Assessment Requirements for AMPA3116 Supervise meat packing operation

Release: 1

Assessment Requirements for AMPA3116 Supervise meat packing operation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must oversee and supervise the packing of meat products in accordance with regulatory, workplace and customer requirements.

The candidate must:

- check and prepare packing area
- perform pre-operational hygiene check
- check product meets specifications prior to packing and take corrective action where necessary
- oversee packing process to ensure process runs smoothly
- oversee hygiene requirements during production and ensure compliance with workplace requirements
- provide support to team members including advice, guidance and additional assistance where required
- ensure packaged product meets customer and workplace specifications
- read and interpret product and packaging specifications and product labels
- ensure team compliance with workplace health and safety requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- monitor quality control

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- labelling systems used in the workplace
- relevant workplace health and safety and regulatory requirements
- the nature and sources of micro, physical and chemical contamination
- hygiene and sanitation requirements of the packaging process
- team member roles and responsibilities
- workplace requirements for handling defective packaging, contamination product and out-of-specification product

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
