## CONTENTS

<b>Preliminary Information .....</b>	<b>31</b>
<b>History.....</b>	<b>31</b>
<b>Full List of AQF Qualifications in AHC10v6 Training Package .....</b>	<b>32</b>
<b>Full List of Units of Competency including Imported Units.....</b>	<b>36</b>
<b>Qualification Mapping of AHC10 - all Versions .....</b>	<b>81</b>
<b>Unit Mapping AHC10v5 to AHC10v6 .....</b>	<b>91</b>
<b>Unit Mapping AHC10v4 to AHC10v5 .....</b>	<b>92</b>
<b>Unit Mapping AHC10v3 to AHC10v4 .....</b>	<b>95</b>
<b>Unit Mapping AHC10v2 to AHC10v3 .....</b>	<b>97</b>
<b>Unit Mapping RTD02, RTE03 and RTF03 to AHC10 .....</b>	<b>106</b>
<b>Overview .....</b>	<b>174</b>
<b>Qualifications Framework.....</b>	<b>178</b>
<b>Qualification Pathways.....</b>	<b>185</b>
<b>Skill Sets in this Training Package.....</b>	<b>193</b>
<b>Assessment Guidelines.....</b>	<b>195</b>
<b>Assessment Guidelines - Industry Contextualisation .....</b>	<b>222</b>
<b>Competency Standards .....</b>	<b>231</b>
<b>Competency Standards - Industry Contextualisation .....</b>	<b>236</b>
<b>AHC10110 Certificate I in Conservation and Land Management.....</b>	<b>238</b>
<b>AHC10210 Certificate I in AgriFood Operations.....</b>	<b>241</b>
<b>AHC20110 Certificate II in Agriculture .....</b>	<b>245</b>
<b>AHC20210 Certificate II in Poultry Production Operations .....</b>	<b>256</b>
<b>AHC20310 Certificate II in Production Horticulture.....</b>	<b>262</b>
<b>AHC20410 Certificate II in Horticulture .....</b>	<b>269</b>
<b>AHC20510 Certificate II in Arboriculture .....</b>	<b>276</b>
<b>AHC20610 Certificate II in Parks and Gardens .....</b>	<b>281</b>
<b>AHC20710 Certificate II in Production Nursery .....</b>	<b>286</b>
<b>AHC20810 Certificate II in Retail Nursery.....</b>	<b>290</b>
<b>AHC20910 Certificate II in Sports Turf Management.....</b>	<b>295</b>
<b>AHC21010 Certificate II in Conservation and Land Management.....</b>	<b>298</b>
<b>AHC21112 Certificate II in Irrigation .....</b>	<b>306</b>
<b>AHC21210 Certificate II in Rural Operations .....</b>	<b>310</b>
<b>AHC21310 Certificate II in Shearing.....</b>	<b>313</b>
<b>AHC21410 Certificate II in Wool Handling.....</b>	<b>316</b>
<b>AHC21510 Certificate II in Floriculture .....</b>	<b>319</b>
<b>AHC21610 Certificate II in Landscaping.....</b>	<b>325</b>
<b>AHC30110 Certificate III in Agriculture .....</b>	<b>330</b>
<b>AHC30210 Certificate III in Agriculture (Dairy Production) .....</b>	<b>343</b>
<b>AHC30310 Certificate III in Horse Breeding.....</b>	<b>350</b>
<b>AHC30410 Certificate III in Pork Production.....</b>	<b>354</b>
<b>AHC30510 Certificate III in Poultry Production.....</b>	<b>359</b>
<b>AHC30610 Certificate III in Production Horticulture .....</b>	<b>364</b>
<b>AHC30710 Certificate III in Horticulture.....</b>	<b>371</b>
<b>AHC30810 Certificate III in Arboriculture .....</b>	<b>378</b>
<b>AHC30910 Certificate III in Landscape Construction.....</b>	<b>382</b>
<b>AHC31010 Certificate III in Parks and Gardens.....</b>	<b>385</b>
<b>AHC31110 Certificate III in Production Nursery .....</b>	<b>390</b>
<b>AHC31210 Certificate III in Retail Nursery .....</b>	<b>397</b>
<b>AHC31310 Certificate III in Sports Turf Management .....</b>	<b>403</b>

AHC31410 Certificate III in Conservation and Land Management.....	406
AHC31510 Certificate III in Indigenous Land Management.....	414
AHC31610 Certificate III in Lands, Parks and Wildlife .....	421
AHC31710 Certificate III in Natural Area Restoration.....	427
AHC31810 Certificate III in Vertebrate Pest Management .....	431
AHC31910 Certificate III in Weed Management.....	435
AHC32010 Certificate III in Beekeeping .....	439
AHC32111 Certificate III in Commercial Seed Processing.....	444
AHC32210 Certificate III in Commercial Composting.....	448
AHC32310 Certificate III in Conservation Earthworks.....	452
AHC32412 Certificate III in Irrigation.....	456
AHC32513 Certificate III in Aboriginal-sites Work .....	461
AHC32610 Certificate III in Rural Machinery Operations.....	469
AHC32710 Certificate III in Rural Merchandising.....	473
AHC32810 Certificate III in Rural Operations.....	479
AHC32910 Certificate III in Shearing .....	482
AHC33010 Certificate III in Wool Clip Preparation .....	485
AHC33110 Certificate III in Advanced Wool Handling.....	489
AHC33210 Certificate III in Floriculture .....	492
AHC33311 Certificate III in Feedlot Operations .....	497
AHC33412 Certificate III in Seed Production.....	505
AHC33512 Certificate III in Seed Testing .....	512
AHC40110 Certificate IV in Agriculture .....	517
AHC40210 Certificate IV in Poultry Production .....	527
AHC40310 Certificate IV in Production Horticulture .....	532
AHC40410 Certificate IV in Horticulture .....	538
AHC40510 Certificate IV in Parks and Gardens .....	545
AHC40610 Certificate IV in Production Nursery .....	551
AHC40710 Certificate IV in Retail Nursery .....	555
AHC40812 Certificate IV in Sports Turf Management.....	561
AHC40910 Certificate IV in Conservation and Land Management.....	566
AHC41010 Certificate IV in Agribusiness .....	574
AHC41112 Certificate IV in Irrigation.....	579
AHC41210 Certificate IV in Shearing .....	584
AHC41310 Certificate IV in Wool Classing.....	587
AHC41412 Certificate IV in Seed Production.....	591
AHC41512 Certificate IV in Seed Testing.....	596
AHC41612 Certificate IV in Organic Farming .....	601
AHC50110 Diploma of Agriculture .....	607
AHC50210 Diploma of Pork Production.....	616
AHC50310 Diploma of Production Horticulture.....	620
AHC50410 Diploma of Horticulture .....	627
AHC50510 Diploma of Arboriculture.....	635
AHC50610 Diploma of Landscape Design .....	639
AHC50710 Diploma of Parks and Gardens Management.....	644
AHC50810 Diploma of Production Nursery Management.....	650
AHC50910 Diploma of Retail Nursery Management.....	656
AHC51010 Diploma of Sports Turf Management.....	662
AHC51110 Diploma of Conservation and Land Management.....	668
AHC51210 Diploma of Community Coordination and Facilitation .....	677
AHC51310 Diploma of Pest Management.....	684
AHC51410 Diploma of Agribusiness Management.....	689
AHC51513 Diploma of Viticulture.....	694

<b>AHC51610 Diploma of Irrigation Management.....</b>	<b>701</b>
<b>AHC51710 Diploma of Rural Machinery Management.....</b>	<b>707</b>
<b>AHC51812 Diploma of Organic Farming .....</b>	<b>711</b>
<b>AHC60110 Advanced Diploma of Agriculture.....</b>	<b>717</b>
<b>AHC60210 Advanced Diploma of Horticulture .....</b>	<b>722</b>
<b>AHC60310 Advanced Diploma of Agribusiness Management.....</b>	<b>727</b>
<b>AHC60410 Advanced Diploma of Conservation and Land Management.....</b>	<b>732</b>
<b>AHCSS00001 Advanced Chemical Spray Application Skill Set.....</b>	<b>736</b>
<b>AHCSS00002 Agricultural Chemical Skill Set.....</b>	<b>738</b>
<b>AHCSS00003 Cotton Industry Skill Set.....</b>	<b>741</b>
<b>AHCSS00004 Gravity Fed Irrigation Operator Skill Set.....</b>	<b>743</b>
<b>AHCSS00005 Irrigation Agronomist Skill Set.....</b>	<b>745</b>
<b>AHCSS00006 Irrigation Contractor Skill Set .....</b>	<b>747</b>
<b>AHCSS00007 Irrigation Installer Skill Set.....</b>	<b>749</b>
<b>AHCSS00008 Irrigation Manager Skill Set.....</b>	<b>751</b>
<b>AHCSS00009 Irrigation Retailer Skill Set.....</b>	<b>753</b>
<b>AHCSS00010 Pork Industry Stockperson Skill Set.....</b>	<b>755</b>
<b>AHCSS00011 Pressurised Irrigation System Operator Skill Set.....</b>	<b>757</b>
<b>AHCSS00012 Recognise Aboriginal Cultural Sites Skill Set.....</b>	<b>759</b>
<b>AHCSS00013 Report on Aboriginal Cultural Sites Skill Set.....</b>	<b>761</b>
<b>AHCSS00014 Seed Crop Field Inspector Skill Set.....</b>	<b>763</b>
<b>AHCSS00015 Carbon Farming Initiative Advisor Skill Set.....</b>	<b>764</b>
<b>AHCSS00016 Carbon Farming Initiative Business Skill Set.....</b>	<b>766</b>
<b>AHCSS00017 Carbon Farming Initiative Livestock Project Implementer Skill Set.....</b>	<b>768</b>
<b>AHCSS00018 Carbon Farming Initiative Waste and Manure Management Project Implementer Skill Set .....</b>	<b>770</b>
<b>AHCSS00019 Carbon Farming Initiative Soil or Biochar Project Implementer Skill Set.....</b>	<b>772</b>
<b>AHCSS00020 Carbon Farming Initiative Savannah Burning, Feral Animal, Rangelands Project Implementer Skill Set.....</b>	<b>774</b>
<b>AHCSS00021 Carbon Farming Initiative Vegetation Project Implementer Skill Set.....</b>	<b>776</b>
<b>AHCSS00022 Carbon Farming Initiative Emissions Avoidance from Soil and Crops Project Implementer Skill Set.....</b>	<b>778</b>
<b>AHCSS00023 Basic Introduction to Beekeeping Skill Set.....</b>	<b>780</b>
<b>AHCAGB301A Keep records for a primary production business.....</b>	<b>782</b>
<b>AHCAGB401A Implement and monitor a property improvement plan .....</b>	<b>787</b>
<b>AHCAGB402A Analyse and interpret production data.....</b>	<b>793</b>
<b>AHCAGB501A Develop climate risk management strategies .....</b>	<b>798</b>
<b>AHCAGB502A Plan and manage infrastructure requirements .....</b>	<b>804</b>
<b>AHCAGB503A Plan and monitor production processes.....</b>	<b>811</b>
<b>AHCAGB504A Plan production for the whole land/farm based business.....</b>	<b>817</b>
<b>AHCAGB505A Develop a whole farm plan .....</b>	<b>825</b>
<b>AHCAGB601A Develop export markets for produce .....</b>	<b>830</b>
<b>AHCAGB602A Manage estate planning.....</b>	<b>835</b>
<b>AHCAGB603A Manage the production system.....</b>	<b>840</b>
<b>AHCAGB604A Analyse business performance.....</b>	<b>845</b>
<b>AHCAGB605A Manage business capital .....</b>	<b>850</b>
<b>AHCAGB606A Manage price risk through trading strategy.....</b>	<b>855</b>
<b>AHCAIS201A Assist with artificial insemination procedures .....</b>	<b>860</b>
<b>AHCAIS301A Collect semen .....</b>	<b>865</b>
<b>AHCAIS302A Process and store semen.....</b>	<b>870</b>
<b>AHCAIS303A Artificially inseminate livestock.....</b>	<b>875</b>
<b>AHCAIS401A Supervise artificial breeding and/or embryo transfer programs.....</b>	<b>881</b>
<b>AHCARB201A Apply a range of treatments to trees .....</b>	<b>887</b>

AHCARB202A	Fell small trees.....	892
AHCARB203A	Perform above ground pruning .....	897
AHCARB204A	Undertake standard climbing techniques.....	902
AHCARB205A	Operate and maintain chainsaws .....	907
AHCARB206A	Undertake stump removal .....	913
AHCARB207A	Perform ground based rigging.....	918
AHCARB301A	Implement a tree maintenance program.....	927
AHCARB302A	Conduct tree inspections.....	933
AHCARB303A	Implement a tree pruning program .....	938
AHCARB304A	Fell trees with advanced techniques.....	944
AHCARB305A	Remove trees in confined spaces .....	951
AHCARB306A	Undertake aerial rescue .....	957
AHCARB307A	Undertake complex tree climbing .....	963
AHCARB308A	Install cable and bracing.....	969
AHCARB309A	Implement a tree protection program.....	974
AHCARB310A	Perform aerial rigging .....	980
AHCARB501A	Assess trees .....	989
AHCARB502A	Identify, select and specify trees.....	995
AHCARB503A	Diagnose tree diseases.....	1001
AHCARB504A	Develop a tree protection program .....	1007
AHCARB505A	Document and audit tree work .....	1013
AHCASW301A	Protect places of Aboriginal cultural significance .....	1018
AHCASW302A	Relate Aboriginal culture to sites work .....	1027
AHCASW303A	Identify and record Aboriginal-sites, objects and cultural landscapes.....	1037
AHCASW304A	Identify Indigenous culturally significant plants .....	1046
AHCASW305A	Work with Aboriginal ceremonial secret sacred materials .....	1055
AHCASW306A	Use technology in Aboriginal-sites work .....	1064
AHCASW307A	Map Aboriginal cultural landscapes .....	1075
AHCASW308A	Apply cultural significance to Aboriginal-sites and landscapes .....	1084
AHCASW309A	Interpret Aboriginal cultural landscape.....	1092
AHCASW310A	Move and store Aboriginal cultural material .....	1102
AHCASW311A	Apply relevant legislation in Aboriginal-sites work.....	1112
AHCASW312A	Maintain an Aboriginal cultural site .....	1120
AHCASW501A	Survey and report on Aboriginal cultural sites .....	1129
AHCBAC101A	Support agricultural crop work.....	1142
AHCBAC201A	Assist agricultural crop establishment.....	1148
AHCBAC202A	Assist agricultural crop maintenance.....	1154
AHCBAC203A	Assist agricultural crop harvesting .....	1160
AHCBAC204A	Prepare grain storages.....	1165
AHCBAC205A	Operate cane haulage vehicle.....	1171
AHCBAC301A	Conserve forage .....	1176
AHCBAC302A	Establish pastures and crops for livestock production.....	1182
AHCBAC303A	Prepare to receive grains/seeds .....	1188
AHCBAC304A	Test grains/seeds on receipt.....	1193
AHCBAC305A	Undertake preparation of land for agricultural crop production.....	1198
AHCBAC306A	Establish agricultural crops .....	1204
AHCBAC307A	Maintain agricultural crops.....	1210
AHCBAC308A	Undertake agricultural crop harvesting activities.....	1216
AHCBAC401A	Manage pastures for livestock production.....	1223
AHCBAC402A	Plan a pasture establishment program .....	1229
AHCBAC403A	Supervise agricultural crop establishment.....	1234
AHCBAC404A	Plan and implement agricultural crop maintenance .....	1240
AHCBAC405A	Supervise agricultural crop harvesting.....	1245

AHCBAC406A Maintain grain quality in storage .....	1251
AHCBAC407A Save, prepare and store agricultural seed .....	1258
AHCBAC501A Manage agricultural crop production.....	1264
AHCBAC502A Manage forage conservation.....	1270
AHCBAC503A Manage integrated crop and pasture production.....	1276
AHCBAC504A Plan and manage a stored grain program.....	1282
AHCBAC505A Plan and manage long-term weed, pest and/or disease control in crops	1289
AHCBAC506A Manage the harvest of crops .....	1296
AHCBAC507A Develop production plans for crops .....	1305
AHCBEK201A support beekeeping work .....	1312
AHCBEK202A Use a bee smoker.....	1317
AHCBEK203A Open and reassemble a beehive .....	1322
AHCBEK204A Construct and repair beehives .....	1327
AHCBEK301A Manage honey bee swarms .....	1332
AHCBEK302A Manipulate honey bee brood .....	1337
AHCBEK303A Re-queen a honey bee colony .....	1342
AHCBEK304A Remove a honey crop from a hive .....	1347
AHCBEK305A Extract honey .....	1352
AHCBEK306A Manage pests and disease within a honey bee colony.....	1357
AHCBEK401A Collect and store propolis .....	1362
AHCBEK402A Perform queen bee artificial insemination.....	1367
AHCBEK403A Produce and harvest royal jelly .....	1373
AHCBEK404A Provide bee pollination services.....	1378
AHCBEK405A Select and establish an apiary site.....	1383
AHCBEK406A Trap and store pollen .....	1388
AHCBEK407A Rear queen bees.....	1393
AHCBIO201A Inspect and clean machinery for plant, animal and soil material .....	1398
AHCBIO202A Follow site quarantine procedures.....	1403
AHCBIO301A Work effectively in an emergency disease or plant pest response.....	1409
AHCBIO302A Identify and report unusual disease or plant pest signs.....	1417
AHCBIO303A Carry out emergency disease or plant pest control procedures at infected premises.....	1422
AHCBIO304A Carry out movement and security procedures .....	1429
AHCBIO305A Monitor and review biosecurity measures .....	1435
AHCBIO401A Supervise activities on infected premises .....	1441
AHCBIO402A Carry out field surveillance for a specific emergency disease or plant pest	1449
AHCBIO403A Plan and implement a biosecurity program .....	1455
AHCBIO501A Manage active operational emergency disease or plant pest sites.....	1462
AHCBIO502A Manage the implementation of an emergency disease or plant pest control program.....	1470
AHCBIO601A Plan and oversee an emergency disease or plant pest control program.	1477
AHCBUS301A Use hand held e-business tools.....	1485
AHCBUS401A Administer finance, insurance and legal requirements .....	1490
AHCBUS402A Cost a project.....	1496
AHCBUS403A Support and review business structures and relationships .....	1501
AHCBUS404A Operate within a budget framework .....	1506
AHCBUS405A Participate in an e-business supply chain .....	1511
AHCBUS501A Manage staff.....	1516
AHCBUS502A Market products and services .....	1522
AHCBUS503A Negotiate and monitor contracts .....	1528
AHCBUS504A Prepare estimates, quotes and tenders.....	1533
AHCBUS505A Develop a marketing plan.....	1539
AHCBUS506A Develop and review a business plan.....	1545

AHCBUS507A Monitor and review business performance .....	1551
AHCBUS508A Prepare and monitor budgets and financial reports .....	1557
AHCBUS601A Manage capital works .....	1562
AHCBUS602A Review land management plans and strategies.....	1567
AHCBUS603A Develop and review a strategic plan .....	1573
AHCBUS604A Design and manage the enterprise quality management system .....	1578
AHCBUS605A Manage human resources.....	1583
AHCBUS606A Develop a monitoring, evaluation and reporting program.....	1590
AHCBUS607A Implement a monitoring, evaluation and reporting program .....	1595
AHCBUS608A Manage risk .....	1600
AHCCCF401A Prepare project acquittal.....	1606
AHCCCF402A Report on project.....	1611
AHCCCF403A Obtain and manage sponsorship.....	1616
AHCCCF404A Contribute to association governance .....	1622
AHCCCF405A Develop community networks .....	1627
AHCCCF406A Facilitate ongoing group development .....	1633
AHCCCF407A Obtain resources from community and groups .....	1638
AHCCCF408A Promote community programs .....	1643
AHCCCF409A Participate in assessments of project submissions .....	1649
AHCCCF410A Support individuals in resource management change processes.....	1654
AHCCCF411A Develop approaches to include cultural and human diversity .....	1659
AHCCCF412A Coordinate board/committee elections.....	1664
AHCCCF413A Service committees.....	1669
AHCCCF414A Coordinate fund-raising activities.....	1674
AHCCCF415A Coordinate social events to support group purposes .....	1680
AHCCCF416A Present proposed courses of action to meeting .....	1685
AHCCCF501A Evaluate project submissions.....	1690
AHCCCF502A Facilitate development of group goals and projects.....	1696
AHCCCF503A Promote group formation and development.....	1702
AHCCCF504A Support group and community changes in resource management .....	1708
AHCCCF505A Contribute to regional planning process .....	1713
AHCCCF506A Manage the incorporation of a group.....	1718
AHCCCF601A Map regional issues and stakeholders .....	1723
AHCCFI501A Provide technical advice on the Carbon Farming Initiative .....	1729
AHCCFI502A Assess the feasibility of a Carbon Farming Initiative project .....	1736
AHCCFI503A Advise on Carbon Farming Initiative project planning and implementation	1743
AHCCFI504A Monitor and report on a Carbon Farming Initiative project.....	1750
AHCCFI505A Aggregate Carbon Farming Initiative projects.....	1756
AHCCFI506A Plan a Carbon Farming Initiative livestock project.....	1762
AHCCFI507A Plan a Carbon Farming Initiative waste or manure management project	1769
AHCCFI508A Plan a Carbon Farming Initiative project to sequester carbon in soil or biochar.....	1776
AHCCFI509A Plan a Carbon Farming Initiative savannah burning, feral animal or rangelands project.....	1783
AHCCFI510A Plan a Carbon Farming Initiative vegetation project.....	1791
AHCCFI511A Plan a Carbon Farming Initiative project to avoid emissions from soil or crops .....	1798
AHCCHM101A Follow basic chemical safety rules .....	1805
AHCCHM201A Apply chemicals under supervision .....	1810
AHCCHM301A Conduct fumigation in enclosed spaces.....	1816
AHCCHM302A Fumigate soil using chemicals.....	1823
AHCCHM303A Prepare and apply chemicals.....	1830
AHCCHM304A Transport, handle and store chemicals .....	1837

AHCCHM305A Conduct manual fumigation of vertebrate and invertebrate pests .....	1842
AHCCHM401A Minimise risks in the use of chemicals .....	1849
AHCCHM402A Plan and implement a chemical use program .....	1854
AHCCHM403A Prepare safe operating procedures for calibration of equipment.....	1860
AHCCHM501A Develop and manage a chemical use strategy .....	1865
AHCCOM201A Assess and receive raw materials for composting .....	1873
AHCCOM202A Recognise and respond to fire emergencies on a composting site.....	1879
AHCCOM203A Recognise raw materials, production processes and products on a composting site .....	1885
AHCCOM301A Operate compost processing plant, machinery and equipment.....	1891
AHCCOM302A Dispatch materials and composted product.....	1897
AHCCOM303A Operate a compost bagging process.....	1903
AHCCOM401A Develop a composting recipe .....	1910
AHCCOM402A Plan and schedule compost production.....	1916
AHCCOM501A Identify and secure raw materials supply for compost production .....	1921
AHCDER401A Handle, store and grade deer velvet.....	1926
AHCDER501A Comply with deer industry national velvet accreditation requirements	1931
AHCDER502A Harvest deer velvet.....	1937
AHCDES501A Design sustainable landscapes .....	1943
AHCDES502A Prepare a landscape project design.....	1950
AHCDES503A Assess landscape sites.....	1956
AHCDES504A Design for construction of landscape features .....	1962
AHCDRG201A Maintain drainage systems.....	1968
AHCDRG301A Install drainage systems .....	1973
AHCDRG302A Measure drainage system performance .....	1979
AHCDRG303A Troubleshoot drainage systems .....	1984
AHCDRG501A Design drainage systems.....	1989
AHCDRY201A Milk livestock .....	1996
AHCDRY301A Coordinate milking operations .....	2001
AHCDRY302A Operate a dairy recycling system.....	2007
AHCDRY401A Manage milking shed routines.....	2013
AHCEXP301A Handle and store explosives .....	2019
AHCEXP302A Identify and select explosive products .....	2024
AHCEXP303A Prepare and use explosives.....	2029
AHCFAU201A Recognise fauna .....	2035
AHCFAU301A Respond to wildlife emergencies .....	2040
AHCFAU501A Manage fauna populations.....	2047
AHCFIR201A Assist with prescribed burning.....	2053
AHCFIR501A Manage wildfire hazard reduction programs.....	2058
AHCHBR101A Support horse work.....	2064
AHCHBR201A Monitor horse health and welfare.....	2070
AHCHBR202A Handle young horses .....	2076
AHCHBR203A Provide daily care for horses.....	2081
AHCHBR204A Assist with mating procedures and parturition of horses.....	2087
AHCHBR302A Carry out basic hoof care procedures .....	2092
AHCHBR303A Carry out mare mating or artificial insemination procedures .....	2097
AHCHBR304A Educate, ride and care for horses and equipment.....	2103
AHCHBR305A Handle and care for stallions.....	2108
AHCHBR306A Prevent and treat equine injury and disease.....	2114
AHCHBR307A Assess suitability of horses for stock work.....	2120
AHCHBR308A Maintain horses in a healthy state and safe environment.....	2125
AHCHBR309A Determine nutritional requirements for horses .....	2131
AHCHBR401A Carry out stud stable management duties .....	2137

AHCHBR402A Supervise raising young horses.....	2142
AHCHYD301A Implement a maintenance program for hydroponic systems .....	2147
AHCHYD302A Install hydroponic systems .....	2152
AHCHYD501A Develop a plan for a hydroponic system.....	2157
AHCILM201A Maintain cultural places.....	2162
AHCILM202A Observe and report plants and/or animals .....	2167
AHCILM203A Record information about country.....	2172
AHCILM301A Propose appropriate uses of traditional customs .....	2177
AHCILM302A Provide appropriate information on cultural knowledge .....	2182
AHCILM305A Work with an Aboriginal Community or organisation.....	2188
AHCILM306A Follow Aboriginal cultural protocols.....	2194
AHCILM307A Implement Aboriginal cultural burning practices.....	2203
AHCILM401A Protect places of cultural significance .....	2213
AHCILM402A Report on place of potential cultural significance.....	2219
AHCILM403A Contribute to the proposal for a negotiated outcome for a given area of country .....	2225
AHCILM404A Record and document community history.....	2230
AHCILM405A Develop work practices to accommodate cultural identity .....	2237
AHCILM501A Conduct field research into natural and cultural resources.....	2243
AHCILM502A Develop conservation strategies for cultural resources.....	2251
AHCILM503A Manage restoration of cultural places .....	2257
AHCILM504A Develop strategies for Indigenous land or sea management .....	2263
AHCILM505A Map relationship of business enterprise to culture and country .....	2269
AHCILM506A Operate within community cultures and goals .....	2275
AHCILM508A Propose a negotiated outcome for a given area of country .....	2280
AHCILM509A Plan burning activities for natural and cultural resource management.....	2286
AHCILM510A Plan for successful cultural practice at work.....	2291
AHCILM601A Manage cultural processes in an Indigenous organisation.....	2298
AHCINF201A Carry out basic electric fencing operations .....	2303
AHCINF202A Install, maintain and repair fencing .....	2308
AHCINF203A Maintain properties and structures.....	2313
AHCINF204A Fabricate and repair metal or plastic structures .....	2318
AHCINF301A Implement property improvement, construction and repair .....	2324
AHCINF302A Plan and construct an electric fence .....	2330
AHCINF303A Plan and construct conventional fencing .....	2336
AHCIRG101A Support irrigation work .....	2342
AHCIRG201A Assist with the operation of gravity fed irrigation .....	2348
AHCIRG202A Assist with the operation of pressurised irrigation.....	2354
AHCIRG203A Install micro-irrigation systems .....	2359
AHCIRG204A Lay irrigation and/or drainage pipes .....	2365
AHCIRG205A Maintain gravity-fed irrigation systems.....	2371
AHCIRG206A Maintain pressurised irrigation systems .....	2377
AHCIRG207A Carry out irrigation site preparation tasks .....	2383
AHCIRG208A Assist with the installation and maintenance of pumps and flow control devices for irrigation.....	2387
AHCIRG209A Carry out installation tasks for low volume irrigation .....	2392
AHCIRG210A Carry out installation tasks for sprinkler irrigation .....	2396
AHCIRG211A Assist with low volume irrigation operations .....	2400
AHCIRG212A Assist with sprinkler irrigation operations .....	2404
AHCIRG213A Assist with surface irrigation operations .....	2408
AHCIRG214A Install micro-irrigation systems for landscaping.....	2413
AHCIRG301A Implement a maintenance program for an irrigation system.....	2418
AHCIRG302A Install irrigation systems .....	2423

AHCIRG303A Measure irrigation delivery system performance .....	2429
AHCIRG304A Operate gravity fed irrigation systems.....	2433
AHCIRG305A Operate pressurised irrigation systems.....	2439
AHCIRG306A Troubleshoot irrigation systems .....	2444
AHCIRG307A Recommend irrigation products and services.....	2449
AHCIRG308A Monitor soils under irrigation .....	2455
AHCIRG309A Interpret and apply instructions to install pumps .....	2460
AHCIRG310A Operate and maintain irrigation pumping systems.....	2466
AHCIRG311A Install low volume irrigation components.....	2472
AHCIRG312A Install sprinkler irrigation components .....	2477
AHCIRG313A Install moving sprinkler irrigation components.....	2482
AHCIRG314A Install surface irrigation structures and components.....	2487
AHCIRG315A Interpret irrigation plans and drawings .....	2493
AHCIRG316A Implement a low volume irrigation maintenance program.....	2497
AHCIRG317A Implement a sprinkler irrigation maintenance program .....	2502
AHCIRG318A Implement a moving sprinkler irrigation maintenance program.....	2507
AHCIRG319A Implement a surface irrigation maintenance program .....	2512
AHCIRG320A Maintain and repair irrigation drainage systems.....	2517
AHCIRG321A Operate low volume irrigation systems.....	2522
AHCIRG322A Operate sprinkler irrigation systems .....	2527
AHCIRG323A Operate moving sprinkler irrigation systems.....	2532
AHCIRG324A Operate surface irrigation systems .....	2537
AHCIRG325A Operate irrigation technology.....	2542
AHCIRG326A Operate irrigation injection equipment .....	2546
AHCIRG327A Implement an irrigation schedule .....	2551
AHCIRG401A Acquire resources for irrigation installation and construction .....	2556
AHCIRG402A Determine hydraulic parameters for an irrigation system.....	2561
AHCIRG404A Implement an irrigation-related environmental protection program....	2566
AHCIRG405A Plan and coordinate gravity-fed irrigation systems .....	2572
AHCIRG406A Plan on-site irrigation system installation and construction work .....	2577
AHCIRG407A Supervise on-site irrigation installation and construction work.....	2582
AHCIRG408A Schedule irrigations.....	2587
AHCIRG410A Select and manage pumping systems for irrigation.....	2592
AHCIRG411A Construct and install a low volume irrigation system.....	2599
AHCIRG412A Construct and install a sprinkler irrigation system.....	2604
AHCIRG413A Construct and install a moving sprinkler irrigation system .....	2609
AHCIRG414A Construct and install a surface irrigation system.....	2614
AHCIRG415A Interpret and apply irrigation designs .....	2619
AHCIRG416A Supervise low volume irrigation maintenance .....	2624
AHCIRG417A Supervise sprinkler irrigation maintenance.....	2629
AHCIRG418A Supervise moving sprinkler irrigation maintenance .....	2634
AHCIRG419A Supervise surface irrigation maintenance.....	2639
AHCIRG420A Manage a low volume irrigation system.....	2644
AHCIRG421A Manage a sprinkler irrigation system.....	2649
AHCIRG422A Manage a moving sprinkler irrigation system .....	2654
AHCIRG423A Manage a surface irrigation system .....	2659
AHCIRG424A Construct and install an irrigation drainage system.....	2664
AHCIRG425A Monitor and control irrigation drainage systems.....	2669
AHCIRG426A Evaluate water supply for irrigation.....	2674
AHCIRG427A Plan and supervise on-site irrigation system installation and construction work .....	2678
AHCIRG428A Provide irrigation sales and service .....	2684
AHCIRG501A Audit irrigation systems .....	2689

AHCIRG502A Design irrigation system maintenance and monitoring programs .....	2695
AHCIRG503A Design irrigation, drainage and water treatment systems .....	2700
AHCIRG504A Develop an irrigation and drainage management plan .....	2707
AHCIRG505A Establish and maintain an irrigation-related environmental protection program.....	2713
AHCLPW301A Supervise park visitor activities .....	2719
AHCLPW303A Construct access tracks.....	2724
AHCLPW304A Carry out inspection of designated area.....	2730
AHCLPW305A Perform diving for scientific purposes.....	2736
AHCLPW306A Undertake sampling and testing of water.....	2743
AHCLPW401A Process applications for changes in land use .....	2749
AHCLPW402A Implement land and sea management practices .....	2754
AHCLPW403A Inspect and monitor cultural places .....	2760
AHCLPW404A Produce maps for land management purposes .....	2767
AHCLPW405A Monitor biodiversity .....	2773
AHCLPW501A Develop a management plan for a designated area.....	2779
AHCLPW503A Assess applications for legislative compliance .....	2786
AHCLPW504A Review assessments for legislative compliance .....	2791
AHCLPW505A Implement natural and cultural resource management plans .....	2796
AHCLPW506A Investigate suspected breaches of Natural Resource Management (NRM) legislation.....	2801
AHCLPW601A Coordinate the preparation of a regional resource management plan.....	2806
AHCLSC101A Support landscape work.....	2813
AHCLSC201A Assist with landscape construction work.....	2818
AHCLSC202A Construct low-profile timber or modular retaining walls.....	2823
AHCLSC203A Install aggregate paths .....	2829
AHCLSC204A Lay paving .....	2835
AHCLSC205A Install tree protection devices.....	2841
AHCLSC301A Set out site for construction works .....	2846
AHCLSC302A Construct landscape features using concrete .....	2851
AHCLSC303A Construct brick and/or block structures and features .....	2856
AHCLSC304A Erect timber structures and features.....	2861
AHCLSC305A Construct stone structures and features .....	2867
AHCLSC306A Implement a paving project.....	2873
AHCLSC307A Implement a retaining wall project .....	2878
AHCLSC308A Install metal structures and features .....	2883
AHCLSC309A Install water features.....	2888
AHCLSC310A Implement a tree transplanting program .....	2893
AHCLSC401A Supervise landscape project works.....	2899
AHCLSC501A Survey and establish site levels .....	2905
AHCLSC502A Manage landscape projects .....	2910
AHCLSC503A Manage a tree transplanting program.....	2916
AHCLSK101A Support extensive livestock work .....	2922
AHCLSK102A Support intensive livestock work.....	2928
AHCLSK201A Assist with feeding in a production system.....	2934
AHCLSK202A Care for health and welfare of livestock.....	2939
AHCLSK203A Carry out birthing duties .....	2946
AHCLSK204A Carry out regular livestock observation.....	2952
AHCLSK205A Handle livestock using basic techniques .....	2957
AHCLSK206A Identify and mark livestock.....	2963
AHCLSK207A Load and unload livestock.....	2968
AHCLSK208A Monitor livestock to parturition.....	2973
AHCLSK209A Monitor water supplies .....	2979

AHCLSK210A Muster and move livestock.....	2984
AHCLSK211A Provide feed for livestock.....	2989
AHCLSK212A Ride horses to carry out stock work.....	2994
AHCLSK213A Clean out production sheds.....	2999
AHCLSK214A Maintain production growing environments.....	3005
AHCLSK215A Carry out alpaca handling and husbandry operations.....	3010
AHCLSK301A Administer medication to livestock.....	3016
AHCLSK302A Mate and monitor reproduction of alpacas.....	3022
AHCLSK303A Carry out feedlot operations.....	3027
AHCLSK304A Carry out post-mortem examination of livestock.....	3033
AHCLSK305A Maintain livestock water supplies.....	3039
AHCLSK306A Coordinate and monitor production performance.....	3045
AHCLSK307A Euthanase livestock.....	3051
AHCLSK308A Identify and draft livestock.....	3057
AHCLSK309A Implement animal health control programs.....	3062
AHCLSK310A Implement feeding plans for intensive production.....	3068
AHCLSK311A Implement feeding plans for livestock.....	3073
AHCLSK312A Coordinate artificial insemination and fertility management of livestock.....	3079
AHCLSK313A Monitor livestock production growing environments.....	3085
AHCLSK314A Prepare animals for parturition.....	3090
AHCLSK315A Prepare for and implement natural mating of livestock.....	3096
AHCLSK316A Prepare livestock for competition.....	3101
AHCLSK317A Plan to exhibit livestock.....	3106
AHCLSK318A Rear newborn and young livestock.....	3112
AHCLSK319A Slaughter livestock.....	3118
AHCLSK320A Coordinate and monitor livestock transport.....	3123
AHCLSK321A Service and repair bores and windmills.....	3128
AHCLSK322A Transport farm produce or bulk materials.....	3134
AHCLSK323A Maintain and monitor feed stocks.....	3141
AHCLSK324A Care for and train working dogs.....	3146
AHCLSK325A Castrate livestock.....	3151
AHCLSK326A Mix and mill standard stockfeed.....	3156
AHCLSK327A Collect, store and administer colostrum.....	3162
AHCLSK328A Remove and facilitate reuse of effluent and manure from an intensive production system.....	3167
AHCLSK329A Implement procedures for calving.....	3173
AHCLSK330A Implement procedures for foaling down mares.....	3179
AHCLSK331A Comply with industry animal welfare requirements.....	3185
AHCLSK332A Monitor animals in intensive production systems.....	3190
AHCLSK333A Monitor pen condition and ration suitability.....	3197
AHCLSK335A Conduct dropped ovary technique procedures for spaying cattle.....	3203
AHCLSK401A Develop feeding plans for a production system.....	3214
AHCLSK402A Develop livestock feeding plans.....	3221
AHCLSK403A Escort livestock during export.....	3226
AHCLSK404A Implement and monitor animal welfare programs.....	3232
AHCLSK405A Implement intensive production systems.....	3237
AHCLSK406A Oversee animal marking operations.....	3244
AHCLSK407A Plan and monitor intensive production systems.....	3250
AHCLSK408A Pregnancy test animals.....	3256
AHCLSK409A Supervise animal health programs.....	3262
AHCLSK410A Supervise feedlot operations.....	3268
AHCLSK411A Supervise natural mating of livestock.....	3274
AHCLSK412A Arrange livestock purchases.....	3279

AHCLSK413A Design livestock handling facilities .....	3284
AHCLSK414A Arrange transport for farm produce or livestock.....	3289
AHCLSK415A Oversee alpaca farm activities.....	3294
AHCLSK416A Identify and select animals for breeding.....	3299
AHCLSK417A Manage horses for stock work.....	3304
AHCLSK501A Manage livestock production .....	3310
AHCLSK502A Arrange marketing of livestock.....	3317
AHCLSK503A Develop and implement a breeding strategy.....	3323
AHCLSK504A Develop livestock health and welfare strategies.....	3329
AHCLSK505A Develop production plans for livestock .....	3335
AHCLSK506A Design livestock effluent systems.....	3340
AHCMER301A Process customer complaints .....	3345
AHCMER302A Provide advice on hardware products.....	3350
AHCMER303A Sell products and services .....	3355
AHCMER401A Coordinate customer service and networking activities .....	3360
AHCMER402A Provide advice and sell machinery .....	3366
AHCMER403A Provide advice and sell farm chemicals .....	3371
AHCMER404A Provide advice on agronomic products .....	3377
AHCMER405A Provide advice on livestock products .....	3383
AHCMER406A Provide information on fertilisers and soil ameliorants.....	3388
AHCMER501A Develop a sales strategy for rural products .....	3394
AHCMKH301A Carry out minor service of milking equipment.....	3399
AHCMKH303A Service and repair milking equipment .....	3404
AHCMKH304A Monitor and provide advice on cleaning milking machines.....	3410
AHCMKH305A Mechanically test milking machines.....	3416
AHCMKH401A Carry out cleaning-time tests of milking machines.....	3422
AHCMKH402A Design and fabricate milking equipment installations .....	3427
AHCMKH403A Design and install on-farm milk cooling and storage.....	3432
AHCMKH404A Install milking equipment .....	3438
AHCMKH405A Performance test milking machines.....	3445
AHCMOM101A Assist with routine maintenance of machinery and equipment.....	3450
AHCMOM201A Operate two wheel motorbikes .....	3455
AHCMOM202A Operate tractors .....	3461
AHCMOM203A Operate basic machinery and equipment.....	3466
AHCMOM204A Undertake operational maintenance of machinery .....	3472
AHCMOM205A Operate vehicles .....	3478
AHCMOM206A Conduct grader operations .....	3483
AHCMOM207A Conduct front-end loader operations.....	3488
AHCMOM208A Conduct excavator operations .....	3493
AHCMOM209A Conduct dozer operations.....	3498
AHCMOM210A Conduct scraper operations.....	3503
AHCMOM211A Operate side by side utility vehicles .....	3508
AHCMOM212A Operate quad bikes.....	3513
AHCMOM301A Coordinate machinery and equipment maintenance and repair .....	3519
AHCMOM302A Perform machinery maintenance.....	3525
AHCMOM304A Operate machinery and equipment .....	3531
AHCMOM305A Operate specialised machinery and equipment.....	3537
AHCMOM306A Ground spread fertiliser and soil ameliorant .....	3543
AHCMOM307A Operate a cane harvester.....	3549
AHCMOM308A Operate broadacre and row crop harvest machinery and equipment.....	3554
AHCMOM309A Operate broadacre sowing machinery and equipment.....	3559
AHCMOM310A Operate land-forming machinery and equipment.....	3564
AHCMOM311A Operate precision control technology .....	3569

AHCMOM312A Operate row crop planting and seeding machinery and equipment	3574
AHCMOM313A Operate mobile irrigation machinery and equipment	3579
AHCMOM314A Transport machinery	3584
AHCMOM315A Operate chemical application machinery and equipment	3589
AHCMOM401A Conduct major repair and overhaul of machinery and equipment	3595
AHCMOM402A Supervise maintenance of property machinery and equipment	3601
AHCMOM501A Manage machinery and equipment	3607
AHCMOM502A Implement a machinery management system	3613
AHCMOM601A Analyse machinery options	3618
AHCNAR101A Support natural area conservation	3623
AHCNAR102A Support native seed collection	3629
AHCNAR201A Carry out natural area restoration works	3635
AHCNAR202A Maintain wildlife habitat refuges	3641
AHCNAR301A Maintain natural areas	3647
AHCNAR302A Collect and preserve biological samples	3652
AHCNAR303A Implement revegetation works	3658
AHCNAR304A Undertake direct seeding	3664
AHCNAR401A Supervise natural area restoration works	3670
AHCNAR402A Plan the implementation of revegetation works	3676
AHCNAR501A Manage natural areas on a rural property	3682
AHCNAR502A Conduct biological surveys	3688
AHCNAR503A Design a natural area restoration project	3694
AHCNAR504A Manage natural area restoration programs	3700
AHCNAR505A Plan river restoration works	3706
AHCNAR506A Develop and implement sustainable land use strategies	3711
AHCNRM501A Develop a coastal rehabilitation strategy	3717
AHCNRM502A Develop a water quality monitoring program	3724
AHCNRM503A Support the implementation of waterways strategies	3731
AHCNRM504A Interpret and report on catchment hydrology	3738
AHCNRM505A Provide technical advice on sustainable catchment management	3745
AHCNRM506A Plan and monitor works projects in catchments and waterways	3752
AHCNRM507A Manipulate and analyse data within geographic information systems	3759
AHCNSY101A Support nursery work	3764
AHCNSY201A Pot up plants	3769
AHCNSY202A Tend nursery plants	3775
AHCNSY203A Undertake propagation activities	3780
AHCNSY204A Maintain indoor plants	3786
AHCNSY301A Maintain nursery plants	3791
AHCNSY302A Receive and dispatch nursery products	3796
AHCNSY303A Install and maintain plant displays	3801
AHCNSY304A Deliver and promote sales of plants	3807
AHCNSY305A Prepare specialised plants	3813
AHCNSY306A Implement a propagation plan	3818
AHCNSY307A Operate fertigation equipment	3824
AHCNSY401A Plan a growing-on program	3829
AHCNSY402A Plan a propagation program	3834
AHCOHS101A Work safely	3840
AHCOHS201A Participate in OHS processes	3845
AHCOHS301A Contribute to OHS processes	3851
AHCOHS401A Maintain occupational health and safety (OHS) processes	3857
AHCOHS501A Manage Occupational Health and Safety (OHS) processes	3863
AHCORG101A Support organic production	3871
AHCORG401A Manage biodynamic production	3876

<b>AHCORG402A Manage organic livestock production.....</b>	<b>3883</b>
<b>AHCORG403A Manage organic soil improvement .....</b>	<b>3889</b>
<b>AHCORG404A Arrange selling through community based marketing .....</b>	<b>3895</b>
<b>AHCORG405A Implement sustainable practices in the organic farm based business ..</b>	<b>3902</b>
<b>AHCORG406A Oversee compliance with an organic certification scheme .....</b>	<b>3908</b>
<b>AHCORG501A Develop an organic management plan.....</b>	<b>3915</b>
<b>AHCORG502A Prepare the enterprise for organic certification .....</b>	<b>3921</b>
<b>AHCORG503A Design and document an organic farm landscape .....</b>	<b>3927</b>
<b>AHCORG504A Develop and manage a community based marketing supply chain .....</b>	<b>3934</b>
<b>AHCORG505A Develop and monitor a sustainable production plan .....</b>	<b>3942</b>
<b>AHCORG506A Manage an agro-ecology production system.....</b>	<b>3948</b>
<b>AHCP201A Recognise plants.....</b>	<b>3954</b>
<b>AHCP202A Collect, prepare and preserve plant specimens .....</b>	<b>3959</b>
<b>AHCP301A Implement a plant nutrition program .....</b>	<b>3964</b>
<b>AHCP302A Provide information on plants and their culture .....</b>	<b>3970</b>
<b>AHCP303A Identify plant specimens .....</b>	<b>3976</b>
<b>AHCP401A Recommend plants and cultural practices.....</b>	<b>3982</b>
<b>AHCP402A Develop a soil health and plant nutrition program.....</b>	<b>3988</b>
<b>AHCP501A Diagnose plant health problems .....</b>	<b>3994</b>
<b>AHCP502A Collect and classify plants .....</b>	<b>4000</b>
<b>AHCP503A Specify plants for landscapes .....</b>	<b>4005</b>
<b>AHCP504A Design and maintain a specialised landscape.....</b>	<b>4011</b>
<b>AHCP505A Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs.....</b>	<b>4018</b>
<b>AHCP601A Develop and implement a plant health management strategy.....</b>	<b>4027</b>
<b>AHCPGD101A Support gardening work.....</b>	<b>4034</b>
<b>AHCPGD201A Plant trees and shrubs .....</b>	<b>4040</b>
<b>AHCPGD202A Prepare and maintain plant displays .....</b>	<b>4045</b>
<b>AHCPGD203A Prune shrubs and small trees.....</b>	<b>4050</b>
<b>AHCPGD204A Transplant small trees.....</b>	<b>4055</b>
<b>AHCPGD205A Prepare a grave site .....</b>	<b>4061</b>
<b>AHCPGD206A Conduct visual inspection of park facilities.....</b>	<b>4066</b>
<b>AHCPGD301A Implement a plant establishment program .....</b>	<b>4072</b>
<b>AHCPGD302A Plan and maintain plant displays.....</b>	<b>4078</b>
<b>AHCPGD303A Perform specialist amenity pruning.....</b>	<b>4083</b>
<b>AHCPGD304A Implement a landscape maintenance program .....</b>	<b>4089</b>
<b>AHCPGD305A Conduct operational inspection of park facilities .....</b>	<b>4094</b>
<b>AHCPGD306A Implement a maintenance program for an aquatic environment.....</b>	<b>4099</b>
<b>AHCPGD401A Design plant displays .....</b>	<b>4104</b>
<b>AHCPGD402A Plan a plant establishment program .....</b>	<b>4109</b>
<b>AHCPGD501A Manage plant cultural practices .....</b>	<b>4115</b>
<b>AHCPGD502A Plan the restoration of parks and gardens .....</b>	<b>4121</b>
<b>AHCPGD503A Manage parks and reserves .....</b>	<b>4127</b>
<b>AHCPGD504A Develop and implement a streetscape management plan .....</b>	<b>4134</b>
<b>AHCPGD505A Conduct comprehensive inspection of park facilities .....</b>	<b>4140</b>
<b>AHCPHT101A Support horticultural production .....</b>	<b>4146</b>
<b>AHCPHT201A Plant horticultural crops.....</b>	<b>4152</b>
<b>AHCPHT202A Carry out canopy maintenance .....</b>	<b>4157</b>
<b>AHCPHT203A Support horticultural crop harvesting .....</b>	<b>4162</b>
<b>AHCPHT204A Undertake field budding and grafting .....</b>	<b>4168</b>
<b>AHCPHT205A Carry out postharvest operations.....</b>	<b>4174</b>
<b>AHCPHT206A Handle and move mushroom boxes.....</b>	<b>4181</b>
<b>AHCPHT207A Perform mushroom substrate process tasks.....</b>	<b>4187</b>

AHCPHT208A Water mushroom crops .....	4193
AHCPHT209A Produce trellis dried grapes .....	4199
AHCPHT301A Carry out a crop regulation program .....	4204
AHCPHT302A Coordinate horticultural crop harvesting .....	4209
AHCPHT303A Implement a post-harvest program.....	4215
AHCPHT304A Harvest horticultural crops mechanically .....	4221
AHCPHT305A Regulate crops .....	4226
AHCPHT306A Establish horticultural crops.....	4232
AHCPHT307A Prepare raw materials and compost the feedstocks.....	4238
AHCPHT308A Prepare value added compost-based products .....	4244
AHCPHT309A Supervise mushroom substrate preparation .....	4250
AHCPHT401A Assess olive oil for style and quality .....	4256
AHCPHT402A Develop a crop regulation program .....	4261
AHCPHT403A Develop harvesting and processing specifications to produce an olive oil.....	4267
AHCPHT404A Implement and monitor a horticultural crop harvesting program .....	4273
AHCPHT405A Manage mushroom substrate preparation .....	4279
AHCPHT406A Control Phase II mushroom substrate process.....	4286
AHCPHT407A Manage mushroom crop development.....	4292
AHCPHT408A Oversee vineyard practices .....	4299
AHCPHT502A Develop a horticultural production plan.....	4305
AHCPHT503A Manage a controlled growing environment.....	4312
AHCPHT504A Develop a grape production plan .....	4318
AHCPHT505A Evaluate wine.....	4326
AHCPHT506A Manage a wine making process.....	4336
AHCPLY201A Collect store and handle eggs from breeder flocks .....	4347
AHCPLY202A Maintain health and welfare of poultry .....	4353
AHCPLY203A Set up shed for placement of day-old chickens .....	4359
AHCPLY204A Collect and pack eggs for human consumption .....	4365
AHCPLY301A Artificially inseminate birds.....	4371
AHCPLY302A Brood poultry .....	4376
AHCPLY303A Identify and sex birds.....	4382
AHCPLY304A Incubate eggs .....	4388
AHCPLY305A Beak trim chickens.....	4395
AHCPLY306A Clean and fumigate intensive production sheds.....	4400
AHCPLY401A Supervise free-range poultry operations .....	4406
AHCPMG201A Treat weeds.....	4413
AHCPMG202A Treat plant pests, diseases and disorders .....	4418
AHCPMG301A Control weeds .....	4423
AHCPMG302A Control plant pests, diseases and disorders .....	4428
AHCPMG303A Maintain biological cultures.....	4434
AHCPMG304A Release biological agents .....	4439
AHCPMG401A Define the pest problem in a local area .....	4444
AHCPMG402A Develop a pest management action plan within a local area.....	4450
AHCPMG403A Develop monitoring procedures for the local pest management strategy.....	4456
AHCPMG404A Coordinate the local pest management strategy .....	4461
AHCPMG405A Implement pest management action plans .....	4467
AHCPMG406A Investigate a reported pest treatment failure .....	4473
AHCPMG407A Monitor and evaluate the local pest management action plan.....	4478
AHCPMG408A Assess and monitor weed, pest and/or disease control programs.....	4483
AHCPMG501A Coordinate the pest management strategy in a regional or broader context.....	4490
AHCPMG502A Define the pest problem in a regional or broader context .....	4496
AHCPMG503A Develop a strategy for the management of target pests .....	4502

AHCPMG504A Develop a system for monitoring the pest management strategy .....	4509
AHCPMG505A Evaluate the pest management strategy .....	4515
AHCPMG506A Manage the implementation of legislation.....	4521
AHCPMG601A Develop a plant pest survey strategy .....	4526
AHCPMG602A Develop a plant pest destruction strategy.....	4533
AHCPRK201A Care for health and welfare of pigs .....	4540
AHCPRK202A Care for weaner and grower pigs.....	4546
AHCPRK203A Move and handle pigs .....	4552
AHCPRK301A Pregnancy test pigs .....	4557
AHCPRK302A Treat rectal prolapse in pigs .....	4562
AHCPRK303A Artificially inseminate pigs .....	4567
AHCPRK304A Mate pigs and monitor dry sow performance .....	4572
AHCPRK401A Implement a feeding strategy for pig production .....	4577
AHCSAW201A Conduct erosion and sediment control activities .....	4583
AHCSAW301A Construct conservation earthworks .....	4588
AHCSAW302A Implement erosion and sediment control measures .....	4593
AHCSAW401A Set out conservation earthworks .....	4598
AHCSAW402A Supervise on-site implementation of conservation earthworks .....	4603
AHCSAW501A Design control measures and structures .....	4608
AHCSAW502A Plan erosion and sediment control measures.....	4613
AHCSAW503A Plan conservation earthworks .....	4619
AHCSDP301A Undertake preparation of land for seed crop production .....	4625
AHCSDP302A Establish seed crops.....	4630
AHCSDP303A Maintain seed crops.....	4635
AHCSDP304A Harvest seed crops.....	4640
AHCSDP401A Plan a seed crop establishment program .....	4646
AHCSDP402A Supervise seed crop establishment.....	4651
AHCSDP403A Plan and implement seed crop maintenance .....	4656
AHCSDP404A Supervise seed crop harvesting.....	4661
AHCSDP405A Inspect a seed crop for quality assurance purposes .....	4666
AHCSDT301A Prepare a working sample .....	4671
AHCSDT302A Identify seeds.....	4675
AHCSDT303A Perform a fluorescence test on seeds .....	4679
AHCSDT304A Perform a seed purity analysis .....	4683
AHCSDT305A Perform a seed moisture test.....	4687
AHCSDT306A Perform a seed germination test.....	4691
AHCSDT307A Perform a 'Determination of Other Seeds by Number' test.....	4695
AHCSDT401A Maintain a quarantine approved laboratory .....	4699
AHCSDT402A Prepare and maintain a seed reference collection.....	4703
AHCSDT403A Perform an Anguina test on annual ryegrass seed.....	4707
AHCSDT404A Develop and implement laboratory policy and procedures.....	4711
AHCSDT405A Handle & store quarantinable seeds.....	4715
AHCSDT406A Undertake internal audits in a seed laboratory .....	4719
AHCSDT407A Perform an endophytic seed test.....	4724
AHCSDT408A Perform an electrophoresis test on a seed sample .....	4728
AHCSDT409A Perform a tetrazolium seed viability test.....	4732
AHCSDT410A Perform a seed vigour test.....	4736
AHCSDT411A Perform a 1000 seed weight test .....	4741
AHCSHG101A Undertake basic shearing and crutching.....	4745
AHCSHG201A Crutch sheep.....	4750
AHCSHG202A Assist in preparing for shearing and crutching.....	4756
AHCSHG203A Shear sheep to novice level.....	4761
AHCSHG204A Shear sheep to improver level.....	4766

AHCSHG205A Grind combs and cutters for machine shearing .....	4772
AHCSHG206A Prepare handpiece and downtube for machine shearing.....	4777
AHCSHG207A Shear goats .....	4782
AHCSHG208A Shear alpacas.....	4788
AHCSHG209A Support alpaca shearing operations.....	4794
AHCSHG301A Prepare livestock for shearing .....	4799
AHCSHG302A Prepare combs and cutters for machine shearing .....	4804
AHCSHG303A Maintain and service shearing handpieces.....	4809
AHCSHG304A Shear sheep to professional level.....	4814
AHCSHG305A Maintain consistent shearing performance .....	4819
AHCSHG306A Carry out post-shearing procedures .....	4824
AHCSHG307A Plan and prepare for alpaca shearing .....	4829
AHCSHG401A Apply advanced shearing techniques .....	4835
AHCSHG402A Conduct equipment experting for machine shearing .....	4840
AHCSHG403A Account for shearing shed supplies.....	4844
AHCSHG404A Manage shearing and crutching operations .....	4848
AHCSHG405A Arrange employment for shearing operations .....	4854
AHCSHG406A Prepare shearing team wages .....	4859
AHCSHG407A Oversee and instruct shed staff.....	4864
AHCSOL201A Determine basic properties of soil and/or growing media.....	4870
AHCSOL301A Prepare growing media.....	4875
AHCSOL302A Construct a soil profile .....	4880
AHCSOL401A Sample soils and interpret results .....	4886
AHCSOL402A Develop a soil use map for a property .....	4892
AHCSOL403A Prepare acid sulphate soil management plans .....	4898
AHCSOL404A Supervise acid sulphate soil remediation and management projects ...	4904
AHCSOL501A Monitor and manage soils for production .....	4909
AHCSPO301A Operate a screen cleaner for seed processing.....	4915
AHCSPO302A Operate an indent cylinder.....	4920
AHCSPO303A Operate a gravity table.....	4925
AHCSPO304A Operate seed modification machinery .....	4930
AHCSPO305A Operate seed treatment machinery.....	4935
AHCSPO306A Operate specialised seed processing machinery .....	4941
AHCSPO307A Handle, package and store commercial quantities of seed.....	4946
AHCSPO308A Sample seed before and after processing .....	4951
AHCTEQ301A Install and terminate extra low voltage wiring systems.....	4956
AHCTRF101A Support turf work .....	4962
AHCTRF201A Assist with turf construction .....	4968
AHCTRF202A Prepare turf surfaces for play .....	4974
AHCTRF203A Renovate grassed areas .....	4980
AHCTRF204A Support turf establishment .....	4986
AHCTRF301A Construct turf playing surfaces.....	4993
AHCTRF302A Establish turf .....	5000
AHCTRF303A Implement a grassed area maintenance program.....	5006
AHCTRF304A Monitor turf health.....	5011
AHCTRF305A Renovate sports turf.....	5017
AHCTRF401A Develop a sports turf maintenance program .....	5022
AHCTRF402A Plan and implement sports turf renovation.....	5028
AHCTRF501A Plan the establishment of sports turf playing surfaces.....	5034
AHCTRF502A Manage sports turf renovation programs.....	5040
AHCTRF503A Develop sports turf management programs .....	5045
AHCTRF504A Manage sports turf facility assets .....	5049
AHCVPT201A Clear features that harbour pest animals .....	5053

AHCVPT202A Muster pest animals .....	5059
AHCVPT203A Use fire arms to humanely destroy animals.....	5065
AHCVPT302A Implement vertebrate pest control program .....	5071
AHCVPT303A Survey pest animals .....	5076
AHCVPT304A Conduct vertebrate pest activities from aircraft .....	5081
AHCVPT305A Tag and locate Judas animals.....	5086
AHCVPT306A Apply animal trapping techniques .....	5091
AHCWAT201A Set up, operate and maintain water delivery systems for compost.....	5097
AHCWAT301A Monitor and operate water treatment processes.....	5103
AHCWAT501A Design water treatment systems.....	5108
AHCWAT502A Manage water systems.....	5114
AHCWOL101A Support woolshed activities .....	5120
AHCWOL201A Pen sheep.....	5126
AHCWOL202A Perform board duties .....	5131
AHCWOL203A Carry out wool pressing .....	5138
AHCWOL204A Undertake basic skirting of alpaca fleece.....	5144
AHCWOL301A Appraise wool using industry descriptions .....	5149
AHCWOL303A Prepare wool based on its characteristics .....	5154
AHCWOL304A Prepare fleece wool for classing.....	5159
AHCWOL305A Prepare skirtings and oddments.....	5164
AHCWOL306A Supervise clip preparation.....	5169
AHCWOL307A Document a wool clip .....	5175
AHCWOL308A Prepare facilities for shearing and crutching.....	5180
AHCWOL310A Press wool for a clip.....	5185
AHCWOL311A Perform shed duties.....	5191
AHCWOL312A Class goat fibre.....	5198
AHCWOL313A Class alpaca fleece .....	5203
AHCWOL401A Determine wool classing strategies .....	5209
AHCWOL402A Use individual fleece measurements to prepare wool for sale .....	5215
AHCWOL403A Prepare for, implement and review wool harvesting, clip preparation and classing .....	5220
AHCWOL404A Establish work routines and manage wool harvesting and preparation staff.....	5226
AHCWOL405A Class fleece wool.....	5233
AHCWRK101A Maintain the workplace .....	5239
AHCWRK201A Observe and report on weather.....	5245
AHCWRK202A Observe environmental work practices .....	5250
AHCWRK203A Operate in isolated and remote situations .....	5255
AHCWRK204A Work effectively in the industry .....	5261
AHCWRK205A Participate in workplace communications .....	5267
AHCWRK206A Observe enterprise quality assurance procedures .....	5272
AHCWRK207A Collect and record production data.....	5277
AHCWRK208A Provide information on products and services.....	5282
AHCWRK209A Participate in environmentally sustainable work practices.....	5287
AHCWRK301A Collect samples for a rural production or horticulture monitoring program.....	5293
AHCWRK302A Monitor weather conditions .....	5299
AHCWRK303A Respond to emergencies .....	5304
AHCWRK304A Respond to rescue incidents .....	5311
AHCWRK305A Coordinate work site activities .....	5317
AHCWRK306A Comply with industry quality assurance requirements .....	5322
AHCWRK307A Develop and apply fertiliser and soil ameliorant product knowledge .....	5327
AHCWRK308A Handle bulk materials in storage area.....	5332

AHCWRK310A Provide on-job training support.....	5339
AHCWRK311A Conduct site inspections .....	5344
AHCWRK313A Implement and monitor environmentally sustainable work practices	5350
AHCWRK401A Implement and monitor quality assurance procedures.....	5359
AHCWRK402A Provide information on issues and policies .....	5364
AHCWRK403A Supervise work routines and staff performance .....	5369
AHCWRK404A Ensure compliance with pest legislation .....	5375
AHCWRK501A Plan, implement and review a quality assurance program .....	5380
AHCWRK502A Collect and manage data .....	5385
AHCWRK503A Prepare reports .....	5391
AHCWRK504A Assess new industry developments .....	5397
AHCWRK505A Manage trial and/or research material.....	5402
AHCWRK507A Implement professional practice .....	5407
AHCWRK508A Interpret legislation.....	5413
AHCWRK509A Provide specialist advice to clients.....	5420
AHCWRK510A Audit site operations .....	5426
AHCWRK511A Develop workplace policy and procedures for sustainability .....	5432
AHCWRK601A Monitor projects in a program.....	5439
AHCWRK602A Lead and manage community or industry organisations .....	5444
AHCWRK603A Design and conduct a field-based research trial .....	5450
BSBADM504B Plan or review administrative systems .....	5456
BSBCMM401A Make a presentation.....	5463
BSBCUS301B Deliver and monitor a service to customers .....	5470
BSBCUS501C Manage quality customer service .....	5477
BSBDES403A Develop and extend design skills and practice .....	5483
BSBDES501A Implement design solutions .....	5490
BSBDES502A Establish, negotiate and refine a design brief.....	5497
BSBFIA301A Maintain financial records .....	5505
BSBFIA402A Report on financial activity .....	5512
BSBFIM501A Manage budgets and financial plans.....	5520
BSBHRM402A Recruit, select and induct staff.....	5528
BSBHRM506A Manage recruitment selection and induction processes.....	5534
BSBHRM604A Manage employee relations.....	5541
BSBINM201A Process and maintain workplace information .....	5548
BSBINM401A IMPLEMENT WORKPLACE INFORMATION SYSTEM .....	5554
BSBITU203A Communicate electronically .....	5560
BSBITU306A Design and produce business documents .....	5567
BSBITU404A Produce complex desktop published documents.....	5574
BSBMGT402A Implement operational plan.....	5582
BSBMGT617A Develop and implement a business plan.....	5589
BSBPRO301A Recommend products and services .....	5595
BSBREL402A Build client relationships and business networks.....	5602
BSBRES401A Analyse and present research information .....	5610
BSBRISK401A Identify risk and apply risk management processes .....	5618
BSBRISK501B Manage risk .....	5625
BSBSLS402A Identify sales prospects .....	5631
BSBSMB403A Market the small business.....	5637
BSBSMB405B Monitor and manage small business operations .....	5644
BSBSMB406A Manage small business finances.....	5650
BSBSUS301A Implement and monitor environmentally sustainable work practices ....	5657
BSB WHS302A Apply knowledge of WHS legislation in the workplace .....	5667
BSB WHS503A Contribute to the systematic management of WHS risk.....	5673
BSB WHS508A Manage WHS hazards associated with plant.....	5682

BSB WOR204A Use business technology.....	5692
BSB WOR402A Promote team effectiveness.....	5699
BSB WOR404B Develop work priorities .....	5706
BSB WOR501B Manage personal work priorities and professional development .....	5713
CHCCD404E Develop and implement community programs .....	5719
CPCCCM2010B Work safely at heights .....	5728
CPCCCM3001C Operate elevated work platforms .....	5736
CPCCCM3003A Work safely around power sources, services and assets.....	5747
CPCCCO3001A Perform dogging .....	5757
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry .....	5769
CPCPCM2007A Carry out levelling .....	5783
CPCPCM2014A Carry out simple concreting and rendering .....	5792
CPCPIG2011A Design domestic urban irrigation systems.....	5802
CPCPWT3007A Connect irrigation systems from drinking water supply .....	5812
CPPFES2005A Demonstrate first attack firefighting equipment.....	5822
CPPSIS4005A Collect basic GPS data .....	5828
CPPWMT5043A Develop and implement an environmental management strategy.....	5837
CPPWMT5045A Develop site safety plans.....	5848
CULATS501A Work with Aboriginal and Torres Strait Islander cultural material.....	5857
CULCNM303A Move and store collection material.....	5864
CULCNM503A Manage the development of collections .....	5871
CULCNM602A Develop and monitor procedures for the movement and storage of collection material.....	5879
CULMS002B Research and evaluate Aboriginal or Torres Strait Islander cultural material .....	5886
CULMS010B Contribute to the preservation of cultural material.....	5895
CUVACD302A Produce computer-aided drawings .....	5902
CUVACD303A Produce technical drawings .....	5907
FDFFS2001A Implement the food safety program and procedures .....	5913
FDFFS3001A Monitor the implementation of quality and food safety programs .....	5922
FDFGPS2011A Operate a creamed honey manufacture process .....	5933
FDFGR3002A Demonstrate knowledge of animal nutrition principles.....	5942
FDFOP2003A Clean equipment in place .....	5947
FDFOP2004A Clean and sanitise equipment.....	5955
FDFOP2012A Maintain food safety when loading, unloading and transporting food...	5962
FDFOP2013A Apply sampling procedures .....	5969
FDFOP2016A Work in a food handling area for non-food handlers.....	5975
FDFOP2023A Operate a packaging process.....	5981
FDFOP2038A Operate a grinding process.....	5990
FDFTEC3001A Participate in a HACCP team.....	5999
FDFWGG2001A Bench graft vines.....	6007
FDFWGG2002A Carry out potting operations .....	6014
FDFWGG2003A Hand prune vines.....	6022
FDFWGG2005A Maintain callusing environment.....	6028
FDFWGG2006A Obtain and process rootlings.....	6037
FDFWGG2008A Train vines .....	6046
FDFWGG2009A Operate specialised canopy management equipment.....	6052
FDFWGG2010A Field graft vines .....	6060
FDFWGG2013A Deliver injection requirements .....	6067
FDFWGG2015A Support mechanical harvesting operations.....	6074
FDFWGG2016A Install and maintain vine trellis .....	6082
FDFWGG2018A Operate vineyard equipment.....	6089

<b>FDFWGG2020A Carry out hot water treatment</b> .....	<b>6096</b>
<b>FDFWGG2021A Operate nursery cold storage facilities</b> .....	<b>6103</b>
<b>FDFWGG2022A Take and process vine cuttings</b> .....	<b>6110</b>
<b>FDFWGG3002A Coordinate canopy management activities</b> .....	<b>6118</b>
<b>FDFWGG3004A Coordinate nursery activities</b> .....	<b>6126</b>
<b>FDFWGG3005A Perform field nursery activities</b> .....	<b>6133</b>
<b>FDFWGG3006A Coordinate hand pruning activities</b> .....	<b>6140</b>
<b>FDFWGG3009A Monitor and maintain nursery plants</b> .....	<b>6148</b>
<b>FDFWGG3010A Implement a soil management program</b> .....	<b>6156</b>
<b>FDFWGG3011A Perform shed nursery activities</b> .....	<b>6163</b>
<b>FNSFMK512A Apply knowledge of emissions markets</b> .....	<b>6171</b>
<b>FPICOT2221B Trim and cross cut felled trees</b> .....	<b>6177</b>
<b>FPICOT2234B Operate 4x4 vehicle</b> .....	<b>6179</b>
<b>FPICOT3202B Navigate in remote or trackless areas</b> .....	<b>6188</b>
<b>FPIFGM2201B Collect seed</b> .....	<b>6198</b>
<b>FPIFGM2208A Fall trees manually (basic)</b> .....	<b>6208</b>
<b>FPIFGM3201B Manage seed collection</b> .....	<b>6218</b>
<b>FPIFGM3202B Extract seed</b> .....	<b>6229</b>
<b>FPIFGM3204A Fall trees manually (intermediate)</b> .....	<b>6238</b>
<b>FPIFGM3205A Fall trees manually (advanced)</b> .....	<b>6248</b>
<b>FPIHAR2206B Operate a mobile chipper/mulcher</b> .....	<b>6258</b>
<b>HLTFA201A Provide basic emergency life support</b> .....	<b>6268</b>
<b>HLTFA301C Apply first aid</b> .....	<b>6276</b>
<b>HLTFA302C Provide first aid in remote situation</b> .....	<b>6287</b>
<b>LGACOM502B Devise and conduct community consultations</b> .....	<b>6295</b>
<b>LGALAND504A Undertake effective consultation with Indigenous people on matters of cultural heritage</b> .....	<b>6301</b>
<b>LGAPLEM508A Manipulate and analyse data within geographic information systems</b> .....	<b>6307</b>
<b>LGAREGS305A Undertake animal or reptile control duties</b> .....	<b>6312</b>
<b>MEM05004C Perform routine oxy acetylene welding</b> .....	<b>6318</b>
<b>MEM05007C Perform manual heating and thermal cutting</b> .....	<b>6324</b>
<b>MEM05012C Perform routine manual metal arc welding</b> .....	<b>6330</b>
<b>MEM05015D Weld using manual metal arc welding process</b> .....	<b>6335</b>
<b>MEM05017D Weld using gas metal arc welding process</b> .....	<b>6343</b>
<b>MEM05019D Weld using gas tungsten arc welding process</b> .....	<b>6351</b>
<b>MEM05049B Perform routine gas tungsten arc welding</b> .....	<b>6359</b>
<b>MEM05050B Perform routine gas metal arc welding</b> .....	<b>6365</b>
<b>MEM05051A Select welding processes</b> .....	<b>6371</b>
<b>MEM05052A Apply safe welding practices</b> .....	<b>6377</b>
<b>MEM12023A Perform engineering measurements</b> .....	<b>6386</b>
<b>MEM18001C Use hand tools</b> .....	<b>6392</b>
<b>MEM18002B Use power tools/hand held operations</b> .....	<b>6398</b>
<b>MSL904001A Perform standard calibrations</b> .....	<b>6404</b>
<b>MSL913002A Plan and conduct laboratory/field work</b> .....	<b>6416</b>
<b>MSL922001A Record and present data</b> .....	<b>6426</b>
<b>MSL924001A Process and interpret data</b> .....	<b>6435</b>
<b>MSL924002A Use laboratory application software</b> .....	<b>6446</b>
<b>MSL933001A Maintain the laboratory/field workplace fit for purpose</b> .....	<b>6454</b>
<b>MSL933004A Perform calibration checks on equipment and assist with its maintenance</b> .....	<b>6467</b>
<b>MSL934002A Apply quality system and continuous improvement processes</b> .....	<b>6476</b>
<b>MSL934003A Maintain and control stocks</b> .....	<b>6488</b>
<b>MSL973007A Perform microscopic examination</b> .....	<b>6498</b>
<b>NWP203B Plan and organise personal work activities</b> .....	<b>6511</b>

NWP209B Use maps, plans, drawings and specifications .....6516

NWP210B Perform basic water quality tests .....6522

NWP215B Install and replace basic volumetric metering equipment.....6528

NWP222A Operate basic flow control and regulating devices in irrigation systems .....6533

NWP226B Prepare and restore work site .....6539

NWP251B Construct open earthen channels or drains .....6545

NWP252B Construct and install irrigation delivery and stormwater drainage assets ...6551

NWP302A Install meters for non-potable, non-urban water supplies.....6557

NWP304A Maintain meters for non-potable, non-urban water supplies.....6563

NWP305B Monitor and conduct minor maintenance on complex flow control and  
metering devices .....6569

NWP316B Monitor and schedule water deliveries .....6575

NWP362B Monitor, operate and control reclaimed water irrigation.....6580

NWP401B Coordinate and monitor the application of environmental plans and  
procedures .....6589

NWP410C Coordinate and monitor asset construction and maintenance .....6597

NWP425B Coordinate and monitor the operation of irrigation delivery systems.....6605

NWP512B Implement and manage catchment management plan.....6611

NWP513B Develop and review catchment management plan.....6617

NWP516B Implement and manage surface water management plan.....6623

NWP517B Develop and review surface water management plan.....6629

NWP518B Prepare and report on data related to flood mitigation.....6635

NWP519B Develop and report flood mitigation.....6640

PSPPM402B Manage simple projects.....6645

PSPPM502B Manage complex projects .....6654

PSPPM503B Close complex projects .....6663

PSPPOL404A Support policy implementation.....6671

PSPPOL603A Manage policy implementation.....6676

PUACOM012B Liaise with media at a local level .....6681

PUAEMR026 Treat operational risk .....6688

PUAEMR027 Assess operational risk.....6694

PUAFIR201B Prevent injury .....6700

PUAFIR204B Respond to wildfire .....6708

PUAFIR303B Suppress wildfire .....6716

PUAFIR406B Develop prescribed burning plans .....6726

PUAFIR407B Conduct prescribed burning .....6732

PUAFIR601B Develop and administer agency policy, procedures and practices .....6739

PUALAW001B Protect and preserve incident scene.....6745

PUAOPE004B Conduct briefings/debriefings.....6753

## Preliminary Information

### Important Note to Users

Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

### Check the version number before commencing training or assessment

This Training Package is Version 6 - check whether this is the latest version by going to the National Training Information Service ([www.ntis.gov.au](http://www.ntis.gov.au)) and locating information about the Training Package. Alternatively, contact AgriFood Skills Australia at <http://www.agrifoodskills.net.au> to confirm the latest version number.

### Explanation of version number conventions

The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Packages national code (which remains the same during its period of endorsement).

## History

The AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package is the result of merging three training packages and orphaned common units:

- RTD02 Conservation and Land Management
- RTE03 Rural Production
- RTF03 Amenity Horticulture
- ZZZ00 RTC common units

During 2006 AgriFood Skills Australia conducted a feasibility study to investigate the potential of merging the three Training Packages into one. The subsequent outcome of the study was the AgriFood Board's approval to merge the Training Packages.

From the beginning of the project the concerns of the wide and varied stakeholder groups were considered to be the major focus of achieving the merged Training Package. In regard to the stakeholder needs it was clear that the qualification framework in particular, the packaging rules would need to cater for the diverse sectors.

Significant design work was undertaken to confirm a model for the qualifications that were identified for the merged package.

At the same time as the initial project work began to merge the packages the Training Package Review Phase 1 reports were completed for the three packages.

Another complication for the merged package was the requirement to respond to a number of national project findings relating to improving the understanding and application of the products and developed under the banner of Training Packages.

AgriFood considered a number options and adopted the decision to 'go bold' with a strategy to

- improve the clarity of competency standards
- increase the flexibility and job related outcomes with qualifications
- develop a model to support Training Packages implementation.

As a consequence the project initiatives shifted the focus from the endorsed components of the Training Package to include implementation products and systems as a means to improve the outcomes of industry training requirements.

The AHC10 Training Package is the result of this intensive focus to consolidate this package to represent a "fit for purpose" package that is well positioned to accommodate appropriate continuous improvement into the future.

The endorsement of the AHC10 Training Package that incorporates contemporary design is just one of the key outcomes of this project. The most significant achievement is the shift in thinking by many stakeholders to include a wider range of issues when they are considering the needs of industry relating to Training Packages.

## Full List of Units of Competency including Imported Units

### AHC10v6 Units of Competency and their Pre-Requisite Requirements

Code	Title	Pre-Requisite
AHCAGB301A	Keep records for a primary production business	
AHCAGB401A	Implement and monitor a property improvement plan	
AHCAGB402A	Analyse and interpret production data	
AHCAGB501A	Develop climate risk management strategies	
AHCAGB502A	Plan and manage infrastructure requirements	
AHCAGB503A	Plan and monitor production processes	
AHCAGB504A	Plan production for the whole land/farm based business	
AHCAGB505A	Develop a whole farm plan	

AHCAGB601A	Develop export markets for produce	
AHCAGB602A	Manage estate planning	
AHCAGB603A	Manage the production system	
AHCAGB604A	Analyse business performance	
AHCAGB605A	Manage business capital	
AHCAGB606A	Manage price risk through trading strategy	
AHCAIS201A	Assist with artificial insemination procedures	
AHCAIS301A	Collect semen	
AHCAIS302A	Process and store semen	
AHCAIS303A	Artificially inseminate livestock	
AHCAIS401A	Supervise artificial breeding and/or embryo transfer programs	
AHCARB201A	Apply a range of treatments to trees	
AHCARB202A	Fell small trees	
AHCARB203A	Perform above ground pruning	
AHCARB204A	Undertake standard climbing techniques	
AHCARB205A	Operate and maintain chainsaws	
AHCARB206A	Undertake stump removal	
AHCARB207A	Perform ground based rigging	
AHCARB301A	Implement a tree maintenance program	
AHCARB302A	Conduct tree inspections	
AHCARB303A	Implement a tree pruning program	
AHCARB304A	Fell trees with advanced techniques	
AHCARB305A	Remove trees in confined spaces	
AHCARB306A	Undertake aerial rescue	

AHCARB307A	Undertake complex tree climbing	
AHCARB308A	Install cable and bracing	
AHCARB309A	Implement a tree protection program	
AHCARB310A	Perform aerial rigging	
AHCARB501A	Assess trees	
AHCARB502A	Identify, select and specify trees	
AHCARB503A	Diagnose tree diseases	
AHCARB504A	Develop a tree protection program	
AHCARB505A	Document and audit tree work	
AHCASW301A	Protect places of Aboriginal cultural significance	AHCILM306A
AHCASW302A	Relate Aboriginal culture to sites work	AHCILM306A
AHCASW303A	Identify and record Aboriginal-sites, objects and cultural landscapes	AHCILM306A
AHCASW304A	Identify Indigenous culturally significant plants	AHCILM306A
AHCASW305A	Work with Aboriginal ceremonial secret sacred materials	AHCILM306A
AHCASW306A	Use technology in Aboriginal-sites work	AHCILM306A
AHCASW307A	Map Aboriginal cultural landscapes	AHCILM306A
AHCASW308A	Apply cultural significance to Aboriginal-sites and landscapes	AHCASW302A AHCILM306A
AHCASW309A	Interpret Aboriginal cultural landscape	AHCASW302A AHCILM306A
AHCASW310A	Move and store Aboriginal cultural material	AHCILM306A
AHCASW311A	Apply relevant legislation in Aboriginal-sites work	
AHCASW312A	Maintain an Aboriginal cultural site	AHCILM306A
AHCASW501A	Survey and report on Aboriginal cultural sites	AHCILM306A
AHCBAC101A	Support agricultural crop work	

AHCBAC201A	Assist agricultural crop establishment	
AHCBAC202A	Assist agricultural crop maintenance	
AHCBAC203A	Assist agricultural crop harvesting	
AHCBAC204A	Prepare grain storages	
AHCBAC205A	Operate cane haulage vehicle	
AHCBAC301A	Conserve forage	
AHCBAC302A	Establish pastures and crops for livestock production	
AHCBAC303A	Prepare to receive grains/seeds	
AHCBAC304A	Test grains/seeds on receipt	
AHCBAC305A	Undertake preparation of land for agricultural crop production	
AHCBAC306A	Establish agricultural crops	
AHCBAC307A	Maintain agricultural crops	
AHCBAC308A	Undertake agricultural crop harvesting activities	
AHCBAC401A	Manage pastures for livestock production	
AHCBAC402A	Plan a pasture establishment program	
AHCBAC403A	Supervise agricultural crop establishment	
AHCBAC404A	Plan and implement agricultural crop maintenance	
AHCBAC405A	Supervise agricultural crop harvesting	
AHCBAC406A	Maintain grain quality in storage	
AHCBAC407A	Save, prepare and store agricultural seed	
AHCBAC501A	Manage agricultural crop production	
AHCBAC502A	Manage forage conservation	
AHCBAC503A	Manage integrated crop and pasture production	
AHCBAC504A	Plan and manage a stored grain program	

AHCBAC505A	Plan and manage long-term weed, pest and/or disease control in crops	
AHCBAC506A	Manage the harvest of crops	
AHCBAC507A	Develop production plans for crops	
AHCBEK201A	Support beekeeping work	
AHCBEK202A	Use a bee smoker	
AHCBEK203A	Open and reassemble a beehive	
AHCBEK204A	Construct and repair beehives	
AHCBEK301A	Manage honey bee swarms	
AHCBEK302A	Manipulate honey bee brood	
AHCBEK303A	Re-queen a honey bee colony	
AHCBEK304A	Remove a honey crop from a hive	
AHCBEK305A	Extract honey	
AHCBEK306A	Manage pests and disease within a honey bee colony	
AHCBEK401A	Collect and store propolis	
AHCBEK402A	Perform queen bee artificial insemination	
AHCBEK403A	Produce and harvest royal jelly	
AHCBEK404A	Provide bee pollination services	
AHCBEK405A	Select and establish an apiary site	
AHCBEK406A	Trap and store pollen	
AHCBEK407A	Rear queen bees	
AHCBIO201A	Inspect and clean machinery for plant, animal and soil material	
AHCBIO202A	Follow site quarantine procedures	
AHCBIO301A	Work effectively in an emergency disease or plant pest response	

AHCBIO302A	Identify and report unusual disease or plant pest signs	
AHCBIO303A	Carry out emergency disease or plant pest control procedures at infected premises	
AHCBIO304A	Carry out movement and security procedures	
AHCBIO305A	Monitor and review biosecurity measures	
AHCBIO401A	Supervise activities on infected premises	
AHCBIO402A	Carry out field surveillance for a specific emergency disease or plant pest	
AHCBIO403A	Plan and implement a biosecurity program	
AHCBIO501A	Manage active operational emergency disease or plant pest sites	
AHCBIO502A	Manage the implementation of an emergency disease or plant pest control program	
AHCBIO601A	Plan and oversee an emergency disease or plant pest control program	
AHCBUS301A	Use hand held e-business tools	
AHCBUS401A	Administer finance, insurance and legal requirements	
AHCBUS402A	Cost a project	
AHCBUS403A	Support and review business structures and relationships	
AHCBUS404A	Operate within a budget framework	
AHCBUS405A	Participate in an e-business supply chain	
AHCBUS501A	Manage staff	
AHCBUS502A	Market products and services	
AHCBUS503A	Negotiate and monitor contracts	
AHCBUS504A	Prepare estimates, quotes and tenders	
AHCBUS505A	Develop a marketing plan	
AHCBUS506A	Develop and review a business plan	

AHCBUS507A	Monitor and review business performance	
AHCBUS508A	Prepare and monitor budgets and financial reports	
AHCBUS601A	Manage capital works	
AHCBUS602A	Review land management plans and strategies	
AHCBUS603A	Develop and review a strategic plan	
AHCBUS604A	Design and manage the enterprise quality management system	
AHCBUS605A	Manage human resources	
AHCBUS606A	Develop a monitoring, evaluation and reporting program	
AHCBUS607A	Implement a monitoring, evaluation and reporting program	
AHCBUS608A	Manage risk	
AHCCCF401A	Prepare project acquittal	
AHCCCF402A	Report on project	
AHCCCF403A	Obtain and manage sponsorship	
AHCCCF404A	Contribute to association governance	
AHCCCF405A	Develop community networks	
AHCCCF406A	Facilitate ongoing group development	
AHCCCF407A	Obtain resources from community and groups	
AHCCCF408A	Promote community programs	
AHCCCF409A	Participate in assessments of project submissions	
AHCCCF410A	Support individuals in resource management change processes	
AHCCCF411A	Develop approaches to include cultural and human diversity	
AHCCCF412A	Coordinate board/committee elections	
AHCCCF413A	Service committees	

AHCCCF414A	Coordinate fund-raising activities	
AHCCCF415A	Coordinate social events to support group purposes	
AHCCCF416A	Present proposed courses of action to meeting	
AHCCCF501A	Evaluate project submissions	
AHCCCF502A	Facilitate development of group goals and projects	
AHCCCF503A	Promote group formation and development	
AHCCCF504A	Support group and community changes in resource management	
AHCCCF505A	Contribute to regional planning process	
AHCCCF506A	Manage the incorporation of a group	
AHCCCF601A	Map regional issues and stakeholders	
AHCCFI501	Provide technical advice on the Carbon Farming Initiative	
AHCCFI502	Assess the feasibility of a Carbon Farming Initiative project	
AHCCFI503	Advise on Carbon Farming Initiative project planning and implementation	
AHCCFI504	Monitor and report on a Carbon Farming Initiative project	
AHCCFI505	Aggregate Carbon Farming Initiative projects	
AHCCFI506	Plan a Carbon Farming Initiative livestock project	
AHCCFI507	Plan a Carbon Farming Initiative waste or manure management project	
AHCCFI508	Plan a Carbon Farming Initiative project to sequester carbon in soil or biochar	
AHCCFI509	Plan a Carbon Farming Initiative savannah burning, feral animal or rangelands project	
AHCCFI510	Plan a Carbon Farming Initiative vegetation project	
AHCCFI511	Plan a Carbon Farming Initiative project to avoid emissions from soil or crops	

AHCCHM101A	Follow basic chemical safety rules	
AHCCHM201A	Apply chemicals under supervision	
AHCCHM301A	Conduct fumigation in enclosed spaces	
AHCCHM302A	Fumigate soil using chemicals	
AHCCHM303A	Prepare and apply chemicals	
AHCCHM304A	Transport, handle and store chemicals	
AHCCHM305A	Conduct manual fumigation of vertebrate and invertebrate pests	
AHCCHM401A	Minimise risks in the use of chemicals	
AHCCHM402A	Plan and implement a chemical use program	
AHCCHM403A	Prepare safe operating procedures for calibration of equipment	
AHCCHM501A	Develop and manage a chemical use strategy	
AHCCOM201A	Assess and receive raw materials for composting	
AHCCOM202A	Recognise and respond to fire emergencies on a composting site	
AHCCOM203A	Recognise raw materials, production processes and products on a composting site	
AHCCOM301A	Operate compost processing plant, machinery and equipment	
AHCCOM302A	Dispatch materials and composted product	
AHCCOM303A	Operate a compost bagging process	
AHCCOM401A	Develop a composting recipe	
AHCCOM402A	Plan and schedule compost production	
AHCCOM501A	Identify and secure raw materials supply for compost production	
AHCDER401A	Handle, store and grade deer velvet	
AHCDER501A	Comply with deer industry national velvet accreditation	

	requirements	
AHCDER502A	Harvest deer velvet	
AHCDES501A	Design sustainable landscapes	
AHCDES502A	Prepare a landscape project design	
AHCDES503A	Assess landscape sites	
AHCDES504A	Design for construction of landscape features	
AHCDRG201A	Maintain drainage systems	
AHCDRG301A	Install drainage systems	
AHCDRG302A	Measure drainage system performance	
AHCDRG303A	Troubleshoot drainage systems	
AHCDRG501A	Design drainage systems	
AHCDRY201A	Milk livestock	
AHCDRY301A	Coordinate milking operations	
AHCDRY302A	Operate a dairy recycling system	
AHCDRY401A	Manage milking shed routines	
AHCEXP301A	Handle and store explosives	
AHCEXP302A	Identify and select explosive products	
AHCEXP303A	Prepare and use explosives	
AHCFAU201A	Recognise fauna	
AHCFAU301A	Respond to wildlife emergencies	
AHCFAU501A	Manage fauna populations	
AHCFIR201A	Assist with prescribed burning	
AHCFIR501A	Manage wildfire hazard reduction programs	
AHCHBR101A	Support horse work	
AHCHBR201A	Monitor horse health and welfare	

AHCHBR202A	Handle young horses	
AHCHBR203A	Provide daily care for horses	
AHCHBR204A	Assist with mating procedures and parturition of horses	
AHCHBR302A	Carry out basic hoof care procedures	
AHCHBR303A	Carry out mare mating or artificial insemination procedures	
AHCHBR304A	Educate, ride and care for horses and equipment	
AHCHBR305A	Handle and care for stallions	
AHCHBR306A	Prevent and treat equine injury and disease	
AHCHBR307A	Assess suitability of horses for stock work	
AHCHBR308A	Maintain horses in a healthy state and safe environment	
AHCHBR309A	Determine nutritional requirements for horses	
AHCHBR401A	Carry out stud stable management duties	
AHCHBR402A	Supervise raising young horses	
AHCHYD301A	Implement a maintenance program for hydroponic systems	
AHCHYD302A	Install hydroponic systems	
AHCHYD501A	Develop a plan for a hydroponic system	
AHCILM201A	Maintain cultural places	
AHCILM202A	Observe and report plants and/or animals	
AHCILM203A	Record information about country	
AHCILM301A	Propose appropriate uses of traditional customs	
AHCILM302A	Provide appropriate information on cultural knowledge	
AHCILM305A	Work with an Aboriginal community or organisation	AHCILM306A
AHCILM306A	Follow Aboriginal cultural protocols	
AHCILM307A	Implement Aboriginal cultural burning practices	AHCILM306A

AHCILM401A	Protect places of cultural significance	
AHCILM402A	Report on place of potential cultural significance	
AHCILM403A	Contribute to the proposal for a negotiated outcome for a given area of country	
AHCILM404A	Record and document community history	
AHCILM405A	Develop work practices to accommodate cultural identity	
AHCILM501A	Conduct field research into natural and cultural resources	
AHCILM502A	Develop conservation strategies for cultural resources	
AHCILM503A	Manage restoration of cultural places	
AHCILM504A	Develop strategies for Indigenous land or sea management	
AHCILM505A	Map relationship of business enterprise to culture and country	
AHCILM506A	Operate within community cultures and goals	
AHCILM508A	Propose a negotiated outcome for a given area of country	
AHCILM509A	Plan burning activities for natural and cultural resource management	
AHCILM510A	Plan for successful cultural practice at work	AHCILM306A
AHCILM601A	Manage cultural processes in an Indigenous organisation	
AHCINF201A	Carry out basic electric fencing operations	
AHCINF202A	Install, maintain and repair fencing	
AHCINF203A	Maintain properties and structures	
AHCINF204A	Fabricate and repair metal or plastic structures	
AHCINF301A	Implement property improvement, construction and repair	
AHCINF302A	Plan and construct an electric fence	
AHCINF303A	Plan and construct conventional fencing	
AHCIRG101A	Support irrigation work	

AHCIRG201A	Assist with the operation of gravity fed irrigation	
AHCIRG202A	Assist with the operation of pressurised irrigation	
AHCIRG203A	Install micro-irrigation systems	
AHCIRG204A	Lay irrigation and/or drainage pipes	
AHCIRG205A	Maintain gravity-fed irrigation systems	
AHCIRG206A	Maintain pressurised irrigation systems	
AHCIRG207A	Carry out irrigation site preparation tasks	
AHCIRG208A	Assist with the installation and maintenance of pumps and flow-control devices for irrigation	
AHCIRG209A	Carry out installation tasks for low volume irrigation	
AHCIRG210A	Carry out installation tasks for sprinkler irrigation	
AHCIRG211A	Assist with low volume irrigation operations and maintenance	
AHCIRG212A	Assist with sprinkler irrigation operations and maintenance	
AHCIRG213A	Assist with surface irrigation operations and maintenance	
AHCIRG214A	Install micro-irrigation systems for landscaping	
AHCIRG301A	Implement a maintenance program for an irrigation system	
AHCIRG302A	Install irrigation systems	
AHCIRG303A	Measure irrigation delivery system performance	
AHCIRG304A	Operate gravity fed irrigation systems	
AHCIRG305A	Operate pressurised irrigation systems	
AHCIRG306A	Troubleshoot irrigation systems	
AHCIRG307A	Recommend irrigation products and services	
AHCIRG308A	Monitor soils under irrigation	
AHCIRG309A	Interpret and apply instructions to install pumps	

AHCIRG310A	Operate and maintain irrigation pumping systems	
AHCIRG311A	Install low volume irrigation components	
AHCIRG312A	Install sprinkler irrigation components	
AHCIRG313A	Install moving sprinkler irrigation components	
AHCIRG314A	Install surface irrigation structures and equipment	
AHCIRG315A	Interpret irrigation plans and drawings	
AHCIRG316A	Implement a low volume irrigation maintenance program	
AHCIRG317A	Implement a sprinkler irrigation maintenance program	
AHCIRG318A	Implement a moving sprinkler irrigation maintenance program	
AHCIRG319A	Implement a surface irrigation maintenance program	
AHCIRG320A	Maintain and repair irrigation drainage systems	
AHCIRG321A	Operate low volume irrigation systems	
AHCIRG322A	Operate sprinkler irrigation systems	
AHCIRG323A	Operate moving sprinkler irrigation systems	
AHCIRG324A	Operate surface irrigation systems	
AHCIRG325A	Operate irrigation technology	
AHCIRG326A	Operate irrigation injection equipment	
AHCIRG327A	Implement an irrigation schedule	
AHCIRG401A	Acquire resources for irrigation installation and construction	
AHCIRG402A	Determine hydraulic parameters for an irrigation system	
AHCIRG404A	Implement an irrigation-related environmental protection program	
AHCIRG405A	Plan and coordinate gravity-fed irrigation systems	
AHCIRG406A	Plan on-site irrigation system installation and construction work	

AHCIRG407A	Supervise on-site irrigation installation and construction work	
AHCIRG408A	Schedule irrigations	
AHCIRG410A	Select and manage pumping systems for irrigation	
AHCIRG411A	Construct and install a low volume irrigation system	
AHCIRG412A	Construct and install a sprinkler irrigation system	
AHCIRG413A	Construct and install a moving sprinkler irrigation system	
AHCIRG414A	Construct and install a surface irrigation system	
AHCIRG415A	Interpret and apply irrigation designs	
AHCIRG416A	Supervise low volume irrigation maintenance	
AHCIRG417A	Supervise sprinkler irrigation maintenance	
AHCIRG418A	Supervise moving sprinkler irrigation maintenance	
AHCIRG419A	Supervise surface irrigation maintenance	
AHCIRG420A	Manage a low volume irrigation system	
AHCIRG421A	Manage a sprinkler irrigation system	
AHCIRG422A	Manage a moving sprinkler irrigation system	
AHCIRG423A	Manage a surface irrigation system	
AHCIRG424A	Construct and install an irrigation drainage system	
AHCIRG425A	Monitor and control irrigation drainage systems	
AHCIRG426A	Evaluate water supply for irrigation	
AHCIRG427A	Plan and supervise on-site irrigation system installation and construction work	
AHCIRG428A	Provide irrigation sales and service	
AHCIRG501A	Audit irrigation systems	
AHCIRG502A	Design irrigation system maintenance and monitoring programs	

AHCIRG503A	Design irrigation, drainage and water treatment systems	
AHCIRG504A	Develop an irrigation and drainage management plan	
AHCIRG505A	Establish and maintain an irrigation-related environmental protection program	
AHCLPW301A	Supervise park visitor activities	
AHCLPW303A	Construct access tracks	
AHCLPW304A	Carry out inspection of designated area	
AHCLPW305A	Perform diving for scientific purposes	
AHCLPW306A	Undertake sampling and testing of water	
AHCLPW401A	Process applications for changes in land use	
AHCLPW402A	Implement land and sea management practices	
AHCLPW403A	Inspect and monitor cultural places	
AHCLPW404A	Produce maps for land management purposes	
AHCLPW405A	Monitor biodiversity	
AHCLPW501A	Develop a management plan for a designated area	
AHCLPW503A	Assess applications for legislative compliance	
AHCLPW504A	Review assessments for legislative compliance	
AHCLPW505A	Implement natural and cultural resource management plans	
AHCLPW506A	Investigate suspected breaches of Natural Resource	
	Management (NRM) legislation	
AHCLPW601A	Coordinate the preparation of a regional resource management plan	
AHCLSC101A	Support landscape work	
AHCLSC201A	Assist with landscape construction work	
AHCLSC202A	Construct low-profile timber or modular retaining walls	

AHCLSC203A	Install aggregate paths	
AHCLSC204A	Lay paving	
AHCLSC205A	Install tree protection devices	
AHCLSC301A	Set out site for construction works	
AHCLSC302A	Construct landscape features using concrete	
AHCLSC303A	Construct brick and/or block structures and features	
AHCLSC304A	Erect timber structures and features	
AHCLSC305A	Construct stone structures and features	
AHCLSC306A	Implement a paving project	
AHCLSC307A	Implement a retaining wall project	
AHCLSC308A	Install metal structures and features	
AHCLSC309A	Install water features	
AHCLSC310A	Implement a tree transplanting program	
AHCLSC401A	Supervise landscape project works	
AHCLSC501A	Survey and establish site levels	
AHCLSC502A	Manage landscape projects	
AHCLSC503A	Manage a tree transplanting program	
AHCLSK101A	Support extensive livestock work	
AHCLSK102A	Support intensive livestock work	
AHCLSK201A	Assist with feeding in a production system	
AHCLSK202A	Care for health and welfare of livestock	
AHCLSK203A	Carry out birthing duties	
AHCLSK204A	Carry out regular livestock observation	
AHCLSK205A	Handle livestock using basic techniques	
AHCLSK206A	Identify and mark livestock	

AHCLSK207A	Load and unload livestock	
AHCLSK208A	Monitor livestock to parturition	
AHCLSK209A	Monitor water supplies	
AHCLSK210A	Muster and move livestock	
AHCLSK211A	Provide feed for livestock	
AHCLSK212A	Ride horses to carry out stock work	
AHCLSK213A	Clean out production sheds	
AHCLSK214A	Maintain production growing environments	
AHCLSK215A	Carry out alpaca handling and husbandry operations	
AHCLSK301A	Administer medication to livestock	
AHCLSK302A	Mate and monitor reproduction of alpacas	
AHCLSK303A	Carry out feedlot operations	
AHCLSK304A	Carry out post-mortem examination of livestock	
AHCLSK305A	Maintain livestock water supplies	
AHCLSK306A	Coordinate and monitor production performance	
AHCLSK307A	Euthanase livestock	
AHCLSK308A	Identify and draft livestock	
AHCLSK309A	Implement animal health control programs	
AHCLSK310A	Implement feeding plans for intensive production	
AHCLSK311A	Implement feeding plans for livestock	
AHCLSK312A	Coordinate artificial insemination and fertility management of livestock	
AHCLSK313A	Monitor livestock production growing environments	
AHCLSK314A	Prepare animals for parturition	
AHCLSK315A	Prepare for and implement natural mating of livestock	

AHCLSK316A	Prepare livestock for competition	
AHCLSK317A	Plan to exhibit livestock	
AHCLSK318A	Rear newborn and young livestock	
AHCLSK319A	Slaughter livestock	
AHCLSK320A	Coordinate and monitor livestock transport	
AHCLSK321A	Service and repair bores and windmills	
AHCLSK322A	Transport farm produce or bulk materials	
AHCLSK323A	Maintain and monitor feed stocks	
AHCLSK324A	Care for and train working dogs	
AHCLSK325A	Castrate livestock	
AHCLSK326A	Mix and mill standard stockfeed	
AHCLSK327A	Collect, store and administer colostrum	
AHCLSK328A	Remove and facilitate reuse of effluent and manure from an intensive production system	
AHCLSK329A	Implement procedures for calving	
AHCLSK330A	Implement procedures for foaling down mares	
AHCLSK331A	Comply with industry animal welfare requirements	
AHCLSK332A	Monitor animals in intensive production systems	
AHCLSK333A	Monitor pen condition and ration suitability	
AHCLSK335A	Conduct dropped ovary technique procedures for spaying cattle	
AHCLSK401A	Develop feeding plans for a production system	
AHCLSK402A	Develop livestock feeding plans	
AHCLSK403A	Escort livestock during export	
AHCLSK404A	Implement and monitor animal welfare programs	
AHCLSK405A	Implement intensive production systems	

AHCLSK406A	Oversee animal marking operations	
AHCLSK407A	Plan and monitor intensive production systems	
AHCLSK408A	Pregnancy test animals	
AHCLSK409A	Supervise animal health programs	
AHCLSK410A	Supervise feedlot operations	
AHCLSK411A	Supervise natural mating of livestock	
AHCLSK412A	Arrange livestock purchases	
AHCLSK413A	Design livestock handling facilities	
AHCLSK414A	Arrange transport for farm produce or livestock	
AHCLSK415A	Oversee alpaca farm activities	
AHCLSK416A	Identify and select animals for breeding	
AHCLSK417A	Manage horses for stock work	
AHCLSK501A	Manage livestock production	
AHCLSK502A	Arrange marketing of livestock	
AHCLSK503A	Develop and implement a breeding strategy	
AHCLSK504A	Develop livestock health and welfare strategies	
AHCLSK505A	Develop production plans for livestock	
AHCLSK506A	Design livestock effluent systems	
AHCMER301A	Process customer complaints	
AHCMER302A	Provide advice on hardware products	
AHCMER303A	Sell products and services	
AHCMER401A	Coordinate customer service and networking activities	
AHCMER402A	Provide advice and sell machinery	
AHCMER403A	Provide advice and sell farm chemicals	
AHCMER404A	Provide advice on agronomic products	

AHCMER405A	Provide advice on livestock products	
AHCMER406A	Provide information on fertilisers and soil ameliorants	
AHCMER501A	Develop a sales strategy for rural products	
AHCMKH301A	Carry out minor service of milking equipment	
AHCMKH303A	Service and repair milking equipment	
AHCMKH304A	Monitor and provide advice on cleaning milking machines	
AHCMKH305A	Mechanically test milking machines	
AHCMKH401A	Carry out cleaning-time tests of milking machines	
AHCMKH402A	Design and fabricate milking equipment installations	
AHCMKH403A	Design and install on-farm milk cooling and storage	
AHCMKH404A	Install milking equipment	
AHCMKH405A	Performance test milking machines	
AHCMOM101A	Assist with routine maintenance of machinery and equipment	
AHCMOM201A	Operate two wheel motorbikes	
AHCMOM202A	Operate tractors	
AHCMOM203A	Operate basic machinery and equipment	
AHCMOM204A	Undertake operational maintenance of machinery	
AHCMOM205A	Operate vehicles	
AHCMOM206A	Conduct grader operations	
AHCMOM207A	Conduct front-end loader operations	
AHCMOM208A	Conduct excavator operations	
AHCMOM209A	Conduct dozer operations	
AHCMOM210A	Conduct scraper operations	
AHCMOM211A	Operate side by side utility vehicles	

AHCMOM212A	Operate quad bikes	
AHCMOM301A	Coordinate machinery and equipment maintenance and repair	
AHCMOM302A	Perform machinery maintenance	
AHCMOM304A	Operate machinery and equipment	
AHCMOM305A	Operate specialised machinery and equipment	
AHCMOM306A	Ground spread fertiliser and soil ameliorant	
AHCMOM307A	Operate a cane harvester	
AHCMOM308A	Operate broadacre and row crop harvest machinery and equipment	
AHCMOM309A	Operate broadacre sowing machinery and equipment	
AHCMOM310A	Operate land-forming machinery and equipment	
AHCMOM311A	Operate precision control technology	
AHCMOM312A	Operate row crop planting and seeding machinery and equipment	
AHCMOM313A	Operate mobile irrigation machinery and equipment	
AHCMOM314A	Transport machinery	
AHCMOM315A	Operate chemical application machinery and equipment	
AHCMOM401A	Conduct major repair and overhaul of machinery and equipment	
AHCMOM402A	Supervise maintenance of property machinery and equipment	
AHCMOM501A	Manage machinery and equipment	
AHCMOM502A	Implement a machinery management system	
AHCMOM601A	Analyse machinery options	
AHCNAR101A	Support natural area conservation	
AHCNAR102A	Support native seed collection	

AHCNAR201A	Carry out natural area restoration works	
AHCNAR202A	Maintain wildlife habitat refuges	
AHCNAR301A	Maintain natural areas	
AHCNAR302A	Collect and preserve biological samples	
AHCNAR303A	Implement revegetation works	
AHCNAR304A	Undertake direct seeding	
AHCNAR401A	Supervise natural area restoration works	
AHCNAR402A	Plan the implementation of revegetation works	
AHCNAR501A	Manage natural areas on a rural property	
AHCNAR502A	Conduct biological surveys	
AHCNAR503A	Design a natural area restoration project	
AHCNAR504A	Manage natural area restoration programs	
AHCNAR505A	Plan river restoration works	
AHCNAR506A	Develop and implement sustainable land use strategies	
AHCNRM501A	Develop a coastal rehabilitation strategy	
AHCNRM502A	Develop a water quality monitoring program	
AHCNRM503A	Support the implementation of waterways strategies	
AHCNRM504A	Interpret and report on catchment hydrology	
AHCNRM505A	Provide technical advice on sustainable catchment management	
AHCNRM506A	Plan and monitor works projects in catchments and waterways	
AHCNRM507A	Manipulate and analyse data within geographic information systems	
AHCNSY101A	Support nursery work	
AHCNSY201A	Pot up plants	

AHCNSY202A	Tend nursery plants	
AHCNSY203A	Undertake propagation activities	
AHCNSY204A	Maintain indoor plants	
AHCNSY301A	Maintain nursery plants	
AHCNSY302A	Receive and dispatch nursery products	
AHCNSY303A	Install and maintain plant displays	
AHCNSY304A	Deliver and promote sales of plants	
AHCNSY305A	Prepare specialised plants	
AHCNSY306A	Implement a propagation plan	
AHCNSY307A	Operate fertigation equipment	
AHCNSY401A	Plan a growing-on program	
AHCNSY402A	Plan a propagation program	
AHCOHS101A	Work safely	
AHCOHS201A	Participate in OHS processes	
AHCOHS301A	Contribute to OHS processes	
AHCOHS401A	Maintain Occupational Health and Safety (OHS) processes	
AHCOHS501A	Manage Occupational Health and Safety (OHS) processes	
AHCORG101A	Support organic production	
AHCORG401A	Manage biodynamic production	
AHCORG402A	Manage organic livestock production	
AHCORG403A	Manage organic soil improvement	
AHCORG404A	Arrange selling through community based marketing	
AHCORG405A	Implement sustainable practices in the organic farm based business	
AHCORG406A	Oversee compliance with an organic certification scheme	

AHCORG501A	Develop an organic management plan	
AHCORG502A	Prepare the enterprise for organic certification	
AHCORG503A	Design and document an organic farm landscape	
AHCORG504A	Develop and manage a community based marketing supply chain	
AHCORG505A	Develop and monitor a sustainable production plan	
AHCORG506A	Manage an agro-ecology production system	
AHCPCM201A	Recognise plants	
AHCPCM202A	Collect, prepare and preserve plant specimens	
AHCPCM301A	Implement a plant nutrition program	
AHCPCM302A	Provide information on plants and their culture	
AHCPCM303A	Identify plant specimens	
AHCPCM401A	Recommend plants and cultural practices	
AHCPCM402A	Develop a soil health and plant nutrition program	
AHCPCM501A	Diagnose plant health problems	
AHCPCM502A	Collect and classify plants	
AHCPCM503A	Specify plants for landscapes	
AHCPCM504A	Design and maintain a specialised landscape	
AHCPCM505A	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs	
AHCPCM601A	Develop and implement a plant health management strategy	
AHCPGD101A	Support gardening work	
AHCPGD201A	Plant trees and shrubs	
AHCPGD202A	Prepare and maintain plant displays	
AHCPGD203A	Prune shrubs and small trees	

AHCPGD204A	Transplant small trees	
AHCPGD205A	Prepare a grave site	
AHCPGD206A	Conduct visual inspection of park facilities	
AHCPGD301A	Implement a plant establishment program	
AHCPGD302A	Plan and maintain plant displays	
AHCPGD303A	Perform specialist amenity pruning	
AHCPGD304A	Implement a landscape maintenance program	
AHCPGD305A	Conduct operational inspection of park facilities	
AHCPGD306A	Implement a maintenance program for an aquatic environment	
AHCPGD401A	Design plant displays	
AHCPGD402A	Plan a plant establishment program	
AHCPGD501A	Manage plant cultural practices	
AHCPGD502A	Plan the restoration of parks and gardens	
AHCPGD503A	Manage parks and reserves	
AHCPGD504A	Develop and implement a streetscape management plan	
AHCPGD505A	Conduct comprehensive inspection of park facilities	
AHCPHT101A	Support horticultural production	
AHCPHT201A	Plant horticultural crops	
AHCPHT202A	Carry out canopy maintenance	
AHCPHT203A	Support horticultural crop harvesting	
AHCPHT204A	Undertake field budding and grafting	
AHCPHT205A	Carry out postharvest operations	
AHCPHT206A	Handle and move mushroom boxes	
AHCPHT207A	Perform mushroom substrate process tasks	

AHCPHT208A	Water mushroom crops	
AHCPHT209A	Produce trellis dried grapes	
AHCPHT301A	Carry out a crop regulation program	
AHCPHT302A	Coordinate horticultural crop harvesting	
AHCPHT303A	Implement a post-harvest program	
AHCPHT304A	Harvest horticultural crops mechanically	
AHCPHT305A	Regulate crops	
AHCPHT306A	Establish horticultural crops	
AHCPHT307A	Prepare raw materials and compost the feedstocks	
AHCPHT308A	Prepare value added compost-based products	
AHCPHT309A	Supervise mushroom substrate preparation	
AHCPHT401A	Assess olive oil for style and quality	
AHCPHT402A	Develop a crop regulation program	
AHCPHT403A	Develop harvesting and processing specifications to produce an olive oil	
AHCPHT404A	Implement and monitor a horticultural crop harvesting program	
AHCPHT405A	Manage mushroom substrate preparation	
AHCPHT406A	Control Phase II mushroom substrate process	
AHCPHT407A	Manage mushroom crop development	
AHCPHT408A	Oversee vineyard practices	
AHCPHT502A	Develop a horticultural production plan	
AHCPHT503A	Manage a controlled growing environment	
AHCPHT504A	Develop a grape production plan	
AHCPHT505A	Evaluate wine	
AHCPHT506A	Manage a wine making process	

AHCPLY201A	Collect store and handle eggs from breeder flocks	
AHCPLY202A	Maintain health and welfare of poultry	
AHCPLY203A	Set up shed for placement of day-old chickens	
AHCPLY204A	Collect and pack eggs for human consumption	
AHCPLY301A	Artificially inseminate birds	
AHCPLY302A	Brood poultry	
AHCPLY303A	Identify and sex birds	
AHCPLY304A	Incubate eggs	
AHCPLY305A	Beak trim chickens	
AHCPLY306A	Clean and fumigate intensive production sheds	
AHCPLY401A	Supervise free-range poultry operations	
AHCPMG201A	Treat weeds	
AHCPMG202A	Treat plant pests, diseases and disorders	
AHCPMG301A	Control weeds	
AHCPMG302A	Control plant pests, diseases and disorders	
AHCPMG303A	Maintain biological cultures	
AHCPMG304A	Release biological agents	
AHCPMG401A	Define the pest problem in a local area	
AHCPMG402A	Develop a pest management action plan within a local area	
AHCPMG403A	Develop monitoring procedures for the local pest management strategy	
AHCPMG404A	Coordinate the local pest management strategy	
AHCPMG405A	Implement pest management action plans	
AHCPMG406A	Investigate a reported pest treatment failure	
AHCPMG407A	Monitor and evaluate the local pest management action	

	plan	
AHCPMG408A	Assess and monitor weed, pest and/or disease control programs	
AHCPMG501A	Coordinate the pest management strategy in a regional or broader context	
AHCPMG502A	Define the pest problem in a regional or broader context	
AHCPMG503A	Develop a strategy for the management of target pests	
AHCPMG504A	Develop a system for monitoring the pest management strategy	
AHCPMG505A	Evaluate the pest management strategy	
AHCPMG506A	Manage the implementation of legislation	
AHCPMG601A	Develop a plant pest survey strategy	
AHCPMG602A	Develop a plant pest destruction strategy	
AHCPRK201A	Care for health and welfare of pigs	
AHCPRK202A	Care for weaner and grower pigs	
AHCPRK203A	Move and handle pigs	
AHCPRK301A	Pregnancy test pigs	
AHCPRK302A	Treat rectal prolapse in pigs	
AHCPRK303A	Artificially inseminate pigs	
AHCPRK304A	Mate pigs and monitor dry sow performance	
AHCPRK401A	Implement a feeding strategy for pig production	
AHCSAW201A	Conduct erosion and sediment control activities	
AHCSAW301A	Construct conservation earthworks	
AHCSAW302A	Implement erosion and sediment control measures	
AHCSAW401A	Set out conservation earthworks	
AHCSAW402A	Supervise on-site implementation of conservation earthworks	

AHCSAW501A	Design control measures and structures	
AHCSAW502A	Plan erosion and sediment control measures	
AHCSAW503A	Plan conservation earthworks	
AHCSDP301A	Undertake preparation of land for seed crops	
AHCSDP302A	Establish seed crops	
AHCSDP303A	Maintain seed crops	
AHCSDP304A	Harvest seed crops	
AHCSDP401A	Plan a seed crop establishment program	
AHCSDP402A	Supervise seed crop establishment	
AHCSDP403A	Plan and implement seed crop maintenance	
AHCSDP404A	Supervise seed crop harvesting	
AHCSDP405A	Inspect a seed crop for quality assurance purposes	
AHCSDT301A	Prepare a working sample	
AHCSDT302A	Identify seeds	
AHCSDT303A	Perform a fluorescence test on seeds	
AHCSDT304A	Perform a seed purity analysis	
AHCSDT305A	Perform a seed moisture test	
AHCSDT306A	Perform a seed germination test	
AHCSDT307A	Perform a 'Determination of Other Seeds by Number' test	
AHCSDT401A	Maintain a quarantine approved laboratory	
AHCSDT402A	Prepare and maintain a seed reference collection	
AHCSDT403A	Perform an Anguina test on annual ryegrass seed	
AHCSDT404A	Develop and implement laboratory policy and procedures	
AHCSDT405A	Handle & store quarantinable materials	
AHCSDT406A	Undertake internal audits in a seed laboratory	

AHCSDT407A	Perform an endophytic seed test	
AHCSDT408A	Perform an electrophoresis test on a seed sample	
AHCSDT409A	Perform a tetrazolium seed viability test	
AHCSDT410A	Perform a seed vigour test	
AHCSDT411A	Perform a 1000 seed weight test	
AHCSHG101A	Undertake basic shearing and crutching	
AHCSHG201A	Crutch sheep	
AHCSHG202A	Assist in preparing for shearing and crutching	
AHCSHG203A	Shear sheep to novice level	
AHCSHG204A	Shear sheep to improver level	
AHCSHG205A	Grind combs and cutters for machine shearing	
AHCSHG206A	Prepare handpiece and downtube for machine shearing	
AHCSHG207A	Shear goats	
AHCSHG208A	Shear alpacas	
AHCSHG209A	Support alpaca shearing operations	
AHCSHG301A	Prepare livestock for shearing	
AHCSHG302A	Prepare combs and cutters for machine shearing	
AHCSHG303A	Maintain and service shearing handpieces	
AHCSHG304A	Shear sheep to professional level	
AHCSHG305A	Maintain consistent shearing performance	
AHCSHG306A	Carry out post-shearing procedures	
AHCSHG307A	Plan and prepare for alpaca shearing	
AHCSHG401A	Apply advanced shearing techniques	
AHCSHG402A	Conduct equipment experting for machine shearing	
AHCSHG403A	Account for shearing shed supplies	

AHCSHG404A	Manage shearing and crutching operations	
AHCSHG405A	Arrange employment for shearing operations	
AHCSHG406A	Prepare shearing team wages	
AHCSHG407A	Oversee and instruct shed staff	
AHCSOL201A	Determine basic properties of soil and/or growing media	
AHCSOL301A	Prepare growing media	
AHCSOL302A	Construct a soil profile	
AHCSOL401A	Sample soils and interpret results	
AHCSOL402A	Develop a soil use map for a property	
AHCSOL403A	Prepare acid sulphate soil management plans	
AHCSOL404A	Supervise acid sulphate soil remediation and management projects	
AHCSOL501A	Monitor and manage soils for production	
AHCSPO301A	Operate a screen cleaner for seed processing	
AHCSPO302A	Operate an indent cylinder	
AHCSPO303A	Operate a gravity table	
AHCSPO304A	Operate seed modification machinery	
AHCSPO305A	Operate seed treatment machinery	
AHCSPO306A	Operate specialised seed processing machinery	
AHCSPO307A	Handle, package and store commercial quantities of seed	
AHCSPO308A	Sample seed before and after processing	
AHCTEQ301A	Install and terminate extra low voltage wiring systems	
AHCTRF101A	Support turf work	
AHCTRF201A	Assist with turf construction	
AHCTRF202A	Prepare turf surfaces for play	

AHCTRF203A	Renovate grassed areas	
AHCTRF204A	Support turf establishment	
AHCTRF301A	Construct turf playing surfaces	
AHCTRF302A	Establish turf	
AHCTRF303A	Implement a grassed area maintenance program	
AHCTRF304A	Monitor turf health	
AHCTRF305A	Renovate sports turf	
AHCTRF401A	Develop a sports turf maintenance program	
AHCTRF402A	Plan and implement sports turf renovation	
AHCTRF501A	Plan the establishment of sports turf playing surfaces	
AHCTRF502A	Manage sports turf renovation programs	AHCTRF305A
AHCTRF503A	Develop sports turf management programs	
AHCTRF504A	Manage sport turf facilities	
AHCVPT201A	Clear features that harbour pest animals	
AHCVPT202A	Muster pest animals	
AHCVPT203A	Use firearms to humanely destroy animals	
AHCVPT302A	Implement vertebrate pest control program	
AHCVPT303A	Survey pest animals	
AHCVPT304A	Conduct vertebrate pest activities from aircraft	
AHCVPT305A	Tag and locate Judas animals	
AHCVPT306A	Apply animal trapping techniques	
AHCWAT201A	Set up, operate and maintain water delivery systems for compost	
AHCWAT301A	Monitor and operate water treatment processes	
AHCWAT501A	Design water treatment systems	

AHCWAT502A	Manage water systems	
AHCWOL101A	Support woolshed activities	
AHCWOL201A	Pen sheep	
AHCWOL202A	Perform board duties	
AHCWOL203A	Carry out wool pressing	
AHCWOL204A	Undertake basic skirting of alpaca fleece	
AHCWOL301A	Appraise wool using industry descriptions	
AHCWOL303A	Prepare wool based on its characteristics	
AHCWOL304A	Prepare fleece wool for classing	
AHCWOL305A	Prepare skirtings and oddments	
AHCWOL306A	Supervise clip preparation	
AHCWOL307A	Document a wool clip	
AHCWOL308A	Prepare facilities for shearing and crutching	
AHCWOL310A	Press wool for a clip	
AHCWOL311A	Perform shed duties	
AHCWOL312A	Class goat fibre	
AHCWOL313A	Class alpaca fleece	
AHCWOL401A	Determine wool classing strategies	
AHCWOL402A	Use individual fleece measurements to prepare wool for sale	
AHCWOL403A	Prepare for, implement and review wool harvesting, clip preparation and classing	
AHCWOL404A	Establish work routines and manage wool harvesting and preparation staff	
AHCWOL405A	Class fleece wool	
AHCWRK101A	Maintain the workplace	

AHCWRK201A	Observe and report on weather	
AHCWRK202A	Observe environmental work practices	
AHCWRK203A	Operate in isolated and remote situations	
AHCWRK204A	Work effectively in the industry	
AHCWRK205A	Participate in workplace communications	
AHCWRK206A	Observe enterprise quality assurance procedures	
AHCWRK207A	Collect and record production data	
AHCWRK208A	Provide information on products and services	
AHCWRK209A	Participate in environmentally sustainable work practices	
AHCWRK301A	Collect samples for a rural production or horticulture monitoring program	
AHCWRK302A	Monitor weather conditions	
AHCWRK303A	Respond to emergencies	
AHCWRK304A	Respond to rescue incidents	
AHCWRK305A	Coordinate work site activities	
AHCWRK306A	Comply with industry quality assurance requirements	
AHCWRK307A	Develop and apply fertiliser and soil ameliorant product knowledge	
AHCWRK308A	Handle bulk materials in storage area	
AHCWRK310A	Provide on-job training support	
AHCWRK311A	Conduct site inspections	
AHCWRK313A	Implement and monitor environmentally sustainable work practices	
AHCWRK401A	Implement and monitor quality assurance procedures	
AHCWRK402A	Provide information on issues and policies	
AHCWRK403A	Supervise work routines and staff performance	

AHCWRK404A	Ensure compliance with pest legislation	
AHCWRK501A	Plan, implement and review a quality assurance program	
AHCWRK502A	Collect and manage data	
AHCWRK503A	Prepare reports	
AHCWRK504A	Assess new industry developments	
AHCWRK505A	Manage trial and/or research material	
AHCWRK507A	Implement professional practice	
AHCWRK508A	Interpret legislation	
AHCWRK509A	Provide specialist advice to clients	
AHCWRK510A	Audit site operations	
AHCWRK511A	Develop workplace policy and procedures for sustainability	
AHCWRK601A	Monitor projects in a program	
AHCWRK602A	Lead and manage community or industry organisations	
AHCWRK603A	Design and conduct a field-based research trial	

### Imported Units of Competency in AHC10v3 Training Package

Code	Title	Origin
BSBADM504B	Plan or review administrative systems	BSB07
BSBCMM401A	Make a presentation	BSB07
BSBCUS301B	Deliver and monitor a service to customers	BSB07
BSBCUS501C	Manage quality customer service	BSB07
BSBDES403A	Develop and extend design skills and practice	BSB07
BSBDES501A	Implement design solutions	BSB07
BSBDES502A	Establish, negotiate and refine a design brief	BSB07

BSBFIA301A	Maintain financial records	BSB07
BSBFIA402A	Report on financial activity	BSB07
BSBFIM501A	Manage budgets and financial plans	BSB07
BSBHRM402A	Recruit, select and induct staff	BSB07
BSBHRM506A	Manage recruitment selection and induction processes	BSB07
BSBHRM604A	Manage employee relations	BSB07
BSBINM201A	Process and maintain workplace information	BSB07
BSBINM401A	Implement workplace information system	BSB07
BSBITU203A	Communicate electronically	BSB07
BSBITU305A	Conduct online transactions	BSB07
BSBITU306A	Design and produce business documents	BSB07
BSBITU404A	Produce complex desktop published documents	BSB07
BSBMGT402A	Implement operational plan	BSB07
BSBMGT617A	Develop and implement a business plan	BSB07
BSBPRO301A	Recommend products and services	BSB07
BSBRELA02A	Build client relationships and business networks	BSB07
BSBRES401A	Analyse and present research information	BSB07
BSBRSK401A	Identify risk and apply risk management processes	BSB07
BSBRSK501B	Manage risk	BSB07
BSBSLS402A	Identify sales prospects	BSB07
BSBSMB403A	Market the small business	BSB07
BSBSMB405B	Monitor and manage small business operations	BSB07
BSBSMB406A	Manage small business finances	BSB07
BSBSUS301A	Implement and monitor environmentally sustainable work practices	BSB07

BSBWHS302A	Apply knowledge of WHS legislation in the workplace	BSB07
BSBWHS503A	Contribute to the systematic management of WHS risk	BSB07
BSBWHS506A	Manage WHS hazards associated with plant	BSB07
BSBWOR204A	Use business technology	BSB07
BSBWOR402A	Promote team effectiveness	BSB07
BSBWOR404A	Develop work priorities	BSB07
BSBWOR501B	Manage personal work priorities and professional development	BSB07
CHCCD404E	Develop and implement community programs	CHC08
CPCCCM2010B	Work safely at heights	CPC08
CPCCCM3001C	Operate elevated work platforms	CPC08
CPCCCM3003A	Work safely around power sources, services and assets	CPC08
CPCCDO3001A	Perform dogging	CPC08
CPCCOHS1001A	Work safely in the construction industry	CPC08
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry	CPC08
CPCPCM2007A	Carry out levelling	CPC08
CPCPCM2014A	Carry out simple concreting and rendering	CPC08
CPCPIG2011A	Design domestic urban irrigation systems	CPC08
CPCPWT3007A	Connect irrigation systems from drinking water supply	CPC08
CPPFES2005A	Demonstrate first attack firefighting equipment	CPP07
CPPSIS4005A	Collect basic GPS data	CPP07
CPPWMT5043A	Develop and implement an environmental management strategy	CPP07
CPPWMT5045A	Develop site safety plans	CPP07
CULATS501A	Work with Aboriginal and Torres Strait Islander cultural material	CUL04
CULCNM303A	Move and store collection material	CUL04

CULCNM503A	Manage the development of collections	CUL04
CULCNM602A	Develop and monitor procedures for the movement and storage of collection material	CUL04
CULMS002B	Research and evaluate Aboriginal or Torres Strait Islander cultural material	CUL04
CULMS010B	Contribute to the preservation of cultural material	CUL04
CUVACD302A	Produce computer-aided drawings	CUV11
CUVACD303A	Produce technical drawings	CUV11
FDFFS2001A	Implement the food safety program and procedures	FDF10
FDFFS3001A	Monitor the implementation of quality and food safety programs	FDF10
FDFGPS2011A	Operate a creamed honey manufacture process	FDF10
FDFOP2003A	Clean equipment in place	FDF10
FDFOP2004A	Clean and sanitize equipment	FDF10
FDFOP2012A	Maintain food safety when loading, unloading and transporting food	FDF10
FDFOP2013A	Implement sampling procedures	FDF10
FDFOP2016A	Work in a food handling area for non-food handlers	FDF10
FDFOP2023A	Operate a packaging process	FDF10
FDFOP2038A	Operate a grinding process	FDF10
FDFTEC3001A	Participate in a HACCP team	FDF10
FDFWGG2001A	Bench graft vines	FDF10
FDFWGG2002A	Carry out potting operations	FDF10
FDFWGG2003A	Hand prune vines	FDF10
FDFWGG2005A	Maintain callusing environment	FDF10
FDFWGG2006A	Obtain and process rootlings	FDF10
FDFWGG2008A	Train vines	FDF10

FDFWGG2009A	Operate specialised canopy management equipment	FDF10
FDFWGG2010A	Field graft vines	FDF10
FDFWGG2013A	Deliver injection requirements	FDF10
FDFWGG2015A	Support mechanical harvesting operations	FDF10
FDFWGG2016A	Install and maintain vine trellis	FDF10
FDFWGG2018A	Operate vineyard equipment	FDF10
FDFWGG2020A	Carry out hot water treatment	FDF10
FDFWGG2021A	Operate nursery cold storage facilities	FDF10
FDFWGG2022A	Take and process vine cuttings	FDF10
FDFWGG3002A	Coordinate canopy management activities	FDF10
FDFWGG3004A	Coordinate nursery activities	FDF10
FDFWGG3005A	Perform field nursery activities	FDF10
FDFWGG3006A	Coordinate hand pruning activities	FDF10
FDFWGG3009A	Monitor and maintain nursery plants	FDF10
FDFWGG3010A	Implement a soil management program	FDF10
FDFWGG3011A	Perform shed nursery activities	FDF10
FNSFMK512A	Apply knowledge of emissions markets	FNS10
FPICOT2221B	Trim and cross cut felled trees	FPI05
FPICOT2234B	Operate 4x4 vehicle	FPI05
FPICOT3202B	Navigate in remote or trackless areas	FPI05
FPIFGM2201B	Collect seed	FPI05
FPIFGM2208A	Fall trees manually (basic)	FPI05
FPIFGM3201B	Manage seed collection	FPI05
FPIFGM3202B	Extract seed	FPI05
FPIFGM3204A	Fall trees manually (intermediate)	FPI05

FPIFGM3205A	Fall trees manually (advanced)	FPI05
FPIHAR2206B	Operate a mobile chipper/mulcher	FPI05
HLTFA201A	Provide basic emergency life support	HLT07
HLTFA301C	Apply first aid	HLT07
HLTFA302C	Provide first aid in remote situation	HLT07
LGACOM502B	Devise and conduct community consultations	LGA04
LGALAND504A	Undertake effective consultation with Indigenous people on matters of cultural heritage	LGA04
LGAPLEM508A	Manipulate and analyse data within geographic information systems	LGA04
LGAREGS305A	Undertake animal or reptile control duties	LGA04
MEM05004C	Perform routine oxy acetylene welding	MEM05
MEM05007C	Perform manual heating and thermal cutting	MEM05
MEM05012C	Perform routine manual metal arc welding	MEM05
MEM05015D	Weld using manual metal arc welding process	MEM05
MEM05017D	Weld using gas metal arc welding process	MEM05
MEM05019D	Weld using gas tungsten arc welding process	MEM05
MEM05049B	Perform routine gas tungsten arc welding	MEM05
MEM05050B	Perform routine gas metal arc welding	MEM05
MEM05051A	Select welding processes	MEM05
MEM05052A	Apply safe welding practices	MEM05
MEM12023A	Perform engineering measurements	MEM05
MEM18001C	Use hand tools	MEM05
MEM18002B	Use power tools/hand held operations	MEM05
MSL904001A	Perform standard calibrations	MSL09
MSL913002A	Plan and conduct laboratory/field work	MSL09

MSL922001A	Record and present data	MSL09
MSL924001A	Process and interpret data	MSL09
MSL924002A	Use laboratory application software	MSL09
MSL933001A	Maintain the laboratory/field workplace fit for purpose	MSL09
MSL933004A	Perform calibration checks on equipment and assist with its maintenance	MSL09
MSL934002A	Apply quality system and continuous improvement processes	MSL09
MSL934003A	Maintain and control stocks	MSL09
MSL973007A	Perform microscopic examination	MSL09
NWP203B	Plan and organise personal work activities	NWP07
NWP209B	Use maps, plans, drawings and specifications	NWP07
NWP210B	Perform basic water quality tests	NWP07
NWP215B	Install and replace basic volumetric metering equipment	NWP07
NWP222A	Operate basic flow control and regulating devices in irrigation systems	NWP07
NWP226B	Prepare and restore work site	NWP07
NWP251B	Construct open earthen channels or drains	NWP07
NWP252B	Construct and install irrigation delivery and stormwater drainage assets	NWP07
NWP302A	Install meters for non-potable, non-urban water supplies	NWP07
NWP304A	Maintain meters for non-potable, non-urban water supplies	NWP07
NWP305B	Monitor and conduct minor maintenance of complex flow-control and metering devices	NWP07
NWP316B	Monitor and schedule water deliveries	NWP07
NWP362B	Monitor, operate and control reclaimed water irrigation	NWP07
NWP401B	Coordinate and monitor the application of environmental plans and procedures	NWP07

NWP410C	Coordinate and monitor asset construction and maintenance	NWP07
NWP425B	Coordinate and monitor the operation of irrigation delivery systems	NWP07
NWP512B	Implement and manage catchment management plan	NWP07
NWP513B	Develop and review catchment management plan	NWP07
NWP516B	Implement and manage surface water management plan	NWP07
NWP517B	Develop and review surface water management plan	NWP07
NWP518B	Prepare and report on data related to flood mitigation	NWP07
NWP519B	Develop and report flood mitigation	NWP07
PSPPM402B	Manage simple projects	PSP04
PSPPM502B	Manage complex projects	PSP04
PSPPM503B	Close complex projects	PSP04
PSPPOL404A	Support policy implementation	PSP04
PSPPOL603A	Manage policy implementation	PSP04
PUACOM012B	Liaise with media at a local level	PUA00
PUAEMR026	Treat operational risk	PUA12
PUAEMR027	Assess operational risk	PUA12
PUAFIR201B	Prevent injury	PUA00
PUAFIR204B	Respond to wildfire	PUA00
PUAFIR303A	Suppress wildfire	PUA00
PUAFIR303B	Suppress wildfire	PUA00
PUAFIR406B	Develop prescribed burning plans	PUA00
PUAFIR407A	Conduct prescribed burning	PUA00
PUAFIR601B	Develop and administer agency policy, procedures and practices	PUA00
PUALAW001B	Protect and preserve incident scene	PUA00

PUAOPE004A	Conduct briefings/debriefings	PUA00
PUAOPE005A	Manage a multi team response	PUA00
RGRPSH409A	Determine nutritional requirements for racing horses	RGR08
RIIMPO304B	Conduct wheel loader operations	RII09
RIIMPO318B	Conduct civil construction skid steer loader operations	RII09
RIIMPO319A	Conduct backhoe/loader operations	RII09
RIIMPO324A	Conduct civil construction grader operations	RII09
RIIOHS202A	Enter and work in confined spaces	RII09
RIIOHS205A	Control traffic with stop-slow bat	RII09
SIRXADM001A	Apply retail office procedures	SIR07
SIRXADM002A	Coordinate retail office	SIR07
SIRXCCS201	Apply point-of-sale handling procedures	SIR07
SIRXCCS202	Interact with customers	SIR07
SIRXCLM001A	Organise and maintain work areas	SIR07
SIRXCLM402	Manage store facilities	SIR07
SIRXFIN201	Balance and secure point-of-sale terminal	SIR07
SIRXFIN002A	Perform retail finance duties	SIR07
SIRXICT001A	Operate retail technology	SIR07
SIRXINV002A	Maintain and order stock	SIR07
SIRXINV004A	Buy merchandise	SIR07
SIRXINV005A	Control inventory	SIR07
SIRXMER004A	Manage merchandise and store presentation	SIR07
SIRXMER201	Merchandise products	SIR07
SIRXMER202	Plan, create and maintain displays	SIR07
SIRXMER303	Coordinate merchandise presentation	SIR07

SIRXMER406	Monitor in-store visual merchandising display	SIR07
SIRXMPR001A	Profile a retail market	SIR07
SIRXPRO007A	Improve supply and distribution chains	SIR07
SIRXRSK002A	Maintain store security	SIR07
SIRXRSK404	Control store security	SIR07
SIRXSLS201	Sell products and services	SIR07
SIRXSLS002A	Advise on products and services	SIR07
SIRXSLS303	Build relationships with customers	SIR07
SIRXSLS406	Manage sales and service delivery	SIR07
SISXRES506A	Undertake open-space planning	SIS10
SITTGDE101	Interpret aspects of local Australian Indigenous culture	SIT12
SITTGDE301	Work as a guide	SIT12
SITTGDE306	Research and share general information on Australian Indigenous cultures	SIT12
SITTGDE307	Prepare specialised interpretive content on flora, fauna and landscape	SIT12
SITTGDE309	Prepare specialised interpretive content on cultural and heritage environments	SIT12
SITTPPD402	Develop interpretive activities	SIT12
SITTPPD602	Develop environmentally sustainable tourism operations	SIT12
SITXCCS201	Provide visitor information	SIT12
SITXCOM301	Address protocol requirements	SIT12
SRXGOV001B	Participate as a member of an effective board of an organisation	SRS03
SRXGOV004B	Work effectively with the board of an organisation	SRS03
SRXGRO002A	Deal with conflict	SRS03
TAEDEL301A	Provide work skill instruction	TAE10

TLID1001A	Shift materials safely using manual handling methods	TLI10
TLID2022A	Conduct weighbridge operations	TLI10
TLIL5019A	Implement and monitor transport logistics	TLI10
TLILIC2001A	Licence to operate a forklift truck	TLI10
TLILIC2005A	Licence to operate a boom-type elevating work platform (boom length 11 meters or more)	TLI10
TLIR4002A	Source goods/services and evaluate contractors	TLI10
TLIR4003C	Negotiate a contract	TLI10

## Qualification Mapping of AHC10 - all Versions

### Qualification Mapping – AHC10v4 to AHC10v5

AHC10v4 Qualification Code and Title	AHC10v5 Qualification Code and Title	Mapping	Comment
	AHC32513 Certificate III in Aboriginal-sites Work		New qualification
	AHC51513 Diploma of Viticulture		New qualification

### Qualification Mapping – AHC10v3 to AHC10v4

AHC10v3 Qualification Code and Title	AHC10v4 Qualification Code and Title	Mapping	Comment
	AHC33412 Certificate III in Seed Production		New qualification
	AHC33512 Certificate III in Seed Testing		New qualification
	AHC41412 Certificate IV in Seed Production		New qualification
	AHC41512 Certificate IV in Seed Testing		New qualification

	AHC41612 Certificate IV in Organic Farming		New qualification
	AHC51812 Diploma of Organic Farming		New qualification

### Qualification Mapping – AHC10v2 to AHC10v3

AHC10v2 Qualification Code and Title	AHC10v3 Qualification Code and Title	Mapping	Comment
AHC21110 Certificate II in Irrigation	AHC21112 Certificate II in Irrigation	N	This qualification supersedes but is not equivalent to AHC21110
AHC32410 Certificate III in Irrigation	AHC32412 Certificate III in Irrigation	N	This qualification supersedes but is not equivalent to AHC32410
AHC40810 Certificate IV in Sports Turf Management	AHC40812 Certificate IV in Sports Turf Management	E	This qualification supersedes and is equivalent to AHC40810
AHC41110 Certificate IV in Irrigation	AHC41112 Certificate IV in Irrigation	N	This qualification supersedes but is not equivalent to AHC41110

### Qualification Mapping – AHC10v1 to AHC10v2

AHC10 Qualification Code and Title	AHC10v2 Qualification Code and Title	Mapping	Comment
AHC33310 Certificate III in Feedlot Feeding and Milling AHC33410 Certificate III in Feedlot Maintenance AHC33510 Certificate III in Feedlot Pen Riding	AHC33311 Certificate III in Feedlot Operations	E

## Unit Mapping AHC10v5 to AHC10v6

### Units of Competency Mapping – AHC10v4 to AHC10v5

AHC10v5 Unit Code	AHC10v5 Unit Title	AHC10v6 Unit Code	AHC10v6 Unit Title	Mapping	Comments
		AHCCFI501A	Provide technical advice on the Carbon Farming Initiative		New unit
		AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project		New unit
		AHCCFI503A	Advise on Carbon Farming Initiative project planning and implementation		New unit
		AHCCFI504A	Monitor and report on a Carbon Farming Initiative project		New unit
		AHCCFI505A	Aggregate Carbon Farming Initiative projects		New unit
		AHCCFI506A	Plan a Carbon Farming Initiative livestock project		New unit

		AHCCFI507A	Plan a Carbon Farming Initiative waste or manure management project		New unit
		AHCCFI508A	Plan a Carbon Farming Initiative project to sequester carbon in soil or biochar		New unit
		AHCCFI509A	Plan a Carbon Farming Initiative savannah burning, feral animal or rangelands project		New unit
		AHCCFI510A	Plan a Carbon Farming Initiative vegetation project		New unit
		AHCCFI511A	Plan a Carbon Farming Initiative project to avoid emissions from soil or crops		New unit
		AHCHBR308A	Maintain horses in a healthy state and safe environment		New unit
		AHCHBR309A	Determine nutritional requirements for horses		New unit
		AHCLSK335A	Conduct dropped ovary technique procedures for spaying cattle		New unit

## Unit Mapping AHC10v4 to AHC10v5

### Units of Competency Mapping – AHC10v4 to AHC10v5

AHC10v4 Unit Code	AHC10v4 Unit Title	AHC10v5 Unit Code	AHC10v5 Unit Title	Mapping	Comments
		AHCASW301A	Protect places of Aboriginal cultural significance		New unit

		AHCASW302A	Relate Aboriginal culture to sites work		New unit
		AHCASW303A	Identify and record Aboriginal-sites, objects and cultural landscapes		New unit
		AHCASW304A	Identify Indigenous culturally significant plants		New unit
		AHCASW305A	Work with Aboriginal ceremonial secret sacred materials		New unit
		AHCASW306A	Use technology in Aboriginal-sites work		New unit
		AHCASW307A	Map Aboriginal cultural landscapes		New unit
		AHCASW308A	Apply cultural significance to Aboriginal-sites and landscapes		New unit
		AHCASW309A	Interpret Aboriginal cultural landscape		New unit
		AHCASW310A	Move and store Aboriginal cultural material		New unit
		AHCASW311A	Apply relevant legislation in Aboriginal-sites		New unit

			work		
		AHCASW312A	Maintain an Aboriginal cultural site		New unit
		AHCASW501A	Survey and report on Aboriginal cultural sites		New unit
AHCILM303A	Work in an Indigenous community or organisation	AHCILM305A	Work with an Aboriginal Community or organisation	N	Supersedes and is not equivalent to AHCILM303A
AHCILM304A	Follow cultural protocols	AHCILM306A	Follow Aboriginal cultural protocols	N	Supersedes and is not equivalent to AHCILM304A
		AHCILM307A	Implement Aboriginal cultural burning practices		New unit
AHCILM507A	Plan for successful cultural practice at work	AHCILM510A	Plan for successful cultural practice at work	N	Supersedes and is not equivalent to AHCILM507A
		AHPCPM505A	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs		New unit
		AHCPHT209A	Produce trellis dried grapes		New unit
		AHCPHT408A	Oversee vineyard practices		New unit
		AHCPHT504A	Develop a grape production plan		New unit

		AHCPHT505A	Evaluate wine		New unit
		AHCPHT506A	Manage a wine making process		New unit

## Unit Mapping AHC10v3 to AHC10v4

### Units of Competency Mapping – AHC10v3 to AHC10v4

AHC10v3 Unit Code	AHC10v3 Unit Title	AHC10v4 Unit Code	AHC10v4 Unit Title	Mapping	Comments
		AHCORG404A	Arrange selling through community based marketing		New unit
		AHCORG405A	Implement sustainable practices in the organic farm based business		New unit
		AHCORG406A	Oversee compliance with an organic certification scheme		New unit
		AHCORG503A	Design and document an organic farm landscape		New unit
		AHCORG504A	Develop and manage a community based marketing supply chain		New unit
		AHCORG505A	Develop and monitor a sustainable production plan		New unit
		AHCORG506A	Manage an agro-ecology production system		New unit
		AHCSDP301A	Undertake preparation of land for seed crops		New unit
		AHCSDP302A	Establish seed crops		New unit
		AHCSDP303A	Maintain seed crops		New unit

		AHCSDP304A	Harvest seed crops		New unit
		AHCSDP401A	Plan a seed crop establishment program		New unit
		AHCSDP402A	Supervise seed crop establishment		New unit
		AHCSDP403A	Plan and implement seed crop maintenance		New unit
		AHCSDP404A	Supervise seed crop harvesting		New unit
		AHCSDP405A	Inspect a seed crop for quality assurance purposes		New unit
		AHCSDT301A	Prepare a working sample		New unit
		AHCSDT302A	Identify seeds		New unit
		AHCSDT303A	Perform a fluorescence test on seeds		New unit
		AHCSDT304A	Perform a seed purity analysis		New unit
		AHCSDT305A	Perform a seed moisture test		New unit
		AHCSDT306A	Perform a seed germination test		New unit
		AHCSDT307A	Perform a 'Determination of Other Seeds by Number' test		New unit
		AHCSDT401A	Maintain a quarantine approved laboratory		New unit
		AHCSDT402A	Prepare and maintain a seed reference collection		New unit
		AHCSDT403A	Perform an Anguina test on annual ryegrass seed		New unit
		AHCSDT404A	Develop and implement laboratory policy and		New unit

			procedures		
		AHCSDT405A	Handle & store quarantinable materials		New unit
		AHCSDT406A	Undertake internal audits in a seed laboratory		New unit
		AHCSDT407A	Perform an endophytic seed test		New unit
		AHCSDT408A	Perform an electrophoresis test on a seed sample		New unit
		AHCSDT409A	Perform a tetrazolium seed viability test		New unit
		AHCSDT410A	Perform a seed vigour test		New unit
		AHCSDT411A	Perform a 1000 seed weight test		New unit

## Unit Mapping AHC10v2 to AHC10v3

### Units of Competency Mapping – AHC10v2 to AHC10v3

AHC10v2 Unit Code	AHC10v2 Unit Title	AHC10v3 Unit Code	AHC10v3 Unit Title	Mapping	Comments
		AHCIRG207A	Carry out irrigation site preparation tasks		New unit
		AHCIRG208A	Assist with the installation and maintenance of pumps and flow-control devices for irrigation		New unit
		AHCIRG209A	Carry out installation tasks for low volume		New unit

			irrigation		
		AHCIRG210A	Carry out installation tasks for sprinkler irrigation		New unit
		AHCIRG211A	Assist with low volume irrigation operations		New unit. This unit has been developed based on AHCIRG202A to reflect the identified need to recognise specific systems.
		AHCIRG212A	Assist with sprinkler irrigation operations		New unit. This unit has been developed based on AHCIRG202A to reflect the identified need to recognise specific systems.
		AHCIRG213A	Assist with surface irrigation operations		New unit. This unit has been developed based on AHCIRG201A to reflect the identified need to recognise specific systems.
AHCIRG203A	Install micro-irrigation systems	AHCIRG214A	Install micro-irrigation systems for landscaping	E	Unit replaces earlier version.
		AHCIRG308A	Monitor soils		New unit

			under irrigation		
		AHCIRG309A	Interpret and apply irrigation to install pumps		New unit
		AHCIRG310A	Operate and maintain irrigation pumping systems		New unit
		AHCIRG311A	Install low volume irrigation components		New unit. This unit has been developed based on AHCIRG302A to reflect the identified need to recognise specific systems.
		AHCIRG312A	Install sprinkler irrigation components		New unit. This unit has been developed based on AHCIRG302A to reflect the identified need to recognise specific systems.
		AHCIRG313A	Install moving sprinkler irrigation components		New unit. This unit has been developed based on AHCIRG302A to reflect the identified need to recognise specific systems.
		AHCIRG314A	Install surface irrigation structures and		New unit. This unit has been developed based on

			components		AHCIRG302A to reflect the identified need to recognise specific systems.
		AHCIRG315A	Interpret irrigation plans and drawings		New unit
		AHCIRG316A	Implement a low volume irrigation maintenance program		New unit. This unit has been developed based on AHCIRG301A to reflect the identified need to recognise specific systems.
		AHCIRG317A	Implement a sprinkler irrigation maintenance program		New unit. This unit has been developed based on AHCIRG301A to reflect the identified need to recognise specific systems.
		AHCIRG318A	Implement a moving sprinkler irrigation maintenance program		New unit. This unit has been developed based on AHCIRG301A to reflect the identified need to recognise specific systems.
		AHCIRG319A	Implement a surface irrigation maintenance		New unit. This unit has been developed based on

			program		AHCIRG301A to reflect the identified need to recognise specific systems.
		AHCIRG320A	Maintain and repair drainage irrigation systems		New unit
		AHCIRG321A	Operate low volume irrigation systems		New unit. This unit has been developed based on AHCIRG305A to reflect the identified need to recognise specific systems.
		AHCIRG322A	Operate sprinkler irrigation systems		New unit. This unit has been developed based on AHCIRG305A to reflect the identified need to recognise specific systems.
		AHCIRG323A	Operate moving sprinkler irrigation systems		New unit
		AHCIRG324A	Operate surface irrigation systems		New unit. This unit has been developed based on AHCIRG304A to reflect the identified need to recognise

					specific systems.
		AHCIRG325A	Operate irrigation technology		New unit
		AHCIRG326A	Operate irrigation injection equipment		New unit
		AHCIRG327A	Implement an irrigation schedule		New unit
AHCIRG403A	Determine seasonal irrigation scheduling tasks				Removed unit. The job function described by this unit is covered by AHCIRG408A Schedule irrigations
AHCIRG409A	Implement, monitor and adjust irrigation schedules				Removed unit. The job function described by this unit is covered by AHCIRG408A Schedule irrigations
		AHCIRG410A	Select and manage pumping systems for irrigation		New unit
		AHCIRG411A	Construct and install a low volume irrigation		New unit. This unit has been developed based on AHCIRG401A

			system		to reflect the identified need to recognise specific systems.
		AHCIRG412A	Construct and install a sprinkler irrigation system		New unit. This unit has been developed based on AHCIRG401A to reflect the identified need to recognise specific systems.
		AHCIRG413A	Construct and install a moving sprinkler irrigation system		New unit. This unit has been developed based on AHCIRG401A to reflect the identified need to recognise specific systems.
		AHCIRG414A	Construct and install a surface irrigation system		New unit. This unit has been developed based on AHCIRG401A to reflect the identified need to recognise specific systems.
		AHCIRG415A	Interpret and apply irrigation designs		New unit
		AHCIRG416A	Supervise low volume irrigation maintenance		New unit

		AHCIRG417A	Supervise sprinkler irrigation maintenance		New unit
		AHCIRG418A	Supervise moving sprinkler irrigation maintenance		New unit
		AHCIRG419A	Supervise surface irrigation maintenance		New unit
		AHCIRG420A	Manage a low volume irrigation system		New unit. This unit has been developed based on AHCIRG303A to reflect the identified need to recognise specific systems.
		AHCIRG421A	Manage a sprinkler irrigation system		New unit. This unit has been developed based on AHCIRG303A to reflect the identified need to recognise specific systems.
		AHCIRG422A	Manage a moving sprinkler irrigation system		New unit. This unit has been developed based on AHCIRG303A to reflect the identified need to recognise specific systems.

		AHCIRG423A	Manage a surface irrigation system		New unit. This unit has been developed based on AHCIRG405A to reflect the identified need to recognise specific systems.
		AHCIRG424A	Construct and install an irrigation drainage system		New unit
		AHCIRG425A	Monitor and control irrigation drainage systems		New unit
		AHCIRG426A	Evaluate water supply for irrigation		New unit
		AHCIRG427A	Plan and supervise on-site irrigation installation and construction work.		New unit based on AHCIRG406A Plan on-site irrigation system installation and construction work and AHCIRG407A Supervise on-site irrigation system installation and construction work.
		AHCIRG428A	Provide irrigation sales and service		New unit

		AHCTRF502A	Manage sports turf renovation programs		New unit
		AHCTRF503A	Develop sports turf management programs		New unit
		AHCTRF504A	Manage sports turf facilities		New unit

## Unit Mapping RTD02, RTE03 and RTF03 to AHC10

### Unit Mapping RTD02, RTE03 and RTF03 to AHC10

Old Code	Old Title	AHC10 Code	AHC10 Title	Mapping	Comment
RTE3904 A	Keep records for a primary production business	AHCAGB301 A	Keep records for a primary production business	E	
RTE4203 A	Implement and monitor a property improvement plan	AHCAGB401 A	Implement and monitor a property improvement plan	E	
RTE4913 A	Analyse and interpret production data	AHCAGB402 A	Analyse and interpret production data	E	
RTE5523 A	Develop climate risk management strategies	AHCAGB501 A	Develop climate risk management strategies	E	
RTE5205 A	Plan and manage infrastructure requirements	AHCAGB502 A	Plan and manage infrastructure requirements	E	
RTE5912	Plan and monitor	AHCAGB503	Plan and	E	

A	production processes	A	monitor production processes		
RTE5922 A	Plan production for the whole land/farm based business	AHCAGB504 A	Plan production for the whole land/farm based business	E	
RTE5516 A	Develop a whole farm plan	AHCAGB505 A	Develop a whole farm plan	E	
RTE6906 A	Develop export markets for produce	AHCAGB601 A	Develop export markets for produce	E	
RTE6909 A	Manage estate planning	AHCAGB602 A	Manage estate planning	E	
RTE6501 A	Manage the production system	AHCAGB603 A	Manage the production system	E	
RTE6901 A	Analyse business performance	AHCAGB604 A	Analyse business performance	E	
RTE6904 A	Manage business capital	AHCAGB605 A	Manage business capital	E	
RTE6905 A	Manage price risk through trading strategy	AHCAGB606 A	Manage price risk through trading strategy	E	
RTE2132 A	Assist with artificial insemination procedures	AHCAIS201A	Assist with artificial insemination procedures	E	
RTE2123 A	Collect semen	AHCAIS301A	Collect semen	E	
RTE3146 A	Process and store semen	AHCAIS302A	Process and store semen	E	

RTE3101 A	Artificially inseminate livestock	AHCAIS303A	Artificially inseminate livestock	E	
RTE4107 A	Supervise artificial breeding and/or embryo transfer programs	AHCAIS401A	Supervise artificial breeding and/or embryo transfer programs	E	
RTF2001 A	Apply a range of treatments to trees	AHCARB201 A	Apply a range of treatments to trees	E	
RTC2005 A	Fell small trees	AHCARB202 A	Fell small trees	E	
RTF2009 A	Perform above ground pruning	AHCARB203 A	Perform above ground pruning	E	
RTF2027 A	Undertake standard climbing techniques	AHCARB204 A	Undertake standard climbing techniques	E	
RTC2304 A	Operate and maintain chainsaws	AHCARB205 A	Operate and maintain chainsaws	E	
RTF2311 A	Undertake stump removal	AHCARB206 A	Undertake stump removal	E	
		AHCARB207 A	Perform ground based rigging		New unit
RTF3015 A	Implement a tree maintenance program	AHCARB301 A	Implement a tree maintenance program	E	
		AHCARB302 A	Conduct tree inspections		New unit
RTF3017 A	Implement a tree pruning program	AHCARB303 A	Implement a tree pruning	E	

			program		
RTF3007 A	Fell large trees	AHCARB304 A	Fell trees with advanced techniques	N	
RTF3019 A	Remove trees in confined spaces	AHCARB305 A	Remove trees in confined spaces	E	
RTF3702 A	Undertake aerial rescue	AHCARB306 A	Undertake aerial rescue	E	
RTF3031 A	Undertake complex tree climbing	AHCARB307 A	Undertake complex tree climbing	N	
RTF3032 A	Install cable and bracing	AHCARB308 A	Install cable and bracing	E	
RTF3035 A	Implement a tree protection program	AHCARB309 A	Implement a tree protection program	E	
		AHCARB310 A	Perform aerial rigging		New unit
RTF5018 A	Assess trees	AHCARB501 A	Assess trees	N	
		AHCARB502 A	Identify, select and specify trees		New unit
		AHCARB503 A	Diagnose tree diseases		New unit
RTF4016 A	Plan a tree protection program	AHCARB504 A	Develop a tree protection program	N	
		AHCARB505 A	Document and audit tree work		New unit
RTE1001 A	Support agricultural crop work	AHCBAC101 A	Support agricultural crop work	E	
RTE2011	Assist agricultural	AHCBAC201	Assist	E	

A	crop establishment	A	agricultural crop establishment		
RTE2029 A	Assist agricultural crop maintenance	AHCBAC202 A	Assist agricultural crop maintenance	E	
RTE2030 A	Assist agricultural crop harvesting	AHCBAC203 A	Assist agricultural crop harvesting	E	
RTE2212 A	Prepare grain storages	AHCBAC204 A	Prepare grain storages	E	
RTE2303 A	Operate cane haulage vehicle	AHCBAC205 A	Operate cane haulage vehicle	E	
		AHCBAC301 A	Conserve forage		New unit
RTE3006 A	Establish pastures and crops for livestock production	AHCBAC302 A	Establish pastures and crops for livestock production	E	
		AHCBAC303 A	Prepare to receive grains/seeds		New unit
		AHCBAC304 A	Test grains/seeds on receipt		New unit
RTE3024 A	Undertake preparation of land for agricultural crop production	AHCBAC305 A	Undertake preparation of land for agricultural crop production	E	
RTE3029 A	Establish agricultural crops	AHCBAC306 A	Establish agricultural crops	E	

RTE3022 A	Undertake agricultural crop maintenance activities	AHCBAC307 A	Maintain agricultural crops	E	
RTE3009 A	Undertake agricultural crop harvesting activities	AHCBAC308 A	Undertake agricultural crop harvesting activities	E	
RTE4011 A	Manage pastures for livestock production	AHCBAC401 A	Manage pastures for livestock production	E	
RTE4009 A	Plan a pasture establishment program	AHCBAC402 A	Plan a pasture establishment program	E	
RTE4018 A	Supervise agricultural crop establishment	AHCBAC403 A	Supervise agricultural crop establishment	E	
RTE4010 A	Supervise agricultural crop maintenance	AHCBAC404 A	Plan and implement agricultural crop maintenance	E	
RTE4026 A	Supervise agricultural crop harvesting	AHCBAC405 A	Supervise agricultural crop harvesting	E	
RTE4008 A	Maintain grain quality in storage	AHCBAC406 A	Maintain grain quality in storage	E	
RTE3037 A	Save, prepare and store agricultural seed	AHCBAC407 A	Save, prepare and store agricultural seed	E	
RTE5014 A	Manage agricultural crop production	AHCBAC501 A	Manage agricultural crop production	E	

		AHCBAC502 A	Manage forage conservation		New unit
RTE5002 A	Manage integrated crop and pasture production	AHCBAC503 A	Manage integrated crop and pasture production	E	
RTE5007 A	Plan and manage a stored grain program	AHCBAC504 A	Plan and manage a stored grain program	E	
RTE5006 A	Plan and manage long-term weed, pest and/or disease control in crops	AHCBAC505 A	Plan and manage long-term weed, pest and/or disease control in crops	E	
RTE5015 A	Manage the harvest of agricultural and horticultural crops	AHCBAC506 A	Manage the harvest of crops	E	
RTE5016 A	Develop production plans for crops	AHCBAC507 A	Develop production plans for crops	E	
RTE2156 A	Support beekeeping work	AHCBEK201 A	Assist beekeeping work	E	
RTE2305 A	Use a bee smoker	AHCBEK202 A	Use a bee smoker	E	
RTE2157 A	Open and reassemble a beehive	AHCBEK203 A	Open and reassemble a beehive	E	
RTE2217 A	Construct and repair beehives	AHCBEK204 A	Construct and repair beehives	E	
RTE3153 A	Manage honey bee swarms	AHCBEK301 A	Manage honey bee swarms	E	
RTE3155 A	Manipulate honey bee brood	AHCBEK302 A	Manipulate honey bee	E	

			brood		
RTE3154 A	Requeen a honey bee colony	AHCBEK303 A	Re-queen a honey bee colony	E	
RTE3320 A	Remove a honey crop from a hive	AHCBEK304 A	Remove a honey crop from a hive	E	
RTE3321 A	Extract honey	AHCBEK305 A	Extract honey	E	
RTE3415 A	Manage pests and disease within a honey bee colony	AHCBEK306 A	Manage pests and disease within a honey bee colony	E	
RTE4131 A	Collect and store propolis	AHCBEK401 A	Collect and store propolis	E	
RTE4132 A	Perform queen bee artificial insemination	AHCBEK402 A	Perform queen bee artificial insemination	E	
RTE4122 A	Produce and harvest royal jelly	AHCBEK403 A	Produce and harvest royal jelly	E	
RTE4128 A	Provide bee pollination services	AHCBEK404 A	Provide bee pollination services	E	
RTE4121 A	Select and establish an apiary site	AHCBEK405 A	Select and establish an apiary site	E	
RTE4130 A	Trap and store pollen	AHCBEK406 A	Trap and store pollen	E	
RTE3156 A	Rear queen bees	AHCBEK407 A	Rear queen bees	E	Unit recoded
RTD2312 A	Inspect machinery for plant, animal and soil material	AHCBIO201A	Inspect and clean machinery for plant, animal and soil material	E	

RTE2707 B	Follow site quarantine procedures	AHC BIO202A	Follow site quarantine procedures	E	
RTE3410 A	Work effectively in an emergency disease or plant pest response	AHC BIO301A	Work effectively in an emergency disease or plant pest response	E	
RTE3407 A	Identify and report unusual disease or plant pest signs	AHC BIO302A	Identify and report unusual disease or plant pest signs	E	
RTE3408 A	Carry out emergency disease or plant pest control procedures at infected premises	AHC BIO303A	Carry out emergency disease or plant pest control procedures at infected premises	E	
RTE3409 A	Carry out movement and security procedures	AHC BIO304A	Carry out movement and security procedures	E	
		AHC BIO305A	Monitor and review biosecurity measures		New unit
RTE4408 A	Supervise activities on infected premises	AHC BIO401A	Supervise activities on infected premises	E	
RTE4409 A	Carry out field surveillance for a specific emergency disease or plant pest	AHC BIO402A	Carry out field surveillance for a specific emergency disease or plant pest	E	
		AHC BIO403A	Plan and		New unit

			implement a biosecurity program		
RTE5407 A	Manage active operational emergency disease or plant pest sites	AHCBIO501A	Manage active operational emergency disease or plant pest sites	E	
RTE5406 A	Manage the implementation of an emergency disease or plant pest control program	AHCBIO502A	Manage the implementation of an emergency disease or plant pest control program	E	
RTE6401 A	Plan and oversee an emergency disease or plant pest control program	AHCBIO601A	Plan and oversee an emergency disease or plant pest control program	E	
RTE3907 A	Use hand held e-business tools	AHCBUS301 A	Use hand held e-business tools	E	
RTE4901 A	Administer finance, insurance and legal requirements	AHCBUS401 A	Administer finance, insurance and legal requirements	E	
RTC4905 A	Cost a project	AHCBUS402 A	Cost a project	E	
RTE4902 A	Support and review business structures and relationships	AHCBUS403 A	Support and review business structures and relationships	E	
RTC4911 A	Operate within a budget framework	AHCBUS404 A	Operate within a budget	E	

			framework		
RTE4914 A	Participate in an e-business supply chain	AHCBUS405 A	Participate in an e-business supply chain	E	
RTE5807 A	Manage staff	AHCBUS501 A	Manage staff	E	
RTE5921 A	Market products and services	AHCBUS502 A	Market products and services	E	
RTE5920 A	Negotiate and monitor contracts/commercial agreements	AHCBUS503 A	Negotiate and monitor contracts	E	
RTC5908 A	Prepare estimates, quotes and tenders	AHCBUS504 A	Prepare estimates, quotes and tenders	E	
RTE5901 A	Develop a marketing plan	AHCBUS505 A	Develop a marketing plan	E	
RTE5902 A	Develop and review a business plan	AHCBUS506 A	Develop and review a business plan	E	
RTE5906 A	Monitor and review business performance	AHCBUS507 A	Monitor and review business performance	E	
RTE5916 A	Prepare and monitor budgets and financial reports	AHCBUS508 A	Prepare and monitor budgets and financial reports	E	
RTE6907 A	Manage capital works	AHCBUS601 A	Manage capital works	E	
RTD6502 A	Review management plans and strategies	AHCBUS602 A	Review management plans and strategies	E	
RTE6903	Develop and review a	AHCBUS603	Develop and	E	

A	strategic plan	A	review a strategic plan		
RTE6908 A	Design and manage the enterprise quality management system	AHCBUS604 A	Design and manage the enterprise quality management system	E	
RTE6803 A	Manage human resources	AHCBUS605 A	Manage human resources	E	
		AHCBUS606 A	Develop a monitoring, evaluation and reporting program		New unit
		AHCBUS607 A	Implement a monitoring, evaluation and reporting program		New unit
		AHCBUS608 A	Manage risk		New unit
RTD4909 A	Prepare project acquittal	AHCCCF401 A	Prepare project acquittal	E	
RTD4910 A	Report on project	AHCCCF402 A	Report on project	E	
RTD4806 A	Obtain and manage sponsorship	AHCCCF403 A	Obtain and manage sponsorship	E	
RTD4912 A	Contribute to association governance	AHCCCF404 A	Contribute to association governance	E	
RTD4804 A	Develop community networks	AHCCCF405 A	Develop community networks	E	
RTD4805	Facilitate ongoing	AHCCCF406	Facilitate ongoing group	E	

A	group development	A	development		
RTD4807 A	Obtain resources from community and group	AHCCCF407 A	Obtain resources from community and group	E	
RTD4808 A	Promote community programs	AHCCCF408 A	Promote community programs	E	
RTD4505 A	Participate in assessments of project submissions	AHCCCF409 A	Participate in assessments of project submissions	E	
RTD4810 A	Support individuals in resource management change processes	AHCCCF410 A	Support individuals in resource management change processes	E	
RTD4802 A	Develop approaches to include cultural and human diversity	AHCCCF411 A	Develop approaches to include cultural and human diversity	E	
RTD3811 A	Coordinate board/committee elections	AHCCCF412 A	Coordinate board/committee elections	E	
RTD3816 A	Service committees	AHCCCF413 A	Service committees	E	
RTD3812 A	Coordinate fund-raising activities	AHCCCF414 A	Coordinate fund-raising activities	E	
RTD3813 A	Coordinate social events to support group purposes	AHCCCF415 A	Coordinate social events to support group purposes	E	
RTD3814 A	Present proposed courses of action to	AHCCCF416 A	Present proposed courses of	E	

	meeting		action to meeting		
RTD5509 A	Evaluate project submissions	AHCCCF501 A	Evaluate project submissions	E	
RTD5805 A	Facilitate development of group goals and projects	AHCCCF502 A	Facilitate development of group goals and projects	E	
RTD5806 A	Promote group formation and development	AHCCCF503 A	Promote group formation and development	E	
RTD5802 A	Support group and community changes in resource management	AHCCCF504 A	Support group and community changes in resource management	E	
RTD5910 A	Contribute to regional planning process	AHCCCF505 A	Contribute to regional planning process	E	
RTD5911 A	Manage the incorporation of a group	AHCCCF506 A	Manage the incorporation of a group	E	
RTD6505 A	Map regional issues and stakeholders	AHCCCF601 A	Map regional issues and stakeholders	E	
RTC1701 A	Follow basic chemical safety rules	AHCCHM101 A	Follow basic chemical safety rules	E	
RTC2706 A	Apply chemicals under supervision	AHCCHM201 A	Apply chemicals under supervision	E	
		AHCCHM301 A	Conduct fumigation in enclosed		New unit

			spaces		
		AHCCHM302 A	Fumigate soil using chemicals		New unit
RTC3704 A	Prepare and apply chemicals	AHCCHM303 A	Prepare and apply chemicals	E	
RTC3705 A	Transport, handle and store chemicals	AHCCHM304 A	Transport, handle and store chemicals	E	
		AHCCHM305 A	Conduct manual fumigation of vertebrate and invertebrate pests		New unit
RTC4702 A	Minimise risks in the use of chemicals	AHCCHM401 A	Minimise risks in the use of chemicals	E	
RTC4703 A	Plan and implement a chemical use program	AHCCHM402 A	Plan and implement a chemical use program	E	
RTD4303 A	Prepare safe operating procedures for calibration of equipment	AHCCHM403 A	Prepare safe operating procedures for calibration of equipment	E	
RTC5702 A	Develop and manage a chemical use strategy	AHCCHM501 A	Develop and manage a chemical use strategy	E	
RTE2506 A	Assess and receive raw materials for composting	AHCCOM201 A	Assess and receive raw materials for composting	E	
RTE2709	Recognise and respond to fire	AHCCOM202	Recognise and respond to fire	E	

A	emergencies on a composting site	A	emergencies on a composting site		
RTE2507 A	Recognise raw materials, production processes and products on a composting site	AHCCOM203 A	Recognise raw materials, production processes and products on a composting site	E	
RTE3322 A	Operate compost processing plant, machinery and equipment	AHCCOM301 A	Operate compost processing plant, machinery and equipment	E	
RTE3323 A	Dispatch materials and composted product	AHCCOM302 A	Dispatch materials and composted product	E	
RTE2315 A	Operate a compost bagging process	AHCCOM303 A	Operate a compost bagging process	E	
RTE4519 A	Develop a composting recipe	AHCCOM401 A	Develop a composting recipe	E	
RTE4520 A	Plan and schedule compost production	AHCCOM402 A	Plan and schedule compost production	E	
RTE5919 A	Identify and secure raw materials supply for compost production	AHCCOM501 A	Identify and secure raw materials supply for compost production	E	
RTE4113 A	Handle, store and grade deer velvet	AHCDER401 A	Handle, store and grade deer	E	

			velvet		
RTE5105 A	Comply with deer industry national velvet accreditation requirements	AHCDER501 A	Comply with deer industry national velvet accreditation requirements	E	
RTE5108 A	Harvest deer velvet	AHCDER502 A	Harvest deer velvet	E	
		AHCDES501 A	Design sustainable landscapes		New unit
RTF5010 A	Prepare a landscape project design	AHCDES502 A	Prepare a landscape project design	E	
		AHCDES503 A	Assess landscape sites		New unit
		AHCDES504 A	Design for construction of landscape features		New unit
RTE2604 A	Maintain drainage systems	AHCDRG201 A	Maintain drainage systems	E	
RTE3603 A	Install drainage systems	AHCDRG301 A	Install drainage systems	E	
RTE3606 A	Measure drainage system performance	AHCDRG302 A	Measure drainage system performance	E	
RTE3604 A	Troubleshoot drainage systems	AHCDRG303 A	Troubleshoot drainage systems	E	
RTE5607 A	Design drainage systems	AHCDRG501 A	Design drainage systems	E	
RTE2103	Carry out milking shed				Unit removed

A	routines				
RTE2112 A	Milk livestock	AHCDRY201 A	Milk livestock	E	
RTE3117 A	Coordinate milking operations	AHCDRY301 A	Coordinate milking operations	E	
RTE3308 A	Operate a dairy recycling system	AHCDRY302 A	Operate a dairy recycling system	E	
RTE4112 A	Manage milking shed routines	AHCDRY401 A	Manage milking shed routines	E	
RTD3709 A	Handle and store explosives	AHCEXP301 A	Handle and store explosives	E	
RTD3710 A	Identify and select explosive products	AHCEXP302 A	Identify and select explosive products	E	
RTD3711 A	Prepare and use explosives	AHCEXP303 A	Prepare and use explosives	E	
RTD2126 A	Recognise animals	AHCFAU201 A	Recognise fauna	E	
RTD3125 A	Respond to wildlife emergencies	AHCFAU301 A	Respond to wildlife emergencies	E	
RTD5102 A	Manage fauna populations	AHCFAU501 A	Manage fauna populations	E	
RTE2002 A	Assist with prescribed burning	AHCFIR201A	Assist with prescribed burning	E	
RTD5513 A	Manage wildfire hazard reduction programs	AHCFIR501A	Manage wildfire hazard reduction programs	E	
RTE1104	Support horse work	AHCHBR101	Support horse	E	

A		A	work		
RTE2104 A	Carry out regular horse observation	AHCHBR201 A	Monitor horse health and welfare	E	
RTE2148 A	Handle young horses	AHCHBR202 A	Handle young horses	E	
RTE2121 A	Provide daily care for horses	AHCHBR203 A	Provide daily care for horses	E	
RTE2137 A	Assist with natural mating procedures and parturition of horses	AHCHBR204 A	Assist with mating procedures and parturition of horses	E	
RTE3104 A	Carry out basic dentition care procedures on horses				Unit removed
RTE3137 A	Carry out basic hoof care procedures	AHCHBR302 A	Carry out basic hoof care procedures	E	
RTE3106 A	Carry out mare mating procedures	AHCHBR303 A	Carry out mare mating or artificial insemination procedures	E	
RTE3102 A	Educate, ride and care for horses and equipment	AHCHBR304 A	Educate, ride and care for horses and equipment	E	Minor changes - remove breaking in and shoeing from PCs
RTE3112 A	Handle and care for stallions	AHCHBR305 A	Handle and care for stallions	E	
RTE3144 A	Prevent and treat equine injury and disease	AHCHBR306 A	Prevent and treat equine injury and disease	E	

RTE3148 A	Assess conformation of horses	AHCHBR307 A	Assess suitability of horses for stock work	E	
RTE4101 A	Carry out stud stable management duties	AHCHBR401 A	Carry out stud stable management duties	E	
RTE4106 A	Supervise raising young horses	AHCHBR402 A	Supervise raising young horses	E	
RTF3033 A	Implement a maintenance program for hydroponic systems	AHCHYD301 A	Implement a maintenance program for hydroponic systems	E	
RTF3215 A	Install hydroponic systems	AHCHYD302 A	Install hydroponic systems	E	
RTF5302 A	Develop a plan for a hydroponic system	AHCHYD501 A	Develop a plan for a hydroponic system	E	
RTD2501 A	Maintain cultural places	AHCILM201A	Maintain cultural places	E	
RTD2803 A	Observe and report plants and/or animals	AHCILM202A	Observe and report plants and/or animals	E	
RTD2802 A	Record information about country	AHCILM203A	Record information about country	E	
RTD3817 A	Propose appropriate uses of traditional customs	AHCILM301A	Propose appropriate uses of traditional customs	E	
RTD3802 A	Provide appropriate information on	AHCILM302A	Provide appropriate	E	

	cultural knowledge		information on cultural knowledge		
RTD3903 A	Work in an Indigenous community or organisation	AHCILM303A	Work in an Indigenous community or organisation	E	
		AHCILM304A	Follow cultural protocols		New unit
RTD4508 A	Protect places of cultural significance	AHCILM401A	Protect places of cultural significance	E	
RTD4509 A	Report on place of potential cultural significance	AHCILM402A	Report on place of potential cultural significance	E	
RTD4501 A	Contribute to the proposal for a negotiated outcome for a given area of country	AHCILM403A	Contribute to the proposal for a negotiated outcome for a given area of country	E	
RTD4809 A	Record and document community history	AHCILM404A	Record and document community history	E	
RTD4906 A	Develop work practices to accommodate cultural identity	AHCILM405A	Develop work practices to accommodate cultural identity	E	
RTD5502 A	Conduct field research into natural and cultural resources	AHCILM501A	Conduct field research into natural and cultural resources	E	
RTD5507	Develop conservation strategies for cultural	AHCILM502A	Develop conservation	E	

A	resources		strategies for cultural resources		
RTD5511 A	Manage restoration of cultural places	AHCILM503A	Manage restoration of cultural places	E	
RTD5508 A	Develop strategies for Indigenous land or sea management	AHCILM504A	Develop strategies for Indigenous land or sea management	E	
RTD5904 A	Map relationship of business enterprise to culture and country	AHCILM505A	Map relationship of business enterprise to culture and country	E	
RTD5803 A	Operate within community cultures and goals	AHCILM506A	Operate within community cultures and goals	E	
RTD5907 A	Plan for successful cultural practice at work	AHCILM507A	Plan for successful cultural practice at work	E	
RTD5517 A	Propose a negotiated outcome for a given area of country	AHCILM508A	Propose a negotiated outcome for a given area of country	E	
		AHCILM509A	Plan burning activities for natural and cultural resource management		New unit
RTD6801 A	Manage cultural processes in an Indigenous	AHCILM601A	Manage cultural processes in an Indigenous	E	

	organisation		organisation		
RTE2201 A	Carry out basic electric fencing operations	AHCINF201A	Carry out basic electric fencing operations	E	
RTC2209 A	Install, maintain and repair fencing	AHCINF202A	Install, maintain and repair fencing	E

## Overview

### What is a Training Package?

A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing peoples skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

### How do Training Packages fit within the National Skills Framework?

The National Skills Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the Australian Quality Training Framework 2010 (AQTF 2010), and Training Packages endorsed by the National Quality Council (NQC).

### How are Training Packages developed?

Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

### How do Training Packages encourage flexibility?

Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained. Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

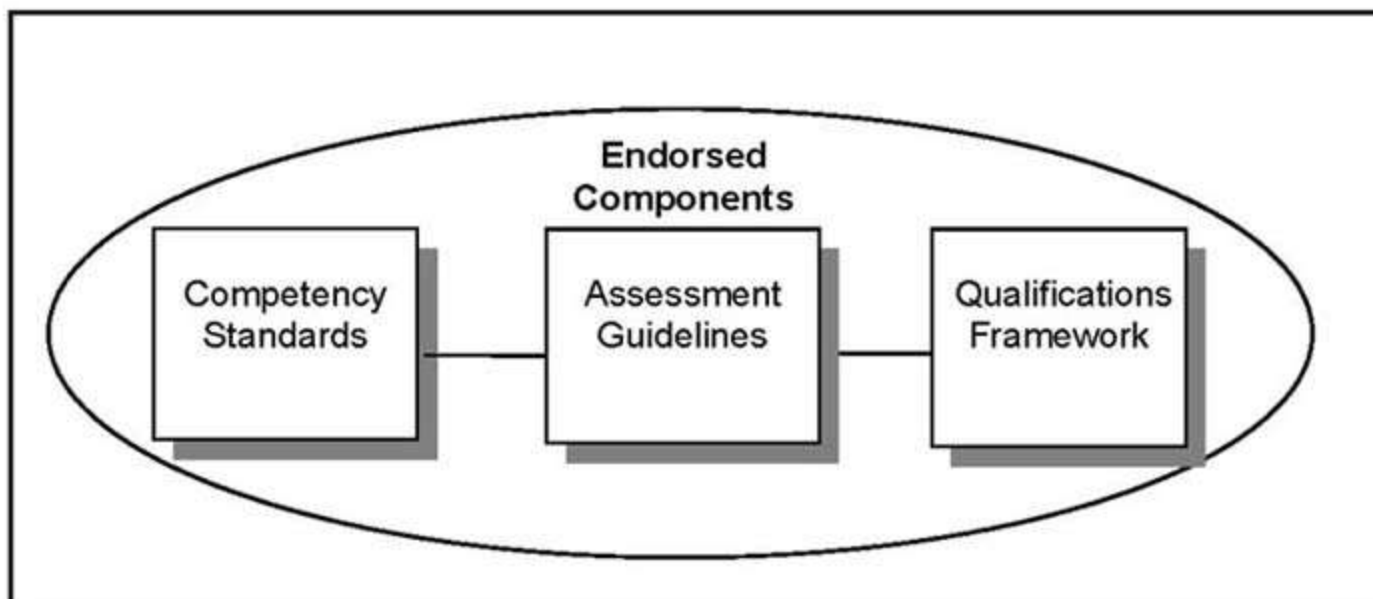

### **Who can deliver and assess using Training Packages?**

Training and assessment using Training Packages must be conducted by a Registered Training Organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO, as specified in the AQTF 2010.

### **Training Package Components**

Training Packages are made up of mandatory components endorsed by the NQC, and optional support materials.

The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used.

### **Competency Standards**

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

### **Assessment Guidelines**

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the AQTF 2010. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

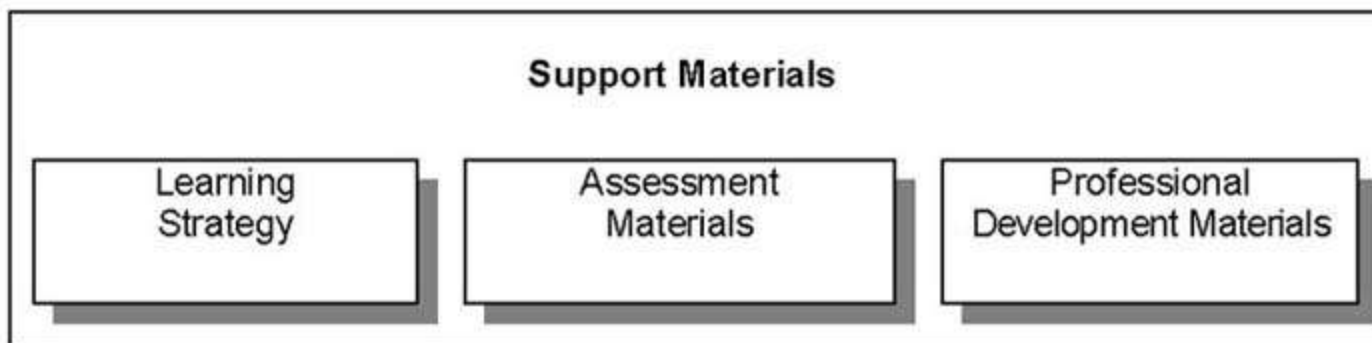

### Qualifications Framework

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the "packaging rules". The packaging rules must be followed to ensure the integrity of nationally recognised qualifications issued.

### Training Package Support Materials

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.

Training Package support materials are produced "by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

Where such materials have been quality assured through a process of "noting" by the NQC, they display the following official logo. Noted support materials are listed on the National Training Information Service (NTIS), together with a detailed description and information on the type of product and its availability < [www.ntis.gov.au](http://www.ntis.gov.au)>.

It is not compulsory to submit support materials for noting; any resources that meet the requirements of the Training Package can be used.

### Training Package, Qualification and Unit of Competency Codes

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, **and with the code always before the title.**

### Training Package Codes

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example AHC10. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

### Qualification Codes

Within each Training Package, each qualification has a unique eight-character code, for example AHC10110. Qualification codes are developed as follows:

- the first three letters identify the Training Package;
- the first number identifies the qualification level (noting that, in the qualification titles themselves, arabic numbers are **not** used);
- the next two numbers identify the position in the sequence of the qualification at that level; and
- the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

Within each Training Package, each unit of competency has a unique code. Unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package. Unit codes are developed as follows:

- a typical code is made up of 12 characters, normally a mixture of uppercase letters and numbers, as in AHCAGB301A;
- the first three characters signify the Training Package - AHC10 - in the above example and up to eight characters, relating to an industry sector, function or skill area, follow;
- the last character is always a letter and identifies the unit of competency version. An "A" at the end of the code indicates that this is the original unit of competency. "B", or another incremented version identifier means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent; and
- where changes are made that alter the outcome, a new code is assigned and the title is changed.

### Training Package, Qualification and Unit of Competency Titles

There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

### Training Package Titles

The title of each endorsed Training Package is unique and relates the Training Packages broad industry coverage.

### **Qualification Titles**

The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma, Advanced Diploma, Vocational Graduate Certificate, or Vocational Graduate Diploma;
- this is followed by the words "in" for Certificates I to IV, and "of" for Diploma, Advanced Diploma, Vocational Graduate Certificate and Vocational Graduate Diploma;
- then, the industry descriptor, for example Telecommunications; and
- then, if applicable, the occupational or functional stream in brackets, for example (Computer Systems).

For example:

- AHC10110 Certificate I in Conservation and Land Management

### **Unit of Competency Titles**

Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example:

- AHCAGB301A Keep records for a primary production business

## **Qualifications Framework**

### **The Australian Qualifications Framework**

#### **What is the Australian Qualifications Framework?**

A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the AQF Implementation Handbook.

[http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF\\_Handbook\\_07.pdf](http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf) The AQF provides a comprehensive, nationally consistent framework for all qualifications in

post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

### **Qualifications**

Training Packages can incorporate the following eight AQF qualifications.

- Certificate I in ...

- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...
- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

Graduate Certificates and Graduate Diplomas can also be awarded in the vocational education and training sector under certain conditions see the *AQF Implementation Handbook* for details.

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **Statement of Attainment**

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). Issuance of Statements of Attainment must comply with the advice provided in the current *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Under the AQTF 2010, RTOs must recognise the achievement of competencies as recorded on a qualification testamur or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

### **AQF Guidelines and Learning Outcomes**

The *AQF Implementation Handbook* provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

#### **Certificate I**

##### *Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

##### *Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas;
- demonstrate basic practical skills, such as the use of relevant tools;
- perform a sequence of routine tasks given clear direction

- receive and pass on messages/information.

## **Certificate II**

### *Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

### *Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas;
- apply a defined range of skills;
- apply known solutions to a limited range of predictable problems;
- perform a range of tasks where choice between a limited range of options is required;
- assess and record information from varied sources;
- take limited responsibility for own outputs in work and learning.

## **Certificate III**

### *Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied

across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

### *Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge

- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.

## **Certificate IV**

### *Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.

Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

### *Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.

## **Diploma**

### *Characteristics of Learning Outcomes*

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation

## **Advanced Diploma**

### *Characteristics of Learning Outcomes*

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

### *Distinguishing Features of Learning Outcomes*

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.

## **Vocational Graduate Certificate**

### *Characteristics of competencies or learning outcomes*

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.

- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

#### *Distinguishing features of learning outcomes*

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
- Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
- Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.

### **Vocational Graduate Diploma**

#### *Characteristics of competencies or learning outcomes*

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth, depth and complexity involving the initiation, analysis, design, planning, execution and evaluation of major functions, both broad and highly specialised, in highly varied and highly specialised contexts.
- Further specialisation within a systematic and coherent body of knowledge.
- Applications involve making high-level, fully independent, complex judgements in broad planning, design, operational, technical and management functions in highly varied and highly specialised contexts. They may include full responsibility and accountability for all aspects of work and functions of others, including planning, budgeting and strategy development.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

#### *Distinguishing features of learning outcomes*

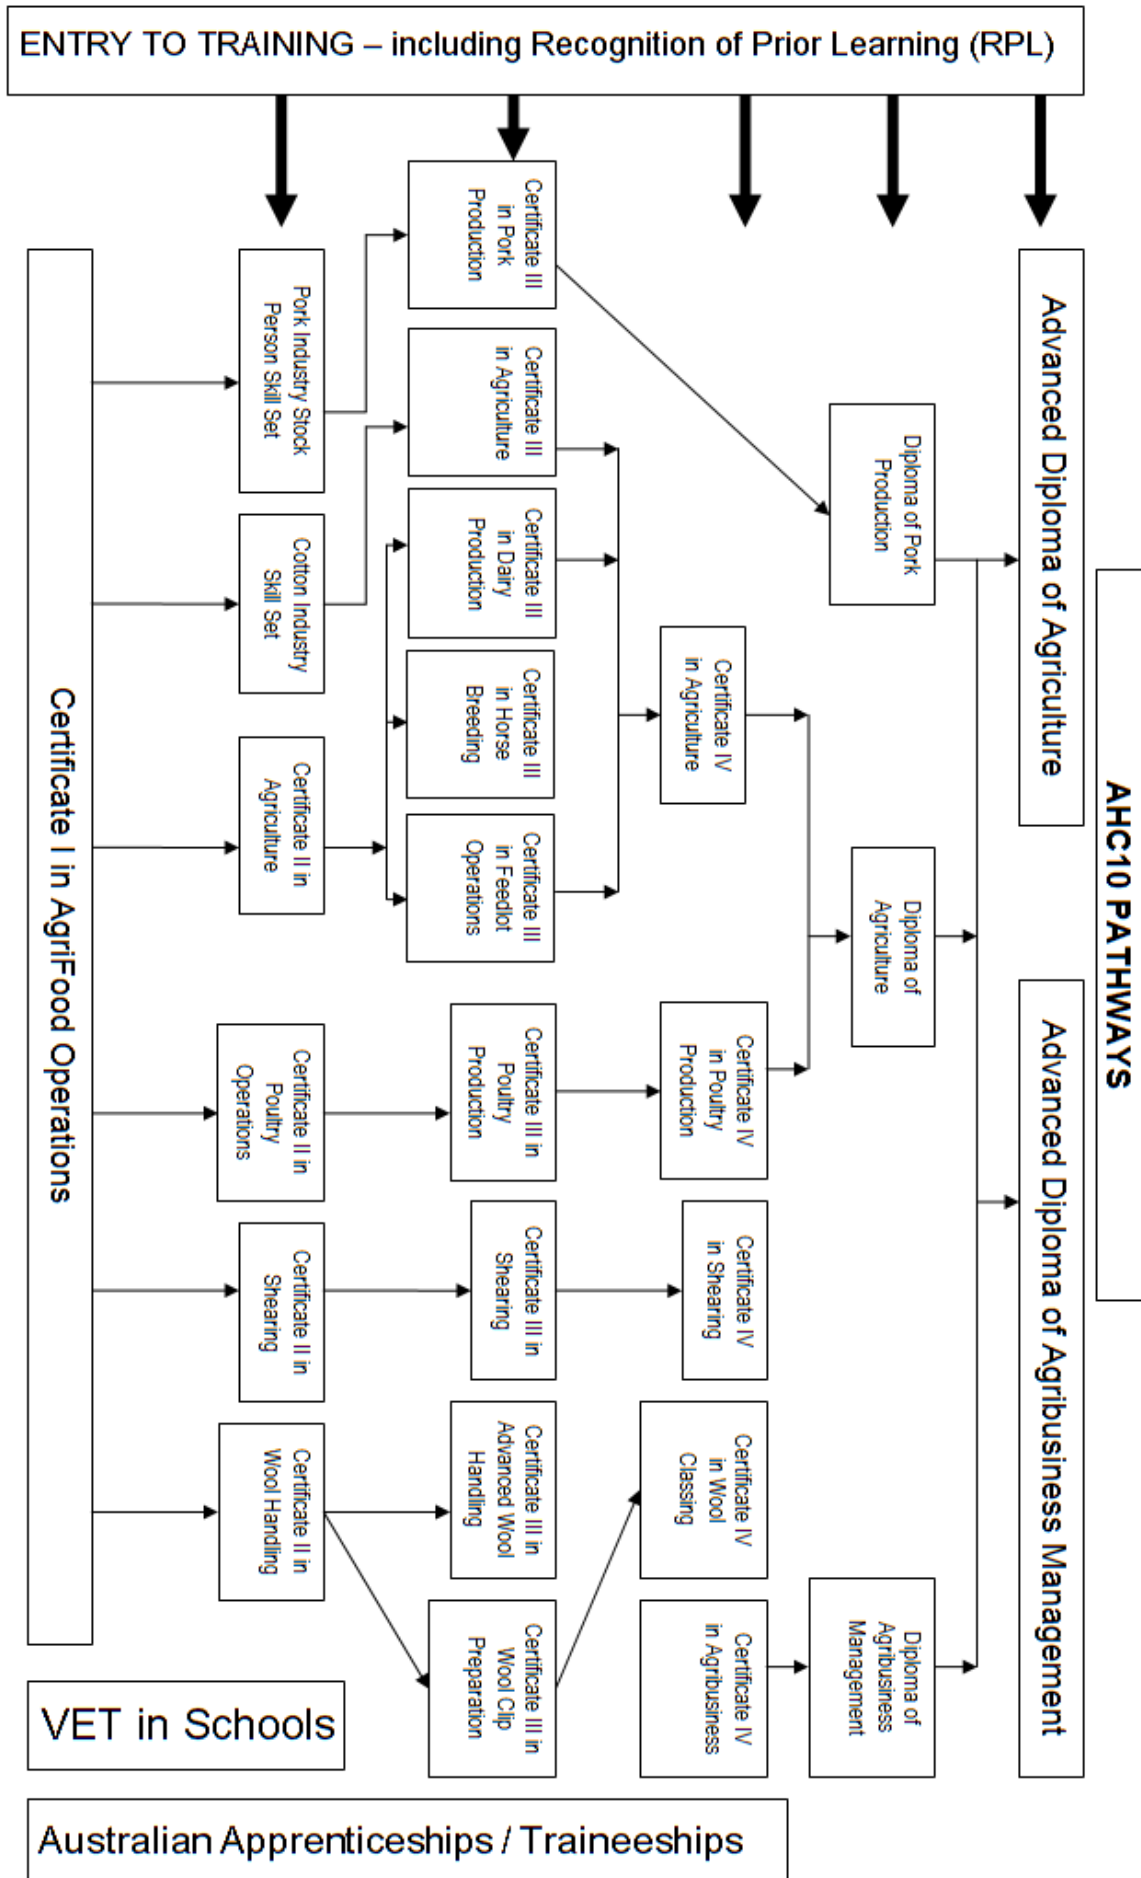

- Demonstrate the self-directed development and achievement of broad and highly specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major functions, both broad and within highly varied and highly specialised contexts.

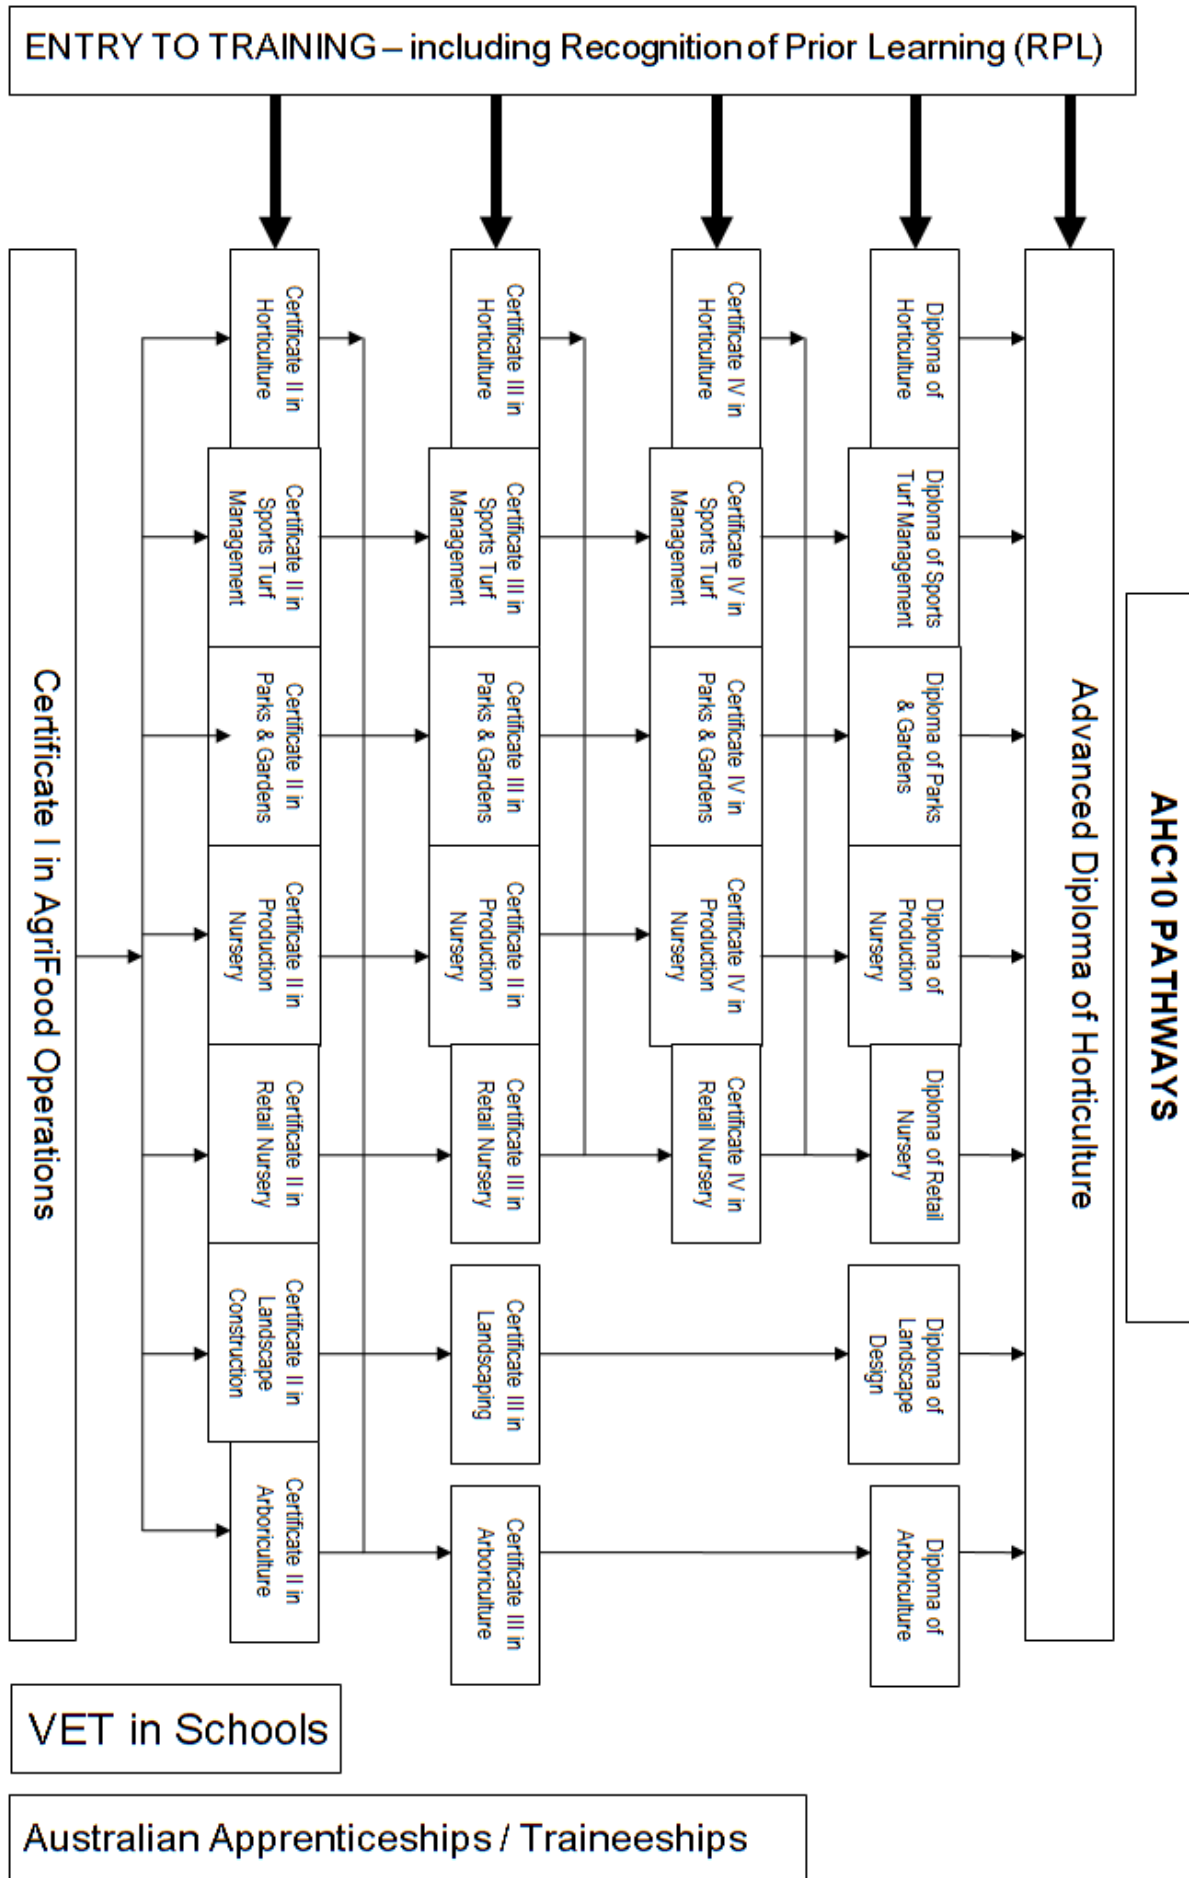

- Generate and evaluate complex ideas through the analysis of information and concepts at an abstract level.
- Demonstrate an expert command of wide-ranging, highly specialised, technical, creative or conceptual skills in complex and highly specialised or varied contexts.
- Demonstrate full responsibility and accountability for personal outputs.
- Demonstrate full responsibility and accountability for all aspects of the work or functions of others, including planning, budgeting and strategy.

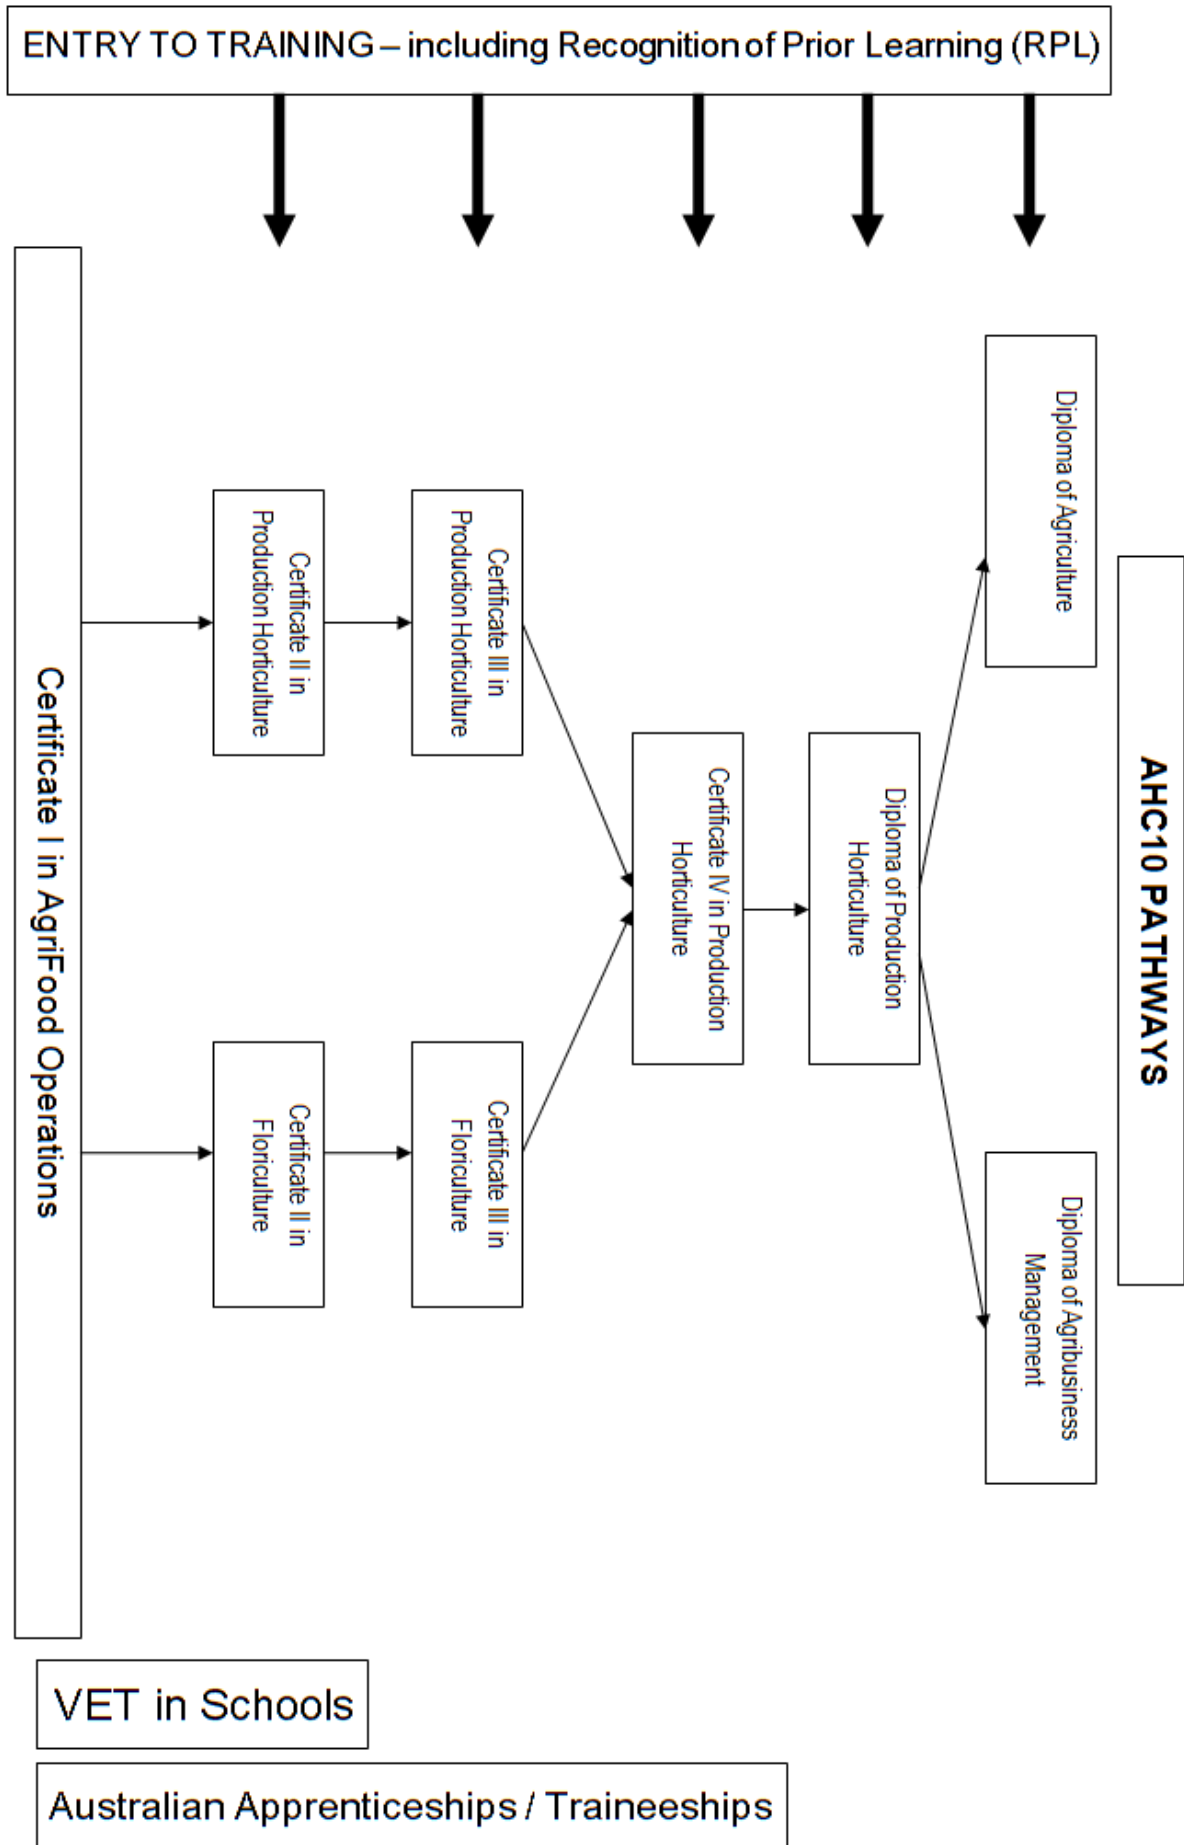

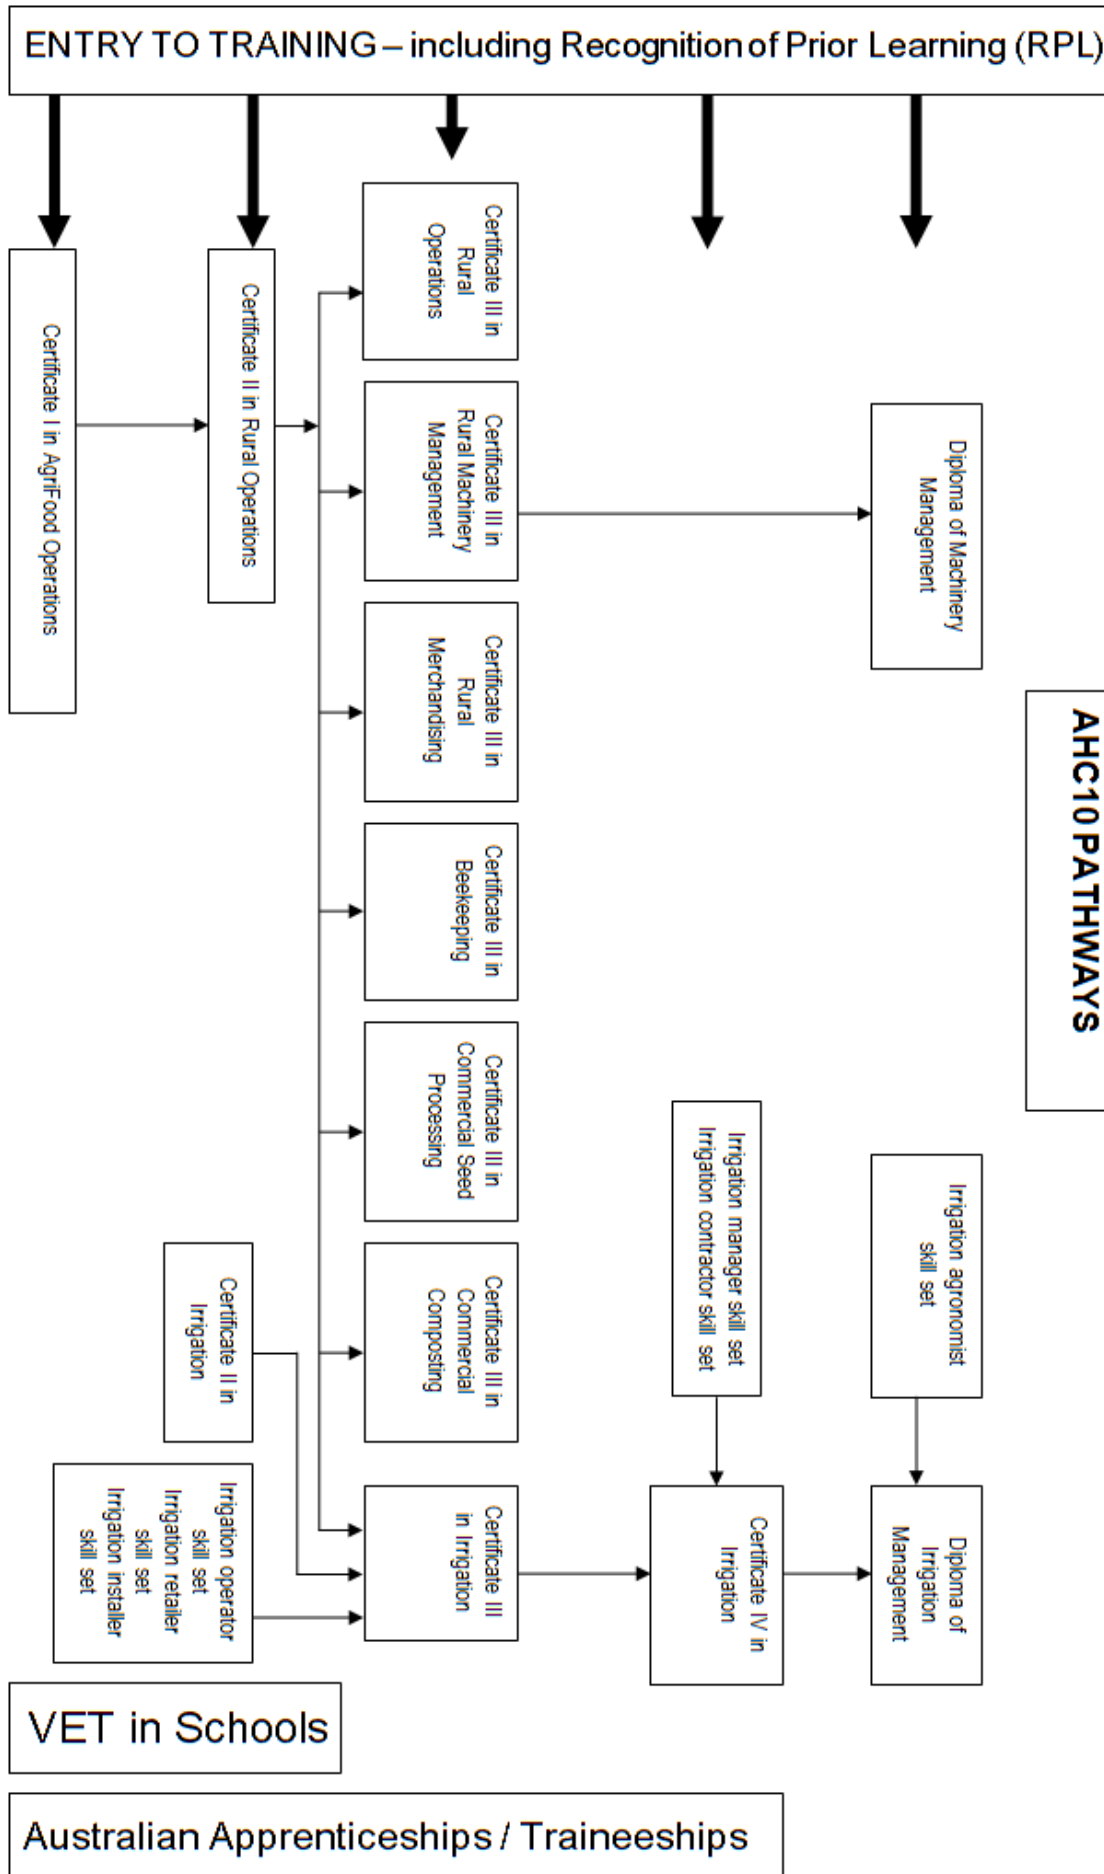

# Qualification Pathways

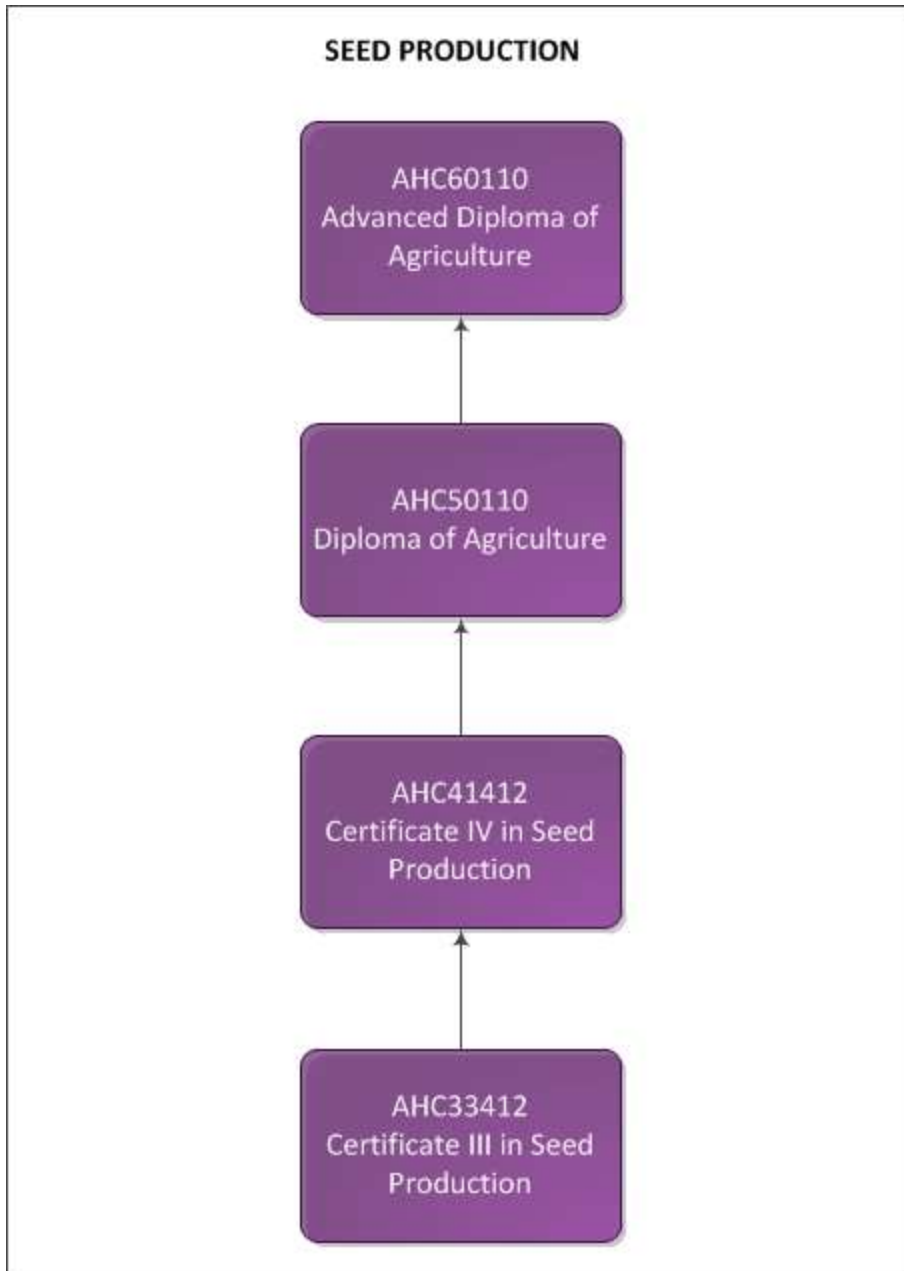

Qualification Pathways

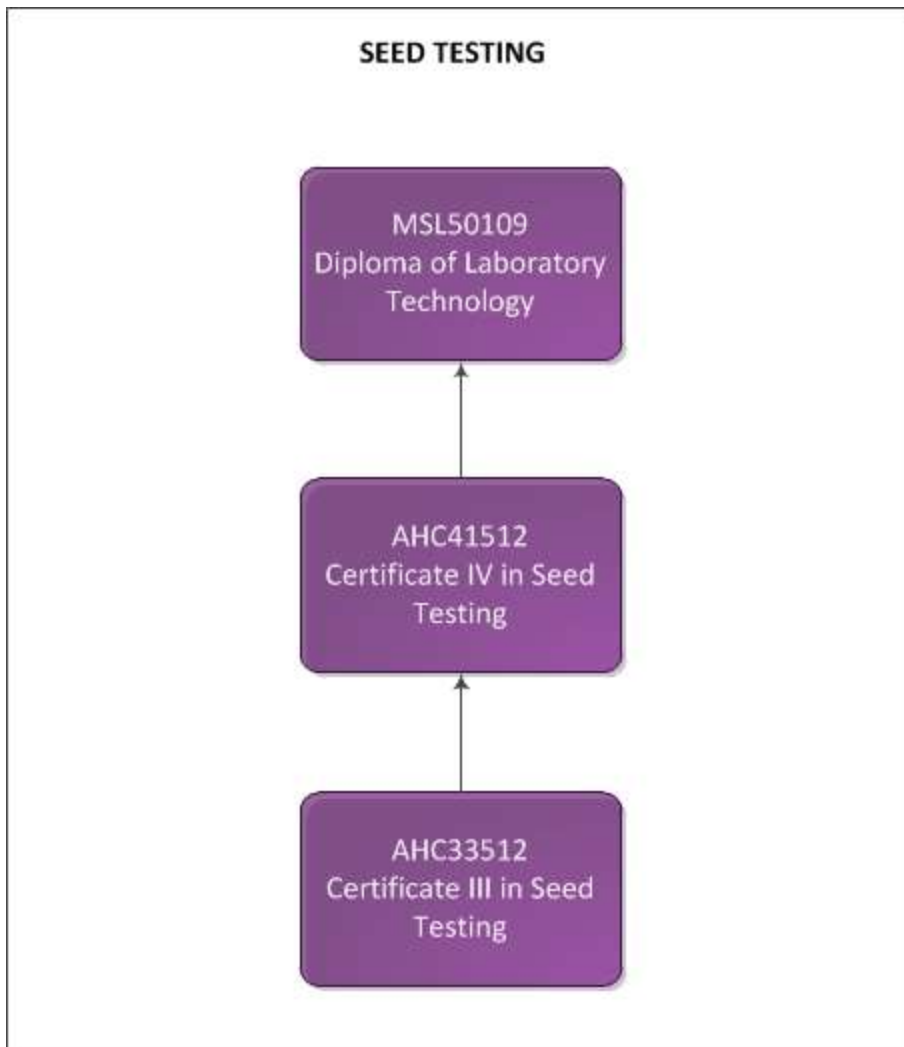

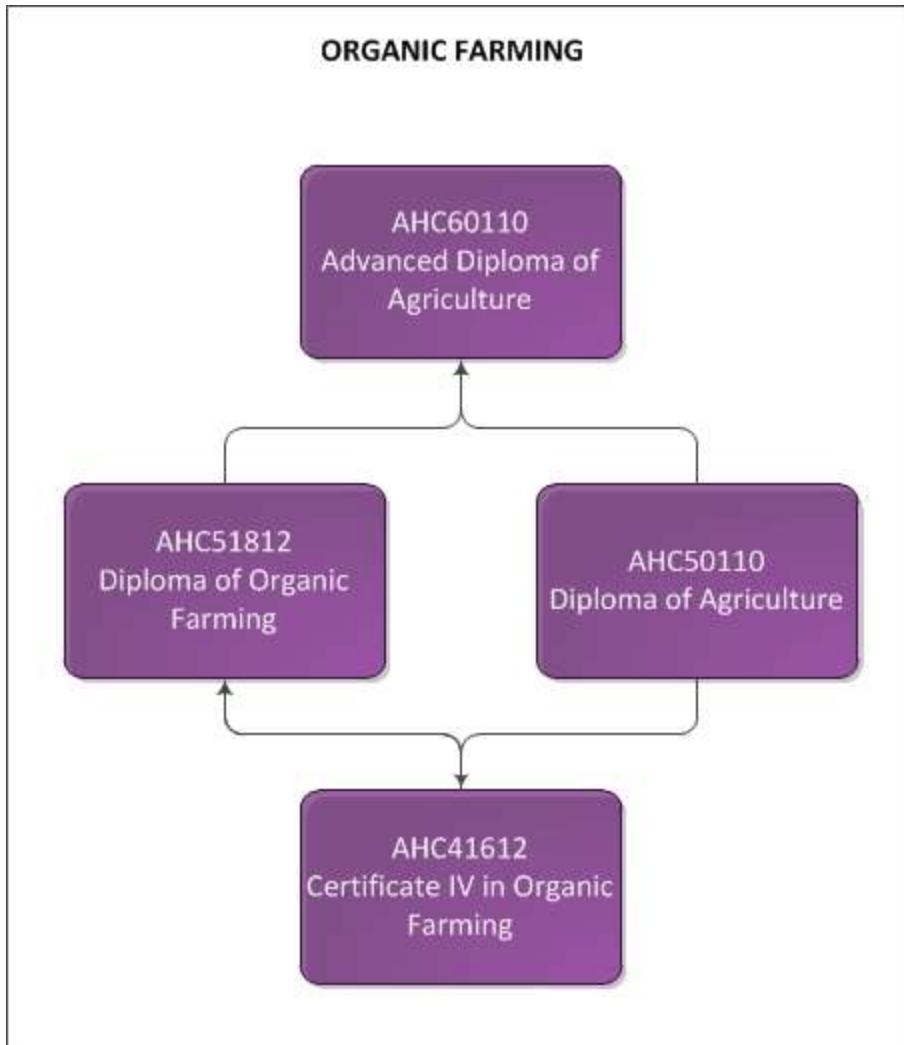

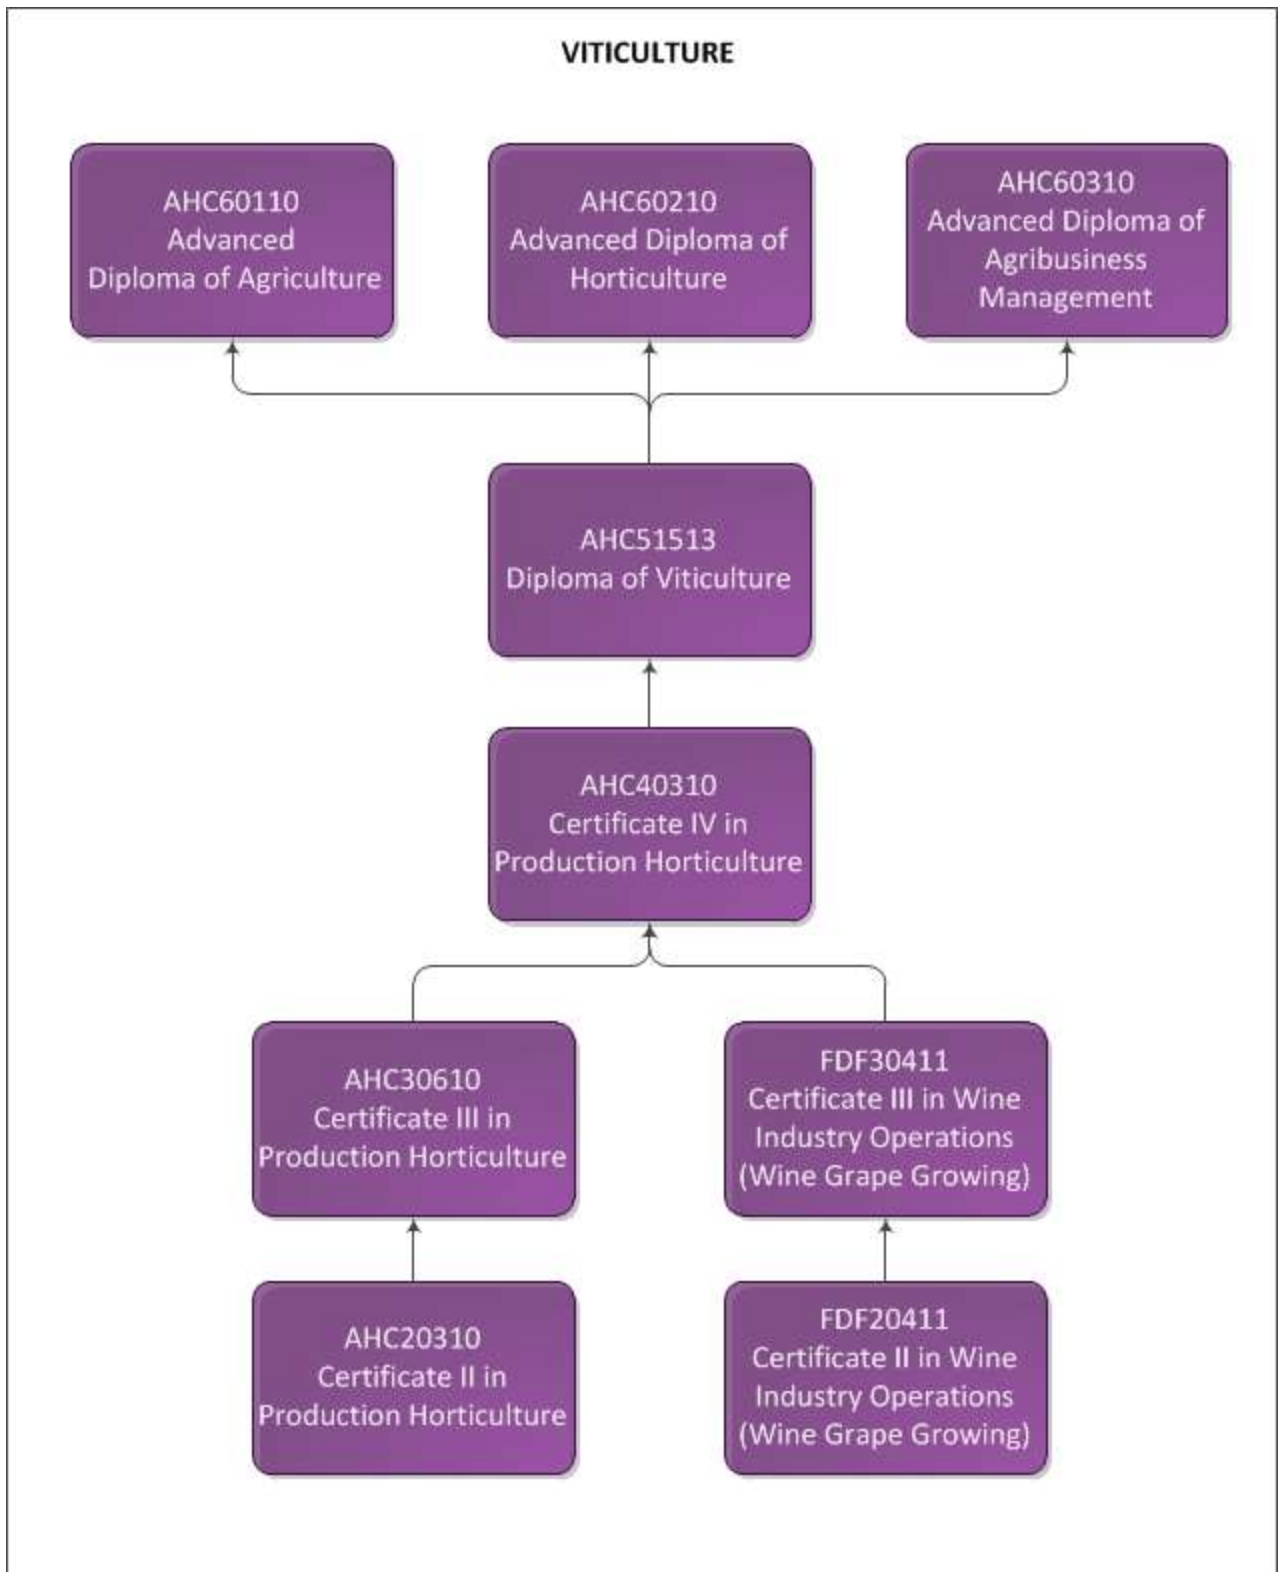

## Skill Sets in this Training Package

### Skill Sets

## Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

## Wording on Statements of Attainment

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

**Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording "these competencies meet [insert skill set title or identified industry area] need" on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package.** See the 2010 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment.

[http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF\\_Handbook\\_07.pdf](http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf)

## Skill Sets in this Training Package

There are fourteen Skill Sets within the AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package. These are:

- AHCSS00001 Advanced Chemical Spray Application Skill Set
- AHCSS00002 Agricultural Chemical Skill Set
- AHCSS00003 Cotton Industry Skill Set
- AHCSS00004 Gravity Fed Irrigation Operator Skill Set
- AHCSS00005 Irrigation Agronomist Skill Set
- AHCSS00006 Irrigation Contractor Skill Set
- AHCSS00007 Irrigation Installer Skill Set
- AHCSS00008 Irrigation Manager Skill Set
- AHCSS00009 Irrigation Retailer Skill Set
- AHCSS00010 Pork Industry Stock Person Skill Set
- AHCSS00011 Pressurised Irrigation System Operator Skill Set
- AHCSS00012 Recognise Aboriginal Cultural Sites Skill Set
- AHCSS00013 Report on Aboriginal Cultural Sites Skill Set
- AHCSS00014 Seed Crop Field Inspector Skill Set
- AHCSS00015 Carbon Farming Initiative Advisor Skill Set
- AHCSS00016 Carbon Farming Business Advisor Skill Set
- AHCSS00017 Carbon Farming Livestock Project Implementer Skill Set
- AHCSS00018 Carbon Farming Initiative Waste and Manure Management Project Implementer Skill Set
- AHCSS00019 Carbon Farming Initiative Soil or Biochar Project Implementer Skill Set
- AHCSS00020 Carbon Farming Initiative Savannah Burning, Feral Animal, Rangelands

**Skill Sets in this Training Package**

- Project Implementer Skill Set
- AHCSS00021 Carbon Farming Initiative Vegetation Project Implementer Skill Set
- AHCSS00022 Carbon Farming Initiative Emissions Avoidance from Soil and Crops Project Implementer Skill Set
- AHCSS00023 Basic Introduction to Beekeeping Skill Set

## Assessment Guidelines

### Introduction

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the *Australian Quality Training Framework (AQTF) Essential Standards for Initial and Continuing Registration*. Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

### Assessment System Overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing/registration requirements; and assessment pathways.

Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.

Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

Assessment must be carried out in accordance with the:

- benchmarks for assessment
- specific industry requirements
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF

### Benchmarks for Assessment

The endorsed units of competency in this Training Package are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

### Principles of Assessment

All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:

validity

reliability

flexibility

fairness

sufficiency

These principles must be addressed in the:

design, establishment and management of the assessment system for this Training

Package development of assessment tools, and the conduct of assessment.

Assessment is valid when the process is sound and assesses what it claims to assess. Validity requires that:

(a)	assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance
(b)	assessment of knowledge and skills must be integrated with their practical application
(c)	judgement of competence must be based on sufficient evidence (that is, evidence gathered on a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency

### *Reliability*

Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

### *Flexibility*

To be flexible, assessment should reflect the candidate's needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

### *Fairness*

Fairness in assessment requires consideration of the individual candidate's needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an

opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

### *Sufficiency*

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

### **Rules of Evidence**

The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

### *Sufficient*

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

### *Current*

In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

### *Authentic*

To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate's own work.

## **Assessment Requirements of the Australian Quality Training Framework**

Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 *Essential Standards for Registration*.

The AQTF 2010 *Essential Standards for Initial and Continuing Registration* can be downloaded from < [www.training.com.au](http://www.training.com.au) >.

The following points summarise the assessment requirements.

### **Registration of Training Organisations**

Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering Body in accordance with the AQTF. The RTO must have the specific units of competency and/or AQF qualifications on its scope of registration.

### **Quality Training and Assessment**

Each RTO must provide quality training and assessment across all its operations. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1.

### **Assessor Competency Requirements**

Each person involved in training, assessment or client service must be competent for the functions they perform. AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1 for assessor (and trainer) competency requirements. See also the AQTF 2010 *Users' Guide to the Essential Standards for Registration* Appendix 2.

### **Assessment Requirements**

The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **National Recognition**

Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **Access and Equity and Client Outcomes**

Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **Monitoring Assessments**

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **Recording Assessment Outcomes**

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **Issuing AQF Qualifications and Statements of Attainment**

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current AQF Implementation Handbook and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/course(s). See the AQTF and the edition of the AQF Implementation Handbook-available on the AQF Council website < [www.aqf.edu.au](http://www.aqf.edu.au)>.

This section provides information on licensing/registration requirements for this Training Package, with the following important disclaimer.

Licensing and registration requirements that apply to specific industries, and VET, vary between each State and Territory and can regularly change. The developers of this Training Package and DEEWR consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and DEEWR cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis.

Contact the relevant State or Territory department(s) to check if the licensing/registration requirements still apply, and to check if there are any others with which you must comply. For further information contact AgriFood Skills Australia at [www.agrifoodskills.net.au](http://www.agrifoodskills.net.au) .

### **Requirements for Assessors**

Assessors will be required to meet the AQTF requirements. This includes meeting the required licensing, registration or regulatory requirements as well as demonstrated technical competency for the AHC units assessed.

RTOs need to take into account a range of considerations when designing assessment strategies. In particular, the majority of units have been written with a focus on a workplace assessment environment. Where this is obligatory it is identified in the unit of competency.

Wherever possible, integrated (holistic) assessment is the preferred means of assessment. Holistic assessment should reflect the grouping of competencies as they would be demonstrated in an actual work role. The context of assessment is defined in each unit of competency.

#### **Design of assessment**

The design of assessment needs to ensure that all aspects of competency are covered:

- task skills (performance of individual tasks)
- job/role environment skills (deals with the responsibilities and expectations of the workplace)
- relevant underpinning knowledge

and where qualification levels require:

- task management skills (managing a number of different tasks within the job)
- contingency management skills (responding to problems, breakdowns and changes in routine).

### Evidence gathering methods

Evidence gathering methods must be gender and culturally-inclusive and take into account the language, literacy and numeracy skills of both candidate and assessor. Assessors may consider :

- incorporating a range of assessment techniques
- integrating the assessment of units related to the performance of 'whole of work' tasks, roles or functions
- using a holistic approach which combines knowledge, understanding,
- problem-solving, technical skills and applications to new situations into the assessment process
- assessing in the workplace (wherever possible), using familiar skills and materials
- eliminating any unnecessary reading or written assessment (if these skills are not required to do the job, they should not be part of the assessment)
- ensuring understanding of questions by rephrasing to clarify and using the language and terms of the job and the workplace
- encouraging the candidate to ask questions to clarify instructions
- providing clarification of purpose and process of assessment
- considering cultural and gender issues when setting up the assessment.

### Workplace assessment considerations

Where assessment is occurring in the workplace, assessors should consult on the assessment process with the parties involved. Candidates should be briefed on the process of making judgements against the standards and made to feel as relaxed as possible.

The assessment should take place over a reasonable length of time so that the candidate has the opportunity to demonstrate work responsibility and contingency management. Third party reports of workplace performance, if available, are helpful for this.

Consider the other staff in the workplace likely to be affected by the process. All staff directly or indirectly involved in the process should be briefed on the factors which will impact on

Ensure that assessment is as compatible as possible with the normal pattern of work and causes minimal disruption. Assessment resources for this Training Package should provide ways in which to address these matters.

### Assessment in a simulated environment

Where assessment is occurring out of the workplace, it is important to ensure that:

- the assessment takes place in a situation as close as possible to workplace reality
- all aspects of competency are assessed
- the assessment takes place over a reasonable length of time so that the candidate has the opportunity to demonstrate work responsibility and contingency management (third party reports of workplace performance, if available, are helpful for this)
- equipment, resources and documents used in assessment closely reflect workplace reality.

It is critical that the designer of the simulation is thoroughly familiar with the application of the competency and is experienced in current and relevant workplace practices. The simulation or assessment environment must provide opportunities to:

- demonstrate use of required equipment and other resources
- show the complexity of dealing with multiple tasks
- reflect time pressures and deadlines
- involve prioritising among competing tasks
- deal with customers/clients, including difficult ones
- work with others in a team
- communicate with diverse groups
- find, discuss and test solutions to problems
- explore animal health, welfare and ethical issues
- explore health and safety issues
- answer practically-oriented, applied knowledge questions
- show the level of verbal and written expression sufficient for, but not exceeding, the work requirements.

Training and assessment in remote and regional areas

Training and assessing candidates in remote and regional areas present a range of challenges. These include:

- lack of numbers preventing the establishment of traditional class sizes
- physical remoteness of some communities, where access to training facilities is limited
- scarcity of trainers with the required industry experience
- scarcity of physical training resources (e.g. current and emerging technology).
- Some options for overcoming these challenges include:
  - partnerships between RTOs to establish classes, i.e. programs delivered on a regional rather than local basis
  - delivering certain units by distance mode
  - partnerships between industry and RTOs to share resources and personnel
  - partnerships between schools and RTOs
  - recruiting suitably qualified workplace supervisors to oversee instruction and assessment on the job
  - travelling to remote workplaces to provide instruction and assessment
  - use of technology (e.g. email, video demonstration, CDs and internet) and self-paced resources
  - use of block release delivery methodology.

Implementation of AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package within the school sector needs to ensure the following:

- currency of skills and knowledge of those charges with training and assessing students
- access to industry-current equipment, facilities and training resources so that students acquire a realistic view of the realities and conditions within the workplace
- comprehensive coverage of underpinning skills and knowledge as delineated within the competency standards
- appropriateness of learning and assessment experiences to ensure that these are current and realistic.

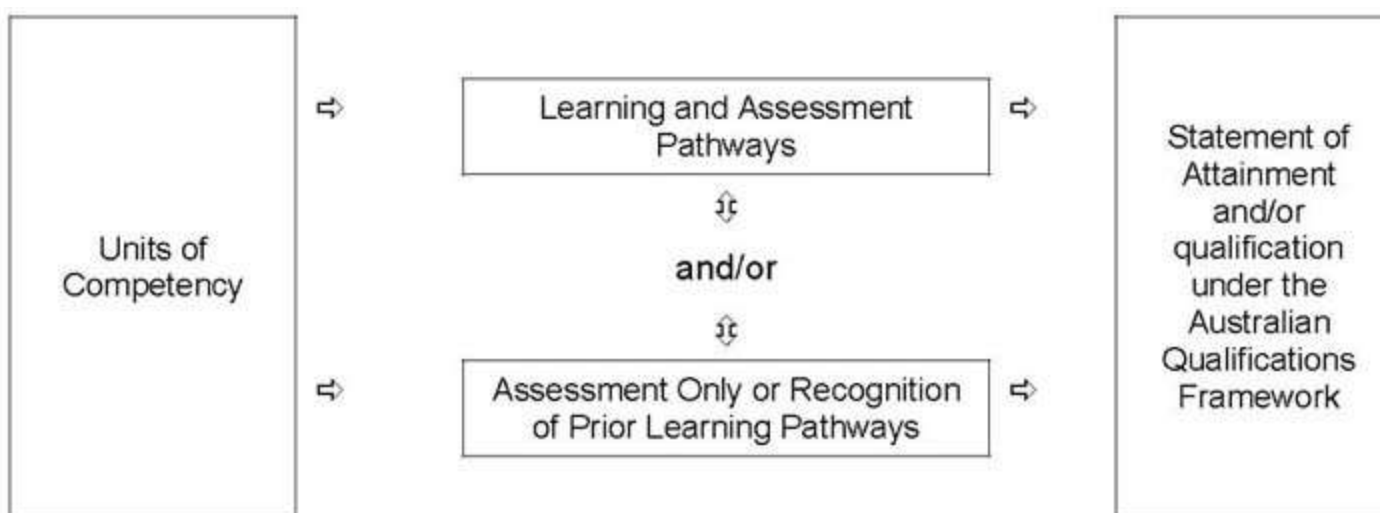

It is recommended that delivery of qualifications in schools should only include Certificates I and II.

### Pathways

The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, an assessment-only or recognition pathway, or a combination of the two as illustrated in the following diagram.

Each of these assessment pathways leads to full recognition of competencies held - the critical issue is that the candidate is competent, not how the competency was acquired.

Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package, and the AQTF, 2 where relevant, the Australian Qualifications Framework.

## Learning and Assessment Pathways

Usually, learning and assessment are integrated, with assessment evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process.

Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

## Credit Pathways

*Credit* is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

## Recognition of Prior Learning

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

existing workers; individuals with overseas qualifications; recent migrants with established work histories; people returning to the workplace; and people with disabilities or injuries requiring a change in career.

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

questioning (oral or written) consideration of a portfolio and review of contents consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components

observation of performance, and

participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

authentic (the candidate's own work);

valid (directly related to the current version of the relevant endorsed unit of competency);

reliable (shows that the candidate consistently meets the endorsed unit of competency);

current (reflects the candidate's current capacity to perform the aspect of the work covered by the endorsed unit of competency); and

sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

### **Credit Transfer**

*Credit transfer is a process which provides learners with agreed and consistent credit outcomes based on equivalences in content between matched qualifications.*

This process involves education institutions:

mapping, comparing and evaluating the extent to which the defined learning outcomes and assessment requirements of the individual components of one qualification are equivalent to the learning outcomes and assessment requirements of the individual components of another qualification

making an educational judgment of the credit outcomes to be assigned between the matched components of the two qualifications

setting out the agreed credit outcomes in a documented arrangement or agreement, and publicising the arrangement/agreement and credit available.

## Combination of Pathways

Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

## Assessor Requirements

This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

## Assessor Competencies

The AQTF specifies mandatory competency requirements for assessors. For information, Element 1.4 from the AQTF 2007 *Essential Standards for Registration* follows:

1.4	Training and assessment is delivered by trainers and assessors who:
a)	have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and
b)	have the relevant vocational competencies at least to the level being delivered or assessed, and
c)	can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and
d)	continue developing their Vocational Education and Training (VET) knowledge and skills as well as their industry currency and trainer/assessor competence.
	* See AQTF 2010 <i>Users' Guide to the Essential Standards for Registration</i> Appendix 2

## Industry Assessment Contextualisation 1

The competencies in this Training Package may be attained in a number of ways including through :

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

### Guidelines

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, an assessment-only or recognition pathway, or a combination of the two as illustrated in the following diagram.

Each of these assessment pathways leads to full recognition of competencies held - the critical issue is that the candidate is competent, not how the competency was acquired. Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package and the AQTF 2007.

### Learning and Assessment Pathways

Usually, learning and assessment are integrated, with assessment evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process.

Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action

learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

### Assessment-Only or Recognition of Prior Learning Pathway

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were achieved.

In an assessment-only or Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor, such as in the compilation of portfolios; or directed by the assessor, such as through observation of workplace performance and skills application, and oral and/or written assessment. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF 2007 must be met (Standard 1).

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, and work samples. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate's own work)
- valid (directly related to the current version of the relevant endorsed unit of competency)
- reliable (shows that the candidate consistently meets the endorsed unit of competency)
- current (reflects the candidate's current capacity to perform the aspect of the work covered by the endorsed unit of competency), and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

The assessment only or recognition of prior learning pathway is likely to be most appropriate in the following scenarios:

- candidates enrolling in qualifications who want recognition for prior learning or current competencies
- existing workers
- individuals with overseas qualifications
- recent migrants with established work histories
- people returning to the workplace, and
- people with disabilities or injuries requiring a change in career.

#### Combination of Pathways

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

#### Assessor Requirements

This section identifies the mandatory competencies for assessors, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

#### Assessor Competencies

The AQTF 2007 specifies mandatory competency requirements for assessors. For information, Standard 1, Element 1.4 from the AQTF 2007 Essential Standards for Registration follows:

1.4	a)	Training and assessment is delivered by trainers and assessors who:
	a)	have the necessary training and assessment competencies as determined by the National Quality Council or its successors
	b)	have the relevant vocational competencies at least to the level being delivered or

	assessed
c)	continue developing their vocational and training and assessment competencies to support continuous improvements in the delivery of the RTOs services.

### Designing Assessment Tools

This section provides an overview on the use and development of assessment tools. Use of Assessment Tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgments about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

### Using Prepared Assessment Tools

If using prepared assessment tools, assessors should ensure these are benchmarked, or mapped, against the current version of the relevant unit of competency. This can be done by checking that the materials are listed on the National Training Information Service [www.ntis.gov.au](http://www.ntis.gov.au). Materials on the list have been noted by the National Quality Council as meeting their quality criteria for Training Package support materials.

### Developing Assessment Tools

When developing assessment tools, assessors must ensure that they:

- are benchmarked against the relevant unit or units of competency
- are reviewed as part of the continuous improvement of assessment strategies as required under Standard 1 of the AQTF 2007
- meet the assessment requirements expressed in Standard 1 of the AQTF 2007. A key reference for assessors developing assessment tools is TAA04 Training and Assessment Training Package and the unit of competency TAAASS403A Develop assessment tools. There is no set format or process for the design, production or development of assessment materials.

### Conducting Assessment

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

### Assessment Requirements

Assessments must meet the criteria set out in the AQTF 2007 Essential Standards for Registration.

For information, the mandatory assessment requirements from Standard 1 from the AQTF 2007 Essential Standards for Registration are as follows:

1.5	Assessment, including Recognition of Prior Learning:
a)	meets the requirements of the relevant Training Package or accredited course,

	b)	is conducted in accordance with the principles of assessment and the rules of evidence, and
	c)	meets workplace and, where relevant, regulatory requirements.

### Designing Assessment Tools

This section provides an overview on the use and development of assessment tools.

#### Use of Assessment Tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgments about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

#### Using Prepared Assessment Tools

If using prepared assessment tools, assessors should ensure these relate to the current version of the relevant unit of competency. The current unit of competency can be checked on the National Register < [www.ntis.gov.au](http://www.ntis.gov.au) >.

#### Developing Assessment Tools

When developing assessment tools, assessors must ensure that they:

- are benchmarked against the relevant unit or units of competency
- are reviewed as part of the continuous improvement of assessment strategies as required under Standard 1 of the AQTF 2007
- meet the assessment requirements expressed in Standard 1 of the AQTF 2010

*Essential Standards for Initial and Continuing Registration.*

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

#### Language, Literacy and Numeracy

The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations.

#### Conducting Assessment

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

#### Mandatory Assessment Requirements

Assessments must meet the criteria set out in the 2010 *Essential Standards for Initial and Continuing Registration*. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 *Essential Standards for Initial and Continuing Registration* are as follows:

1.5	Assessment, including Recognition of Prior Learning:
-----	--

	a)	meets the requirements of the relevant Training Package or accredited course,
	b)	is conducted in accordance with the principles of assessment and the rules of evidence, and
	c)	meets workplace and, where relevant, regulatory requirements.
	d)	is systematically validated.

**Assessment of Employability Skills**

Employability Skills are integral to workplace competency. As such they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.

Employability Skills are embedded and explicit within each unit of competency, and an Employability Skills Summary is available for each qualification. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

## **Employability Skills in the Agriculture, Horticulture and Conservation and Land Management context**

Employability Skills are integral to workplace competency. As such they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.

Employability Skills are embedded and explicit within each unit of competency. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

For more information on Employability Skills in AgriFood Skills Australia Training Packages go to the AgriFood Skills Australia website at <http://www.agrifoodskills.net.au> .

The National Quality Council has endorsed a model for assessing and reporting Employability Skills, which contains further suggestions about good practice strategies in teaching, assessing, learning and reporting Employability Skills. The model is available from <<http://www.training.com.au/>>.

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at <<http://employabilityskills.training.com.au>>

For more information on Employability Skills in AgriFood Skills Australia Training Packages go to the AgriFood Skills Australia website at <http://www.agrifoodskills.net.au>.

Employability Skills are reported on each qualification using the following statement on the qualification testamur: "A summary of the Employability Skills developed through this qualification can be downloaded from <http://employabilityskills.training.com.au> "

### **Access and Equity**

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce.

The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

### **Reasonable adjustments**

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability.

Under the *Disability Standards for Education 2005*, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While "reasonable adjustment" and "unjustifiable hardship" are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.

An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student's disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship.

The Training Package Guidelines provides more information on reasonable adjustment, including examples of adjustments. Go to <http://www.deewr.gov.au/tpdh/Pages/home.aspx>.

## **Industry Assessment Contextualisation 2**

### **Access and Equity**

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

### **Reasonable adjustments**

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability.

Under the *Disability Standards for Education 2005*, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While "reasonable adjustment" and "unjustifiable hardship" are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.

An adjustment is any measure or action that a student requires because of their disability, and

which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student's disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship.

See Part 4, Chapter 2 of the *Training Package Development Handbook* (DEST, September 2007) for more information on reasonable adjustment, including examples of adjustments.  
Assessment for equity groups

It is important that assessment processes take into account a diversity of individual needs and learning styles related to disability, race, socio-economic status, gender, language, ethnicity, geographical isolation, sexuality, work commitments and family responsibilities.

Some inclusive assessment practices which will enhance the learning of all students include:

- know what, in particular, you are assessing, and make this clear to students
- create assessment activities in which students have the opportunity to link their learning to what they already know
- make your expectations clear
- make explicit the way in which competency will be assessed, both in discussion with the class beforehand and prior to any assessment activities
- provide alternative pathways to stated outcomes: allow for flexibility in approach, organisation and assessment. The greater the diversity of methods of assessment, the fairer the process for the greatest number of students
- make accommodations based on individual circumstance and need. Remember that students may need the opportunity to experiment to find the adaptation or accommodation which best meets their learning needs
- include self-assessment as a component of the course. Self-assessment involves discussion with students about the criteria according to which they assess their own performance and the level of performance required for different levels
- discuss assessment alternatives with staff with previous experience teaching students with disabilities. You (and your department) should regularly review any alternative arrangements to ensure that these meet both the student's needs (which may change over time) and stated course outcomes.

#### Assessment for Indigenous learners

There is evidence that Aboriginal and Torres Strait Islander people, both traditional and contemporary, approach learning differently from the Western intellectual tradition, which is relevant to effective training and assessment. It is understood that Aboriginal and Torres Strait Islander people may:

- learn better in groups than individually
- learn better in the surroundings of their community than in an institutional environment
- prefer oral communications to written forms
- learn on the basis of trial and error in the presence of an experienced person in preference to concept building approaches
- have a highly-developed sense of spatial relations by which they learn; hence stories,
- maps and pictures would be preferable to oral explanations.

To be effective, it is necessary that training and assessment recognises, adopts and practises appropriate delivery and assessment approaches.

Trainers and assessors who are not Aboriginal or Torres Strait Islanders need information on aspects of Aboriginal and Torres Strait Islander culture. They need to work closely with Aboriginal and Torres Strait Islander people to adopt practices that reflect Aboriginal and Torres Strait Islander approaches. The community should be asked to identify experts to provide information and to assist with assessment of relevant protocols, for example, where required.

There are a number of ways an RTO can establish and maintain culturally appropriate training and assessment practices, including:

- ensuring a high proportion of Aboriginal and Torres Strait Islander participation in all aspects of planning, development, delivery and evaluation
- establishing and maintaining a collaborative relationship with local Aboriginal and Torres Strait Islander communities
- as a mainstream (non-Indigenous) RTO, establishing auspice relationships with Aboriginal and Torres Strait Islander organisations and individuals, including direct and indirect involvement of persons identified as appropriate by the local community
- ensuring ongoing training of non-Aboriginal and Torres Strait Islander staff at all levels of the RTO, delivered by Aboriginal and Torres Strait Islander personnel.

A flexible approach to assessment will be required by RTOs in order to meet the requirements of Aboriginal and Torres Strait Islander organisations and individuals under this domain within the AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package. Principles that underpin assessment include:

- assessment should be transparent, i.e. clearly seen and understood by the candidate and others
- assessment should empower the candidate on the basis of consent, self-assessment and responsibility for the process
- assessment should involve designated community experts working in collaboration with RTO assessors in order to provide appropriate recognition of cultural and community skills and knowledge
- assessments must provide constructive feedback to candidates and support for further competency development.

Assessors may exercise limited discretion in response to organisational or individual requirements, but any changes must not alter the meaning or integrity of the unit of competency. Refer to the section on Competency Standards for more information.

#### Assessment for people with a disability

A disability presents some impairment to everyday activity. Some people with a disability do not have any impairments resulting from their disability. For example, a person who has a hearing impairment which is compensated for by a hearing aid may function without any adjustments. While some people with a disability may have an impairment because of the environment, not the disability itself. For example, hearing loss can be accentuated in a room with loud, competing noise and poor acoustics.

A disability may affect or relate to a range of human functions, including mobility, stamina, lifting ability, memory, vision, hearing, speech, comprehension and mood swings. This may be due to accidents, illnesses or birth.

It is important to remember that it is not the disability itself that should be of interest but its impact on the student's ability to access material and demonstrate knowledge.

Training providers have a legal obligation under the Disability Standards for Education to ensure that students who have a disability are able to access and participate in education without experiencing discrimination. The information provided below is aimed at assisting teachers/trainers to meet the reasonable adjustment needs of people who have a disability.

#### Adjustments in training and assessment

An open mind, common sense and tailoring to individual circumstances will, as often as not, ensure individuals achieve the standards that employers and training providers expect. Reasonable adjustments need only be that - reasonable. It is about identifying what adjustments might reasonably be made and how they may be put into place. Training and assessment can be made more appropriate and fairer for a person who has a disability through attitude, preparation and application.

#### Attitude

The attitude of others is often the greatest barrier for people who have a disability. While most people who have a disability will only ever require minor adjustments to ensure learning is positive, some will require additional support. There are many support agencies that can provide advice, however teachers/trainers may need to take additional time to ensure their teaching/training meets the learning support needs of the individual concerned.

Positive language creates an atmosphere of mutual respect, which is essential to learning. For example, using language that identifies learners as people rather than language that identifies them by one of their characteristics conveys that the person is more important than the characteristic, such as the difference between a 'person who has an intellectual disability' and an 'intellectually disabled person'. A person who has an intellectual disability could also be identified by a range of equally important characteristics - height, age, sporting interests, etc. However, the term 'intellectually disabled person' refers to the disability as the major, and often only, defining characteristic.

#### Preparation

It is important to identify any functional issues arising from the nature and extent of a person's disability. This can usually be done by discussing such issues with the individual. In most cases, this consultation will identify reasonable adjustment needs which can be put into place. There are many simple things that teachers/trainers can do to make reasonable adjustments to enable individuals who have a disability to succeed in training and assessment. In some cases, professional support may be required.

**Application**

Once reasonable adjustments have been implemented it is important to monitor and evaluate what has been done to ensure the best environment for continuous learning because:

- adjustments may only need to be temporary - i.e. mechanisms may only need to be in place during an induction period or due to a temporary disability, in which case evaluation will ensure appropriateness without the need for ongoing monitoring
- adjustments may need reinforcing - when adjustments need to be ongoing, monitoring may reinforce patterns of behaviour in order for them to become 'natural'
- adjustments may need improving - where adjustments are ongoing or substantial, a commitment to continuous improvement is recommended through monitoring.

In most cases an informal discussion with the person concerned may be all that is necessary. However, should adjustments be substantial, or a learner not be acquiring competence at a reasonable rate, a more formal process may be required. This may include:

- performance indicators - training providers, learners and employers should have agreed indicators of performance which can be measured and monitored
- independent support - a third party, independent of the training and/or assessment environment, may need to be involved
- experimentation - if existing adjustments are not proving satisfactory, creative solutions may be needed
- continuing review - formal monitoring is encouraged if adjustments are changed or if substantial adjustments are necessary.

For further information on training and assessment for people with specific needs, the DEEWR website has information about the National Disability Coordination Officer Program, which 'provides information, co-ordination and referral services for people with a disability interested in or enrolled in post-school education and training' ( [www.deewr.gov.au](http://www.deewr.gov.au) ). The Disability Education Standards Guidance Notes can also be accessed at on the DEEWR web site at: [www.deewr.gov.au/Schooling/DisabilityStandardsforEducation/Documents/Disability\\_Standards\\_Education\\_Guidance\\_Notes\\_pdf](http://www.deewr.gov.au/Schooling/DisabilityStandardsforEducation/Documents/Disability_Standards_Education_Guidance_Notes_pdf) .

**Reasonable adjustment**

Below are some of the practical things that can be done as part of providing reasonable adjustment to learners with specific support needs to enable them to undertake training and assessment. Clearly, each case will be different and will need to be discussed with the person and in some cases expert help will be needed, at least in the initial stages.

Type of disability	Reasonable adjustment
--------------------	-----------------------

Acquired brain injury	<ul style="list-style-type: none"> <li>• Memory aids (posters, notes, etc.)</li> <li>• Reflective listening skills</li> <li>• Stress minimisation</li> <li>• Time and patience.</li> </ul>
Hearing impairment	<ul style="list-style-type: none"> <li>• Audio loops for people using hearing aids</li> <li>• Plain English documents</li> <li>• Fire and alarm systems with flashing lights</li> <li>• Sign language interpreters</li> <li>• Telephone typewriters.</li> </ul>
Intellectual disability	<ul style="list-style-type: none"> <li>• Additional time</li> <li>• Assessment which is appropriate to the skill (i.e. avoiding written assessment for practical tasks)</li> <li>• Mentors</li> <li>• Plain English documents</li> <li>• Practical learning sessions</li> <li>• Repetition of learning exercises.</li> </ul>
Mobility impairment	<ul style="list-style-type: none"> <li>• Access to aids, such as for holding documents</li> <li>• Adjustable tables</li> <li>• Lifting limits</li> <li>• Note-taking support</li> <li>• Verbal rather than written presentations</li> <li>• Personal computers</li> <li>• Wheelchair access.</li> </ul>
Psychiatric disability	<ul style="list-style-type: none"> <li>• Identification and avoidance of stresses</li> <li>• Ongoing rather than formal assessments</li> <li>• Reflective listening skills</li> </ul>
	<ul style="list-style-type: none"> <li>• 'Time-out' breaks in assessment.</li> </ul>
Speech impairment	<ul style="list-style-type: none"> <li>• Information summaries</li> <li>• Stress minimisation</li> <li>• Time and patience</li> <li>• Written rather than verbal opportunities</li> </ul>

	<ul style="list-style-type: none"> <li>• Additional writing time for assignments and tests.</li> </ul>
Vision impairment	<ul style="list-style-type: none"> <li>• Audiotapes</li> <li>• Braille translations</li> <li>• Enlarged computer screen images</li> <li>• Enlarged text and images</li> <li>• Good lighting or reading lamps</li> <li>• Guide dog provision</li> <li>• Informing the person before moving furniture</li> <li>• Voice synthesisers on computers.</li> </ul>

Training and assessment resources and information for equity groups

The following references provide a range of information and resources related to training and assessment for equity groups.

- The Australian Disability Clearing House on Education and Training [www.adcet.edu.au](http://www.adcet.edu.au) website includes resources and articles about the training and assessment of people with a disability.
- Information source for Aboriginal and/or Torres Strait Islander people training and assessment include: National Aboriginal and Torres Strait Education website: [www.natsiew.nexus.edu.au](http://www.natsiew.nexus.edu.au) . In addition most State and Territory Education Departments have an Aboriginal and/or Torres Strait Islander Unit who may be able to provide advice and information.
- The Working with Diversity web site at [www.westone.gov.au/workingwithdiversity](http://www.westone.gov.au/workingwithdiversity) includes a range of resources including:
  - Working with diversity: A Guide to Equity and the AQTF
  - Working with diversity: Quality Training for Indigenous Australians
  - Working with diversity: Quality Training for People with a Disability
- Other relevant, up to date resources may be available in the resources section of the Skills area of the Department of Education, Employment and Workplace Relations at [www.deewr.gov.au](http://www.deewr.gov.au) .
- Other informative resources include:

LiteracyNet at [www.literacynet.deewr.gov.au](http://www.literacynet.deewr.gov.au) . The site contains key information about Australian adult literacy activities and links to a range of additional program, professional development, resource and research sites.

#### Further Sources of Information

The section provides a listing of useful contacts and resources to assist assessors in planning, designing, conducting and reviewing of assessments against this Training Package.

#### Further Sources of Information

Refer to <http://antapubs.dest.gov.au/publications/search.asp> to locate the following ANTA publications.

*AQF Implementation Handbook, third Edition*. Australian Qualifications Framework Advisory

Board, 2002, [aqf.edu.au](http://aqf.edu.au)

Australian Quality Training Framework 2007 (AQTF 2007) - for information and resources go to [www.training.com.au/aqtf2007](http://www.training.com.au/aqtf2007)

*AQTF 2007 Essential Standards for Registration*. Training organisations must meet these standards in order to deliver and assess nationally recognised training and issue nationally recognised qualifications. They include three standards, a requirement for registered training organisations to gather information on their performance against three quality indicators, and nine conditions of registration

AQTF 2007 *User's Guide to the Essential Standards for Registration*. A User's Guide for training organisations who must meet these standards in order to deliver and assess nationally recognised training and issue nationally recognised qualifications.

AQTF 2007 *Standards for Accredited Courses*. State and Territory accrediting bodies are responsible for accrediting courses. This standard provides a national operating framework and template for the accreditation of courses.

TAA04 *Training and Assessment Training Package*. This is available from the Innovation and Innovation & Business Skills Australia (IBSA) Industry Skills Council and can be viewed, and components downloaded, from the National Training Information Service (NTIS).

National Training Information Service, an electronic database providing comprehensive information about RTOs, Training Packages and accredited courses - [www.ntis.gov.au](http://www.ntis.gov.au)

*Training Package Development Handbook* (DEST, August 2007). Can be downloaded from [www.dest.gov.au](http://www.dest.gov.au)

#### Assessment Resources

*Training Package Assessment Guides* - a range of resources to assist RTOs in developing Training Package assessment materials (originally developed by ANTA with funding from the Department of Education, Training and Youth Affairs) and made up of 10 separate titles, as described at the publications page of [www.dest.gov.au](http://www.dest.gov.au). Go to [www.resourcegenerator.gov.au/loadpage.asp?TPAG.htm](http://www.resourcegenerator.gov.au/loadpage.asp?TPAG.htm)

Printed and/or CD ROM versions of the Guides can be purchased from Technical and Vocational Education and Training (TVET) Australia Limited. The resource includes the following guides:

- Training Package Assessment Materials Kit
- Assessing Competencies in Higher Qualifications
- Recognition Resource
- Kit to Support Assessor Training
- Candidates Kit: Guide to Assessment in New Apprenticeships
- Assessment Approaches for Small Workplaces
- Assessment Using Partnership Arrangements
- Strategies for ensuring Consistency in Assessment
- Networking for Assessors
- Quality Assurance Guide for Assessment

An additional guide "Delivery and Assessment Strategies" has been developed to complement these resources.

*Australian Quality Training Framework (AQTF) and AQTF 2010 Users' Guide to the Essential Standards for Registration*  
<http://www.training.com.au/pages/menuitem5cbe14d51b49dd34b225261017a62dbc.aspx>

For general information and resources go to <http://www.training.com.au/>

The National Register is an electronic database providing comprehensive information about RTOs, Training Packages and accredited courses - < [www.ntis.gov.au](http://www.ntis.gov.au) >

The Training Package Development Handbook site provides National Quality Council policy for the development of Training Packages. The site also provides guidance material for the application of that policy, and other useful information and links.

<http://www.deewr.gov.au/Skills/Overview/Policy/TPDH/Pages/main.aspx>

## Assessment Resources

Registered training organisations (RTOs) are at the forefront of vocational education and training (VET) in Australia. They translate the needs of industry into relevant, quality, client-focussed training and assessment.

RTOs should strive for innovation in VET teaching and learning practices and develop highly flexible approaches to assessment which take cognisance of specific needs of learners, in order to improve delivery and outcomes of training.

Resources can be purchased or accessed from: TVET Australia provides an integrated service to enable users of the national training

system to identify and acquire training materials, identify copyright requirements and enter licenses for use of that material consistent with the scope and direction of the NQC.

<http://www.productservices.tvetaustralia.com.au/>

## Assessment Guidelines - Industry Contextualisation

### Additional Advice for Assessment Design

RTOs need to take into account a range of considerations when designing assessment strategies. In particular, the majority of Units in the AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package Version 3 have been written with a focus on a workplace assessment environment. Where this is obligatory it is identified in the Unit of Competency.

Wherever possible integrated (holistic) assessment is the preferred means of assessment. Holistic assessment should reflect the grouping of competencies as they would be demonstrated in an actual work role. The context of assessment is defined in each Unit of Competency.

The design of assessment needs to ensure that all aspects of competency are covered:

- task skills (performance of individual tasks)
- job/role environment skills (deals with the responsibilities and expectations of the workplace)
- relevant underpinning knowledge

and where qualification levels require:

- task management skills (managing a number of different tasks within the job)
- contingency management skills (responding to problems, breakdowns and changes in routine).

Assessors may exercise limited discretion in response to organisational or individual requirements, but any changes must not alter the meaning or integrity of the Unit of Competency. *Refer to the section on Competency Standards for more information.*

### Evidence Gathering Methods

Evidence gathering methods must be gender and culturally-inclusive and take into account the language, literacy and numeracy skills of both candidate and assessor. Assessors may consider:

- incorporating a range of assessment techniques
- integrating the assessment of units related to the performance of 'whole of work' tasks, roles or functions
- using a holistic approach which combines knowledge, understanding, problem-solving, technical skills and applications to new situations into the assessment process
- assessing in the workplace (wherever possible), using familiar skills and materials
- eliminating any unnecessary reading or written assessment (if these skills are not required to do the job, they should not be part of the assessment)
- ensuring understanding of questions by rephrasing to clarify and using the language and terms of the job and the workplace
- encouraging the candidate to ask questions to clarify instructions
- providing clarification of purpose and process of assessment
- considering cultural and gender issues when setting up the assessment.
- 

### Workplace Assessment Considerations

Where assessment is occurring in the workplace, assessors should consult on the assessment process with the parties involved. Candidates should be briefed on the process of making judgements against the standards and made to feel as relaxed as possible.

The assessment should take place over a reasonable length of time so that the candidate has the opportunity to demonstrate work responsibility and contingency management. Third-party reports of workplace performance, if available, are helpful for this.

Consider the other staff in the workplace likely to be affected by the process. All staff directly or indirectly involved in the process should be briefed on the factors which will impact on them, such as duration or changes in work routine.

Ensure that assessment is as compatible as possible with the normal pattern of work and causes minimal disruption. Assessment resources for this Training Package should provide ways in which to address these matters.

#### Assessment in a Simulated Environment

Where assessment is occurring out of the workplace, it is important to ensure that:

- the assessment takes place in a situation as close as possible to workplace reality
- all aspects of competency are assessed
- the assessment takes place over a reasonable length of time so that the candidate has the opportunity to demonstrate work responsibility and contingency management (third-party reports of workplace performance, if available, are helpful for this)
- equipment, resources and documents used in assessment closely reflect workplace reality.

It is critical that the designer of the simulation is thoroughly familiar with the application of the competency and is experienced in current and relevant workplace practices. The simulation or assessment environment must provide opportunities to:

- demonstrate use of required equipment and other resources
- show the complexity of dealing with multiple tasks
- reflect time pressures and deadlines
- involve prioritising among competing tasks
- deal with customers/clients, including difficult ones
- work with others in a team
- communicate with diverse groups
- find, discuss and test solutions to problems
- explore food safety and hygiene issues
- explore health and safety issues
- answer practically-oriented, applied knowledge questions
- show the level of verbal and written expression sufficient for, but not exceeding, the work requirements.

#### Training and Assessment in Remote and Regional Areas

Training and assessing candidates in remote and regional areas present a range of challenges. These include:

- lack of numbers preventing the establishment of traditional class sizes
- physical remoteness of some communities, where access to training facilities is limited
- scarcity of trainers with the required industry experience
- scarcity of physical training resources (e.g. current and emerging technology).

Some options for overcoming these challenges include:

- partnerships between RTOs to establish classes, i.e. programs delivered on a regional rather than local basis
- delivering certain units by distance mode

- partnerships between industry and RTOs to share resources and personnel
- partnerships between schools and RTOs
- recruiting suitably qualified workplace supervisors to oversee instruction and assessment on the job
- travelling to remote workplaces to provide instruction and assessment
- use of technology (e.g. email, video demonstration, CDs and internet) and self-paced resources
- use of block release delivery methodology.

### Training and Assessment for Schools

Implementation of AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package Version 3 within the school sector needs to ensure the following:

- currency of skills and knowledge of those charges with training and assessing students
- access to industry-current equipment, facilities and training resources so that students acquire a realistic view of the realities and conditions within the workplace
- comprehensive coverage of underpinning skills and knowledge as delineated within the units of competency
- appropriateness of learning and assessment experiences to ensure that these are current and realistic.

It is recommended that delivery of qualifications in schools should only include Certificates I and II.

### Assessment for Equity Groups

It is important that assessment processes take into account a diversity of individual needs and learning styles related to disability, race, socio-economic status, gender, language, ethnicity, geographical isolation, sexuality, work commitments and family responsibilities.

Some inclusive assessment practices which will enhance the learning of all students include:

- know what, in particular, you are assessing, and make this clear to students
- create assessment activities in which students have the opportunity to link their learning to what they already know
- make your expectations clear
- make explicit the way in which competency will be assessed, both in discussion with the class beforehand and prior to any assessment activities
- provide alternative pathways to stated outcomes: allow for flexibility in approach, organisation and assessment. The greater the diversity of methods of assessment, the fairer the process for the greatest number of students
- make accommodations based on individual circumstance and need. Remember that students may need the opportunity to experiment to find the adaptation or accommodation which best meets their learning needs
- include self-assessment as a component of the course. Self-assessment involves discussion with students about the criteria according to which they assess their own performance and the level of performance required for different levels

- discuss assessment alternatives with staff with previous experience teaching students with disabilities. You (and your department) should regularly review any alternative arrangements to ensure that these meet both the student's needs (which may change over time) and stated course outcomes.

- 

#### Assessment for Indigenous Learners

There is evidence that Aboriginal and Torres Strait Islander people, both traditional and contemporary, approach learning differently from the Western intellectual tradition, which is relevant to effective training and assessment. It is understood that Aboriginal and Torres Strait Islander people may:

- learn better in groups than individually
- learn better in the surroundings of their community than in an institutional environment
- prefer oral communications to written forms
- learn on the basis of trial and error in the presence of an experienced person in preference to concept building approaches
- have a highly-developed sense of spatial relations by which they learn; hence stories, maps and pictures would be preferable to oral explanations.

To be effective, it is necessary that training and assessment recognises, adopts and practises appropriate delivery and assessment approaches.

Trainers and assessors who are not Aboriginal or Torres Strait Islanders need information on aspects of Aboriginal and Torres Strait Islander culture. They need to work closely with Aboriginal and Torres Strait Islander people to adopt practices that reflect Aboriginal and Torres Strait Islander approaches. The community should be asked to identify experts to provide information and to assist with assessment of relevant protocols, for example, where required.

There are a number of ways an RTO can establish and maintain culturally appropriate training and assessment practices, including:

- ensuring a high proportion of Aboriginal and Torres Strait Islander participation in all aspects of planning, development, delivery and evaluation
- establishing and maintaining a collaborative relationship with local Aboriginal and Torres Strait Islander communities
- as a mainstream (non-Indigenous) RTO, establishing auspice relationships with Aboriginal and Torres Strait Islander organisations and individuals, including direct and indirect involvement of persons identified as appropriate by the local community
- ensuring ongoing training of non-Aboriginal and Torres Strait Islander staff at all levels of the RTO, delivered by Aboriginal and Torres Strait Islander personnel.

A flexible approach to assessment will be required by RTOs in order to meet the requirements of Aboriginal and Torres Strait Islander organisations and individuals under this domain within the AHC10 Agriculture, Horticulture and Conservation and Land Management Training Package Version 3. Principles that underpin assessment include:

- assessment should be transparent, i.e. clearly seen and understood by the candidate and others

- assessment should empower the candidate on the basis of consent, self-assessment and responsibility for the process
- assessment should involve designated community experts working in collaboration with RTO assessors in order to provide appropriate recognition of cultural and community skills and knowledge
- assessments must provide constructive feedback to candidates and support for further competency development.

### Assessment for People with a Disability

A disability presents some impairment to everyday activity. Some people with a disability do not have any impairments resulting from their disability. For example, a person who has a hearing impairment which is compensated for by a hearing aid may function without any adjustments. Some people with a disability may have an impairment because of the environment, not the disability itself. For example, hearing loss can be accentuated in a room with loud, competing noise and poor acoustics.

A disability may affect or relate to a range of human functions, including mobility, stamina, lifting ability, memory, vision, hearing, speech, comprehension and mood swings. This may be due to accidents, illnesses or birth.

It is important to remember that it is not the disability itself that should be of interest but its impact on the student's ability to access material and demonstrate knowledge.

Training providers have a legal obligation under the Disability Standards for Education to ensure that students who have a disability are able to access and participate in education without experiencing discrimination. The information provided below is aimed at assisting teachers/trainers to meet the reasonable adjustment needs of people who have a disability.

### Adjustments in Training and Assessment

An open mind, common sense and tailoring to individual circumstances will, as often as not, ensure individuals achieve the standards that employers and training providers expect. Reasonable adjustments need only be that - reasonable. It is about identifying what adjustments might reasonably be made and how they may be put into place. Training and assessment can be made more appropriate and fairer for a person who has a disability through attitude, preparation and application.

#### *Attitude*

The attitude of others is often the greatest barrier for people who have a disability. While most people who have a disability will only ever require minor adjustments to ensure learning is positive, some will require additional support. There are many support agencies that can provide advice, however teachers/trainers may need to take additional time to ensure their teaching/training meets the learning support needs of the individual concerned.

Positive language creates an atmosphere of mutual respect, which is essential to learning. For example, using language that identifies learners as people rather than language that identifies them by one of their characteristics conveys that the person is more important than the characteristic, such as the difference between a 'person who has an intellectual disability' and an 'intellectually disabled person'. A person who has an intellectual disability could also be identified by a range of equally important characteristics - height, age, sporting interests, etc. However, the term 'intellectually disabled person' refers to the disability as the major, and often only, defining characteristic.

### ***Preparation***

It is important to identify any functional issues arising from the nature and extent of a person's disability. This can usually be done by discussing such issues with the individual. In most cases, this consultation will identify reasonable adjustment needs which can be put into place. There are many simple things that teachers/trainers can do to make reasonable adjustments to enable individuals who have a disability to succeed in training and assessment. In some cases, professional support may be required.

### ***Application***

Once reasonable adjustments have been implemented it is important to monitor and evaluate what has been done to ensure the best environment for continuous learning because:

- adjustments may only need to be temporary, i.e. mechanisms may only need to be in place during an induction period or due to a temporary disability, in which case evaluation will ensure appropriateness without the need for ongoing monitoring
- adjustments may need reinforcing - when adjustments need to be ongoing, monitoring may reinforce patterns of behaviour in order for them to become 'natural'
- adjustments may need improving - where adjustments are ongoing or substantial, a commitment to continuous improvement is recommended through monitoring.

In most cases an informal discussion with the person concerned may be all that is necessary.

However, should adjustments be substantial, or a learner not be acquiring competence at a reasonable rate, a more formal process may be required. This may include:

- performance indicators - training providers, learners and employers should have agreed indicators of performance which can be measured and monitored
- independent support - a third party, independent of the training and/or assessment environment, may need to be involved
- experimentation - if existing adjustments are not proving satisfactory, creative solutions may be needed
- continuing review - formal monitoring is encouraged if adjustments are changed or if substantial adjustments are necessary.

For further information on training and assessment for people with specific needs, the DEEWR website has information about the National Disability Coordination Officer Program, which 'provides information, coordination and referral services for people with a disability interested in or enrolled in post-school education and training' ( [www.deewr.gov.au](http://www.deewr.gov.au) ). The Disability Education Standards Guidance Notes can also be accessed at on the DEEWR web site at:

[http://www.deewr.gov.au/Schooling/Programs/Documents/Disability\\_Standards\\_for\\_Education\\_2005\\_pdf.pdf](http://www.deewr.gov.au/Schooling/Programs/Documents/Disability_Standards_for_Education_2005_pdf.pdf).

### Reasonable Adjustment

Below are some of the practical things that can be done as part of providing reasonable adjustment to learners with specific support needs to enable them to undertake training and assessment. Clearly, each case will be different and will need to be discussed with the person and in some cases expert help will be needed, at least in the initial stages.

<b>Type of disability</b>	<b>Reasonable adjustment</b>
Acquired brain injury	<ul style="list-style-type: none"> <li>• Memory aids (posters and notes)</li> <li>• Reflective listening skills</li> <li>• Stress minimisation</li> <li>• Time and patience.</li> </ul>
Hearing impairment	<ul style="list-style-type: none"> <li>• Audio loops for people using hearing aids</li> <li>• Plain English documents</li> <li>• Fire and alarm systems with flashing lights</li> <li>• Sign language interpreters</li> <li>• Telephone typewriters.</li> </ul>
Intellectual disability	<ul style="list-style-type: none"> <li>• Additional time</li> <li>• Assessment which is appropriate to the skill (i.e. avoiding written assessment for practical tasks)</li> <li>• Mentors</li> <li>• Plain English documents</li> <li>• Practical learning sessions</li> <li>• Repetition of learning exercises.</li> </ul>
Mobility impairment	<ul style="list-style-type: none"> <li>• Access to aids, such as for holding documents</li> <li>• Adjustable tables</li> <li>• Lifting limits</li> <li>• Note-taking support</li> <li>• Verbal rather than written presentations</li> <li>• Personal computers</li> <li>• Wheelchair access.</li> </ul>

Psychiatric disability	<ul style="list-style-type: none"> <li>• Identification and avoidance of stresses</li> <li>• Ongoing rather than formal assessments</li> <li>• Reflective listening skills</li> <li>• 'Time-out' breaks in assessment.</li> </ul>
Speech impairment	<ul style="list-style-type: none"> <li>• Information summaries</li> <li>• Stress minimisation</li> <li>• Time and patience</li> <li>• Written rather than verbal opportunities</li> <li>• Additional writing time for assignments and tests.</li> </ul>
Vision impairment	<ul style="list-style-type: none"> <li>• Audiotapes</li> <li>• Braille translations</li> <li>• Enlarged computer screen images</li> <li>• Enlarged text and images</li> <li>• Good lighting or reading lamps</li> <li>• Guide dog provision</li> <li>• Informing the person before moving furniture</li> <li>• Voice synthesisers on computers.</li> </ul>

#### Training and Assessment Resources and Information for Equity Groups

The following references provide a range of information and resources related to training and assessment for equity groups.

- The Australian Disability Clearing House on Education and Training [www.adcet.edu.au](http://www.adcet.edu.au) website includes resources and articles about the training and assessment of people with a disability.
- Information source for Aboriginal and/or Torres Strait Islander people training and assessment include: National Aboriginal and Torres Strait Education website: <http://www.natsiew.edu.au>. In addition most State and Territory Education Departments have an Aboriginal and/or Torres Strait Islander Unit who may be able to provide advice and information.
- The Working with Diversity web site at <http://www.westone.wa.gov.au/workingwithdiversity> includes a range of resources including:
  - *Working with diversity: A Guide to Equity and the AQTF*
  - *Working with diversity: Quality Training for Indigenous Australians*
  - *Working with diversity: Quality Training for People with a Disability*
- Other relevant, up to date resources may be available in the resources section of the Skills area of the Department of Education, Employment and Workplace Relations at [www.deewr.gov.au](http://www.deewr.gov.au).

1) Other informative resources include:

- LiteracyNet at <http://www.deewr.gov.au/skills/programs/litandnum/literacynet/Pages/default.aspx>. The site contains key information about Australian adult literacy activities and links to a range of additional program, professional development, resource and research sites.

## Competency Standards

### What is competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

### Contextualisation of Units of Competency by RTOs

Registered Training Organisations (RTOs) may contextualise units of competency in this endorsed Training Package to reflect required local outcomes. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can include specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency, or reduce its portability.

- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure—but only where these expand the breadth of the competency and do not limit its use.

### **Components of Units of Competency**

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

#### **Unit Title**

The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

#### **Unit Descriptor**

The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

#### **Employability Skills**

This sub-section contains a statement that the unit contains Employability skills.

#### **Pre-requisite Units (optional)**

If there are any units of competency that must be completed before the unit, these will be listed.

#### **Application of the Unit**

This sub-section fleshes out the unit of competency's scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

#### **Competency Field (Optional)**

The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

#### **Sector (optional)**

The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

## Elements of Competency

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

## Performance Criteria

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

## Required Skills and Knowledge

The essential skills and knowledge are either identified separately or combined. *Knowledge* identifies what a person needs to know to perform the work in an informed and effective manner. *Skills* describe the application of knowledge to situations where understanding is converted into a workplace outcome.

## Range Statement

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

## Evidence Guide

The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;
- how consistency in performance can be assessed over time, various contexts and with a range of evidence; and
- the required underpinning knowledge and skills

•

## Employability Skills in Units of Competency

The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.

Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

### How Employability Skills relate to the Key Competencies

The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

#### Employability Skills Mayer Key Competencies

Communication	Communicating ideas and information
Teamwork	Working with others and in teams
Problem solving	Solving problems Using mathematical ideas and techniques
Initiative and enterprise	
Planning and organising	Collecting, analysing and organising information Planning and organising activities
Self-management	
Learning	
Technology	Using technology

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

### Explicitly embedding Employability Skills in units of competency

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

### Sample unit of competency components showing Employability Skills

The following table shows the sequence of a unit of competency, and each cell contains text taken from a range of units. It provides examples of where and how various Employability Skills could be embedded in each component.

Please note that in the example, the bracketed Employability Skills are provided for clarification only and would not be present in units of competency within this Training Package.

<b>Unit Title</b>	Give formal presentations and take part in meetings ( <b>Communication</b> )
<b>Unit Descriptor</b>	This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. ( <b>Initiative and enterprise</b> )
<b>Element</b>	Proactively resolve issues. (problem solving)
<b>Performance Criteria</b>	Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. ( <b>Planning and organising</b> )
<b>Range Statement</b>	Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (technology)
<b>Required Skills and Knowledge</b>	<p>Modify activities depending on differing workplace contexts, risk situations and environments. (<b>Learning</b>)</p> <p>Work collaboratively with others during a fire emergency. (teamwork)</p> <p>Instructions, procedures and other information relevant the maintenance of vessel and port security. (<b>Communication</b>)</p>

Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to:

### **Evidence Guide**

- assess response options to identified crime-prevention needs and determine the optimal action to be implemented
- in consultation with relevant others, design an initiative to address identified issues. (**Initiative and enterprise**).

### **Employability Skills Summaries and units of competency**

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

## **Competency Standards - Industry Contextualisation**

### **AHC10v3 Contextualisation Guidelines**

This Training Package is relevant to the broad spectrum of Australian industries where food and fibre production, horticulture and land management is undertaken and users are encouraged to customise qualifications and contextualise units of competency to suit their enterprise or sector purposes, provided that the customisation rules are followed.

Customisation of this Training Package may be achieved by:

- choosing appropriate electives from units provided in this Training Package
- importing elective units from other Training Packages or accredited courses
- contextualising units of competency to better suit an enterprise or industry context.

The export of units to other Training Packages is encouraged provided the following rules are observed.

#### **Choosing Appropriate Electives**

The electives listed in the Agriculture, Horticulture and Conservation and Land Management Training Package provide for skill development in all areas identified by industry representatives during consultations.

Most qualifications are able to be customised since candidates are able to choose particular combinations of elective units to suit their individual needs or work context.

### Importing Elective Units from Other Training Packages or Accredited Courses

To achieve maximum cross-industry application, the packaging rules enable units of competency to be imported from any Training Package or accredited course that is directly relevant to the candidate's current or intended work environment. In providing this flexibility it is incumbent on RTOs to ensure that the integrity of qualifications in the Training Package is maintained. The following guidelines for importing units apply.

- Imported units must relate to the core functions or roles in the candidate's current or intended work environment.
- The original title and code for the imported unit of competency must be retained.
- Imported units must come from other endorsed Training Packages or accredited courses.
- Imported units must align to the qualification level outlined in the relevant qualification packaging rules.

### Exporting Competencies to Other Training Packages

AHC10v3 has some application across industries outside the scope of the AHC10v3 Training Package. All AHC10v3 units may be imported to other Training Packages provided that:

- the original unit code and unit title are retained
- they are only contextualised to the extent outlined in the *section on Competency Standards*
- the user advises the appropriate Industry Skills Council in writing of the specific competencies exported to enable input during future revisions and ongoing communication.

### Contextualisation of Units of Competency

AHC10v3 competencies are able to be used in a wide range of industry sectors and enterprises. To enable this, contextualising of the units of competency is actively encouraged provided the requirements outlined in the earlier *section on Competency Standards* are met.

# AHC10110 Certificate I in Conservation and Land Management

## Modification History

Not Applicable

## Description

This qualification is an entry-level qualification aimed at individuals entering the conservation and land management industry. It allows individuals to develop basic skills and knowledge to prepare for work. They may undertake a range of simple tasks under close supervision. The range of technical skills and knowledge is limited.

The qualification is suited to VET in Schools programs or learners with no previous connection to the conservation and land management industry or relevant employment history.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate II in Conservation and Land Management or Certificate II in Rural Operations.

### Licensing considerations

There are no specific licences that relate to this qualification.

### Job roles

There are no specific job outcomes to this qualification, but the skills achieved will assist in successfully undertaking a Certificate II pre-vocational program or job outcome qualification, or will facilitate entry into an Australian Apprenticeship.

## Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>Listening and understanding</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Working as an individual and a team member</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of six (6) units made up of two (2) core units and four (4) elective units.

### ELECTIVE UNITS

- a maximum of four (4) elective units or four (4) units from units aligned to Certificates I or II in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the conservation and land management industry.

**CORE UNITS****Occupational Health and Safety**

AHCOHS101A      Work safely

**Work**

AHCWRK101A      Maintain the workplace

**ELECTIVE UNITS****Chemicals**

AHCCHM101A      Follow basic chemical safety rules

**Machinery operation and maintenance**

AHCMOM101A      Assist with routine maintenance of machinery and equipment

**Natural area restoration**

AHCNAR101A      Support natural area conservation

AHCNAR102A      Support native seed collection

**Nursery**

AHCNSY101A      Support nursery work

AHCWOL101A Support woolshed activities

## AHC20110 Certificate II in Agriculture

### Modification History

Release	TP Version	Comments
4	AHC10v5	Replaced imported elective unit <i>TLID2010A Operate a forklift</i> with <i>TLILIC2001A Licence to operate a forklift truck</i> in response to changes in national licencing regulations  Equivalent imported units updated
3	AHC10v4	Equivalent imported units updated
2	AHC10v2.1	Elective bank groupings modified to provide greater flexibility
1	AHC10	Initial release

### Description

This qualification provides an entry level occupational outcome in agriculture.

The qualification enables individuals to select a livestock production or cropping context as a job focus or, in the case of mixed farming enterprises, both.

### Pathways Information

#### Qualification Pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry. Completion of the Cotton Industry Skill Set will provide credit in this qualification.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate III in Agriculture (Dairy Production), Certificate III in Pork Production, Certificate III in Horse Breeding.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

## Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Assistant animal attendant/stockperson
- Assistant Farm or Station hand
- Assistant Farm or Station worker
- Assistant Farm or Station labourer
- 

## Licensing/Regulatory Information

There is no direct link between this qualification and licensing, legislative and/or regulatory requirements. However, an individual unit of competency may specify relevant licensing, legislative and/or regulatory requirements.

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

**Packaging Rules****Packaging Rules**

Completion of seventeen (17) units made up of two (2) core units and fifteen (15) elective units.

**ELECTIVE UNITS**

- a minimum of seven (7) units must come from elective group A
- a minimum of five (5) units must come from elective groups A or B
- a maximum of three (3) units may be selected from units aligned to Certificates II or III in AHC10 or from any other currently endorsed training package or accredited course.  
Selected units must be relevant to job outcomes in agriculture.

**CORE UNITS****Occupational health and safety**

Unit code	Unit title
AHCOHS201A	Participate in OHS processes

**Work**

Unit code	Unit title
AHCWRK209A	Participate in environmentally sustainable work practices

## ELECTIVE GROUP A

### Biosecurity

Unit code	Unit title
AHCBIO201A	Inspect and clean machinery for plant, animal and soil material
AHCBIO202A	Follow site quarantine procedures

### Broadacre cropping

Unit code	Unit title
AHCBAC201A	Assist agricultural crop establishment
AHCBAC202A	Assist agricultural crop maintenance
AHCBAC203A	Assist agricultural crop harvesting

### Chemicals

Unit code	Unit title
AHCCHM201A	Apply chemicals under supervision

### First aid

Unit code	Unit title
HLTFA201A	Provide basic emergency life support

### Infrastructure

Unit code	Unit title
AHCINF201A	Carry out basic electric fencing operations

AHCINF202A	Install, maintain and repair fencing
AHCINF203A	Maintain properties and structures
AHCINF204A	Fabricate and repair metal or plastic structures

### Irrigation

Unit code	Unit title
AHCIRG201A	Assist with the operation of gravity fed irrigation
AHCIRG204A	Lay irrigation and/or drainage pipes

### Livestock

Unit code	Unit title
AHCLSK202A	Care for health and welfare of livestock
AHCLSK203A	Carry out birthing duties
AHCLSK204A	Carry out regular livestock observation
AHCLSK205A	Handle livestock using basic techniques
AHCLSK206A	Identify and mark livestock
AHCLSK207A	Load and unload livestock
AHCLSK208A	Monitor livestock to parturition
AHCLSK209A	Monitor water supplies
AHCLSK210A	Muster and move livestock
AHCLSK211A	Provide feed for livestock

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM201A	Operate two wheel motorbikes
AHCMOM202A	Operate tractors

AHCMOM203A	Operate basic machinery and equipment
AHCMOM204A	Undertake operational maintenance of machinery
AHCMOM205A	Operate vehicles
AHCMOM212A	Operate quad bikes
FPICOT2234B	Operate 4x4 vehicle

### Pest management

Unit code	Unit title
AHCPMG201A	Treat weeds
AHCPMG202A	Treat plant pests, diseases and disorders

### Tools and equipment

Unit code	Unit title
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations

### Work

Unit code	Unit title
AHCWRK201A	Observe and report on weather
AHCWRK203A	Operate in isolated and remote situations
AHCWRK204A	Work effectively in the industry
AHCWRK205A	Participate in workplace communications
AHCWRK206A	Observe enterprise quality assurance procedures
AHCWRK207A	Collect and record production data
TLID1001A	Shift materials safely using manual handling methods

**ELECTIVE GROUP B****Artificial insemination**

<b>Unit code</b>	<b>Unit title</b>
AHCAIS201A	Assist with artificial insemination procedures

**Beekeeping**

<b>Unit code</b>	<b>Unit title</b>
AHCBEK201A	Support beekeeping work
AHCBEK202A	Use a bee smoker
AHCBEK203A	Open and reassemble a beehive
AHCBEK204A	Construct and repair beehives

**Broadacre cropping**

<b>Unit code</b>	<b>Unit title</b>
AHCBAC204A	Prepare grain storages
AHCBAC205A	Operate cane haulage vehicle

**Dairy**

<b>Unit code</b>	<b>Unit title</b>
AHCDRY201A	Milk livestock

**Drainage**

<b>Unit code</b>	<b>Unit title</b>
AHCDRG201A	Maintain drainage systems

**Horse breeding**

Unit code	Unit title
AHCHBR201A	Monitor horse health and welfare
AHCHBR202A	Handle young horses
AHCHBR203A	Provide daily care for horses
AHCHBR204A	Assist with mating procedures and parturition of horses

### Irrigation

Unit code	Unit title
AHCIRG202A	Assist with the operation of pressurised irrigation
AHCIRG205A	Maintain gravity-fed irrigation systems
AHCIRG206A	Maintain pressurised irrigation systems

### Livestock

Unit code	Unit title
AHCLSK201A	Assist with feeding in a production system
AHCLSK212A	Ride horses to carry out stock work
AHCLSK213A	Clean out production sheds
AHCLSK214A	Maintain production growing environments
AHCLSK215A	Carry out alpaca handling and husbandry operations

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM206A	Conduct grader operations
AHCMOM207A	Conduct front-end loader operations
AHCMOM208A	Conduct excavator operations
AHCMOM209A	Conduct dozer operations

AHCMOM210A	Conduct scraper operations
TLILIC2001A	Licence to operate a forklift truck
TLID2202A	Conduct weighbridge operations

### Pork production

Unit code	Unit title
AHCPRK201A	Care for health and welfare of pigs
AHCPRK202A	Care for weaner and grower pigs
AHCPRK203A	Move and handle pigs

### Poultry

Unit code	Unit title
AHCPLY201A	Collect store and handle eggs from breeder flocks
AHCPLY202A	Maintain health and welfare of poultry
AHCPLY203A	Set up shed for placement of day-old chickens
AHCPLY204A	Collect and pack eggs for human consumption

### Production horticulture

Unit code	Unit title
AHCPHT201A	Plant horticultural crops
AHCPHT202A	Carry out canopy maintenance
AHCPHT203A	Support horticultural crop harvesting
AHCPHT205A	Carry out postharvest operations

### Shearing

Unit code	Unit title
-----------	------------

AHCSHG201A	Crutch sheep
AHCSHG202A	Assist in preparing for shearing and crutching
AHCSHG203A	Shear sheep to novice level
AHCSHG204A	Shear sheep to improver level
AHCSHG205A	Grind combs and cutters for machine shearing
AHCSHG206A	Prepare handpiece and downtube for machine shearing
AHCSHG207A	Shear goats
AHCSHG208A	Shear alpacas
AHCSHG209A	Support alpaca shearing operations

### Soil and water conservation

Unit code	Unit title
AHCSAW201A	Conduct erosion and sediment control activities

### Soils and media

Unit code	Unit title
AHCSOL201A	Determine basic properties of soil and/or growing media

### Vertebrate pests

Unit code	Unit title
AHCVPT201A	Clear features that harbour pest animals
AHCVPT202A	Muster pest animals
AHCVPT203A	Use firearms to humanely destroy animals

### Water

Unit code	Unit title
-----------	------------

AHCWAT201A	Set up, operate and maintain water delivery systems for compost
------------	---

### Wool

Unit code	Unit title
AHCWOL201A	Pen sheep
AHCWOL202A	Perform board duties
AHCWOL203A	Carry out wool pressing
AHCWOL204A	Undertake basic skirting of alpaca fleece

## AHC20210 Certificate II in Poultry Production Operations

### Modification History

Release	TP Version	Comments
3	AHC10v5	Replaced imported elective unit <i>TLID2010A Operate a forklift</i> with <i>TLILIC2001A Licence to operate a forklift truck</i> in response to changes in national licencing regulations

## AHC20310 Certificate II in Production Horticulture

### Modification History

Release	TP Version	Comments
4	AHC10v5	Added 24 elective units to cover grape growing (viticulture)  Replaced imported elective unit <i>TLID2010A Operate a forklift</i> with <i>TLILIC2001A Licence to operate a forklift truck</i> in response to changes in national licencing regulations  Equivalent imported units updated
3	AHC10v4	Equivalent imported units updated
2	AHC10v3	Elective bank groupings modified to provide greater flexibility
1	AHC10	Initial release

### Description

This qualification provides an occupational outcome in production horticulture.

The qualification enables individuals to select a tree cropping, vegetable or berry production, grape growing or mushroom production context as a job focus, or a mixture in the case of mixed enterprises.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, AHC30610 Certificate III in Production Horticulture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Licensing considerations

There are no specific licences that relate to this qualification.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Farm, vineyard or orchard hand
- Farm, vineyard or orchard worker
- Farm, vineyard or orchard labourer

## Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Taking initiative and making decisions within workplace role</li> <li>• Participating in continuous improvement and planning</li> </ul>

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Undertaking learning as required for work</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of two (2) core units and thirteen (13) elective units.

### ELECTIVE UNITS

- a minimum of three (3) units must come from elective group A
- a minimum of seven (7) units must come from elective groups A or B
- a maximum of three (3) units may be selected from units packaged in Certificates II or III in AHC10 or from any other currently endorsed Training Package or accredited course. Selected units must be relevant to job outcomes in the production horticulture industry.

### CORE UNIT

#### Occupational Health and Safety

Unit code	Unit title
AHCOHS201A	Participate in OHS processes

#### Work

Unit code	Unit title
AHCWRK209A	Participate in environmentally sustainable work practices

### ELECTIVE UNITS GROUP A

**Biosecurity**

Unit code	Unit title
AHCBIO202A	Follow site quarantine procedures

**Chemicals**

Unit code	Unit title
AHCCHM201A	Apply chemicals under supervision

**Machinery operation and maintenance**

Unit code	Unit title
AHCMOM203A	Operate basic machinery and equipment

**Production horticulture**

Unit code	Unit title
AHCPHT201A	Plant horticultural crops
AHCPHT203A	Support horticultural crop harvesting
AHCPHT205A	Carry out post-harvest operations

**Pest management**

Unit code	Unit title
AHCPMG201A	Treat weeds
AHCPMG202A	Treat plant pests, diseases and disorders

**Soils and media**

Unit code	Unit title
AHCSOL201A	Determine basic properties of soil and/or growing media

**ELECTIVE UNITS GROUP B****Food**

<b>Unit code</b>	<b>Unit title</b>
FDFOP2012A	Maintain food safety when loading, unloading and transporting food
FDFOP2016A	Work in a food handling area for non-food handlers

**Infrastructure**

<b>Unit code</b>	<b>Unit title</b>
AHCINF203A	Maintain properties and structures

**Irrigation**

<b>Unit code</b>	<b>Unit title</b>
AHCIRG204A	Lay irrigation and/or drainage pipes
AHCIRG207A	Carry out irrigation site preparation tasks
AHCIRG208A	Assist with the installation and maintenance of pumps and flow-control devices for irrigation
AHCIRG209A	Carry out installation tasks for low volume irrigation
AHCIRG210A	Carry out installation tasks for sprinkler irrigation
AHCIRG211A	Assist with low volume irrigation operations
AHCIRG212A	Assist with sprinkler irrigation operations
AHCIRG213A	Assist with surface irrigation operations
FDFWGG2013A	Deliver injection requirements

**Machinery operation and maintenance**

<b>Unit code</b>	<b>Unit title</b>
------------------	-------------------

AHCMOM201A	Operate two wheel motorbikes
AHCMOM202A	Operate tractors
AHCMOM204A	Undertake operational maintenance of machinery
AHCMOM205A	Operate vehicles
AHCMOM212A	Operate quad bikes
FPICOT2234B	Operate 4x4 vehicle
FDFWGG2015A	Support mechanical harvesting operations
FDFWGG2018A	Operate vineyard equipment
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations
TLILIC2001A	Licence to operate a forklift truck
TLID2022A	Conduct weighbridge operations

### Nursery

Unit code	Unit title
AHCNSY202A	Tend nursery plants
AHCNSY203A	Undertake propagation activities
FDFWGG2001A	Bench graft vines
FDFWGG2002A	Carry out potting operations
FDFWGG2005A	Maintain callusing environment
FDFWGG2006A	Obtain and process rootlings
FDFWGG2020A	Carry out hot water treatment
FDFWGG2021A	Operate nursery cold storage facilities
FDFWGG2022A	Take and process vine cuttings

### Production horticulture

Unit code	Unit title
AHCPHT202A	Carry out canopy maintenance
AHCPHT204A	Undertake field budding and grafting
AHCPHT206A	Handle and move mushroom boxes
AHCPHT207A	Perform mushroom substrate process tasks
AHCPHT208A	Water mushroom crops
AHCPHT209A	Produce trellis dried grapes
FDFWGG2003A	Hand prune vines
FDFWGG2008A	Train vines
FDFWGG2009A	Operate specialised canopy management equipment
FDFWGG2010A	Field graft vines
FDFWGG2016A	Install and maintain vine trellis

### Work

Unit code	Unit title
AHCWRK201A	Observe and report on weather
AHCWRK203A	Operate in isolated and remote situations
AHCWRK206A	Observe enterprise quality assurance procedures
AHCWRK207A	Collect and record production data
AHCWRK208A	Provide information on products and services
TLID1001A	Shift materials safely using manual handling methods

## AHC20410 Certificate II in Horticulture

### Modification History

Release	TP Version	Comments
3	AHC10v5	Equivalent imported units updated
2	AHC10v4	Equivalent imported units updated
1	AHC10	Initial release

### Description

This qualification underpins a range of work functions and job roles that can lead to a horticultural trade qualification.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry.

##### Pathways from the qualification

Further training pathways from this qualification include any of the specialist qualifications at Certificate III.

#### Licensing considerations

There are no specific licences that relate to this qualification.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Horticulture worker
- Horticulture assistant.
-

## Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Packaging Rules

Completion of fifteen (15) units made up of two (2) core units and thirteen (13) elective units.

### ELECTIVE UNITS

- a minimum of three (3) units must come from elective group A
- a minimum of seven (7) units must come from elective groups A or B
- a maximum of three (3) units may be selected from units aligned to Certificates II or III in AHC10 or from any other currently endorsed Training Package or accredited course. Selected units must meet job outcomes relevant to horticulture.

### CORE UNITS

#### Occupational Health and Safety

Unit code	Unit title
AHCOHS201A	Participate in OHS processes

#### Work

Unit code	Unit title
AHCWRK209A	Participate in environmentally sustainable work practices

### ELECTIVE UNITS GROUP A

#### Plants

Unit code	Unit title
AHCPCM201A	Recognise plants
AHCPCM202A	Collect, prepare and preserve plant specimens

#### Arboriculture

Unit code	Unit title
AHCARB201A	Apply a range of treatments to trees
AHCARB202A	Fell small trees

AHCARB203A	Perform above ground pruning
AHCARB204A	Undertake standard climbing techniques
AHCARB205A	Operate and maintain chainsaws
AHCARB206A	Undertake stump removal
FPICOT2221B	Trim and cross cut felled trees
FPIFGM2208A	Fall trees manually (basic)
FPIFGM3204A	Fall trees manually (intermediate)
FPIHAR2206B	Operate a mobile chipper/mulcher

### Landscape

Unit code	Unit title
AHCLSC201A	Assist with landscape construction work
AHCLSC202A	Construct low-profile timber or modular retaining walls
AHCLSC203A	Install aggregate paths
AHCLSC204A	Lay paving
AHCLSC205A	Install tree protection devices

### Nursery

Unit code	Unit title
AHCNSY201A	Pot up plants
AHCNSY202A	Tend nursery plants
AHCNSY203A	Undertake propagation activities
AHCNSY204A	Maintain indoor plants

### Parks and gardens

Unit code	Unit title
-----------	------------

AHCPGD201A	Plant trees and shrubs
AHCPGD202A	Prepare and maintain plant displays
AHCPGD203A	Prune shrubs and small trees
AHCPGD204A	Transplant small trees
AHCPGD205A	Prepare a grave site
AHCPGD206A	Conduct visual inspection of park facilities

### Turf

Unit code	Unit title
AHCTRF201A	Assist with turf construction
AHCTRF202A	Prepare turf surfaces for play
AHCTRF203A	Renovate grassed areas
AHCTRF204A	Support turf establishment

### ELECTIVE UNITS GROUP B

#### Chemicals

Unit code	Unit title
AHCCHM201A	Apply chemicals under supervision

#### Infrastructure

Unit code	Unit title
AHCINF203A	Maintain properties and structures
AHCINF204A	Fabricate and repair metal or plastic structures

#### Irrigation

Unit code	Unit title
-----------	------------

AHCIRG202A	Assist with the operation of pressurised irrigation
AHCIRG203A	Install micro-irrigation systems
AHCIRG204A	Lay irrigation and/or drainage pipes
AHCIRG206A	Maintain pressurised irrigation systems

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM202A	Operate tractors
AHCMOM203A	Operate basic machinery and equipment
AHCMOM204A	Undertake operational maintenance of machinery
AHCMOM205A	Operate vehicles
AHCMOM211A	Operate side by side utility vehicles
AHCMOM212A	Operate quad bikes

### Merchandising and sales

Unit code	Unit title
SIRXADM001A	Apply retail office procedures
SIRXCCS201	Apply point-of-sale handling procedures
SIRXCCS202	Interact with customers
SIRXCLM001A	Organise and maintain work areas
SIRXFIN201	Balance and secure point-of-sale terminal
SIRXFIN002A	Perform retail finance duties
SIRXINV002A	Maintain and order stock
SIRXICT001A	Operate retail technology
SIRXMER201	Merchandise products
SIRXSLS201	Sell products and services

SIRXSLS002A	Advise on products and services
-------------	---------------------------------

### Pest management

Unit code	Unit title
AHCPMG201A	Treat weeds
AHCPMG202A	Treat plant pests, diseases and disorders

### Soils and media

Unit code	Unit title
AHCSOL201A	Determine basic properties of soil and/or growing media

### Tools and equipment

Unit code	Unit title
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations

### Work

Unit code	Unit title
AHCWRK204A	Work effectively in the industry
AHCWRK205A	Participate in workplace communications
AHCWRK206A	Observe enterprise quality assurance procedures
AHCWRK207A	Collect and record production data
AHCWRK208A	Provide information on products and services
AHCWRK209A	Participate in environmentally sustainable work practices
TLID1001A	Shift materials safely using manual handling methods

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of seven (7) core units and eight (8) elective units.

**ELECTIVE UNITS**

- a minimum of five (5) units must come from the elective unit list
- a maximum of three (3) units may be selected from units aligned to Certificates II or III in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the nursery industry.

**CORE UNITS**

## Occupational Health and Safety

Unit code	Unit title
AHCOHS201A	Participate in OHS processes

## Plants

Unit code	Unit title
AHCPCM201A	Recognise plants

## Nursery

Unit code	Unit title
AHCNSY202A	Tend nursery plants
AHCNSY204A	Maintain indoor plants

## Merchandising and sales

Unit code	Unit title
SIRXCCS201	Apply point-of-sale handling procedures
SIRXSLS201	Sell products and services

## Soils and media

Unit code	Unit title
-----------	------------

AHCSOL201A	Determine basic properties of soil and/or growing media
------------	---

## ELECTIVE UNITS

### Biosecurity

Unit code	Unit title
AHCBIO202A	Follow site quarantine procedures

### Chemicals

Unit code	Unit title
AHCCHM201A	Apply chemicals under supervision

### Drainage

Unit code	Unit title
AHCDRG201A	Maintain drainage systems

### First Aid

Unit code	Unit title
HLTFA201A	Provide basic emergency life support

### Irrigation

Unit code	Unit title
AHCIRG202A	Assist with the operation of pressurised irrigation
AHCIRG206A	Maintain pressurised irrigation systems

### Machinery operation and maintenance

Unit code	Unit title
-----------	------------

AHCMOM203A	Operate basic machinery and equipment
------------	---------------------------------------

### Merchandising and sales

Unit code	Unit title
SIRXICT001A	Operate retail technology
SIRXADM001A	Apply retail office procedures

### Nursery

Unit code	Unit title
AHCNSY201A	Pot up plants
AHCNSY203A	Undertake propagation activities

### Pests management

Unit code	Unit title
AHCPMG202A	Treat plant pests, diseases and disorders

### Work

Unit code	Unit title
AHCWRK204A	Work effectively in the industry
AHCWRK209A	Participate in environmentally sustainable work practices

# AHC20910 Certificate II in Sports Turf Management

## Modification History

Not Applicable

## Description

This qualification provides an occupational outcome in green-keeping. The sports turf industry expects this qualification to be achieved to meet job outcomes at this level.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate III in Sports Turf Management.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Licensing considerations

There are no specific licences that relate to this qualification.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Groundsperson

Assistant green keeper

## Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

Unit code	Unit title
AHCPMG201A	Treat weeds
AHCPMG202A	Treat plant pests, diseases and disorders

### Plants

Unit code	Unit title
AHCPCM201A	Recognise plants
AHCPCM202A	Collect, prepare and preserve plant specimens

### Soil and water conservation

Unit code	Unit title
AHCSAW201A	Conduct erosion and sediment control activities

### Vertebrate pests

Unit code	Unit title
AHCVPT201A	Clear features that harbour pest animals
AHCVPT202A	Muster pest animals
AHCVPT203A	Use firearms to humanely destroy animals
AHCVPT306A	Apply animal trapping techniques

### Work

Unit code	Unit title
AHCWRK202A	Observe environmental work practices

AHCWRK203A	Operate in isolated and remote situations
AHCWRK204A	Work effectively in the industry
AHCWRK205A	Participate in workplace communications
SITXCCS201	Provide visitor information

## ELECTIVE UNITS GROUP B

### Arboriculture

Unit code	Unit title
AHCARB202A	Fell small trees
AHCARB205A	Operate and maintain chainsaws

### Biosecurity

Unit code	Unit title
AHCBIO201A	Inspect and clean machinery for plant, animal and soil material

### Business

Unit code	Unit title
BSBWOR204A	Use business technology
BSBINM201A	Process and maintain workplace information

### Chemicals

Unit code	Unit title
AHCCHM201A	Apply chemicals under supervision

### First aid

Unit code	Unit title
-----------	------------

HLTFA201A	Provide basic emergency life support
HLTFA301C	Apply first aid
HLTFA302C	Provide first aid in remote situation

### Infrastructure

Unit code	Unit title
AHCINF201A	Carry out basic electric fencing operations
AHCINF202A	Install, maintain and repair fencing
AHCINF203A	Maintain properties and structures

### Landscape

Unit code	Unit title
AHCLSC201A	Assist with landscape construction work
AHCLSC203A	Install aggregate paths
AHCLSC205A	Install tree protection devices

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM201A	Operate two wheel motorbikes
AHCMOM202A	Operate tractors
AHCMOM203A	Operate basic machinery and equipment
AHCMOM204A	Undertake operational maintenance of machinery
AHCMOM205A	Operate vehicles
AHCMOM206A	Conduct grader operations
AHCMOM207A	Conduct front-end loader operations
AHCMOM208A	Conduct excavator operations

AHCMOM209A	Conduct dozer operations
AHCMOM210A	Conduct scraper operations
FPICOT2234B	Operate 4x4 vehicle
TLILIC2001A	Licence to operate a forklift truck

### Nursery

Unit code	Unit title
AHCNSY202A	Tend nursery plants
AHCNSY203A	Undertake propagation activities

### Soils and media

Unit code	Unit title
AHCSOL201A	Determine basic properties of soil and/or growing media

### Work

Unit code	Unit title
AHCWRK201A	Observe and report on weather
AHCWRK206A	Observe enterprise quality assurance procedures
AHCWRK207A	Collect and record production data
AHCWRK208A	Provide information on products and services
TLID1001A	Shift materials safely using manual handling methods

# AHC21112 Certificate II in Irrigation

## Modification History

June 2012: This qualification supersedes but is not equivalent to AHC21110.

## Description

This Qualification allows individuals to develop skills and knowledge to work as field and support staff within the irrigation industry.

## Application

This Qualification describes the job roles of supervised entry-level workers in the irrigation industry. It covers the employment areas of irrigation installation and irrigation operations. Supervised entry-level workers in the irrigation retail sector can complete a retail Qualification with electives chosen from the units in this Qualification.

## Additional Qualification advice

This Qualification is suitable for VET in schools programs.

## Pathways Information

### Pathways into the Qualification

This Qualification may be accessed by direct entry.

### Pathways from the Qualification

Further training pathways from this Qualification include, but are not limited to, AHC32412 Certificate III in Irrigation.

## Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

## Entry Requirements

There are no entry requirements for this Qualification.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding instructions and directions</li> <li>• Speaking clearly and directly to supervisor, customers and other workers</li> <li>• Reading and interpreting simple workplace related documentation</li> <li>• Writing to convey simple information</li> <li>• Applying numeracy skills to perform work role.</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Dealing with conflict in a constructive way</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team.</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical solutions to deal with simple problems</li> <li>• Identifying problems and assessing the importance level</li> <li>• Solving problems individually or in teams</li> <li>• Using numeracy skills to solve simple problems.</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Learning to work in a new situation</li> <li>• Dealing with simple problems</li> <li>• Referring problems onto supervisor for direction.</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting and recording information</li> <li>• Using basic business systems for routine tasks</li> <li>• Carrying out directions with a demonstrated systematic approach</li> <li>• Working within clear project deliverables and timelines</li> <li>• Monitoring time against directed tasks and priorities.</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements.</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Interacting with technology through practical tasks</li> <li>• Setting up equipment.</li> </ul>

## Packaging Rules

Complete **twelve (12)** Units of Competency comprised of:

- Two (2) Core Units
- Ten (10) Elective Units

### Core Units of Competency

Unit code	Unit title
AHCOHS201A	Participate in OHS processes
AHCWRK209A	Participate in environmentally sustainable work practices

### Elective Units

- Select a minimum of **four** (4) Units from Group A.
- Select a minimum of **four** (4) additional Units from Group A or B.
- Select a minimum of **two** (2) additional Units from Group A, Group B and/or this or any other endorsed Training Package or accredited course packaged at Certificate II or III
- Selected Units must be relevant to job outcomes in the irrigation industry.

### Group A

Unit code	Unit title
AHCIRG204A	Lay irrigation and/or drainage pipes
AHCIRG207A	Carry out irrigation site preparation tasks
AHCIRG208A	Assist with the installation and maintenance of pumps and flow-control devices for irrigation
AHCIRG209A	Carry out installation tasks for low volume irrigation
AHCIRG210A	Carry out installation tasks for sprinkler irrigation
AHCIRG211A	Assist with low volume irrigation operations and maintenance
AHCIRG212A	Assist with sprinkler irrigation operations and maintenance
AHCIRG213A	Assist with surface irrigation operations and maintenance
AHCSOL201A	Determine basic properties of soil and/or growing media
NWP210B	Perform basic water quality tests
NWP222A	Operate basic flow control and regulating devices in irrigation systems
NWP251B	Construct open earthen channels or drains

**Group B**

<b>Unit code</b>	<b>Unit title</b>
AHCDRG201A	Maintain drainage systems
AHCIRG214A	Install micro-irrigation systems for landscaping
AHCMOM203A	Operate basic machinery and equipment
AHCWRK204A	Work effectively in the industry
AHCWRK205A	Participate in workplace communications
AHCWRK208A	Provide information on products and services
CPCPCM2007A	Carry out levelling * <i>CPCPCM2003A Carry out OHS requirements</i> <i>CPCPCM2004A Read plans and calculate plumbing quantities</i>
NWP203B	Plan and organise personal work activities
NWP209B	Use maps, plans, drawings and specifications
NWP215B	Install and replace basic volumetric metering equipment
NWP226B	Prepare and restore work site
NWP252B	Construct and install irrigation delivery and stormwater drainage assets
TLID1001A	Shift materials safely using manual handling methods

# AHC21210 Certificate II in Rural Operations

## Modification History

Not Applicable

## Description

This qualification provides an occupational outcome for industries and agencies in rural and regional Australia.

Depending on the units selected individuals can be employed not only in rural industries but also other rural and regional sectors, such as local government, tourism, hospitality, transport, construction, community services, information technology and metals.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate III in Agriculture, Certificate III in Production Horticulture and Certificate III in Horticulture.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Licensing considerations

There are no specific licences that relate to this qualification.

### Job roles

Multifunctional job roles that suit regional areas of Australia.

## Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

#### **Wool**

AHCWOL201A Pen sheep

AHCWOL202A Perform board duties

AHCWOL203A Carry out wool pressing

#### **Work**

AHCWRK204A Work effectively in the industry

AHCWRK202A Observe environmental work practices

## AHC21510 Certificate II in Floriculture

### Modification History

Release	TP Version	Comments
3	AHC10v5	Replaced imported elective unit <i>TLID2010A Operate a forklift</i> with <i>TLILIC2001A Licence to operate a forklift truck</i> in response to changes in national licencing regulations  Equivalent imported units updated
2	AHC10v4	Equivalent imported units updated
1	AHC10	Initial release

### Description

This qualification provides an occupational outcome in floriculture. The floriculture industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate III in Floriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Licensing considerations

There are no specific licences that relate to this qualification.

## Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Flower grower

## Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Taking initiative and making decisions within workplace role</li> <li>• Participating in continuous improvement and planning</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Undertaking learning as required for work</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of one (1) core unit and fourteen elective units.

### ELECTIVE UNITS

- a minimum of three (3) units must come from elective group A
- a minimum of eight (8) units must come from elective groups A or B
- a maximum of three (3) units may be selected from units aligned to Certificates II or III in AHC10 or from any other currently endorsed training package or accredited course.  
Selected units must be relevant to job outcomes in the flower growing industry.

### CORE UNIT

#### Occupational Health and Safety

Unit code	Unit title
AHCOHS201A	Participate in OHS processes

### ELECTIVE UNITS GROUP A

#### Plants

Unit code	Unit title
AHCPCM201A	Recognise plants

#### Nursery

Unit code	Unit title
AHCNSY201A	Pot up plants
AHCNSY202A	Tend nursery plants
AHCNSY203A	Undertake propagation activities

**Production horticulture**

Unit code	Unit title
AHCPHT201A	Plant horticultural crops
AHCPHT203A	Support horticultural crop harvesting
AHCPHT204A	Undertake field budding and grafting
AHCPHT205A	Carry out postharvest operations

**Soils and media**

Unit code	Unit title
AHCSOL201A	Determine basic properties of soil and/or growing media

**ELECTIVE UNITS GROUP B****Biosecurity**

Unit code	Unit title
AHCBIO202A	Follow site quarantine procedures

**Chemicals**

Unit code	Unit title
AHCCHM201A	Apply chemicals under supervision

**Drainage**

Unit code	Unit title
AHCDRG201A	Maintain drainage systems

**Infrastructure**

Unit code	Unit title
AHCINF203A	Maintain properties and structures

### Irrigation

Unit code	Unit title
AHCIRG202A	Assist with the operation of pressurised irrigation
AHCIRG206A	Maintain pressurised irrigation systems

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM201A	Operate two wheel motorbikes
AHCMOM202A	Operate tractors
AHCMOM203A	Operate basic machinery and equipment
AHCMOM204A	Undertake operational maintenance of machinery
AHCMOM205A	Operate vehicles
AHCMOM211A	Operate side by side utility vehicles
FPICOT2234B	Operate 4x4 vehicle
TLILIC2001A	Licence to operate a forklift truck

### Nursery

Unit code	Unit title
AHCNSY204A	Maintain indoor plants

### Pest management

Unit code	Unit title
AHCPMG201A	Treat weeds

AHCPMG202A	Treat plant pests, diseases and disorders
------------	---

**Work**

Unit code	Unit title
AHCWRK206A	Observe enterprise quality assurance procedures
AHCWRK207A	Collect and record production data
AHCWRK208A	Provide information on products and services
AHCWRK209A	Participate in environmentally sustainable work practices
TLID1001A	Shift materials safely using manual handling methods

## AHC21610 Certificate II in Landscaping

### Modification History

Not Applicable

### Description

This qualification provides an occupational outcome in landscaping. The landscaping industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate III in Landscape Construction.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Licensing considerations

There are no specific licences that relate to this qualification.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Landscape labourer, landscape trades assistant

### Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> </ul>

Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Taking initiative and making decisions within workplace role</li> <li>• Participating in continuous improvement and planning</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Learning in order to accommodate change</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of eight (8) core units and seven (7) elective units.

### ELECTIVE UNITS

- a minimum of four (4) units must come from the elective unit list

- a maximum of three (3) units may be selected from the elective unit list or from units aligned to Certificates II or III in AHC10 or from any other currently endorsed training package or accredited course. Selected units must meet job outcomes relevant to landscaping.

## CORE UNITS

### Occupational Health and Safety

AHCOHS201A Participate in OHS processes

### Landscape

AHCLSC201A Assist with landscape construction work

AHCLSC202A Construct low-profile timber or modular retaining walls

AHCLSC203A Install aggregate paths

AHCLSC204A Lay paving

### Machinery operation and maintenance

AHCMOM203A Operate basic machinery and equipment

### Parks and gardens

AHCPGD201A Plant trees and shrubs

### Plants

AHCPCM201A Recognise plants

## ELECTIVE UNITS

### Arboriculture

AHCARB201A Apply a range of treatments to trees

AHCARB205A Operate and maintain chainsaws

### Chemicals

AHCCHM201A Apply chemicals under supervision

### Infrastructure

AHCINF203A Maintain properties and structures

AHCINF204A Fabricate and repair metal or plastic structures

### **Irrigation**

AHCIRG202A Assist with the operation of pressurised irrigation

AHCIRG203A Install micro-irrigation systems

AHCIRG204A Lay irrigation and/or drainage pipes

AHCIRG206A Maintain pressurised irrigation systems

### **Landscape**

AHCLSC205A Install tree protection devices

### **Machinery operation and maintenance**

AHCMOM202A Operate tractors

AHCMOM204A Undertake operational maintenance of machinery

AHCMOM205A Operate vehicles

### **Parks and gardens**

AHCPGD202A Prepare and maintain plant displays

AHCPGD203A Prune shrubs and small trees

AHCPGD204A Transplant small trees

### **Pest management**

AHCPMG201A Treat weeds

AHCPMG202A Treat plant pests, diseases and disorders

### **Soils and media**

AHCSOL201A Determine basic properties of soil and/or growing media

### **Turf**

AHCTRF201A Assist with turf construction

AHCTRF202A Prepare turf surfaces for play

AHCTRF203A Renovate grassed areas

AHCTRF204A Support turf establishment

**Work**

AHCWRK204A	Work effectively in the industry
AHCWRK205A	Participate in workplace communications
AHCWRK206A	Observe enterprise quality assurance procedures
AHCWRK208A	Provide information on products and services
AHCWRK209A	Participate in environmentally sustainable work practices

## AHC30110 Certificate III in Agriculture

### Modification History

Release	TP Version	Comments
6	AHC10v6	Added elective <i>AHCLSK335A Conduct dropped ovary technique procedures for spaying cattle</i>
5	AHC10v5	Added electives <i>MEM05049B Perform routine gas tungsten arc welding</i> and <i>MEM05050B Perform routine gas metal arc welding</i>  Removed elective <i>TLID2010A Operate a forklift</i> in response to new national licencing regulations  Equivalent imported units updated
4	AHC10v4	Equivalent imported units updated  Added missing prerequisite unit to Packaging Rules
3	AHC10v3	Corrected unit <i>AHCPCM303A</i> name in unit grid
2	AHC10v2.1	Elective bank groupings in AHC30110 were modified to provide greater flexibility
1	AHC10	Initial release

### Description

This qualification provides a general vocational outcome in agriculture. The qualification enables individuals to select a livestock production or cropping context as a job focus or, in the case of mixed farming enterprises, both.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, AHC40110 Certificate IV in Agriculture.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Farm or station hand
- Farm or station worker.
- 

### Licensing/Regulatory Information

There is no direct link between this qualification and licensing, legislative and/or regulatory requirements. However, an individual unit of competency may specify relevant licensing, legislative and/or regulatory requirements.

### Entry Requirements

#### Entry requirements

There are no entry requirements for this qualification.

### Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> </ul>

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
	<ul style="list-style-type: none"> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> <li>• Being creative in response to workplace challenges</li> <li>• Identifying opportunities that might not be obvious to others</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Being appropriately resourceful</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Monitoring and evaluating own performance</li> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in a range of settings including informal learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

AHC030309

## Packaging Rules

### Packaging Rules

Completion of sixteen (16) units made up of two (2) core units and fourteen (14) elective units.

### ELECTIVE UNITS

- a minimum of five (5) units must come from elective group A
- a minimum of five (5) units must come from elective groups A or B
- a maximum of four (4) units may be selected from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed Training Package or accredited course. Selected units must be relevant to job outcomes in agriculture.

### CORE UNITS

#### Occupational health and safety

Unit code	Unit title

AHCOHS301A	Contribute to OHS processes
------------	-----------------------------

**Work**

Unit code	Unit title
AHCWRK313A	Implement and monitor environmentally sustainable work practices

**ELECTIVE UNITS GROUP A****Agribusiness**

Unit code	Unit title
AHCAGB301A	Keep records for a primary production business

**Biosecurity**

Unit code	Unit title
AHCBIO301A	Work effectively in an emergency disease or plant pest response
AHCBIO302A	Identify and report unusual disease or plant pest signs
AHCBIO303A	Carry out emergency disease or plant pest control procedures at infected premises
AHCBIO304A	Carry out movement and security procedures
AHCBIO305A	Monitor and review biosecurity measures

**Broadacre cropping**

Unit code	Unit title
AHCBAC301A	Conserve forage
AHCBAC302A	Establish pastures and crops for livestock production
AHCBAC303A	Prepare to receive grains/seeds

AHCBAC304A	Test grains/seeds on receipt
AHCBAC305A	Undertake preparation of land for agricultural crop production
AHCBAC306A	Establish agricultural crops
AHCBAC307A	Maintain agricultural crops
AHCBAC308A	Undertake agricultural crop harvesting activities

### Business

Unit code	Unit title
AHCBUS301A	Use hand held e-business tools
BSBFIA301A	Maintain financial records
BSBINM201A	Process and maintain workplace information
BSBITU203A	Communicate electronically
BSBITU306A	Design and produce business documents
BSBWOR204A	Use business technology

### Chemicals

Unit code	Unit title
AHCCHM301A	Conduct fumigation in enclosed spaces
AHCCHM302A	Fumigate soil using chemicals
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals
AHCCHM305A	Conduct manual fumigation of vertebrate and invertebrate pests

### First aid

Unit code	Unit title
HLTFA301C	Apply first aid

HLTFA302C	Provide first aid in remote situation
-----------	---------------------------------------

### Infrastructure

Unit code	Unit title
AHCINF301A	Implement property improvement, construction and repair
AHCINF302A	Plan and construct an electric fence
AHCINF303A	Plan and construct conventional fencing

### Irrigation

Unit code	Unit title
AHCIRG301A	Implement a maintenance program for an irrigation system
AHCIRG304A	Operate gravity fed irrigation systems
AHCIRG305A	Operate pressurised irrigation systems
AHCIRG306A	Troubleshoot irrigation systems

### Livestock

Unit code	Unit title
AHCLSK301A	Administer medication to livestock
AHCLSK305A	Maintain livestock water supplies
AHCLSK308A	Identify and draft livestock
AHCLSK309A	Implement animal health control programs
AHCLSK311A	Implement feeding plans for livestock
AHCLSK314A	Prepare animals for parturition
AHCLSK318A	Rear newborn and young livestock
AHCLSK323A	Maintain and monitor feed stocks
AHCLSK324A	Care for and train working dogs

AHCLSK325A	Castrate livestock
AHCLSK331A	Comply with industry animal welfare requirements

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM301A	Coordinate machinery and equipment maintenance and repair
AHCMOM302A	Perform machinery maintenance
AHCMOM304A	Operate machinery and equipment
AHCMOM305A	Operate specialised machinery and equipment
AHCMOM306A	Ground spread fertiliser and soil ameliorant
AHCMOM308A	Operate broadacre and row crop harvest machinery and equipment
AHCMOM309A	Operate broadacre sowing machinery and equipment
AHCMOM312A	Operate row crop planting and seeding machinery and equipment

### Merchandising and sales

Unit code	Unit title
AHCMER301A	Process customer complaints

### Pest management

Unit code	Unit title
AHCPMG301A	Control weeds
AHCPMG302A	Control plant pests, diseases and disorders

### Work

Unit code	Unit title
-----------	------------

AHCWRK301A	Collect samples for a rural production or horticulture monitoring program
AHCWRK302A	Monitor weather conditions
AHCWRK303A	Respond to emergencies
AHCWRK305A	Coordinate work site activities
AHCWRK306A	Comply with industry quality assurance requirements
AHCWRK308A	Handle bulk materials in storage area
AHCWRK311A	Conduct site inspections

## ELECTIVE UNITS GROUP B

### Artificial insemination

Unit code	Unit title
AHCAIS301A	Collect semen
AHCAIS302A	Process and store semen
AHCAIS303A	Artificially inseminate livestock

### Drainage

Unit code	Unit title
AHCDRG301A	Install drainage systems

### Fire

Unit code	Unit title
CPPFES2005A	Demonstrate first attack fire fighting equipment
PUAFIR204B	Respond to wildfire* <i>PUAFIR201B Prevent injury</i>

**Horse breeding**

<b>Unit code</b>	<b>Unit title</b>
AHCHBR302A	Carry out basic hoof care procedures
AHCHBR303A	Carry out mare mating or artificial insemination procedures
AHCHBR304A	Educate, ride and care for horses and equipment
AHCHBR305A	Handle and care for stallions
AHCHBR306A	Prevent and treat equine injury and disease
AHCHBR307A	Assess suitability of horses for stock work

**Hydroponics**

<b>Unit code</b>	<b>Unit title</b>
AHCHYD301A	Implement a maintenance program for hydroponic systems
AHCHYD302A	Install hydroponic systems

**Livestock**

<b>Unit code</b>	<b>Unit title</b>
AHCLSK302A	Mate and monitor reproduction of alpacas
AHCLSK303A	Carry out feedlot operations
AHCLSK304A	Carry out post-mortem examination of livestock
AHCLSK306A	Coordinate and monitor production performance
AHCLSK307A	Euthanase livestock
AHCLSK310A	Implement feeding plans for intensive production
AHCLSK312A	Coordinate artificial insemination and fertility management of livestock
AHCLSK313A	Monitor livestock production growing environments
AHCLSK315A	Prepare for and implement natural mating of livestock

AHCLSK316A	Prepare livestock for competition
AHCLSK317A	Plan to exhibit livestock
AHCLSK319A	Slaughter livestock
AHCLSK320A	Coordinate and monitor livestock transport
AHCLSK321A	Service and repair bores and windmills
AHCLSK322A	Transport farm produce or bulk materials
AHCLSK326A	Mix and mill standard stockfeed
AHCLSK327A	Collect, store and administer colostrum
AHCLSK328A	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK329A	Implement procedures for calving
AHCLSK330A	Implement procedures for foaling down mares
AHCLSK332A	Monitor animals in intensive production systems
AHCLSK333A	Monitor pen condition and ration suitability
AHCLSK335A	Conduct dropped ovary technique procedures for spaying cattle

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM202A	Operate tractors
AHCMOM206A	Conduct grader operations
AHCMOM207A	Conduct front-end loader operations
AHCMOM307A	Operate a cane harvester
AHCMOM310A	Operate land-forming machinery and equipment
AHCMOM311A	Operate precision control technology
AHCMOM313A	Operate mobile irrigation machinery and equipment
AHCMOM314A	Transport machinery

AHCMOM315A	Operate chemical application machinery and equipment
RIIMPO319A	Conduct backhoe/loader operations
RIIMPO324A	Conduct civil construction grader operations
RIIMPO318B	Conduct civil construction skid steer loader operations
TLILIC2001A	Licence to operate a forklift truck

### Plants

Unit code	Unit title
AHCPCM301A	Implement a plant nutrition program
AHCPCM302A	Provide information on plants and their culture
AHCPCM303A	Identify plant specimens
AHCPGD402A	Plan a plant establishment program

### Production horticulture

Unit code	Unit title
AHCPHT301A	Carry out a crop regulation program
AHCPHT302A	Coordinate horticultural crop harvesting
AHCPHT303A	Implement a post-harvest program
AHCPHT304A	Harvest horticultural crops mechanically
AHCPHT305A	Regulate crops
AHCPHT306A	Establish horticultural crops

### Shearing

Unit code	Unit title
AHCSHG301A	Prepare livestock for shearing
AHCSHG302A	Prepare combs and cutters for machine shearing

AHCSHG306A	Carry out post-shearing procedures
AHCSHG307A	Plan and prepare for alpaca shearing

### Soils and media

Unit code	Unit title
AHCSOL401A	Sample soils and interpret results

### Tools and equipment

Unit code	Unit title
AHCTEQ301A	Install and terminate extra low voltage wiring systems
MEM05004C	Perform routine oxy acetylene welding
MEM05007C	Perform manual heating and thermal cutting
MEM05049B	Perform routine gas tungsten arc welding
MEM05050B	Perform routine gas metal arc welding
MEM05012C	Perform routine manual metal arc welding
MEM05015D	Weld using manual metal arc welding process* <i>MEM05012C Perform routine manual metal arc welding</i> <i>MEM05051A Select welding processes</i> <i>MEM05052A Apply safe welding practices</i> <i>MEM12023A Perform engineering measurements</i> <i>MEM18001C Use hand tools</i> <i>MEM18002B Use power tools/hand held operations</i>
MEM05017D	Weld using gas metal arc welding process* <i>MEM05050B Perform routine gas metal arc welding</i> <i>MEM05051A Select welding processes</i> <i>MEM05052A Apply safe welding practices</i> <i>MEM12023A Perform engineering measurements</i> <i>MEM18001C Use hand tools</i>

	<i>MEM18002B Use power tools/hand held operations</i>
MEM05019D	<p>Weld using gas tungsten arc welding process*</p> <p><i>MEM05049B Perform routine gas tungsten arc welding</i></p> <p><i>MEM05051A Select welding processes</i></p> <p><i>MEM05052A Apply safe welding practices</i></p> <p><i>MEM12023A Perform engineering measurements</i></p> <p><i>MEM18001C Use hand tools</i></p> <p><i>MEM18002B Use power tools/hand held operations</i></p>

### Vertebrate pests

Unit code	Unit title
AHCVPT302A	Implement vertebrate pest control program

### Wool

Unit code	Unit title
AHCWOL304A	Prepare fleece wool for classing
AHCWOL308A	Prepare facilities for shearing and crutching
AHCWOL310A	Press wool for a clip
AHCWOL311A	Perform shed duties
AHCWOL312A	Class goat fibre
AHCWOL313A	Class alpaca fleece

## AHC30210 Certificate III in Agriculture (Dairy Production)

### Modification History

Release	TP Version	Comments
2	AHC10v5	Added electives <i>AHCAIS303A Artificially inseminate livestock</i> , <i>AHCLSK305A Maintain livestock water supplies</i> and <i>AHCPCM301A Implement a plant nutrition program</i>
1	AHC10	Initial release

### Description

This qualification provides a vocational outcome in dairying. The dairy industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Dairy farmhand

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> <li>• Being creative in response to workplace challenges</li> <li>• Identifying opportunities that might not be obvious to others</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Being appropriately resourceful</li> </ul>

Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of seventeen (17) units made up of eleven (11) core units and six (6) elective units.

### ELECTIVE UNITS

- a minimum of three (3) units must come from the elective unit list
- a maximum of three (3) units from the elective units or from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in dairying.

### CORE UNITS

#### Broadacre cropping

Unit code	Unit title
AHCBAC302A	Establish pastures and crops for livestock production

#### Chemicals

Unit code	Unit title
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals

#### Dairy

Unit code	Unit title
AHCDRY301A	Coordinate milking operations

#### Infrastructure

Unit code	Unit title
-----------	------------

AHCINF302A	Plan and construct an electric fence
------------	--------------------------------------

### Livestock

Unit code	Unit title
AHCLSK309A	Implement animal health control programs
AHCLSK311A	Implement feeding plans for livestock
AHCLSK318A	Rear newborn and young livestock
AHCLSK329A	Implement procedures for calving

### Occupational Health and Safety

Unit code	Unit title
AHCOHS301A	Contribute to OHS processes

### Work

Unit code	Unit title
AHCWRK303A	Respond to emergencies

### ELECTIVE UNITS

#### Artificial insemination

Unit code	Unit title
AHCAIS303A	Artificially inseminate livestock

#### Broadacre cropping

Unit code	Unit title
AHCBAC301A	Conserve forage
AHCBAC305A	Undertake preparation of land for agricultural crop production

AHCBAC306A	Establish agricultural crops
AHCBAC307A	Maintain agricultural crops
AHCBAC308A	Undertake agricultural crop harvesting activities

### Dairy

Unit code	Unit title
AHCDRY302A	Operate a dairy recycling system

### Infrastructure

Unit code	Unit title
AHCINF301A	Implement property improvement, construction and repair
AHCINF303A	Plan and construct conventional fencing

### Irrigation

Unit code	Unit title
AHCIRG301A	Implement a maintenance program for an irrigation system
AHCIRG304A	Operate gravity fed irrigation systems
AHCIRG305A	Operate pressurised irrigation systems

### Livestock

Unit code	Unit title
AHCLSK301A	Administer medication to livestock
AHCLSK305A	Maintain livestock water supplies
AHCLSK308A	Identify and draft livestock
AHCLSK312A	Coordinate artificial insemination and fertility management of livestock

AHCLSK315A	Prepare for and implement natural mating of livestock
AHCLSK320A	Coordinate and monitor livestock transport
AHCLSK321A	Service and repair bores and windmills
AHCLSK322A	Transport farm produce or bulk materials
AHCLSK323A	Maintain and monitor feed stocks
AHCLSK325A	Castrate livestock
AHCLSK326A	Mix and mill standard stockfeed
AHCLSK327A	Collect, store and administer colostrum
AHCLSK328A	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK331A	Comply with industry animal welfare requirements

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM305A	Operate specialised machinery and equipment

### Plants

Unit code	Unit title
AHCPCM301A	Implement a plant nutrition program

### Work

Unit code	Unit title
AHCWRK301A	Collect samples for a rural production or horticulture monitoring program
AHCWRK302A	Monitor weather conditions
AHCWRK305A	Coordinate work site activities
AHCWRK306A	Comply with industry quality assurance requirements

AHCWRK310A	Provide on-job training support
AHCWRK313A	Implement and monitor environmentally sustainable work practices

## AHC30310 Certificate III in Horse Breeding

### Modification History

Not Applicable

### Description

This qualification provides a vocational outcome in horse breeding. The horse breeding industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Stud farm worker

### Licensing/Regulatory Information

Not Applicable

### Entry Requirements

#### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>

Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in a range of settings including informal learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of one (1) core unit and fourteen (14) elective units.

## ELECTIVE UNITS

- a minimum of four (4) units must come from elective group A
- a minimum of seven (7) units must come from elective groups A or B
- a maximum of three (3) units may be selected from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the horse breeding industry.

## CORE UNIT

### Occupational health and safety

AHCOHS301A      Contribute to OHS processes

## ELECTIVE UNITS GROUP A

### Horse breeding

AHCHBR302A      Carry out basic hoof care procedures  
AHCHBR303A      Carry out mare mating or artificial insemination procedures  
AHCHBR304A      Educate, ride and care for horses and equipment  
AHCHBR305A      Handle and care for stallions  
AHCHBR306A      Prevent and treat equine injury and disease  
AHCHBR307A      Assess suitability of horses for stock work  
AHCHBR308A      Maintain horses in a healthy state and safe environment  
AHCHBR309A      Determine nutritional requirements for standardbreds or thoroughbreds  
AHCHBR401A      Carry out stud stable management duties  
AHCHBR402A      Supervise raising young horses

### Livestock

AHCLSK330A      Implement procedures for foaling down mares  
AHCLSK417A      Manage horses for stock work

## ELECTIVE UNITS GROUP B

### Broadacre cropping

AHCBAC301A      Conserve forage

AHCBAC302A Establish pastures and crops for livestock production

### **Chemicals**

AHCCHM303A Prepare and apply chemicals

AHCCHM304A Transport, handle and store chemicals

### **Infrastructure**

AHCINF301A Implement property improvement, construction and repair

AHCINF302A Plan and construct an electric fence

AHCINF303A Plan and construct conventional fencing

### **Livestock**

AHCLSK305A Maintain livestock water supplies

AHCLSK311A Implement feeding plans for livestock

AHCLSK315A Prepare for and implement natural mating of livestock

AHCLSK320A Coordinate and monitor livestock transport

AHCLSK323A Maintain and monitor feed stocks

### **Machinery operation and maintenance**

AHCMOM202A Operate tractors

AHCMOM212A Operate quad bikes

### **Work**

AHCWRK302A Monitor weather conditions

AHCWRK303A Respond to emergencies

AHCWRK305A Coordinate work site activities

AHCWRK306A Comply with industry quality assurance requirements

AHCWRK308A Handle bulk materials in storage area

AHCWRK310A Provide on-job training support

AHCWRK313A Implement and monitor environmentally sustainable work practices

## AHC30410 Certificate III in Pork Production

### Modification History

Not Applicable

### Description

This qualification provides a vocational outcome in the pork production industry. The pork industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry or on completion of the Pork Industry Stockperson Skill Set.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Diploma of Pork Production.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

#### Licensing

Legislation in some states mandates that stockpersons must be competent in euthanasing animals. The unit AHCLSK307A Euthanase animals should be included in courses where this is required in the certificate outcome.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Stockperson or animal attendant

## Licensing/Regulatory Information

Refer to Pathways Information

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of one (1) core unit and fourteen (14) elective units.

### ELECTIVE UNITS

- a minimum of six (6) units must come from elective group A
- a minimum of five (5) units must come from elective groups A or B
- a maximum of three (3) units may be selected from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in pork production.

### CORE UNITS

#### Occupational health and safety

AHCOHS301A      Contribute to OHS processes

### ELECTIVE UNITS GROUP A

#### Artificial insemination

AHCAIS302A Process and store semen

#### Livestock

AHCLSK301A      Administer medication to livestock  
 AHCLSK304A      Carry out post-mortem examination of livestock  
 AHCLSK307A      Euthanase livestock  
 AHCLSK308A      Identify and draft livestock  
 AHCLSK309A      Implement animal health control programs  
 AHCLSK310A      Implement feeding plans for intensive production  
 AHCLSK313A      Monitor livestock production growing environments

AHCLSK314A	Prepare animals for parturition
AHCLSK318A	Rear newborn and young livestock
AHCLSK323A	Maintain and monitor feed stocks
AHCLSK327A	Collect, store and administer colostrum
AHCLSK328A	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK331A	Comply with industry animal welfare requirements

### **Pork production**

AHCPRK301A	Pregnancy test pigs
AHCPRK302A	Treat rectal prolapse in pigs

### **Work**

AHCWRK305A	Coordinate work site activities
AHCWRK313A	Implement and monitor environmentally sustainable work practices

## **ELECTIVE UNITS GROUP B**

### **Pork production**

AHCPRK202A	Care for weaner and grower pigs
AHCPRK303A	Artificially inseminate pigs
AHCPRK304A	Mate pigs and monitor dry sow performance

### **Livestock**

AHCLSK303A	Carry out feedlot operations
AHCLSK305A	Maintain livestock water supplies
AHCLSK306A	Coordinate and monitor production performance
AHCLSK311A	Implement feeding plans for livestock
AHCLSK315A	Prepare for and implement natural mating of livestock
AHCLSK316A	Prepare livestock for competition
AHCLSK319A	Slaughter livestock
AHCLSK320A	Coordinate and monitor livestock transport
AHCLSK322A	Transport farm produce or bulk materials
AHCLSK325A	Castrate livestock

AHCLSK326A Mix and mill standard stockfeed

**Vertebrate Pests**

AHCVPT302A Implement vertebrate pest control program

## AHC30510 Certificate III in Poultry Production

### Modification History

Release	TP Version	Comments
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

### Description

This qualification provides a vocational outcome in the poultry production. The poultry industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

## ELECTIVE UNITS GROUP B

### Biosecurity

Unit code	Unit title
AHCBIO301A	Work effectively in an emergency disease or plant pest response
AHCBIO303A	Carry out emergency disease or plant pest control procedures at infected premises
AHCBIO304A	Carry out movement and security procedures

### Chemicals

Unit code	Unit title
AHCCHM301A	Conduct fumigation in enclosed spaces
AHCCHM302A	Fumigate soil using chemicals

### Drainage

Unit code	Unit title
AHCDRG301A	Install drainage systems
AHCDRG302A	Measure drainage system performance
AHCDRG303A	Troubleshoot drainage systems

### Hydroponics

Unit code	Unit title
AHCHYD301A	Implement a maintenance program for hydroponic systems
AHCHYD302A	Install hydroponic systems

**Irrigation**

Unit code	Unit title
AHCIRG301A	Implement a maintenance program for an irrigation system
AHCIRG302A	Install irrigation systems
AHCIRG303A	Measure irrigation delivery system performance
AHCIRG306A	Troubleshoot irrigation systems

**Machinery operation and maintenance**

Unit code	Unit title
AHCMOM301A	Coordinate machinery and equipment maintenance and repair
AHCMOM302A	Perform machinery maintenance
AHCMOM305A	Operate specialised machinery and equipment
AHCMOM315A	Operate chemical application machinery and equipment
FDFWGG3008A	Operate a mechanical grape harvester
FDFWGG3013A	Operate spreading and seeding equipment

**Nursery**

Unit code	Unit title
FDFWGG3004A	Coordinate nursery activities
FDFWGG3005A	Perform field nursery activities
FDFWGG3009A	Monitor and maintain nursery plants
FDFWGG3011A	Perform shed nursery activities

**Pest management**

Unit code	Unit title
-----------	------------

AHCPMG303A	Maintain biological cultures
AHCPMG304A	Release biological agents

### Production horticulture

Unit code	Unit title
AHCPHT301A	Carry out a crop regulation program
AHCPHT305A	Regulate crops
AHCPHT307A	Prepare raw materials and compost the feedstocks
AHCPHT308A	Prepare value added compost-based products
AHCPHT309A	Supervise mushroom substrate preparation
FDFWGG3002A	Coordinate canopy management activities
FDFWGG3006A	Coordinate hand pruning activities

### Work

Unit code	Unit title
AHCWRK302A	Monitor weather conditions
AHCWRK303A	Respond to emergencies
AHCWRK305A	Coordinate work site activities
AHCWRK306A	Comply with industry quality assurance requirements
AHCWRK308A	Handle bulk materials in storage area

## AHC30710 Certificate III in Horticulture

### Modification History

Release	TP Version	Comments
3	AHC10v5	Added elective <i>AHCWRK311A Conduct site inspection</i>
2	AHC10v3	Corrected unit AHCPCM303A name in unit grid
1	AHC10	Initial release

### Description

This qualification provides a general vocational outcome in amenity horticulture. It is not a suitable pathway for horticultural trades.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include any of the specialist qualifications at Certificate IV.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Horticulturist
- Gardener.
- 

### Licensing/Regulatory Information

AHCARB303A	Implement a tree pruning program
AHCARB304A	Fell trees with advanced techniques

AHCARB305A	Remove trees in confined spaces
AHCARB306A	Undertake aerial rescue
AHCARB307A	Undertake complex tree climbing
AHCARB308A	Install cable and bracing
AHCARB309A	Implement a tree protection program
FPIFGM3205A	Fall trees manually (advanced)

### Landscape

Unit code	Unit title
AHCLSC301A	Set out site for construction works
AHCLSC302A	Construct landscape features using concrete
AHCLSC303A	Construct brick and or block structures and features
AHCLSC304A	Erect timber structures and features
AHCLSC305A	Construct stone structures and features
AHCLSC306A	Implement a paving project
AHCLSC307A	Implement a retaining wall project
AHCLSC308A	Install metal structures and features
AHCLSC309A	Install water features
AHCLSC310A	Implement a tree transplanting program

### Nursery

Unit code	Unit title
AHCNSY301A	Maintain nursery plants
AHCNSY302A	Receive and dispatch nursery products
AHCNSY303A	Install and maintain plant displays
AHCNSY304A	Deliver and promote sales of plants

AHCNSY305A	Prepare specialised plants
AHCNSY306A	Implement a propagation plan
AHCNSY307A	Operate fertigation equipment

### Parks and gardens

Unit code	Unit title
AHCPGD301A	Implement a plant establishment program
AHCPGD302A	Plan and maintain plant displays
AHCPGD303A	Perform specialist amenity pruning
AHCPGD304A	Implement a landscape maintenance program
AHCPGD305A	Conduct operational inspection of park facilities
AHCPGD306A	Implement a maintenance program for an aquatic environment

### Pest management

Unit code	Unit title
AHCPMG301A	Control weeds
AHCPMG302A	Control plant pests, diseases and disorders

### Plants

Unit code	Unit title
AHCPCM301A	Implement a plant nutrition program
AHCPCM302A	Provide information on plants and their culture
AHCPCM303A	Identify plant specimens

### Soils and media

Unit code	Unit title
-----------	------------

AHCSOL301A	Prepare growing media
AHCSOL302A	Construct a soil profile

### Turf

Unit code	Unit title
AHCTRF301A	Construct turf playing surfaces
AHCTRF302A	Establish turf
AHCTRF303A	Implement a grassed area maintenance program
AHCTRF304A	Monitor turf health
AHCTRF305A	Renovate sports turf

### ELECTIVE UNITS GROUP B

#### Biosecurity

Unit code	Unit title
AHCBIO301A	Work effectively in an emergency disease or plant pest response
AHCBIO302A	Identify and report unusual disease or plant pest signs
AHCBIO303A	Carry out emergency disease or plant pest control procedures at infected premises
AHCBIO304A	Carry out movement and security procedures
AHCBIO305A	Monitor and review biosecurity measures

#### Chemicals

Unit code	Unit title
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals

**Irrigation**

<b>Unit code</b>	<b>Unit title</b>
AHCIRG301A	Implement a maintenance program for an irrigation system
AHCIRG302A	Install irrigation systems
AHCIRG303A	Measure irrigation delivery system performance
AHCIRG305A	Operate pressurised irrigation systems
AHCIRG306A	Troubleshoot irrigation systems

**Machinery operation and maintenance**

<b>Unit code</b>	<b>Unit title</b>
AHCMOM304A	Operate machinery and equipment

**Water**

<b>Unit code</b>	<b>Unit title</b>
AHCWAT301A	Monitor and operate water treatment processes

**Work**

<b>Unit code</b>	<b>Unit title</b>
AHCWRK305A	Coordinate work site activities
AHCWRK311A	Conduct site inspection
RIOHS302A	Implement traffic management plan

## AHC30810 Certificate III in Arboriculture

### Modification History

Release	TP Version	Comments
4	AHC10v5	Equivalent imported units updated
3	AHC10v4	Equivalent imported units updated
2	AHC10v3	Corrected Unit AHCPCM303A name in unit grid

### Description

This qualification provides a general vocational outcome in arboriculture. The arboriculture industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Diploma of Arboriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Arborist

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Taking initiative and making decisions within workplace role</li> <li>• Managing time and priorities</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Learning new skills and techniques</li> <li>• Participating in ongoing learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of 15 units made up of two (2) core units and thirteen (13) elective units.

### ELECTIVE UNITS

- a minimum of seven (7) units must come from elective group A
- a minimum of four (4) units must come from elective groups A or B
- a maximum of two (2) units may be selected from units aligned to Certificates II, III, IV or Diploma in AHC10 or from any other endorsed training package. Selected units must be relevant to job outcomes in the arboriculture industry.

### CORE UNITS

#### Occupational Health and Safety

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

#### Arboriculture

AHCARB310A Perform aerial rigging

### ELECTIVE UNITS GROUP A

#### Arboriculture

AHCARB301A Implement a tree maintenance program

AHCARB302A Conduct tree inspections

AHCARB303A Implement a tree pruning program

AHCARB304A Fell trees with advanced techniques

AHCARB305A Remove trees in confined spaces

AHCARB306A Undertake aerial rescue

AHCARB307A Undertake complex tree climbing

FPICOT2221B Trim and cross cut felled trees

### ELECTIVE UNITS GROUP B

**Arboriculture**

AHCARB308A	Install cable and bracing
FPIFGM3204A	Fall trees manually (intermediate)
FPIFGM3205A	Fall trees manually (advanced)

**Chemicals**

AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals

**First Aid**

HLTFA201A	Provide basic emergency life support
-----------	--------------------------------------

**Machinery operation and maintenance**

AHCMOM207A	Conduct front end loader operations
CPCCCM2010B	Work safely at heights
CPCCCM3001C	Operate elevated work platforms
RIIMPO318B	Conduct civil construction skid steer loader operations
TLILIC2005A	Licence to operate a boom-type elevating work platform (boom length 11 meters or more)

**Plants**

AHCPCM303A	Identify plant specimens
------------	--------------------------

**Work**

AHCWRK305A	Coordinate work site activities
AHCWRK313A	Implement and monitor environmentally sustainable work practices
AHCWRK311A	Conduct site inspections
CPCCCM3003A	Work safely around power sources, services and assets
CPCCDO3001A	Perform dogging
RIIOHS302A	Implement traffic management plan

## **AHC30910 Certificate III in Landscape Construction**

### **Modification History**

Not Applicable

### **Description**

This qualification provides a general vocational outcome in landscape construction. The landscaping industry expects this qualification to be achieved to meet job outcomes at this level.

### **Pathways Information**

#### **Qualification pathways**

#### **Pathways into the qualification**

This qualification may be accessed by direct entry.

#### **Pathways from the qualification**

Further training pathways from this qualification include, but are not limited to, Certificate IV in Horticulture or Diploma of Landscape Design.

#### **Australian Apprenticeships**

This qualification is suitable for an Australian Apprenticeship.

#### **Job roles**

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Landscaper

### **Licensing/Regulatory Information**

Not Applicable

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of twelve (12) core units and three (3) elective units.

## ELECTIVE UNITS

- a maximum of three (3) units may be selected from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the landscape construction industry.

## CORE UNITS

### Occupational Health and Safety

AHCOHS301A      Contribute to OHS processes

### Landscape

AHCLSC301A      Set out site for construction works  
AHCLSC302A      Construct landscape features using concrete  
AHCLSC303A      Construct brick and/or block structures and features  
AHCLSC305A      Construct stone structures and features  
AHCLSC306A      Implement a paving project  
AHCLSC307A      Implement a retaining wall project

### Business

AHCBUS402A      Cost a project

### Drainage

AHCDRG301A      Install drainage systems

### Plants

AHPCPM302A      Provide information on plants and their culture

### Parks and gardens

AHCPGD301A      Implement a plant establishment program

### Soils and media

AHCSOL302A      Construct a soil profile

## AHC31010 Certificate III in Parks and Gardens

### Modification History

June 2012. Corrected Unit AHCCPM303A name in Unit grid.

### Description

This qualification provides a vocational outcome in parks and gardens. The parks and gardens industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Parks and Gardens.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Municipal/city gardener

Horticulturist

### Licensing/Regulatory Information

Not Applicable

### Entry Requirements

#### Entry requirements

There are no entry requirements for this qualification.

# AHC31310 Certificate III in Sports Turf Management

## Modification History

Not Applicable

## Description

This qualification provides a general vocational outcome in greenkeeping. The sports turf industry expects this qualification to be achieved to meet job outcomes at this level.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Sports Turf Management.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Greenkeeper

Groundsman

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Taking initiative and making decisions within workplace role</li> <li>• Managing time and priorities</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Participating in ongoing learning</li> <li>• Learning new skills and techniques</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of twelve (12) core units and three (3) elective units.

## ELECTIVE UNITS

- a maximum of three (3) units may be selected from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the turf industry.

## CORE UNITS

### Occupational Health and Safety

AHCOHS301A      Contribute to OHS processes

### Irrigation

AHCIRG302A      Install irrigation systems

### Machinery operation and maintenance

AHCMOM304A      Operate machinery and equipment

### Plants

AHCPCM301A      Implement a plant nutrition program

AHCPCM302A      Provide information on plants and their culture

### Pest management

AHCPMG301A      Control weeds

AHCPMG302A      Control plant pests, diseases and disorders

### Turf

AHCTRF301A      Construct turf playing surfaces

AHCTRF302A      Establish turf

AHCTRF303A      Implement a grassed area maintenance program

AHCTRF305A      Renovate sports turf

### Work

AHCWRK313A      Implement and monitor environmentally sustainable work practices

## AHC31410 Certificate III in Conservation and Land Management

### Modification History

Release	TP Version	Comments
4	AHC10v5	Superseded unit <i>AHCILM303A Work in an Indigenous community or organisation</i> replaced with <i>AHCILM305A Work with an Aboriginal Community or organisation</i> Equivalent imported units updated
3	AHC10v4	Equivalent imported units updated. Added missing prerequisite units to Packaging Rules
2	AHC10v3	Corrected unit AHCPCM303A name in unit grid
1	AHC10	Initial release

### Description

This qualification provides a general vocational outcome in the conservation and land management industry.

The qualification enables individuals to select an Indigenous land management, lands, parks and wildlife or natural area management context as a job focus or a mix of these.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, AHC40910 Certificate IV in Conservation and Land Management.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

## Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Indigenous lands worker
- National parks worker
- Revegetation worker
- Land rehabilitation worker.

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>

Planning and organising	<ul style="list-style-type: none"> <li>• Collecting, analysing and organising information</li> <li>• Being appropriately resourceful</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in a range of settings, including informal learning</li> </ul>

Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>
------------	---

## Packaging Rules

### Packaging Rules

Completion of sixteen (16) units made up of two (2) core units and fourteen (14) elective units.

### ELECTIVE UNITS

- a minimum of four (4) units must come from elective group A
- a minimum of six (6) units must come from elective groups A or B
- a maximum of four (4) units from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed Training Package or accredited course. Selected units must be relevant to job outcomes in conservation and land management.

### CORE UNITS

#### Occupational Health and Safety

Unit code	Unit title
AHCOHS301A	Contribute to OHS processes

#### Work

Unit code	Unit title
AHCWRK313A	Implement and monitor environmentally sustainable work practices

### ELECTIVE UNITS GROUP A

#### Indigenous land management

Unit code	Unit title
-----------	------------

AHCILM301A	Propose appropriate uses of traditional customs
AHCILM302A	Provide appropriate information on cultural knowledge
AHCILM305A	Work with an Aboriginal community or organisation
SITTGDE101	Interpret aspects of local Australian Indigenous culture

### Natural area restoration

Unit code	Unit title
AHCNAR301A	Maintain natural areas
AHCNAR302A	Collect and preserve biological samples
AHCNAR303A	Implement revegetation works
AHCNAR304A	Undertake direct seeding
FPIFGM2201B	Collect seed

### Lands, parks and wildlife

Unit code	Unit title
AHCLPW301A	Supervise park visitor activities
AHCLPW303A	Construct access tracks
AHCLPW304A	Carry out inspection of designated area
AHCLPW305A	Perform diving for scientific purposes
AHCLPW306A	Undertake sampling and testing of water
PUAFIR204B	Respond to wildfire* <i>PUAFIR201B Prevent injury</i>
PUAFIR303B	Suppress wildfire* <i>PUAFIR204B Respond to wildfire</i>
SITTGDE301	Work as a guide

### Fauna

Unit code	Unit title
AHCFAU301A	Respond to wildlife emergencies

### Infrastructure

Unit code	Unit title
AHCINF303A	Plan and construct conventional fencing

### Pest management

Unit code	Unit title
AHCPMG301A	Control weeds
AHCPMG302A	Control plant pests, diseases and disorders
AHCPMG303A	Maintain biological cultures
AHCPMG304A	Release biological agents

### Vertebrate pest management

Unit code	Unit title
AHCVPT302A	Implement vertebrate pest control program
AHCVPT303A	Survey pest animals
AHCVPT304A	Conduct vertebrate pest activities from aircraft
AHCVPT305A	Tag and locate Judas animals
AHCVPT306A	Apply animal trapping techniques

### Work

Unit code	Unit title
AHCWRK311A	Conduct site inspections
FPICOT3202B	Navigate in remote or trackless areas

**ELECTIVE UNITS GROUP B****Biosecurity**

<b>Unit code</b>	<b>Unit title</b>
AHCBIO302A	Identify and report unusual disease or plant pest signs

**Business**

<b>Unit code</b>	<b>Unit title</b>
BSBITU306A	Design and produce business documents

**Chemicals**

<b>Unit code</b>	<b>Unit title</b>
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals

**Infrastructure**

<b>Unit code</b>	<b>Unit title</b>
AHCINF301A	Implement property improvement, construction and repair

**Landscape**

<b>Unit code</b>	<b>Unit title</b>
AHCLSC301A	Set out site for construction works
AHCLSC304A	Erect timber structures and features

**Machinery operation and maintenance**

<b>Unit code</b>	<b>Unit title</b>
------------------	-------------------

AHCMOM301A	Coordinate machinery and equipment maintenance and repair
AHCMOM302A	Perform machinery maintenance
AHCMOM304A	Operate machinery and equipment
AHCMOM305A	Operate specialised machinery and equipment
AHCMOM314A	Transport machinery
AHCMOM315A	Operate chemical application machinery and equipment

### Parks and gardens

Unit code	Unit title
AHCPGD301A	Implement a plant establishment program
AHCPGD304A	Implement a landscape maintenance program
AHCPGD305A	Conduct operational inspection of park facilities
AHCPGD306A	Implement a maintenance program for an aquatic environment

### Plants

Unit code	Unit title
AHCPCM302A	Provide information on plants and their culture
AHCPCM303A	Identify plant specimens

### Seed processing

Unit code	Unit title
AHCSPO308A	Sample seed before and after processing

### Soil and water conservation

Unit code	Unit title
AHCSAW301A	Construct conservation earthworks

AHCSAW302A	Implement erosion and sediment control measures
------------	---

**Work**

<b>Unit code</b>	<b>Unit title</b>
AHCWRK203A	Operate in isolated and remote situations
AHCWRK303A	Respond to emergencies
AHCWRK304A	Respond to rescue incidents
AHCWRK305A	Coordinate work site activities
AHCWRK310A	Provide on-job training support
AHCWRK404A	Ensure compliance with pest legislation
CPPSIS4005A	Collect basic GPS data
PUAEMR026	Treat operational risk
PUAEMR027	Assess operational risk

## AHC31510 Certificate III in Indigenous Land Management

### Modification History

#### Natural area restoration

AHCNAR201A      Carry out natural area restoration works

AHCNAR301A      Maintain natural areas

AHCNAR302A      Collect and preserve biological samples

AHCNAR303A      Implement revegetation works

AHCNAR304A      Undertake direct seeding

FPIFGM2201B      Collect seed

FPIFGM3202B      Extract seed

#### Pest management

AHCPMG301A      Control weeds

**Plants**

- AHCPCM302A Provide information on plants and their culture  
AHCPCM303A Identify plant specimens

**ELECTIVE UNITS GROUP B****Parks and gardens**

- AHCPGD301A Implement a plant establishment program

**Chemicals**

- AHCCHM303A Prepare and apply chemicals  
AHCCHM304A Transport, handle and store chemicals

**Machinery operation and maintenance**

- AHCMOM315A Operate chemical application machinery and equipment

**Soils and media**

- AHCSOL201A Determine basic properties of soil and/or growing media  
AHCSOL401A Sample soils and interpret results

**Soil and water conservation**

- AHCSAW301A Construct conservation earthworks  
AHCSAW302A Implement erosion and sediment control measures

**Work**

- AHCWRK303A Respond to emergencies  
AHCWRK304A Respond to rescue incidents  
AHCWRK305A Coordinate work site activities  
AHCWRK311A Conduct site inspections  
CPPSIS4005A Collect basic GPS data  
FPICOT3202B Navigate in remote or trackless areas

## AHC31810 Certificate III in Vertebrate Pest Management

### Modification History

Release	TP Version	Comments
2	AHC10v5	Equivalent imported units updated
1	AHC10	Initial release

### Description

This qualification provides a general vocational outcome in vertebrate pest management. The vertebrate pest management industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Conservation and Land Management or Diploma of Pest Management.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Feral animal control officer

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> <li>• Being creative in response to workplace challenges</li> <li>• Identifying opportunities that might not be obvious to others</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Being appropriately resourceful</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Monitoring and evaluating own performance</li> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in a range of settings including informal learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of twelve (12) units made up of three (3) core units and nine (9) elective units.

### ELECTIVE UNITS

- a minimum of four (4) units must come from elective group A
- a minimum of three (3) units must come from elective groups A or B
- a maximum of two (2) units may be selected from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in vertebrate pest management.

### CORE UNITS

#### Occupational Health and Safety

AHCOHS301A      Contribute to OHS processes

#### Chemicals

AHCCHM303A      Prepare and apply chemicals

#### Work

AHCWRK313A      Implement and monitor environmentally sustainable work practices

### ELECTIVE UNITS GROUP A

#### Chemicals

AHCCHM301A      Conduct fumigation in enclosed spaces

AHCCHM304A      Transport, handle and store chemicals

AHCCHM305A      Conduct manual fumigation of vertebrate and invertebrate pests

#### Vertebrate pests

AHCVPT201A      Clear features that harbour pest animals

AHCVPT202A      Muster pest animals

AHCVPT203A      Use firearms to humanely destroy animals

AHCVPT302A	Implement vertebrate pest control program
AHCVPT303A	Survey pest animals
AHCVPT304A	Conduct vertebrate pest activities from aircraft
AHCVPT305A	Tag and locate Judas animals
AHCVPT306A	Apply animal trapping techniques

## **ELECTIVE UNITS GROUP B**

### **Explosives**

AHCEXP301A	Handle and store explosives
AHCEXP302A	Identify and select explosive products
AHCEXP303A	Prepare and use explosives

### **Machinery operation and maintenance**

AHCMOM304A	Operate machinery and equipment
AHCMOM315A	Operate chemical application machinery and equipment
FPICOT2234B	Operate 4x4 vehicle

### **Work**

AHCWRK303A	Respond to emergencies
AHCWRK305A	Coordinate work site activities
AHCWRK310A	Provide on-job training support
CPPSIS4005A	Collect basic GPS data
FPICOT3202B	Navigate in remote or trackless areas

## AHC31910 Certificate III in Weed Management

### Modification History

Release	TP Version	Comments
3	AHC10v5	Equivalent imported units updated
2	AHC10v3	Corrected unit AHCPCM303A name in unit grid
1	AHC10	Initial release

--	--

**Packaging Rules****Packaging Rules**

Completion of ten (10) units made up of five (5) core units and five (5) elective units.

**ELECTIVE UNITS**

- a minimum of three (3) units must come from the elective unit list
- a maximum of two (2) units must come from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the beekeeping industry.

**CORE UNITS****Occupational Health and Safety**

Unit code	Unit title
AHCOHS301A	Contribute to OHS processes

**Bee keeping**

Unit code	Unit title
AHCBEK301A	Manage honey bee swarms
AHCBEK304A	Remove a honey crop from a hive
AHCBEK305A	Extract honey

**Work**

Unit code	Unit title
AHCWRK306A	Comply with industry quality assurance requirements

**ELECTIVE UNITS****Bee keeping**

<b>Unit code</b>	<b>Unit title</b>
AHCBEK201A	Support beekeeping work
AHCBEK202A	Use a bee smoker
AHCBEK203A	Open and reassemble a beehive
AHCBEK204A	Construct and repair beehives
AHCBEK302A	Manipulate honey bee brood
AHCBEK303A	Re-queen a honey bee colony
AHCBEK306A	Manage pests and disease within a honey bee colony
AHCBEK401A	Collect and store propolis
AHCBEK402A	Perform queen bee artificial insemination
AHCBEK403A	Produce and harvest royal jelly
AHCBEK404A	Provide bee pollination services
AHCBEK405A	Select and establish an apiary site
AHCBEK406A	Trap and store pollen
AHCBEK407A	Rear queen bees

**Food safety**

<b>Unit code</b>	<b>Unit title</b>
FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>

FDFGPS2011A	Operate a creamed honey manufacture process
FDFOP2013A	Apply sampling procedures
FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2023A	Operate a packaging process
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>

### Work

Unit code	Unit title
AHCWRK303A	Respond to emergencies
AHCWRK305A	Coordinate work site activities

## Packaging Rules

### Packaging Rules

Completion of ten (10) units made up of one (1) core unit and nine (9) elective units.

### ELECTIVE UNITS

- a minimum of five (5) units must come from elective group A
- a minimum of two (2) units must come from elective groups A or B.
- a maximum of two (2) units may be selected from units aligned to from Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the commercial composting industry.

## CORE UNIT

### Occupational Health and Safety

AHCOHS301A Contribute to OHS processes

## ELECTIVE UNITS GROUP A

### Composting

AHCCOM301A Operate compost processing plant, machinery and equipment

AHCCOM302A Dispatch materials and composted product

AHCCOM303A Operate a compost bagging process

RIIMPO304B Conduct wheel loader operations

AHCCOM401A Develop a composting recipe

AHCCOM402A Plan and schedule compost production

### Work

AHCWRK305A Coordinate work site activities

AHCWRK306A Comply with industry quality assurance requirements

AHCWRK308A Handle bulk materials in storage area

## ELECTIVE UNITS GROUP B

### Composting

AHCCOM201A Assess and receive raw materials for composting

AHCCOM202A Recognise and respond to fire emergencies on a composting site

AHCCOM203A Recognise raw materials, production processes and products on a composting site

AHCCOM501A Identify and secure raw materials supply for compost production

**Chemicals**

AHCCHM301A	Conduct fumigation in enclosed spaces
AHCCHM302A	Fumigate soil using chemicals
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals

**Machinery operations and maintenance**

AHCMOM301A	Coordinate machinery and equipment maintenance and repair
AHCMOM302A	Perform machinery maintenance
AHCMOM304A	Operate machinery and equipment
AHCMOM305A	Operate specialised machinery and equipment
AHCMOM315A	Operate chemical application machinery and equipment

## AHC32310 Certificate III in Conservation Earthworks

### Modification History

Not Applicable

### Description

This qualification relates to those individuals constructing earthworks on rural properties and rural land. They perform tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Conservation and Land Management.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles of this occupation include undertaking dam construction and other soil and water conservation activities undertaken by earth moving plant operators.

### Licensing/Regulatory Information

Refer to Entry Requirements

### Entry Requirements

#### Entry requirements

There are no entry requirements for this qualification.

### Licensing and Registration

Some machinery may require licences or tickets to be operated in some states and territories.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>

## Packaging Rules

### Packaging Rules

Completion of ten (10) units made up of three (3) core units and seven (7) elective units.

### ELECTIVE UNITS

- a minimum of four (4) units must come from the elective units list
- a maximum of three (3) units may be selected from units aligned to Certificates II, III or IV from within AHC10 or from any other currently endorsed Training Package or accredited course. Selected units must be relevant to job outcomes in conservation earthworks.

### CORE UNITS

#### Occupational Health and Safety

AHCOHS301A      Contribute to OHS processes

#### Soil and water conservation

AHCSAW301A      Construct conservation earthworks

#### Machinery operation and maintenance

AHCMOM302A      Perform machinery maintenance

### ELECTIVE UNITS

#### Lands, parks and wildlife

AHCLPW303A      Construct access tracks

#### Soil and water conservation

AHCSAW302A Implement erosion and sediment control measures

### **Natural area restoration**

AHCNAR303A Implement revegetation works

### **Machinery operation and maintenance**

AHCMOM304A Operate machinery and equipment

AHCMOM314A Transport machinery

### **Work**

AHCWRK303A Respond to emergencies

AHCWRK305A Coordinate work site activities

AHCWRK311A Conduct site inspections

## AHC32412 Certificate III in Irrigation

### Modification History

June 2012: This qualification supersedes but is not equivalent to AHC32410.

### Description

This Qualification allows individuals to develop skills and knowledge to become installation or operations technicians within the irrigation industry.

### Application

This Qualification applies to skilled workers who carry out installation and operations job roles in the irrigation servicing, amenity horticulture and food and fibre production industries.

### Pathways Information

#### Pathways into the Qualification

This Qualification may be accessed by direct entry or by completion of AHC21112 Certificate II in Irrigation

#### Pathways from the Qualification

Further training pathways from this Qualification include, but are not limited to, AHC41112 Certificate IV in Irrigation.

#### Additional Qualification advice

This Qualification is suitable for an Australian Apprenticeship.

### Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

### Entry Requirements

There are no entry requirements for this Qualification.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include :
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Writing to audience needs</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Applying numeracy skills to workplace requirements</li> <li>• Establishing/using networks.</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> <li>• Applying teamwork skills to a range of situations</li> <li>• Identifying and using the strengths of other team members.</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> <li>• Using numeracy skills to solve problems</li> <li>• Testing assumptions and taking context into account.</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> <li>• Generating a range of options in response to workplace matters.</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Using basic business systems for planning and organising</li> <li>• Taking initiative and making decisions within workplace role</li> <li>• Working within or establishing clear project goals and deliverables</li> <li>• Determining or applying required resources</li> <li>• Allocating people and other resources to tasks and workplace requirements</li> <li>• Managing time and priorities.</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility for individual work practices and team outcomes</li> <li>• Organising time and resources for work</li> <li>• Reflecting on skills gaps and training required.</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements.</li> </ul>

Technology	<ul style="list-style-type: none"> <li>Using measuring equipment for soil moisture monitoring</li> <li>Use of irrigation technology for operating, monitoring and troubleshooting irrigation systems.</li> </ul>
------------	--

## Packaging Rules

Complete **twelve (12)** Units of Competency comprised of:

- Two (2) Core Units
- Ten (10) Elective Units

### Core Units

Unit code	Unit title
AHCIRG308A	Monitor soils under irrigation
AHCOHS301A	Contribute to OHS processes

### Elective Units

- Select a minimum of **four (4)** Units from Group A.
- Select a minimum of **four (4)** additional Units from Group A or B.
- Select a minimum of **two (2)** additional Units from Group A, Group B and/or this or any other endorsed Training Package or accredited course packaged at Certificate III or IV.
- Selected Units must be relevant to job outcomes in the irrigation industry.

### Group A

Unit code	Unit title
AHCDRG301A	Install drainage systems
AHCIRG309A	Interpret and apply instructions to install pumps
AHCIRG310A	Operate and maintain irrigation pumping systems
AHCIRG311A	Install low volume irrigation components
AHCIRG312A	Install sprinkler irrigation components
AHCIRG313A	Install moving sprinkler irrigation components

AHCIRG314A	Install surface irrigation structures and equipment
AHCIRG315A	Interpret irrigation plans and drawings
AHCIRG316A	Implement a low volume irrigation maintenance program
AHCIRG317A	Implement a sprinkler irrigation maintenance program
AHCIRG318A	Implement a moving sprinkler irrigation maintenance program
AHCIRG319A	Implement a surface irrigation maintenance program
AHCIRG320A	Maintain and repair irrigation drainage systems
AHCIRG321A	Operate low volume irrigation systems
AHCIRG322A	Operate sprinkler irrigation systems
AHCIRG323A	Operate moving sprinkler irrigation systems
AHCIRG324A	Operate surface irrigation systems
AHCIRG325A	Operate irrigation technology
AHCIRG326A	Operate irrigation injection equipment
AHCIRG327A	Implement an irrigation schedule
AHCTEQ301A	Install and terminate extra low voltage wiring systems
AHCWRK305A	Co-ordinate worksite activities
AHCWRK313A	Implement and monitor environmentally sustainable work practices

### Group B

Unit code	Unit title
AHCDRG302A	Measure drainage system performance
AHCDRG303A	Troubleshoot drainage systems
AHCIRG303A	Measure irrigation delivery system performance
AHCIRG306A	Troubleshoot irrigation systems

AHCIRG307A	Recommend irrigation products and services
AHCLPW306A	Undertake sampling and testing of water
CPCPIG2011A	Design domestic urban irrigation systems
CPCPWT3007A	Connect irrigation systems from drinking water supply * <i>CPCPCM2003A Carry out OHS requirements</i>
NWP302A	Install meters for non-potable, non-urban water supplies
NWP304A	Maintain meters for non-potable, non-urban water supplies
NWP305B	Monitor and conduct minor maintenance of complex flow-control and metering devices
NWP316B	Monitor and schedule water deliveries
NWP362B	Monitor, operate and control reclaimed water irrigation

## AHC32513 Certificate III in Aboriginal-sites Work

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Description

The qualification enables individuals to complete a core set of Aboriginal cultural competencies under recognised, appropriate cultural supervision and then to undertake work associated with inspecting, documenting and maintaining Aboriginal cultural and heritage sites.

The qualification is designed to reflect the role of individuals who work on Country and who perform a range of skilled tasks in relation to Aboriginal cultural landscapes which include discrete Aboriginal cultural sites. The qualification provides for Aboriginal-sites workers using discretion and judgement, and who have the ability to select, adapt and transfer skills to different situations.

### Pathways Information

#### Job Roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Rangers (Federal National Parks)
- Sites Officers (Aboriginal Land Councils)
- Aboriginal Development Officers (Catchment Management Authorities)
- Mining and Environmental Assessment Officers
- Cultural Heritage Officers and consultants
- Culture and Heritage Officers (National Parks)
- Field Workers (NSW National Parks and Wildlife)
- Aboriginal Tour Guides

#### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- some vocational experience working on Country or in Aboriginal cultural keeping places with Traditional Owners, Cultural managers, Aboriginal Land Councils, or Aboriginal communities but with no formal qualifications

OR

- completion of the Recognise Aboriginal Cultural Sites Skill Set, or attendance and participation in Indigenous Leadership programs or other relevant non-accredited training

### **Australian Apprenticeships**

This qualification is suitable for an Australian Apprenticeship.

### **Pathways from the qualification**

Further pathways from this qualification include, but are not limited to, the Report on Aboriginal-Cultural Sites Skill Set.

### **Additional qualification advice**

This qualification applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in some of the core cultural units. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with delivery and assessment requirements.

**Note:** The delivery and assessment against core cultural units must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.

There are eleven units of competency which require

- delivery and assessment in accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, and
- an appropriate cultural authority's involvement and participation in the training and assessment task. [This may be a Traditional Owner and/or Cultural Manager and/or Cultural Knowledge holder and/or Custodian.]

It is essential that this requirement be respected and implemented in the delivery and assessment of these units to ensure cultural integrity in the qualification is maintained and to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.

There are further details in the Evidence Guide for these units.

## **Licensing/Regulatory Information**

There is no direct link between this qualification and licensing, legislative and/or regulatory requirements.

## Entry Requirements

There are no entry requirements for this qualification, although it is recommended that participants undertaking this qualification have the endorsement of their local Aboriginal Community and local Aboriginal leadership prior to enrolling in this qualification.

## Employability Skills Summary

The following table contains a summary of the Employability Skills required for an Aboriginal-sites worker. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• completing documentation on Sites recording</li> <li>• discussing aspects of Sites work trends with colleagues</li> <li>• presenting information sessions to customers/visitors</li> <li>• seeking feedback on services from clients/visitors</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• sharing information with colleagues</li> <li>• showing sensitivity to cultural and social differences when communicating with others</li> <li>• working with others on Sites monitoring and maintenance</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• interpreting and applying cultural understanding to propose culturally appropriate solutions for contextual problems/issues</li> <li>• considering how current industry information could be used to improve work practices</li> <li>• responding to complaints</li> <li>• responding to equipment failures</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• presenting information to the public in an entertaining and informative way</li> <li>• responding effectively to a range of customer service situations</li> <li>• contributing to innovative and positive means of sharing culture</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• checking condition of Sites and landscapes at regular intervals</li> <li>• maintaining Sites work records</li> <li>• planning the sequence and methods for delivering an information session</li> <li>• reviewing sources of information on the Aboriginal-sites work industry</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• comprehending cultural identity and worldviews</li> </ul>

	<ul style="list-style-type: none"> <li>• following workplace procedures including OHS</li> <li>• maintaining personal presentation standards</li> <li>• operating effectively within scope of individual responsibility</li> <li>• demonstrating an understanding of Cultural protocols and respecting the protocols and lore of the Community.</li> <li>• navigating Community systems and protocols to ensure transparent and professional/cultural respected outcomes.</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• comprehending cultural identity and place in Community</li> <li>• delivering information sessions to visitors and obtaining feedback on the sessions</li> <li>• identifying and using professional development opportunities</li> <li>• participating in ongoing cultural networks and relationships</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• operating Sites location and recording equipment</li> <li>• using audiovisual aids</li> <li>• using database applications</li> <li>• using the internet for research</li> </ul>

## Packaging Rules

Completion of fifteen (15) units of competency made up of nine (9) core units and six (6) elective units.

Units with an asterisk (\*) have one or more pre-requisite units.

### Core Units of Competency

Unit code	Unit title
AHCASW301A	Protect places of Aboriginal cultural significance* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW302A	Relate Aboriginal culture to sites work* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW303A	Identify and record Aboriginal-sites, objects and cultural landscapes* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW308A	Apply cultural significance to Aboriginal-sites and landscapes* <i>AHCASW302A Relate Aboriginal culture to sites work</i> <i>AHCILM306A Follow Aboriginal cultural protocols</i>

AHCASW310A	Move and store Aboriginal-sites cultural material* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW311A	Apply relevant legislation in Aboriginal-sites work
AHCASW312A	Maintain an Aboriginal cultural site* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCILM306A	Follow Aboriginal cultural protocols
BSBWHS302A	Apply knowledge of WHS legislation in the workplace

### Elective Units of Competency

The workplace context for this qualification will vary, and this context must guide the selection of elective units.

- select four (4) units from Group A
- select two (2) additional units from Group A, Group B or units packaged in Certificates II, III or IV in AHC10 or any other currently endorsed Training Package or accredited course

Selected units must be relevant to job outcomes in Aboriginal-sites work.

### Group A

Unit code	Unit title
AHCASW305A	Work with Aboriginal ceremonial secret sacred materials* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW306A	Use technology in Aboriginal-sites work* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW307A	Map Aboriginal cultural landscapes* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW309A	Interpret Aboriginal cultural landscape* <i>AHCASW302A Relate Aboriginal culture to sites work</i> <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCILM305A	Work with an Aboriginal Community or organisation* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCILM307A	Implement Aboriginal cultural burning practices*

	<i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCILM510A	Plan for successful cultural practice at work* <i>AHCILM306A Follow Aboriginal cultural protocols</i>

**Group B**

<b>Unit code</b>	<b>Unit title</b>
AHCASW304A	Identify Indigenous culturally significant plants* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCASW501A	Survey and report on Aboriginal cultural sites* <i>AHCILM306A Follow Aboriginal cultural protocols</i>
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals
AHCFAU301A	Respond to wildlife emergencies
AHCILM201A	Maintain cultural places
AHCILM203A	Record information about Country
AHCILM301A	Propose appropriate uses of traditional customs
AHCILM302A	Provide appropriate information on cultural knowledge
AHCILM404A	Record and document Community history
AHCINF301A	Implement property improvement, construction and repair
AHCLPW301A	Supervise park visitor activities
AHCLPW303A	Construct access tracks
AHCLPW304A	Carry out inspection of designated area
AHCLPW305A	Perform diving for scientific purposes
AHCLPW306A	Undertake sampling and testing of water
AHCLSC304A	Erect timber structures and features
AHCMOM305A	Operate specialised machinery and equipment

AHCMOM315A	Operate chemical application machinery and equipment
AHCNAR201A	Carry out natural area restoration works
AHCNAR301A	Maintain natural areas
AHCNAR303A	Implement revegetation works
AHCPCM301A	Implement a plant nutrition program
AHCPCM302A	Provide information on plants and their culture
AHCPCM303A	Identify plant specimens
AHCPMG301A	Control weeds
AHCVPT302A	Implement vertebrate pest control program
AHCVPT303A	Survey pest animals
AHCVPT306A	Apply animal trapping techniques
AHCWRK303A	Respond to emergencies
AHCWRK304A	Respond to rescue incidents
AHCWRK305A	Coordinate work site activities
BSBITU306A	Design and produce business documents
CPPSIS4005A	Collect basic GPS data
CULATS501A	Work with Aboriginal and Torres Strait Islander cultural material
CULCNM303A	Move and store collection material
CULCNM503A	Manage the development of collections
CULCNM602A	Develop and monitor procedures for the movement and storage of collection material
CULMS002B	Research and evaluate Aboriginal or Torres Strait Islander cultural material
CULMS010B	Contribute to the preservation of cultural material
FPICOT2234B	Operate 4x4 vehicle
FPIFGM2201B	Collect seed

FPIFGM3202B	Extract seed
LGAREGS305A	Undertake animal or reptile control duties
PUAFIR204B	Respond to wildfire
PUAFIR303B	Suppress wildfire
SITTGDE101	Interpret aspects of local Australian Indigenous culture
SITTGDE301	Work as a guide
SITTGDE306	Research and share general information on Australian Indigenous cultures
SITTGDE307	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE309	Prepare specialised interpretive content on cultural and heritage environments
SITTPPD402	Develop interpretive activities
SITXCOM301	Address protocol requirements

## **AHC32610 Certificate III in Rural Machinery Operations**

### **Modification History**

Not Applicable

### **Description**

This qualification provides a general vocational outcome in agricultural plant operations.

### **Pathways Information**

#### **Qualification pathways**

#### **Pathways into the qualification**

This qualification may be accessed by direct entry.

#### **Pathways from the qualification**

Further training pathways from this qualification include, but are not limited to, Certificate IV in Agriculture.

Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> <li>• Use load shifting technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of five (5) core units and ten (10) elective units.

### ELECTIVE UNITS

- a minimum of six (6) units must come from the elective units list
- a maximum of four (4) units may be selected from the elective list or from units aligned to Certificates II, III or IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in machinery operations.

### CORE UNITS

#### Occupational Health and Safety

AHCOHS301A      Contribute to OHS processes

#### Machinery operation and maintenance

AHCMOM301A      Coordinate machinery and equipment maintenance and repair

AHCMOM302A      Perform machinery maintenance

AHCMOM304A      Operate machinery and equipment

AHCMOM305A      Operate specialised machinery and equipment

### ELECTIVE UNITS

#### Machinery operation and maintenance

AHCMOM306A      Ground spread fertiliser and soil ameliorant

AHCMOM307A      Operate a cane harvester

AHCMOM308A      Operate broadacre and row crop harvest machinery and equipment

AHCMOM309A      Operate broadacre sowing machinery and equipment

AHCMOM310A      Operate land-forming machinery and equipment

AHCMOM311A      Operate precision control technology

AHCMOM312A      Operate row crop planting and seeding machinery and equipment

- AHCMOM313A Operate mobile irrigation machinery and equipment  
AHCMOM314A Transport machinery

**Tools and equipment**

- MEM05004C Perform routine oxy acetylene welding  
MEM05007C Perform manual heating and thermal cutting  
MEM05012C Perform routine manual metal arc welding

**Work**

- AHCWRK303A Respond to emergencies  
AHCWRK304A Respond to rescue incidents  
AHCWRK305A Coordinate work site activities

Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of sixteen (16) units made up of two (2) core units and fourteen elective units.

### ELECTIVE UNITS

- a minimum of seven (7) units from Certificate III in the AHC10 endorsed training package
- a maximum of seven (7) units must come from units aligned to Certificates II, III or IV from up to three (3) other currently endorsed training packages or accredited courses. Selected units must be relevant to job outcomes in AgriFood industries.

### CORE UNITS

#### Occupational Health and Safety

AHCOHS301A      Contribute to OHS processes

#### Work

AHCWRK313A      Implement and monitor environmentally sustainable work practices

## AHC32910 Certificate III in Shearing

### Modification History

Not Applicable

### Description

This qualification relates to shearing at the professional level. This requires a high standard of workmanship at a rate of at least 120 sheep per day. The shearing industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

Certificate II in Shearing.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Shearing or Certificate IV in Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job titles relevant to this qualification include:

Shearer - professional level

### Licensing/Regulatory Information

Not Applicable

### Entry Requirements

#### Entry requirements

To be eligible to enrol in this qualification applicants must be able to demonstrate shearing skills and knowledge at Certificate II in Shearing level by completion of that certificate or by Recognition of Prior Learning.

## Packaging Rules

### Packaging Rules

Completion of seven (7) core units.

**CORE UNITS****Occupational Health and Safety**

AHCOHS301A      Contribute to OHS processes

**Shearing**

AHCSHG204A      Shear sheep to improver level

AHCSHG302A      Prepare combs and cutters for machine shearing

AHCSHG303A      Maintain and service shearing handpieces

AHCSHG304A      Shear sheep to professional level

AHCSHG305A      Maintain consistent shearing performance

**Work**

AHCWRK305A      Coordinate work site activities

## AHC33010 Certificate III in Wool Clip Preparation

### Modification History

Release	TP Version	Comments
3	AHC10v4	Equivalent imported Units updated
2	AHC10v3	Corrected typographical errors and removed reference to Certificate II in Wool Clip from Pathways and Entry Requirements
1	AHC10	Initial release

### Description

This qualification is a specialist wool classing qualification for owner classers and enables them to apply for registration with AWEX Ltd.

### Licensing and Registration

This qualification is the minimum mandatory requirement for persons wishing to apply to the Australian Wool Exchange Ltd for registration as an Owner Wool Classer.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

Certificate II in Wool Handling.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Wool Classing or Certificate IV in Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job titles relevant to this qualification include:

Owner Classer

## Licensing/Regulatory Information

Refer to Description

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification. Credit for this qualification may come from completion of Certificate II in Wool Handling.

AHCOHS401A	Maintain occupational health and safety (OHS) processes

**First Aid**

Unit code	Unit title
HLTFA301C	Apply first aid

**Wool**

Unit code	Unit title
AHCWOL301A	Appraise wool using industry descriptions
AHCWOL303A	Prepare wool based on its characteristics
AHCWOL304A	Prepare fleece wool for classing
AHCWOL305A	Prepare skirtings and oddments
AHCWOL306A	Supervise clip preparation
AHCWOL307A	Document a wool clip
AHCWOL308A	Prepare facilities for shearing and crutching

AHCWOL405A	Class fleece wool
------------	-------------------

### Shearing

Unit code	Unit title
AHCSHG407A	Oversee and instruct shed staff

### Work

Unit code	Unit title
AHCWRK306A	Comply with industry quality assurance requirements

## AHC33110 Certificate III in Advanced Wool Handling

### Modification History

June 2012. Corrected typographical error in Pathways and Entry Requirements. Removal of reference to Certificate II in Wool Clip Preparation.

### Description

This qualification focuses on a specialist wool handling role and allows individuals who are already working in the wool handling industry to develop further skills and knowledge in order to fulfil specialist roles in the organisation. The wool industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

Certificate II in Wool Handling

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Certificate IV in Wool Classing or Certificate IV in Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Shearing shed hands

Wool handlers

### Licensing/Regulatory Information

Not Applicable

## Entry Requirements

There are no entry requirements for this qualification. Credit for this qualification may come from completion of Certificate II in Wool Handling

## Packaging Rules

### Packaging Rules

Completion of fifteen (15) units made up of one (1) core unit and fourteen (14) elective units.

## ELECTIVE UNITS

- a minimum of four (4) units must come from elective group A
- a minimum of seven (7) units must come from elective groups A or B
- a maximum of three (3) units may be selected from units aligned to Certificates II, III IV in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the flower growing industry.

## CORE UNIT

### Occupational health and safety

AHCOHS301A      Contribute to OHS processes

## ELECTIVE UNITS GROUP A

### Plants

AHCPCM301A      Implement a plant nutrition program  
AHCPCM302A      Provide information on plants and their culture

### Soils and media

AHCSOL301A      Prepare growing media  
AHCSOL401A      Sample soils and interpret results

### Nursery

AHCNSY301A      Maintain nursery plants  
AHCNSY302A      Receive and dispatch nursery products

## ELECTIVE UNITS GROUP B

### Biosecurity

AHCBIO302A      Identify and report unusual disease or plant pest signs

### Chemicals

AHCCHM301A      Conduct fumigation in enclosed spaces  
AHCCHM302A      Fumigate soil using chemicals

- AHCCHM303A Prepare and apply chemicals  
AHCCHM304A Transport, handle and store chemicals

### **Drainage**

- AHCDRG301A Install drainage systems  
AHCDRG302A Measure drainage system performance  
AHCDRG303A Troubleshoot drainage systems

### **Hydroponics**

- AHCHYD301A Implement a maintenance program for hydroponic systems  
AHCHYD302A Install hydroponic systems

### **Irrigation**

- AHCIRG301A Implement a maintenance program for an irrigation system  
AHCIRG302A Install irrigation systems  
AHCIRG303A Measure irrigation delivery system performance  
AHCIRG305A Operate pressurised irrigation systems  
AHCIRG306A Troubleshoot irrigation systems

### **Machinery operation and maintenance**

- AHCMOM301A Coordinate machinery and equipment maintenance and repair  
AHCMOM302A Perform machinery maintenance  
AHCMOM304A Operate machinery and equipment  
AHCMOM305A Operate specialised machinery and equipment  
AHCMOM315A Operate chemical application machinery and equipment

### **Nursery**

- AHCNSY303A Install and maintain plant displays  
AHCNSY304A Deliver and promote sales of plants  
AHCNSY305A Prepare specialised plants  
AHCNSY306A Implement a propagation plan  
AHCNSY307A Operate fertigation equipment

### **Pest management**

AHCPMG301A	Control weeds
AHCPMG302A	Control plant pests, diseases and disorders
AHCPMG303A	Maintain biological cultures
AHCPMG304A	Release biological agents

### **Production horticulture**

AHCPHT301A	Carry out a crop regulation program
AHCPHT302A	Coordinate horticultural crop harvesting
AHCPHT303A	Implement a post-harvest program
AHCPHT305A	Regulate crops
AHCPHT306A	Establish horticultural crops

### **Water**

AHCWAT301A	Monitor and operate water treatment processes
------------	---

### **Work**

AHCWRK302A	Monitor weather conditions
AHCWRK303A	Respond to emergencies
AHCWRK305A	Coordinate work site activities
AHCWRK306A	Comply with industry quality assurance requirements
AHCWRK308A	Handle bulk materials in storage area
AHCWRK313A	Implement and monitor environmentally sustainable work practices

## AHC33311 Certificate III in Feedlot Operations

### Modification History

Release	TP Version	Comments
3	AHC10v4	Equivalent imported Units updated
2	AHC10v2.1	Fixed typographical errors in Qualification codes in Description
1	AHC10	Initial release

### Description

This qualification provides an occupational outcome in beef cattle feedlot operations. Electives must be chosen to cover a feedlot maintenance, pen riding, or feeding and milling stream.

The testamur issued for this qualification is to be titled AHC33311 Certificate III in Feedlot Operations. An additional descriptor should be added by the RTO to reflect unit selection. For example:

- AHC33311 Certificate III in Feedlot Operations (Feedlot Maintenance)
- AHC33311 Certificate III in Feedlot Operations (Feeding and Milling)
- AHC33311 Certificate III in Feedlot Operations (Pen Riding).
- 

### Pathways Information

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, AHC40110 Certificate IV in Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Licensing considerations

There are no specific licences that relate to this qualification.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Feedlot maintenance worker
- Intensive production enterprise feed mill worker
- Pen rider
- 

### Licensing/Regulatory Information

Refer to Pathways Information

### Entry Requirements

Not Applicable

## Packaging Rules

### Packaging Rules

Completion of seventeen (17) units comprising six (6) core and eleven (11) electives.

### ELECTIVE UNITS

- a minimum of eight (8) elective units must be chosen from **one** of the following streams:
  - Group A: Feedlot Maintenance
  - Group B: Feeding and Milling
  - Group C: Pen Riding
- a maximum of three (3) units may be selected from units aligned to Certificates II, III or IV in this Training Package or from any other currently endorsed Training Package or accredited course. Selected units must be relevant to job outcomes in the feedlot industry.

### CORE UNITS

#### Occupational Health and Safety

Unit code	Unit title
-----------	------------

AHCOHS301A	Contribute to OHS processes
------------	-----------------------------

### Biosecurity

Unit code	Unit title
AHCBIO302A	Identify and report unusual disease or plant pest signs

### Chemicals

Unit code	Unit title
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals

### Work

Unit code	Unit title
AHCWRK209A	Participate in environmentally sustainable work practices
AHCWRK306A	Comply with industry quality assurance requirements

## ELECTIVE UNITS

### GROUP A: FEEDLOT MAINTENANCE

For a Feedlot Maintenance specialisation select a minimum of eight (8) units from the following group.

#### Occupational health and safety

Unit code	Unit title
RIOHS202A	Enter and work in confined spaces

#### Infrastructure

Unit code	Unit title
-----------	------------

AHCINF204A	Fabricate and repair metal or plastic structures
AHCINF301A	Implement property improvement, construction and repair

### Livestock

Unit code	Unit title
AHCLSK213A	Clean out production sheds
AHCLSK328A	Remove and facilitate reuse of effluent and manure from an intensive production system

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM207A	Conduct front end loader operations
AHCMOM301A	Coordinate machinery and equipment maintenance and repair
AHCMOM305A	Operate specialised machinery and equipment

### Pest management

Unit code	Unit title
AHCPMG301A	Control weeds

### Production Horticulture

Unit code	Unit title
AHCPHT307A	Prepare raw materials and compost the feedstocks

### Work

Unit code	Unit title
AHCWRK313A	Implement and monitor environmentally sustainable work practices

**GROUP B: FEEDING AND MILLING**

For a Feeding and Milling specialisation a minimum of eight (8) units from the following group.

**Occupational health and safety**

Unit code	Unit title
RIIOHS202A	Enter and work in confined spaces

**Livestock**

Unit code	Unit title
AHCLSK310A	Implement feeding plans for intensive production
AHCLSK326A	Mix and mill standard stockfeed
AHCLSK333A	Monitor pen condition and ration suitability
FDAGR3002A	Demonstrate knowledge of animal nutrition principles

**Machinery operation and maintenance**

Unit code	Unit title
AHCMOM205A	Operate vehicles
AHCMOM207A	Conduct front end loader operations
AHCMOM302A	Perform machinery maintenance
AHCMOM305A	Operate specialised machinery and equipment
FDROP2038A	Operate a grinding process

**Broad acre cropping**

Unit code	Unit title
AHCBAC204A	Prepare grain storages

AHCBAC303A	Prepare to receive grains/seeds
------------	---------------------------------

### Pest management

Unit code	Unit title
AHCPMG301A	Control weeds

### Work

Unit code	Unit title
AHCWRK308A	Handle bulk materials in storage area

## GROUP C: PEN RIDING

For a Pen Rider specialisation select a minimum of eight (8) units from the following group.

### Livestock

Unit code	Unit title
AHCLSK301A	Administer medication to livestock
AHCLSK304A	Carry out post-mortem examination of livestock
AHCLSK307A	Euthanase livestock
AHCLSK308A	Identify and draft livestock
AHCLSK309A	Implement animal health control programs
AHCLSK310A	Implement feeding plans for intensive production
AHCLSK332A	Monitor animals in intensive production systems
AHCLSK333A	Monitor pen condition and ration suitability

### Machinery operation and maintenance

Unit code	Unit title
-----------	------------

AHCMOM205A	Operate vehicles
------------	------------------

## AHC33412 Certificate III in Seed Production

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Description

This Qualification provides a general vocational outcome in seed production.

### Pathways Information

#### Pathways into the Qualification

This Qualification may be accessed by direct entry.

#### Pathways from the Qualification

Further training pathways from this Qualification include, but are not limited to, AHC41412 Certificate IV in Seed Production.

#### Additional Qualification advice

This Qualification is suitable for an Australian Apprenticeship.

### Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

### Entry Requirements

There are no entry requirements for this Qualification.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> <li>• Being creative in response to workplace challenges</li> <li>• Identifying opportunities that might not be obvious to others</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Being appropriately resourceful</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Monitoring and evaluating own performance</li> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in a range of settings including informal learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

Complete sixteen (16) Units of Competency comprised of **six (6)** core Units and **ten (10)** elective Units.

### Core Units of Competency

### Seed production

Unit code	Unit title
-----------	------------

AHCSDP301A	Undertake preparation of land for seed crops
AHCSDP302A	Establish seed crops
AHCSDP303A	Maintain seed crops
AHCSDP304A	Harvest seed crops

### Occupational health and safety

Unit code	Unit title
AHCOHS301A	Contribute to OHS processes

### Work

Unit code	Unit title
AHCWRK313A	Implement and monitor environmentally sustainable work practices

### Elective Units of Competency

- Select **seven (7)** Units from the Elective list below.
- Select **three (3)** Units from the list below and/or this or any other endorsed Training Package or accredited course at Certificate II, III or IV.

Selected Units must be relevant to job outcomes in seed production.

### Agribusiness

Unit code	Unit title
AHCAGB301A	Keep records for a primary production business

### Biosecurity

Unit code	Unit title
AHCBIO303A	Carry out emergency disease or plant pest control procedures at infected premises

**Chemicals**

<b>Unit code</b>	<b>Unit title</b>
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals

**First aid**

<b>Unit code</b>	<b>Unit title</b>
HLTFA301C	Apply first aid
HLTFA302C	Provide first aid in remote situation

**Infrastructure**

<b>Unit code</b>	<b>Unit title</b>
AHCINF301A	Implement property improvement, construction and repair
AHCINF302A	Plan and construct an electric fence
AHCINF303A	Plan and construct conventional fencing

**Irrigation**

<b>Unit code</b>	<b>Unit title</b>
AHCIRG301A	Implement a maintenance program for an irrigation system
AHCIRG303A	Measure irrigation delivery system performance
AHCIRG308A	Monitor soils under irrigation
AHCIRG312A	Install sprinkler irrigation components
AHCIRG313A	Install moving sprinkler irrigation components
AHCIRG314A	Install surface irrigation structures and components
AHCIRG317A	Implement a sprinkler irrigation maintenance program

AHCIRG318A	Implement a moving sprinkler irrigation maintenance program
AHCIRG319A	Implement a surface irrigation maintenance program
AHCIRG322A	Operate sprinkler irrigation systems
AHCIRG323A	Operate moving sprinkler irrigation systems
AHCIRG324A	Operate surface irrigation systems
AHCIRG325A	Operate irrigation technology
AHCIRG327A	Implement an irrigation schedule

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM202A	Operate tractors
AHCMOM301A	Coordinate machinery and equipment maintenance and repair
AHCMOM302A	Perform machinery maintenance
AHCMOM304A	Operate machinery and equipment
AHCMOM305A	Operate specialised machinery and equipment
AHCMOM306A	Ground spread fertiliser and soil ameliorant
AHCMOM308A	Operate broadacre and row crop harvest machinery and equipment
AHCMOM309A	Operate broadacre sowing machinery and equipment
AHCMOM312A	Operate row crop planting and seeding machinery and equipment
AHCMOM313A	Operate mobile irrigation machinery and equipment
AHCMOM314A	Transport machinery
AHCMOM315A	Operate chemical application machinery and equipment
TLILIC2001A	Licence to operate a forklift truck

### Pest management

Unit code	Unit title
AHCPMG301A	Control weeds
AHCPMG302A	Control plant pests, diseases and disorders

### Plants

Unit code	Unit title
AHCPCM301A	Implement a plant nutrition program
AHCPCM303A	Identify plant specimens

### Soils and media

Unit code	Unit title
FDFWGG3010A	Implement a soil management program

### Tools and equipment

Unit code	Unit title
MEM05004C	Perform routine oxy acetylene welding
MEM05007C	Perform manual heating and thermal cutting
MEM05012C	Perform routine manual metal arc welding

### Vertebrate pests

Unit code	Unit title
AHCVPT302A	Implement vertebrate pest control program

### Work

Unit code	Unit title
AHCWRK301A	Collect samples for a rural production or horticulture monitoring program

AHCWRK302A	Monitor weather conditions
AHCWRK303A	Respond to emergencies
AHCWRK305A	Coordinate work site activities
AHCWRK306A	Comply with industry quality assurance requirements
AHCWRK308A	Handle bulk materials in storage area

## AHC33512 Certificate III in Seed Testing

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Description

This Qualification provides a vocational outcome in seed testing and analysis.

### Pathways Information

#### Pathways into the Qualification

This Qualification may be accessed by direct entry.

#### Pathways from the Qualification

Further training pathways from this qualification include, but are not limited to, AHC41512 Certificate IV in Seed Testing.

#### Additional Qualification advice

This Qualification is suitable for an Australian Apprenticeship.

### Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

### Entry Requirements

There are no entry requirements for this Qualification, however applicants should be working under supervision in a seed testing laboratory.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include :
Communication	<ul style="list-style-type: none"> <li>• Confirm relevant industry and workplace requirements</li> <li>• Understand personal and team requirements of relevant industry and workplace standards, regulations and policies</li> <li>• Complete standard documentation</li> <li>• Use communication technologies efficiently</li> <li>• Provide relevant work-related information to others</li> <li>• Ensure records are accurate and legible</li> <li>• Establish effective working relationships with colleagues</li> <li>• Undertake interactive workplace communication</li> <li>• Support team communication practices</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Explain and implement work team reporting requirements</li> <li>• Provide support to team members</li> <li>• Monitor work team tasks in accordance with regulatory and workplace requirements</li> <li>• Demonstrate and encourage others in working cooperatively with people of different ages, gender, race or religion</li> <li>• Undertake appropriate and effective communication with team members</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Identify risks and implement risk control measures for machinery and equipment</li> <li>• Identify and address problems and faults</li> <li>• Provide problem solving support to team members</li> <li>• Evaluate skill requirements of work tasks</li> <li>• Use problem solving techniques to determine work requirements</li> <li>• Assess processes and outcomes against quality criteria</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Contribute to and promote continuous improvement processes</li> <li>• Seek and provide feedback on procedures and processes</li> <li>• Collect and assess data and information on work processes</li> <li>• Identify non-conformances to standards and take appropriate action</li> <li>• Rectify problems promptly and appropriately</li> <li>• Monitor and adjust activity in response to operational variations</li> <li>• Identify, assess and act on existing and potential risks</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Determine work requirements in order to meet output targets</li> <li>• Identify priorities and variables that impact on work planning</li> </ul>

	<ul style="list-style-type: none"> <li>Plan work tasks for self and others as required</li> <li>Allocate tasks to operators and monitor outcomes</li> <li>Implement contingency plan promptly when incidents occur</li> <li>Ensure work tools are ready and available for operations</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Manage own work to meet performance criteria</li> <li>Monitor information in work area</li> <li>Conduct regular housekeeping activities during shift to keep work area clean and tidy at all times</li> <li>Maintain currency of relevant work-related information</li> <li>Monitor own work against quality standards and identify areas for improvement</li> <li>Understand own work activities and responsibilities</li> <li>Identify and apply safety procedures, including the use of protective equipment</li> <li>Manage work load priorities and timelines</li> </ul>
Learning	<ul style="list-style-type: none"> <li>Recognise limits of own expertise and seek skill development if required</li> <li>Assess competencies in meeting job requirements</li> <li>Ask questions to expand own knowledge</li> <li>Maintain skill and knowledge currency</li> <li>Participate in meetings to inform work practices</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Use work machines and equipment in correct operational mode</li> <li>Monitor machine operation</li> <li>Perform minor maintenance on machinery</li> <li>Work with technology safely and according to workplace standards</li> </ul>

## Packaging Rules

Complete **eighteen (18)** Units of Competency comprised of **nine (9)** core Units and **nine (9)** elective Units.

### Core Units of Competency

Unit code	Unit title
AHCOHS301A	Contribute to OHS processes
AHCSDT301A	Prepare a working sample

AHCSDT302A	Identify seeds
AHCSDT304A	Perform a seed purity analysis
AHCSDT305A	Perform a seed moisture test
AHCSDT306A	Perform a seed germination test
AHCSDT307A	Perform a "Determination of Other Seeds by Number" test
AHCWRK306A	Comply with industry quality assurance requirements
AHCWRK313A	Implement and monitor environmentally sustainable work practices

### Elective Units of Competency

- Select **five (5)** Units from the Elective list below.
- Select **four (4)** Units from the list below and/or this or any other endorsed Training Package or accredited course at Certificate II, III or IV level.

Selected Units must be relevant to job outcomes in a seed testing laboratory.

Unit code	Unit title
AHCSDT303A	Perform a fluorescence test on seeds
AHCSDT405A	Handle & store quarantinable seeds
AHCWRK303A	Respond to emergencies
AHCWRK305A	Coordinate work site activities
MSL922001A	Record and present data
MSL933001A	Maintain the laboratory/field workplace fit for purpose
MSL933004A	Perform calibration checks on equipment and assist with its maintenance
MSL934003A	Maintain and control stocks
MSL973007A	Perform microscopic examination

TAEDEL301A	Provide work skill instruction
------------	--------------------------------

## AHC40110 Certificate IV in Agriculture

### Modification History

Release	TP Version	Comments
3	AHC10v4	Equivalent imported Units updated Replaced AHCIRG403A Determine seasonal irrigation scheduling tasks with AHCIRG408A Schedule irrigations - Units have equivalent outcome
2	AHC10v3	Corrected Unit AHCPMG408A name in Unit grid
1	AHC10	Initial release

### Description

This qualification allows individuals to develop post-trade skills and knowledge to become specialists within the agriculture industry. It is designed to meet the needs of supervisors or team leaders in the agriculture industry.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Diploma of Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Farm team leader

Farm supervisor

Shed supervisor

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Reading and interpreting workplace related documentation</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> <li>• Applying teamwork skills to a range of situations</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Applying a range of strategies in problem solving</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Being creative in response to workplace challenges</li> <li>• Identifying opportunities that might not be obvious to others</li> <li>• Generating a range of options in response to workplace matters</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Being appropriately resourceful</li> <li>• Taking initiative and making decisions within workplace role</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Monitoring and evaluating own performance</li> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in a range of settings including informal learning</li> <li>• Contributing to the learning of others</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Using technology to organise data</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

Completion of twelve (12) units made up of one (1) core unit and eleven (11) elective units.

### ELECTIVE UNITS

- a minimum of four (4) units from elective group A
- a minimum of five (5) units from elective groups A or B
- a maximum of two (2) units from units aligned to Certificates III, IV or Diploma in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in agriculture.

### CORE UNIT

#### Occupational health and safety

Unit code	Unit title
AHCOHS401A	Maintain Occupational Health and Safety (OHS) processes

### ELECTIVE UNITS GROUP A

#### Broadacre cropping

Unit code	Unit title
AHCBAC401A	Manage pastures for livestock production
AHCBAC402A	Plan a pasture establishment program
AHCBAC403A	Supervise agricultural crop establishment
AHCBAC404A	Plan and implement agricultural crop maintenance
AHCBAC405A	Supervise agricultural crop harvesting
AHCBAC406A	Maintain grain quality in storage
AHCBAC407A	Save, prepare and store agricultural seed

#### Dairy

Unit code	Unit title
AHCDRY401A	Manage milking shed routines

### Livestock

Unit code	Unit title
AHCLSK312A	Coordinate artificial insemination and fertility management of livestock
AHCLSK317A	Plan to exhibit livestock
AHCLSK401A	Develop feeding plans for a production system
AHCLSK402A	Develop livestock feeding plans
AHCLSK403A	Escort livestock during export
AHCLSK404A	Implement and monitor animal welfare programs
AHCLSK405A	Implement intensive production systems
AHCLSK406A	Oversee animal marking operations
AHCLSK407A	Plan and monitor intensive production systems
AHCLSK408A	Pregnancy test animals
AHCLSK409A	Supervise animal health programs
AHCLSK410A	Supervise feedlot operations
AHCLSK411A	Supervise natural mating of livestock
AHCLSK412A	Arrange livestock purchases
AHCLSK413A	Design livestock handling facilities
AHCLSK414A	Arrange transport for farm produce or livestock
AHCLSK415A	Oversee alpaca farm activities
AHCLSK416A	Identify and select animals for breeding
AHCLSK417A	Manage horses for stock work

**Pork production**

<b>Unit code</b>	<b>Unit title</b>
AHCPRK401A	Implement a feeding strategy for pig production

**ELECTIVE UNITS GROUP B****Agribusiness**

<b>Unit code</b>	<b>Unit title</b>
AHCAGB401A	Implement and monitor a property improvement plan
AHCAGB402A	Analyse and interpret production data
BSBRK401A	Identify risk and apply risk management processes

**Artificial insemination**

<b>Unit code</b>	<b>Unit title</b>
AHCAIS401A	Supervise artificial breeding and/or embryo transfer programs

**Business**

<b>Unit code</b>	<b>Unit title</b>
AHCBUS401A	Administer finance, insurance and legal requirements
AHCBUS402A	Cost a project
AHCBUS403A	Support and review business structures and relationships
AHCBUS404A	Operate within a budget framework
AHCBUS405A	Participate in an e-business supply chain
BSBFIA402A	Report on financial activity
BSBSMB405B	Monitor and manage small business operations
BSBSMB406A	Manage small business finances
BSBWOR402A	Promote team effectiveness

BSBHRM402A	Recruit, select and induct staff
BSBINM401A	Implement workplace information system
BSBITU404A	Produce complex desktop published documents
BSBCM401A	Make a presentation

### Chemicals

Unit code	Unit title
AHCCHM401A	Minimise risks in the use of chemicals
AHCCHM402A	Plan and implement a chemical use program
AHCCHM403A	Prepare safe operating procedures for calibration of equipment

### Deer

Unit code	Unit title
AHCDER401A	Handle, store and grade deer velvet
AHCDER501A	Comply with deer industry national velvet accreditation requirements
AHCDER502A	Harvest deer velvet

### Horse breeding

Unit code	Unit title
AHCHBR305A	Handle and care for stallions
AHCHBR401A	Carry out stud stable management duties
AHCHBR402A	Supervise raising young horses

### Irrigation

Unit code	Unit title
-----------	------------

AHCIRG401A	Acquire resources for irrigation installation and construction
AHCIRG402A	Determine hydraulic parameters for an irrigation system
AHCIRG404A	Implement an irrigation-related environmental protection program
AHCIRG405A	Plan and coordinate gravity-fed irrigation systems
AHCIRG406A	Plan on-site irrigation system installation and construction work
AHCIRG407A	Supervise on-site irrigation installation and construction work
AHCIRG408A	Schedule irrigations

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM401A	Conduct major repair and overhaul of machinery and equipment
AHCMOM402A	Supervise maintenance of property machinery and equipment

### Merchandising and sales

Unit code	Unit title
AHCMER401A	Coordinate customer service and networking activities
AHCMER402A	Provide advice and sell machinery
AHCMER403A	Provide advice and sell farm chemicals
AHCMER404A	Provide advice on agronomic products
AHCMER405A	Provide advice on livestock products
AHCMER406A	Provide information on fertilisers and soil ameliorants

### Milk harvesting

Unit code	Unit title
AHCMKH401A	Carry out cleaning-time tests of milking machines

AHCMKH402A	Design and fabricate milking equipment installations
AHCMKH403A	Design and install on-farm milk cooling and storage
AHCMKH404A	Install milking equipment
AHCMKH405A	Performance test milking machines

### Organic production

Unit code	Unit title
AHCORG401A	Manage biodynamic production
AHCORG402A	Manage organic livestock production
AHCORG403A	Manage organic soil improvement

### Pest management

Unit code	Unit title
AHCPMG408A	Assess and monitor weed, pest and/or disease control programs

### Plants

Unit code	Unit title
AHCPCM402A	Develop a soil health and plant nutrition program

### Shearing

Unit code	Unit title
AHCSHG401A	Apply advanced shearing techniques
AHCSHG402A	Conduct equipment experting for machine shearing
AHCSHG403A	Account for shearing shed supplies
AHCSHG404A	Manage shearing and crutching operations
AHCSHG405A	Arrange employment for shearing operations

AHCSHG406A	Prepare shearing team wages
AHCSHG407A	Oversee and instruct shed staff

### Soils and media

Unit code	Unit title
AHCSOL401A	Sample soils and interpret results
AHCSOL402A	Develop a soil use map for a property
AHCSOL403A	Prepare acid sulphate soil management plans
AHCSOL404A	Supervise acid sulphate soil remediation and management projects

### Wool

Unit code	Unit title
AHCWOL401A	Determine wool classing strategies
AHCWOL402A	Use individual fleece measurements to prepare wool for sale
AHCWOL404A	Establish work routines and manage wool harvesting and preparation staff

### Work

Unit code	Unit title
AHCWRK401A	Implement and monitor quality assurance procedures
AHCWRK402A	Provide information on issues and policies
AHCWRK403A	Supervise work routines and staff performance
PSPPM402B	Manage simple projects
MSL913002A	Plan and conduct laboratory/field work
SRXGRO002A	Deal with conflict
TAEDEL301A	Provide work skill instruction

## AHC40210 Certificate IV in Poultry Production

### Modification History

Release	TP Version	Comments
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

### Description

This qualification allows individuals to develop post-trade skills and knowledge to become specialists within the poultry production industry. The poultry industry expects this qualification to be achieved to meet job outcomes at this level.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Diploma of Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Consultant/service provider

Egg farm operations manager

Breeder farm operations manager

## Licensing/Regulatory Information

# AHC40910 Certificate IV in Conservation and Land Management

## Modification History

Release	TP Version	Comments
4	AHC10v5	Equivalent imported units updated
3	AHC10v4	Equivalent imported units updated. Added missing prerequisite unit to Packaging Rules
2	AHC10v3	Corrected unit AHCPMG408A name in unit grid
1	AHC10	Initial release

## Description

This qualification allows individuals to develop post-trade skills and knowledge to become specialists within the conservation and land management industry.

This qualification enables a selection of units from indigenous land management, natural area restoration, conservation earthworks or lands, parks and wildlife to create a general qualification as a job focus.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Diploma of Conservation and Land Management.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Senior conservation worker

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Listening and understanding</li> <li>• Speaking clearly and directly</li> <li>• Reading and interpreting workplace related documentation</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> <li>• Being creative in response to workplace challenges</li> <li>• Identifying opportunities that might not be obvious to others</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Being appropriately resourceful</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Monitoring and evaluating own performance</li> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> </ul>

**EMPLOYABILITY SKILLS QUALIFICATION SUMMARY**

	<ul style="list-style-type: none"> <li>• Learning in a range of settings including informal learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using advanced technology skills</li> <li>• Applying OHS knowledge when using technology</li> </ul>

**Packaging Rules****Packaging Rules**

Completion of twelve (12) units made up of one (1) core unit and eleven (11) elective units.

**ELECTIVE UNITS**

- a minimum of seven (7) units must come from the elective units list
- a maximum of four (4) units may be selected from the elective units or from units aligned to Certificates III, IV or Diploma in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in conservation and land management.

**CORE UNIT****Occupational Health and Safety**

Unit code	Unit title
AHCOHS401A	Maintain Occupational Health and Safety (OHS) processes

**ELECTIVE UNITS****Biosecurity**

Unit code	Unit title
AHCBIO402A	Carry out field surveillance for a specific emergency disease or plant pest

**Business**

Unit code	Unit title
AHCBUS402A	Cost a project
AHCBUS404A	Operate within a budget framework
BSBRES401A	Analyse and present research information
TLIR4002A	Source goods/services and evaluate contractors

### Chemicals

Unit code	Unit title
AHCCHM401A	Minimise risks in the use of chemicals
AHCCHM402A	Plan and implement a chemical use program

### Community coordination and facilitation

Unit code	Unit title
AHCCCF401A	Prepare project acquittal
AHCCCF402A	Report on project
AHCCCF403A	Obtain and manage sponsorship
AHCCCF404A	Contribute to association governance
AHCCCF405A	Develop community networks
AHCCCF406A	Facilitate ongoing group development
AHCCCF407A	Obtain resources from community and groups
AHCCCF408A	Promote community programs
AHCCCF409A	Participate in assessments of project submissions
AHCCCF410A	Support individuals in resource management change processes
AHCCCF411A	Develop approaches to include cultural and human diversity
AHCCCF412A	Coordinate board/committee elections
AHCCCF413A	Service committees

AHCCCF414A	Coordinate fund-raising activities
AHCCCF415A	Coordinate social events to support group purposes
AHCCCF416A	Present proposed courses of action to meeting
CHCCD404E	Develop and implement community programs
LGACOM502B	Devise and conduct community consultations

### Fire

Unit code	Unit title
PUAFIR303B	Suppress wildfire* <i>PUAFIR204B Respond to wildfire</i>
PUAFIR407B	Conduct prescribed burning
PUAOPE005B	Manage a multi team response
PUAOPE004B	Conduct briefings/debriefings

### Indigenous land management

Unit code	Unit title
AHCILM401A	Protect places of cultural significance
AHCILM402A	Report on place of potential cultural significance
AHCILM403A	Contribute to the proposal for a negotiated outcome for a given area of country
AHCILM404A	Record and document community history
AHCILM405A	Develop work practices to accommodate cultural identity
SITTGDE306	Research and share general information on Australian Indigenous cultures

### Landscape

Unit code	Unit title
-----------	------------

AHCLSC401A	Supervise landscape project works
------------	-----------------------------------

### Lands, parks and wildlife

Unit code	Unit title
AHCLPW401A	Process applications for changes in land use
AHCLPW402A	Implement land and sea management practices
AHCLPW403A	Inspect and monitor cultural places
AHCLPW404A	Produce maps for land management purposes
AHCLPW405A	Monitor biodiversity
PUACOM012B	Liaise with media at a local level
PUALAW001B	Protect and preserve incident scene
SITTGDE307	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE309	Prepare specialised interpretive content on cultural and heritage environments
SITTPPD402	Develop interpretive activities
SITXCCS201	Provide visitor information

### Machinery operations and maintenance

Unit code	Unit title
AHCMOM402A	Supervise maintenance of property machinery and equipment

### Natural area restoration

Unit code	Unit title
AHCNAR401A	Supervise natural area restoration works
AHCNAR402A	Plan the implementation of revegetation works
FPIFGM3201B	Manage seed collection

**Pest management**

<b>Unit code</b>	<b>Unit title</b>
AHCPMG401A	Define the pest problem in a local area
AHCPMG402A	Develop a pest management action plan within a local area
AHCPMG403A	Develop monitoring procedures for the local pest management strategy
AHCPMG404A	Coordinate the local pest management strategy
AHCPMG405A	Implement pest management action plans
AHCPMG406A	Investigate a reported pest treatment failure
AHCPMG407A	Monitor and evaluate the local pest management action plan
AHCPMG408A	Assess and monitor weed, pest and/or disease control programs

**Parks and gardens**

<b>Unit code</b>	<b>Unit title</b>
AHCPGD402A	Plan a plant establishment program

**Plants**

<b>Unit code</b>	<b>Unit title</b>
AHCPCM401A	Recommend plants and cultural practices

**Soil and water conservation**

<b>Unit code</b>	<b>Unit title</b>
AHCSAW401A	Set out conservation earthworks
AHCSAW402A	Supervise on-site implementation of conservation earthworks

**Soils and media**

<b>Unit code</b>	<b>Unit title</b>
AHCSOL401A	Sample soils and interpret results
AHCSOL403A	Prepare acid sulphate soil management plans
AHCSOL404A	Supervise acid sulphate soil remediation and management projects

### Work

<b>Unit code</b>	<b>Unit title</b>
AHCWRK401A	Implement and monitor quality assurance procedures
AHCWRK402A	Provide information on issues and policies
AHCWRK403A	Supervise work routines and staff performance
AHCWRK404A	Ensure compliance with pest legislation
BSBWOR402A	Promote team effectiveness
LGAPLEM508A	Manipulate and analyse data within geographic information systems
MSL913002A	Plan and conduct laboratory/field work
PSPPM402B	Manage simple projects
PSPPOL404A	Support policy implementation
SRXGRO002A	Deal with conflict
TAEDEL301A	Provide work skill instruction

## AHC41010 Certificate IV in Agribusiness

### Modification History

Release	TP Version	Comments
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

### Description

This qualification allows individuals to develop agribusiness skills and knowledge within the agriculture and production horticulture industry. They may undertake a range of complex and non-routine tasks related to the administration of an agribusiness. The range of technical skills and knowledge is proficient and leadership of others would be expected.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Diploma of Agribusiness or Diploma of Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Agribusiness administrator

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

# AHC41112 Certificate IV in Irrigation

## Modification History

June 2012: This qualification supersedes but is not equivalent to AHC41110.

## Description

This Qualification allows individuals to develop technical and supervisory skills and knowledge to become specialists within the irrigation industry.

## Application

This Qualification applies to irrigation installation site managers and managers of irrigation systems in the irrigation servicing, amenity horticulture and food and fibre production industries.

## Pathways Information

### Pathways into the Qualification

This Qualification may be accessed by direct entry or by completion of AHC32412 Certificate III in Irrigation

### Pathways from the Qualification

Further training pathways from this Qualification include, but are not limited to, AHC51610 Diploma of Irrigation Management.

### Additional Qualification advice

This Qualification is suitable for an Australian Apprenticeship.

## Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

## Entry Requirements

There are no entry requirements for this Qualification.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Reading and interpreting workplace related documentation</li> <li>• Writing to audience needs</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Applying numeracy skills to workplace requirements.</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working as an individual and a team member</li> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> <li>• Applying teamwork skills to a range of situations</li> <li>• Identifying and using the strengths of other team members.</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Solving problems individually or in teams</li> <li>• Applying a range of strategies in problem solving</li> <li>• Using numeracy skills to solve problems</li> <li>• Testing assumptions and taking context into account.</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Adapting to new situations</li> <li>• Identifying opportunities that might not be obvious to others</li> <li>• Generating a range of options in response to workplace matters</li> <li>• Translating ideas into actions.</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Using basic business systems for planning and organising</li> <li>• Being appropriately resourceful</li> <li>• Taking initiative and making decisions within workplace role</li> <li>• Participating in continuous improvement and planning processes</li> <li>• Working within or establishing clear project goals and deliverables.</li> </ul>

## Packaging Rules

Complete **twelve (12)** Units of Competency comprised of:

- One (1) Core Unit
- Eleven (11) Elective Units

### Core units

Unit code	Unit title
AHCOHS401A	Maintain OHS processes

### Elective units

- Select a minimum of **seven (7)** Units from Group A.
- Select a minimum of **two (2)** additional Units from Group A or B.
- Select a minimum of **two (2)** additional Units from Group A, Group B and/or this or any other endorsed Training Package or accredited course packaged at Certificate III, IV or Diploma.
- Selected Units must be relevant to job outcomes in the irrigation industry.

### Group A

Unit code	Unit title
AHCIRG402A	Determine hydraulic parameters for an irrigation system
AHCIRG404A	Implement an irrigation-related environmental protection program
AHCIRG408A	Schedule irrigations
AHCIRG410A	Select and manage pumping systems for irrigation
AHCIRG411A	Construct and install a low volume irrigation system
AHCIRG412A	Construct and install a sprinkler irrigation system
AHCIRG413A	Construct and install a moving sprinkler irrigation system
AHCIRG414A	Construct and install a surface irrigation system

AHCIRG415A	Interpret and apply irrigation designs
AHCIRG416A	Supervise low volume irrigation maintenance
AHCIRG417A	Supervise sprinkler irrigation maintenance
AHCIRG418A	Supervise moving sprinkler irrigation maintenance
AHCIRG419A	Supervise surface irrigation maintenance
AHCIRG420A	Manage a low volume irrigation system
AHCIRG421A	Manage a sprinkler irrigation system
AHCIRG422A	Manage a moving sprinkler irrigation system
AHCIRG423A	Manage a surface irrigation system
AHCIRG424A	Construct and install an irrigation drainage system
AHCIRG425A	Monitor and control irrigation drainage systems
AHCIRG426A	Evaluate water supply for irrigation
AHCIRG427A	Plan and supervise on-site irrigation system installation and construction work
AHCSOL401A	Sample soils and interpret the results

### Group B

Unit code	Unit title
AHCBUS402A	Cost a project
AHCBUS404A	Operate within a budget framework
AHCIRG303A	Measure irrigation delivery system performance
AHCIRG428A	Provide irrigation sales and service
AHCTEQ301A	Install and terminate extra low voltage wiring systems
AHCWRK401A	Implement and monitor quality assurance processes
AHCWRK403A	Supervise work routines and staff performance

BSBHRM402A	Recruit, select and induct staff
BSBMGT402A	Implement operational plan
BSBSMB406A	Manage small business finances
BSBWOR402A	Promote team effectiveness
BSBWOR404B	Develop work priorities
NWP362B	Monitor, operate and control reclaimed water for irrigation
NWP401B	Coordinate and monitor the application of environmental plans and procedures
NWP410C	Coordinate and monitor asset construction and maintenance
NWP425B	Coordinate and monitor the operation of irrigation delivery systems
PSPPM402B	Manage simple projects

## AHC41210 Certificate IV in Shearing

### Modification History

Release	TP Version	Comments
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

### Description

This qualification relates to shearing at the professional level. This requires a high standard of workmanship at a rate of at least 120 sheep per day.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

Certificate III in Shearing.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Professional shearer

Shearing coach

Shearing contractor

Shearing shed manager

Shearing team leader

### Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

To be eligible to enrol in this qualification applicants must be able to demonstrate shearing skills and knowledge at Certificate III in Shearing level by completion of that certificate or by Recognition of Prior Learning.

## Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

### Packaging Rules

Completion of eight (8) core units.

### CORE UNITS

**Occupational Health and Safety**

<b>Unit code</b>	<b>Unit title</b>
AHCOHS401A	Maintain Occupational Health and Safety (OHS) processes

**Shearing**

<b>Unit code</b>	<b>Unit title</b>
AHCSHG303A	Maintain and service shearing handpieces
AHCSHG304A	Shear sheep to professional level
AHCSHG401A	Apply advanced shearing techniques
AHCSHG402A	Conduct equipment experting for machine shearing
AHCSHG403A	Account for shearing shed supplies

**Work**

<b>Unit code</b>	<b>Unit title</b>
AHCWRK403A	Supervise work routines and staff performance
TAEDEL301A	Provide work skill instruction

## AHC41310 Certificate IV in Wool Classing

### Modification History

Release	TP Version	Comments
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

### Description

This qualification is a specialist wool classing qualification for wool classers and enables them to apply for registration with AWEX Ltd. as a professional Australian wool classer.

### Licensing and Registration

This qualification is the minimum mandatory requirement for persons wishing to apply to the Australian Wool Exchange Ltd for registration as an Australian Wool Classer.

### Pathways Information

#### Qualification pathways

#### Pathways into the qualification

Certificate III in Wool Clip Preparation or Certificate III in Advanced Wool Handling.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Diploma of Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Australian Wool Classer

## Licensing/Regulatory Information

Refer to Description

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification. Credit for this qualification may come from completion of Certificate III in Wool Clip Preparation or Certificate III in Advanced Wool Handling.

Employability Skill	Industry/enterprise requirements for this qualification include :
Communication	<ul style="list-style-type: none"> <li>• Reading and interpreting workplace related documentation</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Applying numeracy skills to workplace requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> <li>• Applying teamwork skills to a range of situations</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Showing interdependence and initiative in identifying problems</li> <li>• Applying a range of strategies in problem solving</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Being creative in response to workplace challenges</li> <li>• Identifying opportunities that might not be obvious to others</li> <li>• Generating a range of options in response to workplace matters</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information</li> <li>• Being appropriately resourceful</li> <li>• Taking initiative and making decisions within workplace role</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Monitoring and evaluating own performance</li> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in a range of settings including informal learning</li> <li>• Contributing to the learning of others</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using basic technology skills</li> <li>• Using technology to organise data</li> <li>• Applying OHS knowledge when using technology</li> </ul>

## Packaging Rules

Complete **twelve (12)** Units of Competency comprised of **five (5)** core Units and **seven (7)** elective Units.

## Core Units of Competency

**Seed production**

Unit code	Unit title
AHCSDP401A	Plan a seed crop establishment program
AHCSDP402A	Supervise seed crop establishment
AHCSDP403A	Plan and implement seed crop maintenance
AHCSDP404A	Supervise seed crop harvesting

**Occupational health and safety**

Unit code	Unit title
AHCOHS401A	Maintain Occupational Health and Safety (OHS) processes

**Elective Units of Competency**

- Select **five (5)** Units from the Elective list below.
- Select **two (2)** Units from the list below and/or this or any other endorsed Training Package or accredited course at Certificate III, IV or Diploma.

Selected Units must be relevant to job outcomes in seed production.

**Agribusiness**

Unit code	Unit title
AHCAGB401A	Implement and monitor a property improvement plan
AHCAGB402A	Analyse and interpret production data
BSBRK401A	Identify risk and apply risk management processes

**Chemicals**

Unit code	Unit title
AHCCHM401A	Minimise risks in the use of chemicals
AHCCHM402A	Plan and implement a chemical use program

AHCCHM403A	Prepare safe operating procedures for calibration of equipment
------------	--

### Irrigation

Unit code	Unit title
AHCIRG410A	Select and manage pumping systems for irrigation
AHCIRG412A	Construct and install a sprinkler irrigation system
AHCIRG417A	Supervise sprinkler irrigation maintenance
AHCIRG421A	Manage a sprinkler irrigation system
AHCIRG426A	Evaluate water supply for irrigation

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM401A	Conduct major repair and overhaul of machinery and equipment
AHCMOM402A	Supervise maintenance of property machinery and equipment

### Pest management

Unit code	Unit title
AHCPMG408A	Assess and monitor weed, pest and/or disease control programs

### Plants

Unit code	Unit title
AHCPCM402A	Develop a soil health and plant nutrition program

### Soils and media

Unit code	Unit title
AHCSOL401A	Sample soils and interpret results

AHCSOL402A	Develop a soil use map for a property
------------	---------------------------------------

**Work**

Unit code	Unit title
AHCWRK401A	Implement and monitor quality assurance procedures
AHCWRK402A	Provide information on issues and policies
AHCWRK403A	Supervise work routines and staff performance

# AHC41512 Certificate IV in Seed Testing

## Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

## Description

This Qualification provides a vocational outcome in seed testing and analysis.

## Pathways Information

### Pathways into the Qualification

The preferred pathway for entry to this Qualification is AHC33512 Certificate III in Seed Testing.

### Pathways from the Qualification

Further training pathways from this qualification include, but are not limited to, MSL50109 Diploma of Laboratory Technology.

### Additional Qualification advice

This qualification is suitable for an Australian Apprenticeship.

## Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

## Entry Requirements

Entrants into AHC41512 Certificate IV in Seed Testing are required to hold the following Units of Competency:

- AHCSDT301A Prepare a working sample
- AHCSDT302A Identify seeds
- AHCSDT304A Perform a seed purity analysis
- AHCSDT305A Perform a seed moisture test

- AHCSDT306A Perform a seed germination test
- AHCSDT307A Perform determination of other seeds by number
- AHCOHS301A Contribute to OHS processes
- AHCWRK306A Comply with industry quality assurance requirements
- AHCWRK313A Implement and monitor environmentally sustainable work practices

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> <li>• Complete workplace documentation and records</li> <li>• Use a range of communication technologies to support work operations</li> <li>• Develop work instructions, specifications and procedures</li> <li>• Demonstrate effective and appropriate communication and interpersonal skills when dealing with people</li> <li>• Communicate with all team members in a professional manner</li> <li>• Demonstrate effective and appropriate documentation, communication and interpersonal skills when dealing with internal and external clients</li> <li>• Use most appropriate communication method given priority, cost and audience needs</li> <li>• Access, interpret and apply technical information</li> <li>• Analyse data and information to determine implications for work operations</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Work cooperatively with people of different ages, gender, race or religion</li> <li>• Liaise with and provide support to other team members</li> <li>• Demonstrate leadership skills</li> <li>• Identify and manage performance required to meet internal and external customer needs in own work and team work</li> <li>• Manage organisational processes and provide problem solving support to others</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Investigate problem causes</li> <li>• Identify, rectify or report potential and actual problems associated with work operations</li> <li>• Identify factors which may affect the product or service to be provided</li> <li>• Use material and process knowledge to solve problems</li> <li>• Identify hazards and suggest control measures</li> <li>• Monitor food safety practices</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Gather and analyse feedback on products, processes and procedures</li> </ul>

	<ul style="list-style-type: none"> <li>• Assess quality and other indicators of products</li> <li>• Support achievement of efficient production processes</li> <li>• Determine and act on situations requiring further information or problem solving</li> <li>• Assist in the implementation of continuous improvement processes</li> <li>• Provide leadership in the workplace</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Identify hazards and implement appropriate hazard control measures</li> <li>• Demonstrate time management skills</li> <li>• Source and prepare materials and resources and ensure availability to support work operations</li> <li>• Schedule and sequence work to maximise safety and productivity</li> <li>• Optimise work processes</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Interpret and apply relevant acts and regulations</li> <li>• Keep the work area clean and tidy at all times</li> <li>• Monitor own work and work of team and identify and act on any quality issues</li> <li>• Manage own time to meet deadlines</li> <li>• Implement and monitor workplace procedures and instructions</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Implement learning activities as appropriate to ensure achievement of specified work requirements</li> <li>• Be supportive, assertive and use interpersonal skills to encourage workplace learning</li> <li>• Identify own training needs and seek skill development if required</li> <li>• Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice</li> <li>• Assess work data and information to identify areas for improved performance</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Work with technology safely and according to workplace standards</li> <li>• Help others use technology efficiently and safely</li> <li>• Ensure readiness and operational efficiency of workplace technology</li> </ul>

## Packaging Rules

Complete **eighteen (18)** Units of Competency comprised of **nine (9)** core Units and **nine (9)**

elective Units.

### Core Units of Competency

Unit code	Unit title
AHCSDT402A	Prepare and maintain a seed reference collection
AHCSDT404A	Develop and implement laboratory policy and procedures
AHCSDT406A	Undertake internal audits in a seed laboratory
AHCSDT409A	Perform a tetrazolium seed viability test
AHCSDT410A	Perform seed vigour test
AHCSDT411A	Perform a 1000 seed weight test
AHCOHS401A	Maintain Occupational Health and Safety (OHS) processes
AHCWRK401A	Implement and monitor quality assurance procedures
AHCWRK403A	Supervise work routines and staff performance

### Elective Units of Competency

- Select **five (5)** Units from the Elective list below.
- Select **four (4)** Units from the list below and/or this or any other endorsed Training Package or accredited course at Certificate II, III or IV level.

Selected Units must be relevant to job outcomes in a seed testing laboratory.

Unit code	Unit title
AHCSDT401A	Maintain a quarantine approved laboratory
AHCSDT403A	Perform an Anguina test on annual ryegrass seed
AHCSDT405A	Handle & store quarantinable materials
AHCSDT407A	Perform an endophytic seed test

AHCSDT408A	Perform an electrophoresis test on a seed sample
MSL904001A	Perform standard calibrations
MSL924001A	Process and interpret data
MSL924002A	Use laboratory application software
MSL934002A	Apply quality system and continuous improvement processes
MSL934003A	Maintain and control stocks

# AHC41612 Certificate IV in Organic Farming

## Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

## Description

This Qualification allows individuals to develop skills and knowledge within the organic farming and general agriculture industry. It is designed to meet the needs of supervisors or team leaders working in the organic agriculture industry.

This Qualification is suitable for people currently working or who wish to find employment on an organic farming enterprise.

**Job Roles:** Job roles and titles will vary. Possible job titles relevant to this Qualification include:

- Organic farm team leader
- Organic farm supervisor
- Organic farmer

## Pathways Information

### Pathways into the Qualification

This Qualification may be accessed by direct entry.

### Pathways from the Qualification

Further training pathways from this Qualification include, but are not limited to, AHC51812 Diploma of Organic Farming and AHC50110 Diploma of Agriculture.

## Licensing/Regulatory Information

There is no licensing or regulatory requirement specifically satisfied as a result of completing this Qualification.

## Entry Requirements

There are no entry requirements for this Qualification.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> <li>• Reading and interpreting workplace related documentation and codes of practice.</li> <li>• Interpreting the needs of internal/external customers, especially in relation to the organic supply chain.</li> <li>• Applying numeracy skills to workplace requirements.</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working with diverse individuals and groups.</li> <li>• Applying knowledge of own role as a part of a team.</li> <li>• Applying teamwork skills to a range of situations.</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems.</li> <li>• Showing independence and initiative in identifying problems.</li> <li>• Applying a range of strategies in problem solving.</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Being creative in response to workplace challenges.</li> <li>• Identifying opportunities that might not be obvious to others.</li> <li>• Generating a range of options in response to workplace matters.</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Collecting analysing and organising information.</li> <li>• Being appropriately resourceful.</li> <li>• Taking initiative and making decisions within workplace role.</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Monitoring and evaluating own performance.</li> <li>• Taking responsibility at the appropriate level, especially in relation to organic standards and compliance.</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques.</li> <li>• Learning in a range of settings including informal learning.</li> <li>• Contributing to the learning of others.</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment.</li> <li>• Using basic technology skills.</li> <li>• Using technology to organise data.</li> <li>• Applying OHS knowledge when using technology.</li> </ul>

## Packaging Rules

Completion of twelve (12) Units made up of one (1) core Unit and eleven (11) elective Units.

### Core Units of Competency

Unit code	Unit title
AHCOHS401A	Maintain occupational health and safety (OHS) processes

### Elective Units of Competency

- select four (4) Units from Group A
- select five (5) Units from Groups A or B
- select two (2) Units from Group A, Group B, or Units packaged in Certificates III, IV or Diploma in AHC10 or from any other currently endorsed Training Package or accredited course

Selected Units must be relevant to job outcomes in agriculture.

### GROUP A

Unit code	Unit title
AHCORG401A	Manage biodynamic production
AHCORG402A	Manage organic livestock production
AHCORG403A	Manage organic soil improvement
AHCORG404A	Arrange selling through community based marketing
AHCORG405A	Implement sustainable practices in the organic farm based business
AHCORG406A	Oversee compliance with an organic certification scheme

### GROUP B

#### Agribusiness

Unit code	Unit title
AHCAGB401A	Implement and monitor a property improvement plan
AHCAGB402A	Analyse and interpret production data

### Business

Unit code	Unit title
AHCBUS401A	Administer finance, insurance and legal requirements
AHCBUS402A	Cost a project
AHCBUS404A	Operate within a budget framework
AHCBUS405A	Participate in an e-business supply chain
BSBRSK401A	Identify risk and apply risk management processes
BSBSMB405B	Monitor and manage small business operations
BSBSMB406A	Manage small business finances

### Broadacre cropping

Unit code	Unit title
AHCBAC401A	Manage pastures for livestock production
AHCBAC402A	Plan a pasture establishment program
AHCBAC403A	Supervise agricultural crop establishment
AHCBAC404A	Plan and implement agricultural crop maintenance
AHCBAC405A	Supervise agricultural crop harvesting

### Livestock

Unit code	Unit title
AHCLSK402A	Develop livestock feeding plans
AHCLSK404A	Implement and monitor animal welfare programs

AHCLSK405A	Implement intensive production systems
AHCLSK406A	Oversee animal marking operations
AHCLSK407A	Plan and monitor intensive production systems
AHCLSK409A	Supervise animal health programs
AHCLSK411A	Supervise natural mating of livestock
AHCLSK412A	Arrange livestock purchases
AHCLSK414A	Arrange transport for farm produce or livestock
AHCLSK416A	Identify and select animals for breeding

### Production horticulture

Unit code	Unit title
AHCPHT402A	Develop a crop regulation program
AHCPHT404A	Implement and monitor a horticultural crop harvesting program

### Irrigation

Unit code	Unit title
AHCIRG402A	Determine hydraulic parameters for an irrigation system
AHCIRG404A	Implement an irrigation-related environmental protection system
AHCIRG405A	Plan and coordinate gravity-fed irrigation systems
AHCIRG408A	Schedule irrigations

### Soils and media

Unit code	Unit title
AHCSOL401A	Sample soils and interpret results

### Chemicals

<b>Unit code</b>	<b>Unit title</b>
AHCCHM401A	Minimise risk in the use of chemicals

**Work**

<b>Unit code</b>	<b>Unit title</b>
AHCWRK401A	Implement and monitor quality assurance procedures
AHCWRK403A	Supervise work routines and staff performance

## AHC50110 Diploma of Agriculture

Release	TP Version	Comments
4	AHC10v6	<p>Added elective units:</p> <ul style="list-style-type: none"> <li>• AHCCFI501 Provide technical advice on the Carbon Farming Initiative</li> <li>• AHCCFI502 Assess the feasibility of a Carbon Farming Initiative project</li> <li>• AHCCFI503 Advise on Carbon Farming Initiative project planning and implementation</li> <li>• AHCCFI504 Monitor and report on a Carbon Farming Initiative project</li> <li>• AHCCFI505 Aggregate Carbon Farming Initiative projects</li> <li>• AHCCFI506 Plan a Carbon Farming Initiative livestock project</li> <li>• AHCCFI507 Plan a Carbon Farming Initiative waste or manure management project</li> <li>• AHCCFI508 Plan a Carbon Farming Initiative project to sequester carbon in soil or biochar</li> <li>• AHCCFI509 Plan a Carbon Farming Initiative savannah burning, feral animal or rangelands project</li> <li>• AHCCFI510 Plan a Carbon Farming Initiative vegetation project</li> <li>• AHCCFI511 Plan a Carbon Farming Initiative project to avoid emissions from soil and crops</li> </ul>
3	AHC10v5	Added elective unit <i>AHCPCM505A Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs</i>
2	AHC10v4	Equivalent imported units updated
1	AHC10	Initial release

## Description

The Diploma of Agriculture reflects the role of personnel working on farms and stations who manage enterprise production units and employees and sole operators of agribusinesses who provide crop production advice and services to production enterprises.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

#### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, AHC60110 Advanced Diploma of Agriculture.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Farm production manager
- Production unit manager
- Agronomist
- Station/property manager.
- 

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
<b>Employability Skill</b>	<b>Industry/enterprise requirements for this qualification include:</b>
Communication	<ul style="list-style-type: none"> <li>• Reading and interpreting workplace related documentation</li> <li>• Writing to audience needs</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Establishing/using networks</li> </ul>

Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in order to accommodate change</li> <li>• Managing own learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using technology to organise data</li> <li>• Applying technology as a management tool</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of ten (10) elective units.

#### ELECTIVE UNITS

- a minimum of five (5) units must come from elective group A
- a minimum of three (3) units must come from elective groups A or B
- a maximum of two (2) units may be selected from units aligned to Certificate IV, Diploma or Advanced Diploma in AHC10 or from any other currently endorsed Training Package or accredited course. Selected units must be relevant to job outcomes in agriculture.

#### ELECTIVE UNITS GROUP A

##### Agribusiness

Unit code	Unit title
AHCAGB501A	Develop climate risk management strategies
AHCAGB505A	Develop a whole farm plan

##### Business

Unit code	Unit title
AHCBUS501A	Manage staff
AHCBUS506A	Develop and review a business plan
AHCBUS507A	Monitor and review business performance

##### Broadacre cropping

Unit code	Unit title
AHCBAC501A	Manage agricultural crop production
AHCBAC502A	Manage forage conservation

AHCBAC503A	Manage integrated crop and pasture production
AHCBAC504A	Plan and manage a stored grain program
AHCBAC505A	Plan and manage long-term weed, pest and/or disease control in crops
AHCBAC506A	Manage the harvest of crops
AHCBAC507A	Develop production plans for crops

### Livestock

Unit code	Unit title
AHCLSK501A	Manage livestock production
AHCLSK502A	Arrange marketing of livestock
AHCLSK503A	Develop and implement a breeding strategy
AHCLSK504A	Develop livestock health and welfare strategies
AHCLSK505A	Develop production plans for livestock

### Occupational health and safety

Unit code	Unit title
AHCOHS501A	Manage Occupational Health and Safety (OHS) processes

### Organic production

Unit code	Unit title
AHCORG501A	Develop an organic management plan
AHCORG502A	Prepare the enterprise for organic certification

### Soils and media

Unit code	Unit title
-----------	------------

AHCSOL501A	Monitor and manage soils for production
------------	---

## ELECTIVE UNITS GROUP B

### Agribusiness

Unit code	Unit title
AHCAGB502A	Plan and manage infrastructure requirements
AHCAGB503A	Plan and monitor production processes
AHCAGB504A	Plan production for the whole land/farm based business
BSBWOR501B	Manage personal work priorities and professional development

### Business

Unit code	Unit title
AHCBUS502A	Market products and services
AHCBUS503A	Negotiate and monitor contracts
AHCBUS504A	Prepare estimates, quotes and tenders
AHCBUS505A	Develop a marketing plan
AHCBUS508A	Prepare and monitor budgets and financial reports
BSBFIM501A	Manage budgets and financial plans
BSBHRM506A	Manage recruitment selection and induction processes
BSBRES401A	Analyse and present research information
BSBRISK501B	Manage risk
TLIL5019A	Implement and monitor transport logistics
TLIR4002A	Source goods/services and evaluate contractors
TLIR4003A	Negotiate a contract

### Carbon farming

Unit code	Unit title
AHCCFI501	Provide technical advice on the Carbon Farming Initiative
AHCCFI502	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI503	Advise on Carbon Initiative project planning and implementation
AHCCFI504	Monitor and report on a Carbon Farming Initiative project
AHCCFI505	Aggregate Carbon Farming Initiative projects
AHCCFI506	Plan a Carbon Farming Initiative livestock project
AHCCFI507	Plan a Carbon Farming Initiative waste or manure management project
AHCCFI508	Plan a Carbon Farming Initiative project to sequester carbon in soil or biochar
AHCCFI509	Plan a Carbon Farming Initiative savannah burning, feral animal or rangelands project
AHCCFI510	Plan a Carbon Farming Initiative vegetation project
AHCCFI511	Plan a Carbon Farming Initiative project to avoid emissions from soil and crops

### Chemicals

Unit code	Unit title
AHCCHM401A	Minimise risks in the use of chemicals
AHCCHM501A	Develop and manage a chemical use strategy

### Deer

Unit code	Unit title
AHCDER401A	Handle, store and grade deer velvet
AHCDER501A	Comply with deer industry national velvet accreditation requirements

AHCDER502A	Harvest deer velvet
------------	---------------------

### Drainage

Unit code	Unit title
AHCDRG501A	Design drainage systems

### Livestock

Unit code	Unit title
AHCLSK506A	Design livestock effluent systems

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM501A	Manage machinery and equipment
AHCMOM502A	Implement a machinery management system

### Merchandising and sales

Unit code	Unit title
AHCMER501A	Develop a sales strategy for rural products

### Natural area restoration

Unit code	Unit title
AHCNAR506A	Develop and implement sustainable land use strategies

### Organic production

Unit code	Unit title
AHCORG401A	Manage biodynamic production
AHCORG402A	Manage organic livestock production

AHCORG403A	Manage organic soil improvement
------------	---------------------------------

### Plants

Unit code	Unit title
AHCPCM505A	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs

### Shearing

Unit code	Unit title
AHCSHG405A	Arrange employment for shearing operations

### Water

Unit code	Unit title
AHCWAT502A	Manage water systems

### Work

Unit code	Unit title
AHCWRK501A	Plan, implement and review a quality assurance program
AHCWRK502A	Collect and manage data
AHCWRK504A	Assess new industry developments
AHCWRK505A	Manage trial and/or research material
AHCWRK509A	Provide specialist advice to clients
AHCWRK511A	Develop workplace policy and procedures for sustainability

## **AHC50210 Diploma of Pork Production**

### **Modification History**

Not Applicable

### **Description**

The Diploma of Pork Production Management reflects the role of personnel working on piggeries who manage enterprise production units.

### **Pathways Information**

#### **Qualification pathways**

##### **Pathways into the qualification**

This qualification may be accessed by direct entry or completion of the Certificate III in Pork Production.

##### **Pathways from the qualification**

Further training pathways from this qualification include, but are not limited to, Advanced Diploma of Agriculture or Advanced Diploma of Agribusiness Management.

#### **Australian Apprenticeships**

This qualification is suitable for an Australian Apprenticeship.

#### **Job roles**

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Production unit manager

### **Licensing/Regulatory Information**

Not Applicable

### **Entry Requirements**

#### **Entry requirements**

There are no entry requirements for this qualification.

## Packaging Rules

### Packaging Rules

Completion of ten (10) units made up of two (2) core units and eight (8) elective units.

### ELECTIVE UNITS

- a minimum of six (6) units must come from the elective units list
- a maximum of two (2) units may be selected from the elective units or from units aligned to Certificate III or above in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in pork production.

### CORE UNITS

#### Livestock

- |            |   |
|------------|---|
| AHCLSK501A | Manage livestock production                     |
| AHCLSK504A | Develop livestock health and welfare strategies |

### ELECTIVE UNITS

#### Pork production

- |            |   |
|------------|---|
| AHCPRK401A | Implement a feeding strategy for pig production |
|------------|---|

#### Livestock

- |            |   |
|------------|---|
| AHCLSK405A | Implement intensive production systems    |
| AHCLSK416A | Identify and select animals for breeding  |
| AHCLSK503A | Develop and implement a breeding strategy |
| AHCLSK505A | Develop production plans for livestock    |

#### Business

AHCBUS501A	Manage staff
AHCBUS508A	Prepare and monitor budgets and financial reports
BSBHRM506A	Manage recruitment selection and induction processes

**Work**

AHCWRK502A	Collect and manage data
AHCWRK503A	Prepare reports

## AHC50310 Diploma of Production Horticulture

### Modification History

Release	TP Version	Comments
3	AHC10v5	Added elective unit <i>AHCPCM505A Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs</i>
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

### Description

The Diploma of Production Horticulture reflects the role of personnel working on production horticulture farms.

The qualification can be contextualised for a tree cropping, vegetable, berry or flower production or mushroom production context as a job focus or, in the case of mixed enterprises, both.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Advanced Diploma of Agriculture.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

#### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Production horticulture farm manager

## Licensing/Regulatory Information

Completion of ten (10) elective units.

### ELECTIVE UNITS

- a minimum of two (2) units must come from elective group A
- a minimum of six (6) units must come from elective groups A or B

- a maximum of two (2) units may be selected from units aligned to Certificate IV or above in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the production horticulture industry.

## ELECTIVE UNITS GROUP A

### Plants

Unit code	Unit title
AHCPCM501A	Diagnose plant health problems

### Production horticulture

Unit code	Unit title
AHCPHT502A	Develop a horticultural production plan
AHCPHT503A	Manage a controlled growing environment

### Hydroponics

Unit code	Unit title
AHCHYD501A	Develop a plan for a hydroponic system

### Soils and media

Unit code	Unit title
AHCSOL501A	Monitor and manage soils for production

## ELECTIVE UNITS GROUP B

### Biosecurity

Unit code	Unit title
AHCBIO501A	Manage active operational emergency disease or plant pest sites
AHCBIO502A	Manage the implementation of an emergency disease or plant

	pest control program
--	----------------------

### Business

Unit code	Unit title
AHCBUS501A	Manage staff
AHCBUS502A	Market products and services
AHCBUS503A	Negotiate and monitor contracts
AHCBUS505A	Develop a marketing plan
AHCBUS506A	Develop and review a business plan
AHCBUS507A	Monitor and review business performance
AHCBUS508A	Prepare and monitor budgets and financial reports
BSBR501B	Manage risk
TLIL5019A	Implement and monitor transport logistics
TLIR4002A	Source goods/services and evaluate contractors
TLIR4003A	Negotiate a contract

### Chemicals

Unit code	Unit title
AHCCHM501A	Develop and manage a chemical use strategy

### Drainage

Unit code	Unit title
AHCDRG501A	Design drainage systems

### Hydroponics

Unit code	Unit title
-----------	------------

AHCHYD501A	Develop a plan for a hydroponic system
------------	--

### Irrigation

Unit code	Unit title
AHCIRG502A	Design irrigation system maintenance and monitoring programs
AHCIRG503A	Design irrigation, drainage and water treatment systems
AHCIRG504A	Develop an irrigation and drainage management plan

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM501A	Manage machinery and equipment
AHCMOM502A	Implement a machinery management system

### Organic production

Unit code	Unit title
AHCORG501A	Develop an organic management plan
AHCORG502A	Prepare the enterprise for organic certification

### Plants

Unit code	Unit title
AHCPCM505A	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs

### Water

Unit code	Unit title
AHCWAT501A	Design water treatment systems
AHCWAT502A	Manage water systems

**Work**

<b>Unit code</b>	<b>Unit title</b>
AHCWRK501A	Plan, implement and review a quality assurance program
AHCWRK511A	Develop workplace policy and procedures for sustainability

## AHC50410 Diploma of Horticulture

### Modification History

Self-management	<ul style="list-style-type: none"> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Defining own learning needs</li> <li>• Carrying out independent learning to improve capability</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using technology to organise data</li> </ul>

**Packaging Rules****Packaging Rules**

Completion of twelve (12) units made up of five (5) core units and seven (7) elective units.

**ELECTIVE UNITS**

- a minimum of five (5) units must come from the elective units list
- a maximum of two (2) units may be selected from the elective units or from units aligned to Certificate IV or above in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the parks and gardens industry.

**CORE UNITS****Business**

Unit code	Unit title
AHCBUS501A	Manage staff

AHCBUS504A	Prepare estimates, quotes and tenders
------------	---------------------------------------

### Parks and gardens

Unit code	Unit title
AHCPGD503A	Manage parks and reserves
AHCPGD504A	Develop and implement a streetscape management plan

### Turf

Unit code	Unit title
AHCTRF501A	Plan the establishment of sports turf playing surfaces

## ELECTIVE UNITS

### Parks and gardens

Unit code	Unit title
AHCPGD501A	Manage plant cultural practices
AHCPGD502A	Plan the restoration of parks and gardens
AHCPGD505A	Conduct comprehensive inspection of park facilities

### Arboriculture

Unit code	Unit title
AHCARB501A	Assess trees
AHCARB502A	Identify, select and specify trees
AHCARB503A	Diagnose tree diseases
AHCARB504A	Develop a tree protection program
AHCARB505A	Document and audit tree work

**Business**

Unit code	Unit title
AHCBUS503A	Negotiate and monitor contracts
BSBFIM501A	Manage budgets and financial plans
BSBHRM506A	Manage recruitment selection and induction processes
AHCWRK511A	Develop workplace policy and procedures for sustainability
TLIR4002A	Source goods/services and evaluate contractors
TLIR4003A	Negotiate a contract

**Chemicals**

Unit code	Unit title
AHCCHM501A	Develop and manage a chemical use strategy

**Irrigation**

Unit code	Unit title
AHCIRG501A	Audit irrigation systems
AHCIRG502A	Design irrigation system maintenance and monitoring programs
AHCIRG503A	Design irrigation, drainage and water treatment systems
AHCIRG504A	Develop an irrigation and drainage management plan

**Landscape**

Unit code	Unit title
AHCLSC501A	Survey and establish site levels
AHCLSC502A	Manage landscape projects
AHCLSC503A	Manage a tree transplanting program

**Occupational health and safety**

<b>Unit code</b>	<b>Unit title</b>
AHCOHS501A	Manage Occupational Health and Safety (OHS) processes

### **Plants**

<b>Unit code</b>	<b>Unit title</b>
AHCPCM501A	Diagnose plant health problems
AHCPCM502A	Collect and classify plants
AHCPCM503A	Specify plants for landscapes
AHCPCM504A	Design and maintain a specialised landscape

# AHC50810 Diploma of Production Nursery Management

## Modification History

AHCILM503A	Manage restoration of cultural places
AHCILM504A	Develop strategies for Indigenous land or sea management
AHCILM505A	Map relationship of business enterprise to culture and country
AHCILM506A	Operate within community cultures and goals
AHCILM508A	Propose a negotiated outcome for a given area of country
AHCILM509A	Plan burning activities for natural and cultural resource management
AHCILM510A	Plan for successful cultural practice at work
AHCILM601A	Manage cultural processes in an Indigenous organisation
SITTGDE101	Interpret aspects of local Australian Indigenous culture

### Lands, parks and wildlife

Unit code	Unit title
AHCLPW501A	Develop a management plan for a designated area
AHCLPW503A	Assess applications for legislative compliance
AHCLPW504A	Review assessments for legislative compliance

AHCLPW505A	Implement natural and cultural resource management plans
AHCLPW506A	Investigate suspected breaches of Natural Resource Management (NRM) legislation
AHCLPW601A	Coordinate the preparation of a regional resource management plan
CPPWMT5043A	Develop and implement an environmental management strategy
NWP512B	Develop and review catchment management plan
NWP513B	Implement and manage catchment management plan
NWP516B	Develop and review surface water management plan
NWP517B	Implement and manage surface water management plan
NWP518B	Prepare and report on data related to flood mitigation
NWP519B	Develop and report flood mitigation
PUAFIR406B	Develop prescribed burning plans
SISXRES506A	Undertake open-space planning
SRXRES010B	Protect heritage and cultural assets

### Natural area restoration

Unit code	Unit title
AHCNAR501A	Manage natural areas on a rural property
AHCNAR502A	Conduct biological surveys
AHCNAR503A	Design a natural area restoration project
AHCNAR504A	Manage natural area restoration programs
AHCNAR505A	Plan river restoration works
AHCNAR506A	Develop and implement sustainable land use strategies

### Pest management

Unit code	Unit title
AHCPMG501A	Coordinate the pest management strategy in a regional or broader context
AHCPMG502A	Define the pest problem in a regional or broader context
AHCPMG503A	Develop a strategy for the management of target pests
AHCPMG504A	Develop a system for monitoring the pest management strategy
AHCPMG505A	Evaluate the pest management strategy
AHCPMG506A	Manage the implementation of legislation

### Plants

Unit code	Unit title
AHCPCM502A	Collect and classify plants

### Soil and water conservation

Unit code	Unit title
AHCSAW501A	Design control measures and structures
AHCSAW502A	Plan erosion and sediment control measures
AHCSAW503A	Plan conservation earthworks

### ELECTIVE UNITS GROUP B

#### Business

Unit code	Unit title
AHCBUS501A	Manage staff
AHCBUS503A	Negotiate and monitor contracts
AHCBUS504A	Prepare estimates, quotes and tenders
AHCBUS508A	Prepare and monitor budgets and financial reports

TLIR4003A	Negotiate a contract
-----------	----------------------

### Carbon farming

Unit code	Unit title
AHCCFI504	Monitor and report on a Carbon Farming Initiative project
AHCCFI506	Plan a Carbon Farming Initiative livestock project
AHCCFI507	Plan a Carbon Farming Initiative waste or manure management project
AHCCFI508	Plan a Carbon Farming Initiative project to sequester carbon in soil or biochar
AHCCFI509	Plan a Carbon Farming Initiative savannah burning, feral animal or rangelands project
AHCCFI510	Plan a Carbon Farming Initiative vegetation project
AHCCFI511	Plan a Carbon Farming Initiative project to avoid emissions from soil and crops

### Fauna

Unit code	Unit title
AHCFAU501A	Manage fauna populations

### Fire

Unit code	Unit title
AHCFIR501A	Manage wildfire hazard reduction programs

### Lands, parks and wildlife

Unit code	Unit title
AHCLPW501A	Develop a management plan for a designated area

**Machinery operation and maintenance**

<b>Unit code</b>	<b>Unit title</b>
AHCMOM501A	Manage machinery and equipment
AHCMOM502A	Implement a machinery management system
BSBWHS503A	Contribute to the systematic management of WHS risk
BSBWHS508A	Manage WHS hazards associated with plant

**Occupational health and safety**

<b>Unit code</b>	<b>Unit title</b>
AHCOHS501A	Manage Occupational Health and Safety (OHS) processes

**Natural area restoration**

<b>Unit code</b>	<b>Unit title</b>
AHCNAR501A	Manage natural areas on a rural property
AHCNAR502A	Conduct biological surveys
AHCNAR503A	Design a natural area restoration project
AHCNAR504A	Manage natural area restoration programs
AHCNAR505A	Plan river restoration works
AHCNAR506A	Develop and implement sustainable land use strategies
SITTPPD402	Develop interpretative activities
SITTPPD602	Develop environmentally sustainable tourism operations

**Natural resource management**

<b>Unit code</b>	<b>Unit title</b>
AHCNRM501A	Develop a coastal rehabilitation strategy
AHCNRM502A	Develop a water quality monitoring program

AHCNRM503A	Support the implementation of waterways strategies
AHCNRM504A	Interpret and report on catchment hydrology
AHCNRM505A	Provide technical advice on sustainable catchment management
AHCNRM506A	Plan and monitor works projects in catchments and waterways
AHCNRM507A	Manipulate and analyse data within geographic information systems

### Parks and gardens

Unit code	Unit title
AHCPGD503A	Manage parks and reserves
AHCPGD505A	Conduct comprehensive inspection of park facilities

### Work

Unit code	Unit title
AHCWRK502A	Collect and manage data
AHCWRK503A	Prepare reports
AHCWRK508A	Interpret legislation
AHCWRK509A	Provide specialist advice to clients
AHCWRK511A	Develop workplace policy and procedures for sustainability
PSPPM502B	Manage complex projects
PSPPM503B	Close complex projects

## AHC51210 Diploma of Community Coordination and Facilitation

### Modification History

Release	TP Version	Comments
3	AHC10v6	Added elective units: <ul style="list-style-type: none"> <li>• AHCCFI501 Provide technical advice on the Carbon Farming Initiative</li> <li>• AHCCFI502 Assess the feasibility of a Carbon Farming Initiative project</li> <li>• AHCCFI503 Advise on Carbon Farming Initiative project planning and implementation</li> <li>• AHCCFI504 Monitor and report on a Carbon Farming Initiative project</li> <li>• AHCCFI505 Aggregate Carbon Farming Initiative projects</li> </ul>
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

### Description

Community coordination and facilitation sector is about fostering, promoting and supporting community development, particularly in rural communities that are engaged in land management activities.

### Pathways Information

#### Qualification pathways

##### Pathways into the qualification

This qualification may be accessed by direct entry.

##### Pathways from the qualification

Further training pathways from this qualification include, but are not limited to, Advanced Diploma of Conservation and Land Management.

#### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Volunteer, project manager, community group leader, group or project coordinator, regional coordinator

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Reading and interpreting workplace related documentation</li> <li>• Writing to audience needs</li> <li>• Interpreting the needs of internal/external customers</li> <li>• Establishing/using networks</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Working with diverse individuals and groups</li> <li>• Applying knowledge of own role as a part of a team</li> <li>• Applying teamwork skills to a range of situations</li> <li>• Identifying and using the strengths of other team members</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Developing practical and creative solutions to workplace problems</li> <li>• Applying a range of strategies in problem solving</li> <li>• Listening to and resolving concerns in relation to workplace issues</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Identifying opportunities that might not be obvious to others</li> <li>• Generating a range of options in response to workplace matters</li> </ul>

<b>EMPLOYABILITY SKILLS QUALIFICATION SUMMARY</b>	
	<ul style="list-style-type: none"> <li>• Translating ideas into action</li> <li>• Developing innovative solutions</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Taking initiative and making decisions within workplace role</li> <li>• Working within or establishing clear project goals and deliverables</li> <li>• Determining or applying required resources</li> <li>• Allocating people and other resources to tasks and workplace requirements</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Having a personal vision and goals</li> <li>• Articulating own ideas and vision</li> <li>• Monitoring and evaluating own performance</li> <li>• Taking responsibility at the appropriate level</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• Being open to learning, new ideas and techniques</li> <li>• Learning in order to accommodate change</li> <li>• Managing own learning</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment</li> <li>• Using technology to organise data</li> <li>• Applying technology as a management tool</li> </ul>

## Packaging Rules

### Packaging Rules

Completion of ten (10) elective units.

### ELECTIVE UNITS

- a minimum of four (4) units must come from elective group A
- a minimum of four (4) units must come from elective groups A or B
- a maximum of two (2) units may be selected from units aligned to Certificate IV or above in AHC10 or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in community coordination and facilitation.

### ELECTIVE UNITS GROUP A

#### Community coordination and facilitation

Unit code	Unit title
AHCCCF501A	Evaluate project submissions
AHCCCF502A	Facilitate development of group goals and projects
AHCCCF503A	Promote group formation and development
AHCCCF504A	Support group and community changes in resource management
AHCCCF505A	Contribute to regional planning process
AHCCCF506A	Manage the incorporation of a group
AHCCCF601A	Map regional issues and stakeholders

## ELECTIVE UNITS GROUP B

### Business

Unit code	Unit title
AHCBUS501A	Manage staff
AHCBUS502A	Market products and services
AHCBUS503A	Negotiate and monitor contracts
AHCBUS504A	Prepare estimates, quotes and tenders
AHCBUS505A	Develop a marketing plan
AHCBUS506A	Develop and review a business plan
AHCBUS507A	Monitor and review business performance
AHCBUS508A	Prepare and monitor budgets and financial reports
BSBADM504B	Plan or review administrative systems
BSBRES401A	Analyse and present research information
TLIL5019A	Implement and monitor transport logistics
TLIR4002A	Source goods/services and evaluate contractors

TLIR4003A	Negotiate a contract
-----------	----------------------

### Carbon farming

Unit code	Unit title
AHCCFI501	Provide technical advice on the Carbon Farming Initiative
AHCCFI502	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI503	Advise on Carbon Initiative project planning and implementation
AHCCFI504	Monitor and report on a Carbon Farming Initiative project
AHCCFI505	Aggregate Carbon Farming Initiative projects

### Community coordination and facilitation

Unit code	Unit title
AHCCCF401A	Prepare project acquittal
AHCCCF402A	Report on project
AHCCCF403A	Obtain and manage sponsorship
AHCCCF404A	Contribute to association governance
AHCCCF405A	Develop community networks
AHCCCF406A	Facilitate ongoing group development
AHCCCF407A	Obtain resources from community and groups
AHCCCF408A	Promote community programs
AHCCCF409A	Participate in assessments of project submissions
AHCCCF410A	Support individuals in resource management change processes
AHCCCF411A	Develop approaches to include cultural and human diversity
AHCCCF412A	Coordinate board/committee elections
AHCCCF413A	Service committees

AHCCCF414A	Coordinate fund-raising activities
AHCCCF415A	Coordinate social events to support group purposes
AHCCCF416A	Present proposed courses of action to meeting
CHCCD404E	Develop and implement community programs
LGACOM502B	Devise and conduct community consultations

### Lands, parks and wildlife

Unit code	Unit title
PUACOM012B	Liaise with media at a local level
AHCLPW501A	Develop a management plan for a designated area

### Occupational health and safety

Unit code	Unit title
AHCOHS501A	Manage Occupational Health and Safety (OHS) processes

### Work

Unit code	Unit title
AHCWRK501A	Plan, implement and review a quality assurance program
AHCWRK502A	Collect and manage data
AHCWRK503A	Prepare reports
AHCWRK504A	Assess new industry developments
AHCWRK505A	Manage trial and/or research material
AHCWRK507A	Implement professional practice
AHCWRK508A	Interpret legislation
AHCWRK509A	Provide specialist advice to clients
AHCWRK510A	Audit site operations

AHCWRK511A	Develop workplace policy and procedures for sustainability

## AHC51513 Diploma of Viticulture

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Description

This qualification is designed to meet the needs of managers in the viticulture industry.

**Job Roles:** Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Viticulture farm manager.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Pathways Information

#### Pathways into the Qualification

Preferred pathways for candidates considering this qualification include

- AHC40310 Certificate IV in Production Horticulture

or

- with equivalent technical skills in vineyard operations and vocational experience in a supervisory or technician role but no formal qualification.

#### Pathways from the Qualification

Further training pathways from this Qualification include, but are not limited to, AHC60110 Advanced Diploma of Agriculture or AHC60310 Advanced Diploma of Agribusiness Management.

### Licensing/Regulatory Information

Not applicable.

## Entry Requirements

There are no formal entry requirements for this qualification. However, the qualification assumes that a learner has current or past work experience where operational or technical skills have already been gained and a production management level of responsibility exists. The qualification is not suitable for direct entry from school.

## Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> <li>• Reading and interpreting workplace related documentation.</li> <li>• Writing to audience needs.</li> <li>• Interpreting the needs of internal/external customers.</li> <li>• Applying numeracy skills to workplace requirements.</li> <li>• Establishing/using networks.</li> <li>• Sharing information.</li> <li>• Negotiating responsively.</li> </ul>

Technology	<ul style="list-style-type: none"> <li>• Using technology and related workplace equipment.</li> <li>• Using basic technology skills.</li> <li>• Using technology to organise data.</li> <li>• Applying technology as a management tool.</li> </ul>

## Packaging Rules

Completion of 10 units of competency comprising four (4) core units and six (6) elective units.

### Core Units of Competency

#### Business

Unit code	Unit title
AHCBUS501A	Manage staff

#### Plants

Unit code	Unit title
AHCPCM501A	Diagnose plant health problems

**Production horticulture**

Unit code	Unit title
AHCPHT504A	Develop a grape production plan

**Soil**

Unit code	Unit title
AHCSOL501A	Monitor and manage soils for production

**Elective Units of Competency**

- select three (3) units from the elective list below
- select three additional (3) units from the elective list below, or from units packaged in Certificate IV, Diploma or Advanced Diploma in AHC10 or from any other currently endorsed Training Package or accredited course

Selected units must be relevant to job outcomes in the viticulture industry.

**Broadacre cropping**

Unit code	Unit title
AHCBAC505A	Plan and manage long-term weed, pest &/or disease control in crops

**Biosecurity**

Unit code	Unit title
AHCBIO501A	Manage active operational emergency disease or plant pest sites
AHCBIO502A	Manage the implementation of an emergency disease or plant pest control program

**Business**

Unit code	Unit title
AHCBUS502A	Market products and services

AHCBUS503A	Negotiate and monitor contracts
AHCBUS505A	Develop a marketing plan
AHCBUS506A	Develop and review a business plan
AHCBUS507A	Monitor and review business performance
AHCBUS508A	Prepare and monitor budgets and financial reports
BSBR5K501B	Manage risk
TLIL5019A	Implement and monitor transport logistics
TLIR4002A	Source goods/services and evaluate contractors

### Chemicals

Unit code	Unit title
AHCCHM501A	Develop and manage a chemical use strategy

### Drainage

Unit code	Unit title
AHCDRG501A	Design drainage systems

### Irrigation

Unit code	Unit title
AHCIRG502A	Design irrigation system maintenance and monitoring programs
AHCIRG503A	Design irrigation, drainage and water treatment systems
AHCIRG504A	Develop an irrigation and drainage management plan

### Machinery operation and maintenance

Unit code	Unit title
AHCMOM501A	Manage machinery and equipment

AHCMOM502A	Implement a machinery management system
------------	---

### Natural area restoration

Unit code	Unit title
AHCNAR506A	Develop and implement sustainable land use strategies

### Occupational health and safety

Unit code	Unit title
AHCOHS501A	Manage Occupational Health and Safety (OHS) processes

### Organic

Unit code	Unit title
AHCORG501A	Develop an organic management plan
AHCORG502A	Prepare the enterprise for organic certification

### Production horticulture

Unit code	Unit title
AHCPHT505A	Evaluate wine
AHCPHT506A	Manage a wine making process

### Water

Unit code	Unit title
AHCWAT502A	Manage water systems

### Work

Unit code	Unit title
AHCWRK501A	Plan, implement and review a quality assurance program

# AHC51610 Diploma of Irrigation Management

## Modification History

Release	TP Version	Comments
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

## Description

The Diploma of Irrigation Management reflects the role of an irrigation business manager.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry or by completion of the Irrigation Industry Agronomist Skill Set.

### Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Irrigation business manager

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

SRXGOV003B	Undertake the role of a Chairperson at a Board meeting
SRXGOV004B	Work effectively with the Board of an organisation
SRXINU004A	Promote compliance with laws and legal principles

# AHC60310 Advanced Diploma of Agribusiness Management

## Modification History

Release	TP Version	Comments
2	AHC10v4	Equivalent imported Units updated
1	AHC10	Initial release

## Description

This qualification reflects the roles of individuals working in a range of agribusinesses. The units covered in this qualification are uniquely contextualised for the agribusiness sector and reflect the need for agribusiness specific management expertise in planning and analysis, financial and human resource management together with an emphasis on sustainability.

This qualification is also suited to the needs of individuals who possess significant theoretical agribusiness skills and knowledge that they would like to further develop in order to create further educational or employment opportunities.

## Pathways Information

### Qualification pathways

#### Pathways into the qualification

This qualification may be accessed by direct entry.

### Job roles

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

Rural and regional agribusiness manager (including lending managers, insurance brokers, machinery dealers, chemical resellers, stock agents, grain marketers, real estate agents)

Agriculture enterprise business managers

Production horticulture enterprise business managers

## Licensing/Regulatory Information

Not Applicable

## Entry Requirements

### Entry requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

## AHCSS00014 Seed Crop Field Inspector Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v4	Initial release

### Description

Not applicable.

### Pathways Information

This Unit provides credit towards the Certificate IV in Agriculture.

### Licensing/Regulatory Information

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

### Skill Set Requirements

Units	AHCSDP405A Inspect a seed crop for quality assurance purposes
-------	---

### Target Group

Those working as field inspectors in commercial crop production industry.

### Suggested words for Statement of Attainment

This competency meets the industry requirements for field inspectors in commercial crop production industry.

## AHCSS00015 Carbon Farming Initiative Advisor Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

### Description

Not applicable.

### Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI503A	Advise on Carbon Farming Initiative project planning and implementation

### Target Group

Those whose work role includes the provision of technical, planning and implementation advice about the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative advisors.

## AHCSS00016 Carbon Farming Initiative Business Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

### Description

Not applicable.

### Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI505A	Aggregate Carbon Farming Initiative projects
FNSFMK512A	Apply knowledge of emissions markets

### Target Group

Those whose work role includes developing individual or aggregated carbon farming projects using approved methodologies under the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative business developers.

# AHCSS00017 Carbon Farming Initiative Livestock Project Implementer Skill Set

## Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

## Description

Not applicable.

## Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51110 Diploma of Conservation and Land Management
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI504A	Monitor and report on a Carbon Farming Initiative project
AHCCFI506A	Plan a Carbon Farming Initiative livestock project

## **Target Group**

Those whose work role includes managing the design, planning and implementation of approved livestock or feral animal methodologies developed under the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative livestock project implementers.

## AHCSS00018 Carbon Farming Initiative Waste and Manure Management Project Implementer Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

### Description

Not applicable.

### Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51110 Diploma of Conservation and Land Management
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI504A	Monitor and report on a Carbon Farming Initiative project
AHCCFI507A	Plan a Carbon Farming Initiative waste or manure management project

## **Target Group**

Those whose work role includes managing the design, planning and implementation of approved waste or manure management methodologies developed under the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative waste and manure management project implementers.

## AHCSS00019 Carbon Farming Initiative Soil or Biochar Project Implementer Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

### Description

Not applicable.

### Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51110 Diploma of Conservation and Land Management
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI504A	Monitor and report on a Carbon Farming Initiative project
AHCCFI508A	Plan a Carbon Farming Initiative to sequester carbon in soil or biochar

## **Target Group**

Those whose work role includes managing the design, planning and implementation of approved cropping and/or soil project methodologies developed under the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative soil or biochar project implementers.

## AHCSS00020 Carbon Farming Initiative Savannah Burning, Feral Animal, Rangelands Project Implementer Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

### Description

Not applicable.

### Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51110 Diploma of Conservation and Land Management
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI504A	Monitor and report on a Carbon Farming Initiative project
AHCCFI509A	Plan a Carbon Farming Initiative savannah burning, feral animal or rangelands project

## **Target Group**

Those whose work role includes the implementation of approved fire methodologies developed under the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative savannah burning, feral animal or rangelands project implementers.

# AHCSS00021 Carbon Farming Initiative Vegetation Project Implementer Skill Set

## Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

## Description

Not applicable.

## Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51110 Diploma of Conservation and Land Management
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI504A	Monitor and report on a Carbon Farming Initiative project
AHCCFI510A	Plan a Carbon Farming Initiative vegetation project

## **Target Group**

Those whose work role includes managing the design, planning and implementation of approved vegetation methodologies developed under the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative vegetation project implementers.

## AHCSS00022 Carbon Farming Initiative Emissions Avoidance from Soil and Crops Project Implementer Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

### Description

Not applicable.

### Pathways Information

These units provide credit towards the following qualifications:

- AHC50110 Diploma of Agriculture
- AHC51110 Diploma of Conservation and Land Management
- AHC51210 Diploma of Community Coordination and Facilitation
- AHC51410 Diploma of Agribusiness

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

Unit Code	Unit Title
AHCCFI501A	Provide technical advice on the Carbon Farming Initiative
AHCCFI502A	Assess the feasibility of a Carbon Farming Initiative project
AHCCFI504A	Monitor and report on a Carbon Farming Initiative project
AHCCFI511A	Plan a Carbon Farming Initiative project to avoid emissions from soil and crops

## **Target Group**

Those whose work role includes the implementation of approved fire methodologies developed under the Carbon Farming Initiative.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirement for Carbon Farming Initiative Emissions Avoidance from soil, burning crop residues or rice plants project implementers.

## AHCSS00023 Basic Introduction to Beekeeping Skill Set

### Modification History

Release	TP Version	Comments
1	AHC10v6	Initial release

### Description

Not applicable.

### Pathways Information

These units provide credit towards AHC32010 Certificate III in Beekeeping.

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

Unit Code	Unit Title
AHCBEK202A	Use a bee smoker
AHCBEK203A	Open and reassemble a beehive
AHCBEK204A	Construct and repair beehives
AHCBEK302A	Manipulate honey bee brood
AHCBEK306A	Manage pests and disease within a honey bee colony

### Target Group

Entry level or unqualified workers in the beekeeping industry and hobbyist beekeepers.

## **Suggested words for Statement of Attainment**

These competencies meet the industry requirements for the basic maintenance and monitoring of beehives.

## AHCAGB301A Keep records for a primary production business

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of keeping records for a primary production business and defines the standard required to: prepare and process basic financial transactions; reconcile and prepare invoices within primary production businesses; copy and file invoices and other related documents in accordance with organisational requirements for taxation and auditing purposes.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit requires a full range of well-developed skills where some discretion and judgement is required. The physical and financial records of the business are vital for use by management for planning purposes, meeting legislative requirements, and the efficient operation of the business on a daily basis.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and store physical records	<p>1.1. Physical records and inventories required for the organisation are determined in consultation with the management team.</p> <p>1.2. Methods for collecting information are reliable, and time and resources are used efficiently.</p> <p>1.3. Appropriate interpersonal skills are used to access relevant information from individuals and teams.</p> <p>1.4. Information is organised into a format suitable for analysis, interpretation and dissemination in accordance with organisational requirements.</p> <p>1.5. Business equipment/technology is used to maintain information in accordance with organisational and Occupational Health and Safety (OHS) requirements.</p> <p>1.6. Records are updated and stored in accordance with organisational requirements.</p>
2. Process petty cash transactions	<p>2.1. Petty cash claims and vouchers are checked for accuracy and authenticity prior to processing.</p> <p>2.2. Petty cash transactions are processed and recorded in accordance with organisational requirements.</p> <p>2.3. Petty cash book balanced in accordance with organisational requirements.</p>
3. Establish and maintain a cash book in accordance with organisational	<p>3.1. Cash receipts and payments book created, and documentation relating to financial transactions checked for validity prior to processing.</p> <p>3.2. Cashbook balances reconciled with bank and</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
requirements	<p>creditor statements.</p> <p>3.3.Cashbook balances are used to complete legislative reporting requirements.</p> <p>3.4.Cash flow statements are prepared on the basis of summarised cashbook entries.</p>
4. Reconcile invoices for payment to creditors	<p>4.1.Adjustments and errors are identified, reported and rectified in accordance with organisational requirements.</p> <p>4.2.Invoices processed and payment made in accordance with organisational requirements.</p>
5. Prepare invoices for debtor	<p>5.1.Invoices are prepared accurately and, if required, distributed to nominated person for verification prior to despatch.</p> <p>5.2.Adjustments are made as required in accordance with organisational requirements.</p> <p>5.3.Invoices and other related documents copied and filed in accordance with organisational requirements for taxation and auditing purposes.</p>

## AHCAGB401A Implement and monitor a property improvement plan

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the implementation and monitoring of a property improvement plan and defines the standard required to: consider the environmental impacts of property improvements; plan and implement the construction of physical resources; organise and schedule the maintenance of physical resources; and analyse and assess the costs and benefits of plans and layouts in the light of all considerations Occupational Health and Safety (OHS), financial, environmental and animal welfare; prepare plans and procedures for implementation by others.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to farm supervisors who implement and monitor a property improvement plan.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Agree on the improvement to be carried out	<p>1.1. Specific improvements for the planning period are discussed with the relevant people and agreements are made.</p> <p>1.2. Plans are made, and schedules amended, to construct and maintain the improvements in line with property management plans.</p> <p>1.3. Allocations are made from the available budget for the planned improvements.</p>
2. Arrange the design and layout of the property improvements	<p>2.1. Alternative plans and layouts are assessed and selected based on how appropriate they are for the management plan, and environmental and OHS considerations.</p> <p>2.2. Plans for the improvements are drawn and dimensions are calculated for the agreed improvements.</p>
3. Order materials for property improvements	<p>3.1. Materials required for the construction of the improvements are calculated from the drawn plans and discussed with relevant colleagues.</p> <p>3.2. Quotes are obtained from suppliers for the materials and suitable suppliers are selected.</p> <p>3.3. Orders are placed with the chosen suppliers for the quantities, sizes and types of materials required.</p>
4. Prepare sites for installation	<p>4.1. Sites are inspected, key features noted, and suitable sites are chosen for the planned property improvements.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2. All relevant people, including neighbours, are informed of the proposed activities where this is appropriate and/or necessary.</p> <p>4.3. Selected sites are measured and pegged according to the prepared plans.</p> <p>4.4. The site is prepared to be ready for construction, and precautions are taken to ensure that potential negative environmental impacts are minimised or eliminated.</p> <p>4.5. OHS hazards are identified and assessed, and responsible action taken throughout the site preparation activities.</p>
5. Supervise installation and operation of property improvements	<p>5.1. All materials required for each work period are obtained, organised, and on site ready for construction.</p> <p>5.2. Installation of property improvements is started according to the drawn plans and the prepared schedules.</p> <p>5.3. All installation works are undertaken in a manner that ensures that potential negative environmental impacts are minimised or eliminated.</p> <p>5.4. OHS hazards are identified and assessed, and responsible action taken throughout the installation works.</p> <p>5.5. Communication is maintained between those working at the site and others.</p> <p>5.6. The installation works are regularly checked to ensure consistency with the drawn plans, and environmental and OHS requirements.</p> <p>5.7. Any waste material or substances are disposed of in full consideration of environmental implications.</p> <p>5.8. Where corrective action is required, it is initiated and taken.</p>
6. Carry out and monitor planned maintenance	<p>6.1. Planned maintenance to the improvements is carried out and monitored according to the guidelines and standards of the property.</p> <p>6.2. Precautions are taken throughout the maintenance works to ensure that potential negative environmental impacts are minimised or eliminated.</p> <p>6.3. OHS hazards are identified, assessed, monitored and responsible action taken throughout the maintenance works.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- plan and implement the construction of physical resources
- organise and schedule the maintenance of physical resources
- analyse and assess the costs and benefits of plans and layouts in the light of all considerations - OHS, financial, environmental and animal welfare
- observe, identify and react appropriately to environmental implications and OHS hazards
- prepare written plans and procedures for implementation by others
- prepare drawn plans and sketches for implementation by, or notification of, others
- interpret, analyse and extract information from legal documents and discussions
- estimate and order the materials required for delivery at the appropriate time and place
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- constructing buildings, fences, and earthworks, such as stock yards, yard facilities, grain and fodder storage facilities, irrigation works, and water supply and drainage features
- requirements for grain and fodder storage
- tree planting techniques
- sustainable land and water use principles and practices applicable in the region
- environmental controls and codes of practice applicable to the business and to the improvement works
- the whole property plan
- legislation, regulations and codes of practice relating to soil and water degradation issues, animal health and welfare, chemical use, building construction and OHS.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• consider the environmental impacts of property improvements</li> <li>• plan and implement the construction of physical resources</li> <li>• organise and schedule the maintenance of physical resources</li> <li>• analyse and assess the costs and benefits of plans and layouts in the light of all considerations - OHS, financial, environmental and animal welfare</li> <li>• prepare plans and procedures for implementation by others.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Physical assets in property improvement plans may include:	<ul style="list-style-type: none"> <li>• buildings</li> <li>• dairy sheds</li> <li>• shelters</li> <li>• stock yards</li> <li>• stock handling structures</li> <li>• fences</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect and organise production data	<p>1.1.Information is collected and organised in a format suitable for analysis and interpretation in accordance with enterprise requirements.</p> <p>1.2.Information held by the production unit is assessed for accuracy and relevance in line with enterprise requirements.</p> <p>1.3.Methods of collecting data are reliable and make efficient use of resources in accordance with organisational requirements.</p> <p>1.4.Business equipment is used to access, organise and monitor data in accordance with organisational requirements.</p> <p>1.5.Information is updated, modified, maintained and stored in accordance with organisational requirements.</p>
2. Analyse and interpret data	<p>2.1.Objectives of analysis are clearly defined and consistent with enterprise requirements.</p> <p>2.2.Methods of data analysis are reliable and suitable to research purposes.</p> <p>2.3.Assumptions used in analyses are clear, justified and consistent with enterprise objectives.</p> <p>2.4.Conclusions are supported by evidence and contribute to the achievement of business objectives.</p>
3. Present data	<p>3.1.Data are prepared in an appropriate format, style and structure using suitable business technology.</p> <p>3.2.Structure and format of reports are clear and conform to enterprise requirements.</p> <p>3.3.Findings are reported and distributed in accordance with enterprise requirements.</p> <p>3.4.Feedback and comments on suitability and sufficiency of findings is obtained in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect and organise production data
- analyse and interpret data
- present data
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the relevant legislation, industry and enterprise codes of practice and quality assurance procedures that impact on intensive production
- knowledge of enterprise record keeping and recording practices
- knowledge of enterprise policies and procedures relating to collection, analysis and maintenance of production data
- methods to collect and analyse production data
- data management systems and methods
- business equipment
- principles of report writing and data presentation.

## Evidence Guide

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Survey climate and enterprise data	<p>1.1. Historical climate data is obtained and interpreted from a range of sources.</p> <p>1.2. Weather and climate risk factors are identified.</p> <p>1.3. Information on normal and significant climate events and their impact on natural and rural systems are collected.</p> <p>1.4. Current and historical property and enterprise situation is detailed according to enterprise guidelines.</p> <p>1.5. Short and long term enterprise goals are reviewed.</p> <p>1.6. Climate and enterprise data is sourced, presented and updated according to enterprise requirements.</p>
2. Climate risks and opportunities are identified and analysed	<p>2.1. Forecasted chances of seasonal climate are analysed.</p> <p>2.2. Climate risks and opportunities are identified.</p> <p>2.3. Impact on production of different weather and climate risk factors are determined according to enterprise requirements.</p> <p>2.4. Qualitative and quantitative risk and opportunity factors are identified and developed.</p> <p>2.5. Importance of climate variability and significant climate events is evaluated.</p> <p>2.6. Tactics to address a range of different climate variability risks and opportunities are outlined according to enterprise requirements.</p> <p>2.7. Contingency options for enterprises and the business are identified.</p>
3. Prepare climate risk	<p>3.1. Climate variability and seasonal climate forecasts are</p>

ELEMENT	PERFORMANCE CRITERIA
management strategies	<p>analysed.</p> <p>3.2. Insurance and other options are addressed in strategies.</p> <p>3.3. Major climate risk factors are addressed in strategies.</p> <p>3.4. Financial outcomes for all strategies are prepared according to enterprise guidelines.</p> <p>3.5. Impacts on the environment, property value and equity are predicted for the preferred strategies.</p> <p>3.6. Preferred production, enterprise or alternative strategies are reviewed, and options selected according to enterprise requirements.</p> <p>3.7. A planned strategy to cope with variable climate and climate risk management is presented in a format according to enterprise guidelines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research climate and enterprise data
- analyse and interpret climate and enterprise data
- prepare risk management strategies
- integrate climate risk, and opportunities and management strategies at a business management level
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- current forecasting techniques and phenomena, such as El Nino, ENSO, Southern

## REQUIRED SKILLS AND KNOWLEDGE

- Oscillation Index (SOI) and Pacific and Indian Ocean SST patterns
- the impact of weather and climate phenomena on rainfall, plant growth and yields
- causes of general patterns of weather and climate over Australia
- climate variability and climate change
- direct and indirect impacts of climate variability on land management and sustainability
- property and enterprise management decisions affected by the variable climate
- recognition of climate risks and opportunities
- seasonal climate forecasting systems and related indicators
- drought planning and strategies
- flood planning and strategies
- climate and weather issues pertaining to sustainable agriculture
- potential impacts of greenhouse warming on land and natural resource management
- strategic options and planning in response to climate variability for a range of seasons (normal, drier or wetter than normal), and other risks and opportunities
- calculating financial returns for different strategic options
- computer applications and Internet to access, record and analyse data
- principles of decision-making based on the variable climate and seasonal climate forecasts.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- research climate and enterprise data
- analyse and interpret climate and enterprise data
- prepare risk management strategies
- integrate climate risk and opportunities for

<b>EVIDENCE GUIDE</b>	
	management strategies at a business management level.
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Climate data may include:	<ul style="list-style-type: none"> <li>the statistics of temperature, humidity, atmospheric pressure, wind, rainfall, atmospheric particle count and numerous other meteorological elements in a given region over long periods of time.</li> </ul>
Risk management may include:	<ul style="list-style-type: none"> <li>the identification, assessment, and prioritisation of risks followed by coordinated and economical application of resources to minimise, monitor and control the probability and/or impact of events.</li> </ul>
Data may include:	<ul style="list-style-type: none"> <li>data from primary and secondary sources, including:               <ul style="list-style-type: none"> <li>field work and trials</li> <li>research materials</li> <li>published books</li> <li>academic reports</li> <li>industry reports</li> <li>colleagues</li> <li>computer software</li> <li>internet</li> <li>newspapers</li> <li>photographic data</li> <li>journals</li> <li>industry publications</li> <li>industry specialists and experts.</li> </ul> </li> </ul>

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers planning and managing infrastructure requirements and defines the standard required to: identify infrastructure requirements for the enterprise; source, construct and/or modify infrastructure to meet enterprise requirements; develop an infrastructure maintenance program, including scheduling and responsibilities; establish a recording system for infrastructure purchase, construction and maintenance.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to those whose job role involves planning and managing infrastructure requirements in agricultural or production horticultural enterprises.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine infrastructure requirements	<p>1.1.Information regarding the characteristics of the products and their respective market requirements is accessed.</p> <p>1.2.Characteristics of the land under production and the production processes to be used are confirmed from colleagues and other planning processes.</p> <p>1.3.Historical data, including recent data, from organisational records is identified and accessed for input to infrastructure planning processes.</p> <p>1.4.Information regarding other organisational planning processes and potential for improvements or innovations, is collected and used to inform the infrastructure planning process.</p> <p>1.5.Requirements of the organisation are taken into consideration during analysis.</p> <p>1.6.All available information is analysed, and the infrastructure required to efficiently achieve the targeted production requirements are identified and compared with those existing and available in the organisation.</p> <p>1.7.Occupational Health and Safety (OHS) hazards identified, risks assessed and suitable controls are incorporated into the planning process.</p> <p>1.8.Replacements, purchases and sales of plant and vehicles are planned and budgeted for according to organisational policies and procedures.</p> <p>1.9.Details regarding infrastructure requirements are used as input to other organisational planning</p>

ELEMENT	PERFORMANCE CRITERIA
	processes.
2. Obtain, prepare or build infrastructure	<p>2.1.Solutions to bridging the gaps between required and existing infrastructure are identified.</p> <p>2.2.Preferred solution to filling gaps in required infrastructure is determined from a cost benefit analysis.</p> <p>2.3.Negotiations are undertaken to obtain infrastructure or componentry at the best rate for the organisation.</p> <p>2.4.Preparation work required for existing infrastructure is organised and undertaken as necessary.</p> <p>2.5.Works required are planned and commissioned according to organisation requirements.</p> <p>2.6.All alterations to infrastructure or new developments give due consideration to environmental and waste management requirements.</p>
3. Manage infrastructure	<p>3.1.Infrastructure maintenance programs are determined including scheduling and responsibilities.</p> <p>3.2.Replacements, purchases and sales of plant and vehicles are undertaken according to plans made, and are in line with organisation policies and guidelines.</p> <p>3.3.Any reallocations of land required are undertaken with the planning and consultation required by the organisation, and within all relevant guidelines and regulations.</p> <p>3.4.Situations that require unplanned maintenance are managed within organisation guidelines and policy.</p> <p>3.5.Checks are made to ensure that program specifications are adhered to and amendments are made where necessary.</p> <p>3.6.Checks are made to ensure that all OHS requirements are adhered to, including the appropriate use of personal protective equipment.</p> <p>3.7.Checks are made to ensure that potential detrimental environmental impacts are minimised or eliminated.</p>
4. Record and manage information	<p>4.1.Data, observations and documentation recorded during the production cycle are analysed against the plan according to organisation guidelines.</p> <p>4.2.Recommendations for future plans are prepared based on the analysis of the data.</p> <p>4.3.A report is prepared that documents the plans implementation according to the organisations requirements and guidelines.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4. Records and documentation are created, maintained and kept as described in the infrastructure plan, the OHS requirements, and machinery and equipment management programs.</p> <p>4.5. Records and documentation are completed clearly and accurately throughout production in the organisation.</p> <p>4.6. The record keeping system that is used ensures that required information is available, accessible, meaningful and useful.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret monitored information on production processes
- interpret, analyse and extract information from a range sources such as professional literature, legal documents, discussions, and workshops
- identify, build and use network and support groups
- recognise potential opportunities to use or install more environmentally efficient systems or equipment
- assess, then adopt, profitable innovations
- planning
- calculating volumes areas and distances
- cost benefit analyses observe
- identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- sustainable land use principles and practices
- property planning, financial management and enterprise budgeting systems and procedures
- environmental controls and codes of practice available to the organisation
- relevant legislation and regulations relating to OHS, contractor engagement, chemical use and application, and vehicle and plant use
- sound management practices and processes to minimise noise odours and debris from production processes
- sustainable land use principles and practices applicable in the region
- relevant legislation and regulations relating to soil and water degradation issues, animal health and welfare, and chemical use.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify infrastructure requirements for the enterprise
- source, construct and/or modify infrastructure to meet enterprise requirements
- develop an infrastructure maintenance program including scheduling and responsibilities
- establish a recording system for infrastructure purchase, construction and maintenance.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Infrastructure may include:	<ul style="list-style-type: none"> <li>• buildings</li> <li>• sheds</li> <li>• shelters</li> <li>• stock yards</li> <li>• stock handling structures</li> <li>• fences</li> <li>• water supply systems</li> <li>• roads</li> <li>• tracks</li> <li>• soil conservation works</li> <li>• irrigation and drainage channels</li> <li>• silage pits, and/or grain and fodder storage</li> <li>• dams</li> <li>• monitoring systems</li> <li>• information technology systems.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine production process requirements	<p>1.1.Information regarding the characteristics of products being grown or refined/manufactured and their respective market requirements is accessed.</p> <p>1.2.Characteristics of the land under production and the quality and amount of existing infrastructure are confirmed from colleagues and other planning processes.</p> <p>1.3.Historical data, including recent data from organisational records is identified and accessed for input to production planning.</p> <p>1.4.Information regarding other organisational planning processes and potential for improvements or innovations is collected and used to inform production planning.</p> <p>1.5.Requirements of the organisation are taken into consideration during analysis.</p> <p>1.6.Production processes required to efficiently achieve the targeted production requirements in line with organisational policies are identified and compared with those that currently exist.</p> <p>1.7.Details regarding production planning are used as input to other organisational planning processes.</p>
2. Determine monitoring requirements and systems	<p>2.1.Production targets for each enterprise and each product, crop, herd, or flock are established from the range of organisational management and strategic plans.</p> <p>2.2.Scheduling for production processes is determined taking varying organisational factors into</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>consideration.</p> <p>2.3.Environmental and waste management controls are established and specifically included in the production plan.</p> <p>2.4.Monitoring points and performance indicators for the production process are established using target, environmental management and scheduling information.</p> <p>2.5.Prepared risk management strategies are put into place and acted upon when necessary.</p> <p>2.6.A plan is prepared that documents the decisions taken, the assessments made, the targets established, and any specific issues that relate to environmental and Occupational Health and Safety (OHS) risks.</p>
3. Monitor/evaluate effectiveness of production processes	<p>3.1.Checks are made to ensure that the performance indicators, targets, and specifications are being met and amendments to the process are made where necessary.</p> <p>3.2.The effectiveness of the production processes is evaluated at key points and adjustments are made as necessary.</p> <p>3.3.Environmental impacts and OHS hazards relating to production processes are identified, monitored and assessed throughout the production cycle.</p> <p>3.4.Modifications are made to the production process when made necessary by shifting priorities and results.</p> <p>3.5.Data, observations and documentation from the production process are analysed against the plan according to organisation guidelines.</p>
4. Record and manage information	<p>4.1.Recommendations for future plans are prepared based on the analysis of the data.</p> <p>4.2.A report is prepared that documents the plans implementation according to the organisations requirements and guidelines.</p> <p>4.3.Records and documentation are created, maintained and kept as described in the production plan, the OHS requirements, and machinery and equipment management programs.</p> <p>4.4.The recordkeeping system that is used ensures that required information is available, accessible, meaningful and useful.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret monitored information on production processes
- interpret, analyse and extract information from a range sources such as professional literature, legal documents, discussions and workshops
- identify, build and use network and support groups
- observe, identify and react appropriately to environmental implications and OHS hazards
- assess, then adopt profitable innovations
- set yield targets and objectives and estimate timelines
- prepare enterprise budgets and calculate financial returns
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- environmental controls and codes of practice available to the organisation
- relevant legislation and regulations relating to OHS, contractor engagement, chemical use and application, and vehicle and plant use
- sound management practices and processes to minimise noise, odours and debris from production processes
- sustainable land use principles and practices applicable in the region
- planning processes
- cost benefit analysis
- relevant legislation and regulations, such as those relating to soil and water degradation issues, animal health and welfare, and chemical use.

## AHCAGB504A Plan production for the whole land/farm based business

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers planning production for the whole land/farm based business and defines the standard required to review strategic plans and production goals; prepare enterprise budgets and calculate financial returns of the business; develop financial management and marketing plans for the business; review the natural resource base of the enterprise and incorporate ecological sustainability; principles and goals into land use planning; identify the personal aims and priorities of management as well as the availability, productivity and training needs of labour and incorporate into production planning.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to agribusiness managers whose role is to review and confirm the organisation's business goals and vision, its land-use, human resource development and financial plans.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Review and confirm the organisations business goals and vision	<p>1.1.The organisations documented business goals and vision are accessed and analysed against actual business activities and decisions taken.</p> <p>1.2.The values and community expectations of the organisation are reviewed and analysed against actual business activities and decisions taken.</p> <p>1.3.The organisations operating environment is reviewed to identify potential opportunities and threats.</p> <p>1.4.The overall strengths and weaknesses of the organisation are analysed to identify potential areas for development.</p> <p>1.5.Information on available innovations for potential use in the organisation is accessed and discussed with colleagues.</p> <p>1.6.The organisations goals and vision are articulated and documented to provide a basis for future planning and decision-making.</p>
2. Prepare human resource development plans	<p>2.1.Personal values, attributes and skills of the management team are identified and analysed.</p> <p>2.2.Specific areas of expertise in the business are</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>recognised and articulated.</p> <p>2.3. Specific areas of responsibilities are devolved to the most suitable team members based on identified skills and attributes.</p> <p>2.4. The processes for succession planning are discussed and decided with management team members and the process is put in place.</p> <p>2.5. Areas in which skill development and training is required for individual team members, or the entire group, are identified and recorded.</p> <p>2.6. A commitment is made to ongoing skill development of the management team.</p> <p>2.7. Ongoing communication strategies are put in place, and an environment in which all members can contribute is fostered and developed, to ensure the smooth running of the business.</p>
3. Prepare a plan to manage land use	<p>3.1. Land is surveyed to identify natural resources, soil characteristics, water resources, and cultural heritage values of the property.</p> <p>3.2. Land use capacities are determined from land condition tests and history of yields.</p> <p>3.3. Land use for individual paddocks is determined based on land use capacities, products being produced, and the organisations goals and vision.</p> <p>3.4. A plan to improve the management and use of land on the property is developed, based on property resources and the organisations goals and vision, and incorporated into the production plan.</p> <p>3.5. Organisational policy in relation to the environmental management of the land is developed based on land use, prevalent pests and diseases, and the organisations goals and vision.</p>
4. Plan production processes	<p>4.1. Information regarding the characteristics of the products being grown or refined/ manufactured and their respective market requirements is accessed.</p> <p>4.2. Characteristics of the land under production and the quality and amount of existing infrastructure are confirmed from colleagues and other planning processes.</p> <p>4.3. Historical data, including recent data, from organisational records is identified and accessed for input to production planning.</p> <p>4.4. Information regarding other organisational planning</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>processes and potential for improvements or innovations is collected and used to inform production planning.</p> <p>4.5. Requirements of the organisation are taken into consideration during analysis.</p> <p>4.6. Production processes required to efficiently achieve the targeted production requirements in line with organisational policies are identified and compared with those that currently exist.</p>
5. Develop financial goals and risk management strategies	<p>5.1. The key financial performance indicators of each enterprise in the business are identified from analysis of cash flow, profitability and net worth.</p> <p>5.2. The financial performance of each enterprise in the business is assessed through analysis of key financial performance indicators and their impacts on business performance.</p> <p>5.3. Financial goals for each enterprise in the business are identified from financial performance assessment and the organisations goals and vision.</p> <p>5.4. Areas of risk in the organisation are identified from analysis of the operating environment, production strategies, and skill and ability resources of the organisation.</p> <p>5.5. Risk management strategies are identified and put in place.</p>
6. Prepare and communicate the organisations vision, goals and plan	<p>6.1. The organisations goals and vision, human resource development, land-use, production and financial plans are integrated to reflect the decisions taken in each area.</p> <p>6.2. The organisations goals, vision and plans are clearly articulated to those that will implement them, to ensure a common understanding.</p> <p>6.3. A schedule is put in place to regularly review the organisations vision, goals and plans.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- assess the skills and expertise of self and colleagues
- facilitate group decision-making within the business
- identify, build and use network and support groups
- assess and evaluate land conditions
- recognise land and soil degradation
- determine land use appropriate to land conditions
- set yield targets and objectives and estimate timelines
- implement sustainable land management practices
- assess environmental impacts and implement impact reduction techniques
- interpret historical data in relation to production, finances, environmental issues, staffing and land use
- recognise potential opportunities to use or install more environmentally efficient systems or equipment
- assess, then adopt, profitable innovations
- interpret, analyse and extract information from a range of sources such as professional literature, legal documents, discussions and workshops
- assess financial strategies and prepare budgets
- prepare enterprise budgets and calculate financial returns
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- holistic business planning and benchmarking
- marketplace in which the organisation operates
- sustainable land use principles and practices
- soil nutrient cycling potential and limitations
- chemical and biological methods for pest control
- relevant State/Territory legislative requirements with regard to environmental protection and control standards
- property planning, financial management and enterprise budgeting systems and procedures
- relevant State/Territory legislation, regulations and codes of practice with regard to

## REQUIRED SKILLS AND KNOWLEDGE

- OHS and the use and control of hazardous substances
- monitoring strategies for financial, production, land-use, and human resource development plans
- methods for assessing skills and expertise
- the reasons and methods for succession planning
- the value and methods of risk assessment.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- review strategic plans and production goals
- prepare enterprise budgets and calculate financial returns of the business
- develop financial management and marketing plans for the business
- review the natural resource base of the enterprise and incorporate ecological sustainability
- principles and goals into land use planning
- identify the personal aims and priorities of management as well as the availability, productivity and training needs of labour and incorporate into production planning.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Production process may include:	<ul style="list-style-type: none"> <li>the resources, personnel, methodology and interactions between them.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine directions for the business	<p>1.1. Long-term directions and purposes of the business are established through identification and analysis of the values, expectations and personal goals of the people involved.</p> <p>1.2. Business and personal Strengths, Weaknesses, Opportunities and Threats (SWOT) are identified.</p> <p>1.3. Strategies to address the SWOT are developed consistent with the business vision.</p>
2. Audit the natural resources and infrastructure of the property	<p>2.1. Physical characteristics of the soil resource are identified and recorded.</p> <p>2.2. Soil map of property is drawn and land classes are recorded using classification terminology.</p> <p>2.3. Land capability is determined and land management options for each land class identified.</p> <p>2.4. Natural property features and infrastructure are shown on property map.</p> <p>2.5. Areas at risk of soil degradation are identified.</p> <p>2.6. Native vegetation is classified and condition is assessed.</p> <p>2.7. Endangered species are identified as appropriate.</p> <p>2.8. Other natural resource issues are identified as appropriate to the property.</p> <p>2.9. Infrastructure is marked to assist with maintenance and planning.</p>
3. Monitor legal requirements impacting on the	<p>3.1. Current knowledge of relevant Acts and regulations impacting on the property is maintained.</p> <p>3.2. Legal requirements are addressed through</p>

ELEMENT	PERFORMANCE CRITERIA
management of the property	management plans.
4. Develop management strategies to address natural resource management issues	4.1. Property improvement plans to assist natural resource management are developed, costed and prioritised. 4.2. Plans to repair land degradation are developed. 4.3. Strategies to address water supply and water management, vegetation and revegetation management, and wildlife management are prepared as appropriate to the property. 4.4. Strategies for weed and pest management are developed. 4.5. Plans to address fire risk/fire management are developed as appropriate.
5. Review whole farm plan	5.1. Plans are reviewed and revised to meet changing circumstances.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assessment of soil physical characteristics
- determine existing and required infrastructure requirements
- identification and determination of Natural Resource Management (NRM) requirements
- ability to determine landuse capability
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- SWOT analysis
- sustainable land management practices
- property planning processes and approaches
- land capability
- water, vegetation, soil, fire and wildlife management strategies
- legal requirements impacting on whole farm planning
- risk management.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- audit the natural resources of the property
- monitor legal requirements impacting on the management of the property
- develop management strategies to address the key natural resource management issues of water, soils, vegetation and wildlife
- develop management strategies to address natural resource management issues
- integrate business objectives and production plans with sustainable land management in a whole farm plan.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the processes of evaluating a product for export, developing an export market and implementing an export strategy and defines the standard to: research and analyse product knowledge; establish market potential; and develop the export market strategy.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the research and analyse markets and the determination of the capability of a business to meet the market requirements.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Evaluate export potential	<p>1.1. Competitive advantages and disadvantages for the proposed product are identified in respect to the products entry to overseas markets.</p> <p>1.2. Features of potential markets are analysed in respect to cultural factors, quality requirements, government regulations and other economic, political and social factors.</p> <p>1.3. Business resources are analysed for their appropriateness and capacity to contribute to the marketing effort.</p> <p>1.4. Available capital and time are identified for the development of the export plan.</p>
2. Develop export strategy	<p>2.1. Customer analysis is conducted and the market niche defined.</p> <p>2.2. Operational plan is developed to address the market mix.</p> <p>2.3. Budgets are prepared to address the investment required in the operational plan.</p> <p>2.4. Overseas visit is planned and conducted to confirm the target market and initiate negotiations.</p>
3. Implement export strategy	<p>3.1. Steps in an export transaction are identified and addressed.</p> <p>3.2. Documentation requirements for export is identified and prepared.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- evaluate export potential
- develop export strategy
- implement export strategy
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- sources of information in respect to export requirements
- requirements set out in standards, codes of practice, quality assurance (QA) processes and procedures
- marketing plan formats
- cash flow budgeting techniques
- sensitivity analysis and investment evaluation.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

<b>EVIDENCE GUIDE</b>	
	<p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• research and analyse product knowledge</li> <li>• establish market potential</li> <li>• develop the export market strategy.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Market for export includes:	<ul style="list-style-type: none"> <li>• agricultural products and services</li> <li>• horticultural products and services.</li> </ul>

## AHCAGB602A Manage estate planning

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of managing an estate and defines the standard required to: identify estate planning requirements; clarify estate planning arrangements; implement estate planning.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit relates to the process of managing and planning the succession and distribution of an estate within a family agricultural business context.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify estate planning requirements	1.1. Contingency and succession arrangements are identified and assessed against enterprise and individual requirements. 1.2. Income continuation options are identified and evaluated to find best fit for enterprise requirements. 1.3. Personal and business goals are identified and distinguished. 1.4. Needs of those affected by succession arrangements are considered and taken account of in estate planning.
2. Clarify estate planning arrangements	2.1. Plans for retirement and inheritance are made clear to all relevant parties. 2.2. Apparent inequities in estate distribution are discussed, clarified and mediated. 2.3. Legal implications of succession planning are accounted for in determining succession arrangements and estate distribution. 2.4. External advice is sought as required to clarify obligations and potential effects on business performance.
3. Implement estate planning	3.1. Strategies for estate distribution and succession are determined and implemented. 3.2. Estate structures and transfer arrangements are monitored and reviewed against tax and legislative requirements. 3.3. Estate planning and succession is monitored against enterprise performance. 3.4. Relevant documentation is completed to meet legal and procedural obligations, and to avoid legal complications.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- separate personal goals from enterprise goals
- behave ethically
- define agreements and contracts
- logically consider investment financial and retirement options
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- effective interpersonal communication techniques
- conflict resolution, negotiation and mediation techniques
- solve problems relating to estate management
- goal setting strategies
- working knowledge of estate structures, retirement options, wills and estate planning procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

<b>EVIDENCE GUIDE</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify estate planning requirements</li> <li>• clarify estate planning arrangements</li> <li>• implement estate planning.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Factors influencing planning may include:	<ul style="list-style-type: none"> <li>• the size and asset classes of the estate</li> <li>• the range of options for their allocation.</li> </ul>

## AHCAGB603A Manage the production system

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of managing the production system of an organisation and defines the standard to: align relevant production systems with the enterprise strategic plan; adjust production systems to meet the overarching sustainability requirements for the enterprise; adopt a systemised approach to the incorporation of productions systems into the business plan.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to integrating the production plans for each sector of the organisation with the strategic plan, developing risk management strategies, and analysing the organisations performance in terms of sustainability and profitability.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Integrate plans for different sectors of the enterprise	<p>1.1.Strategic, production, infrastructure and land management plans are examined to identify interactions between different sectors of the enterprise.</p> <p>1.2.Types of interactions and their impacts on resources and production system performance over time, are determined.</p> <p>1.3.Beneficial interactions are assessed and any potential additional benefits are identified for further improvements to the systems efficiency.</p> <p>1.4.Detrimental interactions are assessed and the production system is adjusted to minimise potential losses.</p> <p>1.5.Information on available innovations for potential use in the organisation is accessed and discussed with colleagues and integrated with operational plans.</p>
2. Develop and implement risk management strategies	<p>2.1.The business is analysed to identify its strengths and weaknesses as well as any threats to, or opportunities to improve, the organisations sustainability and/or profitability.</p> <p>2.2.Potential results of threats are considered in terms of natural resources, business assets and infrastructure.</p> <p>2.3.Preventative and reactive contingency plans are developed to minimise threats and maximise opportunities.</p> <p>2.4.Contingency plans aim to ensure business stability and profitability, while protecting and preserving natural resources and business assets.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Analyse the overall performance of the production system	3.1. Whole-business physical and financial analyses are undertaken to determine the long-term sustainability and profitability of the production system. 3.2. Results of analyses are prepared and discussed with colleagues for input to future planning processes.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- integrate plans for different enterprises into sustainable land management and production systems
- interpret historical data in relation to production, finances, environmental issues, staffing and land use
- recognise potential opportunities to use or install more environmentally efficient systems or equipment
- assess, then adopt profitable innovations
- assess financial strategies and prepare budgets
- prepare enterprise budgets and calculate financial returns
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- marketplace in which the organisation operates
- property planning, financial management and enterprise budgeting systems and procedures
- relevant State/Territory legislation, regulations and codes of practice with regard to OHS and the use and control of hazardous substances
- methods of measuring and implementing business and environmental sustainability

**REQUIRED SKILLS AND KNOWLEDGE**

- financial analysis tools and techniques for land based businesses
- sources of information to assist in analysis of operational plans, resourcing and financial analysis
- monitoring strategies for a range of operational plans
- the value and methods of risk assessment.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- align relevant production systems with the enterprise strategic plan.
- adjust production systems to meet the overarching sustainability requirements for the enterprise
- adopt a systemised approach to the incorporation of production systems into the business plan.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

**RANGE STATEMENT**

The production system may include:

- the product
- the production processes
- the infrastructure
- the land resource of each enterprise within the business as well as the interactions and relationships between them.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Analyse financial reports	<p>1.1.Taxation reports are correctly interpreted and accounts are determined to be true and fair.</p> <p>1.2.Management reports generated by the enterprise are reviewed and interpreted.</p> <p>1.3.Distribution of profit is determined.</p>
2. Use financial analysis tools	<p>2.1.Gross margins and relevant breakdowns of profit and loss are calculated.</p> <p>2.2.Ratios related to production activity, solvency and liquidity, gearing and profitability are calculated.</p> <p>2.3.Relevant performance benchmarks are sourced and compared to the enterprise.</p> <p>2.4.Trends in production and profitability are identified and analysed.</p>
3. Identify opportunities for increasing profit	<p>3.1.Yield/production potential is assessed and current position determined.</p> <p>3.2.Key issues related to production efficiency are identified.</p> <p>3.3.Key issues related to market return are identified.</p>
4. Develop strategies for improving business performance	<p>4.1.Strengths, Weaknesses, Opportunities and Threats (SWOT) approach is used to determine possible strategies for addressing production and marketing issues.</p> <p>4.2.Sensitivity analyses are performed to evaluate strategies.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analyse financial reports
- use financial analysis tools
- identify profit drivers for the enterprise
- develop strategies for improving business performance
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- financial reports
- financial analysis tools
- performance benchmarking
- issues related to production efficiency and marketing
- SWOT analysis and developing business strategies.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

<b>EVIDENCE GUIDE</b>	
	<p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• analyse financial reports</li> <li>• use financial analysis tools</li> <li>• identify profit drivers for the enterprise</li> <li>• benchmark business performance against other businesses</li> <li>• develop strategies for improving business performance.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assess the capital needs of the business	1.1. Working capital and capital requirements for development is determined. 1.2. Return on capital/opportunity cost of development capital determined.
2. Assess appropriate equity levels for the business	2.1. Risks associated with the business are assessed. 2.2. Personal and business risk preferences are identified. 2.3. Equity levels in comparable enterprises are analysed using benchmark data.
3. Establish and maintain appropriate financing arrangements for the business	3.1. Capacity to service debt/meet liabilities is determined. 3.2. Sources of funds are identified and terms and conditions compared and evaluated. 3.3. Negotiations are conducted to ensure the establishment of the most favourable terms and conditions. 3.4. Loan funds are sourced and agreements checked. 3.5. Costs of finance are monitored within defined budget limits. 3.6. Relationships with finance providers are managed. 3.7. The economic environment is monitored and implications for the business assessed.
4. Monitor and review the mix of liabilities	4.1. Regular reviews are conducted of the mix of liabilities and the costs and benefits associated with reconfiguring loans are determined. 4.2. Loans are reviewed and renegotiated as appropriate.
5. Monitor equity,	5.1. Review valuations on assets and monitor the effect

ELEMENT	PERFORMANCE CRITERIA
return on equity	<p>on equity.</p> <p>5.2&gt;Returns on assets and returns on equity are calculated and used to assist business performance.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assess capital needs
- assess appropriate equity levels for the business
- establish and maintain appropriate financing arrangements
- monitor and review the mix of liabilities
- monitor equity and return on equity
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- preparation of financial reports
- impacts resulting from changes to various macro economic factors
- sources of finance
- negotiation techniques
- concept of equity, ROA, ROE, IRR
- bank and lending institution policies and requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Conduct market research	1.1. Estimates of supply and demand are collated and evaluated. 1.2. Past trends are analysed and possible future scenarios assessed. 1.3. Own products are related to market indicators.
2. Determine price required	2.1. Cost of production is calculated and break-even price is determined. 2.2. Margins for profit and risk are determined. 2.3. Forward price objectives are set to meet cost of production plus profit required. 2.4. Personal attitude to risk is evaluated.
3. Develop sales plan	3.1. Cash markets are evaluated and projected price trends assessed. 3.2. Forward contract information is obtained and assessed. 3.3. Futures prices are obtained and assessed. 3.4. Options are evaluated against price objectives and the assessment of price movement risk. 3.5. Taxation and cash flow implications are assessed. 3.6. Appropriate mix of sale options is developed in a trading strategy. 3.7. Contingency plans are developed to address possible shifts in price trend.
4. Implement trading strategy	4.1. Appropriate expertise is sought as required. 4.2. Market information is monitored and trading strategy adjusted according to contingency plans.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- determine cost of production
- assess risk
- analyse trends and evaluate forecasts
- monitor and assess price movements
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- supply, demand and price relationships
- price trends and sources of market information/forecasts
- cost of production
- risk assessment and attitudes to risk
- selling options for the relevant commodity
- operation of futures markets, forward selling arrangements, put options
- foreign exchange rates
- contract law
- cash flow and taxation planning
- contingency planning.

## AHCAIS201A Assist with artificial insemination procedures

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of assisting with artificial insemination procedures and defines the standard required to: handle animals humanely and safely; prepare relevant materials and equipment; clean up work areas and equipment following insemination fertility; record details of artificial insemination.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working under supervision within enterprise guidelines. The artificial insemination procedure will generally be carried out by a registered veterinarian or licensed inseminator, but technical support needs to be provided.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assist with preparation of animals for insemination	<p>1.1. Animals on heat are detected and information recorded or reported to supervisors.</p> <p>1.2. Animals on heat are moved to the insemination area.</p> <p>1.3. Animals are restrained, where required, using safe and humane techniques to minimise stress and discomfort.</p> <p>1.4. Assistance is provided with the hygienic preparation of tools and equipment.</p> <p>1.5. Suitable personal protective equipment and clothing is selected, used and maintained according to Occupational Health and Safety (OHS) and enterprise requirements.</p>
2. Support insemination procedure	<p>2.1. All insemination equipment is sterilised and cleaned or disposed of according to industry code of practice.</p> <p>2.2. Intended recipient is correctly identified and readied.</p> <p>2.3. Intended recipient is restrained, where required, and prepared for insemination to optimise results according to recognised handling techniques that minimise stress.</p>
3. Clean work area and equipment	<p>3.1. Waste is disposed of according to recommended hygiene standards and environmental policy.</p> <p>3.2. Work area and equipment cleaned to industry standards and returned to operating order.</p> <p>3.3. Animals are safely returned to designated area according to enterprise requirements and instructions.</p> <p>3.4. Where used, restraints and harnesses are cleaned and returned to safe and operational order.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safety directions
- safely and humanely handle livestock
- sterilise equipment and prepare hygienic work site prior to insemination procedures
- identify and record animals on heat
- keenly observe animals and insemination processes
- employ safe work practices
- clean up worksite and safely dispose of waste
- communicate effectively with other team members, veterinarians and/or licensed inseminators
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- oestrus cycle and heat detection
- sterilisation procedures
- safe animal handling
- animal welfare requirements
- environmental impacts and procedures of working with animals
- record keeping systems.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare animals for collecting semen	<p>1.1.Suitable personal protective equipment and clothing is selected, used and maintained according to OHS and enterprise requirements.</p> <p>1.2.Appropriate equipment for collection is selected and prepared.</p> <p>1.3.Nominated sire is prepared and located at the appropriate semen collection area.</p> <p>1.4.Semen is collected from the nominated sire using industry approved collection techniques.</p> <p>1.5.Semen is transferred to the processing and storage area according to enterprise requirements and instructions.</p>
2. Complete collection procedures	<p>2.1.Post-collection procedures are carried out according to enterprise requirements.</p> <p>2.2.Waste is disposed of according to recommended hygiene standards.</p> <p>2.3.Work area and equipment are cleaned to industry standards and returned to operating order.</p> <p>2.4.Animals are safely returned to the designated area according to enterprise requirements and instructions.</p>
3. Document and record data	<p>3.1.Data on semen collection is accurate and recorded according to enterprise requirements.</p> <p>3.2.Information is supplied to relevant authorities to promote research and improvements in industry practice.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- sterilise equipment and prepare hygienic worksite prior to insemination procedures
- identify and record animals on heat
- employ safe work practices
- clean up work site and safely dispose of waste
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- animal health and abnormalities
- semen collecting and transfer techniques
- animal handling techniques and behavioural characteristics
- enterprise and industry identification system for animals
- personal protective equipment and when and how it should be used
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS and animal welfare
- enterprise and industry policies with regard to semen collection and recording and reporting routines.

## Evidence Guide

## AHCAIS302A Process and store semen

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of storing and processing semen collected from livestock for the purpose of artificial insemination and defines the standard required to: prepare diluent; maintain temperatures required for storing of diluent and processed semen doses; assess semen for quality parameters for livestock semen intended for use in artificial insemination procedures; ensure incubator is operational and prepare and label doses.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit is performed under limited supervision and with reference to established procedures. Some discretion and independent judgement is required.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare diluent	<p>1.1.Containers to be used for preparation of diluent are cleaned according to enterprise hygiene standards.</p> <p>1.2.Equipment and tools to be used in processing semen are calibrated according to manufacturers' specifications.</p> <p>1.3.Distilled water for use in diluent is heated to required temperature.</p> <p>1.4.Distilled water is added to powdered diluent in correct proportions.</p> <p>1.5.Diluent is correctly stored before use.</p>
2. Determine number of doses	<p>2.1.Concentration of the ejaculate is determined using spectrophotometer or other appropriate equipment.</p> <p>2.2.Number of doses is calculated according to the concentration determined. Number of doses is calculated according to the concentration determined.</p>
3. Assess quality of semen batch	<p>3.1.Semen batch is examined and checked for contamination.</p> <p>3.2.Motility of semen is assessed.</p> <p>3.3.Quality of semen batch is compared against enterprise benchmarks.</p> <p>3.4.Poor quality semen is discarded according to enterprise procedures.</p>
4. Ensure incubator is operational	<p>4.1.Temperature and other operational parameters of incubator are checked before use.</p> <p>4.2.Problems with incubator are reported to supervisor and/or resolved before proceeding.</p>

ELEMENT	PERFORMANCE CRITERIA
5. Prepare doses	5.1. Diluent is added to semen batch. 5.2. Diluted semen is divided into doses. 5.3. Each dose is labelled. 5.4. Doses are placed in incubator. 5.5. Quality of doses prepared is assessed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- operate incubator
- operate spectrophotometer
- calculate concentration and motility of semen batch
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- temperatures required for storing of diluent and processed semen doses
- quality parameters for livestock semen intended for use in artificial insemination procedures
- operation of incubator.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for insemination of animals	<p>1.1. Timing of insemination process is scheduled to ensure availability of resource and personnel requirements.</p> <p>1.2. Hygiene factors are identified and appropriate procedures followed.</p> <p>1.3. Semen supplies are accessed from appropriate and reliable sources and stored appropriately.</p> <p>1.4. Animals are prepared to maximise success of insemination program.</p> <p>1.5. Suitable personal protective equipment and clothing is selected, used and maintained according to Occupational Health and Safety (OHS) and enterprise requirements.</p>
2. Inseminate animals	<p>2.1. Semen is prepared according to accepted industry and enterprise practices.</p> <p>2.2. Insemination equipment is sterile and clean and applied according to industry code of practice.</p> <p>2.3. Intended recipient is correctly identified and observed, and checked for signs of ovulation.</p> <p>2.4. Intended recipient is restrained and prepared for insemination to optimise results according to recognised handling techniques that minimise stress.</p> <p>2.5. Insemination is carried out in sterile conditions and according to appropriate hygiene procedures.</p>
3. Document and record data	<p>3.1. Data on insemination process is accurate and recorded according to enterprise requirements.</p> <p>3.2. Historical data is reviewed to measure performance</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>of herd in insemination program.</p> <p>3.3. Conception rates are calculated and used to determine success of AI program.</p> <p>3.4. Information is supplied to relevant authorities to promote research and improvements in industry practice.</p> <p>3.5. Necessary modifications to herd program are identified and recorded to assist continuous improvement processes.</p>
4. Clean work area and equipment	<p>4.1. Waste is disposed of according to recommended hygiene standards and environmental policy.</p> <p>4.2. Work area is cleaned to industry standards and returned to operating order.</p> <p>4.3. Restraints and harnesses are cleaned and returned to safe and operational order.</p> <p>4.4. Animals are safely returned to designated area according to enterprise requirements and instructions.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and employ safe work practices
- store and thaw semen and check sire details
- sterilise equipment and prepare hygienic worksite prior to insemination procedures
- observe animals on heat to detect correct insemination timing
- accurately scan for ovulation
- carry out artificial insemination procedure
- maintain hygiene during the operation
- clean up work site and dispose of waste in an environmentally responsible manner
- monitor pregnancy rates to review effectiveness of operation
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as

**REQUIRED SKILLS AND KNOWLEDGE**

specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required

- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- working knowledge of enterprises herd improvement or animal production plan
- basic breeding principles, including the oestrus cycle and its significance
- pregnancy testing
- animal health and abnormalities
- preparation techniques such as puberty stimulation
- semen thawing and storage techniques
- preparation requirements for artificial insemination of animals
- animal movement and behavioural characteristics
- harness and restraint equipment, components and functions
- handling techniques, restraint methods and when to use them
- enterprise and industry identification system for animals
- personal protective equipment and when and how it should be used
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS and animal welfare
- legislative and regulatory controls with regard to artificial insemination
- enterprise and industry policies with regard to artificial insemination and recording and reporting routines.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include

# AHCAIS401A Supervise artificial breeding and/or embryo transfer programs

## Modification History

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	This unit covers supervising artificial breeding and/or embryo transfer programs and defines the standard required to: identify appropriate artificial breeding options; schedule and resource insemination and implantation strategies; match oestrus cycles, resource availability and timing of operations; manage the genetic material; transfer, identify and implement re-insemination and implantation; maximise conception rates; record all details of the program.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	This unit applies to artificial breeding technicians.
--------------------------------	---

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine breeding method	<p>1.1.Options for artificial breeding are reviewed to determine most suitable and affordable method according to breeding objectives.</p> <p>1.2.Artificial breeding option is selected and matched to resources and breeding objectives so as to meet the enterprise's livestock management program.</p> <p>1.3.Resource implications of breeding programs are identified, sourced and arranged.</p> <p>1.4.Program schedules are prepared according to available resources.</p> <p>1.5.Suitable Personal Protective Equipment (PPE) and clothing for breeding support staff and self according to Occupational Health and Safety (OHS) and enterprise requirements is made readily available.</p>
2. Implement breeding method	<p>2.1.Genetic material is obtained from reliable and legitimate sources.</p> <p>2.2.Genetic material is received, checked and stored according to industry codes of practice, and to ensure maximum viability and program outcomes.</p> <p>2.3.Where Artificial Insemination (AI) is the selected option, females are inseminated at the optimal stage of the oestrus cycle.</p> <p>2.4.Where Embryo Transfer (ET) is the selected option for artificial breeding, checks are carried out to ensure intended recipients are prepared and correctly scheduled for ET according to confirmed pregnancy status, oestrus cycle, animal health and program schedule.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Where ET is the selected option for artificial breeding, hormone injections are provided to intended recipients at appropriate stages of transfer programs to maximise fertilisation and conception.</p> <p>2.6. Where ET is the selected option for artificial breeding, transfers are conducted according to accepted industry practice.</p>
3. Monitor and maintain program	<p>3.1. Need for return to service of intended recipient is monitored through selected methods.</p> <p>3.2. Appropriate arrangements are made for the care of sick and injured animals.</p> <p>3.3. Adjustments in genetic material transfer practices are reviewed to enhance success of future programs.</p> <p>3.4. Data on genetic material transfer programs is documented and maintained according to enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- administer AI
- arrange for implantation of embryos by a veterinarian
- prepare stock for AI and embryo implantation
- determine AI and embryo implantation timing for livestock
- identify hazards and implement safe work practices
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- artificial breeding methods and benefits, and limitations of each method
- anatomy and physiology of the reproductive organs and reproductive process in livestock
- fertilisation and implantation methods
- physical resource requirements and how to safely handle and transport them
- ovulation stimulation and synchronisation
- semen collection and dilution processes
- semen thawing techniques
- knowledge of enterprise's breeding programs
- breeding principles
- pregnancy testing
- animal health and abnormalities
- preparation requirements for AI
- enterprise and industry identification system for livestock
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS and animal welfare
- legislative and regulatory controls with regard to AI and embryo implants
- enterprise and industry policies with regard to AI, and recording and reporting requirements
- identification of veterinary and non-veterinary procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify appropriate artificial breeding options

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• schedule and resource insemination and implantation strategies</li> <li>• match oestrus cycles, resource availability and timing of operations</li> <li>• manage the genetic material</li> <li>• transfer, identify and implement re-insemination and implantation</li> <li>• record and maximise conception rates</li> <li>• record all details of the program.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Artificial breeding programs may include:	<ul style="list-style-type: none"> <li>• the supervision of both AI and ET programs covering: <ul style="list-style-type: none"> <li>• mares</li> <li>• cows</li> <li>• ewes</li> <li>• sows</li> <li>• does.</li> </ul> </li> </ul>

## AHCARB201A Apply a range of treatments to trees

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the application of a range of treatments to trees and defines the standard required to: recognise a range of common causes and sources of stress to trees; prepare and properly maintain tools and equipment for treating common causes of stress to trees; apply common treatments to trees in a safe manner.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to a range of treatments conducted on trees to remedy common problems including alleviating tree stress.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to apply tree treatments	<p>1.1. Trees requiring treatments are located and the treatment determined according to work procedures.</p> <p>1.2. Occupational Health and Safety (OHS) hazards are identified, risks assessed and reported to the supervisor.</p> <p>1.3. Tools and equipment appropriate to the task being undertaken are prepared and used according to supervisor's instructions and enterprise guidelines.</p> <p>1.4. Personal Protective Equipment (PPE) is selected and used according to enterprise OHS requirements.</p>
2. Modify trees to alleviate stress	<p>2.1. All dead, fractured, poorly attached, dying and diseased wood is removed at the designated position according to Compartmentalisation of Decay in Trees (CODIT) principles.</p> <p>2.2. Competing branches are removed to allow adequate space for the natural form of the tree.</p> <p>2.3. Growth patterns are re-directed to avoid physical and structural damage to the tree.</p> <p>2.4. Removed plant material is disposed of according to enterprise guidelines and with due regard for environmental implications.</p>
3. Modify environment to maintain health and vigour of tree	<p>3.1. Competing plants are removed to ensure adequate space; light, water and nutrient requirements of the tree are maintained.</p> <p>3.2. Nutrient additives are applied to the soil at rates and designated location according to supervisor's instructions.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3. Soil structure is ameliorated according to supervisor's instructions.
4. Apply treatment	4.1. Application equipment is checked for volume calibration, adjusted and operated according to manufacturer's instructions and enterprise guidelines. 4.2. Treatments are applied following manufacturer's instructions, enterprise guidelines and in accordance with OHS requirements and with due regard for environmental implications. 4.3. Tools and equipment are cleaned or sterilised to avoid disease transfer according to Enterprise's Standard Operating Procedures (SOPs).

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- work using a variety of chemical application tools and pieces of equipment that are suitable for the particular application task while minimising environmental impact
- dispose of plant and equipment debris in an environmentally aware and sensitive manner, such as sorting plant and paper-based waste for recycling
- dispose of chemical substances and their containers in a way designed to minimise environmental impact
- interpret directions
- read labels
- record information
- communicate with fellow team members
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

- how trees react to drainage and stresses
- industry code of practice
- environmental considerations associated with the treatment program including use of chemical treatments and the environmentally safe disposal of plant, equipment and chemical debris
- principles and methods relating to identification of pests and disease
- factors affecting the timing and method of applying tree treatments
- different broad chemical types, for example, insecticides, herbicides and fungicides and the environmental implications of using these chemicals
- health, safety and environmental considerations when applying chemical treatments
- timing and placement of fertilisers and the need to minimise fertiliser use to limit environmental impact.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- recognise a range of common causes and sources of stress to trees
- prepare and properly maintain tools and equipment for treating common causes of stress to trees
- apply common treatments to trees in a safe manner.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trees may include:	<ul style="list-style-type: none"> <li>all species of trees and woody tree like vegetation forms.</li> </ul>
Treatments may include:	<ul style="list-style-type: none"> <li>all chemical, biological, and environmental treatments on trees.</li> </ul>

## AHCARB202A Fell small trees

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of small tree felling and defines the standard required to: prepare and properly maintain equipment; determine the tree felling conditions, direction of fall, safe fall zone, exclusion zone and escape route; use safe tree felling techniques; use safe tree removal techniques.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the process of small tree felling where hazards have been assessed as low risk.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify tree felling requirements	<p>1.1. Instructions for tree felling operations are received and clarified with supervisor prior to work being undertaken.</p> <p>1.2. Topography and site conditions are assessed and factors influencing the natural direction of fall are identified and confirmed with supervisor.</p> <p>1.3. Tree is visually assessed and factors influencing the tree felling operation are identified and confirmed with supervisor.</p> <p>1.4. Natural direction of fall, safe fall zone and exclusion zone are determined and confirmed with supervisor.</p> <p>1.5. Occupational Health and Safety (OHS) hazards associated with felling operation are identified, risks assessed and reported to the supervisor.</p>
2. Prepare for tree felling	<p>2.1. Felling equipment and component options that are appropriate to the task being undertaken are selected and prepared.</p> <p>2.2. Appropriate support tools are prepared, transported and placed to minimise felling delays.</p> <p>2.3. Suitable safety equipment and Personal Protective Equipment (PPE) are selected, checked, used, maintained and stored.</p> <p>2.4. Fall zone is cleared of obstacles and articles which may be damaged by felled tree.</p> <p>2.5. Clear escape route is established appropriate to the site and according to recognised guidelines.</p>
3. Fell tree	<p>3.1. Location of other personnel is noted and monitored.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.2. Standard tree felling techniques are determined by ground conditions and state of canopy. 3.3. Corrective action is taken in response to changing conditions or problems encountered. 3.4. Planned escape route is used when tree starts to fall. 3.5. Fall of tree and movement on ground are monitored until felled tree is stable. 3.6. Safe working practices are employed according to OHS requirements.
4. Complete tree felling operation	4.1. Appropriate method of clearing the site of felled tree is determined. 4.2. Machinery required for removal of felled tree is selected and used according to manufacturer's specifications and OHS requirements. 4.3. Fall site is cleared of tree and all tree debris.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret work procedures
- demonstrate safe working practices
- communicate orally and using hand signals with other personnel
- participate in teams and contribute to team objectives
- determine safe fall zones and exclusion zones
- measure distances
- monitor and maintain tree felling tools and equipment
- recognise structural defects, common diseases, pests, and nutrition deficiencies
- operate a chainsaw
- recognise caution or hazard signs and symbols
- interpret tasks or information from labels, manuals or written instructions
- record information accurately or verbally report information
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for

**REQUIRED SKILLS AND KNOWLEDGE**

clarification and seeking advice from supervisor

- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- basic operational and maintenance requirements of tree felling equipment
- safe working practices for chainsaw operation
- safety procedures and potential hazards for working safely in the amenity tree industry
- emergency and first aid procedures
- the effect of tree removal on the environment
- local government regulations that apply to tree removal where appropriate
- identification of services and other hazards that affect the performance of the unit
- principles and methods of inspecting trees to identify structural defects.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare and properly maintain equipment
- determine the tree felling conditions, direction of fall, safe fall zone, exclusion zone and escape route
- use safe tree felling techniques
- use safe tree removal techniques

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

**EVIDENCE GUIDE**

enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Trees may include:

- all species of trees and woody tree like vegetation forms.

**Unit Sector(s)****Unit sector**

Arboriculture

**Co-requisite units****Co-requisite units****Competency field****Competency field**

## AHCARB203A Perform above ground pruning

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of aerial pruning of ornamental trees and shrubs and defines the standard required to: carry out pre-operational and safety checks; identify and report site and tree hazards and implement risk controls for pruning; climb using documented safe work methods; perform pruning to AS4373 - 2007 Pruning of amenity trees; drop pruned material safely; record pruning activities.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the pruning of trees and shrubs in amenity horticulture in urban and regional areas.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for pruning operations	<p>1.1. Pruning instructions are obtained and confirmed from supervisor.</p> <p>1.2. Occupational Health and Safety (OHS) hazards are identified, risks assessed and reported to the supervisor.</p> <p>1.3. Tools and equipment are selected that are appropriate to the task being undertaken.</p> <p>1.4. Pre-operational and safety checks are carried out on pruning tools and equipment, according to manufacturer's specifications and work procedures.</p> <p>1.5. Personal Protective Equipment (PPE) required for above ground pruning is selected and used.</p>
2. Perform remedial and corrective pruning of trees	<p>2.1. Safety harness is fitted and adjusted according to manufacturer's guidelines and workplace safety requirements.</p> <p>2.2. Ascent to a given position for the pruning operation is achieved using communication and signage techniques according to enterprise requirements.</p> <p>2.3. Tools are used to perform remedial and corrective pruning operations according to supervisor's instructions.</p> <p>2.4. Pruning operations are carried out according to strict OHS requirements, and industry codes of practice and AS4373 - 2007 Pruning of amenity trees.</p> <p>2.5. Pruning material is dropped in a safe manner into designated drop zone and may include the use of ropes.</p> <p>2.6. Descent at the conclusion of the pruning operation is</p>

ELEMENT	PERFORMANCE CRITERIA
	completed in accordance with industry safe work standards.
3. Complete pruning operations	3.1. Tools and equipment are cleaned, maintained and stored according to manufacturer's specifications and enterprise Standard Operating Procedures (SOPs). 3.2. Pruned material is collected and disposed of and/or recycled in a manner that causes minimal damage to the environment. 3.3. Workplace records are maintained according to enterprise guidelines.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret directions and communicate with fellow team members
- calculate heights and safe working loads
- dispose of plant debris in an environmentally aware and sensitive manner
- minimise noise, dust, and high activity vehicle traffic to prevent nuisance-level environmental disturbance
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the procedures to be followed for safe use of controlled ascending and descending devices
- factors affecting the timing and method of tree or shrub pruning
- basic tree structure and growth patterns
- employees OHS responsibilities when carrying out above ground pruning
- the effect of adverse climatic conditions (e.g., rain, hail, wind or very high

**REQUIRED SKILLS AND KNOWLEDGE**

- temperatures), which may prevent or impede above ground pruning operations
- the relevant industry Code of Practice
  - AS4373 - 2007 Pruning of amenity trees.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out pre-operational and safety checks
- identify and report hazards, and implement risk controls for pruning
- climb using documented safe work methods
- perform remedial and corrective pruning to AS4373 - 2007 Pruning of amenity trees
- drop pruned material safely
- record pruning activities.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

## AHCARB204A Undertake standard climbing techniques

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of climbing small trees with ropes and harness for the purpose of pruning and defines the standard required to: carry out pre-operational and safety checks; identify and report site and tree hazards and implement risk controls; select, prepare and inspect ropes, harnesses and other equipment associated with climbing trees; safely climb/ascend and descend a tree with rope and harness; climb using documented low risk work methods; inspect for faults and store ropes, harnesses and other climbing and safety equipment and record and replace if worn or faulty.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the basic techniques used to climb trees in Arboriculture and applies to a climbing tree worker. This standard involves working under routine supervision with intermittent checking by supervisors or qualified arborists. Climbing techniques follow documented low risk work methods and procedures.
--------------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for climbing operations	<p>1.1.Climbing instructions and methods are determined according to enterprise Standard Operating Procedures (SOPs).</p> <p>1.2.Hazards associated with the climb are identified and reported to the supervisor.</p> <p>1.3.Climbing tools and equipment are selected, prepared and used according to supervisor's instructions and manufacturer's guidelines.</p>
2. Tie knots required for tree climbing operations	<p>2.1.Ropes specific to the task are selected and inspected for wear, damage and soundness.</p> <p>2.2.Industry recognised knots are used in accordance with the required application.</p> <p>2.3.All knots are checked on completion in accordance with established workplace practice.</p>
3. Climb trees in a low hazard work environment	<p>3.1.Personal Protective Equipment (PPE) and safety equipment is selected, maintained and used according to enterprise procedures.</p> <p>3.2.Climbing is undertaken using standard industry methods, enterprise SOPs and according to Occupational Health and Safety (OHS) requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and report risks
- select and prepare climbing tools and equipment
- select and inspect ropes
- use industry recognised knots
- climb trees and use ropes
- estimate tree heights and loads
- interpret supervisors directions and communicate with fellow team members
- minimise noise, dust, and high activity vehicle traffic to prevent nuisance-level environmental disturbance
- follow guidelines, instructions and supervision
- participate and contribute to team objectives
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- basic climbing principles and preparation procedures
- basic climbing techniques and planning
- safe working limit of ropes
- safe work practices relevant to tree climbing activities
- tree anatomy and physiology
- local government tree protection and preservation regulations
- AS4373-2007 Pruning of amenity trees
- relevant Code of Practice.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• carry out pre-operational and safety checks</li> <li>• identify and report site and tree hazards, and implement risk controls</li> <li>• select, prepare and inspect ropes, harnesses and other equipment associated with climbing trees</li> <li>• safely climb/ascend and descend a tree with rope and harness</li> <li>• climb using documented low risk work methods</li> <li>• inspect for faults and store ropes, harnesses and other climbing and safety equipment and record and replace if worn or faulty.</li> </ul>

## AHCARB205A Operate and maintain chainsaws

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of maintaining, preparing and operating hand-held chainsaws in a work environment and defines the standard required to: select, use, maintain and store suitable personal protective equipment; carry out routine checks and maintenance on chainsaw; apply appropriate chainsaw technique and cutting methods according to manufacturer's specifications and documented low risk work procedures; assess and minimise environmental impacts of chainsaw use; maintain records of chainsaw training and certification, risk assessment and use.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to cross-cutting fallen timber using safe cutting techniques.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Recognise and apply workplace safety procedures	<p>1.1. Occupational Health and Safety (OHS) procedures relevant to the maintenance and operation of chainsaws are recognised and applied.</p> <p>1.2. OHS hazards are identified, risks assessed and risk controls are implemented.</p> <p>1.3. Personal Protective Equipment (PPE) is selected and used.</p> <p>1.4. Relevant licensing and legislative requirements with regard to the operation of chainsaws are recognised, accessed and applied.</p>
2. Check and maintain chainsaw	<p>2.1. Tools and materials required for maintenance procedures are selected, checked and confirmed against maintenance plan.</p> <p>2.2. Routine checks and maintenance procedures are conducted prior to operation and according to manufacturer's specifications and maintenance plan.</p> <p>2.3. Chainsaw faults or malfunctions are identified, tagged and reported for repair according to manufacturer's specifications and enterprise requirements.</p> <p>2.4. Completed chainsaw maintenance procedures are detailed and recorded.</p>
3. Operate chainsaw	<p>3.1. Sawing materials are identified and positioned for operation according to documented low risk work procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. Cutting methods are determined appropriate to type of material and risk controls implemented.</p> <p>3.3. Chainsaw is operated according to manufacturer's specifications and operator's manual.</p> <p>3.4. Effective worksite communication is maintained to ensure efficient workflow and address immediate problems.</p> <p>3.5. Environmental implications associated with chainsaw operation are identified, assessed and controlled according to documented requirements.</p>
4. Complete and check chainsaw operation	<p>4.1. Chainsaw damage, malfunctions or irregular performance are recorded and reported according to enterprise requirements.</p> <p>4.2. Chainsaw is cleaned, maintained and stored according to manufacturer's specifications and enterprise requirements.</p> <p>4.3. Relevant reports are maintained to industry standards according to enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- maximise volume and quality of recovery
- demonstrate safe and environmentally responsible workplace practices
- obtain relevant licenses and permits
- read and interpret manufacturer's specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs).
- effectively communicate information, interpret and apply task instructions, and maintain records and reports
- estimate and measure dimensions, and calculate volumes
- recognise caution or hazard signs and symbols
- interpret tasks or information from labels, manuals or written instructions

## REQUIRED SKILLS AND KNOWLEDGE

- record information accurately or verbally report information
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

### Required knowledge

- relevant State/Territory legislation and regulations with regard to the operation of chainsaws
- OHS legislative requirements and Codes of Practice
- hazards and risks when using chainsaws
- operating principles and operating methods
- various types of chainsaws and respective functions
- effects of timber defects on recovery
- environment Codes of Practice with regard to chainsaw operation.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- select, use, maintain and store suitable personal protective equipment
- carry out routine checks and maintenance on chainsaw
- apply appropriate chainsaw technique and cutting

<b>EVIDENCE GUIDE</b>	
	<p>methods according to manufacturer's specifications and documented low risk work procedures</p> <ul style="list-style-type: none"> <li>• assess and minimise environmental impacts of chainsaw use</li> <li>• maintain records of chainsaw training and certification, risk assessment and use.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for stump removal operations	<p>1.1.Site location and details regarding the removal of stumps is collected and interpreted.</p> <p>1.2.All underground services are located according to supply authorities' guidelines.</p> <p>1.3.Tools and equipment are selected according to supervisor's instructions and manufacturer's guidelines.</p> <p>1.4.Site and work zone hazards are identified and recorded, risk level established, and controls checked against the safety plan or safe work method statement.</p> <p>1.5.Suitable Personal Protective Equipment (PPE) is selected, used and maintained such as safety glasses for eye protection.</p>
2. Undertake removal operations	<p>2.1.Pre-operational and safety checks are carried out on stump removing tools and equipment, according to documented guidelines.</p> <p>2.2.Tools and equipment appropriate to the task being undertaken are used according to documented Occupational Health and Safety (OHS) requirements and to manufacturer's specifications.</p> <p>2.3.Stump is removed to agreed depth and spread without damage to underground services and surrounding areas.</p> <p>2.4.Stump hole is back-filled and consolidated to original ground level according to enterprise policy.</p>
3. Complete stump	<p>3.1.Waste material is collected and disposed of and/or recycled in a manner that causes minimal damage to</p>

ELEMENT	PERFORMANCE CRITERIA
removal operation	<p>the environment.</p> <p>3.2. Tools and equipment are cleaned, maintained and stored according to manufacturer's specifications and enterprise guidelines.</p> <p>3.3. A clean and safe work area is maintained throughout and upon completion of work according to enterprise Standard Operating Procedures (SOPs).</p> <p>3.4. Relevant records are maintained according to enterprise guidelines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- conduct pre-operational and safety checks on machinery and equipment
- perform hazard identification and risk control procedures
- inspect the work area to determine method of removal using the risk controls
- select and safely use a range of stump removal machinery and equipment
- perform operational maintenance on stump removal machinery and equipment
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- manufacturer guidelines for operating stump grinding machinery
- environmental implications of removal activities including run off, drainage, salinity and soil erosion, and soil disturbance
- removal practices associated with different soil types
- the effect of adverse outdoor climatic conditions.

## Evidence Guide

## AHCARB207A Perform ground based rigging

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	<p>This unit of competency covers the process of rigging on the ground and defines the standard required to: select and examine ropes and equipment; select and use a rigging system as directed; assist with tree operations; use established methods of rigging and communicate effectively with work crew.</p>
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>This unit applies to work crew engaged in the process of ground based rigging and applies to the appropriate selection and use of rigging equipment and methods. Ground based rigging work requires the application of arboricultural knowledge and skills including different techniques of rigging to raise, lower, control or redirect a load in undertaking tree pruning and /or tree removal. Some discretion and judgement is required. Ground based rigging is likely to be performed under routine supervision with periodic checking by supervisors or qualified arborists and is usually done within established routines, using documented low risk work methods and procedures and according to stringent Occupational Health and Safety (OHS) guidelines. Interactive communications within the work crew are integral to the rigging process. Equipment is used and maintained in accordance with the manufacturer's specifications. Work practices are in accordance with relevant legislation and contract requirements. This unit does not cover crane operations.</p>

## Pre-Requisites

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assist in the preparation of the work site	1.1.Assistance is provided to confirm the location of worksite and location of the correct tree as per the scope of works. 1.2.Required site permits and licences are obtained. 1.3.Assistance is provided to a qualified arborist in the inspection of the tree for structural defects. 1.4.Site hazards are identified; risks assessed and reported to the supervisor or qualified arborist. 1.5.The work zone is confirmed with the work crew and is monitored. 1.6.Traffic management plans for the work site are implemented as instructed.

ELEMENT	PERFORMANCE CRITERIA
2. Prepare for rigging	2.1. Rigging method is discussed by the work crew and determined by supervisor or qualified arborist. 2.2. Rigging method confirms the risk controls selected in accordance with established and documented low risk work methods. 2.3. Appropriate rigging equipment is selected as directed. 2.4. Rigging equipment is examined, assembled, installed and checked for equipment defects.
3. Perform rigging operations	3.1. Communication with the person cutting is commenced, instructions are received and appropriate responses are provided. 3.2. Appropriate knots are selected and tied as required. 3.3. Rigging system and environmental conditions are monitored. 3.4. Rigging is adjusted as instructed. 3.5. Load is controlled and raised, lowered or re-directed as instructed. 3.6. Load is disconnected from the rigging system and rigging equipment is checked. 3.7. The appropriate component of the rigging system is returned to the person cutting.
4. Complete rigging operations	4.1. The load is removed from the drop zone. 4.2. Rigging operations are completed as per scope of works. 4.3. Tools, equipment and machinery are cleaned, checked, and replaced if faulty or worn, and stored.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- technical skills sufficient to:
  - identify, use and maintain rigging equipment and devices on the ground
  - examine equipment before and during use and identify problems, defects and

**REQUIRED SKILLS AND KNOWLEDGE**

- faults
- select rigging equipment as directed
  - assemble a range of rigging equipment
  - safely operate and maintain rigging equipment
  - carry out rigging operations appropriate to site conditions
  - identify unsafe rigging practices
  - understand equipment terminology and names
  - select and tie essential knots required for rigging
  - operate lowering devices as required
  - practice rescue techniques
  - store and maintain rigging equipment
  - install a rope in a tree.
  - communication skills sufficient to:
    - use and respond to appropriate communication and interpersonal techniques and methods with colleagues and others; and,
    - use voice, hand and whistle signals with other operators to maintain effective and low risk rigging operations
    - report information about problems, defects and faults.
  - literacy skills sufficient to:
    - accurately locate and report information;
    - interpret written text material; and,
    - interpret, apply and convey information in written, diagrammatic and/or verbal form.
  - spatial skills sufficient to:
    - estimate distances and dimensions of trees and equipment
    - estimate the centre of gravity for balancing a load
    - estimate areas for safe work zones.
  - numeracy skills to:
    - understand and recognise numerical terms of equipment breaking strains, safe working loads, manufacturer's specifications and labeling
    - use basic geometry to measure distances and dimensions
  - problem solving skills sufficient to:
    - identify work requirements;
    - identifying any faults in tools, equipment or materials
    - recognise own limitations in identifying problems in conditions and trees for rigging
    - demonstrate appropriate response procedures following identification of problems; and, provide alternative rigging solutions
    - apply low risk work practices including the use of personal and protective

## REQUIRED SKILLS AND KNOWLEDGE

- equipment and control of hazards
  - identify hazards, assess risk and report to supervisor.
- teamwork skills sufficient to:
  - use communications to complete complex tasks efficiently and safely
  - coordinate own work with others to action tasks;
  - to relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- the ability to comply with legislation, regulations, standards, codes of practice and established safe practices and procedures for rigging.

### Required knowledge

- organisational and site standards, requirements, policies and procedures for rigging
- types and purposes of a range of rigging equipment and devices
- the use, operation and maintenance of rigging equipment in accordance with the manufacturer's specifications and recommendations
- common problems with rigging and their potential consequences and solutions
- established communication and management channels and protocols
- the recognition of structural defects in trees
- methods of using and operational principles and limitations of friction devices
- procedures for recording and reporting workplace information
- appropriate mathematical procedures for estimating and measuring
- common rigging hazards
- basic physics for load distribution, gravity, heat, potential and kinetic energy, mass, force and leverage
- basic knowledge and understanding of applicable standards and Code of Practice relevant to the full range of processes for rigging
- environmental protection requirements
- basic anatomy, physiology and nomenclature of trees
- safe working load of rigging equipment
- awareness of breaking strength, safety factor and cycles to failure
- signals and communication systems
- first aid and rescue procedures
- use of personal protection equipment.

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• select and examine ropes and equipment;</li> <li>• select and use a rigging system as directed;</li> <li>• assist with tree operations;</li> <li>• use established methods of rigging</li> <li>• communicate effectively with work crew.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some work sites may differ due to the regional or enterprise circumstances. There is an industry expectation for refresher training and assessment.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Tree may include:	<ul style="list-style-type: none"> <li>• the range of tree species that are: <ul style="list-style-type: none"> <li>• hardwood</li> <li>• softwood</li> <li>• palms and palm-like</li> </ul> </li> <li>• trees that are: <ul style="list-style-type: none"> <li>• alive</li> <li>• dead</li> <li>• single or multi-stemmed</li> <li>• leaning or straight.</li> </ul> </li> </ul>
Structural defects may include:	<ul style="list-style-type: none"> <li>• cracks</li> <li>• splits</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• cavities</li> <li>• decay and inclusions.</li> </ul>
Site hazards may include:	<ul style="list-style-type: none"> <li>• aspects of terrain such as:               <ul style="list-style-type: none"> <li>• ground slope</li> <li>• uneven/unstable surfaces</li> <li>• high risk trees and tree parts</li> <li>• tree species characteristics</li> <li>• lean of tree</li> <li>• canopy attributes</li> <li>• overhead and underground services</li> <li>• adjacent objects such as infrastructure</li> <li>• existing vegetation such as ground vegetation density</li> </ul> </li> <li>• excavations</li> <li>• traffic</li> <li>• hazardous materials</li> <li>• fires</li> <li>• insects and animals</li> <li>• other personnel and machinery.</li> </ul>
Work zone may include:	<ul style="list-style-type: none"> <li>• the exclusion zone</li> <li>• safe drop zone</li> <li>• safe fall zone</li> <li>• traffic management zone</li> <li>• asset management zone area under the load</li> <li>• the area that the load is directed to.</li> </ul>
Traffic may include:	<ul style="list-style-type: none"> <li>• pedestrian</li> <li>• vehicle.</li> </ul>
Rigging method may include:	<ul style="list-style-type: none"> <li>• simple rope</li> <li>• taut line</li> <li>• speed line</li> <li>• tag-pull line</li> <li>• lowering</li> <li>• raising</li> <li>• cradling</li> <li>• tip or butt lowering</li> <li>• false crotch.</li> </ul>
Rigging equipment may include:	<ul style="list-style-type: none"> <li>• ropes, including aspects of rope such as:               <ul style="list-style-type: none"> <li>• materials</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• construction</li> <li>• diameter</li> <li>• limits</li> <li>• terminations</li> <li>• karabiners</li> <li>• pulleys</li> <li>• slings</li> <li>• shackles</li> <li>• rapids.</li> <li>• Slings may be:               <ul style="list-style-type: none"> <li>• spliced, sewn or swaged; and may be adjustable, continuous or fixed length.</li> </ul> </li> <li>• Slinging configurations could include choke or basket.</li> </ul>
Equipment defects may include:	<ul style="list-style-type: none"> <li>• signs of wear, melting, burning, stretching, cracking, incompatibility, overload failure, or equipment that is cut, bent, broken or faulty.</li> </ul>
Communication may include:	<ul style="list-style-type: none"> <li>• voice communications</li> <li>• whistles</li> <li>• hand signals.</li> </ul>
Knots may include:	<ul style="list-style-type: none"> <li>• bowline</li> <li>• running bowline</li> <li>• bowline on a bight</li> <li>• blood knot</li> <li>• tautline</li> <li>• sheet bend</li> <li>• Prussik</li> <li>• figure 8</li> <li>• friction</li> <li>• alpine</li> <li>• timber hitch</li> <li>• clove hitch</li> <li>• half hitch.</li> </ul>
Rigging system includes:	<ul style="list-style-type: none"> <li>• the assembly of all the component parts of rigging equipment. This may include mechanical advantage and friction from tree or friction devices or other fixed objects.</li> </ul>
Environmental conditions may include:	<ul style="list-style-type: none"> <li>• the range of variations in weather such as wind speed and direction.</li> </ul>

<b>RANGE STATEMENT</b>	
Load may include:	<ul style="list-style-type: none"> <li>• tree</li> <li>• tree parts</li> <li>• rigging equipment</li> <li>• tools.</li> </ul>
Disconnected may include:	<ul style="list-style-type: none"> <li>• the method of removing the rigging such as un-clipped, untied, unscrewed, unshackled or un-hitched.</li> </ul>

## AHCARB301A Implement a tree maintenance program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the work undertaken to implement a tree maintenance program and describes the standard to: determine the annual maintenance requirements for trees; prepare a comprehensive tree maintenance program; apply a range of tree maintenance techniques; monitor and review the maintenance program over the course of a season.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the application of extensive arboricultural knowledge and a broad range of arboricultural skills.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Contribute to a tree assessment	<p>1.1.Site assessment is undertaken to identify conditions which may impact upon the health and vigour of the tree.</p> <p>1.2. Stress inducing factors are identified according to published characteristics of the species.</p> <p>1.3.Specimens of stressed material are collected to enable diagnosis of stress according to enterprise guidelines.</p> <p>1.4.Environmental issues that could affect the health and vigour of the tree are assessed for impact on growth according to published data and species characteristics.</p> <p>1.5.Information relating to the tree assessment is recorded and reported according to enterprise guidelines.</p>
2. Prepare to undertake a treatment program	<p>2.1.Treatment program is interpreted and confirmed with management.</p> <p>2.2.Occupational Health and Safety (OHS) hazards are identified, risk assessed and suitable controls implemented.</p> <p>2.3.Suitable Personal Protective Equipment (PPE) is selected, used and maintained.</p> <p>2.4.Treatment methods and equipment are selected according to published data and enterprise guidelines.</p> <p>2.5.Environmental implications of undertaking the treatment program are identified, likely outcomes assessed and, if necessary, responsible action taken.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Undertake a treatment program	<p>3.1. Equipment is prepared and used according to enterprise guidelines, OHS requirements and with due regard for environmental implications.</p> <p>3.2. Physical and/or chemical treatments are undertaken according to treatment program specifications, OHS requirements, and with due regard for environmental implications.</p> <p>3.3. Growing environment is maintained according to the needs of the species.</p>
4. Complete treatment program activities	<p>4.1. Infected plant material is disposed of according to enterprise hygiene guidelines.</p> <p>4.2. Equipment is sterilised in accordance with enterprise hygiene guidelines.</p> <p>4.3. Physical and/or chemical treatments are followed up according to treatment program specifications and/or manufacturers recommendation.</p> <p>4.4. Timetables for follow up treatments are determined and communicated as per enterprise guidelines.</p> <p>4.5. Records are maintained in accordance with enterprise guidelines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- work using a variety of chemical application tools and pieces of equipment that are suitable for the task, while minimising environmental impact
- dispose of plant and equipment debris in an environmentally aware and sensitive manner, such as sorting plant and paper-based waste for recycling
- dispose of chemical substances and their containers to minimise environmental impact
- calibrate chemical application equipment
- measure quantities, area and distance and time
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks

## REQUIRED SKILLS AND KNOWLEDGE

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- the environmental implications of implementing a tree maintenance program in a range of locations such as urban, rural - farming, rural - native vegetation, seaside, and water catchment area
- AS1742 Pt 3 1985 - Australian Standard Code of Practice, Work Site Traffic Management
- industry code of practice
- identification and evaluation of structural defects in trees
- the principles of identifying pests, diseases and physiological damage to trees
- methods of attack of tree pests and diseases
- methods of analysing the nutritional status of trees
- statutory requirements relating to the use of pesticides and herbicides and the environmental implications of using chemicals
- recognition and identification of a range of tree species
- treatments and treatment methods commonly used with trees
- methods of collecting and storing specimens for identification and diagnostic tests
- methods of recording, storing and processing data.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• determine the annual maintenance requirements for trees</li> <li>• prepare a comprehensive tree maintenance program</li> <li>• apply a range of tree maintenance techniques</li> <li>• monitor and review the maintenance program over the course of a season.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
The variables for this unit may include:	<ul style="list-style-type: none"> <li>• trees in amenity and urban environments.</li> </ul>
Treatment methods may include:	<ul style="list-style-type: none"> <li>• pruning</li> <li>• repair of damaged material</li> <li>• application of pesticides</li> <li>• application of fertilizers</li> <li>• treatment of soil</li> <li>• reducing compaction/improving aeration and drainage.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare tree inspection requirements	<p>1.1.Scope of inspection is identified in line with client-stakeholder needs and local regulations.</p> <p>1.2.All requirements for inspection are identified and prepared.</p> <p>1.3.Methods and forms for recording inspection are planned and available for use.</p> <p>1.4.Equipment for tree inspection and personal protection is checked, appropriate for the tree and site conditions and prepared for use.</p> <p>1.5.Traffic management requirements are documented and implemented where required.</p> <p>1.6.Environmental conditions are evaluated in relation to relevant legislation and/or regulations.</p>
2. Inspect the tree	<p>2.1.Site specific hazards are documented in appropriate risk control forms.</p> <p>2.2.Trees are inspected to determine the type, location, condition and hazard status.</p> <p>2.3.Trees are visually inspected for structural damage, defects, signs of disease and fauna.</p> <p>2.4.Branches are examined for vitality and integrity of attachment.</p> <p>2.5.Tree hazards identified and recorded in the inspection form.</p> <p>2.6.Scope of work is determined.</p> <p>2.7.Methods of work are selected and tests may be</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>conducted to confirm selections.</p> <p>2.8.Method of treatment of risk is selected and controls applied.</p> <p>2.9.Toolbox meeting record confirms work team agreement and understanding of the work methods selected.</p>
3. Record findings and advise client	<p>3.1.Site details, site and tree hazards, and risk controls are recorded in the inspection form.</p> <p>3.2.Trees identified as hazardous are recorded.</p> <p>3.3.Appropriate remedial action is recommended.</p> <p>3.4.Forms for recording inspection are completed and client-stakeholder is advised.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify a range of tree species and cultivars common to the region
- recognise tree problems and defects
- perform hazard identification and risk control assessment
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- recognition of a wide range of trees common to the region
- signs of structural defects, decay, damage and stress in trees
- botany and tree physiology
- methods of low risk work
- methods of determining tree dimensions

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
--------------------------------------

- |   |
|---|
| <ul style="list-style-type: none"> <li>• local government tree protection and preservation regulations</li> <li>• AS4373-2007 Pruning of amenity trees</li> <li>• relevant Code of Practice.</li> </ul> |

## AHCARB303A Implement a tree pruning program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of implementing a tree pruning program and defines the standard required to conduct tree inspections, implement pruning to AS4373-2007 pruning of amenity trees as required, assess and rectify pruning quality and record work activities.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to an arborists engaged in implementing a tree pruning program.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare for tree pruning</p>	<p>1.1. Trees are visually inspected and all branches to be removed are identified according to the pruning requirements of the program.</p> <p>1.2. Removal stages are nominated to ensure the program is undertaken without unnecessary damage to the trees.</p> <p>1.3. Occupational Health and Safety (OHS) hazards are identified, risks assessed and suitable controls implemented.</p> <p>1.4. Pruning tools and equipment are selected and prepared according to the extent of the pruning program.</p> <p>1.5. Climbing equipment and machinery is selected, checked for damage or imperfections and prepared according to documented low risk work procedures and manufacturers specifications.</p> <p>1.6. Identification and establishment of work exclusion zone is implemented.</p>
<p>2. Implement tree pruning</p>	<p>2.1. Climbing equipment and machinery is operated according to documented low risk work procedures and manufacturers' specifications.</p> <p>2.2. Pruning cuts are implemented according to established pruning techniques and AS4373 Pruning of Amenity Trees as required.</p> <p>2.3. Program is implemented in such a way that no damage occurs to equipment, property or personnel.</p> <p>2.4. Site environmental concerns are adhered to in accordance with relevant legislation and/or regulations.</p> <p>2.5. Waste material is mechanically processed according to documented guidelines and manufacturers'</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>specifications.</p> <p>2.6. Site is cleared and cleaned according to documented guidelines.</p>
3. Assess pruning quality	<p>3.1. Trees selected for the pruning program are visually checked to ensure that the appropriate trees have been pruned to specifications.</p> <p>3.2. Stub length and pruned height are checked to ensure that they meet the pruning requirements of the program and AS4373 Pruning of amenity trees.</p> <p>3.3. Any incorrect pruning is rectified to ensure the tree is able to sustain its growth, natural habit and form.</p> <p>3.4. Completed program of pruning is recorded and communicated to management and/or the client.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- recognise common diseases, pests and nutrition deficiencies in trees
- select and inspect appropriate equipment
- operate chainsaws and pole saws
- sharpen and maintain tools required for pruning
- implement pruning techniques to AS4373 Pruning of amenity trees
- conduct operations in such a way that no damage occurs to equipment, property, environment, trees or personnel
- aerial rescue techniques
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- identification of tree species and their pruning requirements
- tree pruning techniques appropriate to the pruning requirements of the species
- principles and methods of pruning
- effect of pruning on tree growth and habit
- tree morphology and physiology
- Compartmentalisation of Decay in Trees (CODIT) principles
- implications of pruning cuts and the way trees respond
- climbing or elevated work platform operations
- capability of lifting and lowering equipment
- awareness of powerline clearances
- chainsaw and polesaw techniques
- relevant legislation that may impact on a tree pruning program
- local government tree protection and preservation regulations
- AS4373-2007 Pruning of amenity trees
- relevant Code of Practice.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- conduct tree inspections
- implement pruning to AS4373-2007 Pruning of amenity trees
- assess and rectify pruning quality
- record work activities in enterprise forms.

#### Context of and specific resources for

Competency requires the application of work practices

**EVIDENCE GUIDE**

<b>assessment</b>	under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
-------------------	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Pruning techniques may include:	<ul style="list-style-type: none"> <li>• cleaning out</li> <li>• crown lifting</li> <li>• crown reduction</li> <li>• structural integrity</li> <li>• crown renewal</li> <li>• crown thinning</li> <li>• dead wooding</li> <li>• hedging</li> <li>• branch</li> <li>• epicormic and green shoot removal.</li> </ul>
Programs activities may include:	<ul style="list-style-type: none"> <li>• site inspection details</li> <li>• special instructions and/or conditions</li> <li>• OHS risks and controls</li> <li>• environmental considerations</li> <li>• pruning methods and techniques</li> <li>• tools, equipment and machinery requirements</li> <li>• access and exit details</li> <li>• personnel requirements</li> <li>• waste, organic waste and debris disposal</li> <li>• recycling and re-use opportunities.</li> </ul>

## AHCARB304A Fell trees with advanced techniques

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of felling trees with advanced techniques and defines the standard required to: conduct a site and tree hazard identification and risk control assessment; prepare materials and equipment to specifications; set up safe fall and exclusion zones; use low risk dismantling procedures to fell a tree; fell wind thrown and suspended trees; use documented low risk work procedures and record worksite activities according to documented guidelines.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the process of removal of trees of substantial height, of complex nature or in complex situations in an urban environment.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for tree removal	<p>1.1. Trees are assessed for size, structural defects, weight distribution, spread/width, wind loading and canopy.</p> <p>1.2. The fall site is assessed considering wind speed and direction, topography, safe fall zone, exclusion zone, any potential danger to the public or property, and environmental implications.</p> <p>1.3. Tools, equipment and machinery are selected according to appropriate removal methods.</p> <p>1.4. Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise guidelines.</p> <p>1.5. OHS hazards are identified, risks assessed and risk controls are implemented.</p> <p>1.6. Risk controls selected determine work method to cut and drop, or use rigging techniques.</p> <p>1.7. Suitable safety equipment and Personal Protective Equipment (PPE) is selected, used and maintained.</p>
2. Coordinate site preparation	<p>2.1. A safe fall zone and exclusion zone are determined considering tree characteristics, degree of lean of tree, and site, environmental, and safety assessments.</p> <p>2.2. A planned escape route, noting debris and other potential hazards is determined.</p> <p>2.3. Fall zone and escape route are cleared and surrounding features/structures are protected from damage.</p> <p>2.4. Exclusion zone is identified, appropriate safety barriers erected and safety procedures implemented</p>

ELEMENT	PERFORMANCE CRITERIA
	and monitored.
3. Dismantle branches	<p>3.1. Weights of tree branches are ascertained so that they do not exceed the safe working limit of equipment.</p> <p>3.2. Branches are dismantled using the "cut and drop" method, or cut and lowered by ropes in accordance with accepted rigging techniques.</p> <p>3.3. Dismantling techniques are employed to ensure branches fall or are lowered safely into the determined drop zone with no damage to property and equipment, or injury to personnel.</p>
4. Dismantle tree	<p>4.1. A safety lanyard and climbing spurs are used to ascend tree to perform sectional felling.</p> <p>4.2. An elevated platform is used for access to assist sectional felling.</p> <p>4.3. Sections are cut and thrown using a directional scarf and back cut with an accepted industry method.</p> <p>4.4. Sections are cut and dropped using a horizontal cut and appropriate hinge wood.</p> <p>4.5. A pull rope is used to control fall of tree sections.</p> <p>4.6. Industry standard hitches and knots are used in rope lowering of cut tree sections.</p>
5. Fell wind thrown and suspended trees	<p>5.1. The risk potential of wind thrown or suspended tree is assessed.</p> <p>5.2. Safe work methods which apply to the removal of wind thrown or suspended trees are adopted.</p> <p>5.3. Hand or power winches are used to pull out the suspended tree as necessary.</p> <p>5.4. The root system of a wind thrown tree lying on the ground is propped.</p> <p>5.5. Wind thrown tree is crosscut in correct position to reduce trunk movement and prepare it for removal.</p>
6. Complete felling operations	<p>6.1. Felled trunks and branches are crosscut and trimmed to manoeuvrable lengths ready for disposal.</p> <p>6.2. The site is cleared of trunk, branches and tree debris.</p> <p>6.3. Timber disposal methods and equipment are used in accordance with the manufacturer's specifications and documented low risk work procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify site and tree hazards and assess and control risk
- select low risk tree removal methods
- interpret felling plans, work procedure documents, and survey symbols and information
- select and tie appropriate knots
- use advanced climbing, rope handling and rigging techniques or an EWP
- calculate tree dimensions, angles of direction, mass of tree section and balance of load
- coordinate and sequence the work team activities
- use personal protection equipment
- rescue techniques
- operate lowering devices where required by low risk work method statements
- operate elevated work platforms where required by low risk work method statements
- operate a chainsaw
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- safe tree removal methods based on results of tree, site and safety assessments
- maintenance, operation and Safe Working Loads of the tools, equipment and machinery required for given removal methods
- safe working practices for chainsaw operation
- safety procedures and potential hazards for working safely in the amenity tree industry
- emergency and first aid procedures
- environmental implications of tree removal, including National, State and local legislation and/or regulations
- natural heritage, cultural heritage and community use issues that impact on tree removal programs

**REQUIRED SKILLS AND KNOWLEDGE**

- principles and methods of inspecting trees to identify structural defects.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- conduct a site and tree hazard identification and risk control assessment
- prepare materials and equipment to specifications
- set up safe fall and exclusion zones
- use low risk dismantling procedures to fell a tree
- fell wind thrown and suspended trees
- use documented low risk work procedures
- record worksite activities according to documented guidelines.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

<b>RANGE STATEMENT</b>	
Removal methods may include:	<ul style="list-style-type: none"> <li>• felling</li> <li>• dismantling.</li> </ul>
Impacting factors may include:	<ul style="list-style-type: none"> <li>• site and location plans</li> <li>• site assessment details</li> <li>• tree characteristics</li> <li>• special instructions and/or conditions</li> <li>• Occupational Health and Safety (OHS) risks and controls</li> <li>• environmental considerations</li> <li>• removal methods and techniques</li> <li>• tools, equipment and machinery requirements</li> <li>• access and exit details</li> <li>• personnel requirements</li> <li>• waste, organic waste and debris disposal</li> <li>• recycling and re-use guidelines</li> <li>• traffic control and management.</li> </ul>

## AHCARB305A Remove trees in confined spaces

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of removing trees in confined spaces and in difficult/hazardous circumstances and defines the standard required to: conduct a site and tree hazard identification and risk control assessment; safely climb, ascend and descend a tree; dismantle a tree according to industry practice; use appropriate methods of rigging tree sections for load and balance; and coordinate dismantling operation with team members.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to arborists engaged in the process of removing trees in confined spaces and in difficult and hazardous circumstances and applies to appropriate selection of removal method and safe removal where clear felling techniques are not applicable.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for tree removal	<p>1.1.Site and tree hazards are identified, risks assessed and suitable controls implemented.</p> <p>1.2.Tree is inspected to ensure the appropriate removal method is planned that confirms the risk controls selected and is in accordance with the documented low risk work methods.</p> <p>1.3.Access to site is determined and approved by owner/site management.</p> <p>1.4.Site preparations include notification of local residents and authorities where necessary.</p> <p>1.5.Signage, barriers, warning devices and traffic management equipment are erected as necessary.</p> <p>1.6.The drop zone is determined and communicated to all personnel.</p> <p>1.7.Assets, property and vegetation related to work zone activities are protected, relocated, and/or secured from potential damage during tree removal.</p> <p>1.8.Tools, equipment and machinery necessary to implement tree removal are selected, prepared, checked and used according to documented guidelines and manufacturer recommendations.</p>
2. Implement dismantling of trees	<p>2.1.Suspended, wind thrown or damaged trees are stabilised to ensure trunk movement does not occur, and are brought down safely and efficiently according to documented low risk work methods.</p> <p>2.2.Mass of tree sections is calculated and does not</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>exceed the safe working limit of equipment.</p> <p>2.3.Branches and trunk sections are dismantled using the 'cut and drop' method, and cut and lowered by ropes and other lowering devices according to documented low risk work methods.</p> <p>2.4.Dismantling techniques are employed to ensure branches and trunk sections fall or are lowered safely into the determined drop zone, with no damage to property and equipment or injury to personnel.</p> <p>2.5.Direction felling techniques are employed to ensure trunk of dismantled tree falls safely into the determined drop zone with no damage to property and equipment or injury to personnel.</p> <p>2.6.Friction devices are used and controlled where required by documented low risk work methods.</p> <p>2.7.Elevated work platforms are used and controlled where required by documented low risk work methods.</p>
3. Complete tree removal	<p>3.1.Felled trunks are trimmed to manoeuvrable lengths without injury to the operator.</p> <p>3.2.Sufficient material is removed from the stump to prevent re-growth and/or the stump is treated to prevent regrowth.</p> <p>3.3.Plant material and debris is processed and removed from site according to documented guidelines.</p> <p>3.4.Tools, equipment and machinery are cleaned, checked, replaced if faulty or worn, and stored according to documented guidelines and manufacturer recommendations.</p> <p>3.5.Completed tree removal is recorded and communicated to management and/or the client.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify site and tree hazards and assess and control risk

## REQUIRED SKILLS AND KNOWLEDGE

- select low risk tree removal methods
- select and tie appropriate knots
- use advanced climbing, rope handling and rigging techniques
- calculate tree dimensions, mass of tree section and balance of load
- coordinate and sequence the work team activities
- use personal protective equipment (PPE)
- rescue techniques
- operate lowering devices where required by enterprise guidelines
- operate elevated work platforms where required by enterprise guidelines
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- identification and evaluation of structural defects in trees
- safe working limit of all climbing, rigging and lowering equipment
- methods of estimation of mass and balance of load
- density of tree sections
- methods of lowering including friction devices
- awareness of the impact of force, breaking strength, safety factor and cycles to failure
- first aid and rescue procedures
- methods minimising environmental impact
- legislation and local regulations governing tree removal
- relevant codes of practice.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• conduct a site and tree hazard identification and risk control assessment</li> <li>• safely climb, ascend and descend a tree</li> <li>• dismantle a tree according to industry practice</li> <li>• use appropriate methods of rigging tree sections for load and balance</li> <li>• coordinate dismantling operation with team members.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Dismantling may involve:	<ul style="list-style-type: none"> <li>• the use of elevated platforms or tree climbers</li> <li>• cutting sections of branches and trunks and throwing them into a drop zone</li> <li>• lowering branches and trunk sections to ground level using ropes</li> <li>• NB: tree dismantling may be employed where a tree is too high or wide, or directly above a target.</li> </ul>
Felling may be employed where:	<ul style="list-style-type: none"> <li>• a tree can be felled without damaging or getting hung up in another tree</li> <li>• causing damage to a target (e.g. a building)</li> <li>• in a confined situation this may entail the rigging of 'head' and 'stay' ropes to keep positive control of the felled tree and to ensure</li> </ul>

**RANGE STATEMENT**

	it lands into its designated drop zone.

## AHCARB306A Undertake aerial rescue

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of aerial rescue where an injured or unconscious person is safely brought to the ground from a tree or aerial lift and defines the standard required to: carry out preparation for an aerial rescue; assess and respond to an aerial emergency situation; evaluate the need for additional or specialist assistance; carry out the required aerial rescue or response to an aerial emergency; use a dedicated rescue kit for an aerial rescue; implement the documented rescue plan and implement appropriate post incident responses.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to arborists preparing and planning for the coordination and execution of rescue operations and the implementation of safety and first aid requirements covering hazard identification, basic first aid and emergency procedures, tree climbing and aerial rescue techniques. Aerial rescue is likely to be undertaken in emergency situations with little or no supervision.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan for aerial rescue	<p>1.1. Rescue equipment and first aid kit are checked to ensure they are complete and placed within easy access.</p> <p>1.2. Suitable safety equipment, dedicated rescue kit and Personal Protective Equipment (PPE) are selected and checked.</p> <p>1.3. Emergency communication system used to summon emergency services is checked according to manufacturer's specifications and enterprise work procedures.</p> <p>1.4. Documented rescue plan is confirmed and clarified with work team prior to work being undertaken.</p>
2. Assess and respond to an aerial emergency situation	<p>2.1. Casualty response is determined.</p> <p>2.2. Emergency plan is activated and assistance requested from work team and/or public according to documented rescue plan.</p> <p>2.3. Hazards associated with the rescue are identified, risks assessed and suitable controls implemented.</p> <p>2.4. Appropriate access equipment to affect rescue is used according to rescue plan.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Assess nature of injury	3.1. Casualty and rescuer are safely secured according to enterprise standards. 3.2. Injuries are assessed to determine whether or not to move casualty based on standard first aid procedures and risk assessment. 3.3. Casualty with possible neck or spinal injuries is supported (but not moved) to await expert medical treatment. 3.4. First aid able to be performed above ground is applied, as required, in line with standard procedures. 3.5. Instructions to ground staff and climbers are communicated clearly and concisely.
4. Lower casualty to ground	4.1. Casualty is prepared for descent according to first aid and risk assessments. 4.2. Casualty is lowered safely to the ground with support of rescuer.
5. Complete rescue operations	5.1. First aid is applied on the ground according to need. 5.2. Emergency assistance is obtained as per rescue plan. 5.3. Records of aerial rescue are maintained in the appropriate format.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- coordinate work group, equipment and own activities to sequentially and effectively complete rescue operations safely
- apply rigging and rope handling techniques in aerial rescue operations
- apply tree climbing techniques necessary for aerial rescue operations
- administer first aid to injured climbers
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required

## REQUIRED SKILLS AND KNOWLEDGE

- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- senior First Aid Certificate or equivalent
- safety ropes and equipment
- dealing with electrical emergencies
- operational hazards of tree work
- relevant industry codes of practice
- principles of hazard and risk analysis
- statutory requirements relating to Occupational Health and Safety (OHS) records (Incident Notification) required for rescue operations
- selected Australian Standards.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out preparation for an aerial rescue
- assess and respond to an aerial emergency situation
- evaluate the need for additional or specialist assistance
- carry out the required aerial rescue or response to an aerial emergency
- use a dedicated rescue kit for an aerial rescue
- implement the documented rescue plan
- implement appropriate post incident responses.

**EVIDENCE GUIDE****Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Aerial rescue may include:

- rescue, safety and emergency communications
- equipment and standard operating procedures for dealing with hazards
- personal safety.

## AHCARB307A Undertake complex tree climbing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers tree climbing and rigging associated with tree operations such as tree pruning and tree removal in complex situations and defines the standard required to: carry out and record pre-operational and safety checks; conduct a site and tree hazard identification and risk control assessment; inspect a tree and determine safest and best work method using risk controls established; select, inspect and prepare ropes, harnesses and other equipment associated with climbing trees; safely climb/ascend and descend large, hazardous and complex trees using a number of anchor points; climb using documented low risk work methods; inspect for faults and store ropes, harnesses and other climbing and safety equipment and replace if worn or faulty; practice an aerial rescue and document the hazards identified and the risk controls selected.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to advanced techniques used to climb trees in arboriculture and applies to a climbing arborist.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

<b>Prerequisite units</b>	
---------------------------	--

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for climbing and tree operations	1.1. Team members are informed of their role and duties in the climbing and tree operations. 1.2. Ropes are selected according to industry specifications and required tree works. 1.3. Ropes are assessed prior to use with damaged and faulty ropes discarded according to enterprise policy. 1.4. Appropriate climbing tools and equipment are selected. 1.5. Ropes, tools and equipment are checked. 1.6. Tree is inspected for safe ascension route.
2. Ascend and descend from trees	2.1. Occupational Health and Safety (OHS) hazards are identified risks assessed and appropriate controls are documented and implemented. 2.2. Personal protective and safety equipment is used and adjusted. 2.3. Trees are ascended using appropriate techniques and equipment. 2.4. Safe anchor points are selected according to strength

ELEMENT	PERFORMANCE CRITERIA
	<p>and suitability requirements.</p> <p>2.5. Tree is descended in a controlled manner according to industry practice.</p>
3. Undertake tree operations	<p>3.1. Required tree operations are carried out according to treatment plans, work procedures and rigging techniques.</p> <p>3.2. Load is balanced, tensioned and lowered in a staged controlled manner using appropriate crane points according to safe work practices, branch weight and rope characteristics.</p> <p>3.3. Staff are communicated with during operations, as required, verbally and by hand signals.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- climb trees and use twin ropes
- select and inspect appropriate equipment
- select and tie a wide range of knots
- select low risk anchor points
- apply a range of tree treatments
- attach and use rigging equipment
- balance and tension a load
- operate chainsaws and pole-saws
- perform aerial rescue techniques
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- identification of tree species and their pruning requirements
- tree pruning techniques appropriate to the pruning requirements of the species
- tree morphology, physiology and Compartmentalisation of Decay in Trees (CODIT) principles
- advanced tree climbing practices and principles including the use of Personal Protective Equipment (PPE) and secondary attachments
- types, uses and safe working limit of ropes and all other equipment
- impact of force under normal/failure conditions
- capability of lifting and lowering equipment
- Safe Working Loads (SWL) relationship between Breaking Strength (BS), Safety Factor (SF), Working Load Limit (WLL) and Cycles to Failure (CTF)
- awareness of power line clearances
- first aid and rescue procedures applicable to tree work
- industry codes of practice
- a broad range of trees and treatments
- advanced chainsaw techniques
- local government tree protection and preservation regulations
- AS4373-2007 Pruning of amenity trees
- relevant Code of Practice.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out and record pre-operational and safety checks
- conduct a site and tree hazard identification and risk

<b>EVIDENCE GUIDE</b>	
	<p>control assessment</p> <ul style="list-style-type: none"> <li>• inspect a tree and determine safest and best work method using risk controls established</li> <li>• select, inspect and prepare ropes, harnesses and other equipment associated with climbing trees</li> <li>• safely climb, ascend and descend large, hazardous and complex trees using a number of anchor points</li> <li>• climb using documented safe work methods</li> <li>• inspect for faults and store ropes, harnesses and other climbing and safety equipment and replace if worn or faulty.</li> <li>• document the hazards identified and the risk controls selected.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Situations may include:	<ul style="list-style-type: none"> <li>• complex tree climbing incorporates situations made hazardous by tree branches vulnerable to failure under a load</li> <li>• trees affected by decay, disease and/or pests, trees with embedded objects such as wire, nails or spikes</li> <li>• proximity of power lines</li> <li>• adjacent property or intruding branches</li> <li>• the tree's height, size, trunk characteristics, shape and weight distribution of the crown may contribute to making conditions hazardous to a climber or a felling or trimming operation</li> <li>• inclement weather may also contribute to making working conditions difficult and hazardous.</li> </ul>

**RANGE STATEMENT**

Climbing tools and equipment may include:

- ropes
- safety harnesses
- ascending and descending devices
- ladders
- safety equipment (helmets, ear and eye protection, gloves, boots, etc.)
- pulleys and blocks
- shackles and karabiners.

## AHCARB308A Install cable and bracing

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of installing cable and bracing and defines the standard to: interpret a cable and bracing plan; examine the structural integrity of tree components and install cable and bracing in a manner that achieves the intended purpose.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the process of installing hardware into the structure of a tree.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Read and interpret a plan for cable and bracing	1.1.Cable and bracing plan is read and understood. 1.2.Materials required for installing cable and bracing are determined from the plan and obtained with adequate lead time for the proposed work. 1.3.Tools and equipment are selected according to enterprise guidelines. 1.4.Occupational Health and Safety (OHS) hazards are identified, risks assessed and suitable controls implemented.
2. Prepare trees for cable and bracing	2.1.Branches are examined and their vitality and integrity of attachment ascertained to ensure the bracing can be safely implemented according to the provided plan. 2.2.Preliminary pruning is undertaken to aid cable and bracing installation.
3. Install cable and bracing	3.1.Planned approach to cable and bracing is communicated to other members in the work team in a clear and concise manner. 3.2.Cable and bracing is installed in line with the provided plan and enterprise guidelines. 3.3.Completed program is checked for quality of work and recorded. 3.4.Further pruning is carried out to ensure the tree is able to sustain its growth and be restored to its natural habit and form.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- climb trees or operate elevated work platforms
- identify OHS hazards in relation to specific trees and situations
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- cable and bracing techniques appropriate to the tree species
- identification of tree species
- structure of trees
- tree pruning techniques appropriate to the requirements of the species
- principles and methods of pruning
- effect of pruning on tree growth and habit
- tree anatomy and physiology
- Compartmentalisation of Decay in Trees (CODIT) principles
- implications of pruning cuts and the way trees respond
- climbing or elevated work platform operations
- OHS issues in hazardous situations with trees
- relevant legislation that may impact on a tree pruning program
- local government tree protection and preservation regulations
- AS4373-2007 Pruning of amenity trees
- relevant Code of Practice.

## Evidence Guide

## AHCARB309A Implement a tree protection program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the work undertaken to implement a tree protection program and defines the standard required to: determine the protection requirements of trees consistent with recognised industry practice; construct protective devices appropriate to the needs of the tree and site restrictions: comply with public safety and environmental guidelines on completion of tree protection activities.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the recognition of the need for tree protection and the construction or installation of protective devices.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine the implementation requirements of the tree protection program	<p>1.1. Trees to be protected, reason for protection and type of protection methods are identified according to the tree protection plan and enterprise work procedures.</p> <p>1.2. Any Occupational Health and Safety (OHS) controls necessary to ensure the safety of operators, the public and property throughout the tree protection program are identified and taken into account during implementation planning.</p> <p>1.3. Any environmental implications of the tree protection program are assessed and taken into account during implementation planning.</p> <p>1.4. Resources required to implement the tree protection program are identified from the plan, and availability confirmed with relevant personnel or suppliers.</p> <p>1.5. Implementation tasks are determined, scheduled, tasks allocated, and allowance made for contingencies.</p> <p>1.6. Information relating to the implementation of the tree protection program is communicated to appropriate personnel in accordance with enterprise guidelines.</p>
2. Make site preparations	<p>2.1. Suitable Personal Protective Equipment (PPE) is selected, used and maintained.</p> <p>2.2. Location of protection areas are marked out on the site according to protection plan and specifications.</p> <p>2.3. Safety barriers and signage are erected around holes, other disturbed surfaces and hazardous areas during and between work periods to ensure public and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>operator safety.</p> <p>2.4.Pre-operational and safety checks are carried out on all tools, equipment and materials with defective, faulty or out-of-standard components discarded and replaced.</p>
3. Construct protective devices	<p>3.1.Tools, equipment and materials appropriate to the task are used according to enterprise work procedures.</p> <p>3.2.Tree protection devices are constructed and/or assembled according to tree protection plan and any needs specific to the species or individual tree.</p> <p>3.3.Protection devices are installed according to enterprise work procedures and protection program.</p> <p>3.4.Completed protection devices are inspected for viability and remedial action undertaken when necessary.</p>
4. Monitor protection program	<p>4.1.Tree health is monitored during the protection program and remedial action taken to ensure the health and vigour of the tree is maintained.</p> <p>4.2.Protection devices are periodically checked for their effectiveness according to protection plan requirements.</p> <p>4.3.Broken, damaged or ineffective components are reported and/or repaired according to enterprise guidelines.</p> <p>4.4.Damaged trees are repaired and/or replaced according to protection plan requirements.</p> <p>4.5.Protection devices are dismantled and removed according to protection plan requirements.</p> <p>4.6.Tools and equipment are cleaned, maintained and stored consistent with enterprise guidelines.</p> <p>4.7.Records are maintained in accordance with enterprise guidelines.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- build protection devices
- recognise healthy/stressed and damaged trees
- participate in a team working situation
- work in chemical, toxic or hazardous areas
- dispose of chemical substances and their containers to minimise environmental impact
- disposal of plant and equipment debris in an environmentally aware and sensitive manner, such as sorting plant and paper-based waste for recycling
- minimise noise, dust, high activity vehicle traffic and water run-off to prevent nuisance-level environmental disturbance
- construct and install protection devices
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- protection requirements in relation to tree species, position, location and potential threats
- principles of evaluating the effect of damage to trees during construction programs
- environmental factors that may affect individual and plantation trees
- improvements to tree health that can be achieved through modifying environmental influences
- principles, regulations and practices relating to restricting access
- AS4373-2007 Pruning of amenity trees
- AS1742 Pt 3 1985 - Australian Standard Code of Practice, Work Site Traffic Management
- industry codes of practice
- specifications and construction methods when installing protection devices
- local tree protection and preservation regulations
- relevant Code of Practice.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• determine the protection requirements of trees consistent with recognised industry practice</li> <li>• construct protective devices appropriate to the needs of the tree and site restrictions</li> <li>• comply with public safety and environmental guidelines on completion of tree protection activities.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Protection methods may include installation of:	<ul style="list-style-type: none"> <li>• fences</li> <li>• tree guards</li> <li>• tree plantings</li> <li>• barriers</li> <li>• retaining walls and soil coverings</li> <li>• erection of signs and bunting</li> <li>• traffic re-direction.</li> </ul>

## AHCARB310A Perform aerial rigging

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency covers the process of rigging and defines the standard required to: design and implement a rigging system; use established and documented methods of rigging; perform rigging operations and communicate effectively with work crew.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to climbing Arborists and elevated work platform Arborists engaged in the process of rigging and applies to the appropriate selection and use of rigging equipment and methods. Aerial rigging work requires the application of extensive arboricultural knowledge and skills including different techniques of rigging to raise, lower, control or redirect a load in undertaking tree pruning and /or tree removal. Discretion and judgement is required.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare work site	1.1.The location of worksite and location of the correct tree is confirmed as per the scope of works. 1.2.Required site permits and licences are obtained. 1.3.Tree is inspected for structural defects. 1.4.Site hazards are identified, risks assessed and suitable controls implemented. 1.5.The work zone is confirmed with the work crew and is monitored. 1.6.Traffic management plans for the work site are implemented. 1.7.Communications are initiated, received and confirmed as an ongoing process.
2. Prepare rigging	2.1.Rigging method is determined and communicated to work crew. 2.2.Rigging method confirms the risk controls selected in accordance with established and documented low risk work methods. 2.3.Appropriate rigging equipment is selected. 2.4. Rigging equipment is inspected for equipment defects assembled and installed.
3. Design the rigging system	3.1.The load limit of the rigging system is determined. 3.2.Appropriate anchor and attachment points are selected.

ELEMENT	PERFORMANCE CRITERIA
	3.3. Load and balance calculations are performed. 3.4. The impact of force under normal/failure conditions is determined and a safety factor is applied. 3.5. Rigging system is designed to allow for the load and impact of the forces. 3.6. Rigging system is communicated to work crew.
4. Perform rigging operations	4.1. Effective communications are maintained between the work crew during the sequence of the rigging process. 4.2. Rigging is attached. 4.3. Appropriate knots are used where required. 4.4. Rigging system is monitored and adjusted in accordance with environmental conditions. 4.5. Load is tensioned and tested. 4.6. Load is controlled and raised, lowered or re-directed. 4.7. The appropriate components of the rigging system are retrieved.
5. Complete tree rigging operations	5.1. Load frequency and size matches the process capacity of the ground crew. 5.2. Rigging operations are completed as per scope of works. 5.3. Tools, equipment and machinery are cleaned, checked, and replaced if faulty or worn, and stored.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- technical skills sufficient to:
  - identify, select, assemble, use and maintain a range of rigging equipment and devices in a range of contexts and conditions
  - inspect equipment before and during use and identify problems, defects and faults
  - select appropriate anchor and attachment points
  - perform tip lowering, butt lowering, horizontal lowering or unchanged lowering

**REQUIRED SKILLS AND KNOWLEDGE**

- safely operate rigging equipment
- carry out rigging operations appropriate to site conditions
- identify unsafe rigging practices
- understand equipment terminology and names
- select and tie a wide range of knots required for rigging
- operate lowering devices as required
- practice rescue techniques
- perform rigging from an elevated work platform (EWP) where an EWP is being used
- store and maintain rigging equipment
- communication skills sufficient to:
  - use and respond to appropriate communication and interpersonal techniques and methods with colleagues and others
  - use voice, hand and whistle signals with other operators to maintain effective and low risk rigging operations
  - report information about problems, defects and faults.
- literacy skills sufficient to:
  - accurately locate and report information;
  - interpret written text material; and,
  - interpret, apply and convey information in written, diagrammatic and/or verbal form.
- spatial skills sufficient to:
  - estimate distances and dimensions of trees and equipment
  - estimate the centre of gravity for balancing a load
  - estimate areas for safe work zones.
- numeracy skills to:
  - understand and recognise numerical terms of equipment breaking strains, safe working loads, manufacturer's specifications and labeling
  - use basic geometry to measure distances and dimensions
- problem solving skills sufficient to:
  - identify work requirements;
  - identifying any faults in tools, equipment or materials
  - recognise own limitations in identifying problems in conditions and trees for rigging
  - demonstrate appropriate response procedures following identification of problems; and, provide alternative rigging solutions
  - identify hazards, assess risk and implement risk controls
  - apply low risk work practices including the use of personal and protective equipment and control of hazards

## REQUIRED SKILLS AND KNOWLEDGE

- teamwork skills sufficient to:
  - use communications to complete complex tasks efficiently and safely
  - coordinate own work with others to action tasks and sequence the work team activities;
  - to relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- the ability to comply with legislation, regulations, standards, codes of practice and established safe practices and procedures for rigging.

### Required knowledge

- organisational and site standards, requirements, policies and procedures for rigging
- types and purposes of a range of rigging equipment and devices
- the use, operation and maintenance of rigging equipment in accordance with the manufacturer's specifications and recommendations
- common problems with rigging and their potential consequences and solutions
- established communication and management channels and protocols
- identification and evaluation of structural defects in trees
- methods of using and operational principles and limitations of friction devices
- procedures for recording and reporting workplace information
- appropriate mathematical procedures for estimating and measuring
- common rigging hazards
- basic physics for load distribution, gravity, heat, potential and kinetic energy, mass, force and leverage
- knowledge and understanding of AS4373-2007 Pruning of amenity trees
- Code of Practice relevant to the full range of processes for rigging
- environmental protection requirements
- tree anatomy, physiology, nomenclature and taxonomy
- safe working load of rigging equipment
- awareness of breaking strength, safety factor and cycles to failure
- signals and communication systems
- first aid and rescue procedures
- use of personal protection equipment.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

<b>EVIDENCE GUIDE</b>	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• design and implement a rigging system;</li> <li>• use established and documented methods of rigging;</li> <li>• perform rigging operations and</li> <li>• communicate effectively with work crew.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some work sites may differ due to the regional or enterprise circumstances. There is an industry expectation for refresher training and assessment.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trees include:	<ul style="list-style-type: none"> <li>• hardwood</li> <li>• softwood</li> <li>• palms and palm-like</li> <li>• trees that are alive, dead, single or multi-stemmed, leaning or straight.</li> </ul>
Structural defects may include:	<ul style="list-style-type: none"> <li>• cracks</li> <li>• splits</li> <li>• cavities</li> <li>• decay</li> <li>• inclusions.</li> </ul>
Site hazards may include:	<ul style="list-style-type: none"> <li>• uneven/unstable terrain</li> <li>• high risk trees and tree parts</li> <li>• overhead and underground services</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• excavations</li> <li>• traffic</li> <li>• structures</li> <li>• hazardous materials</li> <li>• fires</li> <li>• insects and animals</li> <li>• other personnel and machinery.</li> </ul>
Traffic may include:	<ul style="list-style-type: none"> <li>• pedestrian</li> <li>• vehicle.</li> </ul>
Communication may include:	<ul style="list-style-type: none"> <li>• voice communications</li> <li>• whistles</li> <li>• hand signals.</li> </ul>
Work zone may include:	<ul style="list-style-type: none"> <li>• the exclusion zone</li> <li>• safe drop zone</li> <li>• safe fall zone</li> <li>• traffic management zone</li> <li>• asset management zone</li> <li>• the area under the load</li> <li>• the area that the load is directed to.</li> </ul>
Rigging method may include:	<ul style="list-style-type: none"> <li>• simple rope</li> <li>• taut line</li> <li>• speed line</li> <li>• tag-pull line</li> <li>• lowering</li> <li>• raising</li> <li>• cradling</li> <li>• tip or butt lowering</li> <li>• false crotch.</li> </ul>
Rigging equipment may include:	<ul style="list-style-type: none"> <li>• ropes including aspects of rope such as: <ul style="list-style-type: none"> <li>• materials</li> <li>• construction</li> <li>• diameter</li> <li>• limits</li> <li>• terminations</li> </ul> </li> <li>• karabiners</li> <li>• pulleys</li> <li>• slings</li> <li>• shackles</li> <li>• rapids.</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• Slings may be:               <ul style="list-style-type: none"> <li>• spliced</li> <li>• sewn</li> <li>• swaged</li> <li>• adjustable</li> <li>• continuous</li> <li>• fixed length.</li> </ul> </li> <li>• Slinging configurations could include choke or basket.</li> </ul>
Equipment defects may include:	<ul style="list-style-type: none"> <li>• signs of:               <ul style="list-style-type: none"> <li>• wear</li> <li>• melting</li> <li>• burning</li> <li>• stretching</li> <li>• cracking</li> <li>• incompatibility</li> <li>• overload failure</li> </ul> </li> <li>• equipment that is:               <ul style="list-style-type: none"> <li>• cut</li> <li>• bent</li> <li>• broken</li> <li>• faulty.</li> </ul> </li> </ul>
Rigging system includes:	<ul style="list-style-type: none"> <li>• the assembly of all the component parts of rigging equipment. This may include mechanical advantage and friction from tree or friction devices or other fixed objects.</li> </ul>
Anchor and attachment points may include:	<ul style="list-style-type: none"> <li>• a fork</li> <li>• a false crotch made from a sling and pulley</li> <li>• a cambium saver.</li> </ul>
Load may include:	<ul style="list-style-type: none"> <li>• tree</li> <li>• tree parts</li> <li>• rigging equipment or tools.</li> </ul>
Knots may include:	<ul style="list-style-type: none"> <li>• bowline</li> <li>• running bowline</li> <li>• bowline on a bight</li> <li>• blood knot</li> <li>• tautline</li> <li>• sheet bend</li> <li>• Prussik</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• figure 8</li> <li>• friction</li> <li>• alpine</li> <li>• timber hitch</li> <li>• clove hitch</li> <li>• half hitch.</li> </ul>
Environmental conditions may include:	<ul style="list-style-type: none"> <li>• the range of variations in weather such as wind speed and direction.</li> </ul>

### Unit Sector(s)

<b>Unit sector</b>	
--------------------	--

### Co-requisite units

<b>Co-requisite units</b>		

### Competency field

<b>Competency field</b>	Arboriculture
-------------------------	---------------

## AHCARB501A Assess trees

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of assessing trees to make recommendations on tree health and condition and defines the standard required to consult with clients and provide a service to assess the health of trees; inspect and assess trees for general condition and diseases; diagnose and determine treatment protocols; record assessment data; assess trees for identification of defects and assess risk of harm; document data and recommendations in an assessment report; and maintain assessment data records.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the job role of a consulting arborist in the provision of professional services in evaluation of tree pathology and structural tree problems in a wide range of amenity trees and sites in urban and regional settings and to the production of professional documentation to inform and advise a client.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine tree survey program requirements	<p>1.1.Scope of survey is identified in line with client needs and statutory requirements.</p> <p>1.2.All current data research relevant to survey requirements is identified, sourced and recorded.</p> <p>1.3.Processes for data capture are documented.</p> <p>1.4.Methods of recording assessment data are prepared.</p> <p>1.5.Equipment for tree assessment is checked and prepared for use.</p>
2. Inspect and assess trees	<p>2.1.Trees are assessed to determine their identification, location, health, growth habit, structure and stability.</p> <p>2.2.Consideration is given to the tree's age, condition, habitats, wind loading, distribution of foliage, wound size and potential impacts of proposed recommendations.</p> <p>2.3.Tree locations are identified from a plan according to the size and extent of the project and according to common industry practice.</p> <p>2.4.Testing equipment is used, where required, to determine age, decay, disease and scope of tree problems.</p> <p>2.5.Individual trees are assessed and, where required, their value calculated and recorded.</p> <p>2.6.Observed indications of disease are diagnosed and results recorded.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Assess risk of harm	3.1. Trees are assessed to determine their identification of defects. 3.2. Trees are assessed to determine their risk potential and suitable controls are recommended to the client or organisation. 3.3. Hazardous trees are assessed to determine their risk of harm. 3.4. Risk controls are documented and recommended to the client or organisation.
4. Compile a tree assessment report	4.1. Diagnosis of any tree problem relevant to the scope of survey is documented. 4.2. Specific recommendations of remedial action for tree problems are provided and recorded. 4.3. Identification of hazardous trees, recommendations for appropriate remedial actions and appropriate risk controls are recommended and documented, and applied. 4.4. Tree assessment report incorporates all relevant data from the survey in line with client needs. 4.5. Survey and assessment data are stored and maintained as part of professional practice. 4.6. Client is informed and advised of the content and implications of the report and a copy is presented.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify trees
- locate trees from a survey plan
- assess tree health, identify defects, structural issues
- assess individual trees and groups of trees
- identify hazards and assess risk potential
- assess the risk of harm associated with a tree
- diagnose diseases and health issues
- use testing equipment

## REQUIRED SKILLS AND KNOWLEDGE

- analyse assessment and testing results
- determine management/treatment protocols
- exhibit professional work practices
- capture assessment data
- maintain data records
- value trees
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- identification of a wide range of trees common within the region
- methods of tree assessment, including the visual tree assessment (VTA) method
- methods for the detection of decay and structural defects in trees
- causes of instability, decay, damage and stress in trees
- interpretation of results from assessment and testing
- tree physiology and pathology
- principles of tree selection
- methods of tree protection
- methods of determining tree heights
- application of current tree valuation formulae
- provision of expert witness statements
- legal requirements relating to development and existing structures
- local tree protection and preservation laws
- low risk arboricultural work practices
- AS 4373-2007 Pruning of amenity trees
- relevant codes of practice.

## Evidence Guide

### EVIDENCE GUIDE

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• consult with clients and provide a service to assess the health of trees</li> <li>• inspect and assess trees for general condition and diseases</li> <li>• diagnose and determine treatment protocols</li> <li>• record assessment data</li> <li>• assess trees for identification of defects and assess risk of harm</li> <li>• document data and recommendations in an assessment report</li> <li>• maintain assessment data records.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trees may include:	<ul style="list-style-type: none"> <li>• all species of trees and woody tree-like vegetation forms.</li> </ul>
Assessment may include:	<ul style="list-style-type: none"> <li>• forensic investigation and analysis of data and observation resulting in a judgment.</li> </ul>

## AHCARB502A Identify, select and specify trees

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of identifying, selecting and specifying trees and defines the standard required to: inspect and identify an extensive range of trees; determine the suitability of a tree for a purpose; evaluate and document the selection of trees; specification of replacement tree plantings; monitor and record quality control of selections; document a report of the identification, evaluation and specification process.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to a wide range of applications in urban and regional areas and in local government and legal contexts in the specification of replacement trees in residential, commercial public open spaces and amenity areas.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify a tree	<p>1.1.Client is consulted and a brief developed and agreed.</p> <p>1.2.Trees are identified for the purpose of the project/client brief.</p>
2. Determine the suitability of a tree for a purpose	<p>2.1.Site inspection is undertaken according to the client brief and legislative and regulatory requirements.</p> <p>2.2.Planting area dimensions are estimated for the tree species or cultivar.</p> <p>2.3.Species and cultivar selection is appropriate to the available dimensions of the aspect and the site.</p> <p>2.4.Soil volume is proportioned to the size of tree in consideration.</p> <p>2.5.Environmental conditions are considered and applied to the functional characteristics of the tree.</p> <p>2.6.The existing soil is appraised for suitability as a growth medium appropriate to the tree species or cultivar.</p> <p>2.7.Functional life expectancy of site and plantings is determined.</p> <p>2.8.The selection of the tree is evaluated and the rationale for tree selection is documented.</p>
3. Select trees	<p>3.1.Trees are selected as per the client brief and their suitability for the intended purpose.</p> <p>3.2.Tree function is determined for the precise location within the plan.</p> <p>3.3.Recommendations are made for soil improvements</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>in accordance with the tree species selected.</p> <p>3.4. Species and cultivars are matched appropriately to the determined selection criteria for species specific characteristics.</p> <p>3.5. Tree species or cultivars for replacement or new plantings are recommended.</p> <p>3.6. Tree selections, selection criteria and notes on quality expectations are documented as specifications.</p>
4. Specify trees	<p>4.1. Criteria determined for size of stock selection are incorporated to the specifications.</p> <p>4.2. Selection criteria for mature trees are evaluated against capability for transplanted trees.</p> <p>4.3. Final selections are assessed against the specified soil, site location and client brief and confirmed.</p> <p>4.4. Selected plants are monitored for quality and quantities according to the specifications.</p> <p>4.5. Materials, soils and growing media are monitored for quality according to the specifications.</p> <p>4.6. Records of quality checks on delivered plants and product are documented.</p>
5. Correlate and present a report	<p>5.1. A report of the process is documented and the correlated records are incorporated.</p> <p>5.2. The client or organisation is presented with the report.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify and select an extensive range of trees common to the region
- select and appraise a wide range of soils and growing media
- conduct site inspections and site assessments
- evaluate tree selections
- use comparative techniques

## REQUIRED SKILLS AND KNOWLEDGE

- research multiple sources of reference material and taxonomic keys
- compile a database of tree specimens and characteristics
- monitor quality
- apply quality controls
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## Required knowledge

- tree identification techniques
- ethnobotany, plant morphology, physiology, taxonomy and nomenclature
- soil characteristics particularly in relation to the local region
- soils appraisal techniques
- methods of data capture
- surface hydrology
- problem-solving techniques
- methods of quality control
- symptoms of tree pests and diseases
- basic physiology and life cycle of pests and diseases
- AS4419-2003 and AS4454-2003
- specific legislation and regulations for arboriculture and development relevant Occupational Health and Safety (OHS)
- legislation and regulations.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• inspect and identify an extensive range of trees</li> <li>• determine the suitability of a tree for a purpose</li> <li>• evaluate and document the selection of trees</li> <li>• specification of replacement tree plantings</li> <li>• monitor and record quality control of selections</li> <li>• document a report of the identification, evaluation and specification process.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trees may include:	<ul style="list-style-type: none"> <li>• the range of all tree species and cultivars.</li> </ul>
Sources of knowledge may include:	<ul style="list-style-type: none"> <li>• reference books</li> <li>• photo collections</li> <li>• field guides</li> <li>• networking</li> <li>• internet</li> <li>• identified specimens</li> <li>• software programs</li> <li>• collaboration</li> <li>• electronic storage</li> <li>• taxonomic keys</li> <li>• drawings</li> <li>• herbarium collections</li> </ul>

## AHCARB503A Diagnose tree diseases

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of diagnosing tree diseases (including diseases of palms and other woody monocotyledons) and defines the standard required to: describe the growing requirements and characteristics of trees; determine the impact of the growing environment on the health of a tree; determine the mode of damage; diagnose and record tree diseases; formulate disease management program including the use of Integrated Pest Management (IPM); provide a reasoned prognosis; document a management program report; monitor and recommend changes to the management program.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the process of diagnosing tree diseases and is likely to be undertaken without supervision. Responsibility for and organisation of the work of others involved in the diagnosis and management of tree diseases may be required.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assess environmental impact	<p>1.1.The tree is identified to the lowest taxonomic level, and its region of origin determined.</p> <p>1.2.The seasonal growth stages of the tree are determined.</p> <p>1.3.Any regular cultural practices are identified where appropriate.</p> <p>1.4.Characteristics of the growing environment that affect the growth of a specific tree species are determined.</p> <p>1.5.Environmental and cultural factors that predispose the tree to diseases are identified.</p> <p>1.6.Relevant physical and chemical properties of the soil or growing media are determined and assessed.</p>
2. Identify diseased trees	<p>2.1.Impact of disease type on tree parts and systems is determined.</p> <p>2.2.Natural defence systems of the trees against major disease types are considered.</p> <p>2.3.Disease groups are determined according to a disease classification guide.</p> <p>2.4.Signs and symptoms of disease are used to identify</p>

ELEMENT	PERFORMANCE CRITERIA
	which trees are diseased.
3. Diagnose tree disease	<p>3.1.Symptoms and signs of disease are recorded using accepted nomenclature.</p> <p>3.2.Samples and evidence are collated into a reference collection.</p> <p>3.3.Disease type is determined according a disease classification guide.</p> <p>3.4.Identification of macro biotic disease is determined to genus level.</p> <p>3.5.Specimens are prepared for microscopic examination of micro biotic diseases.</p> <p>3.6.Specialist services are determined and consulted in complex or indeterminate cases.</p> <p>3.7.Specimens are correctly collected, packaged and dispatched for specialist diagnosis or laboratory testing where required.</p>
4. Provide a prognosis	<p>4.1.The current health and energy reserves of the tree are determined.</p> <p>4.2.The severity and extent of the disease is assessed.</p> <p>4.3.The virulence of the disease on the specific host is researched.</p> <p>4.4.The phenology of the host and the disease are determined.</p> <p>4.5.Lag time of management options is researched and considered.</p> <p>4.6.Influences of environmental conditions on host, disease and management options are considered.</p> <p>4.7.An informed prognosis is provided in writing and verbally.</p>
5. Develop, document and monitor the management program	<p>5.1.Management options are researched and appropriate options are recommended.</p> <p>5.2.A disease management program is developed within IPM guidelines.</p> <p>5.3.Tree diseases and management programs are recorded and documented in a report.</p> <p>5.4.Management plans are monitored and modified or refined as needed.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- differentiate between biotic and abiotic symptoms in trees
- research information about tree health problems, their diagnosis and remedial treatments available
- identify signs and symptoms of tree health problems
- determine possible causes of the problem
- assess the severity, extent and speed of onset of the problem
- determine the possible and probable physiological, anatomical, biochemical and physiological impact on the tree
- document management programs for the diseases diagnosed
- compile a disease reference collection
- comply with legislative requirements
- provide a reasoned prognosis
- monitor diseases on an ongoing basis
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- tree anatomy, biochemistry, physiology, histology, pathology and taxonomy
- function of the anatomical parts of the tree, palm etc
- the primary cellular and anatomical structures of the tree
- the critical systems in the tree; physiologically, anatomically and biochemically
- horticultural function, cultural and performance requirements and characteristics of the trees or other woody plants being considered
- tree nutrition issues associated with the soil or media present
- disease detection methods, taxonomic identification, life cycle stages and characteristic symptoms for the specific horticultural trees of the enterprise
- patterns of host - disease interaction for each major disease type
- chemical, cultural and biological control methods as parts of an IPM strategy
- chemical use, toxicity and compatibility with target trees, soil, and environmental

**REQUIRED SKILLS AND KNOWLEDGE**

characteristics of the horticultural region.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- describe the growing requirements and characteristics of trees
- determine the impact of the growing environment on the health of a tree
- determine the mode of damage
- diagnose and record tree diseases
- formulate disease management program including the use of IPM
- provide a reasoned prognosis
- document a management program report
- monitor and recommend changes to the management program.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trees may include:	<ul style="list-style-type: none"> <li>all species of trees and woody tree like vegetation forms.</li> </ul>
Disease may include;	<ul style="list-style-type: none"> <li>both biotic and abiotic diseases and their mode of impact on trees, palms and woody monocotyledons along with a variety of management protocols.</li> </ul>

## AHCARB504A Develop a tree protection program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of developing a program for the protection of trees and defines the standard required to: assess condition of trees on site; assess impacts of development on trees; determine tree protection zones; determine suitable protection methods; document arboriculture assessment report; develop a tree protection plan and guidelines; develop/document tree management guidelines.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the process of planning and developing a tree protection program for trees on development sites. Responsibility for, and limited organisation of the work of others in the tree protection program, may be involved. Developing tree protection programs requires a broad range of skills, and the application of extensive horticultural knowledge in areas such as tree protection.
--------------------------------	--

### Licensing/Regulatory Information

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Undertake assessment of trees on site	1.1.Relevant legislation is identified and researched. 1.2.Site is inspected. 1.3.Trees are located from site plans or working drawings to enable their identification. 1.4.Each tree in the program is assessed.
2. Provide design input	2.1.Trees are assessed for suitability for retention for the purpose of site design. 2.2.Optimal tree protection zone is determined for trees to be retained. 2.3.Design input relevant to retained trees is provided to the client or management.
3. Assess impact of development on trees	3.1.Existing plans and working drawings are interpreted. 3.2.Impact of proposed development on trees is determined. 3.3.Trees to be retained and removed are finalised and recorded.
4. Determine tree protection zones	4.1.Optimal tree protection zone is re-evaluated. 4.2.Site access and relevant logistics are assessed. 4.3.Available/actual tree protection zone is defined and

ELEMENT	PERFORMANCE CRITERIA
	<p>recorded.</p> <p>4.4. Additional remedial measures required are determined.</p>
5. Develop protection measures and advise client	<p>5.1. Appropriate protection measure techniques/systems to minimise impact are designed or developed.</p> <p>5.2. Advice on tree removal and tree pruning is provided to client or management.</p>
6. Document the relevant reports	<p>6.1. An arboriculture assessment report is prepared.</p> <p>6.2. Tree protection plans and guidelines are developed.</p> <p>6.3. Tree management guidelines are prepared and documented.</p> <p>6.4. Relevant reports, plans and guidelines are consolidated and presented to the client, management or relevant stakeholders.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify an extensive range of trees
- assess trees
- interpret plans
- determine tree protection zones
- determine suitable protection methods
- assess condition of trees on site
- assess impacts of development on trees
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- effects on trees due to permanent and temporary changes in their environment
- principles and techniques relating to the selection and implementation of protection programs
- principles of tree protection devices
- principles and methods of mechanical and chemical damage control
- principles and methods relating to protecting trees from human activities
- anatomy and physiology of trees
- diseases of trees
- development and design language
- relevant legislation that may impact on a tree pruning program \
- local government tree protection and preservation regulations
- AS4373-2007 Pruning of amenity trees
- relevant Code of Practice
- Draft AS 4970 Protection of Trees on Development sites
- requirements of Statutory authorities relevant to trees on the development site.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assess condition of trees on site
- assess impacts of development on trees
- determine tree protection zones
- determine suitable protection methods
- document arboriculture assessment report
- develop a tree protection plan and guidelines

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• develop/document tree management guidelines.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trees may include:	<ul style="list-style-type: none"> <li>• all species of trees and woody tree like vegetation forms that require protection from chemical, environmental, physical or other threats.</li> </ul>
Protection devices may include:	<ul style="list-style-type: none"> <li>• tree guards</li> <li>• root barriers</li> <li>• other plantings</li> <li>• soil covering</li> <li>• traffic re-direction</li> <li>• barriers, bunting and flagging</li> <li>• temporary fencing, bollards and vehicle barriers.</li> </ul>
Protection program may include:	<ul style="list-style-type: none"> <li>• location and site plans</li> <li>• drawings</li> <li>• equipment requirements</li> <li>• access details</li> <li>• species requirements</li> <li>• installation and construction plans</li> <li>• maintenance requirements</li> <li>• protection methods</li> <li>• personnel requirements</li> <li>• location of services</li> <li>• work schedules</li> <li>• timeframes</li> <li>• budgets</li> <li>• debris disposal procedures</li> <li>• Occupational Health and Safety (OHS) issues.</li> </ul>

## AHCARB505A Document and audit tree work

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of documenting and auditing tree work and defines the standard required to: identify and gather relevant documentation and standards; inspect works against documentation/legislation/standards; determine conformance and non-conformance; document inspection and feedback/recommendations; provide feedback to contractors, clients, management and stakeholders.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to the processes of documenting and auditing the tree operations of tree pruning, removal, transplanting, planting and tree protection and the inspection and assessment of non arboricultural works that may impact on the tree or its environment. This standard relates to the process of inspection, assessment against documentation and legislation/standards and documentation of findings and recommendations.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify and gather information	1.1. A range of potential sources of information is identified. 1.2. Appropriate persons are interviewed. 1.3. Relevant information and sample documentation is gathered.
2. Audit tree works	2.1. Onsite inspection is organised. 2.2. Work is inspected in relation to relevant documentation/legislation. 2.3. The extent of work conformance to relevant documentation/legislation is determined. 2.4. All non-conformances are identified and recorded. 2.5. Extent or manner of non-conformance is assessed. 2.6. Findings and relevant field notes are documented.
3. Assess impact of non-arboricultural works	3.1. Non-arboricultural works that may impact on the tree or its environment are inspected and assessed. 3.2. Impact of non-arboricultural works of clients, contractors and stakeholders is determined. 3.3. Feedback on non-arboricultural works is provided to clients, contractors and stakeholders.

ELEMENT	PERFORMANCE CRITERIA
4. Provide feedback to contractors, clients and stakeholders	4.1. Feedback on findings of inspection is provided to client, contractors and/or stakeholders. 4.2. Provide advice for improvement, rectification and/or management of non-conformances. 4.3. Prioritize ongoing management required.
5. Document inspection and feedback and/or recommendations	5.1. Audit report and non-conformance notifications are documented. 5.2. Statutory authorities are advised where required. 5.3. An ongoing management plan and/or rectification plan is documented and presented to the client or management.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply audit process to tree pruning, removal, transplant, planting and tree protection
- research and determine documentation including legislation
- understand and apply contract terms
- understand and apply relevant standards and codes of practice
- read and interpret plans
- problem-solving
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- legal issues and terminology relating to quality auditing

## REQUIRED SKILLS AND KNOWLEDGE

- audit methods and techniques
- relevant codes of practice, regulations and standards
- product and/or service knowledge
- quality principles and techniques
- relevant legislation
- pruning, removal, transplant, planting and tree protection techniques and practices
- tree physiology, anatomy and pathology
- tree management techniques/practices
- impact of non-arboricultural activities on trees
- AS4373-2007 pruning of amenity trees
- relevant Code of Practice.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify and gather relevant documentation and standards
- Inspect works against documentation/legislation/standards
- determine conformance and non-conformance
- document inspection and feedback/recommendations
- provide feedback to contractors, clients, management and stakeholders.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Trees may include:	<ul style="list-style-type: none"> <li>all species of trees and woody tree like vegetation forms.</li> </ul>
Audits may include:	<ul style="list-style-type: none"> <li>the evaluation of a person, organisation, system, process, enterprise, project or product.</li> </ul>

# AHCASW301A Protect places of Aboriginal cultural significance

## Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

## Unit Descriptor

This unit covers the protection of places of cultural significance to Aboriginal people. It requires following Aboriginal cultural protocols and details the specific cultural, gender and kinship sensitivities of working in Aboriginal communities and on Country with diverse cultural requirements.

## Application of the Unit

This unit applies to those whose work on Country and in cultural keeping places and includes protecting cultural places, sites and objects often in co-operation with a range of stakeholders and with reference to Aboriginal communities and/or line management. The unit involves and requires a high level of awareness and experience with Aboriginal culture and communities and the need to observe Aboriginal cultural protocols. This unit is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and communicate with key stakeholders	<p>1.1 Appropriate persons within communities who hold cultural knowledge relevant to determining the <i>cultural significance</i> of Aboriginal places and heritage are identified</p> <p>1.2 Working relationships with key <i>stakeholders</i> that assist in the management of culturally significant places are developed</p> <p>1.3 Communication approaches that place <i>Aboriginal cultural protocols</i> and values at the forefront and accommodate stakeholder concerns and interests are developed</p> <p>1.4 Views on the way in which the cultural significance and resource can be conserved and used are regularly sought and obtained</p> <p>1.5 Views obtained are included in organisational planning processes</p> <p>1.6 Research on the <i>Burra Charter process</i> and on other <i>existing industry guidelines</i> is undertaken to ensure proper processes are planned for and applied to protection processes</p>
2. Define cultural significance	<p>2.1 Cultural knowledge holders inform the decision-making process to determine the cultural significance of places</p> <p>2.2 Traditional Aboriginal knowledge and practices in managing Country and environment are acknowledged and respected</p> <p>2.3 <i>Aboriginal beliefs</i> embedded in a place of cultural significance are determined</p> <p>2.4 The embodiment of cultural significance in the place itself, its fabric, setting, use, associations, meanings, records, related places and related objects is recognised</p> <p>2.5 An assessment of cultural significance is conducted</p>

ELEMENT	PERFORMANCE CRITERIA
	2.6 A statement of cultural significance is documented
3. Identify threats to Aboriginal cultural places	3.1 Threats to <i>culturally significant places</i> , both external and internal to the area under consideration, are identified 3.2 Details of evidence of land degradation are observed, described and recorded 3.3 A risk assessment of all threats to determine potential impact on sites and associated cultural landscape is undertaken 3.4 Protection/conservation measures to control potential and actual threats are determined
4. Conserve significance	4.1 Conservation policies and plans are used along with stakeholder views to plan ongoing conservation actions 4.2 Conservation activities are implemented in culturally sensitive ways 4.3 Current mainstream protection practices are compared with those of pre-European settlement in order to consider culturally appropriate alternative practices 4.4 Resources are obtained for conservation and restoration activities, along with any associated ceremonial/cultural activity

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills include:****Ability to:**

- respect cultural diversity and demonstrate sensitivity to social, cultural and professional values and beliefs
- use technology to access written, oral or visual source material
- plan ongoing conservation actions
- conserve significance of place of culture
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities
- exercise discretion and confidentiality

**Required knowledge includes:****Knowledge of:**

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- industry, organisational and enterprise policies and procedures for conservation of places of cultural significance
- core sections of Burra Charter and Guidelines
- Cultural and Heritage Legislation or relevant NPWS legislation
- sustainable environmental practices
- occupational health and safety requirements

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.</p> <p>In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of <i>Cultural Units</i> to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.</p> <p>Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify appropriate cultural authorities for a Community, place or for a Site</li> <li>• develop working relationships with Aboriginal and non-Aboriginal stakeholders in cultural sites</li> <li>• canvass views in determining the cultural significance and heritage value and preservation issues of an Aboriginal cultural site</li> <li>• plan for the protection of an Aboriginal cultural site including resources required and submissions to be completed</li> <li>• observe Aboriginal cultural protocols in dealing with stakeholders and land managers</li> <li>• identify threats and develop action and emergency plans to mitigate and manage the risk of damaging incidents or loss of cultural integrity</li> <li>• document the submissions to implement conservation and restoration activities and support the incident management activities</li> <li>• identify natural resources and how they relate to cultural protocol, spirituality, art, environment, values, beliefs and lore/law</li> <li>• identify cultural rights and responsibilities when using Community knowledge, information and material</li> <li>• identify groups to be consulted in relation to owners/custodians of cultural and Community knowledge, information and/or material</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p>

	<ul style="list-style-type: none"> <li>• on Country, a Community, educational or workplace setting including Aboriginal cultural keeping places</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• candidates who have gained relevant knowledge and skills through their life experience</li> </ul>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in protecting Aboriginal places of cultural significance. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate on Country and/or in Aboriginal cultural keeping places protecting cultural sites and/or cultural material and objects</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Ceremony and/or Sites work related to the knowledge and skills outlined in this unit</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <p>AHCILM306A      Follow Aboriginal cultural protocols</p> <p>AHCASW308A      Apply cultural significance to Aboriginal sites and landscapes</p> <p>AHCASW310A      Move and store Aboriginal cultural material</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Cultural significance</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• aesthetic, historic, scientific, social or spiritual value for past, present or future generations</li> <li>• significance embodied in the place itself, its fabric, setting, use, associations, meanings, records, related places and related objects</li> </ul>
<p><b><i>Stakeholders</i></b> may include</p>	<ul style="list-style-type: none"> <li>• Aboriginal Land Councils</li> <li>• Indigenous Ranger groups</li> <li>• Traditional Owners and Cultural managers</li> <li>• Aboriginal communities and Clans</li> <li>• museums</li> <li>• Culture and Heritage government departments and representatives</li> <li>• National Parks personnel</li> <li>• sites workers</li> <li>• archaeologists</li> <li>• anthropologists</li> </ul>
<p><b><i>Aboriginal cultural protocols</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law.</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of artefacts</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> </ul>

	<ul style="list-style-type: none"> <li>occasions when consultation is required</li> <li>ways in which consultations should be conducted</li> </ul>
<b><i>Burra Charter process</i></b> includes:	<ul style="list-style-type: none"> <li>the cultural significance of a place and other issues affecting its future are best understood by a sequence of collecting and analysing information before making decisions. Understanding cultural significance comes first, then development of policy and finally management of the place in accordance with the policy</li> <li>the policy for managing a place must be based on an understanding of its cultural significance</li> <li>policy development should also include consideration of other factors affecting the future of a place such as the owner's needs, resources, external constraints and its physical condition</li> </ul>

## Unit Sector(s)

Aboriginal-sites work

## AHCASW302A Relate Aboriginal culture to sites work

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Unit Descriptor

This unit covers the cultural and ceremonial worldviews necessary to understand cultural landscapes from Aboriginal perspectives. The unit introduces overarching belief systems that operate where Aboriginal-Sites work takes place. This unit provides a conceptual foundation for understanding Aboriginal cultural protocols, cultural customs and cultural practices that the Aboriginal-Sites worker is likely to encounter in daily work routines.

### Application of the Unit

This unit applies to Aboriginal worldviews and beliefs as they impact and affect Aboriginal-sites work on Country. The unit applies to working either as an autonomous Sites worker or under the supervision and cultural authority of a Traditional owner and/or Elder for specific Country and is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use an understanding of traditional cultural frameworks for Aboriginal peoples at work	1.1 Relationship to the land is integrated into daily work routines
	1.2 Relationships of Aboriginal <i>objects</i> , features and <i>cultural landscapes</i> to <i>Aboriginal beliefs</i> are determined
	1.3 The interrelationship of discrete <i>Aboriginal-sites</i> to cultural frameworks is determined
	1.4 Traditional knowledge, customs and cultural practices in managing Country are acknowledged and respected
2. Recognise the traditional social frameworks for Aboriginal peoples	2.1 Language groups and general lore/laws and customs are shared
	2.2 Extended family structures and clans in physical and geographical locations are identified
	2.3 Totemic structures and associated stories that relate to ancestral beings from the <i>Creation Period</i> are related to landscape features and sites
	2.4 Social structures that define the social positions, behaviours and obligations are classified in kinship names, sections and networks
	2.5 The kinship system determining roles and responsibilities, marriage unions, ceremonial relationships, funeral roles and behaviour patterns with other kin are identified
	2.6 Marriage relationships resulting from the union of two moieties and/or skin names are determined
	2.7 Gender roles are recognised and respected
3. Relate Aboriginal spirituality to the landscape	3.1 <i>Aboriginal beliefs</i> that determine <i>Aboriginal cultural protocols</i> are acknowledged and recorded
	3.2 The connection between spirituality and the land is defined in

ELEMENT	PERFORMANCE CRITERIA
	<p>local and trans-local terms of identity, culture and food</p> <p>3.3 The historical and present living environments are related to <i>Dreaming</i> stories and <i>cultural knowledge</i></p> <p>3.4 Cultural language and customs embedded in the relationship to the land and <i>Aboriginal-sites</i> are recounted</p> <p>3.5 Creation stories, oral histories, kinship and totemic relationships to the cultural landscape are defined</p> <p>3.6 The sense of belonging to the land and culture embedded in landscape are recounted in culturally appropriate ways</p> <p>3.7 Elements of spirituality are expressed in ceremony, rituals, stories, dance, song, art and language</p>
<p>4. Relate the interactions between Dreaming, traditional beliefs and ceremonies to Aboriginal-sites work</p>	<p>4.1 Variable <i>cultural disintegration</i> in modern evolving <i>cultural landscapes</i> is identified</p> <p>4.2 The effects of <i>cultural disconnection</i> with the land, spirituality and ceremonial expressions of culture are recorded</p> <p>4.3 <i>Impacts</i> of disintegration and disconnection on Aboriginal-sites are recorded</p> <p>4.4 The evolving nature of Dreaming is acknowledged and respected</p> <p>4.5 Current trends in <i>mainstream culture and heritage</i> and opportunities and threats to the Aboriginal-sites work sector are identified and documented</p>

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills include:****Ability to:**

- interconnect diverse elements of Aboriginal culture and societies
- relate and recount Aboriginal spirituality
- recognise and apply Aboriginal beliefs and protocols
- use oral communication skills/language competence to question, actively listen, ask for clarification and seek advice from Traditional Owners, and/or Elders
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- research skills to source information orally from Elders, from records in archives, archival programs, archival principles and processes

**Required knowledge includes:****Knowledge of:**

- how to source appropriate cultural and lore/law authority for specific Country and/or sites
- protocols and customs relating to disclosure of knowledge about Country
- Aboriginal cultural and social frameworks
- ancestral beliefs
- genealogy
- kinship names, sections and networks
- totems, moieties, skin names
- Dreaming
- rules and access to cultural knowledge limitations
- indigenous communities and social structures
- indigenous cultural customs and heritage
- history of Aboriginal dispossession in Australia
- dispossession and land rights legislation
- Community guidelines and protocols
- information collection and documentation procedures
- Cultural and Heritage Legislation or relevant NPWS legislation

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and participation with Traditional Owners and/or Elders and custodians of that specific Country.</p> <p>In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of <i>Cultural Units</i> to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.</p> <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge. Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• explain traditional Aboriginal belief systems</li> <li>• identify examples and impacts of disintegration and disconnection with Aboriginal culture</li> <li>• describe the relationship between the land and environment and Aboriginal peoples in culturally relevant ways</li> <li>• explain the relationship between Dreaming, Traditional beliefs, Ceremony and Sites</li> <li>• demonstrate application of conceptual Aboriginal worldview knowledge to practical Sites work under observation</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Competency requires the application of conceptual knowledge of traditional beliefs in work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.</p> <p>Assessment must ensure access to and observation by recognised cultural lore/law men and/or women who hold the Certificate III in Aboriginal-sites Work</p>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess comprehension and the application of Aboriginal worldviews and beliefs to practical skills.</p> <p>The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• assessment of written reports</li> </ul>

	<ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• Observation of participation in Ceremony and/or Sites work related to the knowledge and skills outlined in this unit</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• AHCILM306A Follow Aboriginal cultural protocols</li> <li>• AHCASW308A Apply cultural significance to Aboriginal-sites and landscapes</li> </ul> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Aboriginal objects*** may include:

- physical objects such as stone tools, Aboriginal-built fences and stockyards, scarred trees, the remains of fringe camps
- material deposited on the land, such as middens
- the ancestral remains of Aboriginal people
- art and artworks
- shells
- non-human bones and organic materials

<p><i>cultural landscapes</i> may include:</p>	<ul style="list-style-type: none"> <li>• places and areas made up of living stories that have connections to the past and can include natural resources, objects, customs and traditions (and their contexts)</li> <li>• places of land, sea and air where cultural and natural elements are considered together</li> </ul>
<p><i>Aboriginal beliefs</i> may refer to:</p>	<ul style="list-style-type: none"> <li>• connection to Country</li> <li>• creation events</li> <li>• structure of Community such as lore/law men and women, elders and custodians</li> <li>• practicality and purpose</li> <li>• appropriate behaviour, protocols and restrictions</li> <li>• spiritual value of knowledge and stories</li> <li>• communal ownership of some knowledge and material</li> <li>• intergenerational ownership of some knowledge and material</li> <li>• oral tradition of passing on knowledge and responsibilities</li> <li>• roles as custodians of specified knowledge, ceremony, designs, information</li> <li>• kinship and relationships</li> <li>• storytelling</li> </ul>
<p><i>Aboriginal-sites</i> may include:</p>	<ul style="list-style-type: none"> <li>• shelters with deposits</li> <li>• open camp site</li> <li>• midden</li> <li>• shelter with midden</li> <li>• shelter with art</li> <li>• isolated find</li> <li>• undefined sites</li> <li>• axe grinding grooves</li> <li>• bora/ceremonial ring</li> <li>• burial site</li> <li>• rock engraving</li> <li>• scarred tree</li> <li>• carved tree</li> <li>• natural mythological site</li> <li>• restricted site</li> <li>• quarry</li> <li>• ochre quarry</li> <li>• fish trap</li> <li>• stone arrangement</li> <li>• mound (oven)</li> <li>• mia mia</li> </ul>

	<ul style="list-style-type: none"> <li>• waterhole (well)</li> <li>• contact/mission</li> <li>• abraded grooves</li> <li>• Aboriginal Place (declared under NPW Act)</li> <li>• Aboriginal Area (declared under NPW Act)</li> <li>• protected archaeological site</li> <li>• conservation agreement</li> <li>• massacre</li> <li>• reserve</li> </ul>
<p><b><i>Dreaming and Creation Period</i></b> may be described as:</p>	<ul style="list-style-type: none"> <li>• This is a Western term. According to Aboriginal belief, all life as it is today - Human, Animal, Bird and Fish is part of one vast unchanging network of relationships which can be traced to the Great Spirit Ancestors of the Dreamtime. The Dreamtime is the Aboriginal understanding of the world, of its creation, and its great stories. The Dreamtime is the beginning of knowledge, from which came the laws of existence. For survival these laws must be observed. The Dreaming world was the old time of the Ancestor Beings. They emerged from the earth at the time of the creation. Time began in the world the moment these supernatural beings were "born out of their own Eternity". The Dreamtime continues as the "Dreaming" in the spiritual lives of aboriginal people today. The events of the ancient era of creation are enacted in ceremonies and danced in mime form. Song lines and song chant relates the story of events of those early times and brings the power of the dreaming to bear of life today.</li> </ul>
<p><b><i>Aboriginal cultural protocols</i></b> may include</p>	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of objects and human remains</li> <li>• issues of ownership (clans/nations)</li> </ul>

	<ul style="list-style-type: none"> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• ways in which consultations should be conducted</li> </ul>
<b><i>Cultural knowledge</i></b> may include:	<ul style="list-style-type: none"> <li>• aboriginal land, landscape features, rivers, lakes and sea resources and their uses, and the relationships between plants, animals and individuals, clans and Community</li> <li>• aboriginal beliefs, values, spirituality, language, lore/law, customs, gender roles, kinship networks, factions, moieties, and speaking rights</li> <li>• ceremonies, rituals, stories, song, dance and art</li> <li>• traditional and current land management practices</li> <li>• aboriginal-sites, places, objects, material and landscapes</li> <li>• names, locations and meanings</li> <li>• aboriginal cultural protocols</li> <li>• aboriginal cultural heritage</li> <li>• the cultural significance of Aboriginal knowledge</li> </ul>
<b><i>Cultural disintegration</i></b> may include:	<ul style="list-style-type: none"> <li>• total loss of languages and/or cultural stories and ceremony for a specific area</li> <li>• non-existence of Aboriginal people groups who formerly lived and/or accessed specific lands</li> </ul>
<b><i>Cultural disconnection</i></b> may include:	<ul style="list-style-type: none"> <li>• aboriginal people who have little or no cultural and/or language knowledge</li> <li>• aboriginal people who may experience varying levels of a lack of knowing of their cultural, language and skin group and associated cultural practices</li> </ul>
<b><i>Impacts of disintegration and disconnection</i></b> may include:	<ul style="list-style-type: none"> <li>• social, cultural, religious, economic, spiritual, language factors and outcomes</li> <li>• aboriginal perspectives</li> </ul>
<b><i>Mainstream culture and heritage trends</i></b> may be governed by:	<ul style="list-style-type: none"> <li>• all States and Territories</li> <li>• a range of industry sectors including non-specific sites sectors such as museums.</li> <li>• National Parks and Wildlife jurisdictions - state and federal</li> <li>• Catchment Management and Authority contexts</li> <li>• Office of Environment and Heritage contexts</li> </ul>

## **Unit Sector(s)**

Aboriginal-sites work

# AHCASW303A Identify and record Aboriginal-sites, objects and cultural landscapes

## Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

## Unit Descriptor

This unit covers the process of recording information and knowledge on Country from both an Aboriginal and non-Aboriginal perspective.

## Application of the Unit

This unit applies to working on Country and the identification and recording of Aboriginal-sites, objects and cultural landscapes on Country. The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owner/s and/or Elder/s for specific Country and is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify Aboriginal-sites, objects and materials and cultural landscapes on Country	1.1 Appropriate <i>cultural authorities</i> are identified and consulted 1.2 Approval to be on Country and perform identification and recording work is obtained 1.3 Boundaries and extent of Country are determined according to Community guidelines and <i>Aboriginal cultural protocols</i> 1.4 Determine details of land management and maintenance practices 1.5 Aboriginal <i>materials</i> and <i>objects</i> are identified accurately 1.6 Aboriginal <i>cultural landscapes</i> and <i>Aboriginal-sites</i> are identified accurately 1.7 The interrelationship of discrete Aboriginal-sites to cultural landscapes and Indigenous land management is determined
2. Utilise the relevant Information Management System (IMS)	2.1 The relevant government jurisdiction is determined 2.2 The relevant <i>Information Management System</i> (IMS) in operation and the organisation responsible for maintaining the system are researched and determined 2.3 Access restrictions to the IMS and confidentiality measures for recording secret, sacred materials are applied 2.4 The IMS is accessed and relevant options are selected 2.5 Transfer of site, feature and/or cultural landscape information is initiated and maintained over time
3. Record information on Aboriginal-sites, objects and cultural landscapes	3.1 Information and data collected about the Aboriginal site, feature or landscape is used according to Community guidelines and Aboriginal cultural protocols 3.2 Practices which could damage the level of trust and respect between stakeholders, negotiating parties and the Community are acknowledged and avoided 3.3 <i>Site context</i> , location and <i>information data</i> is categorised and recorded accurately 3.4 <i>Feature data</i> is categorised and recorded accurately

**ELEMENT**

**PERFORMANCE CRITERIA**

3.5 Aboriginal Community interpretations and recommendations are recorded

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- collect site, feature and cultural landscape information and data
- identify, describe and document site, feature and cultural landscape information
- perform Information Management System (IMS) operations
- operate according to Community guidelines and Aboriginal cultural protocols
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from Traditional Owners/s, Elders, Supervisor, etc.
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- exercise discretion and confidentiality

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- designated cultural areas and features, boundaries and extent of Country
- local Aboriginal names for plants, animals and landscape features
- basic ecological concepts
- Cultural and Heritage Legislation or relevant NPWS legislation
- protocols and customs relating to disclosure of knowledge about Country
- sustainable environmental practices
- legislative and enterprise requirements relative to workplace health and safety and the environment

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.

In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of *Cultural Units* to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.

The evidence required to demonstrate competency in this unit must be relevant to workplace operations on Country and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge. Candidates must demonstrate evidence of the ability to:

- record details of Aboriginal-sites, objects and cultural landscapes consistent with the requirements of the relevant IMS
- record and collate information on Aboriginal culture and history for Country whilst following Aboriginal cultural protocols
- use information on sites, objects and cultural landscapes according to Community guidelines and Aboriginal cultural protocols
- identify appropriate cultural authorities for a Community, Site and/or story and/or ceremony
- identify cultural information, material and cultural expression appropriate to be shared
- determine how natural resources relate to cultural protocol, spirituality, art, environment, values, beliefs and lore/law
- understand the cultural rights and responsibilities when using Community knowledge, information and material

	<ul style="list-style-type: none"> <li>• identify groups to be consulted in relation to owners/custodians of cultural and Community knowledge, information and/or material</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting on Country</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• Candidates who have gained relevant knowledge and skills through their life experience</li> <li>• Access restrictions to IMS and confidentiality measures for recording secret, sacred materials</li> <li>• Use of the jurisdictional IMS and/or handheld PDA devices may be included as assessment resources</li> </ul>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in recognising and recording Aboriginal-sites, objects and cultural landscapes. The primary method of assessment for this unit should include participation on Country by candidates in simulated or actual work practices relevant to Sites work.</p> <p>The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate on Country identifying sites, objects and describing cultural landscapes</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Ceremony and/or Sites work related to the knowledge and skills outlined in this unit.</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <p>AHCASW305A Work with Aboriginal ceremonial</p>

	<p>secret sacred materials</p> <p>AHCASW308A Apply cultural significance to Aboriginal-sites and landscapes</p> <p>AHCASW310A Move and store Aboriginal cultural material</p> <p>AHCASW301A Protect places of Aboriginal cultural significance</p> <p>AHCASW311A Apply relevant legislation in Aboriginal-sites work</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>
--	---

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>cultural authorities</i> may include:</p>	<p>Cultural authority refers to the most appropriate senior person/s that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder, Aboriginal Land Council, etc.</p> <p>A ceremonial/cultural manager in terms of Aboriginal customary law means someone who does the work either under the direct supervision of the Aboriginal Owner or does the work that is authorised by the Owner. In a ceremony for example, the ceremonial manager(s) may provide the food and do the performance (work). Traditional roles and responsibilities swap over depending on a person’s status in any given situation – i.e.– whose land / estate one is on for business.</p>
<p>Aboriginal <i>cultural protocols</i> may include:</p>	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> </ul>

	<ul style="list-style-type: none"> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> <li>• Interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of artefacts</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• ways in which consultations should be conducted</li> </ul>
<p><b><i>Aboriginal materials and objects</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• physical objects such as stone tools, Aboriginal-built fences and stockyards, scarred trees, the remains of fringe camps</li> <li>• material deposited on the land, such as middens</li> <li>• the ancestral remains of Aboriginal people</li> <li>• stones and stone tools</li> <li>• art and artworks</li> <li>• shells</li> <li>• non-human bones and organic materials</li> </ul>
<p><b><i>cultural landscapes</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• places and areas made up of living stories that have connections to the past and can include natural resources, objects, customs and traditions (and their contexts)</li> <li>• places of land, sea and air where cultural and natural elements are considered together</li> </ul>
<p><b><i>Aboriginal-sites</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• shelters with deposits</li> <li>• open camp site</li> <li>• midden</li> <li>• shelter with midden</li> <li>• shelter with art</li> <li>• isolated find</li> <li>• undefined sites</li> <li>• axe grinding grooves</li> </ul>

	<ul style="list-style-type: none"> <li>• bora/ceremonial ring</li> <li>• burial site</li> <li>• rock engraving</li> <li>• scarred tree</li> <li>• carved tree</li> <li>• natural mythological site</li> <li>• restricted site</li> <li>• quarry</li> <li>• ochre quarry</li> <li>• fish trap</li> <li>• stone arrangement</li> <li>• mound (oven)</li> <li>• mia mia</li> <li>• waterhole (well)</li> <li>• contact/mission</li> <li>• abraded grooves</li> <li>• Aboriginal Place (declared under NPW Act)</li> <li>• Aboriginal Area (declared under NPW Act)</li> <li>• protected archaeological site</li> <li>• conservation agreement</li> <li>• massacre</li> <li>• reserve</li> </ul>
<p><b><i>Information Management System (IMS)</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Region or State based sites information management systems</li> <li>• Aboriginal Heritage Information Management System (AHIMS)</li> <li>• Aboriginal Cultural Heritage Register and Information System (ACHRIS)</li> <li>• Aboriginal Information Management System (AIMS)</li> <li>• Aboriginal Heritage Management System (AHMS)</li> <li>• Cultural Site Management System</li> </ul>

## Unit Sector(s)

Aboriginal-sites work

## AHCASW304A Identify Indigenous culturally significant plants

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Unit Descriptor

This unit covers the process of observing, recording and reporting on the presence of Indigenous plants against criteria provided by a supervisor or as required under legislation, regulations, and or community protocols. This unit involves the recognition of Indigenous plants that are commonly encountered in land management situations and covers knowledge of Indigenous plant identification techniques, Indigenous plant names, community/organisational procedures for obtaining and supplying advice and information about Indigenous plants, and community/organisational expectations about the range and number of Indigenous plants to be recognised. This unit has a particular focus on culturally significant Indigenous plants, management and conservation.

### Application of the Unit

This unit applies to the identification and recording of Indigenous plants, local bushland and bush foods on Country. The unit applies to working with lore/law men and women either as an autonomous worker or under the supervision and cultural authority of Traditional Owner(s) and/or Elder(s) for specific Country. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for plant recognition	1.1 Identify <i>range of Indigenous plants</i> according to job or client needs 1.2 Identify and locate <i>resources</i> required for use in recognition activity 1.3 Identify, select and prepare <i>processes</i> for Indigenous plant recognition including consultation and seeking approval from relevant cultural authorities to be on specific Country
2. Recognise specified Indigenous plants	2.1 Name specified Indigenous plants according to their identifiable characteristics and by their <i>Indigenous name</i> 2.2 Determine plant habits, <i>characteristics</i> and significant features according to enterprise requirements 2.3 Seek advice from <i>cultural authorities</i> and/or supervisors when necessary and where appropriate in the recognition activity 2.4 Observation activities minimise degradation and disturbance and comply with legislation and workplace health and safety requirements
3. Record recognition of Indigenous plants	3.1 Determine cultural uses and/or significance of specified Indigenous plants 3.2 <i>Document</i> information about Indigenous plants and add to reference collection according to organisational requirements 3.3 Update reference collection if new Indigenous plants are recognised 3.4 Determine disposal techniques for plant debris if specimen collection is necessary
4. Identify local	4.1 Determine the relationship between local foods, general

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<i>bushland and/or bush foods</i> and their uses	health and the land in Aboriginal culture 4.2 Locate and gather information from a range of sources about access to bush foods 4.3 Identify local Indigenous plants using their common and/or cultural names 4.4 Identify Indigenous cultural uses of available bush resources for food and medicine 4.5 Identify <i>land management practices and conservation of Indigenous species</i>

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- plan and organise observations
- recognise flora
- collect and record information
- interpret data
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- recognise the range of Indigenous plants specific to the enterprise or locality
- describe plant attributes
- describe main purpose of species identified within the organisational or cultural context
- describe any specific handling requirements and/or growth requirements to facilitate management and conservation of the species
- use simple keys to identify and describe Indigenous plants
- communicate with customers and clients
- understand cultural protocols in relation to accessing and using information about culturally significant species
- interpret questions effectively
- explain information about the Indigenous plants specific to the organisation

### Required knowledge includes:

---

#### Knowledge of:

- criteria used to group species
- common and scientific names of Indigenous plants and animals
- biological species occurring in the study area
- the importance, value or potential impact of the species in a designated area
- rare and endangered species
- undesirable Indigenous plants (weeds) and animals
- maps and grid references
- a range of plant identification techniques and plant names
- enterprise procedures for obtaining and supplying advice and information about Indigenous plants
- organisational expectations relating to the range and number of Indigenous plants to be recognised

- cultural protocols for obtaining and utilising information about Indigenous plants
- nutritional and medicinal purposes of bushland and/or bush foods
- land management and conservation techniques

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The delivery and assessment against this unit must comply with Community protocols and be carried out in consultation with and participation with Traditional Owners and/or Elders and custodians of that specific Country.</p> <p>In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of <i>Cultural Units</i> to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.</p> <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge. Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• observe and accurately identify species of Indigenous plants in a natural area</li> <li>• record and report observations in required format</li> <li>• carry out a survey of Indigenous plants in a natural area causing minimal disruption to the environment</li> <li>• explain and/or demonstrate uses of available bush resources for food and medicine</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>This is a practical unit utilising the local bushland and/or coastal areas and the knowledge of experts and where available, of local Aboriginal Traditional Owners and/or Elders.</p>

	<p>The focus of assessment for this unit will depend on the industry, workplace, or Community setting. Assessment must be contextualised to meet the needs of the particular group. Assessment context must provide for:</p> <ul style="list-style-type: none"> <li>• an appropriate Community or workplace setting</li> <li>• involvement of people approved by Traditional Owners and/or Elders of the relevant local Aboriginal Community</li> <li>• candidates who have gained relevant knowledge and skills through their life experience</li> </ul> <p>Competence in recognising Indigenous plants requires evidence that a person can identify and utilise available resources and equipment to identify Indigenous plants accurately. The skills and knowledge required to recognise Indigenous plants must be transferable to different work environments. For example, this could include different Indigenous plants, workplace settings, and different cultural experiences.</p>
<b>Method of assessment</b>	<p>Competency requires the application of work practices under work conditions. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate on Country identifying Indigenous plants and describing food, medicinal and cultural relationships</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• portfolio of evidence, including items such as third party reports; relevant experience; employer or client statements; work documentation; written or visual representations of stories; audio or video tape recordings; photographs; PowerPoint presentations; art works; oral presentations or written reports; glossary of terminology</li> </ul> <p><b>Assessment methods</b> should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English), remote communities and those with interrupted schooling.</p>
<b>Guidance information for</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is</p>

<b>assessment</b>	recommended, for example AHCILM306A Follow Aboriginal cultural protocols  Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country and/or in a keeping place facility for this unit.
-------------------	--

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Range of Indigenous plants</i></b> may include:	<ul style="list-style-type: none"> <li>• native or introduced species including weeds</li> <li>• indigenous plants will comprise those commonly encountered within the industry workplace</li> </ul>
<b><i>Resources</i></b> may include:	<ul style="list-style-type: none"> <li>• enterprise or public library</li> <li>• business and research organisation websites</li> <li>• suppliers and contractors</li> <li>• enterprise supervisor and team colleague</li> <li>• experience, and experts in the local area or industry sector</li> <li>• personal or enterprise reference collection</li> </ul>
<b><i>Processes</i></b> may include:	<ul style="list-style-type: none"> <li>• literature searches</li> <li>• internet browsing</li> <li>• personal consultation with experts</li> <li>• oral histories</li> <li>• specimen collections</li> <li>• field guides</li> <li>• workplace notes, and use of simple keys</li> </ul>
<b><i>Indigenous plant names</i></b> may include:	<ul style="list-style-type: none"> <li>• common names</li> <li>• botanical names</li> <li>• in Aboriginal communities, language names can be used in lieu of common names</li> </ul>
<b><i>Plant characteristics</i></b> may include:	<ul style="list-style-type: none"> <li>• shape</li> <li>• size</li> <li>• colour</li> <li>• texture</li> </ul>

	<ul style="list-style-type: none"> <li>• presence of hairs and spikes on leaves</li> <li>• stem, fruit, flower or seed</li> </ul>
<b><i>Cultural authorities</i></b> may include:	<p>Cultural authority refers to the most appropriate senior person(s) that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder, Aboriginal Land Council, etc.</p> <p>A ceremonial/cultural manager in terms of Aboriginal customary law means someone who does the work either under the direct supervision of the Aboriginal Owner or does the work that is authorised by the Owner. In a ceremony for example, the ceremonial manager(s) may provide the food and do the performance (work). Traditional roles and responsibilities swap over depending on a person's status in any given situation, ie, whose land/estate one is on for business.</p>
<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• written description of the plant species including common Aboriginal and/or botanical names</li> <li>• visible characteristics</li> <li>• details of occurrence or origin</li> <li>• optimum growth requirements, and/or a photographic record of the plant</li> <li>• a herbarium of plant samples preserved according to the requirements of the enterprise or industry sector</li> </ul>
<b><i>Bushland and/or bush foods</i></b> may include:	Any plant that grows in the native Australian bush that is edible or partly edible, that may be used for sustenance, seasoning, or preservation, or for medicinal purposes or part of traditional ceremony
<b><i>Land management and conservation techniques</i></b> may include:	<ul style="list-style-type: none"> <li>• understanding individual species and habitat requirements</li> <li>• ensuring the survival of the species through passing down of knowledge</li> <li>• harvesting conservative amounts during an appropriate time of year</li> <li>• not causing damage to surrounding environs when collecting</li> </ul>
<b><i>Indigenous Plant species</i></b> may include:	<ul style="list-style-type: none"> <li>• species covering listed threatened species</li> <li>• listed notifiable or noxious weeds</li> <li>• indigenous plants not previously seen at regularly visited site</li> <li>• indigenous plants to be reported under enterprise or industry guidelines</li> </ul>

## Unit Sector(s)

Aboriginal-sites work

# AHCASW305A Work with Aboriginal ceremonial secret sacred materials

## Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

## Unit Descriptor

This unit provides an awareness of the protocols involved in Aboriginal culture as these relate to individuals and communities, specifically in relation to materials with restrictions on access for cultural reasons. The unit covers Community cultural processes including the need to identify the appropriate person/s when approaching a Community and the cultural and social rules associated with that task.

## Application of the Unit

This unit applies to following Aboriginal cultural protocols when coming into contact and working with cultural materials defined as Aboriginal ceremonial secret sacred objects. The unit applies to working with this material on Country and off Country where rules apply to limited access to the material for cultural and ceremonial reasons. This unit is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct background research and consultation with Traditional Owners, Community, Cultural Managers/Knowledge holders	<p>1.1 Traditional ownership of <b><i>cultural material</i></b> and <b><i>objects</i></b> is confirmed and appropriate Owners/Cultural Managers and Communities are consulted</p> <p>1.2 Gender requirements for consultations, handling of and access to materials are identified according to <b><i>Aboriginal cultural protocols</i></b></p> <p>1.3 Consultation with Traditional Owner/s, Community groups and experts to determine suitable holding for materials not authorised for general exhibition is undertaken</p> <p>1.4 Permissions from <b><i>cultural authorities</i></b> for access and use of Aboriginal secret, sacred and ceremonial materials are sought and obtained</p> <p>1.5 Consultation with Community to determine culturally appropriate approaches to handling of material and any <b><i>limitations</i></b> on access to materials is undertaken</p> <p>1.6 Confidentiality and neutrality in consultations and dealings with Traditional Owners and Cultural Managers is demonstrated</p>
2. Handle Aboriginal secret sacred cultural material	<p>2.1 Any ceremony and/or procedure associated with seeing, handling and/or moving the material is allowed for and/or carried out</p> <p>2.2 Cultural material is identified, moved, stored, maintained and returned according to <b><i>Aboriginal cultural requirements</i></b> and agreements entered into</p> <p>2.3 Aspects of cultural material requiring repair or attention are noted and passed onto supervisor or person with relevant expertise</p> <p>2.4 Action within scope of own job role is taken or referred to</p>

- relevant personnel as required
- 2.5 Specific Aboriginal cultural requirements are communicated to colleagues
  - 2.6 Appropriate handling and moving equipment is selected and used safely
  - 2.7 Adherence to cultural restrictions and limitations on secret, sacred and ceremonial material is observed
  - 2.8 The handling of cultural material in a manner that protects individual items and assists efficient loading and unloading processes if moving is demonstrated
3. Contribute to a third party storage agreement for holding secret sacred material
    - 3.1 Arrangements for ensuring ongoing consultation and maintenance of relationships with the Traditional Owners/Cultural Managers are established
    - 3.2 The term of the agreement for holding/storing materials is established
    - 3.3 *Specific requirements* for, quarantine procedures, condition reporting and conservation, security arrangements, cyclical auditing, environmental monitoring, database management are established and documented
    - 3.4 An access agreement defining personnel access and conditions of access is established
    - 3.5 Removal of material from the Keeping Place and any cultural and management protocols to be followed are defined in the access agreement and followed
    - 3.6 Confidentiality measures for storage, access, display and use of secret, sacred and ceremonial materials are followed
  4. Contribute to documenting a generational succession plan for passing on ownership of secret sacred material
    - 4.1 Options for inheritance of ownership are discussed with Traditional Owners and/or Elders
    - 4.2 Participate in documenting the process, guidelines and timeframes agreeable to Traditional Owners and Cultural managers for handover of ownership, control and access to secret sacred materials

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- demonstrate respect for cultural diversity and sensitivity to social, cultural and professional values and beliefs
- use cultural sensitivity skills to be sensitive to cultural issues and respectful of different cultural practices
- build and engender trust on sensitive issues with Aboriginal people
- implement Aboriginal cultural protocols
- establish and document agreements
- identify Aboriginal cultural authorities for specific Country in culturally appropriate ways
- use appropriate Aboriginal cultural protocols for Community consultation
- recognise and administer Aboriginal ownership and intellectual property rights
- access, transfer and use cultural information and material
- use appropriate personal and social protocols
- exercise discretion and confidentiality
- enforce access and confidentiality agreements
- use technology to access written, oral or visual source material
- conduct library and internet research
- comprehend and interpret written, oral or visual source material
- exercise judgement on sensitive issues
- apply listening skills
- use oral communication skills
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- cultural authority identification for ceremony in a particular area or site
- ownership relationships for secret, sacred material
- genealogy
- contracts and confidentiality agreements
- selection and use of handling, storage and transport systems
- record-keeping
- organisational procedures and guidelines
- Cultural and Heritage Legislation or relevant NPWS legislation
- sustainable environmental practices

- workplace health and safety requirements

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>This unit requires the involvement and participation of the appropriate cultural authority in the training and assessment tasks, i.e. Traditional Owners and/or Cultural Manager and/or Cultural Knowledge holder and/or Custodian/s.</p> <p>The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.</p> <p>In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of <i>Cultural Units</i> to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers. Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply knowledge of issues that frame the development of cultural protocols</li> <li>• consult effectively with Traditional Owners and relevant Community representatives about the handling, access to and display of cultural material</li> <li>• observe Aboriginal cultural protocols, follow collection management practices and industry cultural requirements when moving, storing, displaying and maintaining cultural material</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting</li> <li>• involvement of people approved by Cultural managers, custodians and/or Traditional Owners</li> </ul>

	<p>for the materials in question</p> <ul style="list-style-type: none"> <li>• access to: <ul style="list-style-type: none"> <li>• cultural material or information on material when access is not available</li> <li>• information about cultural protocols</li> </ul> </li> <li>• appropriately qualified and experienced museum personnel and cultural heritage curators</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess competency in working with secret, sacred materials. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate working on Country or in a keeping place facility consulting and/or working with ceremonial secret, sacred materials. Prior approval and permission should be obtained for the Assessor from any Traditional Owners and/or Cultural managers involved</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Ceremony and/or Sites work related to the knowledge and skills outlined in this unit</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• AHCILM306A Follow Aboriginal cultural protocols</li> <li>• AHCASW308A Apply cultural significance to Aboriginal-sites and landscapes</li> </ul> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country and/or in a keeping place facility for this unit.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>cultural material</i></b> is defined as:</p>	<ul style="list-style-type: none"> <li>• objects, collections, artworks</li> <li>• specimens, structures or sites</li> <li>• archaeological material</li> <li>• books and manuscripts</li> <li>• built heritage</li> <li>• cultural sites and buildings</li> <li>• ethnographic material</li> <li>• film and audio-visual material</li> <li>• flora and fauna</li> <li>• furniture</li> <li>• photographs</li> <li>• technological and industry items</li> <li>• textiles</li> <li>• works on paper and canvas</li> </ul>
<p><b><i>objects</i></b> may include</p>	<ul style="list-style-type: none"> <li>• physical objects such as stone tools, Aboriginal-built fences and stockyards, scarred trees, the remains of fringe camps</li> <li>• material deposited on the land, such as middens</li> <li>• the ancestral remains of Aboriginal people</li> <li>• stones and stone tools</li> <li>• art and artworks</li> <li>• shells</li> <li>• non-human bones and organic materials</li> </ul>
<p><b><i>Aboriginal cultural protocols</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> </ul>

	<ul style="list-style-type: none"> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of objects and human remains</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• ways in which consultations should be conducted</li> </ul>
<b><i>cultural authorities</i></b> may include:	Cultural authority refers to the most appropriate senior person/s that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder, Aboriginal Land Council, etc.
<b><i>limitations</i></b> may relate to:	<ul style="list-style-type: none"> <li>• access issues such as gender</li> <li>• consultation with and involvement of appropriate Community members</li> <li>• descriptive or explanatory writing</li> <li>• fragility of material</li> <li>• identification process</li> <li>• interpretation method</li> </ul>
<b><i>cultural requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• access to material and associated research</li> <li>• any ceremony or procedure that should be carried out around the handling and/or moving of material</li> <li>• storage of material</li> <li>• the way material should be transported</li> <li>• use of equipment or tools</li> <li>• who can describe or handle material</li> <li>• who can view or be around material</li> </ul>
<b><i>specific requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• additional protection</li> <li>• cultural protocols, including Indigenous protocols</li> <li>• de-acclimatisation periods for sensitive items</li> <li>• environmentally controlled packaging</li> <li>• object moving equipment</li> <li>• object support systems for moving or transfer</li> <li>• preventive pest management processes</li> <li>• use or non-use of certain items</li> </ul>

## **Unit Sector(s)**

Aboriginal-sites work

## AHCASW306A Use technology in Aboriginal-sites work

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Unit Descriptor

This unit will provide participants with an awareness of the technology and tools available to assist them in their role as an Aboriginal-sites worker and defines the standard required to operate handheld PDAs in sites location and recording; map reading; use digital devices to photograph/record sites, landscapes and objects.

### Application of the Unit

This unit applies to Aboriginal-sites workers utilising technology and other tools to assist them in their work. Aboriginal-sites workers will be working on Country using technological tools to locate and record details of Aboriginal cultural sites, cultural landscapes and cultural material, both on-site as well as recording or processing the information data in an office environment. This unit is also applicable to the work of repatriation workers and anthropologists.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply information literacy skills to meet needs	<p>1.1 Exact nature and extent of <i>information needs</i> for <i>Aboriginal-sites</i> work undertaken in accordance with <i>Aboriginal cultural protocols</i> are determined</p> <p>1.2 The relevant <i>Information Management Systems (IMS)</i> and their applications for Aboriginal-sites are identified</p> <p>1.3 Effective <i>search strategies</i> are developed and appropriate <i>search tools</i> to locate and record information are selected</p> <p>1.4 Aboriginal <i>cultural requirements</i> are followed for access and handling of Aboriginal <i>cultural material</i> and cultural information</p> <p>1.5 <i>Copyright and licensing issues</i> related to access and use of Aboriginal <i>cultural material</i> and cultural information are recognised and applied</p>
2. Set up and use handheld personal digital assistant (PDA) device	<p>2.1 The basic operating and menu settings are identified and set</p> <p>2.2 The screen environment is navigated and manipulated according to needs</p> <p>2.3 Screen icons and access to applications are customised where applicable</p> <p>2.4 The PDA is used to locate and record location and details of the Site and/or cultural landscape, and the output is saved and edited where applicable</p> <p>2.5 The usefulness and relevance of information resources to the sites work context and client needs is assessed</p> <p>2.6 <i>Search results</i> are evaluated and search strategies are adjusted to meet information needs</p> <p>2.7 More <i>advanced features</i> available are identified and used as required</p>
3. Access and use basic connectivity devices	<p>3.1 The basic operating and menu settings are identified and set</p> <p>3.2 External digital devices, such as <i>computer devices</i> or <i>storage devices</i>, are connected to retrieve, copy, move and save information</p> <p>3.3 Physical <i>connectivity</i> of computer devices or storage devices to ensure operation and performance are checked</p> <p>3.4 A printer is connected either through a computer device or</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>directly and <i>printer settings</i> and print data are used</p> <p>3.5 <i>Audio-visual devices</i> are accessed to view and play a multimedia file</p> <p>3.6 Manuals, training booklets and/or online help or help-desks are used to overcome basic difficulties with applications</p>
<p>4. Maintain and operate UHF/HF radio and compass onsite in the context of sites work</p>	<p>4.1 Suitable radio equipment for communication needs is accessible on-site</p> <p>4.2 Radio devices are used effectively and correctly to meet communication needs of self and team onsite</p> <p>4.3 Any storage and transport requirements for compass equipment are applied</p> <p>4.4 A suitable directional compass is identified for orientation needs on-site</p> <p>4.5 Directional compass is used in conjunction with a geographical and topographical map to accurately move around onsite and map coordinates</p>
<p>5. Maintain knowledge of IMS trends and emerging technologies</p>	<p>5.1 Information about current industry trends and emerging technologies in relation to IMS and data collection methods is sourced</p> <p>5.2 Used <i>technology consumables</i> are identified and replaced in accordance with manufacturer's instructions and organisational requirements</p> <p>5.3 <i>Routine maintenance</i> is carried out and/or arranged to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements</p> <p>5.4 <i>Equipment faults</i> are identified accurately and action is taken in accordance with manufacturer's instructions or fault is reported to designated person</p>

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- show respect for cultural diversity and sensitivity to social, cultural and professional values and beliefs
- use cultural sensitivity skills to be sensitive to cultural issues and respectful of different cultural practices
- use technology to access written, oral or visual source material
- conduct library and internet research
- comprehend and interpret written, oral or visual source material
- use literacy skills to interpret user manuals and help functions
- use technical skills to:
  - orient and locate using a compass and map
  - access and use audio-visual devices
  - apply power-management settings
  - back up and save information
  - connect and use peripheral devices
  - input user access details for accessing a personal computer (PC), possibly a networked environment
  - manage mouse (button usage) for different applications
  - navigate a digital graphical user interface (GUI)
  - save and move files to various locations
  - use a keyboard
- exercise discretion and confidentiality
- build and engender trust on sensitive issues with Aboriginal people
- apply sustainable environmental practices
- apply workplace health and safety requirements

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- people who have cultural authority for ceremony in that area or site
- maps and geographic / cultural associations
- audio-visual devices
- basic security functions
- basic software operation and associated applications
- map reading (including topographical maps) and longitudinal and latitudinal coordinates
- digital device functions
- digital device settings
- peripheral devices

- storage devices
- Cultural and Heritage Legislation or relevant NPWS legislation

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The delivery and assessment of this unit must comply with Aboriginal cultural protocols and Community protocols.</p> <p>The following evidence is critical to the judgement of competence in this unit. Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use a digital device, including a handheld PDA</li> <li>• use menu features and navigate around the PDA and IMS functions</li> <li>• use device features to perform tasks</li> <li>• save results of work</li> <li>• read and understand maps in the context of Aboriginal-sites work, including topography maps</li> <li>• observe Aboriginal cultural protocols in the use of technology on Country</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Resources required for assessment include:</p> <ul style="list-style-type: none"> <li>• digital device</li> <li>• computer device</li> <li>• storage device</li> <li>• printer</li> <li>• use of handheld PDA application currently used in industry</li> <li>• appropriate learning and assessment support when required</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in working with secret sacred materials. The following examples are appropriate for</p>

	<p>this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate working on Country with industry related technological devices and maps</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning to assess candidate's knowledge of digital device operations</li> <li>• direct observation of candidate performing basic device-relevant practical skills</li> <li>• direct observation of candidate performing a sequence of routine tasks following clear directions</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <p>AHCILM306A Follow Aboriginal cultural protocols</p> <p>AHCASW308A Apply cultural significance to Aboriginal sites and landscapes</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country and/or in a keeping place facility for this unit.</p>

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Information needs</i></b> may relate to:</p>	<ul style="list-style-type: none"> <li>• authoritative source</li> <li>• currency</li> <li>• format of required information, such as: <ul style="list-style-type: none"> <li>• audio or video recordings</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• electronic files</li> <li>• images</li> <li>• texts</li> <li>• level of readership required, such as suitable for: <ul style="list-style-type: none"> <li>• different age groups</li> <li>• general interest</li> <li>• scholarly and academic research</li> <li>• school assignments</li> </ul> </li> <li>• purpose and intended outcomes of information search</li> </ul>
<i>Aboriginal-sites</i> may include:	<ul style="list-style-type: none"> <li>• shelters with deposits</li> <li>• open camp site</li> <li>• midden</li> <li>• shelter with midden</li> <li>• shelter with art</li> <li>• isolated find</li> <li>• undefined sites</li> <li>• axe grinding grooves</li> <li>• bora/ceremonial ring</li> <li>• burial site</li> <li>• rock engraving</li> <li>• scarred tree</li> <li>• carved tree</li> <li>• natural mythological site</li> <li>• restricted site</li> <li>• quarry</li> <li>• ochre quarry</li> <li>• fish trap</li> <li>• stone arrangement</li> <li>• mound (oven)</li> <li>• mia mia</li> <li>• waterhole (well)</li> <li>• contact/mission</li> <li>• abraded grooves</li> <li>• Aboriginal Place (declared under NPW Act)</li> <li>• Aboriginal Area (declared under NPW Act)</li> <li>• protected archaeological site</li> <li>• Conservation agreement</li> <li>• massacre</li> <li>• reserve</li> </ul>
<i>Aboriginal cultural protocols</i> may include:	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> </ul>

	<ul style="list-style-type: none"> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of artefacts</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• ways in which consultations should be conducted</li> </ul>
<p><b><i>Information Management System (IMS)</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Region or State based sites information management systems</li> <li>• Aboriginal Heritage Information Management System (AHIMS)</li> <li>• Aboriginal Cultural Heritage Register and Information System (ACHRIS)</li> <li>• Aboriginal Information Management System (AIMS)</li> <li>• Aboriginal Heritage Management System (AHMS)</li> <li>• Cultural Site Management System</li> </ul>

<p><i>Search strategies</i> may relate to:</p>	<ul style="list-style-type: none"> <li>• brainstorming keywords and phrases</li> <li>• consulting with colleagues regarding similar searches</li> <li>• consulting with topic experts or external organisations</li> <li>• internet searches</li> <li>• mind mapping</li> <li>• refining or narrowing search terms</li> <li>• searching, such as: <ul style="list-style-type: none"> <li>• electronic databases</li> <li>• external organisations' websites or remote databases</li> <li>• other library catalogues</li> <li>• own library catalogue</li> </ul> </li> <li>• subject headings</li> <li>• topics</li> <li>• use of Boolean operators</li> </ul>
<p><i>Search tools</i> may include:</p>	<ul style="list-style-type: none"> <li>• card/paper indexes</li> <li>• datasets</li> <li>• electronic databases</li> <li>• internet</li> <li>• online catalogues</li> <li>• print or online indexing services.</li> <li>• GPS and topography maps</li> </ul>
<p><i>Cultural requirements</i> may relate to:</p>	<ul style="list-style-type: none"> <li>• access to material and associated research</li> <li>• any ceremony or procedure that should be carried out around the handling and/or moving of material</li> <li>• storage of material</li> <li>• the way material should be transported</li> <li>• use of equipment or tools</li> <li>• who can describe or handle material</li> <li>• who can view or be around material.</li> </ul>
<p><i>Cultural material</i> is defined as objects, collections, artworks, specimens, structures or sites, and includes:</p>	<ul style="list-style-type: none"> <li>• archaeological material</li> <li>• books and manuscripts</li> <li>• built heritage</li> <li>• cultural sites and buildings</li> <li>• ethnographic material</li> <li>• film and audio-visual material</li> <li>• flora and fauna</li> <li>• furniture</li> <li>• photographs</li> <li>• technological and industry items</li> <li>• textiles</li> <li>• works on paper and canvas</li> </ul>

<b>Copyright and licensing issues</b> may include:	<ul style="list-style-type: none"> <li>• conditions of licensing agreements for digital resources</li> <li>• copyright declarations</li> <li>• copyright warnings</li> <li>• restrictions on access and use of electronic resources</li> <li>• restrictions regarding reproduction of works or parts of works</li> <li>• cultural intellectual copyright</li> <li>• protection of cultural knowledge</li> </ul>
<b>Search results</b> may include	<ul style="list-style-type: none"> <li>• bibliographic citations</li> <li>• explanation of search strategy used</li> <li>• information obtained from websites or external organisations</li> <li>• list of records retrieved from internet search</li> <li>• list of records retrieved from searching electronic databases</li> <li>• results of catalogue search</li> </ul>
<b>advanced features</b> may include:	<ul style="list-style-type: none"> <li>• advanced operations</li> <li>• customising standard settings</li> <li>• integrating with other devices</li> </ul>
<b>Computer devices</b> may include:	<ul style="list-style-type: none"> <li>• tablet</li> <li>• laptop</li> <li>• notebook</li> <li>• PDA</li> <li>• PC</li> </ul>
<b>Storage devices</b> may include:	<ul style="list-style-type: none"> <li>• disks: <ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• Blu-Ray</li> </ul> </li> <li>• flash drives</li> <li>• server</li> <li>• solid-state hard drives</li> <li>• virtual devices</li> </ul>
<b>Connectivity</b> may include:	<ul style="list-style-type: none"> <li>• audio-visual</li> <li>• cable, wireless, infra-red or Bluetooth</li> <li>• internal or via universal serial bus (USB) dongle</li> <li>• network or stand-alone computer</li> <li>• ports: <ul style="list-style-type: none"> <li>• Firewire</li> <li>• high definition multimedia interface (HDMI)</li> <li>• printer</li> <li>• USB</li> </ul> </li> </ul>

<i>Printer settings</i> may include:	<ul style="list-style-type: none"> <li>• cartridge type</li> <li>• layout</li> <li>• number of copies</li> <li>• orientation</li> <li>• paper size</li> <li>• paper tray</li> </ul>
<i>Audio visual devices</i> may include:	<ul style="list-style-type: none"> <li>• data projector</li> <li>• external monitor</li> <li>• headset</li> <li>• microphone</li> <li>• speakers</li> <li>• webcam or digital camera</li> </ul>
<i>technology consumables</i> may include:	<ul style="list-style-type: none"> <li>• back-up tapes</li> <li>• CD-ROM</li> <li>• USB drives</li> <li>• print heads</li> <li>• printer ribbons and cartridges</li> <li>• toner cartridges</li> <li>• zip disks</li> </ul>
<i>routine maintenance</i> refers to:	<ul style="list-style-type: none"> <li>• in-house cleaning and servicing of equipment according to manufacturer's guidelines</li> <li>• periodic servicing by qualified or manufacturer approved, technician</li> <li>• regular checking of equipment</li> <li>• replacing consumables</li> </ul>
<i>Identifying equipment faults</i> refers to:	<ul style="list-style-type: none"> <li>• checking repairs have been carried out</li> <li>• encouraging feedback from work colleagues</li> <li>• keeping a log book of detected faults</li> <li>• preparing a maintenance program</li> <li>• regular back-ups of data</li> <li>• regular OHS inspections</li> <li>• routine checking of equipment</li> </ul>

## Unit Sector(s)

Aboriginal-sites work

## AHCASW307A Map Aboriginal cultural landscapes

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Unit Descriptor

This unit covers the process of mapping an Aboriginal cultural landscape on Country from an Aboriginal perspective.

### Application of the Unit

This unit applies to working on and off Country mapping Aboriginal cultural landscapes. The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owner/s and/or Elder/s for specific Country and is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

### Employability Skills Information

This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the characteristics of Aboriginal cultural landscapes on Country	<p>1.1 Aboriginal <i>cultural landscapes</i> and associated sites and features of <i>cultural significance</i> are accurately identified</p> <p>1.2 The concept of lore/law in the land is determined and applied</p> <p>1.3 Aboriginal cultural landscapes in ecological and archaeological terms, Aboriginal cultural language and spiritual terms, and traditional Aboriginal economic terms are identified</p>
2. Investigate cultural and historical records of an Aboriginal cultural landscape	<p>2.1 Traditional understanding of the cycle of the seasons and meteorological phenomena, and of landform and vegetation Community types in a cultural landscape are researched</p> <p>2.2 Environmental <i>cultural knowledge, cultural connections</i> and relationships with the landscape that are passed down generationally are determined</p>
3. Identify Aboriginal cultural values links to cultural landscapes	<p>3.1 Cultural landscapes and links with Aboriginal cultural and Community knowledge are identified</p> <p>3.2 Creation stories, oral histories, kinship and totemic relationships to the cultural landscape are recounted</p> <p>3.3 Gender access, roles and usage as this relates to the cultural landscape are identified</p> <p>3.4 Aboriginal <i>cultural values</i> in cultural landscapes are identified</p> <p>3.5 Links between <i>archaeological evidence</i> to cultural landscapes are determined</p> <p>3.6 Indicators in the landscape that reveal traditional Aboriginal land management practices are identified</p>
4. Describe Aboriginal cultural practices and beliefs which maintain cultural connections to cultural landscapes	<p>4.1 The identification by <i>cultural authorities</i> of appropriate persons within Communities who hold cultural knowledge is performed</p> <p>4.2 Appropriate Cultural Knowledge holders and/or Cultural Manager for an Aboriginal cultural landscape are identified</p> <p>4.3 The range and interrelationship of <i>Aboriginal beliefs</i> and</p>

**ELEMENT****PERFORMANCE CRITERIA**

---

Aboriginal cultural and ceremonial practices that maintain connection with the cultural landscape are researched and recounted

4.4 The associations of connection to Country through language, stories, song, dance and art is documented if appropriate

4.5 Appropriate measures to ensure adequate cultural maintenance of the cultural landscape are determined

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- collect and document cultural information
- identify cultural Knowledge Holders
- identify cultural value of landform types
- research and recount cultural and ceremonial practices
- operate according to Community guidelines and Aboriginal cultural protocols
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- discuss matters relating to traditional customs with the appropriate people according to Community protocols
- discuss gender roles in a culturally appropriate manner
- recognise general situations in regard to interaction of mainstream law and management with traditional customs
- carry out basic investigative research on areas of use of traditional customs
- observe protocols for entry to traditional lands
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from Traditional Owners/s, Elders, Supervisor, etc.
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.
- exercise discretion and confidentiality

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- designated cultural areas and features of Country, boundaries and extent of Country
- Aboriginal cultural values of landform types
- archaeological evidence of landform types
- creation stories, oral histories, kinship and totemic relationships to the cultural landscape
- key principles, values and practices of Aboriginal cultural knowledge
- Community lore/laws, customs and speaking rights
- connection to Country through stories, song, dance and art
- protocols and customs relating to disclosure of knowledge about Country
- Cultural and Heritage Legislation or relevant NPWS legislation
- sustainable environmental practices
- legislative and enterprise requirements relevant to workplace health and safety and the

environment

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.

In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of *Cultural Units* to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.

The evidence required to demonstrate competency in this unit must be relevant to workplace operations on Country and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge. Candidates must demonstrate evidence of the ability to:

- Explain Aboriginal cultural landscapes in ecological and archaeological terms, Aboriginal cultural, language and spiritual terms and traditional Aboriginal economic terms
- Relate creation stories, oral histories, kinship and totemic relationships to the cultural landscape
- Use information on sites, objects and cultural landscapes according to Community guidelines and Aboriginal cultural protocols
- Identify appropriate cultural authorities for a Community, Site and/or story and/or ceremony
- Research the range and interrelationship of Aboriginal cultural and ceremonial practices whereby connection with the cultural landscape is maintained

<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting on Country</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• candidates who have gained relevant knowledge and skills through their life experience</li> </ul> <p>Resources for assessment in this unit may include:</p> <ul style="list-style-type: none"> <li>• Culture and Heritage guidelines and legislation in different jurisdictions</li> <li>• State library and archival information</li> <li>• Burra Charter</li> <li>• Archaeology industry guidelines, procedures and policies</li> </ul>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in recognising and recording Aboriginal-sites, artefacts and cultural landscapes. The primary method of assessment for this unit should include participation on Country by candidates in simulated or actual work practices relevant to Sites work.</p> <p>The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate on Country and in Aboriginal communities describing and mapping Aboriginal cultural landscapes</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Ceremony and/or Sites work related to the knowledge and skills outlined in this unit</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

	<p>AHCILM306A Follow Aboriginal cultural protocols</p> <p>AHCASW305A Work with Aboriginal ceremonial secret sacred materials</p> <p>AHCASW308A Apply cultural significance to Aboriginal-sites and landscapes</p> <p>AHCASW311A Use relevant legislation in Aboriginal-sites work</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Cultural landscapes</i></b> may include:	<ul style="list-style-type: none"> <li>• places and areas made up of living stories that have connections to the past and can include natural resources, objects, customs and traditions (and their contexts)</li> <li>• places of land, sea and air where cultural and natural elements are considered together</li> </ul>
<b><i>Cultural significance</i></b> may include:	<ul style="list-style-type: none"> <li>• aesthetic, historic, scientific, social or spiritual value for past, present or future generations</li> <li>• significance embodied in the place itself, its fabric, setting, use, associations, meanings, records, related places and related objects</li> </ul>
<b><i>Cultural knowledge</i></b> may include:	<ul style="list-style-type: none"> <li>• Aboriginal land, landscape features, rivers, lakes and sea resources and their uses, and the relationships between plants, animals and individuals, clans and Community</li> <li>• Aboriginal beliefs, values, spirituality, language, lore/law, customs, gender roles, kinship networks, factions, moieties, and speaking rights</li> <li>• ceremonies, rituals, stories, song, dance and art</li> <li>• traditional and current land management practices</li> <li>• Aboriginal-sites, places, objects, material and landscapes</li> <li>• names, locations and meanings</li> <li>• Aboriginal cultural protocols</li> </ul>

	<ul style="list-style-type: none"> <li>• Aboriginal cultural heritage</li> <li>• the cultural significance of Aboriginal knowledge</li> </ul>
<i>Cultural connections</i> may include:	<ul style="list-style-type: none"> <li>• totemic relationships with Ancestral beings which now form part of the cultural landscape</li> <li>• geographical locations</li> <li>• access to cultural sites, land and cultural landscapes</li> <li>• obligation relationships to protect and maintain place, species, sites and landforms</li> <li>• ceremonial duties</li> <li>• cultural knowledge duties</li> </ul>
<i>Aboriginal cultural values</i> may include:	<ul style="list-style-type: none"> <li>• aesthetic aspects</li> <li>• historic aspects</li> <li>• scientific aspects</li> <li>• social and spiritual elements</li> <li>• cultural knowledge</li> <li>• Ceremonial knowledge</li> <li>• lore/law</li> </ul>
<i>Archaeological evidence</i> may include:	<ul style="list-style-type: none"> <li>• Aboriginal material</li> <li>• objects</li> <li>• pigments</li> <li>• pollen</li> <li>• charcoal</li> </ul>
<i>Cultural authorities</i> may include:	<p>Cultural authority refers to the most appropriate senior person/s that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder, Aboriginal Land Council, etc.</p> <p>A ceremonial/cultural manager in terms of Aboriginal customary law means someone who does the work either under the direct supervision of the Aboriginal Owner or does the work that is authorised by the Owner. In a ceremony for example, the ceremonial manager(s) may provide the food and do the performance (work). Traditional roles and responsibilities swap over depending on a person's status in any given situation – i.e. – whose land / estate one is on for business.</p>
<i>Aboriginal beliefs</i> may refer to:	<ul style="list-style-type: none"> <li>• connection to Country</li> <li>• creation events</li> <li>• structure of Community such as lore/law men and women, elders and custodians</li> <li>• practicality and purpose</li> </ul>

	<ul style="list-style-type: none"><li>• appropriate behaviour, protocols and restrictions</li><li>• spiritual value of knowledge and stories</li><li>• communal ownership of some knowledge and material</li><li>• intergenerational ownership of some knowledge and material</li><li>• oral tradition of passing on knowledge and responsibilities</li><li>• roles as custodians of specified knowledge, ceremony, designs, information</li><li>• kinship and relationships</li><li>• storytelling</li></ul>
--	---

## Unit Sector(s)

Aboriginal-sites work

# AHCASW308A Apply cultural significance to Aboriginal-sites and landscapes

## Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

## Unit Descriptor

This unit covers the theoretical and practical concept of cultural significance in relation to Aboriginal cultural sites and landscapes and uses the Burra Charter as the industry benchmark in assessing significance for culture and heritage work.

## Application of the Unit

This unit applies to those who are working on Country finding Aboriginal-sites and working to assess significance in landscapes on Country. The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owner/s and/or Elder/s for specific Country. This unit is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

- AHCASW302A      Relate Aboriginal culture to sites work
- AHCILM306A      Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define significance within the industry context	<p>1.1 The role and prominence of the Burra Charter in the culture and heritage sector in Australia is investigated</p> <p>1.2 The Burra Charter definition of significance is researched</p> <p>1.3 The <b><i>Burra Charter process</i></b> is applied and the significance features in the process are incorporated in definitions</p>
2. Determine cultural significance	<p>2.1 Cultural Knowledge holders inform the decision-making process to determine the cultural significance of <b><i>Aboriginal-sites</i></b> and places</p> <p>2.2 The determination of Aboriginal people as the primary source of information about the <b><i>cultural significance</i></b> of an Aboriginal site and landscape is acknowledged</p> <p>2.3 Traditional knowledge and practices in managing Country and environment are acknowledged and respected</p> <p>2.4 <b><i>Aboriginal beliefs</i></b> embedded in a place of cultural significance are determined</p> <p>2.5 The embodiment of cultural significance in the place itself, its fabric, setting, use, associations, meanings, records, related places and related objects is recognised</p>
3. Conduct a significance assessment on an Aboriginal site	<p>3.1 The difference between an assessment of cultural significance and a statement of cultural significance is determined</p> <p>3.2 In consultation with colleagues, factors that may impact on the assessment are identified and incorporated into planning work</p> <p>3.3 In collaboration with <b><i>relevant experts</i></b>, information relevant to the assessment of cultural significance is collected</p> <p>3.4 The cultural significance of the site is assessed in accordance with the Burra Charter guidelines</p>

**ELEMENT****PERFORMANCE CRITERIA**

- 
- 3.5 In collaboration with relevant experts, a statement of cultural significance consistent with the assessment of cultural significance findings is prepared
- 3.6 Feedback from colleagues on statement of significance is sought

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- respect cultural diversity and sensitivity to social, cultural and professional values and beliefs
- use technology to access written, oral or visual source material
- conduct library and internet research
- comprehend written, oral or visual source material
- interpret written, oral or visual source material
- apply listening skills
- apply oral communication skills
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- exercise discretion and confidentiality
- record information accurately
- make field notes
- collaborate with other professionals in the field
- read maps
- record photographic material
- draw mud maps
- handle field tools
- undertake test pits or collaborate with expertise
- monitor surface disturbance
- apply mitigation skills

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- landscape archaeology (predictive), individual or in collaboration with expert
- Burra Charter
- vegetation identification
- geographic/geological identification features
- orientation and identification of location
- artefacts and stone objects identification
- compass/dumpy level use
- sustainable environmental practices
- workplace health and safety requirements
- Cultural and Heritage Legislation or relevant NPWS legislation

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and participation with Traditional Owners and/or Elders and custodians of that specific Country.</p> <p>In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of <i>Cultural Units</i> to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.</p> <p>Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify appropriate cultural authorities for a Community, place or for a Site</li> <li>• collaborate with relevant experts to complete an assessment of cultural significance and involvement in an ACHMP</li> <li>• adhere to Burra Charter process and guidelines</li> <li>• identify cultural information, material and cultural expression appropriate to be shared</li> <li>• identify groups to be consulted in relation to owners/custodians of cultural and Community knowledge, information and/or material</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• experts such as Archaeologists, Researchers, Soil Testers, etc. may provide useful assistance and</li> </ul>

	resources for the assessment of this unit
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess competency in understanding cultural significance. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate on Country identifying sites and collecting information for an assessment</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• examples of completed assessments of cultural significance, statements of significance, field notes, ACHMP reports and/or sections</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• AHCILM306A Follow Aboriginal cultural protocols</li> <li>• AHCILM404A Record and document Community history</li> <li>• AHCASW303A Identify and record Aboriginal-sites, artefacts and cultural landscapes</li> <li>• AHCASW305A Work with Aboriginal ceremonial secret sacred materials</li> </ul> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate,

accessibility of the item, and local industry and regional contexts) may also be included.	
<b><i>Burra Charter process</i></b> includes:	<ul style="list-style-type: none"> <li>• the cultural significance of a place and other issues affecting its future are best understood by a sequence of collecting and analysing information before making decisions. Understanding cultural significance comes first, then development of policy and finally management of the place in accordance with the policy</li> <li>• the policy for managing a place must be based on an understanding of its cultural significance</li> <li>• policy development should also include consideration of other factors affecting the future of a place such as the owner's needs, resources, external constraints and its physical condition</li> </ul>
<b><i>Aboriginal-sites</i></b> may include	<ul style="list-style-type: none"> <li>• shelters with deposits</li> <li>• open camp site</li> <li>• midden</li> <li>• shelter with midden</li> <li>• shelter with art</li> <li>• isolated find</li> <li>• undefined sites</li> <li>• axe grinding grooves</li> <li>• bora/ceremonial ring</li> <li>• burial site</li> <li>• rock engraving</li> <li>• scarred tree</li> <li>• carved tree</li> <li>• natural mythological site</li> <li>• restricted site</li> <li>• quarry</li> <li>• ochre quarry</li> <li>• fish trap</li> <li>• stone arrangement</li> <li>• mound (oven)</li> <li>• mia mia</li> <li>• waterhole (well)</li> <li>• contact/mission</li> <li>• abraded grooves</li> <li>• Aboriginal Place (declared under NPW Act)</li> <li>• Aboriginal Area (declared under NPW Act)</li> <li>• protected archaeological site</li> <li>• Conservation agreement</li> <li>• massacre</li> </ul>

	<ul style="list-style-type: none"> <li>• reserve</li> </ul>
<i>cultural significance</i> may include:	<ul style="list-style-type: none"> <li>• aesthetic, historic, scientific, social or spiritual value for past, present or future generations</li> <li>• significance embodied in the place itself, its fabric, setting, use, associations, meanings, records, related places and related objects</li> </ul>
<i>Aboriginal beliefs</i> may refer to	<ul style="list-style-type: none"> <li>• connection to Country</li> <li>• creation events</li> <li>• structure of Community such as lore/law men and women, elders and custodians</li> <li>• practicality and purpose</li> <li>• appropriate behaviour, protocols and restrictions</li> <li>• spiritual value of knowledge and stories</li> <li>• communal ownership of some knowledge and material</li> <li>• intergenerational ownership of some knowledge and material</li> <li>• oral tradition of passing on knowledge and responsibilities</li> <li>• roles as custodians of specified knowledge, ceremony, designs, information</li> <li>• kinship and relationships</li> <li>• storytelling</li> </ul>
<i>Relevant experts</i> may include	<ul style="list-style-type: none"> <li>• archaeologists</li> <li>• Traditional Owners and/or Elders</li> <li>• surveyors</li> <li>• anthropologists</li> <li>• environmental scientists</li> <li>• historians</li> <li>• researchers</li> </ul>

## Unit Sector(s)

Aboriginal-sites work

## AHCASW309A Interpret Aboriginal cultural landscape

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Unit Descriptor

This unit covers the process of interpreting cultural landscapes from an Aboriginal cultural and spiritual perspective. The unit also covers if and how this knowledge may be collected and provided to others.

### Application of the Unit

This unit applies to working on Country and the interpretation of cultural landscapes. The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owner/s and/or Elder/s for specific Country. This unit is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

- AHCASW302A      Relate Aboriginal culture to sites work
- AHCILM306A      Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate cultural knowledge	<p>1.1 The determination of Aboriginal people as the primary source of information about <i>cultural knowledge</i> is acknowledged</p> <p>1.2 The identification by <i>cultural authorities</i> of appropriate persons within communities who hold cultural knowledge is performed</p> <p>1.3 Cultural knowledge is accessed through reference to the appropriate knowledge holders and/or cultural manager</p> <p>1.4 Appropriate cultural authorities are consulted and approval to be on Country is obtained</p> <p>1.5 Boundaries and extent of Country are determined</p> <p>1.6 Ownership rights and intellectual property rights to Aboriginal cultural knowledge are established</p> <p>1.7 Parameters for access and access restrictions in transferring cultural knowledge and information are established</p> <p>1.8 Community lore/laws, customs and speaking rights about cultural knowledge are respected</p> <p>1.9 Key principles, values and practices of Aboriginal cultural knowledge are determined and recorded</p> <p>1.10 Relationships between cultural knowledge and Country are defined according to <i>Aboriginal cultural protocols</i></p> <p>1.11 The acquisition of the history of dispossession from Community sources and available resources is undertaken</p> <p>1.12 Lost connections to Country due to colonisation are recounted</p>
2. Acquire information	<p>2.1 Movement through Country/park/reserve is managed to minimise disturbance and degradation to the park/reserve and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>surrounding environments</p> <p>2.2 The relationships between <i>Aboriginal beliefs</i>, <i>Aboriginal-sites</i>, land features, seasons, artefacts, objects and spirituality are determined</p> <p>2.3 <i>Landscape</i> features and sites on Country, in accordance with their place and role in Dreaming, Aboriginal spirituality and local cultural practices and ceremony, are identified</p> <p>2.4 The association of connection to Country through language, stories, song, dance and art is made</p> <p>2.5 The role of lore and customs in matters of land, family, marriage, kinship, totem, clan and obligation is accounted for</p> <p>2.6 Fauna and flora used for food and medicine are identified and Aboriginal names and common names are used</p> <p>2.7 Knowledge on relationships of plants and animals is investigated from Aboriginal beliefs, land management and cultural perspectives</p> <p>2.8 Simple bush tucker food chains relevant to Country are defined and relationships to the cultural landscape determined</p>
3. Relate information on cultural knowledge to others	<p>3.1 Permissions from cultural authorities, relevant individuals and organisations for access, use and documented Aboriginal cultural information and material are sought and may be obtained or denied</p> <p>3.2 Information on Aboriginal cultural knowledge is provided to those who are authorised to possess that knowledge according to Community guidelines and Aboriginal cultural protocols</p> <p>3.3 Information on cultural knowledge is related in an appropriate format and medium according to Community guidelines and cultural protocols</p> <p>3.4 Requests for disclosure of information on Aboriginal cultural sites, landscapes and cultural material that infringes intellectual property rights of a group or Community are referred to appropriate persons. Requests for disclosure of information on aspects of cultural knowledge by unauthorised individuals are appropriately declined</p>

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- acquire cultural information
- operate according to Community guidelines and Aboriginal cultural protocols
- investigate, use, and document cultural knowledge
- identify locations and patterns of plants and animals in a specific area
- identify plants, animals and resources used for medicine and food
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from Traditional Owners/s, Elders, Supervisor, etc.
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- exercise discretion and confidentiality

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- Aboriginal cultural customs and heritage
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- designated cultural areas and features of Country, boundaries and extent of Country
- key principles, values and practices of Aboriginal cultural knowledge
- Community lore/laws, customs and speaking rights
- connection to Country through stories, song, dance and art
- role of lore and customs in matters of land, family, marriage, kinship, totem, clan and obligation
- protocols and customs relating to disclosure of knowledge about Country
- when and how to relate and document information and when it is not appropriate according to cultural protocols
- Aboriginal communities and social structures
- history of dispossession in Australia
- Aboriginal history and impact of European colonisation
- dispossession and land rights legislation
- legislation and its impact on Aboriginal communities
- Cultural and Heritage Legislation or relevant NPWS legislation
- Aboriginal names for plants, animals and landscape features
- basic ecological concepts
- cultural knowledge about plant and animals relating to a particular Community, group or

region

- role and rights of indigenous peoples in maintaining and controlling cultural knowledge
- individuals who are authorised to possess cultural knowledge
- intellectual and cultural property rights
- legislative and enterprise requirements relevant to workplace health and safety and the environment
- ownership rights
- intellectual property rights and requirements
- copyright rights and requirements
- sustainable environmental practices
- workplace health and safety requirements

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.</p> <p>In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of <i>Cultural Units</i> to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.</p> <p>Particular care should be exercised in the delivery and assessment of training for this unit in relation to who is authorised to interpret and/or "tell the stories" and share knowledge of particular sites and landscapes.</p> <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations on Country and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge. Candidates must demonstrate evidence of the ability to:</p>

	<ul style="list-style-type: none"> <li>• identify details of plant and animal species on Country, their Aboriginal names and their roles and place in the cultural landscape</li> <li>• collate information on Aboriginal culture and history for Country in culturally appropriate ways</li> <li>• collect and use information according to Community guidelines and cultural protocols</li> <li>• identify landscape features and sites on Country in accordance with their place and role in Dreaming, Aboriginal spirituality and local cultural practices and ceremony</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting on Country</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community who possess the cultural knowledge required for this unit</li> <li>• candidates who have gained relevant knowledge and skills through their life experience</li> </ul>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in interpreting cultural landscapes. The primary method of assessment for this unit should include participation on Country by candidates in simulated or actual work practices relevant to Sites work.</p> <p>The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate on Country identifying sites, artefacts and describing cultural landscapes under the supervision of appropriate cultural authority</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Ceremony and/or interpretation work related to the knowledge and skills outlined in this unit</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <p>AHCASW308A Apply cultural significance to Aboriginal sites and landscapes</p> <p>AHCASW302A Relate Aboriginal culture to sites work</p> <p>AHCILM306A Follow Aboriginal cultural protocols</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>
--	---

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Cultural knowledge</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Aboriginal land, landscape features, rivers, lakes and sea resources and their uses, and the relationships between plants, animals and individuals, clans and Community</li> <li>• Aboriginal beliefs, values, spirituality, language, lore/law, customs, gender roles, kinship networks, factions, moieties, and speaking rights</li> <li>• ceremonies, rituals, stories, song, dance and art</li> <li>• traditional and current land management practices</li> <li>• Aboriginal-sites, places, artefacts, objects, material and landscapes</li> <li>• names, locations and meanings</li> <li>• Aboriginal cultural protocols</li> <li>• Aboriginal cultural heritage</li> <li>• the cultural significance of Aboriginal knowledge</li> </ul>
<p><b><i>Cultural authorities</i></b> may include</p>	<p>Cultural authority refers to the most appropriate senior person/s that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder,</p>

	<p>Aboriginal Land Council, etc.</p> <p>A ceremonial/cultural manager in terms of Aboriginal customary law means someone who does the work either under the direct supervision of the Aboriginal Owner or does the work that is authorised by the Owner. In a ceremony for example, the ceremonial manager(s) may provide the food and do the performance (work). Traditional roles and responsibilities swap over depending on a person's status in any given situation – ie – whose land / estate one is on for business.</p>
<p><b><i>Aboriginal cultural protocols</i></b> may include</p>	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, site, and ceremony</li> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of artefacts</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• ways in which consultations should be conducted</li> </ul>
<p><b><i>Aboriginal beliefs</i></b> may refer to:</p>	<ul style="list-style-type: none"> <li>• connection to Country</li> <li>• creation events</li> <li>• structure of Community such as lore/law men and women, elders and custodians</li> <li>• practicality and purpose</li> <li>• appropriate behaviour, protocols and restrictions</li> <li>• spiritual value of knowledge and stories</li> <li>• communal ownership of some knowledge and material</li> <li>• intergenerational ownership of some knowledge and</li> </ul>

	<ul style="list-style-type: none"> <li>material</li> <li>• oral tradition of passing on knowledge and responsibilities</li> <li>• roles as custodians of specified knowledge, ceremony, designs, information</li> <li>• kinship and relationships</li> <li>• storytelling</li> </ul>
<i>Aboriginal-sites</i> may include	<ul style="list-style-type: none"> <li>• shelters with deposits</li> <li>• open camp site</li> <li>• midden</li> <li>• shelter with midden</li> <li>• shelter with art</li> <li>• isolated find</li> <li>• undefined sites</li> <li>• axe grinding grooves</li> <li>• bora/ceremonial ring</li> <li>• burial site</li> <li>• rock engraving</li> <li>• scarred tree</li> <li>• carved tree</li> <li>• natural mythological site</li> <li>• restricted site</li> <li>• quarry</li> <li>• ochre quarry</li> <li>• fish trap</li> <li>• stone arrangement</li> <li>• mound (oven)</li> <li>• mia mia</li> <li>• waterhole (well)</li> <li>• contact/mission</li> <li>• abraded grooves</li> <li>• aboriginal Place (declared under NPW Act)</li> <li>• Aboriginal Area (declared under NPW Act)</li> <li>• protected archaeological site</li> <li>• Conservation agreement</li> <li>• massacre</li> <li>• reserve</li> </ul>
<i>Cultural landscapes</i> may include:	<ul style="list-style-type: none"> <li>• places and areas made up of living stories that have connections to the past and can include natural resources, objects, customs and traditions (and their contexts)</li> <li>• places of land, sea and air where cultural and natural elements are considered together</li> </ul>

## **Unit Sector(s)**

Aboriginal-sites work

## AHCASW310A Move and store Aboriginal cultural material

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Unit Descriptor

This unit covers the protocols involved to handle, pack and unpack Aboriginal cultural material for movement and storage.

### Application of the Unit

This unit applies particularly to working around and with Aboriginal cultural materials and objects and focuses on the specific cultural and consultative requirements for sourcing, handling, and possibly interpreting Aboriginal cultural material. This unit is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

### Employability Skills Information

This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Source Aboriginal cultural material	<p>1.1 Traditional ownership of <i>cultural material</i> is confirmed</p> <p>1.2 The appropriate Traditional custodians and communities to determine suitable keeping places for cultural materials are consulted</p> <p>1.3 The identification by <i>cultural authorities</i> of appropriate persons within communities who hold <i>cultural knowledge</i> relevant to establishing any restrictions on access to materials is performed</p> <p>1.4 Permission and advice for the use of cultural material according to <i>Aboriginal cultural protocols</i> is sought</p> <p>1.5 Cultural material and <i>objects</i> are located, identified and assessed for suitability for moving</p> <p>1.6 Records are completed according to cultural protocols</p> <p>1.7 Issues and protocols in relation to the return of cultural material to local Aboriginal communities are researched</p>
2. Determine movement and storage requirements	<p>2.1 Legislative and occupational health and safety requirements are implemented</p> <p>2.2 The scope of work required for <i>movement and storage</i> of cultural material is assessed and documented</p> <p>2.3 Organisational procedures and guidelines and specific requirements are identified and confirmed with relevant personnel</p> <p>2.4 Future storage requirements are assessed with relevant personnel</p> <p>2.5 The need for specialist expertise is assessed and, if required, access to the expertise is arranged</p>
3. Handle and transfer Aboriginal cultural material	<p>3.1 Cultural material is identified, moved, stored, maintained and returned according to Aboriginal cultural requirements</p> <p>3.2 Aspects of material requiring repair or attention are noted</p> <p>3.3 Action within scope of own job role is taken or <i>relevant personnel</i> are referred to as required</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.4 Specific Aboriginal cultural requirements are communicated to colleagues</p> <p>3.5 Appropriate <i>handling and moving</i> equipment is selected, and used safely</p> <p>3.6 Handling of cultural material is performed in a manner that protects individual items and assists efficient loading and unloading processes</p> <p>3.7 <i>Transportation documentation</i> is prepared</p> <p>3.8 Aboriginal cultural material is transferred to approved location</p>
4. Store cultural material according to Aboriginal cultural requirements	<p>4.1 Cultural material is installed, positioned or stored as required</p> <p>4.2 Specific storage needs of cultural material are based on knowledge of requirements for different types of materials</p> <p>4.3 Work areas are cleared and cleaned according to organisational procedures</p> <p>4.4 Feedback on own work is sought and areas for improvement are noted</p> <p>4.5 Records are stored according to organisational policies and procedures</p>

## Required Skills and Knowledge

### Required skills includes:

---

#### Ability to:

- respect cultural diversity and sensitivity to social, cultural and professional values and beliefs
- be sensitive to cultural issues and respectful of different cultural practices
- build and engender trust on sensitive issues with Aboriginal people
- handle, transfer and store culturally sensitive material
- pack and unpack materials, artefacts and objects
- load and unload materials, artefacts and objects
- assess suitability of movement of material
- use technology to access written, oral or visual source material
- carry out library and internet research
- comprehend written, oral or visual source material
- interpret written, oral or visual source material
- apply listening skills
- apply oral communication skills
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- exercise discretion and confidentiality

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- cultural authority for ceremony in that area or site
- ownership relationships for secret, sacred material
- selection and use of handling, storage and transport systems
- record-keeping
- organisational procedures and guidelines
- Cultural and Heritage Legislation or relevant NPWS legislation
- sustainable environmental practices
- workplace health and safety requirements

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment</p>
--

Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.</p> <p>In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of <i>Cultural Units</i> to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.</p> <p>Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify appropriate cultural authorities for a Community, place or for a Site</li> <li>• apply knowledge of issues that frame the development of cultural protocols</li> <li>• consult effectively with Traditional Owners, Cultural managers and relevant Community representatives about the handling, access to and display of cultural material</li> <li>• observe Aboriginal cultural protocols, follow collection management practices and industry requirements when moving, storing, displaying and maintaining cultural material</li> <li>• involve and collaborate with other industry experts in the handling, moving and storage of cultural material</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• candidates who have gained relevant knowledge and skills through their life experience</li> <li>• appropriately qualified and experienced museum personnel and cultural heritage curators</li> </ul>

<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in moving and storing cultural materials. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate working on Country or in a keeping place facility consulting and/or working with materials. Prior approval and permission should be obtained for the Assessor from any Traditional Owners and/or Cultural managers involved</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Ceremony and/or Sites work related to the knowledge and skills outlined in this unit</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <p>AHCILM306A Follow Aboriginal cultural protocols</p> <p>AHCASW308A Apply cultural significance to Aboriginal-sites and landscapes</p> <p>AHCILM404A Record and document Community history</p> <p>AHCASW305A Work with Aboriginal ceremonial secret sacred materials</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country and/or in a keeping place facility for this unit.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if

<p>used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Cultural material</i></b> is defined as objects, collections, artworks, specimens, structures or sites, and includes:</p>	<ul style="list-style-type: none"> <li>• archaeological material</li> <li>• books and manuscripts</li> <li>• built heritage</li> <li>• cultural sites and buildings</li> <li>• ethnographic material</li> <li>• film and audio-visual material</li> <li>• flora and fauna</li> <li>• furniture</li> <li>• photographs</li> <li>• technological and industry items</li> <li>• textiles</li> <li>• works on paper and canvas</li> </ul>
<p><b><i>Cultural authorities</i></b> may include:</p>	<p>Cultural authority refers to the most appropriate senior person/s that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder, Aboriginal Land Council, etc.</p> <p>A ceremonial/cultural manager in terms of Aboriginal customary law means someone who does the work either under the direct supervision of the Aboriginal Owner or does the work that is authorised by the Owner. In a ceremony for example, the ceremonial manager(s) may provide the food and do the performance (work). Traditional roles and responsibilities swap over depending on a person's status in any given situation – ie – whose land / estate one is on for business.</p>
<p><b><i>Cultural knowledge</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Aboriginal land, landscape features, rivers, lakes and sea resources and their uses, and the relationships between plants, animals and individuals, clans and Community</li> <li>• Aboriginal beliefs, values, spirituality, language, lore/law, customs, gender roles, kinship networks, factions, moieties, and speaking rights</li> <li>• ceremonies, rituals, stories, song, dance and art</li> <li>• traditional and current land management practices</li> <li>• Aboriginal-sites, places, artefacts, objects, material and landscapes</li> <li>• names, locations and meanings</li> <li>• Aboriginal cultural protocols</li> </ul>

	<ul style="list-style-type: none"> <li>• Aboriginal cultural heritage</li> <li>• the cultural significance of Aboriginal knowledge</li> </ul>
<i>Aboriginal cultural protocols</i> may include:	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of artefacts</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• ways in which consultations should be conducted</li> </ul>
<i>Objects</i> may include	<ul style="list-style-type: none"> <li>• physical objects such as stone tools, Aboriginal-built fences and stockyards, scarred trees, the remains of fringe camps</li> <li>• material deposited on the land, such as middens</li> <li>• the ancestral remains of Aboriginal people</li> <li>• stones and stone tools</li> <li>• art and artworks</li> <li>• shells</li> <li>• non-human bones and organic materials</li> </ul>
<i>Movement and storage</i> may be:	<ul style="list-style-type: none"> <li>• externally</li> <li>• internally (within organisation or same building)</li> <li>• short and long distance</li> <li>• short and long-term storage</li> </ul>
<i>Organisational procedures and guidelines</i> may relate to:	<ul style="list-style-type: none"> <li>• cleaning</li> <li>• conservation</li> <li>• environment</li> </ul>

	<ul style="list-style-type: none"> <li>• handling methods</li> <li>• national and international standards for moving and storing materials</li> <li>• purchasing</li> <li>• security</li> <li>• storage arrangements</li> </ul>
<i>Specific requirements</i> may relate to:	<ul style="list-style-type: none"> <li>• additional protection</li> <li>• cultural protocols, including Indigenous protocols</li> <li>• de-acclimatisation periods for sensitive items</li> <li>• environmentally controlled packaging</li> <li>• object moving equipment</li> <li>• object support systems for moving or transfer</li> <li>• preventive pest management processes</li> <li>• use or non-use of certain items</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• couriers</li> <li>• destination personnel</li> <li>• owners of collection material</li> <li>• specialist advisers</li> <li>• store staff</li> <li>• transportation personnel</li> </ul>
<i>Handling and moving equipment</i> may include:	<ul style="list-style-type: none"> <li>• acid-free interleaving or wrapping</li> <li>• CD and DVD cases</li> <li>• containers</li> <li>• coverings</li> <li>• cushioning material</li> <li>• enclosures</li> <li>• folders</li> <li>• gloves</li> <li>• negative sleeves</li> <li>• packing/cotton tape and dispenser</li> <li>• protective enclosures, such as: <ul style="list-style-type: none"> <li>• boxes</li> <li>• canisters</li> <li>• crates</li> <li>• tubing</li> </ul> </li> <li>• protective wrapping, such as: <ul style="list-style-type: none"> <li>• bubble wrap</li> <li>• cardboard</li> <li>• foam packaging</li> </ul> </li> <li>• scissors</li> <li>• trolleys</li> </ul>

	<ul style="list-style-type: none"><li>• trucks</li><li>• tools, such as:<ul style="list-style-type: none"><li>• hammers</li><li>• screw drivers</li><li>• utility knives</li></ul></li></ul>
<i>Transportation documentation</i> may include:	<ul style="list-style-type: none"><li>• delivery details</li><li>• cart notes</li><li>• pro-forma</li><li>• packaging and handling notes</li><li>• inventory</li><li>• instructions</li></ul>

## Unit Sector(s)

Aboriginal-sites work

# AHCASW311A Apply relevant legislation in Aboriginal-sites work

## Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

## Unit Descriptor

This unit describes the knowledge and skills required by the Aboriginal-sites worker to work within the constructs of relevant legislation in their work with Aboriginal-sites, cultural materials and cultural landscapes.

## Application of the Unit

This unit applies to Aboriginal-sites workers working on Country or in other culture and heritage contexts where there are legislative requirements in place.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

Nil

## Employability Skills Information

This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research the relevant legislation	<p>1.1 The scope and coverage of legislation for the relevant jurisdiction is identified</p> <p>1.2 An understanding of the purpose of legislation and amendments that comply with environmental and sustainability requirements is applied over time</p> <p>1.3 Roles and influences of key stakeholders as outlined in the applicable legislation are defined</p>
2. Identify and interpret relevant legislative provisions	<p>2.1 The provisions of the relevant and applicable legislation and case law precedents are identified and determined</p> <p>2.2 <b>Compliance</b> requirements are clarified to confirm understanding and to ensure consistency of interpretation and application</p> <p>2.3 Any <b>competing interests</b> arising from different pieces of legislation with jurisdiction over the one Aboriginal cultural site, landscape or material are interpreted</p> <p>2.4 <b>Social justice principles</b> are incorporated into interpretation of legislative provisions</p> <p>2.5 Terms and definitions in the legislation are interpreted correctly</p>
3. Identify stakeholder requirements	<p>3.1 Needs of <b>clients and stakeholders</b> in relation to relevant legislation are identified</p> <p>3.2 Client and stakeholder situation is analysed and legislative provisions that apply to the circumstances are identified</p> <p>3.3 Own <b>Aboriginal-sites</b> work is conducted in accordance with legislative requirements and following <b>Aboriginal cultural protocols</b> and values</p> <p>3.4 Own limitations and professional boundaries are recognised</p> <p>3.5 The need for assistance is recognised and referrals to expert advisors or advisory organisations are provided</p>
4. Identify strategies in response to the client's needs	<p>4.1 Strategies to apply legislative provisions to the factual circumstances of the case are identified and provided</p> <p>4.2 A range of legal and non-legal strategies is determined according to the needs of the client and stakeholders and taking into consideration all applicable legislative provisions and regulations</p> <p>4.3 Key concepts and understandings of legislative requirements are related to stakeholders in culturally appropriate ways</p>

**ELEMENT****PERFORMANCE CRITERIA**

- 
- 4.4 Compliance requirements are communicated to clients and stakeholders
  - 4.5 Options and possible outcomes to clients and stakeholders are communicated clearly in culturally appropriate ways
  - 4.6 Clients and stakeholders are supported to achieve appropriate 'best possible' outcomes

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- read and interpret legislation and legal documents
- communicate legal concepts and legislative language
- provide stakeholders with an understanding of legislative requirements
- advise clients and stakeholders of compliance requirements
- demonstrate understanding of and adherence to own work role and responsibilities
- follow organisation policies, protocols and procedures
- work collaboratively with colleagues, Community services professionals and other services
- respect cultural diversity and sensitivity to social, cultural and professional values and beliefs
- use technology to access written, oral or visual source material
- research library and internet
- comprehend and evaluate written, oral or visual source material
- interpret written, oral or visual source material
- listen effectively
- use oral communication skills
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- exercise discretion and confidentiality

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- Cultural and Heritage Legislation or relevant NPWS legislation
- interpretation of legislation including case law precedents
- social justice principles
- organisations to which appropriate referrals can be made
- other legislation that may impact on the situation
- legal system of common law and statute law
- legal structures involving tribunals, local court, district court, supreme court etc.
- sustainable environmental practices

## Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment</p>
--

Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with Traditional Owners and/or Elders and custodians of the Country in question.</p> <p>Candidates must demonstrate evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify appropriate and relevant legislation and knowledge of relevant compliance requirements affecting Aboriginal-sites work in a specified jurisdiction</li> <li>• apply the relevant legislation to the circumstances appropriately and accurately</li> <li>• use referral options and other expertise to assist in interpreting and applying legislative requirements</li> <li>• communicate legal concepts and legislative language to Aboriginal clients and stakeholders in culturally appropriate way</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• relevant organisational policy, protocols and procedures</li> <li>• relevant legislation</li> <li>• candidates who have gained relevant knowledge and skills through their life experience</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess competency in applying relevant legislation in Aboriginal-sites work. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate relating to and engaging Aboriginal persons and Aboriginal Community on Country</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in applying relevant legislation in Aboriginal-sites work related to the</li> </ul>

	<p>knowledge and skills outlined in this unit</p> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<b>Guidance information for assessment</b>	<p>This unit can be assessed independently; however holistic assessment practice with other Indigenous Land Management and Aboriginal-sites worker units of competency is encouraged.</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b><i>Compliance</i></b> may include:	<ul style="list-style-type: none"> <li>• meeting relevant laws, by laws and regulations or best practice or codes of practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):</li> <li>• international</li> <li>• commonwealth</li> <li>• state/territory</li> <li>• industry</li> <li>• organisation</li> </ul>
<b><i>Competing interests</i></b> may include:	<ul style="list-style-type: none"> <li>• application of rights under Native Title legislation versus rights under Aboriginal Land Rights legislation</li> </ul>
<b><i>Social justice principles</i></b> may include:	<ul style="list-style-type: none"> <li>• access</li> <li>• equity</li> <li>• participation</li> <li>• fairness</li> </ul>
<b><i>Clients and stakeholders</i></b>	<ul style="list-style-type: none"> <li>• sites workers</li> <li>• Aboriginal Land Councils</li> </ul>

may refer to:	<ul style="list-style-type: none"> <li>• Traditional Owners</li> <li>• Cultural managers</li> <li>• Aboriginal communities</li> <li>• other culture and heritage providers</li> </ul>
<b>Aboriginal-sites</b> may include	<ul style="list-style-type: none"> <li>• shelters with deposits</li> <li>• open camp site</li> <li>• midden</li> <li>• shelter with midden</li> <li>• shelter with art</li> <li>• isolated find</li> <li>• undefined sites</li> <li>• axe grinding grooves</li> <li>• bora/ceremonial ring</li> <li>• burial site</li> <li>• rock engraving</li> <li>• scarred tree</li> <li>• carved tree</li> <li>• natural mythological site</li> <li>• restricted site</li> <li>• quarry</li> <li>• ochre quarry</li> <li>• fish trap</li> <li>• stone arrangement</li> <li>• mound (oven)</li> <li>• mia mia</li> <li>• waterhole (well)</li> <li>• contact/mission</li> <li>• abraded grooves</li> <li>• Aboriginal Place (declared under NPW Act)</li> <li>• Aboriginal Area (declared under NPW Act)</li> <li>• protected archaeological site</li> <li>• Conservation agreement</li> <li>• massacre</li> <li>• reserve</li> </ul>
<b>Aboriginal cultural protocols</b> may include:	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> </ul>

	<ul style="list-style-type: none"><li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li><li>• interpersonal ways of relating</li><li>• the talking of Community politics</li><li>• repatriation of artefacts</li><li>• issues of ownership (clans/nations)</li><li>• ownership of intellectual property</li><li>• acknowledging participation and ownership</li><li>• communicating about cultural material</li><li>• displaying cultural material</li><li>• handling cultural material</li><li>• identifying appropriate people to be consulted</li><li>• occasions when consultation is required</li><li>• ways in which consultations should be conducted</li></ul>
--	--

## Unit Sector(s)

Aboriginal-sites work

## AHCASW312A Maintain an Aboriginal cultural site

### Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

### Unit Descriptor

This unit covers the processes and practices required to maintain Aboriginal cultural places.

### Application of the Unit

This unit applies to those working in Aboriginal communities and on Country in cultural landscapes and with cultural sites and objects. The unit applies to working with lore/law men and women, either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owner/s and/or Elder/s for specific Country. This unit is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

### Employability Skills Information

This unit contains employability skills

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess maintenance work and relevant cultural protocols required	<p>1.1 Appropriate <i>cultural authorities</i> are identified and consulted according to <i>Aboriginal cultural protocols</i></p> <p>1.2 Approval is obtained from relevant Traditional Owners and Cultural managers for work to be carried out and for access to cultural place and materials for the specific persons who will conduct work</p> <p>1.3 Prior assessment of significance incorporated into strategies and plans for area and place are accessed to determine range of required and appropriate actions</p> <p>1.4 Any prior works not in keeping with significance are identified to determine appropriate maintenance actions</p> <p>1.5 Information on environmental systems and procedures is collected and provided to the work group where appropriate</p> <p>1.6 Machinery, tools and equipment and materials to carry out maintenance works are identified along with appropriate <i>techniques and tools</i></p> <p>1.7 Type and amount of materials required for maintenance work are estimated and documented</p> <p>1.8 Traditional Aboriginal repair/maintenance techniques and relevant <i>archaeological practices</i> and procedures are identified for implementation</p>
2. Prepare for maintenance	<p>2.1 Machinery, equipment and materials to carry out maintenance works are organised and pre-maintenance checks are undertaken</p> <p>2.2 Safety equipment and materials are prepared and assembled according to enterprise workplace health and safety policy</p>
3. Maintain condition of place	<p>3.1 Maintenance work is undertaken and recorded according to Aboriginal cultural protocols and approvals and requirements of work programs</p> <p>3.2 Continuous improvement strategies are applied to own work area of responsibility, including ideas and possible solutions to</p>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>communicate to the work group and management</p> <p>3.3 Team members are supported to identify possible areas for improved practices in work area on Country</p> <p>3.4 Evidence of deterioration and wear is reported to Traditional Owners, Cultural managers and supervisor</p> <p>3.5 Site is made good on completion of maintenance works according to Aboriginal cultural protocols, supervisor's instructions and enterprise guidelines</p>
4. Protect cultural place	<p>4.1 Any breach of legislation or enterprise regulations is reported to Traditional Owners, Cultural managers and supervisor</p> <p>4.2 Protective barriers and signs are maintained according to enterprise procedures and Aboriginal cultural practices</p> <p>4.3 Workers/contractors are informed to ensure significance of place is maintained in terms of environmental sustainability requirements, no damage to surrounds, fabric or building, and removal of materials, equipment and tools at the completion of work</p>

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- respect cultural diversity and sensitivity to social, cultural and professional values and beliefs
- use machinery, tools and equipment
- carry out maintenance activities
- assess the required level of work
- use technology to access written, oral or visual source material
- research library and internet
- comprehend written, oral or visual source material
- interpret written, oral or visual source material
- listen effectively
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- exercise discretion and confidentiality
- identify hazards and adopt safe work practices
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- workplace health and safety requirements and responsibilities
- sustainable environmental practices
- traditional and Western modern techniques of site protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents
- site recording systems used by the enterprise or Community
- relevant archaeological practices and procedures
- Cultural and Heritage Legislation or relevant NPWS legislation

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The delivery and assessment of this unit must comply with Community protocols and be conducted in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.

In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of *Cultural Units* to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal-sites workers.

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge. Candidates must demonstrate evidence of the ability to:

- identify appropriate cultural authorities for a Community, place or for a cultural site
- consult with appropriate cultural authorities and informed approval obtained for works and access of specific persons
- assess the level of work required to maintain the cultural place
- carry out maintenance activities in accordance with organisational, environmental sustainability and Aboriginal cultural requirements
- report deterioration or damage to place
- report incidents of breaches of legislation including vandalism
- determine the cultural rights and responsibilities when using Community knowledge, information and material
- identify of groups to be consulted in relation to owners/custodians of cultural and Community knowledge, information and/or material

<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• a Community, educational or workplace setting</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• candidates who have gained relevant knowledge and skills through their life and Aboriginal cultural experience</li> </ul> <p>Possible resources for assessment may include:</p> <ul style="list-style-type: none"> <li>• Burra Charter and Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places</li> <li>• enterprise and organisational procedures and policies</li> <li>• jurisdictional culture and heritage legislation</li> </ul>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in maintaining an Aboriginal cultural site. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate relating to and engaging Aboriginal persons and Aboriginal Community on Country</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Aboriginal Sites maintenance related to the knowledge and skills outlined in this unit</li> </ul> <p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <p>AHCILM306A Follow Aboriginal cultural protocols</p> <p>AHCASW308A Apply cultural significance to Aboriginal sites and landscapes</p> <p>AHCASW312A Apply relevant legislation in</p>

	<p>Aboriginal sites work</p> <p>AHCASW301A Protect places of Aboriginal cultural significance</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>
--	--

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Cultural authorities</i></b> may include:</p>	<p>Cultural authority refers to the most appropriate senior person/s that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder, Aboriginal Land Council, etc.</p> <p>A ceremonial/cultural manager in terms of Aboriginal customary law means someone who does the work either under the direct supervision of the Aboriginal Owner or does the work that is authorised by the Owner. In a ceremony for example, the ceremonial manager(s) may provide the food and do the performance (work). Traditional roles and responsibilities swap over depending on a person's status in any given situation – ie – whose land / estate one is on for business.</p>
<p><b><i>Aboriginal cultural protocols</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment,</li> </ul>

	<ul style="list-style-type: none"> <li>values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of artefacts</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• how consultations should be conducted</li> </ul>
<i>Techniques and tools</i> may include:	<ul style="list-style-type: none"> <li>• traditional Aboriginal knowledge and processes</li> <li>• hand tools and power tools</li> <li>• excavation and construction equipment</li> <li>• surveying and sampling tools</li> <li>• recording and reporting technological equipment</li> <li>• location and geographic equipment</li> <li>• archaeological techniques and equipment</li> <li>• measurements made under different conditions</li> </ul>

## Unit Sector(s)

Aboriginal-sites work

# AHCASW501A Survey and report on Aboriginal cultural sites

## Modification History

Release	TP Version	Comments
1	AHC10v5	Initial release

## Unit Descriptor

This unit covers the surveying and reporting of Aboriginal cultural sites.

## Application of the Unit

This unit applies to those working in Aboriginal communities and on Country in cultural landscapes and with cultural sites and objects. The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owner/s and/or Elder/s for specific Country and is also applicable to the work of repatriation workers and anthropologists. This unit applies to all Aboriginal-sites workers. Cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit. This applies when restrictions are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will have to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

## Pre-Requisites

AHCILM306A Follow Aboriginal cultural protocols

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify, communicate and consult with key stakeholders	<p>1.1 The identification by <i>cultural authorities</i> of appropriate persons within communities who hold cultural knowledge relevant to determining the <i>cultural significance</i> of Aboriginal places and heritage is applied</p> <p>1.2 Communication and consultation methodologies that place <i>Aboriginal cultural protocols</i> and values at the forefront and accommodate stakeholder concerns and interests are developed and implemented</p> <p>1.3 Traditional ownership of <i>Aboriginal sites, cultural material, and objects</i> is confirmed</p> <p>1.4 Approval is obtained from relevant Traditional Owners and Cultural managers for work to be carried out and for access to the Aboriginal site for the specific persons who will conduct work</p> <p>1.5 Working relationships with <i>key stakeholders</i> that assist in the management of culturally significant places are developed</p> <p>1.6 Client needs for deliverables required in a formal Sites survey report are scoped and documented</p> <p>1.7 Research on the <i>Burra Charter process</i> and on other <i>existing industry guidelines</i> to ensure proper processes are planned for is undertaken and applied to assessment processes</p>
2. Collect initial site data	<p>2.1 Site plans and maps are sourced and verified including topographical maps</p> <p>2.2 Required resources are identified and acquired</p> <p>2.3 A base plan of the site is prepared</p> <p>2.4 Site orientation is undertaken and location, geographic and operational boundaries are defined and verified</p> <p>2.5 Current land use and environmental problems and threats are identified and recorded</p> <p>2.6 Covenants that could affect the site or report are identified and recorded</p>

ELEMENT	PERFORMANCE CRITERIA
3. Compile a site inventory	<p>2.7 Climate and weather conditions are ascertained from historical data</p> <p>3.1 <i>Site context</i>, location and <i>site information data</i> is categorised and recorded accurately</p> <p>3.2 <i>Features data</i> is categorised and recorded accurately</p> <p>3.3 Cultural material, objects, properties and relevant physical characteristics are identified and recorded on site inventory</p> <p>3.4 Relevant <i>field research</i> is undertaken</p> <p>3.5 Appropriate <i>techniques and tools</i> and relevant <i>archaeological practices</i> and procedures are implemented</p> <p>3.6 Structural elements are located and existing services and facilities confirmed</p> <p>3.7 The presence, location and/or extent of other relevant site constraints are recorded</p> <p>3.8 Limits of acceptable change in the forms of deterioration and damage to the places of cultural significance are developed to legislative and enterprise requirements</p>
4. Review, assess and record the site data	<p>4.1 Engagement of <i>relevant expertise</i> and consultant services are obtained when required</p> <p>4.2 An assessment of cultural significance is conducted</p> <p>4.3 A statement of cultural significance is documented</p>
5. Determine the impact of threats to the site	<p>5.1 Threats to <i>culturally significant places</i>, both external and internal to the area under consideration, are identified</p> <p>5.2 A risk assessment of all threats to determine potential impact on sites and associated cultural landscape is undertaken</p> <p>5.3 Risk management strategies and protection/conservation measures to control risks are developed and implemented</p> <p>5.4 A risk management report that incorporates an impact analysis is developed and documented</p> <p>5.5 Policy changes required to address the threats are documented to enterprise requirements</p>
6. Document a site survey report	<p>6.1 Site information is documented into a site assessment report or site survey report</p> <p>6.2 Assessment report incorporates all relevant data from the site assessment in line with client needs and the requirements of relevant legislation and regulations</p> <p>6.3 Specific recommendations for remedial action of site conservation and mitigation of site problems are provided and recorded as appropriate</p> <p>6.4 Recommendations for appropriate risk controls of site hazards are formulated and documented</p>

**ELEMENT****PERFORMANCE CRITERIA**

- 
- 6.5 Survey and assessment data are stored and maintained as part of professional practice
- 6.6 Client-stakeholder is informed and advised of the content and implications of the report and a copy is presented

## Required Skills and Knowledge

### Required skills include:

---

#### Ability to:

- respect cultural diversity and sensitivity to social, cultural and professional values and beliefs
- perform work operations to Aboriginal Community protocols
- use contemporary mainstream and Aboriginal site surveying and archaeological techniques as required
- develop risk management strategies for a specified area
- engage external expertise and consultants
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading, interpreting following organisational policies and procedures, developing sequenced written instructions, recording information collected accurately and legibly
- use technology for accessing, interpreting and developing a wide range of visual and written information sources to complete written documentation
- co-ordinate and work within teams in Community environments
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, enabling clarification, negotiating and refining solutions and responding to a range of complex views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from diverse cultural, social and religious backgrounds and with a range of physical and mental abilities
- exercise discretion and confidentiality

### Required knowledge includes:

---

#### Knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- site survey techniques, procedures and processes
- a range of archaeological and scientific concepts
- monitoring including fabric deterioration, damage and likely causes of deterioration and damage
- general understanding of impacts of natural resources, such as geological settings, ecological processes, and interaction between natural and cultural processes
- policies applying across all levels of government and within the specific region
- international treaties, agreements and charters
- Australian Natural Heritage Charter and the Burra Charter and Guidelines
- design, methodology and implementation of consultation processes
- policy analysis and impact statements

- the range of conservation strategies for cultural areas
- data submission systems and report documentation
- Cultural and Heritage Legislation or relevant NPWS legislation
- sustainable environmental practices
- workplace health and safety requirements

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The delivery and assessment of this unit must comply with Community protocols and be carried out in consultation with and in participation with Traditional Owners and/or Elders and custodians of that specific Country.

In accordance with Aboriginal cultural protocols, cultural knowledge copyright considerations and Aboriginal lore/law restrictions, it is essential that this requirement be respected and implemented in the delivery and assessment of *Cultural Units* to guarantee cultural authenticity and quality control around the delivery of training and assessment for Aboriginal Sites workers.

Candidates must demonstrate evidence of the ability to:

- identify appropriate Aboriginal cultural authorities for a Community, place or Site
- identify key stakeholders to be consulted in relation to owners/custodians of cultural and Community knowledge, information and/or material and cultural significance
- survey and assess Aboriginal cultural sites
- use appropriate techniques, tools and relevant archaeological practices
- incorporate the cultural significance, heritage values and conservation issues of an Aboriginal cultural site into report documentation
- identify threats and develop controls to mitigate and manage the risk of deterioration, damaging

	<p>incidents or loss of cultural integrity</p> <ul style="list-style-type: none"> <li>• develop a risk management report on Aboriginal cultural sites that incorporates an impact analysis</li> <li>• document a Site survey report on Aboriginal cultural sites including submissions to be completed</li> <li>• observe Aboriginal cultural protocols in dealing with stakeholders and land managers</li> <li>• describe natural resources and how they relate to cultural protocol, spirituality, art, environment, values, beliefs and lore/law</li> <li>• describe the cultural rights and responsibilities when using Community knowledge, information and material</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>Assessment events must be contextualised to meet the needs of the particular group, including:</p> <ul style="list-style-type: none"> <li>• on Country, a Community, educational or workplace setting including Aboriginal cultural keeping places</li> <li>• involvement of people approved by cultural authorities and/or Traditional Owners of the relevant local Community</li> <li>• candidates who have gained relevant knowledge and skills through their life experience</li> </ul> <p>Resources which may be useful in assessment for this unit include:</p> <ul style="list-style-type: none"> <li>• Burra Charter</li> <li>• Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places</li> </ul>
<p><b>Method of assessment</b></p>	<p>A range of assessment methods should be used to assess competency in the surveying and reporting of Aboriginal sites. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of the candidate on Country and/or in Aboriginal cultural keeping places protecting cultural sites and/or cultural material and objects</li> <li>• direct questioning combined with third-party workplace reports of on-the-job performance</li> <li>• verbal or written questioning</li> <li>• observation of participation in Ceremony and/or Sites work related to the knowledge and skills outlined in this unit</li> </ul>

	<p>Assessment methods should closely reflect workplace demands and the needs of particular client groups (consider the requirements of different age groups, clients with English as a second language, clients with disabilities, remote library users, etc.).</p>
<p><b>Guidance information for assessment</b></p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p> <p>AHCASW312A Maintain an Aboriginal cultural site AHCASW302A Relate Aboriginal culture to sites work AHCILM306A Follow Aboriginal cultural protocols AHCASW303A Identify and record Aboriginal sites, objects and cultural landscapes AHCASW305A Work with Aboriginal ceremonial secret sacred materials AHCASW308A Apply cultural significance to Aboriginal sites and Landscapes</p> <p>Assessment for this unit should comprise a combination of theory and practical application. Both aspects of assessment are best conducted on Country for this unit.</p>

## Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><b><i>Cultural authorities</i></b> may include</p>	<p>Cultural authority refers to the most appropriate senior person/s that is able to speak for particular Country, cultural objects, ceremony and/or materials in a specific place. A cultural authority could be a Traditional Owner, a Native Title Claimant, Aboriginal Culture and Heritage Body, Elder, Aboriginal Land Council, etc.</p> <p>A ceremonial/cultural manager in terms of Aboriginal customary law means someone who does the work either under the direct supervision of the Aboriginal Owner or does the work that is authorised by the Owner. In a ceremony for example, the</p>

	ceremonial manager(s) may provide the food and do the performance (work). Traditional roles and responsibilities swap over depending on a person's status in any given situation – ie – whose land / estate one is on for business.
<b><i>Cultural significance</i></b> may include:	<ul style="list-style-type: none"> <li>• aesthetic, historic, scientific, social or spiritual value for past, present or future generations</li> <li>• significance embodied in the place itself, its fabric, setting, use, associations, meanings, records, related places and related objects</li> </ul>
<b><i>Aboriginal cultural protocols</i></b> may include:	<ul style="list-style-type: none"> <li>• gender roles in relation to knowledge and cultural practices</li> <li>• information sensitivity and access</li> <li>• appropriate information transfer</li> <li>• negotiations with local Aboriginal Community about information transfer</li> <li>• cultural diversity</li> <li>• natural resources and their importance for economy, religion, spirituality, art, environment, values, beliefs and lore/law</li> <li>• rights and responsibilities associated with cultural knowledge, story, song, Site, and ceremony</li> <li>• interpersonal ways of relating</li> <li>• the talking of Community politics</li> <li>• repatriation of artefacts</li> <li>• issues of ownership (clans/nations)</li> <li>• ownership of intellectual property</li> <li>• acknowledging participation and ownership</li> <li>• communicating about cultural material</li> <li>• displaying cultural material</li> <li>• handling cultural material</li> <li>• identifying appropriate people to be consulted</li> <li>• occasions when consultation is required</li> <li>• ways in which consultations should be conducted</li> </ul>
<b><i>Aboriginal sites</i></b> may include:	<ul style="list-style-type: none"> <li>• shelters with deposits</li> <li>• open camp site</li> <li>• midden</li> <li>• shelter with midden</li> <li>• shelter with art</li> <li>• isolated find</li> <li>• undefined sites</li> <li>• axe grinding grooves</li> <li>• bora/ceremonial ring</li> <li>• burial site</li> <li>• rock engraving</li> </ul>

	<ul style="list-style-type: none"> <li>• scarred tree</li> <li>• carved tree</li> <li>• natural mythological site</li> <li>• restricted site</li> <li>• quarry</li> <li>• ochre quarry</li> <li>• fish trap</li> <li>• stone arrangement</li> <li>• mound (oven)</li> <li>• mia mia</li> <li>• waterhole (well)</li> <li>• contact/mission</li> <li>• abraded grooves</li> <li>• Aboriginal Place (declared under NPW Act)</li> <li>• Aboriginal Area (declared under NPW Act)</li> <li>• protected archaeological site</li> <li>• Conservation agreement</li> <li>• massacre</li> <li>• reserve</li> </ul>
<b><i>Aboriginal objects</i></b> may include:	<ul style="list-style-type: none"> <li>• physical objects such as stone tools, Aboriginal-built fences and stockyards, scarred trees, the remains of fringe camps</li> <li>• material deposited on the land, such as middens</li> <li>• the ancestral remains of Aboriginal people</li> <li>• stones and stone tools</li> <li>• art and artworks</li> <li>• shells</li> <li>• non-human bones and organic materials</li> </ul>
<b><i>Key stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• Aboriginal Land Councils</li> <li>• Indigenous Ranger groups</li> <li>• Traditional Owners and Cultural managers</li> <li>• Aboriginal communities and Clans</li> <li>• museums</li> <li>• Culture and Heritage government departments and representatives</li> <li>• National Parks personnel</li> <li>• sites workers</li> <li>• archaeologists</li> <li>• anthropologists</li> </ul>
<b><i>Burra Charter process</i></b> includes:	<ul style="list-style-type: none"> <li>• the cultural significance of a place and other issues affecting its future are best understood by a sequence of collecting and analysing information before making decisions.</li> </ul> <p>Understanding cultural significance comes first, then</p>

	<p>development of policy and finally management of the place in accordance with the policy</p> <ul style="list-style-type: none"> <li>• the policy for managing a place must be based on an understanding of its cultural significance</li> <li>• policy development should also include consideration of other factors affecting the future of a place such as the owner's needs, resources, external constraints and its physical condition</li> </ul>
<b><i>Existing industry guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places</li> </ul>
<b><i>Site context</i></b> may include:	<ul style="list-style-type: none"> <li>• landform</li> <li>• landform unit</li> <li>• vegetation</li> <li>• land use</li> <li>• proximity to water</li> <li>• open</li> <li>• closed</li> </ul>
<b><i>Site information data</i></b> may include:	<ul style="list-style-type: none"> <li>• general information</li> <li>• datum</li> <li>• zone</li> <li>• date recorded</li> <li>• site context</li> <li>• Aboriginal features</li> <li>• site dimensions</li> <li>• site plan</li> <li>• story</li> <li>• ceremony</li> <li>• site Aboriginal Community interpretation</li> <li>• site Aboriginal Community recommendations</li> <li>• site assessment</li> <li>• cultural analysis</li> <li>• scientific analysis</li> <li>• management recommendations</li> <li>• endorsement by cultural authority</li> </ul>
<b><i>Features data</i></b> may include:	<ul style="list-style-type: none"> <li>• type</li> <li>• material</li> <li>• description</li> <li>• dimensions</li> <li>• context</li> <li>• condition</li> <li>• site name</li> </ul>

	<ul style="list-style-type: none"> <li>• environment</li> <li>• plan</li> <li>• importance</li> <li>• recommended action</li> </ul>
<b>Field research</b> may include:	<ul style="list-style-type: none"> <li>• field observations and manual recording</li> <li>• identification of features</li> <li>• assessing condition</li> <li>• taking, preserving and examining samples</li> <li>• taking photographic records</li> <li>• obtaining geographic/longitudinal data</li> <li>• mapping of cycles of seasons and species</li> <li>• planning information collection to cover specific seasonal impacts</li> <li>• recording species, populations, densities and health of the species</li> <li>• establishing databases and loading records</li> </ul>
<b>Techniques and tools</b> may include:	<ul style="list-style-type: none"> <li>• traditional Aboriginal knowledge and processes</li> <li>• hand tools and power tools</li> <li>• excavation and construction equipment</li> <li>• surveying and sampling tools</li> <li>• recording and reporting technological equipment</li> <li>• location and geographic equipment</li> <li>• archaeological techniques and equipment</li> </ul>
<b>Archaeological practices</b> may include:	<ul style="list-style-type: none"> <li>• review of existing knowledge</li> <li>• survey</li> <li>• landscape context</li> <li>• Aboriginal land use</li> <li>• site definition</li> <li>• site recording</li> <li>• location information</li> <li>• geographic reporting</li> <li>• survey analysis</li> <li>• test excavation</li> <li>• artifact/object recording</li> <li>• attribute recording</li> <li>• archaeological reporting</li> </ul>
<b>Relevant expertise</b> may include	<ul style="list-style-type: none"> <li>• archaeologists</li> <li>• Traditional Owners and/or Elders</li> <li>• surveyors</li> <li>• anthropologists</li> <li>• environmental scientists</li> </ul>

	<ul style="list-style-type: none"> <li>• historians</li> <li>• researchers</li> </ul>
<i>Culturally significant places</i> may include	<ul style="list-style-type: none"> <li>• areas of non-Aboriginal activity</li> <li>• Aboriginal sites</li> <li>• landscapes</li> <li>• buildings and other structures</li> <li>• natural areas of Aboriginal cultural significance</li> <li>• historical events and monuments</li> <li>• areas of Aboriginal activity such as: <ul style="list-style-type: none"> <li>• burial</li> <li>• occupation and contact sites</li> <li>• engravings</li> <li>• grinding grooves</li> <li>• rock pictures</li> <li>• fish traps</li> <li>• middens</li> <li>• mounds</li> </ul> </li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare materials, tools and equipment for agricultural crop work</p>	<p>1.1.The required materials, tools and equipment are identified according to lists provided and/or supervisor's instructions.</p> <p>1.2.Checks are conducted on all materials, tools and equipment with insufficient or faulty items reported to the supervisor.</p> <p>1.3.Techniques used when loading and unloading materials demonstrate correct manual handling and minimise damage to the load and the vehicle.</p> <p>1.4.Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.5.Cropping support is provided according to Occupational Health and Safety (OHS) requirements and according to workplace information.</p> <p>1.6.OHS hazards are identified and reported to the supervisor.</p>
<p>2. Undertake agricultural crop work as directed</p>	<p>2.1.Instructions and directions provided by supervisor are followed and clarification sought when necessary.</p> <p>2.2.Cropping work is undertaken in a safe and environmentally appropriate manner according to enterprise guidelines.</p> <p>2.3.Interactions with other staff and customers are carried out in a positive and professional manner.</p> <p>2.4.Enterprise policy and procedures in relation to workplace practices, handling and disposal of materials is observed.</p> <p>2.5.Problems or difficulties in completing work to required standards or timelines are reported to supervisor.</p>
<p>3. Handle materials and</p>	<p>3.1.Waste material produced during cropping work is</p>

ELEMENT	PERFORMANCE CRITERIA
equipment	<p>stored in a designated area according to supervisor's instructions.</p> <p>3.2. Materials, equipment and machinery are handled and transported according to supervisor's instructions and enterprise guidelines.</p> <p>3.3. A clean and safe work site is maintained while completing cropping activities.</p>
4. Clean up on completion of cropping work	<p>4.1. Materials are returned to store or disposed of according to supervisor's instructions.</p> <p>4.2. Tools and equipment are cleaned, maintained and stored according to manufacturer's specifications and supervisor's instructions.</p> <p>4.3. Work outcomes are reported to the supervisor.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- follow safety procedures
- prepare materials, tools and equipment for cropping work
- undertake work as directed
- handle materials and equipment
- clean up on completion of work
- use literacy skills to read and follow a range of basic instructions
- use oral communication skills/language competence to communicate effectively with others
- use numeracy skills to complete basic calculations
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds.

#### Required knowledge

- safe work practices
- farm tools and equipment
- overview of agricultural cropping activities such as land preparation, seeding, fertilising, harvesting, baling, raking and loading.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• prepare tools and equipment</li> <li>• undertake crop support activities</li> <li>• handle basic materials and equipment</li> <li>• clean up after work activities.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Work tasks may include:	<ul style="list-style-type: none"> <li>• assistance with all activities associated with cropping such as:             <ul style="list-style-type: none"> <li>• land preparation</li> <li>• seeding</li> <li>• fertilising</li> <li>• harvesting</li> <li>• baling</li> <li>• raking</li> <li>• loading</li> </ul> </li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>removing weeds (rouging) or rocks from crops or fields</li> <li>routine maintenance of sheds and other workplaces.</li> </ul>
Tools and equipment may include:	<ul style="list-style-type: none"> <li>knives</li> <li>hand tools</li> <li>rope</li> <li>sack trucks</li> <li>fencing tools</li> <li>augers</li> <li>brooms.</li> </ul>
Hazards may include:	<ul style="list-style-type: none"> <li>solar radiation</li> <li>dust</li> <li>noise</li> <li>air- and soil-borne micro organisms</li> <li>chemicals and hazardous substances</li> <li>sharp hand tools and equipment</li> <li>manual handling</li> <li>holes</li> <li>slippery and uneven surfaces.</li> </ul>

## AHCBC201A Assist agricultural crop establishment

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of applying assistance to others in preparing for agricultural crop establishment and defines the standard required to: carry out ground preparation of the area for planting; apply pre-planting soil treatments; calibrate the planting equipment; treat and plant seed; apply fertiliser with seed at sowing or as a separate operation; apply weedicides or herbicides under supervision; record all details of sowing.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working under close supervision with regular checking. Competency at this level requires the application of limited knowledge and skills to a range of agricultural crop establishment tasks, including assistance with vehicle and machinery preparation. The work undertaken is usually within established routines, methods and procedures.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for agricultural crop establishment operations	<p>1.1. Instructions about planting are interpreted and clarified with the supervisor.</p> <p>1.2. Machinery, equipment and tools are selected and prepared for the task being undertaken.</p> <p>1.3. Occupational Health and Safety (OHS) hazards are identified, risks assessed and reported to the supervisor.</p> <p>1.4. The environmental implications of the crop production plan are identified and discussed with the supervisor.</p> <p>1.5. Suitable personal protective equipment is selected, used and maintained.</p>
2. Prepare the site for crop establishment	<p>2.1. Old crop and other waste materials are removed and disposed of in full consideration of environmental implications.</p> <p>2.2. Soil treatment/amendments are applied according to soil test results and the supervisor's instructions.</p> <p>2.3. Site is worked according to the crop production plan.</p> <p>2.4. Crop protection is implemented according to enterprise guidelines.</p> <p>2.5. The planting pattern is marked out according to the crop production plan.</p> <p>2.6. Machinery, equipment and tools are operated according to enterprise guidelines.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Carry out establishment operations	3.1.Planting material is selected according to the type of crop and enterprise quality standards. 3.2.Planting material is treated according to the crop and supervisors instructions. 3.3.Planting material is handled and transported to the site with no signs of transport damage. 3.4.Planting is carried out according to the planting plan.
4. Complete establishment operation	4.1.Tools and equipment are cleaned and sterilised according to the manufacturer's specifications, enterprise procedures and regulations. 4.2.All containers, leftover fluids, waste and debris are disposed of safely and appropriately. 4.3.All required workplace records are completed accurately and promptly in accordance with enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safety directions
- participate in teams and contribute to team objectives
- communicate with team members and supervisor
- read and interpret a range of workplace information
- calibrate equipment
- measure quantities of treatment
- determine spacings and planting patterns
- operate machinery to manufacturers specifications and enterprise procedures
- safely apply appropriate agricultural chemicals
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and

**REQUIRED SKILLS AND KNOWLEDGE**

ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- importance of field hygiene and quality control in regard to crop establishment
- operations of a range of crop establishment machinery
- the importance of correct timing and procedures for crop planting
- range of pre-planting soil treatments and their importance
- methods of waste disposal causing minimal impact on the environment
- OHS and environmental impacts of establishing crops.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out ground preparation of the area for planting
- apply pre-planting soil treatments
- calibrate the planting equipment
- treat and plant seed
- apply fertiliser with seed at sowing or as a separate operation
- apply weedicides or herbicides under supervision
- record all details of sowing.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Agricultural crops may include:	<ul style="list-style-type: none"> <li>• canola</li> <li>• wheat</li> <li>• hay</li> <li>• barley</li> <li>• oats</li> <li>• rice</li> <li>• triticale</li> <li>• maize</li> <li>• millet</li> <li>• chickpeas</li> <li>• cotton</li> <li>• faba beans</li> <li>• lucerne lupins</li> <li>• pigeon peas</li> <li>• sorghum</li> <li>• soybean</li> <li>• sugar</li> <li>• sunflower</li> <li>• other crops grown as part of a broadacre mixed farming enterprise not specifically named as horticultural crops.</li> </ul>

## AHCBC204A Prepare grain storages

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of safely preparing storages, surrounding areas and equipment in readiness for receiving grain at an acceptable level of hygiene, and defines the standard required to: prepare the storage area for access by grain carriers; comply with Occupational Health and Safety (OHS) requirements for working in confined spaces; prepare grain storages by removing all residues and checking structures; erect simple temporary bulk material storages; prepare and test grain handling machinery and perform routine safety, servicing and maintenance procedures on tools, equipment and machinery.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers in specialist grain storages or on grain farms who would normally operate under routine supervision with intermittent checking. Responsibility for some roles and co-ordination within a team may be required. Preparing bulk material storages is usually within established routines, methods and procedures.
--------------------------------	--

### Licensing/Regulatory Information

### Elements and Performance Criteria Pre-Content

Not Applicable

### Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to work in bulk material storage area	1.1. Work to be undertaken is interpreted from work program where necessary, and confirmed with supervisor. 1.2. OHS hazards are identified, risk assessed and suitable controls implemented. 1.3. Suitable personal protective equipment is selected, used and maintained. 1.4. Tools and equipment suitable for the work to be undertaken are selected, checked and maintained, if necessary. 1.5. Environmental implications of undertaking work in the bulk material storage area are identified, likely outcomes assessed and, if necessary, responsible action taken.
2. Prepare storage area	2.1. Storage site is cleaned of weeds, dust and spillage to organisation requirements. 2.2. Refuse is disposed of according to regulatory requirements. 2.3. Site is maintained in a clean and tidy condition according to organisation requirements.

ELEMENT	PERFORMANCE CRITERIA
	2.4.Storage site is prepared to meet OHS standards.
3. Prepare storages	3.1.Bulk material storages are prepared according to OHS standards. 3.2.Bulk material storages are cleaned of all residues according to organisation requirements. 3.3.Bulk material storages are checked for structural safety, damage or deterioration, and repaired or reported as required according to organisation requirements. 3.4.Temporary storages are prepared and erected to meet the needs of the organisation according to OHS standards.
4. Prepare bulk material handling machinery	4.1.Bulk material handling machinery is cleaned free of contamination and residues according to organisation requirements. 4.2.Bulk material handling equipment is adjusted and set according to organisation requirements. 4.3.Bulk material handling equipment is prepared ready for use according to manufacturer's instructions and OHS standards.
5. Complete maintenance operation	5.1.Workplace information is recorded clearly and accurately in the format and at the time required by the organisation. 5.2.Waste is collected and disposed of or recycled to minimise damage to the external environment. 5.3.Tools and equipment are cleaned and stored according to organisation work procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe work procedures
- erect simple temporary bulk material storages
- check equipment and storage facilities, and identify current or impending faults
- handle and manoeuvre equipment

## REQUIRED SKILLS AND KNOWLEDGE

- complete pre-operational checks on basic tools and equipment
- perform routine safety, service and maintenance procedures on tools, equipment and machinery
- operate hand and independently powered tools and cleaning equipment to industry standards
- clean, secure and store machinery and equipment
- perform basic trouble shooting
- recognise and rectify minor operational faults
- handle hazardous substances (fuels) safely
- work in confined spaces
- use communication systems
- interpret and apply task instructions, communicate with work team and supervisor, and record and report faults, workplace hazards and accidents.
- read and interpret manufacturer's specifications, work and maintenance plans, and Material Safety Data Sheets.

### Required knowledge

- range of construction methods, potential hazards, safety and structural requirements for storage
- erection/dismantling for types of temporary storage used by organisation
- organisation and commodity quality requirements for grain storage
- organisation hygiene requirements
- typical signs of structural damage to be documented and reported
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- general machine maintenance procedures
- machinery operating principles and operating methods
- machinery storage and protection methods
- cleaning and storage of machinery, equipment and materials
- environmental impacts associated with the operation of machinery and equipment
- appropriate action in contingency situations
- organisation requirements for protective equipment and safe practices in relation to OHS
- potential hazards associated with the operation of basic tools and equipment
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS, environment and the use and control of machinery and equipment
- appropriate legislative requirements, manufacturer's instructions and organisation procedures/ instructions
- personal protective clothing and equipment and when and how it should be used
- organisational recording and reporting procedures.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• prepare the storage area for access by grain carriers</li> <li>• comply with OHS requirements for working in confined spaces</li> <li>• prepare grain storages by removing all residues and checking structure</li> <li>• erect simple temporary bulk material storages</li> <li>• prepare and test grain handling machinery</li> <li>• perform routine safety, service and maintenance procedures on tools, equipment and machinery.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Storage areas may include:	<ul style="list-style-type: none"> <li>• permanent and/or temporary storages</li> <li>• the surrounding areas</li> <li>• entry, exit and site roads.</li> </ul>
Storage equipment may include:	<ul style="list-style-type: none"> <li>• fixed and/or portable grain handling equipment.</li> </ul>

## AHCBC205A Operate cane haulage vehicle

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of preparing and operating a cane haulage vehicle in the sugar cane production industry and defines the standard required to: check haulage equipment prior to use; determine operating methods and load from farm maps and instructions; haul cane safely and efficiently; identify and report faults or breakdowns; conduct shutdown procedures; maintain records.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working with the application of some judgement and discretion, and would be carried out with supervision within enterprise guidelines.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare cane haulage vehicle	<p>1.1. Routine pre-operational checks of cane haulage vehicle are completed to manufacturer's specifications and enterprise requirements.</p> <p>1.2. Cabin drill is carried out according to enterprise instructions and safety routines.</p> <p>1.3. Potential and existing Occupational Health and Safety (OHS) hazards in the workplace are recognised, risk assessed and minimised according to enterprise requirements.</p> <p>1.4. Suitable personal protective equipment is selected, used and maintained according to OHS requirements.</p>
2. Carry out cane haulage operations	<p>2.1. Vehicle is operated in a safe, controlled and correct manner and monitored for performance and efficiency.</p> <p>2.2. Cane is correctly selected, hauled and delivered efficiently, safely and co-operatively.</p> <p>2.3. Risks to self, others and the environment are anticipated and minimisation strategies implemented accordingly.</p> <p>2.4. Environmental implications associated with cane haulage are identified, assessed and reported to the supervisor.</p>
3. Complete cane haulage operation	<p>3.1. Shut-down procedures for cane haulage vehicle are completed to manufacturer's specifications and enterprise requirements.</p> <p>3.2. Records are completed and maintained according to enterprise requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Malfunctions, faults, irregular performance and damage to cane haulage vehicle are identified, detailed and reported according to enterprise requirements.</p> <p>3.4. Cane haulage vehicle is cleaned, secured and stored according to OHS and enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and apply safe work practices
- operate a variety of pushing and towing haulage vehicles
- demonstrate emergency operating procedures in normal and adverse conditions
- demonstrate safe and environmentally responsible workplace practices
- obtain relevant licences and permits
- read and interpret farm maps, operators manuals, manufacturers specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- effectively communicate faults, malfunctions and workplace hazards, report and maintain operational records
- comprehend and apply task instructions
- measure and calculate volumes, load weights, consumption and servicing requirements.

#### Required knowledge

- components, controls and features of cane haulage vehicles and their functions
- operating principles and operating methods for cane haulage vehicles
- principles of weight distribution with regard to load shifting and vehicle movement
- risks associated with the operation of cane haulage vehicles in different weather and difficult terrain conditions
- OHS and environment legislative and enterprise requirements
- environmental codes of practice with regard to the operation of machinery
- legislation and regulations with regard to the operation of cane haulage vehicles and licensing requirements
- cane haulage processes and spillage minimisation techniques
- cane harvesting processes as they relate to collection and haulage of harvests.

## AHCBC301A Conserve forage

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the conservation of forage and defines the standard required to: prepare paddocks for forage conservation; apply forage conservation methods; harvest, prepare and store forage; record work activities.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit is carried out under limited supervision from others with checking only related to overall progress. It is usually done within established routines, methods and procedures where some discretion and judgment is required in the selection of equipment and materials, organisation of work, services, actions and the achievement of outcomes within time and budgetary constraints.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for forage conservation	1.1. Determine forage conservation options from the production plan. 1.2. Identify risk factors for spoilage in forage conservation such as fire, vermin and air in silage. 1.3. Confirm that paddock conditions are suitable for forage production. 1.4. Prepare forage conservation machinery and equipment in accordance with manufacturer's specifications, Occupational Health and Safety (OHS) requirements and industry practice. 1.5. Ensure clear access to paddocks for harvesting and transport machinery. 1.6. Prepare storage facility for selected forage conservation method.
2. Prepare paddocks for forage conservation	2.1. Close paddock to stock access at appropriate time. 2.2. Report on the growth stage of the crop for harvest. 2.3. Control pests, weeds and diseases to maintain forage bulk and quality.
3. Make forage	3.1. Identify safety hazards and implement OHS procedures for forage conservation. 3.2. Monitor weather conditions to determine optimum time for harvest and to ensure quality. 3.3. Identify dry matter target and assess dry matter content of forage material for the forage operation. 3.4. Mow, condition, tedder and/or rake swaths depending on weather conditions and forage drying targets.

ELEMENT	PERFORMANCE CRITERIA
	3.5. Conduct harvesting activities in a safe, controlled and efficient manner. 3.6. Check equipment during harvesting operations regularly for wear and damage. 3.7. Bale, wrap, compact, seal or store forage in accordance with storage plan. 3.8. Load, transport, and store/compact (if required) forage in accordance with OHS and quality requirements. 3.9. Store forage so as to minimise risk of spoilage and combustion.
4. Complete operations	4.1. Complete records in accordance with quality assurance requirements and industry practice. 4.2. Dispose of all waste and debris to minimise environmental impacts. 4.3. Clean and service machinery and ancillary equipment in accordance with manufacturer's specifications, OHS requirements and industry practice. 4.4. Test or sample stored forage for quality. 4.5. Report on environmental impacts of forage conservation activities such as effluent run off.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret and implement forage conservation requirements
- operate and maintain forage harvesting equipment
- assess risks and implement OHS procedures for forage conservation
- perform harvesting operations
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening,

**REQUIRED SKILLS AND KNOWLEDGE**

clarifying information and consulting with supervisors as required

- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- silage and hay conservation systems and methods
- factors affecting the quality of silage and hay
- dry matter content, quality and hygiene requirements
- range and functions of silage and haymaking machinery and equipment
- common weeds, pests and diseases associated with crops and pastures
- types and application of personal protective equipment
- legislation and regulations including licensing requirements in relation to forage operations
- risk factors including animal health and weather
- environmental risks and impacts of forage conservation.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare paddocks for forage conservation
- apply forage conservation methods
- harvest, prepare and store forage
- record work activities.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

<b>EVIDENCE GUIDE</b>	
	enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Conservation methods may include:	<ul style="list-style-type: none"> <li>• hay</li> <li>• silage</li> <li>• haylage</li> <li>• green chop.</li> </ul>
What safety hazards may be relevant	<ul style="list-style-type: none"> <li>• risk of fire from moisture content creating excessive temperature of hay stacks</li> <li>• overhead powerlines</li> <li>• exposure to noise and dust.</li> </ul>

## AHCBA302A Establish pastures and crops for livestock production

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the functions required to establish pastures and crops for livestock production and defines the standard required to: assess existing pastures and crops to maximise livestock production; calibrate boom spray; seed drill and fertiliser spreader; identify pests and diseases; sow and monitor new pastures and crops; select pasture species; sowing method and application appropriate for optimal yield; manage grazing systems including weed and stubble control; control pests and weeds without damage to the crop or pasture.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	The unit applies to preparing machinery and equipment, ploughing, cultivating, seeding, applying any pre-planting treatments, maintaining machinery and equipment, and relevant record keeping. This standard requires the application of skills and knowledge to use specialised equipment to carry out seeding and fertiliser operations appropriate to soil and weather conditions.
--------------------------------	--

### Licensing/Regulatory Information

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for pasture and crop establishment	<p>1.1.Pasture and crop establishment program is sourced to meet production requirements and enterprise objectives.</p> <p>1.2.Pre-treatment (including inoculation) of seed is carried out prior to sowing where required.</p> <p>1.3.Sowing methods are selected appropriate to pasture species to maximise pasture survival.</p> <p>1.4.Fertilisers are applied according to crop/pasture needs and enterprise requirements.</p> <p>1.5.Machinery and equipment are selected for soils of property and operated according to manufacturer's instructions, Occupational Health and Safety (OHS) and enterprise requirements.</p>
2. Implement pasture and crop establishment program	<p>2.1.Machinery and equipment is prepared for sowing.</p> <p>2.2.Seeding and fertilising equipment is calibrated for correct rate and placement.</p> <p>2.3.Pasture and crop is sown for even germination and growth.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4. Fertilisers and pesticides are applied at correct rate and stage of growth.
3. Manage fodder production	3.1. Livestock are used to control stubble and fallow weeds as part of an integrated pest management program. 3.2. Grazing program ensures high production levels and sound pasture regrowth. 3.3. Grazing of crops and pastures is carefully controlled during pasture and crop establishment. 3.4. Grazing is managed to minimise damage to soil structure and to prevent erosion according to sustainable land management practices.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- operate machinery and equipment
- calibrate boom spray and drill and fertiliser spreader
- identify pests and diseases
- identify pasture and crop species (both seed and seedlings)
- identify and control weeds
- handle chemicals safely
- mix and inoculate seed
- interpret and implement crop and pasture production plans
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

- types of grasses, legumes and crops
- types of seed inoculants and fertilizers
- seed and fertilizer placement for optimal germination and growth
- integrated weed control including chemical application, cultural practices and grazing management
- relevant provisions of the Native Vegetation Acts with particular attention to potential soil degradation and destruction of flora and fauna
- safe use of chemicals and machinery
- advantages and disadvantages of pasture and crop establishment programs
- timing of pasture and crop establishment
- OHS legislative requirements and safe work procedures
- procedures for minimising environmental impacts.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assess existing pastures and crops to maximise livestock production
- calibrate boom spray, seed drill and fertiliser spreader
- identify pests and diseases
- sow and monitor new pastures and crops
- select pasture species, sowing method and application appropriate for optimal yield
- manage grazing systems including weed and stubble control
- control pests and weeds without damage to the crop or pasture.

**EVIDENCE GUIDE****Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Crop and pasture establishment methods may include:

- methods covering establishment in virgin ground
- establishment after a cropping program
- replacement of run down pasture
- changing the composition of pastures
- growing fodder crops
- growing cash crops
- re-establishing pastures after earthworks.

Sowing methods may include

- under sowing
- direct drilling
- band seeding
- broadcasting seed into stubbles or on to existing pasture.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to work safely	<p>1.1. Hazards are identified and risks assessed and controlled in accordance with Occupational Health and Safety (OHS) requirements and industry practice.</p> <p>1.2. Appropriate personal protective equipment is selected and used in accordance with task requirements and industry practice.</p> <p>1.3. Relevant enterprise and/or industry OHS policies and procedures are observed.</p>
2. Maintain hygiene in receival storage facilities	<p>2.1. Receival and storage areas are cleaned and inspected in accordance with industry practice to ensure grain/seed quality.</p> <p>2.2. Receival area is free from potential contaminants.</p> <p>2.3. Facilities are inspected and items are identified and reported that require maintenance or repair.</p>
3. Prepare testing equipment for use	<p>3.1. Testing equipment is assembled in accordance with manufacturer's instructions.</p> <p>3.2. Equipment calibration is checked and recalibration arranged if required.</p> <p>3.3. Testing equipment is inspected and items requiring maintenance or repair identified and reported.</p> <p>3.4. Testing equipment is kept clean and free from residue.</p>
4. Prepare to provide service to	<p>4.1. All documentation and information is made available including conflict and dispute resolution</p>

ELEMENT	PERFORMANCE CRITERIA
growers/suppliers	<p>procedures.</p> <p>4.2.All documents and/or data are accessible and available to record all necessary information on receipt.</p>
5. Prepare for storage of grains/seed	<p>5.1.Arrangements are made for segregation of grain/seed according to enterprise standards and industry practice.</p> <p>5.2.Site transfer arrangements are made as required.</p> <p>5.3.Conveying equipment is inspected and items requiring maintenance or repair identified and reported.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and assess risks in grain/seed receipt area
- operation and maintenance of grain/seed testing equipment
- inspection and cleaning of receipt and storage areas and equipment
- grower/supplier information
- identify grain/seed types
- use of personal protective equipment
- identification of defects such as split grains/seeds, undersize, chaff, weed seeds
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- grain/seed receipt processes and industry practice
- calibration requirements for testing equipment

**REQUIRED SKILLS AND KNOWLEDGE**

- types of testing equipment such as protein, oil content, moisture etc.
- requirements for segregation, traceability and hygiene
- impact of residues including chemical
- industry practice, standards and quality assurance requirements
- legislation and regulations including OHS
- quality requirements in relation to grains receipt
- segregation strategies/methods
- dust control
- dispute resolution.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare the site and maintain hygiene
- prepare testing equipment
- liaise with growers and/or contractors
- maintain segregation of grains/seeds and arrange storage.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify grains/seeds on receipt	1.1.Grains/seeds are checked against growers/suppliers details and product details. 1.2.A visual check of product is conducted. 1.3.Relevant enterprise and/or industry policies and procedures are observed with regard to rejection of product. 1.4.Grades of grains/seeds are identified in accordance with enterprise and/or industry practice as required.
2. Collect grains/seed samples for testing	2.1.Growers/suppliers requirements are confirmed and feedback sought to improve service delivery. 2.2.Information from growers/suppliers is recorded in accordance with enterprise and/or industry practice. 2.3.The appropriate tests to be performed are determined. 2.4.Sampling requirements/protocols are carried out in accordance with enterprise and/or industry practice.
3. Perform initial tests on samples	3.1.Testing equipment is operated in accordance with manufacturer's instructions, enterprise and/or industry practice. 3.2.Grains/seed defects and contaminants are identified and recorded. 3.3.Results of initial testing are recorded in accordance with enterprise and/or industry practice. 3.4.Test results are compared with specifications and appropriate action taken where necessary. 3.5.Handling procedures are followed to prevent mixing and/or contamination of samples.

ELEMENT	PERFORMANCE CRITERIA
4. Despatch samples to testing facilities	4.1. Samples are packed and labelled in accordance with enterprise and/or industry practice. 4.2. Records of testing requirements are prepared in accordance with enterprise and/or industry practice. 4.3. Samples are dispatched to testing facility.
5. Prepare for storage of grains/seed	5.1. Arrangements are made for segregation of grain/seed according to enterprise standards and industry practice. 5.2. Site transfer arrangements are made as required. 5.3. Inspect conveying equipment and identify and report items requiring maintenance or repair.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify Occupational Health and Safety (OHS) hazards and implement safe operating procedures
- identify grain/seed types
- take samples
- identify defects such as split grains/seeds, undersize, chaff, weed seeds, damage
- store and dispatch grains/seeds samples and maintain hygiene
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- safe operating procedures for handling and storing grain
- grain/seed testing processes
- industry standards and codes of practice

**REQUIRED SKILLS AND KNOWLEDGE**

- testing regimes for grains such as protein, weight, oil content, moisture, defects, sprouts etc.
- testing regimes for seed such as genetic purity, cultivar, dead, abnormal and hard seed, germination potential, foreign matter
- analysis and consequence of test result
- requirements for segregation, traceability and hygiene
- impact of residues including chemical
- industry practice, standards and quality assurance requirements in relation to grains sampling and testing
- segregation strategies/methods
- sampling and testing protocols.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify different grains/seeds
- conduct sampling and initial testing
- record samples for further testing
- communicate with customers and maintain records.

### Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for cultivation	1.1. Requirements for the work to be undertaken are interpreted from the planting plan and confirmed with the manager. 1.2. The method and order of cultivation is identified and interpreted from the planting plan. 1.3. Occupational Health and Safety (OHS) hazards are identified; risks assessed and suitable controls implemented. 1.4. Suitable personal protective equipment is selected, used and maintained. 1.5. Environmental implications of cultivating the site are identified, likely outcomes assessed and, if necessary, responsible action taken.
2. Prepare the cultivating equipment	2.1. Vehicles and equipment required for site cultivation are selected according to the planting plan and organisation guidelines. 2.2. Vehicles and equipment are serviced, adjusted for the conditions and worn parts are replaced to ensure

ELEMENT	PERFORMANCE CRITERIA
	<p>reliability during cultivation.</p> <p>2.3.All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and appropriately.</p> <p>2.4.All maintenance and servicing is documented according to the requirements of the organisation's record keeping system.</p>
3. Cultivate soil	<p>3.1.Previous crop or land clearance debris is removed, incorporated or burnt according to the organisation's guidelines.</p> <p>3.2.The cultivation plan is followed and completed for each paddock.</p> <p>3.3.OHS hazards are identified, risks assessed and suitable controls implemented.</p> <p>3.4.Suitable personal protective equipment (PPE) is selected, used and maintained.</p> <p>3.5.Vehicles and equipment are operated in a safe, effective and efficient manner and at speeds to suit the conditions.</p> <p>3.6.The quality of cultivation is maximised by continually checking and adjusting the vehicles and equipment as necessary.</p> <p>3.7.All timelines, resource and quality requirements of the planting plan are met.</p>
4. Prepare site for planting	<p>4.1.The planting layout and soil profiles are completed as required by the planting plan.</p> <p>4.2.Weed and pest control measures are taken as required by the planting plan.</p> <p>4.3.Fertilisers, ameliorants, and/or other pre-planting treatments are applied as required by the planting plan.</p> <p>4.4.The environmental implications of site preparation are identified, likely outcomes assessed and, if necessary, responsible action is taken.</p>
5. Complete land preparation operations	<p>5.1.Equipment is cleaned according to manufacturer specifications, organisational procedures and regulations.</p> <p>5.2.Vehicles and equipment are cleaned and stored to minimise damage according to manufacturer specifications, organisational procedures and regulations.</p> <p>5.3.All containers, leftover fluids, waste and debris from</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>the cleaning and maintenance work are disposed of safely and appropriately.</p> <p>5.4. All required records and documentation are completed accurately and promptly according to organisational requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret production/planting plans, produce standards, quality specifications and work procedure documents
- measure materials and site plan specifications
- operate, adjust and calibrate cultivation equipment safely
- complete pre- and post-operational checks on tools, vehicles and equipment
- perform routine safety, service and maintenance procedures on tools, cultivator and equipment
- read and interpret manufacturer specifications, work and maintenance plans, and material safety data sheets (MSDS)
- interpret and apply task instructions
- communicate with work team and supervisor
- record and report faults, workplace hazards and accidents
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- methods of cultivating a range of soil types
- environmental issues of cultivating soil for planting, such as drainage and irrigation systems, soil amelioration and waste disposal procedures
- a range of pre-planting treatments, their purpose and method of application
- operation and maintenance of planting equipment
- OHS guidelines, procedures and principles, including manual handling and exposure to hazardous substances.

## Evidence Guide

## AHCBC306A Establish agricultural crops

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of establishing agricultural crops and defines the standard required to: prepare and service machinery and equipment; carry out tillage and apply pre-planting treatments; carry out sowing operation and fertiliser application; monitoring the environmental impacts of establishing the crop; clean, secure and store machinery and equipment; and keep records of the sowing operation.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers on cropping enterprises and involves the application of some judgement and discretion. Work is likely to be carried out under minimal supervision within enterprise guidelines.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare machinery and equipment for use	<p>1.1.Machinery and equipment are selected and confirmed against the work plan and prepared to manufacturer specifications.</p> <p>1.2.Equipment is securely attached and calibrated for operation to manufacturer specifications.</p> <p>1.3.Existing and potential Occupational Health and Safety (OHS) hazards in the workplace are identified, risks assessed and controlled in line with enterprise requirements.</p>
2. Prepare for agricultural crop establishment	<p>2.1.Soil and weather conditions are monitored for optimal seeding conditions.</p> <p>2.2.Soil conservation and sustainable land management practices and procedures are recognised and confirmed according to enterprise requirements.</p> <p>2.3.Seeding, fertiliser, and pest and weed control requirements are confirmed against the work plan and prepared to manufacturer specifications using safe handling procedures.</p> <p>2.4.Contingency plans are prepared for unusual seasonal conditions.</p>
3. Sow the crop	<p>3.1.Suitable personal protective equipment (PPE) is selected, used and maintained according to OHS requirements.</p> <p>3.2.Seeding and fertiliser applications are carried out in line with the work plan.</p> <p>3.3.Pest and weed control treatment is coordinated with seeding and fertiliser applications as required.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.4.Environmental implications associated with sowing operations are identified, impacts assessed and procedures adopted in line with enterprise requirements.
4. Complete seeding operations	<p>4.1.Seeding, machinery and equipment operation records are maintained according to enterprise requirements.</p> <p>4.2.Machinery and equipment damage, malfunctions or irregular performance are reported in line with enterprise requirements.</p> <p>4.3.Machinery and equipment is cleaned, secured and stored in line with manufacturer specifications and enterprise requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- sow seed and apply fertiliser at the required placement and rate
- identify types of weeds and insects harmful to crop establishment
- perform pre-operational and safety checks, servicing and maintenance on machinery and equipment
- calibrate, operate machinery and attach/detach equipment
- demonstrate emergency operating procedures in normal and adverse conditions
- recognise and report machinery damage, faults or malfunctions and perform minor repairs
- demonstrate safe, environmentally responsible and sustainable land management practices
- monitor and minimise impacts to the environment associated with sowing operations
- read and interpret manufacturer specifications, work and maintenance plans, and MSDS
- obtain relevant licences and permits
- clean, secure and store machinery and equipment
- interpret and apply task instructions

## REQUIRED SKILLS AND KNOWLEDGE

- communicate with work team and supervisor
- record and report equipment faults, workplace hazards and accidents
- assess and calculate the application of fertiliser/pesticide requirements and application rates
- calibrate equipment and calculate volumes, consumption and servicing requirements
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## Required knowledge

- crop types, preparation of seeds, seeding methods and application techniques
- fertiliser types, rates of application and crop nutrient requirements
- effects of weather conditions (normal and adverse) on seeding and fertilising applications
- operating principles and operating methods for machinery and equipment
- pre-operational and safety checks, servicing and maintenance procedures for seeding machinery and equipment
- principles of weight distribution with regard to load shifting and vehicle movement
- sustainable land management and soil conservation techniques
- positive environmental practices, negative environmental impacts and minimisation measures associated with seeding operations
- procedures for cleaning, securing and storing machinery, equipment and materials
- enterprise policies with regard to seeding operations, and recording and reporting routines
- relevant state/territory legislation, regulations and codes of practice with regard to workplace OHS and the use and control of hazardous substances
- PPE and when and how it should be used
- relevant state/territory legislation and regulations with regard to licensing requirements and the use and control of machinery and equipment.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>EVIDENCE GUIDE</b>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• prepare and service machinery and equipment</li> <li>• carry out tillage and apply pre-planting treatments</li> <li>• carry out sowing operation and fertiliser application</li> <li>• monitoring the environmental impacts of establishing the crop</li> <li>• clean, secure and store machinery and equipment</li> <li>• keep records of the sowing operation.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Crops may include:	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• sugar</li> <li>• temperate pastures</li> <li>• tropical pastures.</li> </ul>

## AHCBC307A Maintain agricultural crops

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of maintaining agricultural crops and defines the standard required to: monitor crops for levels of pests and diseases and moisture; implement pest and disease control strategies; monitor the health and maturity of the crop.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers on cropping enterprises who operate under limited supervision from others with checking only related to overall progress. It is usually done within established routines, methods and procedures where some discretion and judgment is required in the selection of equipment and materials, organisation of work, services, actions and the achievement of outcomes within time and budgetary constraints.
--------------------------------	--

-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess agricultural crop condition, growth and requirements	<p>1.1.Crops are monitored to assess their needs, and observations are recorded and reported.</p> <p>1.2.Pests and diseases are identified, monitored and reported at nominated threshold levels.</p> <p>1.3.Sites for regular measurement of soil moisture are established in consultation with directions.</p> <p>1.4.Soil probe is used to measure moisture levels and soil water percentage calculated.</p>
2. Apply fertiliser and amendments	<p>2.1.Occupational Health and Safety (OHS) hazards are identified; risks assessed and suitable controls are implemented.</p> <p>2.2.Suitable personal protective equipment is selected, used and maintained.</p> <p>2.3.Specialist sprays are applied according to label directions and industry standards for growth stages, taking into account specialist advice if required.</p> <p>2.4.Chipping or spot spraying is carried out as required.</p> <p>2.5.Crop growth stages and keys are assessed, recorded and reported.</p> <p>2.6.Water is applied according to the identified need and the directions of management.</p> <p>2.7.All applications are undertaken in the full consideration of adverse environmental impacts.</p>
3. Monitor crop condition, growth	<p>3.1.Crop maturity is monitored and the possible need for further applications is reported to the manager.</p>

ELEMENT	PERFORMANCE CRITERIA
and requirements	<p>3.2. The health of the crop is continually monitored and deviation from expected growth and vigour is reported as required.</p> <p>3.3. Observations of crop ripening are reported for the timing of harvest to be determined by contractors and property manager.</p>
4. Complete cleaning and hygiene operations	<p>4.1. Equipment is cleaned in accordance with manufacturer's specifications, organisational procedures and regulations.</p> <p>4.2. All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and appropriately.</p> <p>4.3. All required records and documentation are completed accurately and promptly in accordance with organisational requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- detect differences and variations in crop growth
- report/communicate such differences to the supervisor/farm owner
- observe and report on health and growth of the crop
- monitor pests and disease in crops
- assess crop maturity
- apply sprays and fertilizers as directed
- measure soil moisture and relate data to crop requirements
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

## REQUIRED SKILLS AND KNOWLEDGE

### Required knowledge

- appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
- potential hazards associated with the operation of basic tools and equipment
- general machine maintenance procedures
- machinery operating principles and safe operating methods
- environmental impacts associated with the operation of machinery and equipment in a harvesting context
- organisation recording and reporting procedures
- symptoms of crop lacking health and vigour
- signs of pest and disease infestation, moisture stress and nutrient deficiencies
- hygiene requirements for agricultural crops and equipment that comes into contact with the crop
- types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical)
- OHS and pesticides legislative and enterprise requirements.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- monitor crops for levels of pests and diseases and moisture
- implement pest and disease control strategies
- monitor the health and maturity of the crop.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

<b>EVIDENCE GUIDE</b>	
	enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Crops may include:	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• sugar</li> <li>• temperate pastures</li> <li>• tropical pastures.</li> </ul>

## AHCBA308A Undertake agricultural crop harvesting activities

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of harvesting agricultural crops and defines the standard required to: complete pre and post operational checks on tools, harvesting machinery and equipment; perform routine safety; service and maintenance procedures on tools, harvesting machinery and equipment; sample crops to assess moisture content and maturity/ripeness of the crop; handle and manoeuvre harvesting equipment; monitor efficiency of harvesting equipment and make adjustments to height and other settings and transport; clean and store harvesting equipment.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers on cropping enterprises or in harvesting contract teams and requires the ability to work as part of a team following set routines, methods and procedures. Some discretion and judgment is required in the maintenance and operation of equipment and machinery. The outcomes must be achieved at a rate that maintains the progress of the harvesting operation.
--------------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to harvest agricultural crops	<p>1.1. Requirements for the work to be undertaken, method and order of harvesting is interpreted from the harvest strategy and confirmed with the supervisor.</p> <p>1.2. Occupational Health and Safety (OHS) hazards are identified, risks assessed and risk controls are implemented for the harvesting operation.</p> <p>1.3. Personal protective equipment is selected, used and maintained.</p> <p>1.4. The environmental impacts of harvesting the crop are identified and action taken where required.</p> <p>1.5. Windrowing/swathing is completed to the standard required.</p> <p>1.6. Crop is sampled for moisture content to assess timing of harvest.</p> <p>1.7. The hygiene standards for the crop and the paddock are identified from the harvest strategy and/or the crop storage plan.</p>
2. Prepare the	2.1. Harvesting machinery and other equipment are

ELEMENT	PERFORMANCE CRITERIA
harvesting equipment	<p>cleaned of pests and other contaminants to maintain crop and paddock hygiene standards, as required by the harvest strategy.</p> <p>2.2.All machinery and equipment are serviced, assessed for reliability, adjusted for harvesting conditions and appropriate parts are replaced to ensure reliability during the harvest.</p> <p>2.3.All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and in line with environmental guidelines.</p> <p>2.4.All maintenance and servicing is documented according to the requirements of the organisation.</p>
3. Harvest crops	<p>3.1.The harvest strategy is followed and completed for each paddock.</p> <p>3.2.Personal protective equipment is selected, used and maintained for harvesting.</p> <p>3.3.Harvesting machinery and ancillary equipment is operated in a safe manner and at speeds to suit crop conditions.</p> <p>3.4.Cleanliness and purity of the harvested product is maximised by maintaining the hygiene of all surfaces that come into contact with the crop.</p> <p>3.5.The quality of product is optimised by continually checking and, where necessary, adjusting the harvester and ancillary equipment, including their height and other settings.</p> <p>3.6.Fire prevention measures are taken as outlined and described in the harvest strategy.</p>
4. Complete harvesting operations	<p>4.1.Equipment is cleaned in accordance with manufacturer's specifications, organisational procedures and regulations.</p> <p>4.2.Attachments and other ancillary equipment are cleaned and stored to minimise damage and to maximise hygiene according to manufacturer's specifications, organisational procedures and regulations.</p> <p>4.3.Insecticides are applied as required by the organisation and the harvest strategy.</p> <p>4.4.All containers, leftover fluids, waste and debris from the maintenance and servicing work are disposed of safely and according to environmental requirements.</p> <p>4.5.Harvesting equipment is moved between sites and on public roads in compliance with legislation including</p>

ELEMENT	PERFORMANCE CRITERIA
	hygiene requirements. 4.6. All required records and documentation are completed accurately and promptly in accordance with enterprise requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- handle and manoeuvre harvesting equipment
- operate crop harvesting machinery and equipment
- implement procedures for seed handling and hygiene
- identify hazards and implement OHS procedures for all harvest tasks
- complete pre- and post-operational checks on tools, harvesting machinery and equipment
- perform routine, service and maintenance procedures on tools, harvesting machinery and equipment
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- potential hazards and safe operating procedures for basic tools and equipment
- safe operating procedures and standards for harvesting and ancillary equipment
- grain quality and the impact of harvesting practices
- general machine maintenance procedures

**REQUIRED SKILLS AND KNOWLEDGE**

- machinery operating principles and operating methods
- environmental impacts associated with the operation of machinery and equipment in a harvesting context
- organisation recording and reporting procedures
- pests and signs of pest infestation in the crop
- hygiene procedures for harvesting machinery and equipment
- organisation moisture and hygiene requirements for the crop and equipment that comes into contact with the crop
- requirements for harvesting machinery and equipment transport
- fire prevention strategies.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- complete pre and post operational checks on tools, harvesting machinery and equipment
- perform routine safety, service and maintenance procedures on tools, harvesting machinery and equipment
- sample crops to assess moisture content and maturity/ripeness of the crop
- handle and manoeuvre harvesting equipment
- monitor efficiency of harvesting equipment and make adjustments to height and other settings
- transport, clean and store harvesting equipment.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

<b>EVIDENCE GUIDE</b>	
	enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Harvested crops may include:	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• sugar</li> <li>• temperate pastures</li> <li>• tropical pastures.</li> </ul>

## AHCBC401A Manage pastures for livestock production

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the management of pastures for livestock production and defines the standard required to: establish production targets for each pasture type in an enterprise; develop a pasture management program to meet production targets and enterprise objectives; carry out strategic grazing to reduce or eradicate areas of weed infestation; monitor soil health and grazing management to ensure sustainable pasture and optimal livestock production levels; monitor pasture yields and evaluate against forecast production levels; maintain physical and financial records of production.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to livestock managers working independently, with only technical advice sought from others in areas such as pasture selection, pasture management and grazing management.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Develop a pasture management program	<p>1.1. Production targets for each pasture type are established, consistent with livestock production and enterprise objectives.</p> <p>1.2. Irrigation schedules, where required, are determined for each soil and pasture type based on assessed water requirements, rainfall and evapo-transpiration data.</p> <p>1.3. Nutrient requirements for pastures are assessed to determine appropriate fertiliser and soil ameliorant program.</p> <p>1.4. Grazing and fodder conservation strategies are identified and planned for.</p> <p>1.5. Infrastructure required to support grazing management is identified.</p> <p>1.6. Budgetary constraints are identified and accounted for according to enterprise requirements.</p> <p>1.7. A pasture management program is developed to meet production targets and enterprise objectives.</p>
2. Implement pasture management program	<p>2.1. Pasture program is implemented and pasture capacity is monitored according to enterprise requirements.</p> <p>2.2. Strategic grazing may be carried out to reduce or eradicate areas of weed infestation where planned.</p> <p>2.3. Fertiliser and soil ameliorant applications and rates</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>are determined appropriate to pasture type and soil analysis, and applied accordingly.</p> <p>2.4. Soil moisture is monitored and watering scheduled adjusted for irrigated pasture.</p> <p>2.5. Processes to minimise waste and soil degradation are introduced and implemented according to enterprise environmental requirements.</p>
3. Monitor pasture growth and fodder production	<p>3.1. Longer term trends in weed, pest and disease incidence are determined and any necessary changes to control measures are implemented.</p> <p>3.2. Soil structure and risks of erosion are monitored and necessary changes to cultural practices, grazing management and drainage are determined to improve soil quality.</p> <p>3.3. Irrigation and drainage systems are checked regularly and maintained if appropriate.</p> <p>3.4. Grazing management is monitored to ensure sustainable pasture and optimal livestock production levels.</p> <p>3.5. Feed surpluses and deficiencies are identified and appropriate action taken according to enterprise requirements.</p> <p>3.6. Pasture maturity is monitored and seed harvesting is undertaken to meet marketing and production targets if required.</p>
4. Review production level	<p>4.1. Pasture yields are monitored and evaluated against forecast production levels.</p> <p>4.2. Grazing programs are evaluated for sustainability of the land and pasture resource, and livestock profitability.</p> <p>4.3. Physical and financial records of production are maintained for analysis and evaluation of production performance.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**REQUIRED SKILLS AND KNOWLEDGE****Required skills**

- determine fertiliser, soil ameliorants and biological inputs required to support production
- apply environmental protection strategies in land use
- set objectives and milestones for pasture production
- calculate costs
- determine soil quality and land use capability
- monitor the productivity and feed intake of grazing livestock
- develop grazing strategies and plan infrastructure required
- assess the impact of grazing on pasture productivity and resilience
- identify pasture species and estimate dry matter production of pasture
- assess options to control weed infestation
- identify strategies for pest and disease control
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- land and soil conditions
- pasture species and growing requirements
- pasture grazing strategies
- nutrient requirements and soil fertility
- environmental protection strategies
- safe handling processes for fertilisers
- infestation patterns for different types of weed
- Occupational Health and Safety (OHS) legislative and enterprise requirements
- relevant environmental codes of practice, legislation and regulations relating to farm production.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## AHCBAC402A Plan a pasture establishment program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the planning of a pasture establishment program and defines the standard required to: assess site factors; select suitable pasture species and cultivars; identify threats to pasture establishment including weeds, pests and diseases; determine resources and equipment for planting and post-planting care; prepare pasture establishment plans to meet livestock production plans and schedules.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to farm enterprise managers.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine requirements of the pasture establishment program	<p>1.1.Existing pasture is assessed and either retained or removed.</p> <p>1.2.Pasture species and cultivars that are appropriate to the site and meet production needs are identified and the required quantity calculated, costed and availability confirmed with suppliers.</p> <p>1.3.Pasture establishment procedures are selected consistent with seasonal factors, site and soil characteristics, production plans and the resources and equipment available.</p> <p>1.4.Post-planting care is planned according to production needs, enterprise standards and site capabilities.</p> <p>1.5.Plant germination and nutrient requirements are identified and planned for, taking into account soil characteristics.</p> <p>1.6.Resources, tools, equipment and machinery required for planting and post-planting care are identified, costed and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>1.7.Occupational Health and Safety (OHS) hazards associated with the pasture establishment program are identified; risks assessed and controls developed according to enterprise guidelines.</p>
2. Prepare and document the pasture establishment program	<p>2.1.Detailed plans are prepared based on the requirements of the pasture establishment program and production requirements.</p> <p>2.2.Plan is produced which can be readily interpreted</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>and understood by on-site personnel according to enterprise standards.</p> <p>2.3. On-site procedures and schedules required for the planting of the site and post-planting care of pasture are developed and communicated to staff.</p> <p>2.4. Contingencies are planned for and alternative strategies identified if applicable.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- determine requirements of the pasture establishment program
- research suitable pasture species for the site and proposed land use
- prepare and document the pasture establishment program
- develop strategies for weed, pest and disease control
- assess pastures for production potential
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- pasture varieties and their characteristics, requirements and production potential
- establishment techniques of specific pasture species and cultivars
- the advantages and disadvantages of a range of pasture establishment procedures
- maintenance requirements and practices for specific pasture species and cultivars after initial establishment
- livestock production systems and their integration with pasture production

**REQUIRED SKILLS AND KNOWLEDGE**

- planning process, including costing and scheduling of works
- plant identification of pasture and weed species
- role of pasture in sustainable land use
- environmental impacts of pasture establishment.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assess site factors
- select suitable pasture species and cultivars
- identify threats to pasture establishment including weeds, pests and diseases
- determine resources and equipment for planting and post-planting care
- prepare pasture establishment plans to meet livestock production plans and schedules.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
The range of crops and establishment methods may include:	<ul style="list-style-type: none"> <li>annual, perennial and subtropical pasture species, established with or without cover crops.</li> </ul>

## AHCBA403A Supervise agricultural crop establishment

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the supervision of agricultural crop establishment and defines the standard required to: identify the seasonal conditions which affect crop establishment; plan the planting operation including timing and resources required; carry out pest, weed and disease control either pre or post planting if required; supervise staff and monitor the planting operation; recognise poor growth and lack of vigour and investigate causes.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to cropping managers and supervisors.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Source information for input to planting plan	<p>1.1. Documents within the organisation that detail the requirements of the production plan are identified and obtained.</p> <p>1.2. Information regarding activities that will be occurring at a similar time to planting is gathered through discussion with colleagues and management, and by reading the production/management plan.</p> <p>1.3. The specific target area, or paddock, for planting is identified from the production/management plan.</p> <p>1.4. Trash levels and seedbed conditions are assessed and accounted for in planning.</p>
2. Prepare planting plan	<p>2.1. The agricultural crop and method(s) of planting to be used are determined from the organisations production / management plan and availability.</p> <p>2.2. The resources required for the planting operations are assessed and calculated from the area to be sown, the method of planting to be used, and the available timelines.</p> <p>2.3. The target dates are set for planting, including the sequencing for planting across paddocks or crop areas, in line with the overall production/management planning for the organisation.</p> <p>2.4. The chemical applications that are required prior to and post planting are selected and organised to occur at an appropriate time.</p> <p>2.5. The plan is prepared to ensure that any potential detrimental environmental impacts are minimised or</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>eliminated, including the proper disposal of containers, drums and other waste.</p> <p>2.6. Occupational Health and Safety (OHS) hazards are identified, assessed, and safe work practices for planting are implemented and overseen with staff.</p> <p>2.7. Any approvals that are required for the planting operations are identified, sought and obtained.</p> <p>2.8. Measurable indicators, specifications and targets are determined, based on the production/management plan and the method, resources, and seed to be used.</p>
<p>3. Determine scheduling and key responsibilities</p>	<p>3.1. Scheduling for planting is determined taking the range of geographic and resourcing factors into consideration, as well as operations that will be occurring at the same time as the planting.</p> <p>3.2. Key responsibilities for specific preparatory processes that are required before planting are determined.</p> <p>3.3. Key responsibilities for specific implementation processes are determined.</p> <p>3.4. Recordkeeping requirements are determined and procedures are put in place to ensure compliance with the range of applicable regulations.</p> <p>3.5. The plan, including scheduling and key responsibilities, is clearly documented.</p> <p>3.6. The plan includes the type, format, frequency and detail of any reporting required by both managers and operators.</p>
<p>4. Monitor and adjust the planting plan</p>	<p>4.1. Monitoring points outlined in the implementation plan are adhered to.</p> <p>4.2. Checks are made to ensure that OHS procedures are being observed and followed.</p> <p>4.3. Checks are made to ensure that the site environmental requirements are being observed and followed.</p> <p>4.4. Operational staff and any contractors are communicated with regularly to ensure smooth operation and progress.</p> <p>4.5. Checks are made to ensure that the documentation required by the organisation, or other regulating bodies, is completed clearly and accurately during the progress of the planting process.</p> <p>4.6. Where any corrective action or amendment to the</p>

ELEMENT	PERFORMANCE CRITERIA
	planting plan is required, the action is initiated and taken.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and oversee safe operating procedures
- identify the seasonal conditions which affect crop establishment
- plan and schedule planting including amending plans during the operations
- recognise poor growth and lack of vigour caused by nutrient deficiency and incorrect planting depth
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the equipment that is required for a range of tillage methods, and pest and weed control prior to planting
- crop establishment requirements
- equipment servicing requirements
- integrated pest and weed management techniques
- environmental controls and codes of practice applicable to the enterprise
- Legislation, codes of practice and enterprise procedures for OHS and environmental management
- sound management practices and processes to minimise environmental impacts such as noise, soil degradation, and debris from planting operations.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify the seasonal conditions which affect crop establishment</li> <li>• plan the planting operation including timing and resources required</li> <li>• carry out pest, weed and disease control either pre or post planting if required</li> <li>• supervise staff and monitor the planting operation.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
The range of crops may include:	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• sugar</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>temperate and tropical pastures.</li> </ul>

## AHCBA404A Plan and implement agricultural crop maintenance

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the planning and implementation of agricultural crop maintenance and defines the standard required to: accurately assess crop needs; carry out crop cultural practices and treatments; monitor and assess crop maturity; ascertain water requirements from survey advice and weather forecasts; accurately measure soil moisture and interpret data; determine time of harvest with specialist advice.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to farm supervisors and cropping managers who maintain the health of agricultural crops.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine condition of agricultural crops	<p>1.1.Measurement and assessment of soil moisture is undertaken to calculate soil water percentage.</p> <p>1.2.Water requirements are calculated according to soil analysis data, standing crop, and forecast weather conditions.</p> <p>1.3.Nutrient requirements and availability for crops are assessed and deficiencies identified.</p> <p>1.4.Factors affecting crop capacity are identified.</p> <p>1.5.Sustainable land management is implemented according to enterprise requirements and environmental standards.</p>
2. Determine pest control	<p>2.1.Evidence of pests and disease is assessed and integrated control measures appropriate to type and species of infestation are determined.</p> <p>2.2.Areas of weed infestation, which may be reduced or eradicated, are located and species identified.</p> <p>2.3.Integrated control methods are selected to control pests and weeds.</p> <p>2.4.Control methods are scheduled at the optimum time with minimal damage to the crop.</p> <p>2.5.Severity of infestations and records of treatments are maintained to provide essential data for future management programs.</p>
3. Manage crop health	<p>3.1.Crop is planned and monitored to maintain water and nutritional requirements for optimal production.</p> <p>3.2.Weed and pest levels are monitored and the control program modified as required.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Benefits from soil and plant inputs and treatments are assessed and documented for analysis in future management programs.</p> <p>3.4. Cropping programs are monitored for efficiency and effectiveness, and documented for future best practice.</p> <p>3.5. Relevant data is documented for continual analysis and effective crop management.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- refer to records of, and assess, soil health and nutrient status
- dispatch soil samples to laboratories
- carry out a soil health appraisal
- identify likely threats to crop from pests, weeds and diseases
- recognise damage to crop caused by weeds, pests or diseases
- recognise poor growth and lack of vigour in crop caused by nutrient deficiency
- record monitoring results
- plan and implement integrated control strategies to address nutrient deficiencies, disease outbreaks, pest and weed infestations
- accurately measure soil moisture and estimate irrigation needs if required
- apply pesticides or fertility treatments as required
- communicate with industry, suppliers and other personnel
- read and interpret Material Safety Data Sheets (MSDSs), production plans and analysis results
- estimate and measure pest control treatments
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- crop growth stages and keys
- crop growth requirements compared to soil nutrient status
- fertiliser and soil ameliorant types and application times, methods and rates

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
<ul style="list-style-type: none"> <li>• chemical use if applicable</li> <li>• factors leading to development of chemical resistance</li> <li>• integrated pest management strategies</li> <li>• life-cycles of pest, diseases and weeds</li> <li>• Occupational Health and Safety (OHS) legislative requirements</li> <li>• relevant codes of practice with regard to the use and control of hazardous substances</li> <li>• legislation and codes of practice with regard to environmental protection.</li> </ul>

## Evidence Guide

<b>EVIDENCE GUIDE</b>

## AHCBA405A Supervise agricultural crop harvesting

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the supervision of agricultural crop harvesting and defines the standard required to: establish strategies, procedures and controls for crop harvesting, including fire prevention and control plans; negotiate and arrange contracts and agreements; estimate crop yields; maintain budgetary controls; assess crop maturity and quality in readiness for harvesting; arrange storage and delivery requirements; and segregate grain for quality and monitor for moisture content.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to farm managers and harvest supervisors whose work is likely to be carried out under broad supervision.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for harvesting	<p>1.1. Crop maturity and quality is assessed in readiness for harvesting.</p> <p>1.2. Pre-harvest treatments for the control and eradication of pests are determined and carried out according to Occupational Health and Safety (OHS) requirements.</p> <p>1.3. Requirements for licences or permits are identified and complied with.</p> <p>1.4. Insurance requirements are assessed and risk management strategies planned and implemented as required.</p>
2. Determine harvest strategy	<p>2.1. Optimum timing to carry out harvest is estimated and calculated according to crop maturity assessment.</p> <p>2.2. Resource requirements are assessed giving consideration to the size of the crop and estimated timing of harvest.</p> <p>2.3. Labour and equipment required to carry out harvesting operations is confirmed and arranged within budgetary constraints.</p> <p>2.4. Requirements for fire prevention and control are identified and arranged according to OHS requirements.</p>
3. Coordinate the harvest strategy	<p>3.1. Effective communication strategies are implemented to ensure smooth workflow operations and personnel safety.</p> <p>3.2. Harvesting operations are implemented and adjusted as required according to weather, equipment and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>staff requirements.</p> <p>3.3. Equipment operation is coordinated for maximum efficiency and monitored for performance effectiveness.</p> <p>3.4. Existing and potential hazards are identified and controlled according to OHS and enterprise requirements.</p>
4. Complete harvest operation	<p>4.1. Storage resources are located for efficient operations and strategies for drying grain are identified, if necessary, according to marketing initiatives.</p> <p>4.2. Quality of grain is segregated to marketing grades and monitored for moisture content according to classification standards.</p> <p>4.3. Harvesting operations and outcomes are evaluated against harvest strategy.</p> <p>4.4. Relevant information is documented for continual analysis and effective planning management.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- organise and schedule the maintenance of plant and equipment
- establish strategies, procedures and controls for crop harvesting
- negotiate and arrange contracts and agreements
- implement safe workplace and positive environmental practices
- deal with weather and other contingencies
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected, and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of

## AHCBAC406A Maintain grain quality in storage

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers maintaining grain quality in storage and defines the standard required to: implement pre-determined integrated pest management strategies; monitor and maintain hygiene; monitor and control pests and contaminants; investigate and recommend options for technology, systems or practices that will improve grain quality.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to those whose job role includes assessing and maintaining hygiene in grain storage areas, as well as monitoring the grain for deterioration or pests and contaminants.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Maintain hygiene in storage areas	<p>1.1.Storage conditions and facilities are regularly tested to maintain the standard of hygiene in stored grain.</p> <p>1.2.The need for repairs and maintenance is identified, and either carried out or a report of the need is made.</p> <p>1.3.Treatments are applied to storage facilities to maintain hygiene standards and in line with the grain storage program.</p> <p>1.4.The application of all treatments used is accurately recorded in line with the grain storage program.</p>
2. Monitor grain from arrival to dispatch	<p>2.1.Before the grain is stored, samples are taken for testing to ensure a complete record of the quality of the grain.</p> <p>2.2.Samples of the grain are taken regularly for testing to ensure purity standards in the grain.</p> <p>2.3.At dispatch, the grain is checked for quality and against the records taken at the point of storage.</p> <p>2.4.Test samples are taken, prepared and forwarded for analysis according to prescribed guidelines.</p> <p>2.5.Clear and accurate records of grain movements in and out of storage are created, maintained and kept as prescribed in the grain storage program.</p> <p>2.6.Recommendations are made to adopt new technology, systems or practices that will improve or maintain grain quality in storage.</p> <p>2.7.All activities around the grain storage facilities are undertaken according to the Occupational Health and Safety (OHS) guidelines detailed in the grain storage</p>

ELEMENT	PERFORMANCE CRITERIA
	program.
3. Monitor and maintain grain condition in storage	<p>3.1.Regular checks of grain in storage are conducted to maintain continued freedom from contaminants and deterioration.</p> <p>3.2.Periodical checks of grain in long-term storage are conducted for quality factors and viability according to enterprise requirements.</p> <p>3.3.Where necessary, samples of the grain are taken for testing in a laboratory setting.</p> <p>3.4.Where test samples are required, they are taken, prepared, and forwarded for analysis according to industry quality assurance and laboratory requirements.</p> <p>3.5.Clear and accurate records of grain tests and inspections are created, maintained and kept as described in the grain storage program.</p> <p>3.6.The condition of storage facilities is monitored using the schedule and methods outlined in the grain storage program.</p> <p>3.7.Where it is required, appropriate corrective action is taken to maintain grain quality.</p> <p>3.8.All activities around the grain storage facilities are undertaken according to the OHS guidelines detailed in the grain storage program.</p>
4. Control weeds and pests in storage are	<p>4.1.Grain is monitored according to the monitoring points, targets and methods outlined in the grain storage program.</p> <p>4.2.Samples of the grain are appropriately taken to test for pest infestation.</p> <p>4.3.Where it is required, the sample is prepared and forwarded for analysis according to the prescribed guidelines.</p> <p>4.4.Pests in storage are controlled according to the guidelines in the grain storage program.</p> <p>4.5.Enclosed grain storage area is fumigated, and the surrounding environment is kept clean according to the integrated pest management strategy in the grain storage program.</p> <p>4.6.The sources of any infestations are identified and steps are taken to control them in line with the integrated pest management strategy in the grain storage program.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.7. All pest control activities are undertaken in line with the OHS guidelines detailed in the grain storage program.</p> <p>4.8. Clear and accurate records of treatments to the grain and storage facilities are created, maintained and kept as described in the grain storage program.</p> <p>4.9. Clear and accurate records of all chemical use in the storage facility, and the applicable withholding periods are created, maintained and kept as described in the grain storage program.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- setup and operate fumigation and pesticide application equipment
- sample loads and grain in storage, and conduct a simple analysis
- create, maintain, use and keep clear and trackable records
- use a range of communication equipment, including in emergency situations
- inspect and test silos
- identify insects, pests and other factors that affect grain quality
- set up and operate inert atmosphere equipment
- handle and mix chemicals for baiting, fumigation, spraying, and other forms of application
- interpret monitored information on pests
- plan and schedule weed, pest and/or disease control including amending plans during the operations
- calculate mass and volumes of grain and grain storages
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of

**REQUIRED SKILLS AND KNOWLEDGE**

cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- the types, levels and control methods for a range of pests and contaminants
- silo and temporary storage configuration and operation
- chemical handling and dangerous goods requirements
- the range of applicable pesticides, their uses, application methods and handling requirements
- commodity types, varieties and grades
- handling requirements for gas cylinders
- insect life cycles and optimum conditions for development
- Integrated Pest Management (IPM) principles and the procedures used within the organisation
- legislative requirements, codes of practice and enterprise procedures relating to the purchase, transport, storage, use and disposal of pesticides and fumigants, OHS and environment
- client's sampling and classification requirements
- common grain pests and their general control methods
- appropriate action to be taken in contingency situations
- marketing requirements and options for grain growers
- equipment available and its uses, limitations and OHS requirements
- site hazards and sound management practices and processes to minimise noise, odours, and debris from grain storage operations
- chemical handling and dangerous goods requirements
- developments and options available for maintaining or improving the quality of grain during storage.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy

<b>EVIDENCE GUIDE</b>	
<b>competency in this unit</b>	holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: <ul style="list-style-type: none"> <li>• implement pre-determined integrated pest management strategies</li> <li>• monitor and maintain hygiene</li> <li>• monitor and control pests and contaminants</li> <li>• investigate and recommend options for technology, systems or practices that will improve grain quality.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Factors affecting grain quality in storage may include:	<ul style="list-style-type: none"> <li>• the presence of water or water damage</li> <li>• presence and activity of pests (including insects, moulds, birds and rodents)</li> <li>• dead vertebrate pests in storage</li> <li>• breakdown of storage security and integrity (e.g. holes, cracks, poor sealing, etc.)</li> <li>• grain moisture migration</li> <li>• excessive dust levels</li> <li>• high pesticide and fumigant residues</li> <li>• legal withholding periods.</li> </ul>

# AHCBAC407A Save, prepare and store agricultural seed

## Modification History

Not Applicable

## Unit Descriptor

<p><b>Unit descriptor</b></p>	<p>This unit covers saving, preparing and storage of agricultural seed and defines the standard required to: calculate the quantity of seed required for the following season; grade and test seed and interpret the results; store the seed for use in the following season; maintain grain in storage to ensure maximum quality and yield when used.</p>
-------------------------------	--

## Application of the Unit

<p><b>Application of the unit</b></p>	<p>This unit applies to cropping managers and is likely to be carried out independently as part of managing a cropping enterprise.</p>
---------------------------------------	--

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

<p><b>Prerequisite units</b></p>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Select seed from agricultural crops	<p>1.1.The quantity of seed required to sow the following season's crop is calculated.</p> <p>1.2.The area of crop needed to produce the required quantity of seed for the following season's crop is calculated.</p> <p>1.3.A portion of the crop to be used as seed is selected, based on the calculated requirements and its health, vigour, and grain size.</p> <p>1.4.The soil type in the selected portion of the crop is noted for potential input to management decision-making.</p> <p>1.5.Measures are taken to improve seed and plant health, vigour and uniformity within the selected area.</p> <p>1.6.The application of any chemicals to the crop is undertaken in full consideration of detrimental environmental impacts.</p> <p>1.7.All work carried out is done using the appropriate personal protective equipment and is within Occupational Health and Safety (OHS) guidelines.</p>
2. Evaluate and grade seed	<p>2.1.After harvest, the grain variety saved is assessed for its suitability for the location, the soil, and the organisation's current marketing requirements.</p> <p>2.2.Information regarding new varieties or trial results and progress is sourced for input to management decision-making.</p> <p>2.3.The seed is graded to the required size either on or off-site.</p> <p>2.4.Fungicidal and insecticidal dressings are applied to</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>the seed where appropriate and according to the organisation's production and marketing requirements.</p> <p>2.5. Test samples are taken, prepared and forwarded to the analysing body, according to the guidelines of that body.</p> <p>2.6. Records of observations, information gathered, and results of tests and grading are kept, updated, and maintained according to the requirements of the organisation and the industry.</p> <p>2.7. The records kept are forwarded to the appropriate person for analysis and decision-making.</p>
3. Store seed	<p>3.1. The storage facilities to be used are selected and hygienically prepared.</p> <p>3.2. Seed is transferred to the storage facility according to the organisation's OHS and hygiene procedures.</p> <p>3.3. Seed is stored under conditions that maintain its quality and germination capacity.</p> <p>3.4. Periodical checks of seed in long-term storage are conducted for quality factors and viability according to enterprise requirements.</p> <p>3.5. Seed samples for laboratory testing are taken, prepared and forwarded for analysis according to prescribed guidelines.</p> <p>3.6. Clear and accurate records of seed storage, tests and inspections are created, maintained and kept as described in the seed storage program.</p> <p>3.7. The condition of storage facilities is monitored using the schedule and methods outlined in the seed storage program and appropriate corrective action is taken to maintain seed quality where required.</p> <p>3.8. Activities around the seed storage facilities are undertaken according to the OHS guidelines detailed in the grain storage program.</p>
4. Collect and deliver seed	<p>4.1. Delivery or supply terms are established and applied when collecting or delivering seed.</p> <p>4.2. Seed sold or purchased conforms to local State and Federal legislation and regulations.</p> <p>4.3. Regulations relating to the interstate movement of seeds are observed.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- select appropriate seed tests
- apply pre and post-harvest treatments for seed
- identify varieties from growth patterns
- identify weed seeds and contaminants
- identify pests in stored grain and initiate control measures
- calculate volumes, capacities, areas, ratios for seed, storages, and chemicals
- keep, update and maintain records relating to test results, provenance, varieties, pest control measures, and other relevant information about the seed
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- identification of varieties
- seed treatment and cleaning measures
- sources of purchased seed
- inoculation treatments and seed dressings used within the organisation
- records and documentation required for tracking and handling of seed
- storage techniques and requirements for seed and grain
- environmental controls and codes of practice applicable to the enterprise
- relevant legislation and regulations relating to OHS, contractor engagement, chemical use and application, vehicle and plant use, and to the use, handling and sale of seed
- sound management practices and processes to minimise noise, odours, and debris from sowing operations.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Develop agricultural crop establishment program	<p>1.1. Production targets for each crop type are established, consistent with marketing and enterprise objectives.</p> <p>1.2. Plant varieties are selected that are best suited to soil, climate, seasonal conditions and marketing goals.</p> <p>1.3. Irrigation schedules, where required, are determined for each soil and crop type based on assessed water requirements, rainfall and evapo-transpiration data.</p> <p>1.4. Nutrient requirements for crops are assessed to determine appropriate fertiliser program.</p> <p>1.5. Budgetary constraints are identified and maintained according to enterprise requirements.</p> <p>1.6. A crop establishment program is developed to meet the production targets and enterprise objectives specified in the crop production plan.</p>
2. Manage crop maintenance	<p>2.1. Strategic grazing may be planned to reduce or eradicate areas of weed infestation.</p> <p>2.2. Fertiliser applications and rates are determined appropriate to crop type and applied accordingly.</p> <p>2.3. Crop nutrient requirements are determined to ensure sustainability and achievement of yield.</p> <p>2.4. Soil moisture is monitored and watering schedule adjusted if appropriate.</p> <p>2.5. Processes to minimise waste and soil degradation are introduced and implemented according to environmental procedures.</p>
3. Monitor an	3.1. Longer term trends in weed, pest and disease

ELEMENT	PERFORMANCE CRITERIA
agricultural crop through to harvest	<p>incidence are determined, and any necessary changes to control measures are implemented.</p> <p>3.2. Soil structure and erosion are monitored and necessary changes to cultural practices, grazing management and drainage are determined.</p> <p>3.3. Irrigation and drainage systems are checked regularly and maintained if appropriate.</p> <p>3.4. Grazing management is monitored to ensure crop production levels.</p> <p>3.5. Crop maturity is monitored and harvesting is undertaken to meet marketing and production targets.</p>
4. Record production level and review cropping strategies	<p>4.1. Crop yields are monitored and evaluated against forecast production levels.</p> <p>4.2. Grazing and cropping programs are evaluated for efficiency and effectiveness, and documented for future best practice.</p> <p>4.3. Evaluation of production performance is undertaken and documented for use in reviewing and revising management program.</p> <p>4.4. Physical and financial records of production are maintained for analysis and evaluation of production performance.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply environmental protection strategies in land use
- set objectives and milestones for a cropping program
- determine soil quality and land use capability
- determine crop nutrient requirements and fertiliser requirements
- measure and assess quantities of fertiliser to meet plant requirements
- predict patterns of weed infestation
- design irrigation processes to avoid soil degradation if applicable
- assess financial strategies and prepare budgets
- use literacy skills to fulfil job roles as required by the organisation. The level of

**REQUIRED SKILLS AND KNOWLEDGE**

skill may range from reading and understanding documentation to completion of written reports

- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- land and soil conditions
- effects of soil characteristics on nutrient availability
- financial analysis techniques
- environmental protection strategies
- cultivation requirements for different types of crop
- safe handling processes for fertilisers
- infestation patterns for different types of weed
- integrated strategies for the management of pests, weeds and diseases
- Occupational Health and Safety (OHS) legislative requirements
- environmental legislation and codes of practice, relating to farm production.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- develop a cropping program for an enterprise
- plan for crop establishment
- monitor growing crops, provide inputs and carry out

<b>EVIDENCE GUIDE</b>	
	cultural practices as required <ul style="list-style-type: none"> <li>• develop a plan for the crop harvest</li> <li>• monitor crop yields and evaluate production performance.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Agricultural crops include:	<ul style="list-style-type: none"> <li>• wheat and coarse grains</li> <li>• cotton</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• sugar</li> <li>• temperate and tropical pastures.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan for forage conservation	<p>1.1. Determine the resource needs and end use requirements of forage conservation in the farm production system.</p> <p>1.2. Define forage conservation options and cost benefit.</p> <p>1.3. Select appropriate paddocks for forage conservation with regard to species selection and target growth stage.</p> <p>1.4. Select appropriate forage conservation machinery, equipment and personal protective equipment in accordance with manufacturer's specifications, Occupational Health and Safety (OHS) requirements and industry practice.</p> <p>1.5. Ensure safe access to paddocks for harvesting and transport machinery.</p> <p>1.6. Plan and prepare storage facility/system for selected forage conservation method.</p> <p>1.7. Identify and minimise potential environmental impacts of forage conservation activities.</p> <p>1.8. Negotiate contracts and costs including crop inputs, machinery, harvest area and storage sites where applicable.</p> <p>1.9. Communicate details of work activities with workers and/or contractors where applicable.</p>
2. Prepare paddocks for forage conservation	<p>2.1. Identify need for fertiliser, irrigation, weed control and grazing or slashing before closing paddock to stock at appropriate time.</p> <p>2.2. Identify optimum time for harvest of key species.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Oversee forage harvesting operations	<p>2.3. Monitor and control weeds, pests and diseases.</p> <p>3.1. Establish dry matter targets for the selected method of forage conservation.</p> <p>3.2. Monitor seasonal and current weather conditions to determine optimum time for harvest and to ensure quality.</p> <p>3.3. Assess condition and dry matter content of the crop throughout the harvesting operation.</p> <p>3.4. Select harvesting and conditioning machinery based on weather conditions and forage drying targets.</p> <p>3.5. Ensure that harvesting activities are conducted in a safe, controlled and efficient manner.</p> <p>3.6. Ensure that baling, wrapping, compacting, sealing and/or storage of forage is in accordance with storage plan.</p> <p>3.7. Ensure that forage is safely loaded, transported and stored in accordance with OHS and quality requirements and to minimise spoilage and the risk of combustion.</p>
4. Complete operation	<p>4.1. Complete records in accordance with quality assurance requirements and industry practice.</p> <p>4.2. Ensure waste and debris is disposed of to minimise environmental impact.</p> <p>4.3. Ensure that machinery and ancillary equipment is cleaned and serviced in accordance with manufacturer's specifications, OHS requirements and industry practice.</p> <p>4.4. Conduct quality checks on stored forage.</p> <p>4.5. Monitor and minimise environmental impacts of forage conservation activities including concentration of nutrients at field out areas and effluent run-off.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <ul style="list-style-type: none"> <li>• assess the need for and implications of forage conservation in the farming system</li> <li>• select and implement a forage conservation system</li> <li>• perform harvesting operations</li> <li>• use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports</li> <li>• use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views</li> <li>• use numeracy skills to estimate, calculate and record complex workplace measures</li> <li>• use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• economic analysis of forage conservation</li> <li>• silage and hay conservation systems</li> <li>• factors affecting the quality of silage and hay</li> <li>• dry matter content, quality and hygiene requirements</li> <li>• range and functions of silage and haymaking machinery and equipment</li> <li>• common weeds, pests and diseases associated with crops and pastures</li> <li>• types and application of personal protective equipment</li> <li>• legislation and regulations including licensing requirements in relation to forage operations</li> <li>• risk factors including human and animal health, weather, harvesting and environmental.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Develop a pasture and crop program	<p>1.1. Production targets for each crop and pasture type are established consistent with marketing and enterprise objectives.</p> <p>1.2. Plant varieties are selected that are best suited to soil, climate, seasonal conditions and marketing goals.</p> <p>1.3. Irrigation schedules, where required, are determined for each soil and crop/pasture type based on assessed water requirements, rainfall and evapo-transpiration data.</p> <p>1.4. Nutrient requirements for crops and pastures are assessed to determine appropriate fertiliser program.</p> <p>1.5. Budgetary constraints are identified and maintained according to enterprise requirements.</p> <p>1.6. A pasture and crop program is developed to meet production targets and enterprise objectives.</p>
2. Implement pasture and crop management program	<p>2.1. Pasture and crop program is implemented and pasture capacity is monitored according to enterprise requirements.</p> <p>2.2. Strategic grazing is carried out, where necessary, to reduce or eradicate areas of weed infestation, where planned.</p> <p>2.3. Fertiliser applications and rates are determined appropriate to crop/pasture type and applied</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>accordingly.</p> <p>2.4.Crop and pasture nutrient requirements are applied to ensure achievement of yield and sustainability of pasture.</p> <p>2.5.Soil moisture is monitored and watering scheduled adjusted as required.</p> <p>2.6.Processes to minimise waste and soil degradation are introduced and implemented according to environmental standards.</p>
3. Monitor crop/pasture growth and fodder production	<p>3.1.Longer term trends in weed, pest and disease incidence are determined and any necessary changes to control measures are implemented.</p> <p>3.2.Soil structure and erosion are monitored and necessary changes to cultural practices, grazing management and drainage are determined.</p> <p>3.3.Irrigation and drainage systems are checked regularly and maintained, if appropriate.</p> <p>3.4.Grazing management is monitored to ensure high pasture and livestock production levels.</p> <p>3.5.Livestock are integrated into the cropping cycle through grazing of pastures returning to crop, stubbles and crop residues, and dual purpose crops.</p> <p>3.6.Feed surpluses and deficiencies are identified and appropriate action taken according to enterprise requirements.</p> <p>3.7.Crop/pasture maturity is monitored and harvesting is undertaken to meet marketing and production targets.</p>
4. Review production level	<p>4.1.Pasture and crop yields are monitored and evaluated against forecast production levels.</p> <p>4.2.Grazing and cropping programs are evaluated for efficiency and effectiveness, and documented for future best practice.</p> <p>4.3.Evaluation of production performance of each enterprise is undertaken and documented for use in reviewing and revising management program.</p> <p>4.4.Physical and financial records of production are maintained for analysis and evaluation of production performance.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- measure and assess quantities of fertiliser
- apply environmental protection strategies in land use
- set objectives and milestones
- determine soil quality and land use capability
- predict patterns of weed infestation
- design irrigation processes to avoid soil degradation
- assess financial strategies and prepare budgets
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- land and soil conditions
- effects of nutrients of soil types
- financial analysis techniques
- environmental protection strategies
- cultivation requirements for different types of crop
- safe handling processes for fertilisers
- infestation patterns for different types of weed
- OHS and environmental legislation codes of practice and enterprise procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

<b>EVIDENCE GUIDE</b>	
Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• develop a pasture and crop program to meet production targets and enterprise objectives</li> <li>• maintain the productivity of crops and pastures in a farming system</li> <li>• monitor soil structure and erosion and make required changes to cultural practices and grazing management</li> <li>• implement grazing strategies to optimise pasture and livestock production levels and support the cropping program</li> <li>• evaluate grazing and cropping programs for efficiency and effectiveness</li> <li>• use physical and financial records of production to evaluate production performance.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Pastures may include:	<ul style="list-style-type: none"> <li>• all unimproved and improved rangelands used for grazing</li> <li>• temperate and tropical pastures</li> <li>• crop stubble</li> <li>• shrubs and trees</li> <li>• residues that may be used for stock feed.</li> </ul>

<b>RANGE STATEMENT</b>	
Crops may include:	<ul style="list-style-type: none"> <li>• agricultural broadacre crops, including wheat and coarse grains</li> <li>• grain legumes</li> <li>• oilseeds</li> <li>• sugar</li> <li>• temperate and tropical pastures</li> <li>• intensive fruit and vegetable crops</li> <li>• field and tree crops</li> <li>• vines</li> <li>• hay crops.</li> </ul>

## AHCBA504A Plan and manage a stored grain program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers planning and managing a stored grain program and defines the standard required to: plan for storage needs based on grain production estimates; implement an Integrated Pest Management (IPM) program for grain storage; supervise procedures to manage Occupational Health and Safety (OHS) risk for the storage site; schedule the storage and transport of grain; supervise staff to monitor transport, storage, sampling and pest control procedures; maintain records of grain storage to meet Quality Assurance (QA) requirements.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to those who plan and manage grain storage at grain storage facilities for the long, medium and short term to maximise returns for the organisation.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan grain storage program	<p>1.1.Relevant organisational documentation and information is obtained and analysed for input to the storage program.</p> <p>1.2.The available storage facilities are identified, recorded and assessed for suitability and capacity.</p> <p>1.3.The projected grain production and delivery quantities, types and timeframes are calculated and analysed against storage capacity.</p> <p>1.4.Temporary storage if required, is arranged.</p> <p>1.5.Timeframes and scheduling for delivery of grain to storage facilities on- and off-site are estimated.</p> <p>1.6.The program includes plans for annual, seasonal and short-term periods, and is prepared to achieve the goals and objectives of the organisation.</p> <p>1.7.The program, including scheduling and key responsibilities, is clearly documented.</p> <p>1.8.The program includes the type, format, frequency and detail of any reporting required by both managers and operators.</p>
2. Plan integrated pest control for the storage area	<p>2.1.Grain is sampled for pest infestation and testing is organised.</p> <p>2.2.The results of samples and tests for pest infestation are recorded and analysed.</p> <p>2.3.An integrated pest management program is developed and implemented to control grain insects</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>and other pests in storage.</p> <p>2.4. Monitoring points, targets and methods are determined to identify possible development of resistance in insects.</p> <p>2.5. The pest control strategies selected relate to the requirements of the end use, and to the customers expectations.</p> <p>2.6. Record keeping requirements are determined and procedures are put in place to ensure compliance with the range of applicable regulations.</p> <p>2.7. The program, including scheduling and key responsibilities, is clearly documented.</p> <p>2.8. The program includes the type, format, frequency and detail of any reporting required by both managers and operators.</p>
3. Implement OHS program for grain storage area	<p>3.1. OHS hazards are identified within and surrounding the grain storage area(s).</p> <p>3.2. Procedures to minimise OHS risks are developed and documented for use by all people operating around the storage facilities.</p> <p>3.3. Procedures to minimise OHS risks are communicated clearly to all people operating around the storage facilities, and confirmation of the clear communication is sought.</p> <p>3.4. The OHS program clearly describes the personal protective equipment and safety gear required to be used around the storage facilities.</p> <p>3.5. Record keeping requirements are determined and procedures are put in place to ensure compliance with the range of applicable regulations.</p> <p>3.6. The program includes the type, format, frequency and detail of any reporting required by both managers and operators.</p>
4. Manage the grain storage program	<p>4.1. All aspects of the grain storage program are implemented to achieve the goals and objectives of the organisation.</p> <p>4.2. Activities are scheduled and organised to allow for efficient transport and storage of the grain.</p> <p>4.3. Pest control strategies are undertaken according to the requirements of the integrated pest management program.</p> <p>4.4. Personal protective equipment and safety gear is</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>provided to all people operating around the storage facilities.</p> <p>4.5. All OHS procedures that were prepared are implemented by operational personnel.</p> <p>4.6. Checks are made to ensure that the performance indicators, targets and specifications are being met and amendments to the program are made where necessary.</p> <p>4.7. Operational personnel are communicated with regularly throughout the storage, transport, sampling and chemical application operations to ensure efficient and safe operation and progress.</p> <p>4.8. The impact and risk of existing and potential problems are assessed.</p> <p>4.9. Where a potential problem is identified, investigation is made into its likely causes.</p> <p>4.10. Alternative solutions are analysed and reviewed, and the most appropriate is recommended to the appropriate personnel for a decision.</p>
5. Maintain records of stored grain movement	<p>5.1. Records and documentation are created, maintained and kept as described in the grain storage program, the integrated pest management program, and the OHS requirements.</p> <p>5.2. Records and documentation are completed clearly and accurately throughout the storage program.</p> <p>5.3. The record keeping system that is used ensures that required information is available, accessible, reliable, meaningful, and useful.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- estimate costs of problems and cost savings in improvements
- establish procedures and controls for implementation by others
- plan, schedule, monitor and amend plans for operations

## REQUIRED SKILLS AND KNOWLEDGE

- administer and co-ordinate operations on a site
- explain, and deliver instructions about the plans and scheduling of the grain storage operations to both staff and contractors
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- silo layout and operations, configuration, and maintenance procedures
- safe working practices, especially in confined spaces and at heights
- organisational priorities and policies in relation to production planning, OHS and chemical use
- organisational priorities and policies in relation to quality, personnel and operations
- pest control principles
- reporting and recording requirements within the organisation and as required by external authorities
- general grains market and commodity prices
- specific electronic systems used within the organisation
- integrated pest and weed management techniques
- relevant legislation and regulations relating to OHS, contractor engagement, chemical use and application, site management, and vehicle and plant use
- sound management practices and processes to minimise noise, odours, and debris from grain storage operations.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

<b>EVIDENCE GUIDE</b>	
Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• plan for storage needs based on grain production estimates</li> <li>• implement an IPM program for grain storage</li> <li>• supervise procedures to manage OHS risk for the storage site</li> <li>• schedule the storage and transport of grain</li> <li>• supervise staff to monitor transport, storage, sampling and pest control procedures</li> <li>• maintain records of grain storage to meet QA requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
This standard includes:	<ul style="list-style-type: none"> <li>• a range of grain storage areas that can be assessed in relation to capacity, suitability for fumigation, state of repair and their current use.</li> </ul>

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Source information for input to weed, pest and/or disease control planning	<p>1.1. Historical data, including recent data from organisational records is identified and accessed for input to weed, pest and/or disease control planning.</p> <p>1.2. Information from other enterprises within the district is sought and gathered.</p> <p>1.3. Information regarding the characteristics of the crop(s) planned for, or under production, is accessed.</p> <p>1.4. Information regarding the local geography, soil and climatic conditions is accessed and gathered.</p> <p>1.5. The environmental implications of pesticide/herbicide use, alternative methods and non-chemical preventative methods are considered and documented.</p> <p>1.6. Information is assessed to determine potential key information for input to planning decisions.</p>
2. Determine long-term weed, pest and/or disease control strategies	<p>2.1. Information gathered is analysed for suitable methods of weed, pest and/or disease control.</p> <p>2.2. Methods of control are considered in light of their impacts.</p> <p>2.3. Strategies for weed, pest and/or disease control are</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>determined to integrate the most suitable control methods with the proposed crops and the existing geography.</p> <p>2.4.Environmental controls are established and specifically included in the plan.</p> <p>2.5.Occupational Health and Safety (OHS) hazards are identified; risks assessed and suitable controls are incorporated into the plan.</p>
<p>3. Provide input to other planning processes</p>	<p>3.1.Details regarding selected weed, pest and/or disease control strategies are used as input to other organisational planning processes.</p> <p>3.2.Information regarding other planning processes is collected and used to inform the weed, pest and/or disease control planning process.</p> <p>3.3.Information about the range of planning processes is communicated verbally and/or in writing according to the requirements of the circumstances and the people involved.</p>
<p>4. Determine scheduling and key responsibilities</p>	<p>4.1.Scheduling for weed, pest and/or disease control is determined taking the range of seasonal, geographic and resourcing factors into consideration.</p> <p>4.2.Key responsibilities for specific implementation processes are determined.</p> <p>4.3.Record keeping requirements are determined and procedures are put in place to ensure compliance with the range of applicable regulations.</p> <p>4.4.The plan, including scheduling and key responsibilities, is clearly documented.</p> <p>4.5.The plan includes the type, format, frequency and detail of any reporting required by both manager(s) and operators.</p>
<p>5. Monitor and adjust weed, pest and/or disease control strategies</p>	<p>5.1.The effectiveness of the weed, pest and/or disease control strategies is evaluated at key points, and adjustments made as necessary.</p> <p>5.2.Environmental impacts and OHS hazards relating to weed, pest and/or disease control are identified, monitored and assessed throughout the implementation process.</p> <p>5.3.Modifications are made to the strategy as and when necessary for environmental, OHS, resourcing, or effectiveness reasons.</p>
<p>6. Evaluate weed, pest</p>	<p>6.1.Data, observations, and documentation from the</p>

ELEMENT	PERFORMANCE CRITERIA
and/or disease control strategies and record result	<p>implementation of weed, pest and/or disease control is analysed against the plan according to organisation guidelines.</p> <p>6.2. Recommendations for future strategies are prepared based on the analysis of the data.</p> <p>6.3. A report is prepared that documents the implementation of the strategies and includes any difficulties or issues faced, the methods used for treatment, impacts on environmental and OHS, any recommendations for future work, results, costs and any available data analysis.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- interpret monitored information on pest and weed numbers, density and control
- interpret, analyse and extract information from a range of sources and discussions
- plan and manage long-term weed, pest and/or disease control including amending plans during the operations
- plan land use incorporating appropriate weed, pest and/or disease control measures
- establish processes/strategies, procedures and controls for long-term weed, pest and/or disease control
- negotiate and arrange contracts and agreements
- explain, and deliver instructions about the plans and scheduling of the weed, pest and/or disease control operations to both staff and contractors, as well as suppliers, customers, and neighbours
- recognise poor growth and lack of vigour caused by nutrient deficiency
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <ul style="list-style-type: none"> <li>• use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• pest and weed species, including their life cycles and reproduction/multiplication capability</li> <li>• integrated pest and weed management</li> <li>• the effects on crops of weeds, pests and/or diseases including competitive effects on crop yield; threshold levels; and the effects of alternative methods of control</li> <li>• environmental controls and codes of practice applicable to the enterprise</li> <li>• relevant legislation and regulations relating to OHS, contractor engagement, chemical use and application, and vehicle and plant use</li> <li>• environmental controls and codes of practice applicable to the business, and to the weed, pest and/or disease control operations</li> <li>• sound management practices and processes to minimise noise, odours, and debris from weed, pest and/or disease control operations.</li> </ul>

## Evidence Guide

<p><b>EVIDENCE GUIDE</b></p>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• interpret information on pest and weed numbers, density and control</li> <li>• establish processes/strategies, procedures and controls for long-term weed, pest and/or disease control</li> <li>• implement and monitor long-term weed, pest and/or disease control strategies</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• use records and observations to evaluate weed, pest and/or disease control strategies</li> <li>• plan land use incorporating long term weed, pest and/or disease control strategies.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

### Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Crop pests may include:	<ul style="list-style-type: none"> <li>• insects</li> <li>• weeds</li> <li>• pathogens</li> <li>• vertebrates</li> <li>• nematodes</li> <li>• molluscs.</li> </ul>

## Competency field

Competency field	
------------------	--

## AHCBAC506A Manage the harvest of crops

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of planning for and implementing the harvest of agricultural and horticultural crops and defines the standard required to: estimate crop yield and value and monitor for harvest readiness; plan for the resources that will be required for harvest; negotiate insurance and equipment supply contracts; develop risk management procedures for Occupational Health and Safety (OHS), climate and fire risk; organise for the logistics of the harvesting operation including harvesting, storage and delivery; keep grain batches separate and monitor for pests or spoilage.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to managing the harvest and is likely to be undertaken without supervision, with only general guidance on progress sought from others.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine crop quality	<p>1.1.The potential crop yield is assessed by measurements made in the field.</p> <p>1.2.The potential quality of the crop is assessed by testing the quality parameters before harvest.</p> <p>1.3.The value of each crop is estimated using the measurements taken and assessments made before harvest.</p>
2. Determine crop readiness	<p>2.1.Pre-harvest samples are sent to the laboratory/marketing agent to determine the potential quality of the crop.</p> <p>2.2.Weather patterns are monitored to assist in estimating the rate of ripening.</p> <p>2.3.The crop maturity is monitored to anticipate when the crop will be at its optimum, and thus when the harvest will begin.</p> <p>2.4.The incidence of pests is assessed to determine the requirement for, and the type of, pre-harvest treatment.</p> <p>2.5.Pre-harvest treatments are selected to ensure that the crop meets market requirements.</p> <p>2.6.All OHS and environmental requirements are adhered to throughout the application of pre-harvest treatments.</p>
3. Assess the need for	3.1.If the crop is estimated to be of sufficient value, and

ELEMENT	PERFORMANCE CRITERIA
insurance	<p>where commitments were made to insure the crop, these commitments are honoured.</p> <p>3.2.Strategies to manage financial risk are analysed and assessed, and implemented where they are found to be appropriate</p>
4. Plan harvest strategy	<p>4.1.The commencement date and the time span for harvest are estimated, so that the crop will be maintained in optimum condition.</p> <p>4.2.The equipment and labour resources required for harvest are calculated from the size of the crop and the time limitations on the harvest.</p> <p>4.3.The equipment and labour resources required are analysed against those available within the enterprise, and the amount of labour and equipment to be contracted is determined.</p> <p>4.4.Any equipment preparation that is required prior to harvest is planned for, in order that it is ready at the appropriate time.</p> <p>4.5.Where pre-harvest pest control treatments are to be applied, these are planned for according to the recommendations of the manufacturer and the legislative requirements.</p> <p>4.6.Any requirements for licenses, permits and notifications are determined, and arrangements are made for these requirements to be met.</p> <p>4.7.The order in which the harvest is to occur is determined, planned, and described in the plan.</p>
5. Plan for OHS hazard management	<p>5.1.All people involved in harvesting are made aware of the OHS hazards that may be present, their responsibilities for action, and the systems that are in place to deal with such hazards.</p> <p>5.2.Suitable controls are put in place to minimise or eliminate the OHS hazards, and so reduce risks.</p> <p>5.3.At each stage of the harvesting process, OHS hazards are monitored, identified and the associated risks are assessed.</p>
6. Plan for fire prevention and control	<p>6.1.The property is evaluated and the fire risks and hazards are identified where appropriate.</p> <p>6.2.A fire prevention and control strategy that addresses the identified risks and hazards, and includes the measures to be taken, is prepared where appropriate.</p> <p>6.3.The fire prevention and control strategy, and the</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>specific measures to be taken are assessed to ensure that they meet legislative requirements where appropriate.</p> <p>6.4. Fire breaks are prepared in the manner, and locations identified in the strategy, where appropriate.</p> <p>6.5. Arrangements are made to ensure that firefighting equipment that is serviceable and meets appropriate fire authority standards and/or guidelines is available in the quantities prescribed by the strategy, where appropriate.</p> <p>6.6. Community fire control practices are understood and put in place where appropriate.</p>
7. Decide on storage and delivery requirements	<p>7.1. Storage facilities for the crop are allocated and arrangements are made for the immediate delivery of the crop to packing sheds, the bulk handling system, or other purchasers.</p> <p>7.2. Silos, storage bins and other containers are located to enable harvesting and transport operations to be as efficient as possible.</p> <p>7.3. Any OHS hazards presented by silo operation are identified and practices put in place to reduce risk to the health of operators.</p> <p>7.4. Storage is planned in such a way that it enables flexible marketing and distribution initiatives</p> <p>7.5. Resources required for crop transport are evaluated, and where contractors are required, they are engaged.</p> <p>7.6. Where crops are to be dried, the strategies and resources for doing so are identified, ensuring safe working practices are enabled at all times.</p>
8. Implement the harvest strategy	<p>8.1. Where the weather patterns permit, pre-harvest pest control treatments are applied in the manner, and at the time, scheduled in the harvesting plan.</p> <p>8.2. All OHS and environmental requirements are adhered to throughout the application of pre-harvest treatments.</p> <p>8.3. All labour and equipment that is required for the harvest is organised to be ready and available at the scheduled place and time.</p> <p>8.4. The harvest is begun at the scheduled time when the crop will be at its optimum.</p> <p>8.5. All OHS practices are monitored throughout the harvest to ensure that staff and contractors work</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>safely at all times.</p> <p>8.6. The order of the harvest described in the harvesting plan is followed.</p> <p>8.7. Harvesting operations are monitored regularly and adjusted to allow for weather, contracting and equipment maintenance needs.</p> <p>8.8. Truck, tractor and harvester operators are instructed on procedures to deliver each crop load at maximum quality.</p>
9. Segregate crop for quality	<p>9.1. As the crop is harvested, it is monitored for quality and assessed against the quality expectations in the harvesting plan.</p> <p>9.2. The quality of the crop is assessed throughout the harvest and segregated into the various marketing grades.</p> <p>9.3. Each grade is located and stored in the appropriate place as determined by the harvesting plan.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- plan and implement harvesting operations, including amendment of these during the operation itself
- organise and schedule the maintenance of plant and equipment
- establish processes/strategies, procedures and controls for crop harvesting
- interpret, analyse and extract information from a range of sources and discussions
- assess potential yields
- negotiate and arrange contracts and agreements
- explain, and deliver instructions about the plans and scheduling of the harvest operations to both staff and contractors, as well as suppliers, customers, and neighbours
- observe, identify and react appropriately to environmental implications and OHS hazards
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <p>written reports</p> <ul style="list-style-type: none"> <li>• use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views</li> <li>• use numeracy skills to estimate, calculate and record complex workplace measures</li> <li>• use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• capability and use of harvesting equipment</li> <li>• crop measurement techniques and parameters</li> <li>• market information and sources</li> <li>• location and relative skills and abilities of available contractors</li> <li>• contracting requirements for crop insurance</li> <li>• management of the moisture content of crops, including drying and aeration</li> <li>• storage options and local storage availability</li> <li>• bushfire prevention and control legislation</li> <li>• bushfire prevention and control strategies and equipment</li> <li>• contact details for local fire services</li> <li>• weather conditions which may affect the harvest</li> <li>• relevant legislation and regulations relating to OHS, contractor engagement, chemical use and application, and vehicle and plant use</li> <li>• environmental controls and codes of practice applicable to the business and to the harvesting operations</li> <li>• sound management practices and processes to minimise noise, odours, and debris from the harvesting operations.</li> </ul>

## Evidence Guide

<p><b>EVIDENCE GUIDE</b></p>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate</b></p>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy</p>

<b>EVIDENCE GUIDE</b>	
<b>competency in this unit</b>	<p>holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• estimate crop yield and value and monitor for harvest readiness</li> <li>• plan for the resources that will be required for harvest</li> <li>• negotiate insurance and equipment supply contracts</li> <li>• develop risk management procedures for OHS, climate and fire risk</li> <li>• organise for the logistics of the harvesting operation including harvesting, storage and delivery</li> <li>• keep grain batches separate and monitor for pests or spoilage.</li> </ul>

## AHCBAC507A Develop production plans for crops

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of developing production plans for agricultural and horticultural crops and defines the standard required to: prepare budgets and gross margins; source and interpret relevant benchmark information from consultants or peers; sample soils and plant tissue for testing; select crop species and variety and determine yield potential for crop; prepare individual paddock plans and a whole farm cropping plan.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to production managers is likely to be undertaken without supervision, with only technical advice sought from others. It requires knowledge of determinants of crop types and yields, market prices, gross margins, cash flow budgets and disease and pest management for relevant crops.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select crop species and variety	<p>1.1. Crop types and varieties are assessed and selected for their market potential and gross margin returns for the farm environment.</p> <p>1.2. Most profitable cultural practices and rotations are selected consistent with disease and pest management strategies, available machinery resources, and management for sustainability of resources.</p> <p>1.3. Production risks are identified for each crop and strategies to address these are determined.</p> <p>1.4. Environmental risks are identified and strategies developed as appropriate.</p>
2. Establish yield potential and quality specification for crop	<p>2.1. Relevant benchmark yields are sourced, where available, to assist setting target yields.</p> <p>2.2. Past production records are analysed to determine the key determinants of yield.</p> <p>2.3. Available models for calculating water use efficiency or other key determinants of yield are used, as appropriate, to assist in setting target yields.</p> <p>2.4. Quality specifications and target yields are established for all crops.</p>
3. Prepare crop program	<p>3.1. Proposed crop land areas are assessed for their nutrient, pest and disease status, water reserves, tillage requirements, and other factors before selecting crop variety.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2. Records of chemical use are used, as appropriate, to assist planning to reduce chemical resistance.</p> <p>3.3. Crop variety is selected and paddock preparation, planting, fertilising and other treatments are planned.</p> <p>3.4. Optimum timing of planting, applications and treatments is determined and a calendar of operations is prepared.</p> <p>3.5. Cash flow budget for the cropping program is determined.</p>
4. Review production plan	<p>4.1. Logistical arrangements related to harvesting/transportation/marketing and other key operations are planned for the production cycle.</p> <p>4.2. Machinery and equipment requirements are planned and checked for the crop production cycle.</p> <p>4.3. Labour requirements are identified and planned for the crop production cycle.</p> <p>4.4. Seed, fertiliser, pest and disease treatments and other input requirements are identified.</p> <p>4.5. Physical and financial record keeping system is established to provide data for the analysis of crop performance, and to meet other statutory requirements including records of chemical use.</p> <p>4.6. Production plan is reviewed, amended where required and documented as a final plan.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- prepare budgets and gross margins
- source and interpret relevant benchmark information from consultants or peers
- sample soils and plant tissue for testing
- manage and monitor crop diaries and associated records
- select crop species and variety
- source and interpret relevant benchmark information
- determine yield potential for crop

<p><b>REQUIRED SKILLS AND KNOWLEDGE</b></p> <ul style="list-style-type: none"> <li>• prepare crop programs</li> <li>• review, amend and document the production plan</li> <li>• use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports</li> <li>• use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views</li> <li>• use numeracy skills to estimate, calculate and record complex workplace measures</li> <li>• use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>
<p><b>Required knowledge</b></p> <ul style="list-style-type: none"> <li>• determinants of crop yield</li> <li>• cultural practices related to cropping</li> <li>• market prices, gross margins, cash flow budgets</li> <li>• benchmark performance indicators</li> <li>• disease and pest management for relevant crops</li> <li>• machinery and equipment requirements for cropping</li> <li>• record keeping systems (computer or non-computer).</li> </ul>

## Evidence Guide

<p><b>EVIDENCE GUIDE</b></p>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p><b>Overview of assessment</b></p>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• prepare budgets and gross margins</li> <li>• source and interpret relevant benchmark information from consultants or peers</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• sample soils and plant tissue for testing</li> <li>• select crop species and variety and determine yield potential for crop</li> <li>• prepare individual paddock plans and a whole farm cropping plan.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## AHCBEK201A support beekeeping work

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of supporting beekeeping and defines the standard required to: assist with routine beekeeping activities; work safely around and with bees; apply knowledge of food safety regulations when handling frames and honey or other hive products for human consumption.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to beekeeping assistants who may be working by themselves or as part of a small team. Work may be performed in a workshop or similar facility or in the field. Where work requires the use of load-shifting equipment, appropriate training/certification must be provided according to state and territory safety and licensing requirements.
--------------------------------	--

### Licensing/Regulatory Information

Refer to Application of the Unit

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare materials, tools and equipment for beekeeping work	<p>1.1. Required materials, tools and equipment are identified according to lists provided and/or supervisor instructions.</p> <p>1.2. Checks are conducted on all materials, tools and equipment, and insufficient or faulty items are reported to supervisor.</p> <p>1.3. Correct manual handling techniques are used when loading and unloading materials to minimise damage to self, others, load and vehicle.</p> <p>1.4. Suitable personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.5. Work support is provided according to Occupational Health and Safety (OHS) requirements and supervisor instructions.</p>
2. Undertake beekeeping work as directed	<p>2.1. Instructions and directions provided by supervisor are followed and clarification is sought when necessary.</p> <p>2.2. Work is undertaken in a safe and environmentally appropriate manner and according to enterprise guidelines.</p> <p>2.3. Interactions with other staff, apiary site owners and customers are carried out in a positive and professional manner.</p> <p>2.4. Enterprise policies and procedures in relation to workplace practices in the handling and disposal of materials are observed.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.5. Problems or difficulties in completing work to required standards or timelines are reported to supervisor.
3. Handle materials and equipment	3.1. Materials, tools and equipment are handled and transported according to supervisor instructions and enterprise guidelines. 3.2. Waste material produced during work is handled according to supervisor instructions. 3.3. Clean and safe work site is maintained while working.
4. Clean up on completion of work	4.1. Materials are returned to store or disposed of according to supervisor instructions. 4.2. Tools and equipment are cleaned, maintained and stored according to manufacturer specifications and supervisor instructions. 4.3. Work outcomes are reported to supervisor, feedback on performance is sought and any required improvements are noted for future action.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and applying safe work practices
- cleaning up on completion of work
- handling bees
- handling materials, tools and equipment
- preparing materials, tools and equipment for work
- undertaking work as directed
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and

**REQUIRED SKILLS AND KNOWLEDGE**

ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- appropriate tools and equipment
- bee-handling techniques
- repair and maintenance of buildings, fixtures or fittings
- OHS, environment and animal welfare legislative and enterprise requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assist with routine beekeeping activities
- work safely around and with bees
- apply knowledge of food safety regulations when handling frames and honey or other hive products for human consumption.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Bees may include:

- all species of bees used in production.

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of using a bee smoker when undertaking bee husbandry tasks and defines the standard required to: interpret impact of weather, nectar flow and strain of bee on defensive behaviour of colony; select suitable fuel; place a bee smoker in a cleared spot when not in use and have fire extinguishment materials available when working in dry conditions; keep a bee smoker alight and functioning while carrying out bee husbandry tasks; monitor the effects of smoke on bees, including the wearing off of the effects.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to working in the field. It is an important competency for almost all beekeeping job roles. Work is performed under supervision, following established routines and according to Standard Operating Procedures (SOPs).
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare bee smoker for use	1.1. Confirmation is sought that climatic and other conditions permit the use of a bee smoker and planned activities are adjusted if required. 1.2. Bee smoker and components are checked to ensure that they are in good repair and serviceable, and any faults are addressed according to SOPs. 1.3. Personal Protective Equipment (PPE) is checked for serviceability and worn and used correctly. 1.4. Occupational health and safety (OHS) hazards associated with the use of a bee smoker are identified and appropriate action is taken to minimise risks to self and others. 1.5. Adequate water supply and tools are available for fire control. 1.6. Suitable fuel is added to bee smoker and lit. 1.7. Bee smoker bellows are operated to produce and maintain a steady and dense stream of cool smoke.
2. Use bee smoker to manage bee	2.1. Smoke is blown into entrance of hive and sufficient time is allowed before hive is opened. 2.2. After opening hive, additional smoke is puffed over frames and/or supers and directed at bees. 2.3. Bee smoker is placed within easy reach while working on hives to ensure bees remain under control.

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4. Bee smoker is kept alight and producing cool smoke until operations are complete.</p> <p>2.5. After completion of operations, bee smoker is made safe according to fire, biosecurity and other enterprise procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and using safe work practices
- interpreting impact of weather, nectar flow and strain of bee on defensive behaviour of colony
- keeping a bee smoker alight and functioning while carrying out bee husbandry tasks
- monitoring effects of smoke on bees, including the wearing off of the effects
- selecting suitable fuel
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- effects of smoke on bees and hive products
- legislation and regulations relating to use of bee smokers, especially in relation to fire protection and bushfires
- suitable fuel for bee smokers
- when and why to use a bee smoker.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• interpret impact of weather, nectar flow and strain of bee on defensive behaviour of colony</li> <li>• select suitable fuel</li> <li>• place a bee smoker in a cleared spot when not in use and have fire extinguishment materials available, when working in dry conditions</li> <li>• keep a bee smoker alight and functioning while carrying out bee husbandry tasks</li> <li>• monitor the effects of smoke on bees, including the wearing off of the effects.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Bee smokers may include:	<ul style="list-style-type: none"> <li>• all types and makes of bee smokers.</li> </ul>

## AHCBEK203A Open and reassemble a beehive

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of opening and reassembling a beehive in order to carry out routine bee husbandry and related tasks and defines the standard required to: assess weather conditions and nectar availability; minimise risk of robbing and hive stress; raise a beehive lid using a hive tool and bee smoker; reassemble the beehive.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	Open and reassemble a beehive applies to working individually or as part of a small team. Work may be performed in a workshop or similar facility or in the field. Where work requires the use of load-shifting equipment, appropriate training/certification must be provided according to state and territory safety and licensing requirements.
--------------------------------	--

### Licensing/Regulatory Information

Refer to Application of the Unit

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to open a beehive	<p>1.1. Required tools and equipment are identified according to supervisor instructions or Standard Operating Procedures (SOPs).</p> <p>1.2. Checks are conducted on all tools and equipment and insufficient or faulty items are reported to supervisor or addressed according to SOPs.</p> <p>1.3. Weather conditions and nectar availability are assessed, and planned activities are adjusted if needed to minimise risk of robbing and hive stress.</p> <p>1.4. Correct manual handling techniques are used and damage to beehive is minimised.</p> <p>1.5. Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.6. Occupational health and safety (OHS) hazards are identified and reported, and appropriate action is taken to minimise risks to self and others.</p> <p>1.7. Where in effect, site quarantine/biosecurity protocols are followed.</p>
2. Open the beehive	<p>2.1. Bees are controlled throughout the opening process by using smoke according to OHS requirements and SOPs.</p> <p>2.2. Work is carried out from a safe and appropriate position in relation to beehive.</p> <p>2.3. Beehive lid is raised using hive tool, and queen excluder, frames and/or supers are removed as</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>required, according to specific task to be undertaken.</p> <p>2.4.All removed frames and supers are placed on upside down lid to ensure they remain dirt free.</p>
3. Reassemble the beehive	<p>3.1.Bees are controlled throughout reassembling process by using smoke according to OHS requirements and SOPs.</p> <p>3.2.Brood frames are placed back into hive in the same position from which they were removed unless manipulation is being undertaken.</p> <p>3.3.All frames are replaced in appropriate boxes and, where used, queen excluders and/or supers are replaced.</p> <p>3.4.Beehive lid is replaced and, where used, hive fasteners are done up securely.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- complying with OHS requirements, including manual handling
- following work instructions and SOPs
- selecting and using appropriate PPE and beekeeping tools, including a bee smoker
- working safely around bees
- opening and reassembling a beehive
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- bee behaviour, particularly when beehive is disturbed
- components of a beehive.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• assess weather conditions and nectar availability</li> <li>• minimise risk of robbing and hive stress</li> <li>• raise a beehive lid using a hive tool and bee smoker</li> <li>• reassemble the beehive.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to construct or repair beehives	<p>1.1. Required materials and equipment are identified according to lists provided and/or supervisor instructions.</p> <p>1.2. Beehive components for assembly or use in repairs are checked to ensure that they are suitable for use.</p> <p>1.3. Faulty or incorrect components are returned to storeroom and replaced, repaired or disposed of according to enterprise policy.</p> <p>1.4. Checks are conducted on all other materials and equipment and insufficient or faulty items are reported to supervisor.</p> <p>1.5. Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.6. Occupational Health and Safety (OHS) hazards are identified and reported to supervisor.</p>
2. Construct or repair beehives	<p>2.1. Beehives requiring repair are inspected visually to identify scope of job and materials and tools required.</p> <p>2.2. Where visual inspection indicates presence of American foulbrood disease, beehives are burned or sent for irradiation.</p> <p>2.3. Beehive components are assembled or repaired using appropriate replacement parts, nails, joins, glues and construction techniques.</p> <p>2.4. Appropriate timber treatments are applied to beehive.</p> <p>2.5. Constructed or repaired beehive and all components are correctly and legibly marked in accordance with</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>state and territory requirements.</p> <p>2.6. Work is undertaken in a safe and environmentally appropriate manner according to enterprise guidelines.</p> <p>2.7. A clean and safe work site is maintained while working.</p> <p>2.8. Problems or difficulties in completing work to required standards or timelines are reported to supervisor.</p>
3. Clean up on completion of work	<p>3.1. Materials are returned to store or disposed of according to enterprise procedures and/or supervisor instructions.</p> <p>3.2. Equipment is cleaned, maintained and stored according to manufacturer specifications and supervisor instructions.</p> <p>3.3. Work outcomes are reported to supervisor or noted in enterprise records, feedback on performance is sought and any required improvements are noted for future action.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and using safe work practices
- cleaning up on completion of work
- handling materials and equipment
- preparing materials and equipment for work
- selecting and using tools appropriate to task being performed
- undertaking work as directed
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures

**REQUIRED SKILLS AND KNOWLEDGE**

- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- construction and health standards to be maintained for beehives
- hive components and materials required to construct or repair them
- safe work practices.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assemble construction materials and check that they present no risk of contamination to environment or apiculture products
- mark beehives as they are constructed or repaired
- select and use tools appropriate to task being performed
- use only timber treatments approved for beehives.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to catch a swarm of honey bees	<p>1.1.All equipment required to collect a swarm of honey bees is obtained and confirmed as being in good repair and serviceable for use.</p> <p>1.2.Personal Protective Equipment (PPE) is checked for serviceability and worn and used correctly.</p> <p>1.3.Occupational Health and Safety (OHS) hazards associated with collecting bee swarms are identified and action is taken to deal with them effectively.</p> <p>1.4.Any site quarantine in effect or other biosecurity protocols are observed.</p> <p>1.5.Risks associated with collecting a swarm of honey bees are identified and actions are taken to minimise likelihood and consequences of risks.</p>
2. Collect a swarm of honey bees	<p>2.1.Dry drawn frames are placed in hive box to be used for collected swarm to ensure collected bees remain in new hive box.</p> <p>2.2.Swarm is caught by shaking it into an empty box.</p> <p>2.3.Boxed swarm is moved to new location after confirming that whole swarm has been collected.</p> <p>2.4.Swarm is requeened.</p>
3. Manage swarming behaviour in a honey bee colony	<p>3.1.Honey bee colony is monitored for signs that swarming may occur.</p> <p>3.2.Risks associated with handling bees that are likely to swarm are identified and actions are taken to minimise likelihood and consequences of risks.</p> <p>3.3.Where swarming appears likely to occur, range of control options is considered and best option is</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>selected and implemented.</p> <p>3.4.Colony is monitored to ensure that swarming behaviour has been controlled and if necessary further control options are implemented.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and implementing safe work procedures
- communication skills for dealing with members of the public and owners/managers of the property from which a swarm is being collected
- interpreting bee behaviour and handling bees
- identifying disease
- use of specialist equipment and PPE
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- signs of brood disease and wax moth infestation in swarm once it has been placed in a hive
- signs that indicate that a colony is about to swarm
- control options for honey bee swarms
- range of methods that can be used to manage a colony that is showing signs that it is about to swarm
- when to requeen a swarm that has been collected
- why and when honey bees swarm
- why swarms are collected.
- biosecurity protocols.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to manipulate brood combs	<p>1.1. Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.2. Tools and equipment required to manipulate brood are selected and checked prior to use.</p> <p>1.3. Occupational Health and Safety (OHS) hazards associated with manipulating brood are identified and actions are taken to minimise risk to self and others.</p> <p>1.4. Any site quarantine or other biosecurity protocols in force are observed.</p> <p>1.5. Reason for manipulating brood is clarified and appropriate sequence of actions is planned.</p> <p>1.6. Risks to colony, including to brood and queen bee, are identified and actions are taken to minimise likelihood and consequences of risks.</p>
2. Manipulate brood	<p>2.1. Hive is opened according to enterprise procedures and safe work practices.</p> <p>2.2. Combs are removed in planned sequence and placed in suitable position.</p> <p>2.3. Frames are replaced in same or new sequence and/or position, or removed to another hive according to purposes for which brood is being manipulated.</p> <p>2.4. Work is undertaken in a safe and environmentally appropriate manner according to enterprise guidelines.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Enterprise policies and procedures in relation to workplace practices, handling and disposal of waste materials, and site quarantine are observed.</p> <p>2.6. Hive and colony are monitored after manipulation process and appropriate action is taken if needed.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and implementing safe work procedures handling bees
- handling materials and equipment
- using a bee smoker.
- cleaning up on completion of work
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- biosecurity for moving bees
- bee behaviour
- bee-handling techniques
- different types of manipulation that may be used to achieve desired result
- fire risk level
- purposes for which brood may be manipulated
- safe work practices.
- animal welfare requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• determine when and how honey bee brood should be manipulated to achieve desired result</li> <li>• open hives and remove and reposition frames safely and with minimal damage or unintended disturbance to brood</li> <li>• apply knowledge of food safety regulations when handling frames, honey or other hive products for human consumption.</li> </ul>

## AHCBEK303A Re-queen a honey bee colony

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of requeening a honey bee colony with a replacement queen, and defines the standard required to: identify need to requeen, breed and select for replacement queen bee and place in hive; monitor activity of new queen bee and threat of competition.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to beekeepers that are likely to be working supervised. Well-reared and mated, young healthy queen bees of good genetic stock are a major factor in improving honey yields. Requeening is typically practised annually to obtain benefits from the increased egg-laying ability and high pheromone production associated with young queen bees. Requeening by commercial honey producers is normally carried out in spring/summer through to autumn to fit in with seasonal conditions and management practices.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Identify requirement to requeen a colony	<p>1.1. Vigour of the current queen is assessed.</p> <p>1.2. Colony is monitored for signs that indicate queen replacement is necessary.</p>
2. Prepare to requeen a colony	<p>2.1. Replacement queens that meet enterprise criteria are obtained from a commercial supplier or from own breeding stock.</p> <p>2.2. Replacement queens and any escort worker bees are stored in appropriate conditions and monitored until requeening is undertaken.</p> <p>2.3. Hive is monitored to ensure requeening occurs under optimum conditions.</p> <p>2.4. Replacement queen is confirmed as being healthy and free from parasites.</p>
3. Introduce replacement queen bee	<p>3.1. Old queen bee is located in the hive and removed.</p> <p>3.2. Where queen bee has been raised in a nucleus colony, either nucleus colony is placed on top of colony to be requeened, and the two colonies separated by a single layer of paper, or queen bee is caught and introduced into another colony.</p> <p>3.3. Hive is left undisturbed for a period of ten days.</p>
4. Monitor progress of a replacement queen bee	<p>4.1. After ten days, the hive is monitored for acceptance of replacement queen bee by colony.</p> <p>4.2. Replacement queen bee is monitored for evidence of</p>

ELEMENT	PERFORMANCE CRITERIA
	egg laying and adequate levels of hatching.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and implementing safe work practices
- assessing suitability of conditions for requeening
- breeding and selecting replacement queen bees
- identifying disease status of parent colonies
- installing replacement queen bee
- monitoring queen bee activity
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- conditions for requeening
- factors other than queen vigour that may affect brood production
- factors to consider when identifying and removing old queen and introducing new queen
- queen bee behaviour and brood pattern
- selection criteria for new queen bee
- storage requirements of queen bees before being introduced into the colony.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify need to requeen</li> <li>• breed and select for replacement queen bee and place in hive</li> <li>• monitor activity of new queen bee and threat of competition.</li> </ul>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to remove honey	<p>1.1.All tools and equipment required to remove a honey crop from a hive are obtained and confirmed as being in good repair and serviceable for use.</p> <p>1.2.Personal Protective Equipment (PPE) is checked for serviceability and worn and used correctly.</p> <p>1.3.Occupational Health and Safety (OHS) hazards associated with removing a honey crop from a hive are identified and action is taken to deal with them.</p> <p>1.4.All food safety requirements are identified and met.</p> <p>1.5.Any site quarantine or other biosecurity protocols in force are observed.</p> <p>1.6.Risks associated with removing a honey crop from a hive are identified and actions are taken to minimise likelihood and consequences of risks.</p> <p>1.7.Ripeness of nectar honey is determined to ensure that the honey is mature enough to be harvested.</p> <p>1.8.Any withholding periods for honey bee medications and treatments are observed.</p> <p>1.9.Time and location of planned honey removal takes into account potential contaminants, impact on the colony and quality and type of honey to be obtained.</p> <p>1.10. Factors affecting quantity of honey to be removed from hive are identified and taken into consideration.</p>
2. Remove honey from the hive	<p>2.1.Range of suitable methods for removing bees from honey-filled combs is considered and best option (or combination) is selected and implemented.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2. Range of suitable methods for removing honey crop in the frames from the hive or honey-filled combs is considered and best option (or combination) is selected and implemented.</p> <p>2.3. Quality of honey is monitored during removal process and, if required, removal methods are modified to ensure that desired quality standards are achieved and maintained.</p> <p>2.4. Honey-filled frames are transported to extracting facility.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- judging ripeness of honey nectar
- manual handling
- using PPE
- working with and around bees
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- food safety requirements
- indicators of ripe honey nectar and adequately filled cells
- methods to remove bees from hives.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• determine ripeness of nectar honey and filling of comb cells</li> <li>• select and use the most suitable method(s) for removing bees and frames/combs from hive</li> <li>• handle frames/combs filled with honey so that they are not contaminated with dust, dirt or water.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Removal may include:	<ul style="list-style-type: none"> <li>• removal from commercial or native bees from the hive and combs</li> <li>• removing filled combs from the hive into other boxes for transport to the extracting facility.</li> </ul>

## Unit Sector(s)

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to extract honey	<p>1.1.All equipment is cleaned, dried, sanitised and checked for serviceability and use.</p> <p>1.2.Ripe honey combs are selected for extraction of honey.</p> <p>1.3.Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.4.Occupational Health and Safety (OHS) hazards are identified and action is taken to minimise risks to self and others.</p>
2. Extract honey	<p>2.1.Quality Assurance (QA) and food safety requirements are complied with throughout process of extracting honey.</p> <p>2.2.Frames are visually inspected for areas of brood and, if found, frames are uncapped by hand to avoid brood.</p> <p>2.3.Where required, combs are warmed to assist extraction process.</p> <p>2.4.Cells are uncapped using a hand knife or machine, avoiding damage to cells and frames.</p> <p>2.5.Frames are placed in extraction unit and unit is operated according to manufacturer instructions.</p>
3. Purify honey	<p>3.1.Extracted honey is heated to 30°C and strained or settled to remove wax, air bubbles, pollen and bees.</p> <p>3.2.Moisture content of honey is checked and appropriate action is taken as required.</p> <p>3.3.Action is taken to reduce risk of fermentation of honey by storing in an airtight container or tank.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Store honey	4.1.Cleaned honey is stored in suitable containers to meet customer requirements. 4.2.Reference sample of honey is taken, correctly labelled and stored according to enterprise, food safety and quality assurance requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- distinguishing between honey cells and brood cells
- judging when combs are ripe
- safely using equipment required for honey extraction
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- biosecurity protocols for honey extraction and movement
- effect of heat and extraction process on honey
- effect of heat and extraction process on honey
- equipment and its maintenance requirements
- food safety systems and requirements
- requirements of honey Bee Industry Quality Assurance Program (BQUAL).

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## AHCBEK306A Manage pests and disease within a honey bee colony

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the process of inspecting a honey bee colony for indicators of disease or evidence of pests, and taking appropriate follow-up action and defines the standard required to: inspect hive and colony for signs of disease and ill thrift; identify key signs and symptoms of disease and pests that may affect brood or adult honey bees; undertake remedial action to ensure colony is maintained in healthy and productive condition for intended use.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit relates to managing pests and disease within a honey bee colony. Beekeepers may be working by themselves or as part of a small team. Work may be performed in a workshop or similar facility or in the field. Work is likely to be undertaken with limited supervision. The standard requires a broad range of knowledge about honey bee health and nutrition, as well as skills in handling and working with bees.
--------------------------------	---

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to check brood	<p>1.1.Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.2.Tools and equipment required to open a hive are selected and checked prior to use.</p> <p>1.3.Occupational Health and Safety (OHS) hazards associated with opening a hive are identified and actions are taken to minimise risk to self and others.</p>
2. Assess health and condition of brood	<p>2.1.Brood is inspected for signs of disease and, where notifiable disease is observed, appropriate authorities are notified as required by legislation and appropriate action is taken.</p> <p>2.2.Brood is inspected for evidence of pests and parasites and, where found, appropriate action is taken and appropriate authorities are notified as required by legislation.</p> <p>2.3.Signs of disease or pest are identified, appropriate samples for testing are collected, and evidence is gathered to support a diagnosis according to relevant standards and protocols.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4.Hive is inspected for signs of diseased brood being ejected from hive at entrance or bottom board.
3. 3 Assess health and condition of adult bees	<p>3.1.Flight paths around hive entrance are observed for signs of poor or irregular flight patterns, and for dead or dying bees at hive entrance.</p> <p>3.2.Adult bees and brood combs are observed for signs of disease and, where notifiable disease is present, appropriate authorities are informed as required by legislation and appropriate action is taken.</p> <p>3.3.Signs of disease or pest are identified, appropriate samples for testing are collected and evidence is gathered to support a diagnosis according to relevant standards and protocols.</p> <p>3.4.Biosecurity measures are implemented according to enterprise biosecurity plans and instructions from appropriate authority.</p> <p>3.5.Results of inspections and any remedial action taken are recorded and used as the basis for future beekeeping operations.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying pests and diseases
- inspecting broods
- preparing supplementary feeds
- reporting signs of notifiable diseases
- requeening a colony
- taking samples
- transporting colonies
- using PPE
- working safely around bees
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks

**REQUIRED SKILLS AND KNOWLEDGE**

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- mode of spread of pests/diseases and level of risk to beekeeping
- signs of endemic and exotic disease and pests of honey bees and treatments
- where relevant, non-allowable inputs for organic honey production.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- inspect hive and colony for signs of disease and ill thrift
- identify key signs and symptoms of disease and pests that may affect brood or adult honey bees
- undertake remedial action to ensure colony is maintained in healthy and productive condition for intended use.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Diseases, pests and parasites may include:	<ul style="list-style-type: none"> <li>the range of diseases, pests and parasites affecting brood and adult bees.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to collect propolis	<p>1.1. Suitable colony is selected or acquired.</p> <p>1.2. All equipment to be used in collection of propolis is cleaned and sanitised according to quality assurance and food safety requirements.</p> <p>1.3. Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.4. Occupational Health and Safety (OHS) hazards are identified and action is taken to minimise risks to self and others.</p> <p>1.5. Suitable propolis trap is constructed and installed, or cracks are created for bees to place propolis.</p> <p>1.6. Propolis production is stimulated by manipulation of environmental conditions.</p>
2. Collect and store propolis	<p>2.1. Quality assurance and food safety requirements are complied with throughout collection and storage of propolis.</p> <p>2.2. Propolis is collected from traps by shaking into a container.</p> <p>2.3. Appropriate extraction method is selected and propolis is extracted according to quality assurance and food safety requirements.</p> <p>2.4. Extracted propolis is stored in appropriate clean and dry conditions.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and implementing safe work practices
- basic woodworking skills
- bee handling
- extracting propolis
- identifying propolis-producing flora
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- bees and their behaviour
- food safety requirements
- quality assurance, including requirements of honey Bee Industry Quality Assurance Program (BQUAL)
- suitable conditions and constraints on collecting propolis.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Determine breeding method	<p>1.1.Options for artificial breeding are reviewed to determine most suitable and affordable method in line with breeding objectives.</p> <p>1.2.Artificial breeding option is selected and matched to resources so as to meet enterprise's queen and drone management program.</p> <p>1.3.Resource requirements of breeding programs are identified, sourced and arranged.</p> <p>1.4.Program schedules are prepared according to available resources.</p> <p>1.5.Suitable clothing and work environment for self and breeding support staff are made available and comply with Occupational Health and Safety (OHS) and enterprise requirements.</p>
2. Implement breeding method	<p>2.1.Genetic material is obtained from reliable and legitimate sources.</p> <p>2.2.Genetic material is received, checked and stored to ensure maximum viability and program outcomes, according to industry codes of practice.</p> <p>2.3.Rearing times are managed so that queen bees and drones are of appropriate age and condition when AI is scheduled to occur.</p> <p>2.4.Semen is collected from drones and queens are prepared and inseminated using hygienic techniques to minimise risk of contamination.</p> <p>2.5.After insemination, queen is placed in a colony of suitable strength and monitored to determine whether further insemination or treatments with carbon</p>

ELEMENT	PERFORMANCE CRITERIA
	dioxide are required.
3. Monitor and maintain program	3.1. Adjustments in genetic material transfer practices are reviewed to enhance success of future programs. 3.2. Data on genetic material transfer programs is documented and maintained according to enterprise requirements. 3.3. Success rates are determined from breeding objectives and are calculated and used to determine success of AI program. 3.4. Information is supplied to relevant authorities to promote research and improvements in industry practice. 3.5. Necessary modifications to queen and drone management program are identified and recorded to assist continuous improvement processes.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify appropriate AI techniques
- determining AI timing
- schedule and obtain resources for insemination activities and
- identifying queen bee laying fertilised eggs
- performing AI
- preparing queen and drone honey bees for AI
- match queen and drone cycles to resource availability
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of

**REQUIRED SKILLS AND KNOWLEDGE**

cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- artificial breeding methods and benefits, and limitations of each method
- anatomy and physiology of reproductive organs and reproductive process in queen and drone honey bees
- enterprise and industry identification system for queen and drone honey bees and semen
- enterprise and industry policies with regard to AI, and the recording and reporting requirements
- honey bee health and abnormalities
- knowledge of enterprise breeding programs
- preparation requirements for AI
- principles of genetics
- physical resource requirements and how to safely handle and transport them
- relevant commonwealth, state or territory legislation, regulations and codes of practice with regard to workplace OHS
- semen collection and homogenising processes
- semen thawing techniques.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- collect semen from drone honey bees
- inseminate queen bees
- manage queen bees after insemination
- maintain required hygiene standards

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>keep records in relation to AI program.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to produce and harvest royal jelly	<p>1.1.Hive is assessed for suitability for production of royal jelly.</p> <p>1.2.Production of royal jelly is stimulated.</p> <p>1.3.Personal Protective Equipment (PPE) is selected and used.</p> <p>1.4.Occupational Health and Safety (OHS) hazards associated with working with bees are identified and appropriate action is taken to minimise risks to self and others.</p> <p>1.5.All equipment used in process of collecting royal jelly is cleaned and sanitised either by heat, alcohol or irradiation according to food safety requirements and enterprise procedures.</p>
2. Collect and store royal jelly	<p>2.1.Personal hygiene requirements are met, including washed hands and clean clothing.</p> <p>2.2.Wax is cut from selected grafted queen larvae cells just above the royal jelly to aid and speed up collection.</p> <p>2.3.Larvae are carefully removed from cell with a grafting tool so as not to harm or contaminate jelly, and larvae are discarded.</p> <p>2.4.Royal jelly is removed from each cell.</p> <p>2.5.Royal jelly is filtered through fine nylon net to remove traces of wax or larvae.</p> <p>2.6.Harvested royal jelly is placed into appropriate hygienic containers, avoiding excessive exposure to air, and is refrigerated immediately.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Finalise tasks	3.1. Equipment is checked, cleaned and returned to store area. 3.2. Records are made and maintained according to enterprise procedures, and food safety and quality assurance requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- bee handling
- carefully collecting and filtering royal jelly
- record keeping
- removing larvae
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- bee handling
- correct cleaning and sanitation methods
- field floral conditions
- food safety requirements
- role of nurse bees in royal jelly production
- quality assurance, including requirements of honey Bee Industry Quality Assurance Program (BQUAL).

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Assess pollination service requirement	<p>1.1.Pollination services to be provided are confirmed with customer.</p> <p>1.2.Number and types of colonies required for crop are determined.</p> <p>1.3.Strength and condition of bee colonies are assessed for their suitability for use as crop pollinators.</p> <p>1.4.Risk of pollination problems is assessed with customer and process to monitor risk is agreed and established.</p> <p>1.5.Technical information is provided to customer.</p>
2. Price and formalise agreement for pollination services	<p>2.1.Costs in providing pollination services are identified and calculated.</p> <p>2.2.Price for pollination services is agreed with customer.</p> <p>2.3.Formal agreement is made with customer and documented.</p>
3. Monitor pollination performance of bee colonies	<p>3.1.Crop is monitored within appropriate timeframe for evidence of bee foraging and pollination efficiency.</p> <p>3.2.Remedial action is taken where required.</p> <p>3.3.Hive strength and condition are demonstrated to customer where required.</p> <p>3.4.Swarm control is maintained.</p> <p>3.5.Bee husbandry practices are carried out as required.</p>
4. Comply with industry and legislative	<p>4.1.Appropriate health certificates and permits are obtained where bees are to be moved across state borders.</p>

ELEMENT	PERFORMANCE CRITERIA
requirement	4.2. Appropriate pollination code of practice is followed. 4.3. All state or territory Apiary Acts and other relevant Acts and regulations, and local government regulations affecting beekeeping are addressed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and following safe work practices
- calculating strength and numbers of bee colonies required to pollinate crop
- managing pollination of honey bee colonies
- monitoring chemical use near hives
- monitoring climate and weather
- monitoring hive activity on target crop
- pricing and negotiating provision of services
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- chemicals used on each crop to be pollinated and available alternatives
- environmental and climatic factors affecting bee foraging behaviour and pollination
- essential elements of a valid contract
- location of colonies to maximise pollination
- management of health and performance of bee colonies
- nutrition and water requirements of bees
- pollination requirements of major crops in locality of operation, including nearby crops/plants that may be more attractive to foraging bees

**REQUIRED SKILLS AND KNOWLEDGE**

- public liability insurance requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assess need for pollination
- negotiate price and pollination agreement
- comply with all industry and legislative requirements
- identify suitable locations within crop or site for hive placement
- objectively assess hive condition and suitability for pollination
- monitor performance of contract and of bee colonies.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Performance relates to and may

- all processes and equipment used in

<b>RANGE STATEMENT</b>	
include:	commercial bee pollination services.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan to select and establish an apiary site	<p>1.1.Criteria for selecting a site are established.</p> <p>1.2.Suitable locality in which to search for site is identified.</p> <p>1.3.Suitable Personal Protective Equipment (PPE) is selected and checked prior to use.</p> <p>1.4.Tools and equipment required to select and establish an apiary site are selected and checked prior to use.</p> <p>1.5.Occupational Health and Safety (OHS) hazards associated with selecting and establishing an apiary site are identified and actions are taken to minimise risk to self and others.</p>
2. Select the apiary site	<p>2.1.Detailed information about potential sites in selected locality is gathered and analysed using site selection criteria.</p> <p>2.2.Capacity of available flora to support desired number of hives at site is determined.</p> <p>2.3.Most suitable site(s) is selected.</p> <p>2.4.Precise area(s) within site to place hives is selected taking into account proximity to flora, water, gates, stockyards and movement of the sun.</p> <p>2.5.Permission to locate beehives at site is obtained from land owner or manager.</p>
3. Establish the apiary at the selected sit	<p>3.1.Access of bees to floral sources and water is monitored and hives are repositioned as required or a new site is sought.</p> <p>3.2.Where required, supplementary feeds of nectar and/or protein substitutes are provided at</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>concentration and frequency required by bees to obtain desired results.</p> <p>3.3. Results of inspections and any remedial action taken are recorded and used as basis for future beekeeping operations.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- hazard identification and risk assessment
- bush sense
- correct manual handling
- loading and unloading beehives
- map reading
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- potential productivity of flora, including its potential for pollen and nectar flow
- nutritional requirements of colony
- sources of information about potential sites
- residue risks in honey
- OHS and environmental legislation, codes of practice and enterprise procedures.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• identify flora and assess its productivity including its potential for pollen and nectar flow</li> <li>• communicate with land owners/managers</li> <li>• determine site selection criteria including the potential productivity of flora</li> <li>• select apiary location to meet the nutritional requirements of colony.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to trap and store pollen	<p>1.1.Colony is assessed for suitability for pollen collection.</p> <p>1.2.Personal Protective Equipment (PPE) is selected and used.</p> <p>1.3.Occupational Health and Safety (OHS) hazards associated with working with bees are identified and appropriate action is taken to minimise risks to self and others.</p> <p>1.4.All equipment used in process of collecting pollen is cleaned and sanitised according to food safety requirements and enterprise procedures.</p>
2. Collect pollen	<p>2.1.Suitable pollen trapping mechanism is constructed and installed in hive.</p> <p>2.2.Personal hygiene requirements are met, including washed hands and clean clothing.</p> <p>2.3.Pollen is collected at appropriate frequency, depending on its intended use as bee feed or for human consumption.</p> <p>2.4.Risk of theft by ants is assessed and steps are taken to reduce likelihood of this occurring.</p> <p>2.5.Risk of colony decline is assessed and pollen collection is stopped if necessary.</p> <p>2.6.Pollen is temporarily stored in a suitable container to be transported to processing facilities.</p>
3. Process pollen	<p>3.1.Pollen is cleaned to remove all foreign material.</p> <p>3.2.Pollen is air dried until moisture content is appropriate to prevent fermentation and deterioration.</p>

ELEMENT	PERFORMANCE CRITERIA
	3.3.Pollen is stored appropriately and according to its intended use.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- basic woodworking skills to construct a pollen trap
- bee handling
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- bee colony's pollen requirements
- bee handling
- correct cleaning and sanitation methods
- knowledge of appropriate floral sources
- quality assurance and food safety, including requirements of honey Bee Industry Quality Assurance Program (BQUAL)
- requirements for commercial processing.

## Evidence Guide

## AHCBEK407A Rear queen bees

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers rearing queen bees and defines the standard required to: select breeding stock according to established breeding program criteria; graft larvae of suitable age; assess and maintain nutrition and health of larvae and drones; maintain records.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to those who rear queen bees to produce high quality queen bees and queen cells through the application of good management practices.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Establish conditions and obtain requirements for queen bee rearing	<p>1.1. Breeding stock is selected from productive healthy stock according to established breeding program criteria.</p> <p>1.2. All tools, equipment and other requirements needed to rear queen bees are obtained and confirmed as being in good repair and serviceable for use.</p> <p>1.3. Personal Protective Equipment (PPE) is checked for serviceability and worn and used correctly.</p> <p>1.4. Occupational Health and Safety (OHS) hazards associated with rearing queen bees are identified and action is taken to minimise them.</p> <p>1.5. Any site quarantine or other biosecurity protocols in force are observed.</p> <p>1.6. All hives and colonies used for queen bee and drone production are confirmed as being in clean and healthy condition.</p> <p>1.7. Day-old larvae from the breeder queen bee are selected for grafting and transferred from worker cells into queen cell cups.</p> <p>1.8. Adequate numbers of nurse bees are confirmed as being present in cell raising colonies.</p> <p>1.9. Grafted cells are placed into cell starting colonies and then into cell finishing colonies.</p>
2. Establish and monitor the queen mating process	<p>2.1. Ripe queen cells are transferred into the nucleus 10-11 days after grafting.</p> <p>2.2. Adequate numbers of mature, well nourished and genetically suitable drones are provided during</p>

ELEMENT	PERFORMANCE CRITERIA
	mating period. 2.3. Details of grafting and subsequent placement of cells into nucleus colonies are recorded according to enterprise standards. 2.4. Age of the queen removed from mating colony is recorded.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identifying hazards and implementing safe work practices
- grafting
- handling the hive
- recognising diseases, pests and disorders and taking appropriate action
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills / language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- basic knowledge of the principles of inheritance of bee characteristics
- signs of brood and adult bee ill health sufficient to recognise diseases, pests and disorders and take appropriate
- techniques and timing for queen cell production
- storage requirements of queen bees
- optimum conditions for requeening
- OHS and animal welfare requirements.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• select breeding stock according to established breeding program criteria</li> <li>• graft larvae of suitable age</li> <li>• assess and maintain nutrition and health of larvae and drones.</li> </ul>

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check machinery and support vehicles	<p>1.1. Machinery and equipment are checked for contamination according to written guidelines and legislative requirements.</p> <p>1.2. Machinery and support vehicles are made safe for checking, supported safely, with free moving parts pinned or supported as required.</p> <p>1.3. Covers and guards removed safely.</p> <p>1.4. All points identified in legislation or operating procedures are identified and inspected for contamination.</p>
2. Clean machinery and equipment	<p>2.1. Machinery is made safe for cleaning, supported safely, with free moving parts pinned or supported as required.</p> <p>2.2. Correct equipment for cleaning selected.</p> <p>2.3. Points listed in appropriate regulations, checklists or enterprise procedures are cleaned and checked.</p> <p>2.4. Guards replaced safely and checked.</p> <p>2.5. Areas on other equipment likely to accumulate contaminants identified, inspected and cleaned.</p>
3. Complete cleaning work	<p>3.1. Waste materials are disposed of according to enterprise operating procedures and relevant legislative requirements.</p> <p>3.2. Records of cleaning are recorded on appropriate</p>

ELEMENT	PERFORMANCE CRITERIA
	forms according to enterprise policy and procedures.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and adopt safe work practices
- inspect machinery and support vehicles
- dispose of waste materials
- report inspection results
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- machinery and equipment operating features
- major components of machinery and equipment
- inspection points and procedures required by legislation
- vectors for spread of weeds, pests or diseases
- Occupational Health and Safety (OHS), environment and pest management legislative and enterprise requirements.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to work in quarantine site	<p>1.1.Ensure personal and/or work vehicles are decontaminated before entering the quarantine site.</p> <p>1.2.Contact with potential contaminants is reported according to enterprise requirements.</p> <p>1.3.Hands are washed before livestock, feed, plant stock or other products are handled.</p> <p>1.4.Showering and changing into work clothes is carried out if required.</p> <p>1.5.Appropriate clothing and footwear is put on before commencing work and street clothing is securely stored away from livestock, feed or other products.</p> <p>1.6.Footbaths are used thoroughly and checked for disinfectant level before entering site and sheds if required.</p>
2. Work in quarantine site	<p>2.1.Chemicals and/or medications are handled and stored appropriately.</p> <p>2.2.Different feed mixes, soils and/or growing media and/or other products are kept separate and appropriately marked according to enterprise procedures.</p> <p>2.3.Any cases of disease or pest infestation are identified and reported to supervisor.</p> <p>2.4.Any breaches of quarantine procedures are identified and reported to supervisor.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Any Occupational Health and Safety (OHS) hazards are identified and appropriate action is taken according to enterprise policy and OHS legislation and codes.</p> <p>2.6. All waste products is disposed of according to enterprise procedures.</p> <p>2.7. All deceased livestock, unwanted biological material or damaged/infected plant stock are disposed of according to enterprise procedures.</p> <p>2.8. Information relating to work in quarantine site is recorded as required by the enterprise procedures.</p>
<p>3. Assist in maintaining site quarantine procedures</p>	<p>3.1. All visitors are informed of the quarantine procedures and are provided with appropriate clothing and footwear, if required by enterprise procedures.</p> <p>3.2. Visitors are required to sign in, state their recent activities and exposures, and wash or shower if required by enterprise procedures.</p> <p>3.3. Any observed breaches of quarantine procedures by visitors are noted and reported to supervisor.</p> <p>3.4. Gates and doors are kept locked where required by enterprise procedures and supervisor instructions.</p> <p>3.5. Where installed, security fencing is maintained according to supervisor's instructions.</p> <p>3.6. Deliveries to site are checked to ensure that established procedures for vehicle decontamination, unloading and receipt and holding or storage of stock and/or supplies are followed.</p>
<p>4. Respond to site quarantine breach or problem</p>	<p>4.1. The specific problem and its location is identified and reported to supervisor.</p> <p>4.2. Problems are secured according to enterprise procedures.</p> <p>4.3. Quarantine site and location of breach is cleaned and disinfected as required according to the specific nature of the problem and enterprise procedures.</p> <p>4.4. Livestock, plant stock suspected of being exposed to contaminants are isolated and monitored for evidence of contamination according to enterprise procedures.</p> <p>4.5. All contaminated stock/materials are treated and/or disposed of according to enterprise procedures.</p> <p>4.6. Information about the breach or problem is recorded according to enterprise procedures.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- read and/or interpret site quarantine procedures
- follow biosecurity and hygiene procedures
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- enterprise site quarantine policy and procedures
- industry quality assurance requirements (where applicable) and documentation required to be kept
- reporting procedures for alleged breaches of site quarantine procedures
- consequences of breaching site quarantine procedures
- OHS, environmental and disease legislative and enterprise requirements.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

<b>EVIDENCE GUIDE</b>	
<b>competency in this unit</b>	<p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• read and/or interpret site quarantine procedures</li> <li>• follow enterprise quarantine procedures (including industry quality assurance procedures if applicable)</li> <li>• report and respond to quarantine issues or breaches of procedures</li> <li>• communicate with visitors to the enterprise about site quarantine procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to carry out movement and security procedures.</p> <p>The candidate must also have access to resources that establish movement and security controls.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Sites may include:	<ul style="list-style-type: none"> <li>• quarantine site of the whole farm</li> <li>• an apiary</li> <li>• enterprise premises, or part of the premises or enterprise, such as <ul style="list-style-type: none"> <li>• an isolation area or sick bay.</li> </ul> </li> <li>• in some cases, the quarantine area may extend beyond the enterprise boundaries.</li> </ul>

## AHC BIO301A Work effectively in an emergency disease or plant pest response

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit specifies the outcomes required to work effectively within own area of responsibility in a response to an emergency disease or plant pest incursion.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.
--------------------------------	---

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>	

### Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain and use information about the emergency disease or plant pest and an appropriate response	1.1. Information about emergency disease or plant pest and appropriate response is accessed and applied during an emergency disease or plant pest response. 1.2. Information is used to address specific work needs and further information requirements are identified. 1.3. Information and/or resources required from stakeholders are identified and accessed.
2. Work according to organisational requirements	2.1. All communication with stakeholders is carried out according to organisational policies and procedures. 2.2. All work undertaken reflects a current working knowledge and understanding of organisational requirements. 2.3. All work undertaken reflects understanding and compliance with relevant duty of care and legal responsibilities. 2.4. Work activities conform to relevant legislation, regulations, procedures and codes of practice appropriate to work area and level of responsibility. 2.5. Hazards and risks relevant to specific work being undertaken are identified and responded to as required. 2.6. Work is carried out according to organisational policies and procedures.
3. Manage own work	3.1. Work instructions are interpreted correctly and clarification is sought if inconsistencies are noted. 3.2. Workload is assessed and competing demands are prioritised to achieve personal, team and organisational goals and objectives. 3.3. Need for physical and human resources is communicated clearly to appropriate person(s). 3.4. Own role, responsibilities and duties are performed

ELEMENT	PERFORMANCE CRITERIA
	<p>in a positive manner that promotes cooperation within the workplace.</p> <p>3.5.Importance of own and others' roles in achieving organisational goals is respected.</p> <p>3.6.Personal symptoms of stress and their potential to impact on performance are recognised, action is taken to minimise their negative effects and undue personal stress is reported to appropriate persons.</p>
4. Comply with biosecurity requirements	<p>4.1.Biosecurity procedures relevant to own work area are identified.</p> <p>4.2.Work activities are carried out according to established biosecurity procedures.</p> <p>4.3.Personal protective equipment and fomites are maintained according to biosecurity procedures.</p> <p>4.4.Biosecurity breaches are reported immediately to appropriate person.</p> <p>4.5.Biosecurity records are completed according to work area requirements.</p>
5. Adapt to change as required	<p>5.1.Need for change in own work practices to reflect critical emergency issues or emerging trends is identified and assessed.</p> <p>5.2.Changes required are discussed and agreed with senior staff.</p> <p>5.3.Own work practices are changed where required and according to agreed arrangements.</p> <p>5.4.Flexible approach that takes account of changing priorities and circumstances is applied when implementing instructions for changes to work practices.</p> <p>5.5.Change is monitored to determine the effectiveness of revised work practices and senior staff members are advised of findings.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- operating in stressful situations
- prioritising conflicting demands
- working in a strict line management environment
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- district, regional and local plans
- functional plans of other government agencies
- legal and regulatory framework under which responses are taken
- national plans such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN)
- Occupational Health and Safety (OHS) and biosecurity procedures
- national, state and territory plans.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to:

- access and use national plans such as

<b>EVIDENCE GUIDE</b>	
	<p>AUSVETPLAN or PLANTPLAN</p> <ul style="list-style-type: none"> <li>operate within a response team and follow instructions</li> <li>operate effectively under stress in tasks involving problem solving in relation to own role</li> <li>make effective judgements</li> <li>follow instructions</li> <li>provide advice in area of expertise and authority</li> <li>understand legal and regulatory implications of one's own role in an emergency disease or plant pest response.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to work effectively in an emergency disease or plant pest response.</p> <p>The candidate must also have access to the following resources:</p> <ul style="list-style-type: none"> <li>simulated workplace for an emergency disease or plant pest response for assessment using scenarios, case studies, role plays and group work</li> <li>access to local, regional, district, state and territory, and national plans relating to an emergency disease or plant pest response.</li> </ul>
<b>Method of assessment</b>	<p>Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in a simulated workplace or in a situation that reproduces normal work conditions.</p>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to work effectively in an emergency disease or plant pest response must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. This could include:</p> <ul style="list-style-type: none"> <li>working in the field or in a local, state or national control centre</li> </ul>

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>participating in a response to a plant pest or to an emergency disease of animals, fish or other marine animals</li> <li>participating in a response to a natural disaster.</li> </ul>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Information about emergency diseases or plant pests may be found in:	<ul style="list-style-type: none"> <li>AUSVETPLAN or PLANTPLAN strategies</li> <li>published texts</li> <li>scientific literature.</li> </ul>
Information about emergency response may be found in:	<ul style="list-style-type: none"> <li>district, regional or local plans</li> <li>functional plans of other government agencies</li> <li>industry biosecurity plans</li> <li>national, state or territory plans.</li> </ul>
Emergency diseases and pests may include:	<ul style="list-style-type: none"> <li>diseases that may effect animals, fish and other marine animals include:                             <ul style="list-style-type: none"> <li>disease that is exotic to Australia</li> <li>serious infectious diseases or pests of or uncertain cause</li> <li>severe infectious disease of unknown or uncertain cause</li> <li>severe outbreaks of known endemic diseases or pests that are considered to be of national significance with serious social or trade implications</li> <li>variants of endemic diseases</li> <li>biotypes or strains of invertebrate pests or pathogens injurious to plants or plant health; invasive pest plants.</li> </ul> </li> </ul>
Stakeholders may include:	<ul style="list-style-type: none"> <li>agronomists and consultants</li> <li>chemical resellers</li> <li>consumers</li> <li>crop monitors or scouts</li> <li>general community</li> <li>government departments</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• industry</li> <li>• producers and other local enterprise owners</li> <li>• other personnel involved in an emergency response</li> <li>• plant pathologists</li> <li>• property owners, managers and staff</li> <li>• stock agents and transport personnel</li> <li>• veterinarians.</li> </ul>
Organisational requirements may include:	<ul style="list-style-type: none"> <li>• biosecurity and OHS policies and procedures</li> <li>• district or regional plans</li> <li>• functional plans of other government agencies</li> <li>• goals, objectives, policies and standard operating procedures of response lead agency</li> <li>• national plans such as AUSVETPLAN or PLANTPLAN</li> <li>• local, state and territory plans.</li> </ul>
Duty of care and legal responsibilities may include:	<ul style="list-style-type: none"> <li>• duties and responsibilities for self and others</li> <li>• responsibilities defined through legislation</li> <li>• responsibility of an employer to provide a safe workplace.</li> </ul>
Procedures may include:	<ul style="list-style-type: none"> <li>• AUSVETPLAN or PLANTPLAN</li> <li>• biosecurity procedures of industry and response lead agency</li> <li>• handling and storage of hazardous materials</li> <li>• industry codes of practice</li> <li>• legal or regulatory requirements</li> <li>• personal hygiene</li> <li>• standard operating procedures of response lead agency.</li> </ul>
Hazards and risks may include:	<ul style="list-style-type: none"> <li>• allergic reaction</li> <li>• chemical exposure</li> <li>• occupational trauma</li> <li>• physical injury</li> <li>• spreading disease or plant pests</li> <li>• zoonotic infection.</li> </ul>
Ways in which work may be carried out include:	<ul style="list-style-type: none"> <li>• individually</li> <li>• in cooperation with other sections in response team, using their skills and knowledge as appropriate.</li> </ul>
Appropriate person may include:	<ul style="list-style-type: none"> <li>• controller</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• section manager</li> <li>• team leader.</li> </ul>
Fomites may be defined in terms of:	<ul style="list-style-type: none"> <li>• inanimate objects capable of transmitting an infectious agent such as:                             <ul style="list-style-type: none"> <li>• boots</li> <li>• clothing</li> <li>• vehicles.</li> </ul> </li> </ul>

## AHC BIO302A Identify and report unusual disease or plant pest signs

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit of competency specifies the outcomes required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	The work in this unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify signs of unusual disease or a plant pest	1.1. Signs of disease or a plant pest are identified. 1.2. Signs of disease or a plant pest are compared with own experience of common endemic disease or a plant pest in the species. 1.3. Where signs indicate an unusual disease or a plant pest, severity and extent of problem in the species are assessed. 1.4. Where signs indicate an unusual disease or a plant pest, immediate advice is sought from supervisors, professionals or appropriate authorities.
2. Report signs of unusual disease or a plant pest	2.1. Signs of unusual disease or a plant pest are reported immediately to appropriate authorities. 2.2. Biosecurity measures are implemented according to enterprise biosecurity plans and instructions from appropriate authority.

## Required Skills and Knowledge

<b>REQUIRED SKILLS AND KNOWLEDGE</b>
This section describes the skills and knowledge required for this unit.
<b>Required skills</b>
<ul style="list-style-type: none"> <li>• observing</li> <li>• recognising unusual disease or plant pest signs</li> </ul>

**REQUIRED SKILLS AND KNOWLEDGE**

- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- required procedures to follow in notifying appropriate authorities
- where to access additional reliable information or personnel.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to:

- identify unusual disease or pest signs within ones own experience
- notify appropriate authorities where appropriate
- implement appropriate biosecurity measures.

**Context of and specific resources for assessment**

For valid assessment, one must have opportunities to participate in a range of exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to identify and report unusual disease or plant pest signs.

The candidate must also have access to resources such as photographs of signs of emergency and endemic diseases

<b>EVIDENCE GUIDE</b>	
	and of plant pests.
<b>Method of assessment</b>	Assessment for this unit of competency may be undertaken on or off the job. The unit could be assessed on its own or in combination with other units of competency relevant to the job function,
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to identify and report unusual disease or plant pest signs must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include a range of diseases for a particular species or a variety of pests.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Signs of disease or a plant pest may include:	<ul style="list-style-type: none"> <li>• abnormality</li> <li>• clinical signs</li> <li>• decline and dieback</li> <li>• insect damage or presence of insects</li> <li>• mortalities and mode of death</li> <li>• presence of highly specific vectors</li> <li>• results of post-mortem examinations</li> <li>• unexplained levels of morbidity or mortality in populations.</li> </ul>
Unusual diseases or plant pests may include:	<ul style="list-style-type: none"> <li>• disease that is classified as an emergency disease</li> <li>• disease that presents in an unusual, uncommon or atypical form</li> <li>• plant pest species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.</li> </ul>

<b>RANGE STATEMENT</b>	
Appropriate authorities may include:	<ul style="list-style-type: none"> <li>• national disease watch hotlines</li> <li>• property owner or manager</li> <li>• regulatory officers from state and territory departments of Primary Industries, Agriculture, Fisheries and Forestry.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare for emergency disease or plant pest control activities	<p>1.1. Work instructions received from IP site supervisor are clarified in preparation for carrying out control procedures.</p> <p>1.2. Appropriate equipment and materials are selected and prepared to undertake control activities in line with IP site supervisor work instructions and associated safety requirements.</p> <p>1.3. Personal Protective Equipment (PPE) is selected and prepared according to Occupational Health and Safety (OHS) requirements.</p>
2. Implement emergency disease or plant pest control activities	<p>2.1. Control activities are implemented in line with work instructions, OHS requirements and standards and protocols.</p> <p>2.2. Log of activities carried out on the IP is maintained according to instructions from IP site supervisor.</p> <p>2.3. PPE is used as instructed by IP site supervisor and according to OHS requirements and manufacturer instructions.</p> <p>2.4. Within own area of responsibility, work instructions are given and received.</p>
3. Check and adjust emergency disease or plant pest control activities	<p>3.1. Control activities within own area of responsibility are regularly checked to ensure compliance with work instructions, OHS requirements, and standards and protocols.</p> <p>3.2. Reports are provided to IP site supervisor as required.</p> <p>3.3. Any variations from work instructions, and standards and protocols, or failure to achieve</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>objectives are reported to IP site supervisor and remedial action is undertaken within one's scope of authority.</p> <p>3.4. Any recommendations for adjusting work instructions are communicated to IP site supervisor.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adhering to security procedures in line with specific emergency disease or plant pest control strategies
- coordinating a team, if team leader
- correctly preparing and using equipment and materials for control procedures
- correctly preparing and using PPE
- ensuring animal welfare when working with animals
- following guidelines and protocols for control procedures in an emergency disease or plant pest response
- keeping records
- making written and oral reports
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- OHS requirements for working in an emergency disease or plant pest control situation, including safe use of equipment and material
- PPE requirements
- record-keeping requirements
- relevant provisions of the control strategy for particular emergency disease or plant pest being controlled

should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

The skills and knowledge required to carry out emergency disease or plant pest control procedures at an IP must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events.

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Emergency diseases or plant pests may include:

- diseases that may affect animals, fish and other marine animals including:
  - diseases that are exotic to Australia
  - serious infectious diseases of or uncertain cause
  - severe outbreaks of known endemic diseases that are considered to be of national significance with serious social or trade implications
  - variants of endemic diseases
- species, biotypes or strains of invertebrate pests or pathogens which are injurious to plants or plant health.

Information covered in work instructions may involve:

- stipulations relating to standards, protocols and specific IP site requirements, and may cover:
  - administration
  - collection of biological samples
  - decontamination
  - destruction of livestock or crop
  - disposal of carcasses and infectious material
  - gate control
  - inventory and valuation
  - mapping of location of affected plants or

<b>RANGE STATEMENT</b>	
	<p>crops</p> <ul style="list-style-type: none"> <li>• pest control</li> <li>• team leader duties</li> <li>• wild animal control.</li> </ul>
Control procedures may include:	<ul style="list-style-type: none"> <li>• containment of livestock or crop and other materials</li> <li>• decontamination and disinfection of premises, equipment and staff leaving premises</li> <li>• destruction and slaughter</li> <li>• disposal of livestock or crop and other materials</li> <li>• gate control</li> <li>• pest control</li> <li>• sample collection</li> <li>• use of chemicals</li> <li>• vaccination and treatment</li> <li>• wild animal control.</li> </ul>
OHS requirements may include:	<ul style="list-style-type: none"> <li>• administration of treatments and vaccinations</li> <li>• animal handling and use of approved restraints where required</li> <li>• correct techniques for manual handling</li> <li>• policies relating to livestock or crop destruction and disposal</li> <li>• procedures for dealing with risks associated with working in areas where there may be an accumulation of airborne dusts or gases, such as ammonia, methane and carbon dioxide</li> <li>• procedures for dealing with risks that may arise when working in buildings or yards that have been damaged in the course of implementation of control procedures</li> <li>• processes for avoiding needle stick injuries and safe use of biohazard containers for disposal of sharps</li> <li>• safe operation of machinery and equipment, including consideration of layout, buildings, terrain, location and prevailing weather conditions</li> <li>• safe use and handling of chemicals</li> <li>• use of firearms for livestock destruction</li> <li>• use of PPE and clothing.</li> </ul>
Relevant standards and protocols	<ul style="list-style-type: none"> <li>• approved standard operating procedures</li> </ul>

**RANGE STATEMENT**

may include:

- Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) or similar protocols
- damage minimisation policies
- environmental policies
- OHS legislation
- relevant commonwealth, state and territory legislation.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare to carry out movement and security procedures	<p>1.1. Specific movement and security procedures to be carried out, and times and locations of operations are identified from work instructions.</p> <p>1.2. Where required for the particular procedures to be carried out, Personal Protective Equipment (PPE) is obtained and checked for serviceability and use.</p> <p>1.3. Documentation required to carry out specific procedures is obtained.</p> <p>1.4. Resources required to carry out specific procedures are obtained and checked for serviceability and use.</p>
2. Apply movement and security procedures	<p>2.1. Traffic check point is established according to work instructions.</p> <p>2.2. Movement of vehicles, personnel, products, livestock and/or plant material through declared areas is monitored in line with requirements.</p> <p>2.3. Permits are issued and/or checked appropriately according to standards and protocols.</p> <p>2.4. Where vehicles are determined to be carrying personnel, products, livestock and/or plant material without a valid permit, action is taken according to standards and protocols.</p> <p>2.5. Close liaison with external security providers is maintained as required.</p> <p>2.6. PPE is used where required, according to occupational health and safety requirements and manufacturer instructions.</p> <p>2.7. Resources are appropriately decontaminated where required, according to standards, protocols and</p>

ELEMENT	PERFORMANCE CRITERIA
	policies.
3. Check and adjust movement and security procedures	3.1. Application of movement and security procedures within own area of responsibility is regularly checked to ensure consistency, currency and ongoing effectiveness. 3.2. Reports are provided to appropriate authorities as required. 3.3. Any variations in consistency, currency and ongoing effectiveness or failure to achieve objectives are reported to appropriate authorities and remedial action is undertaken within one's scope of authority. 3.4. Any recommendations for adjusting movement and security procedures are communicated to supervisor and appropriate authorities.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying movement and security controls under emergency conditions
- carrying out instructions
- identifying the checks and permits required to maintain effective security
- taking appropriate measures to enforce movement and security procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- application of the law in relation to movement and security controls during an emergency disease or plant pest incursion response program
- decontamination procedures where required

**REQUIRED SKILLS AND KNOWLEDGE**

- movement permit system
- safety issues
- understanding the role of movement and security controls in controlling the spread of an emergency disease or a plant pest incursion.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to: <ul style="list-style-type: none"> <li>• establish appropriate movement and security controls</li> <li>• check movement permits for validity</li> <li>• check for unauthorised movement of personnel, livestock, plant materials and/or products that have been in contact with infectious or infested material</li> <li>• deal with unauthorised movements in line with required standards and protocols.</li> </ul>
<b>Context of and specific resources for assessment</b>	Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in a practical training activity or emergency disease outbreak or a plant pest incursion.
<b>Method of assessment</b>	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to carry out movement and security procedures.
<b>Guidance information for assessment</b>	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of

## AHC BIO305A Monitor and review biosecurity measures

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers monitoring and reviewing biosecurity measures defines the standard required to: interpret quarantine procedures and monitor compliance; supervise the range of activities required to maintain biosecurity; communicate with staff and visitors on biosecurity issues and procedures; respond to breaches of biosecurity and participate in the review of biosecurity measures.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to workers and team leaders in animal production facilities who are responsible for implementing biosecurity procedures.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Apply biosecurity procedures to people, animals and equipment entering the site	<p>1.1. Possible sources of pathogen contamination entering the site are identified.</p> <p>1.2. Personal sanitation and hygiene is maintained including required change of clothing and showering if required on entry to quarantined area.</p> <p>1.3. Sign in procedures are completed with information supplied fully and accurately.</p> <p>1.4. Visitors are signed in, checked for risk profile and instructed in quarantine requirements.</p> <p>1.5. All equipment is cleaned and disinfected before being brought onto the site.</p> <p>1.6. Animals introduced to the site are checked for health status, isolated from all others and placed in disinfected sheds.</p>
2. Implement biosecurity procedures to prevent the incidence or spread of pathogens	<p>2.1. Potential biosecurity threats on the enterprise are identified.</p> <p>2.2. The potential costs and impacts of an outbreak of disease in a production facility are quantified and described.</p> <p>2.3. Possible sources of pathogen contamination being carried between sheds are identified.</p> <p>2.4. Procedures for entering sheds or moving from one shed to another are implemented.</p> <p>2.5. Order of priority and prescribed routes are established for movements, with younger or more susceptible animals visited before more resistant animals.</p> <p>2.6. Personal sanitation and equipment cleaning procedures are implemented for movement between</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>sheds.</p> <p>2.7. Farm compound footpaths and areas around sheds are kept clear of debris.</p>
<p>3. Apply on-farm sanitation practices to reduce the risk of disease</p>	<p>3.1. Litter is cleaned from sheds and dust removed from surfaces.</p> <p>3.2. Shed areas are sprayed down with water and then allowed to dry before disinfection.</p> <p>3.3. Shed feeding and watering equipment is pressure cleaned and water lines flushed.</p> <p>3.4. Disinfectant is mixed and applied according to label requirements and enterprise procedures.</p>
<p>4. Implement pest control to reduce the risk of disease</p>	<p>4.1. High risk pathogens that can be introduced by pests are identified.</p> <p>4.2. Pests are excluded from the facility, and from individual sheds, by effective physical barriers.</p> <p>4.3. Pest numbers are monitored through the use of counts or other indicators.</p> <p>4.4. Pest control procedures are carried out including destruction of habitat and poisoning.</p> <p>4.5. Feeds imported are screened for introduction of pests.</p>
<p>5. Review biosecurity procedures</p>	<p>5.1. Records of biosecurity procedures are kept as required by standards and protocols.</p> <p>5.2. Effectiveness and progress of control activities are monitored and compared with planned objectives.</p> <p>5.3. Monitoring of sheds and facilities is carried out as part of work duties to ensure that work practices and procedures are applied in line with required standards and protocols.</p> <p>5.4. Issues and concerns with biosecurity are reported to management.</p> <p>5.5. Control activities are revised as required to address relevant protocols, maintain cost-effectiveness (including appropriate resource allocation) and contain wider impacts.</p> <p>5.6. Revisions to activities are communicated promptly to other staff.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- carrying out cleaning and pest control activities
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- diseases that pose a threat and their likely causes of spread
- principles of risk management applied to biosecurity
- personal hygiene and quarantine procedures for site entry
- safe use of chemicals and cleaning agents
- Occupational Health and Safety (OHS), environmental and biosecurity legislation, codes of practice and enterprise procedures
- record keeping requirements
- reporting incidents or issues
- safety practices related to use of equipment and materials used in cleaning and pest control.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and

The evidence required to demonstrate competency in this

<b>EVIDENCE GUIDE</b>	
<b>evidence required to demonstrate competency in this unit</b>	<p>unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• interpret quarantine procedures and monitor compliance</li> <li>• supervise the range of activities required to maintain biosecurity</li> <li>• communicate with staff and visitors on biosecurity issues and procedures</li> <li>• respond to breaches of biosecurity</li> <li>• participate in the review of biosecurity measures.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
<b>Method of assessment</b>	This unit may be assessed in a holistic way with other units. The assessment strategy for this unit must verify required knowledge, skill and application using more than one of the following assessment methods: oral/written questions, professional conversations, direct observation, third-party evidence, performance audit and portfolio.
<b>Guidance information for assessment</b>	Evidence should be gathered over a period of time in a range of actual or simulated environments.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Animals may include:	<ul style="list-style-type: none"> <li>• pigs</li> <li>• poultry.</li> </ul>
Biosecurity may include:	<ul style="list-style-type: none"> <li>• isolation or quarantine through physical barriers as well as hygiene practices to prevent importing pathogens onto the site, or from spreading if they are able to enter the site.</li> </ul>

## AHC BIO401A Supervise activities on infected premises

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers supervising activities on infected premises and defines the standard required to: develop a schedule for implementation of emergency disease or plant pest control activities; effectively supervise the range of activities required to achieve emergency disease or plant pest control in an outbreak or incursion; effectively communicate and give directions.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	This unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response. Where work requires the use of load-shifting or other equipment, appropriate training/certification must be provided according to state and territory safety and licensing requirements.
--------------------------------	--

### Licensing/Regulatory Information

Refer to Application of the Unit

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan emergency disease or plant pest control activities on an IP	<p>1.1. Emergency disease or plant pest control activities are planned under direction from Infected Premises (IP) operations manager and in consultation with property owner/manager.</p> <p>1.2. All IP procedures are confirmed with IP operations manager and communicated to property owner/manager.</p> <p>1.3. Schedule for implementation of emergency disease or plant pest control activities is developed and resources required for planned activities are requested according to instructions from IP operations manager.</p> <p>1.4. Reporting processes are established according to instructions from IP operations manager.</p> <p>1.5. Staff rosters are established to support activities in a cost-effective manner and with minimal stress on personnel.</p>
2. Oversee emergency disease or plant pest control activities	<p>2.1. Personnel are assigned to team leader and worker positions according to IP operations functions to be performed and are given directions about tasks to be performed.</p> <p>2.2. Emergency disease or plant pest control activities are conducted in ongoing consultation with IP operations manager and property owner/manager.</p> <p>2.3. Emergency disease or plant pest control activities are overseen to ensure that they are cost-effective, make</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>effective use of resources, and avoid unnecessary property damage and livestock or crop destruction.</p> <p>2.4. Valuations of materials requiring destruction, use of plant, equipment and materials, and all IP service provision are monitored to ensure they adhere to relevant standards, protocols and contract requirements.</p> <p>2.5. Supplies of materials and resources are monitored to ensure that they are adequate to meet needs of control activities.</p> <p>2.6. Incident log is maintained that includes details of all activities undertaken and contractors' hours and performance.</p> <p>2.7. Effective communications with IP operations manager and property owner/manager are established and maintained throughout operation.</p> <p>2.8. Personnel are supervised and motivated to carry out specific emergency disease or plant pest control activities to the standard required and according to Occupational Health and Safety (OHS) and legislative requirements.</p>
<p>3. Check effectiveness of emergency disease or plant pest control activities</p>	<p>3.1. Effectiveness and progress of control activities are monitored and compared with planned objectives.</p> <p>3.2. Inspections of teams on site are carried out with sufficient regularity to ensure that standards are applied in line with required standards and protocols.</p> <p>3.3. Progress reports are provided to IP operations manager according to agreed reporting schedule and format.</p> <p>3.4. Records are kept as required by standards and protocols.</p>
<p>4. Revise site-specific emergency disease or plant pest control activities</p>	<p>4.1. Control activities are revised as required to address relevant protocols, maintain cost-effectiveness (including appropriate resource allocation) and contain wider impacts.</p> <p>4.2. Revisions to activities are communicated promptly to Local Control Centre (LCC).</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- operating effectively under stress
- managing people
- supervising application of emergency disease or plant pest control measures on an IP, in line with relevant response plan
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- appropriate standards and protocols for the emergency disease or plant pest e.g. Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN)
- OHS and other legislative requirements in an emergency disease or plant pest incursion response
- principles underpinning control procedures
- procedures necessary to ensure that environmental values are protected during and after emergency disease or plant pest control program
- OHS, environmental and biosecurity legislation, codes of practice and enterprise procedures
- record keeping requirements
- reporting requirements
- safety practices related to use of equipment and materials used in emergency disease or plant pest control.

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to:</p> <ul style="list-style-type: none"> <li>• effectively supervise range of activities required to achieve emergency disease or plant pest control in an outbreak or incursion</li> <li>• effectively communicate and give directions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest simulation exercise or in responses to outbreaks or incursions.</p> <p>The skills and knowledge required to supervise activities on IP must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events.</p>
<b>Method of assessment</b>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to supervise activities on IP.</p> <p>The candidate must also have access to either real or simulated IP.</p>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to supervise activities on IP must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Emergency diseases or plant pests may include:	<ul style="list-style-type: none"> <li>• diseases that may affect animals, fish and other marine animals including:               <ul style="list-style-type: none"> <li>• disease that is exotic to Australia</li> <li>• serious infectious disease of unknown or uncertain cause</li> <li>• severe outbreak of a known endemic disease that is considered to be of national significance with serious social or trade implications</li> <li>• variant of an endemic disease</li> </ul> </li> <li>• species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.</li> </ul>
IP procedures may include	<ul style="list-style-type: none"> <li>• collection of emergency disease or plant pest information</li> <li>• decontamination</li> <li>• destruction</li> <li>• disposal</li> <li>• eradication</li> <li>• mustering</li> <li>• property security and quarantine</li> <li>• sentinel restocking</li> <li>• valuation and inventory</li> <li>• vector control.</li> </ul>
Resources required may include:	<ul style="list-style-type: none"> <li>• personnel</li> <li>• plant, facilities, equipment and materials for livestock or crop destruction, disposal, cleaning and disinfection</li> <li>• staff amenities.</li> </ul>
Factors to take into account when overseeing IP control activities may include:	<ul style="list-style-type: none"> <li>• cost</li> <li>• direction by LCC</li> <li>• effectiveness of emergency disease or plant pest control operations</li> <li>• OHS requirements</li> <li>• relevant standards and protocols</li> <li>• staff welfare</li> </ul>

<b>RANGE STATEMENT</b>	
	<ul style="list-style-type: none"> <li>• wider impact on things such as:               <ul style="list-style-type: none"> <li>• animal welfare</li> <li>• environment</li> <li>• industry</li> <li>• local businesses</li> <li>• local community</li> <li>• neighbouring properties</li> <li>• other non-susceptible livestock or crops</li> <li>• property owners and managers.</li> </ul> </li> </ul>
Relevant standards and protocols may include:	<ul style="list-style-type: none"> <li>• animal welfare codes of practice</li> <li>• approved standard operating procedures</li> <li>• AUSVETPLAN or PLANTPLAN protocols</li> <li>• commonwealth, state and territory legislation</li> <li>• environmental legislation</li> <li>• impact on and potential for damage to property</li> <li>• OHS requirements and legislation.</li> </ul>
Progress reports may include information about:	<ul style="list-style-type: none"> <li>• estimated completion dates</li> <li>• problems encountered</li> <li>• recommendations for change to priorities or procedures</li> <li>• resource requirements</li> <li>• successful solutions</li> <li>• work completion and work in progress.</li> </ul>
Records may be kept of:	<ul style="list-style-type: none"> <li>• any other records relevant to outbreak or incursion</li> <li>• authorisations for personnel and equipment to enter and leave IP</li> <li>• damage to equipment and property</li> <li>• inventories of livestock or crops alive/destroyed</li> <li>• materials and stockfeed destroyed</li> <li>• personnel employed</li> <li>• stores ordered and supplied</li> <li>• work done by private contractors.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Look for signs of a specific emergency disease or plant pest	1.1. Work instructions from surveillance coordinator or other appropriate authority are received and confirmed. 1.2. Signs of an emergency disease or plant pest are identified, appropriate samples for testing collected, and evidence gathered to support a diagnosis according to relevant standards and protocols. 1.3. Available expertise is accessed to assist in diagnosis, as appropriate. 1.4. Diagnostic samples are collected, handled, packaged and dispatched according to relevant standards and protocols.
2. Respond to an emergency disease or plant pest	2.1. Where signs of an emergency disease or plant pest are found, surveillance coordinator is alerted. 2.2. Appropriate measures are taken to immediately contain emergency disease or plant pest according to instructions from control centre and relevant guidelines. 2.3. Information relevant to management of emergency disease or plant pest outbreak is collected and reported to surveillance coordinator. 2.4. Property owners/persons in charge are given directions and warnings about suspected emergency disease or plant pest. 2.5. Personal decontamination and, where appropriate, decontamination of equipment and vehicles, are conducted according to relevant standards and protocols for emergency disease or plant pest.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- apply relevant standards, protocols and procedures
- solve problems to deal with unexpected issues
- work as part of a team where required
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected, and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- appropriate standards and protocols for the emergency disease or plant pest, such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN)
- emergency disease or plant pest control procedures
- personal and general decontamination procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

<b>EVIDENCE GUIDE</b>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>The critical requirements for this unit of competency as a whole are listed below.</p> <p>Assessment must confirm one's ability to:</p> <ul style="list-style-type: none"> <li>• follow work instructions</li> <li>• follow biosecurity and decontamination procedures</li> <li>• communicate findings to supervisor in a timely and accurate manner</li> <li>• communicate with property owner while observing confidentiality requirements.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to carry out field surveillance for a specific emergency disease or plant pest.</p> <p>The candidate must also have access to the following resources:</p> <ul style="list-style-type: none"> <li>• standards, protocols and procedures, such as:                             <ul style="list-style-type: none"> <li>• AUSVETPLAN or PLANTPLAN</li> </ul> </li> <li>• operational plan and survey plan</li> <li>• personal protective and decontamination equipment.</li> </ul>
<p><b>Method of assessment</b></p>	<p>Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest response simulation exercise or in responses to an emergency disease or plant pest incursion.</p>
<p><b>Guidance information for assessment</b></p>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to carry out field surveillance for a specific emergency disease or plant pest must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work with outbreaks of different emergency diseases or plant pest incursions and with possibly unfamiliar</p>

<b>EVIDENCE GUIDE</b>	
	species.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Signs of emergency disease or plant pest may include:	<ul style="list-style-type: none"> <li>• abnormality</li> <li>• clinical signs</li> <li>• high levels of morbidity in populations</li> <li>• mode of death</li> <li>• mortalities</li> <li>• presence of highly specific vectors</li> <li>• results of post-mortem examinations</li> <li>• symptoms and decline.</li> </ul>
Emergency diseases or plant pests include:	<ul style="list-style-type: none"> <li>• diseases that may affect animals, fish and other marine animals, including: <ul style="list-style-type: none"> <li>• disease that is exotic to Australia</li> <li>• serious infectious disease of unknown or uncertain cause</li> <li>• severe outbreak of a known endemic disease that is considered to be of national significance with serious social or trade implications</li> <li>• variant of an endemic disease</li> </ul> </li> <li>• species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.</li> </ul>
Relevant standards and protocols may include:	<ul style="list-style-type: none"> <li>• approved standard operating procedures</li> <li>• commonwealth, state and territory legislation</li> <li>• emergency disease or plant pest specific guidelines, such as AUSVETPLAN or PLANTPLAN</li> <li>• other relevant guidelines for handling an emergency disease or plant pest</li> <li>• transportation of dangerous goods.</li> </ul>
Appropriate measures to contain emergency diseases or plant pests	<ul style="list-style-type: none"> <li>• decontaminating people, products, materials and premises</li> <li>• disposing of carcasses or plants and plant</li> </ul>

<b>RANGE STATEMENT</b>	
may include:	products <ul style="list-style-type: none"> <li>• implementing movement controls</li> <li>• notifying appropriate authorities</li> <li>• quarantining one or more premises.</li> </ul>

## AHC BIO403A Plan and implement a biosecurity program

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers the planning and implementation of a biosecurity program and defines the standard required to: establish a biosecure area for an animal enterprise; manage visitor access and the storage and movement of inputs and outputs for biosecurity; develop sanitation procedures to reduce the risk of disease; apply integrated pest management practices to control pests in a biosecure area; train staff in biosecurity procedures; review biosecurity status based on records system.
------------------------	--

### Application of the Unit

<b>Application of the unit</b>	This unit applies to site managers in animal production facilities and covers the work involved in taking responsibility for maintaining protection for animals from transmissible diseases.
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Maintain a biosecure area to prevent disease transmission through the use of physical barriers and hygiene practices	<p>1.1. A controlled access perimeter is maintained to funnel authorised traffic through control points.</p> <p>1.2. Procedures are established and implemented for all staff and equipment to cross the controlled access perimeter into the controlled access zone.</p> <p>1.3. Entry of workers and equipment into the controlled access zone is restricted by transferring inputs, waste and products through access points on the controlled access perimeter.</p> <p>1.4. Restricted access perimeters and restricted access zones for each shed are maintained.</p> <p>1.5. Access to sheds is prioritised, based on the risks and potential impacts of infection being carried to the animals being housed in them.</p>
2. Implement biosecurity procedures to manage visitors	<p>2.1. The risk level of visitors is defined by gathering information before the visit and during sign in.</p> <p>2.2. Procedures for higher risk visitors such as veterinarians, catchers and vaccinating crews are established.</p> <p>2.3. Clear signage is maintained to direct traffic and discourage unauthorised visitors.</p> <p>2.4. The requirements for entry are communicated to visitors before they arrive on site.</p> <p>2.5. Visitor parking is kept separate so that staff vehicle or traffic ways don't become contaminated.</p> <p>2.6. A questionnaire is developed to be completed and signed by visitors to establish their risk levels.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.7. Criteria for banning visitors are set down including those who fail to make pre-arrangements.</p> <p>2.8. Visitor log books are maintained to allow traceability of any subsequent disease issues.</p>
<p>3. Apply on-farm sanitation practices and personnel movements to reduce the risk of disease</p>	<p>3.1. Drainage is monitored and adjusted to ensure water doesn't collect and stand.</p> <p>3.2. Hygiene and clothing procedures for entry to the site are put in place and monitored.</p> <p>3.3. Well-defined transition zones are established and maintained for entering barns or rooms.</p> <p>3.4. Disinfectants that are appropriate for surfaces and water quality are selected for use.</p> <p>3.5. Standard operating procedures for cleaning and sanitising facilities, tools and equipment are developed and implemented.</p> <p>3.6. Staff movements and animal exposures are from most susceptible animals to least susceptible.</p> <p>3.7. Boot dips are used correctly and recharged frequently.</p>
<p>4. Implement an integrated strategy for pests to reduce the risk of disease</p>	<p>4.1. Facilities are maintained to eliminate potential points of entry for pests.</p> <p>4.2. All inputs such as feed, animals and bedding are screened to reduce the likelihood of pests being introduced.</p> <p>4.3. Pest numbers are monitored through the use of counts or other indicators.</p> <p>4.4. Good sanitation and hygiene is used to break pest cycles and eliminate pest habitat.</p> <p>4.5. Pests are controlled or excluded from output storage areas.</p> <p>4.6. Pest numbers are reduced by use of an integrated approach using a combination of biological, chemical, behavioural and mechanical controls.</p> <p>4.7. Pesticides are rotated periodically to overcome resistance in pest populations.</p> <p>4.8. Sufficient time is allowed between groups of animals in a shed to break the pest cycle.</p> <p>4.9. Pest control measures are documented and evaluated in response to effectiveness over time.</p>
<p>5. Manage farm outputs to reduce the risk of</p>	<p>5.1. Farm outputs such as garbage, manure and bedding are removed and stored for removal or disposal.</p>

ELEMENT	PERFORMANCE CRITERIA
disease	<p>5.2.Storage areas for farm outputs are located in low-traffic areas and managed to prevent cross-contamination and comply with environmental legislation.</p> <p>5.3.A manure management strategy is put in place with emphasis on sale or recycling.</p> <p>5.4.A mortality management strategy is implemented using alternatives such as burial, composting, rendering or incineration.</p>
6. Review the implementation of biosecurity measures	<p>6.1.Record keeping of biosecurity procedures is used to reduce risk of disease.</p> <p>6.2.Effectiveness and progress of control activities are monitored and compared with planned objectives.</p> <p>6.3.Standards and protocols for the monitoring of sheds and facilities are carried out as part of work duties.</p> <p>6.4.Issues and concerns with biosecurity are addressed and procedures amended where required.</p> <p>6.5.Control activities are revised as required to address relevant protocols, maintain cost-effectiveness (including appropriate resource allocation) and contain wider impacts.</p> <p>6.6.Staff training and induction records are reviewed to ensure they are able to implement all biosecurity requirements appropriate to their position.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- develop safe operating procedures
- manage and maintain quarantine
- implement and monitor on-farm sanitation
- disinfect production facilities
- planning and implementing pest control strategies
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly

<b>REQUIRED SKILLS AND KNOWLEDGE</b>	
information collected and select and apply procedures to a range of tasks <ul style="list-style-type: none"> <li>• use oral communication skills / language competence to fulfill the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views</li> <li>• use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data</li> <li>• use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.</li> </ul>	
<b>Required knowledge</b>	
<ul style="list-style-type: none"> <li>• diseases that pose a threat and their likely causes of spread</li> <li>• principles of risk management applied to biosecurity</li> <li>• requirements for personal hygiene and quarantine procedures for site entry</li> <li>• principles of disinfecting a site</li> <li>• safe use of chemicals and cleaning agents</li> <li>• integrated pest management and rotation of chemical pest controls</li> <li>• cleaning and disinfecting procedures</li> <li>• Occupational Health and Safety (OHS), environmental and biosecurity legislation, codes of practice and enterprise procedures</li> <li>• record keeping requirements</li> <li>• reporting incidents or issues</li> <li>• safety practices related to use of equipment and materials used in cleaning and pest control.</li> </ul>	

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

<b>EVIDENCE GUIDE</b>	
	<ul style="list-style-type: none"> <li>• establish a biosecure area for an animal enterprise</li> <li>• manage visitor access and the storage and movement of inputs and outputs for biosecurity</li> <li>• develop sanitation procedures to reduce the risk of disease</li> <li>• apply integrated pest management practices to control pests in a biosecure area</li> <li>• train staff in biosecurity procedures</li> <li>• review biosecurity status based on records system.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
<b>Method of assessment</b>	This unit may be assessed in a holistic way with other units. The assessment strategy for this unit must verify required knowledge, skill and application using more than one of the following assessment methods: oral/written questions, professional conversations, direct observation, third-party evidence, performance audit and portfolio.
<b>Guidance information for assessment</b>	Evidence should be gathered over a period of time in a range of actual or simulated environments.

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Animals may include:	<ul style="list-style-type: none"> <li>• pigs</li> <li>• poultry.</li> </ul>
Biosecurity may include:	<ul style="list-style-type: none"> <li>• isolation or quarantine through physical barriers as well as hygiene practices to prevent importing pathogens onto the site, or from spreading if they are able to enter the site.</li> </ul>

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Plan control procedures across the declared area	<p>1.1.Planning is carried out in effective and ongoing consultation with stakeholders and field personnel.</p> <p>1.2.Planning is conducted in line with relevant standards and protocols, and according to instructions from operations director.</p> <p>1.3.All required resources are identified, obtained, scheduled, prioritised and deployed according to relevant standards and protocols.</p> <p>1.4.Occupational Health and Safety (OHS) requirements, and hazards associated with implementing control procedures, are identified and appropriate action is taken to minimise risks to self and others.</p> <p>1.5.Criteria for implementing control procedures are decided and agreed to satisfy relevant standards and protocols with minimal livestock or crop destruction and property damage.</p> <p>1.6.Contingency plans for effective control of emergency disease or plant pest are prepared.</p>
2. Manage the implementation of control procedures	<p>2.1.Control procedures are coordinated to achieve effective emergency disease or plant pest control outcomes.</p> <p>2.2.Ongoing consultation and communication links are maintained with all stakeholders, field staff, property owners/managers and others in control centre.</p> <p>2.3.Control procedures and services supplied under contract are implemented according to standards, protocols and contractual requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4. Written and verbal reports are prepared and submitted as required.
3. Monitor and review the effectiveness of control procedures	3.1. Personnel are monitored to ensure that they are achieving specified objectives. 3.2. Supply of resources is monitored to ensure that it is appropriate and available to carry out required tasks. 3.3. Implementation of control procedures is monitored to ensure cost-effective compliance with relevant standards and protocols. 3.4. Priorities for emergency disease or plant pest control operations are reviewed, and confirmed or revised as appropriate, according to relevant standards and protocols.
4. Implement review findings	4.1. Control activities are revised as required. 4.2. Revisions to control activities are promptly and effectively communicated to relevant stakeholders and personnel for implementation.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying relevant standards and protocols such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) to determine requirements and/or guidelines applying to on-site control and eradication procedures
- managing resources effectively to achieve emergency disease or plant pest control and eradication
- operating effectively under stress in tasks involving high-level problem solving and decision making
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures

## REQUIRED SKILLS AND KNOWLEDGE

- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- emergency animal disease or plant pest control program
- common reactions and behaviours of people working under stressful conditions
- OHS requirements, particularly for use of chemicals, specific control procedures and managing personnel under emergency conditions
- relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
- relevant standards and protocols, such as AUSVETPLAN or PLANTPLAN
- OHS and environmental protection legislation, codes of practice and enterprise procedures.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- manage emergency disease or plant pest control operations at a number of operational sites
- ensure procedures implemented at operational sites conform to relevant standards and protocols
- manage resources across operational sites
- monitor performance of personnel.

#### Context of and specific resources for assessment

Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest response simulation or in a response to an outbreak.

<b>EVIDENCE GUIDE</b>	
<b>Method of assessment</b>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to manage active operational emergency disease or plant pest sites.</p> <p>The candidate must also have access to a functional control centre established as part of an emergency disease or plant pest response simulation, or in response to an actual outbreak.</p>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to manage active operational emergency disease or plant pest sites must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include managing the implementation of different control procedures required in different responses or on different sites.</p>

## Range Statement

<b>RANGE STATEMENT</b>	
The range statement relates to the unit of competency as a whole.	
Stakeholders may include:	<ul style="list-style-type: none"> <li>• industry representatives and organisations</li> <li>• local community</li> <li>• local government authorities and other government departments</li> <li>• property owners, operators and managers</li> <li>• suppliers of goods and services.</li> </ul>
Relevant standards and protocols may include:	<ul style="list-style-type: none"> <li>• approved standard operating procedures</li> <li>• commonwealth, state and territory legislation</li> <li>• emergency disease or plant pest response agreements</li> <li>• emergency disease or plant pest specific</li> </ul>

<b>RANGE STATEMENT</b>	
	<p>guidelines and manuals included in the relevant national response plans such as AUSVETPLAN and PLANTPLAN</p> <ul style="list-style-type: none"> <li>• other relevant guidelines for handling an emergency disease or plant pest incursion, such as local government regulations.</li> </ul>
Resources may include:	<ul style="list-style-type: none"> <li>• contractors and other service providers</li> <li>• documents such as: <ul style="list-style-type: none"> <li>• plans</li> <li>• pro formas</li> <li>• maps</li> </ul> </li> <li>• equipment such as: <ul style="list-style-type: none"> <li>• trucks</li> <li>• tankers</li> <li>• pumps</li> </ul> </li> <li>• facilities such as: <ul style="list-style-type: none"> <li>• portable shower blocks</li> </ul> </li> <li>• operations personnel and teams responsible for: <ul style="list-style-type: none"> <li>• clerical and administrative duties</li> <li>• decontamination</li> <li>• destruction</li> <li>• disposal</li> <li>• pest control</li> <li>• site supervision of infected premises</li> <li>• valuation.</li> </ul> </li> </ul>
Control procedures required may cover:	<ul style="list-style-type: none"> <li>• decontamination</li> <li>• destruction</li> <li>• disposal</li> <li>• pest control</li> <li>• security</li> <li>• surveillance and testing</li> <li>• treatment</li> <li>• vaccination</li> <li>• valuation</li> <li>• vector control measures</li> <li>• wild animal control measures.</li> </ul>
Reports may include:	<ul style="list-style-type: none"> <li>• input into situation reports and control centre planning activities</li> <li>• use of emergency disease or plant pest</li> </ul>

<b>RANGE STATEMENT</b>	
	management software <ul style="list-style-type: none"> <li>• verbal progress and activity reports</li> <li>• written reports.</li> </ul>
Personnel monitoring may involve consideration of:	<ul style="list-style-type: none"> <li>• appropriate resources</li> <li>• first aid</li> <li>• meals</li> <li>• OHS</li> <li>• personal protective equipment</li> <li>• providing information to personnel</li> <li>• right range of skills on sites</li> <li>• shelter</li> <li>• staff rosters</li> <li>• stress levels.</li> </ul>
Implementation of control procedures may be monitored through:	<ul style="list-style-type: none"> <li>• site inspections</li> <li>• specific software</li> <li>• usage levels of major resources such as time, equipment and materials</li> <li>• verbal and written reports.</li> </ul>

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Initiate emergency disease or plant pest control program	1.1. Control procedures needed to manage an infection or infestation are identified, sourced or developed according to standards, protocols and situational variables. 1.2. Operational plans are developed for own area of responsibility. 1.3. Contributions are made as required to other plans and strategies. 1.4. Resources required to control or eradicate emergency disease or plant pest are sourced.
2. Direct implementation of emergency disease or plant pest control procedures	2.1. Implementation of emergency disease or plant pest control plan and procedures is managed according to operational plan, other specified guidelines and situational variables. 2.2. Reports on progress of emergency disease or plant pest control are disseminated as required. 2.3. Relevant management systems are implemented, and confirmed as functioning and available as required.
3. Monitor emergency disease or plant pest control procedures	3.1. Emergency disease or plant pest status of properties is monitored in line with relevant guidelines and operational or control plan. 3.2. Appropriateness and effectiveness of emergency disease or plant pest control procedures being used are monitored.

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Resource expenditure and availability are monitored to ensure adequacy for job.</p> <p>3.4. Effectiveness of emergency disease or plant pest control information management system is monitored.</p>
<p>4. Review emergency disease or plant pest control program</p>	<p>4.1. Emergency disease or plant pest control operational plans and procedures are reviewed and revised.</p> <p>4.2. Emergency disease or plant pest control information management procedures are revised as appropriate to ensure a complete set of records.</p> <p>4.3. Where required, resources are reallocated or acquired.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- accessing standards and protocols such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) to interpret and determine requirements for implementing specific emergency animal disease or plant pest control programs
- collating, interpreting and analysing relevant information
- operating effectively under stress in tasks involving high-level problem solving and decision making
- managing people under stressful conditions
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

- application of emergency management principles when implementing an emergency disease or plant pest control program
- common reactions and behaviours of people working under stressful conditions
- occupational health and safety requirements, particularly for use of chemicals, specific control procedures and managing personnel under emergency conditions
- relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
- relevant standards and protocols, such as AUSVETPLAN or PLANTPLAN
- requirements of relevant commonwealth, state and territory legislation.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances. Competency requires the application of work practices under work conditions.

- direct and monitor activities of one or more operational units
- source resources
- work effectively under stressful conditions
- apply approved standards and protocols for emergency disease or plant pest control within a specific area
- provide accurate and detailed reports to appropriate authorities.

#### Context of and specific resources for assessment

For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to manage the implementation of an emergency disease or plant pest control program.

<b>EVIDENCE GUIDE</b>	
	The candidate must also have access to a functioning emergency disease or plant pest control centre, or a control centre established for an emergency disease or plant pest response simulation exercise.
<b>Method of assessment</b>	<p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to manage the implementation of an emergency disease or plant pest control program.</p> <p>The candidate must also have access to a functioning emergency disease or plant pest control centre, or a control centre established for an emergency disease or plant pest response simulation exercise.</p>
<b>Guidance information for assessment</b>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to manage the implementation of an emergency disease or plant pest control program must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. # AHC BIO601A Plan and oversee an emergency disease or plant pest control program

## Modification History

Not Applicable

## Unit Descriptor

<b>Unit descriptor</b>	This unit covers planning and overseeing an emergency disease or plant pest control program according to the relevant standards and protocols provided in a national response plan and defines the work practices required to: plan for contingencies; plan, oversee and monitor a response to an emergency disease or plant pest incursion; build, maintain and motivate a team in response to an emergency disease or plant pest incursion; prioritise allocation of resources; implement best options for problem solving based on risk assessment.
------------------------	--

## Application of the Unit

<b>Application of the unit</b>	This unit applies to the planning and management of an emergency response to a disease or plant pest outbreak.
--------------------------------	--

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

<b>Prerequisite units</b>		

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Not Applicable

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan emergency disease or plant pest control program	1.1. Effective strategies to control emergency disease or plant pest are identified to support the emergency disease or plant pest control. 1.2. All components of emergency disease or plant pest control program comply with relevant standards and protocols, jurisdiction's nationally approved response plan, relevant state/territory and commonwealth legislation, and emergency management principles. 1.3. Expert advice is sought and used to identify source of emergency disease or plant pest and gauge its likely spread. 1.4. Declared areas are identified in line with expert advice and available evidence of presence of emergency disease or plant pest. 1.5. Plans are developed to effectively and efficiently control emergency disease or plant pest. 1.6. Plans are submitted to appropriate authorities for approval. 1.7. Likely developments and consequences of emergency disease or plant pest outbreak are identified and appropriate personnel are advised according to established lines of command and control.
2. Oversee emergency disease or plant pest control program	2.1. Emergency disease or plant pest control plans are implemented and monitored. 2.2. Information recording and dissemination are

ELEMENT	PERFORMANCE CRITERIA
	<p>monitored to ensure compliance with standards and protocols.</p> <p>2.3. Reports are sent, received and acted upon according to relevant standards and protocols.</p> <p>2.4. Relevant organisations/agencies and personnel are briefed in relation to management of emergency disease or plant pest.</p>
<p>3. Monitor and review the emergency disease or plant pest control program</p>	<p>3.1. Emergency disease or plant pest control strategies are monitored continually to ensure that they are achieving the intended outcomes.</p> <p>3.2. Emergency disease or plant pest control plans are amended as appropriate in line with expert advice, standards and protocols.</p> <p>3.3. Resource requirements are monitored continually to ensure strategies are achieved.</p>
<p>4. Revise emergency disease or plant pest control program</p>	<p>4.1. Emergency disease or plant pest control strategies and/or plans are revised as required. Changes to emergency disease or plant pest control strategies are communicated to appropriate personnel.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- accessing relevant standards and protocols such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) to determine requirements for a specific emergency disease or plant pest response
- demonstrating flexibility by modifying priorities and procedures in response to new findings
- developing briefing materials for use by others to communicate sensitive and complex information in an appropriate manner
- making effective judgements to achieve a balance of taking authority and delegating appropriately
- managing a team of people under stressful conditions
- managing collection, analysis and dissemination of data to guide the ongoing emergency disease or plant pest response

**REQUIRED SKILLS AND KNOWLEDGE**

- operating effectively under stress while performing tasks requiring high-level problem solving and decision making
- preparing or commissioning a detailed plan to manage an emergency disease or plant pest response, including identifying an outbreak of the emergency disease or plant pest, monitoring its presence, investigating its source and pattern of infection, estimating its likely spread and implementing measures and planning procedures for its control or eradication
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- detailed knowledge of relevant state, territory and commonwealth Acts of parliament with respect to emergency disease or plant pest control, emergency powers and notification of appropriate authorities
- extensive knowledge of emergency disease or plant pest control strategies for emergency disease or plant pest situations
- extensive knowledge of standards and protocols, such as AUSVETPLAN or PLANTPLAN
- extensive knowledge of where to source technical information and/or expert advice and expertise to effectively manage an emergency disease or plant pest incursion
- knowledge of common reactions and behaviours under stress
- knowledge of relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
- knowledge of occupational health and safety requirements, particularly when managing personnel in an emergency under stressful conditions.

**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

<b>EVIDENCE GUIDE</b>	
<p><b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b></p>	<p>Competency is demonstrated in this standard if the candidate is able to:</p> <ul style="list-style-type: none"> <li>• plan for contingencies</li> <li>• plan, oversee and monitor a response to an emergency disease or plant pest incursion</li> <li>• build, maintain and motivate a team in response to an emergency disease or plant pest incursion</li> <li>• prioritise allocation of resources</li> <li>• implement best options for problem solving based on risk assessment.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>For valid assessment, one must have opportunities to participate in a range of exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to plan and oversee an emergency disease or plant pest control program.</p> <p>The candidate must also have access to a functioning control centre, or a control centre established for an emergency disease or plant pest response simulation exercise.</p>
<p><b>Method of assessment</b></p>	<p>Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest response simulation exercise or in responses to an emergency disease or plant pest incursion.</p>
<p><b>Guidance information for assessment</b></p>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to plan and oversee an emergency disease or plant pest control program must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work within control centres established for other emergency diseases or plant pest incursions.</p>

## Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Strategies to control the emergency disease or plant pest may include:	<ul style="list-style-type: none"> <li>• application of plant pesticides</li> <li>• cleaning and decontamination</li> <li>• collecting samples</li> <li>• commonwealth, state, territory and industry response agreements</li> <li>• destruction</li> <li>• disinfestation</li> <li>• disposal</li> <li>• emergency management approach</li> <li>• epidemiological assessments</li> <li>• movement control</li> <li>• quarantine</li> <li>• tracing and surveillance</li> <li>• vaccination</li> <li>• vector control</li> <li>• whole of government approach</li> <li>• wild animal control measures</li> </ul>
Emergency diseases or plant pests may include:	<ul style="list-style-type: none"> <li>• diseases that may affect animals, fish and other marine animals including:                             <ul style="list-style-type: none"> <li>• disease that is exotic to Australia</li> <li>• serious infectious disease of unknown or uncertain cause</li> <li>• variant of an endemic disease</li> <li>• severe outbreak of a known endemic disease that is considered to be of national significance with serious social or trade implications</li> </ul> </li> <li>• species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.</li> </ul>
Relevant standards and protocols may include:	<ul style="list-style-type: none"> <li>• directions from state control headquarters</li> <li>• emergency disease or plant pest response agreements such as:                             <ul style="list-style-type: none"> <li>• Emergency Animal Disease Response Agreement (EADRA)</li> <li>• Emergency Plant Pest Response Deed (EPPRD)</li> </ul> </li> <li>• emergency disease or plant pest specific</li> </ul>

<b>RANGE STATEMENT</b>	
	<p>guidelines and manuals included in the relevant national response plan such as AUSVETPLAN and PLANTPLAN</p> <ul style="list-style-type: none"> <li>• emergency management principles</li> <li>• standard operating procedures</li> <li>• state and territory legislation defining legal powers in an emergency disease or plant pest incursion</li> <li>• state response plans.</li> </ul>
Declared areas may include:	<ul style="list-style-type: none"> <li>• areas in which defined conditions apply to the access or egress of specified plants, animals, fish and other marine animals or things</li> <li>• control areas</li> <li>• dangerous contact premises and suspect premises</li> <li>• infected premises</li> <li>• quarantine premises</li> <li>• restricted areas</li> <li>• stand still areas</li> <li>• any other areas declared.</li> </ul>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Prepare hand held e-business tools for use	<p>1.1.E-business tools are selected according to requirements of the task and business practices.</p> <p>1.2.Relevant start-up procedures are completed in accordance with technical and business requirements.</p> <p>1.3.Tools are configured with relevant business data as required.</p> <p>1.4.Connectivity is tested, as required, according to technical and business requirements.</p>
2. Use hand held e-business tools	<p>2.1.E-business tools are used according to technical and business requirements.</p> <p>2.2.Equipment faults are addressed, as required, according to technical and business requirements.</p> <p>2.3.Data is checked for accuracy and errors are addressed, as required, according to technical and business requirements.</p>
3. Process business data	<p>3.1.Business data is generated and compiled, as required, with reference to technical and business requirements.</p> <p>3.2.Business data is processed according to technical and business requirements.</p> <p>3.3.Procedures to maintain the integrity of data and data security are followed.</p> <p>3.4.Performance of hand held e-business tools is reviewed and recommendations made for improvements to hardware, software and/or their use in accordance with e-business strategy and budget.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- follow protocols for equipment use and data storage
- use relevant e-business technology
- generate data in the format required by the e-business supply chain
- print reports as required
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- operating procedures of relevant business tools
- relevant protocols for electronic data interchange
- personal identification and password for online access between businesses for access to inventory data and purchasing, payment or supply processes.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

<b>EVIDENCE GUIDE</b>	
	<p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• use relevant technology such as computers, handheld scanners, and barcoding equipment</li> <li>• enter and process data according to technical and business requirements</li> <li>• generate data in the format required by the e-business supply chain.</li> </ul>
<b>Context of and specific resources for assessment</b>	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

<b>RANGE STATEMENT</b>

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Obtain current prices for project resources	<p>1.1. Project objectives, required work activities and available finance are identified and interpreted according to the project plan and enterprise guidelines.</p> <p>1.2. Resources required for project works are identified according to the project plan.</p> <p>1.3. Factors affecting resource costs are identified using available information.</p> <p>1.4. Add-on costs are taken into consideration according to enterprise guidelines.</p> <p>1.5. Appropriate tools and equipment are selected and used for the calculation and documentation of project costs.</p>
2. Calculate individual itemised costs of the project	<p>2.1. Unit and total cost for each resource item is calculated according to enterprise guidelines.</p> <p>2.2. Total itemised resource costs are evaluated against the financial schedule for the project.</p> <p>2.3. Adjustments are made where required to reconcile resource costs with project schedules in strict adherence to enterprise guidelines for costing a project.</p>
3. Prepare a summary of the cost of the project	<p>3.1. Resource costs are collated and scheduled according to the project plan and enterprise guidelines.</p> <p>3.2. Total project costs are accurately calculated and recorded according to enterprise guidelines.</p> <p>3.3. Financial summary is collated, organised and submitted to management for approval.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and evaluate information
- accurately complete financial calculations, collate and organise quantitative and financial information
- comply with legislative requirements
- document financial summaries for the understanding of staff, managers and contractors
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- relevant State and Federal legislation, awards, enterprise agreements and management policies relating to labour hire and employment terms, and Occupational Health and Safety (OHS)
- current pricing structures and options for material supplies, services, contractors and consultants
- enterprise and industry standards and practices for formatting, organising and presenting financial and quantitative information.

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Analyse market information	<p>1.1. Markets for existing or new products or services are identified, researched and analysed for possible entry or development.</p> <p>1.2. Past trends and developments are analysed to determine market variability and associated risks.</p> <p>1.3. Market environment is continually monitored in a consistent manner to ensure information is current and reliable.</p> <p>1.4. The legal, ethical and environmental constraints of the market(s) and their effect on the enterprise are identified.</p> <p>1.5. Product mix that suits market requirements/price advantage at the time is adopted.</p>
2. Develop a marketing plan	<p>2.1. Alternative marketing strategies and techniques are assessed and interpreted to identify marketing targets and methods.</p> <p>2.2. Marketing strategies are based on reliable data, market environment and substantiated trends.</p> <p>2.3. Marketing options incorporate suitable advice from marketing professionals.</p> <p>2.4. A measurable cost-effective marketing plan is developed incorporating a reasoned analysis of market research and business plan objectives.</p>
3. Implement marketing activities	<p>3.1. Planned marketing activities are scheduled within appropriate timeframes.</p> <p>3.2. Measurable performance targets are developed and meet business plan objectives.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.3. Distribution channels are organised, and product and service information is accurate and readily available to clients.</p> <p>3.4. Marketing activities are implemented within budgetary constraints to meet legal, ethical and enterprise requirements.</p>
4. Evaluate marketing performance	<p>4.1. Product, pricing and distribution policies are monitored in relation to market changes, marketing objectives and enterprise requirements.</p> <p>4.2. Areas of positive performance are identified and corrective action is taken to remedy poor performance areas.</p> <p>4.3. An objective assessment of the marketing plan and implementation is made by a comparison of valid and reliable data against performance targets.</p> <p>4.4. Relevant information is documented for continual analysis and effective planning management.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analyse with regard to market research and assessments
- manage information
- assess financial strategies and prepare budgets
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

- price risk management
- performance evaluation measures
- competitors strengths and weaknesses
- business planning process
- customer relations policies
- market conditions and forces
- enterprise goals, objectives and directions
- markets and market analysis
- communication and promotion skills
- marketing principles and practice
- principles of trend analysis.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- collect, analyse and present data in the internal and external business environment
- assess alternative marketing strategies and techniques to meet business plan objectives
- plan and implement a marketing strategy
- monitor product, pricing and distribution policies to improve market performance.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement
