Assessment Requirements for AMPA3046 Undertake retain rail operations

Release: 1

Assessment Requirements for AMPA3046 Undertake retain rail operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform retain rail operations to remove contamination, pathology and dressing defects identified by inspection staff.

The candidate must:

- trim defects on carcasses (on retain rail) in accordance with meat inspector's or Quality Assurance (QA) officer's direction and work instructions
- demonstrate trim which meets regulatory requirements and maintains yield
- dispose of trim in accordance with work instructions
- communicate appropriately with meat inspectors and other relevant workplace personnel
- apply relevant regulatory requirements
- provide and accept feedback in order to improve performance from colleagues and meat inspectors

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- potential sources of contamination or cross-contamination
- retain rail procedures
- relevant regulatory requirements
- types of defects which result in carcasses being retained.
-

Assessment Conditions

Assessment must be undertaken in an operating abattoir or game processing plant.

Competency must be demonstrated when the chain is working at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
