Application

This unit describes the skills and knowledge required to improve business outcomes through implementing the introduction or upgrade of advanced electronic technologies.

This unit applies to leaders or managers whose role is to manage the introduction of advanced electronic technologies to enhance business practices.

Leaders and managers should manage the implementation of advanced electronic technologies, such as those associated with electronic business (e-business) models; financial systems, information management systems, mobile and wireless technologies; and technologies relating to managing customer and regulatory requirements.

Operational management in relation to introducing technologies to enhance business processes may involve complex judgements.

This unit may relate to the business activities of a small to medium-sized organisation or to a significant unit of activity in a large organisation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector
