knowledge required for field and operational staff with responsibility for using flow control and metering devices according to organisational procedures.

## **Licensing/Regulatory Information**

Not applicable.

## **Pre-Requisites**

Not applicable.

## **Employability Skills Information**

This unit of competency contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Monitor required flows in irrigation systems.</b>	<p>1.1 Access and apply operating parameters and requirements for flows in irrigation systems.</p> <p>1.2 Use <i>equipment</i> to support monitoring process in irrigation systems according to OHS, organisational and manufacturer requirements.</p> <p>1.3 <i>Monitor, measure and record</i> flows at <i>designated locations and systems</i> according to agreed schedule and procedures.</p> <p>1.4 Identify potential operational problems in irrigation systems and provide proactive advice to relevant personnel.</p>
<b>2 Regulate flows in irrigation systems.</b>	<p>2.1 Adjust <i>flow regulation</i> and control mechanisms in irrigation systems to increase and decrease flow according to organisational procedures.</p> <p>2.2 Secure flow regulation devices in irrigation systems to maintain a constant flow and meet <i>legislative and organisational requirements</i>.</p>
<b>3 Record and report system adjustments.</b>	<p>3.1 Produce information relating to flow adjustments in irrigation systems according to organisational procedures.</p> <p>3.2 Collect, record and report information on flows and abnormalities in irrigation systems according to organisational requirements.</p>
<b>4 Respond to contingencies.</b>	<p>4.1 Identify and assess potential risks and contingencies in the operation of flow control and regulating devices within irrigation systems.</p> <p>4.2 Identify and apply organisational standards and procedures for responding to potential and actual risks and contingencies.</p> <p>4.3 Apply organisational standards and procedures for informing relevant personnel within organisation of potential risks.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- collect and report system performance information
- adjust and maintain flow system control mechanisms
- secure flow regulation devices
- use literacy skills in regard to verbal and written communication in the workplace
- use personal protective equipment

### **Required knowledge:**

- impact of the principles of hydraulics on the operation of flows
- system layout
- role of relevant utilities and service bodies
- risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site
- system flow control mechanisms
- relevant lock-out procedures for mechanical and electrical installations

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to operate basic flow control and regulating devices in irrigation systems including:

- identifying flow requirements
- preparing for and conducting flow monitoring
- identifying and reporting operational problems
- adjusting and regulating flows according to organisational requirements
- completing records and reports

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Equipment*** used includes:

- personal protective equipment
- electronic digital monitoring and metering systems
- basic hand and power tools
- valves, pumps and flow meters
- mechanical meters and flow devices
- hydrants
- recording systems
- communication equipment, including:
  - two-way radio
  - telephone

Processes to ensure flows are ***monitored, measured and recorded*** may require:

- fax
- lifting and winching equipment
- on- and off-road vehicles
- interaction and communication with other employees, other authorities and general public
- visual observation
- implementation of reporting procedures that may also include procedures for implementation of by-laws, organisational policies and statutory requirements

***Designated locations and systems*** may include:

- urban locations
- rural locations
- ground and surface water source systems
- wastewater collection and transfer systems
- trade waste systems

***Flow regulation*** may include operation of:

- valving systems, including:
  - sluice
  - blade
  - gate
  - non-return
  - pressure reducing
- supervisory control and data acquisition (SCADA) systems
- pumping systems, including:
  - centrifugal
  - Archimedes screw type
  - submersible
  - positive displacement
  - electronic and manual controlling systems
  - service reservoirs

***Legislative and organisational requirements*** may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

## **Unit Sector(s)**

Collection and distribution.

# NWP226B Prepare and restore work site

## Modification History

NWP226B Release 2: Layout adjusted. No changes to content.

NWP226B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to prepare work sites prior to work and restore them on completion of work. The ability to follow work instructions, use a range of equipment and tools to prepare a safe work site and subsequently to restore the site to the required condition is essential to satisfactory performance.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff performing a wide range of functions that support construction, maintenance and operations processes.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and prepare for work.</b>	<p>1.1 Determine <i>site preparation</i> requirements from specifications, instructions and pre-work inspections.</p> <p>1.2 Identify and report potential risks to public and environment.</p> <p>1.3 Perform a site check according to <i>legislative and organisational requirements</i> to identify risks and prevent damage to other utilities.</p> <p>1.4 Select and check work site <i>equipment, tools and materials</i> as appropriate to meet task and safety specifications.</p> <p>1.5 Select, fit and use personal protective equipment.</p>
<b>2 Prepare work site.</b>	<p>2.1 Position <i>safety equipment and materials</i> as required to prevent potential risks to public and environment.</p> <p>2.2 <i>Store and secure equipment</i> and materials as necessary.</p> <p>2.3 Use work site equipment, tools and materials according to regulatory and legislative requirements.</p> <p>2.4 Use manual or mechanical excavation equipment where required to achieve specifications.</p> <p>2.5 Provide appropriate drainage and diversion of site inflows from work site without <i>damage to environment</i>.</p>
<b>3 Restore work site.</b>	<p>3.1 Use equipment, tools and materials according to regulatory and legislative requirements.</p> <p>3.2 Backfill and compact excavations according to specifications.</p> <p>3.3 Remove excess soil, debris and unwanted materials from site.</p> <p>3.4 <i>Restore work site</i> to meet environmental and organisational requirements.</p>
<b>4 Review, record and report activities.</b>	<p>4.1 Check, maintain and store equipment, tools and materials according to manufacturer guidelines and organisational procedures.</p> <p>4.2 Maintain workplace records as required.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- set up a site
- excavate backfill

- compact and reinstate site
- prepare site for planting and plant vegetation
- interpret plans, instructions and standard operating procedures
- use tools and equipment
- identify and respond to operational problems
- use communication systems
- use safety equipment and personal protective equipment
- identify hazards
- give and receive instructions
- use literacy skills in regard to verbal and written communication in the workplace
- communicate with customers and other employees

**Required knowledge:**

- OHS procedures
- personal work site safety
- public and site safety
- risk factors and potential hazards of site preparation and restoration
- environmental aspects of site preparation and restoration
- trenching, shoring and excavation management
- excavation procedures and site restoration
- relevant utilities and service bodies
- communication systems
- landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on construction site or plant

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to prepare work sites prior to work and restore them on completion of work including:

- interpreting work requirements
- planning work site layout
- selecting appropriate work and safety equipment
- storing and securing materials and equipment safely
- clearing and preparing work site according to specifications
- restoring work site according to environmental and

## Context of and specific resources for assessment

organisational procedures

- cleaning, maintaining and storing equipment
- completing relevant workplace documentation

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

Questioning will be appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Site preparation*** may include:

- interpreting plans
- locating public utilities
- setting out site
- battering
- shoring
- scaffolding
- excavating
- directing traffic and the public

***Legislative and organisational requirements*** may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

***Equipment, tools and materials*** may include:

- hand and power tools
- lifting and winching equipment
- mechanical excavation equipment
- pneumatic and motorised equipment, including:
  - compressors
  - pneumatic spades and attachments
  - motorised cutting equipment
- revegetation and gardening supplies and plants
- communication equipment
- personal protective equipment
- positioning signs
- erecting barricades
- controlling access

***Safety equipment and materials*** may be used to ensure public and site safety when:

- stacking and securing pipes safely
- placing equipment in locked storage during absence from site

***Damage to environment*** is avoided or minimised by

- sediment control devices
- erosion prevention

using a range of techniques, including:

*Restore work site* using techniques, including:

- diversion and collection structures
- backfilling
- compacting
- planting or replanting vegetation
- reinstating site

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Common.

# NWP251B Construct open earthen channels or drains

## Modification History

NWP251B Release 2: Layout adjusted. No changes to content.

NWP251B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to plan and prepare for the construction of open channels or drains and to complete construction operations and subsequent site restoration according to legislative and organisational requirements.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff involved in the construction of earthen channels and drains for stormwater or irrigation systems or the remodelling or reconstruction of unserviceable systems.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and prepare for construction work.</b>	<p>1.1 Determine <i>work requirements</i> from design plans, specifications, instructions and work orders.</p> <p>1.2 Check site and identify <i>hazards</i> according to <i>legislative and organisational requirements</i>.</p> <p>1.3 Make appropriate <i>drainage and diversion arrangements</i> without damage to environment.</p> <p>1.4 Check <i>equipment</i> and open-cut excavation methods to ensure that safety requirements of task and site are met.</p> <p>1.5 <i>Prepare site</i> according to specifications and organisational requirements.</p>
<b>2 Construct channels or drains.</b>	<p>2.1 Construct earthen channels, drains and batters to planned width, depth and gradient.</p> <p>2.2 Compact soil, apply additives if necessary, and take earth samples to meet organisational requirements.</p> <p>2.3 Check construction works to ensure that specifications are met.</p>
<b>3 Restore work site and equipment.</b>	<p>3.1 Check, maintain and store equipment, tools and materials according to manufacturer guidelines and organisational procedures.</p> <p>3.2 Restore work site and add <i>environmental improvements or controls</i> to complete work according to plans and organisational requirements.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- identify and respond to operational problems
- produce reports and logs
- use safety and personal protective equipment
- use tools and machinery
- interpret plans, charts and instructions
- apply procedures and standards
- apply channel, drain and batter construction techniques
- identify soil types, mechanics and compaction rates
- select and operate appropriate compaction plant, such as tamping foot and smooth drum roller
- operate communication systems

- perform work-related calculations
- communicate with employees and customers
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- give and receive instructions

### Required knowledge:

- channel and drain system design basics
- channel and drain system layout
- environmental aspects of construction
- channel, drain and batter construction processes
- measures to reduce channel deterioration, infestation of weeds, pests and seepage
- relevant utilities and service providers
- safe use of lasers
- use of automatic levels
- basic levelling techniques
- profiles and boning rods
- survey principles
- soil types, mechanics and compaction rates
- capabilities of plant used for construction, including equipment operation, capacity and limitations
- communication systems
- work-related calculations
- hazardous materials handling
- landscape and ground structure of work area
- risk factors and potential hazards of construction processes
- effects of weather and conditions on construction site or plant
- control systems

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to construct open earthen channels and drains by:

- planning work and preparing work site according to given specifications and instructions
- cutting channels to specification
- compacting soil
- taking soil samples

- checking that work meets specifications
- cleaning and storing equipment
- restoring work site

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Work requirements*** may include:

- confirmation of site availability
- confirmation of statutory approvals, including:
  - vegetation clearing approval
  - riverine protection permits
  - use of borrow approvals
  - preparations for conditions included in statutory approvals for work
- site boundaries
- borrow and spoil areas
- boundary protection
- location, timing and type of work activity
- extent of the work
- access roads
- specifications for depth, width and gradient
- utility location
- safe work methods

***Hazards*** may include:

- damage to other utilities
- soil types and suitability to cut
- those associated with particular plant and equipment
- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material

***Legislative and organisational requirements*** may include:

- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

***Drainage and diversion arrangements*** may include:

- statutory approvals and conditions
- environmental

***Equipment*** may include:

- hand and power tools
- on- and off-road vehicles
- off-road plant
- lifting and winching equipment
- compressors

*Site preparation* may include:

*Environmental improvements or controls* may include:

- rotating lasers
- profiles
- automatic level
- pneumatic spaders and attachments
- motorised cutting equipment
- portable pumps
- communication equipment
- breathing apparatus
- gas detection equipment
- rescue equipment
- appropriate personal protective equipment
- installation of temporary erosion control structures
- cultural heritage monitors
- safety barricades
- removal of vegetation, debris, silt and soil
- revegetation processes
- drainage measures
- sedimentation control

Collection and distribution.

# NWP252B Construct and install irrigation delivery and stormwater drainage assets

## Modification History

NWP252B Release 2: Layout adjusted. No changes to content.

NWP252B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to construct irrigation delivery or stormwater drainage assets on site and to install both constructed assets and prefabricated components.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for field staff with specific responsibility for ensuring that the construction and installation of irrigation or stormwater drainage assets is completed in a safe and timely manner.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and prepare for work.</b>	<p>1.1 Determine <i>work requirements</i> from specifications and instructions.</p> <p>1.2 Select, fit and use personal protective equipment.</p> <p>1.3 Perform site check to identify hazards and prevent damage to other utilities according to <i>legislative and organisational requirements</i>.</p> <p>1.4 Provide appropriate drainage and diversion from work site without damage to environment.</p> <p>1.5 Check <i>equipment</i> and excavation methods to meet safety requirements of task and site.</p>
<b>2 Construct and install drains, channels, pipes and associated fittings.</b>	<p>2.1 Provide bedding and foundations according to <i>structure</i> type, location and specification.</p> <p>2.2 Select, lay and install join <i>pipes</i> and <i>fittings</i> according to manufacturer and organisational requirements.</p> <p>2.3 Select, place and join prefabricated components according to manufacturer and organisational requirements.</p> <p>2.4 Check installed pipes, fittings and prefabricated components to ensure that test specifications are met.</p> <p>2.5 Construct cast in situ components according to specifications and organisational requirements.</p>
<b>3 Finalise work.</b>	<p>3.1 Check constructions and installations to ensure that specifications are met.</p> <p>3.2 Check, maintain and store equipment, tools and materials according to manufacturer guidelines and organisational procedures.</p> <p>3.3 Backfill, compact and restore work site to meet environmental and organisational requirements.</p> <p>3.4 Maintain workplace records as required.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- identify and respond to operational problems

- produce reports and logs
- use safety and personal protective equipment
- use tools and machinery
- interpret plans, charts and instructions
- perform work-related calculations
- apply procedures and standards
- communicate with employees and customers
- work effectively as part of a team
- use communication equipment
- use literacy skills in regard to verbal and written communication in the workplace
- give and receive instructions

**Required knowledge:**

- system hydraulics basics
- system layout
- environmental aspects of construction
- construction processes
- relevant utilities and service providers
- communication systems
- hazardous materials handling
- landscape and ground structure of work area
- risk factors and potential hazards of construction processes
- equipment operation, capacity and limitations
- effects of weather and conditions on construction site or plant
- control systems
- pre-cast components
- pipes and fittings

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to construct and install irrigation delivery or stormwater drainage assets by:

- planning work and preparing work site according to given specifications and instructions
- constructing assets according to specifications
- installing assets according to specifications
- checking that work meets specifications

## Context of and specific resources for assessment

- cleaning and storing equipment
- restoring work site
- completing documentation

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Work requirements*** may include:

- extent and scope of work
- work site boundaries
- utilities location
- risk assessment and prevention measures
- signage
- traffic control

***Legislative and organisational requirements*** may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

***Equipment*** used may include:

- hand and power tools
- on- and off-road vehicles
- lifting and winching equipment
- mechanical excavation equipment
- compressors
- pneumatic spaders and attachments
- motorised cutting equipment
- chemical spraying apparatus
- small marine craft
- trenching systems
- portable pumps
- communication equipment
- breathing apparatus
- gas detection equipment
- rescue equipment
- appropriate personal protective equipment

***Structures*** may include:

- drop structures
- regulators
- erosion barriers
- head walls

- Pipes*** may include:
- concrete channels
  - vitrified clay
  - polyvinyl chloride (PVC)
  - polyethylene
  - reinforced concrete
- Fittings*** may include:
- jointing systems for pipe types and prefabricated sections, e.g. gibault and tension bands
  - tension bands
  - solvent cement joints
  - compression rings
  - bolted flanges
  - malleable jointing materials
  - electrofusion
  - butt welding

# NWP302A Install meters for non-potable, non-urban water supplies

## Modification History

NWP302A Release 2: Layout adjusted. No changes to content.

NWP302A Release 1: Primary release.

## Unit Descriptor

This unit covers the competency required to install water meters for non-potable water allocation in non-urban water systems.

## Application of the Unit

This unit of competency forms part of a skill set for meter installation and has application for the certification of water meter installers.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Confirm conditions of the site for meter installation.</b>	1.1 Identify the location of the site and establish <i>client information</i> .
	1.2 Identify access to the site and any <i>conditions of access</i> .
	1.3 Test the <i>conditions of the site</i> and analyse impact on installation assets.
	1.4 Complete an <i>environmental impact statement</i> for the site.
	1.5 Carry out a <i>job safety analysis</i> and identify hazards and control measures.
<b>2 Set out the site.</b>	2.1 Locate and install temporary benchmark.
	2.2 Store and secure material and equipment on site.
	2.3 Calculate and mark the site perimeters in relation to the flow of the channel.
	2.4 Ensure that excavations provide sufficient width for <i>movements of installation</i> .
<b>3 Install meter facilities.</b>	3.1 Install sumps and headwalls to ensure correct elevation, orientation and horizontal and vertical levels.
	3.2 Install pipes and meter pits to ensure the correct elevation, fall and orientation.
	3.3 Check pipe fittings and seals and eliminate flow disturbance.
	3.4 Install solar panels and display units according to manufacturers' requirements, check for operation and seal.
<b>4 Install meters.</b>	4.1 Install meters in meter pits according to manufacturers' requirements.
	4.2 Fit meters according to manufacturers' requirements.
	4.3 Align flanges, gaskets and internal pipe walls to eliminated flow disturbance and leaks.
	4.4 Locate and support meters to protect them from traffic and vibration.
<b>5 Restore site.</b>	5.1 Backfill upstream and downstream sumps with suitable material, moisture content and compaction to maximize compaction efficiency.
	5.2 Restore the site to closest to original site conditions.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### **Required skills:**

- meter installation construction project planning
- calculation of head, flow and measurements of pipes and pressure
- undertake locational assessment and risk analysis for meter installation
- sample and test soil for backfill and installation structures
- analyse the impact of water infiltration on the stability of structures
- measure the head of water to judge sufficiency for meter's accuracy
- check power supply and links
- position solar panels to maximise power collection
- undertake a job safety analysis and checking hazards and safety requirements
- store and safe use of equipment on site
- determine excavation requirements
- calculate sump and headwall elevation and orientation
- calculate pipe and meter pit elevation, fall and presentation.
- install transducers and cabling safely
- interpret manufacturers' requirements for fitting meters in meter pits
- use techniques to protect meters from disturbance
- assess the effectiveness of backfill
- undertake site restoration

### **Required knowledge:**

- the purpose and standards for non-urban water metering.
- community expectations for water measurement and use
- standards for the installation of non-urban meters in open and closed conduit systems
- the social, environmental, economic and political responsibilities of water authorities in relation to meter installation
- requirements for checking the pattern approval of meters
- requirements for compliance with meter installation standards
- meter manufacturers guidelines and installation manual for specific meters
- the organisation's policies and procedures for water meter installation
- conditions for meter location and suitable installation assets and meters for the conditions
- causes of flow disturbance
- potential environmental causes of meter failure
- the organisation's environmental impact guidelines
- maintenance requirements for meter facility within and open channel
- relevant safety requirements including confined space

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to install meters for non-potable, non-urban water supplies including:

- identifying and analysing client requirements, site conditions and their impact on the types of meter required, and the design of the installation
- identifying and analysing environmental conditions and limitations and the impact of work to be undertaken
- identifying and analysing safety risks and hazards and responding to remove risks and hazards
- preparing sites and equipment for installation
- installing meter facilities using site specific requirements
- installing meters according to client and manufacturers' requirements and conditions
- identifying faults, changes and failure indicators
- restoring sites to original conditions

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning or examination to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Client information*** will include:

- landowner details
- GPS coordinates
- identification of the supply channel
- running distance from validated point on the channel
- discharge point

***Conditions of access*** will include:

- suitability of existing access
- landowner conditions
- stock safety
- vehicle and driver safety

***Conditions of the site*** will include:

- soil sampling and testing
- water infiltration
- compaction of backfill
- suitability of source head for accuracy
- power supply
- communication links

***Environmental impact statement*** will include:

- water
- air
- soil
- vegetation
- fauna
- cultural and heritage

***Job safety analysis*** will include:

- personal protective equipment
- safe access
- confined space requirements
- safe use of machinery and equipment
- level of risk of hazards
- adjustments to control hazards

***Movements of installation*** will include:

- protect from collapse
- correct depth
- sufficient compaction

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Collection and distribution.

# **NWP304A Maintain meters for non-potable, non-urban water supplies**

## **Modification History**

NWP304A Release 2: Layout adjusted. No changes to content.

NWP304A Release 1: Primary release.

## **Unit Descriptor**

This unit describes the skills and knowledge required for the maintenance of water meters in open and closed conduit, for non-potable water allocation in non-urban water systems.

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

## **Application of the Unit**

This unit covers the maintenance of the operational integrity of already installed meters, metering systems and their components. This unit covers corrective, predictive and preventative maintenance.

This unit does not cover replacement of the meter itself, or other significant components such as pipes, sumps and emplacements; capital works/asset replacement or tasks that use skills required for complex installations.

## **Licensing/Regulatory Information**

Not applicable.

## **Pre-Requisites**

Not applicable.

## **Employability Skills Information**

This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the Performance criteria describe the required performance needed to

essential outcomes of a unit of competency. demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Confirm meter type and location within asset management system.</b>	<p>1.1 Obtain organisational maintenance plan and manufacturers guidelines, where available.</p> <p>1.2 Locate meter <b><i>emplacement</i></b> on a map or by GPS or according to organisational procedures.</p> <p>1.3 Confirm that <b><i>meter type</i></b> matches maintenance plan or manufacturer's guidelines.</p> <p>1.4 Confirm that meter number matches maintenance plan.</p>
<b>2 Check condition of meters and metering system.</b>	<p>2.1 Identify <b><i>faults</i></b> using an <b><i>asset condition checklist</i></b>.</p> <p>2.2 Establish maintenance requirements.</p> <p>2.3 Check for hydraulic disturbances.</p> <p>2.4 Check condition of battery and charging system.</p> <p>2.5 Perform in situ test of meter as applicable.</p>
<b>3 Maintain meter and meter facilities.</b>	<p>3.1 <b><i>Rectify</i></b> faults in <b><i>components</i></b>, according to organisational guidelines.</p> <p>3.2 Identify faults which need to be rectified by a third party, according to organisational guidelines.</p>
<b>4 Test and recommission.</b>	<p>4.1 Ensure meter complies with standards.</p> <p>4.2 Perform in situ re-test of meter as applicable.</p> <p>4.3 Replace seals and tags.</p> <p>4.4 <b><i>Record faults</i></b> and meter performance, maintenance and repairs according to <b><i>organisational procedures</i></b> and <b><i>statutory requirements</i></b>.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- reading and analysis of an electronic display
- input of data into electronic controller

- working with low voltage wiring
- reading manufacturer's instructions, plans, exploded drawings, parts catalogues
- reading verification marks
- appropriate use of tags and seals

### **Required knowledge:**

- organisational policies and procedures for water meter maintenance
- organisational rights and responsibilities
- manufacturers maintenance procedures for specific meter types
- knowledge of checking pattern approval requirements (NMI)
- standards for non-urban metering (ATS 4747)
- manufacturers maintenance guidelines
- GPS
- meter types and accuracy limits
- head
- water quality
- flow rates
- roles and responsibilities of maintenance personnel
- OHS guidelines
- environmental, cultural and heritage guidelines

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- confirms the site and the meter
- checks meter condition
- replaces components as required
- documents the maintenance

### **Context of and specific resources for assessment**

Assessment must ensure:

- access to a range of meters and installation sites
- access to organisational documentation
- observance of OHS guidelines

A range of assessment methods should be used to assess knowledge. The following examples are appropriate for this unit:

- written questions

- oral questions on the job during the maintenance process
- written reports including asset condition checklist, meter condition report
- third party reports from workplace supervisors

A range of assessment methods should be used to assess skills. The following examples are appropriate for this unit:

- demonstrations of meter maintenance in a workplace environment
- written Reports including asset condition checklist, meter condition report
- third party reports from workplace supervisors

Assessment should be based on evidence which has been gathered from a number of meter installations in a range of conditions which reflect a predictable variety of routine requirements and the range of variables, as well as which allow the potential for applying knowledge and skills in some conditions which require problem solving and contingency responses.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Emplacement*** may include:

- sumps, pipes, civil structures
- pits, concrete structures

***Meter type*** may include:

- electromagnetic
- ultrasonic (Doppler, transit time)
- mechanical meters (propeller actuated, turbine)
- systems of automated or manually operated weirs and gates with flow measurement capability
- open channel flumes and thin-plate weirs
- channel or stream gauging emplacements

***Faults*** may include:

- weeds and other obstructing materials
- dirty solar panels
- blockages and leakages of pipes and channels
- leaking/seeping channel banks
- animal infestations (wasp nests, ants and spider webs, bird nests, yabbies)
- electrical interference
- distortion of pipes
- flow disturbance factors

***Asset condition checklist*** may include:

- visual clues - leaks, breaks, seals, vandalism or tampering, wiring, tags and verification marks
- validated third-party reports
- display outputs - fault codes
- erratic or inconsistent data readings

**Rectify** may include:

- water quality, water flow (flow rate and full pipe)
- operating parameters of the emplacement & meter (eg full flowing or partially full; operating range with respect to flows)
- electrical interference
- check of security seals
- unblocking/ desilting
- ensuring flanges etc are tight
- replacing components according to organisational guidelines

**Components** may include:

- sensors
- chips
- cogs
- spindles
- transducers
- outputs
- probes
- connectors
- wiring
- seals & guides (doors & valves)
- actuation system
- chargers & batteries

**Record faults** may include:

- asset condition checklist
- meter condition report

**Organisational procedures and statutory requirements** may include:

- maintenance plan
- manufacturers guidelines
- Australian Technical Standards

## **Unit Sector(s)**

Not applicable.

# **NWP305B Monitor and conduct minor maintenance on complex flow control and metering devices**

## **Modification History**

NWP305B Release 2: Layout adjusted. No changes to content.

NWP305B Release 1: Primary release.

## **Unit Descriptor**

This unit of competency describes the outcomes required to monitor the operation of complex flow control, measuring and regulating devices controlling water supply in ground and/or surface water source systems, or water supply and/or distribution systems, wastewater collection and transfer systems. This competency also covers minor maintenance responsibilities.

## **Application of the Unit**

This unit supports the attainment of skills and knowledge required for field staff with a specific responsibility for monitoring the operation of complex flow control, measuring and regulating devices, conducting minor maintenance and ensuring that problems and anomalies are rectified by specialist technicians in a timely manner.

## **Licensing/Regulatory Information**

Not applicable.

## **Pre-Requisites**

Not applicable.

## **Employability Skills Information**

This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and prepare for work.</b>	<p>1.1 Interpret work requirements for <i>monitoring complex flow control and metering devices</i> from plans, drawing specifications and instructions.</p> <p>1.2 Select and check <i>equipment and tools</i> to meet the safety requirements of the task and site.</p> <p>1.3 Correctly select, fit and use required safety equipment, including personal protective equipment.</p>
<b>2 Monitor device and equipment performance.</b>	<p>2.1 Identify devices and equipment and interpret specifications for operation.</p> <p>2.2 Check information on devices and equipment performance and report according to <i>organisational and statutory requirements</i>.</p>
<b>3 Conduct minor maintenance on devices and equipment.</b>	<p>3.1 Undertake routine maintenance tasks for complex devices according to manufacturer's specifications and organisational requirements.</p> <p>3.2 Secure devices and equipment according to organisational requirements.</p> <p>3.3 Identify and report <i>problems and anomalies</i> immediately to appropriate personnel for correction.</p>
<b>4 Monitor system performance.</b>	<p>4.1 Schedule and monitor <i>routine inspections</i> of system and networks according to organisational procedures.</p> <p>4.2 Collect, analyse and report data on system performance and usage according to organisational requirements.</p> <p>4.3 Take samples according to organisational requirements.</p>
<b>5 Compile process records and reports.</b>	<p>5.1 Report information relating to system demand adjustment requirements according to organisational requirements.</p> <p>5.2 Identify process faults and the operational condition of the system and network and report according to organisational requirements.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- identify and report operational problems
- collect and report system performance information

- inspect flow regulation, measuring and regulating devices
- produce reports and logs
- use communication systems
- give and receive instructions
- interpret plans, charts and instructions
- interpret policies, procedures and standards
- communicate with customers and other employees
- use personal protective equipment

### **Required knowledge:**

- monitoring flow control, measuring and regulating devices' performance
- system hydraulics
- system layout
- relevant utilities and service bodies
- communication systems
- materials handling
- environmental, landscape and ground structure of water distribution and/or wastewater collection systems
- system and network risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site
- flow measurement procedures
- data collection and recording
- system flow control mechanisms and control systems
- where relevant, lock out procedures for mechanical and electrical installations

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to monitor the operation of complex flow control, measuring and regulating devices including:

- interpreting work requirements and selecting appropriate equipment and tools, including personal protective equipment
- identifying devices and equipment to be monitored and relevant operational specifications
- collecting and recording information on device performance

- conducting minor routine maintenance tasks and secure devices
- identifying and reporting problems and anomalies
- inspecting system and networks
- collecting and recording data on system performance
- taking samples
- reporting monitoring and inspecting findings
- identifying and reporting on system performance

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a

manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Monitoring complex flow control and metering devices*** may include:

- SCADA
- checking pressures at PSVs
- checking the status of valves and sensors

***Equipment and tools*** may include:

- electronic digital monitoring and metering systems (telemetry) and system adjustments
- basic hand and power tools
- manual chart recording systems
- communication equipment
- lifting and winching equipment
- on- and off-road vehicles
- atmosphere monitor
- safety and rescue equipment

***Organisational and statutory requirements*** may include:

- by-laws and organisational policies
- standard operating procedures
- environment protection
- occupational health and safety
- marine
- Water Acts
- flood operation procedures
- emergency and incident management plans
- World Health Organisation standards
- Australian Drinking Water Guidelines
- Mines Act

***Routine inspections*** may include:

- interaction and communication with other employees, other authorities and the general public
- visual observation
- implementation of reporting procedures that may also include procedures for the implementation of by-laws, organisational policies, standard operating procedures and

- Reporting of *problems and anomalies* may include:
- statutory requirements
  - location of faults, such as:
    - sensor
    - signal
    - power supply
    - actuator
    - valve
  - contacting designated specialist

# NWP316B Monitor and schedule water deliveries

## Modification History

NWP316B Release 2: Layout adjusted. No changes to content.

NWP316B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to schedule water deliveries for irrigation and/or domestic and stock supply systems, including monitoring flows, analysing data, coordinating hydraulic processes and compiling operational reports.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for field staff and operators with a specific responsibility for ensuring that water deliveries meet varying customer requirements.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Schedule water deliveries.</b>	1.1 Identify and record customer water orders. 1.2 Analyse water orders to determine water delivery and flow rate requirements. 1.3 <i>Schedule water deliveries</i> to meet flow rate requirements and organisational standards for channel balance and capacity restraints.
<b>2 Monitor water delivery.</b>	2.1 Monitor channel flow rate, regulation and delivery according to customer requirements. 2.2 Maintain delivery performance records according to organisational requirements. 2.3 Analyse system performance using system data and records to determine actual and planned performance.
<b>3 Coordinate and control water delivery.</b>	3.1 Calculate system adjustments according to demand and organisational requirements. 3.2 Coordinate flow regulation, channel levels, security of flow devices and settings according to demand and organisational requirements.
<b>4 Compile reports and records of water delivery.</b>	4.1 Compile reports from system performance data according to organisational requirements. 4.2 Maintain appropriate measurements and delivery records according to organisational requirements.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- identifies and responds to operational problems
- produces basic reports and logs
- operates communications equipment
- gives and receives instructions
- follows plans, charts and instructions
- uses safety equipment and personal protective equipment
- communicates with customers and other employees
- works effectively as part of a team
- performs work related calculations
- operates irrigation and/or domestic stock supply system
- checks channel flow

- identifies control system faults

### **Required knowledge:**

- system hydraulics
- impact of the principles of hydraulics on the operation of flows
- coordination processes
- principles of scheduling
- system layout
- system operations
- policies and standard operating procedures
- communication systems
- lock out procedures for mechanical and electrical installations
- environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
- safety procedures
- environment, landscape and ground structure of work area
- risk factors and potential hazards of irrigation and/or domestic and stock supply systems
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site plant
- water flow calculations
- flow measurement procedures
- gravity systems
- control systems

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to schedule water deliveries for irrigation and/or domestic and stock supply systems including:

- analysing volumes and flow rates required for water deliveries
- preparing schedules for water deliveries from customer orders
- monitoring and regulating system performance
- adjusting system according to demand
- coordinating flow regulating devices
- completing relevant documentation

## **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

# NWP362B Monitor, operate and control reclaimed water irrigation

## Modification History

NWP362B Release 2: Layout adjusted. No changes to content.

NWP362B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to monitor, operate and control reclaimed water irrigation and the use of reclaimed water for irrigation practices.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for staff with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation in compliance with organisational, environmental and legislative requirements.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Assess sites for reclaimed water irrigation.</b>	1.1 Identify soil/water interactions and <i>soil properties</i> important for plant growth. 1.2 Identify soil <i>sampling</i> sites, collect samples and conduct <i>soil testing</i> . 1.3 Classify soils using field texture, pH and structure analysis. 1.4 Monitor and determine the <i>water holding capacity</i> of the soil.
<b>2 Assess quality of reclaimed water for irrigation.</b>	2.1 Sample and test reclaimed water and interpret <i>quality parameters</i> . 2.2 Determine crops suitable for the quality of reclaimed water and site conditions.
<b>3 Implement reclaimed water irrigation.</b>	3.1 Identify basic features of <i>irrigation systems</i> . 3.2 Operate and maintain irrigation <i>equipment</i> according to organisational requirements. 3.3 Identify and apply irrigation <i>scheduling options</i> for reclaimed water. 3.4 Use crop factors and climate data to produce <i>water budgets</i> . 3.5 Apply irrigation water and collect and monitor tail water or runoff according to <i>organisational and statutory requirements</i> .
<b>4 Respond to water or soil quality issues.</b>	4.1 Develop <i>irrigation management options</i> to respond to water quality issues. 4.2 Identify and apply requirements and options for <i>soil ameliorants</i> . 4.3 Monitor infiltration and drainage according to organisational requirements.
<b>5 Compile reclaimed water irrigation records.</b>	5.1 Compile <i>reports</i> to meet organisational procedures and statutory requirements. 5.2 Report observations outside defined parameters for further action.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- implement best practice irrigation procedures
- monitor and manage soil

- solve operational problems
- access, interpret and apply relevant legislation
- apply environmental policies, plans and procedures
- apply control procedures to environmental risks and incidents
- assess environmental risks at the work site
- report and record environmental procedures
- access, interpret and apply standard operating procedures
- communicate effectively with customers
- complete basic workplace records and/or reports
- identify soil groups
- use safety and personal protective equipment
- perform work-related calculations
- work effectively as part of a team
- use communication equipment
- give and receive instructions
- sample and test soil and water

**Required knowledge:**

- key principles of irrigation practices, including irrigation scheduling
- key characteristics of reclaimed water
- relevant legislative requirements
- standard operating procedures
- environmental management procedures
- control procedures for environmental risks and incidents
- risk assessment procedures
- environmental impact assessment
- recording procedures
- reporting procedures
- established environmental management procedures
- risk assessment procedures
- primary agencies involved in drinking water quality management
- water quality performance indicators
- an overview of the water supply system
- water hazardous agents and preventative strategies
- community and agency roles and responsibilities in monitoring water quality
- best management practices for the use of reclaimed water for irrigation purposes
- reclaimed water usage licensing procedures and requirements
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site or plant
- interpretation and use of material safety data sheets

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to monitor, operate and control reclaimed water irrigation, including:

- analysis of the critical aspects of reclaimed water reuse management relating to the project or site
- implementing reclaimed water reuse irrigation
- identifying environment, health and safety risks and impact on soil, stock and operators
- applying environmental procedures
- participating in and contributing to reviews of reclaimed water reuse procedures

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- collecting and noting circumstances and observations relating to a specific breaches of legislation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

*Soil properties* may include:

- surface soil
- subsoil
- soil profiles
- a, b & c horizons
- texture:
  - rock/gravel
  - sand
  - silt
  - clay
- soil structure
- aggregates
- minerals
- pores
- soil colour

*Soil sampling* may include:

- selection of sample site/s using methods such as:
  - grid
  - random
  - zigzag
  - transect

- collection of samples from:
    - field pits
    - auger holes
  - consistent application of sampling procedures as identified by the Department of Agriculture
  - maintenance of the integrity of the sample according to applicable statutory guidelines (Department of Agriculture, EPA)
- Soil testing*** may include:
- soil pH
  - soil texture assessment
  - mottle colour
  - soil nutrients
  - nitrogen
  - phosphorus (Olsen P or Colwell P)
  - potassium
  - fertiliser requirements
  - cation exchange capacity (CEC)
  - exchangeable sodium percentage (ESP)
  - calcium/magnesium ratio
  - organic matter
  - hydraulic conductivity
  - consistence (dry only)
  - strength
  - stickiness
  - plasticity
  - Emerson dispersion grade
- Water holding capacity*** may include:
- hydraulic conductivity
  - soil water potential
  - infiltration/leaching rates
  - field capacity determination
- Reclaimed water ***quality parameters*** may include:
- pH
  - BOD/COD
  - total salt concentration
  - total Dissolved Solids (TDS)
  - soluble salts by electrical conductivity (EC)
  - nutrients - N, P, K
  - anions and cations
  - sodium adsorption ratio (SAR)
  - adjusted SAR
- Irrigation systems*** may include:
- border check flood irrigation
  - graded or contour furrows
  - sub-surface irrigation

- sprinklers
  - localised systems, such as:
    - drip
    - micro spray
    - trickle
- Equipment** may include:
- electronic monitoring and metering systems
  - reclaimed water flow distribution systems, including:
    - pipes
    - valves
    - pumps
    - channels
    - checks
    - drains
    - collection dams
    - flow control gates
  - pressured distribution equipment, such as:
    - sprinklers
    - travelling irrigators
  - sampling and testing equipment
  - infiltration testing equipment
  - manual chart recording systems
  - on- and off-road vehicles
  - communication equipment
  - atmosphere monitoring equipment
  - personal protective equipment
  - communication equipment
  - computerised equipment
- Irrigation *scheduling options* may include:
- measurement of soil moisture content
  - on-site, physical soil moisture investigations
  - evaporation minus rainfall calculations
  - tensiometers
  - gypsum blocks
  - neutron probes
  - capacitance probes
- Water budgets** may include:
- weather details
  - rainfall
  - evaporation
  - crop factors and predicted plant water requirement
  - leaching requirements
  - soil types and characteristics
  - monthly/yearly calculation of reclaimed water required

**Organisational**

*requirements* may include:

- calculation of suitable land areas for use
- organisational policies and procedures
- occupational health and safety
- electrical and mechanical procedures

**Statutory requirements** may include:

- environmental legislation, including relevant:
  - Federal legislation
  - State/Territory legislations
  - local government by-laws
  - government or quasi-government policies and regulations
  - community planning and development agreements, such as land care agreements
- Water Acts
- licensing and/or drainage agreements
- plumbing and drainage standards
- hazardous substances
- World Health Organisation standards
- NHMRC guidelines

**Irrigation management options** may include:

- shandyng to reduce salt or nutrient loads
- managing algal outbreaks
- identification and reduction of odours from irrigation
- restricting livestock or public access due to water quality issues
- suspension of irrigation

**Soil ameliorants** may include:

- gypsum (calcium sulphate)
- hydrated lime (liml)
- agricultural lime (calcium carbonate)
- biosolids

**Reports** may include:

- reclaimed water irrigation data including:
  - applications dates and volumes applied
  - volumes of run-off
  - water quality
- rainfall, evaporation and/or other meteorological data
- water budgets
- salt budgets
- plant performance data

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Collection and distribution.

## **NWP401B Coordinate and monitor the application of environmental plans and procedures**

### **Modification History**

NWP401B Release 2: Layout adjusted. No changes to content.

NWP401B Release 1: Primary release.

### **Unit Descriptor**

This unit of competency describes the outcomes required to monitor and coordinate the application of environmental plans and procedures to specific projects and to develop environmental procedures for the local work area.

### **Application of the Unit**

This unit supports the attainment of skills and knowledge required for staff with a specific responsibility for ensuring that all relevant environmental plans and policies are applied to each project and work site within the scope of their job role; and for ensuring that environmental plans and policies are implemented, monitored, reviewed and reported according to organisational and statutory requirements.

### **Licensing/Regulatory Information**

Not applicable.

### **Pre-Requisites**

Not applicable.

### **Employability Skills Information**

This unit contains employability skills.

### **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Determine relevant environmental plans and procedures.</b>	<p>1.1 Identify <i>environmental plans and procedures</i> and determine relevance to <i>specific projects or work sites</i>.</p> <p>1.2 Interpret relevant environmental plans and procedures in relation to specific project or site activities.</p>
<b>2 Implement environmental plans and procedures.</b>	<p>2.1 Identify <i>environmental risks and impacts</i>.</p> <p>2.2 Manage and minimise environmental risks.</p> <p>2.3 Apply emergency procedures.</p> <p>2.4 Carry out activities according to environmental plans and procedures.</p> <p>2.5 Maintain effective participation and contribution.</p>
<b>3 Develop project or site specific environmental procedures.</b>	<p>3.1 Assess the need for project or site specific environmental procedures.</p> <p>3.2 Consult <i>stakeholders</i> and address issues and concerns.</p> <p>3.3 Develop specific project or site environmental procedures.</p> <p>3.4 Review and report specific project or site environmental procedures according to <i>organisational procedures and statutory requirements</i>.</p>
<b>4 Control environmental incidents.</b>	<p>4.1 Identify environmental incidents and apply appropriate control measures.</p> <p>4.2 Analyse environmental incidents to prevent recurrence.</p> <p>4.3 Record and report environmental incidents and complete <i>environmental management documentation</i> according to organisational requirements.</p>
<b>5 Monitor and report on environmental plans and procedures.</b>	<p>5.1 Monitor and report the implementation of environmental plans and procedures according to organisational requirements.</p> <p>5.2 Report environmental risks according to organisational procedures.</p> <p>5.3 Ensure participation by the relevant work force in reviews of environmental procedures and report according to organisational requirements.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### **Required skills:**

- apply control procedures at environmental risks and incidents
- access, interpret and apply relevant legislation and standard operating procedures
- assess environmental risks at the specific project or site
- apply environmental plans and procedures
- report and record environmental procedures
- develop local workplace environmental procedures
- identify risks and impacts
- apply consultation processes
- manage environmental incidents
- conduct environmental audits
- apply due diligence
- monitor a specific project or site
- identify possible cultural or heritage sites
- identify potential pollutants
- analyse personal and team performance against work objectives
- solve operational problems

### **Required knowledge:**

- relevant legislative requirements
- standard operating procedures
- environmental plans and procedures
- sedimentation and erosion control
- risk assessment procedures
- rare and endangered plants
- recording procedures
- reporting procedures
- monitoring procedures
- identification of risks and impacts
- consultation procedures
- incident management procedures
- potential environmental risks and incidents
- disposal of dangerous and contaminated soils
- environmental auditing
- concepts of due diligence
- principles of environmental protection
- endangered species and habitat protection
- environmental impact assessment
- control procedures for environmental risks and incidents
- waste management

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to coordinate and monitor the application of environmental plans and procedures including:

- identifying and analysing environmental plans and procedures relevant to a representative variety of projects and work sites
- interpreting and implementing relevant environmental plans and procedures for a typical project or work site
- developing site- or project-specific environmental plans and procedures for an atypical project or work site, including consultation with stakeholders
- managing environmental incidents
- monitoring, reporting and reviewing the implementation of environmental plans and procedures
- coordinating participation by relevant sectors of the workforce

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's

- competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
  - where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
  - assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

- Environmental plans and procedures*** may include:
- national, state or local government policies or local government or regional development plans concerning:
    - water resources
    - industry and cross industry issues
    - business, corporate or enterprise issues
    - cultural and heritage issues
    - conservation
    - flora and fauna
    - waste disposal
    - coastal protection
    - groundwater protection
    - irrigation
    - salination control
    - pollution and litter control
    - river and surface water systems

- chemical management
- biological control
- organisational procedures, including:
  - minimisation of waste materials
  - proper disposal of waste materials
  - restriction of burning off
  - correct handling of toxic substances
  - containment of chemicals such as chlorofluorocarbons
  - minimisation of factors that contribute, directly or indirectly, to the production of greenhouse gases
  - correct use of enterprise vehicles and machinery
  - reuse or recycling of trade materials where possible
  - overall reduction of energy usage through general awareness and the use of appropriate technologies

***Specific projects or work sites*** may include:

- buildings
- plants
- construction and maintenance sites
- workshops
- laboratories
- bulkwater storage sites
- surface or groundwater sites
- catchments
- flood plains irrigation sites
- wetlands
- drainage sites
- waste disposal sites

***Environmental risks and impacts*** may include:

- risks, including:
  - impact of mismanagement of chemicals
  - impact of mismanagement of biological agents
  - detrimental impact on limited water resources
  - spillage
  - waste disposal
  - detrimental impact on water catchment areas (urban and non-urban)
  - detrimental impact on rivers, waterways and channels
  - unsatisfactory water and wastewater treatment processes
  - unsatisfactory trade waste treatment and disposal processes
  - poor construction processes
  - planning deficiencies

- incidents of environmental impact, including:
  - emissions to air
  - releases to/of water
  - releases to land
  - vibration and noise
  - disposal of waste
  - contamination of land
  - impact on communities
  - destruction of habitat
  - use of energy sources
  - waste generation processes and technologies
  - impact on culturally significant sites
- incidents may involve the implementation of emergency responses

**Stakeholders** may include:

- the enterprise
- all levels of government
- industry (e.g. extractive, other utilities, manufacturing)
- community action groups
- environmental conservation groups
- land care groups
- primary producers
- the general community and individuals
- Indigenous and Torres Strait Islander groups

**Organisational and procedures and statutory requirements** may include:

- environmental legislation, including:
  - relevant federal legislation
  - relevant state or territory legislation
  - relevant local government by-laws
  - relevant government and quasi government policies and regulations

**Environmental management documentation** may include:

- information on applicable environmental laws or other requirements
- complaint records
- training records
- process information
- process operational logbooks
- inspection, maintenance and calibration records
- relevant contractor and supplier information
- incident reports
- information on emergency preparedness and response
- records of significant environmental impacts
- chain of custody and compliance records

- audit results
- management reviews

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Common.

# NWP410C Coordinate and monitor asset construction and maintenance

## Modification History

NWP410C Release 2: Layout adjusted. No changes to content.

NWP410C Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to coordinate and monitor asset construction and maintenance, including site management and associated commissioning and post-commissioning activities.

## Application of the Unit

This unit is required by operators with responsibility for ensuring that asset construction and maintenance activities are performed and completed in compliance with all relevant organisational and statutory requirements. The level of responsibility may vary according to the size, scope, location, and technical complexity of individual projects.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and prepare for asset construction and maintenance.</b>	1.1 Determine <i>work requirements</i> according to asset purpose, maintenance history, components, maintenance schedules and known logistics. 1.2 Confirm maintenance plan and prioritise and schedule work. 1.3 Confirm <i>authorisations</i> and communication with stakeholders. 1.4 Identify and address <i>stakeholders</i> issues that impact on construction or maintenance. 1.5 Conduct <i>site inspections</i> according to organisational procedures and risk management guidelines.
<b>2 Undertake work site maintenance.</b>	2.1 Monitor material handling procedures according to organisational requirements. 2.2 Monitor construction activities to ensure compliance with <i>occupational health and safety and environmental regulations</i> . 2.3 Confirm maintenance requirements by detailed diagnosis of problems and conditions at the site. 2.4 Carry out <i>maintenance tasks</i> according to the condition of the equipment and organisational requirements. 2.5 Use equipment, tools and technology safely, effectively and productively.
<b>3 Test and commission work.</b>	3.1 Conduct tests and apply defined commissioning programs according to <i>organisational and manufacturers' requirements</i> . 3.2 Monitor test results to ensure that the assets function within agreed specifications. 3.3 Conduct and record inspections according to commissioning and stakeholders requirements.
<b>4 Conduct post-maintenance activities.</b>	4.1 Coordinate and monitor work site inspections and rehabilitation. 4.2 Undertake a review of the construction or installation and monitor asset performance. 4.3 Identify defects and make arrangements to rectify them. 4.4 Complete reports and documentation required by the organisation. 4.5 Store and secure reports according to information and data management system.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills:

- interpret and make adjustments to asset maintenance plan
- monitor work progress against a plan
- apply relevant organisational procedures based on legislation, risk management, manufacturers guidelines, site conditions and quality standards
- conduct site inspections and investigations
- communicate with supervisors, team members, contractors and the public using clear and direct communication
- prepare reports for management on asset monitoring and maintenance in organisation proformas
- interpret and apply a range of organisation documents
- liaise and negotiate with local and internal stakeholders
- detect and solve operational problems within area of authority and delegation
- work within safety requirements, identify hazards and use equipment and processes safely
- use safety and personal protective equipment
- interpret policies, standard operating procedures and standards related to monitoring and maintenance of water services assets
- control system operations, processes, failure and rectification
- use required forms of transport including marine craft, 4 wheel drive vehicles, aircraft, snow mobiles based on site location and conditions and safety and equipment management procedures
- use organisation equipment, tools and technology

### Required knowledge:

- enterprise contract conditions and compliance
- site inspection and investigation procedures
- organisational policies, procedures, guidelines and requirements for asset monitoring and maintenance
- system layout, integrity, design and performance
- evaluation and investigation requirements
- enterprise auditing and recording procedures and reporting requirements
- characteristics, technical capabilities and limitations of materials and equipment according to manufacturers' specifications
- occupational health and safety policies and procedures including material handling procedures, use of protective equipment, safe driving in hazardous conditions, bush and water survival, working in the location of power supplies, working in confined spaces
- relevant environmental and natural resource management legislation
- risk factors and potential hazards involved with water pressures and flows

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to plan, coordinate and monitor the construction or maintenance of water industry assets, including:

- analysing work requirements
- prioritising and scheduling work
- liaising and negotiating with all relevant stakeholders and work teams
- planning construction or maintenance activities
- monitoring work performance for compliance with OHS and other organisational and statutory requirements
- providing technical advice on maintenance methods
- conducting risk and hazard assessments
- reporting recommendations for risk and hazard prevention
- conducting or supervising asset tests
- implementing commissioning programs and post commissioning inspections
- coordinating and monitoring the rehabilitation of the worksite
- reviewing the construction or installation and monitoring performance
- identifying and reporting defects

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical

requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Work requirements*** will include the organisation and site specific requirements including:

- purpose and history of site and its assets
- maintenance plans and specifications
- site location and conditions
- risk and hazard management procedures
- communication methods and equipment
- authorisations, permits and restrictions
- environmental and heritage conditions
- recording and reporting asset condition and maintenance
- preparing and coordinating the availability and transporting

of:

- maintenance and construction support
- equipment and tools
- replacement assets
- safety and protective equipment
- communication equipment
- technical expertise
- surveying equipment
- camping and survival resources
- rescue and retrieval resources
- federal, state and local government
- quarantine controls
- legal access
- traffic management
- Blue Card

*Authorisations* may include:

*Stakeholders* may include:

- contractors
- government and regulatory authorities
- property owners
- utility organisations
- specialised work teams
- general public
- asset users

*Site inspections* may include:

- confirmation of:
  - plans
  - contracts
  - purpose
  - asset history
  - fault reports
  - components
  - risk factors
- inspection of preparation work
- assessment of compliance with specifications and manufacturers' guidelines
- assessment of compliance with procedures and legislation including:
  - occupational health and safety requirements
  - environmental
  - natural resource management
  - water quality

*Occupational health and safety and environmental*

*requirements* will include:

- confined spaces
- heights
- water
- forests
- equipment operation
- plant operation
- contamination issues
- weather exposure
- herbicides
- pesticides
- solvents
- fuels
- PPE requirements
- onsite communication and procedures for working remotely.
- equipment:
  - ladders
  - harness
  - trailer
- personnel safety:
  - medical constraints and conditions
  - CPR
  - First Aid
  - water survival
  - bush survival
  - self rescue
  - traffic management authority

*Maintenance tasks* will be influenced by consideration of:

- performance benchmarks
- reference marks
- CTF
- relevant section:
  - control
  - approach
  - inlet
  - tailwater
  - DM
- long survey
- staff gauges
- peak level indicators
- power supplies
- instrument circuits

***Organisational and manufacturers' requirements***

may include:

- lightning protection
- banks
- site access
- transducer exposure
- general and special conditions of contract and site specifications
- plans, maps and drawings
- authorisations and permits
- operational manuals
- manufacturers' manuals and specifications
- maintenance manuals
- plans of other authorities, services and utilities
- hazard and response reports
- project plans
- maintenance checklists

**Unit Sector(s)**

Not applicable.

**Competency field**

Asset management.

# NWP425B Coordinate and monitor the operation of irrigation delivery systems

## Modification History

NWP425B Release 2: Layout adjusted. No changes to content.

NWP425B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to coordinate and monitor irrigation delivery systems to ensure system maintenance and performance standards and customer liaison.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for staff with a specific responsibility for ensuring that the operation of irrigation systems complies with organisational and statutory requirements. The level of responsibility will vary according to the size and complexity of the irrigation system.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 <b>Confirm performance measures in irrigation system's management plan.</b>	1.1 Identify customer requirements for irrigated culture. 1.2 Identify <i>environmental factors</i> that impact on the irrigation system. 1.3 Consult <i>historic system information</i> and <i>stakeholders</i> as appropriate 1.4 Confirm performance requirements for an <i>irrigation system management plan</i> .
2 <b>Monitor and coordinate processes and resource targets.</b>	2.1 Correctly select, fit and use <i>equipment</i> , including personal protective equipment. 2.2 Apply <i>monitoring and testing programs</i> and identify, investigate and report any deviations from water quantity, quality, release or flow. 2.3 Evaluate the timeliness, volume and flow rates of water deliveries and identify, investigate and report deviations from agreed service levels. 2.4 Evaluate maintenance budgets, activity programs and output target measures and identify, investigate and report deviations from targets. 2.5 Identify and record links between operational problems and maintenance activities.
3 <b>Report outcomes of coordination and monitoring.</b>	3.1 Analyse, record and report coordination and monitoring data according to <i>organisational procedures and statutory requirements</i> . 3.2 Identify and report current and potential problems according to organisational procedures. 3.3 Make recommendations for improvements in system performance and/or customer service.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- interpret and apply legislation and policies
- coordinate measuring and testing activities
- conduct investigations

- assess environmental impact
- uses safety equipment and personal protective equipment
- communicate with customers and other employees
- operate irrigation and/or domestic stock supply system
- check channel flow
- identify control system faults

**Required knowledge:**

- relevant legislation
- relevant enterprise policies
- range of appropriate measuring and testing procedures
- investigation procedures
- customer expectations and requirements
- operations and maintenance policies and procedures
- occupational health and safety and environmental legislation, Acts and procedures
- impact of the principles of hydraulics on the operation of flows
- coordination processes
- principles of scheduling
- system layout
- system operations
- policies and standard operating procedures
- communication systems
- lock out procedures for mechanical and electrical installations
- environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
- safety procedures
- environment, landscape and ground structure of work area
- risk factors and potential hazards of irrigation and/or domestic and stock supply systems
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site plant
- water flow calculations
- flow measurement procedures
- gravity systems
- control systems

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Critical aspects for**                      The candidate should demonstrate the ability to coordinate

**assessment and evidence required to demonstrate competency in this unit**

and monitor the operation of irrigation systems including:

- identifying customer requirements for irrigated culture and environmental factors that impact on the irrigation system
- consulting historic system information and stakeholders as appropriate
- confirming performance requirements for an irrigation system management plan
- implementing monitoring and testing programs and investigating and reporting deviations from planned parameters
- evaluating performance of water deliveries and investigating and reporting deviations from agreed service levels
- evaluating performance targets such as maintenance budgets, activity programs and output target and investigating and reporting deviations
- analysing and reporting data
- identifying and reporting problems
- making recommendations for system performance or customer service improvements

**Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.

***Environmental factors*** may include:

- environmental flows
- chemicals
- nutrients
- salinity
- downstream requirements

***Historic system information*** may include:

- previous studies
- impact of weather
- relevant hydrometric information
- previous system deliveries
- previous flow rates
- operational procedures

***Stakeholders*** may include:

- customers
- government
- farmer and grower associations
- downstream land holders
- other water authorities

***Irrigation system management plan*** may include:

- employees
- customer representative committees
- land care or similar active groups
- local communities
- service levels
- capital investment
- maintenance levels

***Equipment*** may include:

- electronic monitoring and metering systems
- manual chart recording systems
- on- and off-road vehicles
- communication equipment
- personal protective equipment

***Monitoring and testing programs*** may include:

- timeliness of deliveries
- flow
- input and output quality
- testing procedures
- frequency
- sampling locations
- budgets
- physical achievement targets
- operational procedures
- number of complaints

***Organisational and statutory requirements*** may include:

- relevant federal legislation
- relevant state or territory legislation
- relevant local government by-laws or planning instruments
- board or authority by-laws

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Collection and distribution.

# NWP512B Implement and manage catchment management plan

## Modification History

NWP512B Release 2: Layout adjusted. No changes to content.

NWP512B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to implement and manage activities in water catchments that impact on water yield and/or quality to ensure performance measures for the catchment management plan are met.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for managers in water organisations with responsibility for the management of water catchments.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <b><i>bold italicised</i></b> text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
---	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Prepare for catchment management.</b>	<p>1.1 Confirm performance measures for the catchment management plan.</p> <p>1.2 Identify and interpret <i>catchment management requirements</i>.</p> <p>1.3 Identify <i>user and customer</i> requirements that impact on the catchment area.</p> <p>1.4 Gather <i>historical catchment information</i> and evaluate as input to the management process.</p> <p>1.5 Identify, interpret and assess water quality and quantity requirements.</p> <p>1.6 Identify and interpret <i>environmental factors</i> and other relevant <i>issues</i> that impact on the catchment area.</p>
<b>2 Implement the catchment management plan.</b>	<p>2.1 Inform and educate stakeholders about catchment activity regulations.</p> <p>2.2 Develop management plan activities.</p> <p>2.3 Develop the implementation plan.</p> <p>2.4 Coordinate management plan activities.</p>
<b>3 Monitor the catchment management plan.</b>	<p>3.1 <i>Design</i> and implement <i>monitoring and testing programs</i>.</p> <p>3.2 Analyse, interpret and record testing results.</p> <p>3.3 Coordinate and manage the identification and investigation of current and/or potential problems.</p> <p>3.4 Report the results of the investigation of problems and make recommendations.</p> <p>3.5 Monitor the catchment area usage according to the plan.</p> <p>3.6 Coordinate and manage the identification, investigation and reporting of breaches of usage provisions.</p>
<b>4 Monitor and evaluate the catchment management plan.</b>	<p>4.1 Review objectives of the management and implementation plans.</p> <p>4.2 Make recommendations for changes to objectives and implementation procedures.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- communicate effectively to a wide and diverse group of stakeholders
- interpret and apply legislation and policies
- design and manage measuring and testing activities
- analyse test results
- coordinate and oversees the conduct of investigations
- assess environmental impact
- implement management plans
- develop implementation plans that reflect management plan objectives and organisational requirements
- prepare reports and recommendations

**Required knowledge:**

- relevant historical records
- relevant legislation
- relevant enterprise policies
- range of appropriate measuring and testing procedures
- investigation procedures
- risk management principles
- customer expectations and requirements
- occupational health and safety and environmental legislation
- Acts and procedures

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to implement and manage activities in water catchments that impact on water yield and quality to ensure performance measures for the catchment management plan are met including:

- gathering, interpreting and synthesising information (including historical data, current legislation and standards, stakeholder views and water quality test results) to underpin the sound management of the water catchment plan
- consulting widely and effectively
- developing effective implementation plans that address the objectives and requirements specified in the management plan
- developing, implementing and overseeing testing and other monitoring arrangements to track the performance

**Context of and specific resources for assessment**

- of the catchment management plan
- preparing reports and recommendations for future action

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

- Catchment management requirements*** may include:
- relevant federal legislation
  - relevant state or territory legislation
  - relevant local government by-laws
  - organisational needs
  - codes of practice
- User and customer*** may include:
- recreational users of the catchment area
  - forestry and land management authorities
  - housing developers and home owners
  - farmers
  - traditional land owners
  - consumers of water
  - water authorities
- Historical catchment information*** may include:
- relevant hydrometrical information
  - previous monitoring studies
  - previous risk assessments
  - vegetation surveys
  - anecdotal information from land holders
  - geological data
  - hydro-geological data
- Environmental factors*** that impact on the catchment area may include:
- flora
  - fauna
  - chemicals
  - land degradation
  - nutrients
  - fire breaks
  - farming practices
  - land use
- Issues*** that impact on or relate to the catchment area may include:
- existence of known cultural sites
  - land use patterns
  - environmental issues
  - other human activity
- Monitoring and testing programs are designed*** and may include reference to:
- sampling and testing procedures
  - the testing medium
  - the testing frequency

- sampling locations
- testing variables

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Collection and distribution.

# NWP513B Develop and review catchment management plan

## Modification History

NWP513B Release 2: Layout adjusted. No changes to content.

NWP513B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to develop and review catchment management plans that impact on water yield and/or quality.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for managers in water organisations with responsibility for the management of water catchments.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Prepare for catchment management.</b>	1.1 Identify and interpret <i>catchment management requirements</i> .
	1.2 Identify and evaluate <i>user and customer</i> requirements that impact on the catchment area.
	1.3 Gather <i>historical catchment information</i> and evaluate as input to the planning process.
	1.4 Identify, interpret and assess water quality and quantity requirements.
	1.5 Identify and interpret <i>environmental factors</i> and other relevant <i>issues</i> that impact on the catchment area.
<b>2 Develop the catchment management plan.</b>	2.1 Identify, interpret and validate <i>stakeholder</i> requirements that impact on the catchment area.
	2.2 Review and clarify organisational objectives and key performance indicators for the catchment management plan.
	2.3 Develop a catchment management plan.
<b>3 Review and refine the catchment management plan.</b>	3.1 Assess data from the ongoing implementation of the catchment management plan and use to inform the review of the plan.
	3.2 Review objectives of the management and implementation plans.
	3.3 Make recommendations for changes to objectives and implementation procedures.
	3.4 Provide advice and guidance to catchment area users and stakeholders.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- interpret and apply legislation and policies
- interpret and use measuring and testing activities
- conduct investigations
- assess environmental impacts
- use data to inform planning process
- communicate and consult with stakeholders

### Required knowledge:

- water quality processes and parameters
- water management processes
- analysis of historical records
- relevant legislation
- relevant enterprise policies
- range of appropriate measuring and testing procedures
- risk management principles
- investigation procedures
- customer expectations and requirements
- occupational health and safety and environmental legislation
- Acts and procedures

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to develop and review catchment management plans that impact on water yield and quality including:

- gathering, interpreting and synthesising information (including historical data, current legislation and standards, stakeholder views and water quality test results) to underpin the sound development of the water catchment management plan
- consulting widely and effectively
- developing effective catchment management plans that address the water organisation's objectives and requirements
- using data from testing and other monitoring arrangements to track the performance of the catchment management plan and inform the review of the plan
- preparing reports and recommendations for changes to the objectives of the management plan and its implementation

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include

equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry

and regional contexts.

**Catchment management requirements** may include:

- relevant federal legislation
- relevant state or territory legislation
- relevant local government by-laws
- organisational needs
- codes of practice

**User and customer stakeholders** may include:

- recreational users of the catchment area
- forestry and land management authorities
- housing developers and home owners
- farmers
- traditional land owners
- consumers of water
- water authorities

**Historical catchment information** may include:

- relevant hydrometrical information
- previous monitoring studies
- previous risk assessments
- vegetation surveys
- anecdotal information from land holders
- geological data
- hydro-geological data

**Environmental factors** that impact on the catchment area may include:

- flora
- fauna
- chemicals
- land degradation
- nutrients
- fire breaks
- farming practices
- land use

**Issues** that impact on or relate to the catchment area may include:

- existence of known cultural sites
- land use patterns
- environmental issues
- other human activity

**Stakeholder** groups may include:

- state forestry bodies
- state parks authorities
- land care groups
- catchment management trusts and community groups
- environmental interest groups
- native title and indigenous groups
- state government
- local councils/shires
- water authorities

**Unit Sector(s)**

Not applicable.

**Competency field**

Collection and distribution.

# NWP516B Implement and manage surface water management plan

## Modification History

NWP516B Release 2: Layout adjusted. No changes to content.

NWP516B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required for the implementation of the management plan for surface water to ensure environmental considerations are met and source of supply is maintained.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for managers in water organisations with responsibility for the management of surface water resources.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <b><i>bold italicised</i></b> text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
---	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Implement and coordinate monitoring and testing program.</b>	<p>1.1 Confirm performance measures of the <i>surface water</i> management plan.</p> <p>1.2 Design and implement <i>monitoring and testing programs</i>.</p> <p>1.3 Coordinate activities relating to the surface water plan.</p> <p>1.4 Interpret and record test results and education programs.</p> <p>1.5 Identify and investigate current and/or potential problems and report results and recommendations.</p> <p>1.6 Gather <i>historical surface water information</i> and evaluate.</p> <p>1.7 Monitor <i>water usage, water flow and water quality</i> according to the plan.</p>
<b>2 Monitor and evaluate performance of surface water management plans.</b>	<p>2.1 Identify, investigate and report deviations of planned water usage and quality and management plan procedures.</p> <p>2.2 Review objectives of the management and implementation plans.</p> <p>2.3 Review parameters for water usage and quality.</p> <p>2.4 Monitor and review <i>environmental factors that impact on surface water</i>.</p> <p>2.5 Make recommendations for changes to plan objectives and procedures and usage and quality parameters.</p> <p>2.6 Provide advice and guidance to water <i>users and stakeholders</i>.</p>
<b>3 Report on monitoring and implementation activities.</b>	<p>3.1 Identify and report deviations from the management plan.</p> <p>3.2 Review and report objectives of the management and implementation plans.</p> <p>3.3 Make recommendations for changes to plan objectives.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- interpret and apply legislation and policies
- coordinate measuring and testing activities
- conduct investigations
- assess environmental impacts
- communicate effectively with stakeholders and users
- make decisions based on the analysis of data

- report clearly and effectively

### **Required knowledge:**

- relevant legislation
- relevant enterprise policies
- measuring and testing procedures
- investigation procedures
- risk management principles
- customer expectations and requirements
- climatic and weather characteristics and impacts
- hydraulic analysis

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to implement management plans for surface water to ensure environmental considerations are met and source of supply is maintained:

- gathering, interpreting and synthesising information (including historical data, current legislation and standards, stakeholder views and water quantity and quality test results) to underpin the implementation of the surface water management plan
- designing and implementing testing processes and programs
- monitoring and evaluating the outcomes of the surface water management plan
- providing advice about water usage and communicate with stakeholders and users
- preparing reports and recommendations for future action

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

- Surface water*** sources may include:
- dams and reservoirs
  - weirs and rivers
  - lakes
  - creeks and streams

***Monitoring and testing programs*** may include:

- wetlands
- off stream storage
- catchment areas
- storage tanks
- resource yields
- resource status
- flow rates
- testing procedures
- testing medium
- testing frequency
- sampling locations
- testing variables
- land use changes
- hydrometrical information
- previous monitoring studies
- previous risk assessments
- geological data
- hydro-geological data
- land use studies
- environmental management studies
- anecdotal information from land owners
- usage and environment allocations
- licenses
- legislative requirements
- enterprise policies
- cost benefit analysis
- environmental flow requirements
- catchment usage and management
- weather and climate
- rainfall run-off
- chemicals
- salinity
- nutrients
- reservoir operations
- natural events
- water consumers
- government
- water authorities
- environmental departments
- recreational users of the area
- interest groups

***Historical surface water information*** may include:

***Water usage, water flow and water quality*** may be influenced by a range of factors including:

***Environmental factors that impact on surface water*** may include:

***Users and stakeholders*** may include:

- industry
- extractive industry

## **Unit Sector(s)**

Not applicable.

Collection and distribution.

# NWP517B Develop and review surface water management plan

## Modification History

NWP517B Release 2: Layout adjusted. No changes to content.

NWP517B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to develop and review a surface water management plan to ensure environmental considerations are met and source of supply is maintained.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for managers in water organisations with responsibility for the management of surface water resources.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <b>bold italicised</b> text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Plan and prepare for management of surface water flows and quality.</b>	1.1 Identify and interpret <i>surface water</i> flow requirements.
	1.2 Identify and interpret <i>water flow, quality and quantity requirements</i> , including release.
	1.3 Identify and interpret <i>historic source water flow</i> and system capacity information.
	1.4 Identify and interpret environmental flows that impact on water flows and quality.
	1.5 Identify and interpret <i>environmental factors</i> that impact on surface water.
	1.6 Identify, interpret and review the current status of resource and operational protocols.
<b>2 Develop the surface water management plan.</b>	2.1 Identify and interpret surface water management requirements.
	2.2 Identify, interpret and validate stakeholder requirements that impact on surface water.
	2.3 Develop a <i>surface water management plan</i> .
<b>3 Review the surface water management plan.</b>	3.1 Analyse and report deviations from planned performance measures.
	3.2 Review objectives of the management and implementation plans.
	3.3 Review parameters for water usage and quality through <i>monitoring and testing programs</i> .
	3.4 Make recommendations for changes to plan objectives and procedures, and usage and quality parameters.
	3.5 Provide advice and guidance to water <i>users and stakeholders</i> .

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- interpret and apply legislation and policies
- coordinate measuring and testing activities
- conduct investigations
- assess environmental impact
- use data to inform planning process
- communicate and consult with stakeholders and users

### **Required knowledge:**

- relevant legislation
- relevant enterprise policies
- measuring and testing procedures
- investigation procedures
- risk management principles
- customer expectations and requirements
- climatic and weather characteristics and impacts
- hydraulic analysis

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to develop and review a surface water management plan to ensure environmental considerations are met and source of supply is maintained including:

- gathering, interpreting and synthesising information (including historical data, current legislation and standards, stakeholder views and monitoring and test results) to underpin the sound development of the surface water management plan
- consulting widely and effectively
- developing effective surface water management plans that address the water organisation's objectives and requirements
- using data from testing and other monitoring arrangements to track the performance of the surface water management plan and inform the review of the plan
- preparing reports and recommendations for changes to the objectives of the management plan and its implementation

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include

equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Surface water*** sources may • dams

include:

- reservoirs
- weirs
- rivers
- lakes
- creeks and streams
- wetlands
- off stream storage
- catchment areas
- storage tanks

***Water flow, quality and quantity requirements*** may be influenced by factors including:

- usage and environment allocations
- licenses
- legislation
- enterprise policies
- cost benefit analysis

***Historic source water flow*** information may include:

- hydrological information
- previous monitoring studies
- previous risk assessments
- geological data
- hydro-geological data
- land use studies
- environmental management studies
- anecdotal information from land owners

***Environmental factors*** that impact on surface water may include:

- environmental flow requirements
- catchment usage and management
- weather and climate
- rainfall run-off
- chemicals
- salinity
- nutrients
- reservoir operations
- natural events

The development of a ***surface water management plan*** may include:

- setting targets and objectives for quantity
- quality
- stakeholders
- future use

***Monitoring and testing programs*** may include:

- resource yields
- resource status
- flow rates
- testing procedures
- testing medium
- testing frequency

*Users and stakeholders*  
may include:

- sampling locations
- testing variables
- land use changes
- water consumers
- government
- water authorities
- environmental departments
- recreational users of the area
- interest groups
- industry
- extractive industry

# NWP518B Prepare and report on data related to flood mitigation

## Modification History

NWP518B Release 2: Layout adjusted. No changes to content.

NWP518B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to collect and analyse data associated with rainfall, run-off, flood estimation and reporting required for the development and communication of flood mitigation plans.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for planners and managers in water organisations with responsibility for the preparation of flood mitigation reports.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <b><i>bold italicised</i></b> text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
---	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Analyse rainfall and run-off regimes.</b>	1.1 Access and interpret historical rainfall run-off and <i>flooding regimes</i> of specific catchments. 1.2 Delineate historical floods. 1.3 Model simulated, hypothetical or estimated rainfall intensity data and catchment characteristics. 1.4 Collate, manipulate and interpret <i>data</i> .
<b>2 Estimate flooding.</b>	2.1 Use <i>techniques for flood estimation</i> and apply to the development of flood estimation guidelines. 2.2 Estimate and record flood levels, extents and flow rates. 2.3 Complete and record <i>flood hazard assessments</i> . 2.4 Analyse and record the impact of <i>planning controls</i> of flood assessments.
<b>3 Report and communicate information.</b>	3.1 Collate, analyse and record information to meet organisational requirements. 3.2 Communicate information to <i>stakeholders</i> using standard organisational procedures. 3.3 Prepare and present reports in a clear, concise and timely manner to meet organisational requirements.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- use mathematical techniques to analyse and model flood data
- collect and interpret data
- manipulate and model data
- develop clear and effective reports
- communicate effectively

### Required knowledge:

- catchment hydrology principles
- water flow measurement
- flow routing
- relevant legislation, by-laws and planning schemes
- mathematical calculation
- cultural environment
- occupational health and safety and environmental legislation, Acts and procedures

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to collect and analyse data associated with rainfall, run-off, flood estimation and reporting required for the development and communication of flood mitigation plans including:

- collecting relevant data
- analysing relevant data
- modelling of data
- preparing clear, concise and timely reports
- communicating data and outcomes to stakeholders and team members

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Flooding regimes*** may include:

- flood levels
- peaks; flow rates
- area extent
- duration

***Data*** may include:

- time series data
- historical
- rainfall
- flood levels

***Techniques for flood estimation*** may include:

- base flow separation
- flood frequency
- rainfall modelling

***Flood hazard assessments*** may include:

- the safety of people
- safety of animals
- land inundation
- house and other property inundation
- effects on communication and other infrastructures
- ability and extent of need for emergency services industry

**Planning controls** may include.

- cost analysis
- land use planning
- construction or destruction of physical structures (e.g. levee banks, sand bag levees)
- infrastructure development
- cultural land restrictions

**Stakeholders** may include:

- community groups
- land holders
- emergency response groups
- town planners
- utility managers (gas, electricity, water)
- local government
- industry and commerce

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Common.

# NWP519B Develop and report flood mitigation

## Modification History

NWP519B Release 2: Layout adjusted. No changes to content.

NWP519B Release 1: Primary release.

## Unit Descriptor

This unit of competency describes the outcomes required to analyse and model data relating to flooding, develop effective management and warning systems and communicate the outcomes concisely and effectively.

## Application of the Unit

This unit supports the attainment of skills and knowledge required for planners and managers in water organisations with responsibility for the preparation of flood management strategies and flood warning systems.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <b><i>bold italicised</i></b> text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
---	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1 Analyse rainfall and run-off regimes.</b>	1.1 Access and interpret historical rainfall run-off and <i>flooding regimes</i> of specific catchments. 1.2 Delineate historical floods. 1.3 Model simulated, hypothetical or estimated rainfall intensity data and model catchment. 1.4 Collate, manipulate and interpret <i>data</i> .
<b>2 Estimate flooding.</b>	2.1 Use <i>techniques for flood estimation</i> and apply to flood estimation guidelines. 2.2 Estimate and record flood levels, extents and flow rates. 2.3 Undertake and record <i>flood hazard assessment</i> .
<b>3 Determine management and warning systems.</b>	3.1 Evaluate the roles of storage and/or retarding basins safety and flood attenuation strategies. 3.2 Evaluate current flood classifications and impacts and formulate planning controls for flood plain or waterway management. 3.3 Evaluate current flood warning systems. 3.4 Recommend or develop changes to existing flood plain or waterway management controls and warning systems.
<b>4 Report and communicate recommendations.</b>	4.1 Prepare and present reports in a clear, concise and timely manner to meet organisational requirements. 4.2 Communicate findings and recommendations to <i>stakeholders</i> .

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:

- use mathematical techniques to analyse and model flood data
- prepare and plan strategically
- computer skills
- collect and interpret data
- model data
- develop clear and effective reports
- communicate effectively
- interpret data
- manipulate data

- communicate with a range of stakeholders

### **Required knowledge:**

- catchment hydrology principles
- water flow measurement; flow routing
- relevant legislation, by-laws and planning schemes
- mathematical calculation
- cultural environment
- occupational health and safety and environmental legislation, Acts and procedures

## **Evidence Guide**

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to analyse and develop flood mitigation warning systems and strategies using the effective:

- collecting relevant data
- analysing relevant data
- modelling data
- developing critical flood warning systems
- developing strategies to mitigate the impact of potential future floods
- preparing clear, concise and timely reports
- communicating data and outcomes to stakeholders and team members

### **Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period

of time reflecting the scope of the role and the practical requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

***Flooding regimes*** may include:

- flood levels
- peaks
- flow rates
- area extent
- duration
- time series data
- historical

***Data*** may include:

**Techniques for flood estimation** may include:

- rainfall
- flood levels
- base flow separation
- flood frequency
- rainfall modelling

**Flood hazard assessment** may include:

- safety of people
- safety of animals
- land inundation
- house and other property inundation
- effects on communication and other infrastructures
- ability and extent of need for emergency services industry
- cost analysis

**Stakeholders** may include:

- community groups
- land holders
- emergency response groups
- town planners
- utility managers (gas, electricity, water)
- local government
- industry and commerce

## **Unit Sector(s)**

Not applicable.

## **Competency field**

Common.

## PSPPM402B Manage simple projects

### Modification History

PSPPM402B Release 2: Layout adjusted. No changes to content.

PSPPM402B Release 1: Primary release.

### Unit Descriptor

This unit covers management of generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project start-up activities, coordinating project implementation, monitoring the project and arranging follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing simple projects overlaps with other generalist and specialist work activities such as applying government processes, using resources, gathering information, managing contracts etc.

When this unit is completed in conjunction with *PSPPM401B Design simple projects* and *PSPPM403B Close simple projects*, the three units together are equivalent to the eight private sector Business Services project management competencies: BSBPM401A - BSBPM408A inclusive.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

This unit replaces and is equivalent to *PSPPM402A Implement projects*.

### Application of the Unit

Not applicable.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <b>Implement start-up activities</b>	1.1 The <i>project plan</i> is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy.
	1.2 Project <i>stakeholders'</i> understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.
	1.3 <i>Required systems</i> are established and maintained throughout the project in accordance with the project plan.
	1.4 A working knowledge of <i>project management tools</i> is used to facilitate integration of project activities and achievement of project outcomes.
2. <b>Coordinate project implementation</b>	2.1 <i>Integration</i> and <i>management</i> of project activities are handled in accordance with the project plan.
	2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan.
	2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures.
	2.4 Project <i>change proposals</i> are received and changes are recommended/made in accordance with the project plan, and documented in accordance with <i>policy and procedures</i> .
3. <b>Monitor project</b>	3.1 All aspects of the project are continually monitored and corrective action is taken as necessary to maintain progress in accordance with the project plan.
	3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee

**ELEMENT****PERFORMANCE CRITERIA**

- members or other stakeholders.
- 3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.
- 3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.
- 3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan.
- 4. Arrange project follow-up activities**
- 4.1 Project deliverables are analysed against *specifications*, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.
- 4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.
- 4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.
- 4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.

**Required Skills and Knowledge**

This section describes the essential skills and knowledge and their level, required for this unit.

**Skill requirements**

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools applicable to small scale or low risk projects
- applying ethical decision making and problem solving related to project management of small scale or low risk projects
- writing recommendations and preparing implementation support packages

requiring precision of expression

- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

### Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project management, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment requirements
  - project governance requirements
  - quality standards
- risk management
- procurement guidelines
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles
- organisational and political context

## Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

### Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV402B Deliver and monitor service to clients

PSPGOV403B Use resources to achieve work unit goals

PSPGOV411A Deal with conflict

PSPGOV412A Use advanced workplace communication strategies

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the

public sector

PSPPROC410A Administer contracts

PSPPM401B Design simple projects

PSPPM403B Close simple projects

- *Excluded units* that may not contribute to the same qualification as this unit:

PSPPM405A Administer simple projects

### **Overview of evidence requirements**

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

### **Resources required to carry out assessment**

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

### **Where and how to assess evidence**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination

of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

## Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

*Project plan* will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose

**Stakeholders** may include:

- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

**Required systems for project management** may include:

- planning and monitoring system
- financial management including:
  - budget allocation/funding
  - income generated
  - expenditure
- recordkeeping for documented information such as:
  - correspondence
  - quality data including survey, needs, test results
  - contracts
  - time allocated and spent on each aspect of the project
  - progress reports
  - performance reports against milestones
  - project outcomes
  - samples, prototypes, models

**Project management tools** may include:

- risk analysis
- organisational project governance framework
- communications plan

- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

***Integration of project activities*** may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

***Management*** may include:

- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management
- contract management
- change management

***Change proposals*** may include:

- scope
- administration
- engineering, technical, technology changes
- time
- cost
- resources

***Policy and procedures*** may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation

- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

*Specifications* may include:

- functional
- technical
- performance
- material

## **Unit Sector(s)**

Not applicable.

Project Management.

# PSPPM502B Manage complex projects

## Modification History

PSPPM502B Release 2: Layout adjusted. No changes to content.

PSPPM502B Release 1: Primary release.

## Unit Descriptor

This unit covers management of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes managing start-up, project implementation, project integration and follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis, etc.

When this unit is completed in conjunction with *PSPPM501B Design complex projects*, and *PSPPM503B Close complex projects*, the three units together are equivalent to the nine private sector Business Services project management competencies: BSBPM501A - BSBPM509A inclusive.

This unit replaces and is equivalent to *PSPPM502A Manage projects*.

## Application of the Unit

Not applicable.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1. Manage start-up activities

- 1.1 *Project plans* are refined in consultation with steering committee and team members, and precise details are included for schedules of activities, milestones and resources.
- 1.2 *Required systems* are established and maintained throughout the project in accordance with the complexity of the project and in line with the project plan.
- 1.3 Project team members' understanding of and commitment to fulfilling the project requirements and their roles and responsibilities for the duration of the project are confirmed.
- 1.4 *Project management tools* are selected and applied effectively to achieve project outcomes.

#### 2. Manage project implementation

- 2.1 *Integration* and *management* of complex project activities are handled in accordance with the project plan.
- 2.2 Leadership and required *development* are provided to the project team, and morale, stress levels and triggers are managed throughout the life of the project in accordance with organisational *policy and procedures*.
- 2.3 *Stakeholder* input and expectations are managed throughout the project in accordance with the communication plan.
- 2.4 Disagreements and disputes are resolved to the satisfaction of stakeholders or referred to a higher authority in accordance with organisational policy and procedures.
- 2.5 Project *change proposals* are negotiated, agreed and documented in accordance with policy and procedures.

#### 3. Manage project integration

- 3.1 All aspects of the project and related projects are integrated and links are established to ensure objectives are met in accordance with the project plan.
- 3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan and staff and contractors are regularly consulted to discuss progress and ensure effective results.
- 3.3 Project integration is monitored, and management plans and any related contracts are reviewed and amended as appropriate, with

**ELEMENT****PERFORMANCE CRITERIA**

4. Coordinate project follow-up activities	<p>results reported in accordance with mechanisms identified in the communication plan.</p> <p>3.4 Ongoing progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the project.</p> <p>3.5 Programmed review of objectives and achievement is planned and implemented in accordance with the project plan.</p> <p>4.1 Significant judgment is applied in the analysis of project deliverables against <i>specifications</i>, performance standards and project objectives, and the results are reported to stakeholders.</p> <p>4.2 Support package arrangements are identified and offered to stakeholders who will be required to apply the project results.</p> <p>4.3 Options for stakeholders to take account of environmental and cultural factors in applying the project results are included in the support package.</p> <p>4.4 Operational and support authorities are consulted to investigate any testing/trialling/building and evaluation requirements resulting from the project, and funding implications estimated in project report.</p>
--	---

**Required Skills and Knowledge**

This section describes the essential skills and knowledge and their level, required for this unit.

**Skill requirements**

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project outcomes
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- negotiating with stakeholders and team members using communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools applicable to reasonably complex projects
- applying ethical decision making and problem solving related to project management of reasonably complex projects
- writing recommendations and preparing project reports requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

## Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project implementation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
- project governance requirements
- quality standards
- risk management
- procurement guidelines
- financial management and budgetary framework
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of reasonably complex projects in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
- project management systems
- organisational and political context
- critical analysis in a project management context
- business and commercial issues related to the projects managed

## Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

### Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV505A Promote diversity

PSPPM501B Design complex projects  
PSPPM503B Close complex projects  
PSPPROC501A Manage contract risk  
PSPPROC503A Manage contract performance

**Overview of evidence requirements**

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

**Resources required to carry out assessment**

These resources include:

- legislation, guidelines, procedures and protocols relating to project management in the organisation and the public sector
- workplace project documentation
- scenarios and case studies
- examples of project management tools

**Where and how to assess evidence**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing complete projects, including coping with difficulties, irregularities and breakdowns in routine
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration

- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

## Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

*Project plans* will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale

***Required systems for project management*** may include:

- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- planning and monitoring system
- financial management including:
  - budget allocation/funding
  - income generated
  - expenditure
- recordkeeping for documented information such as:
  - correspondence
  - quality data including survey, needs, test results
  - contracts
  - time allocated and spent on each aspect of the project
  - progress reports
  - performance reports against milestones
  - project outcomes
  - samples, prototypes, models

***Project management tools*** may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

***Integration of project activities*** may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk

**Management** may include:

- procurement
- scope management
- communication and reporting
- schedule management
- financial management
- fraud control
- quality management
- resources management
- people management
- logistics management
- risk management
- contract management
- project implementation
- transition
- change management

**Development** may include:

- regular meetings
- feedback
- encouragement
- mentoring and coaching
- additional physical and human resources (within allocated budget) if and as required

**Policy and procedures** may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements
  - environment and sustainability

**Stakeholders** may include:

- project sponsor/funding bodies

Project Management.

## PSPPM503B Close complex projects

### Modification History

PSPPM503B Release 2: Layout adjusted. No changes to content.

PSPPM503B Release 1: Primary release.

### Unit Descriptor

This unit covers closure of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes reviewing project activity and managing project closure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, closing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis, etc.

When this unit is completed in conjunction with *PSPPM501B Design complex projects* and *PSPPM502B Manage complex projects*, the three units together are equivalent to the nine private sector Business Services project management competencies: BSBPM501A - BSBPM509A inclusive.

### Application of the Unit

Not applicable.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1. Review project activity

- 1.1 Evaluation of project process, supplier performance and achievement against objectives is undertaken in consultation with *stakeholders* and results are reported in accordance with the *project plan* evaluation framework and organisational *policy and procedures*.
- 1.2 The extent to which clients needs were met is evaluated and action to rectify problems is identified and documented.
- 1.3 Implications of project outputs/outcomes for policies and operating procedures are identified and recommendations are made for their amendment.
- 1.4 Information obtained from the evaluation of the project is provided in accordance with organisational requirements so it may be used to improve relevant policy and practice .

#### 2. Manage project closure

- 2.1 Any funding associated with the project is acquitted against project budget items, and financial records are checked for accuracy and completed in accordance with organisational procedures.
- 2.2 Project wind-down is *managed* and *documentation*, records and *approvals* are handled in accordance with project plan and organisational policy and procedures.
- 2.3 Project stakeholders are debriefed, and infrastructure and resources are redeployed in accordance with organisational policy and procedures.
- 2.4 Project hand-over to user/s is completed in accordance with organisational procedures, and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.
- 2.5 Stakeholders are advised of procedures and authorities for initial support to apply project results where relevant, and strategies are provided to manage long-term project momentum in accordance with organisational requirements.

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating outcomes against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing stakeholders and redeploying resources and infrastructure
- acquitting and reporting on resource expenditure including time and costs
- using project management tools applicable to reasonably complex projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

### Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
  - project governance requirements
  - quality standards
  - risk management
  - procurement guidelines
  - financial management
  - human resource management and development
  - equal employment opportunity, equity and diversity principles
  - project specifications and objectives
- project management tools to suit a range of reasonably complex projects in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
- project management principles and systems
- critical analysis in a project management context
- business and commercial issues related to the projects managed
- organisational and political environment

## Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

### Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV505A Promote diversity

PSPGOV507A Undertake negotiations

PSPGOV512A Use complex workplace communication strategies

PSPGOV517A Coordinate risk management

PSPPM501B Design complex projects

PSPPM502B Manage complex projects

PSPPROC504A Finalise contracts

### Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- reviewing and closing complex projects in a range of (3 or more) contexts (or occasions, over time)

### Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools suited to reasonably complex projects

### Where and how to

Valid assessment of this unit requires:

## assess evidence

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing and closing complex projects, including coping with difficulties, irregularities and breakdowns in routine
- reviewing and closing complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

## For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

## Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

**Stakeholders** may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

**Project plan** will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities

***Policy and procedures*** may include:

- schedule/timeline
- task/work breakdown structure (WBS)
- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements
  - environment and sustainability

***Management of project wind-down*** may include:

- risks
- issues
- assets
- consultants
- project team
- support staff

***Documentation*** may include:

- project completion report
- supplier performance reports
- whole-of-life support plans
- transfer documents
- financial reports and acquittals
- evaluation reports
- transition plans

***Approvals*** may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

**Unit Sector(s)**

Not applicable.

**Competency field**

Project Management.

# PSPPOL404A Support policy implementation

## Modification History

PSPPOL404A Release 2: Layout adjusted. No changes to content.

PSPPOL404A Release 1: Primary release.

## Unit Descriptor

This unit covers the identification and application of policy in a public sector work environment. It includes identifying relevant policy, implementing policy, and monitoring and reporting on policy implementation.

In practice, supporting policy implementation occurs in the context of other generalist or specialist work activities such as delivering client services, providing input to change, implementing workplace safety procedures, awarding contracts etc.

This unit replaces and is equivalent to *PSPPOLI401A Support policy implementation*.

## Application of the Unit

Not applicable.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify relevant policy	1.1 <i>Work situations</i> that are shaped by government or organisation policy are identified in accordance with public sector guidelines.
	1.2 <i>Policy</i> relating to particular work situations is identified and located.
2. Implement policy	2.1 Policy to be implemented is interpreted under direction to identify and plan for change in work practices.
	2.2 The implications of policy for individual work practices are identified, and practices are confirmed/adjusted to reflect policy requirements in accordance with organisational procedures.
	2.3 Others affected by policy requirements are supported to accommodate those requirements.
	2.4 Policy is implemented to support achievement of outcomes intended in specific work areas.
3. Monitor and report on policy implementation	3.1 Information that will assist with the evaluation of the effectiveness of policy implementation is gathered, recorded and reported under direction in accordance with organisational procedures.
	3.2 <i>Information</i> that will assist with the evaluation of the impact of policy implementation on organisational outcomes is gathered, recorded and reported under direction in accordance with organisational procedures.

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Skill requirements

Look for evidence that confirms skills in:

- reading complex and formal documents such as policy and legislation and providing information on their application
- researching and providing information
- preparing written reports requiring accuracy of expression and language and structures suited to the intended audience
- working with legislation drafters and legal advisers
- writing guidelines in plain English

- working as a member of a team to consult on and prepare policy guidelines
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- gathering and analysing policy feedback
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental and occupational health and safety implications of policy/s being implemented

### Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- practices and procedures for developing policy guidelines
- policy feedback mechanisms
- current organisation policies
- whole of government policies and international policy obligations that impact on organisation policy
- organisation and government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being implemented

## Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

### Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to, public sector generalist and specialist units in the Certificate IV in Government.

Choice from the following is recommended:

PSPGOV402B Deliver and monitor service to clients

PSPGOV403B Use resources to achieve work unit goals

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPREG407B Produce formal record of interview

PSPREG410B Give evidence

PSPPROC409A Receive and select offers

**Overview of evidence requirements**

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- policy implementation supported in a range of (2 or more) contexts (or occasions, over time)

**Resources required to carry out assessment**

These resources include:

- relevant policy and legislation
- public sector standards, procedures and protocols
- policy guidelines

**Where and how to assess evidence**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when supporting policy implementation, including coping with difficulties, irregularities and breakdowns in routine
- policy implementation supported in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training

courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

## Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

*Work situations* may include:

- processes
- outcomes
- priorities
- client services
- core business
- service delivery mode/s
- organisational structure

*Policy* may include:

- government policy
- organisation policy

*Information for evaluation* may include:

- statistical data
- qualitative data
- anecdotal feedback
- survey data
- stakeholder opinions

## Unit Sector(s)

Not applicable.

## Competency field

Policy.

# PSPPOL603A Manage policy implementation

## Modification History

PSPPOL603A Release 2: Layout adjusted. No changes to content.

PSPPOL603A Release 1: Primary release.

## Unit Descriptor

This unit covers the interpretation of policy and the management of the policy implementation process. It includes interpreting and communicating the requirements of policy, and policy implementation.

In practice, the management of policy implementation occurs in the context of other generalist and specialist work activities such as managing change, managing diversity, managing workplace safety, managing the delivery of client services, managing risk, directing the management of contracts, etc.

This unit replaces and, for qualification purposes is equivalent to *PSPPOLI601A Manage policy implementation*. The unit no longer requires evaluation of policy implementation. Evaluation is addressed in *PSPMNGT611A Manage evaluations*.

## Application of the Unit

Not applicable.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the

competency.

Range Statement following.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |   |  |
|---|--|
| <p><b>1. Interpret and communicate requirements of policy</b></p> | <p>1.1 The expected outcomes of policy implementation are identified and explained to staff in a manner suited to their levels of understanding, experience and <i>specific needs</i>.</p> <p>1.2 <i>Policy</i> is interpreted relative to workplace responsibilities and accountabilities.</p> <p>1.3 The impact on <i>work activities</i> of policy implementation is communicated to staff.</p> <p>1.4 Staff are assisted with the interpretation of policy and its application to their work.</p> <p>1.5 Policy and its implications are explained to other stakeholders using language and materials to suit their current level of knowledge, experience and specific needs.</p> |
| <p><b>2. Implement policy</b></p>                                 | <p>2.1 Potential or impending policy changes are identified and strategies are prepared to accommodate and communicate those changes</p> <p>2.2 Work plans are prepared in consultation with staff and management to ensure that policy is implemented as intended.</p> <p>2.3 Staff performance is monitored to ensure that it complies with policy and corrective action is taken as necessary.</p> <p>2.4 Staff are assisted in adjusting to changes in accordance with their needs and experience.</p>   |

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Skill requirements

Look for evidence that confirms skills in:

- interpreting complex and formal documents such as policy and legislation, and assisting others to apply them in the workplace
- using communication to suit different audiences
- responding to diversity, including gender and disability
- accessing legislation and codes of ethics electronically or in hard copy

- preparing work plans requiring attention to detail and the interpretation and application of complex language and/or concepts
- providing leadership to the workgroup in the interpretation and implementation of policy
- identifying and addressing the environmental and occupational health and safety implications of the policy/s to be implemented

### Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- range and type of policies relating to the public sector
- public sector code/s of ethics and code/s of conduct
- organisation and government procedures
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being implemented

## Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

### Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPMNGT604B Manage change

PSPMNGT605B Manage diversity

PSPMNGT606B Manage quality client service

PSPMNGT608B Manage risk

PSPOHS602A Manage workplace safety

PSPPROC602B Direct the management of contracts

### Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)

	<ul style="list-style-type: none"><li>• management of policy implementation in a range of (2 or more) contexts (or occasions, over time)</li></ul>

## PUACOM012B Liaise with media at a local level

### Modification History

Not applicable.

### Unit Descriptor

#### Unit Descriptor

This unit covers the liaison with media at a low level incident and providing information about local events.

### Application of the Unit

#### Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

#### Prerequisite Unit/s

Nil

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

#### 1. Determine media requirements

- 1.1 ***Organisational protocols*** are followed when ***liaising with the media***
- 1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate
- 1.3 ***Operational responsibilities*** are balanced against the provision of information to the ***media***

#### 2. Provide information to the media

- 2.1 A positive image of the ***organisation*** is maintained when liaising with the media
- 2.2 Every opportunity is used to promote the organisation, its services and personnel
- 2.3 ***Relevant and succinct information*** is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media

#### 3. Publicise an event

- 3.1 Relationship is established with media contacts
- 3.2 ***Event*** details and support materials are gathered and presented in a logical, relevant and concise manner to the media
- 3.3 Information provided to media is recorded and maintained

## **Required Skills and Knowledge**

### **REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

#### **Required Skills**

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to media
- public speaking
- retaining professionalism under duress

#### **Required Knowledge**

- organisational protocols relating to media liaison (for example legal and organisation requirements relating to:
  - confidentiality
  - libel
  - accuracy
  - discrimination)
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
  - newspapers
  - magazines
  - radio
  - television (local, regional, national media)
- communication skills
- establishing media relationship

## **Evidence Guide**

### **EVIDENCE GUIDE**

## EVIDENCE GUIDE

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities

### Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

### Context of and specific resources for assessment

#### Context of assessment

On the job or in a simulated work environment

#### Specific resources for assessment

No special requirements

### Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

### Organisation may include

Fire  
Police  
State Emergency Service  
Emergency Management

### Organisational protocols may include

organisational policies and procedures  
personal presentation being as neat as possible considering the operational circumstances  
ensuring media liaison person is fully briefed and prepared  
acknowledge support of other organisations

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>seeking advice from headquarters where appropriate</li> <li>limiting comments on role of own service</li> <li>relevant Federal and State legislation and regulations</li> </ul>
<b>Liaising with the media may include</b>	<ul style="list-style-type: none"> <li>print (local, community, daily newspapers, magazines)</li> <li>television (live or pre-recorded)</li> <li>radio (live or pre-recorded)</li> </ul>
<b>Operational responsibilities may include</b>	<ul style="list-style-type: none"> <li>preservation of life and property, which is the principal concern to all public safety personnel</li> <li>presenting information relevant to the public</li> </ul>
<b>Event may include</b>	<ul style="list-style-type: none"> <li>long service to organisation</li> <li>medal presentation</li> <li>awarding of certificates</li> <li>donations/sponsorships/fundraising</li> <li>recruiting</li> <li>new equipment</li> <li>VIP visit</li> <li>open day</li> <li>training</li> <li>unusual rescues</li> <li>self help information</li> </ul>
<b>Media's potential interest may include</b>	<ul style="list-style-type: none"> <li>enormous media event</li> <li>standard report</li> <li>human interest</li> <li>in the public's interest</li> </ul>
<b>Media's requirements may include</b>	<ul style="list-style-type: none"> <li>deadlines</li> <li>capabilities</li> <li>visual and verbal requirements</li> <li>types of medium</li> <li>variation</li> <li>journalists</li> <li>amenities</li> </ul>

**RANGE STATEMENT**

	briefing area
<b>Media may include</b>	access to media liaison person bilingual personnel and bilingual information representatives from mainstream, community and ethnic television print and broadcast media
<b>Organisational positive image may include</b>	promote the relevance and efficiency of the service report the facts heroism of personnel organisational personnel are co-operative and responsive organisational personnel well presented handling media in most positive manner in even the most adverse conditions/circumstances
<b>Media opportunity may include</b>	opportunity to promote the services provide educational information to the public airplay
<b>Relevant and succinct information may include</b>	information that according to protocol is available for public release report facts and avoid speculation do not supply classified information use language that can be readily understood by all to avoid misinterpretation

**Unit Sector(s)**

Not applicable.

**Corequisite Unit/s**

Co-requisite Unit/s Nil

## PUAEMR026 Treat operational risk

### Modification History

PUAEMR026 Release 1: Primary release.

### Unit Descriptor

This unit describes the outcomes required to identify, plan and implement treatment options in order to reduce risk.

### Application of the Unit

This unit applies to people working in a relatively simple and routine workplace in which they use the organisation's policy and procedures. They would normally have local supervisory/management responsibility and will apply known solutions to a variety of predictable problems.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Make risk decision	<p>1.1 Calculated level of risk is compared to the established <i>risk criteria</i> and determined to be acceptable or unacceptable in consultation with the supervisor.</p> <p>1.2 Risk that is determined as unacceptable is documented and noted for treatment.</p>
2. Identify and select treatment options	<p>2.1 <i>Treatment options</i> of known risks are identified and confirmed as contained in <i>organisational standards and guidelines</i> or supervisor's guidance.</p> <p>2.2 Treatment options under consideration are evaluated for <i>effectiveness</i> within the given context.</p> <p>2.3 Selected treatment options are documented and communicated in accordance with organisational policies and procedures.</p>
3. Implement treatment options	<p>3.1 <i>Treatment plans</i> incorporating selected options are implemented in accordance with organisational policies and procedures.</p> <p>3.2 Treatment plans are communicated in the workplace in accordance with organisational policies and procedures.</p>
4. Monitor and review risk and the process	<p>4.1 Effectiveness and efficiency of the treatment plan is <i>monitored</i>, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity.</p> <p>4.2 Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process.</p> <p>4.3 Treatments are adjusted and communicated following the review process.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required Skills

- communicating effectively with personnel at all levels of organisation and risk management specialists
- preparing more detailed reports for a range of target groups including OHS or risk

committee, OHS representatives, managers and supervisors

- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically treat risks and, where appropriate, access resources
- manage simple project implementation
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes

### **Required Knowledge**

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- treatment options for risks relevant in the workplace
- team work principles and strategies
- basic project management strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

## **Evidence Guide**

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholders' involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation.

### **Consistency in performance**

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

### **Context of and specific resources for assessment**

#### **Context of assessment**

Competency should be assessed in the workplace or under conditions that closely simulate the workplace.

#### **Specific resources for assessment**

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplace

### **Guidance information for assessment**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of treating operational risk, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of treating operational risk in a range of 3 or more contexts or occasions, over time

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and should include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Risk criteria*** may include:
- the nature and types of causes and consequences that can occur and how they will be measured
  - how likelihood will be defined
  - the timeframe(s) of the likelihood and/or consequence(s)
  - how the level of risk is to be determined
  - the views of stakeholders
  - the level at which risk becomes acceptable or tolerable
  - whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
- Treatment options*** may include:
- avoidance of the risk
  - removing a risk source
  - changing the likelihood of
  - an initiating event or source of risk occurring
  - a hazard impacting on elements at risk
  - changing the consequences of an identified hazard impact
  - sharing the risk
  - retaining the risk based on an informed decision
- Organisational standards and guidelines*** may include:
- AS/NZS ISO 31000:2009 Risk management—Principles and guidelines
  - regulatory or legislative requirements
  - environmental protection and sustainability regulations
  - industry standards and codes of practice
  - organisational charter/business plan
  - organisational OHS, risk management or resilience policies or operating procedures
- Effectiveness*** may include:
- benefits to the individual
  - benefits to the organisation
  - cost benefits resulting from the implementation of the treatment
  - cost of implementing the treatment option
- Treatment plans*** may include:
- budgeting
  - expected outcome of treatments
  - performance measures

- Monitored* may include:
- responsibilities
  - review process to be set in place
  - schedules
  - critical observation
  - identification of changes over time
  - regular checking
  - regular recording

## PUAEMR027 Assess operational risk

### Modification History

PUAEMR027 Release 1: Primary release.

### Unit Descriptor

This unit describes the outcomes required to identify and assess risk in an operational environment.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Application of the Unit

This competency applies to workers at a relatively simple and routine level, in which they use established organisational policy and procedures. Workers would normally have local supervisory or management responsibility and apply known solutions to a variety of predictable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<b>1. Establish the risk context</b>	<p>1.1 Objectives and scope are identified using organisational risk management standards and guidelines.</p> <p>1.2 <b>Risk criteria</b> are identified and confirmed as contained in organisational policies, procedures or supervisor guidance.</p> <p>1.3 <b>Structure for the planning</b> required to conduct a risk assessment is determined.</p> <p>1.4 <b>Stakeholder</b> aims and objectives are identified and recorded in accordance with workplace procedures and guidelines.</p>
<b>2. Identify risk</b>	<p>2.1 All possible sources of risk which may affect the situation or objectives are identified and recorded in consultation with stakeholders.</p> <p>2.2 Risks are identified using a <b>specified methodology or tool</b> in accordance with workplace procedures and guidelines.</p> <p>2.3 Risk statements describing consequences are generated.</p>
<b>3. Analyse risk</b>	<p>3.1 Risks are analysed by estimating the likelihood of particular consequences occurring.</p> <p>3.2 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures.</p>
<b>4. Evaluate risk</b>	<p>4.1 Levels of risk are prioritised for treatment.</p> <p>4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors.</p> <p>4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented.</p>

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

## Required Skills

- communicating effectively with risk management specialists and people at all organisational levels
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically assess risks and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (e.g. % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

## Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care as applies in emergency risk management context
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

## Evidence Guide

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder's involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

### Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

### Context of and specific resources for assessment

#### Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace

#### Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplaces

### Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of operational risk assessment, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of operational risk assessment in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects

- simulation or role plays
- case studies and scenarios
- observation
- portfolios

## Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

***Organisational risk management standards and guidelines*** may include:

- Standard AS/NZS/ISO 31000:2009 Risk Management—Principles and Guidelines
- regulatory or legislative requirements e.g. ohs act
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational ohs, risk management or resilience policies or operating procedures

***Risk criteria*** may include:

- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

***Structure for the planning*** may include:

- documentation required
- analysis tools which are required to conduct the assessment
- approach taken to conduct the assessment
- depth of assessment

***Specified methodology or tools*** may include:

- a risk matrix
- analysis of risk registers
- brainstorming
- business continuity planning
- examining any available data e.g. audit

- results/incident reports
- expert judgement
  - focus groups
  - nomogram
  - scenario analysis

## **Unit Sector(s)**

### Modification History

Not applicable.

### Unit Descriptor

#### Unit Descriptor

This unit covers the competency associated with the identification, avoidance, review, and evaluation of workplace risks and hazards, maintenance of personal safety and the reporting to supervisors and team members.

### Application of the Unit

#### Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

#### Prerequisite Unit/s

Nil

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

1. **Identify workplace hazards and risks and advise others**

- 1.1 Procedures and practices are followed to identify workplace *hazards* and risks
- 1.2 Appropriate procedures for dealing with hazards in the workplace are followed in accordance with Occupational Health and Safety (OH&S) guidelines and the organisation's procedures
- 1.3 *Contact* is maintained at all times with other crew members and supervisor
- 1.4 Hazards in the work area and warnings of hazardous situations are recognised and reported to designated personnel
- 1.5 Stressful situations are recognised and support is sought or given to minimise effect

2. **Implement hazard control procedures**

- 2.1 *Personal protective clothing and equipment* is selected and donned in accordance with the organisation's procedures and within its limitations
- 2.2 Appropriate procedures and work instructions for controlling risks and hazards are followed
- 2.3 Personal health is protected in accordance with legislative and organisation's procedures
- 2.4 Equipment appropriate to dealing with a hazard is used in accordance with standard operating procedures

ELEMENT	PERFORMANCE CRITERIA
3. <b>Review effectiveness of hazard control procedures</b>	<p>2.5 Controls are implemented to minimise damage to the environment</p> <p>2.6 Fluid and food intake and rest breaks are maintained in accordance with environmental and working conditions and the organisation's policy</p> <p>2.7 Assistance is given to crew members in danger while maintaining personal safety in accordance with the organisation's procedures</p> <p>3.1 Hazard controls are monitored to ensure continued effectiveness</p> <p>3.2 Changes in incident behaviour and conditions are reported immediately to supervisor</p> <p>3.3 Factors which may create or increase <i>risk</i> to life, property or the environment are identified, reported and controlled in so far as possible</p>
4. <b>Participate in the implementation of OH&amp;S in the workplace</b>	<p>4.1 OH&amp;S issues are raised with designated personnel in accordance with procedures and OH&amp;S legislation</p> <p>4.2 Contributions to OH&amp;S implementation in the workplace are made within organisation's procedures and scope of responsibilities and competencies</p> <p>4.3 Activities/debriefings are undertaken which <i>alleviate occupational stress</i></p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

#### Required Skills

identification of typical hazards in the workplace

use of protective clothing and equipment

#### Required Knowledge

Health and fitness requirements such as diet and nutrition, exercise, impact of smoking, alcohol and drugs on the body

## REQUIRED SKILLS AND KNOWLEDGE

Occupational hazards encountered in the workplace such as structural collapse, electricity, chemicals, dust, wildfires, extreme temperatures, biological, radiation, hazardous atmospheres, flammable and combustible liquids and gases and manual handling

Personal protection such as clothing and equipment requirements, survival in life threatening situations and health hazards

Signs of occupational stress, limiting stress, dealing with stress and seeking assistance

Signs of fatigue and dealing with fatigue

Methods of hazard control and reporting in accordance with the organisation's procedures

Procedures for participating in OH&S arrangements

## Evidence Guide

### EVIDENCE GUIDE

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

It is essential for this unit that competence be demonstrated in:

correct identification of hazards in the workplace  
 application of the organisation's procedures including the correct selection and use of PPE  
 advising and reporting of workplace hazards in accordance with the organisation's requirements  
 notification of risk to the team and supervisor in a timely manner

#### **Consistency in performance**

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

#### **Context of and specific resources for assessment**

#### **Context of assessment**

A combination of oral or written presentations, observations, on the job and/or in a range of simulated environments

## EVIDENCE GUIDE

<p><b>Guidance information for assessment</b></p>	<p><b>Specific resources for assessment</b></p> <p>Availability of appropriate protective clothing, equipment and organisational procedures</p> <p>Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.</p>
---	--

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<p><b>Workplaces may include</b></p>	<p>locations where activities and operations may occur such as structures, open spaces, water, public and private property, (including crown land), mobile property, confined spaces</p>
<p><b>Activities to alleviate occupational stress include</b></p>	<p>avoidance</p> <p>limiting exposure</p> <p>withdrawal</p> <p>defusion/debriefing</p> <p>counselling services</p> <p>referral to medical services or relevant government agencies</p>
<p><b>Hazards must include those associated with</b></p>	<p>urban, rural and aircraft fires</p> <p>training and simulation activities</p> <p>hazardous materials</p> <p>electricity</p>
<p><b>and may also include</b></p>	<p>prescribed burning activities</p> <p>vehicle and industrial rescue/extrication</p> <p>flood, storm and tempest rescues</p> <p>travelling in vehicles and</p>

**RANGE STATEMENT**

<b>The nature of the hazard must include</b>	travelling in aircraft
	<b>Incident</b>
	chemical spills such as those involving dangerous goods; vapours/poisonous gases/smoke; contaminated fire water; explosions/flammability; radioactivity; environmental
	contamination of air/land/water, appliances and equipment
	<b>Biological</b>
	biological such as infections, bites, stings, radiation
	<b>Personal</b>
	heat stress; dehydration
	psychological such as critical incident stress; shock, drownings
	<b>Environmental</b>
	fire and explosions; falling objects (trees, masonry, rocks etc.); subsidence; water load; structural collapse, radiant heat
	entrapment by fire in a vehicle or on foot
	chemical types
	heavy machinery
<b>and may also include</b>	confined space/structure
	aerial retardant drops
	broken terrain
<b>Risk control measures must include</b>	use of clothing and equipment to provide protection
	eye, sight, hearing protection
	appropriate training
	barriers
	vehicle protection hoses and devices
	survival techniques
	life support equipment/features
<b>and may also include</b>	spill clean up kits
	electrically insulated tools and equipment

**RANGE STATEMENT**

	<p>fire blankets/roll over protection</p> <p>goggles, face shield, hearing protection and chainsaw chaps</p> <p>adequate food, fluid and other welfare needs during extended operations</p>
<b>Personal protective clothing and equipment must include</b>	<p>Turnout uniform and gloves</p> <p>respiratory protection</p> <p>eye protection</p>
<b>and may also include</b>	<p>face shield</p> <p>chemical protective clothing</p> <p>personal lines</p> <p>personal distress units</p> <p>personal accessories kit</p> <p>chainsaw chaps</p>
<b>Life support equipment/features may include</b>	<p>radiation shielding</p> <p>vehicle cabins with/without sprays</p> <p>low water level indicators</p> <p>protective vests</p> <p>fire blankets</p> <p>first aid kit</p>
<b>Factors which must require evaluation and review include</b>	<p>available resources</p> <p>traffic and spectators</p> <p>wind strength/direction</p> <p>temperature and relative humidity</p> <p>fire development/behaviour</p> <p>structural and equipment integrity</p> <p>water supply/pressure</p> <p>vegetation type</p> <p>topographical features including slope, terrain and aspect</p>
<b>Contact with crew members and supervisors must</b>	<p>visual</p> <p>touch</p>

## **RANGE STATEMENT**

<b>include</b>	radio verbal
<b>and may also may include</b>	electronic and written
<b>Designated personnel must include</b>	other crew members/supervisors/OH&S representatives

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <b>Prepare to respond to fire</b>	1.1 The location of fire and the most effective route to the fire are obtained taking into account local conditions 1.2 <b>Protective clothing</b> and <b>equipment</b> , food and fluid requirements are identified and relevant preparations undertaken prior to departure
2. <b>Proceed to fire</b>	2.1 The location of the fire is confirmed on approach 2.2 Access to the area is gained with minimum injury to personnel or damage to vehicles, equipment or the environment 2.3 Evidence of fire cause is noted and brought to the attention of the supervisor
3. <b>Obtain and use extinguishing media and equipment</b>	3.1 Nominated media and equipment are located and obtained 3.2 Equipment is used to deliver the nominated media in accordance with the organisation's and manufacturer's procedures
4. <b>Combat wildfire</b>	4.1 Instructions are received, confirmed and implemented in accordance with the organisation's safe work practices and procedures 4.2 Equipment and <b>extinguishing media</b> used are appropriate to wildfire conditions 4.3 Control lines are prepared in accordance with the

ELEMENT	PERFORMANCE CRITERIA
5. <b>Observe and react to wildfire and weather conditions</b>	<p>organisation's procedures</p> <p>4.4 Equipment is positioned, made ready for use and protected from damage in accordance with the organisation's procedures</p> <p>4.5 Fire is attacked taking into account <i>wildfire hazards</i> as directed and in accordance with the organisation's procedures</p> <p>4.6 Evidence of fire cause and area of fire origin are protected</p> <p>4.7 Communication is maintained at all times in accordance with the organisation's procedures</p> <p>5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor</p> <p>5.2 <i>Weather</i> conditions and changes to fire behaviour are observed and reported to the supervisor</p> <p>5.3 Variations in terrain, <i>fuel</i> types and fuel arrangements are observed and the effect on fire behaviour is reported to the supervisor as required</p> <p>5.4 A safe escape route or refuge is identified and maintained at all times</p> <p>5.5 Communication is maintained with other <i>firefighting</i> personnel and the supervisor throughout operational activities</p>
6. <b>Participate in mop-up and patrol activities</b>	<p>6.1 Mopping-up activities are carried out under direction in accordance with the organisation's procedures</p> <p>6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with the organisation's procedures</p>
7. <b>Assist in ancillary operations</b>	<p>7.1 Activities to complement firefighting operations are carried out as directed and according to the organisation's procedure</p>
8. <b>Recover and store equipment</b>	<p>8.1 Equipment and consumables are recovered as directed</p> <p>8.2 Equipment is stored in accordance with the organisation's procedures</p> <p>8.3 Cleaning and maintenance are carried out in accordance with the organisation's procedures</p>

**ELEMENT**

**PERFORMANCE CRITERIA**

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

**Required Skills**

- use of wildfire control tools and equipment
- undertaking dry and wet wildfire attack
- detection of hot spots, stags, unsecured wildfire perimeter

**Required Knowledge**

- fire behaviour
- extinguishing media, water, foam, suppressants
- knapsack
- operating firefighting equipment
- responding to wildfire
- wildfire control tactics and techniques
- wildfire hazards, safety techniques
- fuel load, moisture content of fuel, topography, fireground signals
- organisation's operating procedures
- effects of wildfire on structures
- awareness of health and fitness requirements

**Evidence Guide**

**EVIDENCE GUIDE**

## EVIDENCE GUIDE

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

For this unit it is essential that competence be demonstrated by:

- reacting to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- participating in dry wildfire control
- use of extinguishing media in wildfire control
- maintaining health and safety of self, other workers and people in the immediate work area
- participating in mop-up and patrol
- undertaking operational activities safely

### Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

### Context of and specific resources for assessment

#### Context of assessment

A combination of oral or written presentation, observation on the job or in a simulated wildfire (grass, crop, scrub, forest) environment

#### Specific resources for assessment

- access to controlled or contained fires
- availability of wildfire control equipment

### Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

### Types of wildfire must include

ground, surface, crown

**RANGE STATEMENT**

<b>Types of fuel may include</b>	grass crop forest heath plantation scrub
<b>Fuel features must include</b>	type size arrangement/distribution quantity moisture content topography local fire conditions
<b>Weather factors must include</b>	variations to wind speed and direction relative humidity temperature atmospheric stability
<b>Wildfire extinguishing media must include</b>	water
<b>and may also include</b>	wetting agent Class A foam fire suppressants (short and long term) earth retardants
<b>Wildfire extinguishing equipment must include</b>	tanker hand tools hose and small gear pump
<b>and may also include</b>	aircraft ropes and lines knap sack

**RANGE STATEMENT****Types of firefighting strategies must include**

chainsaw  
 offensive strategy  
 defensive strategy  
 flank attack  
 combined strategy  
 direct attack  
 parallel attack  
 indirect attack  
 combination attack

**Wildfire hazards must include**

heat related illness  
 fatigue  
 smoke inhalation  
 burns  
 sprain or fracture  
 snake or insect bite  
 falling branches/trees  
 manual handling  
 trips/falls  
 disorientation  
 environmental  
 lack of visibility  
 water bombing operations

**Variations in topography must include**

elevation  
 slope  
 aspect  
 landscape features

**Access may be gained by**

vehicle  
 aircraft  
 boat  
 foot

**Information about access**

radio/phone

**RANGE STATEMENT**

<b>must be received by</b>	personal contact
<b>and may also include</b>	map reference
<b>Personal protective clothing and equipment must include</b>	turnout uniform and gloves eye protection hearing protection respiratory protection
<b>and may also include</b>	protective hoods accessories as per organisational standards
<b>Ancillary activities may include</b>	provision/transportation of food, water and equipment for an incident working with earth moving equipment such as bulldozer, grader, tractor with blade

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. **Receive and report details of wildfire**

- 1.1 Details of the fire's location and development of the fire are received and recorded
- 1.2 Fire details are reported in accordance with the organisation's procedures

2. **Prepare to respond to fire**

- 2.1 The location of and access to the *wildfire* are confirmed and the most effective route is ascertained
- 2.2 Required organisational *equipment*, protective clothing, apparel, food and water required are assessed and procured before departure
- 2.3 The most appropriate method of transport to the wildfire is selected and used

3. **Proceed to fire**

- 3.1 The location of the wildfire is confirmed from observation or by direction while on approach
- 3.2 Access to area is determined and achieved with minimum injury to personnel or damage to vehicles, equipment or environmentally sensitive areas
- 3.3 The safety of people in the wildfire area is assessed and monitored
- 3.4 Evidence of the wildfire cause is noted and brought to the attention of the appropriate authority
- 3.5 *Navigational* tools are used for planning and

**ELEMENT****PERFORMANCE CRITERIA****4. Protect people**

operational purposes

- 4.1 As far as conditions allow, the number and location of people in the threatened area is determined
- 4.2 Appropriate evacuation or non-evacuation protocols are identified and applied or advised to persons in the path of a wildfire
- 4.3 **Access** to hazardous locations is controlled
- 4.4 The safe defensibility of property is evaluated and assistance is provided to help occupiers
- 4.5 Advice and support is provided to occupiers in helping them safely defend their property
- 4.6 The safety of people in the threatened area is monitored during the course of the fire
- 4.7 The safety of people in the area is checked and confirmed after the passing of the fire

**5. Combat wildfire**

- 5.1 **Media** and equipment are selected and used to allow wildfire control operations to be conducted effectively and safely in accordance with the organisation's procedures and OH&S procedures
- 5.2 The most suitable location from which to use equipment to commence wildfire control operations is selected
- 5.3 Access to the selected area of operations is gained in the safest and most effective manner
- 5.4 Fire **hazards** are identified and action taken to minimise the risk of injury to the public, personnel and self
- 5.5 Fire control strategies and tactics are employed to achieve the objectives in accordance with the organisation's procedures
- 5.6 Fire control activities undertaken minimise overall damage and impact on the environment
- 5.7 Potential **fire behaviour** is considered and acted upon to ensure safety and achievement of objective
- 5.8 Fuel, **weather** and **topographical factors** are observed and potential fire behaviour anticipated
- 5.9 The effectiveness of tactics employed is reported to the supervisor
- 5.10 Area of origin and evidence of fire cause is protected and brought to attention of

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<b>6. Conduct mop-up and patrol activities</b>	<p>supervisor or relevant authority</p> <p>5.11 Safe egress and/or refuge from the fire is identified and communicated to personnel</p> <p>6.1 Mop-up and patrol activities are carried out effectively and safely to the distance determined by the Incident Controller</p> <p>6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with the organisation's procedures and guidelines</p>
<b>7. Recover and maintain equipment</b>	<p>7.1 Equipment is made up and made ready for operational use in accordance with the organisation's procedures</p> <p>7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with the organisation's procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

#### Required Skills

wildfire control and suppression; back burning; use of wildfire control tools and equipment

map reading and interpretation

detection of hot spots, stags,

unsecured wildfire perimeter,

mop-up activities

#### Required Knowledge

Firefighting Protocols

organisation policy; direct, indirect, parallel attack; wet, dry firefighting; backburning (ground, aerial); control lines and firebreaks; defensive firefighting tactics

Fire attack procedures

standard operating procedures; reporting; patrol; mop-up; briefings/instructions;

## REQUIRED SKILLS AND KNOWLEDGE

identification of cause

Safety

organisation first-aid requirements; fireground hazards; procedures for dealing with injury; safety near vehicles and machines; briefings; team work

Fuel and its impact on fire behaviour

moisture content, quantity, type, arrangement and distribution, size, drought effects, curing

Fire behaviour

rate of spread, flame height and intensity, spotting, fire development, junction zones

Topography and its impact on fire behaviour

slope, aspect, physical features, turbulence

Weather factors which impact on fire behaviour

wind direction and speed

wind changes

temperature

relative humidity

atmospheric stability

## Evidence Guide

### EVIDENCE GUIDE

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

For this unit it is essential that competence be demonstrated by:

anticipating and reacting to changing wildfire behaviour

observing and reacting to weather behaviour

undertaking dry wildfire control activity

use of extinguishing media

maintaining health and safety of self, other workers and people in the wildfire area

completing mop-up and patrol

## EVIDENCE GUIDE

	reading maps and navigation
	<p><b>Consistency in performance</b></p> <p>Evidence should be gathered over a period of time in a range of actual or simulated workplace environments</p>
<b>Context of and specific resources for assessment</b>	<p><b>Context of assessment</b></p> <p>A combination of oral or written presentation, observation, on the job and/or in a range of simulated environments</p> <p><b>Specific resources for assessment</b></p> <p>access to controlled fires</p> <p>availability of wildfire control equipment</p>
<b>Guidance information for assessment</b>	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<b>Types of wildfire must include</b>	ground surface and crown fire
<b>Fuel types may include</b>	grass crop forest plantation heath
<b>Fuel features which will impact on fire development must include</b>	type size arrangement/distribution

**RANGE STATEMENT**

	quantity
	seasonal effects
	effects of drought
	moisture content
<b>Wildfire extinguishing media must include</b>	water
<b>and may also include</b>	wetting agents
	Class A foam
	fire suppressants (short and long term)/earth retardants
<b>Wildfire extinguishing equipment must include</b>	tanker
	hand tool
	hose and small gear
	pump
<b>and may also include</b>	aircraft
	ropes and lines
	knap sack
	chainsaw
<b>Types of firefighting strategies must include</b>	offensive strategy
	defensive strategy
	combined strategy
	direct attack
	parallel attack
	indirect attack
	flank attack
	combination attack
	reconnaissance
	mop-up
	patrol
<b>Access methods may include by</b>	vehicle
	aircraft

**RANGE STATEMENT**

	boat
	foot
<b>Topographic factors which may impact on fire development must include</b>	elevation
	slope
	wind turbulence
	local wind effects
	botanical effects
	aspect
<b>Weather factors which may impact on fire development must include</b>	wind direction and speed
	wind changes
	temperature
	relative humidity
	atmospheric stability
	cold fronts
	local effects
	adiabatic winds
	katabatic winds
	sea breezes
	land breezes
<b>Personal protective clothing and equipment must include</b>	turnout uniform and gloves
	eye protection
	hearing protection
	respiratory protection
<b>and may also include</b>	protective hoods
	accessories as per organisational standards
<b>Ancillary activities may include</b>	provision and transport of food, water, fuel and equipment of an incident
	aircraft operations
	working with earthmoving equipment
<b>Navigational aids must include</b>	maps
	compass

**RANGE STATEMENT****and may also include**

geographical information systems  
 global positioning satellites  
 aerial photographs

**Wildfire hazards must include**

heat-related illness (heat exhaustion and dehydration)  
 fatigue  
 smoke inhalation  
 burns  
 sprain or fracture  
 trips/falls  
 snake or insect bite  
 lack of visibility  
 falling branches and trees  
 rolling objects  
 falling objects  
 manual handling  
 disorientation  
 water bombing operation  
 environmental

**Fire behaviour is evidenced by**

rate of spread  
 flame height and intensity  
 spotting  
 fire development  
 terrain, topography  
 fuel load and arrangement  
 weather conditions - winds, fire whirls

**Employability Skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. <b>Identify target areas and burn objectives</b>	1.1 Areas requiring prescribed burning are identified in accordance with the organisation's procedures 1.2 Burn objectives are developed in accordance with the organisation's procedures
2. <b>Prepare plans for prescribed burning</b>	2.1 Strategies and tactics which are suitable for the location and will meet objectives, are nominated in accordance with organisational procedures and programs 2.2 Consultation with other <i>interested parties</i> , during the planning process, is conducted in accordance with organisational procedures 2.3 Proposed strategies and tactics take into account the safety of persons and <i>protection of property, assets</i> and the <i>environment</i> 2.4 Resources required and conditions for implementation of the strategies and tactics, are specified in accordance with organisational procedures
3. <b>Monitor implementation of prescribed burning plans</b>	3.1 Progress of plan implementation is monitored for compliance with organisational requirements 3.2 Prescribed burning activities are recorded in accordance with organisational procedures 3.3 <i>Incidents</i> are reported and investigated in accordance with organisational procedures

## ELEMENT

## PERFORMANCE CRITERIA

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

#### Required Skills

community consultation and liaison  
recommending actions to be taken, communicating with others  
preparation of plans  
map reading  
measuring quantities, calculating areas

#### Required Knowledge

wildfire hazards  
prescribed burning strategies  
wildfire behaviour  
organisational procedures and programs  
legislation relevant to wildfire hazard reduction  
effects of fire on vegetation, fauna and fuel accumulation  
effects of fire on areas and places of cultural significance

### Evidence Guide

#### EVIDENCE GUIDE

**Critical aspects for  
assessment and evidence  
required to demonstrate**

It is essential for this unit that competence be demonstrated by:

## EVIDENCE GUIDE

### competency in this unit

identifying wildfire hazards  
 developing objectives  
 meeting objectives for burn strategies and tactics  
 minimising environmental impact  
 recognising and consulting interested parties

### Consistency in performance

competency demonstrated over a period of time within the range of variables

### Context of and specific resources for assessment

#### Context of assessment

on the job and/or  
 indirect evidence in the form of documentation, and/or  
 discussion with the applicant and nominated referees  
 simulated situations

#### Specific resources for assessment

travel to remote locations may be necessary

### Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

### Hazards may include

flammable vegetation  
 flammable hazardous materials  
 adjoining land use, proximity to urban areas

### Actions may include

assist in community protection  
 hazard reduction  
 vegetation management

**RANGE STATEMENT**

	<ul style="list-style-type: none"> <li>habitat management</li> <li>management of cultural sites</li> </ul>
<b>Interested parties may include</b>	<ul style="list-style-type: none"> <li>government organisations including local, state and federal</li> <li>adjacent land owners and/or managers</li> <li>community groups with specific interests</li> </ul>

Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1. Prepare to burn

- 1.1 Burn plan is identified in accordance with the organisational procedures and legislative requirements
- 1.2 A *contingency plan* is developed based on *local conditions at the time of burn* and communicated to all personnel
- 1.3 Permits are obtained in accordance with organisational procedures
- 1.4 Burn *notifications* are issued in accordance with organisational procedures
- 1.5 Resource requirements are identified
- 1.6 Control lines are specified and prepared in accordance with organisational procedures
- 1.7 *Assets* are *protected* in accordance with organisational procedures
- 1.8 *Weather conditions* are *monitored*

#### 2. Conduct burn

- 2.1 *Resources* are gathered and deployed
- 2.2 Day of burn notifications are issued
- 2.3 Pre burn checks are conducted
- 2.4 *Lighting* is conducted in accordance with plan or organisational procedures
- 2.5 *Burning* is monitored and operational changes are made as required

ELEMENT	PERFORMANCE CRITERIA
3. <b>Conduct post burn activities</b>	2.6 Records are kept in accordance with organisational procedures 2.7 Burn operations are concluded 3.1 Outcomes of the burn are assessed and reported 3.2 Variations from the burn plan are reported in accordance with organisational procedures 3.3 <b>Restoration and rehabilitation</b> is carried out in accordance with organisational requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

#### Required Skills

developing a prescribed burn  
 conducting high and low intensity prescribed burns  
 establishing control lines for prescribed burns  
 developing a contingency plan  
 monitoring the burn  
 undertaking patrol activities

#### Required Knowledge

legislative, organisational policy and procedures for conducting a prescribed burn  
 types of prescribed burns  
 seasonal restrictions on prescribed burns  
 authorisations required for conducting a burn  
 high and low intensity prescribed burns  
 ignition patterns and techniques  
 developing a prescription  
 resource requirements  
 procedures for monitoring prescribed burns and securing burn area

## REQUIRED SKILLS AND KNOWLEDGE

### Evidence Guide

#### EVIDENCE GUIDE

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

It is essential for this unit that competence is demonstrated in:

- the preparation of burn plans for a designated area
- the effective conduct of a burn, utilising the appropriate resources and record action taken
- follow up activities once the burn is completed

#### **Consistency in performance**

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

#### **Context of and specific resources for assessment**

#### **Context of assessment**

Evidence of competence may be demonstrated on the job and/or in a simulated environment

#### **Specific resources for assessment**

Access to a range of controlled or simulated fires  
lighting equipment

#### **Guidance information for assessment**

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

### Range Statement

#### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

1. **Secure and preserve scene**

1.1 Initial *assessment* is participated in to identify *factors which will impact* on public safety and scene preservation

1.2 *Incident/accident scene* is effectively secured to *preserve the scene* and maintain public safety in line with legislative requirements

2. **Record and report details of incident scene**

2.1 *Details of the scene* are noted, *recorded and reported* according to organisation's policies and procedures

2.2 *Witness details* and information volunteered are recorded in accordance with *organisational and legislative requirements*

2.3 Information is communicated to *relevant personnel* in line with organisation's procedures

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

#### Required Skills

- listening
- note taking
- observation
- questioning
- reporting

#### Required Knowledge

- legislative and organisation requirements relating to scene preservation
- methods of securing scene
- organisation requirements for taking witness details and information
- regulatory requirements for taking witness details and information
- techniques for estimating distance
- techniques for removing public from scene
- types of information which may assist in investigations

## Evidence Guide

### EVIDENCE GUIDE

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation's policies and procedures

#### Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

**Context of and specific resources for assessment**

#### Context of assessment

Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence

## EVIDENCE GUIDE

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1. Prepare for the brief/debrief

- 1.1 A ***briefing***/debriefing is planned and prepared in accordance with organisation's policy and procedures
- 1.2 ***Relevant personnel*** involved in the activity are identified and informed of debriefing requirements
- 1.3 Briefing/***debriefing*** meeting is scheduled as soon as possible following the incident
- 1.4 An appropriate location for the brief/debrief is selected
- 1.5 Appropriate incident information is collected

#### 2. Conduct the brief/debrief

- 2.1 Purpose and structure of the brief/debrief is outlined to incident personnel
- 2.2 Discussion, analyses and evaluation by personnel of their anticipated or actual roles in the activity are encouraged
- 2.3 Contributions from personnel during the brief/debrief are continually sought, encouraged and valued
- 2.4 Review of the activity against the policies, practices and training of the organisation is undertaken to identify any discrepancies
- 2.5 Brief/debrief is conducted in accordance with the organisation's policies and procedures

#### 3. Conclude the brief/debrief

- 3.1 Contributions of personnel are acknowledged in a positive way
- 3.2 ***Brief/debrief follow-up actions*** are identified

**ELEMENT****PERFORMANCE CRITERIA**

- and acted upon in a timely manner
- 3.3 Brief/debrief findings are summarised and recorded if appropriate in a format suitable for **subsequent action** by the appropriate personnel
- 3.4 **Reports** are prepared for presentation to appropriate personnel as required

**Required Skills and Knowledge****REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

**Required Skills**

- communicate clearly in a group setting
- manage group processes
- prepare a briefing/debriefing plan
- provide feedback and encourage contributions from group members

**Required Knowledge**

- organisation's policies
- organisation's procedures for activity debriefing
- practices and training processes in relation to activity

**Evidence Guide****EVIDENCE GUIDE**

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

It is essential for this unit that competence be demonstrated in ability to communicate effectively with personnel and elicit and encourage contributions to the briefing/debriefing in a constructive and positive way

## EVIDENCE GUIDE

## PUAOPE005B Manage a multi team response

### Modification History

Not applicable.

### Unit Descriptor

#### Unit Descriptor

This unit covers the competency to manage a multi team response to incidents which may be time critical and/or potentially threatening to life, property or the environment.

### Application of the Unit

#### Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

#### Prerequisite Unit/s

PUAOPE001B Supervise response (Fire specific)

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

### Elements and Performance Criteria

#### ELEMENT

#### PERFORMANCE CRITERIA

#### 1. Conduct an assessment of incident

- 1.1 A risk assessment of all factors impacting upon the response is conducted
- 1.2 An initial assessment of *resources* required is conducted
- 1.3 Resources required to deal with the incident are identified
- 1.4 *Constraints* which may impede the response are identified
- 1.5 *Initial response options* are identified and assessed

#### 2. Establish control and command

- 2.1 Control is assumed in accordance with the organisation's policies and procedures
- 2.2 *Communication systems* are activated in accordance with organisation's policies and procedures
- 2.3 Reporting processes are activated in accordance with organisational policies and procedures to provide continuous monitoring and evaluation of incident
- 2.4 *Command and control facilities* are established

#### 3. Develop operational plan

- 3.1 *Operational plan* is developed and adjusted if required in accordance with response requirements and operational guidelines

ELEMENT	PERFORMANCE CRITERIA
4. <b>Implement operational plan</b>	<p>3.2 Response strategies are identified</p> <p>3.3 Tactics to effectively manage the incident are identified in accordance with the operational plan</p> <p>3.4 Tasks are determined and prioritised</p> <p>4.1 Operational plan is communicated to teams in accordance with the organisation's guidelines</p> <p>4.2 Resources are deployed to ensure that the operational plan is implemented in accordance with organisation guidelines</p> <p>4.3 Operations are conducted and monitored in accordance with the operational plan</p> <p>4.4 Operational reports are issued in accordance with <i>policy and procedures</i></p> <p>4.5 Operations are modified as required by the situation</p> <p>4.6 Resources are requested, acquired and deployed</p>
5. <b>Manage post incident operations</b>	<p>5.1 Resources are accounted for and demobilised in accordance with organisational policies and procedures</p> <p>5.2 Post operational <i>documentation</i> is completed to organisational requirements</p> <p>5.3 Post incident recovery is initiated in accordance with the organisation's policies and procedures</p> <p>5.4 Effectiveness of operations is evaluated and documented</p> <p>5.5 Debriefing conducted in accordance with organisational guidelines</p> <p>5.6 Recommendations are made for changes in policies and procedures</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

#### Required Skills

- accessing information and support from the control facility

## REQUIRED SKILLS AND KNOWLEDGE

- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
  - electronic data exchange systems etc.
  - equipment and consumables
  - identification and correct use of equipment
  - materials
  - other organisations
  - personnel
  - personnel and external authorities
  - processes and procedures
  - radio frequency devices
  - team and personnel management
  - team dynamics
- use of a range of information technology devices including computers
- using tools and techniques to solve problems

### Required Knowledge

- codes of practice or other legislative requirements
- current principles and practices in response activities
- display of the following knowledge and skills in terms of job role or function:
  - emergency management plans
  - emergency site layout
  - focus of operation of work systems and equipment
  - legislation
  - organisational command structure
  - relevant agreements
  - roles and responsibilities of all organisations
  - security and confidentiality of material

## Evidence Guide

### EVIDENCE GUIDE

#### Critical aspects for assessment and evidence required to demonstrate

It is essential for this unit that competence be demonstrated in assessment of incident both functionally and strategically; development of a plan

## EVIDENCE GUIDE

### competency in this unit

and implementation of response in accordance with the organisation's policies and procedures.

Strategic reaction to changes within the emergency environment

### Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

### Context of and specific resources for assessment

#### Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment

#### Specific resources for assessment

Resources should involve access to, or simulation of, emergency situations in a multi-team response environment.

This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control

### Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

## Range Statement

### RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

### Initial response options will be determined by

the availability of resources and estimated outcome  
organisational guidelines  
regulatory authorities  
legislative requirements

### Risks to life and property

fire

**RANGE STATEMENT****may include**

flood  
 hazardous materials  
 landslip  
 severe storm  
 biological agents  
 fauna rescue

**Transport may include**

on road  
 off road  
 aviation  
 maritime  
 rail

**Command facility may include**

field facility such as an existing airfield helipads or established operations centre

**En route hazards may include**

traffic  
 prevailing weather  
 road conditions  
 terrain  
 debris  
 plumes  
 animals  
 atmospheric hazards  
 tidal conditions  
 restricted areas  
 wires/masts/aerials  
 other aircraft  
 interference communications

**Hazardous conditions may include**

adverse weather  
 after dark operations  
 difficult terrain  
 dangerous goods and substances  
 time pressure

**RANGE STATEMENT**

<b>Incident assessment may include</b>	<ul style="list-style-type: none"> <li>visibility</li> <li>type of incident</li> <li>risk to life</li> <li>property and environment</li> <li>hazards</li> <li>capability of assigned personnel</li> <li>adequacy of allocated equipment</li> <li>information gathered from existing plans/databases</li> <li>forecasts</li> <li>meteorological profiles</li> </ul>
<b>Communications systems may include</b>	<ul style="list-style-type: none"> <li>radio</li> <li>telephone</li> <li>computer</li> <li>facsimile</li> <li>pager</li> <li>mobile data terminal</li> <li>satellite</li> <li>signalling</li> <li>signage</li> <li>warnings</li> </ul>
<b>Incidents may include</b>	<ul style="list-style-type: none"> <li>life threatening situations</li> <li>protection of property and the environment</li> </ul>
<b>Constraints may include</b>	<ul style="list-style-type: none"> <li>legislative</li> <li>resources</li> <li>time</li> <li>prevailing weather</li> <li>restrictions on duration of work or the conditions under which personnel may be employed</li> <li>constraints on road closure</li> <li>redirection of water course</li> <li>military areas</li> </ul>

## RANGE STATEMENT

	Aboriginal and Torres Strait Islander sacred sites
	other areas of environmental and cultural significance
	seasonal factors
	wilderness areas
	hazardous areas
	other areas requiring permission and/or authorisation to enter
	existing emergency management plans
	financial
<b>Documentation and reporting requirements may include</b>	input to debriefs
	completion of logs
	sitreps
	journal records
	assessment of safety procedures utilised
	financial statements
	post-operational report
<b>Resources may include</b>	human -
	<ul style="list-style-type: none"><li>• operations personnel</li><li>• volunteers</li><li>• support personnel</li></ul>
	local, federal and state/territory governments
	physical - equipment
	machinery
	vehicles
	technology devices
	communication devices
	equipment characteristics
	support services
	amenities
	parking
	safety equipment
	aircraft

**RANGE STATEMENT****Command facility establishment procedures and principles may include**

personnel  
 specialised personnel such as aviation authorities  
 equipment  
 material  
 proximity to incident  
 size and type of structure  
 special incident requirements  
 communication modes  
 topography  
 environment  
 climatic conditions  
 logistical operations  
 site access and exit requirements  
 security arrangements

**Monitoring of operations may include**

progress against plan  
 welfare of personnel  
 utilisation of resources and potential of incident

**Organisational policy, procedures, requirements and guidelines may vary between sectors and organisations and may include**

legislation relevant to the operation/incident/response  
 legislation relevant to the organisation  
 operational  
 corporate and strategic plans  
 operational procedures  
 operational performance standards  
 organisational personnel practices and guidelines  
 organisational quality standards  
 Civil Aviation Orders  
 search and rescue time  
 procedures/action

**Operational plan may include**

aims and objectives of the response/incident/operation  
 possible strategies to achieve objectives  
 possible tactics to implement strategies

## RANGE STATEMENT

<b>Operational plan may include</b>	resources required including their availability limitations contingencies and alternatives monitoring and evaluative procedures reporting requirements pre-plans flight plans consideration or aircraft type performance and suitability document (formal or informal) part of an overall plan cover one or more place area or region
-------------------------------------	---

## Unit Sector(s)

Not applicable.

## Corequisite Unit/s

Co-requisite Unit/s Nil

## RIIMPO304B Conduct wheel loader operations

### Modification History

Not applicable.

### Unit Descriptor

This unit covers the conducting of wheel loader operations in mining and extractive industries. It includes planning and preparing for operations, operating the loader, and carrying out post-operational procedures.

### Application of the Unit

Wheel loaders are self-propelled wheeled machines with an integral front-mounted bucket-supporting structure and linkage. It loads or excavates through forward motion of the machine, and lifts, transports and discharges material. This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Coal mining
- Extractive industries
- Metalliferous mining

### Licensing/Regulatory Information

Refer to Unit Descriptor.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for operations	1.1. Access, interpret and apply <b><i>compliance documentation</i></b> relevant to conducting wheel loader operations 1.2. Obtain, interpret and apply <b><i>work requirements and procedures</i></b> for the satisfactory completion of the allocated job 1.3. Access, interpret and apply <b><i>geological and survey data</i></b> required to complete the allocated job 1.4. <b><i>Inspect</i></b> and <b><i>prepare work area</i></b> in coordination with others 1.5. Identify, manage and report <b><i>potential hazards and risks</i></b> 1.6. Resolve <b><i>coordination requirements</i></b> with others at the site prior to commencing and during work activities 1.7. Select and wear <b><i>personal protective equipment</i></b> appropriate for work activities
2. Operate the loader	2.1. Carry out <b><i>pre-start, start-up, park-up and shutdown procedures</i></b> 2.2. Select and modify the <b><i>operating technique</i></b> to appropriately meet <b><i>changing work conditions</i></b> 2.3. Conduct, control and monitor operations within the equipment limitations 2.4. Act on or report <b><i>monitoring systems and alarms</i></b> 2.5. Recognise and respond to <b><i>hazardous and emergency situations</i></b> 2.6. Complete work in accordance with the agreed work requirements and within the operating capacity of the allocated equipment
3. Carry out post-operational procedures	3.1. Inspect, fault find and report faults 3.2. Carry out routine <b><i>operator servicing, maintenance and housekeeping tasks</i></b> 3.3. Maintain and process <b><i>records and reports</i></b>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct wheel loader operations:

- apply legislative, organisation and site requirements and procedures
- apply operational safety requirements
- apply environmental requirements
- apply environmentally sensitive fluids and materials disposal requirements and procedures
- apply chemical and fuel safety measures
- apply hazardous goods handling techniques
- apply manual lifting techniques
- work wearing personal protective equipment
- access, interpret and apply technical information
- interpret plans, reports, maps, specifications
- apply hand-eye coordination
- apply equipment operating techniques
- apply work tasks organising techniques
- work in a team
- apply equipment records maintenance requirements
- apply diagnostic techniques
- use relevant hand tools

### Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following as required to conduct wheel loader operations:

- site risk control procedures
- hazard identification and response procedures
- hazardous substances handling techniques
- site personal protective equipment requirements
- site and equipment health and safety procedures
- site environmental and heritage requirements and constraints
- site quality requirements

- site communication procedures
- site product characteristics
- site geological and survey data
- site operational procedures
- pre-start, start-up, operating and shutdown procedures and techniques
- machine characteristics, technical capability and limitations
- machine operational procedures
- isolation procedures
- maintenance systems and procedures
- site record keeping requirements

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> <li>• knowledge of the requirements, procedures and instructions for conducting wheel loader operations</li> <li>• implementation of requirements, procedures and techniques for the safe, effective and efficient completion of wheel loader operations</li> <li>• working with others to undertake and complete wheel loader operations that meet all of the required outcomes</li> <li>• consistent timely completion of wheel loader operations that safely, effectively and efficiently meets the required outcomes</li> </ul>
<b>Context of and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of</li> </ul>

	<p>workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</p> <ul style="list-style-type: none"> <li>• The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</li> <li>• Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.</li> <li>• Aboriginal people and other people from a non English speaking background may have second language issues.</li> <li>• Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.</li> <li>• Where applicable, physical resources should include equipment modified for people with disabilities.</li> <li>• Access must be provided to appropriate learning and/or assessment support when required.</li> </ul>
<p><b>Method of assessment</b></p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidate's required knowledge</li> <li>• observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes</li> <li>• consistently achieving the required outcomes</li> </ul> </li> <li>• first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• working with others to undertake and complete wheel loader operations</li> </ul> </li> </ul>

<b>Guidance information for assessment</b>	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.
--	--

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b>Relevant compliance documentation</b> may include:</p>	<ul style="list-style-type: none"> <li>• legislative, organisation and site requirements and procedures</li> <li>• manufacturer's guidelines and specifications</li> <li>• Australian standards</li> <li>• codes of practice</li> <li>• Employment and Workplace Relations legislation</li> <li>• Equal Employment Opportunity and Disability Discrimination legislation</li> </ul>
<p><b>Work requirements and procedures</b> may come from briefings, handovers, and work orders and may be written or verbal, formal or informal, depending on the complexity of the process and may include:</p>	<ul style="list-style-type: none"> <li>• product identification</li> <li>• nature and scope of tasks</li> <li>• achievement targets</li> <li>• operational conditions</li> <li>• obtaining permits required</li> <li>• site layout</li> <li>• out of bounds areas</li> <li>• worksite inspection requirements</li> <li>• lighting conditions</li> <li>• plant or equipment defects</li> <li>• hazards and potential hazards</li> <li>• coordination requirements or issues</li> <li>• contamination control requirements</li> <li>• environmental control requirements</li> <li>• barricade and signage requirements</li> </ul>
<p><b>Geological data</b> may include relevant site-specific information in relation to:</p>	<ul style="list-style-type: none"> <li>• rock type and characteristics</li> <li>• faults and joints</li> <li>• broken ground</li> <li>• water tables or other water sources</li> </ul>

	<ul style="list-style-type: none"> <li>• wet and dry areas</li> <li>• degree of compaction</li> </ul>
<b>Survey data</b> may include relevant site-specific information in relation to:	<ul style="list-style-type: none"> <li>• floor heights</li> <li>• bench heights and widths</li> <li>• ramp and floor grades</li> <li>• underground workings and voids</li> </ul>
<b>Inspect and prepare work area</b> may include:	<ul style="list-style-type: none"> <li>• identification of hazards</li> <li>• selection and implementation of control measures for the hazards identified</li> <li>• safeguarding site and non-site personnel by: <ul style="list-style-type: none"> <li>• erection of barricades and posting of signs</li> <li>• selection of appropriate equipment to ensure personnel safety and protection</li> </ul> </li> <li>• determination of appropriate path of movement for loads and equipment/vehicles</li> <li>• floor clean up to specified levels and grade requirements</li> <li>• selection and implementation of environmental control measures</li> </ul>
<b>Potential hazards and risks</b> may include:	<ul style="list-style-type: none"> <li>• installed services</li> <li>• damaged or defective pressurise hoses and fastenings</li> <li>• abandoned equipment</li> <li>• adjoining pit walls or structures</li> <li>• adverse weather conditions (electrical storms, floods, fires)</li> <li>• chemicals</li> <li>• contaminants</li> <li>• ancillary equipment</li> <li>• fences</li> <li>• holes and pot holes</li> <li>• over-hanging rocks</li> <li>• personnel</li> <li>• unsafe ground</li> <li>• unstable faces</li> <li>• vehicles</li> <li>• powerlines</li> <li>• dust and noise</li> <li>• conveyors</li> <li>• overhead services</li> <li>• stored energy which may include: <ul style="list-style-type: none"> <li>• engine components</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• radiators and cooling systems</li> <li>• hydraulic tanks and reservoirs</li> <li>• air tanks and reservoirs</li> <li>• hydraulic hoses</li> <li>• air hoses</li> <li>• tyres</li> <li>• air conditioning components</li> <li>• electrical components</li> <li>• braking systems</li> <li>• centrifugal forces</li> </ul>
<b>Coordination requirements</b> may include with:	<ul style="list-style-type: none"> <li>• other mobile plant operators</li> <li>• processing plant operators</li> <li>• maintenance personnel</li> <li>• water truck operators</li> <li>• service vehicle operators</li> <li>• crane and float operators</li> <li>• contractors</li> <li>• inspectors</li> <li>• supervisors</li> <li>• visitors</li> </ul>
<b>Personal protective equipment</b> includes:	<ul style="list-style-type: none"> <li>• steel-capped boots and hardhat</li> <li>• gloves</li> <li>• dust mask</li> <li>• eye and hearing protection</li> <li>• general protective and reflective clothing</li> </ul>
<b>Pre-start and start-up procedure</b> may include:	<ul style="list-style-type: none"> <li>• external check of the machine</li> <li>• inspection of attachments to ensure security and identify defects</li> <li>• selection, removing and fitting of attachments</li> <li>• checking of fluid levels (windscreen washer tank, hydraulic oil, coolant, grease, water, engine oil, fuel)</li> <li>• carry out lubrication</li> <li>• checking of display instrumentation and gauges (indicators, gauges, laser levels), computer systems</li> <li>• inspection of air filter restriction indicator</li> <li>• inspection and checking of cab (horn, lights, air conditioner)</li> <li>• testing of engine and stop engine lights</li> <li>• testing visual and audio warning devices and lights</li> </ul>

	<ul style="list-style-type: none"> <li>• checking instruments and control lever</li> <li>• reporting of defects and damage</li> </ul>
<b>Park-up and shutdown procedure</b> may include:	<ul style="list-style-type: none"> <li>• secure equipment as required by site procedures</li> <li>• render attachments safe</li> <li>• clear access ways</li> </ul>
<b>Operating techniques</b> may include:	<ul style="list-style-type: none"> <li>• manoeuvring</li> <li>• braking</li> <li>• bucket loading</li> <li>• single sided loading</li> <li>• double sided loading</li> <li>• drive by loading</li> <li>• load carrying</li> <li>• haulage vehicle positioning</li> <li>• load discharge</li> <li>• building and maintaining stockpiles</li> <li>• blending materials</li> <li>• attaching, securing, lifting, carrying and placing materials</li> <li>• driving machines on to floats</li> <li>• towing</li> <li>• observing site speed limits</li> <li>• working safely around: <ul style="list-style-type: none"> <li>• overhead powerlines</li> <li>• other machines and personnel</li> <li>• live stockpiles</li> </ul> </li> </ul>
<b>Changing work conditions</b> may include variations in:	<ul style="list-style-type: none"> <li>• bulk material grades</li> <li>• height of stockpiles</li> <li>• materials</li> <li>• contamination</li> <li>• haulage units</li> <li>• materials handling facilities</li> <li>• weather conditions</li> <li>• light conditions (including day and night)</li> </ul>
<b>Monitoring systems and alarms</b> may include:	<ul style="list-style-type: none"> <li>• brake air pressure</li> <li>• brake oil temperature</li> <li>• computer indicators</li> <li>• engine oil pressure</li> <li>• fuel filter</li> <li>• parking brake</li> <li>• retarder</li> </ul>

	<ul style="list-style-type: none"> <li>• service meter</li> <li>• speedometer/odometer</li> <li>• steering filters</li> <li>• tachometer</li> <li>• torque converter</li> <li>• oil temperature</li> <li>• transmission filter</li> <li>• voltmeter</li> <li>• water temperature</li> </ul>
<b>Hazardous and emergency situations</b> may include:	<ul style="list-style-type: none"> <li>• powerlines and other overhead services</li> <li>• dust and noise</li> <li>• face overhangs</li> <li>• lighting strikes (potential tyre explosion)</li> <li>• tyre fires (isolation procedures)</li> </ul>
<b>Operator service, maintenance and housekeeping</b> tasks are those established and authorised for the site and may include:	<ul style="list-style-type: none"> <li>• cleaning</li> <li>• authorised servicing and the monitoring</li> <li>• recording and reporting of faults</li> <li>• conduct of authorised minor replacements</li> <li>• provision of assistance to maintenance personnel during maintenance and repair activities</li> </ul>
<b>Records and reports</b> may include:	<ul style="list-style-type: none"> <li>• fuel usage</li> <li>• computer readings</li> <li>• end of shift documentation</li> <li>• supplies logs</li> <li>• work logs stockpile information</li> <li>• quality information</li> <li>• despatch details</li> </ul>

## Unit Sector(s)

Mobile Plant Operations

## Competency field

Refer to Unit Sector(s).

## Co-requisite units

Not applicable.

# RIIMPO318B Conduct civil construction skid steer loader operations

## Modification History

Not applicable.

## Unit Descriptor

This unit covers conducting skid steer loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating skid steer loaders; lifting, carrying and placing materials; selecting, removing and fitting attachments; relocating the skid steer loaders; carrying out machine operator maintenance; and cleaning up.

## Application of the Unit

This unit is appropriate for those working in operational roles, at worksites within:

- Civil construction

## Licensing/Regulatory Information

Refer to Unit Descriptor.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply <b>compliance documentation</b> relevant to <b>skid steer loader tasks</b> 1.2. Obtain, confirm and apply <b>work instructions</b> to the allotted task 1.3. Obtain, confirm and apply <b>safety requirements</b> to the allotted task 1.4. Obtain, identify and implement signage requirements from the project traffic management plan 1.5. Select plant, <b>tools and equipment</b> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply <b>environmental</b> protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check loader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate skid steer loader	3.1. Identify site hazards associated with skid steer loader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for skid steer loader to achieve optimum output in accordance with manufacturer's design specifications while achieving specified tolerances 3.3. Operate loader to work instructions
4. Lift, carry and place materials	4.1. Conduct <b>communication</b> practices associated with transportation and lifting of <b>materials</b> in accordance with site specific practices and procedures, and confirm between parties 4.2. Select, attach and apply slings and lifting

	<p>gear in accordance with safe working load requirements as identified in legislation</p> <p>4.3.Establish weight of load</p> <p>4.4.Position machinery to ensure stability and locate to effectively shift materials according to job specifications</p> <p>4.5.Shift load safely and effectively</p> <p>4.6.Move load in accordance with conventional hand and available signals</p>
5. Select, remove and fit attachments	<p>5.1.Select <i>attachment</i> for the task</p> <p>5.2.Remove and fit attachment</p> <p>5.3.Test attachment to ensure correct fitting and operation as specified</p> <p>5.4.Use attachment in accordance with recommendations and design limits</p> <p>5.5.Clean and store removed attachments in designated location</p>
6. Relocate the skid steer loader	<p>6.1.Move skid steer loader safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2.Prepare for relocation of skid steer loader</p>
7. Carry out machine operator maintenance	<p>7.1.Safely park, shutdown and prepare machine for <i>maintenance</i></p> <p>7.2.Conduct inspection and fault finding</p> <p>7.3.Remove and replace defective parts safely and effectively</p> <p>7.4.Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1.Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2.Clean, check, maintain and store plant tools and equipment</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly

for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct civil construction skid steer loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- perform safe working load calculations
- apply skid steer loader operating techniques
- apply processes for interpreting drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- apply basic earthworks calculations
- apply levelling techniques

### **Required knowledge**

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following as required to conduct civil construction skid steer loader operations:

- skid steer loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- skid steer loader techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- Project Quality Requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSAs/Safe work method statement

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> <li>• knowledge of the requirements, procedures and instructions for conducting civil construction skid steer loader operations</li> <li>• implementation of requirements, procedures and techniques for the safe, effective and efficient completion of civil construction skid steer loader operations, including:             <ul style="list-style-type: none"> <li>• in a minimum of two different soil types, and</li> <li>• to include the mandatory tasks of stripping/spreading topsoil and materials, lifting, loading vehicles, excavations, mixing materials and site clean-up</li> </ul> </li> <li>• working with others to undertake and complete civil construction skid steer loader operations that meet all of the required outcomes</li> <li>• consistent timely completion of civil construction skid steer loader operations that safely, effectively and efficiently meet the required outcomes</li> </ul>
<b>Context of and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</li> <li>• The assessment environment should not disadvantage the participant. For example,</li> </ul>

	<p>language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> <li>• Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.</li> <li>• Aboriginal people and other people from a non English speaking background may have second language issues.</li> <li>• Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.</li> <li>• Where applicable, physical resources should include equipment modified for people with disabilities.</li> <li>• Access must be provided to appropriate learning and/or assessment support when required.</li> </ul>
<p><b>Method of assessment</b></p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidate's required knowledge</li> <li>• observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes including: <ul style="list-style-type: none"> <li>• in a minimum of two different soil types, and</li> <li>• to include the mandatory tasks of stripping/ spreading topsoil and materials, lifting, loading vehicles, excavations, mixing materials and site clean-up</li> </ul> </li> <li>• consistently achieving the required outcomes</li> </ul> </li> <li>• first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• working with others to conduct civil</li> </ul> </li> </ul>

	construction skid steer loader operations
<b>Guidance information for assessment</b>	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Relevant compliance documentation</b> may include:	<ul style="list-style-type: none"> <li>legislative, organisation and site requirements and procedures</li> <li>manufacturer's guidelines and specifications</li> <li>Australian standards</li> <li>codes of practice</li> <li>Employment and Workplace Relations legislation</li> <li>Equal Employment Opportunity and Disability Discrimination legislation</li> </ul>
A <b>skid steer loader</b> is:	<ul style="list-style-type: none"> <li>a self-propelled wheeled machine in which steering is accomplished by skidding or reversing the wheels or tracks on one side of the machine. It has an integral front-mounted bucket-supporting structure and linkage, which loads or excavates through forward motion of the machine, and lifts, transports and discharges material</li> </ul>
<b>Skid steer loader</b> may include:	<ul style="list-style-type: none"> <li>compacting, truck excavation, lifting and carrying materials, cutting batters and benches, rock breaking and any activities associated with attachments listed</li> </ul>
<b>Skid steer loader tasks</b> are to include:	<ul style="list-style-type: none"> <li>stripping/spreading topsoil and materials, backfilling, lifting, loading vehicles, excavations, mixing materials and site clean-up</li> </ul>
<b>Work instructions</b> may include:	<ul style="list-style-type: none"> <li>plans, specifications, quality requirements and operational details</li> <li>quality requirements may include but not be limited to dimensions, tolerances, standards of</li> </ul>

	work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
<b>Safety requirements</b> are to be:	<ul style="list-style-type: none"> <li>in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan</li> </ul>
<b>Safety requirements</b> may include:	<ul style="list-style-type: none"> <li>protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances</li> <li>personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices</li> <li>safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public</li> <li>safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, a safe distance from excavations, and secured from unauthorised access or movement</li> <li>hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials</li> <li>emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation</li> </ul>
<b>Tools and equipment</b> are to include:	<ul style="list-style-type: none"> <li>hand tools and maintenance equipment relevant to the particular loader</li> </ul>
<b>Environmental</b> requirements are to include:	<ul style="list-style-type: none"> <li>organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management</li> </ul>

<b>Communications practices</b> are to include:	<ul style="list-style-type: none"> <li>• verbal instructions and fault reporting and may include two-way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task</li> <li>• on-site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues</li> </ul>
<b>Materials</b> may include:	<ul style="list-style-type: none"> <li>• clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes</li> <li>• rock types may include metamorphic, igneous and sedimentary</li> <li>• construction materials may include pegs, wire, cordage, safety equipment and other support equipments</li> </ul>
<b>Attachments</b> may include:	<ul style="list-style-type: none"> <li>• a front end loader (FEL), multipurpose 4:1 bucket, forklift, dozer blade, backhoe, auger, chain digger, power broom, profiler, tiller/mixer, rotary hoe, hammer, asphalt cutter/saw, concrete cutter/saw</li> </ul>
Operator <b>maintenance</b> is to include:	<ul style="list-style-type: none"> <li>• cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities</li> </ul>

## Unit Sector(s)

Mobile Plant Operations

## Competency field

Refer to Unit Sector(s).

## Co-requisite units

Not applicable.

## RIIMPO319A Conduct backhoe/loader operations

### Modification History

Not applicable.

### Unit Descriptor

This unit covers the conducting backhoe/loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating backhoe/ loaders; lifting, carrying and placing materials; selecting, removing and fitting attachments; relocating the backhoe/ loaders; carrying out machine operator maintenance; and cleaning up.

### Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

### Licensing/Regulatory Information

Refer to Unit Descriptor.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply <b>compliance documentation</b> relevant to conduct <b>backhoe/loader tasks</b> 1.2. Obtain, confirm and apply <b>work instructions</b> to the allotted task 1.3. Obtain, confirm and apply <b>safety requirements</b> to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, <b>tools and equipment</b> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply <b>environmental</b> protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out <b>pre-start, start-up, park and shutdown procedures</b> 2.2. Check machine controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate backhoe/ loader	3.1. Identify site hazards associated with backhoe/loader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for backhoe/loader to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate machine to work instructions
4. Lift, carry and place materials	4.1. Conduct <b>communication</b> practices associated with transportation and lifting of <b>materials</b> 4.2. Select and attach slings and lifting gear in accordance with safe working load requirements 4.3. Establish weight of load

	<p>4.4.Position and locate machinery to ensure stability to effectively shift materials according to job specifications</p> <p>4.5.Shift load safely and effectively</p> <p>4.6.Move load in accordance with conventional hand and audible signals</p>
5. Select, remove and fit attachments	<p>5.1.Select <i>attachment</i> for the task</p> <p>5.2.Remove and fit attachment</p> <p>5.3.Test attachment to ensure correct fitting and operation</p> <p>5.4.Use attachment in accordance with recommendations and design limits</p> <p>5.5.Clean and store removed attachments in designated location</p>
6. Relocate the backhoe/ loader	<p>6.1.Move backhoe/loader safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2.Prepare backhoe/loader for relocation</p>
7. Carry out machine operator maintenance	<p>7.1.Park safely, shutdown and prepare machine for <i>maintenance</i></p> <p>7.2.Conduct inspection and fault finding</p> <p>7.3.Remove, replace safely and effectively defective parts</p> <p>7.4.Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1.Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2.Clean, check, maintain and store plant, tools and equipment</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct backhoe/loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply backhoe/loader techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheet and materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- interpret JSA's/Safe work method statement

### **Required knowledge**

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct backhoe/loader operations:

- backhoe/loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- backhoe/loader techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> <li>• knowledge of the requirements, procedures and instructions for conducting backhoe/loader operations</li> <li>• implementation of requirements, procedures and techniques for the safe, effective and efficient completion of backhoe/ loader operations, including:             <ul style="list-style-type: none"> <li>• in a minimum of two different soil types and</li> <li>• to include the mandatory tasks: mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes, and cutting/boxing</li> </ul> </li> <li>• working with others to undertake and complete backhoe/ loader operations that meet all of the required outcomes</li> <li>• consistent timely completion of backhoe/loader operations that safely, effectively and efficiently meet the required outcomes</li> </ul>
<b>Context of and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</li> <li>• The assessment environment should not</li> </ul>

	<p>disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> <li>• Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.</li> <li>• Aboriginal people and other people from a non English speaking background may have second language issues.</li> <li>• Assessment of this competency requires typical resources normally used in the work environment. <p><b>Method of assessment</b></p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidate's required knowledge</li> <li>• observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> <li>• in a minimum of two different soil types and</li> <li>• the mandatory tasks: mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes, and cutting/boxing</li> </ul> </li> <li>• consistently achieving the required outcomes</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• working with others to undertake and complete the backhoe/loader operations</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b>Relevant compliance documentation</b> may include:</p>	<ul style="list-style-type: none"> <li>• legislative, organisation and site requirements and procedures</li> <li>• manufacturer's guidelines and specifications</li> <li>• Australian standards</li> <li>• codes of practice</li> <li>• Employment and workplace relations legislation</li> <li>• Equal Employment Opportunity and Disability Discrimination legislation</li> </ul>
<p>A <b>backhoe/loader</b> is:</p>	<ul style="list-style-type: none"> <li>• a self-propelled wheeled machine with a main structural support designed to carry both a front-mounted bucket loading mechanism and a rear-mounted backhoe</li> </ul>
<p><b>Backhoe/loader tasks</b> are to include:</p>	<ul style="list-style-type: none"> <li>• mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes and cutting/boxing</li> </ul>
<p><b>Backhoe/loader tasks</b> may include:</p>	<ul style="list-style-type: none"> <li>• scrub clearing, ripping, compacting, cutting, batters and benches, rock breaking, demolition and any activities associated with the attachments listed</li> </ul>
<p>A <b>skid steer loader</b> is:</p>	<ul style="list-style-type: none"> <li>• a self-propelled wheeled machine in which steering is accomplished by skidding or reversing the wheels or tracks on one side of the machine. It has an integral front-mounted</li> </ul>

	<p>bucket-supporting structure and linkage, which loads or excavates through forward motion of the machine, and lifts, transports and discharges material</p>
<b>Skid steer loader</b> may include:	<ul style="list-style-type: none"> <li>• compacting, truck excavation, lifting and carrying materials, cutting batters and benches, rock breaking and any activities associated with attachments listed</li> </ul>
<b>Skid steer loader tasks</b> are to include:	<ul style="list-style-type: none"> <li>• stripping/ spreading topsoil and materials, backfilling, lifting, loading vehicles, excavations, mixing materials and site clean up</li> </ul>
<b>Work instructions</b> may include:	<ul style="list-style-type: none"> <li>• plans, specifications, quality requirements and operational details</li> <li>• quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction</li> </ul>
<b>Safety requirements</b> are to be:	<ul style="list-style-type: none"> <li>• in accordance with State or Territory legislation and regulations, organisational safety policies and procedures, and project safety plan</li> </ul>
<b>Safety requirements</b> may include:	<ul style="list-style-type: none"> <li>• protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances</li> <li>• personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices</li> <li>• safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public</li> <li>• safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement</li> </ul>

	<ul style="list-style-type: none"> <li>hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials</li> <li>emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation</li> </ul>
<b>Tools and equipment</b> are to include:	<ul style="list-style-type: none"> <li>hand tools and maintenance equipment relevant to the particular loader and may include lifting equipment</li> </ul>
<b>Environmental requirements</b> are to include:	<ul style="list-style-type: none"> <li>organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management</li> </ul>
<b>Communications practices</b> are to include:	<ul style="list-style-type: none"> <li>verbal instructions and fault reporting and may include two way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task</li> <li>on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues</li> </ul>
<b>Materials</b> may include:	<ul style="list-style-type: none"> <li>clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes</li> <li>rock types may include metamorphic, igneous and sedimentary</li> </ul>
<b>Attachments</b> may include:	<ul style="list-style-type: none"> <li>extending devices, tilt bucket, buckets, compaction wheel, ripper, plate compactor, rock breaker, auger, broom, mower/slasher, forklift, 4 in 1 bucket and free/rock grab</li> </ul>
Operator <b>maintenance</b> is to include:	<ul style="list-style-type: none"> <li>cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities</li> </ul>

## **Unit Sector(s)**

Mobile Plant Operations

## **Competency field**

Refer to Unit Sector(s).

## **Co-requisite units**

Not applicable.

## RIIMPO324A Conduct civil construction grader operations

### Modification History

Not applicable.

### Unit Descriptor

This unit covers conducting grader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the machine; selecting, removing and fitting attachments; relocating the machine; carrying out machine operator maintenance; and cleaning up.

### Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Operator license issued by OHS authority may be required in some states or territories and graders must be registered to drive and operate on public roads.

### Licensing/Regulatory Information

Refer to Unit Descriptor.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply <b>compliance documentation</b> relevant to <b>grader operations tasks</b> 1.2. Obtain, confirm and apply <b>work instructions</b> to the allotted task 1.3. Obtain, confirm and apply <b>safety requirements</b> to the allotted task 1.4. Resolve coordination requirements with others at the site prior to commencing and during work activities 1.5. Identify, obtain and implement signage requirements from the project traffic management plan 1.6. Select plant, <b>tools and equipment</b> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.7. Identify, confirm and apply <b>environmental</b> protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out <b>pre-start, start-up, park and shutdown procedures</b> 2.2. Recognise and respond to hazardous and emergency situations as required 2.3. Check grader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate grader	3.1. Identify site hazards associated with grader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for grader to achieve optimum output in accordance with design specifications while achieving specified tolerances

	3.3. Operate grader to work instructions
4. Select, remove and fit attachments	<p>4.1. Select <i>attachment</i> for the task</p> <p>4.2. Remove and fit attachment</p> <p>4.3. Test attachment to ensure correct fitting and operation</p> <p>4.4. Use attachment in accordance with recommendations and design limits</p> <p>4.5. Clean and store removed attachments in designated location</p>
5. Relocate the grader	<p>5.1. Move grader safely between worksites, observing relevant codes and traffic management requirements</p> <p>5.2. Prepare grader for relocation</p>
6. Carry out machine operator maintenance	<p>6.1. Safely park, shutdown and prepare machine for <i>maintenance</i></p> <p>6.2. Conduct inspection and fault finding</p> <p>6.3. Remove and replace defective parts safely and effectively</p> <p>6.4. Carry out regular programmed maintenance and housekeeping tasks</p> <p>6.5. Maintain and process records</p>
7. Clean up	<p>7.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>7.2. Clean, check, maintain and store plant, tools and equipment</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct grader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply grader operating techniques related to essential tasks, including:
  - apply cut and fill techniques

- apply levelling techniques
- construct drains
- form and carry a windrow
- tow equipment/plant
- apply processes for interpreting drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply JSA's/Safe work method statement procedures
- apply diagnostic techniques
- apply operations directing techniques
- apply driving techniques
- apply hazardous goods handling techniques
- interpret plans, reports, maps, specifications
- apply lifting techniques
- organise work tasks
- apply defect reporting requirements
- apply safe work practices
- use communications equipment
- use computer systems
- use hand and power tools

### **Required knowledge**

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct grader operations:

- site risk control procedures
- site and equipment health and safety procedures, including:
  - site isolation and traffic control responsibilities and authorities
  - materials safety data sheets (MSDS) and materials handling methods
  - JSA's/Safe work method statement
  - hazard identification and response procedures
  - site and project personal protective equipment requirements
- site and project environmental requirements and constraints
- site and project quality requirements
- site and project communication procedures

- site operational procedures
- civil construction activity sequences of road construction, earthworks and drainage
- civil construction terminology
- processes for interpreting drawings and sketches
- site soil and survey data
- basic principles of soil technology for civil works
- grader types, characteristics, technical capability and limitations
- grader pre-start, start-up, operating and shut-down procedures and techniques
- grader and attachment operating techniques related to essential tasks, including:
  - safe operating techniques in all terrain
  - levelling techniques
- operational, maintenance and basic diagnostic procedures
- methods of changing machine attachments
- site record keeping requirements
- basic earthworks calculations

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> <li>• knowledge of the requirements, procedures and instructions for conducting grader operations</li> <li>• implementation of requirements, procedures and techniques for the safe, effective and efficient completion of grader operations, including:           <ul style="list-style-type: none"> <li>• in a minimum of two different soil types and</li> <li>• to include the mandatory tasks of cutting and maintaining drains, forming/upgrading/maintaining roads, mixing/ spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• working with others to undertake and complete grader operations that meet all of the required outcomes</li> <li>• consistent timely completion of grader operations that safely, effectively and efficiently meet the required outcomes</li> <li>• laser guidance or ATS are not to be used to assist in control of the machine during assessment</li> </ul>
<b>Context of and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</li> <li>• The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</li> <li>• Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.</li> <li>• Aboriginal people and other people from a non English speaking background may have second language issues.</li> <li>• Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.</li> <li>• Where applicable, physical resources should include equipment modified for people with disabilities.</li> <li>• Access must be provided to appropriate learning and/or assessment support when required.</li> </ul>
<b>Method of assessment</b>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment</p>

	<p>methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidate's required knowledge</li> <li>• observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> <li>• in a minimum of two different soil types, and</li> <li>• to include the mandatory tasks of cutting and maintaining drains, forming/upgrading/ maintaining roads, mixing/ spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements</li> </ul> </li> <li>• consistently achieving the required outcomes</li> </ul> </li> <li>• first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> <li>• working with others to undertake and complete grader operations</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### **Relevant compliance documentation**

may include:

- legislative, organisation and site requirements and procedures
- manufacturer's guidelines and specifications
- Australian standards
- codes of practice

	<ul style="list-style-type: none"> <li>• Employment and workplace relations legislation</li> <li>• Equal Employment Opportunity and Disability Discrimination legislation</li> </ul>
<b>A grader:</b>	<ul style="list-style-type: none"> <li>• is a self-propelled articulating or rigid framed wheeled machine, designed to cut, move and place construction materials using a centrally mounted blade and may include forward and/or rear mounted rippers/scarifiers</li> <li>• the blade and attachment controls are normally hydraulic; however, they may be mechanical</li> </ul>
<b>Grader tasks</b> are to include:	<ul style="list-style-type: none"> <li>• cutting and maintaining drains, forming/upgrading/maintaining roads, mixing/spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements</li> </ul>
<b>Grader tasks</b> may include:	<ul style="list-style-type: none"> <li>• stripping/spreading topsoil and materials, cutting/boxing, cut and fill</li> </ul>
<b>Work instructions</b> may include:	<ul style="list-style-type: none"> <li>• plans, specifications, quality requirements and operational details</li> <li>• quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction</li> <li>• soil types and information</li> <li>• survey data, including: cut and fill levels, layer thicknesses, finished levels, finished grades and cross-falls</li> </ul>
<b>Safety requirements</b> are to be:	<ul style="list-style-type: none"> <li>• in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan</li> </ul>
<b>Safety requirements</b> may include:	<ul style="list-style-type: none"> <li>• the site safety plan and organisational policies and procedures</li> <li>• protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances</li> <li>• personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices</li> <li>• safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel,</li> </ul>

	<p>restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public</p> <ul style="list-style-type: none"> <li>• safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement</li> <li>• hazards and risks may include but not be limited to installed services, damaged or defective pressurise hoses and fastenings, abandoned equipment, adverse weather conditions (electrical storms, floods, fires), chemicals, contaminants, ancillary equipment, fences, holes and pot holes, over-hanging rocks, personnel, unsafe ground, unstable faces, vehicles, powerlines, dust and noise, conveyors, overhead services and stored energy which may include: engine components, radiators and cooling systems, hydraulic tanks and reservoirs, air tanks and reservoirs, hydraulic hoses, air hoses, tyres, air conditioning components, electrical components, braking systems, centrifugal forces</li> <li>• hazardous and emergency situations, which may include: motor vehicle accidents, lighting strikes (potential tyre explosion) and tyre fires (isolation procedures)</li> <li>• emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation</li> </ul>
<p><b>Tools and equipment</b> are to include:</p>	<ul style="list-style-type: none"> <li>• hand tools and maintenance equipment relevant to the particular grader</li> </ul>
<p><b>Environmental</b> requirements are to include:</p>	<ul style="list-style-type: none"> <li>• organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management</li> </ul>
<p><b>pre-start, start-up, park and shutdown procedures</b> may include:</p>	<ul style="list-style-type: none"> <li>• external check of the machine</li> <li>• inspection of attachments to ensure security and identify defects</li> <li>• checking of fluid levels (windscreen washer tank, hydraulic oil, coolant, grease, water,</li> </ul>

	<p>engine oil, fuel)</p> <ul style="list-style-type: none"> <li>• carry out lubrication</li> <li>• checking of display instrumentation and gauges (indicators, gauges, laser levels), computer systems, including: <ul style="list-style-type: none"> <li>• brake air pressure</li> <li>• brake oil temperature</li> <li>• computer indicators</li> <li>• engine oil pressure</li> <li>• fuel filter</li> <li>• parking brake</li> <li>• retarder</li> <li>• service meter</li> <li>• speedometer/odometer</li> <li>• steering filters</li> <li>• tachometer</li> <li>• torque converter</li> <li>• oil temperature</li> <li>• transmission filter</li> <li>• voltmeter</li> <li>• water temperature</li> </ul> </li> <li>• inspection of air filter restriction indicator</li> <li>• inspection and checking of cab (horn, lights, air conditioner)</li> <li>• testing of engine and stop engine lights</li> <li>• testing visual and audio warning devices and lights</li> <li>• checking instruments and control lever</li> <li>• reporting of defects and damage</li> <li>• secure equipment as required by site procedures</li> <li>• render attachments safe</li> <li>• clear access ways</li> </ul>
<b>Materials</b> may include:	<ul style="list-style-type: none"> <li>• clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes</li> <li>• rock types may include metamorphic, igneous and sedimentary</li> </ul>
<b>Attachments</b> are to include:	<ul style="list-style-type: none"> <li>• tynes/scarifiers</li> </ul>
<b>Attachments</b> may include:	<ul style="list-style-type: none"> <li>• dozer blade, machine guidance system, laser levelling equipment, ripper, slash</li> </ul>

Operator <b>maintenance</b> is to include:	<ul style="list-style-type: none"><li>• cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities</li></ul>

## Unit Sector(s)

Mobile Plant Operations

## Competency field

Refer to Unit Sector(s).

## Co-requisite units

Not applicable.

## R110HS202A Enter and work in confined spaces

### Modification History

Not applicable.

### Unit Descriptor

This unit covers the entering and working in confined spaces in resources and infrastructure industries. It includes planning and preparing for entry of confined spaces, entry and working in confined spaces, exiting confined spaces and cleaning up.

### Application of the Unit

This unit is appropriate for those working in confined spaces (enclosed or partially enclosed) for the purpose of carrying out work or inspections and also is appropriate for those performing sentry or stand-by person roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining
- General construction

### Licensing/Regulatory Information

Refer to Unit Descriptor.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range</p>
--	---

	statement. Assessment of performance is to be consistent with the evidence guide.
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for entering and working in confined spaces	1.1. Access, interpret and apply <b>compliance documentation</b> relevant to entering and working in confined spaces 1.2. Obtain, confirm and apply <b>work instructions</b> relevant to the allotted task 1.3. Obtain, confirm and apply <b>safety requirements</b> relevant to the allotted task 1.4. Obtained authorisation ( <b>entry permit</b> ) to enter the <b>confined space</b> is in accordance with regulatory requirements 1.5. Confirm the emergency response procedure is with the stand-by person 1.6. Identify, obtain and implement <b>signage</b> and barrier requirements as required by the project plan 1.7. Select tools and equipment to carry out tasks that are consistent with the requirements of the job and check them for serviceability and rectify or report any faults 1.8. Identify, confirm and apply to the allotted task the <b>environmental protection requirements</b> from the project environmental management plan 1.9. Position rescue equipment as required by the entry permit close to the point of entry
2. Enter and work in the confined space	2.1. <b>Gain access</b> to the confined space 2.2. Ensure that the atmosphere is tested and monitored for harmful elements in accordance with procedures 2.3. Apply tagging and lock-out procedures as required 2.4. Enter the confined space according to agreed procedure 2.5. Maintain <b>communication</b> with the stand-by

	<p>person</p> <p>2.6. Comply with entry permit requirements while carrying out designated work in confined space</p> <p>2.7. Monitor and adhere to allocated entry time</p>
3. Exit confined space	<p>3.1. Exit confined space according to agreed procedure</p> <p>3.2. Recover tools, equipment and materials from the confined space</p> <p>3.3. Conduct inspection of the confined space</p> <p>3.4. <b>Secure access</b> according to site procedures</p> <p>3.5. Remove tagging and lock-out according to site procedures</p> <p>3.6. Complete confined space entry permit</p>
4. Clean up	<p>4.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>4.2. Clean, check, maintain and store <b>tools and equipment</b> in accordance recommendations and standard work practices</p> <p>4.3. Remove, clean and store barriers and signs</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to enter and work in confined spaces:

- apply legislative, organisation and site requirements and procedures
- apply operational, maintenance and basic diagnostic procedures
- apply materials handling methods
- use atmospheric monitoring devices
- interpret JSAs/Safe work method statements

### Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used.

<p>This includes knowledge of the following as required to enter and work in confined spaces:</p> <ul style="list-style-type: none"> <li>• site and equipment safety requirements</li> <li>• confined space entry and exit procedures, risks and regulations</li> <li>• air contaminants and toxic gases</li> <li>• breathing apparatus limitations</li> <li>• equipment types, characteristics, technical capabilities and limitations</li> <li>• site isolation and site control responsibilities and authorities</li> <li>• materials safety data sheets (MSDS)</li> <li>• project quality requirements</li> <li>• industry terminology</li> <li>• state and territory interpretations of a confined space</li> </ul>
--

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> <li>• knowledge of the requirements, procedures and instructions for entering and working in confined spaces</li> <li>• implementation of requirements, procedures and techniques for the safe, effective and efficient completion for entering and working in confined spaces</li> <li>• working with others to undertake and complete the entering and working in confined spaces that meet all of the required outcomes</li> <li>• consistent timely completion of entering and working in confined spaces that safely, effectively and efficiently meets the required outcomes</li> </ul>
<b>Context of and specific</b>	<ul style="list-style-type: none"> <li>• This unit must be assessed in the context of the work environment. Where personal safety or</li> </ul>

<p><b>resources for assessment</b></p>	<p>environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</p> <ul style="list-style-type: none"> <li>• The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</li> <li>• Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.</li> <li>• Aboriginal people and other people from a non English speaking background may have second language issues.</li> <li>• Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular work sites may differ due to site circumstances.</li> <li>• Where applicable, physical resources should include equipment modified for people with disabilities.</li> <li>• Access must be provided to appropriate learning and/or assessment support when required.</li> </ul>
<p><b>Method of assessment</b></p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidate's required knowledge</li> <li>• observed, documented and/or first hand testimonial evidence of the candidate's:             <ul style="list-style-type: none"> <li>• implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes</li> <li>• consistently achieving the required outcomes</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• first hand testimonial evidence of the candidate's:             <ul style="list-style-type: none"> <li>• working with others to undertake and complete the entering and working in confined spaces</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<ul style="list-style-type: none"> <li>• Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</li> </ul>

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Relevant compliance documentation</b> may include:	<ul style="list-style-type: none"> <li>• legislative, organisation and site requirements and procedures</li> <li>• manufacturer's guidelines and specifications</li> <li>• Australian standards</li> <li>• code of practice</li> <li>• Employment and Workplace Relations legislation</li> <li>• Equal Employment Opportunity and Disability Discrimination legislation</li> </ul>
<b>Work instructions</b> may include:	<ul style="list-style-type: none"> <li>• plans</li> <li>• specifications</li> <li>• quality requirements</li> <li>• operational details</li> </ul>
<b>Safety requirements</b> may be included in:	<ul style="list-style-type: none"> <li>• site safety plans</li> <li>• organisational policies and procedures</li> <li>• statutory/regulatory authorities which may include:             <ul style="list-style-type: none"> <li>• federal</li> <li>• state and</li> <li>• local authorities</li> </ul> </li> <li>• verbal or written and graphical instructions</li> <li>• signage</li> <li>• work schedules/plans/specifications</li> <li>• work bulletins</li> </ul>

	<ul style="list-style-type: none"> <li>• charts and hand drawings</li> <li>• memos</li> <li>• maps</li> <li>• materials safety data sheets (MSDS)</li> <li>• diagrams or sketches</li> <li>• safe work procedures or equivalent related to working in confined spaces</li> <li>• regulatory/legislative requirements pertaining to working in confined spaces</li> <li>• manufacturer's specifications and instructions</li> <li>• organisation's work specifications and requirements</li> <li>• instructions issued by authorised organisational or external personnel</li> <li>• relevant Australian standards</li> </ul>
<p><b>Safety requirements</b> may include:</p>	<ul style="list-style-type: none"> <li>• OHS requirements</li> <li>• personal protective clothing and equipment as prescribed under legislation, regulation and workplace policies and practices</li> <li>• use of tools and equipment</li> <li>• workplace environment and safety</li> <li>• handling of materials</li> <li>• use of fire fighting equipment</li> <li>• use of First Aid equipment</li> <li>• hazard control and hazardous materials and substances</li> <li>• safe operating procedures including recognising and preventing hazards associated with working in confined spaces, working in proximity to others, worksite visitors and the public</li> <li>• hazards and risks may include but not be limited to fires, underground services, excavations, traffic, hazardous materials, contaminated atmosphere and toxic gases</li> <li>• risks associated with confined spaces may include but not be limited to restricted means of entry and exit, atmosphere which contains potentially harmful levels of contaminant, unsafe oxygen levels or engulfment</li> <li>• respiratory protection devices are to include but not be limited to air purifying respirators and may include self contained compressed air breathing apparatus, supplied airline breathing apparatus and escape breathing apparatus and</li> </ul>

	<p>atmospheric monitoring devices</p>
<p>Confined space <b>entry permit</b>, or work permits, may include:</p>	<ul style="list-style-type: none"> <li>• location of work</li> <li>• duration of work</li> <li>• size of work crew</li> <li>• atmospheric testing requirements</li> <li>• personal protective equipment</li> <li>• hot work</li> <li>• stand-by personnel</li> <li>• rescue arrangements</li> <li>• other precautions (signs, barriers)</li> <li>• authorisation</li> </ul>
<p><b>Confined spaces</b> may include:</p>	<ul style="list-style-type: none"> <li>• storage tanks, tank cars, process vessels, boilers, pressure vessels, silos and other tank-like compartments</li> <li>• open-topped spaces such as pits or degreasers</li> <li>• pipes, sewers, shafts, ducts and similar structures</li> <li>• shipboard spaces entered through a small hatchway or access point, cargo tanks, cellular double bottom tanks, duct keels, ballast and oil tanks and void spaces (but not including dry cargo holds)</li> </ul>
<p><b>Signage</b> may include:</p>	<ul style="list-style-type: none"> <li>• site safety signage</li> <li>• temporary signage for the benefit of motorists</li> <li>• pedestrians and barricades</li> </ul>
<p><b>Environmental protection requirements</b> may include:</p>	<ul style="list-style-type: none"> <li>• organisational/project environmental management plan</li> <li>• waste management</li> <li>• water quality protection</li> <li>• noise</li> <li>• vibration</li> <li>• dust</li> <li>• clean-up management</li> </ul>
<p><b>Gain access</b> may include:</p>	<ul style="list-style-type: none"> <li>• removing access cover</li> <li>• installing and securing ladder</li> </ul>
<p><b>Communications</b> may include:</p>	<ul style="list-style-type: none"> <li>• verbal instructions</li> <li>• fault reporting</li> <li>• 2-way radio</li> <li>• hand signals</li> <li>• mobile phone</li> <li>• site specific instructions</li> <li>• written instructions</li> </ul>

## RIIOHS205A Control traffic with stop-slow bat

### Modification History

Not applicable.

### Unit Descriptor

This unit covers controlling of traffic with a stop-slow bat in resources and infrastructure industries. It includes: planning and preparing; coordinating traffic; operating radios; and cleaning up.

### Application of the Unit

This unit is appropriate for those working in a operational roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

### Licensing/Regulatory Information

Refer to Unit Descriptor.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Plan and prepare</p>	<p>1.1. Access, interpret and apply <b>compliance documentation</b> relevant to controlling of traffic with a stop-slow bat</p> <p>1.2. Obtain, confirm and apply <b>work instructions</b> relevant to the allotted task</p> <p>1.3. Obtain, confirm and apply <b>safety requirements</b> from the site safety plan and organisational policies and procedures for the allotted task</p> <p>1.4. Identify, obtain and implement <b>signage and devices</b> requirements from the project traffic management plan</p> <p>1.5. Select <b>tools and equipment</b> to carry out tasks that are consistent with the requirements of the job; check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply <b>environmental</b> protection requirements from the project environmental management plan</p>
<p>2. Coordinate traffic</p>	<p>2.1. Position or confirm temporary traffic signs and barriers in accordance with regulations</p> <p>2.2. Direct traffic in accordance with site traffic plan and away from services or areas of potential damage or danger</p> <p>2.3. Control vehicles and pedestrian traffic within the worksite to ensure safety of workers</p> <p>2.4. Monitor traffic, and make adjustments for changing <b>conditions</b>, and position waiting vehicles to allow for smooth traffic flow</p> <p>2.5. Use hand held stop/slow bats in accordance with regulatory authority approved procedures</p> <p>2.6. Use hand signals in accordance with regulatory authority approved procedures</p> <p>2.7. Report traffic offenders in accordance with regulatory authority approved procedures</p>

<p>3. Operate radio</p>	<p>3.1.Adjust <i>radio</i> controls for optimum reception/transmission results</p> <p>3.2.Transmit messages concisely and in accordance with operating procedures or best practice</p> <p>3.3.Maintain radio power supply</p> <p>3.4.Check radio contact after nominated period of non contact</p>
<p>4. Clean up</p>	<p>4.1.Remove or cover signs and devices sequentially to provide warning to motorists during shutdown</p> <p>4.2.Clean, check, maintain and store tools and equipment in accordance with recommendations and standard work practices</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to control traffic with a stop-slow bat:

- apply legislative, organisation and site requirements and procedures

### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to control traffic with a stop-slow bat:

- site and equipment safety requirements
- traffic controlling
- traffic management plans
- traffic control signage and barricades
- radio operations
- equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities

- affects of travel speed and vehicle mass on stopping distances
- quality requirements
- JSAs/Safe work method statement

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> <li>• knowledge of the requirements, procedures and instructions for controlling traffic with a stop-slow bat</li> <li>• implementation of requirements, procedures and techniques for the safe, effective and efficient control of traffic with a stop-slow bat</li> <li>• working with others to control traffic with a stop-slow bat that meets all of the required outcomes</li> <li>• consistent timely control of traffic with a stop-slow bat that safely, effectively and efficiently meets the required outcomes</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<ul style="list-style-type: none"> <li>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</li> <li>• Evidence for assessment is best gathered using the outcomes of products and processes of the workplace context.</li> <li>• The assessment environment should not</li> </ul>

	<p>disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> <li>• Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.</li> <li>• Aboriginal people and other people from a non English speaking background may have second language issues.</li> <li>• Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.</li> <li>• Where applicable, physical resources should include equipment modified for people with disabilities.</li> <li>• Access must be provided to appropriate learning and/or assessment support when required.</li> </ul>
<p><b>Method of assessment</b></p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidate's required knowledge</li> <li>• observed, documented and/or first hand testimonial evidence of the candidate's:             <ul style="list-style-type: none"> <li>• implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes</li> <li>• consistently achieving the required outcomes</li> </ul> </li> <li>• first hand testimonial evidence of the candidate's:             <ul style="list-style-type: none"> <li>• working with others to control traffic with a stop-slow bat</li> </ul> </li> </ul>
<p><b>Guidance information for assessment</b></p>	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b>Relevant compliance documentation</b> may include:</p>	<ul style="list-style-type: none"> <li>• legislative, organisation and site requirements and procedures</li> <li>• manufacturer's guidelines and specifications</li> <li>• Australian standards</li> <li>• code of practice</li> <li>• Employment and workplace relations legislation</li> <li>• Equal Employment Opportunity and Disability Discrimination legislation</li> </ul>
<p><b>Work instructions</b> may be received via verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, charts and hand drawings, memos, maps, materials safety data sheets (MSDS) and diagrams or sketches and may include:</p>	<ul style="list-style-type: none"> <li>• plans</li> <li>• specifications</li> <li>• quality requirements</li> <li>• operational details</li> <li>• safe work procedures or equivalent</li> <li>• regulatory/legislative requirements</li> <li>• manufacturers' specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised organisational or external personnel</li> <li>• relevant Australian Standards</li> </ul>
<p><b>Safety requirements</b> may include:</p>	<ul style="list-style-type: none"> <li>• those included in compliance documentation</li> <li>• personal protective equipment</li> <li>• safe operating procedures, including recognising and preventing hazards associated with:                             <ul style="list-style-type: none"> <li>• uneven/unstable terrain</li> <li>• trees</li> <li>• pits</li> <li>• poles</li> <li>• trip hazards</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• dirt mounds</li> <li>• overhead services</li> <li>• underground services</li> <li>• bridges</li> <li>• surrounding buildings</li> <li>• obstructions</li> <li>• structures</li> <li>• facilities</li> <li>• fires</li> <li>• excavations</li> <li>• traffic</li> <li>• embankments</li> <li>• cuttings</li> <li>• hazardous materials</li> <li>• recently filled trenches</li> <li>• other machines</li> <li>• personnel</li> <li>• restricted access barriers</li> <li>• traffic control</li> <li>• working in proximity to others</li> <li>• worksite visitors and the public</li> <li>• safe parking practices, including:             <ul style="list-style-type: none"> <li>• ensuring access ways are clear</li> <li>• equipment/machinery is away from overhangs and refuelling sites</li> <li>• safe distance from excavations</li> <li>• secured from unauthorised access or movement</li> </ul> </li> </ul>
<p><b>Signage and devices</b> are to include:</p>	<ul style="list-style-type: none"> <li>• temporary warning signs</li> <li>• regulatory and traffic cones</li> </ul>
<p><b>Signage and devices</b> may include:</p>	<ul style="list-style-type: none"> <li>• vehicle mounted signs and flashing lights</li> <li>• guide signs</li> <li>• warning signs</li> <li>• barriers</li> <li>• hazard markers</li> <li>• bollards</li> <li>• arrow boards</li> </ul>
<p><b>Tools and equipment</b> are to include:</p>	<ul style="list-style-type: none"> <li>• radio</li> <li>• stop-slow bat</li> <li>• high visibility vest</li> </ul>

	<ul style="list-style-type: none"> <li>• traffic cones</li> <li>• signage</li> </ul>
<b>Tools and equipment</b> may include:	<ul style="list-style-type: none"> <li>• warning lights and beacons</li> <li>• arrow boards</li> </ul>
<b>Environmental</b> include the requirements of the organisational/ project environmental management plan, and may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• water quality protection</li> <li>• noise, vibration and dust management</li> <li>• clean-up management</li> </ul>
<b>Traffic conditions</b> may include	<ul style="list-style-type: none"> <li>• congested urban environments</li> <li>• low traffic rural areas</li> <li>• off-road un-trafficked areas</li> <li>• buildings</li> <li>• parking sites</li> <li>• pedestrian areas</li> </ul>
<b>Radios</b> may include:	<ul style="list-style-type: none"> <li>• VHF and UHF</li> </ul>

## Unit Sector(s)

Occupational Health and Safety

## Competency field

Refer to Unit Sector(s).

## Co-requisite units

Not applicable.

## RIIOHS302A Implement traffic management plan

### Modification History

Not applicable.

### Unit Descriptor

This unit covers the competency required to implement a traffic management plans in the civil construction industry. It includes: planning and preparing; setting out, monitoring and closing down the traffic guidance scheme; and cleaning up.

### Application of the Unit

These traffic management plans include those for public and private roads, parking areas and restricted access construction sites. This unit is appropriate for those working in a operational roles, at worksites within:

- Civil construction

### Licensing/Regulatory Information

Refer to Unit Descriptor.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Plan and prepare</p>	<p>1.1. Access, interpret and apply <b>compliance documentation</b> relevant to implement a traffic management plans</p> <p>1.2. Obtain, confirm and apply <b>work instructions</b> relevant to the allotted task</p> <p>1.3. Obtain, confirm and apply <b>safety requirements</b> from the site safety plan and organisational policies and procedures to the allotted task</p> <p>1.4. Identify, obtain and implement <b>signage and devices</b> requirements from the project traffic management plan</p> <p>1.5. Select <b>tools and equipment</b> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply <b>environmental</b> protection requirements from the project environmental management plan to the allotted task</p> <p>1.7. Check the designated traffic controllers' training and qualifications for currency as per legislation</p> <p>1.8. Advise traffic controllers of the traffic flow requirements for the site</p>
<p>2. Set out the traffic guidance scheme</p>	<p>2.1. Select traffic guidance scheme to suit site <b>conditions</b>, traffic volumes and work activities</p> <p>2.2. Determine and ensure adherence to work schedule, maximum traffic delays, signals and site <b>communications</b></p> <p>2.3. Ensure signs and devices are correctly positioned on the approaches to the work area in accordance with the traffic management plan</p> <p>2.4. Ensure that signs and devices are positioned and displayed on each approach according to Road Authority requirements and the traffic management plan</p> <p>2.5. Ensure signs and devices are positioned</p>

	<p>laterally and displayed in accordance with Road Authority requirements</p> <p>2.6.Ensure traffic is controlled effectively to protect the work crew placing traffic control devices around the work area</p>
3. Monitor traffic guidance scheme	<p>3.1.Ensure traffic flow is monitored and effectiveness of guidance scheme determined</p> <p>3.2.Monitor work activities and provide guidance to adjust scheme</p> <p>3.3.Apply process for dealing with traffic controllers when they fail to adhere to the approved procedures</p> <p>3.4.Apply procedures to deal with offending motorists</p>
4. Close down traffic guidance scheme	<p>4.1.Ensure traffic is controlled to protect work crew removing traffic control devices from the work area</p> <p>4.2.Ensure signs are removed in sequence to provide maximum warning during removal of traffic control devices</p> <p>4.3.Ensure guidance scheme details are recorded to organisational and or Road Authority requirements</p> <p>4.4.Ensure incidents are reported as required by the organisation and/or Road Authority</p>
5. Clean up	<p>5.1.Ensure work area is cleared in accordance with the project environmental management plan</p> <p>5.2.Ensure tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturers' recommendations and standard work practices</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly

for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to implement a traffic management plan:

- apply legislative, organisation and site requirements and procedures

**Required knowledge**

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to implement a traffic management plan:

- site and equipment safety requirements
- state and territory traffic management legislation
- requirements set down by the Manual for Uniform Traffic Control Devices
- potential hazards
- traffic controlling
- traffic management plans
- basic signalling
- signs and devices
- radio operations
- equipment types, characteristics, technical capabilities and limitations
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- processes for the calculation of travel speed
- quality requirements
- civil construction terminology
- JSAs/Safe work method statement

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and

	<p>instructions for implementing of traffic management plans</p> <ul style="list-style-type: none"> <li>• implementation of requirements, procedures and techniques for the safe, effective and efficient implementing of traffic management plans, which are to include:             <ul style="list-style-type: none"> <li>• complying with State/Territory regulations on three separate live traffic projects, and</li> <li>• one project controlling site construction vehicles</li> </ul> </li> <li>• working with others to undertake and complete the traffic management plans that meet all of the required outcomes</li> <li>• consistent timely implementation of traffic management plans that safely, effectively and efficiently meets the required outcomes</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<ul style="list-style-type: none"> <li>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</li> <li>• The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</li> <li>• Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.</li> <li>• Aboriginal people and other people from a non English speaking background may have second language issues.</li> <li>• Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.</li> <li>• Where applicable, physical resources should include equipment modified for people with disabilities.</li> <li>• Access must be provided to appropriate</li> </ul>

	learning and/or assessment support when required.
<b>Method of assessment</b>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of the candidate's required knowledge</li> <li>• observed, documented and/or first hand testimonial evidence of the candidate's:             <ul style="list-style-type: none"> <li>• implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes</li> <li>• consistently achieving the required outcomes</li> </ul> </li> <li>• first hand testimonial evidence of the candidate's:             <ul style="list-style-type: none"> <li>• working with others to implement traffic management plans</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b>Relevant compliance documentation</b> may include:</p>	<ul style="list-style-type: none"> <li>• legislative, organisation and site requirements and procedures</li> <li>• manufacturer's guidelines and specifications</li> <li>• Australian standards</li> <li>• code of practice</li> <li>• Employment and workplace relations legislation</li> </ul>

	<ul style="list-style-type: none"> <li>• Equal Employment Opportunity and Disability Discrimination legislation</li> </ul>
<p><b>Work instructions</b> may be received via verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, charts and hand drawings, memos, maps, materials safety data sheets (MSDS) and diagrams or sketches and may include:</p>	<ul style="list-style-type: none"> <li>• specifications</li> <li>• quality requirements</li> <li>• operational details</li> <li>• safe work procedures or equivalent</li> <li>• regulatory/legislative requirements</li> <li>• manufacturers' specifications and instructions</li> <li>• organisation work specifications and requirements</li> <li>• instructions issued by authorised organisational or external personnel</li> <li>• relevant Australian standards</li> </ul>
<p><b>Safety requirements</b> may include:</p>	<ul style="list-style-type: none"> <li>• those included in compliance documentation</li> <li>• personal protective equipment</li> <li>• safe operating procedures, including recognising and preventing hazards associated with:             <ul style="list-style-type: none"> <li>• uneven/unstable terrain</li> <li>• trees</li> <li>• pits</li> <li>• poles</li> <li>• trip hazards</li> <li>• dirt mounds</li> <li>• overhead services</li> <li>• underground services</li> <li>• bridges</li> <li>• surrounding buildings</li> <li>• obstructions</li> <li>• structures</li> <li>• facilities</li> <li>• fires</li> <li>• excavations</li> <li>• traffic</li> <li>• embankments</li> <li>• cuttings</li> <li>• hazardous materials</li> <li>• recently filled trenches</li> <li>• other machines</li> <li>• personnel</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• restricted access barriers</li> <li>• traffic control</li> <li>• working in proximity to others</li> <li>• worksite visitors and the public</li> <li>• safe parking practices, including:             <ul style="list-style-type: none"> <li>• ensuring access ways are clear</li> <li>• equipment/machinery is away from overhangs and refuelling sites</li> <li>• safe distance from excavations</li> </ul> </li> <li>• secured from unauthorised access or movement</li> <li>• emergency procedures</li> </ul>
<b>Signage and devices</b> are to include	<ul style="list-style-type: none"> <li>• temporary warning signs</li> <li>• regulatory and traffic cones</li> </ul>
<b>Signage and devices</b> may include:	<ul style="list-style-type: none"> <li>• vehicle mounted signs and flashing lights</li> <li>• guide signs</li> <li>• warning signs</li> <li>• barriers</li> <li>• hazard markers</li> <li>• portable traffic signals</li> <li>• bollards</li> <li>• arrow boards</li> </ul>
<b>Tools and equipment</b> are to include:	<ul style="list-style-type: none"> <li>• high visibility vests</li> <li>• cones</li> <li>• signage</li> <li>• notebooks</li> <li>• pens</li> <li>• radios</li> <li>• stop-slow bats</li> <li>• delineators</li> <li>• barricades</li> <li>• barriers</li> <li>• bollards</li> <li>• warning lights and beacons</li> <li>• arrow boards</li> <li>• signalling devices</li> </ul>
<b>Environmental</b> include the requirements of the organisational/project environmental management plan, and may include:	<ul style="list-style-type: none"> <li>• waste management</li> <li>• water quality protection</li> <li>• noise, vibration, dust management</li> <li>• clean-up management</li> </ul>

<p><b>Conditions</b> may include:</p>	<ul style="list-style-type: none"> <li>• varying terrain</li> <li>• all weather conditions</li> <li>• varying road surfaces</li> <li>• all vehicle types</li> <li>• rural, urban or residential localities</li> <li>• all times of day</li> <li>• varying traffic volumes</li> <li>• varying road types</li> <li>• congested urban environments</li> <li>• low traffic rural areas</li> <li>• off-road un-trafficked areas</li> <li>• buildings</li> <li>• parking sites</li> <li>• pedestrian areas</li> <li>• civil construction site</li> <li>• road where civil construction work is conducted</li> </ul>
<p><b>Communications</b> is to include:</p>	<ul style="list-style-type: none"> <li>• verbal instructions</li> <li>• fault reporting</li> </ul>
<p><b>Communications</b> may include:</p>	<ul style="list-style-type: none"> <li>• 2-way radio</li> <li>• hand signals</li> <li>• mobile phone</li> <li>• site specific instructions</li> <li>• written instructions</li> <li>• instructions related to job/task</li> </ul>

## SIRXADM001A Apply retail office procedures

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply retail office procedures. It involves processing mail, operating office equipment, filing and retrieving documents, establishing contact with customers and preparing simple correspondence.

### Application of the Unit

This unit applies to sales and administrative staff who operate and maintain office equipment, receive and dispatch correspondence in a variety of formats, file and retrieve documents, communicate with internal and external customers, and prepare simple correspondence according to store policy and procedures.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Process incoming and outgoing mail.	<p>1.1. <b><i>Sort and dispatch incoming mail</i></b> to nominated recipients or locations.</p> <p>1.2. Collect and check outgoing mail to ensure all items are correctly prepared for dispatch.</p> <p>1.3. Record mail according to <b><i>store policy and procedures</i></b>.</p> <p>1.4. Dispatch mail within designated time limits.</p>
2. Process bulk mail.	<p>2.1. Collate documents as required.</p> <p>2.2. Sort and batch envelopes according to Australia Post specifications.</p> <p>2.3. Lodge batched items for delivery.</p>
3. Operate office equipment.	<p>3.1. Identify appropriate <b><i>equipment</i></b> for intended application.</p> <p>3.2. Operate equipment according to manufacturer instructions.</p> <p>3.3. Identify and rectify equipment faults or report to <b><i>relevant personnel</i></b>.</p> <p>3.4. Follow opening and shutdown processes according to store procedures.</p> <p>3.5. Apply maintenance program for equipment to ensure down time is minimised.</p>
4. File and retrieve documents.	<p>4.1. <b><i>File documents</i></b> according to store policy.</p> <p>4.2. Identify and retrieve documents as requested.</p> <p>4.3. Update and modify existing records.</p> <p>4.4. Remove, process and store designated inactive files according to store policy.</p>
5. Establish contact with internal and external customers.	<p>5.1. Use telephone system functions according to store policy.</p> <p>5.2. Obtain and accurately record telephone and fax number or email <b><i>address</i></b>.</p> <p>5.3. Answer incoming calls promptly and according to store policy.</p> <p>5.4. Establish and clearly convey purpose of <b><i>contact</i></b>.</p> <p>5.5. Transfer or place calls on hold as required.</p> <p>5.6. Keep customers informed of delays and action being taken.</p> <p>5.7. Record messages accurately and promptly return calls if</p>

required.

- |                                   |  |
|-----------------------------------|--|
| 6. Prepare simple correspondence. | 6.1. Prepare and present correspondence for approval or signature according to set timeframes.<br>6.2. Write text using clear, concise language.<br>6.3. Use correct spelling, punctuation and grammar.<br>6.4. Use standard form letters according to store policy. |
|-----------------------------------|--|

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Required Skills

- technical skills to operate a range of office technology
- planning and organising skills to complete tasks in a set timeframe
- literacy and numeracy skills to:
  - process, record and document information
  - generate a range of retail documents
- interpersonal communication skills to:
  - report equipment faults
  - answer telephone calls and keep customers informed of delays and action being taken through clear and direct communication
  - ask questions to identify and confirm requirements
  - share information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication

### Required Knowledge

- store policy and procedures in regard to:
  - store administration and clerical systems
  - receiving and dispatching incoming and outgoing mail
  - processing information
  - reporting problems and faults
- relevant regulatory and licensing requirements, such as:

- Work Health and Safety (WHS)
- privacy policies

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- applies procedures for the processing of mail, including bulk mail
- operates and maintains office equipment according to store policy and procedures
- files and retrieves documents according to store policy and procedures
- follows procedures for establishing contact with internal and external customers
- applies procedures for the preparation of simple correspondence.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - manufacturer instructions and operation manuals
- a range of retail equipment.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXICT001A Operate retail technology
- SIRXFIN002A Perform retail finance duties.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Procedures to ***sort and dispatch incoming mail*** may relate to:
- internal systems
  - Australia Post
  - courier services.
- Store policy and procedures*** in regard to:
- store administration
  - clerical systems
  - operating and maintaining retail equipment.
- Equipment*** may include:
- fax machine
  - telephone system
  - photocopier
  - answering machine or voicemail
  - public address system
  - paging system
  - franking machine
  - typewriters
  - computers
  - calculators
  - adapted equipment for people with a disability, for example, talking calculators, computer hard and software, and TTY.
- Relevant personnel*** may include:
- supervisor
  - team leader
  - manager.
- Systems used to record or ***file documents*** may be:
- manual
  - electronic.
- Contact*** may be established by:
- telephone
  - fax
  - email
  - letter
  - face-to-face contact.

Cross-Sector

## **Competency field**

Administration

## SIRXADM002A Coordinate retail office

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to coordinate a retail office. It involves maintaining office procedures, processing data in response to information requests, composing reports and correspondence, maintaining recording and filing systems and maintaining digital storage media and computer filing systems.

### Application of the Unit

This unit applies to team member who coordinate a retail office, responding accurately and appropriately to requests for information and maintaining records and filing systems, including computerised records, according to store policy and procedures. Those with managerial responsibility undertake this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain office procedures.	<p>1.1. Monitor, record and <b><i>order</i></b> office supplies as required according to <b><i>store policy and procedures</i></b>.</p> <p>1.2. Implement store policy and procedures in regard to <b><i>special requests and requirements</i></b>, according to set timeframes.</p>
2. Process data in response to information requests.	<p>2.1. Document requests for information and identify responses according to store policy.</p> <p>2.2. Identify <b><i>relevant external information sources</i></b>.</p> <p>2.3. Obtain <b><i>access to identified sources</i></b>.</p> <p>2.4. Access and extract <b><i>relevant information</i></b>.</p> <p>2.5. Identify and offer <b><i>options and alternatives</i></b> where available information does not match defined needs.</p> <p>2.6. Accurately copy or summarise extracted information.</p> <p>2.7. Compile and update appropriate records required for regulatory compliance to maintain security and confidentiality of contents.</p>
3. Compose reports and correspondence.	<p>3.1. Collate relevant information and edit as required.</p> <p>3.2. Use clear, concise, easily understood language when writing text.</p> <p>3.3. Use correct spelling, punctuation and grammar.</p> <p>3.4. Draft and set out correspondence and reports according to store policy.</p> <p>3.5. Produced edited report and dispatch to <b><i>relevant personnel</i></b>.</p> <p>3.6. Copy and securely file final report according to store policy.</p>
4. Maintain existing recording and filing systems.	<p>4.1. Maintain <b><i>recording and filing systems</i></b> according to store policy.</p> <p>4.2. Allocate new documents to designated category.</p> <p>4.3. Monitor the issue and return of documents to ensure the integrity of the system is maintained.</p> <p>4.4. Archive, remove and update documents to ensure appropriate space available for current records.</p> <p>4.5. Identify and locate required files and dispatch to nominated person or section within designated time limits.</p>

- 4.6. Monitor and record file and document movements.
  - 4.7. Maintain documents in good condition and in correct location.
  - 4.8. Separate confidential files from general files, with access available to nominated personnel only.
  - 4.9. Monitor security system to ensure issued files are traceable at all times.
5. Maintain computer storage media.
    - 5.1. Maintain storage media and filing system according to store policy and procedures.
    - 5.2. Format *digital storage media* using correct procedures.
    - 5.3. Create back up files to ensure safety, security and confidentiality of files is maintained.
    - 5.4. Store back up files in the designated manner and location.
    - 5.5. Regularly perform virus checks on the system and back up storage media.
    - 5.6. Store *hardware* according to manufacturer instructions.
    - 5.7. File and store software according to organisational procedures.
    - 5.8. Observe *Work Health and Safety (WHS) guidelines* relating to screen based equipment and ergonomic work stations.
  6. Maintain computer filing system.
    - 6.1. Determine document filing requirements.
    - 6.2. Create a filing system that reflects the size, nature and complexity of the workplace.
    - 6.3. Implement security checks where necessary.
    - 6.4. Add file names to the filing system as required.
    - 6.5. Update the filing system regularly by deleting or archiving old files.
    - 6.6. Exit programs according to screen prompts to preserve data.

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Required skills

- literacy and numeracy skills to:
  - process, record and document information
  - write reports
  - use various computer software packages
- interpersonal communication skills to:
  - deal with information requests through clear and direct communication
  - ask questions to identify and confirm requirements

- share information
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication

### Required knowledge

- store policy and procedures in regard to:
  - store administration and financial systems
  - systems and methods for organisation of work routine
  - appropriate clerical or office systems
  - mail procedures
  - transport procedures, including cab charge and courier systems
  - systems and procedures for processing information
- types and functions of records management systems
- types and functions of office technology, including:
  - computer
  - printer
  - software packages
  - installation of hardware and software packages
  - software licensing requirements
- relevant WHS requirements in relation to the retail office
- principles and techniques in interpersonal communication skills

### Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently implements workplace office procedures
- responds accurately and appropriately to requests for information according to store policy
- consistently applies procedures for maintaining records and filing system, including computerised records.

#### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- sample policy and procedures in regard to:
  - store administration and clerical or office systems
  - processing of information

- format and technical vocabulary
- WHS legislation and codes of practice
- a range of office equipment, including:
  - computer
  - printer
  - software packages
  - a work team.

### Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Ordering*** procedures may include:

- fax
- phone
- email
- internet.

***Store policy and procedures*** in regard to:

- store administration and clerical systems
- document format and technical vocabulary.

***Special requests and requirements*** may include:

- mail
- ordering of stock
- bill payment
- taxation paperwork
- courier service
- transport, e.g. taxi, cab charge
- special mail procedures.

***External information sources***

- distributors

may include:

- suppliers
- manufacturers
- technical support personnel
- maintenance personnel.

Modes of *access to identified sources* may include:

- contact person
- contact details.

*Relevant information* may include:

- orders
- files
- letters
- correspondence
- warranties.

*Options and alternatives* may be limited by:

- regulatory requirements
- cost-effectiveness
- store policy.

*Relevant personnel* may include:

- relevant managers
- supervisor
- team leader.

*Recording and filing systems* may be:

- paper-based
- electronic.

*Digital storage media* may include:

- floppy disk
- USB drive
- zip disk
- CD-ROM
- DVD-ROM
- digital tape
- external hard drive.

*Hardware* may include:

- computer
- keyboard or typewriter
- printer
- scanner
- monitor
- mouse
- storage media.

*OHS guidelines* may include:

- lighting
- seating
- posture
- ventilation
- glare and reflection
- keyboard equipment and radiation
- eye strain

- setting up work stations.

## SIRXCCS201 Apply point-of-sale handling procedures

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release Date	Comments
First Release:	This is a revised unit, based on and equivalent to SIRXCCS001A Apply point-of-sale handling procedures.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate point-of-sale equipment, apply store policy and procedures to a range of transactions, interact with customers, and package or wrap an item for transportation.

It covers demonstration of the ability to operate a range of point-of-sale equipment in order to complete sales, returns and exchange transactions, and process a number of methods of payment, according to store policies.

### Application of the Unit

This unit applies to frontline service personnel.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Operate point-of-sale equipment.	<p>1.1. Open and close point-of-sale terminal according to <b><i>store policy and procedures</i></b>.</p> <p>1.2. Clear point-of-sale terminal and transfer tender according to store procedure.</p> <p>1.3. Handle cash according to store security procedures.</p> <p>1.4. Maintain supplies of change in point-of-sale terminal according to store policy.</p> <p>1.5. Attend active point-of-sale terminals according to store policy.</p> <p>1.6. Complete records for transaction errors according to store policy.</p> <p>1.7. Maintain adequate supplies of dockets, vouchers and <b><i>point-of-sale documents</i></b>.</p> <p>1.8. Inform <b><i>customers</i></b> of delays in the point-of-sale operation where required.</p>
2. Ensure accuracy of transactions.	<p>2.1. Identify and perform <b><i>numerical calculations</i></b> to ensure accurate pricing and collection of money.</p> <p>2.2. Collect numerical information from various sources and calculate accurately with or without the use of a calculator.</p>
3. Perform point-of-sale transactions.	<p>3.1. Complete <b><i>point-of-sale transactions</i></b> according to store policy.</p> <p>3.2. Identify and apply store procedures in respect of cash and non cash transactions.</p> <p>3.3. Identify and apply store procedures in regard to exchanges and returns.</p> <p>3.4. Move goods through point-of-sale area efficiently and with attention to fragility and packaging.</p> <p>3.5. Enter information into <b><i>point-of-sale equipment</i></b>.</p> <p>3.6. State price or total and amount of cash received verbally to customer.</p> <p>3.7. Tender correct change.</p>

4. Complete sales.
  - 4.1. Complete customer order forms, invoices and receipts and process any loyalty card transactions.
  - 4.2. Identify and process customer delivery requirements according to set timeframes.
  - 4.3. Process sales transactions or direct customers to point-of-sale terminals according to store policy without undue delay.
  - 4.4. Acknowledge and thank customer in line with store policy and procedures.
5. Wrap and pack goods.
  - 5.1. Maintain and request adequate supplies of ***wrapping and packaging materials***.
  - 5.2. Select appropriate wrapping or packaging material.
  - 5.3. Wrap merchandise neatly and effectively where required.
  - 5.4. Pack items safely to avoid damage in transit, and attach labels where required.
  - 5.5. Arrange transfer of merchandise for parcel pick up or other ***delivery methods*** if required.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - inform customers of delays
  - listen actively
  - request adequate supplies of wrapping material or bags through clear and direct communication
  - share information
  - state price or total and amount of cash received
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- self-management skills to:
  - deal with different types of transactions
  - follow set routines and procedures
- literacy and numeracy skills to:
  - document sales and delivery information
  - render change
  - undertake work functions, including addition, division, multiplication, percentages and subtraction

## Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale equipment
  - calculating non-cash documents
  - change required, denominations of change and tendering change
  - clearance of terminal and transference of tender
  - counting cash
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- functions and procedures for operating point-of-sale equipment, including:
  - calculators
  - electronic scales
  - numerical display board
  - registers
- merchandise handling techniques, including wrapping and packaging techniques
- range of services provided by the store
- relevant legislation and statutory requirements, including:
  - industry codes of practice
  - work health and safety (WHS)
  - Australian consumer law
  - scanners
- store policy and procedures in relation to:
  - allocated duties and responsibilities
  - bag checking
  - customer service
  - exchanges and returns
  - handling, packing and wrapping goods or merchandise
  - point-of-sale transactions
- stock availability
- key features of a calculator

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- operates point-of-sale equipment according to manufacturer instructions and store policy and procedures
- applies store policy and procedures in regard to cash handling and point-of-sale transactions
- interprets, calculates and records numerical information accurately
- processes sales transaction information responsibly and accurately according to store policy and procedures
- applies store policy and procedures in regard to the handling, packing, wrapping and delivery of goods or merchandise.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - stock, inventory and price lists
  - financial transaction dockets and slips
  - lay-by, credit and product return slips
  - store policy and procedures manuals
- a range of point-of-sale equipment.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the work
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, work and job role is recommended, for example:

- SIRXCCS202 Interact with customers
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the

performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Store policy and procedures*** in regard to:
- cash handling
  - financial transactions
  - handling techniques of stock
  - operation of point-of-sale equipment
  - sales transactions
  - security.
- Point-of-sale documents*** may include:
- credit slips
  - lay-by slips
  - message pads
  - order forms
  - product return slips
  - promotional materials.
- Customers*** may include:
- customers with routine or special requests
  - internal and external contacts
  - new or repeat contacts
  - people from a range of social, cultural and ethnic backgrounds
  - people with varying physical and mental abilities.
- Numerical calculations*** may include:
- addition and subtraction
  - calculations of cash amounts and change
  - calculations of discount amounts
  - estimation of quantities
  - measurement
  - multiplication and division
  - percentages.
- Point-of-sale transactions*** may include:
- cheques
  - credit cards and store cards
  - EFTPOS
  - exchanges
  - gift vouchers
  - lay-by
  - returns
  - smart cards
  - travellers cheques.
- Point-of-sale equipment*** may include:
- cash drawer
  - cash register
  - EFTPOS terminal
  - electronic scales
  - numerical display board

***Wrapping and packaging materials*** may include:

- scanner
- security tagging.
- adhesive tape
- bags
- boxes
- bubble wrap
- gift wrapping
- paper
- ribbon
- string.

***Delivery methods*** may include:

- courier
- domestic or international delivery
- freight
- parcel pick-up
- post or express post.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

#### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Deliver service to customers.	<p>1.1. <b><i>Communicate</i></b> with <b><i>customers</i></b> in a professional, courteous manner according to store policy.</p> <p>1.2. Meet <b><i>customer needs</i></b> and reasonable requests or refer to supervisor, according to store policy and <b><i>legislative requirements</i></b>.</p> <p>1.3. Record customer details and information where necessary.</p> <p>1.4. Identify and anticipate possible problems and take action to minimise the effect on customer satisfaction.</p> <p>1.5. Recognise and act upon opportunities to deliver additional levels of <b><i>service</i></b> beyond the customer's immediate request.</p> <p>1.6. Maintain contact with customer until sale is completed according to store policy.</p> <p>1.7. Use verbal and non-verbal communication to develop rapport with customers during service delivery.</p> <p>1.8. Encourage repeat customers by promotion of appropriate services or products according to store policy.</p> <p>1.9. Farewell customer appropriately and courteously according to store policy.</p>
2. Respond to customer complaints.	<p>2.1. Convey a positive, helpful attitude to customers when handling <b><i>complaints</i></b>, according to store policy.</p> <p>2.2. Handle complaints sensitively, courteously and with discretion.</p> <p>2.3. Establish and confirm with customer nature of complaint by active listening and questioning.</p> <p>2.4. Take action to resolve complaint to customer's satisfaction wherever possible.</p> <p>2.5. Promptly refer unresolved customer dissatisfaction or</p>

- complaints to supervisor.
- 2.6. Take the opportunity to turn incidents of customer dissatisfaction into a demonstration of high-quality service to customer according to store policy.
  - 2.7. Complete documentation regarding customer dissatisfaction or complaints accurately and legibly.
  - 2.8. Take **follow-up action** as necessary to ensure customer satisfaction.
3. Receive and process sales orders.
    - 3.1. Record customer details and information accurately.
    - 3.2. Promptly refer customers to appropriate area as required.
    - 3.3. Provide customers with information in clear, concise manner.
    - 3.4. Process, record and act upon sales orders according to store policy.
    - 3.5. Process customer returns or refunds according to store policy and procedures.
  4. Identify special customer requirements.
    - 4.1. Promptly identify customers with special needs or requirements by observation and questioning.
    - 4.2. Verbally and non-verbally convey a willingness to assist.
    - 4.3. Promptly service, refer or redirect customers' needs as required.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - build rapport and understanding
  - clarify and feed back information
  - deal with difficult customers
  - listen to customers' needs
  - negotiate with and persuade customers to buy
  - promote products and services
  - respond to complaints effectively and politely
- literacy and numeracy skills to:
  - calculate costs and discounts
  - document sales, stock and delivery information
  - follow procedures for recording customer orders that are placed in person, by telephone or by electronic means

- handle legal tender
- take messages in person or by telephone
- write records of complaints
- weigh and measure goods
- observation and analysis skills to anticipate customer behaviour
- self-management skills to follow set routines and procedures

### Required knowledge

- add-on selling concepts
- conflict-resolution strategies
- functions and procedures for operating the store telephone system and other communication equipment, and the relevant numbers
- greeting and farewelling techniques
- location of store departments
- merchandise and service range of store departments
- non-verbal cues indicating customer behaviour
- questioning and active listening techniques
- relevant legislation and statutory requirements, including work health and safety (WHS)
- store policy and procedures in regard to:
  - customer service
  - dealing with customer complaints
  - allocated duties and responsibilities
  - customer returns and refunds
  - lay-by, gift voucher and rain-check procedures
- strategies for handling difficult or abusive customers

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- accesses, records and processes sales orders accurately and responsibly, according to store policy and procedures
- identifies the nature of customer complaints, resolves complaints and provides service to customers according to store policies
- collaboratively works within a team to meet customers' needs

- applies store policy and procedures and industry codes of practice in regard to customer service
- provides a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure
- uses effective questioning, active listening and observation skills to identify special customer requirements.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - sales order forms
  - complaint and return forms
  - stock, inventory and price lists
  - store policy and procedures manuals
- a range of customers with different requirements
- point-of-sale equipment and materials
- a communication system or a range of communication equipment.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility

of the item, and local industry and regional contexts) may also be included.

**Communication**

techniques may include:

- face-to-face or telephone contact with customers
- non-verbal communication
- speaking clearly and concisely
- using appropriate language
- using open and inclusive language.

**Customers** may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

**Store policy** may relate to:

- cash handling
- customer service
- dealing with customer complaints
- processing sales orders.

**Customer needs** may include:

- information regarding store facilities and services
- location of specific items within the store
- product information
- returns or refunds.

**Legislative requirements** may include:

- liquor licensing regulations
- lottery legislation
- sale of second-hand goods
- sale of X and R-rated products
- tobacco laws
- Trade Practices Act
- trading hours
- transport, storage and handling of goods.

**Service** may include:

- all store activities
- internal and external customers
- follow-up in event of delays in service provision.

**Complaints** may relate to:

- prices
- products
- service.

**Follow-up action** may require:

- communication with:
  - customers
  - staff
  - supervisors and management
  - suppliers
- recommendations to supervisor regarding policy and procedure development or alteration.

## SIRXCLM001A Organise and maintain work areas

### Modification History

Not applicable.

### Unit Descriptor

#### Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain and organise work areas in a retail environment. It involves applying personal hygiene practices and the organised use of equipment and chemicals to keep the workplace tidy, clean and safe.

### Application of the Unit

#### Application of the unit

This unit requires the team member to demonstrate and apply knowledge of workplace policies, legislative requirements and manufacturer instructions in order to utilise tools, chemicals and equipment for the safe and efficient cleaning, organisation and maintenance of work areas. Frontline service personnel are responsible for this function.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

#### Prerequisite units

Nil

## Employability Skills Information

**Employability skills** The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Organise work area.	<p>1.1 Maintain <b><i>work areas</i></b> in a safe, uncluttered and organised manner according to <b><i>store policy and procedures</i></b>.</p> <p>1.2 Carry out all <b><i>routines</i></b> safely, effectively and efficiently with minimum inconvenience to <b><i>customers</i></b> and <b><i>staff</i></b> according to store policy.</p> <p>1.3 Apply store policy and procedures for tidying work areas and placing items in designated areas.</p>
2 Clean work area.	<p>2.1 Apply store policy and procedures for personal hygiene.</p> <p>2.2 Apply store policy and procedures for cleaning of work area.</p> <p>2.3 Remove and dispose of waste promptly according to store policy and <b><i>legislative requirements</i></b>.</p> <p>2.4 <b><i>Report</i></b> spills, food, waste, or other potential hazards to <b><i>relevant personnel</i></b> and remove from floors according to store policy and legislative requirements.</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	2.5 Promptly display signage in regard to <i>unsafe areas</i> .
	2.6 Maintain equipment and consumable materials and store correctly after use.
	2.7 Use and clean <i>tools and equipment</i> (including guards) according to manufacturer instructions and legislative requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- using and maintaining cleaning equipment
- using and storing chemicals, hazardous substances and flammable materials
- using electrical and other equipment safely
- literacy and numeracy skills in reading and understanding manufacturer instructions
- reading and understanding warning labels and instructions for the use of chemicals and hazardous substances.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - housekeeping
  - use and maintenance of store cleaning equipment
  - personal hygiene
  - waste disposal and environmental protection
  - reporting problems and faults
- relevant OHS regulations
- relevant labels to identify chemicals and hazardous substances, HAZCHEM labels
- manufacturer instructions for use of cleaning materials or hazardous substances
- manufacturer instructions for use of cleaning equipment
- relevant legislation and statutory requirements
- relevant industry codes of practice.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently applies housekeeping duties to work area, point-of-sale terminals, walkways, fixtures and display areas
- consistently applies safe working practices in the operation and maintenance of a range of cleaning and housekeeping equipment according to:
  - store policy and procedures
  - OHS legislation and codes of practice
  - industry codes of practice
  - manufacturer instructions and design specifications
- applies store housekeeping program for work area and reports faults and problems to relevant person or department
- reads, interprets and applies manufacturer instructions for cleaning products, tools and equipment
- completes tasks in set timeframe.

#### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated work environment
- cleaning and store housekeeping equipment and materials
- relevant documentation, such as:
  - store policy and procedures manuals on housekeeping, cleaning and OHS
  - manufacturer instructions and operation manuals on cleaning equipment and materials
  - manual handling regulations and industry codes of practice
  - plant and equipment regulations.

## EVIDENCE GUIDE

### Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCOM001A Communicate in the workplace
- SIRXIND001A Work effectively in a retail environment
- SIRXOHS001A Apply safe working practices
- SIRXICT001A Operate retail technology.

### Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the

## **RANGE STATEMENT**

performance criteria is detailed below.

**Work areas** may include:

- counters
- benches
- sinks
- storage areas
- point-of-sale terminals
- point-of-sale areas
- preparation areas
- walkways and aisles
- displays
- fixtures and working surfaces.

**Store policy and procedures** may relate to:

- housekeeping practices
- personal hygiene
- maintenance and storage of cleaning equipment
- use and storage of cleaning chemicals
- job descriptions and responsibilities
- OHS
- interaction with:
  - customers
  - other team members
  - supervision and management.

Handling and cleaning **routines** may vary according to:

- stock characteristics
- industry codes of practice.

**Customers** may include:

- new or repeat contacts
- internal and external contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

**Staff** may be:

- management
- other staff members

## RANGE STATEMENT

- full-time, part-time, contract or casual staff
  - from within or outside own work team
  - from a range of social, cultural and ethnic backgrounds.
- Legislative requirements* may include:
- federal, state and local health and hygiene
  - waste removal
  - environmental protection
  - transport, storage and handling of goods
  - hazardous substances and dangerous goods
  - labelling of workplace substances
  - OHS
  - use of protective clothing and equipment.
- Reporting* may be conducted:
- face to face
  - by email
  - by phone
  - by fax.
- Relevant personnel* may include:
- manager
  - area supervisor
  - team leader
  - colleagues.
- Unsafe areas* may include:
- spills
  - sharp edges
  - loose wiring
  - customer and public areas
  - staff-only areas.
- Tools and equipment* may relate to:
- point of sale
  - cleaning
  - display and promotion
  - food preparation
  - storage.

## SIRXCLM402 Manage store facilities

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXCLM002A Manage store facilities.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves managing the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts, and identifying and locating facilities requirements.

The unit covers the application of store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment.

### Application of the Unit

This unit applies to staff with managerial responsibility in a retail environment.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

#### Element

#### Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Manage store maintenance program.

- 1.1. Monitor and maintain premises, fittings, fixtures and equipment, according to *store policy and procedures* and *relevant legislation*.
- 1.2. Identify deficiencies in store maintenance procedures and take remedial action as required.
- 1.3. Obtain *expert or specialist advice* as required, according to store policy.
- 1.4. Initiate contingency plan within scope of authority in the event of maintenance problems.

2. Manage retail equipment maintenance.

- 2.1. Develop and implement procedures to ensure retail equipment is maintained according to store policy.
- 2.2. Monitor and implement maintenance program for retail equipment, according to manufacturer design specifications and store policy.
- 2.3. Identify and rectify equipment faults where possible, without undue delay.
- 2.4. **Report** equipment faults or failures, according to service agreements and store policy.

3. Negotiate maintenance contracts.

- 3.1. Negotiate maintenance *contracts* with contractors and suppliers according to store policy and procedures.
- 3.2. Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to *relevant personnel*.
- 3.3. Monitor maintenance procedures to ensure products and tasks meet contract specifications.

4. Identify facilities and space requirements.

- 4.1. Identify facilities and space requirements to reflect business needs and volume, according to store policy and budget requirements.
- 4.2. Locate suitable facilities and space to facilitate expansion or change of use in line with store policy and procedures.
- 4.3. Consult, as required, with senior manager or business owner to determine optimum strategy for store space and location.

4.4. Maximise use of space, with consideration to existing configuration, to optimise the merchandising of existing and incoming stock.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - ensure listening and understanding
  - negotiate contracts and relay contractual requirements to staff
  - obtain expert or specialist advice
  - report faults
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- negotiation skills to negotiate maintenance contracts with contractors and suppliers
- literacy and numeracy skills to:
  - apply accounting processes and record data
  - develop, document and record procedures
  - estimate measurements and volumes
  - maintain records
  - read and interpret manufacturer instructions
  - work within a budget

### Required knowledge

- store policy and procedures in regard to:
  - maintenance of store facilities
  - maintenance of retail equipment
- maintenance contract terms and options
- contract specifications
- relevant legislation and statutory requirements relating to managing store facilities, including:
  - work health and safety (WHS) legislation
  - food safety legislation and regulations
- relevant industry codes of practice relating to managing store facilities
- principles and techniques in:

- monitoring performance of contracts
- negotiating, in particular contract negotiation
- interpersonal communication

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and uses space and facilities effectively
- evaluates and reports on effectiveness of maintenance contracts.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - maintenance contracts
  - store policy and procedures on maintenance of facilities, and contract negotiation
  - relevant legislation and statutory requirements
  - WHS
  - legislation and industry codes of practice
- a team
- equipment and technology.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- case study or research report
- written or verbal questioning to assess knowledge and understanding

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment** Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Store policy and procedures*** in regard to:
- store maintenance
  - facilities management
  - reporting mechanisms
  - WHS
  - food safety.
- Relevant legislation*** may include:
- federal, state or territory and local legislation
  - food safety regulations
  - WHS.
- Expert or specialist advice*** may be sought regarding:
- point-of-sale terminals
  - EFTPOS terminals
  - computers, scanners and printers
  - pricing equipment
  - electronic bar coding equipment
  - portable data entry
  - electronic ordering equipment
  - wrapping and packing equipment
  - equipment for carrying or moving merchandise
  - equipment for storage of merchandise, including refrigerators
  - weighing machines
  - thermometers
  - security tag systems
  - trolley return equipment
  - fixtures and fittings
  - food preparation equipment.
- Faults may be ***reported***:
- verbally
  - in writing
  - by email
  - to service personnel

- to contractors
  - to relevant managers
  - to supervisor.
- Contracts:**
- may be negotiated internally and externally
  - may involve:
    - quality standards
    - building maintenance services
    - cleaning
    - security
    - electrical services
    - plumbing services
    - equipment maintenance.
- Relevant personnel** may include:
- managers
  - supervisors
  - specialist staff.

Record store and individual department takings and file <b><i>records</i></b> according to store policy.                            |

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- literacy and numeracy skills to:
  - balance the register or terminal
  - count cash
  - calculate non-cash transactions
  - calculate discrepancies between reported and actual takings
  - complete documentation

- interpret documentation
- report on takings
- planning and organising skills to complete tasks in a set timeframe
- technology skills to operate register or terminal

### Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale terminal
  - calculating non-cash documents
  - change required and denominations of change
  - clearance of terminal and transference of tender
  - counting cash
  - credit and returns
  - credit cards
  - EFTPOS
  - gift vouchers
  - lay-by
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- store policy and procedures in regard to:
  - cash float
  - operation of equipment used at register or terminal
  - register or terminal balance
  - security of cash and non-cash transactions

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- applies store policy and procedures in regard to cash float

- applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

### Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - financial transaction dockets, slips and invoices
  - sample debit card and credit card vouchers
  - recording and tally sheets
  - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXRSK201 Minimise loss.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Register or terminal*** may be:
- cleared at intervals during or at close of trading
  - cleared by operator or specialist staff
  - electronic

- Store policy and procedures*** in regard to:
- manual.
  - cash handling
  - register or terminal balance
  - security.
- Non-cash documents*** may relate to:
- cash on delivery (COD)
  - cheques
  - credit cards
  - customer credit ratings
  - customer refunds
  - gift vouchers
  - hire-purchase
  - lay-by.
- Relevant personnel*** may include:
- manager
  - supervisor
  - team leader.
- Records*** may be:
- electronic
  - manual.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Process petty cash transactions.	1.1. Check petty cash claims for approval, accuracy and authenticity before processing. 1.2. Check and balance transactions according to <i>store policy and procedures</i> . 1.3. Note irregularities and refer to <i>relevant personnel</i> for resolution. 1.4. Process and record petty cash transactions within designated time limits.
2. Prepare banking documents.	2.1. Balance cashbook entries against record of takings. 2.2. Compile and balance deposit entries. 2.3. List cash and <i>non cash transactions</i> on banking deposit forms, according to the banking institution's guidelines. 2.4. Process in store credit systems according to store policy.
3. Process non cash transactions.	3.1. Balance non cash transactions and present <i>documentation</i> to relevant personnel for checking. 3.2. Note irregularities and refer to relevant personnel for resolution.
4. Reconcile invoices for payment to creditors.	4.1. Identify discrepancies between invoices and delivery notes and report to relevant personnel or section for resolution. 4.2. Identify errors in invoice charges and report to relevant personnel or section for correction or resolution. 4.3. Rectify discrepancies and errors as directed. 4.4. Process corrected and authorised invoices for payment within designated time limits. 4.5. Resolve creditor enquiries or refer to relevant personnel or section for resolution.
5. Prepare invoices for debtors.	5.1. Perform <i>preparatory calculations</i> to produce accurate customer invoices. 5.2. Complete relevant documentation to ensure accuracy of contents. 5.3. Distribute documents to relevant personnel or section for certification prior to being dispatched. 5.4. Dispatch verified documents within designated time limits. 5.5. Copy and <i>file</i> documents for auditing purposes.

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Required skills

- self management skills to complete tasks within a set timeframe
- literacy skills to interpret documentation
- numeracy skills to:
  - process petty cash transactions
  - receive and process deliveries
  - perform sales transactions
  - balance cashbook entries and takings
  - generate invoices
- interpersonal skills to:
  - refer and report irregularities, discrepancies and errors in transactions to relevant personnel
  - resolve creditor enquiries or refer to relevant personnel through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication

### Required knowledge

- store policy and procedures in regard to:
  - register or terminal balance
  - security of cash and non-cash transactions
  - petty cash
  - cash balances
  - banking procedures
  - purchase requisitions or orders
  - issuing of receipts
  - delivery dockets
  - credit notes
  - statements
  - remittance advices
  - cash register rolls
  - deposit books
  - change required and denomination of change
  - operation of equipment used at register or terminal

- processing delivery and delivery document discrepancies
- invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements
- cash and non-cash handling procedures, including:
  - opening and closing point-of-sale terminal
  - clearance of terminal and transference of tender
  - maintenance of cash balances
  - counting cash
  - calculating non-cash documents
  - customer credit ratings
  - balancing point-of-sale terminal
  - recording takings
  - change required and denominations of change
  - EFTPOS
  - credit cards
  - processing of cheques
  - gift vouchers
  - lay-by
  - cash on delivery (COD)
  - lay-by
  - credits and returns
  - customer refunds

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently applies store policy and procedures in regard to petty cash and non-cash transactions, invoicing, banking processes and processing delivery and document discrepancies
- consistently applies skills related to the reconciliation and payments of invoices for creditors and debtors, according to store policy and procedures.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated work environment

- relevant documentation, such as:
  - store policy and procedures manuals
  - financial transaction dockets, slips and invoices
  - banking deposit forms
- EFTPOS facilities and equipment
- registers and related equipment
- relevant financial management systems.

### Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXADM001A Apply retail office procedures
- SIRXICT001A Operate retail technology.

## Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

***Store policy and procedures*** in regard to:

- store financial systems.

***Relevant personnel*** may include:

- manager
- supervisor
- team leader
- specialist staff.

***Non-cash transactions*** may include:

- EFTPOS and credit cards
- customer credit ratings
- cheques
- hire-purchase
- lay-by

**Documentation** may include:

- cash on delivery (COD)
- customer refunds.
- purchase requisitions
- purchase orders
- invoices
- receipts
- delivery dockets and receipts
- credit notes
- statements
- remittance advices
- cash register rolls
- deposit books.

**Preparatory calculations** may include:

- application of prior credit
- discounting
- quantity
- calculation of GST.

Methods used to *file* documents may include:

- manual
- electronic.

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of <i>equipment</i> used in store or department. 1.2. Operate equipment, according to design specifications and <i>safety requirements</i> . 1.3. Identify equipment faults and report to <i>relevant personnel</i> . 1.4. Identify and apply maintenance program for retail equipment according to <i>store policy and procedures</i> .
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

### Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

#### Required skills

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
  - read store procedures for operating equipment
  - enter data
  - perform point-of-sale transactions
  - follow common fault-finding procedures

#### Required knowledge

- store policy and procedures in regard to:
  - the operation and maintenance of store retail equipment
  - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
  - store policy and procedure manuals
  - manufacturer instructions and operation manuals
- a range of store retail equipment.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Equipment*** may include:

- point-of-sale terminals
- electronic bar coding equipment for price labelling and stocktaking
- portable data entry
- printers
- EFTPOS terminals
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers

Act upon variations to quantity and quality of delivered goods, according to <b><i>store policy and procedures</i></b>.</p> <p>1.6. Supervise safe <b><i>handling and storage of goods</i></b>, according to store policy.</p>
<p>2. Maintain stock records.</p>	<p>2.1. Monitor and maintain stock levels at required levels.</p> <p>2.2. Maintain, monitor and adjust stock reorder cycles as required.</p> <p>2.3. Inform team members of their individual responsibilities in regard to recording of stock.</p> <p>2.4. Maintain stock storage and movement <b><i>records</i></b>, according to store policy.</p> <p>2.5. Record stock discrepancies and follow procedures according to store policy.</p> <p>2.6. Monitor stock performance and identify and <b><i>report</i></b> fast and slow selling items according to store policy.</p>
<p>3. Coordinate stocktake or cyclical count.</p>	<p>3.1. Interpret policy and procedures in regard to <b><i>stocktaking</i></b> and cyclical counts and explain to team members.</p> <p>3.2. <b><i>Roster</i></b> staff, according to allocated budget and time constraints.</p> <p>3.3. Allocate stocktaking tasks to individual team members.</p> <p>3.4. Provide team members with clear directions for the performance of each task.</p> <p>3.5. Allocate team members to ensure effective use of staff resources to complete task.</p> <p>3.6. Produce accurate reports on stocktake data, including discrepancies, for management.</p>

- |                           |   |
|---------------------------|---|
| 4. Identify stock losses. | 4.1. Identify, record and assess losses against potential loss forecast on a regular basis.                                     |
|                           | 4.2. Identify avoidable losses and establish reasons.   |
|                           | 4.3. Recommend and implement possible solutions.  |
| 5. Process orders.        | 5.1. Process and raise orders for stock as requested, according to store policy and procedures.                                 |
|                           | 5.2. Maintain <b>ordering and recording system</b> .  |
|                           | 5.3. Ensure availability of sample range, according to buying plan.   |
|                           | 5.4. Order pricing materials as required.   |
|                           | 5.5. Record negotiated purchase and supply agreements and file for retrieval.   |
| 6. Follow up orders.      | 6.1. Monitor delivery process to meet agreed deadlines.   |
|                           | 6.2. Handle routine supply problems or refer to management as required by store policy.   |
|                           | 6.3. Maintain ongoing liaison with buyers, store or departments, warehouse and <b>suppliers</b> to ensure continuity of supply. |
|                           | 6.4. Distribute stock, according to store or department allocation.   |

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Required skills

- technical skills to:
  - use store stocktaking systems
  - use electronic recording equipment
- interpersonal skills to:
  - inform team members of their responsibilities and give instructions
  - explain policies and procedures to staff
  - allocate tasks and provide directions for performance of tasks
  - liaise with buyers, store and departments, warehouse and suppliers through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- management skills to coordinate stock takes
- negotiation skills to handle supply problems
- literacy and numeracy skills to:
  - prepare and present stock control reports and documentation

- process orders
- maintain delivery and supply records
- maintain stock distribution records
- maintain stock ordering and recording systems

### Required knowledge

- store policy and procedures in regard to:
  - stock control
  - store merchandising system
  - current and future stock levels
  - bar codes, labels and price tags
  - store stock recording system
  - stock replenishment and reorder procedures
  - inter- and intra-store and department transfers
  - reporting of stock discrepancies and damage
  - identifying and recording stock losses
  - identifying and recording discrepancies
  - existing suppliers
  - quality control procedures and requirements
  - receipt and dispatch of goods, including inspection for quality and quantity
- relevant licensing requirements for moving stock mechanically
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant Work Health and Safety (WHS) legislation and codes of practice

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment** Evidence of the following is essential:

**and evidence required to demonstrate competency in this unit**

- consistently implements and monitors store policy and procedures regarding receipt, dispatch and secure storage of goods
- regularly monitors staff implementation of store procedures and documentation in regard to receipt, dispatch and secure storage of goods
- monitors stock levels, storage, movement and reorder cycles on a regular basis.
- organises and coordinates stocktake according to store

policy and procedures

- consistently raises and processes stock orders and maintains record system according to store policy and procedures
- monitors delivery processes and distributes stock to ensure continuity of supply.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures for receipt and dispatch of goods
  - store procedures for stocktake
  - WHS legislation and codes of practice
  - industry codes of practice
  - legislation and statutory requirements
  - store merchandising and marketing policy and procedures
  - inter- and intra-store and department transfer procedures
  - store quality control procedures and requirements.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## **Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Appropriate staff*** may include:

- frontline staff
- relevant managers

- supervisor
  - team leader
  - specialist staff.
- Staff** may include:
- full-time, part-time, casual or contract staff
  - people from a range of social, cultural and ethnic backgrounds
  - people with varying degrees of language and literacy levels.
- Store policy and procedures** in regard to:
- stock control
  - stock control system
  - recording procedures
  - procedures for investigating discrepancies
  - store merchandise and marketing
  - pricing, labelling and packaging requirements
  - quality control policy and procedures.
- Handling and storage of goods** may vary according to:
- stock characteristics
  - industry codes of practice.
- Records** may be:
- manual
  - digital.
- Reports** for management may include:
- financial reports
  - business documents
  - informal reports
  - stocktake reports.
- Stocktaking** may be:
- cyclical
  - compliance driven.
- Roster** may include:
- varying levels of staff training
  - staffing levels
  - routine or busy trading conditions
  - full-time, part-time or casual staff
  - range of staff responsibilities.
- Ordering and recording system** may be:
- manual
  - digital.
- Suppliers** may include:
- existing contacts
  - new contacts
  - local suppliers
  - overseas supplies.

## **Unit Sector(s)**

## **SIRXINV004A Buy merchandise**

### **Modification History**

Not applicable.

### **Unit Descriptor**

#### **Unit descriptor**

This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

### **Application of the Unit**

#### **Application of the unit**

This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

### **Licensing/Regulatory Information**

Not applicable.

### **Pre-Requisites**

#### **Prerequisite units**

Nil

**Prerequisite units** Nil

## Employability Skills Information

**Employability skills** The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse market.	<p>1.1 Identify and analyse <b><i>store merchandise and marketing policy and procedures</i></b>.</p> <p>1.2 Monitor <b><i>customer requirements</i></b> formally and informally in order to evaluate market trends and customer needs.</p> <p>1.3 Research new products and services.</p> <p>1.4 Identify, evaluate, implement and review opportunities to improve sales.</p> <p>1.5 Monitor <b><i>merchandise range</i></b> to identify the demand for individual items and seasonal variations.</p> <p>1.6 Monitor market competition.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Analyse factors affecting stock levels and range requirements.	2.1 Apply mathematical calculations to measure analyse and report on existing and potential stock loss and dissipation and its <i>impact on business operations</i> . 2.2 Analyse store or department sales figures to determine contribution rates of product lines. 2.3 Determine store or department space requirements and brand product mix according to store policy. 2.4 Determine future directions for merchandise ranges according to store policy.
3 Plan merchandise ranges.	3.1 Develop and implement buying plan according to outcomes of analysis and store policy. 3.2 Determine future directions for merchandise ranges according to store policy. 3.3 Liaise with <i>relevant personnel</i> to coordinate promotional and marketing activities. 3.4 Analyse store or department sales figures to determine contribution rates of product lines. 3.5 Determine investment levels with reference to previous years' sales figures, predicted demand and projected gross profit. 3.6 Identify and act upon contribution improvement opportunities. 3.7 Determine store or department space requirements and brand product mix according to store policy. 3.8 Determine stock levels according to peak seasons, special events and supplier lead time. 3.9 Analyse, evaluate and amend merchandise range and sources of supply according to management, staff and customer <i>feedback</i> .
4 Establish supplier relations.	4.1 Develop cooperative relationships with supplier representatives according to store policy. 4.2 Continuously review existing suppliers in regard to quality, profitability, service and delivery status. 4.3 Identify new suppliers and delete existing suppliers according to <i>performance indicators</i> .

ELEMENT	PERFORMANCE CRITERIA
5 Negotiate supply of goods.	<p>5.1 <i>Negotiate</i> and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.</p> <p>5.2 Authorise special <i>pricing arrangements</i> and customer payment agreements and communicate to relevant staff and management personnel according to store policy.</p> <p>5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.</p> <p>5.4 Identify <i>market factors</i> affecting supply and communicate to relevant personnel.</p> <p>5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.</p> <p>5.6 Take immediate corrective action where potential or actual problems with supply are indicated.</p> <p>5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.</p> <p>5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback.</p>
6 Monitor quality control.	<p>6.1 Establish merchandise quality standards with suppliers according to <i>legal requirements</i>, customer requirements and store policy.</p> <p>6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.</p> <p>6.3 Record and analyse stock return figures against target figure.</p>
7 Introduce product ranges.	<p>7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.</p> <p>7.2 Implement <i>staff training</i> in product knowledge to introduce product range.</p> <p>7.3 Demonstrate or display new ranges to <i>staff</i> according to store merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
8 Maximise profit.	8.1 Calculate or estimate individual product range contributions against budget and targets. 8.2 Develop and implement product range assessment checks against budget and targets. 8.3 Calculate or estimate overall selling space contributions according to store merchandising plan. 8.4 Maximise profit margins in negotiations with suppliers. 8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law. 8.6 Negotiate specifications for <i>terms of trade</i> .
9 Rationalise stock.	9.1 Review and update stock range at regular intervals. 9.2 Identify stock lines to be <i>deleted</i> and take action to minimise adverse effect on profit. 9.3 <i>Consolidate stock</i> as required to maximise sales potential.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
  - market trends and projections
  - sales figures and investment levels
  - space requirements
- negotiation skills
  - interpersonal communication skills to:
    - liaise with relevant personnel
    - establish supplier relationships, negotiate supply of goods
    - provide information and training on product range
    - provide feedback and coaching through clear and direct communication

## **REQUIRED SKILLS AND KNOWLEDGE**

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
  - developing pricing policies
  - calculating and estimating product range contributions
  - calculating the cost of stock loss and dissipation
  - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - marketing
  - buying
  - profit margins
  - quality control
  - stock inventory levels: current and future
  - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
  - market needs
  - range of merchandise available
  - market competition
  - existing and possible new suppliers
  - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
  - pricing procedures, including GST requirements.

## **Evidence Guide**

### **EVIDENCE GUIDE**

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
  - store policy and procedures
  - legislation and statutory requirements
  - industry codes of practice
  - merchandise and supplier data.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback

## EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

### Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Store merchandise and marketing policies*** may include:

- store culture
- current market position
- target market.

***Customer requirements*** may be monitored by:

- questionnaires
- surveys
- observation.

***Merchandise range*** may include:

- existing stock
- new stock.

## RANGE STATEMENT

***Impact on business operations*** may include:

- buying
- ordering patterns
- planning
- budgeting.

***Relevant personnel*** may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

***Feedback*** may be sought and given:

- verbally
- in writing
- in groups
- individually.

***Performance indicators*** may include:

- price
- quality
- performance
- supply reliability
- merchandise range.

***Negotiation*** process may include:

- face-to-face
- correspondence
- meetings
- telephone or electronic media.

***Pricing arrangements*** may include:

- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

***Market factors*** may include:

- fashion trends

## RANGE STATEMENT

- product availability
  - sales performance.
- Legal requirements* may include:
- sale of second-hand goods
  - Trade Practices and Fair Trading Acts
  - licence, patent or copyright arrangements
  - pricing procedures, including GST requirements.
- Staff training* may include:
- on-the-job
  - off-the-job
  - one-on-one coaching
  - any combination of the above.
- Staff* may include:
- full-time, part-time, casual or contract staff
  - people from a range of social, cultural and ethnic backgrounds
  - people with varying degrees of language and literacy levels.
- Terms of trade* may include:
- special buys
  - payment terms
  - promotional deals with supplier.
- Stock lines may be *deleted* due to:
- changes in store policy and culture
  - sales performance
  - customer requirements
  - fashion trends
  - product availability
  - problems with supply.
- Methods to *consolidate stock* may include:
- movement of stock between departments or stores.

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to control inventory in a retail environment. It involves managing receipt, dispatch and storage of merchandise, and managing stock control.

### Application of the Unit

This unit applies to team members at a supervisory level who plan, coordinate and implement activities associated with the receipt, dispatch, storage and movement of merchandise. This includes observing maintenance procedures for storage areas and equipment, according to store policy and procedures and relevant legislation.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

<b>Element</b>	<b>Performance criteria</b>
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Manage receipt, dispatch and storage of merchandise.	1.1. Receive, dispatch and store merchandise according to <b><i>store policy and procedures</i></b> . 1.2. Determine cost-effective and efficient methods for goods movement according to store policy. 1.3. Implement maintenance procedures for storage areas and <b><i>equipment</i></b> according to store policy.
2. Manage stock control.	2.1. Implement store policy and procedures in regard to <b><i>stock control</i></b> and inventories. 2.2. Establish and implement store procedures to monitor and control stock levels. 2.3. Maintain budgeted stock levels. 2.4. Establish and implement stocktaking procedures. 2.5. Establish and implement <b><i>contingency plans</i></b> in regard to stock delivery times. 2.6. Document and prepare accurate <b><i>reports</i></b> on stock inventories.

### Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

#### Required skills

- technical skills to use electronic recording equipment
- time management skills to maintain stock levels according to store policy and procedure requirements
- literacy and numeracy skills to:
  - maintain stock control reports and documentation
  - process orders
  - maintain delivery and supply records
  - maintain stock distribution records
  - maintain stock recording systems

- analyse data
- prepare and present reports

### **Required knowledge**

- store policy and procedures in regard to:
  - receipt of goods from suppliers
  - dispatch of goods
  - shrinkage prevention
  - waste controls
  - safety controls
  - secure storage in an appropriate environment
  - equipment used to move stock
- store systems and equipment for stock recording and control
- inventory control
- storage security
- licensing requirements for operating moving equipment (if applicable)
- relevant legislation and statutory requirements
- relevant industry codes of practice
- Work Health and Safety (WHS) legislation and codes of practice

### **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit** Evidence of the following is essential:

- plans, coordinates and implements activities associated with receipt, dispatch, storage and movement of merchandise according to store policy and procedures, including OHS policies and guidelines
- implements maintenance procedures for storage areas and equipment according to store policy
- plans, coordinates and implements activities associated with stock control, including:
  - monitoring and controlling stock levels
  - establishing and maintaining stocktaking procedures
  - documenting and reporting on inventories according to store policy and procedures.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures on inventory control
  - legislation and statutory requirements
  - industry codes of practice
  - WHS legislation and codes of practice
- access to:
  - a stock control system
  - stock control equipment
  - a team.

**Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Store policy and procedures*** in regard to:

- receipt of goods from suppliers
- dispatch of goods
- shrinkage prevention
- waste controls
- safety controls
- secure storage
- stock control and inventories.

***Equipment*** may include:

- electronic bar coding equipment
- weighing machines
- thermometers

- climate control
  - cold storage units
  - storage fixtures
  - trolley return equipment
  - portable data entry
  - cutting equipment
  - protective clothing.
- Stock control* may include:
- stocktaking
  - monitoring stock levels
  - cyclical counts
  - minimisation of out-of-date stock
  - quality control.
- Contingency plans* may include:
- breakdowns
  - delays
  - floods
  - breakages.
- Reports* may include:
- business documents
  - informal reports
  - stocktake reports.

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage store merchandising.	<p>1.1 Ensure layout and presentation support market position and promote customer flow according to store <b><i>visual merchandising policies and plans</i></b>.</p> <p>1.2 Develop and implement layout assessment checks.</p> <p>1.3 Define standards for visual presentations and displays and clearly communicate to all staff</p> <p>1.4 Consult floor staff to assess customer response to space allocations.</p>
2 Plan and manage store advertising and promotions.	<p>2.1 Manage and implement store policies and procedures, in regard to store <b><i>promotional activities</i></b>.</p> <p>2.2 Organise activities in line with anticipated or researched customer requirements.</p> <p>2.3 Manage <b><i>promotions</i></b> in order to achieve maximum customer impact.</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	2.4 Negotiate arrangements with suppliers in regard to special promotional activities.
	2.5 Coordinate store activities to complement shopping centre or retail complex promotions.
	2.6 Develop and implement assessment checks to measure effectiveness of promotions, including layout, visual impact and customer response.
	2.7 Document and report on promotional activities.
3 Manage store pricing policies.	3.1 Maintain store pricing according to <i>organisation pricing policies and procedures</i> in regard to pricing.
	3.2 Maintain accurate information on pricing trends and changes and communicate to relevant staff.
	3.3 Develop and implement procedures for pricing according to store policies and <i>legislative requirements</i> .
4 Manage housekeeping.	4.1 Develop and implement store policies and procedures in regard to <i>store housekeeping and maintenance</i> .
	4.2 Develop and manage rosters or schedules, ensuring store housekeeping standards are monitored and maintained.
	4.3 Initiate <i>contingency plan</i> in the event of merchandise or store presentation problems.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- providing feedback on performance
- interpersonal communication skills to:
  - communicate store standards and expectations to staff
  - consult floor staff
  - negotiate arrangements with suppliers, through clear and direct communication
  - ask questions to identify and confirm requirements

## **REQUIRED SKILLS AND KNOWLEDGE**

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- roster development
- report writing
- literacy skills in regard to:
  - researching, analysing and interpreting a broad range of written material
  - preparing rosters
  - preparing reports
  - documenting results

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
  - layout and presentation
  - advertising and promotions
  - pricing or marking down of goods, including risk assessment
  - housekeeping for premises, fittings, fixtures and equipment
  - store merchandise and service range
  - store merchandising plan
  - range and availability of new products and services
  - customer demand and market trends
  - product quality standards
- OHS legislation and codes of practice
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements
- principles and techniques in:
  - visual merchandising
  - project management

## **Evidence Guide**

### **EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

## EVIDENCE GUIDE

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- collaboratively plans layout and presentation of merchandise according to store policies and procedures
- assesses effectiveness of layout and presentation according to sales targets or predetermined objectives
- collaboratively plans, coordinates and implements advertising and promotions activities according to store policies and procedures
- assesses and reports on effectiveness of advertising and promotions to staff and management according to store policies and procedures
- collaboratively plans, coordinates and implements pricing activities according to store policies and procedures
- collaboratively plans, coordinates and implements housekeeping activities according to store policies and procedures and OHS legislation, regulations and codes of practice.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store merchandising plan
  - legislation and statutory requirements
  - OHS legislation, regulations and codes of practice
- a work team.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the

## EVIDENCE GUIDE

industry sector, workplace and job role is recommended.

### Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Visual merchandising policies and plans*** may include:

- target market
- market research
- store image
- store layout and space availability
- seasonal lines
- pricing policy.

***Promotional activities*** may involve:

- external and in-store activities
- corporate or locally based activities
- dealing with advertising agencies and consultants.

***Promotions*** may include:

- advertising
- catalogues
- newspapers
- posters

## RANGE STATEMENT

- Organisation pricing policies and procedures* may include:
- radio or TV
  - suppliers
  - internet
  - website.
  - marking down of slow moving stock
  - soiled or damaged goods
  - goods close to use-by date
  - end of season stock
  - pricing policies, including GST requirements.
- Legislative requirements* may include:
- Trade Practices and Fair Trading Acts
  - consumer law.
- Store housekeeping and maintenance* may include:
- store premises
  - fittings
  - fixtures
  - equipment.
- Contingency plan* may include:
- major spillages
  - flood, storm or cyclone
  - breakages
  - blackout
  - break-in.

- legislative requirements.
- 3.5. Identify optimum stock levels and replenish stock according to store policy.
- 3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.
4. Protect merchandise.
- 4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - read and interpret store procedures and guidelines
  - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

### Required knowledge

- store policies and procedures in regard to:
  - availability and use of display materials
  - correct storage of stock
  - correct storage procedures for labelling and ticketing equipment and materials
  - location of display areas
  - merchandise range
  - merchandising, ticketing and pricing of stock
  - scheduling for building or rotating displays
  - stock replenishment
  - stock rotation
  - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
  - manual handling
  - hygiene and sanitation

- hazardous substances
- labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
  - store policy and procedures
  - industry codes of practice
  - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props

- cleaning materials
- relevant documentation, such as:
  - store policy and procedure manuals on housekeeping, merchandising and WHS
  - manufacturer instructions and operation manuals for electronic ticketing equipment
  - relevant legislation and industry codes of practice.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS201 Sell products and services
- SIRXSLS002A Advise on products and services.

## **Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

***Merchandise*** may be characterised by:

- type
- brand
- size
- customer needs
- colour
- price.
- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.
- pricing requirements, including GST requirements

***Store policy and procedures*** in regard to:

***Legislative***

- requirements** may include:
- industry codes of practice
  - discounted items
  - Australian Consumer law.
- Display** may include:
- setting new displays
  - maintaining existing displays.
- Handling techniques** may vary according to:
- stock characteristics
  - store policy
  - legislative requirements
  - industry codes of practice.
- Safety requirements** may relate to:
- transport, storage and handling of goods
  - hazardous substances
  - labelling of workplace substances.
- Preparation of **labels and tickets** may involve:
- pricing gun
  - shelf tickets
  - shelf talkers
  - written labels
  - swing ticketing
  - bar coding
  - price boards
  - header boards.
- Special promotion areas** may be:
- permanent or temporary
  - interior or exterior
  - publicly accessible
  - windows
  - shelves
  - wall fixtures
  - on floor.

## SIRXMER202 Plan, create and maintain displays

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER005A Create a display.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify requirements for displays, develop display ideas, obtain approval from relevant personnel, and plan and build displays. It also covers maintaining displays to meet the requirements of the product, the audience and the organisation.

### Application of the Unit

This unit applies to floor and sales team members responsible for merchandise displays for a retail business.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify requirements for displays.	1.1. Identify <i>purpose, audience</i> and products for each display. 1.2. Identify organisational requirements and research <i>relevant information</i> where required. 1.3. Identify available budget and <i>resources</i> required to create the display. 1.4. Identify and consider <i>constraints or factors</i> that may affect the creation of the display.
2. Develop display ideas.	2.1. Generate ideas for the display using <i>creative thinking techniques</i> . 2.2. Test ideas against display and <i>organisational requirements</i> . 2.3. Discuss <i>display options</i> with relevant personnel. 2.4. Modify display ideas and refine according to <i>feedback</i> and confirm with <i>relevant personnel</i> .
3. Plan and build displays.	3.1. Develop ideas into simple <i>display plans</i> . 3.2. Source resources, materials and products to meet plan requirements. 3.3. Create displays following display plans. 3.4. Seek assistance from relevant personnel where required. 3.5. Review display and make refinements as required.
4. Maintain displays.	4.1. Regularly clean and tidy displays and replace products as necessary according to display plans. 4.2. Make changes or alterations to the display as appropriate.

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication and interpersonal skills to:

- communicate display ideas to others
- seek and accept feedback through clear and direct communication
- use and interpret non-verbal communication
- use language and concepts appropriate to cultural differences
- creative thinking and design skills to generate ideas for improving displays
- initiative and enterprise skills to ensure efficient and cost-effective use of resources
- observation skills to identify when display needs to be changed, updated or altered
- sketching and writing skills to represent ideas in a simple display plan

### Required knowledge

- audiences for and required effects of displays
- basic design principles, including:
  - colour
  - flow of product
  - shape
  - use of space
- organisational requirements, including:
  - environment, health and safety compliance
  - location of displays
  - visual merchandising standards
- visual merchandising display options

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- identifies the requirements for new displays
- creates display plans that meet the requirements of the product, audience and organisation
- plans and builds displays, according to plans
- maintains displays.

### Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as store policy and procedures manuals
- display space
- a range of display products and materials.

<b>Method of assessment</b>	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: <ul style="list-style-type: none"><li>• observation of performance in the workplace</li><li>• third-party reports from a supervisor</li><li>• customer feedback</li><li>• written or verbal questioning to assess knowledge and understanding.</li></ul>
<b>Guidance information for assessment</b>	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Purpose</i></b> of display may include:	<ul style="list-style-type: none"><li>• attracting customers into the store</li><li>• new products</li><li>• new range</li><li>• promotion</li><li>• sale.</li></ul>
<b><i>Audience</i></b> for display may include:	<ul style="list-style-type: none"><li>• internal and external foot or vehicular traffic</li><li>• new or repeat customers</li><li>• people from a range of social, cultural and ethnic backgrounds</li><li>• people with varying physical and mental abilities</li><li>• people of different ages</li><li>• people with varying degrees of language and literacy.</li></ul>
<b><i>Relevant information</i></b> may be sourced from:	<ul style="list-style-type: none"><li>• colleagues</li><li>• direct observation</li><li>• internet</li><li>• magazines</li><li>• marketing personnel</li><li>• technical personnel</li><li>• written reports.</li></ul>
<b><i>Resources</i></b> may include:	<ul style="list-style-type: none"><li>• equipment and technology</li><li>• fixtures and fittings</li></ul>

- labels and tickets
  - new or recycled materials
  - staff
  - time.
- Constraints or factors*** may include:
- availability of materials
  - budget
  - product characteristics
  - space
  - staff
  - time.
- Creative thinking techniques*** may include:
- brainstorming
  - creative writing
  - drawings
  - lateral thinking
  - mind mapping
  - product association
  - telling stories
  - using prompts
  - visualising.
- Organisational requirements*** may include:
- aesthetics
  - allocated space
  - branding
  - budget
  - work health and safety (WHS)
  - organisational standards
  - staff
  - store policy and procedures, including:
    - housekeeping and waste disposal procedures
    - WHS procedures.
- Display options*** may include:
- indoor or outdoor
  - lighting
  - sound
  - static or moving.
- Feedback*** may be sought and received:
- in groups
  - in writing
  - individually
  - verbally.
- Relevant personnel*** may include:
- external personnel with visual merchandising expertise
  - manager
  - team leader.
- Display plans*** may
- checklist of materials and equipment required

include:

- simple sketches of planned display.

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Instruct and coordinate staff.	<p>1.1. Communicate and demonstrate store <i>display standards and requirements</i> to staff.</p> <p>1.2. Identify occurrence and timing of promotions and special events and inform staff.</p> <p>1.3. Identify items to be advertised or promoted, according to store merchandising policy and inform staff.</p> <p>1.4. Identify appropriate timing for dismantling and disposing of displays and inform staff.</p>
2. Supervise construction and maintenance of presentations.	<p>2.1. Plan and coordinate promotions and special events as directed by management.</p> <p>2.2. Plan and supervise construction and maintenance of <i>displays</i> in order to achieve balance and visual impact.</p> <p>2.3. Ensure product or service <i>display information</i> accurately depicts product or service being promoted.</p> <p>2.4. Ensure displays are completed according to required time schedule, with minimum disruption to <i>customer</i> service and traffic flow.</p> <p>2.5. Ensure displays are constructed and maintained in a safe and secure manner.</p> <p>2.6. Regularly monitor replenishment of merchandise and rotation of stock on store displays and take action as required.</p>
3. Implement merchandise pricing.	<p>3.1. Implement store policy and procedures in regard to pricing and ticketing.</p> <p>3.2. Identify current prices for products and services and amend according to store policy.</p> <p>3.3. Inform team members of price changes and current pricing policies.</p>
4. Review merchandise presentations.	<p>4.1. Evaluate promotions or special events against sales turnover and store presentation standards.</p> <p>4.2. Evaluate merchandise presentation against sales turnover and store presentation standards.</p> <p>4.3. Provide management with feedback in regard to improvement of</p>

store marketing and promotional activities.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - give instructions
  - provide feedback to management through clear and direct communication
  - provide information to staff
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - present and price merchandise
  - read and interpret store policies and procedures
- observation skills to assess display and presentation compliance with visual merchandising standards
- technology skills to operate and maintain electronic labelling and ticketing equipment
- team leadership skills to:
  - instruct and support staff
  - supervise staff activities

### Required knowledge

- availability and use of materials
- correct storage procedures for labelling and ticketing equipment and materials
- load-bearing capacity of fixtures and display areas
- location of display areas
- manufacturer specifications for the use of electronic labelling and ticketing equipment
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication skills
- principles of display and design
- procedure for accessing information and implementing price changes
- relevant industry codes of practice relating to coordinating merchandise presentation
- relevant legislation and statutory requirements relating to coordinating merchandise presentation, including Australian Consumer Law

- relevant work health and safety (WHS) legislation and codes of practice
- store policies and procedures in regard to:
  - efficient use of resources
  - merchandise range
  - merchandising, pricing and ticketing
  - minimum stock levels required
  - stock rotation and replenishment
  - storage of stock
- store promotional themes

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- implements and instructs staff regarding store display, merchandising, ticketing and pricing policies and procedures
- coordinates and monitors display, promotion and presentation of merchandise according to store policies and procedures and legislative requirements
- identifies products to be advertised or promoted according to store merchandising policies
- coordinates construction and maintenance of displays within time schedule set in regard to advertising, catalogues, special offers and in-store promotions in a safe and secure manner
- informs staff of pricing policies, promotions, special events, display standards and requirements, and timing for dismantling and disposing of displays
- evaluates and reports effectiveness of store merchandising and promotional activities to management and staff as required by store policies and procedures.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a real or simulated retail work environment
- pricing and ticketing equipment
- merchandise for display
- display materials and props
- relevant documentation, such as:
  - store policy and procedures manuals on merchandising
  - WHS requirements

- manufacturer instructions and operation manuals on electronic ticketing equipment
- legislation and statutory requirements
- industry codes of practice
- a work team.

**Method of assessment** A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

**Guidance information for assessment** Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

***Display standards and requirements*** may include:

- maintaining existing displays
- safety
- setting up new displays
- ticketing and display signage.

***Staff*** may be:

- from a range of social, cultural and ethnic backgrounds
- from within or outside own work team
- full-time, part-time, casual or contract.

***Displays*** may be located in a variety of areas, including:

- fixtures on floor
- interior or exterior
- permanent or temporary
- publicly accessible areas
- shelves
- walls
- windows.

***Display information*** may include:

- discount information
- price

- product brand
- special guarantees
- product characteristics, such as:
  - size
  - weight capacity
  - materials.

*Customers* may include:

- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

## SIRXMER406 Monitor in-store visual merchandising display

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER003A Monitor in-store visual merchandising display.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to interpret organisational visual merchandising plans and manuals and monitor in-store displays to ensure that they reflect and maintain current organisational visual merchandising directions.

It involves applying fundamental design principles, making decisions with regard to merchandise for display, and ensuring that displays contribute to the visual merchandising standards of the organisation and are constructed and located to ensure customer and staff safety.

### Application of the Unit

This unit applies to frontline visual merchandising team members and other staff with a responsibility for monitoring displays to ensure they reflect and maintain current organisational visual merchandising directions.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

<b>Element</b>	<b>Performance Criteria</b>
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Interpret a visual merchandising plan.	1.1. Identify <i>design requirements</i> of visual merchandising plan or manual. 1.2. Source <i>resources required</i> to implement plan. 1.3. Identify <i>factors that may affect the plan</i> . 1.4. Apply organisation's visual merchandising standards to the plan.
2. Monitor display requirements.	2.1. Regularly monitor display to ensure it meets the requirements of the <i>visual merchandising plan</i> . 2.2. Identify <i>damage or changes to the display</i> . 2.3. Take action to rectify unwanted changes to the display.
3. Maintain displays in line with organisational requirements and plan.	3.1. Maintain display so that it is clean and tidy. 3.2. Make additions or changes to display to ensure it consistently adheres to the visual merchandising plan. 3.3. Maintain organisation's requirements for visual merchandising in the display.
4. Contribute to the visual merchandising standards of the organisation.	4.1. Interpret visual merchandising standards of the organisation. 4.2. Identify opportunities for improving visual merchandising standards. 4.3. Make contributions to the visual merchandising standards as appropriate.

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- artistic interpretation skills to create displays according to visual merchandising standards
- communication skills to share ideas
- creative thinking skills to generate ideas for improving visual merchandising standards
- literacy skills to interpret visual merchandising manuals

- observation skills to identify damage to displays or deviations from visual merchandising standards
- practical skills to maintain and update displays according to the visual merchandising plan

### Required knowledge

- basic design principles
- basic principles of visual merchandising
- work health and safety (WHS) requirements relating to monitoring displays
- organisation's visual merchandising principles
- resources required to implement visual merchandising plans
- procedures for safe use of tools, equipment and materials used in visual merchandising displays

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets and identifies the design requirements of a visual merchandising plan
- monitors the display closely and completes regular maintenance to ensure it meets the requirements of the visual merchandising plan and the organisation's visual merchandising standards
- contributes appropriately to the ongoing development of the organisation's visual merchandising standards.

### Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail visual merchandising work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store visual merchandising standards.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

### Guidance information

Holistic assessment with other units relevant to the industry sector,

**for assessment** workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

### ***Design requirements***

may include:

- colours used
- functionality
- layout of display
- location of display in store
- merchandise for display
- size of display.

***Resources required*** may include:

- fixtures and fittings
- lights
- materials
- people
- supports
- time.

***Factors that may affect the plan*** may include:

- availability of display stands and structures
- availability of staff
- budget requirements
- merchandise availability
- store promotions
- time requirements.

***Visual merchandising plan*** may include:

- display location
- retail image
- store plan and design.

***Damage or changes to the display*** may include:

- changes in the appearance of the display
- damage to fixtures, fittings or display supports
- damage to items on display.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Review the image of the store.	1.1. Analyse the <b><i>components of the store image</i></b> . 1.2. Access and analyse relevant <b><i>store documentation</i></b> in relation to store image. 1.3. Promote the store image in an appropriate manner.
2. Research market demands for the store.	2.1. Select an <b><i>appropriate area for research</i></b> of market demands. 2.2. Use appropriate <b><i>market research techniques</i></b> according to <b><i>store policy</i></b> . 2.3. Plan market research according to store policy and procedures. 2.4. Collect, analyse and present <b><i>data</i></b> in an appropriate manner.
3. Profile the store's customers.	3.1. Research the demography of the store's <b><i>customers</i></b> . 3.2. Develop a demographic <b><i>profile</i></b> . 3.3. Access information about <b><i>changing trends</i></b> and relate to <b><i>customer demands</i></b> .
4. Implement methods to attract customers to store.	4.1. Access and analyse information about the customer. 4.2. Generate <b><i>ideas</i></b> to develop <b><i>methods for attracting customers</i></b> . 4.3. Select and develop a suitable idea in collaboration with others in the organisation. 4.4. Present and discuss the idea with <b><i>relevant personnel</i></b> . 4.5. <b><i>Evaluate</i></b> the idea to ensure that it meets the requirements for the target customers.

### Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

#### Required skills

- interpersonal skills to:
  - carry out market research
  - generate ideas and discuss with relevant personnel through clear and direct communication

- ask questions to identify and confirm requirements
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- collaborate with team members
- literacy and numeracy skills to:
  - interpret store policy and procedures
  - conduct research
  - analyse data
  - generate reports

### **Required knowledge**

- store policy and procedures in regard to:
  - accessing documentation
  - promoting store image
- market research methods
- evaluation methods
- creative thinking techniques
- techniques in interpersonal communication

### **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit** Evidence of the following is essential:

- analyses components of the store image by accessing relevant store documentation
- promotes the store image in an appropriate manner
- researches market demands using appropriate market research techniques
- accurately profiles store customers
- generates ideas for attracting customers to store
- selects and develops a suitable idea in collaboration with others
- presents and discusses idea with supervisor
- evaluates idea to ensure that it meets requirements for target customers
- implements the idea according to store policies and budgetary requirements.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store documentation in relation to store image
  - market data.

**Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- case studies
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Components of the store image*** may include:

- logo
- products
- services
- layouts
- displays
- tickets
- visual merchandising
- promotional events and themes.

***Store documentation*** may include:

- sales reports
- customer surveys
- market research.

***Appropriate areas for research***

- location

may focus on:

- consumer
- product
- brand
- price
- layout
- advertising.

**Market research techniques**

may include:

- interviews
- observations
- surveys
- questionnaires.

**Store policy** may relate to:

- marketing
- market research.

**Data** may include:

- internal: customer orders, random surveys, complaints, returns
- external: ABS statistics, books, newspaper reports, supplier information.

**Customers** may include:

- new or repeat contacts
- external and internal contacts
- business customers or individuals
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Demographic **profile** may include:

- age
- buying power
- family structures
- employment patterns
- education levels
- tourism
- mobility
- occupations
- marital status
- cultural and ethnic background
- income levels
- population size.

**Changing trends** may include:

- tourism
- immigration
- technology
- selling approaches

**Customer demands** may vary according to:

- leisure time
- environmental issues
- discount operators
- quality demands
- advances in technology.
- preference
- health factors
- age
- cultural group
- dietary issues
- price.

**Ideas** may be generated using techniques such as:

- product association
- brainstorming
- visualising
- telling stories
- creative writing
- lateral thinking
- mind mapping, drawings
- using prompts.

**Methods for attracting customers** may include:

- advertising
- seasonal promotions
- new product launches
- public relations
- publicity.

**Relevant personnel** may include:

- team leader
- supervisor
- manager.

Methods used to **evaluate** ideas may include:

- developing checklists
- discussing the process with colleagues or supervisors
- writing a report of the outcomes.

## SIRXPRO007A Improve supply and distribution chains

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify, evaluate and implement ways to improve supply and distribution chains for a retail or wholesale business.

### Application of the Unit

This unit applies to personnel who are responsible for identifying, evaluating and implementing ways to continuously review and improve the supply and distribution of products or services for a retail or wholesale business. It includes maintaining continuity of supply whereby inventory can meet requirements for production, sales, distribution and service commitments provided to another business or directly to the end customer.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Confirm features of specific supply chains.	1.1. Determine position of the business in the supply chain. 1.2. Analyse features and impact of <b><i>business relationships</i></b> with <b><i>suppliers</i></b> to the business. 1.3. Establish <b><i>benchmarks</i></b> of supply chain efficiency.
2. Maintain information on suppliers.	2.1. Obtain and store <b><i>information on suppliers</i></b> of products and services to a retail or wholesale business according to <b><i>business policy and procedures</i></b> . 2.2. Update and regularly review information on suppliers of products and services to a business. 2.3. <b><i>Store information</i></b> on nature and feature of business relationship with suppliers to a retail or wholesale business and report, according to confidentiality, security, and business requirements.
3. Review distribution arrangements.	3.1. Review, compare and analyse sales, customer satisfaction and performance reports. 3.2. Review factors affecting supply of retail or wholesale products and services.
4. Devise policy and procedures for distribution and supply.	4.1. Establish policy and procedures for supply and distribution to business customers and end consumers. 4.2. Establish procedures to collect and analyse information on distribution chain management.
5. Forecast future contingencies affecting supply chain management.	5.1. Analyse forecasted market demand to confirm future requirements. 5.2. Communicate forward supply needs for the business to suppliers according to policy and contract provisions. 5.3. Confirm factors affecting forward purchasing and supply arrangements. 5.4. Set standards for supply of products and services to the business in qualitative and quantitative terms. 5.5. Communicate procedures for enforcing quality of supply to the business to relevant internal and external personnel.
6. Improve supply and distribution chain	6.1. Evaluate supply chain against agreed benchmarks and overall

- effectiveness. impact on business performance.
- 6.2. Benchmark comparative performance of supply chain against best in class or competitors.
  - 6.3. Assess *factors affecting future distribution and supply* of products.
  - 6.4. Make recommendations to relevant personnel to respond to opportunities for improvements in customer supply and distribution relationships.
  - 6.5. Confirm impact of proposed improvements to supply and distribution activities against budget and operational plans.
  - 6.6. Use prevailing trading terms to enhance supply and distribution chain management.
  - 6.7. Generate reports on business relationships with suppliers to the business using available business technology and agreed measures.
  - 6.8. Complete *reports* to *relevant personnel* (internal and external to operational unit) to promote recommended implementation of improvement to supply and distribution chain.

## Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

### Required skills

- interpersonal skills to:
  - communicate forward business needs to suppliers
  - communicate procedures to relevant internal and external personnel through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- literacy and numeracy skills to:
  - interpret a range of workplace documentation
  - access and maintain information on suppliers
  - generate reports and recommendations for supply and distribution chain improvement to relevant personnel
- analytical skills to collect, organising and evaluate information
- management skills to:
  - implement benchmarks of supply chain efficiency
  - devise effective policy and procedures

## Required knowledge

- relevant business policy and procedures
- principles and techniques in analysis, assessment, development and implementation
- approval processes and key personnel
- supply cycle
- supply chain for business and typical supply chain models used in different industry sectors and businesses
- procedures for collecting and analysing distribution chain management
- position of the business in the supply chain
- factors affecting supply and distribution management
- work and team priorities
- current forecasts and trends
- market information and data collection
- sales plans
- principles and techniques for measuring supply chain efficiency and quality standards
- Work Health and Safety (WHS) aspects of job
- relevant commercial law and legislation

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit** Evidence of the following is essential:

- evaluates and seizes opportunities to improve supply chain for a product or service within an operational context
- identifies and understands a range of current and emerging supply chain management models
- applies tools to measure and quantify supply chain quality standards and efficiency for a retail or wholesale business
- develops clear and effective policy and procedures for wholesale or retail distribution or supply activities
- develops and implements realistic and measurable performance benchmarks for supply and distribution into a business.

**Context of and specific**

Assessment must ensure access to:

**resources for assessment**

- a retail or wholesale work environment
- relevant sources of supply chain information
- relevant documentation, such as:
  - policy and procedure manuals
  - supply and distribution reports
  - supplier records
- a range of suppliers.

**Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Business relationships*** may be influenced by:

- due diligence requirements
- risk sharing
- market position
- planning cycles and timing
- cost and price analysis
- terms and conditions agreed
- intellectual property and technology rights
- value management
- continuous improvement
- supply chain management
- infrastructural and capital outlay requirements
- organisational systems integration and compatibility.

***Suppliers*** may be:

- commercial companies

- public agencies or organisations
  - governments
  - community and not-for-profit organisations
  - internal.
- Benchmarks** may include:
- Australian standards
  - international standards
  - professional standards
  - industry standards
  - performance indicators
  - quality measures and criteria
  - planning milestones and timeframes
  - manufacturer and supplier standards.
- Information on suppliers** may include:
- representative's name and contact details
  - range of products and/or services
  - transaction records
  - contact history
  - account terms
  - prices
  - dispatch and shipping procedures
  - records of supplier performance
  - details of items supplied or returned.
- Business policy and procedures** may relate to:
- purchasing
  - supply and distribution of products or services
  - approval processes
  - storage and transport of goods.
- Methods used to **store information** may be:
- manual
  - electronic or digital.
- Factors affecting future distribution and supply** of retail or wholesale products and services may include:
- merchandise availability
  - transport availability
  - time requirements
  - budget requirements
  - logistics.
- Relevant personnel** may include:
- manager or supervisor
  - colleagues
  - business or area manager
  - specialist or technical personnel.
- Reports** may be delivered:
- verbally
  - in writing

- in groups
- individually.

## SIRXRSK002A Maintain store security

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain store security in a retail environment. It involves implementing store policy and procedures to ensure store security, informing team members and providing ongoing supervision and training to facilitate awareness and detection of theft.

### Application of the Unit

This unit applies to team leaders and supervisors who interpret, apply and monitor security procedures according to store policy, industry codes of practice, relevant legislation and statutory requirements. A person undertaking this role maintains frontline security as well as reporting security concerns and providing ongoing supervision and training for staff on security procedures.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Monitor and maintain store security.	<p>1.1. Implement <i>store policy and procedures</i> to ensure store security is maintained.</p> <p>1.2. Monitor and review <i>security procedures</i>, according to store policy and <i>legislative requirements</i>.</p> <p>1.3. Implement procedures to minimise theft of easily stolen merchandise.</p> <p>1.4. Maintain security of cash, cash register and keys according to store policy.</p> <p>1.5. Implement store procedures in regard to <i>transactions</i>.</p> <p>1.6. Inform <i>team members</i> of store policy and procedures in regard to security.</p> <p>1.7. Provide team members with <i>feedback</i> in regard to implementation or non implementation of store security procedures.</p> <p>1.8. Provide staff with ongoing supervision and <i>training</i> to facilitate awareness and detection of theft.</p> <p>1.9. <i>Report</i> matters likely to affect store security, according to store policy.</p>
2. Facilitate awareness and detection of theft.	<p>2.1. Inform <i>team members</i> of store policy and procedures in regard to security.</p> <p>2.2. Provide team members with <i>feedback</i> in regard to implementation or non implementation of store security procedures.</p> <p>2.3. Provide staff with ongoing supervision and <i>training</i> to facilitate awareness and detection of theft.</p>

### Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

#### Required skills

- interpersonal skills to:
  - provide information, feedback and training to staff

- report relevant matters through clear and direct communication
- ask questions to identify and confirm requirements
- share information
- give instructions
- use and interpret non-verbal communication
- provide team leadership
- literacy skills to:
  - interpreting and applying Work Health and Safety (WHS) documents
  - reporting procedures
  - analytical skills to evaluate performance analysis

### **Required knowledge**

- store policy and procedures in regard to:
  - security
  - cash and non-cash transactions
  - external or internal theft
  - suspicious circumstances
  - armed robbery
  - staff security training
  - procedures for opening and closing premises
- relevant legislation and statutory regulations, particularly in relation to checking of customers' bags and purchases
- types of store alarm and security systems used in the retail industry

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit** Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to store security
- accurately applies relevant legislation and statutory regulations particularly in regard to checking of customers' bags and purchases
- interprets, applies and monitors security procedures in regard to:
  - cash handling, and cash and non-cash transactions

- internal or external theft or suspicious circumstances
- armed robbery
- opening and closing premises
- implements store policy and procedures in regard to:
  - reporting on matters related to store security
  - staff security supervision and training.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures in regard to security
  - legislation and statutory requirements
  - WHS legislation
- relevant equipment such as:
  - alarm systems
  - point-of-sale equipment
  - communication equipment.

### **Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- third-party reports from a supervisor
- observation of performance in the workplace
- a role play
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### **Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXOHS002A Maintain store safety.

## **Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the

performance criteria is detailed below.

***Store policy and procedures*** in regard to:

- security
- checking bags
- cash and non-cash transactions
- surveillance of merchandise
- reporting problems and faults.

***Security procedures*** may deal with:

- customers
- staff or staff property
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash and cash movement
- equipment
- premises
- opening and closing of premises
- theft
- armed robbery
- events likely to endanger customers or staff.

***Legislative requirements*** may include:

- privacy or confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards or agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

***Transactions*** may include:

- cash
- EFTPOS
- cheques
- credit cards or store cards
- smart cards
- lay-by
- returns
- exchanges
- gift vouchers.

***Team members*** may include:

- small work teams
- store team
- corporate team

- full-time, part-time, casual or contract staff
- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

**Feedback** may be given:

- verbally
- in writing
- in groups
- individually.

**Training** may include:

- mentoring or coaching
- off-the-job training
- on-the-job training.

**Report** may be:

- verbal
- written
- formal
- informal.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - converse clearly and directly with staff
  - use and interpret non-verbal communication
- literacy and numeracy skills to:
  - access and interpret store policy documents
  - calculate the cost of stock loss
  - document security procedures
  - handle cash
  - maintain records
- research and analysis skills to:
  - analyse stock control data
  - develop procedures
- problem-solving skills to establish and implement stock control procedures

### Required knowledge

- organisational policy and procedures that relate to the development of store procedures for:
  - security
  - detection and apprehension of thieves
  - non-cash transactions
  - cash handling
  - stock control
- principles and techniques for:
  - detecting and preventing theft
  - ensuring safety of personnel in the event of robbery
- relevant codes of practice, legislation and statutory requirements, including:
  - industry codes of practice
  - retail case law or common law
  - state laws relating to property offences
  - work health and safety (WHS) legislation

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- develops and implements security procedures to facilitate the detection and prevention of theft
- develops and implements procedures to ensure safety and security of internal and external clients in the event of robbery
- calculates, analyses and reports on the cost and potential impact of identified loss and dissipation on:
  - buying
  - ordering patterns
  - planning
  - budgeting
- develops and implements procedures for:
  - opening and closing premises
  - cash security
  - non-cash transactions
  - stock control to minimise loss and dissipation
- communicates procedures to staff and monitors implementation.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures on:
    - security
    - cash handling and non-cash transactions
    - stock control, including buying, ordering, planning and budgeting
  - relevant legislation and statutory requirements
  - industry codes of practice
  - WHS legislation and codes of practice
- a team
- a range of security equipment.

### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- case studies
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment** Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

***Security procedures*** may relate to:

- armed robbery
- cash and cash movement
- customers
- equipment
- events likely to endanger customers or staff
- opening and closing of premises
- premises
- records
- staff and staff property
- stock
- theft
- visitors, sales representatives and contractors.

***Organisational policy and procedures*** in regard to:

- cash handling
- non-cash transactions
- security
- stocktaking.

***Staff*** may include:

- full-time, part-time, casual or contract staff
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions
- people with varying degrees of language and literacy
- small work teams

- store team.
  - cheques
  - customer refunds
  - EFTPOS and credit cards
  - gift vouchers.
  - mentoring and coaching
  - on-the-job or off-the-job training
  - posters and pamphlets
  - simulated events.
  - budgeting
  - buying
  - ordering patterns
  - planning.
  - minimising out-of-date stock
  - minimising theft
  - monitoring stock levels
  - quality control
  - stocktaking and cyclical counts.
- Non-cash transactions***  
may include:
- Techniques used to  
***communicate security***  
***procedures*** may include:
- Impact on business***  
***operations*** may include:
- Stock control***  
***procedures*** may include:

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop product and service knowledge.	1.1. Develop and maintain <b><i>product knowledge</i></b> according to <b><i>store policy</i></b> and <b><i>legislative requirements</i></b> . 1.2. Convey product knowledge to other <b><i>staff</i></b> as required. 1.3. Research and apply comparisons between products and services. 1.4. Demonstrate knowledge of competitors' product and service range and <b><i>pricing structure</i></b> .
2. Recommend specialised products or services.	2.1. Evaluate merchandise according to <b><i>customer requirements</i></b> . 2.2. Demonstrate features and benefits of products and services to <b><i>customer</i></b> to create a buying environment. 2.3. Apply detailed specialised knowledge of product to provide accurate advice to customers.

### Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

#### Required skills

- interpersonal skills to:
  - convey product knowledge to staff
  - apply knowledge to provide advice to customers
  - handle difficult customers through clear and direct communication
  - ask questions to identify and confirm requirements
  - share information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- literacy skills in regard to:
  - use a range of communication and electronic equipment
  - access relevant product and service information
  - interpret product information
  - interpret store policies and procedures

- record information
- numeracy skills to:
  - estimate and calculate costs relevant to pricing products

### Required knowledge

- specialised product knowledge, including:
  - warranties
  - benefits and features
  - shelf life and use-by date
  - storage requirements
  - ingredients or materials contained in product
  - product and ingredient origins
  - care and handling of products
  - corresponding or complementary products and services
  - stock availability
- store and industry manuals and documentation
- stock and merchandise range
- service range
- store policies and procedures including:
  - procedures for taking orders
  - pricing procedures, including GST requirements
- relevant legislation and statutory requirements and industry code of practice relating to the retail industry

## Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit** Evidence of the following is essential:

- consistently applies store policies and procedures and industry codes of practice in regard to customer service and selling products and services
- develops, maintains and conveys product knowledge to customers and other staff
- applies detailed and specialised product knowledge to provide accurate advice according to the needs of the customer.

**Context of and specific**

Assessment must ensure access to:

**resources for assessment**

- a retail work environment
- a range of stock and merchandise
- relevant documentation, such as:
  - price lists
  - policy and procedures manuals
- a range of customers with different requirements
- a range of communication equipment.

**Methods of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

***Product knowledge*** may include:

- brand options
- product features and benefits
- warranties
- safety features
- use-by dates
- handling and storage requirements
- stock availability
- price.

***Product knowledge*** may be developed and maintained by:

- accessing the internet
- attending product launches
- attending product seminars
- discussions with staff
- accessing product information booklets and

- pamphlets.
- Store policy*** and procedures in regard to:
- interaction with customers
  - selling products and services.
- Legislative requirements*** may include:
- Trade Practices and Fair Trading Acts
  - tobacco laws
  - liquor laws
  - lottery legislation
  - industry codes of practice
  - WHS
  - sale of second-hand goods
  - sale of X and R rated products
  - trading hours
  - transport, storage and handling of goods.
- Staff*** may include:
- full-time, part-time or casual
  - under contract
  - people with varying degrees of language and literacy
  - people from a range of cultural, social and ethnic backgrounds
  - people with a range of responsibilities and job descriptions.
- Customer requirements*** may include:
- specific brand
  - sizing
  - quality
  - quantity
  - price range
  - usage.
- Customers*** may include:
- new or repeat contacts
  - external and internal contacts
  - customers with routine or special requests
  - people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.
- Pricing structure*** may include:
- sales reductions
  - pricing procedures, including GST requirements
  - mark-downs.

## SIRXSL S201 Sell products and services

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSL S001A Sell products and services.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to sell products and services in a retail environment.

It involves the use of sales techniques and encompasses key selling skills, from approaching the customer to closing the sale.

It requires a basic level of product knowledge and the recognition and demonstration of verbal and non-verbal communication skills to determine customer requirements, sell the benefits of products and services, overcome objections and close sales.

Personal evaluation is used to maximise sales, according to industry codes of practice, relevant legislation and store policy.

### Application of the Unit

This unit applies to frontline sales personnel.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop and apply product knowledge.	<p>1.1. Develop <b><i>product knowledge</i></b> by accessing <b><i>relevant sources of information</i></b> and confirm with relevant staff.</p> <p>1.2. Apply knowledge of the use and application of relevant products and services in interactions with customers according to store policy and <b><i>legislative requirements</i></b>.</p> <p>1.3. Identify gaps in product knowledge and resolve by accessing relevant sources of information.</p>
2. Approach customer.	<p>2.1. Identify <b><i>customers</i></b> by name where possible.</p> <p>2.2. Develop knowledge of customer buying behaviour by accessing relevant sources of information.</p> <p>2.3. Determine and apply appropriate timing of customer approach according to store policy and customer behaviour.</p> <p>2.4. Initiate customer contact according to store policy.</p> <p>2.5. Convey a positive impression to encourage customer interest according to store policy.</p>
3. Gather and respond to information.	<p>3.1. Apply questioning techniques and listening skills to determine customer buying motives and requirements.</p> <p>3.2. Interpret and clarify non verbal communication cues.</p> <p>3.3. Direct customer to specific merchandise according to customer requirements and store policy.</p>
4. Sell benefits.	<p>4.1. Match customer needs to appropriate products and services.</p> <p>4.2. Communicate knowledge of product features and benefits clearly to customers.</p> <p>4.3. Describe product use and safety requirements to customers.</p> <p>4.4. Refer customers to appropriate product specialist as required.</p> <p>4.5. Answer <b><i>routine customer questions</i></b> about merchandise accurately and honestly or refer to senior sales staff.</p>

5. Overcome objections.
  - 5.1. Identify and acknowledge customer objections according to store policy.
  - 5.2. Categorise objections into price, time and merchandise characteristics and consider solutions.
  - 5.3. Offer solutions to customer objections according to store policy.
  - 5.4. Apply *problem solving* within personal scope of responsibilities to overcome customer objections or refer to senior staff.
6. Close sale.
  - 6.1. Monitor, identify and respond appropriately to customer buying signals.
  - 6.2. Encourage customer to make purchase decisions.
  - 6.3. Select and apply appropriate method of closing sale.
7. Maximise sales opportunities.
  - 7.1. Recognise and apply opportunities for making additional *sales* according to store policy.
  - 7.2. Advise customer of complementary products or services according to customer's identified need.
  - 7.3. Review personal sales outcomes and consider strategies to maximise future sales in consultation with relevant staff.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - handle difficult customers
  - verbal and non-verbal communication skills to:
    - question, listen and observe
    - overcome objections and close sale
- literacy and numeracy skills to:
  - handle payments for goods
  - read product information
  - read store policies and procedures
  - record information
  - weigh and measure goods
- selling skills to use a range of selling techniques

### Required knowledge

- customer types and needs, including:
  - customer behaviour and cues

- customer buying motives
- demographics, lifestyle and income
- individual and cultural differences
- types of customer needs, such as:
  - functional
  - psychological
- relevant industry codes of practice, legislation and statutory requirements relating to the sale of products and services
- selling techniques, including:
  - add-ons and complementary sales
  - closing techniques
  - opening techniques
  - overcoming customer objections
  - recognising buying signals
  - using strategies to focus customer on specific merchandise
- specific product knowledge for area or section
- store merchandise and service range
- store policies and procedures in regard to:
  - allocated duties and responsibilities
  - selling products and services and sales performance

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future

sales.

<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• a real or simulated retail work environment</li> <li>• relevant documentation, such as policy and procedures manuals</li> <li>• a range of customers with different requirements</li> <li>• a range of merchandise and products appropriate to the retail workplace</li> <li>• product labels and sources of product information.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate in the workplace</li> <li>• customer feedback</li> <li>• answers to questions about specific skills and knowledge</li> <li>• review of portfolios of evidence and third-party workplace reports of on-the-job performance.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Product knowledge</i></b> may include:	<ul style="list-style-type: none"> <li>• features and benefits</li> <li>• handling and storage requirements</li> <li>• price</li> <li>• safety features</li> <li>• stock availability</li> <li>• use-by dates</li> <li>• warranties.</li> </ul>
<b><i>Relevant sources of information</i></b> may include:	<ul style="list-style-type: none"> <li>• demonstrations</li> <li>• internet</li> <li>• labels</li> <li>• product profiles</li> </ul>

- staff members
  - store or supplier product manuals
  - store tours
  - videos.
- Legislative requirements** may include:
- industry codes of practice
  - liquor laws
  - lottery legislation
  - work health and safety (WHS)
  - sale of second-hand goods
  - sale of X and R-rated products
  - tobacco laws
  - Australian consumer law and fair trading Acts
  - trading hours
  - transport, storage and handling of goods.
- Customers** may include:
- customers with routine or special requests
  - internal and external contacts
  - new or repeat contacts
  - people from a range of social, cultural and ethnic backgrounds
  - people with varying physical and mental abilities.
- Routine customer questions** may relate to:
- availability
  - features and benefits
  - price and price reductions
  - quality.
- Problem solving** may be affected by:
- resource implications
  - store policies and procedures.
- Sales transactions** may be completed:
- face-to-face
  - online
  - over the telephone.

## SIRXSL303 Build relationships with customers

### Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSL004A Build relationships with customers.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and maintain expert knowledge to provide accurate product information to customers, including post-sales support.

It also covers communication, analysis and sales techniques to plan and implement sales presentations, build positive relationships with customers, and resolve customer complaints to ensure positive business outcomes.

### Application of the Unit

This unit applies to senior sales personnel.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop relationships with customers.	<p>1.1. Establish rapport with <i>customers</i> and express genuine interest to <i>clarify customer requirements</i> and enhance <i>outcomes</i>.</p> <p>1.2. Maintain <i>professional ethics</i> with the customer to promote store image and credibility.</p> <p>1.3. Identify <i>customer needs and preferences</i> to maximise sales opportunities.</p> <p>1.4. Maximise sales opportunities by use of add-on and complementary <i>sales techniques</i>.</p> <p>1.5. Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.</p> <p>1.6. Use effective methods to close sales.</p>
2. Apply expert knowledge.	<p>2.1. Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to <i>legislative requirements</i>.</p> <p>2.2. Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.</p> <p>2.3. Provide evaluation of product range, demonstrate features and benefits of products or services where appropriate, and make recommendations to the customer to maximise sales potential.</p> <p>2.4. Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to <i>store policy</i>.</p> <p>2.5. Calculate prices and discounts according to pricing determinants and store policy.</p>
3. Provide post-sales support.	<p>3.1. Provide evidence of ongoing support as sale is concluded.</p> <p>3.2. Explain <i>back-up service</i> and reassure customer according to legislative requirements and store policy.</p> <p>3.3. Provide customer with store or salesperson's contact details to ensure customer follow-up according to store policy.</p> <p>3.4. Enter customer and transaction details into <i>customer database</i> according to store policy.</p>

4. Plan sales presentations.
  - 4.1. Plan presentation to complement *product characteristics*.
  - 4.2. Select client group according to product characteristics and store merchandising policy.
  - 4.3. Access *promotional materials* where required and distribute to client group.
  - 4.4. Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.
5. Implement sales presentations.
  - 5.1. Ensure sufficient numbers of adequately briefed support staff, where required, for presentation.
  - 5.2. Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups.
  - 5.3. Demonstrate products or services to create a buying environment.
  - 5.4. Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future *sales presentations*, according to store sales policy.
6. Maintain and use a customer database.
  - 6.1. Maintain customer confidentiality as required by store policy and legislative requirements.
  - 6.2. Develop and maintain accurate *customer records* and store securely according to store policy and procedures.
  - 6.3. Identify and follow up regular customers according to store marketing policy.
  - 6.4. Use customer records to advise customers on products and services of possible interest.
  - 6.5. Implement *customer loyalty schemes* where required according to store promotional activities.
7. Deal with difficult customers.
  - 7.1. Acknowledge customer complaints and problems and reassuringly support difficult customers to produce positive outcome.
  - 7.2. Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration.
  - 7.3. Develop customer's confidence in the candidate and product or service to promote long-term trust and commitment to store.
  - 7.4. Establish mutually acceptable resolution of complaint.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to resolve conflict
- literacy and numeracy skills to:
  - access and read relevant product information
  - calculate prices and discounts
  - read store policies and procedures
  - record client and sales information
- sales skills to apply selling techniques, including:
  - add-ons and complementary sales
  - identifying buying signals
  - opening and closing techniques
  - overcoming customer objections
  - presenting product information
  - promoting enhanced sustainability features of selected products and services
  - using strategies to focus customer on specific merchandise

### **Required knowledge**

- customer types and needs, including:
  - customer buying motives, customer behaviour and cues
  - functional and psychological needs
  - individual and cultural differences, demographics, lifestyle and income
- work health and safety (WHS) requirements relating to:
  - manual handling
  - plant and equipment
  - hazardous substances and dangerous goods
  - workers compensation
- relevant industry codes of practice, legislation and statutory requirements relating to building relationships with clients
- store policies and procedures in regard to:
  - efficient use of resources
  - establishing, maintaining and using customer records
  - methods of maintaining customer confidentiality and secure storage of customer details
  - price negotiation and payment and credit options
  - pricing, including GST requirements
  - resolving customer complaints
  - updating and maintaining customer mailing lists
- store and area merchandise and service range

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- applies:
  - detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
  - industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
  - store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations, and providing after-sales support
- develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and discerning customer buying motives, requirements and preferences
- establishes, records and maintains customer records and details, maintaining customer confidentiality, ensuring secure storage of data, and using customer records to maximise customer interest and create a buying atmosphere
- evaluates personal or team sales performance to maximise future sales
- maximises sales opportunities by using effective selling techniques, applying detailed product knowledge, and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- plans, prepares and conducts sales presentations and briefs
- supports staff where required, to create a buying environment and maximise sales performance
- resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution
- uses effective questioning, listening and observation skills to determine customer requirements.

### **Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:

- policy and procedures manuals
- industry codes of practice and relevant legislation
- WHS legislation and codes of practice
- a range of customers with different requirements
- an appropriate range of products and equipment
- a customer database system.

**Method of assessment** A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment** Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

**Customers** may include:

- a single customer, couples, families or groups
- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

**Clarification of customer requirements** may be achieved by:

- active listening
- appropriate questioning
- empathy
- observation
- reassurance and confirmation.

**Outcomes** may include:

- credibility of store
- customer commitment

- Maintaining *professional ethics* with the customer may include:
- customers' trust
  - increased return customer base.
  - confirmed appraisals of products and services
  - honesty
  - positive statements.
- Customer needs and preferences* may include:
- brand
  - customer physical needs
  - price
  - product characteristics
  - product type
  - size.
- Sales techniques* will include:
- add-on and complementary products and services
  - selling up or down
  - suggestive selling
  - variety of methods of closing sales.
- Legislative requirements* may include:
- environmental protection legislation
  - health and welfare law specific to local government, state and federal legislation
  - liquor laws
  - WHS
  - pricing procedures, including GST requirements
  - privacy laws
  - sale of second-hand goods
  - tobacco laws
  - Australian Consumer Law and fair trading Acts
  - transport, storage and handling of goods.
- Store policy* and procedures in regard to:
- dealing with difficult customers
  - maintaining and using client records
  - promotional, marketing, discounting and reward programs
  - resolving customer complaints
  - selling products and services.
- Back-up service* may include:
- delivery specifications
  - financial products and services
  - installation
  - returns policies
  - technical support
  - warranties and guarantees.
- Customer database* may be:
- computer-based
  - manual.

- Product characteristics*** may include:
- features and benefits
  - price range
  - supplier or manufacturer information
  - target group.
- Promotional materials*** may include:
- brochures
  - business cards
  - pamphlets
  - posters
  - promotional merchandise
  - vouchers.
- Sales presentations*** may be:
- at client site
  - in-house
  - verbal
  - visual.
- Customer records*** may include:
- anniversaries and special dates
  - details of items bought or returned
  - name and contact details
  - personal preferences
  - transaction records.
- Customer loyalty schemes*** may include:
- credit or discount facilities
  - customer clubs
  - customer reward schemes
  - special offers.

### Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Establish and respond to customer requirements.	<p>1.1. Plan and develop strategies to enhance provision of customer service according to store policy.</p> <p>1.2. Research and <b><i>analyse customer needs</i></b> in regard to local geographic and cultural issues.</p> <p>1.3. Resolve <b><i>customer</i></b> complaints referred by <b><i>staff</i></b>, according to store policy.</p> <p>1.4. Monitor sales and service targets and plans to ensure that customer requirements are met, and take appropriate remedial action if required.</p> <p>1.5. Encourage staff to take responsibility for meeting customer requirements.</p> <p>1.6. Seek and use feedback from customers to improve future operations.</p>
2. Monitor, maintain and improve sales and service delivery.	<p>2.1. Implement, communicate and review <b><i>policies and procedures for sales and service delivery</i></b> on a regular basis.</p> <p>2.2. Maintain adequate <b><i>resource</i></b> allocation for client service provision in line with <b><i>store policy and procedures</i></b>.</p> <p>2.3. Ensure sales and service targets and plans are consistent with quality and functional <b><i>specifications</i></b>.</p> <p>2.4. Communicate sales and service targets and plans to <b><i>relevant personnel</i></b> according to implementation schedules.</p> <p>2.5. Provide <b><i>feedback</i></b> to staff on operations and outcomes.</p> <p>2.6. Take corrective measures to minimise <b><i>factors that may cause disruption to operations</i></b>.</p> <p>2.7. Monitor and evaluate effectiveness of corrective actions for future operational planning.</p> <p>2.8. Ensure current and accurate <b><i>records</i></b> on sales are available to authorised personnel.</p>

- 2.9. Interpret and act on relevant reports as required.
3. Negotiate supply of goods.
- 3.1. *Negotiate* and implement *arrangements with suppliers*, according to store policies and procedures, and communicate to relevant personnel.
- 3.2. Authorise and communicate special pricing arrangements and customer payment agreements to relevant staff and management personnel according to store policy.
- 3.3. Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.
- 3.4. Identify and communicate market factors affecting *supply* to relevant personnel.
- 3.5. Convey complete and accurate records of negotiations and agreements to appropriate personnel within designated time limits.
- 3.6. Take immediate corrective action where potential or actual *problems with supply* are indicated.
- 3.7. Identify and develop new suppliers to maintain and improve sales and service delivery.
4. Provide productive work environment.
- 4.1. Establish and maintain a sufficient supply of resources of the necessary quantity and quality to meet customer requirements.
- 4.2. Regulate and monitor access to and use of resources for maximum efficiency and sustainability.
- 4.3. Maintain staff working conditions to meet requirements of *relevant legislation* and store policy.
- 4.4. Ensure that maintenance frequency and use of equipment conform to recommended schedules and procedures.
- 4.5. Replace, repair or adapt resources that do not meet requirements as soon as practicable and with minimum disruption to work activity.
- 4.6. Communicate *recommendations* for improving conditions to relevant personnel within designated timeframe.
- 4.7. Maintain complete, accurate records and make them available to authorised personnel.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - communicate with staff through clear and direct communication
  - negotiate with suppliers and customers
  - present information
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
  - calculate costs and pricing arrangements
  - document results
  - estimate volume
  - interpret and maintain data
  - prepare reports
  - research, analyse and interpret a broad range of written material
- technical skills to use new technology

### **Required knowledge**

- customer demand and market trends
- principles and techniques for:
  - interpersonal communication
  - purchasing and supply specifications
  - stock control
- product quality standards
- range and availability of new products and services, especially those with enhanced sustainability features
- relevant industry codes of practice applicable to the sales environment
- relevant legislation and statutory requirements, including work health and safety (WHS) requirements applicable to the sales environment
- store merchandise and service range
- store merchandising plan
- store policies and procedures in regard to:
  - efficient and sustainable use of resources
  - pricing procedures, including GST requirements
  - quality assurance and control
  - sales and service delivery
  - stock maintenance and control
  - supply specifications

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- maintains, monitors and evaluates sales and service delivery
- communicates sales and service targets and plans and provides feedback on operations and outcomes to relevant personnel according to store policy
- proactively improves sales and service delivery operations
- interprets and maintains data on sales and services delivery
- negotiates and arranges supply of goods according to store policy and procedures
- authorises pricing and payment agreements according to store policy and procedures
- maintains, monitors and evaluates supply of stock.

### Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - policy and procedures manuals
  - sales and service delivery targets and plans
  - records of sales and service
  - legislation and statutory requirements
  - industry codes of practice
  - WHS legislation and codes of practice
- suppliers
- a team.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Methods used to ***analyse customer needs*** may be:

- qualitative
- quantitative.

***Customer*** may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

***Staff*** may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

***Policies and procedures for sales and service delivery*** may involve:

- customer complaints
- customer service and sales training
- service standards
- staff induction
- staff presentation.

***Resource*** may include:

- equipment and technology
- finances
- materials
- people
- time.

***Store policy and procedures*** in regard to:

- interaction with customers
- interaction with other team members
- WHS
- quality assurance and control
- acquisition and sale of products and services.

***Specifications*** may include:

- customer agreements
- operational means for meeting agreements
- specific functional duties within the organisation.

***Relevant personnel*** may

- managers

- include:
- members of own or other work teams
  - supervisors.
- Feedback** may be sought and given:
- in groups
  - in writing
  - individually
  - verbally.
- Factors that may cause disruption to operations** may include:
- operational resources
  - quality of materials
  - supply.
- Records** may be:
- electronic
  - hard copy.
- Techniques used to **negotiate** with suppliers may include:
- correspondence
  - email
  - face-to-face contact
  - meetings
  - telephone.
- Arrangements with suppliers** may relate to:
- credit levels
  - delivery
  - partnerships and exclusivity
  - pricing.
- Sources of **supply** may include:
- external organisations
  - internal departments and teams
  - internal and external personnel.
- Problems with supply** may involve:
- cost
  - coverage or content
  - quality
  - quantity
  - time schedules or scales.
- Relevant legislation** may include:
- equal employment opportunity and anti-discrimination laws
  - federal, state and local legislation
  - WHS.
- Recommendations** may be communicated to:
- colleagues, specialists, staff from other departments
  - external organisations with a health, safety or environmental responsibility
  - government bodies
  - higher-level managers
  - subordinates.

## SISXRES506A Undertake open-space planning

### Modification History

Not Applicable

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake research to determine supply and demand for open spaces in order to develop and implement an action plan for open-space planning for sport and recreation programs and activities.

### Application of the Unit

This unit applies to those who work as operations managers or program managers who are responsible for planning, implementing and evaluating outdoor recreation programs and activities across a range of activity areas. Work would be undertaken autonomously with responsibility for management of resources.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Nil

### Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

#### Elements and Performance Criteria

##### ELEMENT

Elements describe the essential outcomes of a unit of competency.

##### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

**ELEMENT****PERFORMANCE CRITERIA**

with the evidence guide.

- |   |   |
|---|---|
| 1. Conduct research into open-space planning. | <ul style="list-style-type: none"> <li>1.1. ELEMENT	PERFORMANCE CRITERIA
6. Implement work plan.	<p>personnel according to organisational policies and procedures.</p> <p>5.5. Establish <i>evaluation procedures</i> for open-space planning according to organisational policies and procedures.</p> <p>6.1. Monitor effectiveness of plan and evaluate relevance to current situation.</p> <p>6.2. Seek feedback from stakeholders and the community.</p> <p>6.3. Make recommendations to appropriate personnel to improve the effectiveness of the plan according to organisational policies and procedures.</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to:
  - consult and liaise with stakeholders to gather information about usage patterns and demand for open space
  - seek approval for work plans from appropriate personnel
- literacy skills to:
  - research and gather information about the requirements, supply and demand for open planning
  - develop and document work plans
- numeracy skills to analyse financial requirements for open-space planning
- planning and organising skills to:
  - establish criteria to evaluate open spaces
  - prioritise work and set timeframes to develop a schedule of works
  - implement and monitor the effectiveness of the plan
- problem-solving skills to:
  - develop and select options for open-space planning
- evaluate effectiveness of implemented work plan and suggest improvements.

### Required knowledge

- legislation to enable the collection and use of information from stakeholders and the development of a work plan to effectively manage open spaces
- organisational policies and procedures to:

- collect information responsibly
- consult stakeholders
- evaluate options for open-space planning to enable effective open-space management of competing demands
- methodology to conduct feasibility studies to enable effective open-space planning
- research and data-collection techniques to enable the responsible collection and use of data
- goals and objectives of open-space planning in relation to outdoor recreation programs and activities
- open-space management techniques to enable the management and prioritisation of competing demands
- sources of information and resources to establish supply of and demand for open space.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- conducts a feasibility study in consultation with stakeholders to determine requirements and resources for open-space planning
- conducts research, planning and consultation to determine open-space supply and demand relevant to sport and recreation activities in own work environment, and analyses and evaluates information collected to develop a work plan
- prioritises competing demands for open space to develop, implement and monitor a work schedule and seeks feedback from users and stakeholders on the effectiveness of the work plan
- applies effective contingency-management techniques to deal with a range of problems and issues that may arise in relation to competing demands for open space.

#### Context of and specific resources for assessment

Assessment must ensure development and implementation of a work plan for open-space planning which reflects local requirements and is of sufficient

breadth to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a regional open space
- resources and information on the location
- target groups with open-space demands
- appropriate persons to gain approvals
- resources to undertake the open-space planning
- organisational documentation relevant to open-space planning.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of interacting with a range of target groups to establish open-space needs
- oral and or written questioning to assess knowledge of research and data-collection techniques to conduct a feasibility study
- portfolio containing evidence of work plans for open-space planning, feasibility study and research and demographic profiles for open spaces
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXRES505A Achieve sustainable land management.

### Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Feasibility study*** may include:

- current and previous expenditure patterns
- user satisfaction levels
- usage patterns.

- Open space*** may include:
- facilities
  - car parks
  - natural elements
  - greenfields area.
- Information*** may include:
- planning studies
  - political environment of organisations
  - issues papers
  - demographic profiles.
- Sources*** may include:
- grants
  - schools
  - service sporting clubs and associations
  - corporate sponsors
  - bequests
  - developer and organisation joint ventures
  - community groups.
- Stakeholders*** may include:
- government bodies
  - community groups
  - participants.
- Relevant legislation*** may include:
- occupational health and safety
  - environmental protection
  - privacy
  - anti-discrimination
  - local laws and by-laws.
- Organisational policies and procedures*** may include:
- ***occupational health and safety***
  - collection and use of information
  - evaluation criteria
  - aims and objectives of open-space planning.
- Criteria*** may include:
- access
  - geographical factors
  - environmental factors
  - location
  - quality and characteristics of open space
  - usage.
- Demographic profile*** may include:
- transport routes
  - distance between areas
  - topography
  - proximity to amenities
  - ecology.
- Work plans*** may include:
- objectives
  - tasks
  - timeframes

*Schedule of works* may include:

- budget
- consultation plan.
- priorities
- costs
- timeframes.
- community consultation
- surveys
- public meetings
- market research.

*Evaluation procedures* may include:

# SITTGDE101 Interpret aspects of local Australian Indigenous culture

## Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITTGDE009A Interpret aspects of local Australian Indigenous culture. Wording simplified to more accurately reflect level at which skills are applied.

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to share information about a specific local Australian Indigenous culture. It is this localised focus that distinguishes this unit from SITTGDE306 Research and share general information on Australian Indigenous cultures.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of local cultural knowledge, appropriate behaviour and local community consultation.

## Application of the Unit

This unit applies to those people who are able to share local Indigenous cultural knowledge with others. They may work at many different levels, as cultural knowledge has no direct relationship with workplace levels of responsibility.

The local cultural knowledge necessary to achieve competency in this unit may only be accessible to those individuals who identify as elders or who are authorised by local elders on behalf of their communities.

There are many different Indigenous language groups in Australia, therefore focus of cultural interpretation will vary and should ultimately be decided in consultation with elders on behalf of the local community.

## Licensing/Regulatory Information

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru National Parks in the Northern Territory. This training is based on the following units:

- SITTGDE101 Interpret aspects of local Australian Indigenous culture
- SITTGDE306 Research and share general information on Australian Indigenous cultures.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- |   |  |
|---|--|
| 1. Talk with the local Indigenous community.                    | <p>1.1 Talk to community members about cultural tourism activities, and the <b><i>ways that information can be used</i></b>.</p> <p>1.2 Prepare for and conduct activities according to the needs and wishes of the local Indigenous community.</p> <p>1.3 Identify potential conflicts within the local Indigenous community and seek solutions.</p>  |
| 2. Share information about local Australian Indigenous culture. | <p>2.1 Share information about <b><i>aspects of Australian Indigenous culture</i></b> with customers to an appropriate level.</p> <p>2.2 Advise customers about culturally appropriate behaviour.</p> <p>2.3 Show respect for Australian Indigenous cultures and values through appropriate personal behaviour during activities.</p> <p>2.4 Show customers traditional and contemporary practices when appropriate.</p> <p>2.5 Use local language and share with customers when appropriate.</p> <p>2.6 Invite customers to actively participate and share in the Australian Indigenous <b><i>cultural experience</i></b> when appropriate.</p> |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to:
  - talk with others about Indigenous cultural issues
  - share information with people from other cultures.

### Required knowledge

- aspects of a specific local Australian Indigenous culture
- protocols for the sharing of information about specific local Australian Indigenous cultures
- copyright and intellectual property issues associated with providing information about local Australian Indigenous culture.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- talk with Indigenous community members about what information can be shared with customers
- provide cultural information in an appropriate and respectful manner
- demonstrate knowledge of the local Australian Indigenous culture appropriate to the region.

#### Context of and specific resources for assessment

Assessment must ensure use of:

- cultural sites and locations
- involvement of persons approved of by relevant local community elders in the assessment process.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge.

For this unit, methods should be chosen by relevant local community elders or those approved of by the elders.

**Guidance information for assessment**

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITXCCS101 Provide information and assistance.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Ways that information can be used* may relate to:

- what information can be shared
- who can give information to whom
- who can receive the information
- what activities are appropriate
- who should be involved in activities.

*Aspects of Australian Indigenous culture* may relate to:

- art
- bush foods and medicine
- dance
- music
- storytelling
- tools and implements.

*Cultural experience* may take place in:

- cultural centres
- galleries
- natural sites.

Guiding

## SITTGDE301 Work as a guide

### Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITTGDE001B Work as a guide.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to work effectively as a guide. It covers key legal, ethical, safety, environmental and professional development issues that guides must consider in their day-to-day work.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act (2003).

### Application of the Unit

This unit applies to guides who may work across multiple industry sectors as employees or independent contractors. They could operate within a single site, or in a particular city, region or tourist precinct, but they often move across sites, cities and regions.

Guides apply discretion and judgement within established organisational procedures, and when on tour they take a lead role without supervision. Sometimes guides are the owner-operators of small tour operations.

### Licensing/Regulatory Information

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- |   |  |
|---|--|
| 1. Apply knowledge of the guiding sector.                           | <ul style="list-style-type: none"> <li>1.1 Conduct guiding activities in a manner that takes account of the roles and responsibilities of different types of guides.</li> <li>1.2 Identify key guide information sources and contacts.</li> <li>1.3 Use industry knowledge and guide networks to enhance the quality of guiding services provided to customers.</li> </ul>   |
| 2. Guide tours according to legal, ethical and safety requirements. | <ul style="list-style-type: none"> <li>2.1 Conduct guiding activities according to legal requirements governing the industry.</li> <li>2.2 Actively participate in <b><i>risk assessment</i></b> as an integral part of work activities.</li> <li>2.3 Take account of <b><i>ethical considerations</i></b> for particular contexts.</li> <li>2.4 Guide tours according to safety requirements.</li> <li>2.5 Support <b><i>sustainability</i></b> in work practices.</li> </ul>           |
| 3. Develop guiding skills and knowledge.                            | <ul style="list-style-type: none"> <li>3.1 Identify and use <b><i>opportunities</i></b> to update knowledge and skills required by guides.</li> <li>3.2 Maintain knowledge of <b><i>technologies</i></b> used by guides.</li> <li>3.3 Identify and access sources of guide support when required.</li> <li>3.4 Share knowledge with colleagues to enhance quality of service provided to customers.</li> </ul>   |
| 4. Communicate with tourism industry operators in English.          | <ul style="list-style-type: none"> <li>4.1 Articulate information using industry acceptable language.</li> <li>4.2 Achieve mutual understanding and agree on details relevant to guiding activities.</li> <li>4.3 Provide accurate information and explanations about customer requirements and special requests.</li> <li>4.4 Identify nature and key facts of operational problems and provide appropriate solutions by consulting with the <b><i>tourism operator</i></b>.</li> </ul> |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to liaise with others on operational matters
- critical thinking skills to:
  - evaluate legal, ethical, safety and sustainability issues and requirements for guides
  - make decisions on appropriate behaviours and actions
  - contribute to risk assessment processes
- literacy skills to:
  - read and interpret industry codes of practice and regulations
- learning and self-management skills to maintain and enhance professional skills and knowledge
- technology skills to work with online information systems.

### Required knowledge

- tourism industry sectors and their interrelationship, in particular the tour operations and wholesaling sectors and the way that guiding fits into the tourism industry
- roles, responsibilities and career paths for different types of guides, including tour guides, tour managers, site guides, adventure guides, meet and greet guides, city hosts and driver guides
- role of the guide in the risk management process
- roles and services provided to guides by peak guiding bodies and industry associations
- industry and legal compliance requirements that affect guiding operations, including:
  - consumer protection laws
  - occupational licensing and industry accreditation
  - contents of various guiding codes of conduct or practice and the impacts of non-compliance
  - public liability and the guide's duty of care
  - environmental laws
  - permit requirements for operating in protected areas
  - Queensland Tourism Services Act (2003) requirements for guides when working in Queensland
- safety issues that affect guiding operations in particular contexts, particularly those related to customer safety in different environments
- sustainability considerations for professional guides, including those related to:
  - host community interactions, including Indigenous contexts
  - minimal impact practices
  - own professional development.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- provide guiding services that meet legal, ethical, safety and sustainability requirements
- communicate with industry colleagues in English and achieve mutual understanding on day-to-day operational requirements
- demonstrate knowledge of roles and responsibilities of different types of guides
- demonstrate knowledge of legal, ethical, safety and sustainability issues to be considered in specific guiding contexts.

#### Context of and specific resources for assessment

Assessment must ensure use of:

- environments in which guiding activities take place, e.g. at visitor sites, on-board various forms of transportation
- plain English documents that describe the legal requirements of the Queensland Tourism Services Act (2003), consumer laws and environmental management issues
- industry association membership information and codes of conduct
- other people to allow for oral communication in English on practical guiding matters.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- use of case studies and problem-solving activities to assess application of knowledge to different guiding situations and contexts, including analysis of ethical issues
- use of role-plays to assess the individual's ability to communicate in English on practical guiding issues, and to guide a tour
- written or oral questioning to assess knowledge of different guide roles, content of industry codes of conduct and relevant legal issues
- review of portfolios of evidence and third-party

workplace reports of on-the-job performance by the individual.

### Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE303 Lead tour groups
- SITTGDE401 Coordinate and operate tours
- SITTIND201 Source and use information on the tourism industry
- SITTSL303 Sell tourism products and services.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Risk assessment*** activity may involve:

- dealing with inherent risks
- identifying hazards as part of normal operations
- making simple reports
- identifying need for a full risk assessment
- using risk assessment templates.

***Ethical considerations*** may relate to:

- compliance with industry codes of conduct
- cultural considerations
- dealings with local communities, including Indigenous communities
- provision of services as promoted or confirmed
- relationships with industry colleagues, customers and suppliers
- unconscionable conduct.

***Sustainability*** may be:

- economic:
  - business profitability
- environmental:
  - minimal impact
  - waste minimisation
- social:
  - interactions with host communities.

- Opportunities** may include:
- familiarisation tours
  - industry seminars
  - participation in industry accreditation schemes
  - participation or membership in professional guide associations
  - research
  - social networking
  - training courses.

- Technologies** may include:
- presentation technologies
  - RFID codes (for hand held devices)
  - social networking.

- Tourism operator** may be:
- inbound tour operators
  - other guides
  - retail outlets, including:
    - factory outlets
    - opal or souvenir outlets
    - tax free stores
  - suppliers of any tourism product or service that is a component of the touring itinerary, including:
    - accommodation providers
    - airlines
    - attraction or theme parks
    - coach companies
    - food and beverage outlets
    - tour operators and cruise operators.

## SITTGDE306 Research and share general information on Australian Indigenous cultures

### Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITTGDE008A Research and share general information on Australian Indigenous cultures.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to research and share information about Australian Indigenous societies in a culturally appropriate way. It focuses on information that is widely available to the general community. The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of culturally appropriate behaviour and local community consultation.

### Application of the Unit

This unit applies across many industry sectors. It is particularly relevant to cultural tourism operations and to individuals who work in customer service and guiding roles with differing levels of responsibility. Information could apply to Indigenous countries and cultures across Australia, or to a specific Indigenous country and culture.

### Licensing/Regulatory Information

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru National Parks in the Northern Territory. This training is based on the following units:

- SITTGDE101 Interpret aspects of local Australian Indigenous culture
- SITTGDE306 Research and share general information on Australian Indigenous cultures.

### Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- |  |  |
|--|--|
| 1. Research general information on Australian Indigenous cultures. | 1.1 Identify key information <i>sources</i> about Australian Indigenous cultures.  |
|  | 1.2 Select and use formal and informal research techniques to access current, accurate and relevant <i>information</i> about Australian Indigenous cultures. |
|  | 1.3 Obtain information in a culturally appropriate way.  |
|  | 1.4 Enhance cultural awareness and understanding by sharing information with others.   |
| 2. Share general information on Australian Indigenous cultures.    | 2.1 Identify and use Indigenous interpreters where possible.   |
|  | 2.2 Provide people with guidance on appropriate behaviour when interacting with Indigenous people.   |
|  | 2.3 Share clear and accurate information on Australian Indigenous cultures ensuring acknowledgment of the diversity of cultures.                             |
|  | 2.4 Share information in a manner respectful of local community values and customs.  |
|  | 2.5 Answer questions according to community wishes about what information can be shared.   |
|  | 2.6 Respond to culturally inappropriate customer behaviour in a manner that minimises the likelihood of offence being taken.                                 |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to:
  - use cultural awareness when communicating with people from other cultures
  - share information clearly

- literacy skills to:
  - source information about Australian Indigenous cultures
  - interpret varied information on Australian Indigenous cultures.

### **Required knowledge**

- protocols for researching and sharing information about Australian Indigenous cultures
- fundamental Indigenous intellectual property issues, including:
  - strong links between intellectual property and cultural heritage
  - issues associated with the reproduction and sale of Indigenous cultural works
- Australian Indigenous cultures and their place in historical and contemporary Australia
- aspects of Australian Indigenous cultures relevant to the regional context.

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Overview of assessment**

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- follow protocols for researching and sharing information generally available about Australian Indigenous cultures
- demonstrate knowledge of Australian Indigenous cultures
- source different types of information covering multiple topics to ensure a breadth of knowledge.

#### **Context of and specific resources for assessment**

Assessment must ensure use of:

- people accepted by the local community in the assessment process (where information is specific to a community)
- information sources verified or supported by Indigenous communities.

## Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the individual sharing information about Australian Indigenous cultures
- questioning of group members about the individual's breadth of knowledge and ability to answer customer questions
- review of a portfolio of information prepared by the individual
- written or oral questioning to evaluate the process undertaken by the individual to source information
- written or oral questioning or to assess general knowledge of Australian and Indigenous cultures appropriate to the region
- use of case studies to assess ability to apply correct protocols to particular situations
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

## Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE304 Prepare and present tour commentaries or activities.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Sources* may include:

- artworks
- events
- exhibitions
- experiences (of self or others)
- films
- images
- Internet

**Information** may cover:

- music
- other people:
  - Indigenous people
  - traditional owners
- performances
- presentations
- professional associations
- printed texts (books, journals, magazines, newspapers)
- technical information.
- Australian Indigenous cultures and countries in general
- specific topics:
  - art and music
  - bushcraft, bush food and bush medicine
  - contemporary Indigenous life and culture
  - cultural sites:
    - cultural centres
    - galleries
    - natural sites
    - occupation sites like middens
  - dance
  - history, pre and post-European contact
  - land ownership
  - tools and implements
  - traditional life and culture.

## SITTGDE307 Prepare specialised interpretive content on flora, fauna and landscape

### Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITTGDE010A Prepare specialised interpretive content on flora, fauna and landscape. Corequisites removed.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to research specialised information on flora, fauna and landscape, and then critically analyse that information to develop interpretive themes and messages. It highlights the need for ongoing research to update and expand knowledge.

### Application of the Unit

This unit applies across many industry sectors and has particular application to guides who work in national parks, or who conduct tours with a strong focus on the natural environment. In this context, they work independently to research and prepare interpretive content.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- critical thinking and interpretive skills to:
  - establish an interpretive framework
  - evaluate and adapt a varied range of information for practical workplace purposes
  - create key messages, themes and storylines for audiences
- literacy skills to:
  - interpret potentially complex and detailed information on flora, fauna and landscape
- learning skills to proactively build own knowledge base
- technology skills to use the Internet as a research tool.

## Required knowledge

- understanding of the role of interpretation in creating a powerful customer experience
- current interpretive theory, methods and media
- sources of information on flora, fauna and landscape in the relevant geographic context
- landscapes of interest within a local region and their general characteristics
- key ecological terminology and concepts, including:
  - biotic and physical factors
  - populations
  - biodiversity and abundance
  - food web
  - community relations
  - life cycles
  - succession
  - zonation
  - carbon cycle
  - water cycle
  - energy flow
  - nutrient cycle
- interrelationships between parts of the ecosystem:
  - developmental processes related to the formation of the local landscapes, including:
    - geological formations and history
    - soil composition and its relation to plant and animal life and water catchment areas
- principles of Gondwana theory and the impact of Gondwana on plant and animal communities
- major species of flora and fauna within the landscape, including:
  - nature of species and where it is found
  - roles of individual species
  - characteristics
  - commonalities
  - interactions between species and the environment
  - nutrition and life cycles
  - species harmful to humans
- identification techniques for flora and fauna
- environmental influences that affect the landscape, including climate and fire
- nature of human impact on the landscape, including industrial impacts
- management regimes for the local landscape, including relevant authorities and codes of practice
- Australian Indigenous perspective on the landscape.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- demonstrate knowledge of flora, fauna and landscape as detailed under Required Knowledge
- develop coherent and interesting interpretations for presentation.

#### Context of and specific resources for assessment

Assessment must ensure use of:

- current specialised information sources
- current interpretive resources.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the individual using knowledge to deliver interpretive commentaries or activities
- questioning of group members about the individual's breadth of knowledge and ability to answer customer questions
- review of a research portfolio prepared by the individual
- written or oral questioning to assess the way in which the research process has been used
- written or oral questioning to assess aspects of specialised knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

#### Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE303 Lead tour groups
- SITTGDE304 Prepare and present tour commentaries or activities
- SITTPPD402 Develop interpretive activities.

Assessment should also recognise the different ways that people acquire specialised knowledge, for example:

- specialised qualifications in the subject matter area
- cultural knowledge in Aboriginal or Torres Strait Islander societies.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Sources* may include:

- artworks
- events
- exhibitions
- experiences and observations (of self or others)
- films
- images
- Internet
- music
- objects
- other people:
  - local experts
  - traditional owners
- performances
- presentations
- professional associations
- printed texts (books, journals, magazines, newspapers)
- special interest groups:
  - geological societies
  - plant study groups
  - wildlife societies
- technical information.

*Landscape* may be:

- alpine
- coastal
- desert
- outback
- temperate
- tropical.

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- critical thinking and interpretive skills to:
  - establish an interpretive framework
  - evaluate and adapt a varied range of information for practical workplace purposes
  - create key messages, themes and storylines for audiences
- literacy skills to:
  - interpret potentially complex and detailed information on cultural and heritage environments

- learning skills to proactively build own knowledge base
- technology skills to use the Internet as a research tool.

### **Required knowledge**

- understanding of the role of interpretation in creating a powerful customer experience
- current interpretive theory, methods and media
- sources of information on cultural and heritage environments
- the nature and significance of one or more cultural or heritage environments including:
  - how the environment developed and evolved
  - historically and culturally significant features, including details of any exhibits, displays or performances
  - individuals associated with the environment, their roles and impacts
  - role of the environment in the local community, both past and present
  - relationship of the environment to past and current Australian culture and history.

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Overview of assessment**

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- demonstrate knowledge of cultural and heritage environments as detailed under Required Knowledge
- develop coherent and interesting interpretations for presentation.

#### **Context of and specific resources for assessment**

Assessment must ensure use of:

- current specialised information sources
- current interpretive resources.

#### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the individual using knowledge to deliver interpretive commentaries or activities
- questioning of group members about the individual's breadth of knowledge and ability to answer customer questions
- review of a research portfolio prepared by the individual

- written or oral questioning to assess the way in which the research process has been used
- written or oral questioning to assess aspects of specialised knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

### **Guidance information for assessment**

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE303 Lead tour groups
- SITTGDE304 Prepare and present tour commentaries or activities
- SITTPPD402 Develop interpretive activities.

Assessment should also recognise the different ways that people acquire specialised knowledge, for example:

- specialised qualifications in the subject matter area
- cultural knowledge in Aboriginal or Torres Strait Islander societies.

## **Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Sources* may include:

- artworks
- events
- exhibitions
- experiences and observations (of self or others)
- films
- images
- Internet
- music
- objects
- other people:
  - local experts
  - traditional owners

*Cultural and heritage environments* may be natural or built and may include:

- performances
- presentations
- professional associations
- printed texts (books, journals, magazines, newspapers)
- special interest groups:
  - geological societies
  - plant study groups
  - wildlife societies
- technical information.
- Aboriginal art or occupation sites
- art galleries
- cultural centres
- heritage trails
- historic localities or regions
- historic theme parks
- museums
- prehistoric and fossil sites.

Guiding

## SITTPPD402 Develop interpretive activities

### Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITTPPD005A Plan and develop interpretive activities. Title simplified.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives, develop operational aspects and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE304 Prepare and present tour commentaries or activities.

### Application of the Unit

This unit applies to many industry sectors and has particular relevance in tourism, sport and recreation and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and development of interpretive activities may be for a series of activities within a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- |                                   |   |
|-----------------------------------|---|
| 1. Establish need for activities. | 1.1 Identify need for <i>interpretive activities</i> , based on customer, organisation and community needs.                       |
|                                   | 1.2 Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues.                    |
| 2. Create activities.             | 2.1 Identify and evaluate a range of potential information and <i>resources</i> , including <i>other specialists</i> as required. |
|                                   | 2.2 Develop interpretive framework for activities.  |
|                                   | 2.3 Generate and select ideas for potential messages, themes and storylines.  |
|                                   | 2.4 Consider relationships between themes, storylines and the site.   |
|                                   | 2.5 Incorporate interpretive media that matches the site.   |
|                                   | 2.6 Conduct a risk assessment and incorporate controls into activity development.   |
|                                   | 2.7 Evaluate and integrate legal, ethical and sustainability considerations.  |
|                                   | 2.8 Develop resources to support activities.  |
|                                   | 2.9 Develop activity within budget to meet agreed objectives.   |
|                                   | 2.10 Promote activities according to organisational marketing objectives.   |
| 3. Evaluate activities.           | 3.1 Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities.                   |
|                                   | 3.2 Modify activities according to feedback received.   |
|                                   | 3.3 Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives. |

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to consult with colleagues about development issues for interpretive activities
- critical thinking skills and research skills to evaluate wide ranging information and tease out creative themes and messages for activities
- literacy skills to:
  - analyse complex information and to interpret this for creative communication to customers
  - develop resources and information materials for the activities
- numeracy skills to calculate costs and work within established budgets
- planning and organising skills to coordinate creative and practical aspects of activities
- problem-solving skills to evaluate and adjust activities.

### Required knowledge

- subject matter around which activities are developed
- principles of interpretation, including work of Freeman Tilden
- physical and digital interpretive media
- practical processes that support activity development, including:
  - budgeting
  - evaluation
  - needs analysis
  - resource development
  - scheduling
- creative communication techniques for interpretive activities, including:
  - games
  - illustrated talks
  - role-playing
  - sensory awareness exercises
  - storytelling
  - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes, including:
  - determining overall risk level
  - determining the exposure to the risk
  - estimating the probability of negative impacts
  - identifying the consequences that could result from the identified risk
- legal, ethical and sustainability considerations for activity development, including:

- cultural appropriateness
- duty of care
- minimal impact
- minimising waste and conserving resources.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- plan and develop multiple interpretive activities with varying themes and messages that meet the needs of different customer groups and commercial and operational constraints
- apply subject matter knowledge to the development of interpretive activities
- plan and develop interpretive activities for a number of different delivery environments.

#### Context of and specific resources for assessment

Assessment must ensure use of:

- a real or simulated environment for which interpretive activities can be planned and developed.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- evaluation of a project undertaken by the individual to develop and evaluate activities for a nominated customer group or organisation
- evaluation of activities by professional interpretation organisations
- written or oral questioning to assess knowledge of interpretation principles and activity development processes
- use of case studies to assess ability to tailor activities and information to suit particular customer needs
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

## Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE304 Prepare and present tour commentaries or activities
- SITTGDE306 Research and share general information on Australian Indigenous culture
- SITTGDE307 Prepare specialised interpretive content on flora, fauna and landscape
- SITTGDE308 Prepare specialised interpretive content on marine environments
- SITTGDE309 Prepare specialised interpretive content on cultural and heritage environments.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### *Interpretive activities:*

- may include:
  - guided site activities
  - guided walks
  - one or more activities that may be combined in an overall tour program
  - sporting activities
  - touring activities
  - virtual activities
- may relate to a range of subjects, including:
  - art
  - birds
  - built environment
  - culture
  - domestic and farm animals
  - festivals or seasonal themes
  - history and heritage
  - natural environment
  - sports

- wildlife.
- Resources** may include:
- actors and performers
  - apps and other digital content
  - costumes
  - guest speakers
  - handouts
  - information and communications technology
  - natural resources
  - props
  - professional organisations
  - special interest organisations.
- Other specialists** may include:
- actors and performers
  - creative designers
  - cultural advisers
  - designers
  - environmental educators
  - heritage specialists
  - historians
  - interpretation consultants
  - marketers
  - subject matter experts
  - technical experts.

# SITTPPD602 Develop environmentally sustainable tourism operations

## Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	<p>E</p> <p>Replaces and is equivalent to SITTPPD006B Plan and develop ecologically sustainable tourism operations.</p> <p>Title changed to better reflect the intent and content of the unit Added innovation. Minor changes to structure for consistency.</p>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan strategically for environmentally sustainable operations. It requires the ability to establish and operate a sustainable operation and to monitor its environmental impact.

The work involved in this unit is subject to a range of regulatory requirements that relate to environmental sustainability at land management agency and federal, state or territory, and local government level.

## Application of the Unit

This unit applies to all industry sectors, and to individuals with managerial responsibilities who have strategic planning and product development roles. Planning may be for a whole region or local area or for a particular venue, organisation, event or product. The unit applies to any operation with a strong focus on environmental sustainability.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

- communication skills to consult with diverse stakeholders on potentially divisive and nuanced issues
- critical thinking skills to evaluate complex issues and information and develop strategic responses
- literacy skills to:
  - interpret materials describing environmental regulatory requirements and codes of practice
  - develop plans, systems and procedures for tourism operations
- numeracy skills to perform complex calculations to assess profitability considerations
- planning and organising skills to coordinate interrelated planning and operational processes
- problem-solving skills to respond to complex internal and external management challenges.

### Required knowledge

- current research trends in the area of ecologically sustainable operations
- global environmental issues, in particular a layperson's understanding of the science associated with:
  - climate change
  - energy
  - land management
  - waste and consumption
  - water
- relevance of particular environmental issues to the area or region of work including the specific features and vulnerabilities of the local environment
- consultation and communication mechanisms used by organisations in the product development process, including:
  - features
  - nature
  - objectives and outcomes
  - scope
  - time parameters
- strategic frameworks and operational systems and procedures that support environmentally sustainable operations, including those related to:
  - customers
  - equipment and supplies
  - staff

- ways of balancing ecological sustainability and the economic viability of an operation
- laws, regulations and land management requirements and guidelines, including:
  - need for permits in national parks or on land under control of traditional owners
  - restrictions on operations in relevant areas.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- develop and implement a plan for a tourism, hospitality or event operation that supports environmental sustainability and provides evidence of:
  - analysis of key environmental issues
  - consultation with key stakeholders
  - development of strategies and operational approaches that maximise positive impacts
  - integration of current legislation, regulations and industry codes
- demonstrate knowledge of current and emerging issues and trends for tourism and the environment.

#### **Context of and specific resources for assessment**

Assessment must ensure use of:

- a destination, location, organisation or event for which an environmentally sustainable operation can be established
- current information about environmental practices, such as legislation, guidelines and industry codes of practice
- stakeholders with whom consultations can take place
- current information and communications technology to support the research and planning process.

#### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- evaluation of a completed plan, including analysis of all evaluations that have been conducted
- evaluation of codes of practice developed by the

- individual for operations in particular locations
- use of case studies to assess ability to:
  - evaluate and respond to different commercial and environmental challenges
  - make suggestions for improving the environmental sustainability of existing tourism operations
- written or oral questioning to assess knowledge of industry codes of conduct, regulatory requirements, minimal impact techniques and methods of managing tourism impact
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

### **Guidance information for assessment**

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTPPD601 Develop tourism products
- SITTPPD603 Develop culturally appropriate tourism operations
- SITXFIN501 Prepare and monitor budgets.

## **Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Evaluations* may involve:

- environmental impact study
- evaluation of organisational capacity to comply with:
  - environmental and community protection laws
  - industry and ecotourism codes of practice
- social sustainability
- site studies.

*Stakeholders* may include:

- consumer representatives
- host community
- investors
- government authorities
- land management agencies
- suppliers of environmentally-friendly products.

*Methods of managing impact* may include:

- community consultation and involvement
- education programs:
  - internal
  - external
- exclusion
- operational initiatives:
  - equipment selection
  - frequency of operation
  - group sizes
  - scheduling for optimal weather conditions and seasons
  - selection of most appropriate transport modes.

*Negative environmental impacts* may include:

- disturbance of flora and fauna
- introduction of exotic and feral species
- physical damage
- pollution
- visual impacts
- waste issues.

## SITXCCS201 Provide visitor information

### Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITXCCS001B Provide visitor information. Re-worked Elements, Performance Criteria, Required Skills and Knowledge to more fully articulate content.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to access general information on facilities, products and services available in the local area and to provide this to visitors.

### Application of the Unit

This unit applies to a range of tourism, travel, hospitality, event, entertainment and cultural sectors.

It applies to frontline service personnel who routinely respond to visitor requests for general local area information. They may be working independently or with guidance from others in restaurants, hotels, wineries, attractions, entertainment venues, tour operations, visitor information centres and at tour desks.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- |  |   |
|--|---|
| 1. Access and update visitor information.  | 1.1 Identify and access <i>sources of visitor information</i> .<br>1.2 Obtain general information on different local facilities, products and services to meet different customer needs.<br>1.3 Share information with colleagues to support the efficiency and quality of service.<br>1.4 Identify and use <i>opportunities</i> to update and maintain local area knowledge. |
| 2. Provide information to visitors.        | 2.1 Identify the specific information and assistance needs of the customer.<br>2.2 Provide an appropriate scope and depth of information to meet customer needs.<br>2.3 Promote <i>internal products and services</i> .   |
| 3. Seek feedback on information provision. | 3.1 Proactively seek visitor feedback to ensure all required information has been provided.<br>3.2 Follow procedures for any formal customer evaluation.<br>3.3 Provide internal feedback on visitor information services.  |

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - interact in a friendly and courteous way with customers
  - promote local products and services
- learning skills to continuously update local area knowledge
- literacy skills to:
  - read and comprehend product and local area information
  - research, sort and use relevant information
  - write simple notes on products and local services

- problem-solving skills to identify knowledge deficiencies and seek information to satisfy visitor enquiries
- teamwork skills to share local area information with colleagues and provide internal feedback.

### **Required knowledge**

- sources of information on the local area, facilities and general products available
- sources of information on organisational products and services
- major local attractions and events, transport options and general visitor facilities.

## **Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Overview of assessment**

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- respond to multiple and diverse customer requests and provide local area information to meet their needs
- source accurate and current information on the local area
- integrate knowledge of the local area when providing general information.

#### **Context of and specific resources for assessment**

Assessment must ensure use of:

- a real or simulated tourism, hospitality or event industry environment where visitor information is sourced and provided to customers
- current information on the local area, facilities and general products available
- customers with whom the individual can interact.

#### **Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation, using role plays, to assess the individual's ability to use local knowledge to answer a variety of customer questions
- projects and activities to source and obtain current, accurate and relevant local information
- written or oral questioning to assess knowledge of sources of information on the local area, facilities and

general products available

- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

### **Guidance information for assessment**

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITHACS201 Provide porter services
- SITHACS303 Provide accommodation reception services
- SITXCCS202 Interact with customers
- SITXCCS302 Provide club reception services
- SITXCOM201 Show social and cultural sensitivity.

## **Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

*Sources* may include:

- brochures
- library
- local council
- local people, including local identities with specialised knowledge
- local visitor guide booklets
- maps
- online reservations systems
- organisation information
- organisation-designed information systems, e.g. inventory control database
- principal supplier of the product
- product library
- room directories
- social media websites
- state or territory government tourism authority information systems
- supplier of the product
- the Internet

*Visitor information* may include:

- timetables.
- accommodation options:
  - backpacker lodges
  - holiday parks and resorts
  - hotels
  - motels
- attractions:
  - animal parks
  - art galleries
  - museums
  - national parks
  - walks
  - wineries
  - zoos
- cruises
- dining options:
  - cafes
  - food halls
  - food markets
  - restaurants
- vehicle rental
- entertainment venues:
  - cinemas
  - theatres
  - performing arts centres
- events
- local facilities:
  - airline offices
  - banks
  - dentists
  - doctors
  - currency exchanges
  - hairdressers
  - hospitals
  - emergency services
  - post offices
  - travel agencies
- local shopping facilities:
  - centres
  - malls

- markets
- souvenir shops
- local transport options:
  - buses
  - ferries
  - taxis
  - trains
- organisation-specific information
- road conditions
- sporting facilities
- tours, local outings and trips
- travelling routes
- weather conditions.
- attending team meetings
- informal discussions with colleagues
- listening to radio
- ongoing contact with principal or supplier of the product or service
- participating in local familiarisation tours
- reading:
  - brochures
  - and internal newsletters
  - leaflets
  - local newspapers
  - staff noticeboards
- talking and listening to colleagues and customers
- using personal observation or exploration
- visiting the local information centre
- watching television, videos and films.
- accommodation
- activities
- general retail products and souvenirs
- products made by the organisation:
  - craft items
  - food
  - wine
- restaurant products
- tours.

*Opportunities* may include:

*Internal products and services* may include:

## **Competency Field**

Client and Customer Service

## SITXCOM301 Address protocol requirements

### Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITXCOM006A Address protocol requirements. Re-worked Elements, Performance Criteria, Required Skills and Knowledge to more fully articulate content.

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to source and access information on protocol requirements to fulfil any sales or operational need. It requires the ability to identify appropriate information sources, access and interpret specific details of protocol requirements and to coordinate the use of protocol.

### Application of the Unit

This unit applies to many tourism, travel, hospitality and event sectors and is particularly relevant to events, function coordination, tour operations and tour guiding.

Protocol affects a broad range of business and government activity and the breadth and depth of protocol knowledge required will vary. This unit is not about having an in-depth knowledge of protocol requirements but focuses on the ability to collect and interpret protocol information.

This unit applies to a range of people working independently or with limited guidance including tour and event coordinators, and managers; tour guides and front of house or duty managers.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

### Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- |  |   |
|--|---|
| 1. Source information on appropriate protocol. | 1.1 Assess the need for protocol to be followed for the <i>particular situation</i> .<br>1.2 Identify relevant <i>sources of protocol information</i> .<br>1.3 Liaise with customers to determine appropriate protocol.<br>1.4 Interpret relevant protocol information to inform work practice. |
| 2. Coordinate the use of protocol.             | 2.1 Identify <i>specific work activities</i> that require appropriate use of protocol.<br>2.2 Provide protocol briefings to staff and suppliers.<br>2.3 Coordinate the use of correct protocol for the delivery of <i>products and services</i> .   |
| 3. Update knowledge of protocol.               | 3.1 Identify and use <i>opportunities to update protocol knowledge</i> .<br>3.2 Share updated knowledge with customers and colleagues.  |

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - liaise with customers, clients, their agents and personal assistants to ascertain protocol
  - address dignitaries and officials using appropriate language
- learning skills to continually seek information to enhance knowledge of protocol
- literacy skills to:
  - read and interpret unfamiliar and complex protocol information
  - research and analyse information on protocol
  - write correspondence to dignitaries and officials, invitations and team briefing papers
- self-management skills to take responsibility for meeting protocol requirements

- teamwork skills to share protocol information with team members to ensure protocol is followed.

### Required knowledge

- main types of civic functions held in Australia
- importance and role of protocol in different business situations
- key sources of information on protocol for:
  - Australian honours system, including order of precedence, ranks and forms of address, and wearing of honours and medals
  - involvement of Indigenous Australians and other cultural groups in business activities
  - correct use of national and state symbols, including flags, anthems and military salutes
  - forms of address for different VIPs and dignitaries, both for written correspondence and in oral communication
- protocols for different situations, including:
  - invitations to VIPs
  - arrival procedures, including for heads of state or government officials
  - introduction protocols and order of speakers
  - order of precedence for official guests
  - seating arrangements
  - dress styles.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- source accurate information on multiple and diverse protocol requirements
- use protocol for diverse oral and written purposes
- integrate knowledge of protocol when organising business activities.

#### Context of and specific resources for assessment

Assessment must ensure use of:

- current protocol information.

#### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation, using roles plays, of the individual addressing and introducing dignitaries and officials
- activities to assess the individual's ability to:
  - source information on protocol
  - coordinate the use of correct protocol for the delivery of products and services
- evaluation of documents prepared by the individual which include use of protocol:
  - briefing papers
  - correspondence to dignitaries and officials
  - invitations
  - marketing materials
  - running sheets
- written or oral questioning to assess knowledge of key sources of information on protocol and protocols for different situations
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

### Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTGDE401 Coordinate and operate tours
- SITTTSL201 Operate an online information system
- SITXEVT401 Plan in-house events or functions
- SITXMPR401 Coordinate production of brochures and marketing materials.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Particular situation*** may involve:

- event organisation, including:
  - citizenship ceremonies
  - civic receptions
  - formal parades
  - freedom of city ceremonies

***Sources of protocol information*** may include:

- national day receptions
- private functions
- general business administration
- issuing marketing materials reflecting correct titles of dignitaries
- meeting the requirements of dignitaries and officials
- meeting the requirements of entertainers and masters of ceremony.
- Aboriginal Land Councils
- Australia Day Councils
- customers, clients, their agents and personal assistants
- federal, state or territory, and local government protocol departments
- Internet
- libraries
- Office of the United Nations.

***Specific work activities*** may involve:

- addressing and introducing dignitaries and officials
- correspondence to dignitaries and officials
- issuing invitations
- liaison with dignitaries and officials
- preparing:
  - briefing papers
  - marketing materials
  - running sheets
- providing various services during the conduct of an event, including on-site management and service of food and beverage.

***Products and services*** may include:

- accommodation
- events
- functions
- meetings
- tours.

***Opportunities to update protocol knowledge*** may include:

- informal networking with colleagues
- Internet research
- reading relevant journals.

## Elements and Performance Criteria

### Elements and Performance Criteria

Element	Performance Criteria
1 Identify the core business and establish the strategic direction of the organisation	1.1 Identify the <b>core business of the organisation</b>
	1.2 Identify, explain and document the relationships between the organisation and other <b>stakeholders</b>
	1.3 Interact with key <b>stakeholders</b> to inform them of achievements and to ensure their input into the determination of strategic goals and directions
	1.4 Document the organisation's strategic direction and priorities
	1.5 Establish performance targets, that form the basis for evaluation of performance
2 Follow legal requirements when carrying out Board duties	2.1 Identify and refer to the relevant provisions of the <b>legal framework</b> under which the organisation was established
	2.2 Monitor relevant aspects of the appropriate federal, state and local <b>legislation</b> and by-laws for organisation compliance
3 Work within the structure of the organisation	3.1 Differentiate and document the member, governance and management issues of the organisation in the <b>organisation's governance policy guidelines</b>
	3.2 Identify, document and refer to the relationships between governance issues and management issues
	3.3 Identify and document the role of the Board in the <b>organisation's governance policy guidelines</b>
	3.4 Identify and document the role of the individual Directors in the <b>organisation's governance policy guidelines</b>
	3.5 Identify and document the role of the Chairperson in the <b>organisation's governance policy guidelines</b>
	3.6 Identify and document the role of the Secretary in the <b>organisation's governance policy guidelines</b>

- 3.7 Document delegations of the Board's authority
- 3.8 Undertake and evaluate duties outlined in job descriptions of Board members regularly as a whole **Board assessment** and an **individual Director assessment**
- 4 **Monitor trends and changes in the industry**
  - 4.1 Ensure the Board is aware of **emerging issues** in the industry that are likely to have an impact on the organisation's business
  - 4.2 Evaluate the identified **emerging issues** within a risk management and due diligence framework for their impact on the organisation
  - 4.3 Ensure those **emerging issues** requiring attention by the organisation are dealt with by the Board in an appropriate manner
  - 4.4 Demonstrate how the Board regularly reviews its policies and procedures to take account of the **emerging issues**
- 5 **Monitor the organisation's operations**
  - 5.1 Ensure preparation for meetings is adequate and timely
  - 5.2 Record meeting attendance and encourage effective participation by all Board members
  - 5.3 Utilise information provided in analysing the efficiency and effectiveness of the organisation in meeting its stated objectives and performance targets
  - 5.4 Review policies, procedures, operations and **workplace responsibilities** of the organisation and adapt accordingly
- 6 **Supervise the senior management of the organisation**
  - 6.1 Receive information and advice regularly from the senior management of the organisation to form the basis of informed decision-making
  - 6.2 Provide instructions to the senior management of the organisation to implement specific policy directions as required
  - 6.3 Seek feedback from senior management of the organisation in relation to the implementation of the specific policy directions

- 6.4 Assess the performance of the Chief Executive Officer (CEO) regularly in accordance with the **legal framework** under which they are engaged

## Required Skills and Knowledge

Not applicable.

## Evidence Guide

### Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

### Critical aspects of evidence to be considered

Assessment must confirm sufficient knowledge of being an effective paid or unpaid member of the Board of a sport or recreation organisation in the work environment

Assessment of performance should be over a period of time covering all categories of the Range Statements that are applicable in the learner's environment

In particular, assessment must confirm the ability to

identify the core business and establish the strategic direction of the organisation

follow legal requirements when carrying out Board duties

work within the structure of the organisation

monitor trends and changes in the industry

monitor the organisation's operations

supervise the senior management of the organisation

### Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

SRXGOV002B Undertake the role of an individual Director of an organisation

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

Nil

### **Required knowledge and skills**

#### Required knowledge

Knowledge of natural justice and fair process as it relates to the evaluation and assessment of the effectiveness and efficiency of a Board and individual Directors

Knowledge of the business and operations of the organisation as it relates to participating in the formulation of strategic directions

Knowledge of the legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation

Knowledge of roles and responsibilities of particular functions on the Board such as Chairperson, Secretary and Director

Knowledge of the role policies and procedures play in the effective running of an organisation

Knowledge of the separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)

Knowledge of performance measurement systems as they relate to the measurement of the efficiency and effectiveness of the organisation in meeting its stated performance targets

Knowledge of effective human resource management practices as they relate to the delegation, monitoring and evaluation of the Chief Executive Officer (CEO) and senior management

Knowledge of issues to do with Occupational Health and Safety (OH&S) as they relate to the employment of staff

#### Required skills

Literacy and numeracy skills as they relate to the reading, comprehension, evaluation and analysis of documentation that relates to the organisation's strategic direction, governance policy guidelines, undertaking of the function of Director and the monitoring of trends in industry

Research skills as they relate to the monitoring of trends in industry

Verbal communication skills as they relate to the presentation of cogent arguments within the Board processes

Written communication skills as they relate to the presentation of papers at a Board meeting

Negotiation skills as they relate to active participation in Board discussions and decision - making

Consultation skills as they relate to the meaningful engagement of relevant stakeholders in the organisation's operations

Policy development skills as they relate to the drafting of, consultation on and endorsement of policies and procedures for the effective operation of the organisation

#### Resource implications

Physical resources - assessment of this competency requires access to either real or simulated organisations and their respective Board processes

Human resources - assessment of this unit of competency will require human resources

consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must

be competent in this unit but preferably be competent in the unit at the level above

be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area

have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the **Standards for Registered Training Organisations**

### **Consistency in performance**

Due to issues such as performing various duties as a member of a Board of an organisation, this unit of competency must be assessed over period of time in order to ensure consistency of performance over the Range Statements and contexts applicable to participating as a member of an effective Board of an organisation

### **Context for assessment**

This unit of competency must be assessed in the context of participating as a member of an effective Board of a sport or recreation organisation

Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

## **KEY COMPET ENCIES**

Collect, Analyse & Organise Information	Communicate Ideas & Information	Plan & Organise Activities	Work with Others & in Teams	Use Mathematical Ideas & Techniques	Solve Problems	Use Technology
3	3	3	3	3	3	2

These levels do not relate to the Australian Qualifications Framework. They relate to the seven areas of generic competency that underpin effective workplace practices.

The three levels of performance (1, 2 and 3) denote the level of competency required to perform the task:

Use routine approaches

Select from routine approaches

Establish new approaches

**Collecting, analysing**

**and  
organising  
informatio**

**n -**  
Collecting  
information  
on the core  
business of  
the  
organisatio  
n

**Communic  
ating ideas  
and  
informatio**

**n -**  
Reporting  
to the  
Board on a  
task that  
was  
allocated

**Planning  
and  
organising  
activities -**

Planning  
and  
organising

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies.

## Range Statement

### Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency

### RANGE STATEMENT

**Board assessment**

### CATEGORIES

[all categories]

the assessment of the Board as a whole could

be undertaken by four key issues

chat with the Chairperson

yes/no questionnaire

grading questionnaire

written questionnaire

the introduction of an effective process of Board assessment will involve

implementation over time

gaining commitment

careful preparation

deciding the issues to be covered by the Board assessment

defining measures of performance: organisation and Board

communicating performance

implementing changes

reviewing the process

### **Chief Executive Officer assessment**

[all categories]

the Chief Executive Officer (CEO) assessment should be

undertaken by the Board, as the Chief Executive Officer (CEO) is responsible to the Board as a whole, not just the Chairperson

part of a policy framework

based on objective performance criteria

reviewed as part of an organisation and Board performance review

linked to a remuneration policy which reflects objective performance

the aim of the performance evaluation is to align the long - term interests of the Chief Executive Officer (CEO) with the long - term interests of the organisation. This would require a three stage process of

the Board setting goals for/with the Chief Executive Officer

monitoring the performance of the organisation against the goals

responding to the difference between expected and actual outcomes

performance measures should be

valid

verifiable

controllable

global

communicable

### **Core business of the organisation**

[all categories]

that business that is consistent with the intent and purpose for which the organisation was established

that business that is consistent with the Memorandum and Articles of Association

### **Emerging issues**

[all categories]

the Corporate Law Economic Reform Bill (1998)

technology

information

### **Individual Director assessment**

[all categories]

the assessment of Directors who are currently on the Board can be undertaken by various means

chat with the Chairperson

chat with the Governance Committee

Director self-assessment

aggregated results to give Board profiles

qualitative peer assessment

the assessment of a Director prior to appointment should consider the following issues

the profile should be related to the goals of the organisation and the organisation and Board performance criteria

an external search process should be used to complement the probable likely suspects known to the Board

the appointment term should be considered relevant information should be discussed prior to the appointment

current Directors should meet the final candidate to ensure they are comfortable that the new Director will contribute the skills knowledge and experience sought in a team-like manner

a thorough induction process should be undertaken

## Legal framework

[all categories]

the legal context within which the organisation operates

association - Associations law

corporation - Corporation law

## Legislation

[all categories]

specific laws

Corporation law

the Corporations law, the complementary State legislation and the Ordinances of the relevant Territories

the Company Law Review Act (1998)

the Corporate Law Economic Reform Bill (1998)

Associations law

Trade Practices law

competition

consumer protection

Contract law

Environmental law

Taxation law

Regulatory compliance

laws relating to people

Industrial Relations/Workplace Relations Act

Occupational Health and Safety (OH&S) Acts

Employment

Equal Opportunity and Anti - Discrimination

Child Protection

Volunteer Workers Insurance

Public Liability

Workers compensation

Business specific laws

laws relating to business

Income Tax Act

Payroll Acts

Stamp duty Act

Liquor Licensing Acts

Landlord and Tenant

Goods and Services Tax (GST) Act

Copyright Act

Trade Marks Act

Business specific laws and Acts

**Organisation's governance policy guidelines**

[all categories]

would include policies and processes in the areas of

role of board

board structure

role of individual directors

role of chairperson

role of company secretary  
role of chief executive officer  
board meetings  
board meeting agenda  
board papers  
board minutes  
the board calendar  
committees  
delegation of authority  
monitoring  
strategy formulation  
service/advice  
contacts  
chief executive officer evaluation  
director protection  
board evaluation  
director development  
director selection and induction

## **Stakeholders**

[all categories]  
shareholders  
government Ministers  
government departments  
Departments of Consumer Affairs or Fair  
Trading government industry regulators  
Australian Competition and Consumer  
Commission  
Australian Securities and Investments  
Commission  
Departments of Consumer Affairs or Fair  
Trading  
  
Non-government industry regulators  
Australian Stock Exchange

employees

suppliers

customers

media

unions

the community

other organisations

**Workplace responsibilities**

[all categories]

employment of staff

Occupational Health and Safety (OH&S)

## Elements and Performance Criteria

### Elements and Performance Criteria

Element	Performance Criteria
1 <b>Identify the roles of governance and management</b>	1.1 Differentiate and document the member, governance and management issues of the organisation in the <b>organisation's governance policy guidelines</b>
	1.2 Identify, document and refer to the relationships between governance issues and management issues
2 <b>Facilitate the development of an effective Board</b>	2.1 Provide information to enable the <b>Board</b> to analyse the efficiency and effectiveness of the organisation in meeting its stated objectives and performance targets
	2.2 Ensure new Directors understand the way that the <b>Board</b> operates and the <b>organisation's governance policy guidelines</b>
	2.3 Highlight continuing professional development opportunities to the attention of all Directors
	2.4 Monitor relevant aspects of the appropriate federal, state and local <b>legislation</b> and by-laws for organisation compliance and provide advice to ensure Directors follow legal requirements when carrying out <b>Board</b> duties
3 <b>Provide detailed information for the Board to deal with the right matters</b>	3.1 Ensure the <b>Board</b> is aware of <b>emerging issues</b> in the industry that are likely to have an impact on the organisation's business
	3.2 Evaluate the identified <b>emerging issues</b> within a risk management and due diligence framework for their impact on the organisation and provide this information to the <b>Board</b>
	3.3 Differentiate governance and management issues of the organisation to ensure the <b>Board</b> deals with the right matters
	3.4 Collate a well structured <b>Board</b> paper, containing all necessary information items and including a recommendation from management, for all agenda items

- 3.5 Ensure **Board** members receive the papers in sufficient time to study them before the meeting
- 3.6 Establish processes to source appropriate internal and external professional advice for Directors to inform their decision-making (where required)
- 3.7 Establish processes to deal with extraordinary matters that arise outside scheduled meetings
- 4 **Ensure that Board decisions are implemented properly**
  - 4.1 Ensure complete and accurate minutes are recorded and reported to the **Board**
  - 4.2 Identify and implement actions that flow from the decisions clearly
  - 4.3 Implement the appropriate policies and procedures to support the Board's decisions within agreed timeframes
  - 4.4 Advise the **Board** promptly of **issues** affecting the implementation of **Board** decisions
- 5 **Ensure regular communication with the Board**
  - 5.1 Provide information and advice regularly to the **Board** to foster informed decision-making
  - 5.2 Brief the Chairperson in great detail on all substantive issues at all times
  - 5.3 Seek clear instructions from the **Board** in order to implement specific policy directions (as required)
  - 5.4 Seek feedback from the **Board** in relation to the performance of staff regarding implementation of the specific policy directions

## Required Skills and Knowledge

Not applicable.

## Evidence Guide

### Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of

competence and should be read in conjunction with the Range Statements

**Critical aspects of evidence to be considered**

Assessment must confirm sufficient knowledge of working effectively with the Board of a recreation organisation or facility in the work environment

Assessment of performance should be over a period of time covering all categories of the Range Statements that are applicable in the learner's environment

In particular, assessment must confirm the ability to

differentiate between management and governance issues

ensure the Board follows the organisation's governance policy guidelines

facilitate the establishment of an effective Board team

arrange for the Board to deal with the right matters

provide sufficient documentation for the Board to reach informed decisions

ensure that the decisions are implemented properly

communicate regularly with the Board and ensure the Chairperson is well briefed on current issues affecting the organisation

**Interdependent assessment of units**

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

Nil

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

Nil

## Required knowledge and skills

### Required knowledge

Knowledge of the business and operations of the organisation as it relates to the formulation of strategic directions

Knowledge of the legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation

Knowledge of roles and responsibilities of particular functions on the Board such as Chairperson, Secretary and Director

Knowledge of the role policies and procedures play in the effective running of an organisation

Knowledge of the separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)

Knowledge of human resource management practices as they relate to the development of effective working relationships between paid staff and volunteer Boards

### Required skills

Literacy and numeracy skills as they relate to the reading, comprehension, evaluation and analysis of documentation that relates to the organisation's strategic direction, governance policy guidelines and the monitoring of trends in industry

Research skills as they relate to the monitoring of trends in industry

Verbal communication skills as they relate to the presentation of information to the Board

Written communication skills as they relate to the presentation of papers at a Board meeting

Consultation skills as they relate to the

meaningful engagement of relevant Board members in the organisation's operations

Policy development skills as they relate to the drafting of, consultation on and endorsement of policies and procedures for the effective operation of the organisation

Facilitation and project management skills as they relate to the implementation of Board decisions

Leadership skills as they relate to demonstration of appropriate individual standards of performance, influencing others, making decisions, facilitating group decision - making and the utilisation of appropriate leadership styles

## Resource implications

Physical resources - assessment of this competency requires access to

either real or simulated organisations and their respective Board processes

Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must be competent in this unit but preferably be competent in the unit at the level above

be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area

have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the **Standards for Registered Training Organisations**

## Consistency in performance

Due to issues such as the varied issues that are required to be discussed by a Board, this unit of competency must be assessed over period of time in order to ensure consistency of performance over the Range Statements and contexts applicable to working

effectively with the Board or management committee of a sport or recreation organisation

**Context for assessment**

This unit of competency must be assessed in the context of working effectively with the Board or management committee of a sport or recreation organisation

Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

**KEY COMPETENCIES**

Collect, Analyse & Organise Information	Communicate Ideas & Information	Plan & Organise Activities	Work with Others & in Teams	Use Mathematical Ideas & Techniques	Solve Problems	Use Technology
3	3	3	3	3	3	2

These levels do not relate to the Australian Qualifications Framework. They relate to the seven areas of generic competency that

underpin  
effective  
workplace  
practices.

The three  
levels of  
performanc  
e (1, 2 and  
3) denote  
the level of  
competency  
required to  
perform the  
task:

Use routine  
approaches

Select from  
routine  
approaches

Establish  
new  
approaches

**Collecting,  
analysing  
and  
organising  
informatio  
n -**

Collecting  
information  
on the core  
business of  
the  
organisatio  
n

**Communic  
ating ideas  
and  
informatio  
n -**

Reporting  
to the  
Board on a  
task that  
was

allocated

**Planning  
and  
organising  
activities -**

Planning  
and  
organising  
regular  
Board  
meetings

**Working  
with teams  
and others**

- Working  
with mem-  
bers of a  
Board of an  
organisatio-  
n

**Using  
mathemati-  
cal ideas  
and**

**techniques**  
- Analysing  
financial  
documents  
for the  
organisatio-  
n

**Solving  
problems -**

Identifying  
the need to  
hold an  
extraordina-  
ry meeting

**Using  
technology**

- Taking  
part in a  
teleconfere-  
nce

Please refer  
to the

Assessment  
Guidelines  
for advice  
on how to  
use the Key  
Competenci  
es.

## Range Statement

### Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency

#### RANGE STATEMENT

#### CATEGORIES

##### Board

[all categories]

refers to Boards or committees of management responsible for the governance of a recreation organisation or facility as distinct from the management operations

Board members may be paid Directors or volunteers

##### Emerging issues

[all categories]

may include but not limited to

the Corporate Law Economic Reform Bill (1998)

technology

information

##### Legislation

[all categories]

specific laws

Corporation law

the Corporations law, the complimentary State legislation and the Ordinances of the relevant Territories

the Company Law Review Act (1998)  
the Corporate Law Economic Reform Bill  
(1998)

Associations law  
Trade Practices law  
Competition  
consumer protection  
Contract law  
Environmental law  
Taxation law  
Regulatory compliance

laws relating to people  
Industrial Relations/Workplace Relations  
Act  
Occupational Health and Safety (OH&S)  
Acts  
Employment  
Equal Opportunity and Anti - Discrimination  
Child Protection  
Volunteer Workers Insurance  
Public Liability  
Workers compensation  
business specific laws

laws relating to business  
Income Tax Act  
Payroll Acts  
Stamp duty Act  
Liquor Licensing Acts  
Landlord and Tenant  
Goods and Services Tax (GST) Act  
Copyright Act  
Trade Marks Act

**Organisation's governance policy guidelines**

business specific laws and acts

[all categories]

would include policies and processes in the areas of

role of Board

Board structure

role of individual Directors

role of Chairperson

role of Company Secretary

role of Chief Executive Officer (CEO)

Board meetings

Board meeting agenda

Board papers

Board minutes

the Board calendar

committees

delegation of authority

monitoring

strategy formulation

service/advice

contacts

Chief Executive Officer (CEO) evaluation

Director protection

Board evaluation

Director development

Director selection and induction

### **Elements and Performance Criteria**

**Elements and Performance Criteria**

Element	Performance Criteria
1 <b>Identify conflict situations</b>	1.1 Identify (quickly) signs and possible causes of conflict 1.2 Determine accurately the stage of the conflict, with respect to progression and possible escalation 1.3 Take swift and tactful action to prevent escalation 1.4 Identify (quickly) situations where personal safety of clients or staff may be threatened and organise appropriate assistance (if required) 1.5 Identify factors within the individual or workplace environment which relate to the developing conflict
2 <b>Implement conflict resolution strategies</b>	2.1 Take responsibility for resolving the conflict within scope of individual responsibility 2.2 Clarify <b>factors and issues relevant to the conflict</b> 2.3 Demonstrate correct use of <b>conflict resolution techniques</b> to manage the conflict after consideration of the particular situation 2.4 Identify <b>options for resolution</b> of the conflict which allow for constructive responses to be negotiated and enable established work relationships to continue 2.5 Encourage, treat with respect, and accept (where appropriate) all points of view during negotiations and discussions
3 <b>Use effective interpersonal skills</b>	3.1 Demonstrate use of effective verbal and non verbal communication during negotiations (including body language, questioning, language style, active listening and reflection) 3.2 Provide assertive feedback, and receive feedback non-defensively during negotiations

## Required Skills and Knowledge

Not applicable.

## Evidence Guide

### Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

### Critical aspects of evidence to be considered

Assessment must confirm sufficient knowledge of typical symptoms and causes of conflict in the work environment and conflict resolution techniques

Assessment of performance should be over the resolution of a minimum of three (3) different conflict situations, covering the prescribed number of categories from the Range Statements

Assessment must confirm the ability to apply this knowledge and appropriate techniques to identify sources of conflict in the workplace resolve a range of different conflict situations, using different options for resolution

use suitable communication skills to facilitate effective discussion between all parties and achieve resolution

### Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

Nil

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

Nil

### Required knowledge and skills

Required knowledge

Signs and stages of conflict in the workplace

Possible causes/sources of conflict  
(ideational, status and power, goal conflict)

Functions of conflict (functional and  
dysfunctional)

Options for constructive responses to typical  
conflict situations

Required skills

Interpersonal skills

Participation in small informal work groups

Problem solving

Ability to gather, record, and convey  
information

## Resource implications

Physical resources - assessment of this unit  
of competency requires access to

real or simulated work group situations

access to information relevant to the  
workplace

Human resources - assessment of this unit of  
competency will require human resources  
consistent with those outlined in the  
Assessment Guidelines. That is, assessors (or  
persons within the assessment team) must

be competent in this unit but preferably be  
competent in the unit at the level above

be current in their knowledge and  
understanding of the industry through  
provision of evidence of professional activity  
in the relevant area

have attained the mandatory competency  
requirements for assessors under the  
Australian Quality Training Framework  
(AQTF) as specified in Standard 7.3 of the  
**Standards for Registered Training  
Organisations**

## Consistency in performance

Due to issues such as differences in conflict  
situations, this unit of competency must be

assessed over the resolution of a minimum of three (3) different conflict situations, to ensure consistency of performance over the Range Statements and contexts applicable to conflict arising in workplaces

**Context for assessment**

This unit of competency must be assessed in the context of responding to a conflict issue arising during a sport or recreation activity for a group of clients. For valid and reliable assessment the clients should be real, i.e., not peers, and the sport or recreation activity should be similar to those that occur in the learners work environment. The environment should be safe with the hazards, circumstances and equipment likely to be encountered in a real workplace

Assessment of this unit of competency will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

**KEY  
COMPET  
ENCIES**

## TAEDEL301A Provide work skill instruction

### Modification History

Not applicable.

### Unit Descriptor

<b>Unit descriptor</b>	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.
--------------------------------	---

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information,

ELEMENT	PERFORMANCE CRITERIA
	instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according to organisational and legal requirements

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- verbal and non-verbal communication techniques, such as:
  - asking relevant and appropriate questions
  - providing explanations
  - demonstrating
  - using listening skills
  - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
  - identify hazards
  - conduct prestart-up checks if required
  - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:

**REQUIRED SKILLS AND KNOWLEDGE**

- ensure all learning objectives are covered
- pace learning
- reflection skills in order to:
  - identify areas for improvement
  - maintain personal skill development
- literacy skills to:
  - complete and maintain documentation
  - read and follow learning programs and plans
  - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
  - engage, motivate and connect with learners
  - provide constructive feedback
  - maintain appropriate relationships
  - establish trust
  - use appropriate body language
  - maintain humour
  - demonstrate tolerance
  - manage a group
  - recognise and be sensitive to individual difference and diversity
- observation skills to:
  - monitor learner acquisition of new skills, knowledge and competency requirements
  - assess learner communication and skills in interacting with others
  - identify learner concerns
  - recognise learner readiness to take on new skills and tasks

**Required knowledge**

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency

**REQUIRED SKILLS AND KNOWLEDGE**

procedures

- risk controls for the specific learning environment

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
  - different learning objectives
  - a range of techniques and effective communication skills appropriate to the audience.

**Context of and specific resources for assessment**

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

**Method of assessment****Guidance information for assessment**

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website ([www.ibsa.org.au](http://www.ibsa.org.au)).

**Range Statement****RANGE STATEMENT**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Learner characteristics</i></b> may include:	<ul style="list-style-type: none"> <li>• language, literacy and numeracy levels</li> <li>• learning styles</li> <li>• past learning and work experiences</li> <li>• specific needs</li> <li>• workplace culture.</li> </ul>
<b><i>Safe learning environment</i></b> may include:	<ul style="list-style-type: none"> <li>• exit requirements</li> <li>• personal protective equipment</li> <li>• safe access</li> <li>• safe use of equipment.</li> </ul>
<b><i>Instruction and demonstration objectives</i></b> may include:	<ul style="list-style-type: none"> <li>• competencies to be achieved</li> <li>• generic and technical skills, which may be: <ul style="list-style-type: none"> <li>• provided by the organisation</li> <li>• developed by a colleague</li> <li>• individual or group objectives</li> <li>• learning outcomes.</li> </ul> </li> </ul>
<b><i>Learning resources</i></b> may include:	<ul style="list-style-type: none"> <li>• any material used to support learning, such as: <ul style="list-style-type: none"> <li>• learner and user guides</li> <li>• trainer and facilitator guides</li> <li>• example training programs</li> <li>• specific case studies</li> <li>• professional development materials</li> <li>• assessment materials</li> </ul> </li> <li>• a variety of formats</li> <li>• those produced locally</li> <li>• those acquired from other sources.</li> </ul>
<b><i>Learning materials</i></b> may include:	<ul style="list-style-type: none"> <li>• handouts for learners</li> <li>• materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.</li> </ul>
<b><i>Details</i></b> may include:	<ul style="list-style-type: none"> <li>• location and time</li> <li>• outcomes of instruction or demonstration</li> <li>• reason for instruction or demonstration</li> <li>• who will be attending instruction session.</li> </ul>

<b>RANGE STATEMENT</b>	
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> <li>• emergency procedures</li> <li>• hazards and their means of control</li> <li>• incident reporting</li> <li>• use of personal protective equipment</li> <li>• safe work practices</li> <li>• safety briefings</li> <li>• site-specific safety rules.</li> </ul>
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> <li>• coaching</li> <li>• demonstration</li> <li>• explanation</li> <li>• group or pair work</li> <li>• providing opportunities to practise skills and solve problems</li> <li>• questions and answers.</li> </ul>
<i>Coaching</i> may include:	<ul style="list-style-type: none"> <li>• learning arrangements requiring immediate interaction and feedback</li> <li>• on-the-job instruction and 'buddy' systems</li> <li>• relationships targeting enhanced performance</li> <li>• short-term learning arrangements</li> <li>• working on a one-to-one basis.</li> </ul>
<i>Measures</i> may include:	<ul style="list-style-type: none"> <li>• informal review or discussion</li> <li>• learner survey</li> <li>• on-the-job observation</li> <li>• review of peer coaching arrangements.</li> </ul>

Co-requisite units		

## TLID2010A Operate a forklift

### Modification History

Not Applicable

### Unit Descriptor

#### Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### Application of the Unit

#### Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |   |  |
|---|--|
| <b>1 Check forklift condition</b>           | <p>1.1 Condition of forklift is checked for compliance with OH&amp;S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task</p> <p>1.2 Attachments are checked to ensure appropriate adjustment and operation</p> <p>1.3 Mirrors and seats are adjusted for safe operation by the driver</p> <p>1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements</p>  |
| <b>2 Drive the forklift</b>                 | <p>2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions</p> <p>2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage</p> <p>2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques</p> <p>2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures</p> |
| <b>3 Operate a forklift to handle loads</b> | <p>3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected</p> <p>3.2 The load is lifted, carried, lowered and set down in accordance with OH&amp;S legislation, manufacturers specifications and company procedures</p>   |

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<b>4 Monitor site conditions</b>	4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
<b>5 Monitor and maintain forklift performance</b>	5.1 Performance and efficiency of vehicle operation is monitored during use 5.2 Defective/irregular performance and malfunctions reported to relevant personnel 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

#### Required skills:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

**Required skills:**

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

## EVIDENCE GUIDE

### demonstrate competency in this unit

requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

### Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

### Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks

## RANGE STATEMENT

Operations may be carried out in typical forklift operational situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road or worksite
- while at a workplace
- internal or external

Customers may be:

- large, medium or small worksites

Workplaces may comprise:

- restricted spaces
- exposed conditions
- controlled or open environments

Work may be conducted in:

- special precautions

Loads to be shifted may require:

Loads to be shifted may be:

- irregularly shaped
- packaged or unpackaged
- labelled or unlabelled
- palleted or unpalleted

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Forklift handling procedures may include:

- starting a forklift
- steering and manoeuvring a forklift
- accelerating and braking
- positioning and stopping a forklift
- reversing a forklift
- operating forklift controls, instruments and indicators
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of forklift
- checking and topping up of fluid levels
- checks of tyres
- checks of operation of forklift lights and indicators
- checks of brakes

Hazards may include (examples only):

- wet and iced operating surfaces
- oil on operating surface

## RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- faulty brakes
- workplace obstacles and other operational equipment and vehicles
- damaged loads and pallets
- other personnel in work area
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protection equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
- manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification
- Australian Standard 2359 - Industrial Truck Code
- manufacturers specifications for forklift and associated equipment
- operations and service record book or log
- workplace procedures and policies for the operation of forklifts
- supplier and/or client instructions
- ADG Code and material safety data sheets
- regulatory requirements concerning the use of forklifts
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable procedures and codes may include:

- relevant state/territory regulations pertaining to the operation of forklifts
- relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

## Unit Sector(s)

Not Applicable

## Competency Field

Competency Field                      D - Load Handling

# TLID1001A Shift materials safely using manual handling methods

## Modification History

Not Applicable

## Unit Descriptor

### Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

## Application of the Unit

### Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1 Assess risks associated with the relocation of the load

- 1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation
- 1.2 Locations for storage are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made
- 1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered
- 1.7 Potential risks in route(s) which may be followed are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered for application
- 1.11 Appropriate personal protective equipment is worn
- 1.12 Size to weight ratio of items to be manually handled are identified

#### 2 Plan load relocation

- 2.1 Relocation of the load is planned consistent with the code of practice for manual handling
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties
- 2.3 Proposed process is checked against code of practice and workplace procedures for compliance

**ELEMENT****PERFORMANCE CRITERIA****3 Relocate load**

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements
- 3.2 Applications appropriate for team relocation of load are identified
- 3.3 Team lifting tasks are coordinated
- 3.4 Planned process and route are followed
- 3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
- 3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported

**Required Skills and Knowledge****REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

**Required skills:**

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods

**Required skills:**

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - applying the underpinning knowledge and skills
  - interpreting manual handling risks
  - using correct manual handling practices
  - applying relevant legislation and workplace procedures

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

## EVIDENCE GUIDE

- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

### Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
  - through activities in an appropriately simulated environment, and/or
  - in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Materials to be shifted may include:

- goods
- large luggage items
- baggage items

## RANGE STATEMENT

- equipment and tools
  - cleaning materials
  - components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc.
  - materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
- Loads to be shifted may be:
- irregularly shaped
  - packaged or unpackaged
  - labelled or unlabelled
- Hazards in the work area may include exposure to:
- chemicals
  - dangerous or hazardous substances
  - movements of equipment, goods and materials
  - weight of items being handled
- Personnel in the work area may include:
- workplace personnel
  - site visitors
  - contractors
  - official representatives
- Communication in the work area may include:
- phone
  - electronic data interchange
  - fax
  - email
  - internet
  - radio
  - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
  - enterprise procedures
  - organisational procedures
  - established procedures
- Personal protective equipment may include:
- gloves
  - safety headwear and footwear
  - safety glasses
  - two-way radios
  - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
  - manifests, bar codes, goods and container identification
  - manufacturers specifications for equipment/tools
  - workplace procedures and policies
  - supplier and/or client instructions
  - material safety data sheets
  - codes of practice including the National Standards for

## RANGE STATEMENT

Applicable regulations and legislation may include:

- Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
  - award, enterprise bargaining agreement, other industrial arrangements
  - standards and certification requirements
  - quality assurance procedures
  - emergency procedures
  - relevant state/territory OH&S legislation
  - relevant state/territory environmental protection legislation
  - workplace relations regulations
  - workers compensation regulations
  - licence, patent or copyright arrangements
  - dangerous goods and air freight regulations
  - export/import/quarantine/bond requirements
  - marine orders

## Unit Sector(s)

Not Applicable

## Competency Field

Competency Field                      D - Load Handling

## TLID2022A Conduct weighbridge operations

### Modification History

Not Applicable

### Unit Descriptor

#### Unit Descriptor

This unit involves the skills and knowledge required to conduct weighbridge operations in accordance with regulatory requirements and workplace procedures, including setting up for weighbridge operations, weighing loaded vehicles, weighing unloaded vehicles, finalising weighbridge operations, and completing required records and documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### Application of the Unit

#### Application of the Unit

Work must be carried out in accordance with regulations and workplace requirements relevant to weighbridge operations.

Work is performed under some supervision, generally within a team environment.

Work involves the application of regulatory requirements and workplace procedures when conducting weighbridge operations in the transport, warehousing, distribution and/or storage industries.

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |  |  |
|--|--|
| <b>1 Set up for weighbridge operations</b> | <p>1.1 Weighbridge systems, including equipment, computer and recording arrangements are checked for operational status</p> <p>1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturers instructions and relevant legislation</p> <p>1.3 Accurate reporting of the results of the inspection and testing is kept in accordance with statutory requirements, workplace policy and industry guidelines</p> <p>1.4 Faults/discrepancies in weighbridge operation are identified and action is undertaken in accordance with workplace procedures</p> |
| <b>2 Weigh loaded vehicles</b>             | <p>2.1 Vehicles likely to exceed weighbridge weight limit are turned away</p> <p>2.2 Vehicles are directed onto platform to obtain accurate weight</p> <p>2.3 Weight of loaded stationary vehicle is registered against vehicle and load identification</p> <p>2.4 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement</p> <p>2.5 Areas of dispute are resolved or forwarded for further action undertaken in accordance with workplace procedures</p>  |
| <b>3 Weigh unloaded vehicles</b>           | <p>3.1 Vehicles are directed onto platform to obtain accurate weight</p> <p>3.2 Weight of unloaded stationary vehicle is registered against vehicle</p> <p>3.3 Proposed load weight is assessed for conformance to statutory requirements</p> <p>3.4 Where appropriate, loading operations are commenced in</p>  |

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	accordance with legal loading weight, customer requirements and workplace procedures with vehicle re-weighed to establish final load weight
	3.5 Vehicle and load information is entered into workplace recording system and invoice is issued to driver where appropriate
	3.6 Driver signatures on weighbridge documents, invoices or receipts are obtained in accordance with statutory and workplace requirements
	3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures
<b>4 Complete weighbridge operations</b>	4.1 Weighbridge systems, including equipment, computer and recording arrangements are secured or made ready for next shift
	4.2 Record of operations is maintained and filed in accordance with workplace procedures and statutory requirements

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Regulations relevant to the conduct of weighbridge operations including Australian Dangerous Goods Code where applicable
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the conduct of weighbridge operations
- Problems that may occur when conducting weighbridge operations and appropriate action that can be taken to resolve the problems
- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Records and documentation requirements for weighbridge operations
- Classification procedures
- Despatch procedures
- Calculation method and approaches for both metric and imperial systems
- Correct weighing procedures including statutory and workplace requirements
- Emergency response procedures
- Site layout

**Required skills:**

- Communicate effectively with others when conducting weighbridge operations
- Read and interpret instructions, procedures and information relevant to the conduct of weighbridge operations
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the conduct of weighbridge operations
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when conducting weighbridge operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, errors or malfunctions that may occur when conducting weighbridge operations in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the conduct of weighbridge operations
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Set up and maintain weighbridge equipment
- Identify, select and efficiently and effectively use weighbridge equipment
- Monitor performance of weighbridge equipment

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

## EVIDENCE GUIDE

### unit

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

### Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

### Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

## RANGE STATEMENT

- Workplaces may comprise:
- large, medium or small worksites
- Workplace environment may include:
- movement of equipment, goods, products, materials and vehicular traffic
- Weighbridge operations may be:
- inclusive of a single operation involving the loading of vehicles and despatch functions
- Weighbridge operation may be:
- electro/mechanical
  - electronic
  - computerised
- Vehicles may include
- trucks
  - articulated road vehicles
  - trailers
  - wagons
- Calibration and/or testing of equipment may be:
- required prior to and during operations
- Hazards in the work area may include exposure to:
- chemicals and pesticides
  - dangerous or hazardous substances
  - stationary and moving equipment, parts and materials
  - noise, light, energy sources
  - electrical equipment
  - humidity, air temperature, radiant heat
  - faulty equipment
- Personal protective equipment may include:
- gloves
  - safety headwear and footwear
  - safety glasses
  - two-way radios
  - protective clothing
  - respirators and fume/dust masks
  - high visibility clothing
- Requirements for work may include:
- site restrictions and procedures
  - use of safety and personal protective equipment
  - communications/recording equipment
  - authorities and permits
  - breakdown procedures
  - emergency procedures
- Communication in the work area may include:
- phone
  - fax
  - email/internet
  - electronic data interchange (EDI)

## RANGE STATEMENT

Consultative processes may involve:

- RF systems
- oral, aural or signed communications
- workplace personnel
- supervisors and managers
- existing and potential customers/clients
- drivers
- suppliers and contractors
- union representatives
- industrial relations and OH&S specialists
- maintenance, professional or technical staff
- company procedures
- workplace procedures
- organisational procedures
- established or standard procedures

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

Information/documents may include:

- operations manuals, job specifications and procedures
- induction documentation
- competency standards and training materials
- manufacturers specifications and instructions for the operation of weighbridge equipment
- material safety data sheets
- workplace operating procedures and policies
- supplier and/or client instructions
- Australian and international standards, criteria and certification requirements
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant regulations including the ADG Code
- award, workplace bargaining agreement, other industrial arrangements
- OH&S procedures
- quality assurance procedures
- emergency procedures
- relevant codes and regulations pertaining to weighbridge operations
- traffic acts and road transport mass and loading regulations
- ADG Code and regulations pertaining to the storage and handling of dangerous and hazardous goods
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian and international standards and

Applicable regulations and legislation may include:

## **RANGE STATEMENT**

- certification requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

Not Applicable

## **Competency Field**

**Competency Field**                      D - Load Handling

# TLIL5019A Implement and monitor transport logistics

## Modification History

Not Applicable

## Unit Descriptor

### Unit Descriptor

This unit involves the skills and knowledge required to implement and monitor transport logistics in accordance with relevant regulatory requirements and workplace procedures, including mobilising resources, coordinating multi-modal transport activities, monitoring consignment(s) tracking, and implementing a contingency management strategy. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

## Application of the Unit

### Application of the Unit

Work must be carried out in compliance with the relevant regulations, standards and codes of practice, including the ADG Code.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplace's goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Not Applicable

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |  |   |
|--|---|
| <b>1 Mobilise resources</b>                          | <ul style="list-style-type: none"> <li>1.1 Optimal resource level is acquired to meet the requirements of the operational schedule</li> <li>1.2 Relevant regulatory and insurance requirements are determined and implemented</li> <li>1.3 Allocated resources are assessed and monitored to ensure operational effectiveness and efficiency</li> <li>1.4 Changes to resource allocation are undertaken (in accordance with enterprise procedures) where deficiencies or over-supply are apparent</li> </ul>          |
| <b>2 Coordinate multi-modal transport activities</b> | <ul style="list-style-type: none"> <li>2.1 Facilities, personnel and equipment are made ready to accommodate interchange functions</li> <li>2.2 Security arrangements are invoked as required</li> <li>2.3 Loading and unloading operations are conducted in accordance with operation schedule and applicable statutory requirements, codes of practice and enterprise procedures</li> <li>2.4 Relevant documentation is completed/updated to accord with operational schedule and reporting requirements</li> </ul> |
| <b>3 Monitor consignment(s) tracking</b>             | <ul style="list-style-type: none"> <li>3.1 Consignment tracking systems are monitored against workplace quality standards</li> <li>3.2 Variations from workplace quality standards are identified and appropriate action is initiated to rectify the identified problems</li> </ul>   |

**ELEMENT****PERFORMANCE CRITERIA**

or to institute any required improvements

**4 Implement contingency management strategy**

4.1 Operational schedule is continually reviewed in light of information updates, reports and feedback

4.2 The nature, extent and impact of any issues or incidents are identified and assessed against contingency management strategy

4.3 Relevant information is processed to establish priorities and responses for dealing with issues or incidents

4.4 Operations are redirected and controlled to meet changes in transport environment and tasks in accordance with enterprise procedures

4.5 Liaison is initiated and maintained with organisations/individuals affected by changed operational schedules

4.6 Actions undertaken are clearly documented and filed

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to transport logistics
- Relevant OH&S and environmental protection procedures and regulations
- Workplace procedures for the implementation and monitoring of transport logistics
- Problems that may occur during the implementation and monitoring of transport logistics and action that can be taken to resolve or report the problems
- Risks and hazards related to the implementation and monitoring of transport logistics and ways of controlling the risks involved
- Focus of operation of transport logistic systems, resources, management and workplace operating systems
- Transport and equipment applications, capacities, configurations, safety hazards and control mechanisms
- Code, regulatory, permit and licence requirements relevant to transport logistics
- Application of relevant Australian standards and associated certification requirements
- Business policies and plans including procedures for outsourcing components of operations and engaging additional resources

## REQUIRED KNOWLEDGE AND SKILLS

- Workplace policies including issue resolution and grievance procedures
- Resource availability including the competencies of individuals in the team/group
- The application of current competencies within functional activity
- Relevant workplace documentation procedures

### Required skills:

- Communicate effectively with others when implementing and monitoring transport logistics
- Read and interpret transport schedules, regulatory requirements, customer instructions, workplace procedures and manuals relevant to the implementation and monitoring of transport logistics
- Prioritise work and coordinate self and others in relation to transport logistics activities
- Complete documentation related to the implementation and monitoring of transport logistics
- Operate electronic communication equipment to required protocol
- Provide leadership and work collaboratively with others when implementing and monitoring transport logistics
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any problems identified when implementing and monitoring transport logistics in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise during the implementation and monitoring of transport logistics
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and apply appropriate application of technology, information systems and procedures
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

#### **Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

#### **Method of assessment**

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- |  |   |
|--|---|
| Work may be undertaken:  | <ul style="list-style-type: none"> <li>• in various work environments in the sections of the warehousing, storage, transport and distribution industries involved in transport logistics</li> </ul>   |
| Customers may be:  | <ul style="list-style-type: none"> <li>• internal or external</li> </ul>  |
| Operations may be conducted:   | <ul style="list-style-type: none"> <li>• by day or night</li> </ul>   |
| The workplace environment may involve:   | <ul style="list-style-type: none"> <li>• twenty-four hour operation</li> <li>• single and multi-site locations</li> <li>• large, medium and small workplaces</li> </ul>   |
| Critical parameters for the evaluation of consignment loads may include but are not limited to:                              | <ul style="list-style-type: none"> <li>• type, capacity, compatibility and capability of load</li> <li>• agreed delivery times and destination</li> <li>• pick-up and drop-off points</li> <li>• waiting, loading and unloading times</li> </ul>  |
| Key requirements for the planning of transport logistics may include but are not limited to:                                 | <ul style="list-style-type: none"> <li>• collection and distribution destination</li> <li>• transport duration times</li> <li>• type and compatibility of load</li> <li>• transport mode(s) and capacity</li> <li>• return freight</li> <li>• fatigue management</li> <li>• use of designated routes</li> </ul> |
| Strategies to address identified deficiencies in operational capability and availability may include but are not limited to: | <ul style="list-style-type: none"> <li>• re-negotiation of collection and/or delivery times</li> <li>• alternate transport mode(s)</li> <li>• outsourcing components of operation</li> </ul>  |
| Consignments may be:   | <ul style="list-style-type: none"> <li>• palletised</li> <li>• containerised</li> <li>• packages or loose</li> <li>• and in gas, liquid or solid form</li> </ul>  |
| Transport may be:  | <ul style="list-style-type: none"> <li>• single or multi-modal</li> </ul>   |
| Modes of transport may include:  | <ul style="list-style-type: none"> <li>• road</li> <li>• rail</li> <li>• air</li> <li>• sea</li> </ul>  |
| Calculation of transport duration  | <ul style="list-style-type: none"> <li>• travelling</li> <li>• loading</li> </ul>   |

## RANGE STATEMENT

times includes:

- unloading
- change-over
- standing times
- with due regard to varying transit condition and environments (i.e. road conditions, traffic flows, weather, local government by-laws)

Transport may involve:

- the use of designated routes

Requirements for work may include:

- site restrictions and procedures
- use of safety and personal protective equipment
- systems and facilities for transport logistics
- specialised lifting and/or handling equipment
- incident/accident breakdown procedures
- additional gear and equipment
- noise restrictions
- hours of operation
- authorities and permits
- communications equipment

Hazard management is consistent with:

- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment

Consultative processes may involve:

- other employees and supervisors
- suppliers, potential customers and existing clients
- relevant authorities and institutions
- relevant government instrumentalities
- emergency services
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF communications
- bar code readers
- oral, aural or signed communications

Personal protective equipment may include but is not limited to:

- gloves
- safety headwear and footwear
- safety clothing

## RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- safety glasses
- two-way radios
- high visibility clothing
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documentation may include:

- Australian and international codes of practice and regulations relevant transport logistics including the ADG Code where applicable
- workplace operating procedures and policies
- supplier and/or client instructions
- operations manuals, job specifications and procedures and induction documentation
- transport routes and timetables
- manufacturers specifications for equipment and goods
- suppliers advice
- material safety data sheets
- dangerous goods documentation where applicable including dangerous goods declarations
- Safe Working Limits (SWL) and Working Load Limits (WLL) of load shifting equipment and storage facilities
- communications technology equipment, oral, aural or signed communications
- quality assurance standards and procedures
- emergency procedures
- relevant competency standards and training materials
- relevant Australian and international standards, criteria and certification requirements
- QA plans, data and document control
- conditions of service, legislation and industrial agreements including workplace agreements and awards
- codes and regulations relevant to transport logistics
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances,
- relevant Australian and international standards and certification requirements
- licence, patent or copyright arrangements
- relevant state/territory OH&S and environmental protection legislation

Applicable regulations and legislation may include:

## **RANGE STATEMENT**

- workplace relations regulations
- workers compensation regulations
- equal opportunity, equal employment opportunity and affirmative action legislation

## **Unit Sector(s)**

## **Competency Field**

**Competency Field**                    L - Resource Management

## TLILIC2001A Licence to operate a forklift truck

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit Descriptor</b>	<p>This unit specifies the outcomes required for the operation of a powered industrial truck equipped with a mast and an elevating load carriage to which is attached a pair of fork arms or other attachment, for licensing purposes. This definition also includes a truck on which the operator is raised with the attachment for order-picking.</p>
------------------------	---

### Application of the Unit

<b>Application of the Unit</b>	<p>THIS UNIT REQUIRES THE OPERATOR TO BE ABLE PLAN THE WORK, CONDUCT ROUTINE CHECKS ON THE FORKLIFT, SHIFT LOADS IN A SAFE MANNER, AND SHUT DOWN AND SECURE THE EQUIPMENT AFTER THE COMPLETION OF OPERATIONS.</p> <p>This unit is based on the National Standard for Licensing Persons Performing High Risk Work.</p> <p>This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.</p>
--------------------------------	---

### Licensing/Regulatory Information

## Employability Skills Information

<b>Employability Skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b> <i>Elements describe the essential outcomes of a unit of competency.</i>	<b>PERFORMANCE CRITERIA</b> <i>Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
1. Plan work	1.1 Potential workplace <b><i>hazards</i></b> are identified 1.2 <b><i>Hazard control measures</i></b> are identified consistent with <b><i>appropriate standards</i></b> to ensure the safety of personnel and equipment 1.3 Appropriate <b><i>forklift</i></b> truck is selected according to the load and workplace conditions 1.4 Working area is inspected to determine appropriate path of movement for loads and forklift truck 1.5 <b><i>Communication methods</i></b> are identified according to <b><i>procedures</i></b>
2. Conduct routine checks	2.1 Forklift is visually checked for any damage or defects 2.2 All <b><i>signage and labels</i></b> are visible and legible according to the <b><i>appropriate standard</i></b> 2.3 All controls are located and identified 2.4 <b><i>Pre-start operational checks</i></b> are carried out according to <b><i>procedures</i></b> 2.5 <b><i>Forklift</i></b> is started according to <b><i>procedures</i></b> and checked for any abnormal noise  2.6 <b><i>Post-start operational checks</i></b> are carried out according to <b><i>procedures</i></b> 2.7 All forklift functions and safety devices are tested to their maximum according to <b><i>procedures</i></b>

	2.8 Defects and damage are reported and recorded according to <i>procedures</i> , and appropriate action is taken
3. Shift load	<p>3.1 The weight of load is assessed to ensure compliance with <i>forklift</i> truck data plate specifications</p> <p>3.2 Appropriate <i>hazard prevention/control measures</i> are implemented and communicated with personnel in the work area</p> <p>3.3 <i>Forklift</i> is operated at a safe speed and according to <i>procedures</i></p> <p>3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards</p> <p>3.5 Load movement is monitored constantly ensuring safety to personnel and load, and structural stability</p> <p>3.6 <i>Unplanned and/or unsafe situations</i> are responded to in line with <i>procedures</i></p>
4. Shut down and secure forklift truck	<p>4.1 <i>Forklift</i> truck is parked to avoid hazards</p> <p>4.2 Forklift is <i>shut down</i> according to <i>procedures</i></p> <p>4.3 Routine post-operational forklift checks are carried out according to <i>procedures</i></p> <p>4.4 Forklift is secured to prevent unauthorised access/use</p> <p>4.5 All defects and damage are reported and recorded according to <i>procedures</i>, and appropriate action is taken</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

*This describes the essential skills and knowledge and their level required for this unit.*

#### Required skills:

- Accurately interpret information relating to conducting forklift truck operations (e.g. procedures)
- Safely conduct forklift truck operations including all functions to the maximum height and load capacity
- Identify hazards associated with the operation of the forklift truck, assess risks and put into place effective hazard prevention/control measures for those hazards identified
- Use communication skills at a level sufficient to communicate with other site personnel (e.g. receive and interpret work instructions, safety information, emergency procedures)

**REQUIRED SKILLS AND KNOWLEDGE**

- Drive forklift with load in forward and reverse, maintaining visibility
- Verify problems and equipment faults and demonstrate appropriate response procedures

**Required knowledge:**

- Methodology of determining the weight of a load
- Commonwealth, state or territory OH&S legislation, standards relevant to the safe operation for the forklift trucks
- Understanding of forklift characteristics and capabilities (including use of load data plates)
- Understanding of the hierarchy of hazard identification and control
- Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class
- Procedures for the recording, reporting and maintenance of workplace records and information
- Forklift truck operations and safe operating techniques
- Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

**Evidence Guide****EVIDENCE GUIDE**

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.*

**Overview of assessment**

- Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work.
- State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- Compliance with OH&S licensing legislation.
- Communicate and work safely with others in the work area.
- Identify hazards associated with the operation of the forklift truck and put in place effective hazard controls for those hazards identified.

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• Conduct pre-start-up, operational, moving loads and shut down and secure checks of the forklift truck according to procedures.</li> <li>• Operate the forklift truck and move loads safely, including driving and manoeuvring, picking up and placing of loads at various stack heights.</li> <li>• Drive forklift truck with load in forward and reverse, maintaining visibility.</li> </ul>
<b>Context of and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• Assessment of the safe application of knowledge and skills to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument.</li> <li>• Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting.</li> <li>• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.</li> <li>• Applicants must have access to: <ul style="list-style-type: none"> <li>• Personal Protective Equipment (PPE) for the purpose of the Performance Assessment</li> <li>• associated equipment appropriate to forklift truck operations</li> <li>• suitable loads as described by the endorsed Assessment Instrument</li> <li>• manufacturers specifications</li> <li>• appropriate forklift truck in a safe condition.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>• Assessment must be conducted using the endorsed Assessment Instrument. These Instruments provide instruction on their application.</li> <li>• The use of '<b>simulators</b>' in the assessment of this unit of competency is <b>not acceptable</b>.</li> <li>• Assessment may be in conjunction with the assessment of other units of competency.</li> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> <li>• Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> </ul>
<b>Guidance information for</b>	<ul style="list-style-type: none"> <li>• Further information about endorsed Assessment Instruments may be obtained from state/territory</li> </ul>

**EVIDENCE GUIDE****assessment**

OH&amp;S regulators.

**Range Statement****RANGE STATEMENT**

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.*

**Hazards**

May include but not limited to:

- ground conditions (e.g. condition of pavement, slopes)
- overhead hazards (e.g. powerlines, service pipes)
- insufficient lighting
- traffic (e.g. pedestrians, vehicles, other plant)
- weather (e.g. wind, lightning, rain)
- forklift instability (e.g. overloading, poor load placement, irregular loads)
- other hazards (e.g. dangerous materials)

**Hazard control measures**

Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls

It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:

- 1 elimination
- 2 substitution
- 3 isolation
- 4 engineering control measures
- 5 using safe work practices
- 6 personal protective equipment

**Appropriate standards**

May include but not limited to:

- legislation
- Australian standards
- manufacturer's specifications
- industry standards (where applicable)

<b>RANGE STATEMENT</b>	
<b>Forklift truck</b>	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> <li>• counterbalanced</li> <li>• reach trucks</li> <li>• rough terrain</li> <li>• internal combustion petrol, diesel, gas</li> <li>• electric</li> </ul>
<b>Communications methods</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• verbal and non-verbal language</li> <li>• written instructions</li> <li>• signage</li> <li>• hand signals</li> <li>• listening</li> <li>• questioning to confirm understanding</li> <li>• appropriate worksite protocol</li> </ul>
<b>Procedures</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• manufacturer's guidelines (instructions, specifications or checklists)</li> <li>• industry operating procedures</li> <li>• workplace procedures (work instructions, operating procedures, checklists)</li> </ul>
<b>Pre-start operational checks</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• safety devices fitted where appropriate</li> <li>• forklift data plate fitted and interpreted</li> <li>• logbook, handbook or operating manuals available</li> <li>• external visual check including, evidence of damage, leaks, visual evidence of structural weaknesses (including paint separation or stressed welds) is carried out</li> <li>• forklift attachment is checked for security</li> <li>• approved modifications and/or attachments fitted to manufacturer's specifications (e.g. as per forklift or attachment data plate) are identified</li> <li>• checks for adaptations or modifications outside manufacturer's specifications (e.g. not listed on the forklift or attachment data plate) are carried out</li> <li>• maintenance logbook/records checked</li> </ul>

<b>RANGE STATEMENT</b>	
<b>Post-start operational checks</b>	<p>May include checks of the forklift truck and equipment after start-up to ensure:</p> <ul style="list-style-type: none"> <li>• hazard warning systems (for example lights and horns), are functional</li> <li>• attachment movements and control functions are smooth and comply with operating requirements</li> <li>• steering, transmission and brake functions comply with operating requirements</li> </ul>
<b>Hazard prevention/control measures</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• barricades and traffic control</li> <li>• safety tags on electrical switches/isolators</li> <li>• insulated powerlines</li> <li>• safety observer used inside exclusion zone</li> <li>• disconnected power</li> <li>• pedestrian control (barricades, signs, etc.)</li> <li>• excavation safeguards</li> <li>• movement of obstructions</li> <li>• personal protective equipment</li> <li>• adequate illumination</li> </ul>
<b>Unplanned and/or unsafe situations</b>	<p>May include but not limited:</p> <ul style="list-style-type: none"> <li>• failure/loss of control (e.g. brakes and steering)</li> <li>• failure of equipment (e.g. hydraulic system)</li> <li>• environmental condition</li> </ul>
<b>Shut down</b>	<p>May include, but is not limited to:</p> <ul style="list-style-type: none"> <li>• parking in a suitable location away from dangerous areas</li> <li>• fork arms are correctly positioned (tips down, tilted forward, lowered to ground)</li> <li>• appropriate transmission/gear is selected for parking (relevant to transmission type)</li> <li>• hand/parking brake is applied</li> <li>• engine power is turned off</li> <li>• ignition key is removed (if applicable)</li> <li>• LPG gas cylinder valve is shut off (where fitted)</li> <li>• securing equipment against unauthorised operation</li> <li>• securing the site</li> <li>• ensuring access ways are clear</li> <li>• identifying and segregating defective equipment</li> </ul>

<b>RANGE STATEMENT</b>	
	and reporting to authorised personnel <ul style="list-style-type: none"><li>• batteries are connected to the charger (if applicable)</li></ul>

## **Unit Sector(s)**

Not Applicable

## TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit Descriptor</b>	<p>This unit specifies the outcomes required to operate a boom-type elevating work platform (boom length 11 metres or more) for licensing purposes, and involves the operation of a telescoping device, hinged device, or articulated device or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work. The 11 metre boom length shall be taken to mean the greater of the following:</p> <p>(a) The vertical distance from the floor of the platform to the surface supporting the elevating work platform with the platform at its maximum height; or</p> <p>(b) The nominal reach, measured horizontally from the centre point of rotation to the outer edge of the platform in its most extended position.</p>
------------------------	---

### Application of the Unit

<b>Application of the Unit</b>	<p>This unit requires the operator to plan the work, conduct routine checks, set up elevating work platform, operate elevating work platform and shut down and secure elevating work platform.</p> <p>This unit is based on the requirements of the National Standard for Licensing Persons Performing High Risk Work.</p> <p>This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.</p>

## Elements and Performance Criteria Pre-Content

<i>Elements describe the essential outcomes of a unit of competency</i>	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan work	1.1 Potential workplace <i>hazards</i> are identified 1.2 <i>Hazard control measures</i> are identified consistent with <i>appropriate standards</i> to ensure the safety of personnel and equipment 1.3 <i>Elevating work platform</i> is appropriate for the task 1.4 Appropriate <i>communication methods</i> are identified
2. Conduct routine checks	2.1 <i>Service logbook</i> for elevating work platform is checked for compliance 2.2 <i>Elevating work platform</i> is visually checked for any defects or damage according to <i>procedures</i> 2.3 Routine pre-operational checks are carried out according to <i>procedures</i> 2.4 <i>Safety equipment</i> is inspected according to <i>procedures</i>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5 <i>Elevating work platform</i> is accessed in a safe manner</p> <p>2.6 Fit <i>safety equipment</i> and secure to platform according to <i>procedures</i></p> <p>2.7 All controls are located and identified</p> <p>2.8 <i>Elevating work platform</i> is started according to <i>procedures</i></p> <p>2.9 All <i>safety devices</i> are identified and tested according to <i>procedures</i></p> <p>2.10 Post-start operational checks are carried out according to <i>procedures</i></p> <p>2.11 All <i>communication equipment</i> is checked (where applicable)</p> <p>2.12 All defects and damage are reported and recorded in according to <i>procedures</i>, and appropriate action is taken</p>
<p>3. Set up elevating work platform</p>	<p>3.1 <b>Ground suitability</b> is inspected and checked</p> <p>3.2 Elevating work platform is driven to or located at work area according to <i>procedures</i> (where applicable)</p> <p>3.3 Elevating work platform is positioned for work application and <i>stability</i> according to <i>procedures</i></p> <p>3.4 Appropriate <i>hazard prevention/control measures</i> are applied to the work area according to <i>procedures</i></p> <p>3.5 Work gear and tools are stowed and secured</p>
<p>4. Operate elevating work platform</p>	<p>4.1 <i>Elevating work platform</i> is operated using all <i>relevant plant movements</i> according to <i>procedures</i> and the <i>appropriate standards</i></p> <p>4.2 <i>Elevating work platform</i> is mobilised using <i>best mobile practice</i> and appropriate <i>procedures</i></p> <p>4.3 Elevated working platform operations are monitored constantly ensuring safety of personnel and stability</p> <p>4.4 <i>Unplanned and/or unsafe situations</i> are responded to in line with <i>procedures</i></p>
<p>5 Shut down and secure elevating work platform</p>	<p>5.1 <i>Elevating work platform</i> is lowered and stowed according to <i>procedures</i></p> <p>5.2 All relevant motion locks and brakes are applied (where applicable)</p> <p>5.3 <i>Safety equipment</i> is disconnected from platform</p> <p>5.4 Egress from <i>elevated work platform</i> is conducted according to <i>procedures</i></p>

ELEMENT	PERFORMANCE CRITERIA
	<p>5.5 Outriggers/stabilisers are stowed and secured according to <i>procedures</i> (where applicable)</p> <p>5.6 Plates or packing are stowed and secured (where applicable)</p> <p>5.7 Elevating work platform is <i>shut down</i> according to <i>procedures</i></p> <p>5.8 Routine post-operational checks are carried out according to <i>procedures</i></p> <p>5.9 All defects and damage are reported and recorded according to <i>procedures</i>, and appropriate action is taken</p>

## Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
<i>This describes the essential skills and knowledge and their level required for this unit.</i>
<b>Required skills:</b>
<ul style="list-style-type: none"> <li>• Accurately record and maintain information relating to elevating work platform operations</li> <li>• Assess ground conditions to confirm that the site is suitable (e.g. firm, level and safe) to extend and travel the elevating work platform</li> <li>• Complete the positioning, stabilising, set up of elevating work platforms, including the use of outriggers/stabilisers and packing</li> <li>• Operate mobile elevating work platform using best mobile practice</li> <li>• Use communication skills at a level sufficient to communicate with other site personnel</li> <li>• Operate and control an elevating work platform including all functions to their maximum extension within the safe working (rated) capacity</li> <li>• Apply risk assessment and hazard control strategies, including hierarchy of control as applied to the positioning and safe operation of the elevating work platform (particular awareness of the risks associated with overhead powerlines/electrical cables, ground conditions, wind, pedestrians and tipping)</li> <li>• Use and interpret manufacturer's specifications and data</li> <li>• Identify problems and equipment faults and where practicable demonstrate appropriate response procedures</li> </ul>
<b>Required knowledge:</b>
<ul style="list-style-type: none"> <li>• Appropriate mathematical procedures for estimation of loads, to ensure that the elevating work platform is not overloaded</li> </ul>

## REQUIRED SKILLS AND KNOWLEDGE

- Commonwealth, state or territory OH&S legislation, standards and codes of practice relevant to the full range of processes for conducting elevating work platform operations
- Ability to read and comprehend manufacturer's instructions, procedures and safety signs
- Understanding of elevating work platform operations and operating techniques
- Emergency procedures and safety equipment, including the use of safety harness, energy absorber, lanyard and anchor points
- Understanding of organisational and workplace standards, requirements, policies and procedures for conducting elevating work platform operations
- Understanding of the hierarchy of hazard identification and control
- Procedures for the recording, reporting and maintenance of workplace records and information, including the use of the service logbook
- Typical routine problems encountered in the process and with equipment and adjustments required for correction

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

- Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work.
- State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Compliance with OH&S licensing legislation.
- Emergency procedures and safety equipment, including the use of safety harnesses, energy absorbers, lanyard and anchor points.
- Assessment of ground conditions to confirm that the site is suitable (e.g. firm, level and safe) to extend and travel the elevating work platform.
- Risk assessment and hazard control strategies, including hierarchy of control as applied to the positioning and safe operation of the elevating work

<b>EVIDENCE GUIDE</b>	
	<p>platform (particular awareness of the risks associated with overhead powerlines/electrical cables, ground conditions, wind, pedestrians and tipping).</p> <ul style="list-style-type: none"> <li>• Appropriate procedures for estimation of loads, to ensure that the elevating work platform is not overloaded.</li> <li>• Positioning and operation of the elevating work platform to ensure that the safest lift is performed.</li> </ul>
<b>Context of and specific resources for assessment</b>	<ul style="list-style-type: none"> <li>• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument.</li> <li>• Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace.</li> <li>• Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace.</li> <li>• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.</li> <li>• Assessment is to comply with relevant appropriate standard requirements.</li> <li>• Applicants must have access to: <ul style="list-style-type: none"> <li>• Personal Protective Equipment (PPE) for the purpose of the Performance Assessment</li> <li>• appropriate safety equipment in safe condition</li> <li>• appropriate elevated working platform and associated equipment in safe condition</li> <li>• communication equipment (e.g. two-way radios, mobile phones etc.) where applicable.</li> </ul> </li> </ul>
<b>Method of assessment</b>	<ul style="list-style-type: none"> <li>• Assessment must be conducted using the endorsed Assessment Instruments. These Instruments provide advice on their application.</li> <li>• The use of '<b>simulators</b>' in the assessment of this unit of competency is <b>not acceptable</b>.</li> <li>• Assessment may be in conjunction with the assessment of other units of competency.</li> <li>• Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstances, but is able to be transferred to other circumstances.</li> </ul>
<b>Guidance information for assessment</b>	<ul style="list-style-type: none"> <li>Further information about endorsed Assessment Instruments may be obtained from state/territory OH&amp;S regulators.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
<p><i>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. <b>Bold italicised</b> wording, if used in the Performance Criteria, is detailed below.</i></p>	
<b>Hazards</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>ground stability (e.g. ground condition, recently filled trenches, slopes)</li> <li>overhead hazards (e.g. powerlines, service pipes, trees, buildings etc.)</li> <li>insufficient lighting</li> <li>traffic (e.g. pedestrians, vehicles, plant)</li> <li>environmental conditions (e.g. wind, lightning, storms, etc.)</li> <li>other specific hazards (e.g. tidal areas, chainsaws, pressure washers, dangerous materials)</li> </ul>
<b>Hazard control measures</b>	<p>Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls</p> <p>It includes the application of the hierarchy of control - the six-step preference of control measures to manage and control risk:</p> <ol style="list-style-type: none"> <li>elimination</li> <li>substitution</li> <li>isolation</li> </ol>

<b>RANGE STATEMENT</b>	
	<ol style="list-style-type: none"> <li>4. engineering control measures</li> <li>5. using safe work practices</li> <li>6. personal protective equipment</li> </ol>
<b>Appropriate standards</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• codes of practice</li> <li>• legislation</li> <li>• Australian Standards</li> <li>• manufacturer's specifications</li> <li>• industry standards (where applicable)</li> </ul>
<b>Elevating work platform</b>	<p>The operation of a telescoping device, hinged device, or articulated device or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work. Excluded from this definition are platforms of less than 11 metres boom length.</p> <p>The 11 metre boom length shall be taken to mean the greater of the following:</p> <p>(a) The vertical distance from the floor of the platform to the surface supporting the elevating work platform with the platform at its maximum height; or</p> <p>(b) The nominal reach, measured horizontally from the centre point of rotation to the outer edge of the platform in its most extended position</p>
<b>Communication method</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• verbal and non-verbal language</li> <li>• written instructions</li> <li>• signage</li> <li>• hand signals</li> <li>• listening</li> <li>• questioning to confirm understanding</li> <li>• appropriate worksite protocol</li> </ul>
<b>Service logbook</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• any logbook</li> <li>• service book</li> <li>• history record system where the service and maintenance history is kept</li> </ul>
<b>Procedures</b>	<p>May include but not limited to:</p>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• manufacturer's guidelines (instructions, specifications, operators manual or checklists)</li> <li>• industry operating procedures</li> <li>• workplace procedures (work instructions, operating procedures, checklists)</li> </ul>
<b>Safety equipment</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• safety harness</li> <li>• energy absorber</li> <li>• lanyard</li> <li>• anchor points</li> </ul>
<b>Safety devices</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• horns/sirens</li> <li>• audible and visual reversing devices</li> <li>• operator restraint devices (platform gate)</li> <li>• lights (where applicable)</li> </ul>
<b>Communication equipment</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• two-way radios</li> <li>• mobile phone</li> </ul>
<b>Ground suitability</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• rough uneven ground</li> <li>• backfilled ground</li> <li>• soft soils</li> <li>• hard compacted soil</li> <li>• rock</li> <li>• bitumen</li> <li>• concrete</li> </ul>
<b>Stability</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• deploying outriggers</li> <li>• establishing correct size plates or packing</li> <li>• correctly positioning plates or packing</li> </ul>
<b>Hazard prevention/control measures</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• safety tags on electrical switches/isolators</li> <li>• insulated powerlines</li> <li>• safety observer used inside exclusion zone</li> <li>• disconnected power</li> <li>• traffic barricades and controls</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• illumination requirements</li> <li>• pedestrian controls</li> <li>• trench covers</li> <li>• movement of obstructions</li> <li>• personal protective equipment</li> <li>• suitable area for set-up</li> <li>• suitable firm and stable standing</li> </ul>
<b>Relevant plant movements</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• raising boom</li> <li>• lowering boom</li> <li>• slewing</li> <li>• hinging</li> <li>• articulating</li> <li>• telescoping</li> </ul>
<b>Best mobile practice</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• minimum speed</li> <li>• gentle acceleration and braking</li> <li>• minimum boom/jib length</li> <li>• avoiding ground depressions</li> </ul>
<b>Unplanned and/or unsafe situations</b>	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> <li>• loss of power</li> <li>• failure of controls</li> <li>• contact with overhead electrical conductors</li> <li>• damage caused by contact with obstructions</li> <li>• illness of personnel</li> </ul>
<b>Shut down</b>	<p>May include but not limited to:</p> <ul style="list-style-type: none"> <li>• retracting boom/jib (where applicable)</li> <li>• folding boom/jib into the transport position</li> <li>• retracting outriggers/stabilisers</li> <li>• idling engine to stabilise temperature</li> <li>• turning off engine (where applicable)</li> <li>• removing key from ignition (where applicable)</li> </ul>

## Unit Sector(s)

Not Applicable

## **TLIR4002A Source goods/services and evaluate contractors**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit Descriptor**

This unit involves the skills and knowledge required to source goods/materials/services and evaluate contractors including analysing supply requirements, and evaluating and selecting appropriate potential contractor(s). Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### **Application of the Unit**

#### **Application of the Unit**

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures. This includes the application of established workplace procedures to source goods and to evaluate potential contractors.

A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations' goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

### **Licensing/Regulatory Information**

Refer to Unit Descriptor

### **Pre-Requisites**

Not Applicable

## Employability Skills Information

**Employability Skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

#### 1 Analyse supply requirements

- 1.1 Purpose and specifications of required goods/services are identified
- 1.2 Criteria to evaluate potential or existing contractor performance is established
- 1.3 Quantities of required goods/services are determined
- 1.4 Frequency of ordering/requesting of goods/services is identified

#### 2 Evaluate potential contractors

- 2.1 Contractors of requested goods/materials/services are identified
- 2.2 Comparative costings for goods/materials/services are obtained
- 2.3 Contractors' ability to provide a consistent level of performance on repeat jobs is assessed
- 2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures
- 2.5 A prioritised contractor shortlist is established based on the capacity of contractors to provide a cost competitive quality service
- 2.6 The outcomes of the contractor selection process are documented including recommendations for actioning agreements/contracts with selected contractors
- 2.7 Information and data generated during the selection process is filed and maintained in accordance with workplace procedures

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Relevant regulatory and code requirements
- Relevant OH&S responsibilities and procedures
- Workplace policies, procedures and protocols for the sourcing and supply of goods/services, and the evaluation of potential supply contractors
- Workplace grievance and disputation handling policies and procedures
- Workplace business policies and plans as they relate to supply contracts, including procedures for maintenance of confidentiality
- Focus of operation of recording, reporting and statistical analysis systems and resources
- Resource availability including the processing capacity of equipment and software systems for statistical analysis of data
- Typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

#### Required skills:

- Communicate and negotiate effectively with others when sourcing goods and services and evaluating contractors
- Read and interpret instructions, procedures and information and signs relevant to the sourcing of goods and services and the evaluation of contractors
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the sourcing of goods and services and the evaluation of contractors
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when sourcing goods and services and evaluating contractors
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when sourcing goods and services and evaluating contractors in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and appropriately apply technology, information systems and procedures to workplace

**Required skills:**

tasks

- Adapt to differences in equipment in accordance with standard operating procedures

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

**Method of assessment**

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation,

## EVIDENCE GUIDE

and/or

- in an appropriate range of situations in the workplace

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:

- single and multi-site location
- large, medium or small companies

Services, products, risks, work systems and requirements may:

- potentially vary across different sections of the workplace

Operations require:

- customer and supplier contact and coordination

Contractors may be:

- for one-off or repeat supplies/contract services

Document/data interchange may be:

- electronic
- paper-based

Selection processes include:

- procedures for maintenance of confidentiality and integrity

Personnel in work area may include

- other employees and supervisors
- customers and suppliers
- external authorities and agencies
- management and union representatives
- industrial relations, occupational health and safety specialists
- other professional or technical staff, contractors and maintenance personnel

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documentation may include:

- quality and work specifications and procedures
- specifications for required products or services
- manufacturers specifications and/or suppliers handling and storage advice

## RANGE STATEMENT

Applicable regulations and legislation may include:

- workplace procedures, policies and instructions
- OH&S regulations and procedures
- supplier and/or client instructions
- materials safety data sheets
- relevant agreements, codes of practice including the national standards for manual handling and the industry safety code
- legislation, regulations and related documentation, including regulations related to hazardous substances, dangerous goods and environment protection
- reports of accidents and incidents within regulatory requirements and enterprise procedures
- workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information
- quality assurance procedures
- relevant regulations, standards and codes of practice
- relevant Australian and state/territory OH&S legislation
- equal employment legislation and related policies
- environmental protection regulations
- hazardous substances and dangerous goods codes
- relevant Australian standards and certification requirements
- licence, patent or copyright arrangements

### Unit Descriptor

#### Unit Descriptor

This unit involves the skills and knowledge required to contract transport and distribution services in accordance with relevant regulatory requirements and workplace procedures. This includes negotiating the contract with a contractor, finalising the contract negotiations, and completing all enterprise contract requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

### Application of the Unit

#### Application of the Unit

Work must be carried out in compliance with the relevant regulations, standards, legal requirements and codes of practice.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplace's goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- |   |   |
|---|---|
| <b>1 Negotiate contract with contractor</b> | <ul style="list-style-type: none"> <li>1.1 Requirements of the contract are clearly documented and understood by the relevant parties</li> <li>1.2 Areas of ambiguity or concern are clarified and resolved</li> <li>1.3 Negotiations are undertaken with selected contractor for the contracting of required goods/services on a 'without prejudice' basis</li> <li>1.4 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor including the determination of key performance indicators</li> <li>1.5 Alternative contractors are negotiated with if agreement is unable to be reached with preferred contractor</li> <li>1.6 Contract negotiations conform to established workplace requirements and relevant legislation</li> </ul> |
| <b>2 Complete contract negotiations</b>     | <ul style="list-style-type: none"> <li>2.1 Contract documentation is drafted in accordance with relevant legislation, workplace procedures and negotiated conditions of service and supply</li> <li>2.2 Technical support in the drafting of contracts is accessed where required</li> <li>2.3 Contract documentation is signed and exchanged between the relevant parties</li> </ul>   |
| <b>3 Complete enterprise</b>                | <ul style="list-style-type: none"> <li>3.1 Documentation systems are established to ensure traceability of</li> </ul>   |

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<b>contract requirements</b>	orders and financial transactions
	3.2 Workplace systems that require interaction with contractors are identified and actioned
	3.3 Quality assurance procedures for supplied goods/services are initiated
	3.4 Contract and ancillary documentation is completed and stored in accordance with workplace procedures and, where applicable, regulatory requirements

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

#### Required knowledge:

- Regulations, codes of practice and legal requirements relevant to contractual arrangements
- Relevant OH&S and environmental protection procedures and regulations
- Workplace procedures for the negotiation of a contract
- Problems that may occur during the negotiation of a contract and action that can be taken to report or resolve the problems
- Risks that may exist when negotiating a contract and ways of controlling the risks involved
- Focus of operation supply arrangements, resources, management and workplace operating systems
- Applicable aspects of contract law
- Processes for contract formulation and negotiation
- Workplace business policies and plans including procedures for maintenance of confidentiality
- Equipment applications, capacities, and configurations
- Resource availability including the competencies of individuals in the team/group
- Relevant contract documentation requirements

#### Required skills:

- Communicate effectively with others when negotiating a contract
- Read and interpret instructions, procedures, information and regulatory requirements relevant to the negotiation of a contract
- Prioritise work and coordinate self and others in relation to workplace activities

**Required skills:**

- Complete documentation related to the negotiation of a contract
- Operate electronic communication equipment to required protocol
- Provide leadership and work collaboratively with others when negotiating a contract
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when negotiating a contract in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- Plan and organise work activities
- Monitor work activities in terms of planned schedule
- Modify activities to cater for variations in workplace contexts and environment
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and apply appropriate technology and information systems
- Adapt to differences in equipment in accordance with standard operating procedures

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

**Context of and specific resources for assessment**

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational

## RANGE STATEMENT

Clients/customers/suppliers may include:

- domestic and international contractors
- corporations
- individuals
- government agencies

Contract must conform to:

- relevant legislation in regard to issues of probity and fair dealings

Consultative processes may involve:

- employees, supervisors and managers
- contractors
- suppliers and current or potential clients
- legal representatives, financial managers, accountants
- relevant authorities, government departments and institutions
- representatives of other enterprises and organisations related to the international transfer of freight
- industrial relations and OH&S specialists
- other professional, maintenance and technical staff

Communications systems may involve:

- fixed and mobile telephone
- radio
- fax
- email
- electronic data transfer of information
- mail, forms and internal memos

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Documentation/records may include:

- codes of practice and regulations relevant to the transport and distribution contractual arrangements
- legal and contract documentation
- workplace operating procedures and policies
- operations manuals, job specifications and procedures and induction documentation
- supplier and/or client instructions
- Australian and International standards, criteria and certification requirements
- communications technology equipment and oral, aural or signed communications
- quality assurance standards and procedures
- emergency procedures
- relevant competency standards and training materials

## RANGE STATEMENT

Applicable procedures and codes may include:

- QA plans, data and document control
- conditions of service, legislation and industrial agreements including workplace agreements and awards
- regulations and codes of practice relevant to contractual arrangements
- Australian and international regulations and codes of practice for the handling and transfer of dangerous goods and hazardous substances
- relevant financial regulations
- Australian and international standards and certification requirements
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant licence or permit requirements and associated regulations
- relevant workplace relations legislation
- relevant workers compensation legislation
- equal opportunity, equal employment opportunity and affirmative action legislation
