**Assessment Requirements for AMPA407
Contribute to abattoir design and
construction processes**

Release: 1

Assessment Requirements for AMPA407 Contribute to abattoir design and construction processes

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must maintain abattoir design and construction standards.

The candidate must:

- assess plans for a meat processing establishment against regulatory requirements
- describe the layout, operation, stock and product flow of a range of meat processing establishments
- identify elements of production process design that demonstrate efficient, hygienic and practical production procedures for edible and inedible products
- consult with relevant stakeholders to ensure all requirements are addressed
- identify and apply relevant workplace requirements
- interpret flow charts and plans relating to the design and construction of meat processing plants
- prepare reports relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- relevant statutory requirements for design and construction of abattoirs to meet hygienic production, workplace health and safety, and animal welfare requirements
- critical points in meat processing establishments that relate to design

Assessment Conditions

Plans can be assessed in simulated situations but must be assessed against current legislation and codes.

Assessment must be undertaken utilising realistic plans for slaughtering or boning facilities.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.
