Manage the collection, monitoring and
reporting of animal health data from a meat
processing plant**

Release: 1

Assessment Requirements for AMPA414 Manage the collection, monitoring and reporting of animal health data from a meat processing plant

Modification History

Release	Comments
Release 1	This version released with AMP Meat Industry Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, at least on one occasion, performed the following:

- identified which relevant common diseases and conditions are to be recorded
- identified signs of the relevant endemic diseases and conditions to be recorded at ante-mortem
- identified signs of the relevant endemic diseases and conditions to be recorded at post-mortem
- described and validated the data collection and recording procedures at ante- and post-mortem
- overseen the collection and recording of animal health data according to documented procedures
- utilised animal health data as part of the verification of the accuracy of the data collected
- populated the fields to be recorded in the database when entering data
- uploaded data to a database
- monitored the animal health data of relevant diseases/conditions against yields
- investigated abnormalities in data to establish the cause and potential impact on processors and producers
- provided feedback to enquiries from relevant individuals and parties.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the common diseases and conditions that are to be recorded relevant to the species and plant

- the signs of the relevant endemic diseases and conditions to be recorded at ante- and post-mortem
- the costs associated with common endemic animal diseases and conditions (to be recorded) for processors and producers through condemnns and partial condemnns
- the source for advice on the ways the incidence of these diseases and conditions can be reduced
- the ante- and post-mortem data collection and recording procedures for the plant
- the procedures for verification of the accuracy of the data collected
- the fields in the database
- how data are uploaded to a database
- the nature of abnormalities in data that require investigation to establish the cause and potential impact on producers and processors
- how to format animal health data reports to address the needs of the range of parties receiving the data
- how to ensure control of privacy relating to data collected for individual livestock owners.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an operating meat processing plant
- resources, equipment and materials:
 - workplace records
 - working database and record keeping system
- specifications:
 - use of specific workplace documents such as policies, procedures, processes and forms
 - access to specific legislation/codes of practice
 - a minimum of three different forms of assessment must be used
- relationships:
 - clients and stakeholders
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
