Assessment Requirements for AMPA406 Inspect transportation container or vehicle

Release: 1

Assessment Requirements for AMPA406 Inspect transportation container or vehicle

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must apply regulatory and workplace requirements for the inspection of meat transport containers and vehicles.

The candidate must:

- assess vehicle against workplace and regulatory standards and requirements
- identify non-conformance in hygiene and sanitation, workplace health and safety, and licensing requirements
- apply mathematical applications relevant to work instructions and Standard Operating Procedures (SOPs)
- follow enterprise and regulatory inspection procedures for meat transport vehicles
- prepare reports clearly and concisely in standard formats
- follow workplace health and safety requirements whilst conducting inspections
- take corrective action if vehicle or container does not meet workplace or regulatory requirements

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- potential sources of contamination
- regulatory and enterprise hygiene and sanitation requirements related to inspection of meat transport vehicles or containers
- licensing and registration requirements for meat transport vehicles

Assessment Conditions

Assessment has to utilise actual containers or vehicles for inspection activities.

Candidates must be able to implement current regulatory requirements.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
