|-----------|-----------------------------------------------------------------------------------------|
| Release 1 | This version released with AMP Australian Meat Processing Training Package Version 8.0. |

## Application

This unit describes the skills and knowledge required to receive livestock into lairage at a meat processing premises, using livestock identification data systems, such as the National Livestock Identification System (NLIS) or PigPass.

This unit applies to individuals who work as quality assurance managers, livestock clerks or lairage supervisors, who take responsibility for managing animal identification data for livestock from the point of arrival at an abattoir or export shed.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

Operational (OPR)

## Elements and Performance Criteria

| Elements                                         | Performance Criteria                                                                                                                                                                   |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                 |
| 1. Receive livestock                             | 1.1 Identify workplace health and safety hazards, assess risks and implement control measures<br>1.2 Receive animal and accompanying movement documentation and check for completeness |

| Elements                                         | Performance Criteria                                                                                                                                                                                                                                                                                                             |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>                                                                                                                                                                                                                           |
|                                                  | 1.3 Carry out physical check of received stock (head count) against the movement documents<br>1.4 Check documentation for any status alerts, and implement workplace procedures where required                                                                                                                                   |
| 2. Check animal identification and origin        | 2.1 Check animal for presence of identification tags or devices<br>2.2 Implement workplace procedure for non-identified stock<br>2.3 Record or scan animal identification for compliance with state regulations<br>2.4 Implement corrective action for any status alerts for Property Identification Code (PIC) or animal device |
| 3. Report on animal identification data          | 3.1 Upload or provide data to complete animal identification records and reports according to workplace requirements<br>3.2 Complete records of issues arising and actions taken<br>3.3 Report issues with animal identification for livestock received at site to supervisor or manager                                         |

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

| Skill              | Description                                                                                                                                                                                                                  |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reading            | <ul style="list-style-type: none"> <li>Interpret procedures to operate animal identification system</li> <li>Interpret information included on National Vendor Declarations (NVDs), electronic NVDs (ENVDs), PICs</li> </ul> |
| Writing            | <ul style="list-style-type: none"> <li>Keep paper-based and/or digital records associated with livestock identification system</li> </ul>                                                                                    |
| Oral communication | <ul style="list-style-type: none"> <li>Follow up and resolve issues with original location or issues that arise with PICs, NVDs and ENVDs</li> </ul>                                                                         |
