Assessment Requirements for AMPA409 Inspect poultry

Release: 1

Assessment Requirements for AMPA409 Inspect poultry

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must inspect poultry.

The candidate must:

- perform poultry inspection in accordance with regulatory and workplace requirements
- work with processing team to inspect poultry and identify suspect birds in an efficient and timely manner
- identify symptoms and signs of exotic or notifiable diseases
- report exotic or notifiable diseases promptly, accurately and clearly
- identify and apply relevant health and safety and workplace requirements
- apply mathematical operations in order to establish regulatory compliance
- identify and describe the QA programs operating in poultry plants
- identify and use relevant workplace information and documentation
- identify sources of repeated contamination and work with processing team to rectify the problem
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- steps in poultry processing
- major diseases and defects found in poultry
- procedures for reporting exotic or notifiable diseases in poultry
- symptoms of exotic or notifiable diseases
- major food safety hazards at each step of poultry processing
- basic anatomical structure of poultry
- relevant regulatory requirements including Australian Standards and the various requirements for processing poultry
- hygiene and sanitation requirements for poultry processing

Assessment Conditions

Competency should be demonstrated against current Australian Standards and regulations.

Assessment should utilise poultry carcasses and actual examples of pathology.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.
