# AMPA2109 Store carcass product

## Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

## Application

This unit describes the skills and knowledge required to move carcasses safely and hygienically into and out of freezers and chillers using a rail system.

This unit is applicable to workers in large-scale chiller or freezer storage facilities.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

## Pre-requisite Unit

Nil.

## Unit Sector

## Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Store carcass product	1.1 Use rails according to workplace requirements to transfer carcass product to storage area 1.2 Transport carcass meat product to designated area for storage according to workplace and health and safety requirements 1.3 Identify and store carcass meat product in appropriate area according to workplace requirements

Element	Performance criteria
	1.4 Store carcass meat product at correct temperature according to workplace and regulatory requirements 1.5 Meet specific workplace health and safety requirements related to working in cold areas and manual handling

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

## Unit Mapping Information

This unit is equivalent to MTMP2133C Store carcass product
