Application

This unit describes the skills and knowledge required to establish a sampling program in a meat processing plant.

This unit is applicable to Quality Assurance (QA) personnel and regulatory officers required to:

- establish a sampling plan for testing or monitoring meat and meat products
- prepare aseptic samples for testing
- report on testing results.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Establish and implement a valid sampling plan	1.1 Recognise and use sampling tables from AS 1199.1-2003 and AS 1199.0-2003
	1.2 Determine scope and purpose of sampling
	1.3 Determine acceptable quality levels in accordance with relevant Australian Standards
	1.4 Determine sampling plans
	1.5 Conduct sampling according to workplace requirements
	1.6 Record and monitor test results
	Interpret and report test results to relevant personnel

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.
