Assessment Requirements for AMPP202 Operate a poultry evisceration process

Release: 1

Assessment Requirements for AMPP202 Operate a poultry evisceration process

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the poultry evisceration process at least once, including:

- confirming availability of materials
- identifying and applying safe work practices
- selecting, fitting and using appropriate personal protective clothing and equipment
- conducting pre-start checks on machinery used for evisceration
- starting, operating, monitoring and adjusting evisceration process equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- safely shutting down equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the evisceration process, including the internal organs of birds, package removal requirements and consequences of poor removal processes
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required for an evisceration process and action to take if services are not available
- adjustments required to take account of different bird size and type
- quality characteristics to be achieved by each stage of the evisceration process
- the effect of each stage of the evisceration process on the quality of the end product

- the effect of variation in carcase condition and age on evisceration process and outcomes
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the evisceration process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination and food safety risks associated with the evisceration process and related control measures
- work health and safety hazards associated with the evisceration process and controls, including the use of personal protective equipment and the limitations of personal protective equipment
- requirements of different shutdowns as appropriate to the evisceration process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- requirements for reporting production and performance information
- environmental issues and controls relevant to the evisceration process, including waste and rework collection and handling procedures related to the process
- workplace cleaning and sanitation procedures relevant to the poultry evisceration process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective clothing and equipment
 - evisceration equipment and services
 - carcasses
 - testing equipment
 - cleaning materials and equipment
 - workplace information recording system
- specifications:
 - work procedures, including safe work practices, food safety, quality, cleaning and environmental requirements
 - information on equipment capacity and operating parameters
 - production schedule/batch instructions
 - sampling schedules and test procedures
 - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
