**Release: 1**

# Assessment Requirements for AMPA3088 Operate blood processing plant

## Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

## Performance Evidence

The candidate must operate a blood processing plant.

The candidate must:

- operate the blood processing plant to workplace requirements
- identify production problems and out-of-specification product and take corrective action
- monitor quality of blood meal
- undertake routine maintenance to workplace requirements
- follow workplace health and safety requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory and workplace requirements

## Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- workplace health and safety and Quality Assurance (QA) requirements associated with the operation of a blood processing plant
- general principles of blood processing
- qualities of raw materials and final product
- work instructions for the operation of a blood processing plant
- relevant regulatory and workplace requirements
- workplace and customer blood meal specifications

## Assessment Conditions

Competency must be demonstrated at the normal rate of production for that rendering plant.

Assessment must be conducted in a registered, operating meat rendering plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
