Release: 1

Assessment Requirements for AMPA3046 Undertake retain rail operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform retain rail operations to remove contamination, pathology and dressing defects identified by inspection staff.

The candidate must:

- trim defects on carcases (on retain rail) in accordance with meat inspector's or Quality Assurance (QA) officer's direction and work instructions
- · demonstrate trim which meets regulatory requirements and maintains yield
- dispose of trim in accordance with work instructions
- communicate appropriately with meat inspectors and other relevant workplace personnel
- apply relevant regulatory requirements
- provide and accept feedback in order to improve performance from colleagues and meat inspectors

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- potential sources of contamination or cross-contamination
- retain rail procedures
- relevant regulatory requirements
- types of defects which result in carcases being retained.

Assessment Conditions

Assessment must be undertaken in an operating abattoir or game processing plant.

Competency must be demonstrated when the chain is working at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

quiz of underpinning knowledge

Approved Page 2 of 3

- workplace demonstration
- · workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
