AMPA3103 Manage NLIS data for livestock in lairage

Release: 1

AMPA3103 Manage NLIS data for livestock in lairage

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manage National Livestock Identification System (NLIS) data for stock identified with Radio Frequency Identification Devices (RFIDs) from the point of arrival at an abattoir and whilst they are in lairage.

This Unit is applicable for those managing and identifying livestock fitted with RFIDs in lairage.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3102 Overview of the NLIS program utilising RFIDs

Unit Sector
