AMPA2047 Inspect hindquarter and remove contamination

Release: 1

AMPA2047 Inspect hindquarter and remove contamination

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to inspect the hindquarter of the carcass and remove contamination.

This unit is applicable to workers trimming carcasses to remove contamination on slaughter floors and in boning rooms, chillers and game processing establishments.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect the hindquarter of the carcass for contamination	1.1 Identify types of contamination and their sources 1.2 Scan carcass according to workplace requirements
2. Remove contamination	2.1 Trim hindquarter to remove contamination according to workplace requirements

Element	Performance criteria
	2.2 Trim hindquarter to remove contamination according to workplace health and safety requirements 2.3 Report ongoing contamination issues according to workplace requirements 2.4 Dispose of trimmings according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2054C Inspect hindquarter and remove contamination.
