Overview of processing

Release: 1

Assessment Requirements for AMPA2100 Overview of offal processing

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain processing of offal in abattoirs, the uses of offal and the hygiene, Quality Assurance (QA) and workplace health and safety requirements for offal processing areas.

The candidate must:

- identify types of offal processed at the plant
- identify and explain all the steps in offal processing in the plant
- identify and explain all the plant offal processing production requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- defects in offal and procedures for reporting defects
- importance of the storage procedures for offal
- nature and importance of customer trim specifications and grades
- uses of edible offal including for pharmaceuticals and human consumption

Assessment Conditions

Assessment must be conducted in an abattoir.

Competency must be demonstrated at the normal chain speed over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
