Assessment Requirements for AMPA2114 Overview offal processing on the slaughter floor

Release: 1

Assessment Requirements for AMPA2114 Overview of offal processing on the slaughter floor

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain the steps required to process offal on the slaughter floor.

The candidate must:

- explain the steps for processing offal
- identify condemnation marks on offal
- identify edible offal
- identify the various organs processed on the viscera table

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- inspection process
- contamination to offal caused by bile, ingesta, excreta and paunch content
- procedures for the disposal of inedible offal in appropriate bins or chutes
- workplace, health and safety, hygiene and sanitation, and Quality Assurance (QA) requirements related to processing offal on the slaughter floor
- sources of contamination
- general uses of offal
- impact of contamination of edible offal on further processing.
-

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
