Assessment Requirements for AMPX420 Participate in the ongoing development and implementation of a HACCP and Quality Assurance system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must participate in the ongoing development and implementation of an HACCP and QA system. The candidate must demonstrate competency in the workplace while using an existing approved HACCP plan.

The candidate must:

- conduct monitoring of a CCP
- validate CCPs and critical limits
- record and analyse monitoring and verification data
- use relevant communication skills
- use communications technology including computers, as relevant to the task
- develop and implement changes in a HACCP-based QA system
- identify and apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- objectives of a HACCP-based QA system
- the process for validating critical limits and CCPs
- the role of pre-requisite programs and Good Manufacturing Processes (GMPs) in a HACCP-based program
- the process of auditing and verifying a HACCP-based QA system
- the steps involved in developing a HACCP-based QA system
- the steps involved in systematically introducing a HACCP-based QA system
- the documentation required to support a HACCP-based QA system

Assessment Conditions

Assessment must involve working with actual realistic data and in the context of a HACCP plan that meets regulatory requirements.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.
