1. Set up link and tie machinery	1.1 Set up equipment according to production requirements 1.2 Use appropriate personal protective equipment (PPE) as provided 1.3 Conduct routine pre-start checks prior to commencement of operation 1.4 Ensure required materials are in place
2. Operate link and tie machinery	2.1 Use link and tie machinery according to workplace requirements and product specifications 2.2 Take appropriate remedial action to correct any faults in process or product 2.3 Monitor process to confirm that specifications are met, and variations in operating conditions are addressed 2.4 Meet daily production schedule 2.5 Maintain workplace records according to workplace recording requirements
3. Ensure smooth operation of process	3.1 Identify potential dangers from hazards and take appropriate precautions 3.2 Use clear and accurate oral communication with team members 3.3 Report faults and variances outside area of responsibility promptly, clearly and accurately to an appropriate authority 3.4 Encourage and support team members to work as an effective team 3.5 Follow safe working procedures at all times
4. Shut-down the process	4.1 Identify appropriate shut-down procedure 4.2 Shut-down process according to workplace procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS310B Operate link and tie machinery.

Assessment Requirements for AMPS310 Operate link and tie machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must operate and control the use of link and tie machinery in a smallgoods manufacturing operation.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- apply fault-finding, rectification and reporting procedures
- consistently operate link and tie machinery to workplace requirements
- demonstrate correct use of PPE
- identify potential dangers in specific plant and equipment
- observe relevant Quality Assurance (QA) and inspection procedures and systems
- apply production documentation requirements and procedures
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- Standard Operating Procedures (SOPs)
- safe working procedures and systems
- materials and equipment specifications
- production documentation requirements and procedures
- relevant QA and inspection procedures and systems
- food safety and HACCP requirements
- precautions necessary to ensure safety
- how input is maximised while still meeting quality and safety requirements
- limits of authority

- rationale for linking, tying and hanging products
- tolerances allowable in the quality system and when action should be taken
- workplace requirements for dealing with waste product and broken casings
- relevant workplace health and safety, regulatory and workplace requirements

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration
- workplace referee's observation of performance over time
- quiz, question and answer.

Assessors must satisfy the current standards for RTOs.

AMPS311 Operate complex slicing and packaging machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to operate and control slicing and packaging machinery in smallgoods manufacturing operations.

This unit is applicable to smallgoods manufacturing operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Set up equipment for operation	1.1 Confirm and load packaging components and consumables, materials and items to be packaged or sliced to meet operating requirements 1.2 Identify and confirm cleaning and maintenance requirements, and status 1.3 Fit and adjust machine components and related attachments to meet operating requirements 1.4 Carry out pre-start checks as required by workplace requirements 1.5 Use appropriate Personal Protective Equipment (PPE) as provided
2. Operate slicing and packaging machinery	2.1 Start and operate process according to workplace procedures and product specifications 2.2 Monitor equipment to identify variation in operating conditions 2.3 Identify variation in equipment operation and report maintenance requirements according to workplace reporting requirements 2.4 Take appropriate remedial action to correct any faults in process or product 2.5 Meet workplace housekeeping standards 2.6 Meet daily production schedule 2.7 Maintain workplace records according to workplace recording requirements
3. Ensure smooth operation of process	3.1 Identify potential dangers from hazards and take appropriate precautions 3.2 Check and adjust equipment performance as required 3.3 Use clear and accurate oral communication with team members 3.4 Encourage and support team members to work as an effective team 3.5 Follow safe working procedures at all times
4. Shut down the process	4.1 Identify appropriate shut-down procedure 4.2 Shut-down process according to workplace procedures 4.3 Promptly, clearly and accurately report faults and variances outside area of responsibility to an appropriate authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS311B Operate complex slicing and packaging machinery.

Assessment Requirements for AMPS311 Operate complex slicing and packaging machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must operate and control slicing and packaging machinery in smallgoods manufacturing operations.

Candidates must:

- follow the requirements of the work instruction
- work to production speed
- demonstrate correct use of protective clothing and equipment
- set up equipment to workplace requirements
- apply production documentation requirements and procedures
- efficiently and consistently operate machinery to workplace requirements
- identify potential dangers in specific plant and equipment
- apply fault-finding, rectification and reporting procedures
- complete shut-down processes as required
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- observe relevant Quality Assurance (QA) and inspection procedures and systems
- apply relevant workplace health and safety and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- Standard Operating Procedures (SOPs)
- safe working procedures and symptoms
- materials and equipment specifications
- production documentation requirements and procedures
- relevant QA and inspection procedures and systems
- food safety and Hazard Analysis Critical Control Point (HACCP) requirements
- precautions necessary to ensure safety

- limits of authority
- optimisation of processing
- tolerances allowable in the quality system and when action should be taken
- workplace requirements for dealing with waste product
- relevant workplace health and safety, and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS312 Prepare meat-based pates and terrines for commercial sale

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to prepare meat-based pâtés and terrines for commercial sale.

This unit is applicable to smallgoods producers who are developing and manufacturing pâtés and terrines for commercial sale.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare ingredients	1.1 Prepare work area 1.2 Select ingredients for pâtés and terrines according to specifications 1.3 Pre-prepare meat and offal ingredients according to specifications 1.4 Pre-cook meat, offal and other ingredients according to specifications 1.5 Prepare and line moulds for pâtés and terrines according to specifications 1.6 Set-up equipment and conduct pre-operational checks on required specialised machinery
2. Prepare pâtés and terrines	2.1 Prepare and use a range of binding agents and processes required in the preparation of basic forcemeat 2.2 Prepare a range of pastries suitable for pâté en croute and handle correctly to ensure high quality and attractive presentation 2.3 Use specialised machinery for making pâtés and terrines correctly and safely according to manufacturer instructions 2.4 Cook pâtés and terrines to specification ensuring non-spore forming pathogens are destroyed 2.5 Assess product stability and spreadability
3. Pack and store pâtés and terrines	3.1 Select and pack pâtés and terrines using appropriate packaging 3.2 Chill pâtés and terrines at a sufficient rate to prevent spore-forming pathogens 3.3 Store pâtés and terrines according to regulatory requirements
4. Develop new recipes	4.1 Develop recipes for pâtés and terrines using a range of suitable products, with consideration given to food safety, taste and presentation 4.2 Cost and price new recipes 4.3 Assess and evaluate customer response to new recipes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS312A Prepare meat-based pates and terrines for commercial sale.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AMPS312 Prepare meat-based pates and terrines for commercial sale

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must prepare a minimum of three different types of meat-based pâtés and terrines for commercial sale.

The candidate must:

- follow recipes and work instructions
- assess the freshness and suitability of ingredients for pâtés and terrines
- pre-prepare meat and offal using safe knife skills
- cook meat emulsions
- poach or boil products, as required
- apply presentation skills for pâtés and terrines, including pastry decoration, glazing and layering of ingredients
- correctly package and store finished products
- consistently prepare at least three different products suitable for commercial sale
- develop commercially viable new recipes for at least two products
- use communication and numeracy skills required to read, write and interpret written documentation, such as recipes and regulatory requirements
- listen to, interpret and correctly carry out instructions

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- ingredients suitable for making pâtés and terrines and their characteristics
- culinary terms related to pâtés and terrines commonly used in the industry
- properties and outcomes of the various seasonings, additives, binding agents and processes used in the preparation of pâtés and terrines
- core temperature requirements associated with the various stages of pâté production
- heating and cooling processes required to ensure end product is safe for consumption and meets regulatory requirements

- safe work practices, in particular in relation to using chopping and mincing equipment
- food safety requirements for the handling and separation of cooked and raw meats
- hygiene requirements particularly relating to possible bacterial spoilage in the preparation, storage and service of pâté and terrine products
- casings and containers suitable for commercial use and storage of pâtés and terrines
- three-stage cooling program or regime specified in the Australian standard
- principles of nutrition, in particular, the food values of pâtés and terrines and the effects of cooking on the nutritional value of food
- packing and storage requirements for pâtés and terrines
- organisation's food safety plan

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS313 Prepare product formulations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to prepare product formulations in a meat establishment.

Skilled operators involved in the preparation of salamis and smallgoods products and mixing combinations of additives, spices and binders may require this unit.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare product formulations	1.1 Follow recipes and product specifications to formulate products in accordance with workplace and regulatory requirements 1.2 Formulate products in accordance with product specifications, hygiene and sanitation, regulatory and workplace requirements 1.3 Check ingredients to ensure they meet product specifications and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS313A Prepare product formulations.

Assessment Requirements for AMPS313 Prepare product formulations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare product formulations in a meat establishment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- follow recipes and product specifications to formulate products
- formulate products consistently and accurately
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, and hygiene and sanitation requirements
- use equipment according to manufacturer's specifications and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- functions, dangers and legal implications of various ingredients
- usage and purpose of various additives, spices, binders and ingredients in the products
- potential sources of contamination and ways to minimise risk of contamination
- relevant workplace health and safety and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS314 Ferment and mature product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to prepare semi-dried and fermented products such as salami, mettwurst or prosciutto in a smallgoods manufacturing establishment.

This unit is applicable to workers manufacturing fermented meat products in smallgoods processing plants or smaller specialist smallgoods producers.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Ferment product	1.1 Sanitise maturation area according to workplace requirements 1.2 Correctly place product in greening room for adequate air circulation for processing according to product specifications and hygiene requirements 1.3 Space product according to product and manufacturer's specifications 1.4 Monitor maturation process regularly and take appropriate corrective action according to product specifications 1.5 Smoke product if required by product specifications 1.6 Ferment and mature a variety of products to workplace and regulatory requirements and customer specifications, at a speed similar to production requirements
2. Finish maturation process	2.1 Store product according to product specifications 2.2 Identify and stack product according to product specifications and workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS314A Ferment and mature product.

Assessment Requirements for AMPS314 Ferment and mature product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare semi-dried and fermented products such as salami, mettwurst or prosciutto in a smallgoods manufacturing establishment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- ferment and mature product to workplace requirements, and product and customer specifications, within workplace time frames
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- demonstrate familiarity with the regulatory requirements related to fermenting product
- apply relevant workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- possible effects on health of inadequate finishing of maturation process
- possible effects of temperature fluctuations, relative humidity and air circulation on product
- effect pH has on the maturation process
- purpose and effect of smoking salamis
- air circulation requirements of specific products
- impact of Aw on the shelf life of fermented products
- relevant workplace health and safety requirements
- importance of check-weighing at the end of drying
- relationship between pH, Aw and humidity
- requirements of product spacing for specific product
- various types of fermented products

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS315 Blend meat product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare and operate blending equipment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- use blending equipment to blend a variety of products to production requirements
- demonstrate effective operation of tools and equipment used for adjusting blending equipment
- demonstrate safe handling procedures for operating blending equipment
- operate equipment to manufacturer's specifications, workplace and health and safety requirements
- clean and maintain blending equipment as required in work instructions
- apply mathematical and communication skills relevant to the task
- learn new techniques, operate new equipment and adjust to workplace change as required
- apply relevant regulatory requirements
- take corrective action to improve own work performance

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- safe handling procedures for operating blending equipment
- conditions under which processing equipment might need adjusting
- cleaning and maintenance procedures for blending equipment if required in work instructions
- relevant regulatory requirements
- purpose and use of equipment used in blending

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

AMPX201 Prepare and operate bandsaw

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit covers the skills and knowledge required to assemble, clean, disassemble and operate a bandsaw.

This unit is applicable to workers in meat processing plants, smallgoods factories, boning rooms, food services operations, knackeries, game meat processing plants, wholesale and retail operations.

This unit must be delivered in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assemble a bandsaw	1.1 Assemble bandsaw according to manufacturer's specifications and workplace requirements. 1.2 Checked bandsaw guards and scrapers for functioning and safety

Element	Performance criteria
	according to manufacturer's specifications and workplace health and safety requirements. 1.3 Check bandsaw to ensure it is clean in accordance with hygiene and sanitation, and workplace requirements.
2. Operate a bandsaw	2.1 Operate bandsaw in accordance with workplace requirements and manufacturer's specifications. 2.2 Operate bandsaw in accordance with workplace health and safety requirements. 2.3 Use bandsaw to cut meat products according to product specifications and workplace requirements.
3. Clean a bandsaw	3.1 Clean bandsaw to manufacturer's, hygiene, workplace health and safety and workplace requirements.
4. Disassemble bandsaw	4.1 Disassemble bandsaw according to manufacturer's, workplace health and safety and workplace requirements 4.2 Perform routine maintenance according to workplace requirements.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

MTMPR201C Prepare and operate bandsaw	E
---------------------------------------	---

Links

Assessment Requirements for AMPX201 Prepare and operate bandsaw

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Assessment must involve cutting meat products over a period of time.

The candidate must:

- assemble and operate a bandsaw to manufacturer's, workplace, workplace health and safety, and hygiene and sanitation requirements
- carry out a pre-operational safety check on the bandsaw
- cut products using the bandsaw according to workplace, workplace health and safety and hygiene requirements
- use the bandsaw according to workplace health and safety, hygiene and sanitation, Quality Assurance (QA) and workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- demonstrate effective use of all cutting guides and safety guards
- report equipment faults either verbally or in writing to supervisor in accordance with workplace requirements
- work safely and effectively as an individual and as part of a team
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- purpose and effective use of all cutting guides and safety guards
- purpose and use of the bandsaw
- safety procedures related to use of the bandsaw
- relevant regulatory requirements
- workplace health and safety requirements for operating a bandsaw
- workplace requirements related to:
 - cleaning a bandsaw
 - disassembly and reassembly of the bandsaw

- operating a bandsaw
- routine maintenance of a bandsaw

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX202 Clean work area during operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- follow work instructions which may require the employee to:
 - communicate to supervisor any problems or difficulties
 - maintain cleanliness of work areas and surfaces to workplace requirements
 - sort and dispose of waste in accordance with workplace requirements
 - store equipment and chemicals (where applicable) safely
 - use cleaning materials and equipment in a safe and hygienic manner
 - use hoses in a manner that effectively cleans without contaminating surfaces, edible or inedible product
- apply relevant regulatory requirements
- apply relevant communication skills
- demonstrate a broad understanding of the inedible waste processing that occurs in the meat industry
- explain potential threat to the edible product of inadequate cleaning demonstrate the capacity to clean the work area safely during operations

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements associated with the work e.g. using very hot water, using correct manual handling procedures, and maintaining a safe work environment for others
- potential threat to the edible product of inadequate cleaning
- correct usage of chemicals (as required)
- importance of dealing with or reporting problems associated with waste disposal e.g. blocked chutes or drains
- relevant regulatory requirements
- workplace health and safety issues associated with cleaning during operations
- impact of incorrect disposal of waste on the environment and on by-products processing

- importance of following the documented cleaning procedure or schedule
- importance of, and difference between, wet and dry cleaning procedures

Assessment Conditions

Competency must be demonstrated under normal production conditions.

Assessment must occur in a registered meat processing or food handling premises.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX203 Operate scales and semi-automatic labelling machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate carton scales and electronic label-generating and record-keeping equipment, and, where appropriate, recover data and produce reports where this forms part of work instructions.

This unit is applicable to workers using carton scales and labelling machinery in boning rooms, offal rooms, pet meat packing rooms, smallgoods and food service operations.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select meat product	1.1 Identify meat products for weighing and labelling according to workplace requirements 1.2 Place carton on scales in accordance with manufacturer's specifications and workplace requirements
2. Enter product data	2.1 Enter codes for specific cuts into the system 2.2 Recover data in report form where this is part of work

Element	Performance criteria
	instructions
3. Weigh carton	3.1 Weigh carton and record details according to workplace requirements 3.2 Monitor equipment operation to ensure correct information is recorded on label
4. Label carton	4.1 Remove label from labelling equipment and place on carton according to workplace and regulatory requirements 4.2 Label carton clearly for loadout 4.3 Monitor labelling of cartons for accuracy in correlation with products

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPS203C Operate scales and semi-automatic labelling machinery.

Links

Assessment Requirements for AMPX203 Operate scales and semi-automatic labelling machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- perform pre-start checks and routine maintenance as specified in work instructions
- monitor operation of equipment
- weigh and label meat product cartons in accordance with workplace and regulatory requirements
- check carton contents against labelling
- apply relevant communication and mathematical skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements related to labelling
- regulatory requirements with regard to labelling
- consequences of incorrect labelling
- monitoring of consumables
- purpose of labelling information

Assessment Conditions

Competency must be demonstrated under normal rate of production.

Assessment must be conducted in a registered meat processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX204 Maintain production records

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to maintain records required for workplace and regulatory agencies by the stock person, boning room or chiller clerk, or the person responsible for maintaining smallgoods production records. It covers major record-keeping and report generating activities.

This unit is applicable to workers who are responsible for keeping detailed records relating to production such as kill sheets, chiller records, boning room records and loadout records. These record-keeping duties should form a significant part of the individual's responsibilities.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare production records	1.1 Identify workplace and regulatory requirements for record-keeping 1.2 Prepare production recording equipment or materials in accordance with work instructions 1.3 Update records on an electronic or manual system in accordance with work instructions 1.4 Correct shortcomings of the recording system if applicable
2. Generate reports	2.1 Prepare data summaries and reports in accordance with workplace

Element	Performance criteria
	requirements 2.2 Generate major reports detailing inventory, production or staffing data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPS204C Maintain production records.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5e2e56b7-698f-4822-84bb-25adbb8443a7>

Assessment Requirements for AMPX204 Maintain production records

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Competency must be demonstrated while collecting and recording significant data over a period of time. The data should involve some complexity in categories and require accurate recording.

The candidate must:

- follow all work instructions effectively
- generate reports to meet workplace and regulatory requirements
- apply relevant workplace health and safety requirements
- maintain stocks of consumables for use
- prepare all recording equipment for use (where relevant)
- use all recording equipment properly (where relevant)
- record data according to data requirements
- update records as required
- prepare all summaries required
- apply relevant communication and mathematical skills
- describe the workplace and/or regulatory requirements for record-keeping

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace requirements for reports
- relevant security arrangements such as Department of Agriculture or company requirements
- function and uses of the reports generated
- possible shortcomings of recording and how to correct them
- purposes of keeping production records
- relevant workplace health and safety requirements

Assessment Conditions

Assessment should be undertaken in an operating meat processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace project
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX205 Clean chillers

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to clean and sanitise chillers when empty of product.

This unit is applicable to workers at abattoirs, boning rooms, smallgoods factories, game meat processing plants, food services, smallgoods establishments and wholesale operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

The unit must be delivered and assessed using Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Clean chillers	1.1 Clean chillers in accordance with cleaning program and workplace, workplace health and safety and regulatory

Element	Performance criteria
	requirements 1.2 Workplace health and safety risks and requirements are identified specifically for chillers 1.3 Identify specific areas of contamination risk for the products 1.4 Handle and store chemicals according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPS205C Clean chillers.

Assessment Requirements for AMPX205 Clean chillers

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must clean and sanitise chillers when empty of product.

The candidate must:

- implement cleaning regime for chillers in accordance with workplace, workplace health and safety, and regulatory requirements
- apply relevant communication and mathematical skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene and sanitation monitoring programs for chillers
- importance of avoiding condensation in chillers
- chiller cleaning program
- potential contamination risks for product in chillers and freezers
- workplace health and safety hazards of working in a cold environment

Assessment Conditions

Competency must be demonstrated when the chillers and plant are operating during normal production.

Assessment must occur in a registered meat processing plant or premises.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX206 Operate forklift in a specific workplace

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate forklifts in specific work areas, which may require fitting forklifts with specialised lifting attachments or shifting hazardous materials. These areas include freezers, cold stores, loadouts, skin sheds, smallgoods and rendering plants.

This unit is applicable to workers in meat processing plants and smallgoods enterprises who operate forklifts in environments requiring specific competencies. Prior to undertaking this unit, individuals should have gained the necessary licence or permit to operate a forklift.

This unit must be delivered in the context of Australian meat industry processing standards and regulations.

All work should be carried out in relation to workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify load characteristics	1.1 Take characteristics of the load into account and employ appropriate attachments 1.2 Identify hazardous materials and take workplace, industry and regulatory requirements into account when operating a forklift carrying hazardous materials
2. Consider specific features of workplace in transporting product	2.1 Transport and load product, taking into consideration specific features of the workplace environment
3. Transport and store product	3.1 Identify and follow specific workplace health and safety requirements for work area 3.2 Handle forklift and pallets in accordance with the requirements of specific work locations 3.3 Transport product in accordance with workplace, Quality Assurance (QA), and hygiene and sanitation requirements 3.4 Store product in accordance with workplace, QA, and hygiene and sanitation requirements 3.5 Rack or store products and pallets in accordance with work instructions
4. Maintain equipment records	4.1 Maintain equipment records in accordance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPS206C Operate forklift in a specific workplace.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AMPX206 Operate forklift in a specific workplace

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- gain a licence and satisfy traffic authority examiner, where required by government regulation
- explain operational safety requirements including workplace health and safety requirements
- operate a forklift in a specific workplace to requirements of that workplace
- operate a forklift in accordance with workplace requirements, and workplace health and safety, and manufacturer's specifications
- transport and store a variety of products to meet production requirements
- maintain equipment records
- apply hand-eye coordination
- apply relevant communication and mathematical skills
- assess, interpret and apply technical information

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- characteristics, capabilities and limitations of the forklift
- operational safety requirements including workplace health and safety requirements
- QA considerations for transporting product within the plant
- critical aspects of:
 - identification of damage or leaks which may compromise operational capability or safety
 - operational safety
- specific features of the workplace that impact on the operation of the forklift (e.g. operating in a cold environment)
- workplace operating procedures

Assessment Conditions

Competency must be demonstrated in specific meat processing plant environments such as freezers and under normal operating conditions.

Assessment must be conducted in an operating meat processing plant and assessment tools must be customised to the workplace-specific workplace health and safety procedures and work instructions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX207 Vacuum pack product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to pack meat products using vacuum packaging.

This unit is applicable to workers packing meat and meat products in boning rooms, offal rooms, smallgoods plants, wholesalers and food services operations. It is not applicable to small scale vacuum packaging in retail operations.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select packaging	1.1 Bag product in appropriately sized bag

Element	Performance criteria
	1.2 Arrange product in appropriate container
2. Set machine requirements	2.1 Complete requirements in preparation for start-up of vacuum packing machine to workplace requirements 2.2 Set machine requirements 2.3 Follow start-up procedures to workplace requirements 2.4 Attach and change packing materials to workplace requirements and product specification 2.5 Place bagged meat on the vacuum packing machine or in the formed pockets as appropriate 2.6 Place open ends of bags flat across the sealing bar or meat contained in pockets as appropriate 2.7 Follow workplace health and safety, hygiene and sanitation requirements
3. Operate machinery	3.1 Operate vacuum packaging machine in accordance with workplace requirements 3.2 Vacuum pack a variety of products to customer specifications, hygiene and sanitation, workplace health and safety, and Quality Assurance (QA) requirements at a speed that is the same as production requirements 3.3 Shrink bags using hot water baths where appropriate 3.4 Drain bagged cuts 3.5 Perform shut-down procedures to workplace requirements
4. Perform routine maintenance	4.1 Change dyes according to workplace requirements 4.2 Take corrective action when leaks and defects are identified, according to workplace requirements 4.3 Change plates as required
5. Ensure quality of packaging and product	5.1 Inspect bagged cuts for leaks and other defects 5.2 Place bagged cuts in cartons according to specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPSR201C Vacuum pack product.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AMPX207 Vacuum pack product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be observed vacuum packing products.

The candidate must:

- prepare for vacuum packaging according to workplace health and safety, and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- explain defects that can occur during packaging
- demonstrate hygienic cleaning of equipment
- demonstrate hygienic work practices for vacuum packing
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements
- manage time and priorities

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific workplace health and safety requirements for vacuum packing
- purpose of vacuum packaging
- relevant communication and mathematical skills
- relevant regulatory requirements
- general operating principles, including start-up and shut-down procedures
- manufacturer's and workplace requirements for vacuum packaging of product

Assessment Conditions

Competency should be demonstrated at the normal speed of production.

Assessment should take place in an operating meat processing plant or food service operation.

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration or project
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX208 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to reduce negative environmental impacts of meat industry work practices.

This unit addresses the knowledge, processes and techniques necessary to support environmentally sustainable work practices. It is applicable to personnel in all sectors and areas, and at all levels of the meat processing industry. It is particularly applicable to production personnel in meat processing, smallgoods operators and meat retailing personnel.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify current resource use	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Identify wastes and emissions created by own work role
2. Comply with environmental regulations	2.1 Follow regulatory requirements, work instructions and procedures to ensure compliance 2.2 Identify non-conformances and follow corrective action procedures
3. Seek opportunities to improve resource efficiency	3.1 Follow enterprise plans to improve environmental practices and resource efficiency 3.2 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPSR202B Apply environmentally sustainable work practices.

Links

Assessment Requirements for AMPX208 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- demonstrate a basic understanding of sustainability
- interpret workplace information
- report non-conformances
- recognise and follow procedures, follow instructions and respond to change
- relate to people from a range of social, cultural, ethnic backgrounds, and physical and mental abilities
- apply relevant communication and mathematical skills
- ask questions and clarify work requirements
- follow good housekeeping procedures and practices
- apply relevant workplace health and safety, regulatory and workplace requirements
- take corrective action according to workplace requirements
- work with others to solve problems relating to environmental performance

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- environmental and resource efficiency hazards and risks associated with own workplace and own work area
- workplace environmental management strategies affecting own work practice
- relevant environmental and resource efficiency systems and procedures for own work area
- relevant workplace health and safety, regulatory and workplace requirements

Assessment Conditions

Competency in this unit must be demonstrated under conditions that are the same as the speed of production and within the parameters of the role responsibilities.

Assessment should be undertaken in an operating meat processing plant or food service operation.

The following three forms of assessment must be used:

- demonstration - snapshot of performance
- quiz, question and answer
- observation of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX209 Sharpen knives

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to maintain knives for safe and effective use in a meat establishment.

This unit is applicable to any worker who is required to sharpen a knife to use in a processing, wholesaling or retail meat establishment. This unit is a pre-requisite for any other unit where a knife is used to perform a task.

This unit must be delivered in the context of Australian meat industry standards and regulations.

All work should be carried out in accordance with workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Sharpen knives	1.1 Sharpen knives according to workplace requirements 1.2 Sharpen knives to maintain bevel edge 1.3 Use steel correctly to maintain bevel edge and to meet workplace health and safety requirements
2. Work safely with others	2.1 Use knives in ways which minimise the risk of injury 2.2 Use knives safely at all times in accordance with workplace health and safety, hygiene and sanitation, and food safety requirements
3. Maintain knives and associated equipment	3.1 Maintain knives to hygiene and sanitation, and workplace requirements 3.2 Maintain, clean and store knife-sharpening equipment to hygiene and sanitation, and workplace requirements

Assessment Requirements for AMPX209 Sharpen knives

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed maintaining knives for safe and effective use in a meat establishment. Competency must be demonstrated in conjunction with a skill or task requiring the use of a knife. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- steel a knife correctly
- use safe techniques of knife sharpening to workplace, hygiene and sanitation, and health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- steps in steeling a knife to maintain edge
- technique to sharpen a knife with an appropriate bevel edge
- theory of knife sharpening
- sterilisation, and hygiene and sanitation requirements related to knife sharpening
- workplace health and safety issues related to the use and sharpening of knives
- relevant regulatory requirements

Assessment Conditions

Assessment can be carried out in an actual or simulated workplace.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX210 Prepare and slice meat cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be observed preparing and slicing meat into finished cuts.

For meat retailing:

- prepare and slice meat cuts for all primals for three species (including beef and sheep) to workplace and regulatory requirements, similar to the speed of production.

For smallgoods manufacturing:

- prepare and slice meat cuts for all primals for one species to workplace and regulatory requirements, similar to the speed of production.

The candidate must:

- demonstrate correct cutting, slicing and trimming techniques
- use safe and effective knife skills
- identify and name examples of finished meat cuts
- apply relevant regulatory requirements
- slice and trim meat in preparation for sale according to workplace health and safety, hygiene and workplace requirements and customer specifications
- prepare finished meat cuts from all primals relevant to meat retailing and/or smallgoods manufacturing
- remove defects from products according to workplace and regulatory requirements
- seek advice from relevant sources when working with new cutting equipment or products
- use communication skills appropriate to the task

Knowledge Evidence

The candidate must demonstrate a factual, technical and procedural knowledge of:

- principles of QA, hygiene and sanitation, and workplace health and safety in relation to slicing meat
- workplace requirements related to slicing meat
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX211 Trim meat to specifications

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be observed trimming a selection of meat cuts in accordance with workplace specifications.

The candidate must:

- prepare equipment appropriately prior to the commencement of the task
- give examples of customer and workplace specifications for trimming meat
- trim meat to specifications as follows:
 - for meat retailing, meat must include beef, sheep meat and one other species
 - for smallgoods manufacturing, meat must include a minimum of one species
- use a knife to workplace, health and safety, and hygiene requirements
- maintain a sharp knife
- apply relevant communication skills
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene requirements for the handling of meat products
- steps in sharpening a knife
- workplace, health and safety and hygiene requirements for use of a knife
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

AMPX212 Package product using automatic packing and labelling equipment

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to pack and label meat products, using automatic packaging and labelling equipment.

This unit is applicable to workers in smallgoods plants, meat wholesale enterprises, and meat retail establishments who set up packaging units, accurately identify products and package products to meet customer orders.

This unit must be delivered using Australian meat industry standards and regulations.

All work undertaken should comply with workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some responsibility for their own actions.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Set up packaging unit for operation	1.1 Implement workplace start-up procedures ensuring compliance with workplace health and safety, and hygiene requirements 1.2 Load consumables to specifications 1.3 Select equipment settings according to packaging instructions 1.4 Identify and report faults in equipment either verbally or in writing according to workplace requirements.
2. Set weight controls	2.1 Set weight controls to production requirements ensuring bagged product is check-weighed to verify machine set up 2.2 Adjust controls to achieve production specifications
3. Operate packaging process	3.1 Package product to workplace requirements ensuring process is operated according to workplace health and safety, workplace and hygiene requirements, and manufacturer's specifications 3.2 Check packs for damage 3.3 Seal and code to packing requirements
4. Describe packaged product	4.1 Measure packaged product according to workplace requirements 4.2 Label packaged product according to workplace requirements 4.3 Package product according to workplace health and safety and hygiene requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX212 Package product using automatic packing and labelling equipment

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed packing and labelling meat products, using relevant equipment. Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- assemble the packaging unit
- check safety features are in place
- check the unit to ensure cleanliness and working order
- accurately enter information in labelling equipment
- set weight controls
- load product according to specifications
- operate packaging equipment to package products according to manufacturer's specifications, workplace, health and safety, hygiene and sanitation requirements
- adjust equipment settings according to packaging instructions or schedules
- complete packaging and labelling records accurately
- package product to customer specifications
- identify and report faults in equipment
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements
- use estimation and manual scales to check-weigh product

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- methods of recording production
- regulatory requirements related to packaging
- features of the packaging unit including parts, safety features, start-up and shut-down procedures, possible faults and adjustments

- production schedule for automatic packaging and labelling equipment
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated using automated packaging equipment under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX213 Despatch meat product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to place orders at a despatch point and loading products into transportation.

This unit is applicable to workers in smallgoods manufacturers and meat establishments, which deliver meat and meat products to customers, including restaurants.

This unit must be delivered using Australian meat industry standards and regulations.

All work should be carried out to comply with workplace procedures, regulatory requirements and hygiene standards.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Arrange and	1.1 Consolidate orders picked from separate areas

Element	Performance criteria
consolidate orders	1.2 Place products and/or batches in correct despatch area 1.3 Acquire information about despatch scheduling requirements 1.4 Arrange and secure products 1.5 Store product in despatch area according to schedule 1.6 Use correct methods for efficient and safe loading
2. Loadout product	2.1 Transport product to loadout according to workplace health and safety, hygiene and sanitation, Quality Assurance (QA) and workplace requirements 2.2 Load product is loaded according to workplace health and safety, hygiene, QA and workplace production requirements 2.3 Document and record products according to workplace and production requirements 2.4 Complete product loadout is completed according to workplace health and safety S, QA, and workplace requirements
3. Maintain clean holding rooms	3.1 Maintain holding rooms to workplace, regulatory, and hygiene and sanitation requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX213 Despatch meat product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed placing orders at a despatch point and loading products into transport.

The candidate must:

- identify species and various meat products for storage
- handle product according to hygiene requirements
- monitor refrigerated temperature on a regular basis
- rotate stock
- apply relevant communication and mathematical skills
- arrange and consolidate orders to customer and workplace requirements
- record information accurately and legibly
- seek advice where necessary from relevant sources when working with new products, technology or changes in work practices
- use correct manual handling techniques for transferring product to storage facilities
- maintain clean holding rooms

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- storage requirements for products
- recording procedures for loadout of product
- regulatory requirements related to storage and handling of product
- temperatures for storage of meat products
- workplace requirements for despatch of meat
- appropriate storage facilities for individual products

Assessment Conditions

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- use a range of packaging equipment to package processed meats and smallgoods for retail sale
- identify food safety hazards in packaging processed meat and take appropriate preventative or corrective action
- identify sub-standard or contaminated product
- clean equipment according to hygiene requirements
- work with team members
- apply relevant regulatory and workplace requirements
- report equipment faults, either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- effect of packaging materials and processes on quality, safety and shelf life of product
- regulatory requirements for packaging and labelling
- packaging processes
- workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific workplace health and safety requirements for vacuum packing
- general operating principles, including start-up and shut-down procedures

Assessment Conditions

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX215 Operate tenderiser

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate and maintain machinery for tenderising meat cuts.

The candidate must:

- follow the requirements of the work instruction
- work at production speed
- operate tenderiser in accordance with workplace requirements and manufacturer's specifications
- monitor meat input and output in accordance with work instructions
- carry out routine cleaning and maintenance in accordance with work instructions, manufacturer's specifications and hygiene and sanitation requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- basic operating principles of meat tenderisers
- workplace health and safety requirements related to meat tenderising
- work instructions for operating tenderiser
- relevant regulatory requirements
- potential sources of contamination to the product

Assessment Conditions

Assessment must be conducted using meat prepared to a specification.

Competency must be demonstrated over a period of time and at a relevant rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPX216 Operate mincer

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate and maintain mincing machinery, select product for mincing and monitor finished product to achieve quality specifications.

The candidate must:

- operate mincer in accordance with work instructions and manufacturer specifications
- monitor minced product to ensure compliance with customer or workplace specifications
- monitor product to be minced to ensure compliance with QA specifications
- consistently follow hygiene and sanitation procedures associated with the operation of the mincer
- report equipment faults according to workplace requirements
- maintain mincer in accordance with work instructions
- apply relevant regulatory requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- operation and adjustment of the mincer
- work instructions for operating the mincer
- relevant regulatory requirements
- potential workplace health and safety risks
- potential sources of contamination

Assessment Conditions

Assessment must be conducted using a mincer in an actual or simulated environment.

Candidate must be able to operate a mincer to produce minced meat products over a period of time under normal operating conditions of the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPX301 Assess product in chillers

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must be observed assessing products in chillers.

The candidate must:

- assess meat colour, fat colour and marbling
- ensure the chiller cleaning program is followed
- monitor chiller temperature
- monitor product handling and identification
- apply mathematical concepts to monitoring procedures (e.g. temperature checks and adjustments)
- apply relevant communication skills
- assess carcasses according to workplace and regulatory requirements
- complete documentation, including accurate and legible labelling
- identify and apply relevant workplace health and safety requirements
- identify product chiller requirements
- identify product health and hygiene requirements
- use available technology to record, gather and interpret product-monitoring data

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the carcass grading system employed in an enterprise
- product transfer and storage methods
- the process involved in assessing chillers in the workplace
- product quality monitoring processes
- the importance of fat depth, marbling, carcass colour and other grading parameters
- rejection procedures

Assessment Conditions

Assessment must be conducted in an operating meat processing enterprise.

As a minimum, the following three forms of evidence must be used:

- Workplace Referee report
- Knowledge test
- Assessor observation of performance on the job

Assessors must satisfy the current standards for RTOs.

3. Prepare ingredients	3.1 Select and prepare ingredients in accordance with product specifications, hygiene and workplace requirements
4. Prepare brines	4.1 Add required amount of water, other liquids and solid additives in correct order and mix in accordance with product specifications, hygiene and workplace requirements 4.2 Prepare brine solutions in accordance with product specifications, hygiene and workplace requirements 4.3 Use hydrometer (salinometer) to check brine solution
5. Process meat	5.1 Cure or corn meat in accordance with product specifications, health regulations and workplace and production requirements 5.2 Regularly monitor processing 5.3 Make adjustments to processing to achieve product specifications
6. Store meat product	6.1 On completion of processing, store product in accordance with product specifications, hygiene, regulatory and workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPSR301C Cure and corn product.

Assessment Requirements for AMPX302 Cure and corn product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be observed curing and corning various meat products.

The candidate must:

- identify meat cuts used in curing and corning
- identify various ingredients used in curing and explain their purposes
- identify sub-standard product and address the problem according to workplace requirements
- follow recipes and procedures accurately
- activate processing equipment to assess its readiness for operational use
- operate mixing machines for required length of time
- operate adjustment tools and equipment correctly
- perform running adjustments in accordance with workplace requirements and manufacturer's specifications
- pump meat correctly to avoid air pockets
- pump meat to increase weight in accordance with workplace requirements
- perform curing and corning in accordance with workplace, workplace health and safety, hygiene and regulatory requirement
- demonstrate correct pickling procedures in accordance with product specifications and workplace requirements
- wash residue from cured meats following removal from holding brine
- report any faults and required adjustments to processing equipment in accordance with workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer's specifications
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements
- seek advice from appropriate sources when working with new products or equipment

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- conditions under which equipment may need adjusting
- function of various additives and ingredients
- meat curing process
- purpose and effect of brine on meat
- health regulations which apply to curing and corning of meats
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corning products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling in accordance with pump percentage and yield requirements
- selection criteria for meat for the curing or corning process
- relevant regulatory requirements
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment
- 'osmosis' in relation to the curing process

Assessment Conditions

Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.

Assessment must occur in the workplace under normal production conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX303 Break carcass into primal cuts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to break the carcass into primals and trim in accordance with relevant specifications.

This unit is applicable to smallgoods operators and meat tradespersons in the retail industry who are required to separate primal cuts for further processing or preparation.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Break carcass into primal cuts	1.1 Accurately separate carcass into primal cuts in accordance with workplace, workplace health and safety, Quality Assurance (QA) and hygiene requirements
2. Handle knives effectively	2.1 Handle knives safely, hygienically and effectively

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMSR301C Break carcass into primal cuts.

Links

Assessment Requirements for AMPX303 Break carcass into primal cuts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be observed breaking carcasses into primals and trim cuts in accordance with relevant specifications.

For **meat retail** the candidate must be able to:

- break carcass into primal cuts for a minimum of three species (including beef and sheep)
- identify primary cut specifications for beef and at least two species of small stock

For **smallgoods** manufacturing the candidate must be able to:

- break carcass into primal cuts for a minimum of one species
- identify primary cut specifications for at least one species

The candidate must:

- identify the major anatomical structures of the carcass of each species
- prepare equipment for breaking carcass correctly and safely
- position or fasten carcass securely for separation
- separate carcasses into primal cuts for a range of meat cuts (minimum of three species for meat retailing and one species for smallgoods manufacturing), in accordance with workplace, workplace health and safety, hygiene requirements and customer specifications
- use acceptable cutting lines to produce primary cuts to workplace requirements
- identify contaminated product and take appropriate corrective action
- demonstrate safe manual handling techniques
- sanitise equipment according to workplace requirements
- apply relevant communication skills
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene, workplace health and safety, and workplace requirements when breaking carcasses
- quality requirements for breaking carcasses
- principles of contamination in regard to primary cuts
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX304 Prepare primal cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to bone and trim primals into specific finished meat products (cuts).

This unit is applicable to skilled operators in a smallgoods establishment or tradespeople in a meat retail enterprise. Primal cuts may be prepared for sale or further processing.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene and sanitation standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Bone primal cuts	1.1 Bone primal cuts in accordance with workplace, workplace health and safety, hygiene and sanitation, and Quality Assurance (QA) requirements
2. Trim primal cuts	2.1 Trim primal cuts in accordance with workplace, workplace health and safety, hygiene and sanitation, and QA requirements
3. Handle knives effectively	3.1 Handle knives safely, hygienically and effectively

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPX304 Prepare primal cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed boning and trimming primals into specific meat products (cuts).

For **meat retail** the candidate must be able to:

- identify meat cut specifications for a minimum of three species using cut descriptions according to customer specifications and regulatory requirements

For **smallgoods** manufacturing the candidate must be able to:

- identify meat cut specifications for a minimum of one species

Where the candidate does not prepare primal cuts in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The candidate must:

- correctly use personal protective equipment (PPE) when boning
- position cuts securely for boning
- using knives and other cutting tools safely and effectively when separating primals
- use safe manual handling techniques
- identify contaminated product and take corrective action according to workplace requirements
- sterilise or sanitise equipment according to regulatory and workplace requirements
- apply relevant communication and mathematical skills
- describe meat cut specifications in accordance with customer specifications and regulatory requirements
- apply relevant regulatory requirements
- seek advice from appropriate sources where necessary, particularly when working with new species, technology or changed regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- principles of hygiene and sanitation, and workplace health and safety in relation to cutting meat product
- food safety, QA and product quality requirements for boning primals
- principles of cross-contamination in relation to cutting
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX305 Smoke product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare products which are smoked, such as ham, bacon and smallgoods products.

This unit is applicable to skilled operators who are responsible for smoking ham, bacon and other smallgoods products and operating the smokehouse in smallgoods plants or meat retail enterprises.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene and sanitation standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select meat	1.1 Select meat according to product specifications 1.2 Prepare meat according to product specifications, where part of the work instructions
2. Prepare ingredients and equipment	2.1 Prepare ingredients according to product specifications and workplace requirements 2.2 Prepare machinery and equipment according to product and manufacturer's specifications
3. Load products	3.1 Check products to ensure correct spacing prior to loading 3.2 Load products in a manner that ensures even cooking 3.3 Handle products according to workplace health and safety, hygiene and sanitation requirements at all times
4. Smoke product	4.1 Insert core temperature probes into product centre appropriately and in accordance with product specifications and workplace requirements 4.2 Program machinery, where applicable, in accordance with manufacturer's and product specifications 4.3 Smoke a variety of products to workplace requirements and customer specifications at a speed similar to production requirements 4.4 Monitor and record process according to workplace requirements
5. Monitor smoke cycle	5.1 Regularly monitor smoke cycle, note results and correct deviations from the program 5.2 Manually check internal temperature in accordance with workplace requirements to ensure correct smoke time has been achieved and undertake further cooking if necessary 5.3 When product type and processing procedures require, initiate a shower cycle according to process specifications
6. Chill products	6.1 On completion of smoke cycle, correctly weigh product and either chill immediately or cool at ambient temperature to a specified internal temperature before chilling, according to regulatory requirements 6.2 Keep products at a specific and constant temperature according to product specifications

Element	Performance criteria
	6.3 Store products according to product specifications 6.4 Identify and stack products according to product specifications and workplace requirements

Assessment Requirements for AMPX305 Smoke product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed preparing smoked products including ham, bacon and smallgoods products. Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- produce commercially suitable smoked products
- demonstrate correct loading procedure for both a full and less-than-full smokehouse
- activate and operate machinery according to manufacturer's and workplace instructions
- measure and monitor product internal temperature correctly to ensure it meets product specifications
- monitor smoking of meat on a regular basis to meet product specifications (including, where relevant, the interpretation of graphs or flow charts or mimic panels and controls)
- interpret cooking records where appropriate with respect to relevant product
- adjust processing as required to achieve product specifications
- apply relevant communication and mathematical skills
- operate smoke facility according to workplace health and safety, hygiene, regulatory, product specifications and workplace requirements, and meet production requirements
- report machine faults according to workplace specifications
- store meat according to workplace health and safety, hygiene, regulatory, product specifications and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct smoking procedure for specific product
- storage procedures for smoked products
- meat smoking process
- the purpose and effect of smoking processes on meat
- health regulations that apply to smoking of meats
- chilling requirements for different products

- the possible effects of inconsistent temperature on product
- the effects of smoking on shelf life and product taste
- the purpose of correct water temperature and correct additive sequence, especially phosphate and smoke
- recording requirements for the smoking/cooking process
- relevant workplace requirements related to:
 - appropriate humidity levels
 - effect of moisture on casings
 - smoke generator
 - smoke jet
 - sock
 - wet bulb sock
- the use and purpose of raw materials for smoking meat
- the use and purpose of ingredients for smoking meat
- mathematical information in work instructions, specifications and recipes
- meat cuts used in smoking
- cause and effects of, and explain the appropriate corrective action for:
 - cycle out of sequence
 - excess smoke
 - insufficient smoke

Assessment Conditions

Competency must be demonstrated over time and under normal operating conditions for the enterprise, within the parameters of the role and responsibilities, and according to workplace requirements.

Assessment may occur in the workplace under normal operating conditions or in a simulated environment.

As a minimum, the following three forms of assessment are required:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs

AMPX306 Provide coaching

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to act as a coach to others in the workplace.

Coaching is used when experienced personnel are teamed with new recruits or employees new to a position. The role of a coach is to provide advice, support and guidance as the employee learns new tasks and skills, and becomes familiar with the position and the working environment. In many enterprises, this is referred to as a 'buddy' system. Coaching or buddying is used throughout the meat industry.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene and sanitation standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish coaching relationship	1.1 Identify areas for development in accordance with organisational and individual requirements 1.2 Apply effective communication styles to develop trust, confidence and rapport 1.3 Make coaching arrangements on how the relationship will be conducted 1.4 Agree upon expectations and goals 1.5 Seek input from relevant personnel, if required
2. Provide coaching support	2.1 Assist individuals to clarify tasks, duties and other requirements associated with their positions 2.2 Assist individuals to gain required skills and expertise through demonstration, guidance, advice and constructive feedback 2.3 Provide a supportive environment to allow individuals to work towards achieving required skill levels 2.4 Encourage individuals to make decisions and take responsibility for the courses of actions or solutions under consideration 2.5 Provide assistance and guidance in a manner that allows individuals to retain responsibility for personal performance
3. Evaluate effectiveness of coaching	3.1 Recognise and openly discuss changes in the coaching relationship 3.2 Make adjustments to the relationship to take account of the needs of both the coach and the individual 3.3 Seek feedback from colleagues and other relevant personnel to identify and implement improvements

Assessment Requirements for AMPX306 Provide coaching

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed acting as a coach to others in the workplace. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply communication skills in giving, receiving and analysing feedback relevant to the process of coaching
- apply the organisation's policies, procedures and plans
- apply relevant problem-solving skills
- assist another individual to achieve their goals and development needs through the use of significant workplace knowledge
- create a learning environment that allows for open discussion, feedback, tolerance of mistakes during learning within a safe environment, and affirmation of the individual's worthiness
- demonstrate effective methods of coaching
- demonstrate effective planning skills to organise activities
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- use appropriate methods and techniques for eliciting and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- effective learning styles and methods of coaching
- methods for identifying development opportunities
- enterprise's Standard Operating Procedures (SOPs), work instructions and relevant regulatory requirements, and apply them to the coaching process
- principles of coaching for development of competence

Assessment Conditions

Competency must be demonstrated over time and under typical operating or production conditions for the enterprise.

Assessment must occur in the workplace and under normal enterprise or production conditions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX307 Provide mentoring

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to act as a mentor to others in the workplace. Mentoring is a strategy to promote individual well-being in the workplace and to facilitate retention.

In the meat industry, mentors play a key role. Mentors may be from all areas and levels of the organisation. Mentors may be the people champions or change champions on-site. Mentors can be found in all sectors of the meat industry.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene and sanitation standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

AMPX308 Follow and implement an established work plan

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available procedures and advice. Work plans may need to be modified with supervisor/team leader agreement to suit changing conditions and priorities.

Team leaders and Quality Assurance (QA) Officers in the meat industry are required to implement a wide variety of work plans such as schedules, work instructions, customer orders and daily plans. They will be required to interpret, prioritise, communicate and implement plans in the context of a team environment.

Work and tasks may be allocated through managers, supervisors, work schedules or plans. They may be individual tasks and jobs or team function work schedules.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX308 Follow and implement an established work plan

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must develop, implement and modify a work plan to suit their daily work activities.

The candidate must:

- use communication skills appropriate to the task, including reading, writing, numeracy, listening and speaking skills
- identify and control hazards
- interpret work schedules and follow instructions
- follow relevant procedures
- effectively and efficiently utilise resources and time
- recognise potential disruptions or changed circumstances and modify work plans in conjunction with relevant personnel
- seek assistance from relevant personnel when difficulties arise
- apply problem-solving skills relevant to work instructions and Standard Operating Procedures (SOPs)
- interpret and apply enterprise's standard operating procedures, work instructions and relevant regulatory requirements
- use appropriate methods and techniques for obtaining and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- enterprise quality, operational and safety procedures
- regulatory requirements and customer specifications
- importance of workplace documentation
- routine work planning processes
- potential safety implications of modifying the work plan

- job outcomes, standards and priorities
- equipment and processes used in the workplace
- hazards associated with the process
- methods of controlling the hazards according to procedures

Assessment Conditions

Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPX309 Identify and repair equipment faults

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed locating and repairing or replacing faulty equipment in accordance with agreed upon workplace practices. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- prepare equipment and work area to conduct maintenance
- wear personal protective clothing for maintenance work
- apply relevant regulatory requirements
- follow instructions in undertaking agreed maintenance task
- diagnose and repair or replace faulty equipment according to workplace health and safety, hygiene and sanitation, workplace requirements and manufacturer's specifications
- apply fault diagnosis techniques and procedures
- demonstrate the use of common hand and power tools for component repair or replacement
- verify completion of repair or replacement
- clean maintenance tools or equipment
- maintain a clean and safe work area
- pack or store tools in designated location
- apply relevant communication and mathematical skills including reporting and describing faults, calculating weights, measures, quantities and time
- seek advice from others and relevant sources, including manuals, to learn new skills and techniques

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- common problems in conducting maintenance
- consequences of incorrect or inadequate maintenance
- environmental aspects related to maintenance

- equipment isolation requirements
- food safety factors in maintaining equipment
- workplace health and safety hazards and controls
- purpose and use of common hand and power tools for component repair or replacement
- fault diagnosis techniques and procedures
- purpose of routine preventative maintenance
- quality parameters to be achieved
- recording or reporting systems and processes
- relationship of maintenance to other work activities in the meat or enterprise plant
- roles of and relationships with others involved in carrying out maintenance functions
- services used in maintenance
- significance of minimising equipment down time
- waste handling requirements
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating and production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX310 Perform pre-operations hygiene assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to undertake a pre-operations hygiene assessment prior to the commencement of production.

This unit is applicable to workers in meat and animal processing premises.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for pre-operational hygiene assessment	1.1 Explain purpose of pre-operational hygiene assessment 1.2 Identify area to be checked 1.3 Check cleaning and maintenance records relating to identified area 1.4 Identify testing requirements according to workplace requirements 1.5 Assemble, check and calibrate equipment, as required
2. Conduct pre-operational hygiene assessment	2.1 Conduct visual assessment, including equipment and fittings 2.2 Conduct pre-operational testing according to workplace, hygiene and sanitation, regulatory, and workplace health and safety requirements 2.3 Record results according to workplace requirements
3. Evaluate results and take corrective action	3.1 Analyse results and identify areas of non-conformance 3.2 Take corrective action where required 3.3 Re-test or assess, as necessary, to ensure compliance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Links

Assessment Requirements for AMPX310 Perform pre-operations hygiene assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must undertake a pre-operations hygiene assessment prior to the commencement of production.

The candidate must:

- prepare for and conduct pre-operations hygiene assessment according to workplace, hygiene and sanitation, workplace health and safety and regulatory requirements
- use testing equipment correctly
- accurately interpret and record results
- consistently identify areas of non-conformance and take corrective action
- comply with workplace health and safety requirements
- apply relevant communication skills when reporting to supervisors and interacting with team members

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- process for conducting pre-operational hygiene assessment
- likely causes of contamination
- corrective action to be taken when contamination is identified
- workplace record-keeping requirements
- regulatory requirements as they relate to pre-operational inspection processes
- relevant workplace health and safety requirements

Assessment Conditions

Assessment must be conducted in an operating and registered meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX311 Monitor production of packaged product to customer specifications

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to monitor packers and packaged product to ensure it meets customer and workplace specifications.

This unit is applicable to products packaged in abattoirs, boning rooms, smallgoods plants, game processing plants, food services and wholesaling operations. This role will usually be performed by persons with leading hand responsibilities.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify customer and workplace specifications	1.1 Identify and explain customer specifications for packaged product 1.2 Identify any workplace or regulatory requirements which may be relevant 1.3 Explain workplace monitoring and recording requirements
2. Check and assess packaged product	2.1 Undertake checking regime according to workplace requirements 2.2 Check that meat product meets customer specifications 2.3 Check that packing confirms with customer and workplace requirements 2.4 Check that packaging process meets workplace hygiene and sanitation requirements and check for contamination 2.5 Observe workplace health and safety, and hygiene and sanitation requirements
3. Address non-conformance	3.1 Identify out-of-specification product 3.2 Identify required action according to workplace and regulatory requirements 3.3 Implement required action 3.4 Record action taken according to workplace requirements
4. Provide support to team members	4.1 Provide guidance and support to individual team members where necessary 4.2 Monitor speed and accuracy of team members and provide additional guidance and support where necessary 4.3 Ensure new staff receive additional support where required 4.4 Use communication skills to give clear instructions and advice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Assessment Requirements for AMPX311 Monitor production of packaged product to customer specifications

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must monitor packers and packaged product to ensure it meets customer and workplace specifications.

The candidate must:

- identify, explain and apply customer and workplace specifications
- check and assess packaged product according to workplace requirements
- address non-conformance in a timely manner
- identify and apply relevant regulatory requirements
- follow workplace health and safety, and hygiene and sanitation requirements
- maintain monitoring records to workplace requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- customer specifications
- relevant workplace and regulatory requirements
- workplace monitoring requirements and processes
- causes of contamination and corrective actions
- workplace labelling systems and requirements
- actions to be taken for out-of-specification product

Assessment Conditions

Assessment must be conducted in an operating meat packing room.

Competency must be demonstrated at a rate of packing that meets workplace requirements over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX313 Contribute to energy efficiency

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to maintain energy efficient work practices and to contribute to systems improvement with regard to energy efficiency in the meat processing industry.

This unit is applicable to supervisors, quality assurance and maintenance personnel in meat processing operations who have responsibility for maintaining and contributing to energy efficient work practices of the enterprise.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify enterprise energy use and policies	1.1 Identify types of energy that are used in the enterprise and what the energy is used for 1.2 Identify and follow relevant workplace health and safety, environmental, and organisational policies and procedures relevant to maintaining and contributing to energy efficiency
2. Measure energy use	2.1 Identify what is measured and how it is measured 2.2 Use tools such as checklists and spreadsheets to collate the energy use measurements 2.3 Read and interpret records of energy use, seeking the advice of specialist advisors if required
3. Maintain and contribute to energy efficiency	3.1 Identify and review requirements to maintain energy efficiency 3.2 Identify, recommend and implement areas for improvement, within scope of responsibility
4. Follow and promote energy efficient work practices	4.1 Follow and promote enterprise energy efficiency policy and procedures 4.2 Monitor operation of equipment to ensure maximum energy efficiency 4.3 Monitor equipment maintenance and replacement schedules 4.4 Provide support and advice to other workers, as appropriate
5. Contribute to systems improvement	5.1 Contribute to and support reviews of operations for improvement in energy efficiency 5.2 Identify opportunities for efficiencies in energy consumption and progress through appropriate personnel

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPX313 Contribute to energy efficiency

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must maintain energy efficient work practices and contribute to systems improvement with regard to energy efficiency in the meat processing industry.

The candidate must:

- follow relevant workplace health and safety, environmental, and organisational policies and procedures relevant to maintaining and contributing to energy efficiency
- measure and interpret enterprise energy consumption using established data collection systems
- contribute to workplace energy efficiency practices
- support other workers to achieve workplace environmental policies and procedures
- apply relevant communication skills, including interpreting and explaining enterprise energy polices; communicating new ideas and information
- recognise and explain mathematical information as part of data collection and analysis processes

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- relevant enterprise policies and procedures
- applicable regulatory requirements
- enterprise data collection and analysis systems
- current industry practices and developments related to energy efficiency
- relevant enterprise equipment maintenance and replacement schedules

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

As a minimum, three different forms of assessment must be used, including:

- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX401 Monitor meat preservation process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to monitor the hygienic preservation of meat and ensure compliance with quality standards and regulatory requirements.

This unit is applicable to meat safety officers (inspectors) and Quality Assurance (QA) managers responsible for overseeing meat preservation.

All work is carried out to comply with product specifications, customer requirements and workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Overview the meat preservation process	1.1 Identify and explain types of preservation processes used by the meat industry 1.2 Identify meat quality required for preservation processes according to customer and workplace requirements 1.3 Prepare ingredients and equipment required for the preservation process according to product specifications, hygiene and sanitation, and safety requirements
2. Monitor the meat preservation process	2.1 Inspect and monitor product and process to ensure meat is preserved to specifications, health, hygiene and customer requirements 2.2 Regularly monitor equipment or processes involved in the preservation process at critical control points 2.3 Monitor and follow procedures to ensure quality and hygiene of products at all times 2.4 Implement procedures for rejecting, reprocessing and/or recall for products which do not meet specifications or hygiene requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX401 Monitor meat preservation process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must monitor the meat preservation process on at least three separate occasions.

The candidate must demonstrate ability to:

- identify critical control points in the meat preservation process
- prepare ingredients and equipment required for the preservation process according to product specifications, hygiene and sanitation, and safety requirements
- apply relevant communication and mathematical skills
- maintain currency of knowledge through professional development and self-directed research
- determine and implement corrective action
- identify and apply relevant workplace health and safety requirements
- interpret monitoring data and identify out-of-specification performance or product
- monitor the preservation of meat to ensure compliance with workplace and regulatory requirements
- record monitoring information accurately
- report non-conformances to appropriate personnel

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the criteria for rejected, reprocessed or recalled product
- the process involved in preserving meat in own workplace
- critical aspects of meat safety and hygiene during the preservation process
- relevant procedures for ensuring the preserved meat product is safe and fit for human consumption
- rejection and recall procedures
- the impact of the preservation process on product quality, including eating quality

- current regulatory requirements relating to the preservation of meat and meat products
- the appropriate Australian Standard and regulatory requirements

Assessment Conditions

Competency must be demonstrated while monitoring a commercial meat preservation operation.

Assessment of application of reject and recall procedures may involve a simulated monitoring role for the trainee.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

All evidence must be collected in the context of current Australian meat industry standards and regulations.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX402 Monitor and overview the production of processed meats and smallgoods

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must monitor the production of processed meats and smallgoods in the workplace on at least three separate occasions.

The candidate must:

- monitor production of processed meats and smallgoods to ensure compliance with workplace and regulatory requirements
- apply relevant communication and mathematical skills
- identify and apply relevant workplace health and safety requirements
- propose and implement solutions to a range of production problems

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- hazards to the safe and hygienic manufacture of smallgoods
- options for chilling product
- the process involved in manufacturing smallgoods
- procedures required to ensure products are fit for human consumption and meet regulatory and quality requirements
- critical limits in the manufacture of smallgoods
- recall procedures, including notification of appropriate authorities
- the appropriate Australian Standard and regulatory requirements

Assessment Conditions

Competency must be demonstrated while monitoring the commercial production of processed meats and smallgoods.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX403 Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to understand and manage the production processes for Uncooked Comminuted Fermented Meat (UCFM).

This unit is applicable to personnel responsible for the outcomes of the production processes of UCFM in a smallgoods processing operation.

This unit relates to the Australia New Zealand Food Standards Code, Standard 3.2.2 Food Safety Practices and General Requirements, Clause 3 Food handling - skills and knowledge, which states:

'A food business must ensure that persons undertaking or supervising food handling operations have:

- (a) skills in food safety and food hygiene matters; and
- (b) knowledge of food safety and food hygiene matters, commensurate with their work activities.'

All work is carried out to comply with product specifications, customer requirements, hygiene standards and workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian Meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPCOR202 Apply hygiene and sanitation practices

AMPCOR404 Facilitate hygiene and sanitation performance

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify microbiological hazards for UCFM products	1.1 Identify types of micro-organisms 1.2 Identify major threats to UCFM products 1.3 Identify types of bacteria that cause food poisoning and spoilage 1.4 Identify effects of bacterial contamination for food poisoning (impact on people) and food spoilage (shelf life) 1.5 Identify sources of bacterial contamination 1.6 Identify growth characteristics and requirements of bacteria
2. Identify chemical hazards for UCFM products	2.1 Identify chemical hazards which may affect UCFM products 2.2 Identify common sources of chemical hazards/contamination 2.3 Explain control methods which prevent chemical contamination including enterprise policies and relevant national programs (including residue testing) 2.4 Explain the impact of chemical residues on meat (including poisoning, tainting, rejections)
3. Identify physical hazards for UCFM products	3.1 Explain physical hazards which may affect meat 3.2 Identify common sources of physical hazards and/or contamination 3.3 Explain control methods to prevent contamination 3.4 Explain effects or impact of physical hazards on meat
4. Overview the production of UCFM products	4.1 Identify and explain the range of UCFM products 4.2 Identify and explain the processing techniques involved in producing UCFM 4.3 Identify and explain the hygiene and food safety hazards

Element	Performance criteria
	<p>associated with the production of UCFM products</p> <p>4.4 Identify and explain the regulatory requirements associated with the production of UCFM products</p>
<p>5. Monitor the preparation of processing equipment and areas</p>	<p>5.1 Identify procedures for pre-operational equipment checks in accordance with workplace policies and procedures, and manufacturer's instructions</p> <p>5.2 Carry out and monitor pre-operational checks and procedures in accordance with workplace, food safety and regulatory requirements</p>
<p>6. Manage the production of UCFM and further processed products</p>	<p>6.1 Identify ingredients by type, quality and safety in accordance with product specifications and explain their functions</p> <p>6.2 Identify types of meat, by-product, stock, additive, binder and spices selected in accordance with formulation specifications</p> <p>6.3 Demonstrate handling requirements for ingredients (including starter culture) to prevent food safety hazards and ensure product quality and safety</p> <p>6.4 Identify relevant processing equipment and explain operating procedures in accordance with manufacturer specifications</p> <p>6.5 Describe relevant time, temperature and humidity requirements for fermentation, maturation and monitoring in accordance with product specifications, regulatory requirements and industry guidelines</p> <p>6.6 Describe relevant consistency, appearance, texture and monitoring requirements in accordance with product specifications and regulatory requirements</p> <p>6.7 Identify and assess procedures for rejecting, reprocessing and recalling products which fail to meet specifications or hygiene and sanitation requirements as measured against industry guidelines</p> <p>6.8 Identify and monitor relevant processing area hygiene and sanitation requirements as specified in workplace procedures and regulatory requirements</p>
<p>7. Overview the implementation of the Approved Hazard Analysis Critical Control Point (HACCP) plan for the production of UCFM products</p>	<p>7.1 Identify Critical Control Points (CCPs) and control points for preventing and controlling bacterial contamination, including process controls and systems</p> <p>7.2 Explain and implement control methods to prevent microbiological contamination</p> <p>7.3 Identify critical limits for CCPs and implement monitoring processes</p> <p>7.4 Describe validation requirements for critical limits of HACCP programs</p> <p>7.5 Implement documented procedures which ensure out of control</p>

Element	Performance criteria
	<p>CCPs are brought back under control and affected products are suitably handled</p> <p>7.6 Implement documented procedures to ensure the whole HACCP system is regularly audited and verified as working effectively</p> <p>7.7 Keep all documents and records required for the system available, up-to-date and in use</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

UCFM products must include knowledge of:

- caccitona
- chorizo
- csabai
- landjaeger
- Lebanon Bologna
- mettwurst
- polnische
- salami
- some cabanossi
- summer sausage
- Teewurst

Assessment Requirements for AMPX403 Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must display an understanding of and manage the production processes for UCFM. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply relevant communication and mathematical skills
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research by using resources including the internet, industry journals, circulars from regulators and industry workshops
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to resolve problems
- identify and apply relevant workplace health and safety and workplace requirements
- monitor production of UCFM to ensure compliance with workplace and regulatory requirements
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the relevant Australian Standards and associated regulations
- use technology to access information, prepare reports, and to access and prepare relevant data

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- process involved in manufacturing UCFM
- purpose of fermentation
- raw materials storage and selection requirements
- fermentation control criteria for pH
- fermentation speed control
- purpose of maturation and drying
- maturation and drying speed control

- impact of raw material on product quality and food safety
- water activity as a release criteria
- microbiological criteria in UCFM production and microbiological limits of UCFM, particularly the following significant microbial pathogens: enterohaemorrhagic Escherichia coli, Salmonella, enterotoxin of Staphylococcus aureus and Listeria monocytogenes
- physical hazards for UCFM products
- role of starter culture
- storage and handling requirements for starter culture
- product handling and release criteria
- impact of critical limits in a HACCP program for UCFM production
- procedures required to ensure products are fit for human consumption and meets regulatory, food safety and quality requirements
- implementation of the HACCP plan for the production of UCFM products

Assessment Conditions

Competency must be demonstrated through sustained performance over time, with an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

The following methods of assessment must be used:

- assignment focusing on understanding and application of principles and theory to workplace operations
- third-party referee report of sustained performance at appropriate level of authority and responsibility
- workplace project with a focus on enterprise environment and conditions

Assessors must satisfy current standards for RTOs.

AMPX404 Conduct an internal audit of a documented program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to conduct an internal audit of a documented program.

This unit is applicable to plant managers, Quality Assurance (QA) personnel, managers and marketing personnel who have a role in scheduling, preparing for and conducting an internal audit in a meat processing plant. The scope of the audit may include operational areas such as food safety, workplace health and safety, vendor and environmental programs. This may include industry standards and codes.

Work in this unit must be carried out to comply with the appropriate Australian Standard.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan the audit	1.1 Interpret audit schedule and plan and organise the timely conduct of internal audit 1.2 Determine objectives, scope and criteria of audit according to workplace requirements 1.3 Assemble and brief audit team, as required, about the objectives, scope and criteria of the audit 1.4 Notify those affected by and involved in the audit and document responsibilities according to workplace requirements 1.5 Notify stakeholders involved in an internal audit according to workplace requirements 1.6 Identify procedures, records and workplace documentation needed for the audit 1.7 Document evidence collection methods and sources to be used during the audit, including developing workplace checklists in accordance with workplace specifications 1.8 Conduct a document review prior to audit
2. Conduct the audit	2.1 Conduct an entry meeting with relevant parties to explain the purpose, scope and criteria for the audit, the methods to be used for conducting the audit, and procedures for reporting and following up results 2.2 Conduct an audit of the program in accordance with workplace and regulatory requirements 2.3 Use effective communication skills when conducting the audit 2.4 Collect verifiable objective evidence against the criteria of the audit 2.5 Make findings using the objective evidence against the audit criteria 2.6 Identify and categorise non-conformances according to workplace requirements 2.7 Record audit activity according to workplace requirements
3. Report on audit findings	3.1 Prepare an audit report, detailing areas of the program which were audited and findings against the audit criteria, including

Element	Performance criteria
	non-conformances, where applicable 3.2 Document objective evidence according to workplace standards 3.3 Keep records of audit process, objective evidence and findings in accordance with workplace and regulatory requirements 3.4 Report findings according to workplace requirements
4. Confirm and close out corrective action	4.1 Verify the effectiveness of corrective actions 4.2 Maintain records of the effectiveness of corrective actions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX404 Conduct an internal audit of a documented program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must conduct an internal audit of at least one complete section of a documented program.

The candidate must:

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of the business
- locate relevant codes or compliance program requirements
- communicate the audit process, requirements and findings to relevant personnel clearly and accurately
- apply planning skills to ensure the smooth conduct of the audit process
- use negotiation skills to organise and facilitate audit processes, including following meeting procedures and resolving issues
- identify and follow an audit trail
- conduct research to identify, collect and analyse evidence
- gather, analyse and record data accurately
- plan and organise audit activities
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- interpret evidence and make a judgement on the level of compliance
- prepare well-balanced, factual and objective written audit reports

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- audit management processes to develop and implement an audit against an agreed plan, including an understanding of the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan
- legislation, regulations, orders, codes and standards applicable to the areas being audited
- communication methods relevant to different groups and audience

- evidence appropriate for use in audit processes, including an understanding of the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- evidence collection methods including record sampling and sample analysis, including an understanding of the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range/extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
- legislation that impacts on acceptable communication methods and conduct including anti-discrimination, anti-harassment and privacy legislation
- methods used to identify Critical Control Points and establish critical limits, appropriate to the nature of the hazard, the requirements of the audit and the industry sector
- personal attributes required of an auditor
- the internal auditing policies and procedures of the workplace
- the structure, authority levels and lines of reporting within the organisation
- the underlying principles of risk-based approaches to controlling food safety hazards including HACCP as described in the Codex Alimentarius Guidelines
- vocabulary and terms relating to food safety, including terms and jargon used to describe technical processes, industry standards and common biological and chemical terms

Assessment Conditions

Competency must be demonstrated while conducting an internal audit of an operating meat processing enterprise.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX405 Conduct statistical analysis of process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to collect and analyse statistical information relating to meat processing.

This unit is applicable to managers and Quality Assurance (QA) personnel who are required to analyse monitoring and verification data of a meat production process.

All work is carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable solutions.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect and analyse statistical data drawn from the workplace	1.1 Select samples from a process line 1.2 Conduct statistical calculations on samples
2. Use statistical analysis to verify the process	2.1 Prepare relevant graphs and charts 2.2 Use a range of information and communications technology and software, including statistics management and analysis programs 2.3 Identify and analyse trends and cyclic patterns of control graphs 2.4 Prepare and present reports on the outcomes of the statistical analysis of monitoring data

Foundation Skills

Assessment Requirements for AMPX405 Conduct statistical analysis of process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must collect and analyse statistical information relating to meat processing. The candidate must complete analysis and report on at least three data runs to achieve competency.

The candidate must:

- apply statistical information to the analysis and verification of a process
- calculate simple statistical measures
- cooperate with monitors to ensure accuracy and timeliness of data
- use a range of information and communications technology and software, including statistics management and analysis programs
- conduct trend analysis of meat processing data
- explain the verification process using statistical data
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- perform basic statistical calculations on data from samples drawn from the workplace
- prepare control graphs and use charts as relevant
- prepare reports on the outcomes of the statistical analysis of monitoring data
- use and explain simple statistical measures, including mean, range, frequency, mode and median
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- statistical measures, including mean, range, frequency, mode and median
- available software systems to assist with analysis and report preparation

Assessment Conditions

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

All evidence must be collected in the context of current Australian meat industry standards and regulations.

Assessors must satisfy current standards for RTOs.

AMPX406 Manage or oversee an external audit of the establishment's quality system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare for and respond to an audit of a quality system conducted by an external party.

This unit is applicable to managers and Quality Assurance (QA) personnel who facilitate external audits by regulators, accrediting agencies, customers or overseas reviewers.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

The unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify audit dates	1.1 Document and schedule known or expected dates of external audits in accordance with workplace practices 1.2 Confirm dates and notify all relevant company personnel
2. Identify audit scope	2.1 Describe and convey audit scope to people affected by external audit processes
3. Identify audit team size and length/duration of the external audit	3.1 Identify audit team size and duration and make necessary notifications throughout the workplace
4. Review internal audit reports to check areas expected to be covered in the external audit	4.1 Conduct internal audits, where necessary, and develop reports in accordance with workplace policy and procedures 4.2 Review previous internal audit reports and production reports to identify past problem areas 4.3 Monitor and review previous problem areas 4.4 Review previous customer complaints that reflect on food production and safety
5. Make arrangements for the external audit process	5.1 Make arrangements for the external audit and confirm them with the auditors 5.2 Make arrangements for greeting the external auditors and the provision of a workplace guide in accordance with workplace requirements 5.3 Notify relevant internal departments of the arrangements 5.4 Determine roles and responsibilities of enterprise personnel in the audit process
6. Accompany the external auditors	6.1 Facilitate entry and exit interviews 6.2 Escort external auditors for the duration of the audit in accordance with established arrangements and workplace procedures
7. Report on the external audit	7.1 Report external audit finding in accordance with workplace requirements 7.2 Communicate external audit findings to relevant individuals 7.3 Follow up on external audit findings and take corrective action, where appropriate

Assessment Requirements for AMPX406 Manage or oversee an external audit of the establishment's quality system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must manage or oversee at least one complete external audit of the establishment's quality system.

The candidate must:

- apply relevant communication and problem-solving skills
- work effectively as an individual and as part of a team
- demonstrate clear communication and interpersonal skills related to preparing for and participating in an external audit
- schedule, record the schedule and manage the planning for external audits
- ensure the quality systems covering the area to be audited are in place and effective as shown by internal audit reports
- identify and apply relevant workplace health and safety and regulatory requirements
- use available technology to prepare for and follow up external audits
- identify reports of internal and external audits and take corrective action
- maintain currency of knowledge through independent research and professional development

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- regulatory and other requirements for external audits
- technical and regulatory aspects covered by each external audit

Assessment Conditions

Competency must be demonstrated while managing or overseeing one complete external audit of the company's quality system.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

Assessors must satisfy current standards for RTOs.

AMPX407 Overseas export requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to understand and identify export requirements for an Australian meat processing plant.

This unit is applicable to those employed in meat processing plants as government inspection staff, plant manager or Quality Assurance (QA) personnel.

All work should be carried out to comply with workplace, customer and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify major export legislation	1.1 Identify relevant legislation and describe its application to establishment 1.2 Identify export control orders and explain their application in accordance with customer specifications and work instructions 1.3 Access legislation on Electronic Legislation, Manuals and Essential References (ELMER)
2. Identify and describe importing country requirements	2.1 Access and apply information on importing country requirements 2.2 Perform specific importing country and export inspection procedures in accordance with regulatory requirements and workplace requirements
3. Identify the role of the federal Department of Agriculture	3.1 Describe the role of the Department of Agriculture 3.2 Identify the function of Department of Agriculture meat inspection staff 3.3 Identify the structure of the Department of Agriculture and the relevant chain of command
4. Identify Quality Assurance arrangements	4.1 Identify specific requirements for Department of Agriculture Approved Arrangement 4.2 Describe Department of Agriculture review, monitoring and auditing arrangements for Approved Arrangements

Assessment Requirements for AMPX407 Overseas export requirements

Modification History

Not applicable.

Performance Evidence

The candidate must oversee the export requirements for at least one enterprise section or department for a period of at least three months.

The candidate must:

- access and research legislation on the ELMER system and other appropriate electronic information systems
- gather, analyse and present complex information to colleagues
- identify and apply relevant workplace health and safety requirements
- identify orders relevant to specific operational situation
- use communication and information technology to access required information
- use relevant communication skills
- work with Department of Agriculture personnel

Knowledge Evidence

The candidate must demonstrate a broad factual, technical, procedural and theoretical knowledge of:

- role and jurisdiction of Department of Agriculture
- role and function of Department of Agriculture meat inspection staff
- ante-mortem and post-mortem inspection procedures for importing countries
- procedures for condemnation in export works
- main regulatory and legislative requirements for exporting product and their application to meat processing
- QA systems operating, monitored and audited by Department of Agriculture in export works

Assessment Conditions

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

AMPX408 Coordinate contracts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to coordinate the production, packaging and transportation of products to contracted markets in accordance with enterprise, customer and legal requirements. This unit is relevant to contracts in local, national and international markets.

The breadth of this unit makes it particularly useful for small and micro businesses in the retail, meat processing, smallgoods manufacturing and food service areas. In a micro or small business one person would have responsibility for overseeing contract management.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX408 Coordinate contracts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must coordinate the production, packaging and transportation of products to contracted markets in accordance with enterprise, customer and legal requirements. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply food safety and QA requirements where relevant
- apply problem-solving skills to resolve issues that impact on capacity to meet contractual obligations
- apply relevant mathematical skills
- calculate costs and prices for local, national and international markets, including the impacts of inter-market taxes, tariffs, duties, charges or exchange rates
- complete documentation accurately and on time
- use effective communication strategies, including cross cultural communication, to negotiate or confirm transactions in the marketplace including new, distant and diverse markets
- determine implications for the enterprise of information relevant to the sale of meat and meat products in a local, national and international context (including market regulations, agents' terms and conditions)
- identify and apply relevant workplace health and safety regulatory and workplace requirements
- identify and follow freight, insurance and banking procedures
- liaise, as required, with agents, representatives and brokers
- prepare schedules and coordinate supply, production, packaging and transhipment of product to meet contract specifications and deadlines
- review enterprise operations and processes to meet regulatory requirements
- use appropriate communication and information technology to complete communication, scheduling, monitoring and reporting tasks

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- legislation, regulations and codes of practice applicable to the production, sale, packaging and transportation of meat products in local, national or international markets, including legislative requirements and regulations for meat and other ingredients
- standard documentation required for local, national or international trade
- product specifications and enterprise contractual obligations
- negotiation and communication strategies appropriate for use with government agencies and business clients

Assessment Conditions

Competency must be demonstrated in the workplace while coordinating at least one complete contractual process, or coordinating ongoing contracts over a minimum period of three months. A workplace referee report could be used to confirm this.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX409 Prepare and evaluate resource proposals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare and evaluate the impact of resource proposals on enterprise operations and profitability. Resource proposals are prepared to determine potential costs and returns on investment in resources including personnel, new equipment, systems or procedures. The information presented in resource proposals assists in financial decision making and planning.

This unit is suitable for first line managers, supervisors and team leaders in all sectors of the meat industry.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX409 Prepare and evaluate resource proposals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must prepare and present at least one resource proposal to meat processing enterprise management personnel.

The candidate must:

- assess potential impacts of the proposal on enterprise operations (including production and personnel)
- determine necessity and scope of the proposal in relation to enterprise directions and goals
- record, gather and consolidate financial information
- apply relevant mathematical skills
- assess risks associated with the proposal and recommend risk management strategies
- calculate net present value, internal rate of return and payback periods
- prepare departmental/section financial information for inclusion in enterprise/department budget
- interpret and prepare cash flow statements, profit and loss statements and asset and liabilities statements
- recommend strategies for obtaining resources including finance (including internal, external, re-allocation of resources, new resources or funds)
- prepare financial proposals which include costs, cash flow requirements, payback period and benefits
- consult and collaborate with colleagues and those potentially affected to refine the proposal
- promote the advantages and disadvantages of the proposal to relevant personnel and stakeholders
- develop performance indicators to measure outcomes of resource allocation/proposal
- identify and apply relevant workplace health and safety regulatory and workplace requirements
- research options, models and benchmarks relating to the proposal
- use communication skills to present and argue a case and prepare reports in language, style and format appropriate to the audience

- use technology to analyse, prepare and present a range of data

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- variable and fixed costs relating to the operations of the department, cost centre or enterprise
- sources of information within the enterprise, including specialist personnel, information systems and documentation
- enterprise structure, scope of operations and relevant policies and procedures

Assessment Conditions

Resource proposals prepared for assessment must relate to an operating meat processing enterprise.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX410 Facilitate achievement of enterprise environmental policies and goals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to facilitate the achievement of enterprise environmental goals. It includes developing a workforce understanding of and commitment to environmental responsibility and sustainability and techniques for monitoring and minimising environmental impact and waste.

Management of environmental impact is a high priority for the meat processing industry. All industry members are responsible for environmental management and sustainability.

This unit is applicable to for first line managers, including supervisors and team leaders in all meat industry sectors.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX410 Facilitate achievement of enterprise environmental policies and goals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must facilitate the achievement of enterprise environmental policies and goals for at least one section or department of the enterprise for a period of at least three months.

The candidate must:

- adjust and improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- consult with stakeholders, individuals and teams to develop and review environmental procedures
- maintain currency of knowledge through independent research or professional development
- develop, in conjunction with managers, environmental targets for the section or department
- apply consultation, negotiation and mentoring skills in interactions with employees, managers, peers and technical experts
- determine and take corrective actions to eliminate or minimise environmental risks
- ensure that procedures are followed by all employees in the area of responsibility
- explain environmental management requirements, procedures and responsibilities clearly to individuals and teams, in appropriate styles, formats and language
- identify and apply relevant communication and mathematical skills
- identify environmental hazards and conduct risk analyses
- interpret monitoring information and take corrective action
- apply relevant workplace health and safety regulatory and workplace requirements
- investigate, analyse and report environmental incidents, in accordance with enterprise procedures
- measure and monitor pollutants, emission and waste levels for the area of responsibility
- prepare reports containing technical and mathematical information for employees, managers and peers
- recognise limits of own expertise seeking additional expertise when necessary

- utilise informal and formal consultative strategies to build individual and team commitment to environmental goals and procedures

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise goals, targets and performance measures
- enterprise environmental management policies and legal obligations and responsibilities
- legal and regulatory requirements as applicable to enterprise

Assessment Conditions

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX411 Foster a learning culture in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to integrate work and learning in a meat enterprise. This unit does not provide workplace trainer skills, but does describe the skills and knowledge required for people in leadership positions to monitor and facilitate workplace training and learning.

In the meat industry, workplace learning adds to performance and the competitive advantage of the business. The commitment of personnel in leadership roles to training and learning is essential.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a learning culture in the enterprise	1.1 Demonstrate a commitment to, and value of learning through own personal performance 1.2 Include learning and training strategies as an integral part of work and performance plans 1.3 Reflect diversity of needs and opportunities in learning and training strategies and plans 1.4 Prepare and recommend resource proposals to support workplace learning 1.5 Ensure consultation and negotiation with training and development professionals results in the planning and provision of learning which enhances individual, team and organisational performance
2. Create learning opportunities to develop individual, team and organisational performance	2.1 Develop and support workplace environments and contexts which facilitate learning 2.2 Identify and promote external and internal opportunities for learning 2.3 Collaboratively develop learning plans to meet individual, team and organisational goals 2.4 Facilitate individual and team access to, and participation in, learning opportunities 2.5 Plan and provide individual and team learning and training in consultation with learners and training specialists, where appropriate
3. Facilitate and promote learning	3.1 Use workplace activities as opportunities for learning 3.2 Encourage personnel to take advantage of learning opportunities 3.3 Ensure coaching and mentoring contributes effectively to development of workplace knowledge, skills and attitudes 3.4 Share benefits of learning with others in team and organisation 3.5 Provide opportunities for learners to continue utilising and extending new skills and knowledge 3.6 Recognise workplace achievement through timely and appropriate recognition, feedback and rewards
4. Monitor and improve learning effectiveness	4.1 Monitor individual and team performance to determine the type and extent of required additional work-based support

Element	Performance criteria
	4.2 Use feedback from individuals and teams to make improvements to future learning arrangements 4.3 Monitor effectiveness and efficiency of learning and training programs and prepare recommendations for improvement 4.4 Negotiate adjustments to learning plans and activities with training and development personnel to achieve improvements to learning effectiveness 4.5 Document and maintain learning plans, records and reports of competency in accordance with organisation systems and procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX411 Foster a learning culture in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must foster a learning culture in a meat enterprise. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- communicate openly and sensitively when negotiating learning opportunities and plans
- define the workplace learning opportunities within areas of responsibility, taking into consideration the requirements and limitations of the enterprise
- identify the areas that require the training services provided by training professionals
- develop and review learning plans, linked with individual and team goals and enterprise needs, in consultation with relevant personnel
- develop simple targets, goals and performance measures for evaluating outcomes of learning and training
- estimate resources required to support learning and training within the department or enterprise (including personnel, time, cost)
- facilitate and monitor the implementation of training and assessment schedules (including negotiating time release)
- maintain currency of knowledge through independent research or professional development
- apply relevant communication and mathematical skills
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify and support internal coaches and mentors to provide support to individuals and teams
- identify learning opportunities and strategies which address the cultural, working and learning experiences and styles of individuals and team
- identify learning opportunities to support individual and team learning plans
- map learning and training strategies against individual, team and enterprise goals or priorities

- negotiate training strategies and schedules with enterprise trainers and assessors and other training and development professionals, to meet enterprise needs
- promote and report the impact of training on the operation of the department or enterprise
- promote the sharing of skills and knowledge as a strategy for achieving personal and enterprise goals
- recognise the achievements of individuals promptly and appropriately, within enterprise requirements
- resource and encourage enterprise trainers and assessors (including ensure necessary equipment and materials are available) to provide and follow up training and assessment
- review learning plans, opportunities, strategies and outcomes with individuals or team

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise and employee obligations under industrial and training agreements relating to the provision of (workplace) training
- requirements and ethical considerations for the supervision of employees operating under formal training agreements and contracts (including trainees and apprentices)
- impact and outcomes of workplace learning on the competitive advantage of the enterprise
- range of internal and external learning opportunities available to enterprise personnel

Assessment Conditions

The candidate must demonstrate competency through sustained performance over time, at an appropriate level of responsibility and authority, and under typical enterprise operating and production conditions.

Assessment must be conducted under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX412 Build productive and effective workplace relationships

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop, maintain and model positive workplace relationships.

Effective workplace relationships contribute to a productive working environment and minimise conflict and disruption. This unit is applicable to first line managers, including supervisors and team leaders, working in a meat industry context.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Gather and present information and ideas relevant to the job	1.1 Utilise information from appropriate sources to fulfil workplace responsibilities and to develop and refine alternative processes and solutions 1.2 Apply communication methods to take into account the purpose and the audience, including social and cultural diversity 1.3 Use communication strategies to keep relevant personnel informed about enterprise or department directions and activities 1.4 Provide clear and unambiguous guidance and direction to others, consistent with workplace responsibilities 1.5 Seek and value input from internal and external sources when developing and refining new ideas and approaches
2. Develop trust and confidence	2.1 Treat people with integrity, respect and empathy 2.2 Use enterprise social, ethical and business standards to develop and maintain positive relationships 2.3 Gain and maintain trust and confidence of colleagues, customers and suppliers through competent performance 2.4 Adjust interpersonal styles and methods to the social and cultural environment
3. Build and maintain networks and relationships	3.1 Use networking to identify and build relationships 3.2 Provide identifiable benefits for the team and organisation through networks and other work relationships with stakeholders
4. Manage difficulties to achieve positive outcomes	4.1 Identify and analyse problems and take action to rectify them with minimal disruption to performance 4.2 Ensure colleagues receive guidance and support to resolve their work difficulties 4.3 Use pro-active strategies to manage individual performance in accordance with organisational processes 4.4 Manage conflict constructively in accordance with organisational processes 4.5 Negotiate difficult situations to achieve results which are acceptable to participants and also meet organisational and legislative requirements

Assessment Requirements for AMPX412 Build productive and effective workplace relationships

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must develop, maintain and model positive workplace relationships. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- accept and provide constructive feedback
- contribute to and support meetings (including team, department and maintenance meetings)
- cooperate with other supervisors and managers
- locate and evaluate information from a range of sources, using a range of available resources including the internet and journals
- maintain currency of knowledge through independent research or professional development
- demonstrate problem-solving and negotiation skills in a range of circumstances
- develop and implement consultative and participative approaches within own work practices
- encourage and respond to individual and team contributions
- gather and analyse alternative viewpoints, ideas and information to develop processes and strategies
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- introduce strategies for improving workplace relationships (including coaching and mentoring)
- mentor and counsel individuals and teams, within enterprise procedures
- model positive and effective communication and interaction strategies while performing responsibilities
- monitor and diffuse potential conflicts and disputes, applying a range of strategies including the enterprise's established procedures
- resolve differences between employees, within enterprise processes

- observe and respect enterprise confidentiality requirements and individual's privacy requests
- provide direction, instruction and guidance in ways that encourage cooperation
- recognise and discuss alternative suggestions, viewpoints and proposals
- review own actions and attitudes and describe their impact on colleagues
- seek feedback from colleagues and networks on own ideas and performance
- use available information and communications technology to facilitate two-way communication and understanding

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the impact of enterprise social, ethical and business standards on workplace relationships
- factors which influence workplace relationships, including cultural and social characteristics, past experiences and industrial approaches
- networks and other sources of information which could assist in developing workplace relationships and building own knowledge and expertise
- strategies for building networks

Assessment Conditions

The candidate must demonstrate competency through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Assessment must be conducted under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX413 Manage and maintain a food safety plan

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to manage a food safety plan.

Food safety is critical to public health and safety and the successful operation of meat industry businesses. This unit is applicable to managers in meat retail establishments, and supervisors and team leaders in smallgoods, meat processing and food services establishments, who maintain a food safety plan or system in a designated work area.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage the implementation of the food safety plan	1.1 Explain food safety principles, procedures and requirements, including regulatory requirements, to the team 1.2 Develop team commitment to, and responsibility for, food safety 1.3 Develop and implement procedures to support the food safety plan 1.4 Provide training and mentoring to the team to assist implementation
2. Monitor the food safety plan and take corrective action	2.1 Monitor team implementation of the food safety plan 2.2 Complete records and reports accurately and on schedule 2.3 Take prompt action to correct non-conformance in accordance with enterprise and regulatory requirements 2.4 Identify and analyse causes of non-conformance 2.5 Implement control measures to prevent future non-conformance 2.6 Report non-conformance in accordance with enterprise requirements
3. Maintain the food safety plan	3.1 Seek feedback from all personnel to identify potential hazards, corrective actions and controls 3.2 Identify processes or conditions which could result in breaches of food safety procedures and take preventive or corrective action 3.3 Update corrective action and control procedures to improve food safety 3.4 Complete documentation in accordance with enterprise and regulatory requirements

Assessment Requirements for AMPX413 Manage and maintain a food safety plan

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must manage and maintain a food safety plan. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- collect, monitor and interpret data to identify trends and non-conformance
- communicate with a range of stakeholders, including customers, to convey information about food safety requirements and programs
- determine and take corrective action
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify and review operations and practices for food safety improvement
- lead personnel and team in investigation of food safety incidents
- maintain currency of knowledge through independent research or professional development
- monitor records and documentation for accuracy and conformance
- respond to food safety incidents and implement food recall procedures as required
- review communication systems to minimise potential of misreporting and misunderstanding of food safety requirements, procedures and plans
- use a range of communication and team building strategies to gain team commitment to food safety
- use detailed product knowledge, including product characteristics and the requirements for safe preparation, processing, storage, handling, display, to monitor food safety
- use required problem-solving strategies when investigating non-conformance and reviewing the food safety system

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise Standard Operating Procedures (SOPs) and their role in the food safety system

- enterprise monitoring procedures (including sampling, testing and maintaining required records and documents) and their purposes
- current technical and process knowledge for controlling hazards and improving the food safety system
- enterprise recall and traceability procedures
- food safety requirements and their importance to team members
- food safety risk assessment procedures
- Hazard Analysis Critical Control Point (HACCP) principles and the process for developing a food safety plan
- regulatory requirements that apply to the enterprise's food safety plan

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs

AMPX414 Assess and evaluate meat industry requirements and processes

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to assess and evaluate the role of the Australian meat industry as a part of the food processing sector. It also describes the requirements for working in meat processing.

This unit applies to food technologists, industry researchers, and to middle management personnel who are new to the industry. It includes gaining an understanding of the economic and political structure of the industry, production stages and methods, and key factors affecting meat safety, quality and market access.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

Work in this unit must be carried out in accordance with Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish livestock production and transportation requirements	1.1 Explain production techniques impacting meat quality for the range of species involved 1.2 Explain the role and purpose of traceability requirements 1.3 Explain purchasing process and selling alternatives for livestock 1.4 Explain relationship between transportation arrangements and meat quality 1.5 Identify potential hazards to product quality, animal welfare and food safety from transporting livestock
2. Identify the sequence of operations for meat processing in an abattoir	2.1 Identify critical elements of the slaughtering process 2.2 Identify critical elements of the boning process 2.3 Explain the role and purpose of rendering 2.4 Explain offal processing requirements 2.5 Identify differences between export and domestic requirements
3. Explain factors affecting food safety and meat quality during processing	3.1 Describe key meat safety issues 3.2 Identify key legislation and regulations affecting meat processing 3.3 Explain impacts of seasonal and geographical factors on meat quality 3.4 Describe the nature and purpose of the Meat Standards Australia (MSA) program 3.5 Explain impacts of further processing on meat quality 3.6 Identify factors affecting shelf life and meat quality 3.7 Explain the nature and purpose of meat testing programs
4. Identify processes and process controls for a range of meat smallgoods	4.1 Identify differences between product sources 4.2 Identify key smallgoods products and production processes 4.3 Explain food safety requirements impacting smallgoods production
5 Describe the structure and nature of meat retailing in Australia	5.1 Identify differences between supermarket, independent and wholesale butchers 5.2 Explain regulatory requirements directly impacting meat retailing 5.3 Identify key meat product lines and the role of value-adding

Element	Performance criteria
	5.4 Explain the impact of customer requirements and expectations 5.5 Explain food safety requirements impacting retail operations
6. Identify key issues and bodies that impact the Australian meat industry	6.1 Explain impacts of climatic factors on the meat industry 6.2 Explain key issues impacting meat industry employment 6.3 Review environmental impacts of a meat processing site 6.4 Explain impacts of changing customer expectations 6.5 Describe the role of key industry bodies

Assessment Requirements for AMPX414 Assess and evaluate meat industry requirements and processes

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must assess and evaluate meat industry requirements and processes. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- describe the livestock production and marketing, and retailing systems for the meat industry
- document the sequence of operations for livestock slaughter and meat processing
- define processes for a range of meat smallgoods
- describe production factors influencing meat quality and safety
- comply with industry requirements in relation to hygiene, workplace health and safety and other work practices.
- analyse and interpret work instructions, Standard Operating Procedures (SOPs), safety and hygiene procedures, and other workplace documentation
- identify livestock
- locate, and interpret industry information
- distinguish between meat products and production processes
- identify personal hygiene and operational sanitation procedures
- apply sustainable work practices

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- factors which impact on meat safety and quality through the supply chain
- the main animal welfare issues associated with producing and processing animals for human consumption
- main markets for meat
- common causes and impact of contamination
- the relationship between food safety and market access

- the nature and structure of the Australian meat processing industry
- principles of Quality Assurance (QA) and traceability from paddock to retailer
- slaughtering and boning processes
- sources and nature of regulatory requirements that affect the meat processing industry
- nature and purpose of the AUS-MEAT and MSA programs
- customer requirements
- value adding of meat products

Assessment Conditions

Assessment must occur in a real or simulated workplace where the candidate has access to:

- production process and related equipment, manufacturers' advice and operating procedures
- equipment and facilities for carrying out slaughtering of livestock and processing of primary cuts of meat.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX415 Specify beef product using AUS-MEAT language

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to use AUS-MEAT language in defining beef specifications. Satisfactory completion of assessment conducted by AUS-MEAT is required before an individual can gain AUS-MEAT Accreditation for Beef Boning Room Standards Officers. Individuals who have satisfactorily completed AUS-MEAT Accreditation for Beef Boning Room Standards Officers will have satisfied the requirements for this unit of competency.

This unit prepares workers to work with beef cuts, specifications and cutting lines.

Individuals will be directly involved in demonstration and explanation of:

- achieving maximum yields and returns
- basic anatomy
- cutting lines
- detecting and recording defects
- product description
- specifications and verification

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX415 Specify beef product using AUS-MEAT language

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must use AUS-MEAT language in defining beef specifications. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- identify and apply standard beef primal cut names
- apply relevant communication and problem-solving skills
- identify and monitor Critical Control Points (CCPs) in accordance with workplace requirements
- identify and apply relevant workplace and regulatory requirements
- assess product compliance
- measure and check product compliance against written specifications
- identify and explain AUS-MEAT language specifications on beef product label
- identify non-conforming product in accordance with relevant specifications

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- anatomical features of a beef carcass
- beef primal cut names
- correct cutting lines products and the correct anatomical terms for describing them
- sections of the workplace QA system related to ensuring beef product compliance with AUS-MEAT product description requirements
- corrective action procedures for non-conforming products
- product specification points
- AUS-MEAT language specifications

Assessment Conditions

Competency must be demonstrated over time and under normal enterprise or production conditions.

Assessment must consist of either:

- successful completion of standard AUS-MEAT assessment

or a minimum of:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time

Assessment must occur in the workplace under normal enterprise or production conditions.

Assessors must satisfy current standards for RTOs.

People who have satisfactorily completed AUS-MEAT Accreditation for Pork Boning Room Standards Officers will have satisfied the requirements for this unit of competency.

This unit prepares the workers to work with pigmeat cuts, specifications and cutting lines.

Individuals will be directly involved in demonstration and explanation of:

- achieving maximum yields and returns
- basic anatomy
- cutting lines
- detecting and recording defects
- product description
- specifications and verification

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify anatomical features of a pork carcass	1.1 Describe directions on a carcass using anatomical direction format 1.2 Locate and identify bones relevant to meat specifications in a pork skeleton 1.3 Identify major muscles relevant to meat specifications 1.4 Identify major glands and cartilage relevant to meat specifications
2. Identify and name meat products using the standard product description	2.1 Identify nature and format of product specifications 2.2 Use, and correctly spell, standardised cut descriptions for naming meat products 2.3 Identify the major muscles that make up each meat cut 2.4 Identify correct cutting lines for each product and use the correct anatomical terms to describe them 2.5 Identify necessary alterations for any given meat product to comply with the enterprise product specifications
3. Check pork products comply with written specifications	3.1 Check pork products comply with written specifications and describe principles of Quality Assurance (QA) 3.2 Describe sections of the workplace QA system related to ensuring pork products comply with AUS-MEAT product description 3.3 Define and describe non-conforming product in relation to workplace requirements 3.4 Identify and monitor Critical Control Points (CCPs) in accordance with workplace requirements
4. Assess product compliance	4.1 Assess product compliance with written specifications in accordance with workplace requirements and AUS-MEAT product descriptions 4.2 Identify and explain product description given in written specifications 4.3 Take corrective action in the event of non-conformance with

Element	Performance criteria
	pork product specifications
5. Measure and check product compliance against written specifications	5.1 Check cutting lines and muscle content in accordance with written specifications 5.2 Identify non-conforming product that can be altered to comply with specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

MTMPSR410A Specify pork product using AUS-MEAT language	E
---	---

Links

Assessment Requirements for AMPX417 Specify pork product using AUS-MEAT language

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must use AUS-MEAT language to describe pork product specifications. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- identify and apply standard pork primal cut names
- apply relevant communication and problem-solving skills
- Identify and monitor Critical Control Points (CCPs) in accordance with workplace requirements
- identify and apply relevant workplace and regulatory requirements
- assess product compliance
- measure and check product compliance against written specifications
- identify and explain AUS-MEAT language specifications on pork product label
- identify non-conforming product in accordance with relevant specifications

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- anatomical features of a pig carcass
- pork primal cut names
- correct cutting lines for each product and the correct anatomical terms for describing them
- sections of the workplace QA system related to ensuring pork product compliance to AUS-MEAT product description requirements
- corrective action procedures for non-conforming products
- product specification points
- AUS-MEAT language specifications

Assessment Conditions

Competency must be demonstrated over time and under normal enterprise or production conditions.

Assessment must consist of either:

- successful completion of standard AUS-MEAT assessment

or a minimum of:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time

Assessment must occur in the workplace under normal enterprise or production conditions.

Assessors must satisfy current standards for RTOs.

AMPX418 Lead communication in the workplace

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to lead and promote effective communication in the workplace. It includes the skills and knowledge required for effective written and verbal communication.

This unit is applicable to supervisors, technical experts or managers in the meat retail, smallgoods, meat processing and food service sectors producing meat and meat products for domestic and export markets.

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Engage in complex verbal communication	1.1 Facilitate and monitor group processes to support group objectives 1.2 Provide one-to-one interaction with team members to provide effective support 1.3 Explain work instructions to others 1.4 Negotiate work requirements and expectations with others 1.5 Use negotiation skills where appropriate 1.6 Use conflict resolution techniques where appropriate 1.7 Use problem-solving and decision making techniques where appropriate
2. Read complex text	2.1 Read, analyse and use written information to assist in overseeing workplace performance 2.2 Use technical information from written and electronic sources to examine and introduce new procedures and approaches for improving workplace performance
3. Prepare written information for a range of audiences and applications	3.1 Consolidate and summarise routine and specialist reports to convey key points 3.2 Write procedures and instructions related to existing and new functions and tasks for others to follow and implement

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX418 Lead communication in the workplace

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must lead communication in the workplace. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must demonstrate competency while exercising suitable levels of authority in the workplace.

The candidate must:

- analyse written information from a variety of sources to assist in decision-making processes
- locate and extract relevant information from technical documentation
- convey information, which may be complex or technical or involve a change, to people who may not have a technical background
- explain and demonstrate communication styles relevant to conveying information to employees from a range of social, cultural and ethnic backgrounds
- convey workplace information, including work instructions, in a way that facilitates learning by others
- use relevant techniques to check that information has been understood
- use facilitation skills to ensure participation from all group members
- demonstrate conflict-resolution techniques
- demonstrate participative problem-solving techniques to resolve workplace problems
- resolve or progress issues in complex or hostile environments
- select and organise relevant routine information to:
 - clarify or explain issues or problems
 - offer suggestions for improvement
 - provide opinions
- identify and observe workplace health and safety requirements
- identify and observe regulatory and workplace requirements

- prepare reports in a range of formats and language styles in accordance with audience needs
- utilise available information and communications technology to facilitate communication

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the purpose of feedback and forms of feedback suitable for the workplace
- the purpose of reports and other documentation used in the work area
- roles and expectations of customers, suppliers and participants in the work process

Assessment Conditions

Assessment must include demonstration of competency in the workplace under normal working conditions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX419 Participate in product recall

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to initiate and participate in a product recall.

This unit is applicable to plant managers, Quality Assurance (QA) personnel, managers and marketing personnel who have a role in implementing a product recall.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Participate in decision about disposition	1.1 Participate in making the decision about whether to recall a product, in accordance with according to regulatory, workplace and product specifications
2. Simulate a product recall	2.1 Identify criteria for a product recall in accordance with product specifications and workplace requirements 2.2 Identify and trace product to be recalled according to product specifications and workplace requirements 2.3 Identify individuals or groups involved in a product recall and describe their roles 2.4 Identify and describe steps in recall 2.5 Review product development in consultation with relevant personnel 2.6 Review manufacturing methods and quality control methods to prevent problems re-occurring

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX419 Participate in product recall

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must participate in a real or simulated product recall.

The candidate must:

- identify and implement the procedures for a product recall
- use communications technology including computers and telephones to facilitate product recall
- complete records of simulated product recall exercise and review to improve recall procedures
- identify and apply relevant workplace health and safety and regulatory requirements
- identify records of product identification and traceability and use them for trace forward
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- steps involved in implementing a product recall
- reasons and procedures for initiating a product recall

Assessment Conditions

Competency must be demonstrated utilising a documented product recall procedure and realistic data. Assessment can be based on participation in a comprehensive simulation.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX420 Participate in the ongoing development and implementation of a HACCP and Quality Assurance system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop and manage a Hazard and Critical Control Point (HACCP)-based Quality Assurance (QA) program.

This unit is applicable to QA personnel and supervisors who are responsible for developing or implementing a HACCP-based QA system in a meat establishment.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

The unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Involve management and staff in developing the quality system	1.1 Involve relevant staff members and managers in clarifying purpose and scope of program 1.2 Clearly define enterprise needs and expectations 1.3 Incorporate other systems, including AUS-MEAT, workplace health and safety and meat inspection in accordance with workplace needs
2. Establish the scope of the system	2.1 Define the scope of the HACCP-based quality system to encompass food safety, quality, regulatory compliance, animal welfare and preventative maintenance 2.2 Set up the system to prevent and control food safety hazards and other hazards, including product quality and workplace health and safety hazards 2.3 Seek consensus from relevant workplace areas on coverage and scope of system
3. Conduct hazard analysis and assessment	3.1 Assess every step in the production process for potential food safety hazards 3.2 Establish Critical Control Points (CCPs) to identify methods for preventing and controlling significant hazards 3.3 Establish critical limits for each CCP 3.4 Assign measurable or recognisable standards for each CCP to define the critical limits 3.5 Technically and scientifically validate critical limits
4. Ensure all documents, work procedures and processes required for the system are developed, available and in use	4.1 Describe all products and processes covered by the HACCP-based quality system in a standardised format defining product characteristics relevant to food safety 4.2 Review work instructions and Standard Operating Procedures (SOPs) for accuracy, relevancy and sufficiency to prevent potential hazards 4.3 Implement documented procedures for monitoring CCPs 4.4 Implement documented procedures designed to ensure any CCPs which are out of control are brought back under control, and any affected products are suitably handled 4.5 Implement documented procedures to ensure the whole HACCP system is regularly audited and verified as working effectively 4.6 Ensure availability, currency and current usage of all documents

Element	Performance criteria
	and records required for system
5. Audit, verify and validate the system	5.1 Routinely revise, verify and validate HACCP plan through reassessing hazards, CCPs, critical limits, testing methods, and all related HACCP system procedures, to ensure their ongoing relevancy to plant operations 5.2 Take corrective action and record follow up on audit findings 5.3 Review HACCP system to account for any process or product changes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX420 Participate in the ongoing development and implementation of a HACCP and Quality Assurance system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must participate in the ongoing development and implementation of an HACCP and QA system. The candidate must demonstrate competency in the workplace while using an existing approved HACCP plan.

The candidate must:

- conduct monitoring of a CCP
- validate CCPs and critical limits
- record and analyse monitoring and verification data
- use relevant communication skills
- use communications technology including computers, as relevant to the task
- develop and implement changes in a HACCP-based QA system
- identify and apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- objectives of a HACCP-based QA system
- the process for validating critical limits and CCPs
- the role of pre-requisite programs and Good Manufacturing Processes (GMPs) in a HACCP-based program
- the process of auditing and verifying a HACCP-based QA system
- the steps involved in developing a HACCP-based QA system
- the steps involved in systematically introducing a HACCP-based QA system
- the documentation required to support a HACCP-based QA system

Assessment Conditions

Assessment must involve working with actual realistic data and in the context of a HACCP plan that meets regulatory requirements.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX421 Establish sampling program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to establish a sampling program in a meat processing plant.

This unit is applicable to Quality Assurance (QA) personnel and regulatory officers required to:

- establish a sampling plan for testing or monitoring meat and meat products
- prepare aseptic samples for testing
- report on testing results.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish and implement a valid sampling plan	1.1 Recognise and use sampling tables from AS 1199.1-2003 and AS 1199.0-2003 1.2 Determine scope and purpose of sampling 1.3 Determine acceptable quality levels in accordance with relevant Australian Standards 1.4 Determine sampling plans 1.5 Conduct sampling according to workplace requirements 1.6 Record and monitor test results Interpret and report test results to relevant personnel

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPX421 Establish sampling program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must establish a sampling program. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- establish a sampling plan in accordance with relevant Australian Standards
- demonstrate aseptic sampling techniques for micro-samples or swabs
- apply an appropriate level of mathematical skills to undertake accurate sampling
- utilise available workplace technology to establish, record and monitor sampling program data
- work effectively as an individual and as part of a team
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- record sampling information accurately to meet workplace and regulatory requirements
- report test results to relevant personnel promptly
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- routine tests performed on meat or meat products in the plant
- preparation and analysis of specimens or samples
- requirements of relevant Australian Standards

Assessment Conditions

Competency must be demonstrated using the current Australian Standard and implementing an approved workplace procedure. Assessment must involve a demonstration of skills at a meat processing plant or related work situation.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX422 Develop and implement work instructions and SOPs

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop and implement work instructions and Standard Operating Procedures (SOPs). It addresses the planning and consultation process for development, validation and implementation of SOPs.

Work instructions and SOPs will be presented in written form and may utilise photographs or illustrations to emphasise a particular characteristic or feature required in the performance of the task. Format is sequential and uses a Plain English approach.

Work Instructions and SOPs will usually be developed by Quality Assurance Officers, regulators or supervisors in the meat processing industry, and will frequently address regulatory or customer requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and scope the requirements of the work instructions and SOPs	1.1 Develop or select format in accordance with enterprise requirements 1.2 Accurately identify individual tasks and responsibilities to be covered 1.3 Determine the sequence of tasks to ensure efficiency is achieved 1.4 Ensure the sequencing of information is consistent with current or desired performance 1.5 Identify regulatory and customer requirements
2. Write work instruction or SOP	2.1 Ensure work instruction or SOP identifies key roles and responsibilities 2.2 Prepare document using formatting and language consistent with enterprise procedures 2.3 Include corrective actions and/or critical control points in the documentation 2.4 Include relevant safe work practices and hygiene requirements 2.5 Include photographs or illustrations where appropriate 2.6 Implement document version control procedures
3. Validate work instruction or SOP	3.1 Test written document for consistency with identified requirements and check that it supports workplace performance 3.2 Trial written document with personnel to confirm clarity and use of appropriate language 3.3 Ensure written document addresses workplace health and safety, hygiene and regulatory requirements where appropriate 3.4 Amend written document, as necessary, based on feedback from validation activities 3.5 Examine images and diagrams for accuracy and conformance to workplace and regulatory requirements

Element	Performance criteria
4. Implement work instruction or SOP	4.1 Obtain and record required approvals 4.2 Develop plan for implementation and communicate the details to appropriate personnel 4.3 Identify and address training requirements 4.4 Implement work instruction or SOP 4.5 Evaluate effectiveness of implementation 4.6 Ensure implementation records are stored appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AMPX422 Develop and implement work instructions and SOPs

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must develop or revise, and implement at least one work instruction or SOP.

The candidate must:

- perform tasks necessary to develop and validate work instructions or SOP
- implement the work instructions or SOPs
- assess implementation against the product specifications, workplace health and safety requirements, and ability to meet learning needs of relevant staff.
- collect, record and analyse data
- communicate with work teams and management
- communicate complex technical information to culturally diverse staff
- interpret product specifications, standards and production information
- use enterprise procedures to control document versions
- use computers to develop, control and store documentation
- develop plans
- prioritise tasks
- solve problems
- apply literacy skills to:
 - compile reports
 - use Plain English
 - interpret complex technical specifications or data
 - prepare detailed specifications, procedures and work instructions
 - read and interpret information
 - record and analyse data
 - report progress and technical information
- use numeracy skills to:
 - calculate time and other production data
 - estimate volume, mass and weight

- gather and record data
- prepare technical reports

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise Standard Operating Procedures (SOPs)
- product specifications, quality objectives and production parameters
- sources of information relating to equipment and personnel capability
- special language requirements of the workplace
- the nature and sequence of the tasks being documented, time required to perform the task and the relevant product specifications
- the processes for validating documents
- workplace health and safety requirements
- document version control
- workplace chain of communication
- implementation processes
- record keeping requirements.
- communication techniques appropriate for culturally diverse workforce
- Hazard Analysis Critical Control Point (HACCP) and food safety plan
- legal and regulatory requirements impacting the Australian meat processing industry
- methods available to regulate production flows and temperature control
- product and process specifications
- organisational communication systems
- production systems, including corrective actions and control points
- validation techniques

Assessment Conditions

Assessment must be conducted in the workplace.

A minimum of three different assessment tasks must be used.

As a minimum, assessment must consist of:

- project writing, rewriting, or modifying existing work instructions or SOPs (work or scenario based), completing a validation process and developing an implementation plan
- workplace referee's report.

Assessors must satisfy current standards for RTOs.

AMPX423 Supervise new recruits

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to support, mentor and develop new recruits. It includes an understanding of the roles and responsibilities of first line managers in defining and communicating expectations, providing appropriate learning environments, and providing mentoring and feedback to support the retention and development of new recruits.

This unit is applicable to individuals who are responsible for supervising, developing and managing new recruits. Typically this unit would be applicable to first line managers, including supervisors and may also apply to team leaders.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Communicate work requirements and expectations	1.1 Identify information requirements for new recruits 1.2 Communicate enterprise policies, performance requirements and responsibilities to new recruits 1.3 Make information available to new recruits in appropriate and accessible formats

Element	Performance criteria
	1.4 Adjust communication methods to account for the purpose and the audience, factoring in social and cultural diversity 1.5 Model appropriate work behaviours and procedures in personal conduct 1.6 Identify, facilitate and resolve (within level of responsibility) individual and team issues in relation to developing and managing new recruits
2. Provide an appropriate learning environment for new recruits	2.1 Establish learning and development plans for new recruits and monitor progress in conjunction with human resources personnel 2.2 Estimate and secure resources required to support informal and formal learning and training 2.3 Monitor implementation of workplace policies to ensure the workplace and learning environment conforms with industrial, customer and legal requirements 2.4 Arrange opportunities for new recruits to develop and apply skills and knowledge 2.5 Establish patterns of work organisation and job rotation to reinforce learning
3. Provide regular and timely feedback on performance	3.1 Monitor progress and performance of new recruits 3.2 Identify signs of poor or unacceptable practices 3.3 Investigate reasons for poor or unacceptable performance 3.4 Provide structured feedback to new recruits 3.5 Identify and agree strategies for addressing the performance gap with the new recruit 3.6 Confirm progress or take appropriate follow up action through ongoing monitoring

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX423 Supervise new recruits

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must supervise new recruits. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- establish effective relationships with new recruits in the nominated work area
- apply appropriate communication skills to manage conflict and facilitate resolution of issues, disagreements or disputes
- apply interpersonal skills including appropriate questioning, listening and feedback techniques
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- foster effective teamwork by recognising and utilising individual strengths
- ensure that appropriate behaviours and procedures are consistently observed by all personnel in the work area
- ensure that new recruits have adequate opportunity to learn, apply and practice new skills and knowledge
- ensure availability of relevant and appropriate information describing behaviour and performance expectations for new recruits; this includes information on policies and procedures, corporate values, and production targets or work outcomes
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify legal requirements and personal and company responsibilities in relation to managing new recruits
- identify and conform with enterprise and employee obligations under industrial arrangements and training agreements in relation to the provision of (workplace) training
- investigate causes of poor or unacceptable work performance in consultation with new recruits
- model behaviour consistent with company policies and procedures
- monitor individual performance, identify performance gaps and develop strategies in consultation with human resources personnel
- monitor progress towards achieving agreed conduct and/or performance improvements

- plan and undertake structured feedback or appraisal of new recruits
- provide regular feedback to new recruits to foster confidence and appropriate workplace behaviours

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- workplace feedback and performance management systems and responsibilities in the workplace, including personal level of authority in relation to performance counselling and disciplinary procedures
- applicable legislation and Fair Work Australia requirements
- conflict management techniques
- workplace policies and procedures

Assessment Conditions

Competency must be demonstrated in the workplace whilst working with new recruits over time and under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX424 Raise and validate requests for export permits and Meat Transfer Certificates

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to raise and validate Requests For (export) Permits (RFPs) and Meat Transfer Certificates (MTCs).

This unit applies to enterprise personnel who have responsibility for preparing this documentation. These individuals require a knowledge and understanding of the entire process of training and validating RFPs etc. The importance of having a robust system in the enterprise's Approved Arrangement which fulfils the requirement for full traceability and accuracy of the information required for the generation of the RFPs and MTCs is also critical to this unit.

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Explain the nature and purpose of export documentation	1.1 Identify nature, purpose, and process for preparing an RFP 1.2 Identify nature, purpose, and process for preparing an MTC 1.3 Explain nature and purpose of export permits 1.4 Identify the nature, purpose, and process for preparation of a health certificate (or meat export certificate) 1.5 Explain the nature and purpose of the EXDOC system 1.6 Explain the relationships between various forms of export documentation 1.7 Identify electronic systems used to collect and process data
2. Identify evidence of traceability from live animals to the point of raising the health certificate	2.1 Identify and explain information contained on a National Vendor Declaration (NVD) 2.2 Identify and explain information collected through the National Livestock identification System (NLIS) and its relationship with the NVD 2.3 Identify and explain segregation and identification processes on the slaughter floor, offal room and in the boning room 2.4 Identify and explain segregation and identification processes in the chiller, packing room and load out 2.5 Explain enterprise processes for tracing back from carton to farms of origin
3. Identify roles of enterprise personnel in raising and validating export documentation	3.1 Explain management responsibility as identified in Approved Arrangement 3.2 Identify and explain responsibilities of individuals who prepare and input into traceability documentation across the enterprise 3.3 Identify enterprise personnel with responsibility for validating information collected across the entire process 3.4 Identify enterprise personnel with responsibility for verifying information contained in electronic labelling systems 3.5 Identify enterprise personnel with responsibility for correcting identified errors
4. Gather information to raise export documentation	4.1 Identify and explain specific customer requirements related to the Health Certificate and explain how these are addressed in the traceability system 4.2 Explain enterprise process for the preparation of export

Element	Performance criteria
	documentation 4.3 Prepare required documentation in accordance with regulatory and enterprise requirements
5. Verify and validate prepared documentation	5.1 Distinguish between enterprise and regulator roles in verification and validation 5.2 Check prepared documentation 5.3 Implement processes for correcting errors, where necessary 5.4 Validate prepared information, where appropriate 5.5 Maintain ability to use the required Information Technology systems 5.6 Maintain enterprise records as required
6. Comply with regulatory, customer and workplace requirements	6.1 Consistently complete and check workplace documentation to required standards 6.2 Maintain currency with customer and regulatory requirements 6.3 Identify and implement ongoing training requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AMPX424 Raise and validate requests for export permits and Meat Transfer Certificates

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must raise and validate requests for (export) permits and Meat Transfer Certificates. Demonstration of consistency of performance over time is essential in this unit.

Candidates must:

- prepare export documentation accurately and consistently
- verify traceability from loadout back to producer(s)
- verify the accuracy of prepared documentation
- identify and correct errors in accordance with regulatory and enterprise requirements
- identify processes and information required to address specific customer requirements
- validate prepared documentation
- maintain required records
- use electronic systems associated with preparing export documentation
- identify required system improvements and work with relevant enterprise personnel to facilitate implementation
- follow workplace health and safety, biosecurity and equal employment requirements

Knowledge Evidence

Candidates must demonstrate a broad factual, technical and theoretical knowledge of:

- customer, regulatory and enterprise requirements related to preparing and validating export documentation
- enterprise responsibilities related to the preparation of export documentation under the Approved Arrangement
- roles and responsibilities of regulatory personnel
- enterprise traceability systems
- verification and validation processes and responsibilities
- the registration process for an RFP validator
- roles and responsibilities of an RFP validator

- the consequences associated with inaccurate or incomplete export documentation
- the process associated with an RFP amendment request
- as appropriate, methods to identify and resolve issues related to timeline faults; trade description problems; cut codes; label printing and placement errors; electronic system failure; raising claims; incorrect dates; incorrect container numbers; wrong seal numbers

Assessment Conditions

Assessment must be conducted in a meat export establishment.

As a minimum, assessment must consist of the following three forms of assessment:

- workplace referee report
- knowledge test
- five test validations

Assessors must satisfy current standards for RTOs.

AMPX425 Conduct a document review

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to undertake a document review of a company's Approved Arrangement or Quality system for compliance with regulatory and commercial requirements.

Document reviews of an Approved Arrangement or Quality System may be carried out by a Quality Assurance Officer/team or a regulatory authority. They may also be carried out by third party providers.

Candidates must demonstrate industry recognised technical expertise in the area being audited.

This unit is applicable to individuals who are responsible for supervising, developing and managing new recruits. Typically this unit would be applicable to first line managers, including supervisors and may also apply to team leaders.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan the document review	1.1 Determine the objective(s), scope and criteria of the document review 1.2 Identify relevant and current regulatory and commercial requirements 1.3 Define audit client and reporting processes 1.4 Select an audit team with appropriate technical expertise against the scope
2. Develop document review checklist	2.1 Develop checklist against criteria 2.2 Ensure the checklist covers all applicable regulations and/or commercial requirements as defined by the scope
3. Conduct document review	3.1 Identify and retrieve required enterprise documents for review 3.2 Review documents against the prepared checklist and determine compliance with each element on the checklist 3.3 Identify and raise non-conformances against nominated criteria
4. Report on outcomes of document review	4.1 Collate and report on findings according to workplace requirements 4.2 Consult with relevant personnel and raise corrective actions where required according to workplace requirements 4.3 Close out audit
5. Confirm and close out corrective actions	5.1 Evaluate and report the effectiveness of the corrective action after an agreed time interval 5.2 Close out Corrective Actions according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AMPX425 Conduct a document review

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidates must conduct a document review.

The candidate must:

- complete at least one document review of a section of the Approved Arrangement or Quality System within area of technical expertise
- establish the authenticity of the documents being audited
- identify and assemble documents for a minimum of one audit of an Approved Arrangement or Quality System
- develop and validate a checklist for the audit
- verify compliance with regulatory systems and/or commercial requirements
- explain the process of audit and the reasons for the findings made
- be able to reference the specific requirement that has not been met when a non-conformity is issued
- plan and organise audit activities to conduct the audit effectively
- use information systems, technologies and software, where applicable, to manage security, authorisation and distribution of audit data and records
- interpret evidence and make a judgment on the level of compliance
- prepare well-balanced, factual and objective written audit reports
- use communication methods relevant to different groups and audience

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the specified regulatory and commercial requirements and their impact on the nominated enterprise
- audit management to develop an audit plan and audit processes
- legislation, regulations, orders, codes and standards applicable to the areas being audited
- the structure, authority levels and lines of reporting within the organisation

Assessment Conditions

Assessment may take place using a sample Approved Arrangement or Quality Assurance system; however, all evidence collected must meet minimum regulatory and commercial requirements.

All evidence must be collected in the context of current Australian standards and regulations, as well as commercial standards which relate to the enterprise.

The assessor and/or assessment team must demonstrate a current working knowledge of the nature, structure and purpose of Approved Arrangements or Quality Assurance system and the regulatory and commercial requirements impacting the nominated enterprise.

The following three forms of assessment must be used:

- Written test or quiz
- Workplace Project
- Workplace referees report

Assessors must satisfy current standards for RTOs.

AMPX426 Undertake chiller assessment to AUS-MEAT requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to manage product in chillers, in terms of product quality and specifications, in accordance with AUS-MEAT requirements.

AUS-MEAT chiller assessment provides a means of describing saleable meat characteristics including meat colour, fat colour, marbling, eye muscle area, subcutaneous and total rib fat measurements and maturity.

This unit is applicable to supervisors and Quality Assurance (QA) staff who wish to become AUS-MEAT accredited chiller assessors.

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and the work of others within known parameters.

This units must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct AUS-MEAT chiller Assessment	1.1 Monitor product daily to ensure compliance with AUS-MEAT Chiller Assessment pre-conditions 1.2 Assess beef carcasses for marbling, meat and fat colour scores in accordance with the AUS-MEAT chiller assessment standards 1.3 Assess beef carcasses for eye muscle area, subcutaneous and total rib fat and carcass maturity 1.4 Correctly allocate the Grain Fed (GF) and Grain Feed Young Beef (GFYG) symbols to beef carcasses 1.5 Manage chiller assessment equipment
2. Monitor chiller temperature	2.1 Monitor temperature of product daily to meet AUS-MEAT Chiller Assessment requirements and product specifications, workplace procedures and regulatory requirements 2.2 Maintain temperature of chiller to ensure product quality and to meet product specifications 2.3 Correct changes to temperature to maintain product quality and specifications
3. Monitor product handling and identification	3.1 Identify and label products in accordance with product specification, customer and workplace requirements 3.2 Identify and maintain AUS-MEAT requirements for carcass feedback

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AMPX426 Undertake chiller assessment to AUS-MEAT requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must undertake chiller assessment in relation to AUS-MEAT requirements.

Competency must be demonstrated by assessing beef carcasses using the AUS-MEAT Chiller Assessment Standards. Candidates will be assessed for their accuracy in meeting the chiller assessment requirements by applying the correct techniques and measurement to the allocated carcasses. Candidates will conduct runs on a significant number of carcasses to achieve the outcomes required.

The candidate must:

- apply mathematical concepts to monitoring procedures (including temperature checks and adjustments)
- apply relevant communication skills
- identify AUS-MEAT Chiller Assessment pre-conditions
- assess carcasses in accordance with AUS-MEAT requirements
- complete documentation, including accurate feedback outcomes
- use available technology to record, gather and interpret product-monitoring data
- correlate to the AUS-MEAT Chiller Assessment requirements using the Onsite Correlation and Practice Program (OSCAP)

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- AUS-MEAT Chiller Assessment requirements
- product quality monitoring processes
- Importance of AUS-MEAT Chiller Assessment
- procedure for determining non-conformance

Assessment Conditions

Assessment must be conducted in an operating meat processing plant.

Candidates will be required to complete the required correlations using the OSCAP program. This will be conducted in their own workplace.

Candidates must successfully complete the AUS-MEAT Chiller Assessment Course requirements.

Assessors must satisfy current standards for RTOs.

AMPX427 Dry age meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to dry age meat.

This unit is applicable to meat retailing.

This unit should be delivered and assessed using appropriate dry ageing equipment and controlled environments.

All relevant food safety regulations must be followed when delivering and assessing this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for dry ageing	1.1 Explain the purpose of dry ageing 1.2 Describe the optimum dry aged product 1.3 Describe the dry ageing process 1.4 Explain the difference between dry ageing and wet ageing 1.5 Describe the regulatory requirements for storage and processing
2. Prepare and assess dry ageing equipment	2.1 Prepare dry ageing cabinets and equipment following manufacturers' guidelines 2.2 Explain the temperature, humidity and air-flow requirements for an effective dry ageing process 2.3 Check dry ageing cabinets and equipment for faults 2.4 Sanitise dry ageing equipment according to workplace requirements
3. Select meat for dry ageing	3.1 Select suitable meat for dry ageing according to workplace, and regulatory 3.2 Identify meat with the correct characteristics for dry ageing
4. Prepare meat for dry ageing	4.1 Prepare meat to workplace, workplace health and safety, QA and regulatory requirements 4.2 Identify sub- standard or contaminated product and take corrective action 4.3 Correctly place product in dry age cabinets to allow adequate air circulation 4.4 Space product according to workplace and manufacturers specifications
5. Monitor the dry ageing process	5.1 Dry age meat according to workplace, workplace health and safety, QA and regulatory requirements 5.2 Monitor and record temperature during dry age process 5.3 Perform testing according to regulatory requirements 5.4 Monitor dry ageing process regularly and take appropriate corrective action as required
6. Prepare dry aged meat for sale	6.1 Prepare dry aged meat for sale according to workplace, workplace health and safety, QA and regulatory requirements 6.2 Trim meat, fat and bone to workplace requirements 6.3 Identify sub- standard or contaminated product and take

Element	Performance criteria
	corrective action
7. Cost and price dry aged meat	7.1 Determine actual cost of dry aged meat by weighing product before dry ageing compared to finished saleable product 7.2 Calculate sale price to achieve required return according to enterprise targets and goals 7.3 Calculate yield of dry aged meat

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Links

Assessment Requirements for AMPX427 Dry age meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must undertake the entire process of dry ageing in a registered meat retail premises or simulated environment using appropriate dry ageing cabinets and equipment that meet all relevant regulatory requirements.

The candidate must:

- check, prepare and sanitise dry ageing cabinets and equipment prior to use
- select, weigh and prepare suitable meat for dry ageing to workplace requirements
- follow workplace health and safety, regulatory and for dry ageing meat
- demonstrate familiarity with regulatory requirements related to dry ageing meat products
- identify sub-standard or contaminated product throughout the entire dry ageing process and take corrective action
- hang/store meat for dry ageing appropriately
- monitor and record temperatures throughout the dry ageing process
- undertake testing according to regulatory requirements
- store dry-aged meat according to regulatory requirements
- follow manufacturers', workplace health and safety and hygiene and sanitation requirements for the use of machines and equipment used in the dry ageing process
- prepare dry aged meat for retail sale including:
 - boning carcass or primal
 - trimming fat
 - trimming dried surfaces
 - slicing
- identify the contamination risk associated with dry aged meat and take appropriate control measures
- calculate yield of dry aged meat
- cost and price dry aged meat

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- food safety and hygiene relevant to dry ageing of meat
- purpose of dry ageing
- difference between dry ageing and wet ageing processes
- cleaning and sanitation procedures for dry ageing cabinets and equipment
- possible effects on health of inadequate dry ageing processes
- possible effects of temperature fluctuations, humidity levels and air circulation on product
- workplace health and safety, regulatory and quality assurance requirements for dry ageing meat
- characteristics of meat that are suitable for dry ageing
- the effects of enzymes during dry ageing on meat proteins and connective tissue
- correct temperature and storage conditions for dry ageing meat
- cross contamination risks and controls
- workplace and regulatory requirements for recording information during the dry age process
- mathematical skills relevant to the task

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation.

It applies to individuals who use their sound theoretical knowledge of compliance and skills in identifying compliance requirements to plan, carry out and evaluate their own work and/or the work of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, licensing and risk – compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Clarify the scope of operations	1.1 Identify and review the relevant range of operations and the sphere of business arrangements of the organisation 1.2 Conduct an analysis of the operations and business arrangements of the organisation and identify the functions, products and services that may be subject to compliance requirements 1.3 Develop and document work activity plans for determining

ELEMENT	PERFORMANCE CRITERIA
	<p>relevant compliance requirements</p> <p>1.4 Obtain approval of plans from relevant organisational personnel</p>
2 Identify compliance requirements	<p>2.1 Conduct a search of information on internal and external compliance requirements using appropriate search resources, including relevant Australian and international standards</p> <p>2.2 Ensure the search of compliance requirements scans across all relevant jurisdictions of laws, regulations, and industry and organisational codes and standards and identify pertinent compliance requirements</p> <p>2.3 Progressively review information collected in terms of its relevance to the organisation's operations, services and products</p> <p>2.4 Organise and store gathered information on relevant compliance requirements in an appropriate format for further analysis</p>
3 Interpret, analyse and prioritise identified compliance requirements	<p>3.1 Review and interpret collected information in terms of its relevance to the organisation's functions, services and products</p> <p>3.2 Discuss and clarify with relevant internal or external personnel ambiguities, uncertainties and problems experienced in interpreting identified compliance information</p> <p>3.3 Identify, analyse and prioritise relevant compliance requirements in terms of critical implications for the organisation and risks and consequence of possible breaches</p> <p>3.4 Group pertinent compliance requirements into those that are critical and central to the organisation's operations, those that are important in some circumstances but are not central to the organisation's operations, and those that are pertinent but are incidental to the organisation's operations</p>
4 Document compliance requirements	<p>4.1 Organise and document outcomes of the identification and interpretation activities</p> <p>4.2 Prepare and communicate reports of relevant compliance requirements and assessment of implications to relevant personnel performing specific compliance management functions</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Identifies, interprets, analyses or reviews complex texts from various sources to determine legal requirements, organisational operations, specific requirements and responsibilities
Writing	1.2, 1.3, 1.4, 2.4, 3.2, 3.3, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> Collates and compiles results of research and analysis using appropriate technical language and organisational formats Develops materials to convey information, requirements or recommendations using language and structure appropriate to the audience
Oral Communication	1.4, 3.2, 4.2	<ul style="list-style-type: none"> Presents specialised information using structure and language to suit the audience Uses appropriate techniques, including active listening and questioning, to seek approvals and to confirm understanding
Navigate the world of work	1.2, 2.2, 3.1, 3.3	<ul style="list-style-type: none"> Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulations
Interact with others	1.4, 3.2, 4.2	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and practices when communicating with internal and external personnel
Get the work done	1.1, 1.3, 2.1-2.4, 3.1, 3.3, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> Plans, organises and implements activities required to identify, prioritise and document compliance requirements Systematically gathers, analyses and evaluates all relevant information in order to make informed decisions about management of compliance breaches Uses digital tools and systems to locate, organise and share information in effective ways

Assessment Requirements for BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse an organisation's operations to identify areas subject to compliance requirements
- interpret and analyse information from Australian and international standards, legislation, regulations, industry and organisational codes of practice to determine their relevance to the organisation
- document and store the outcomes of identification and interpretation activities related to the organisation's compliance requirements
- report on key compliance requirements and the implications of these for the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline elements of compliance programs and related management systems breaches
- identify relevant Australian and international standards.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- relevant Australian and international standards, laws, regulations, industry and organisational codes and standards
- appropriate computer resources for online searching
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCOM601 Research compliance requirements and issues

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore and investigate various aspects and issues associated with compliance requirements and a related compliance program/management system.

It applies to individuals in regulatory authorities or large organisations with responsibilities related to identifying and investigating impacts, issues and policy implications of various aspects of compliance. It also applies to internal or external consultants who carry out research activities for clients on various aspects of compliance as a compliance researcher or member of a compliance management team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Clarify the purpose and scope of the research	<p>1.1 Confirm and clarify the purpose and scope of the required compliance related research in collaboration with the client/s and relevant internal and/or external personnel</p> <p>1.2 Document the purpose and scope of the required research in accordance with organisational and/or client requirements</p>

ELEMENT	PERFORMANCE CRITERIA
2 Develop the research plan	2.1 Develop a suitable research methodology to enable sufficiently valid and reliable outcomes for the required research 2.2 Prepare the research plan for the proposed project 2.3 Obtain approval of plan from relevant internal and/or external personnel
3 Gather required research data	3.1 Collect relevant research data using appropriate research techniques and sources in accordance with the agreed research plan 3.2 Gather and interpret from appropriate sources, information on relevant Australian and international standards pertaining to compliance requirements and related systems 3.3 Organise, interpret and review collected data in terms of its relevance to the project's purpose and objectives 3.4 Discuss ambiguities, uncertainties and problems experienced while interpreting collected data and address appropriately in conjunction with relevant internal or external personnel 3.5 Organise interpreted research data for later analysis
4 Analyse collected data	4.1 Analyse data in accordance with planned methodology 4.2 Review and discuss outcomes of the analysis with relevant internal or external personnel
5 Determine research findings and outcomes	5.1 Interpret the outcomes of the data analysis in accordance with the project objectives 5.2 Develop and discuss preliminary findings, identified issues and related recommendations with relevant internal and/or external personnel 5.3 Undertake any additional data collection and analysis required to clarify aspects of findings, issues and related action options
6 Document and disseminate research outcomes	6.1 Prepare a draft report of the research outcomes, findings and recommendations in accordance with the agreed structure and format, and distribute to relevant internal and/or external personnel for comment and feedback 6.2 Edit the report based on the feedback obtained 6.3 Proofread the report prior to publication 6.4 Ensure the outcomes, findings and recommendations in the report are signed off by authorised personnel 6.5 Produce and disseminate the report to nominated internal

ELEMENT	PERFORMANCE CRITERIA
	and/or external personnel in accordance with agreed arrangements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 3.1, 3.2, 3.4, 3.5, 4.1, 5.2, 6.2, 6.3	<ul style="list-style-type: none"> Comprehends and analyses texts to identify key requirements Identifies, analyses, reviews and extracts relevant information from complex texts Proofreads draft texts to identify changes required
Writing	1.2, 2.1-2.3, 3.2-3.4, 4.2, 5.2, 6.1-6.3	<ul style="list-style-type: none"> Collates, summarises and compiles information from a range of sources Develops reports for a specific audience using clear and detailed language to convey findings and recommendations Edits and incorporates amendments to ensure compliance with regulatory or organisational requirements
Oral Communication	1.1, 2.3, 3.4, 4.2, 5.2	<ul style="list-style-type: none"> Conveys information, in a format and style appropriate to a specific audience Elicits the views and opinions of others by listening and questioning
Navigate the world of work	3.2	<ul style="list-style-type: none"> Identifies organisational implications of legislative requirements and considers these when planning and implementing work
Interact with others	1.1, 2.3, 3.4, 4.2, 5.2	<ul style="list-style-type: none"> Collaborates with others using effective interpersonal skills to facilitate shared understanding Identifies and uses appropriate conventions and practices when communicating with internal and external personnel
Get the work done	1.2, 2.1, 2.2, 3.1-3.5, 4.1, 4.2, 5.1-5.3, 6.1-6.5	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation and manages required communication with others Gathers and analyses data and feedback to improve outcomes Utilises features and functions of digital tools to

		complete complex tasks

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and interpret information on relevant Australian and international standards
- collaborate with others to identify and document the purpose and scope of the compliance research
- plan the research requirements including:
 - selecting an appropriate research methodology
 - preparing a research plan
 - getting approval for the plan from appropriate people
- carry out the research according to the approved plan including:
 - collecting, organising, analysing and interpreting data
 - reviewing and discussing analysis and preliminary outcomes with relevant personnel
- prepare and distribute report of the research outcomes according to organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain compliance requirements relevant to the organisational research methods
- explain elements of relevant compliance program/management systems
- describe quantitative and qualitative data analysis techniques relevant to compliance related research
- list relevant Australian and international standards
- identify relevant organisational policies and procedures
- identify sources of information relevant to compliance related research.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- organisational information and Australian and international standards related to compliance requirements
- relevant personnel
- computer resources and business equipment
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer

ELEMENT	PERFORMANCE CRITERIA
	needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2 Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3 Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with organisational procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.3, 2.4, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements
Writing	1.1, 3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Prepares written reports, up-to-date procedures and other workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 1.2, 1.3, 2.1,	<ul style="list-style-type: none"> Clearly articulates customer's needs using language suitable to diverse audiences and employs listening

Communication	2.2, 3.1, 3.2	and questioning techniques to confirm understanding
Navigate the world of work	3.5	<ul style="list-style-type: none"> Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1-1.3, 2.1, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> Selects and uses appropriate communication techniques to establish and maintain positive working relationships Establishes connections and shares information with others who can contribute to effective work outcomes
Get the work done	2.3, 2.4, 3.3-3.5	<ul style="list-style-type: none"> Develops and implements plans for routine and non-routine tasks recognising the importance of aligning goals and expectations to achieve outcomes Recognises and takes responsibility for addressing predictable and non-predictable problems in own work context Uses digital systems to organise and store information relevant to own work

Assessment Requirements for BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- communicate effectively with customers including
 - helping customers to articulate their needs and evaluate options
 - explaining products/services and how they match customer needs
 - establishing regular communication
 - explaining customer rights and responsibilities
- address customer's needs
- use organisational procedures to document customer satisfaction
- develop and maintain networks to support meeting customer needs
- identify potential difficulties in meeting customer needs and taking appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational procedures and standards for establishing and maintaining customer service relationships

- describe informed consent
- explain consumer rights and responsibilities
- describe ways to establish effective regular communication with customers
- outline details of products or services including with reference to:
 - possible alternative products and services
 - variations within a limited product and service range.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and resources
- business technology
- organisational policies, procedures, quality systems, manuals and guidelines for customer management
- examples of products/services and promotional strategies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBDES801 Research and apply design theory

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research, in significant depth and breadth, and apply different theories of design.

It applies to individuals who use sophisticated research and critical analysis skills in the exploration of design, design theory and its application to professional design practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Research design theory	1.1 Use a range of research techniques to source information about design theory 1.2 Identify and explore new, emerging and alternative sources of ideas and thinking on design 1.3 Expand own knowledge and understanding of design through review and critical analysis of information 1.4 Analyse, compare and contrast a range of theoretical perspectives and thinking on design

ELEMENT	PERFORMANCE CRITERIA
2 Apply theories of design to professional practice	<p>2.1 Evaluate the relevance and application of different theories of design based on analysis of own professional and personal experience</p> <p>2.2 Analyse the ways different aspects of history, theory and other influences are applied, adapted or challenged in practice</p> <p>2.3 Assess how theories and thinking about design may be applied to benefit individuals, businesses and communities</p>
3 Develop, articulate and debate own perspectives on theories of design	<p>3.1 Take a critical approach to different theories and reflect on own ideas and responses</p> <p>3.2 Develop own substantiated positions in response to research and analysis</p> <p>3.3 Articulate own positions, demonstrating clarity of thought and conceptual understanding of different theories and thinking</p> <p>3.4 Debate positions on design showing belief in own ideas and a willingness to remain open to new perspectives</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.3, 2.1	<ul style="list-style-type: none"> Draws on a range of strategies to facilitate personal and professional learning
Reading	1.1, 1.2, 1.4, 2.2	<ul style="list-style-type: none"> Identifies and interprets complex concepts and theories from a range of sources
Writing	3.3	<ul style="list-style-type: none"> Organises information and uses structure, language and context to clearly explain own ideas and positions
Oral Communication	3.3, 3.4	<ul style="list-style-type: none"> Actively engages in critical discourse using appropriate vocabulary, tone and pace Uses active listening techniques to gain input and feedback
Get the work done	1.2, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Takes responsibility for planning and organising own tasks and workload, including how to link with the work of others Systematically analyses information to aid in deciding

		<p>on own views and ideas</p> <ul style="list-style-type: none"> Keeps abreast of innovations and good practice beyond own context, using ideas to rethink current approaches

Assessment Requirements for BSBDES801 Research and apply design theory

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- conduct research into past, current and emerging theories of design
- develop substantiated positions on design and its application in own professional practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast different theories of design, including different historical perspectives and current and emerging thinking
- explain relationship between theories of design and design in practice with reference to a particular work or broader social context
- summarise the relationships, similarities and differences at a conceptual and practical level between the concepts of design, innovation and creativity
- rationalise the systemic impacts on design – social, economic, political and environmental.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to and use of current and emerging sources of information and thinking on design.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDIV601 Develop and implement diversity policy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research diversity and its importance to organisational activity and to draft, plan and implement diversity policy.

It applies to individuals working in organisations with staff and clients from different cultures, races or religions, multiple generations, or where there are other forms of diversity in the workforce.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Diversity

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Research diversity	1.1 Analyse existing practices and information in relation to diversity 1.2 Identify potential benefits of diversity and analyse in relation to business objectives 1.3 Consult key stakeholders about their requirements for a diversity policy 1.4 Access diversity policies from similar organisations and review

ELEMENT	PERFORMANCE CRITERIA
	for relevance to own organisation
2 Draft policy and plan for implementation	2.1 Draft diversity policy 2.2 Develop action plans for policy 2.3 Consult key stakeholders for feedback on draft policy and action plans 2.4 Determine relationships and links with other related policies 2.5 Revise policy for implementation
3 Implement diversity policy	3.1 Explain and interpret policy to key stakeholders 3.2 Promote policy across the organisation through a range of communication channels 3.3 Identify intended and unintended impacts of policy implementation 3.4 Develop tools, benchmarks and other indicators for planning and measuring impact of policy implementation 3.5 Monitor business activities, team plans and staff performance to ensure diversity policy is effectively implemented
4 Review diversity policy	4.1 Gather and analyse information about diversity, the policy and its implementation 4.2 Consult key stakeholders to provide feedback on the policy 4.3 Develop and approve recommendations for changes to the policy 4.4 Refine diversity policy in accordance with feedback and recommendations

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1, 3.3, 3.4, 3.5, 4.1, 4.3	<ul style="list-style-type: none"> Identifies, analyses and evaluates complex information to determine business requirements Monitors reported information to determine efficiency of policy

Writing	1.3, 2.1, 2.2, 2.3, 2.5, 3.2, 3.4, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> • Develops detailed procedural material according to organisational and legislative requirements • Records and collates feedback from stakeholders • Prepares factual and informative documentation to suit purpose and audience
Oral Communication	1.3, 2.3, 3.1, 3.2, 4.2	<ul style="list-style-type: none"> • Presents information and opinions using language and non-verbal features appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Navigate the world of work	1.2, 2.1, 2.5, 3.4, 4.3, 4.4	<ul style="list-style-type: none"> • Works autonomously making high level decisions to achieve and improve organisational goals • Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are being met • Monitors and reviews the organisation's policies, procedures and adherence to legislative requirements in order to implement and manage change
Interact with others	1.3, 2.3, 3.1, 3.2, 4.2	<ul style="list-style-type: none"> • Adapts personal communication style to build a positive working relationship and show respect for the opinions, values and particular needs of others • Plays a lead role in situations requiring effective collaborative skills, demonstrating high level negotiation skills and ability to influence others • Shares knowledge, information and experience openly as an integral part of the working relationship
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.2-3.5, 4.1, 4.3	<ul style="list-style-type: none"> • Develops plans for complex, high impact activities with strategic implications for the organisation • Gathers and analyses data and seeks feedback to improve plans and processes • Makes high impact decisions in a complex and diverse environment, using input from a range of sources • Identifies key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision making strategies where appropriate

Assessment Requirements for BSBDIV601 Develop and implement diversity policy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse information about diversity from a range of internal and external sources to identify:
 - existing practices
 - potential benefits of diversity and the fit with business objectives
- develop a comprehensive diversity policy with details of an implementation strategy and how the policy will be monitored and reviewed
- implement, evaluate and change the diversity policy based on recommendations for improvement
- consult with relevant stakeholders during development, implementation and review of the diversity policy and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain business operations that can be linked to diversity
- identify potential benefits of diversity to the organisation
- describe diversity within the business environment including:
 - cultures
 - beliefs
 - traditions and practices
- describe contemporary theory about diversity and its potential contribution to business advantage

- outline legislation, codes of practice and national standards as they apply to development of diversity policy.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – diversity field of work and include access to:

- business technology
- legislation, regulations and codes of practice for managing diversity
- workplace diversity policies and procedures
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan financial management approaches	1.1 Access budget/financial plans for the work team 1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3 Negotiate any changes required to be made to budget/financial

ELEMENT	PERFORMANCE CRITERIA
	plans with relevant personnel within the organisation 1.4 Prepare contingency plans in the event that initial plans need to be varied
2 Implement financial management approaches	2.1 Disseminate relevant details of the agreed budget/financial plans to team members 2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances 2.3 Determine and access resources and systems to manage financial management processes within the work team
3 Monitor and control finances	3.1 Implement processes to monitor actual expenditure and to control costs across the work team 3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4 Report on budget and expenditure in accordance with organisational protocols
4 Review and evaluate financial management processes	4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team 4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3	<ul style="list-style-type: none"> Interprets and analyses information to determine activities required

Writing	1.1, 1.4, 4.1-4.3	<ul style="list-style-type: none"> Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures
Oral Communication	1.2, 1.3, 2.1-2.3	<ul style="list-style-type: none"> Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience Uses active listening and questioning to clarify information and to confirm understanding
Numeracy	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Navigate the world of work	2.2, 3.3, 3.4, 4.3	<ul style="list-style-type: none"> Recognises, understands and adheres to organisational requirements in undertaking own work
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3	<ul style="list-style-type: none"> Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Get the work done	1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financial record keeping and auditing
- describe the principles and techniques involved in managing:
 - budgeting
 - cash flows
 - electronic spreadsheets

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM601 Manage finances

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake budgeting, financial forecasting and reporting and to allocate and manage resources to achieve the required outputs for the business unit. It includes contributing to financial bids and estimates, allocating funds, managing budgets and reporting on financial activity.

It applies to individuals who have managerial responsibilities which include overseeing the management of financial and other resources across a business unit, a series of business units or teams, or an organisation. It covers all areas of broad financial management. In a larger organisation this work would be supported by specialists in financial management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan for financial management	1.1 Review and analyse previous financial data to establish areas which have generated a profit or loss 1.2 Undertake research to review reasons for previous profit and loss 1.3 Review business plan to establish critical dates and initiatives that will require or generate resources in the next financial cycle

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Analyse cash flow trends</p> <p>1.5 Review statutory requirements for compliance and liabilities for tax</p> <p>1.6 Review existing software and its suitability for financial management</p>
2 Establish budgets and allocate funds	<p>2.1 Use previous financial data to determine allocations for resources</p> <p>2.2 Make informed estimates of new items for inclusion in budget</p> <p>2.3 Prepare budgets in accordance with organisational requirements and statutory requirements</p>
3 Implement budgets	<p>3.1 Circulate budgets and ensure managers and supervisors are clear about budgets, reporting requirements and financial delegations</p> <p>3.2 Manage risks by checking there are no opportunities for misappropriation of funds and that systems are in place to properly record all financial transactions</p> <p>3.3 Review profit and loss statements, cash flows and ageing summaries</p> <p>3.4 Revise budgets, as required, to deal with contingencies</p> <p>3.5 Maintain audit trails to ensure accurate tracking and to identify discrepancies between agreed and actual allocations</p> <p>3.6 Ensure compliance with due diligence</p>
4 Report on finances	<p>4.1 Ensure structure and format of reports are clear and conform to organisational and statutory requirements</p> <p>4.2 Identify and prioritise significant issues in statements, including comparative financial performances for review and decision making</p> <p>4.3 Prepare recommendations to ensure financial viability of the organisation</p> <p>4.4 Evaluate the effectiveness of financial management processes</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

	Criteria	
Reading	1.1-1.6, 2.1-2.3, 3.2-3.5, 4.1-4.4	<ul style="list-style-type: none"> Interprets, analyses and evaluates complex information to determine and adhere to organisational or legislative requirements and to assist with financial decision making
Writing	1.1-1.6, 2.1- 2.3, 3.1-3.5, 4.1-4.3	<ul style="list-style-type: none"> Develops and records information which incorporates a detailed analysis of factual and forecasted information Prepares documents using format, content and layout appropriate to audience, purpose and regulatory requirements
Oral Communication	3.1	<ul style="list-style-type: none"> Explains financial decisions and outcomes clearly and uses listening and questioning techniques to exchange information and obtain agreement
Numeracy	1.1-1.6, 2.1-2.3, 3.2-3.5, 4.1-4.2	<ul style="list-style-type: none"> Reviews and analyses numerical data embedded in organisational documentation and legislation Compares and contrasts complex numerical data to analyse and evaluate financial position and processes. Uses appropriate formulae to analyse financial data to assess and manage risk and identify discrepancies
Navigate the world of work	1.5, 2.3, 3.6, 4.1	<ul style="list-style-type: none"> Recognises, understands and adheres to legislative and organisational requirements in undertaking own work
Interact with others	3.1	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with supervisors and managers to share information or seek agreement
Get the work done	1.1-1.6, 2.1-2.3, 3.1-3.5, 4.1-4.4	<ul style="list-style-type: none"> Uses logical processes in planning, implementing and evaluating complex tasks to achieve stated goals Uses formal analytical thinking techniques to identify issues, investigate underlying causes and generate possible solutions, seeking input from others as required Uses a range of digital technology to access, filter, compile, integrate and logically present complex information from multiple sources Investigates new digital technologies and applications to manage and manipulate data

Assessment Requirements for BSBFIM601 Manage finances

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan for financial management
- read and review profit and loss statements, cash flows and aging summaries
- prepare, implement and revise a budget which aligns with the business plan, is based on research and analysis of previous financial data and cash flow trends, and meets all compliance requirements
- contribute to financial bids and estimates
- establish a budget and allocate funds in accordance with statutory and organisational requirements
- communicate with other people including:
 - reporting on financial activity and making recommendations
 - identifying and prioritising significant issues
 - ensuring managers and supervisors are clear about budgets.
- analyse the effectiveness of existing financial management approaches including reviewing financial management software, managing risks of misappropriation of funds, ensuring systems are in place to record all transactions, maintaining an audit trail and complying with due diligence.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the requirements for financial probity
- describe the principles of accounting and financial systems
- explain Australian, international and local legislation and conventions that are relevant to financial management in the organisation

- outline the requirements of the Australian Tax Office, including Goods and Services Tax, Company Tax, Pay As You Go.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- financial data
- relevant legislation and Australian Tax Office requirements
- examples of business plans, profit and loss statements, cash flows and aging summaries
- organisational financial policies and procedures
- financial management software.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Contribute to team outcomes	1.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2 Support team members to meet expected outcomes

ELEMENT	PERFORMANCE CRITERIA
2 Support team cohesion	<p>2.1 Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility</p> <p>2.2 Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward team members' efforts and contributions</p> <p>2.4 Identify and address issues, concerns and problems identified by team members, or refer to relevant persons as required</p>
3 Participate in work team	<p>3.1 Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions</p> <p>3.2 Support the team to identify and resolve problems which impede its performance</p> <p>3.3 Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers</p>
4 Communicate with management	<p>4.1 Maintain open communication with line manager/management at all times</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues to line manager/management and follow up to ensure action is taken in response to these matters</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.3, 2.4, 4.2, 4.3	<ul style="list-style-type: none"> Uses appropriate vocabulary, grammatical structures and conventions to communicate information, matching style to purpose and audience
Oral	1.1, 1.2, 2.1-2.4, 3.1,	<ul style="list-style-type: none"> Presents ideas and seeks feedback from others using vocabulary and non-verbal features appropriate to the

Communication	3.2, 4.1-4.3	<p>audience</p> <ul style="list-style-type: none"> Participates in open discussions to elicit the views of others by asking questions and listening to responses
Navigate the world of work	1.1	<ul style="list-style-type: none"> Ensures that team members are aware of their rights and responsibilities in the workplace, including workplace safety
Interact with others	1.1, 1.2, 2.1-2.4, 3.1, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Collaborates, supports and cooperates with others to achieve work outcomes, and encourages others to do the same Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Recognises importance of own interpersonal skills in projecting a positive image to others in work context Understands the need to modify own communication style to accommodate individual differences
Get the work done	1.1, 2.4, 4.1, 4.3	<ul style="list-style-type: none"> Plans and implements tasks required to achieve required outcomes Recognises and responds to problems related to role and seeks assistance when problems are beyond immediate responsibilities

Assessment Requirements for BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
 - provides direction and leadership
 - assists individuals to achieve goals
 - motivates and builds team cohesion
 - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
 - group dynamics and processes
 - motivation

- negotiation
- explain why considering individual behaviour and differences is important to a manager.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate's agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

- explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM302 Utilise a knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to access a knowledge management system, use monitoring and review processes to provide feedback and improve own work practices using the system.

This includes a whole range of strategies, methods, activities and techniques used formally and informally by individuals and the organisation (as formalised in a knowledge management system) to identify, collect, organise, store, retrieve, analyse, share and apply knowledge to the work of the organisation.

It applies to individuals who apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of knowledge management to assist in increasing productivity, to improve quality or to recognise the benefits to the organisation through the improved use of knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Access and use	1.1 Access knowledge management system to assist with specific

ELEMENT	PERFORMANCE CRITERIA
knowledge management system	tasks, in line with system procedures 1.2 Administer system, in line with legislative, regulatory and organisational procedures
2 Input to knowledge management system	2.1 Gather, analyse and prepare inputs for contribution to system, in line with procedures 2.2 Check inputs for clarity, accuracy, currency and relevance 2.3 Make inputs to system, in line with procedures 2.4 Analyse requirements of the system and ensure suggestions for improvements are provided to relevant personnel
3 Review and improve work practices	3.1 Provide feedback about clarity, accuracy, currency and relevance of system's output to relevant personnel 3.2 Document learning resulting from use of the system 3.3 Improve work practices as a result of learning from use of the system

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.2, 3.3	<ul style="list-style-type: none"> Builds on knowledge and experience from the use and review of using the knowledge management system, and applies knowledge to improve work practices

BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to be an effective and proactive member of an innovative team.

It applies to individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. Teams may be formal or informal and may comprise a range of personnel.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Create opportunities to maximise innovation within the team	1.1 Evaluate and reflect on what the team needs and wants to achieve 1.2 Check out information about current or potential team members' work in the context of developing a more innovative team 1.3 Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross fertilising ideas

ELEMENT	PERFORMANCE CRITERIA
	1.4 Acknowledge, respect and discuss the different ways that people may contribute to building or enhancing the team
2 Organise and agree effective ways of working	2.1 Jointly establish ground rules for how the team will operate 2.2 Agree and communicate responsibilities in ways that encourage and reinforce team-based innovation 2.3 Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4 Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5 Establish personal reward and stimulation as an integral part of the team's way of working
3 Support and guide colleagues	3.1 Model behaviour that supports innovation 3.2 Seek external stimuli and ideas to feed into team activities 3.3 Proactively share information, knowledge and experiences with other team members 3.4 Challenge and test ideas within the team in a positive and collaborative way 3.5 Proactively discuss and explore ideas with other team members on an ongoing basis
4 Reflect on how the team is working	4.1 Debrief and reflect on activities and on opportunities for improvement and innovation 4.2 Gather and use feedback from within and outside the team to generate discussion and debate 4.3 Discuss the challenges of being innovative in a constructive and open way 4.4 Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5 Identify, promote and celebrate successes and examples of successful innovation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 4.2	<ul style="list-style-type: none"> Interprets and analyses textual information, from a wide range of sources, to identify information relevant to team activities
Writing	2.2, 3.3, 4.4	<ul style="list-style-type: none"> Uses clear language and formats appropriate for the audience to highlight and present specific information
Oral Communication	1.2, 1.3, 1.4, 2.1, 2.2, 3.5, 4.1, 4.2, 4.3, 4.4, 4.5	<ul style="list-style-type: none"> Actively participates in verbal exchanges of ideas and elicits the views and opinions of team members by listening and questioning Uses clear language to clarify rules and roles relating to team activities in formal and informal situations
Numeracy	1.2, 4.2	<ul style="list-style-type: none"> Interprets numeric information relevant to team activities
Navigate the world of work	1.1, 3.1, 3.2, 3.5	<ul style="list-style-type: none"> Understands the nature and purpose of own role and how it affects others in the work context
Interact with others	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Uses inclusive techniques to initiate, contribute and promote discussion amongst potentially diverse team members Recognises the importance of establishing and building effective working relationships Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.3, 1.4, 2.2, 2.4, 2.5, 3.2, 3.4, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Plans, sequences and prioritises tasks for efficient and effective outcomes Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking Uses problem-solving processes to address less predictable problems, and when appropriate, seeking input from others Reflects on outcomes and further explores own and the team's role in implementing innovation

 - planning and scheduling of activities
 - reflecting on activities, feedback and challenges to identify improvement options
- encourage others to contribute to innovation in the team
- implement improvements and communicate about them.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain what innovation is, the different types of innovation and the benefits of innovation
- describe the internal and external factors that contribute to a team becoming and remaining innovative including:
 - team characteristics
 - the role of group dynamics and diversity
 - broader environmental factors
- explain how activities can encourage or hinder innovation in a team including:
 - allocation of time and activities
 - modelling behaviour
 - rewards and recognition
 - communications

- feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN801 Lead innovative thinking and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate, lead and sustain innovative organisational thinking and practice.

It applies to individuals who initiate and lead innovation in any industry or community context. Each organisation's thinking and practice will be different depending on its core business, purpose, size, complexity and broader operating context.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Generate innovative thinking and creativity	1.1 Research and use a range of techniques and tools to generate new ideas and thinking 1.2 Research and analyse trends shaping organisation's current and future thinking and practice 1.3 Introduce and promote creative thinking techniques to foster personal and team innovation 1.4 Evaluate overall context for individual and collective

ELEMENT	PERFORMANCE CRITERIA
	<p>innovative thinking and creativity</p> <p>1.5 Research and analyse specific conditions for innovation and issues that impact on individual and collective innovative thinking and creativity</p> <p>1.6 Research and review innovation drivers and enablers</p>
2 Lead innovative practices	<p>2.1 Develop personal leadership style to model positive innovative thinking and practice</p> <p>2.2 Review, challenge and refine own style and practice in relation to modelling and supporting innovation</p> <p>2.3 Assess and determine the requirements to promote sustainable innovative activity for the operational context and people involved</p> <p>2.4 Devise and implement most appropriate means to promote knowledge transfer</p> <p>2.5 Identify, evaluate and manage risks associated with innovation within an organisation</p>
3 Generate and support a culture of innovation	<p>3.1 Introduce and promote innovative practices, processes, products or services appropriate to audience and organisational requirements</p> <p>3.2 Establish ways to capture, communicate and share innovative ideas and practices</p> <p>3.3 Initiate and foster communication, consultation and team development approaches that support innovation</p> <p>3.4 Identify, assess and provide adequate resources for innovation to occur</p> <p>3.5 Develop and apply strategies to foster a workplace culture capable of encouraging innovation</p> <p>3.6 Establish mechanisms at system and process level that can support innovation</p>
4 Sustain innovative thinking and practice	<p>4.1 Develop strategies to make innovation an integral part of organisational activity</p> <p>4.2 Develop and monitor processes to ensure ongoing awareness of individual and collective contributions to innovative thinking and practice</p> <p>4.3 Analyse potential barriers and risks to innovation and devise strategies to respond</p> <p>4.4 Analyse and reflect on innovation performance as a basis for developing strategies for improvement</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.1, 2.2, 4.4	<ul style="list-style-type: none"> Evaluates and reflects on personal effectiveness to develop strategies to enhance own performance
Reading	1.1, 1.2, 1.5, 1.6	<ul style="list-style-type: none"> Identifies, analyses, interprets and evaluates visual and textual information from a range of sources to identify innovation strategies, practices and trends
Writing	1.1, 1.2, 1.5, 1.6, 3.2	<ul style="list-style-type: none"> Uses clear and precise language to document research findings for reference purposes Develops complex plans, strategies and systems to integrate innovation into the organisation using appropriate formats for the audience and purpose
Oral Communication	1.3, 3.2, 3.3, 3.5	<ul style="list-style-type: none"> Discusses, presents and seeks information using appropriate structure and language for the particular audience Uses questioning and active listening to encourage discussion and to clarify or confirm understanding
Numeracy	1.1, 1.2, 1.5, 1.6, 3.2	<ul style="list-style-type: none"> Interprets, analyses and presents numeric/financial information in complex documents
Navigate the world of work	2.1, 2.2, 2.3, 2.5, 3.1, 3.5, 4.1	<ul style="list-style-type: none"> Understands how own role meshes with others and contributes to broader work goals Leads in the development of strategies to integrate innovative practices into the organisation
Interact with others	1.3, 3.2, 3.3, 3.5	<ul style="list-style-type: none"> Uses a variety of relevant communication tools and strategies to build and maintain effective working relationships Uses inclusive and collaborative techniques to communicate, negotiate and consult effectively with a range of stakeholders Actively seeks the perspectives of others as part of work role
Get the work done	1.1,1.2, 1.3-1.6, 2.3-2.5, 3.2-3.6, 4.1-4.4	<ul style="list-style-type: none"> Plans, develops, implements and monitors practical strategies to introduce and support innovation in the workplace Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking

		<ul style="list-style-type: none"> Uses formal analytical and lateral thinking techniques to identify issues, generate and evaluate possible solutions, and select most appropriate option

Assessment Requirements for BSBINN801 Lead innovative thinking and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use various techniques and tools to stimulate creative or innovative thinking
- research, review and critically analyse trends in thinking and emerging practices as they relate to an organisation's current thinking and practices
- develop own capacity to lead innovative thinking and practice in an organisational context
- complete a workplace project or case study to demonstrate a comprehensive understanding and application of key concepts, current theories and processes for introducing, communicating, promoting, supporting and sustaining innovative thinking and practices in an organisational context.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast current and past theories and thinking about innovation
- explain how theory and thinking on innovation and creativity can contribute to applied practice
- discuss the impact of leadership style on innovation in organisations, including how specific approaches may encourage or inhibit innovation
- discuss the relevance of organisational and industry context on innovation
- analyse the internal and external conditions or factors that impact on organisational innovation
- outline strategies for identifying, assessing and managing risks associated with innovation
- provide examples of innovation drivers in an organisation
- provide examples of innovation enablers in an organisation

- list and describe mechanisms at system or process level that can support innovative practices
- discuss typical challenges and barriers to innovation within an organisation and ways of overcoming these challenges and barriers.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation field of work and include access to:

- workplace documentation and resources
- office equipment and materials
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU101 Operate a personal computer

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on a personal computer or business computer terminal.

It applies to individuals who perform a range of routine computer tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Start computer, system information and features	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation 1.3 Start computer or log on according to user procedures 1.4 Identify basic functions and features using system information 1.5 Customise desktop configuration, if necessary, with assistance from appropriate persons

ELEMENT	PERFORMANCE CRITERIA
	1.6 Use help functions as required
2 Navigate and manipulate desktop environment	2.1 Open, close and access features by selecting correct desktop icons 2.2 Open, resize and close desktop windows by using correct window functions 2.3 Create shortcuts onto the desktop, if necessary, with assistance from appropriate persons
3 Organise files using basic directory and folder structures	3.1 Create folders/subfolders with suitable names 3.2 Save files with suitable names in appropriate folders 3.3 Rename and move folders/subfolders and files as required 3.4 Identify folder/subfolder and file attributes 3.5 Move folders/subfolders and files using cut and paste, and drag and drop techniques 3.6 Save folders/subfolders and files to appropriate media where necessary 3.7 Search for folders/subfolders and files using appropriate software tools 3.8 Restore deleted folder/subfolders and files as necessary
4 Print information	4.1 Print information from installed printer 4.2 View progress of print jobs and delete as required 4.3 Change default printer, if installed
5 Shut down computer	5.1 Close all open applications 5.2 Shut down computer according to user procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.5, 1.6, 3.1-3.8, 4.1-4.3, 5.1, 5.2	<ul style="list-style-type: none"> Recognises textual information within internal procedures and technical documents to determine and complete work requirements

Writing	1.3, 3.1-3.3, 3.7	<ul style="list-style-type: none"> Inputs information using familiar text types and records numerical and textual information for file naming conventions
Oral Communication	1.5, 2.3	<ul style="list-style-type: none"> Asks simple questions and comprehends answers that contain short and explicit information
Navigate the world of work	1.1-1.3, 5.2	<ul style="list-style-type: none"> Recognises and follows organisational procedures and legislative responsibilities, with particular reference to health and safety
Interact with others	1.5, 2.3	<ul style="list-style-type: none"> Uses appropriate communication practices to seek guidance from more experienced work colleagues
Get the work done	1.3-1.6, 2.1-2.3, 3.1-3.8, 4.1-4.3, 5.1, 5.2	<ul style="list-style-type: none"> With guidance, is beginning to understand and use the specific functions and features of digital systems and tools

Assessment Requirements for BSBITU101 Operate a personal computer

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- adjust equipment, furniture and workspace to suit individual ergonomic requirements
- follow organisational and WHS requirements when operating a computer
- follow user procedures and system information when using the basic functions on a computer, seeking assistance when necessary
- use desktop icons and create shortcuts
- create and manipulate folders and subfolders
- check and delete print jobs and change default printer
- correctly shut down software applications and the computer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the main work health and safety requirements for working with a computer
- list the main points to consider when setting up an ergonomic work environment
- list the main components of the computer system, and briefly explain what each one does
- briefly explain the functions of the operating system
- outline the organisation's conventions for naming files

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- information about work health and safety requirements.
- computer user and system information
- suitable workspace including a personal computer or computer terminal with relevant software and printer.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

ELEMENT	PERFORMANCE CRITERIA
	productivity measures in work plans 1.3 Lead and support team members in meeting expected outcomes
2. Lead team to develop cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2 Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required 2.5 Model expected behaviours and approaches
3. Participate in and facilitate work team	3.1 Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2 Give the team support to identify and resolve problems which impede its performance 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4 Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Foundation Skills

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine development needs	1.1 Systematically identify and implement learning and development needs in line with organisational requirements 1.2 Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and

ELEMENT	PERFORMANCE CRITERIA
	<p>implemented</p> <p>1.3 Encourage individuals to self-evaluate performance and identify areas for improvement</p> <p>1.4 Collect feedback on performance of team members from relevant sources and compare with established team learning needs</p>
2. Develop individuals and teams	<p>2.1 Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry</p> <p>2.2 Ensure that learning delivery methods are appropriate to the learning goals, the learning style of participants, and availability of equipment and resources</p> <p>2.3 Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate individual and team achievement of competencies</p> <p>2.4 Create development opportunities that incorporate a range of activities and support materials appropriate to the achievement of identified competencies</p> <p>2.5 Identify and approve resources and time lines required for learning activities in accordance with organisational requirements</p>
3. Monitor and evaluate workplace learning	<p>3.1 Use feedback from individuals or teams to identify and implement improvements in future learning arrangements</p> <p>3.2 Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support</p> <p>3.3 Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning</p> <p>3.4 Document and maintain records and reports of competency according to organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Learning	1.1-1.4, 2.1-2.4, 3.1, 3.3	<ul style="list-style-type: none"> • Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1-3.4	<ul style="list-style-type: none"> • Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	1.1, 1.2, 1.4, 2.1, 2.5, 3.1-3.4	<ul style="list-style-type: none"> • Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives
Navigate the world of work	1.1, 2.5, 3.4	<ul style="list-style-type: none"> • Recognises and responds to explicit and implicit organisational procedures and protocols Understands how own role meshes with others and contributes to broader goals
Interact with others	1.2, 1.3, 1.4, 2.2, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve joint/agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> • Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- systematically identify and implement learning opportunities for others
- collect feedback on team and individual performance
- give and receive feedback from team members to encourage participation in and effectiveness of the team
- collaboratively develop learning plans to match skill needs of individuals and groups
- provide mentoring and coaching assistance to teams and individuals
- monitor and review workplace learning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe facilitation techniques to encourage team development and improvement
- outline organisational policies, plans and procedures for developing teams
- identify career paths and competency standards relevant to the industry.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- office equipment and resources
- learning and development plans, policies and procedures
- case studies and, where available, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	<ul style="list-style-type: none"> Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	<ul style="list-style-type: none"> Identifies, interprets, analyses and reviews textual information related to the operational plan and

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	<ul style="list-style-type: none"> Communicates relationships between ideas and information, matching style of writing to purpose and audience Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	<ul style="list-style-type: none"> Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion

Assessment Requirements for BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

ELEMENT	PERFORMANCE CRITERIA
processes	<p>making processes, assume responsibility and exercise initiative</p> <p>1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback</p> <p>1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes</p>
2. Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBMKG502 Establish and adjust the marketing mix

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- report on activities undertaken to establish a marketing mix in an organisation, including information on each element of the mix, such as:
 - customer service levels
 - product or service distribution
 - product or service pricing
 - additional products or services, if any
 - product or service promotion
- report on success of marketing mix activities developed, including coverage of any necessary adjustments made.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisational policies, procedures, products and services related to marketing
- describe principles and concepts of marketing such as consumer or buyer behaviour and elements of marketing mix
- outline and explain statistical techniques used to gather and analyse marketing information.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- organisational and marketing strategic plans
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Construct an applied research strategy	1.1 Clarify and confirm applied research purpose and needs of the target group 1.2 Determine policies and procedures in relation to conducting applied research 1.3 Establish mechanisms for collecting and maintaining data in a

ELEMENT	PERFORMANCE CRITERIA
	systematic manner 1.4 Analyse factors affecting the reliability and validity of data 1.5 Review relevant research ethics and codes of conduct 1.6 Prepare applied research strategy and hypothesis 1.7 Frame a research strategy in consideration of available tools and resources
2. Use a range of applied research techniques	2.1 Review and evaluate a range of applied research methods, theories and data collection techniques 2.2 Select appropriate methods to gather and analyse data 2.3 Use suitable technology and technology services to support data collection and analysis 2.4 Access appropriate sources of information and contributors relevant to the research 2.5 Optimise relevance of the research through integrity of the data collected and analysis tools used
3. Analyse and present findings	3.1 Evaluate how research findings such as trends and changes will impact on learning strategy 3.2 Review data and research findings for accuracy of details and adherence to any legal requirements 3.3 Collate and analyse data for relevance against the original applied research strategy 3.4 Document and present research findings in a clear and logical manner consistent with audience needs 3.5 Identify the need for and an appropriate approach to, further research

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.5	<ul style="list-style-type: none"> Evaluates and reflects on the need for further research to contribute to ongoing organisational improvement

Reading	1.1, 1.2, 1.5, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> Collects, analyses, compares and evaluates textual information from a range of resources to inform research strategies
Writing	1.6, 3.3, 3.4	<ul style="list-style-type: none"> Develops texts dealing with complex ideas and concepts Uses specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal, ethical and organisational requirements
Oral Communication	1.1, 3.4	<ul style="list-style-type: none"> Uses specialised vocabulary appropriate to context and audience to discuss and confirm research requirements Applies listening and questioning techniques to check or confirm understanding
Numeracy	3.2, 3.3	<ul style="list-style-type: none"> Applies knowledge of mathematical information to statistically analyse data and identify possible trends and confirm reliability
Navigate the world of work	1.2, 1.5, 3.2	<ul style="list-style-type: none"> Is highly autonomous, taking responsibility for determining applicable organisational policies and procedures and considering legal and ethical obligations Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others
Interact with others	3.4	<ul style="list-style-type: none"> Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals
Get the work done	1.1, 1.2, 1.3, 1.7, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3	<ul style="list-style-type: none"> Develops plans for complex activities, regularly reviewing priorities and performance during implementation, identifying and addressing issues as they arise Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks Uses formal analytical thinking to make informed decisions about research strategies and techniques, seeking input, advice and feedback as required

Assessment Requirements for BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
 - specific research questions or hypotheses
 - valid population or sample size
 - description of the geographical, cultural, social or institutional context within which the research will be carried out
 - full description of the data collection methods
 - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques

- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations .

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRKG404 Monitor and maintain records in an online environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and assess records for storage, and maintain and monitor electronic business records.

It applies to individuals who use guidelines and processes to inform judgements on the status and classification of records in an existing business or records system. They work under supervision or in consultation with more senior staff or users of the system.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Recordkeeping

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm requirements for recordkeeping in an online environment	1.1 Identify and confirm system procedures for capturing and managing records 1.2 Identify and verify organisational and risk management requirements for classifying and storing online information 1.3 Identify legal, business, financial, socio-historical, and security requirements for recording online business transactions 1.4 Prepare a checklist of organisational requirements to assess

ELEMENT	PERFORMANCE CRITERIA
	which electronic information should be captured, for how long and in what format
2. Identify and assess records for storage	<p>2.1 Categorise incoming and outgoing records information in terms of key activities and responsible personnel</p> <p>2.2 Assess information against the organisational checklist and records identified for capture</p> <p>2.3 Dispose of information not to be stored, in accordance with organisational procedures</p> <p>2.4 Determine storage methods and media in accordance with retention requirements</p>
3. Monitor and maintain business records in an online environment	<p>3.1 Classify, sentence and link records with other records in the system in accordance with system rules and organisational procedures</p> <p>3.2 Assign unique identifiers and register records into the recordkeeping system in accordance with system rules and organisational procedures</p> <p>3.3 Determine access and security status and disposal requirements of records and records in accordance with organisational procedures</p> <p>3.4 Store records on required media in accordance with organisational and record retention requirements</p> <p>3.5 Carry out migration of records from one medium to another in accordance with organisational procedures</p> <p>3.6 Action and record archiving or disposal of records in accordance with disposal schedule and organisational procedures</p> <p>3.7 Maintain records in a usable and accessible form in accordance with security conditions and legislative requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2,	<ul style="list-style-type: none"> Identifies, interprets, analyses and reviews information from a range of complex texts, including legislative

	2.3, 3.1-3.7	materials and organisational policies and procedures
Writing	1.4, 2.1, 3.1, 3.2, 3.6, 3.7	<ul style="list-style-type: none"> Develops list of recordkeeping requirements in required format Inputs information to create, identify, retrieve or modify records
Oral Communication	1.1, 1.2, 1.3	<ul style="list-style-type: none"> Communicates to exchange information with others using questioning and careful listening to clarify requirements
Numeracy	1.1, 1.3	<ul style="list-style-type: none"> Interprets and analyses numerically expressed information from records to determine their classification and management requirements
Navigate the world of work	1.2, 1.3, 2.3, 2.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7	<ul style="list-style-type: none"> Takes personal responsibility for following organisational policies and procedures and legal and regulatory responsibilities relevant to own work context
Get the work done	1.1, 1.2, 1.3, 1.4, 2.4, 3.1, 3.4, 3.5, 3.6, 3.7	<ul style="list-style-type: none"> Sequences and schedules tasks required to achieve outcomes according to organisational and legislative requirements Gathers, analyses and evaluates information to decide on record status Uses digital systems and tools to access, organise, analyse and display records, showing awareness of the need for data security

Assessment Requirements for BSBRKG404 Monitor and maintain records in an online environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- monitor usage of online business or records system
- monitor application of system procedures
- manage record creation, update, migration and disposal processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of relevant legislation that apply to a records system
- explain the general principles and processes of records management and records management systems, including, but not limited to;
 - systems of control
 - records continuum theory
 - mandate and ownership of business process
- explain the operation of the online recordkeeping environment including location and nature of transactions.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSMB405 Monitor and manage small business operations

Modification History

Release	Comments
Release 3	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement a business plan and modify operations as required.

It applies to individuals who operate a small business which stands alone, or is part of a department within a larger organisation. Individuals in this role use problem-solving skills and take responsibility for developing approaches to manage business operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the</i>	<i>Performance criteria describe the performance needed to</i>

ELEMENT	PERFORMANCE CRITERIA
<i>essential outcomes.</i>	<i>demonstrate achievement of the element.</i>
1. Develop operational strategies and procedures	1.1 Develop an action plan to provide a clear and coherent direction, in accordance with business goals and objectives 1.2 Identify work health and safety (WHS) and environmental issues, and implement strategies to minimise risk factors 1.3 Develop a quality system for the business in line with industry standards, compliance requirements and cultural criteria 1.4 Develop performance measures and operational targets to conform with the business plan 1.5 Develop strategies for innovation, including utilisation of existing, new or emerging technologies, where practicable, to optimise business performance
2. Implement operational strategies and procedures	2.1 Implement systems and key performance indicators or targets to monitor business performance and customer satisfaction 2.2 Implement systems to control stock, expenditure or cost, wastage or shrinkage and risks to health and safety in accordance with the business plan 2.3 Maintain staffing requirements, where applicable, within budget, to maximise productivity 2.4 Carry out provision of goods or services in accordance with established legal, ethical cultural and technical standards 2.5 Provide goods or services in accordance with time, cost and quality specifications, and customer requirements 2.6 Apply quality procedures to address product or service and customer requirements
3. Monitor business performance	3.1 Regularly monitor and review achievement of operational targets to ensure optimum business performance, in accordance with business plan goals and objectives 3.2 Review systems and structures, with a view to more effectively supporting business performance 3.3 Investigate and analyse operating problems to establish causes and implement changes as required, as part of the business quality system 3.4 Amend operational policies and procedures to incorporate corrective action
4. Review business operations	4.1 Review and adjust business plan, as required, to maintain business viability, in accordance with business goals and

ELEMENT	PERFORMANCE CRITERIA
	objectives 4.2 Clearly record proposed changes to aid future planning and evaluation 4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.5, 2.1, 2.2, 2.4, 2.5, 3.1, 4.1	<ul style="list-style-type: none"> Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.1, 1.3-1.5, 3.2, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	3.2	<ul style="list-style-type: none"> Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding
Numeracy	2.2, 2.3, 2.5	<ul style="list-style-type: none"> Interprets numerical information to manage performance information and regulate cash flow
Navigate the world of work	1.1-1.3, 2.2, 2.4, 4.1	<ul style="list-style-type: none"> Monitors adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment Appreciates implications of legal and regulatory responsibilities related to own work with specific reference to safety
Get the work done	1.1, 1.3-1.5, 2.1-2.3, 2.5, 2.6, 3.1-3.3, 4.1, 4.3	<ul style="list-style-type: none"> Reflects on how digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications Identifies concepts, principles and features of approaches in use in other contexts and considers how these may suit own situation Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may

		<p>contribute to longer-term operational and strategic goals</p> <ul style="list-style-type: none"> • Uses each experience to reflect on how variables impact decision outcomes, and to gain insights into what constitutes 'good' judgement and an effective decision in different contexts • Recognises and addresses some unfamiliar problems of increasing complexity within own scope

Assessment Requirements for BSBSMB405 Monitor and manage small business operations

Modification History

Release	Comments
Release 3	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
 - developing an action plan
 - identifying risk management procedures
 - developing a quality system
 - implementing performance measures
 - utilising technologies to optimise business performance
- implement and monitor strategies and procedures developed, including:
 - analysing and correcting business problems
 - reviewing and adjusting the business plan
- record and research business improvements
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise relevant industry codes of practice
- explain methods for implementing operation and revenue control systems
- summarise methods for monitoring performance and implementing improvements
- outline work health and safety (WHS) responsibilities and procedures for managing hazards
- identify relevant principles of risk management, including risk assessment
- clarify quality system principles and methods
- summarise relevant performance measures
- discuss role of innovation
- outline systems to manage staff, stock, expenditure, services and customer service
- identify technical or specialist skills relevant to business operations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop staffing plan	1.1 Determine staffing requirements to allow the business to run effectively, in accordance with requirements outlined in the

ELEMENT	PERFORMANCE CRITERIA
	<p>business plan</p> <p>1.2 Identify and compare existing skills of owner/s and staff with business requirements to identify any gaps</p> <p>1.3 Develop policies and procedures for owner/s and staff, in accordance with the business plan</p>
2. Recruit, induct, train and retain team	<p>2.1 Develop job or position descriptions, competencies required and selection criteria to meet business' needs</p> <p>2.2 Judge information obtained from each candidate against specified selection criteria, and select according to business needs and legal requirements</p> <p>2.3 Induct new staff members in accordance with policies and procedures of the business</p> <p>2.4 Make team members aware of their responsibilities and performance requirements as soon as practicable, and take opportunities to coach team members who are unfamiliar with procedures of the business</p> <p>2.5 Develop and implement a staff development program and career paths based on requirements of business and staff competencies</p> <p>2.6 Advertise staff vacancies appropriately in accordance with staffing plan</p>
3. Comply with industrial relations obligations	<p>3.1 Clarify workplace rights and obligations of employers and employees, in accordance with legal requirements and codes of practice</p> <p>3.2 Counsel staff, if required, in a positive and constructive manner and record outcomes accurately</p>
4. Maintain staff records	<p>4.1 Develop staff records system to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements</p> <p>4.2 Monitor and accurately maintain system for recording and retrieving personnel and payroll information, and seek specialist advice where required</p>
5. Manage staff	<p>5.1 Regularly review contribution and skills of self and other team members to ensure performance is in line with agreed performance measures</p> <p>5.2 Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business</p> <p>5.3 Support and encourage staff, and acknowledge and reward</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>their contribution</p> <p>5.4 Regularly provide opportunities for staff to discuss work related issues</p> <p>5.5 Develop contingency plans to cope with unexpected or extreme situations and take appropriate corrective action as required</p>
6. Review team performance	<p>6.1 Develop positive and constructive relationships with and between team members</p> <p>6.2 Review and update team objectives in support of business goals on a regular basis in consultation with team members</p> <p>6.3 Identify strengths and weaknesses of team against current and expected work requirements</p> <p>6.4 Schedule time, on a regular basis, for team members to review work operations to maintain and improve operational efficiency</p> <p>6.5 Encourage team members to monitor their own performance, suggest improvements and identify professional development needs, in accordance with personal and business requirements</p> <p>6.6 Monitor and review staff turnover rate</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.2, 2.3, 2.5, 2.6, 3.1, 4.1, 5.1, 6.3, 6.5, 6.6	<ul style="list-style-type: none"> Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.3, 2.1-2.6, 3.1, 3.2, 4.1, 4.2, 5.5, 6.1-6.3, 6.5	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.2, 2.2-2.4, 3.1, 3.2, 4.2, 5.3, 5.4, 6.1, 6.2, 6.4, 6.5	<ul style="list-style-type: none"> Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding Participates in verbal negotiations and coaching using tone and language suitable to audience

Numeracy	6.4	<ul style="list-style-type: none"> Uses basic mathematical formulas to review staff performances within available work schedules
Navigate the world of work	1.3, 2.2, 3.1, 4.1	<ul style="list-style-type: none"> Understands own legal rights and responsibilities and is extending understanding of general legal principles across work contexts Monitors adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment
Interact with others	2.4, 2.6, 5.3, 6.1, 6.5	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion Looks for ways of establishing connections and building genuine understanding with a diverse range of people Actively identifies important communication exchanges, selecting appropriate channels, format, tone and context to suit purpose and audience, and monitors impact
Get the work done	1.1, 1.2, 2.2, 2.3, 2.5, 4.2, 5.1, 5.2, 5.5, 6.3, 6.6	<ul style="list-style-type: none"> Uses digital technologies and systems safely, legally and ethically when gathering, storing, accessing and sharing information Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans

Assessment Requirements for BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use the business plan to:
 - determine staffing requirements
 - coordinate skill-gap training where required
 - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CPPCLO3020 Pressure wash and clean surfaces

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3020A Clean using pressure washing.

This version first released with CPP Property Services Training Package Version 4.

Application

This unit of competency specifies the outcomes required to set up and use pressure washing equipment to clean surfaces by producing a variable stream of water or cleaning chemical. The unit covers assessing the extent of the cleaning task, and selecting the equipment, chemicals and cleaning methods required for the task.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- | | |
|--|---|
| 1. Plan and prepare to clean using pressure washing. | 1.1. Type and condition of <i>surfaces</i> to be pressure washed are assessed, job requirements are reviewed, and issues are clarified. |
|--|---|

- 1.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
- 1.3. **Soil types** are identified by observation and **cleaning chemicals** required for the task are selected and prepared.
- 1.4. **Equipment** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
- 1.5. **Personal protective equipment** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
- 1.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
- 1.7. Pre-existing damage is identified and reported according to company requirements.
2. Use pressure washing equipment and techniques.
 - 2.1. Items requiring protection from pressure spray are covered and secured according to specified requirements.
 - 2.2. Heavily soiled areas are pre-sprayed according to manufacturer specifications and company requirements.
 - 2.3. Pressure washing is conducted using equipment and chemicals and according to manufacturer specifications.
 - 2.4. Hand washing is performed on areas requiring additional treatment, using suitable equipment and chemicals according to manufacturer specifications.
 - 2.5. Washed area is rinsed using required equipment and allowed to dry.
3. Tidy work site.
 - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
 - 3.2. Protective coverings are removed and items returned to position according to specified requirements.
 - 3.3. Signs and barricades are removed according to health and safety, and company requirements.

- | | |
|---|--|
| 4. Clean and safety check equipment, and store equipment and chemicals. | 4.1. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
| | 4.2. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements. |

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	<ul style="list-style-type: none"> • dilute and mix required chemicals using whole numbers and routine fractions.
Oral communication skills to:	<ul style="list-style-type: none"> • ask questions to clarify job requirements • respond clearly and concisely to client questions.
Reading skills to:	<ul style="list-style-type: none"> • interpret directions and safety instructions, including: <ul style="list-style-type: none"> • equipment operating manuals • product labels • safety data sheets (SDS).
Writing skills to:	<ul style="list-style-type: none"> • document and report faults in equipment to manufacturer and other personnel.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Surfaces</i> must include at least three of the following:	<ul style="list-style-type: none"> • brick, including rendered brick surfaces • concrete, including polished concrete • metal surfaces, including industrial kitchen equipment and industrial machinery • painted • polyresin.
--	---

- Hazards** that must be assessed include:
- biological and environmental contaminants
 - chemical exposure via absorption, ingestion and inhalation
 - chemical reactivity
 - dust and fibre particulates
 - electrical
 - environmental allergens
 - explosions
 - fatigue
 - fire
 - manual handling
 - noise
 - poor ventilation
 - slips, trips and falls
 - syringes and sharps
 - working in confined spaces.
- Health and safety requirements** must include:
- access to communication devices when working alone
 - compliance with Safe Work Australia regulations and guidelines
 - electrical equipment test and tag compliance
 - emergency response procedures
 - environmental controls
 - hazard signs and barricades
 - health and safety induction and refresher training
 - manual handling techniques
 - processes for safely dispensing chemicals
 - risk assessment procedures, including:
 - hazardous chemicals register
 - hierarchy of control
 - job safety analyses (JSA) for low-risk situations
 - safe work method statements (SWMS) for high-risk situations
 - incident reporting
 - SDS
 - selection and use of required PPE
 - storage and maintenance of equipment according to manufacturer specifications
 - use of first aid according to SDS information.
- Soil types** must include at least three of the following:
- graffiti
 - grease and oil
 - mould and mildew
 - pollution marks.
- Cleaning chemicals**
- acid cleaners

must include at least one of the following:

- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

Equipment must include at least two of the following:

- brooms
- cloths
- hoses
- lances
- pressure washers
- squeegees
- wet area electrical safety connections.

Personal protective equipment must include at least three of the following:

- ear muffs and plugs
- gloves
- eye protection
- disposable respirators
- safety shoes
- sun protection
- wet-work clothing.

Unit Mapping Information

CPPCLO3020A Clean using pressure washing

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPCLO3020 Pressure wash and clean surfaces

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3020A Clean using pressure washing.

This version first released with CPP Property Services Training Package Version 4.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also pressure wash three of the following surface types:

- brick, including rendered brick surfaces
- concrete, including polished concrete
- metal surfaces, including industrial kitchen equipment and industrial machinery
- painted
- polyresin.

In doing the above work, the person must:

- remove three of the following different soil types:
 - graffiti
 - grease and oil
 - mould and mildew
 - pollution marks
- identify site hazards and control risks before commencing the task
- identify surface and soil types
- select and prepare required cleaning equipment, including personal protective equipment (PPE) and cleaning chemicals
- use safe and efficient cleaning methods using pressure washing.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- suitability of different surfaces for pressure washing

- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning using pressure washing, including industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and disposing of waste, including:
 - chemicals past their expiry date
 - obsolete equipment
 - disposal of packaging
 - sweeping detritus
 - used containers
 - used or contaminated PPE
 - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
 - emergency chemical spill control measures
 - routes of entry and potential symptoms of exposure to chemicals
 - safe methods for distilling chemicals
 - working according to safety data sheets (SDS)
- range and functionality of equipment used in pressure washing
- procedures for selecting and applying cleaning chemicals required for different surfaces, including:
 - acid cleaners
 - alkaline cleaners
 - low environmental impact chemicals
 - neutral cleaners
 - solvent cleaners.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - as listed in the range of conditions
 - PPE as listed in the range of conditions
- materials:
 - cleaning chemicals as listed in the range of conditions
- specifications:
 - equipment operating manuals
 - product labels
 - SDS
- physical conditions:
 - suitable work site with range of surfaces as listed in the performance evidence
- relationships with team members and supervisor:
 - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPPCLO3035 Maintain cleaning storage areas

Modification History

Release 1.

Replaces superseded equivalent CPPCLO2035A Maintain cleaning storage areas.

This version first released with CPP Property Services Training Package Version 4.

Application

This unit of competency specifies the outcomes required to maintain cleaning consumable storage areas to ensure they are accessible to authorised personnel only, that their contents are safely stored, and that equipment is maintained in serviceable condition. It requires the ability to maintain and operate a safe and efficient cleaning storage area following established procedures for storing and using chemicals according to legislative and health and safety requirements. The unit includes the movement and control of equipment, chemicals and consumables used in the provision of cleaning services.

The unit supports cleaners who work alone or in teams. It applies to storage areas in a range of commercial and residential work sites, including cleaners' rooms at a client work site, chemical cupboards, equipment storage bays, and in-built vehicular storage arrangements to keep consumables and equipment secure during transportation.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of

conditions.

1. Ensure safety and security of cleaning storage area and its contents.
 - 1.1. **Storage area** is secured from unauthorised access according to legislative, company, and **health and safety requirements**.
 - 1.2. **Hazards** in storage area are assessed and risks controlled according to legislative, company, and health and safety requirements.
 - 1.3. Safety warning charts and labels are prominently displayed and **safety information** is made accessible according to legislative, company, and health and safety requirements.
 - 1.4. **Equipment** is stored, maintained and checked to enable ready access and re-use according to manufacturer specifications and legislative, company, and health and safety requirements.
 - 1.5. **Cleaning chemicals** and **consumables** are stored according to manufacturer specifications and legislative, company, and health and safety requirements.
 - 1.6. **Personal protective equipment** (PPE) is cleaned, safety checked and stored, and maintenance requirements are recorded, according to manufacturer specifications, and health and safety and company requirements.
 - 1.7. Communication tools are stored and used according to company requirements.
 - 1.8. Storage area is kept accessible and free of obstacles according to practical restrictions of site or vehicle, and health and safety and company requirements.
2. Control equipment, chemical and consumable stock.
 - 2.1. Inventory system of equipment, PPE, chemicals and consumables with maximum and minimum holding levels is maintained according to company requirements.
 - 2.2. Usage patterns are monitored and chemicals and consumables are re-ordered to maintain required levels according to company requirements.
 - 2.3. Labelling system of containers is maintained according to manufacturer specifications and legislative, company, and health and safety requirements.
 - 2.4. Chemicals and consumables are issued on a first-in

- first-out basis according to company requirements.
3. Handle waste.
 - 3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
 - 3.2. Obsolete equipment and chemicals are identified, collected and disposed of according to manufacturer specifications, and environmental, legislative, company, and health and safety requirements.
 4. Respond to emergency situations.
 - 4.1. Spillages and emergency situations are responded to in line with emergency response procedures and according to environmental, legislative, company, and health and safety requirements.
 - 4.2. Required documentation is completed following an emergency situation and submitted according to environmental, legislative, company, and health and safety requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"> • identify and access a range of resources to assist in maintaining security and safety of cleaning storage area.
Numeracy skills to:	<ul style="list-style-type: none"> • calculate current and required levels of stock.
Oral communication skills to:	<ul style="list-style-type: none"> • ask questions to clarify job requirements.
Reading skills to:	<ul style="list-style-type: none"> • interpret simple, structured manufacturer instructions when using equipment and chemicals • interpret directions and safety instructions, including: <ul style="list-style-type: none"> • equipment operating manuals • product labels • safety data sheets (SDS).
Writing skills to:	<ul style="list-style-type: none"> • report faults in equipment to manufacturer and other personnel • use legible handwriting when recording stock levels and completing incident reports.

- Teamwork skills to:
- work collaboratively with others accessing and using the same storage area.
- Initiative and enterprise skills to:
- proactively report the need for additional products or equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Storage area*** must include at least one of the following:
- cleaners' room located at client work site
 - in-vehicular cleaning storage facility.

- Health and safety requirements*** must include:
- access to communication devices when working alone
 - compliance with Safe Work Australia regulations and guidelines
 - electrical equipment test and tag compliance
 - emergency response procedures
 - environmental controls
 - hazard signs and barricades
 - health and safety induction and refresher training
 - manual handling techniques
 - processes for safely dispensing chemicals
 - risk assessment procedures, including:
 - hazardous chemicals register
 - hierarchy of control
 - job safety analyses (JSA) for low-risk situations
 - safe work method statements (SWMS) for high-risk situations
 - incident reporting
 - SDS
 - selection and use of required PPE
 - storage and maintenance of equipment according to manufacturer specifications
 - use of first aid according to SDS information.
- Hazards*** that must be assessed include:
- biological and environmental contaminants
 - chemical exposure via absorption, ingestion and inhalation
 - chemical reactivity
 - dust and fibre particulates

- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.
- chemical co-location, separation and segregation arrangements
- chemical manifests
- chemical registers
- company policies and procedures relating to workplace safety
- equipment operation manuals
- manufacturer specifications
- product labels
- SDS.

Safety information must include:

Equipment must include at least five of the following:

- access equipment, such as ladders
- bins
- brooms
- buckets
- buffers
- cleaning trolleys
- cloths
- cobwebbers
- doodle bag holders
- drop sheets
- drying equipment
- dustpans and brushes
- dusters
- extension poles
- extraction units
- wands
- hoses
- microfibre products
- mops
- polishers
- pressure-washing equipment and attachments
- scouring pads
- scrapers

- scrubbers
- sponges
- spray bottles
- squeegees
- steam cleaners
- sweepers
- vacuum cleaners and attachments
- window cleaning equipment
- work site communication devices.

Cleaning chemicals must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

Consumables must include at least two of the following:

- air fresheners
- hand towels
- liner bags
- soap
- toilet paper.

Personal protective equipment must include at least two of the following:

- disposable respirators
- eye protection
- gloves
- protective clothing
- safety shoes.

Unit Mapping Information

CPPCLO2035A Maintain cleaning storage areas

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPCLO3035 Maintain cleaning storage areas

Modification History

Release 1.

Replaces superseded equivalent CPPCLO2035A Maintain cleaning storage areas.

This version first released with CPP Property Services Training Package Version 4.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also maintain one of the following cleaning storage areas:

- cleaners' room located at client work site
- in-vehicular cleaning storage facility used to transport cleaning equipment from site to site.

In doing the above work, the person must:

- maintain cleaning storage area and stock levels, ensuring correct storage of equipment, chemicals and consumables required for work site and client requirements
- maintain the security and accessibility of storage area
- maintain accurate labelling of chemicals
- maintain legible stock control records and documentation
- access each of the following documentation:
 - accident and incident reporting documentation
 - job sheets
 - health and safety control procedures, forms and documentation
 - safety data sheets (SDS).

In doing the above work, the person must also implement correct emergency response procedures in the event of a chemical spillage on site or inside the cleaning storage area, including:

- undertaking correct clean-up procedures, including erecting required signs and barricades
- accurately and legibly completing required incident reporting documentation.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- application and operation of on-site communication tools, including:
 - mobile telephones
 - noticeboards
 - two-way radios
 - whiteboards
- documentation requirements in the event of an incident or accident
- environmental requirements relating to maintaining cleaning storage areas, including:
 - clean-up, containment and isolation procedures
 - environmental protection agency requirements relating to maintaining cleaning storage areas
 - use of low-energy cleaning methods
 - use of low-moisture cleaning methods
 - use of low water-use equipment and water-efficient cleaning methods
 - use of non-chemical cleaning methods
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to maintaining cleaning storage areas, including:
 - health and safety legislation
 - industry advisory standards and codes, such as dangerous goods codes
- safe handling techniques for working with hazardous chemicals, including:
 - emergency chemical spill control measures
 - routes of entry and potential symptoms of exposure to chemicals
 - safe methods for distilling chemicals
 - working according to SDS
- procedures for safe treatment and handling of the following waste:
 - chemicals past their expiry date
 - obsolete equipment
 - packaging
 - used containers
 - used or contaminated personal protective equipment (PPE)
 - used or unused chemicals
- processes for inventory and stock control and ordering replenishment stock
- manufacturer specifications for equipment and chemicals being used.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - as listed in the range of conditions

- PPE as listed in the range of conditions
- materials:
 - cleaning chemicals as listed in the range of conditions
 - consumables as listed in the range of conditions
- contingencies:
 - handling of chemicals that are past expiry
 - disposal of contaminated PPE and materials
 - handling of emergency situations
- specifications:
 - equipment operating manuals
 - product labels
 - SDS
- physical conditions:
 - access to commercial or residential cleaning site with suitable cleaning storage area
- relationships with team members and supervisor:
 - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPPCLO3036 Clean at heights

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3036A Clean at high levels.

This version first released with CPP Property Services Training Package Version 4.

Application

This unit of competency specifies the outcomes required to clean at heights above two metres from the ground or from a solid floor construction. It covers assessing the extent of the cleaning task and selecting the required equipment, chemicals and cleaning methods. Cleaning at heights may occur indoors or outdoors and can involve the use of specialised equipment to access the area to be cleaned.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. The unit does not apply to work requiring the use of elevated work platforms.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify work area 1.1. Work area and job requirements are identified and need

- requirements.
- for access equipment is confirmed according to work instructions.
- 1.2. Method of accessing work area is identified according to **safe work method statement** (SWMS).
 - 1.3. Access equipment is selected, set up and inspected for defects, and issues are reported and rectified before commencing cleaning tasks.
 - 1.4. Safe work methods for moving cleaning equipment and chemicals are identified to minimise risks.
 - 1.5. Personal protective equipment (PPE) is selected according to the work task, manufacturer specifications, and health and safety and company requirements.
 - 1.6. Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
 - 1.7. Drop sheets are placed on floor, furniture and equipment as required and according to client and site requirements.
2. Access area to be cleaned.
- 2.1. **Fall protection system** where required is correctly fitted, adjusted and anchored.
 - 2.2. Work site **hazards** are assessed and risks controlled according to company, legislative, and **health and safety requirements**.
 - 2.3. Access equipment is inspected for defects, and issues are reported and rectified within scope of own responsibilities according to health and safety requirements.
 - 2.4. Cleaning equipment and chemicals are positioned to eliminate risk of items falling.
3. Conduct cleaning tasks.
- 3.1. Cleaning is conducted following approved procedures and SWMS.
 - 3.2. Communication with team members and other site personnel is maintained as required to progress cleaning tasks within agreed timelines.
 - 3.3. Fall protection system is kept in place and adjusted to cater for movement during cleaning process.
 - 3.4. Scaffold components and fall barriers are kept in place during cleaning process.

- 3.5. Work area is exited following SWMS and supervisor-approved methods for moving self, cleaning equipment and chemicals to ground level.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	<ul style="list-style-type: none"> • dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.
Oral communication skills to:	<ul style="list-style-type: none"> • ask questions to clarify job requirements.
Reading skills to:	<ul style="list-style-type: none"> • interpret safety instructions in a range of texts, including: <ul style="list-style-type: none"> • equipment manuals • safety data sheets (SDS).
Writing skills to:	<ul style="list-style-type: none"> • document and report faults in equipment to manufacturer and other personnel.
Planning and organising skills to:	<ul style="list-style-type: none"> • locate and apply instructions for cleaning tasks • plan and schedule cleaning tasks.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Safe work method statement</i> must include:	<ul style="list-style-type: none"> • tools and equipment, including PPE prescribed by legislation, regulations, and work site and workplace requirements • establishing exclusion areas using signs and barricades • hazard identification and risk assessment for work site and job tasks • health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures • risk control measures to be implemented for job tasks • safe operating procedures for:
--	--

- accessing, moving within, and leaving work site
 - moving and placing tools, equipment and materials
 - using tools and equipment at heights.
- Fall protection systems*** must include at least one of the following:
- lanyards
 - harness.
- Hazards*** that must be assessed include:
- biological and environmental contaminants
 - chemical exposure via absorption, ingestion and inhalation
 - chemical reactivity
 - dust and fibre particulates
 - electrical
 - environmental allergens
 - explosions
 - fatigue
 - fire
 - manual handling
 - noise
 - poor ventilation
 - slips, trips and falls
 - syringes and sharps
 - working in confined spaces.
- Health and safety requirements*** must include:
- access to communication devices when working alone
 - compliance with Safe Work Australia regulations and guidelines
 - electrical equipment test and tag compliance
 - emergency response procedures
 - environmental controls
 - hazard signs and barricades
 - health and safety induction and refresher training
 - manual handling techniques
 - processes for safely dispensing chemicals
 - risk assessment procedures, including:
 - hierarchy of control
 - job safety analyses (JSA) for low-risk situations
 - SWMS for high-risk situations
 - incident reporting
 - SDS
 - selection and use of required PPE
 - storage and maintenance of equipment according to manufacturer specifications
 - use of first aid according to SDS information.

Unit Mapping Information

CPPCLO3036A Clean at high levels

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for CPPCLO3036 Clean at heights

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3036A Clean at high levels.

This version first released with CPP Property Services Training Package Version 4.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- identify, assess and manage risks while completing three different cleaning tasks at a height above two metres from the ground or from a solid floor construction, with one of the cleaning tasks requiring the use of a fall protection system
- transport cleaning equipment and chemicals to the above work areas
- complete the above cleaning tasks using the transported cleaning equipment and chemicals
- return the cleaning equipment and chemicals to ground level at job completion.

In doing the above work, the person must:

- locate, interpret and apply cleaning task information, standards and specifications
- select, prepare and use required access and fall protection system and work methods
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning at heights, including:
 - Australian standards and codes of practice for the safe use of ladders
 - work health and safety legislation when cleaning at heights
- preparation and safe use of access equipment when cleaning, including:
 - bosun chairs

- building maintenance units
- extension poles
- industrial rope access
- ladders, including extension ladders
- scaffolding
- water-fed extension brooms
- processes for identifying and reporting faults in access equipment and fall protection systems.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - access equipment required for site
 - cleaning equipment required for task
 - fall protection systems required for site
 - signs and barricades required for task
- materials:
 - cleaning products required for task
- specifications:
 - safe work method statement (SWMS)
- physical conditions:
 - suitable venue with cleaning required at least two metres above ground or a solid floor construction
 - suitable weather conditions if task performed outdoors
- contingencies:
 - faults in access equipment
- relationships with team members and supervisor:
 - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPPCLO3038 Clean food-handling areas

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3038A Clean food-handling areas.

This version first released with CPP Property Services Training Package Version 4.

Application

This unit of competency specifies the outcomes required to clean areas where food is dispatched, handled, inspected, packaged, prepared, processed, received, stored and transported. The unit covers assessing the extent of the cleaning task and selecting required cleaning equipment, chemicals and methods.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites, including food courts and commercial or industrial food-processing kitchens or plants.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- | | |
|------------------------------|---|
| 1. Plan and prepare to clean | 1.1. Work site <i>hazards</i> , including cross-contamination, are assessed and risks controlled according to company, |
|------------------------------|---|

- food-handling areas.
- legislative, and *health and safety requirements*.
- 1.2. Requirements of food-safety program applicable to the area are accessed, interpreted and applied to planning.
 - 1.3. *Surfaces* and *soil types* are identified by observation, and cleaning techniques and *cleaning chemicals* required for task are selected and prepared.
 - 1.4. *Equipment* is selected, checked for serviceability and compliance with cleaning and sanitation requirements of food-safety program, and faults are rectified or reported before starting work.
 - 1.5. *Personal protective equipment* (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
 - 1.6. *Consumables* are obtained to meet anticipated usage patterns according to company requirements.
 - 1.7. Signs and barricades are selected and installed according to health and safety, and company requirements.
2. Replenish consumables and remove waste.
 - 2.1. Consumables are replenished according to client and company requirements.
 - 2.2. Rubbish bins are emptied, cleaned and sanitised according to specified requirements, and new replacement bin liners are inserted.
 - 2.3. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
3. Clean food-handling surfaces.
 - 3.1. Loose dirt and debris are removed from food-handling surfaces prior to applying cleaning treatment.
 - 3.2. Physical movement around food-handling areas is conducted according to food-safety program.
 - 3.3. Chemicals are applied to surfaces and allowed to dwell according to manufacturer specifications and company requirements.
 - 3.4. Surfaces are thoroughly rinsed and allowed to dry according to company requirements.
 - 3.5. Practices inconsistent with food-safety program are reported according to company requirements.

- | | |
|---|--|
| 4. Sanitise food-handling surfaces. | 4.1. Chemical sanitisers or heat are applied to food-handling surfaces according to job requirements. |
| | 4.2. Surfaces are thoroughly rinsed and allowed to dry according to company requirements. |
| 5. Clean, safety check and store equipment. | 5.1. Signs and barricades are removed according to health and safety, and company requirements. |
| | 5.2. Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements. |
| | 5.3. Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements. |

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	<ul style="list-style-type: none"> • source and apply requirements of different food-safety programs to different food-handling environments.
Numeracy skills to:	<ul style="list-style-type: none"> • perform calculations required for diluting and mixing chemicals as specified on product labels.
Oral communication skills to:	<ul style="list-style-type: none"> • ask questions to clarify job requirements.
Reading skills to:	<ul style="list-style-type: none"> • interpret manufacturer instructions when using equipment and preparing chemicals • read and interpret directions and safety instructions, including: <ul style="list-style-type: none"> • chemical labels • safety data sheets (SDS).
Writing skills to:	<ul style="list-style-type: none"> • document and report faults in equipment to manufacturer and other personnel.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

- Hazards*** that must be assessed include:
- biological and environmental contaminants
 - chemical exposure via absorption, ingestion and inhalation
 - chemical reactivity
 - dust and fibre particulates
 - electrical
 - environmental allergens
 - explosions
 - fatigue
 - fire
 - manual handling
 - noise
 - poor ventilation
 - slips, trips and falls
 - sharps.
- Health and safety requirements*** must include:
- access to communication devices when working alone
 - compliance with Safe Work Australia regulations and guidelines
 - electrical equipment test and tag compliance
 - emergency response procedures
 - environmental controls
 - hazard signs and barricades
 - health and safety induction and refresher training
 - manual handling techniques
 - processes for safely dispensing chemicals
 - risk assessment procedures, including:
 - hazardous chemicals register
 - hierarchy of control
 - job safety analyses (JSA) for low-risk situations
 - safe work method statements (SWMS) for high-risk situations
 - incident reporting
 - SDS
 - selection and use of required PPE
 - storage and maintenance of equipment according to manufacturer specifications
 - use of first aid according to SDS information.
- Surfaces*** must include
- ceramics and porcelain

at least five of the following:

- chrome
- concrete
- floors and walls
- fridge and freezer seals
- glass
- laminate
- metal
- paint
- plastic
- stainless steel
- stone
- terracotta
- vinyl.

Soil types must include at least three of the following:

- baked-on food and grease
- dust
- food and drink stains
- food and drink residue
- grease and oil
- litter
- mould
- rust
- tannin stains.

Cleaning chemicals must include at least one of the following:

- acid cleaners
- alkaline cleaners
- low environmental impact chemicals
- neutral cleaners
- solvent cleaners.

Equipment must include at least five of the following:

- brooms
- brushes and dustpan
- buckets
- cleaning trolleys
- cloths
- disposable wipes
- doodle bugs
- hoses and nozzles
- mops
- sharps disposal units
- scourers
- scrapers
- scrubbing and polishing machines
- scrubbing brushes
- tongs

- Personal protective equipment* must include at least two of the following:
- squeegees.
 - disposable respirators
 - eye protection
 - gloves
 - hair nets
 - safety shoes
 - tongs.
- Consumables* must include at least two of the following:
- air fresheners
 - bin liners
 - disposable gloves
 - paper hand towels
 - liquid hand-soap.

Unit Mapping Information

CPPCLO3038A Clean food-handling areas

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPCLO3038 Clean food-handling areas

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3038A Clean food-handling areas.

This version first released with CPP Property Services Training Package Version 4.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean three of the following different food-handling areas:

- commercial food-preparation area
- commercial food-processing area
- food court
- food storage area
- refrigeration area
- public food-handling area
- residential food-handling area.

In doing the above work, the person must:

- identify and control site hazards, including contamination hazards, before commencing cleaning, and take steps to prevent identified hazards
- identify type of surfaces and soil present in the work area
- select cleaning equipment required for the task
- fit and use personal protective equipment (PPE) as required by work tasks to meet food business requirements
- maintain housekeeping standards in food-handling area and dispose of waste to meet food-handling requirements
- maintain personal hygiene to ensure that food safety is not compromised
- replenish two different types of consumables.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- methods for cleaning food-handling areas, including the use of microfibre products
- methods for cleaning surfaces in food-handling areas
- cleaning and sanitation requirements of food-handling areas, including:
 - required chemicals, equipment and cleaning methods
 - personal hygiene practices, including:
 - clothing and footwear requirements associated with working and moving in and between food-handling and non food-handling areas
 - washing hands before entering food-handling areas
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning food-handling areas, including Food Safety Standard 3.2.2, Clause 17:3
- processes for safely handling and disposing of waste, including:
 - chemicals past their expiry date
 - obsolete equipment
 - disposal of packaging
 - sweeping detritus
 - used containers
 - used or contaminated PPE
 - used or unused chemicals
- processes for recording and reporting health conditions and illness as required by workplace food-safety procedures
- purpose and operation of food-safety program as it applies to cleaning food-handling areas, including specifications for:
 - how hazards can be controlled
 - how controls are monitored
 - corrective actions required if conditions are not met
 - information to be recorded and procedures to be signed off
 - key requirements of legislation and regulations relating to work in food-handling areas
 - responsibilities for any person visiting or working in food-handling areas
 - minimum procedures to ensure person does not:
 - contaminate food
 - have unnecessary contact with ready-to-eat food
 - spit, smoke or use tobacco or similar in food-handling areas
- range of potential contamination hazards in food-handling areas, including:
 - chemical contamination of food caused by cleaning and sanitation chemicals
 - microbiological contamination of food resulting from cross-contamination when moving into and between food-handling areas
 - physical contamination of food caused by metal, glass, plastic and cloths used in the cleaning process
- routes of entry and potential symptoms of exposure to chemicals

- types and application of different signs and barricades to be installed prior to cleaning, including:
 - physical barricades and restraints erected to restrict access to site
 - signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
 - cleaning in progress
 - hazardous chemicals in use or present in work area.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - as listed in the range of conditions
 - PPE as listed in the range of conditions
- materials:
 - cleaning chemicals as listed in the range of conditions
 - consumables as listed in the range of conditions
- specifications:
 - Food Safety Standard 3.2.2, Clause 17:3
 - food-safety program
 - work instructions and schedules
- physical conditions:
 - work site with food-handling areas
- relationships with team members and supervisor:
 - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

FDFAU4001A Assess compliance with food safety programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers skills and knowledge required to assess compliance against an approved food safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to regulatory, commercial or internal auditors.</p> <p>When this unit is applied to regulatory auditing it should be noted that the National Food Safety Audit Policy for regulatory auditing requires that the unit FDFAU4002A Communicate and negotiate to conduct food safety audits, must be pre or co-assessed with this unit when applied to assessing compliance against approved food safety programs that have been validated by a technical expert.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan the audit	<p>1.1. An audit plan is developed to meet the audit scope</p> <p>1.2. The plan is capable of delivering the required outcomes within resource and time allocations</p> <p>1.3. Plan includes audit purpose, scope and relevant templates or approved food safety program</p> <p>1.4. Activities and responsibilities for the audit are identified</p> <p>1.5. Audit timing (as required by legislation and/or client) is identified including timetable for each stage of the audit</p> <p>1.6. Resource, personnel and reporting requirements are identified</p> <p>1.7. Follow up and completion procedures are identified</p> <p>1.8. Communication protocols are identified and established to facilitate the effective exchange of information and suited to the auditee environment</p>

ELEMENT	PERFORMANCE CRITERIA
2. Confirm that the food business has documented required preliminary work	2.1.The food and the method of distribution are defined 2.2.Customers and intended use of food is identified 2.3.The process is described and documented 2.4.The food business has checked their documentation for accuracy and completeness
3. Confirm the food safety program is supported by a tool or template or has been validated	3.1.The documented food safety program and related procedures and prerequisite programs are assessed to confirm that they have a prescriptive tool or have been validated by a technical expert 3.2.The food business method of identifying and analysing food safety hazards is reviewed 3.3.Templates or the approved food safety program are correctly selected to meet audit scope 3.4.Templates or the approved food safety program are appropriately adapted to suit the needs of the business without adversely affecting food safety 3.5.Documented verification records are reviewed to confirm that the requirements of the food safety program are being met 3.6.Corrective actions required where processes are identified as not meeting targets or critical limits are assessed to confirm they meet the requirements of the template or food safety program 3.7.Food safety prerequisite programs are assessed to confirm they are appropriate for the food business/industry sector to maintain a safe food environment 3.8.Food safety program documents are reviewed to confirm currency, accuracy and adequacy to facilitate maintenance of an adequate food safety program
4. Collect evidence to review and assess implementation of food safety programs	4.1.Evidence is collected to confirm that documented programs and procedures are working effectively, reflect actual practice and are consistently applied 4.2.Evidence is collected to confirm that food safety monitoring and corrective actions are carried out according to procedure 4.3.Evidence is collected to confirm that safety prerequisite programs are effective and consistently followed 4.4.Evidence is collected to confirm that food safety records are completed and provide an accurate

ELEMENT	PERFORMANCE CRITERIA
	<p>record of events</p> <p>4.5.Evidence is collected to confirm that records are accessed and analysed to confirm effective program maintenance in accordance with the template or food safety program</p> <p>4.6.Evidence is collected to confirm that food safety skills and knowledge of food business personnel is commensurate with their work role</p> <p>4.7.Evidence is collected to confirm that the food safety program has been internally monitored and assessed, updated and improved by a technical expert</p>
5. Manage the audit process	<p>5.1.Audit progress is monitored against the audit plan and any variation to plan is identified and addressed</p> <p>5.2.Circumstances requiring the audit plan to be adjusted are identified and negotiated in a timely manner</p> <p>5.3.Audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards</p> <p>5.4.The audit process is reviewed to identify opportunities for improvement</p>
6. Consolidate audit outcomes	<p>6.1.Audit evidence is analysed and assessed to identify any areas of non-compliance with legislation and/or the food safety program</p> <p>6.2.Non-conformities are identified and classified as agreed by the audit plan</p> <p>6.3.Non-conformities are reported in accordance with agreed client and/or legislative requirements</p> <p>6.4.Audit reports and/or certificates are prepared and submitted or presented as required to meet regulatory and client requirements</p> <p>6.5.A corrective action implementation plan defining proposed actions and timelines developed by the auditee is reviewed by the auditor to confirm that template or food safety program requirements are met</p> <p>6.6.Audit findings are reviewed to confirm that evidence is sufficient as defined by the template or approved food safety program</p>
7. Confirm and close out corrective actions	<p>7.1.Implementation and effectiveness of corrective action is monitored and verified against the template or the approved food safety program</p>

ELEMENT	PERFORMANCE CRITERIA
	7.2. Audit records are maintained to record corrective actions

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- plan and organise audit activities
- identify work processes and work flow
- interpret food safety programs including flow charts, standard operating procedures (SOPs), and other process documentation
- describe each process step and identify food safety hazards
- conduct research to identify, collect and analyse evidence of compliance with food safety programs
- use communication skills to support evidence collection and outcome presentation
- identify and classify non-compliances
- prepare audit reports and certificates to meet regulatory and client requirements
- review corrective action implementation plans
- monitor the implementation of corrective actions
- maintain audit records

Required knowledge

Knowledge of:

- required content and scope of food safety programs as defined in the National Food Safety Standard 3.2.1 or other relevant standards
- purpose and minimum requirements of risk-based approaches to managing food safety hazards, including the role of prescriptive templates or approved food safety programs in supporting a risk-based approach and the process used to validate these tools
- guidelines on implementing industry templates or approved food safety programs
- legal requirements of food businesses
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- audit activities and principles, including guidelines on audit stages and activities as

REQUIRED SKILLS AND KNOWLEDGE

outlined in ISO 19011:2002

- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional system owner requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- evidence appropriate for use in audit processes, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- vocabulary and terms relating to food safety programs, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- common biological, physical and chemical hazards that may occur in the food business and appropriate methods of control and critical limits as outlined in the approved food safety program or template
- the impact of (1) the design and construction of premises and (2) the selection, application and condition of equipment, on food safety as defined in Food Safety Standard 3.2.3
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority to initiate cessation of an audit
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the of food safety and food hygiene relevant to the food business

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to assess compliance against an approved food

EVIDENCE GUIDE	
	<p>safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • confirm that the food safety program and/or template is appropriate to the activities of the business • review food safety program records to assess compliance against the approved food safety program and/or template • collect and analyse evidence to confirm that the food safety program is consistently followed and controls all critical risks • identify circumstances where variation or customising of the template or food safety program requires further validation • submit non-compliance reports to clearly identify the aspects of the food safety program that have broken down/need further development in order to prevent recurrence.
Context of and specific resources for assessment	<p>Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the scenarios should be assessed in an actual workplace context.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"> • food safety plans • food safety-related documentation required to implement and record the food safety plan • evidence and documentation relevant to processes that would typically be used to assess compliance with the food safety program • plant and equipment that would typically be used in a commercial manufacturing business.

EVIDENCE GUIDE	
Method of assessment	<p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package. The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and a report covering the critical aspects for assessment identified above • questioning to test the level and application of knowledge • workplace example or scenario to allow a valid decision on the compliance of the food safety program to be made, with evidence of recording and feedback.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Food safety program	<p>Food safety programs include both prerequisite programs and a risk-based analysis of food safety hazards to determine required control measures to eliminate, prevent or reduce hazards.</p> <p>Minimum legal requirements for food safety programs are specified in National Food Safety Standard 3.2.1 or other relevant legislative requirements.</p> <p>The food safety program may be based on a template or externally developed program that is adapted to the needs of the business</p>

RANGE STATEMENT	
Licensing/certification requirements	Licensing and certification requirements are determined by system owners
Technical expert	<p>The requirements of a technical expert are determined by the system owner. System owners may include:</p> <ul style="list-style-type: none"> • government regulators as well as private system owners
Audit scope	<p>The scope describes the purpose, extent and boundaries of the audit. This may include:</p> <ul style="list-style-type: none"> • physical locations • products • processes • time period covered by the audit • extent of authority of the auditor
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP)</p> <p>Prerequisite programs can be divided into two categories.</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design and construction of buildings and facilities • supplies of air, water energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures

RANGE STATEMENT	
	<ul style="list-style-type: none"> • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Legal requirements	<p>The scope of the audit determines and may be determined by food safety legislation which may include:</p> <ul style="list-style-type: none"> • Food Standards Code • relevant state and territory legislation and related codes of practice, including industry sector-specific legislation and related codes of practice, such as that relating to meat, seafood, dairy and primary production and processing • regulatory and commercial requirements relevant to importing countries • Commonwealth legislation (e.g. Export Control Act) <p>Other legislation which may impact on the conduct of a food safety auditor may include legislation covering:</p> <ul style="list-style-type: none"> • occupational health and safety (OHS), anti-harassment, anti-discrimination and industrial relations • trade practices legislation • environmental risk management • legal contracts or agreements
Food businesses	<p>A food business refers to a business, enterprise or activity where food is produced, processed, stored, displayed and/or sold. It may also include primary producers</p>
Food safety program documents	<p>Food safety program documents may include:</p> <ul style="list-style-type: none"> • documented statements of food safety policy

RANGE STATEMENT	
	and objectives <ul style="list-style-type: none"> • documented procedures and records • documented complaints register • documents and records to ensure the effective development, implementation and updating of the food safety program
Risk-based approaches	Risk-based approaches to controlling food safety are typically based on HACCP, described in the Codex Alimentarius guidelines

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a communication plan to support audit processes	<p>1.1.Roles and responsibilities of the auditee are defined and agreed by both parties to address the audit scope</p> <p>1.2.Roles and responsibilities of all personnel involved in the audit process are defined, communicated and agreed</p> <p>1.3.Appropriate communication methods and protocols are determined and specific arrangements, including reporting requirements, are agreed</p> <p>1.4.A communication plan is developed to identify the communication requirements and responsibilities of personnel involved in the audit process</p>
2. Select and use appropriate communication methods to conduct an audit	<p>2.1.Appropriate communication methods are used to establish and maintain effective client relationships, collect audit evidence, provide and present information, facilitate meeting processes, facilitate issue management and conflict resolution and communicate audit findings</p> <p>2.2.Communication methods are selected to take account of system owner and food business requirements, workplace culture and individual differences</p> <p>2.3.Information provided by the auditee is interpreted in the context of the industry sector, language and culture of the business</p>
3. Negotiate to achieve agreement on audit outcomes	<p>3.1.Areas of disagreement over audit outcomes are identified and clarified with the auditee</p> <p>3.2.Understanding is sought on actions to be followed to</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>resolve outstanding issues</p> <p>3.3. Communication techniques are applied to encourage all relevant parties to participate and express their views fully</p> <p>3.4. Auditee views are treated with respect</p> <p>3.5. Options for resolving differences are explored to reach agreement and meet audit timeline and resource parameters</p> <p>3.6. Appropriate issue resolution strategies are explored to increase the likelihood of agreement on steps required to conclude the audit</p> <p>3.7. The negotiation process is managed to maintain constructive client relationships</p> <p>3.8. Any areas of continuing non-compliance that result from unresolved differences are reported to system owners and appropriate authorities as required</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select, design and use appropriate communication methods and techniques to support the audit process and the needs of the audience
- apply strategies to communicate with people at different levels of the food business with different English language, literacy and technical skill levels
- facilitate groups to resolve sensitive and/or conflict-based issues
- structure and present written and verbal information that is thorough, legible, clear, accurate and appropriate to the purpose and the audience
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- communicate information in environments where the recipients may be hostile to the information being presented
- apply issue resolution strategies

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- legislation that impacts on acceptable communication methods and conduct, including anti-discrimination, anti-harassment and privacy legislation
- vocabulary and terms relevant to audit process, including terms and jargon to describe food safety legislation, technical processes and industry standards
- confidentiality needs and expectations of food businesses
- strategies to communicate in culturally diverse environments
- dynamics of conflict and strategies to manage resolution
- the structure, authority levels and lines of reporting within a food business
- communication methods relevant to different groups and audiences
- reporting formats and requirements to meet client and legislative needs

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to select and use appropriate methods of communication and negotiation to support audit processes. This unit should be assessed together with other food safety auditing units.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- design a communication plan to meet the needs of stakeholders in an audit process, specifically where a number of participants have limited English language and literacy skills
- facilitate and negotiate to seek understanding of audit outcomes in a conflict-based situation where the outcomes are contested by the auditee. This component of assessment must provide opportunities to select and apply appropriate communication

EVIDENCE GUIDE	
	methods.
Context of and specific resources for assessment	Competency may be assessed in an actual workplace or simulated environment where the simulated context provides access to audit findings which are disputed by the auditee. At least one of the audit scenarios should be assessed in an actual workplace context. A simulated environment must provide access to a typical range of personnel with communication skill levels appropriate to food businesses and to the roles of personnel involved in food safety audit processes.
Method of assessment	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation of communication and conflict management skills • a report for a communication plan to conduct a food safety audit • questioning to test the level and application of knowledge • a journal or report on communication strategies used in conducting a food safety audit. <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT	
Licensing/certification requirements	This unit is part of a set of units that are a minimum requirement for auditors of food safety programs
Communication plan	<p>A communication plan identifies:</p> <ul style="list-style-type: none"> • the type and purpose of information to be provided through each stage of the audit process • audiences for types of information • the form or method of communication (e.g. written report, verbal presentation) • when/how often the communication will occur reporting procedures and responsibilities, including reporting timelines, formats and procedure for reporting serious/critical food safety hazards
Communication methods and protocols	<p>Methods of communication may include:</p> <ul style="list-style-type: none"> • written presentations and reports • two-way verbal interaction • constructive feedback • active listening • questioning to elicit, confirm and clarify information • interview techniques • facilitation of meetings and group processes • interpreting non-verbal skills and body language <p>Communication protocols may include:</p> <ul style="list-style-type: none"> • confidentiality • objectivity • information access and dissemination • levels of communication/lines or reporting • timeliness of providing information/responding to information requests
Food business requirements	<p>Business requirements may require that communication is consistent with:</p> <ul style="list-style-type: none"> • confidentiality requirements • legal requirements and related policies and procedures relating to communication

RANGE STATEMENT	
	<p>requirements</p> <ul style="list-style-type: none"> • professional codes of conduct/personal attributes of auditors • information that is accurate, thorough and clearly presented • resource parameters • organisational structure and delegated levels of authority • existing communication mechanisms and systems used in the auditee's workplace
Individual differences	<p>Individual differences may include but are not limited to:</p> <ul style="list-style-type: none"> • age • race • gender • culture • religion • impairment/disability • physical features • educational background • technical skill level • communication styles and skill levels • English language and literacy • any other individual characteristics that may need to be taken into account in designing communication as covered by relevant legislation
Issue resolution strategies	<p>Issue resolution strategies may include:</p> <ul style="list-style-type: none"> • establishing open communication practices to encourage the trust and engagement of all parties • designing processes that ensure all parties have opportunities to fully express their position • involving personnel with additional expertise (this may include other expertise from the auditing body and/or the regulator) • validating evidence used to support audit findings

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define the scope of the audit	1.1. Audit scope is identified and defines the extent of the audit to meet legislative and audit client requirements 1.2. Audit criteria meet legislative and client requirements 1.3. The definition and levels of non-conformity and related reporting responsibilities are identified consistent with legislative requirements and client requirements 1.4. Evidence required to address audit scope and criteria

ELEMENT	PERFORMANCE CRITERIA
	<p>is identified and appropriate collection methods are selected</p> <p>1.5. Food safety management system documents are reviewed to determine adequacy for the purposes of the audit</p>
2. Plan the audit	<p>2.1. An audit plan is developed that includes definitions and levels of non-conformity to meet the audit scope</p> <p>2.2. Activities and responsibilities for the audit are identified</p> <p>2.3. Audit timing (as required by legislation and/or client) is identified, including timetable for each stage of the audit</p> <p>2.4. Resource, personnel and reporting requirements are identified</p> <p>2.5. Follow up and completion procedures are identified</p> <p>2.6. Communication protocols are established to facilitate the effective exchange of information and suited to the auditee environment</p>
3. Conduct the audit	<p>3.1. Information on the audit scope and methodology is communicated in an effective and timely manner</p> <p>3.2. Stages and activities of the audit process are followed</p> <p>3.3. Methods used by the food business to carry out preliminary work, identify food safety hazards and assess level of risk are reviewed to confirm that they are appropriate and correctly applied</p> <p>3.4. Evidence used by the food business to support identification of control measures and establish control limits is identified and evaluated to determine adequacy and relevance</p> <p>3.5. Methods used by the food business to control hazards and determine corrective action where processes are identified as not meeting targets or critical limits are reviewed to confirm they are adequate, effective and appropriate</p> <p>3.6. Evidence is collected to confirm that the documented food safety policies and procedures are working effectively, reflect actual practice and are consistently applied</p>
4. Manage the audit process	<p>4.1. Audit progress is monitored against the audit plan and any variation to plan is identified and addressed</p> <p>4.2. Circumstances requiring the audit plan to be</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>adjusted are identified and negotiated in a timely manner</p> <p>4.3. Audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards</p> <p>4.4. The audit process is reviewed to identify opportunities for improvement</p>
5. Consolidate audit outcomes	<p>5.1. Evidence is analysed and assessed to identify any areas of non-compliance with legislation and/or client requirements as appropriate to the audit scope</p> <p>5.2. Non-conformities are identified and classified as agreed by the audit plan</p> <p>5.3. Non-conformities are reported in accordance with agreed client and/or legislative requirements</p> <p>5.4. Audit findings are communicated to the auditee</p> <p>5.5. Audit reports and/or certificates are prepared and submitted or presented as required to meet regulatory and client requirements</p> <p>5.6. Corrective actions proposed by the auditee in response to non-conformances are reviewed for compliance with the template or food safety program</p> <p>5.7. Audit findings are reviewed to confirm that evidence is appropriate and sufficient and findings are accurate</p> <p>5.8. The food safety management system is reviewed to identify areas of potential improvement of the system according to audit scope</p>
6. Confirm and close out corrective actions	<p>6.1. Implementation and effectiveness of corrective actions are monitored and verified and any variation to the food safety plan is identified and addressed</p> <p>6.2. Audit records are maintained to record corrective actions</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of food businesses relevant to the industry sector
- plan and manage audit activities
- communicate information in ways appropriate to the purpose and the audience and to facilitate opening and closing meetings
- negotiate and facilitate audit processes, including following meeting procedures and resolving issues
- select and use research skills relevant to audit activities, including researching technical sources to validate food safety programs and collecting evidence to support verification
- consolidate audit findings based on objective evidence
- prepare records and reports appropriate to the purpose of the audit and the needs of the auditee and the client (system owner/regulator)

Required knowledge

Knowledge of:

Auditor roles and responsibilities

- audit activities and stages, including guidelines on audit stages and activities as outlined in ISO 19011:2002
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional client requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
- relevant competencies and certification/registration criteria and processes applying to both regulatory and commercial auditors
- audit management to develop and implement an audit against an agreed plan, including the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan

Food safety management systems

- purpose and intent of each element of a food safety management system
- the underlying principles of risk-based approaches to controlling food safety hazards, including HACCP as described in the Codex Alimentarius Guidelines
- vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- food safety management system knowledge relevant to the system being audited., including system requirements, definitions and levels of non-compliance and

REQUIRED SKILLS AND KNOWLEDGE

related reporting responsibilities as defined by legal and management system requirements

- the interaction between different types of management systems, including the impact of food safety decisions on other management systems, such as occupational health and safety (OHS), quality, environmental risk management and animal welfare
- technical knowledge required to assess the adequacy of the food safety management system performance and corrective actions
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements

Food safety legislation

- the purpose and intent of food safety legislation, including sources of information on importing country requirements and of requirements of countries and retailer driven systems in importing markets
- the content covered by the Food Standards Code and/or other relevant standards
- the structure and responsibilities of commonwealth, state and territory government departments and local government to manage and implement food safety legislation, including where to find information on relevant commonwealth, state/territory legislative requirements, product or industry sector legislation and regulations and import and export market requirements
- the regulatory framework and specific legislation relevant to the audit, including relevant risk profiling or classification systems where they apply
- sources of information on legislation and codes governing primary production and primary processing
- requirements for scheduling and conducting further auditing as determined by food safety legislation and/or client system requirements
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- the role of auditors when called on to provide evidence as a witness in court

Food safety audit processes

- preliminary work required to identify food to be covered by the food safety program, define the food and the method of distribution, identify customers and intended use of food, describe the process (flowchart) and check accuracy and completeness
- methods used identify food safety hazards and assess food safety hazard risk levels taking account of severity and likelihood of occurrence
- methods used to identify critical control points and establish critical limits, suited

REQUIRED SKILLS AND KNOWLEDGE

- to the nature of the hazard, the requirements of the audit and the industry sector
- methods used to validate control techniques and critical limits, including industry or sector codes of practice, technical standards and research
- types of evidence, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- evidence collection methods, including record sampling and sample analysis, and the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range/extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the required skills and knowledge of food safety and food hygiene relevant to the food business
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority of an auditor to initiate cessation of an audit
- understanding of the context in which audits are conducted, including workplace culture and preferred communication methods, industry, process and/or product knowledge and related jargon
- information recording requirements and audit reporting requirements

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- Identify food safety legislation applying to a food business. Legislative requirements may relate to

EVIDENCE GUIDE

	<p>actual or hypothetical food businesses. A minimum of two scenarios must be covered providing that at least one food business operates in a market segment that has to meet compliance requirements in place of or in addition to the Food Standards Code. One such market segment is export meat processors who must comply with the Export Control Act and the Export Meat Orders.</p> <ul style="list-style-type: none"> • The assessment activity must: <ul style="list-style-type: none"> • identify the relevant legislation applying to the food business taking account of the industry sector, range of food handling activities undertaken and the markets into which products and/or services are sold. • locate advice on relevant authorities and enforcement agencies in a state or territory and for international markets as appropriate. • explain the legal responsibilities of a given food business. • Plan and conduct an audit that complies with legal and client requirements as appropriate. The criteria and evidence requirements may be developed to apply to an actual or hypothetical food business. The assessee must substantiate: <ul style="list-style-type: none"> • how audit scope and criteria meet legislative and client requirements. • the evidence required to assess compliance with the criteria and to support an objective, reliable and consistent audit outcome. • definitions, levels and related reporting of non-conformance to comply with legislative requirements. • Submit completed audit records for the selected audit including the final audit report, non-conformity reports, corrective action reports, follow up reports and suggestions for improvements to the food safety management system and to the audit process. These latter items may be documented in personal notes rather than part of the formal audit report according to the audit scope.
Context of and specific resources for assessment	Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the audit scenarios

EVIDENCE GUIDE	
	<p>should be assessed in an actual workplace context.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"> • food safety plans • food safety-related documentation typical of commercial manufacturing businesses and used for the purpose of verification • evidence and documentation relevant to processes that would typically be used by commercial manufacturing businesses to support validation processes • plant and equipment that would typically be used in a commercial manufacturing business.
Method of assessment	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation, including the completion of documentation to show the planning and conducting of an audit • a report on the legal responsibilities of the food business • questioning to test the level and application of knowledge • documentation to show validation and verification processes used • completion of all audit records. <p>The whole audit process must be witnessed by the assessor.</p> <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Food safety audits	Audits may be conducted for either regulatory or commercial food safety systems for low, medium or high risk food safety hazards
Licensing/certification requirements	Licensing and registration arrangements are determined by system owners
Audit scope	<p>The audit scope describes the purpose, extent and boundaries of the audit. This may include:</p> <ul style="list-style-type: none"> • physical locations • products • processes • time period covered by the audit • extent of authority of the auditor
Legal requirements	<p>The scope of the audit determines and may be determined by food safety legislation which may include:</p> <ul style="list-style-type: none"> • Food Standards Code • relevant state legislation and related codes of practice, including industry sector-specific legislation and related codes of practice, such as those relating to meat, seafood, dairy and primary production and processing • regulatory and commercial requirements relevant to importing countries • commonwealth legislation (e.g. Export Control Act) • other legislation which may impact on the conduct of a food safety auditor and may include legislation covering: <ul style="list-style-type: none"> • OHS, anti-harassment, anti-discrimination and industrial relations • trade practices legislation • environmental risk management

RANGE STATEMENT	
	<ul style="list-style-type: none"> • legal contracts or agreements
Audit client	<p>Audit client refers to the organisation or person requesting an audit (system owner). This may be the same as the auditee or any other organisation which has the regulatory or contractual right to request an audit.</p> <p>The system owner may be the regulator</p>
Auditee	Auditee refers to the organisation being audited
Audit client requirements	<p>Client requirements are typically defined in audit contracts or agreements and may relate to:</p> <ul style="list-style-type: none"> • legal requirements • food safety management system requirements • compliance with client site operational policies and procedures • confidentiality • business size, activities and processes • business culture • professional standards of conduct
Audit criteria	<p>The audit criteria must comply with relevant food safety legislation and may extend to address additional system owner/client requirements. In addition to meeting the requirements of food safety legislation, reference against which conformity is determined may include:</p> <ul style="list-style-type: none"> • management systems policies and procedures • industry standards or codes • contractual requirements • international treaties and conventions
Levels of non-conformity	<p>Levels of non-conformity are defined and based on food safety risk. They may be determined by:</p> <ul style="list-style-type: none"> • the management system • the audit client • legislation • where legislation applies, definitions may be determined by: <ul style="list-style-type: none"> • state and territory authorities • AQIS • primary industry jurisdiction

RANGE STATEMENT	
	<ul style="list-style-type: none"> • primary food production jurisdiction
Audit evidence	<p>Evidence required for the purposes of meeting relevant food safety legislation may be defined by:</p> <ul style="list-style-type: none"> • the client and/or the regulatory authority <p>Audit evidence should be based on objective information rather than hearsay and may include:</p> <ul style="list-style-type: none"> • system records • evidence collection records • statements of fact or other information relevant to the audit criteria and which is verifiable • observations • records of audit stage progression
Evidence collection methods and sources	<p>Evidence collection methods and sources will depend on the purpose and scope of the audit and may include:</p> <ul style="list-style-type: none"> • observation • interviews • checklists • auditee documentation review • reports/data from other sources, such as customer feedback, technical references, computerised databases • results of analyses
Food safety management system	<p>A food safety management system is a documented arrangement implemented (and resourced) by a business for control of food safety. A food safety management system includes:</p> <ul style="list-style-type: none"> • commitment from management, procedures and practices to identify and control food safety hazards and prevent their recurrence. It may incorporate recognised food safety tools, such as HACCP and its prerequisite programs
Resource requirements	<p>Resource requirements will depend on the purpose and scope of the audit and may include:</p> <ul style="list-style-type: none"> • audit personnel directly involved in undertaking the audit

RANGE STATEMENT	
	<ul style="list-style-type: none"> • access to relevant personnel and information within the business • access to any additional resources as required
Food businesses	A food business refers to a business, vehicle, enterprise or activity where food is produced, processed, stored, displayed, transported and/or sold. It may also include primary producers
Preliminary work	<p>Preliminary work includes but is not limited to:</p> <ul style="list-style-type: none"> • identifying food to be covered by the food safety program • defining the food and the method of distribution • identifying customers and intended use of food • describing the process (flowchart) • checking for accuracy and completeness of the previous steps
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes
Verification	Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met
Audit records	<p>Audit records are maintained to demonstrate the implementation of the audit process. These may include but are not limited to:</p> <ul style="list-style-type: none"> • audit plans • audit reports • non-conformity reports • corrective action reports • follow up reports
Close out	<p>Auditors have different levels of responsibility and authority to close out audits according to the level of non-conformity and whether they are an authorised officer or a commercial auditor. Closing out may involve notifying the regulator</p>

RANGE STATEMENT	
	with the power to enforce legislation
Commercial auditor	Commercial auditor refers to any auditor other than a regulatory auditor, who is external to and independent of the food business being audited
Risk-based approaches	Risk-based approaches to controlling food safety are typically based on HACCP, described in the Codex Alimentarius guidelines
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP)</p> <p>Prerequisite programs can be divided into two categories.</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design and construction of buildings and facilities • supplies of air, water, energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Critical control point	Critical control point is a step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level
Critical limit	Critical limit refers to criterion which separates acceptability from unacceptability

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify food safety hazards in a food business	<p>1.1. Biological food safety hazards that could present a risk in the food at the point of consumption are identified by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.2. Intrinsic and extrinsic chemical food safety hazards that could present a risk in the food at the point of consumption, including toxin presence, are identified</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.3. Physical food safety hazards that present a risk in food are identified and assessed to determine control requirements</p>
2. Control food safety hazards in a food business	<p>2.1. Processing hazards and related control measures and critical limits, monitoring and recording requirements are established and validated to eliminate or reduce food safety hazards to acceptable levels</p> <p>2.2. Food storage and handling requirements necessary to eliminate or reduce food safety hazards are determined</p> <p>2.3. Personal hygiene practices required to eliminate or reduce food safety hazards are established</p> <p>2.4. Cleaning and sanitation, housekeeping and pest control practices and procedures required to prevent or reduce food safety hazards are established</p> <p>2.5. Other prerequisite programs are developed to eliminate or reduce food safety hazards to acceptable levels</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- interpret and apply relevant legislation, codes of practice and technical standards
- identify biological, chemical and physical food safety hazards
- determine critical control points and critical limits for identified hazards
- establish the required procedures, systems and records to monitor critical control points in order to demonstrate that the critical control point is in control
- specify required corrective actions and corrections to be taken when critical limits are not achieved

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- sources of advice and research on foods, processing methods, production technologies and associated food safety hazards and control methods
- ways in which food can cause illness and injury, including incidence and trends in food-borne illness
- intrinsic and extrinsic factors that can impact on food safety
- common biological food safety hazards (including toxin production and spore formation) and conditions required for survival and growth of each, including growth rates, transmission routes, likely carriers and threshold levels
- sources of information on acceptable (and legal) levels of biological, chemical and physical contamination
- food supply chains and potential of a breakdown in control at one point to impact other parts of the chain
- survival and growth requirements of biological food safety hazards
- common allergenic substances as described by the Food Standards Code (and may be additionally defined by system owners)
- common control methods necessary to eliminate or reduce the risk of food-borne illness to acceptable levels for each common pathogen, including the role of food storage, temperature control, preservation and process methods, traceability, product shelf-life, cleaning and sanitation, and pest control
- methods to detect and minimise the risk of food contamination by personal carriers, including convalescent and symptomless carriers, and related minimum legal illness reporting requirements and personal hygiene procedures
- the role of microbiological sampling, swabbing and testing in assessing the presence of biological contamination
- methods to determine the appropriateness and effectiveness of control measures and critical limits, including identifying the effect of control measures on the identified food safety hazard, method and feasibility of monitoring, the relationship to other control measures, and the severity of consequences and required corrective action in the event of failure of control
- types and causes of acute and chronic chemical food borne illness
- the food safety and legal impact of chemical contamination, including residual agricultural and environmental chemicals, residual industrial (including cleaning) chemicals, and chemical contamination as a result of packaging methods and materials
- physical hazards that pose a food safety risk
- common control methods to eliminate or reduce the risk of chemical or physical food-borne illness to acceptable levels for each common form of chemical and physical food safety hazard, including:
 - chemicals that pose a food safety risk
 - common food allergens
 - physical hazards
- the role and requirements of prerequisite programs and procedures to eliminate, prevent or reduce biological, chemical and physical food safety hazards to

REQUIRED SKILLS AND KNOWLEDGE

acceptable levels

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to establish or validate specific control measures in a food safety program based on demonstration of the identification, evaluation and control of food safety hazards.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- select a food supply chain and identify:
 - known biological food safety hazards that could occur across the chain and could present a risk in food at the point of consumption
 - likely patterns of growth and transmission from source of contamination to onset of consumer symptoms for pathogens likely to occur in the supply chain, including threshold levels
 - sources of chemical and physical contamination that could present a food safety risk at the time of food consumption, across the chain
 - impact and indicators of the presence of biological or chemical food safety hazards throughout the food chain
 - acceptable levels of contamination. These may be established by reference to relevant legislation and/or reference to system requirements
- select one stage in the food supply chain (which must be a medium or high risk business or process) and establish or validate control measures and

EVIDENCE GUIDE	
	verification records and procedures.
Context of and specific resources for assessment	<p>Assessment may occur in a real or simulated food business context where the simulated context provides access to food safety programs for a multi-staged food supply chain which includes the point of delivery to the consumer.</p> <p>The selected supply chain must include at least one medium or high risk business and/or process and provide opportunity to apply a depth and breadth of food safety knowledge.</p>
Method of assessment	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and documentation showing the identification of critical aspects of a food chain • questioning to test the level and application of knowledge • workplace example or scenario to produce validated control measures and verification records and procedures for food safety hazards.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Licensing/certification requirements	Licensing and registration arrangements are determined by system owners
Food safety hazards	A food safety hazard is a biological, chemical, or

RANGE STATEMENT	
	physical agent in, or condition of, food with the potential to cause an adverse health effect in humans (defined in 'Hazard Analysis and Critical Control Point System and Guidelines for its Application', Codex Alimentarius Commission)
Biological food safety hazards	<p>Common biological food safety hazards include but are not limited to:</p> <ul style="list-style-type: none"> • Salmonella spp • Campylobacter jejuni • Bacillus cereus • Clostridium perfringens • Clostridium botulinum • Cryptosporidium • Pathogenic escherichia coli • Giardia • Listeria monocytogenes • Shigella spp • Staphylococcus aureus • Vibrio parahaemolyticus • Yersinia enterocolitica • Hepatitis A virus • Norwalk virus <p>Classifications by type of micro-organism include:</p> <ul style="list-style-type: none"> • bacteria • viruses • moulds/fungi • parasites • algae
Chemical food safety hazards	<p>Common origins of chemical contamination may include:</p> <ul style="list-style-type: none"> • cleaning chemicals • pesticides • veterinary residues • chemical additives • allergenic substances • toxic metals • nitrites, nitrates and N-nitroso compounds • polychlorinated biphenyls (PCBs)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • plasticizers and packaging migration • phytotoxins • zootoxins
Physical food safety hazards	Physical food safety hazards refer to objects not normally found in food which may cause illness or injury to the consumer
Acceptable levels	<p>Acceptable levels define the level of a particular hazard in the end product that is acceptable to ensure food safety. Acceptable levels are typically defined by:</p> <ul style="list-style-type: none"> • the Food Standards Code • commonwealth, state or territory legislation or codes • industry codes of practice • international protocols (CODEX Alimentarius) • customer food safety requirements (including intended use)
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP).</p> <p>Prerequisite programs can be divided into two categories.</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design and construction of buildings and facilities • supplies of air, water, energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control

RANGE STATEMENT	
	<ul style="list-style-type: none"> • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Critical control point	Critical control point is a step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level
Critical limit	Critical limit refers to criterion which separates acceptability from unacceptability
Food supply chain	Food supply chain refers to a sequence of stages and operations involved in the production, processing, distribution and handling of food from primary production to consumption
Growth requirements	<p>Factors which influence the growth of pathogenic micro-organisms may include:</p> <ul style="list-style-type: none"> • temperature • water activity • gases • pH • time • moisture • nutrients
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes
Validation evidence	Validation evidence confirms that control

RANGE STATEMENT

	<p>measures are capable of being consistently effective and may include the application of:</p> <ul style="list-style-type: none"> • existing Australian legislative requirements • challenge tests • peer reviewed scientific papers • targeted scientific reports • validation already carried out in other jurisdictions and recognised by the responsible authority • mathematical modelling (e.g. predictive microbiology models) • industry codes of practice (where implementation by food business is verified during audits)

Competency field

Competency field	
-------------------------	--

Co-requisite units

Co-requisite units		

FDFV3001A Conduct chemical wash for fresh produce

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to implement a wash process for fresh produce, where chemicals, such as chlorine, are used to achieve quality standards.
------------------------	---

Application of the Unit

Application of the unit	This unit has application in a food processing production environment. It typically targets the production worker responsible for setting and monitoring levels of cleaning chemicals, such as chlorine, while conducting wash operations. This unit typically applies for produce such as leafy greens and fruit where chemicals are used to ensure required cleaning outcomes.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm required use of chemicals	<p>1.1.Chemicals used for the washing of fresh produce are identified and required levels confirmed</p> <p>1.2.Risks associated with using chemicals are identified and control measures implemented throughout operations</p> <p>1.3.Implications of incorrect chemical levels on fresh produce are identified</p> <p>1.4.Storage and handling requirements for chemicals are identified</p>
2. Prepare for washing operation	<p>2.1.Raw materials are confirmed and prepared for washing</p> <p>2.2.Equipment is confirmed for operational readiness and components and related attachments fitted and adjusted as required</p> <p>2.3.Pre-start checks are carried out as required by workplace requirements</p> <p>2.4.Chemicals are measured and dose added according to specifications</p> <p>2.5.Performance of chemical dosing equipment is checked to confirm accuracy</p> <p>2.6.Water quality is checked and confirmed for use</p>
3. Operate and monitor the washing process	<p>3.1.The washing process is started and operated according to workplace procedures</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.2.Raw materials are inspected and washed to meet workplace specifications</p> <p>3.3.Water is checked to confirm correct levels of chemicals</p> <p>3.4.Washed materials are transferred for further processing or packaging</p> <p>3.5.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>3.6.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>3.7.The work area is maintained according to housekeeping standards</p> <p>3.8.Work is conducted in accordance with workplace environmental guidelines</p> <p>3.9.Workplace records are maintained according to workplace recording requirements</p>
4. Shut down the washing process	<p>4.1.The appropriate shutdown procedure is implemented</p> <p>4.2.Chemicals are handled, stored and disposed of according to workplace environmental standards</p> <p>4.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

Required knowledge

Knowledge of:

- purpose and basic principles of the washing process, including the importance of water quality and the role of chemicals in the washing process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services (principally water) required and action to take if services are not available
- the flow of this process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the washing, including the consequences of out-of-specification moisture levels on further processing and final product
- quality requirements of raw materials and effect of variation on process

Required knowledge

- performance, including how variation in microbial load can affect the washing process
- operating requirements, parameters and corrective action required where operation is outside specified operating parameters
 - typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
 - methods used to monitor the washing process, such as inspecting, measuring and testing as required by the process
 - inspection or test points (control points) in the process and the related procedures and recording requirements
 - contamination/food safety risks associated with the process and related control measures
 - common causes of variation and corrective action required
 - occupational health and safety (OHS) hazards and controls
 - requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
 - isolation, lock out and tag out procedures and responsibilities
 - product/process changeover procedures and responsibilities
 - procedures and responsibility for reporting production and performance information
 - environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
 - basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
 - sampling and testing associated with process monitoring and control where relevant
 - routine maintenance procedures where relevant
 - cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance

EVIDENCE GUIDE	
	with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for washing • handle and apply chemicals according to specifications • start, operate, monitor and adjust process equipment to achieve required quality outcomes • conduct water and chemical checks • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications and inspection or control points • washing equipment and services, including water and chemicals • raw materials to be processed • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports

RANGE STATEMENT	
Washing equipment	Washing equipment may include: <ul style="list-style-type: none"> • wash baths • tanks • flumes • pumps • hoses
Operation of equipment and processes	Operation of equipment and processes may require: <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: <ul style="list-style-type: none"> • power • water • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm produce grading specifications	1.1.Features of the grading equipment and process are described 1.2.Characteristics of produce are examined and purpose for grading confirmed 1.3.Customer and packaging requirements are confirmed 1.4.Specifications for grading are determined
2. Program grading equipment	2.1.Specifications are entered into computer to set grading parameters 2.2.Computer program or equipment components are used effectively to enable a variety of grading outcomes to be achieved 2.3.Program or equipment operation is tested or monitored to ensure standards are achieved 2.4.Problems or inconsistencies in grading outcomes are investigated to determine cause and corrective action implemented 2.5.Documentation is completed and records of grading specifications for customer are recorded

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Ability to:

- identify characteristics of produce used to determine grading requirements
- use computer software or mechanical equipment to establish and set grading specifications
- identify and apply the quality assurance systems in place to ensure that grading meets customer requirements
- identify problems that occur in the grading process and investigate likely causes
- determine appropriate corrective action to prevent grading non-conformance
- describe the purpose of grading and processes implemented by grading equipment to achieve specific grading outcomes
- identify typical problems that occur in the grading process, and outline likely causes and appropriate response options within level of responsibility
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- grading equipment processes and technologies
- characteristics of produce used for grading and the process of identification
- factors that influence grading outcomes
- typical problems that occur in the grading process, and likely causes and appropriate response options

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • analyse grading requirements and confirm specifications for grading equipment • determine grading specifications for a variety of outcomes • use computing or mechanical technology to achieve grading specifications • verify program specifications for required outcomes • analyse non-conformances and grading problems and determine probable cause.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • grading specifications • produce, grading equipment and consumables • relevant standard operating procedures (SOPs) • communication systems • workplace information recording systems, requirements and procedures.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT	
Policies and procedures	Product packaging and related work processes are consistent with company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements and takes account of occupational health and safety (OHS) and environmental impact
Equipment	Equipment may include: <ul style="list-style-type: none"> • cameras • infra-red lights • lasers • temperature gauges • conveyor belts
Grading purpose	Grading purpose may include: <ul style="list-style-type: none"> • singulation • rotation • sorting • quality control

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in processes to identify and assess manual handling	<p>1.1. Manual handling components of a work function are identified</p> <p>1.2. Manual handling risks are identified and reported in accordance with hazard and incident reporting procedures</p> <p>1.3. Risks to self and others of manual handling are assessed within level of responsibility</p>
2. Contribute to manual handling risk minimisation	<p>2.1. Equipment is available and in a fit state for use</p> <p>2.2. Clothing and footwear, including personal protective clothing, does not contribute to manual handling risk</p>
3. Plan and conduct manual handling	<p>3.1. Sources of risk are identified</p> <p>3.2. Workplace layout and environment is modified within area of control to minimise manual handling risk</p> <p>3.3. Work tasks are modified within area of control to minimise the risk of injury</p> <p>3.4. Manual handling aids are used according to workplace instructions</p> <p>3.5. Movement and postures used minimise the risk of injury within the limits of the work environment and the demands of the task</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information relating to use of equipment and other task requirements
- identify any manual handling requirements of the work function and specifically any manual handling risks
- report manual handling risks using appropriate hazard and incident reporting procedures
- identify manual handling risks, including:
 - risks to self and others
 - any existing arrangements to control risks
- identify scope of responsibility to eliminate or control level of risk (for hazards outside scope of responsibility, identify and use the appropriate reporting and consultation arrangements to address hazards)
- participate in consultative processes to evaluate options for removing or controlling manual handling risks, including applying hierarchy of control
- select appropriate equipment and techniques to suit manual handling task within workplace procedures
- inspect manual handling-related equipment/aids/tools to confirm fitness for use, including identifying and correcting and/or reporting signs of wear and tear
- follow procedures to complete manual handling tasks to maintain safety of self and others
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- different types of manual handling activities, including lifting, reaching, pushing, pulling, holding, restraining, throwing and carrying
- types of injuries that can result from manual handling
- aspects of manual handling that may be risks (hazard identification), such as:
 - repetitive or sustained application of force
 - repetitive or sustained awkward posture
 - repetitive or sustained movement
 - application of high force

REQUIRED SKILLS AND KNOWLEDGE

- manual handling of live animals (related to handling of poultry)
- manual handling of unstable or unbalanced loads, such as liquids
- workplace procedures and responsibilities for identifying and reporting manual handling hazards
- factors to be considered when assessing manual handling risks relevant to work role (refer to workplace risk assessment sheets and code of practice advice where available), including:
 - postures
 - movements
 - force required
 - duration and frequency of manual handling activity
 - environmental conditions, such as hot and cold work environments
- procedures and responsibilities for conducting risk assessments of manual handling tasks
- typical options for eliminating or controlling manual handling risks associated with work functions, including principles of hierarchy of control and the advantages and disadvantages of different options
- types of equipment and/or techniques used to eliminate or reduce manual handling risks in the workplace, including when and how to use each type of technique/equipment relevant to manual handling tasks in work role
- level of authority to address OHS issues related to manual handling and related workplace arrangements for managing safety issues
- sources of advice on manual handling relevant to work function
- equipment available to assist manual handling, related inspections required to identify faulty equipment and related reporting procedures
- movement and postures that increase the risk of injury, and movements and postures to minimise the force in the body as applied to specific tasks in the workplace

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance

EVIDENCE GUIDE	
	with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify manual handling tasks required for work activity and associated risks • eliminate risk through movement, posture and effectively using equipment provided • modify work to eliminate or minimise risk • apply safe work procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • work procedures, including advice on manual handling requirements and safe work practices • workplace documentation and related advice, such as codes of practice to support OHS arrangements for hazard identification, risks assessment and control • materials and related equipment as appropriate for manual handling • information on equipment capacity and operating procedures where relevant • reporting and monitoring systems.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

RANGE STATEMENT	
regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company policies and procedures, legislation, regulations and industrial awards and agreements
Workplace information	Workplace information may include: <ul style="list-style-type: none"> • standard operating procedures (SOPs) • OHS procedures • equipment manufacturers' advice • material safety data sheets (MSDS) • codes of practice and related advice
Equipment	Equipment may include but is not limited to: <ul style="list-style-type: none"> • trolleys • pallet jacks • conveyors, • vacuum lifters • other mechanical handling and lifting aids and equipment
Task-specific training	Task specific training is provided as appropriate
Contributions to manual handling risk minimisation	Contributions to manual handling risk minimisation includes: <ul style="list-style-type: none"> • reporting equipment requiring maintenance, especially wheeled equipment or other equipment where friction may increase force requirements
Changes to workplace layout and environment	Changes to workplace layout and environment within area of control may include but not be limited to: <ul style="list-style-type: none"> • changes in location of load, such as use of bench to not lift from floor • arrangement of items to eliminate above shoulder handling • placement of trolley • using sit stand stools • using task lighting • using a footrest
Task modifications within area of control	Task modifications within area of control may include but are not limited to:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • changes to frequency, duration, number of objects handled • route selected • seeking assistance as appropriate • housekeeping to minimise obstacles
Assessment of risks and evaluation of control options according to the hierarchy of control	Assessment of risks and evaluation of control options according to the hierarchy of control is carried out in consultation with others as required by workplace arrangements and regulatory requirements for risk assessment and control

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Overview the food processing industry	1.1.Sectors of the food processing industry are identified 1.2.Key sector representatives and their roles are identified 1.3.Relevant legislation and guidelines common to employment in the sector are identified 1.4.Types of employment in the food industries are identified and key responsibilities described
2. Identify key production processes and supply chains	2.1.Raw materials used in the workplace and their source are identified 2.2.Range of products produced in the workplace are identified 2.3.Workplace production processes for converting materials into products are identified 2.4.Supply chains for products are identified
3. Carry out work responsibilities according to policies and procedures	3.1.Information on conditions of employment, company policies and procedures is identified 3.2.Policies and procedures are applied when carrying out work role 3.3.Rights, responsibilities and legal obligations are identified

ELEMENT	PERFORMANCE CRITERIA
	3.4.Key personnel and their roles are identified. 3.5.Employability skills required for working effectively are identified and applied 3.6.Consequences of not following workplace environmental and safety policies and practices are identified
4. Take responsibility for own skill development	4.1.Skills required for work role are identified and own ability assessed to determine learning needs 4.2.Opportunities for skill development are identified and participated in 4.3.Responsibility is taken for own work tasks and role 4.4.Own work is monitored against workplace standards and areas for improvement identified and acted upon 4.5.Problem solving strategies are used to address problems, inconsistencies or concerns when fulfilling work role

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify and access information on conditions of employment and workplace policies and procedures (information may be provided in print, audio-visual and/or verbal formats)
- identify and locate materials/storage areas in the work place, relevant to work role, such as locating tank farms and other bulk storage locations and identifying special storage conditions (e.g. hazardous goods and temperature controlled stores areas)
- identify and locate production and packing processes/main work areas in the workplace
- model appropriate behaviour when interacting with others and moving around the workplace
- explain employee's responsibilities
- explain the dispute resolution procedures in the workplace
- explain the flow of product from receipt to sale in own workplace
- explain the nature and role of work instructions and standard operating procedures

REQUIRED SKILLS AND KNOWLEDGE

(SOPs)

- explain the principles of equal employment opportunity (EEO) and policies to prevent sexual harassment
- follow relevant workplace policies
- identify and explain the relevance of occupational health and safety (OHS) and regulatory requirements for foodindustry employees
- identify and explain workplace employment conditions
- identify relevant workplace requirements, policies and procedures and explain their implications for trainees
- list the markets where the company's products are distributed
- name the products produced in own workplace
- outline enterprise ethical standards and requirements for interacting with other employees and staff
- relate to others in an effective and non-discriminatory way showing mutual respect
- apply environmental practices
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- workplace structure and key personnel
- rights and responsibilities of employees as defined in employment conditions
- company policies and procedures relating to work responsibilities, including areas covered by legislation and related responsibilities
- appropriate personal conduct in a work area, including minimum clothing and personal hygiene standards when entering and moving around a food processing area in order to protect both employees and product safety, and behaving appropriately towards others in the work area
- industrial representation arrangements
- site security arrangements, including responsibility to report when coming on and off site
- site layout, including main facilities, such as canteens, parking areas, storage areas, processing and packing areas and location of emergency exits and assembly areas
- the main products/product range produced in the workplace
- stages and processes used to manufacture and package products
- personal reporting roles and responsibilities

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • recognise key industry sectors • identify workplace practices and processes • describe concepts of supply chains • identify relevant legislation Identify expectations and responsibilities of the work role • identify organisational products and processes • identify location of operations.
Context of and specific resources for assessment	Assessment must occur in a real workplace where the assessee has access to: <ul style="list-style-type: none"> • advice on work roles and responsibilities • advice on workplace policies, codes of practice, procedures, structure and personnel • advice on conditions of employment and entitlements • site maps • workplace access.
Method of assessment	This unit should be assessed together with other units of competency relevant to the work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements.
Company policies and procedures	<p>Company policies and procedures referred to are additional to those covered by OHS, quality, food safety and environmental competency standards. They include:</p> <ul style="list-style-type: none"> • codes of practice and general employment policies and procedures in areas, such as sexual harassment • EEO/affirmative action • anti-discrimination • racial vilification • workplace bullying
Conditions of employment	<p>Conditions of employment typically include:</p> <ul style="list-style-type: none"> • pay and conditions • leave arrangements • reporting and timekeeping responsibilities • terms of employment, including permanent, casual and probationary periods • disciplinary procedures • staff facilities and amenities
Key personnel	<p>Key personnel may include but are not limited to:</p> <ul style="list-style-type: none"> • human resource personnel responsible for recruitment, training, pay and conditions issues • relevant site and operations managers • supervisors/team leaders • industrial/work area representatives
Employability skills	<p>Employability skills include:</p> <ul style="list-style-type: none"> • ability to work in teams • ability to solve problems

RANGE STATEMENT	
	<ul style="list-style-type: none"> • ability to communicate in the workplace • using initiative and enterprise • using technology • ability to plan and organise • ability to manage self • ability to learn work-related skills and knowledge
Supply chains	<p>Supply chains refer to:</p> <ul style="list-style-type: none"> • concept of product flow from raw materials to production, distribution, marketing and sales • customers and suppliers
Problem solving strategies	<p>Problem solving strategies include:</p> <ul style="list-style-type: none"> • asking questions • reporting or referring to appropriate personnel • asking for help or support • referring to standard operating procedures • consideration of options • accessing information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Inspect materials to confirm fitness for use	1.1.Type and quality requirements of materials are confirmed 1.2.Materials are conveyed or transferred to required locations
2. Sort materials	2.1.Materials are inspected to confirm quality requirements are met 2.2.Materials are sorted as required to meet production requirements 2.3.Unacceptable quality is identified and reported according to workplace reporting requirements 2.4.The work area is maintained according to housekeeping standards 2.5.Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

<p>REQUIRED SKILLS AND KNOWLEDGE</p> <p>This section describes the skills and knowledge required for this unit.</p>
--

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Ability to:

- access workplace information on materials specification/quality requirements
- select, fit and use personal protective clothing and/or equipment
- inspect quality of materials to confirm compliance with quality specifications, such as:
 - product type and quantity
 - product condition, such as identifying any bruising, discolouration or other damage, confirming product is clean, and checking size and weight
- identify out-of-specification or non-conforming product and follow procedures to separate unacceptable product
- respond to and/or report equipment failure within level of responsibility
- maintain work area to meet housekeeping standards
- complete workplace records as required according to enterprise procedures
- demonstrate procedures for operating materials transfer equipment as required according to enterprise procedures
- wash/clean raw materials or product according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and standards to be met by the inspection and sorting process, including criteria and specifications as they apply to inspection and sorting requirements
- the relationship between visual inspection and sorting and other inspection procedures, such as those that may be conducted by a laboratory or at subsequent processing stages
- typical causes of unacceptable or out-of-specification product, including causes of product damage that can occur prior to arrival at the plant and as part of the handling process
- the stages that occur in the inspection and sorting process and their effect on product, such as in-line cleaning or conditioning and product or materials transfer stages
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- contamination/food safety risks associated with the sorting process and related control measures
- occupational health and safety (OHS) hazards and controls, including the

REQUIRED SKILLS AND KNOWLEDGE

- limitations of protective clothing and equipment relevant to the work process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to equipment operation, including waste collection and handling procedures related to the process
- basic operating principles of equipment used, where relevant, including main equipment components, status and purpose of guards, emergency stop, isolation and lockout controls, equipment operating capacities and applications
- services required and action to take if services are not available
- recording procedures and responsibilities where relevant
- washing/cleaning requirements and standards where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- recognise and act on materials or product that does not comply with quality standards
- apply safe work practices and identify OHS hazards and controls
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- production schedule and batch instructions
- quality criteria, specifications and inspection procedures

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • materials handling system and product to be inspected • related inspection equipment as required • documentation and recording requirements and procedures • workplace records as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP1005A Operate basic equipment.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for cleaning	1.1. Chemical stocks are available to meet cleaning and sanitation requirements 1.2. Services are confirmed as available and ready for operation 1.3. Equipment shutdown is planned and equipment is taken off-line for cleaning 1.4. Equipment and related valves and pipework are configured to confirm readiness for cleaning 1.5. The plant is set for the cleaning cycle
2. Operate and monitor the cleaning process	2.1. The cleaning cycle is undertaken according to company policies and procedures 2.2. The cleaning process is monitored to confirm cleaning meets company requirements 2.3. Cleaning data is recorded according to workplace reporting requirements 2.4. Out-of-specification process and equipment performance is identified, rectified and/or reported
3. Dispose of waste and return plant to operating condition	3.1. Cleaning chemicals are flushed from plant and disposed of according to company policies and procedures

ELEMENT	PERFORMANCE CRITERIA
	3.2. Work is conducted according to environmental requirements 3.3. Plant is set up to meet operational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information, such as the cleaning schedule to identify cleaning requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- handle and prepare cleaning and sanitation agents safely, including following correct handling and preparation procedures and use of appropriate protective clothing and equipment as required
- schedule cleaning and/or liaise with related work areas to take equipment and area off-line with minimal disruption to production
- prepare equipment and area for cleaning, such as rendering equipment safe to clean, removing obstacles and unnecessary equipment, correctly positioning equipment (e.g. valves, pipes, vents and taps), selecting appropriate cleaning cycle, removing waste and/or dismantling equipment
- clean equipment according to cleaning process cycle and procedures, such as starting up and operating the CIP process in both automatic and manual modes
- monitor the process and equipment operation to maintain the cleaning process within the required parameters
- locate emergency stop functions on equipment
- return plant to operating order
- return area to working order
- take corrective action in response to out-of-specification results
- advise affected work areas of cleaning schedule and progress
- maintain and store chemicals and related equipment as required
- carry out relevant checks and inspections to confirm effectiveness of cleaning
- sort, collect, treat, recycle or dispose of waste
- record cleaning information
- maintain work area to meet housekeeping standards

REQUIRED SKILLS AND KNOWLEDGE

- conduct routine maintenance according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of CIP, including the use and functions of caustic and acid solutions, and cleaning sequence and stages as required in the workplace
- purpose and use of cleaning equipment and chemicals used
- terminology relating to the chemical solutions used
- safe work procedures, including appropriate signage of cleaning activities and safe handling and storage of cleaners and sanitisers used
- purpose and limitations of protective clothing and equipment
- cleaning and sanitation requirements, including different levels of cleaning requirements depending on the reason for cleaning
- characteristics of cleaning and sanitising chemicals used, including basic composition as well as compatibility of chemicals with types of equipment
- methods used to render equipment safe to clean, including the status and purpose of equipment guards, relevant lock out/tagout and isolation procedures
- equipment settings required for cleaning and for operating respectively
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- inspection points for cleaning and sanitation
- consequences of contamination of process flows by cleaning solutions and related safeguards
- types of waste generated by both the production and the cleaning process and related collection, treatment and disposal requirements
- environmental consequences of incorrect cleaning waste disposal procedures
- requirements to liaise/advise related work areas
- reporting and recording systems
- routine maintenance procedures where relevant
- sampling methods and test procedures where relevant

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • shut down equipment and prepare for cleaning • prepare and use chemicals according to safe work requirements • clean equipment to meet work standards • monitor cleaning and report or address any non-compliances • flush equipment and dispose of waste according to environmental guidelines • complete required documentation • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • cleaning procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements • personal protective clothing and equipment • equipment to be cleaned, and related CIP system • chemicals and/or automated chemical addition system • services as required • MSDS where appropriate • cleaning schedule or advice and related standard operating procedures • housekeeping standards and procedures • advice on environmental management issues relevant to work responsibilities • workplace information recording systems, requirements and procedures • sampling and testing schedules and procedures as

EVIDENCE GUIDE	
	relevant to cleaning requirements in the workplace.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP</p>
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production cleaning schedules and instructions • signs and symbols • materials safety data sheets (MSDS) • manufacturers' advice • standard forms and reports

RANGE STATEMENT	
Dosing of cleaning chemicals	Dosing of cleaning chemicals may be: <ul style="list-style-type: none"> • automatically controlled or manually dosed
Services	Services may include: <ul style="list-style-type: none"> • power • water • Steam • compressed and instrumentation air
Testing	Where tests are conducted as part of operation, a typical requirement is measurement of pH
Monitoring the process	Monitoring the process is dependent on the nature of equipment. Examples of monitoring include: <ul style="list-style-type: none"> • chemical strength • cycle time • temperatures • time • storage tank levels • condensate quality
Operation and monitoring of equipment and processes	Operation and monitoring of equipment and processes typically requires the use of control panels and systems

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information, such as the cleaning schedule to identify cleaning requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary cleaning and sanitising equipment and services
- select and prepare cleaners and sanitisers as required according to workplace procedures
- prepare equipment for cleaning, such as rendering equipment safe to clean, clearing product and waste materials, covering motors and instrumentation where steam or water hoses are used, and simple dismantling of equipment parts
- advise any affected work areas/operators of cleaning progress to coordinate timely completion with minimal disruption to production
- clean and sanitise equipment as required according to workplace procedures and cleaning schedule
- return equipment to operating order (this may involve basic assembly of equipment parts)
- inspect equipment to identify equipment condition and cleanliness
- locate emergency stop functions on equipment
- report and/or correct unacceptable equipment condition
- maintain housekeeping standards
- prepare cleaners and sanitisers as required
- store cleaners, sanitisers and related equipment as required
- carry out relevant checks and inspections
- maintain work area to meet housekeeping standards
- conduct routine maintenance according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- record cleaning and sanitation information according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose of cleaning and sanitation and importance in maintaining food safety
- functions of cleaners, sanitisers and related equipment

REQUIRED SKILLS AND KNOWLEDGE

- safe work procedures, including appropriate signage of cleaning activities, safe handling and storage of cleaners and sanitisers used, safety when using cleaning methods, such as hot water and steam hoses, and status and purpose of safety guards
- purpose and limitations of protective clothing and equipment
- cleaning and sanitation requirements relating to work responsibilities, including the need for different levels of cleaning where relevant
- procedures for preparing cleaners and sanitizers as required
- cleaning method/s to be followed relating to work responsibilities
- other work areas/operators who need to be consulted/advised on timing of cleaning
- methods used to render equipment safe to clean, including understanding the status and purpose of equipment guards, relevant lock out/tagout and isolation procedures and related equipment settings for both cleaning and operating as required
- procedures for conducting cleaning and sanitising
- types of waste generated by the cleaning process and related collection, treatment and disposal requirements
- potential environmental impact of incorrect waste handling
- inspection, cleaning and storage requirements of cleaning equipment used
- inspection points and methods for confirming the effectiveness of cleaning and sanitation, including visual inspection, and where required, recording of cleaning conducted
- inspection requirements to confirm equipment condition, including acceptable equipment condition, ability to identify faulty or unacceptable equipment and take required corrective action
- recording requirements and responsibilities
- routine maintenance procedures where relevant
- sampling methods and test procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • prepare equipment for cleaning • prepare and use chemicals according to safe work requirements • clean and sanitise equipment to meet work standards • monitor cleaning and report or address any non-compliances • dispose of waste according to environmental guidelines • complete required documentation • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • cleaning procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements • personal protective clothing and equipment • cleaning schedule and related procedures, including OHS advice • equipment/items to be cleaned • chemicals, cleaning equipment and services as required • MSDS where appropriate • housekeeping standards and procedures • cleaning/sanitising information recording system and procedures • advice on environmental management issues relevant to work responsibilities.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out in accordance with company procedures, licensing requirements, legislative requirements, and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production and cleaning schedules
- labels and codes
- safety signs and symbols
- materials safety data sheets (MSDS)
- standard forms
- written or verbal instruction

Cleaning and sanitising chemicals

Cleaning and sanitising chemicals may be:

- pre-mixed or manually mixed

Preparing/restoring equipment to operating order

Preparing/restoring equipment to operating order may involve:

- simple dismantling and reassembling of equipment parts
- basic isolation
- covering of motors and instrumentation

Services

Services may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • power • water • steam • compressed and instrumentation air
Inspecting cleaning effectiveness	Inspecting cleaning effectiveness typically involves: <ul style="list-style-type: none"> • carrying out a visual inspection

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate with people from diverse backgrounds	1.1. People from all cultural groups are valued and treated with respect and sensitivity 1.2. Verbal and non-verbal communication takes account of cultural differences 1.3. Where language barriers exist, efforts are made to communicate through use of gestures or simple words in the other persons' language 1.4. Assistance from colleagues, specialist resources or outside organisations is obtained when required
2. Respond to cross-cultural misunderstandings	2.1. Issues which may cause conflict or misunderstanding in the workplace are identified 2.2. Difficulties are addressed with the appropriate people in the workplace 2.3. When difficulties or misunderstandings occur, possible cultural differences are considered 2.4. Efforts are made to resolve the misunderstanding, taking account of cultural considerations 2.5. Issues and problems that cannot be resolved are referred as required for follow up

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify and recognise cultural differences in the workplace
- apply understanding of cultural difference to communicate effectively to achieve work requirements, including selecting appropriate communication style to suit audience
- identify and respond to cross-cultural misunderstandings
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

Required knowledge

Knowledge of:

- principles of equal employment opportunity (EEO) and anti-discrimination legislation as they apply to company and employee rights and responsibilities in the workplace
- recognition of the different cultural groups in the workplace
- understanding of the basis of cultural difference, including behaviour or practices that can cause offence, and related strategies for interacting in ways that are culturally sensitive
- communication strategies and styles appropriate to diverse audiences related to the workplace

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify responsibilities according to the principles of anti-discrimination legislation • treat people from other cultures with respect and sensitivity • make efforts to communicate and understand others using verbal and non-verbal techniques • seek assistance when required to facilitate understanding • treat cross-cultural misunderstandings with sensitivity and act to resolve the matter with respect.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • advice on legal rights and responsibilities relating to anti-discrimination and EEO • related company policies and procedures • opportunities to interact with others using typical workplace communication processes.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies

RANGE STATEMENT	
	and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation includes: <ul style="list-style-type: none"> • anti-discrimination • EEO
People from diverse backgrounds	People from diverse backgrounds may include: <ul style="list-style-type: none"> • any person involved in or related to the work process, such as work colleagues, managers and external personnel
Cultural differences	Cultural difference may include but is not limited to: <ul style="list-style-type: none"> • race • special needs • disabilities • gender • marital status • sexual preference • age
Examples of cultural differences	Examples of cultural differences may include but are not limited to: <ul style="list-style-type: none"> • language spoken and related communication style • levels of formality/informality • personal grooming • family obligations • recognised holidays • customs • work ethic • product preferences
Outside organisations	Outside organisations may include but are not limited to: <ul style="list-style-type: none"> • interpretative services • diplomatic services • local cultural organisations • appropriate government agencies

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to enter a freezer storage environment	1.1. Appropriate clothing and footwear are identified and available 1.2. Clothing and footwear are correctly fitted prior to entering a freezer 1.3. Checks and inspections are conducted according to workplace procedures
2. Identify and monitor equipment operation in a freezer storage environment	2.1. Effects of freezing temperatures on equipment used are identified 2.2. Equipment is monitored to ensure it is in operational order when in use in a freezer
3. Handle frozen product safely	3.1. Handling requirements for frozen product are identified 3.2. Frozen product is handled safely 3.3. Work is conducted in accordance with workplace environmental guidelines
4. Respond to emergencies	4.1. Signs and symptoms of exposure are identified 4.2. Appropriate action is taken to minimise effects of exposure of self and others

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- locate and fit appropriate protective clothing, footwear and equipment
- follow procedures to enter and work in a freezer environment to ensure safety of self and others, including carrying out relevant checks and inspections prior to entry as required by workplace procedures
- follow procedures to handle product to avoid product damage
- monitor operating performance of equipment used in the freezer and identify signs of unsafe or unfit operation
- conduct work in a manner appropriate to minimising risk of contamination
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and conditions required in a freezer storage environment, including how temperature parameters are maintained in the freezer/cold room
- safety requirements and hazards associated with entering and working in a freezer storage/cold room area, including required protective clothing and equipment, limitations of protective clothing and equipment, and maximum work duration
- symptoms associated with hypothermia and action to take if these occur
- the effects of freezer/cold room temperatures and frozen condensation on equipment used in a freezer/cold room but designed for room temperature operation, including symptoms that equipment is unsafe or unfit for use
- effects of room temperatures on equipment using hydraulic oils designed for freezer/cold room temperatures
- typical freezing rates for product handled, such as products stacked on pallets
- handling requirements for moving pallets of frozen product and how this differs from moving pallets of fresh product
- the differences in product stability of pallets loaded with fresh compared with frozen product and related wrapping requirements
- the effect of freezing on product packaging and related handling requirements
- housekeeping requirements for work area

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • identify risks associated with freezer storage to self and equipment and identify controls to address risks • correctly use personal protective equipment • use and monitor equipment in freezer storage • take corrective action in response to typical faults, inconsistencies and symptoms of exposure • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • freezer storage/cold room area • stock to be held in frozen storage.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: <ul style="list-style-type: none"> • FDFOP2010A Work with temperature controlled stock.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, occupational health and safety (OHS), anti-discrimination and equal opportunity
Workplace information	Workplace information may include: <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store stock to meet temperature control requirements	<p>1.1. Goods requiring temperature control are identified</p> <p>1.2. Goods are located in correct storage areas to meet storage temperature, stores handling and stock rotation requirements</p> <p>1.3. Stores information is recorded according to workplace requirements</p>
2. Monitor and maintain temperature of stock within specifications	<p>2.1. Stock temperature is monitored to confirm temperature is within specified limits</p> <p>2.2. Storage areas are monitored to confirm temperature is within storage zone limits</p> <p>2.3. Residence time in temperature controlled stores is monitored to meet stock control requirements</p> <p>2.4. Out-of-specification storage temperatures are identified and corrective action is taken</p>
3. Transfer temperature controlled stock	<p>3.1. Goods are handled and transferred to maintain temperature control and meet stock rotation requirements</p> <p>3.2. Stores transfer information is recorded according to workplace reporting requirements</p> <p>3.3. Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to determine product handling and storage requirements
- identify storage requirements including temperature limits, minimum duration at given temperatures, and segregation and co-storage requirements
- identify temperature controlled storage facilities and temperature zones available
- select, fit and use personal protective clothing and/or equipment
- use materials handling equipment in a temperature controlled environment as required to undertake work functions
- follow procedures to measure temperature of product, such as use of instrumentation as required to take core and surface temperatures
- read instrumentation, such as temperature gauges, to monitor stores and zone temperatures
- identify and report out-of-specification temperatures in product and storage facilities
- take corrective action in response to out-of-specification temperatures including implementation of procedures to segregate damaged or potentially unsafe product
- complete records of stock receipt and transfer as required
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- occupational health and safety (OHS) hazards and controls, including the purpose and limitations of protective clothing and equipment
- temperature controlled storage facilities and capacities available in the work area, such as temperature zones within a single store and concepts (e.g. the Cold Chain compliance) as relevant to work requirements
- temperature control requirements of stock handled in the work area, including acceptable temperature ranges and consequences of failing to meet these ranges, and where required requirements for gradual temperature change
- stock handling procedures for receiving and locating stock within a store, including stock rotation and procedures for identifying, segregating, and disposing of damaged or potentially unsafe stock

REQUIRED SKILLS AND KNOWLEDGE

- stock handling procedures for transferring temperature controlled stock from a temperature controlled environment, including maximum duration stock can be held outside a controlled environment
- food safety and quality consequences of stock temperature control requirements not being met
- monitoring procedures and instrumentation, including use of thermometers or other temperature measuring instrumentation
- notification, recording and reporting requirements
- operating procedures for goods handling equipment as required
- housekeeping requirements for work area
- recording requirements and procedures

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify storage requirements of temperature controlled stock
- monitor temperature of storage area and stock to ensure standards are maintained
- handle and transfer stock to maintain required conditions
- identify and act on non-conformances
- complete workplace documentation
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental

EVIDENCE GUIDE	
	<p>requirements</p> <ul style="list-style-type: none"> • temperature storage specifications • stock handling and rotation systems • controlled temperature storage facilities • stock requiring storage • load shifting equipment as required • stock information recording system and procedures.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2007A Work in a freezer storage area • TLIA1407C Use product knowledge to complete work operations • TLID1007C Operate a forklift • TLIK107C Use infotechnology devices and computer applications in the workplace • TLID207C Shift a load using manually-operated equipment.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</p>

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct routine inspection of plant and equipment	1.1. Equipment is inspected to identify signs of wear 1.2. Nature of maintenance requirement is assessed
2. Prepare to conduct routine maintenance	2.1. Maintenance task is assessed to determine tools and services required 2.2. Equipment is prepared for maintenance 2.3. Hand tools are selected according to task requirements 2.4. Tools are checked before use and unsafe and/or faulty items are reported within standard procedures 2.5. Maintenance is planned and scheduled in consultation with affected work areas to minimise disruption to production
3. Carry out routine maintenance	3.1. Routine maintenance on equipment is carried out according to workplace procedures 3.2. Maintenance activities are reported according to workplace reporting requirements
4. Complete maintenance tasks	4.1. Equipment is returned to operating order 4.2. Tools and materials are stored according to workplace procedure

ELEMENT	PERFORMANCE CRITERIA
	4.3.Relevant personnel are notified of maintenance completion 4.4.Housekeeping standards are maintained 4.5.Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information such as the equipment history, faults or difficulties
- select, fit and use personal protective clothing and/or equipment
- inspect equipment for signs of wear, such as visual inspections to detect leaks, listening for unusual noises and/or vibrations
- identify and describe maintenance requirements, including the ability to assess the urgency of the maintenance issue, recognise common types of maintenance requirements and run basic checks according to workplace procedures to confirm the need for and type of maintenance support required
- take action to address maintenance requirements, such as carrying out routine maintenance within level of skill and responsibility and/or reporting outstanding maintenance to appropriate personnel using the required forms or request system
- plan and schedule maintenance within level of responsibility, such as consulting affected personnel and/or work areas on timing and notifying of maintenance progress
- prepare equipment and work area for routine maintenance, including cleaning equipment prior to carrying out maintenance and confirming that equipment is safe to work on, and simple isolation or tag out of equipment as required by workplace procedure
- select and use hand tools as required to carry out maintenance task
- select relevant parts and materials as required to carry out maintenance task
- carry out routine maintenance tasks according to workplace procedures
- on completion of maintenance tasks, return equipment to operational order, including confirming that all equipment parts, nuts and bolts are accounted for and correctly tightened, and where required, cleaning and sanitising equipment
- store tools in designated location, including basic tool maintenance, such as oiling
- complete records of maintenance as required

REQUIRED SKILLS AND KNOWLEDGE

- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- system in place to manage maintenance of plant and equipment in the workplace, including programs, such as responsive, preventative and proactive maintenance as appropriate
- responsibilities for participating in the maintenance program, including scope of operator responsibilities, roles of others involved in plant and equipment maintenance and procedures for raising maintenance orders where requirements are outside operator role
- basic operating principles of equipment to be maintained
- signs and symptoms of faulty equipment and early warning signs of potential problems
- basic checks used to confirm the nature of maintenance requirements, including distinguishing between mechanical and electrical faults and identifying probable causes or conditions that may increase maintenance requirements of equipment used
- procedures for issuing, maintaining and storing tools used
- safe use of hand tools and measuring instrumentation relevant to maintenance responsibilities
- lubrication requirements, including requirements to use food grade lubricants as required and consequences of using incorrect type or amount of lubricants
- safe work procedures, including appropriate signage of maintenance activities as required, use of appropriate personal protective clothing and equipment, and awareness of safety hazards and controls relating to maintenance tasks
- methods used to render equipment safe to work on or clean including lock out/tag out and isolation procedures (in some cases this may involve liaising with other maintenance operators)
- procedures and inspections to be carried out to confirm that equipment is in operating order and all parts are accounted for
- food safety risks arising from poor personal hygiene, cleaning and housekeeping practices and procedures associated with routine maintenance
- maintenance planning, scheduling and recording procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to transport food	<p>1.1. Food storage vehicles and containers/receptacles are appropriate for use</p> <p>1.2. Food storage vehicles and containers/receptacles are prepared for use</p> <p>1.3. Food is loaded and secured as required to meet transportation and temperature control requirements</p> <p>1.4. Hand washing and disinfecting procedures are followed to meet workplace requirements</p> <p>1.5. Work is conducted in accordance with workplace environmental guidelines</p>
2. Load, unload and transport food safely	<p>2.1. Food safety control measures are monitored to ensure that food safety is maintained during transport</p> <p>2.2. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken</p> <p>2.3. Food is unloaded as required according to transportation and temperature control requirements</p> <p>2.4. Food safety information is recorded to meet workplace requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to determine food handling and transport requirements
- select, fit and use personal protective clothing and/or equipment
- confirm that the vehicle and associated equipment are appropriate and ready for use, including confirming that vehicle type is capable of maintaining the required temperature range for product
- prepare transport containers (this will vary depending on the type of food and transport method), such as checking cleaning records, and where required, confirming product compatibility to ascertain that appropriate level of cleaning has occurred
- prepare the storage/holding environment as required, including confirming that temperature parameters for the loading and unloading areas are met
- follow procedures to load/unload food to ensure that materials/product is loaded/unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food or non-food items that can cause contamination (osmosis)
- monitor temperature parameters and related food safety control points before, during and after transporting food and record information in the required format
- take appropriate corrective action in response to failure to meet temperature parameters or other food safety requirements as required by workplace procedures
- clean and sanitise food containers according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- food safety control points in the loading/unloading and transportation of food materials and product and related methods of control
- characteristics of food transported and related transport environment requirements
- micro-biological, physical and chemical hazards that can occur when loading, transporting and unloading food, appropriate to nature and method of food transported, including the types of hazards likely to occur, the conditions under which they occur, and possible consequences
- methods and procedures used to control food safety hazards (this depends on the

REQUIRED SKILLS AND KNOWLEDGE

type of controls and equipment used), including the purpose and operation of equipment, procedures in place to maintain food safety and workplace records, such as temperature control charts and cleaning and sanitation records

- procedures used to confirm that transportation and related food safety equipment is appropriate for use and operational, such as equipment capacity to maintain a given temperature environment appropriate to the food product
- cleaning and sanitation requirements for food containers where relevant
- where contamination by osmosis is a possibility, the potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- ensure readiness of transport in accordance with product requirements
- identify risks associated with transporting food products
- identify and apply control measures for ensuring safety of food
- load and unload goods according to requirements
- identify and act on non-compliances
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- loading/unloading and transport advice/schedules

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • food safety information (this may be included in a food safety plan and/or integrated into work procedures) • work procedures relevant to loading/unloading and transportation, including advice on required temperature parameters to be maintained • workplace information, such as temperature charts and cleaning records as appropriate • food materials and product to be loaded/unloaded and transported • documentation and recording requirements and procedures .
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, licensing requirements, legislative requirements and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP
Workplace information	Workplace information may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • standard operating procedures (SOPs) • food safety program • product handling specifications • transport schedules and instructions • transport vehicle manufacturers' advice • standard forms and reports
Transport vehicles	Transport vehicles are appropriate for the transportation of food and capable of maintaining the required environment for the food type transported
Food safety controls	Food safety controls refer to the methods used to control food safety hazards. Control methods, requirements and record keeping are specified in workplace food safety procedures which typically form part of a workplace food safety program
Safe food transport parameters	Safe food transport parameters depend on the type of food transported. Industry guidelines and codes, such as Cold Chain guidelines should be used as a basis for setting these parameters where available
Confirming readiness for use of food transport vehicle	<p>Confirming readiness for use of food transport vehicle and containers/receptacles can include:</p> <ul style="list-style-type: none"> • confirming that the vehicle is in good operating order and that containers/receptacles used to store food meet the relevant cleaning and sanitation requirements <p>It may also include:</p> <ul style="list-style-type: none"> • bringing the food handling area and storage container/receptacle to within the required temperature range before loading/unloading and confirming that equipment required to maintain temperature is operational
Food safety incidents	A food safety incident is a situation where the safe limits or parameters identified by the food safety program are not met

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for sampling	<p>1.1.Sampling requirements are identified in accordance with the sampling plan</p> <p>1.2.Sampling equipment, containers and labels are prepared</p>
2. Collect samples	<p>2.1.Samples are collected according to sampling procedures and the requirements of the sampling plan</p> <p>2.2.Samples are handled and prepared to preserve sample and source integrity</p> <p>2.3.Defects or abnormalities in source material and/or sample are identified and reported</p> <p>2.4.Sample information is recorded according to workplace sample recording requirements</p> <p>2.5.The work area is maintained according to housekeeping standards</p> <p>2.6.Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and interpret sampling plan to identify sampling requirements
- select, fit and use personal protective clothing and/or equipment
- prepare for sampling to ensure required tools, containers and labels are available
- follow sampling procedures and the sampling plan to collect samples from the points, in the quantities and at the times specified
- identify atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules as required
- complete sample records according to workplace requirements, such as labelling samples as required
- transfer samples for testing
- maintain work area to meet housekeeping standards
- prepare samples according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples and related handling and preparation requirements and responsibilities
- characteristics of materials sampled and common contaminants and related conditions under which contamination is likely to occur
- sampling techniques relevant to samples collected, such as sterilisation methods and procedures
- the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
- procedures and responsibility for reporting and recording sampling information, such as legislative requirements
- procedures for preparing samples where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on equipment used for collecting and handling samples • collect, handle and store samples according to sampling requirements and standards • take corrective action in response to typical defects and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • sampling plan • documentation, including specifications, work instruction and other advice on sampling requirements • recording and reporting system • sampling instrumentation and containers as required • product/source material to be sampled.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Example could be:</p> <ul style="list-style-type: none"> • MSL973001A Perform basic tests
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production schedules and instructions
- manufacturers' advice
- sampling plans

Sampling requirements

Sampling requirements include:

- sampling under standard conditions
- sampling after processes are adjusted in response to variation or non-conformance

Sampling

Sampling typically occurs at a number of points and using a range of techniques

Maintenance of sample integrity

Maintenance of sample integrity may be achieved by:

- use of appropriate personal protective clothing
- use of clean sampling tools and containers (sterilised tools/containers for aseptic sampling)
- temperature control
- addition of preservatives as required

RANGE STATEMENT

Sampling techniques	Sampling techniques may include: <ul style="list-style-type: none"> • sub-sampling

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to conduct sensory analysis	1.1. Personal conduct and the test environment are appropriate to conducting sensory analysis 1.2. Criteria for assessment is available and appropriate to analysis requirements 1.3. Method of analysis is appropriate 1.4. Samples are available for analysis 1.5. Defects or abnormalities in sample are identified and reported
2. Conduct sensory analysis	2.1. Samples are analysed according to workplace procedure and analysis criteria 2.2. Results are recorded according to workplace recording requirements 2.3. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

<p>REQUIRED SKILLS AND KNOWLEDGE</p> <p>This section describes the skills and knowledge required for this unit.</p>
<p>Required skills</p>
<p>Ability to:</p> <ul style="list-style-type: none"> access and interpret sensory analysis schedule and analysis criteria to identify requirements ensure that personal conduct does not jeopardise analytical ability confirm that samples are available and in an appropriate condition for analysis

REQUIRED SKILLS AND KNOWLEDGE

- follow procedures to analyse samples provided
- record and/or report results of analysis
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- principles of sensory analysis, including attributes that can be detected by taste and smell, such as sour, sweet, salty and bitter, and how these different tastes are detected (where on the tongue tastes are discerned, and the interaction between taste and smell, it also includes an understanding of attributes detected by mouth feel and appearance)
- sensory analysis system and procedures, such as the collection and use of reference samples, the role of the individual in the analysis process and how the system validates analysis results
- specific criteria used to evaluate material/product samples and the associated descriptions
- sample preparation requirements (this is dependent on materials/products to be analysed), including the effect of sample temperature on sensory analysis
- the effect of personal conduct on analytical ability, including stimuli and conditions that can dull sensitivity
- requirements of the environment appropriate to conducting sensory analyses
- the components of material/product sampled that contribute to flavour, aroma, appearance and texture
- the likely causes of variation in results, including typical variation that can occur in the material/product and how these occur, as well as how the method of analysis, environment and state of individual participants that can affect the outcome
- procedures and responsibility for recording and reporting sensory analysis information

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that

EVIDENCE GUIDE	
	recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct a sensory analysis of food and food ingredients using texture, taste, smell and appearance • interpret results of sensory analysis against assessment criteria • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • samples for analysis • sensory analysis environment, procedures, criteria and reporting documentation.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Example could be:</p> <ul style="list-style-type: none"> • FDFOP2013A Apply sampling procedures.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements
Workplace information	Workplace information may include: <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • sampling plans • sensory analysis criteria • reporting documentation
Sensory analysis	Sensory analysis may be conducted by individuals and/or panels and applied to materials/ingredients and/or final products

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect statistical information	1.1.Data requirements are identified 1.2.Data is collected to meet requirements
2. Analyse and interpret data	2.1.Data is analysed to identify variation 2.2.Trends in data are identified 2.3.Corrective action requirements are determined based on data

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> identify and collect required data retrieve/access data, which may require use of computer programs to access and analyse data, and the ability to locate the relevant information or screens to collect and analyse the data apply basic statistical analysis techniques to meet work requirements, such as plotting data on charts (e.g. run or control charts) and identify variation according

REQUIRED SKILLS AND KNOWLEDGE

to given limits

- interpret data to identify trends (manually or using a computer program)
- determine when corrective action is required, such as identifying upper and lower control limits (and warning limits where relevant)

Required knowledge***Knowledge of:***

- data sampling method, including the nature of the sample on which data is based and the reasons for different sampling requirements that may apply in a given situation
- concept of variation, including the difference between common and special causes of variation and consequent options for reducing variation and remaining within a given range
- the purpose and process of establishing targets and limits
- concept of standard distribution/standard deviation
- methods used to analyse statistical data, including methods to determine the average, median and mean, and what these measures indicate

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify data for collection and requirements for ensuring accuracy
- interpret data
- document data on charts, graphs or required workplace format
- identify need for corrective action.

Context of and specific resources for

Assessment must occur in a real or simulated workplace

EVIDENCE GUIDE	
assessment	where the assessee has access to: <ul style="list-style-type: none"> • statistical process control data • related data collection and analysis systems • calculator.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain food safety while working in a food handling area	<p>1.1. Food safety requirements related to work tasks are identified and followed</p> <p>1.2. Work responsibilities are carried out so that the safety of food is maintained</p> <p>1.3. Procedures or practices which are not consistent with workplace food safety program are identified and reported</p>
2. Maintain food handling area in clean and orderly state	<p>2.1. Equipment and the food handling area meet the cleaning and sanitation requirements of workplace food safety program</p> <p>2.2. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.3. Waste is collected and disposed of according to workplace procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and apply workplace information on food safety policies and procedures relating to own work
- fit and use appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- maintain personal conduct consistent with workplace requirements
- check own work area to identify food safety hazards
- carry out work responsibilities to ensure that food safety is not compromised
- take necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognise and report situations or procedures that could compromise food safety according to workplace procedure, including following procedures in own work and related work area to report to the appropriate personnel, in required detail and in a timely manner
- take corrective or preventative action within level of responsibility
- report health conditions and illness as required by workplace food safety procedures
- sort and dispose of waste as required by work responsibility according to workplace procedure
- maintain housekeeping standards in work area
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non food-handling areas
- suitable standard for materials and equipment used in the food handling area, including materials that are unsuitable for use, such as breakable or dirty equipment/materials
- methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised (this will depend on the nature of work responsibilities and food safety requirements as

REQUIRED SKILLS AND KNOWLEDGE

specified by the workplace)

- the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring
- cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area
- waste collection, recycling and handling procedures
- housekeeping standards to be maintained in the work area

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify food handling procedures and food safety issues for work
- apply food safety procedures when handling food products
- identify and act on non-conformances
- ensure cleaning standards are met
- follow environmental and waste management procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety policies and procedures relevant to work function
- work procedures, including procedures for entering and exiting food handling areas
- work process and related services/resources
- work area and related equipment to undertake work function

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> waste collection, treatment, recycling and/or disposal methods monitoring and reporting system.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the case packing equipment and process for operation	<p>1.1.Packaged product and packaging components/consumables are confirmed and available to meet production requirements</p> <p>1.2.Pre-start checks are carried out on process and related equipment to confirm readiness for use</p> <p>1.3.Packaging components/consumables are loaded/positioned to meet requirements</p> <p>1.4.Parameters are set to meet safety and packaging requirements</p>
2. Operate and monitor the case packing process	<p>2.1.The process is started and operated according to workplace procedures</p> <p>2.2.Equipment is monitored to identify variation in operating conditions</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.Packaging quality and packaging appearance are</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>monitored to confirm that specifications are met</p> <p>2.5.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the case packing process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify casepacking requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary packaging components/consumables, including boxes/cartons and related consumables
- inspect the quality of packaging components/consumables to confirm that standards are met
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters to suit product type, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, loading packaging components/consumables, positioning electronic eyes and sensors correctly, ensuring all safety guards are in place and operational, and confirming coders are correctly set for date and product requirements
- start, operate, monitor and adjust pick and place equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:

REQUIRED SKILLS AND KNOWLEDGE

- box formation
- alignment, placement and quantity of units packed
- operation of suction cups
- operation of related equipment (e.g. box closers and sealers)
- operation of ink jet coders to confirm correct code and clarity/legibility
- demonstrate procedure to reference or align equipment against setup parameters
- demonstrate product/packaging changeovers
- monitor flow of product to the process and packaged goods from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take casepacking process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- prepare equipment for cleaning
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of secondary packaging, including the requirements of packaging materials used and coding requirements
- basic operating principles of casepacking equipment, including main equipment components, status and purpose of guards, purpose and location of electronic eyes and sensors, equipment operating capacities and applications, and services required for operation of casepackers used in the workplace
- the flow of product to this stage in the packing process and the effect of outputs on downstream processes
- quality characteristics and requirements of outer packaging materials and of the packaged product, including board quality and finished packaged product specifications
- methods used to monitor the process, such as visual inspection of the process and of the quality of the packaged product
- inspection or test points (control points) in the process and the related procedures and recording requirements, and testing gluing or sealing of packages where

REQUIRED SKILLS AND KNOWLEDGE

required

- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including the effect of variation in packaging components/consumables on performance
- contamination/food safety hazards and risks associated with this stage in the packaging process and related control measures
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/packaging changeover procedures
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the packaging process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for case packing
- start, operate, monitor and adjust process equipment

EVIDENCE GUIDE	
	<p>to achieve required quality outcomes</p> <ul style="list-style-type: none"> • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems and production/packaging schedules • information on equipment capacity and operating parameters • specifications, control points and operating parameters • automated case packers and related equipment and services • product to be packaged and board and related consumables • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2030A Operate a process control interface.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</p>
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity <p>When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP</p>
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Case packing process and related equipment	<p>Case packing process and related equipment may include:</p> <ul style="list-style-type: none"> • product assembly and indexing systems • conveyors • carton/box erectors • automated product placement equipment • bundlers • labellers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • heat/shrink wrappers • box closers • ink jet coders
Packing configuration	Packing configuration may require: <ul style="list-style-type: none"> • single or multi-layered indexing
Operation of equipment and processes	Operation of equipment and processes may require: <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the filling and closing process for operation	<p>1.1. Materials and packaging components/consumables are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the filling process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that filled and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>closed containers meet specifications</p> <p>2.5.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Monitor closure and seaming stage	<p>3.1.The closing stage is monitored to confirm that closures and seams meet specifications</p> <p>3.2.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>3.3.The workplace meets housekeeping standards</p> <p>3.4.Workplace records are maintained according to workplace recording requirements</p>
4. Shut down the filling and closing process	<p>4.1.The appropriate shutdown procedure is identified</p> <p>4.2.The process is shut down according to workplace procedures</p> <p>4.3.Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- prepare/condition product for filling as required
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters to suit filling requirements, cancelling isolation or lockouts as required, confirming that equipment is clean, correctly configured for filling and seaming requirements,

REQUIRED SKILLS AND KNOWLEDGE

- positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the filling process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - fill temperatures
 - headspace
 - vacuum
 - visual appearance of the product
 - line speed/throughput
 - monitor supply and flow of materials to and from the process
 - start, monitor and adjust the closer to confirm alignment and formation of the seam
 - monitor control points and conduct inspections related to the seaming/closing process, including confirming that coding is correct
 - take corrective action in response to out-of-specification results
 - conduct product/batch changeovers
 - respond to and/or report equipment failure within level of responsibility
 - locate emergency stop functions on equipment
 - follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
 - complete workplace records as required
 - demonstrate shift handover procedure
 - maintain work area to meet housekeeping standards
 - use process control systems according to enterprise procedures
 - inspect seams according to enterprise procedures
 - collect samples and conduct tests according to enterprise procedures
 - clean and sanitise equipment according to enterprise procedures
 - use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
 - work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of filling and closing, including the properties and requirements of packaging materials used, hermetic sealing and properties of containers used for this purpose, coding requirements and related legal requirements, such as product weight
- the flow of this process and the effect of the filling and seaming process on downstream processes

REQUIRED SKILLS AND KNOWLEDGE

- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- quality characteristics of the filled and closed container, including seam components and integrity requirements within level of responsibility for inspection
- effect of raw material characteristics on filling and seaming
- quality parameters for cans and ends
- methods used to prepare product for filling
- effect of process variables, such as headspace, fill temperature and vacuum on the process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the production/packing process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety issues associated with filling and seaming and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing procedures, where relevant, such as seam inspection procedures
- cleaning and sanitation procedures where relevant

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the forming, filling and sealing equipment and process for operation	<p>1.1. Materials and packaging components/consumables are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the forming, filling and sealing process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. Packaging quality and seal integrity are monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the forming, filling and sealing process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary packaging components/consumables and product
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, loading packaging components/consumables, positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the forming, filling and sealing process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification,

REQUIRED SKILLS AND KNOWLEDGE

such as:

- formation of container/packaging
- flow rates
- product weights and volumes
- fill levels
- temperature, including product and sealing temperatures
- supply of packaging components/consumables
- packaging quality and seal integrity, such as testing packaging integrity
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take forming, filling and sealing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- prepare forming, filling and sealing equipment for cleaning
- demonstrate product/process changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate aseptic container preparation/forming, filling and sealing according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of forming, filling and sealing, including the purpose and characteristics required of packaging materials used, and the methods used to form packaging, fill and seal product (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of forming, filling and sealing equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, the purpose and location of sensors and related

REQUIRED SKILLS AND KNOWLEDGE

- feedback instrumentation, and services required for operation of form, fill and seal equipment used in the workplace
- the flow of processes supplying the forming, filling and sealing process and the effect of process output on downstream processes
 - quality characteristics and requirements of forming, filling and sealing, such as quality requirements of product and packaging components/consumables, requirements of packaging forming stage, filling, including fill levels and weights, and requirements of seal formation and integrity, and integrity testing procedures, where required
 - methods used to monitor the process, such as inspecting, measuring and testing as required by the process
 - inspection or test points (control points) in the process and the related procedures and recording requirements
 - operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up
 - typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
 - common causes of variation and corrective action required, including the effect of variation in both product characteristics and packaging components/consumables on forming, filling and sealing performance
 - food safety hazards and risks associated with forming, filling and sealing and related control measures
 - occupational health and safety (OHS) hazards and controls
 - requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
 - isolation, lock out and tag out procedures and responsibilities
 - product/packaging changeover procedures
 - procedures and responsibility for reporting production and performance information
 - environmental issues and controls relevant to the forming, filling and sealing process, including waste/rework collection and handling procedures related to the process
 - basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
 - aseptic container preparation/forming, filling and sealing requirements where relevant
 - sampling and testing procedures where relevant
 - cleaning and sanitation procedures where relevant

	<p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.Packaging quality and seal integrity are monitored to confirm that specifications are met</p> <p>2.5.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the filling and sealing process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify filling and packaging requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary packaging components/consumables, product and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, loading packaging components/consumables, positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the filling and sealing process equipment to achieve required outcomes, including monitoring control points and conducting

REQUIRED SKILLS AND KNOWLEDGE

inspections as required to confirm process remains within specification, such as:

- flow rates
- product weights and volumes
- fill levels
- times and temperatures, including product and sealing temperatures
- supply of packaging components/consumables
- packaging quality and seal integrity, such as testing seal integrity
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take filling and sealing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- prepare filling and sealing equipment for cleaning
- demonstrate product/process changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate aseptic filling and sealing according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of filling and sealing, including the purpose and characteristics required of packaging materials used and the method used to fill and seal product (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements including product weight
- basic operating principles of filling and sealing equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, the purpose and location of sensors and related feedback instrumentation, and services required for operation of filling equipment used in the workplace
- the flow of processes supplying the filling and sealing process and the effect of outputs on downstream processes

REQUIRED SKILLS AND KNOWLEDGE

- quality characteristics and requirements of filling and sealing, such as quality requirements of product and packaging components/consumables, requirements of filling including fill levels and weights, requirements of seal formation and integrity, and integrity testing procedures, where required
- methods used to monitor the process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including procedures to clear a breach and restart following a crash or jam up as appropriate
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including the effect of variation in both product and packaging components/consumables on filling and sealing performance, such as the effect of temperature variation on the filling process
- food safety hazards and risks associated with filling and sealing and related control measures
- occupational health and safety (OHS) hazards and controls
- requirements of, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/packaging changeover procedures
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the filling and sealing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- aseptic filling and sealing requirements where relevant
- sampling and testing procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for filling and sealing • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems and production/packaging schedules • information on equipment capacity and operating parameters • specifications, control points and operating parameters • filling and sealing process and related equipment and services • materials and packaging components/consumables to be formed and filled • product • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and

EVIDENCE GUIDE	
	<p>other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity <p>When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food</p>

RANGE STATEMENT	
	Standards Code and reference to food safety is replaced by GMP
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Filling and sealing equipment	<p>Filling and sealing equipment may include:</p> <ul style="list-style-type: none"> • pumps • fillers, including aseptic bottle fillers • hermetic sealers • bag fillers • aseptic packaging • seamers • level detection equipment • conveyors <p>Related processes depend on product requirements and may include:</p> <ul style="list-style-type: none"> • product preparation equipment, such as mixers, blenders, carbonators, heat exchangers, chillers and crystallisers
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Packaging	<p>Packaging may include:</p> <ul style="list-style-type: none"> • vacuum packing • modified atmosphere packaging (MAP)
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services are appropriate to the process to be operated. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water

RANGE STATEMENT

	<ul style="list-style-type: none"> • vacuum • inert gas (where gas flushing is used) • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the wrapping equipment and process for operation	<p>1.1. Materials and packaging components/consumables are confirmed and available to meet production requirements</p> <p>1.2. Pre-start checks are carried out on process and related equipment to confirm readiness for use</p> <p>1.3. Packaging components/consumables are loaded/positioned to meet requirements</p> <p>1.4. Parameters are set to meet safety and packaging requirements</p>
2. Operate and monitor the wrapping process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. Packaging quality and seal integrity is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification</p>

ELEMENT	PERFORMANCE CRITERIA
	2.6.The work area is maintained according to housekeeping standards 2.7.Work is conducted in accordance with workplace environmental guidelines 2.8.Workplace records are maintained according to workplace recording requirements
3. Shut down the wrapping process	3.1.The appropriate shutdown procedure is identified 3.2.The process is shut down according to workplace procedures 3.3.Maintenance requirements are identified and reported

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify wrapping requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary packaging materials/film/cello and product, such as inspecting the quality of both product and wrapping material to confirm that standards are met
- conduct pre-start checks, such as inspecting equipment and conveyor belt condition to identify any signs of wear, selecting appropriate settings and/or related parameters to suit product type, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, loading/threading packaging components/consumables, positioning electronic eyes and sensors correctly, ensuring all safety guards are in place and operational, and confirming coders are correctly set for date and product requirements
- start, operate, monitor and adjust wrapping equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - product alignment
 - product weights
 - packaging quality
 - packaging and product alignment

REQUIRED SKILLS AND KNOWLEDGE

- seal integrity, such as testing packaging integrity
- codes-correct content and clarity/legibility
- monitor flow of product to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take high speed wrapping process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- prepare wrapping equipment and conveyors for cleaning
- demonstrate product/packaging changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of wrapping, including the properties and requirements of packaging materials used, coding requirements and related legal requirements (e.g. product weight)
- basic operating principles of wrapping equipment, such as main equipment components (e.g. conveyors and related guides and alignment adjustments), purpose and location of electronic eyes and sensors, status and purpose of guards, equipment operating capacities and applications, and services required for operation of wrapping equipment used in the workplace
- the flow of product to the wrapping process and the effect of outputs on downstream processes
- quality characteristics and requirements of product to be wrapped, wrapping materials and the final wrapped product
- methods used to monitor the process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of

REQUIRED SKILLS AND KNOWLEDGE

- faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including the effect of variation in both product and packaging components/consumables on performance
- contamination/food safety hazards and risks associated with the wrapping process and related control measures
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/packaging changeover procedures
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the filling and wrapping process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing procedures where relevant
- cleaning and sanitation procedures where relevant

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the equipment and process for operation	<p>1.1. Packaging components/consumables, materials and items to be packaged are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Materials, product and packaging components/consumables are loaded or positioned as required to meet packaging requirements</p> <p>1.6. Equipment performance is checked and adjusted as required</p>

ELEMENT	PERFORMANCE CRITERIA
	1.7.Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the process	2.1.The process is started and operated according to workplace procedures 2.2.Equipment is monitored to identify variation in operating conditions 2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4.The process is monitored to confirm that specifications are met 2.5.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6.The work area is maintained according to housekeeping standards 2.7.Work is conducted in accordance with workplace environmental guidelines 2.8.Workplace records are maintained according to workplace recording requirements
3. Shut down the process	3.1.The appropriate shutdown procedure is identified 3.2.The process is shut down according to workplace procedures 3.3.Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify packaging requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary packaging components/consumables, materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any

REQUIRED SKILLS AND KNOWLEDGE

signs of wear, setting coders and printers, selecting appropriate equipment settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational

- start, operate, monitor and adjust packaging equipment to achieve required outcomes., such as packaging components/consumables and/or product, and monitoring control points (e.g. weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity) as required to confirm process remains within specification
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take packaging equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/process changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- integrity testing of packaging according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the packaging process, including the purpose and characteristics required of packaging materials used and the principles of the packaging process used (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available

REQUIRED SKILLS AND KNOWLEDGE

- the flow of processes supplying the packaging process and the effect of outputs on downstream processes
- quality characteristics required of the packaging process, such as seal integrity requirements
- effect of variation in inputs, such as packaging components/consumables, materials and/or services, on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the packaging process, such as visual inspecting, and measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks related to stages in the packaging process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the packaging process, including emergency and routine shutdowns and procedures to follow in the event of a power outage, and conducting basic equipment referencing where required
- product/packaging changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- packaging integrity testing where relevant
- cleaning and sanitation procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the biscuit forming process for operation	<p>1.1. Materials and ingredients are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing or operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the biscuit forming process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that formed product is produced to specification</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the biscuit forming process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify biscuit forming process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply and condition of necessary materials and services, such as transferring and loading dough into hoppers
- confirm condition of dough, such as:
 - dough type matches product specification
 - dough temperature, consistency/texture, moisture level, weight and colour
 - dough standing time
 - dough supply/quantities
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that related equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational

REQUIRED SKILLS AND KNOWLEDGE

- confirm setting selection, such as:
 - setting parameters for process type
 - setting equipment speeds
 - adjusting roller and web settings (as required)
 - adjusting depositing/extrusion settings (as required)
- start, operate, monitor and adjust process equipment to achieve required outcomes, including control points and conducting inspections as required to confirm process remains within specification, such as:
 - biscuit size, shape and thickness
 - biscuit weight
 - dough temperature
- form product to specification, such as conducting a trial run in preparation for production run
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- conduct product/batch changeovers
- locate emergency stop functions on equipment
- shut down equipment in response to an emergency situation
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of biscuit forming
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the biscuit forming process and the effect of outputs on downstream

REQUIRED SKILLS AND KNOWLEDGE

- processes
- effect of dough quality on process outcomes
 - quality characteristics to be achieved by the process
 - quality requirements of materials and effect of variation on process performance
 - operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including procedures for incorporating rework dough and procedures for mending webs as required
 - typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
 - methods used to monitor the production process, such as inspecting, measuring and testing as required by the process
 - inspection or test points (control points) in the process and the related procedures and recording requirements
 - contamination/food safety risks associated with the process and related control measures
 - common causes of variation and corrective action required
 - occupational health and safety (OHS) hazards and controls
 - requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
 - isolation, lock out and tag out procedures and responsibilities
 - procedures and responsibility for reporting production and performance information
 - environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
 - basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
 - cleaning and sanitation procedures where relevant
 - sampling and testing associated with process monitoring and control where relevant
 - routine maintenance procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that

EVIDENCE GUIDE	
	recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for biscuit dough forming and shaping • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures to work practices.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule and recipe/batch instructions • specifications, control points and processing parameters • forming process and related equipment and services • biscuit dough to be formed • sampling and testing schedules and procedures, as required • sampling schedules and test procedures and equipment, as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment, as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • manufacturers' advice • standard forms and reports
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • depositing, rolling, forming and cutting equipment • manual and automated weighing and measuring equipment • conveying systems
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to dispense ingredients	<p>1.1. Materials are inspected to confirm type, quality clearance, quantities and identify any obvious contamination or non-compliance</p> <p>1.2. Measuring and weighing equipment is selected appropriate to dispensing requirements and checked to confirm readiness for use</p> <p>1.3. Containers, bags and labels are available as required</p> <p>1.4. Pre-start checks are carried out as required by workplace requirements</p>
2. Measure and/or weigh ingredients	<p>2.1. Non-bulk ingredients and additives are weighed or measured to meet production requirements</p> <p>2.2. Dispensed ingredients are labelled according to workplace procedure</p> <p>2.3. Accuracy of measuring and dispensing equipment is monitored to identify variation in operating conditions</p> <p>2.4. Variation in equipment operation is identified and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p style="text-align: center;">maintenance requirements are reported according to workplace reporting requirements</p> <p style="text-align: center;">2.5. The work area is maintained according to housekeeping standards</p> <p style="text-align: center;">2.6. Work is conducted in accordance with workplace environmental guidelines</p>
3. Complete the dispensing process	<p style="text-align: center;">3.1. Dispensing equipment is cleaned according to workplace procedure</p> <p style="text-align: center;">3.2. Unacceptable equipment and utensil condition is identified and reported</p> <p style="text-align: center;">3.3. Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify dispensing requirements
- select, fit and use personal protective clothing and/or equipment, such as use of breathing apparatus and fume cabinets as required
- confirm supply of necessary raw materials, such as checking ingredient type, grade, quantity, use-by codes and quality clearance
- carry out visual inspections and tests as required to confirm that raw materials are appropriate for use
- conduct pre-start checks on equipment, such as inspecting the condition and cleanliness of equipment and utensils, taring scales and carrying out any related procedures to confirm that equipment is accurately calibrated and fit for use, and confirming that any scheduled maintenance has been carried out
- identify out-of-specification or unacceptable ingredient condition and take appropriate corrective action
- measure materials and additives within specified accuracy range
- take corrective action in response to out-of-specification results
- pace dispensing to meet production requirements
- pack and label dispensed materials as required
- follow labelling procedures, such as identifying batch numbers, dates of

REQUIRED SKILLS AND KNOWLEDGE

preparation, contents and use-by information

- reconcile and record materials dispensed against materials released and return unused materials to storage as required
- clean dispensing equipment and utensils according to workplace procedures
- respond to and/or report equipment failure within level of responsibility
- complete dispensing records as required by workplace recording system
- maintain work area to meet housekeeping standards
- use basic equipment to support the dispensing process according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- quality characteristics and related handling requirements of raw materials/ingredients and additives used, such as best-by/use-by codes, ingredient compatibility and common allergens used
- storage requirements and shelf-life of ingredients and additives, including ingredients with special storage and handling requirements, such as hygroscopic ingredients
- relevant legislative responsibilities and workplace systems for recording and tracing the use of ingredients and additives and related workplace labelling requirements and purpose
- the relationship between the dispensing process and related operations, including accuracy and tolerance and consequence of error
- purpose, measuring and accuracy capacity of instrumentation and related equipment calibration responsibilities and procedures
- control points in the dispensing process
- contamination and food safety issues associated with dispensing and related control measures
- procedures for requisitioning, receiving and returning ingredients from stores
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- cleaning, care and storage of equipment and instrumentation used
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the dispensing process, including

REQUIRED SKILLS AND KNOWLEDGE

- waste collection and handling procedures related to the process
- sampling and testing where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on ingredients and equipment used for dispensing
- accurately weigh or measure ingredients to ensure specifications are met
- take corrective action in response to inconsistencies
- correctly label ingredients
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch and recipe instructions
- information on equipment and instrumentation capacity and operating parameters
- dispensing schedule or batch instructions
- dispensing instrumentation and equipment
- containers, bags, labelling and storage facilities

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the mixing or blending equipment and process for operation	1.1. Materials are confirmed and available to meet production requirements 1.2. Pre-mixes are prepared as required 1.3. Cleaning and maintenance requirements and status are identified and confirmed 1.4. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.5. Processing or operating parameters are entered as required to meet production requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>1.6. Equipment performance is checked and adjusted as required</p> <p>1.7. Pre-start checks are carried out as required by workplace requirements</p>
<p>2. Operate and monitor the mixing or blending process</p>	<p>2.1. Ingredients and additives are delivered to the mixer in the required quantities and sequence to meet recipe specifications</p> <p>2.2. The mixing or blending process is started and operated according to workplace procedures</p> <p>2.3. Equipment is monitored to identify variation in operating conditions</p> <p>2.4. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.5. The mixing process is monitored to confirm that specifications are met</p> <p>2.6. Out-of-specification product or process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.7. Mix is transferred to required production or storage location</p> <p>2.8. The work area is maintained according to housekeeping standards</p> <p>2.9. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.10. Workplace records are maintained according to workplace recording requirements</p>
<p>3. Shut down the mixing or blending process</p>	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- access workplace information to identify mixing/blending requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- add/load materials in correct quantities and sequence, such as monitoring automatic ingredient addition and/or manual addition
- start, monitor and adjust mixing or blending process equipment to achieve required outcomes, including monitoring flow rates/quantity, time or temperature and mix/blending settings
- monitor control points and conduct inspections as required to confirm process remains within specification
- monitor supply and flow of ingredients and additives to and from the mixing or blending process
- pace mixing/blending to meet production requirements
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out or tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- demonstrate batch or product changeovers
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- label and store pre-mixes and/or mixes according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- purpose and basic principles of preparing mixes and blends, including the characteristics and basic function of ingredients and additives used, method and sequence of ingredient addition required to achieve required blend characteristics, and where relevant, the purpose of conditioning, maturation or holding stages required prior to further processing of the mix
- basic understanding of specific gravity and bulk density as appropriate for ingredients used
- basic operating principles of mixing/blending equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, the purpose and location of sensors and related feedback instrumentation, and awareness of calibration schedules for scales and related weighing/measuring equipment
- services required and action to take if services are not available
- the flow of the mixing process and the effect of mix preparation on downstream processes
- procedures for requisitioning, receiving and returning ingredients from stores
- ingredient handling requirements and shelf-life or coding
- quality characteristics required of ingredients and additives and their effect on mixing process performance, including methods used to condition or prepare ingredients prior to addition
- methods used to monitor the blending or mixing process, including inspecting, measuring, and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements, such as:
 - flow rates
 - ingredient/additive addition sequence
 - times/temperatures and agitator speeds
 - required characteristics of blend, such as viscosity, appearance and temperature
- required attributes of the mixed or blended output, such as chemical, texture and flavour profiles as required
- the effect of the mixing or blending parameters, such as temperature and length of mix time on mixing outcome
- contamination and food safety risks associated with the process and related control measures, including product compatibility and cross contamination risks and associated cleaning requirements, as well as common allergens used in mixes prepared
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the blending or mixing

REQUIRED SKILLS AND KNOWLEDGE

- process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product or process changeover procedures and responsibilities
 - isolation, lock out and tag out procedures and responsibilities
 - procedures and responsibility for reporting production and performance information
 - environmental issues and controls relevant to the mixing or blending process, including waste or rework collection and handling procedures related to the process
 - basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
 - characteristics of solutions, suspensions and emulsions where relevant
 - sampling and testing associated with process monitoring and control where relevant
 - product labelling and storage requirements where relevant
 - routine maintenance procedures where relevant
 - cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- prepare premixes for mixing or blending
- conduct pre-start checks on machinery used for mixing or blending
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards

FDFOP2029A Operate a baking process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down processes used to bake and de-pan baked products.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit has application in a food processing production workplace. It typically targets the production worker responsible for producing baked products that may include pastry, biscuits, cake and other dough-based products and may be fresh or frozen.</p> <p>This unit does not apply to production of bread. For bread baking refer to the relevant plant baking and/or retail baking units of competency.</p> <p>When operators are required to perform batch or product changeover procedures as part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be selected.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the baking equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Materials are prepared to meet production requirements 1.3. Services are confirmed as available and ready for operation 1.4. Equipment performance and pans are checked and adjusted as required 1.5. The process is set to meet safety and production requirements
2. Operate and monitor the baking process	2.1. The baking process is started and operated according to workplace procedures 2.2. Product is loaded into oven and baked to specification 2.3. Equipment is monitored to identify variation in

ELEMENT	PERFORMANCE CRITERIA
	<p>operating conditions</p> <p>2.4.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.5.The process is monitored to confirm that specifications are met</p> <p>2.6.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.7.The work area is maintained according to housekeeping standards</p> <p>2.8.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.9.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the baking process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify baking process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- confirm condition and quality of ingredients
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all

REQUIRED SKILLS AND KNOWLEDGE

- safety guards are in place and operational, and rework bins are positioned
- confirm settings and parameters, including:
 - correct oven settings are selected for baking time, oven zone temperatures, conveyor speed, loaders and dischargers, circulation and exhaust fans, water seals, burner controls and steam as required
 - heights, guides and air blowers, and pre-blast conveyor are correctly set
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - baking output, including quantities and product appearance (colour and sheen, uniformity of shape, weight and size and moisture)
 - confirming product is cleanly removed from the pan (depanning stage) and/or belt/band as required
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers
- sort, collect, treat, recycle or dispose of waste, including clearing dust extractors
- complete workplace records as required
- maintain work area to meet housekeeping standards
- set up, start up and monitor the proofer, such as time and temperature, humidity, and position of the loading arm
- monitor the proving process according to enterprise procedures, including dough condition/surface and dough size and height
- set up and operate finishing equipment according to enterprise procedures, including setting topping application equipment, water sprays and splitters (monitoring typically involves checking appearance to confirm even coverage and/or finish as required by product specification)
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- purpose and basic principles of each stage of the baking process, including the stages of the baking process and changes that occur in the product, such as starch gelatinisation, the effect of variables (e.g. time, temperature and humidity), and oven zones as appropriate to oven type
- basic operating principles of equipment, including the difference between convection and impingement ovens, main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the baking process and the effect of outputs on customer satisfaction and downstream processes, such as packaging
- quality requirements of materials and effect of variation on baking process performance
- quality characteristics to be achieved by the baked product
- process specifications, procedures and operating parameters for different baked pastry products
- operating requirements, parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the baking process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the baking process and the related procedures and recording requirements, such as the ability to conduct dew point and/or wet bulb tests as required
- contamination/food safety risks associated with the baking process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including risks of spontaneous combustion and limitations of protective clothing and equipment used
- requirements of different shutdowns as appropriate to the baking process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- baking process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the baking process, including waste/rework collection and handling procedures related to the process
- purpose and operating procedures for related processes, such as in-line proving and finishing equipment where relevant

REQUIRED SKILLS AND KNOWLEDGE

- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for bake products
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • specifications, control points and processing parameters • production schedule and recipe/batch instructions • baking and depanning equipment and services, and related equipment as required • product to be baked • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • PMLTEST300B Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company policies and procedures, regulatory and licensing</p>

RANGE STATEMENT	
	requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Product	<p>Product includes, but is not limited to:</p> <ul style="list-style-type: none"> • pastry • biscuits • cake • other dough-based products and may be fresh or frozen
Equipment	<p>Equipment typically includes:</p> <ul style="list-style-type: none"> • in-line provers • ovens • trolleys • oven trays/tins • depanning equipment • cooling tunnels • finishing equipment
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)

RANGE STATEMENT

Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Navigate the process control interface	1.1. The readiness of the control interface and related components for operation are confirmed 1.2. Hardware provided is used to operate the interface 1.3. Page links are used to move between screens 1.4. Messages and alarms are acknowledged 1.5. Required information is accessed from screen displays 1.6. Interface system malfunctions are recorded and reported in accordance with workplace procedures
2. Use interface system to operate and maintain a process within required parameters	2.1. Individual items of equipment and/or processes are started, monitored and shutdown using the control interface 2.2. Equipment is selected, status altered and settings entered to meet operating requirements 2.3. Sequences are activated to initiate process operation 2.4. Equipment giving a bad signal or bad measurements is recognised and responsive action taken
3. Analyse data to predict and control performance	3.1. Trends are selected and analysed to identify performance patterns 3.2. Causes of abnormal or unacceptable performance are identified and corrective action taken 3.3. Information is recorded as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use all hardware components to operate the control interface
- navigate the system to locate and use information required, including moving between screens and locating relevant performance data
- operate the control system using the interface, including start up and shut down equipment components and change set points as required
- locate sensors and instrumentation providing input signals to the control system and confirm operating order within level of responsibility
- recognise and respond to error messages and alarms as required
- access relevant performance data using the control system, including locating and interpreting performance trend information
- record log information using the interface system according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- processes and equipment being controlled, including required processing sequences
- operating principles of process control and interface system, including the relationship between control panels, systems and the physical equipment, and where relevant understanding of the operating conditions required for accurate information input from sensors and related instrumentation
- action required to respond to error messages and alarms
- typical faults that can occur when operating a process control interface and corrective action required
- performance data collected by the control interface system and its application to troubleshoot performance, including the ability to identify and investigate related trend data to track cause and effect
- recording requirements and responsibilities

Evidence Guide

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- prepare coating materials as required
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust coating equipment to achieve required outcomes (this will depend on the nature of coating materials),such as:
 - condition of coating materials, such as checking grist/particle shape and size, checking for dough balls or lumps in flour-based breaders
 - viscosity and temperature of batter-type breaders and glazes
 - condition of product to be coated (this may include shape and temperature)
 - product orientation/indexing
 - conveyor positions and speeds

REQUIRED SKILLS AND KNOWLEDGE

- drum speed
- compression roller settings (drum applicator)
- dip pond levels
- air blow off settings
- spread/evenness of coating
- monitor supply and flow of materials to and from the coating process
- take corrective action in response to out-of-specification results
- conduct product/batch changeovers
- report and/or record corrective action as required
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- prepare equipment for cleaning
- respond to and/or report equipment failure within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- prepare breaders and glazes according to enterprise procedures
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of coating, including coating process, process design and operation to achieve the coating requirements, related requirements of product and coating condition and equipment settings
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- quality characteristics to be achieved by the coating process
- the flow of the coating process and the effect of product output on downstream processes
- quality requirements of coating materials and product to be coated and effect of variation on process performance
- operating requirements and parameters and corrective action required where

REQUIRED SKILLS AND KNOWLEDGE

- operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the coating process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the coating process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

EVIDENCE GUIDE	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on equipment used for product coating • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule, batch/recipe instructions • coating process and related equipment and services • coating materials and product • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
<p>Method of assessment</p>	<p>This unit should be assessed together with other units of competency relevant to the work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP1004A Prepare basic mixes • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • FDFOP2049A Operate a reduction process • MSL973001A Perform basic tests.

EVIDENCE GUIDE**Guidance information for assessment**

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements

Legislative requirements

Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:

- the Food Standards Code, including labelling, weights and measures legislation
- legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production schedules and instructions
- manufacturers' advice
- standard forms and reports

Coating processes

Coating processes include:

- pre-dusting
- batter and breading

RANGE STATEMENT	
	<ul style="list-style-type: none"> • application of marinades and glazes <p>These may be configured in sequence and/or involve multiple passes according to coating requirements. Related processes may include:</p> <ul style="list-style-type: none"> • batter preparation and crumb preparation <p>Refer to FDFOP1004A Prepare basic mixes, for batter preparation, and FDFOP2049A Operate a reduction process, for crumb preparation</p>
Coating materials	<p>Coating materials include:</p> <ul style="list-style-type: none"> • pre-dusts (usually finely ground) • grain-based material or dry batter • standard batters • tempura batter • wash batter • breaders, including flour, cracker meal, crumb, and marinades and glazes
Coating application equipment	<p>Coating application equipment may include:</p> <ul style="list-style-type: none"> • dip-type batter applicators, • top curtain/underflow applicators (enrobers) • standard breaders (belt-based with compression roller), including single belt (non-flip) and flip applicators, • drum breaders
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <p>Cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)</p>
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

	FDFPH2001A	Apply Good Manufacturing Practice procedures

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to enter a clean room environment	1.1. Appropriate clothing and footwear are identified and available 1.2. Clothing and footwear are correctly fitted and inspected prior to entering a clean room 1.3. Hand washing and disinfecting procedures are followed according to workplace procedure
2. Work in a clean room environment	2.1. Workplace procedures are followed to enter a clean room environment 2.2. Work activities are conducted so as to minimise risk of contamination
3. Exit a clean room environment and de-gown	3.1. Workplace procedures are followed to exit a clean room environment 3.2. Protective clothing and footwear is removed according to workplace procedure 3.3. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to determine clean room work requirements
- confirm that protective clothing and footwear are appropriate for use
- follow procedures to fit and inspect protective clothing and footwear
- follow procedures to enter a clean room environment, including following appropriate hand washing, disinfecting procedures and fitting gloves as required
- conduct work in a manner appropriate to minimising risk of contamination, including following procedures for sterilising and disinfecting equipment and surfaces as required
- exit the clean room environment according to workplace procedures
- remove protective clothing and footwear in correct sequence and deposit for laundering according to workplace procedures
- complete records as required
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and conditions required in a clean room environment, including how the clean room maintains a clean environment and related airflow systems
- preparation and handling requirements for garments and footwear worn in a clean room environment, including garment features appropriate to a clean room environment and inspection procedure to confirm clothing and footwear are fit for use prior to fitting
- inspection points to confirm that clothing and footwear are correctly fitted according to workplace procedures
- procedures to follow if garments are not fit for use
- clean room control measures and related monitoring requirements, such as pressure differences between the clean room and change room and knowledge of location of pressure gauges, and checking operating conditions of ventilation systems where required
- entry procedures
- requirements for conducting work in a clean room and consequences of not complying with these requirements (typically work is conducted slowly to minimise disturbance of particulates)

REQUIRED SKILLS AND KNOWLEDGE

- procedures to follow to minimise risk of contamination including cleaning, sanitation, sterilisation and disinfecting of equipment and surfaces
- conditions which can cause contamination, and control measures to avoid this occurring
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- procedures for exiting and de-gowning
- laundering requirements and procedures
- housekeeping requirements for work area
- recording requirements and procedures

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- prepare to work in a clean room environment through the correct application of required clothing and footwear
- conduct work according to clean room work standards
- follow hand washing procedures
- exit room according to clean room standards
- apply safe work practices and identify OHS hazards and controls.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- protective clothing, footwear and equipment appropriate to a clean room
- work procedures relevant to working in a clean room environment, including those specific to entering and

EVIDENCE GUIDE	
	<p>exiting the clean room and to carrying out the relevant work function</p> <ul style="list-style-type: none"> • a clean room environment • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, licensing requirements, legislative requirements, and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Clean room	A clean room refers to any environmentally graded

RANGE STATEMENT	
	work area
Multiple gowning processes	Multiple gowning processes may be required
Protective clothing and footwear	Protective clothing and footwear are fit for purpose and appropriate to a clean room environment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the depositing equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements 1.7. Materials are transferred to depositing equipment
2. Operate and monitor the depositing process	2.1. The depositing process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in

ELEMENT	PERFORMANCE CRITERIA
	<p>operating conditions</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The depositing process is monitored to confirm that specifications are met</p> <p>2.5.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the depositing process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- Access workplace information to identify depositing processing requirements
- Select, fit and use personal protective clothing and/or equipment
- Confirm supply of necessary materials and services as required for production. This may include confirming condition of materials including temperature, texture, appearance and holding times prior to use
- Conduct pre-start checks. This may involve inspecting equipment condition to identify any signs of wear; selecting appropriate settings and/or related parameters. This may include setting up depositor manifold and controls to meet production requirements and cancelling isolation or lockouts as required. Confirm that related equipment is clean; correctly configured for processing requirements; sensors and controls are correctly positioned; any scheduled maintenance has been carried out,

REQUIRED SKILLS AND KNOWLEDGE

and that all safety guards are in place and operational

- Start, operate, monitor and adjust depositing process equipment to achieve required outcomes. This may include monitoring control points and conducting inspections as required to confirm the process remains within specification. Monitoring may include:
 - maintaining supply of materials to hopper
 - controlling weights
 - checking dimensions and positioning of deposited material
 - visual inspections to identify faults such as unacceptable placement
 - checking pump stroke settings
 - checking line speed
- Monitor supply and flow of materials to and from the depositing process to confirm process remains within specification.
- Demonstrate product changeover procedures
- Take corrective action in response to out-of-specification results
- Respond to and/or report equipment failure within level of responsibility
- Locate emergency stop functions on equipment
- Follow isolation and lock out/tag out procedures as required to take depositing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- Complete workplace records as required
- Maintain work area to meet housekeeping standards
- Use process control systems according to enterprise procedures
- Collect samples and conduct tests according to enterprise procedures
- Conduct routine maintenance according to enterprise procedures
- Clean and sanitize equipment according to enterprise procedures
- Use oral communication skills / language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- Work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- Purpose and basic principles of the depositing process. This may include product preparation and conditioning requirements and product depositing
- Basic operating principles of equipment. This may include an operational understanding of main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation. It also includes knowledge of services required and action to take if services are not available
- The flow of the depositing process and the effect of outputs on downstream

REQUIRED SKILLS AND KNOWLEDGE

processes

- Quality requirements of materials for depositing and effect of variation on depositing process performance and outputs
- Quality characteristics required of process outputs
- Operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- Scope to adjust for weight variation within workplace quality parameters
- Typical equipment faults and related causes. This includes recognition of signs and symptoms of faulty equipment and early warning signs of potential problems
- Methods used to monitor the depositing process. This may include inspecting, measuring and testing as required by the process. It requires awareness of inspection or test points (control points) in the process and the related procedures and recording requirements
- Contamination/food safety risks associated with the depositing process and related control measures
- Common causes of variation and corrective action required
- OHS hazards and controls
- Requirements of different shutdowns as appropriate to the depositing process and workplace production requirements. This includes emergency and routine shutdowns and procedures to follow in the event of a power outage
- Isolation, lock out and tag out procedures and responsibilities
- Product/process changeover procedures and responsibilities
- Procedures and responsibility for reporting production and performance information
- Environmental issues and controls relevant to the depositing process. This includes waste/rework collection and handling procedures related to the process
- Basic operating principles of process control where relevant. This includes the relationship between control panels and systems and the physical equipment
- Sampling and testing associated with process monitoring and control where relevant
- Routine maintenance procedures where relevant
- Cleaning and sanitizing procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for depositing • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OH&S hazards and controls • safely shut down equipment • apply food safety procedures
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • recipe/batch instructions • specifications, control points and processing parameters • depositing and related equipment • ingredients/mix to be deposited • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required
Method of assessment	This unit should be assessed together with core units and other units of competence relevant to the function or work role. Examples could be: <ul style="list-style-type: none"> • FDFOP2030A Operate a process control interface

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • FDFOP2013A Apply sampling procedures • PMLTEST300B Perform basic tests • FDFOP2014A Participate in sensory analyses • FDFOP2011A Conduct routine maintenance • FDFOP2004A Clean and sanitise equipment
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes the Food Standards Code including labelling, weights and measures legislation; and legislation covering food safety, environmental management, occupational health and safety, anti-discrimination and equal opportunity. When applied to the pharmaceutical industry, relevant GMP codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP
Workplace information	Workplace information may include Standard Operating Procedures (SOPs), specifications, production schedules and instructions,

RANGE STATEMENT	
	manufacturers' advice, standard forms and reports
Typical equipment	Typical equipment includes depositing hopper, nozzles and manifolds, tins/pans, belts, and lubricant applicators. Related processes may include cooling, further processing, and cutting equipment
Materials deposited	Materials deposited may include batter, cream, jam and fillings as appropriate to product
Operation of equipment and processes	Operation of equipment and processes may require the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include cleaning. In some cases cleaning may be carried out by a dedicated cleaning crew
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include power, steam, water, vacuum, and compressed and instrumentation air

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- prepare materials as required
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust evaporation equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - temperatures
 - vacuum
 - motor amperage
 - condensate flow
 - steam flow and pressure

REQUIRED SKILLS AND KNOWLEDGE

- throughput
- time/speed
- evaporated product characteristics
- monitor supply and flow of materials to and from the evaporation process
- take corrective action in response to out-of-specification results
- conduct product/batch changeovers
- report and/or record corrective action as required
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- prepare equipment for cleaning
- respond to and/or report equipment failure within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of evaporation, including an understanding of the principles of steam, the relationship between boiling point and pressure as applied to evaporation, and the changes that occur to product as it moves through the evaporation process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- quality characteristics to be achieved by the evaporation process
- the flow of the evaporation process and the effect of product output on downstream processes
- quality requirements of materials and effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems

REQUIRED SKILLS AND KNOWLEDGE

- techniques used to monitor the evaporation process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- occupation health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the evaporation process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for evaporation
- start, operate, monitor and adjust process equipment

EVIDENCE GUIDE	
	<p>to achieve required quality outcomes</p> <ul style="list-style-type: none"> • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule, batch/recipe instructions • evaporation process and related equipment and services • materials to be evaporated • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the enrobing equipment and process for operation	<p>1.1. Tempered chocolate is confirmed and available for enrobing and centres/bars are conditioned as required to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the enrobing process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the enrobing process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify enrobing process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of tempered chocolate and the relevant centres/biscuits are available at the correct temperature
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust enrobing process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - supply of chocolate to the enrobing reservoir
 - temperatures of chocolate and pipelines

REQUIRED SKILLS AND KNOWLEDGE

- chocolate temper
- chocolate supply pump speed
- curtain flow
- blower and vibrator settings
- temperature profile of cooling tunnel
- chocolate coverage
- backing off and tailing
- product weight
- appearance
- cooling temperatures
- monitor supply and flow of materials to and from the enrobing process and equipment operation to confirm process remains within specification
- demonstrate product/batch changeovers
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take enrobing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the enrobing process, such as the effect of chocolate viscosity on enrobing and types of chocolate suitable/used for coverage and backing off
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation.
- services required and action to take if services are not available
- the flow of the enrobing process and the effect of outputs on downstream processes
- conditioning requirements for centres/bars/biscuits and chocolate, such as

REQUIRED SKILLS AND KNOWLEDGE

- understanding of temper test procedures
- quality characteristics of centres/bars/biscuits and chocolate for use in the enrobing process and the effect of variation on process performance and outputs
- quality characteristics to be achieved by the process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the enrobing process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the enrobing process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the enrobing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the enrobing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitising procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the

EVIDENCE GUIDE	
	<p>assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for enrobing • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • recipe/batch instructions • specifications, control points and processing parameters • process and related equipment and services, including enrober and cooling equipment • materials to be processed, including tempered chocolate and conditioned centers to be enrobed • sampling schedules and test procedures and equipment as required • cleaning procedures, materials and equipment as required.
<p>Method of assessment</p>	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Ingredients	<p>Ingredients include:</p> <ul style="list-style-type: none"> • tempered chocolate (more than one type of

RANGE STATEMENT	
	<p>chocolate may be used)</p> <ul style="list-style-type: none"> • centres • bars or biscuits to be covered
Typical equipment	<p>Typical equipment includes:</p> <ul style="list-style-type: none"> • pump • conveyor belt • reservoir tank • enrober • blowers • vibrators • detailers • roll scrapers/licking rolls • cooling tunnels
Operation of equipment	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the extrusion equipment and process for operation	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Machine components and related attachments are selected and fitted to meet operating requirements</p> <p>1.3. Processing and operating parameters are entered as required to meet safety and production requirements</p> <p>1.4. Equipment performance is checked and adjusted as required</p> <p>1.5. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the extrusion process	<p>2.1. Ingredients and additives are delivered to the extrusion process in the required quantities and sequence</p> <p>2.2. Preparation of the mass is monitored to confirm that specifications are met and mass is suitable for extrusion</p> <p>2.3. The extrusion process is operated according to workplace procedures</p> <p>2.4. Equipment is monitored to identify variation in operating conditions</p> <p>2.5. Variation in equipment operation is identified and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p style="text-align: center;">maintenance requirements are reported according to workplace reporting requirements</p> <p>2.6. The extruded product is monitored to confirm that specifications are met</p> <p>2.7. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.8. The work area is maintained according to housekeeping standards</p> <p>2.9. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.10. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the extrusion process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials/ingredients and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting and fitting appropriate attachments where required, setting processing parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required at each stage of the extrusion process to confirm process remains within specification, such

REQUIRED SKILLS AND KNOWLEDGE

as:

- parameters such as throughput
- load/work input as measured by rpm (revs per minute)
- kilowatts
- amps and/or Hz (hertz) at each stage of the process
- monitor supply of materials to and from the extrusion process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of each part of the process, including the purpose and methods used to achieve each stage of the extrusion process
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the extrusion process and the effect of outputs on downstream processes
- quality characteristics of extruded output, including required characteristics of mass or blend to be extruded, such as:
 - gelatinisation and viscosity
 - dimensions, texture and hardness of extruded product
 - moisture content
- effect of variation in inputs and/or services on process performance
- operating requirements and parameters and corrective action required where

REQUIRED SKILLS AND KNOWLEDGE

operation is outside specified operating parameters, including the effect of variation in key variables, such as:

- throughput and work input at each stage of the process
- effect of time and temperature
- barrel pressures and temperatures at each zone
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems, such as:
 - screw and barrel assembly wear
 - die plate wear
 - wear of conditioner paddles
 - extruder knife condition
- methods used to monitor the extrusion process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- common causes of variation and corrective action required
- contamination risks related to the extrusion process and related control measures
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the extrusion process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

3. Shut down the filtration process	<p>3.1. The appropriate shut down procedure is identified</p> <p>3.2. The process is shutdown according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify filtration processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting and fitting appropriate screens and equipment components, selecting settings and/or related parameters, cancelling isolation or lockouts as required, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place

REQUIRED SKILLS AND KNOWLEDGE

and operational

- start, operate, monitor and adjust filtration process and equipment to achieve required outcomes, including:
 - flow rates
 - residence time
 - solids for in-feeds and out-feeds (this is typically done by conducting a spin test)
- monitor supply and flow of materials to and from the filtration process
- take corrective action in response to out-of-specification results, such as identifying and responding to sieve or screen blockages or tears
- identify and correct or report equipment faults, such as confirming condition screens and sieves and replacing damaged components within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take filtration and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- clean and sanitise filtration equipment
- conduct product/batch changeover
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of filtration, including stages and changes that occur during filtration
- basic operating principles of filtration equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, including relevant screens and sieves as required by filtration equipment, and the purpose and location of sensors and related feedback instrumentation
- services required for operation of filtration equipment used in the workplace
- the flow of the filtration process and the effect of product output on downstream processes
- effect of raw material characteristics on filtration performance
- quality characteristics required of filtration process output
- test methods used to monitor solids in in-feed and out-feed streams

REQUIRED SKILLS AND KNOWLEDGE

- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems such as screen or sieve damage
- common causes of variation and corrective action required
- spoilage and other food safety risks associated with filtration
- occupation health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the filtration process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- cleaning procedures appropriate for the range of filtration components used
- isolation, lock out and tag out procedures and responsibilities
- product/batch changeover procedures
- cleaning and sanitising methods and procedures
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to filtration, including handling of effluent
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the grinding equipment and process for operation	<p>1.1. Materials are confirmed and available to meet production requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the grinding process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted according to environmental standards 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the grinding process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services to the grinding process
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- operate stockfeed control panel to transfer and grind product
- monitor and adjust the grinding process and equipment operation to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, and running adjustments to hammer mills and roller mills
- monitor supply and flow of materials to and from the grinding process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- demonstrate batch/product changeovers
- sort, collect, treat, recycle or dispose of waste
- maintain work area to meet housekeeping standards
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the grinding process, including the characteristics of materials, which can be reduced to a suitable form for product such as stockfeed
- basic operating principles of equipment, such as main equipment components, bulk materials transfer systems and equipment, dust collection equipment, grinding equipment operating capacities and applications, and the purpose and location of magnets, sensors and related feedback instrumentation
- services required and action to take if services are not available
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- the flow of the grinding process and the effect of product output on downstream processes
- quality characteristics and uses of grinding process outputs
- effect of the grinding process on the end product
- effect of raw material characteristics on grinding process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the grinding process and related control measures

REQUIRED SKILLS AND KNOWLEDGE

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the risk of dust explosion and an understanding of the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for grinding
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards

EVIDENCE GUIDE	
	<p>and controls</p> <ul style="list-style-type: none"> • safely shut down equipment • apply food safety procedures to work practices.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions • specifications, control points and processing parameters • production schedule/batch instructions • information on equipment capacity and operating parameters • grinding and related equipment and services • stock required for the grinding process • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standard Code, including the labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • conveyors/elevators • augers • magnets • fans • sieves • hammer mills • roller mills • breaker bars • cyclones
Materials	<p>Materials include:</p> <ul style="list-style-type: none"> • grains

RANGE STATEMENT	
	<ul style="list-style-type: none"> • pulses Pulses are legumes typically include: <ul style="list-style-type: none"> • peas • beans • lentils
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> • cleaning(in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the frying process for operation	<p>1.1.Frying oil and product are confirmed and available to meet operating requirements</p> <p>1.2.Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3.Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4.Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5.Equipment performance is checked and adjusted as required</p> <p>1.6.Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the frying process	<p>2.1.The process is started and operated according to workplace procedures</p> <p>2.2.Equipment is monitored to identify variation in operating conditions</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the frying process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify frying requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary oil type to meet product frying requirement, product to be processed and services
- prepare materials as required prior to frying
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and valves are correctly positioned for oil transfer and processing stages, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the frying process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - product throughput/belt speeds
 - oil levels/temperatures

REQUIRED SKILLS AND KNOWLEDGE

- operation of oil filtration process
- visual appearance of product, such as breaking open to inspect
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- conduct product/batch changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of frying, including optimal frying conditions and the role of oil filtration
- basic operating principles of equipment, such as main equipment components, the configuration of valves, pumps and pipework, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the frying process and the effect of product output on downstream processes
- quality characteristics to be achieved by the frying process
- effect of product and oil quality characteristics on the frying process, final product and shelf-life
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the frying process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control

REQUIRED SKILLS AND KNOWLEDGE

measures

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the fire suppression system and procedures to follow if temperatures exceed the specified range
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the frying process, including procedures for recycling oil and for disposing of spent oil and the consequences of incorrect disposal
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

	<p>operating conditions</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The process is monitored to confirm that temperature specifications are met</p> <p>2.5.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the heat treatment process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify heat treatment requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- prepare materials as required
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational

REQUIRED SKILLS AND KNOWLEDGE

- start, operate, monitor and adjust the heat treatment process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - time and temperature
 - pressure
 - flow rates
 - flow diversion
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate procedure to clean and sanitise equipment
- complete workplace records as required
- maintain work area to meet housekeeping standards
- control related holding and cooling stages according to enterprise procedures
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- conduct product/batch changeovers according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of heat treatment, including the effect of heat treatment on product and on microbiological characteristics
- the relationship between time, temperature and pressure in the heat treatment process, such as associated holding and cooling profiles according to product requirements
- basic operating principles of equipment, such as main equipment components, types and characteristics of heating mediums used, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the heat treatment process and the effect of product output on downstream processes
- quality characteristics required of the heat treated product

REQUIRED SKILLS AND KNOWLEDGE

- effect of raw material characteristics on the heat treatment process, such as variation in viscosity/texture, microbial load and acidity
- heat treatment requirements for food to be treated, such as low and/or high acid foods
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the heat treatment process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- cleaning and sanitation procedures
- environmental issues and controls relevant to the heat treatment process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- routine maintenance procedures where relevant
- sampling and testing associated with process monitoring and control where relevant

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare mixing/blending and cooking equipment and process for operation	1.1. Ingredients are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the mixing/blending	2.1. Ingredients and additives are introduced in the required quantities and sequence to meet recipe

ELEMENT	PERFORMANCE CRITERIA
and cooking process	<p>specifications</p> <p>2.2.The process is started and operated according to workplace procedures</p> <p>2.3.Equipment is monitored to identify variation in operating conditions</p> <p>2.4.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.5.The process is monitored to confirm that specifications are met</p> <p>2.6.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.7.Mix is transferred to required production or storage location</p> <p>2.8.The work area is maintained according to housekeeping standards</p> <p>2.9.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.10. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the mixing/blending and cooking process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify recipe requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any

REQUIRED SKILLS AND KNOWLEDGE

signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that related equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational

- sequence ingredient addition to meet recipe specifications, such as manual addition and/or operating bulk materials transfer and automatic addition equipment
- start, monitor and adjust processing equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - time and temperature
 - agitation settings
 - weights
 - flow rates
 - flow diversion
 - characteristics of the mix (e.g. colour, viscosity, density and consistency)
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- conduct product/batch changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- cool and pack off cooked product according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of heat sterilisation and effect on physical, chemical, microbiological and organoleptic characteristics of the cooked product
- the flow of the mixing or blending and cooking process and the effect of product output on downstream processes

REQUIRED SKILLS AND KNOWLEDGE

- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, the purpose and location of sensors and related feedback instrumentation, and calibration schedules for scales and related weighing/measuring equipment
- services required and action to take if services are not available
- quality characteristics and conditioning required of ingredients used and their role in the product, such as reconstituting dry ingredients and bringing ingredients to a required temperature
- effect of ingredient quality/condition on the process, including variables such as temperature, viscosity/texture, microbial load and acidity quality
- heat treatment requirements for low and/or high acid foods as appropriate to production requirements
- stages and changes which occur during the blending and heat treatment stages
- quality requirements of the cooked product, such as chemical, textural and flavour profiles as required
- relationship between time and temperature in the cooking process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- procedures for requisitioning, receiving and returning ingredients from stores
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required
- contamination/food safety issues associated with mixing and blending and related control measures
- operational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- food safety requirements when preparing products containing meat where relevant
- packaging requirements and procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for mixing, blending and cooking • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch/recipe instructions • specifications, control points and operating parameters • mixing/blending and cooking process and related equipment and services • ingredients to be cooked • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as

EVIDENCE GUIDE	
	required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</p>
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

RANGE STATEMENT	
	When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • consignment notes • verification procedures • standard forms and reports
Equipment	<p>Equipment typically includes:</p> <ul style="list-style-type: none"> • weighing and measuring equipment • sieves • stand-alone kettles fitted with agitators (batch processing) or blenders • shell and tube heat exchangers/cookers (continuous processing) • conveyors • bulk materials transfer equipment • storage facilities <p>Product cooling and packing may be integral to a mixing and cooking process depending on equipment/process configuration</p>
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services are appropriate to the process to be operated. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water

RANGE STATEMENT

	<ul style="list-style-type: none"> • vacuum • and compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the drying process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Processing and operating parameters are entered as required to meet safety and production requirements 1.4. Equipment performance is checked and adjusted as required 1.5. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the drying process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4. The process is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the drying process	<p>3.1. The appropriate shut down procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- prepare materials as required
- conduct pre-start checks, such as inspecting equipment condition (e.g. checking belts, chains, screens, seals and valves, and filters) to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:

REQUIRED SKILLS AND KNOWLEDGE

- temperatures
- moisture content
- air flow
- throughput
- time/speed
- pressure/vacuum
- product characteristics
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- respond to and/or report equipment failure within level of responsibility
- report and/or record corrective action as required
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- prepare equipment for cleaning
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate product/batch changeovers (may not apply to some continuous operations) according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the drying process, including the stages that occur during the drying process and the effect on product structure of each stage
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- quality characteristics to be achieved by the process
- materials preparation requirements and effect of variation on the process
- the flow of the drying process and the effect of outputs on downstream processes
- operating requirements and parameters and corrective action required where

REQUIRED SKILLS AND KNOWLEDGE

- operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the drying process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation, such as air temperature, air velocity, humidity and pressure, and corrective actions required if these are out-of-specification
- operational health and safety (OHS) hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the drying process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- routine maintenance procedures where relevant
- sampling and testing associated with process monitoring and control where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for drying • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule, batch instructions • specifications, control points and processing parameters • drying process and related equipment and services • product to be dried • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, and confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm the homogenising process remains within specification, such as:
 - temperature
 - pressure
 - throughput
- monitor supply and flow of materials to and from the process

REQUIRED SKILLS AND KNOWLEDGE

- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of homogenising
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- effect of raw materials on homogenisation, such as variables, including solids (brix), acidity, temperature, consistency and colour on process outcomes
- quality requirements to be achieved by the homogenisation process
- the flow of the homogenising process and the effect of product output on downstream processes
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the homogenising process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage

REQUIRED SKILLS AND KNOWLEDGE

- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the homogenising process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for homogenising
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • homogenisation process and related equipment and services • materials to be homogenised • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the retort equipment and process for operation	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.4. Equipment performance is checked and adjusted as required</p> <p>1.5. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the retort process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to</p>

ELEMENT	PERFORMANCE CRITERIA
	housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the retort process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including confirming container coding, and treating or confirming availability of treated cooling water
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the cooking and cooling process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - time
 - temperature
 - pressure at each stage
- cool, clean and handle post-treated containers to meet requirements
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- demonstrate batch changeovers
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of heat treatment and retort process, including the relationship between time and temperature in the retort process, and the changes and requirements of each stage, such as cooking, cooling and post-treatment container handling
- the purpose and requirements of container coding
- basic operating principles of equipment, such as main equipment components (e.g. thermometers, chart recorder, temperature control system, clock and pressure gauges), status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the retort process and the effect of product output on downstream processes
- quality characteristics required of the retorted product
- effect of raw material characteristics on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the retort process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures, including both the risks of contamination related to processing and to

REQUIRED SKILLS AND KNOWLEDGE

- post-processing handling of containers
- common causes of variation and corrective action required, including the effects of variables, such as container size, product particulates, pH, water activity, time/temperature and pressure on process outcomes
- operational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for retorting
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • retort process and related equipment and services • materials to be processed • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Retort/cooker equipment	<p>Retort/cooker equipment includes:</p> <ul style="list-style-type: none"> • static and batch retorts • continuous retorts, including hydrostatic cookers with or without over-pressure • coding and materials handling equipment
Equipment components	<p>Equipment components typically include:</p> <ul style="list-style-type: none"> • vents • bleeders • spreaders • time and temperature measurement instrumentation
Process stages	Process stages typically include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • cooking • cooling • post-cooling container handling
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare pumps for operation	<p>1.1.Pre-start checks on pumps and related equipment are carried out</p> <p>1.2.Appropriate settings are selected to meet safety and production requirements</p> <p>1.3.Condition of pumps and related equipment is monitored and maintenance requirements are identified and reported according to workplace reporting requirements</p>
2. Monitor pump operation	<p>2.1.Pumps and related equipment are started and monitored to identify variation in operating conditions</p> <p>2.2.Corrective action is taken as required to maintain pump operation within equipment capacity and operating parameters</p>
3. Complete pump operations	<p>3.1.Pumps are prepared for cleaning and/or maintenance</p> <p>3.2.Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify pumping requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of materials to be pumped and necessary services
- conduct pre-start checks, such as inspecting pump flanges, gaskets and seals to identify any signs of wear, checking related valve assemblies to identify any signs of leaks, cancelling isolation or lockouts as required (where pumps have variable settings, this involves selecting appropriate settings and confirming that related pipework is correctly configured for pumping requirements)
- monitor and adjust pump operation as required, such as identifying variation in amperage and adjusting pump speeds/flow rates to meet pumping requirements
- monitor supply and flow of materials to and from the pump
- follow isolation and lock out/tag out procedures as required to take pumps and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility (preparation of equipment may include flushing or pigging related lines and pipework, and removal of faceplate)
- respond to and/or report pump equipment failure within level of responsibility
- locate stop and reset functions on pumps
- maintain work area to meet housekeeping standards
- operate pumps using process control systems according to enterprise procedures
- conduct routine pump maintenance according to enterprise procedures
- clean pumps and related equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic operating principles of pumps and related equipment, including main pump components, status and purpose of guards, pump system configuration, including valves, taps and pipework
- the effect of pumping system design on operating performance, including flow resistance, pressure and head

REQUIRED SKILLS AND KNOWLEDGE

- operating capacities of pumps used in the work area, including different pump types as required to perform pumping operations where relevant
- effect of raw material characteristics on pump performance, including variables such as soluble solids, temperature and viscosity
- effect of pump operating parameters on product/materials pumped
- corrective action required where pump operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- services required
- isolation, lock out and tag out procedures and responsibilities
- operational health and safety (OHS) hazards and controls
- procedures and responsibility for reporting problems
- environmental issues and controls, including action required in the event of significant leaks or spills
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- routine pump maintenance requirements and procedures where relevant
- cleaning procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on pumps
- start, operate, monitor and adjust pumps to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • pumps, related equipment and services • materials to be pumped • routine preventative maintenance schedule as required • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2008A Operate a bulk liquid transfer process • FDFOP2011A Conduct routine maintenance • FDFOP2030A Operate a process control interface.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

RANGE STATEMENT	
situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Workplace information	Workplace information may include: <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Pumps	Pumps may include but are not limited to: <ul style="list-style-type: none"> • centrifugal pumps • reciprocating or positive displacement pumps • diaphragm pumps • helical screw pumps • electrical submersible pumps

ELEMENT	PERFORMANCE CRITERIA
	<p>operating conditions</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The process is monitored to confirm that specifications are met</p> <p>2.5.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to

REQUIRED SKILLS AND KNOWLEDGE

- confirm process remains within specification
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate batch/product changeovers according to enterprise procedures (may not apply to some continuous operations)
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of this process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the process
- quality requirements of materials and effect of variation on process performance
- operating requirements, parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including recognition of signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures

REQUIRED SKILLS AND KNOWLEDGE

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare portion saw for operation	1.1.Safety guards and covers are in place 1.2.Pre-start checks are carried out as required by workplace requirements
2. Operate the portion saw to achieve required outcome	2.1.Portions to be cut are positioned 2.2.The portion is passed over the blade and cut to meet specifications 2.3.Equipment is monitored to identify variation in operating conditions 2.4.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.5.Quality and accuracy of cuts is monitored to confirm that specifications are met 2.6.Equipment is inspected and cleaned according to workplace procedures 2.7.Work is conducted in accordance with workplace environmental guidelines 2.8.The work area is maintained according to housekeeping standards 2.9.Workplace records are maintained according to workplace recording requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Ability to:

- access workplace information to identify portion requirements
- select, fit and use personal protective clothing and/or equipment, including use of mesh gloves or similar protective clothing
- confirm supply of necessary poultry pieces, including inspecting and removing pieces of unacceptable quality
- conduct pre-start checks, such as inspecting condition of the portion saw to identify blade sharpness and other signs of wear, cancelling isolation or lock outs as required, confirming that equipment is clean and all safety guards are in place and operational, and ensuring that lighting, guarding and signage around the saw are in position
- collect portions to be cut
- position portions to allow the blade to pass cleanly through
- achieve cut accuracy to meet specifications and workplace standards with minimal waste
- identify faulty equipment operation and/or blunt blades and take corrective action
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take the portion saw and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- inspect and clean portion saw and report maintenance issues as required
- maintain work area to meet housekeeping standards
- conduct routine maintenance, such as blade replacement according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- quality specifications and characteristics required of portioned product
- portion saw operating procedures, including correct positioning of guards, lighting and safe work practices when working with the saw
- operational health and safety (OHS) hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- contamination/food safety risks associated with the automated cutting process and related control measures, including hygiene and sanitation requirements when

REQUIRED SKILLS AND KNOWLEDGE

handling product

- grading/downgrading specifications for portioned product
- the effect of outputs on downstream processes
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- procedures for cleaning and for reporting maintenance requirements
- waste handling requirements and procedures
- routine maintenance procedures where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on portion saw
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment,

EVIDENCE GUIDE	
	<p>including a mesh glove</p> <ul style="list-style-type: none"> • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • portion saw and related equipment and services • carcasses/pieces to be cut into portions • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and</p>

RANGE STATEMENT	
	industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Equipment	<p>Equipment includes:</p> <ul style="list-style-type: none"> • portion saw that is fixed in position • materials handling equipment as required

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for pre-processing	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the pre-processing process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the pre-processing process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- load or transfer materials to pre-processing equipment
- start, operate and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of pre-processing used
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the process and the effect of product output on downstream processes
- quality characteristics to be achieved at the pre-processing stage
- effect of raw material characteristics on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with pre-processing and related control measures
- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities

REQUIRED SKILLS AND KNOWLEDGE

- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for preparation of raw materials
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • production schedule and batch instructions • quality criteria, specifications and inspection procedures • raw materials • documentation and recording requirements and procedures • workplace records as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</p>

RANGE STATEMENT	
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Pre-processing methods	<p>Pre-processing methods may include:</p> <ul style="list-style-type: none"> • fully or semi-automated peeling • slicing and dicing • blanching • milling • other specialist processes
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services are appropriate to the process to be operated. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

3. Shut down the reduction process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify reduction process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that related equipment is clean and correctly configured for reduction process requirements, positioning sensors and

REQUIRED SKILLS AND KNOWLEDGE

- controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust reduction process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - correct product type/quantity
 - roll releases
 - even spread of feed across rolls
 - mill balance
 - even grind/correct particle size
 - monitor supply and flow of materials to and from the reduction process
 - take corrective action in response to out-of-specification results
 - respond to and/or report equipment failure within level of responsibility
 - locate emergency stop functions on equipment
 - follow isolation and lock out/tag out procedures as required to take reduction process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
 - demonstrate batch/product changeovers
 - complete workplace records as required
 - maintain work area to meet housekeeping standards
 - use process control systems according to enterprise procedures
 - collect samples and conduct tests according to enterprise procedures
 - conduct routine maintenance according to enterprise procedures
 - clean and sanitise equipment according to enterprise procedures
 - use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
 - work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the reduction process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the reduction process and the effect of outputs on downstream flour milling processes
- quality characteristics to be achieved by the reduction process
- quality requirements of materials and effect of variation on reduction process performance

REQUIRED SKILLS AND KNOWLEDGE

- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the reduction process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the reduction process and the related procedures and recording requirements
- contamination/food safety risks associated with the reduction process and related control measures
- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the reduction process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the reduction process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

ELEMENT	PERFORMANCE CRITERIA
	<p style="text-align: center;">maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The separation process is monitored to confirm that specifications are met</p> <p>2.5.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted according to environmental standards</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the separation process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify separation processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, confirming that the correct bowl is fitted, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust separation process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:

REQUIRED SKILLS AND KNOWLEDGE

- separation speed
- solids in in-feed and out-feed streams (this is typically done by in-line refractometers, Baume tests and spin tests)
- flow rates
- time/temperatures
- pressures
- air/water/oil levels
- condition of seals and valves
- discharge/desludging
- monitor supply and flow of materials to and from the separation process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- shut down separation process equipment in response to emergency situation
- follow isolation and lock out/tag out procedures as required to take separation process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- clean and sanitise equipment
- demonstrate product/process changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the separation process, including stages and changes that occur during the separation process
- basic operating principles of equipment, including safety hazards associated with separation equipment and the implications of interchanging parts/incorrect bowl balance
- main equipment components, status and purpose of guards, equipment operating capacities and applications, the purpose and location of sensors and related feedback instrumentation, and services required for operation of separation equipment used in the workplace
- the flow of the separation process and the effect of product output on downstream processes

REQUIRED SKILLS AND KNOWLEDGE

- impact of in-feed quality and concentration levels on the separation process
- quality characteristics and uses of separation process outputs
- methods used to monitor the separation process, such as inspecting, measuring and testing in-feed and out-feed solids, and other tests as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including how variation in temperature and solids affects the process
- spoilage and other food safety risks associated with separation, and related control measures
- operational health and safety (OHS) hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- cleaning and sanitation procedures
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the operation, including handling of effluent
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.

EVIDENCE GUIDE	
	Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for separation • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions • information on equipment capacity and operating parameters • production schedule and batch instructions • separation process and related equipment and services • specifications, control points and processing parameters • materials required for the separation process • sampling schedules and test procedures and equipment as required • routine preventative maintenance schedule as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

FDOP2051A Operate a spreads production process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a spreads production process appropriate to the manufacture of margarine or dairy-based spreads.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit has application in a food processing production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of a spreads production process and associated equipment.</p> <p>When operators are required to perform batch or product changeover procedures as part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be selected.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the spreads equipment and process for operation	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the spreads process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p style="text-align: center;">maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the spreads process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that related equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:

REQUIRED SKILLS AND KNOWLEDGE

- temperature
- work input
- throughput
- pressures
- crystal formation
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- demonstrate batch/product changeovers
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of spreads preparation, including crystallisation, the relationship between stages of crystal formation, work input and temperature, and the stages involved in the process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the spreads production process and the effect of outputs on downstream processes
- quality characteristics required of the finished product
- quality requirements of oil or emulsion for processing and the effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of

REQUIRED SKILLS AND KNOWLEDGE

- faulty equipment and early warning signs of potential problems
- methods used to monitor the spreads production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for production of spreads

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • spread processing and related equipment and services • emulsion or oil to be processed • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2013A Apply sampling procedures • FDFOP2011A Conduct routine maintenance • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

EVIDENCE GUIDE

	possible, over a number of assessment activities.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements

Legislative requirements

Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:

- the Food Standards Code, including labelling, weights and measures legislation
- legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production schedules and instructions
- manufacturers' advice
- standard forms and reports

Spreads

Spreads may include:

- pure fat
- emulsion-based products

Processing equipment

Processing equipment may include:

- pumps
- heat exchangers
- chillers

RANGE STATEMENT	
	<ul style="list-style-type: none"> • crystallisers • pin machines • votators • perfectors
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • refrigeration • compressed and instrumentation air

3. Shut down the tempering process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify tempering process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust tempering process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - setting pump speeds
 - checking temperature/zone settings
 - checking chocolate temperatures
- monitor supply and flow of materials to and from the tempering process and equipment operation to confirm process remains within specification
- demonstrate product/batch changeovers

REQUIRED SKILLS AND KNOWLEDGE

- conduct temper test, interpret results and determine adjustments as required
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take tempering process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the tempering process, including:
 - basic understanding of the crystallisation behaviour of cocoa fat
 - relationship between crystal forms and melting points/temperatures
 - process stages, such as heating, cooling, agitating, reheating and effect of each of these on outcomes
- basic operating principles of equipment, including main equipment components, temperature zones, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the tempering process and the effect of outputs on downstream processes
- quality characteristics required of chocolate for tempering and the effect of variation on tempering process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the tempering process, including temper test procedures and the significance of results for tempering process adjustments
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the tempering process and related

REQUIRED SKILLS AND KNOWLEDGE

control measures

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the tempering process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the tempering process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify production requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary raw materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust washing and drying equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, such as:
 - operation of dosing equipment

REQUIRED SKILLS AND KNOWLEDGE

- tank/bath or flume water levels
- related equipment operation (such as pumps/conveyors)
- immersion of raw materials
- temperatures
- water quality
- flow rates
- drying times
- weight (before and after drying)
- monitor supply and flow of raw materials to the wash process and from the drying process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the washing and drying process, including water quality, the role of sanitisers in the washing process, and of drying technology, such as the use of centrifugal force in a drying process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services (principally water) required and action to take if services are not available
- the flow of this process and the effect of outputs on downstream processes
- quality characteristics to be achieved by both the washing and drying stages, including consequence of out-of-specification moisture levels on further processing and final product

REQUIRED SKILLS AND KNOWLEDGE

- quality requirements of raw materials and effect of variation on process performance, including how variation in microbial load can affect the washing and drying process
- operating requirements, parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the washing and drying process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.

EVIDENCE GUIDE	
	Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for washing and drying product • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications and inspection or control points • washing and drying equipment and services, including water and sanitizer • raw materials to be processed • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

Co-requisite units		

FDOP2054A Operate a water purification process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a water purification process to produce water to meet production requirements.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit has application in a food processing production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of a water purification process and associated equipment.</p> <p>When operators are required to perform batch or product changeover procedures as part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be selected.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the water purification equipment and process for operation	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and sanitising requirements and status are identified and confirmed</p> <p>1.3. Batch records or process documentation is completed</p> <p>1.4. Processing/operating parameters are entered and/or confirmed as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the water purification process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions from those indicated in workplace documents or standard operating</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>procedures</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The process is monitored to confirm that purified water is produced to specification</p> <p>2.5.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the water purification process	<p>3.1.The appropriate shut down procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Workplace and/or batch documentation is completed</p> <p>3.4.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify water purification process requirements
- select, fit and use personal protective clothing and/or equipment
- respond appropriately to hazards, including chemical spills
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for water purification process requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and

REQUIRED SKILLS AND KNOWLEDGE

- confirming that all safety guards are in place and operational
- start, operate, monitor and adjust water purification process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - flow rates
 - pressure
 - operation of dosing equipment (where relevant)
 - alarms
- monitor supply and flow of materials to and from the water purification process
- take corrective action in response to out-of-specification results
- maintain a purification system free of physical, chemical and biological contaminants
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take water purification process and related equipment off-line in preparation for cleaning/back flushing and/or maintenance within level of responsibility
- carry out cleaning, sanitising, regenerating and back-flushing as required
- complete workplace records as required
- maintain work area to meet housekeeping standards
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the water purification process, including methods used to purify water appropriate to workplace requirements
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the water purification process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the water purification process
- quality requirements of inputs to the purification process and the effect of variation on process performance
- operating requirements and parameters and corrective action required where

REQUIRED SKILLS AND KNOWLEDGE

- operation is outside specified operating parameters
- typical equipment faults and related causes, including following troubleshooting and problem solving guidelines, and recognising signs and symptoms of faulty equipment and early warning signs of potential problems
- basic operating principles of process control as appropriate, including the relationship between control panels and systems and the physical equipment
- methods used to monitor the water purification process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the water purification process and the related procedures and recording requirements
- Good Manufacturing Practice (GMP)/food safety requirements (as appropriate) associated with the purification process and related control measures
- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the water purification process and workplace production requirements, including emergency and routine shutdowns
- isolation, lock out and tag out procedures and responsibilities
- cleaning and sanitation procedures
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the water purification process
- sampling and testing associated with water purification process monitoring and control where relevant
- routine maintenance procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate

Evidence of ability to:

EVIDENCE GUIDE	
competency in this unit	<ul style="list-style-type: none"> • conduct pre-start checks on machinery used for water purification • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule • specifications, control points and processing parameters • water purification process, chemicals and related equipment and services • water to be purified • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.

EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity <p>When applied to the pharmaceutical industry, relevant GMP codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP</p>
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports

RANGE STATEMENT	
Water purification equipment	Water purification equipment may include: <ul style="list-style-type: none"> • dosing equipment • storage tanks • pumps • valves • distillation systems • reverse osmosis systems • UV light • deionisation plants • softeners • carbon tanks • filters
Water produced	Water produced may include, but is not limited to: <ul style="list-style-type: none"> • purified water • deionised water • reverse osmosis (RO) • distilled water • water for injection (WFI)
Purification processes	Purification processes are typically continuous processes
Operation of equipment and processes	Operation of equipment and processes typically requires: <ul style="list-style-type: none"> • the use of process control panels and systems

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the freezing process for operation	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the freezing process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the freezing process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- prepare materials as required
- conduct pre-start checks, such as involve inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the freezing process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - tunnel and product temperatures
 - throughput
 - removal of frozen waste product from equipment

REQUIRED SKILLS AND KNOWLEDGE

- visually inspecting product
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- demonstrate procedure to defrost tunnels as required
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct product/batch changeovers according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of freezing, including the changes which occur to product during freezing
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, basic principles and operation of refrigeration system, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the freezing process and the effect of product output on downstream processes
- quality characteristics to be achieved by the freezing process
- effect of raw material characteristics on the freezing process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control

REQUIRED SKILLS AND KNOWLEDGE

measures

- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

ELEMENT	PERFORMANCE CRITERIA
	<p style="text-align: center;">maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted according to environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the membrane process	<p>3.1. The appropriate shutdown and cleaning procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- Access workplace information to identify membrane processing requirements
- Select, fit and use personal protective clothing and/or equipment
- Confirm supply of necessary materials and services
- Conduct pre-start checks. This may involve inspecting equipment/membrane condition to identify any signs of wear; selecting appropriate settings and/or related parameters; cancelling isolation or lockouts as required; confirming that equipment such as pumps, valves and pipework are clean and correctly configured for membrane processing requirements; sensors and controls are correctly positioned; any scheduled maintenance has been carried out, and that all safety guards are in place and operational
- Start, operate, monitor and adjust membrane processing equipment to achieve required outcomes. This may include monitoring control points and conducting

REQUIRED SKILLS AND KNOWLEDGE

inspections as required to confirm process remains within specification. This may include monitoring:

- temperatures
- flow rates
- total solids
- pressure/vacuum
- Monitor supply and flow of materials to and from the membrane process
- Conduct run/batch changeovers
- Take corrective action in response to out-of-specification results
- Respond to and/or report equipment failure within level of responsibility
- Locate emergency stop functions on equipment
- Follow isolation and lock out/tag out procedures as required to take membrane processing and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- Follow procedures to clean membranes
- Complete workplace records as required
- Maintain work area to meet housekeeping standards
- Use process control systems according to enterprise procedures
- Conduct routine maintenance according to enterprise procedures
- Collect samples and conduct tests according to enterprise procedures
- Use oral communication skills / language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- Work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- Purpose and basic principles of membrane processing. This includes an understanding of the components of milk, particle size of each component and the effect on these components of membrane processing. It also includes an understanding of the methods used to achieve this outcome
- Basic operating principles of equipment. This may include an operational understanding of main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation. It also includes an awareness of the material composition of membranes used in the workplace and related operating, cleaning and storage requirements
- The flow of the membrane process including the different processing streams and the effect of the membrane process outputs on downstream processes
- Quality characteristics required of the membrane processing outputs
- The effect of variation in raw material characteristics on membrane processing

REQUIRED SKILLS AND KNOWLEDGE

performance

- Operating requirements and parameters and corrective action required where operation is outside specified operating parameters. This includes an understanding of the effect of variation in processing parameters such as temperature, pressure, total solids and flow rates on membrane process performance
- Typical equipment faults and related causes. This includes recognition of signs and symptoms of faulty equipment and early warning signs of potential problems
- Techniques used to monitor membrane processing. This may include inspecting, measuring and testing as required by the process. It requires awareness of inspection or test points (control points) in the process and the related procedures and recording requirements
- Contamination/food safety risks associated with the process and related control measures
- Common causes of variation and corrective action required
- OHS hazards and controls. This includes awareness of the limitations of protective clothing and equipment relevant to the work process
- Requirements of different shutdowns as appropriate to membrane processing and workplace production requirements. This includes emergency and routine shutdowns and procedures to follow in the event of a power outage and shutdown
- Cleaning and sanitation requirements associated with changeovers
- Isolation, lock out and tag out procedures and responsibilities
- Procedures and responsibility for reporting production and performance information
- Environmental issues and controls relevant to membrane processing. This includes waste collection and handling procedures related to the process
- Basic operating principles of process control where relevant. This includes the relationship between control panels and systems and the physical equipment
- Routine maintenance procedures where relevant
- Sampling and testing associated with process monitoring and control where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.

EVIDENCE GUIDE	
	Competency in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for separation process • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OH&S hazards and controls • safely shut down equipment • apply food safety procedures to work practices
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions • information on equipment capacity and operating parameters • production schedule and batch instructions • specifications, control points and processing parameters • membrane processing and related equipment and services • materials required for membrane processing • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning and sanitation procedures, materials and equipment as required
Method of assessment	<p>This unit should be assessed together with core units and other units of competence relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2030A Operate a process control interface • FDFOP2013A Apply sampling procedures

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • PMLTEST300B Perform basic tests • FDFOP2011A Conduct routine maintenance • FDFOP2003A Clean work area and in place equipment • FDFOP2004A Clean and sanitise equipment
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes the Food Standards Code including labelling, weights and measures legislation; and legislation covering food safety, environmental management, occupational health and safety, anti-discrimination and equal opportunity
Workplace information	Workplace information may include Standard Operating Procedures (SOPs), specifications, production schedules and instructions, manufacturers' advice, standard forms and reports
Membrane modules	Membrane modules may be flat sheet (plate), spirally wound, hollow fibre, or tubular and may

RANGE STATEMENT	
	have a symmetrical, asymmetric or composite asymmetric structure. Related equipment typically includes pipework, valves and pumps, and refrigeration equipment
Shutdown procedures	Shutdown procedures may include cleaning. In some cases cleaning may be carried out by a dedicated cleaning crew
Operation of equipment and processes	Operation of equipment and processes may require the use of process control panels and systems
Services	Services are appropriate to the process to be operated. Typical examples include power, steam, water, vacuum, and compressed and instrumentation air

FDOP2058A Operate a holding and storage process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a holding/storage process under conditions that control the quality of the product.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit has application in a food production environment, such as processing of raw milk and/or processed products within a dairy production enterprise. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of equipment used to hold and store products, such as silos and holding tanks.</p> <p>When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the holding and storage equipment and process for operation	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the holding and storage process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p style="text-align: center;">maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The process is monitored to confirm that specifications are met</p> <p>2.5.Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Environmental procedures and standards are achieved</p> <p>2.8.Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the holding and storage process	<p>3.1.The appropriate shutdown procedure is identified</p> <p>3.2.The process is shut down according to workplace procedures</p> <p>3.3.Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify requirements for the holding and storage process
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services for the holding and storage process
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust holding and storage process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:

REQUIRED SKILLS AND KNOWLEDGE

- time/temperature
- flow rates
- agitation speed
- equipment condition and performance
- monitor supply and flow of materials to and from the holding and storage process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take holding and storage process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the holding/storage process including the importance of stock rotation
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the holding and storage process and the effect of product output on downstream processes
- contamination/food safety risks associated with the process and related control measures
- quality characteristics to be achieved by the holding and storage process, such as organoleptic characteristics of the product
- effect of raw material characteristics on the holding and storage process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the holding and storage process, such as inspecting,

REQUIRED SKILLS AND KNOWLEDGE

- measuring and testing as required by the process
- or test points (control points) in the process and the related procedures and recording requirements
 - common causes of variation and corrective action required
 - occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
 - requirements of different shutdowns as appropriate to the holding and storage process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
 - isolation, lock out and tag out procedures and responsibilities
 - procedures and responsibility for reporting production and performance information
 - environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process
 - basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
 - sampling and testing associated with process monitoring and control where relevant
 - routine maintenance procedures where relevant
 - cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for holding and storage of food products
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and

EVIDENCE GUIDE	
	<p>inconsistencies</p> <ul style="list-style-type: none"> • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures to work practices.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules and batch/recipe instructions • specifications, control points and processing parameters • information on equipment capacity and operating parameters • production schedule and batch instructions • holding and storage process and related equipment and services • materials required for a holding/storage process • sampling schedules and test procedures and equipment as required • routine preventative maintenance schedule as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of</p>

EVIDENCE GUIDE

	circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements

Legislative requirements

Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:

- the Food Standards Code, including labelling, weights and measures legislation
- legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production schedules and instructions
- manufacturers' advice
- standard forms and reports

Holding/storage equipment

Holding/storage equipment may include:

- silos
- intermediate storage tanks
- aseptic storage tanks
- mixing/blending tanks
- process tanks

RANGE STATEMENT	
	<ul style="list-style-type: none"> balance tanks
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services are appropriate to the holding and storage process to be operated. Typical examples include:</p> <ul style="list-style-type: none"> power steam water vacuum compressed and instrumentation air

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the freezing equipment and process for operation	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Monitor the freezing process operation	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the freezing process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - flow rates
 - churn speed
 - time/temperature
 - ingredient addition systems

REQUIRED SKILLS AND KNOWLEDGE

- pressures
- equipment condition and performance
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate batch/product changeovers according to enterprise procedures (may not apply to some continuous operations)
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the process, including the stages that occur during the churning and freezing process and the required physical and microstructure of the product
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the freezing process and the effect of outputs on downstream processes
- additives and ingredients used and their role in the product
- quality characteristics to be achieved by the freezing process
- quality requirements of materials/ingredients and effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, such as inspecting, measuring and

REQUIRED SKILLS AND KNOWLEDGE

- testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
 - contamination/food safety risks associated with the process and related control measures
 - common causes of variation and corrective action required
 - occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
 - requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
 - isolation, lock out and tag out procedures and responsibilities
 - procedures and responsibility for reporting production and performance information
 - environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
 - basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
 - product/process changeover procedures and responsibilities where relevant
 - sampling and testing associated with process monitoring and control where relevant
 - routine maintenance procedures where relevant
 - cleaning procedures where relevant

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the automated cutting equipment and process for operation	1.1.Carcasses/pieces are confirmed and available 1.2.Cleaning and maintenance requirements and status are identified and confirmed 1.3.Machine components and related attachments are fitted and adjusted to meet safety, type/size and cutting requirements 1.4.Equipment performance is checked and adjusted as required 1.5.Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the automated cutting process	2.1.Carcasses/pieces are inspected to confirm that quality requirements are met 2.2.Carcasses/pieces are hung to meet production pace 2.3.Equipment is monitored to identify variation in operating conditions 2.4.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.5.Quality and accuracy of cuts is monitored to confirm that specifications are met 2.6.Out-of-specification outcomes are identified,

ELEMENT	PERFORMANCE CRITERIA
	<p>rectified and/or reported to maintain the process within specification</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. The work area is maintained according to housekeeping standards</p> <p>2.9. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the automated cutting process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify cutting requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary carcasses/pieces and services, including inspecting and removing carcasses/pieces of unacceptable quality
- conduct pre-start checks, such as inspecting equipment condition to identify blade sharpness and other signs of wear, selecting appropriate settings and/or related parameters according to bird size/type, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for cutting process requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, confirming that all safety guards are in place and operational and running, and trialing cut to confirm accuracy/positioning where required
- start, operate, monitor and adjust automated cutting process equipment to achieve required outcomes, including hanging carcasses/pieces to meet production pace, such as monitoring control points and conducting inspections as required to confirm cut accuracy within specification
- monitor supply and flow of carcasses/pieces to and from the automated cutting process

REQUIRED SKILLS AND KNOWLEDGE

- take corrective action in response to out-of-specification results, including adjusting blades/knives within level of responsibility
- respond to and/or report equipment failure within level of responsibility
- demonstrate procedure to adjust equipment for bird/portion type/size
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take automated cutting process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance such as blade replacement according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the automated cutting process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the automated cutting process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the automated cutting process, including quality specifications and ability to assess cut quality and determine any required adjustments
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the automated cutting process, including inspecting the quality of cuts
- inspection or test points (control points) in the automated cutting process and the related procedures and recording requirements, such as recording information (e.g. temperatures and product codes)
- contamination/food safety risks associated with the automated cutting process and related control measures
- common causes of variation and corrective action required

REQUIRED SKILLS AND KNOWLEDGE

- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the automated cutting process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the automated cutting process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for cutting
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

EVIDENCE GUIDE	
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • automated cutting process and related equipment and services • carcasses/pieces to be processed • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2030A Operate a process control interface.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

FDOP2061A Use numerical applications in the workplace

Modification History

Not applicable.

Unit Descriptor

<p>Unit descriptor</p>	<p>This is unit of competency covers the skills and knowledge required to apply basic mathematical functions of addition, subtraction, multiplication and division to undertake workplace calculations or to estimate approximate answers when exact calculations are not required.</p>
-------------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>This unit has application in a production environment where basic mathematics may be required to undertake or support work processes. Typical applications of mathematical concepts in the workplace include but are not limited to measuring or estimating product characteristics, such as weight, capacity, time and temperature; measuring and estimating material usage, quantities and ratios; measuring equipment and processing parameters, such as speed/throughput; and calculating entitlements, such as pay, leave entitlements, and shift allowances.</p> <p>The unit requires both calculation and estimation skills with the choice between calculation and estimation dependent on the particular process and sector.</p>
---------------------------------------	--

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply basic mathematical concepts to calculate workplace information	1.1. Calculation requirements are identified and appropriate method is selected 1.2. Data is obtained from relevant sources and interpreted correctly. 1.3. Calculations are undertaken using addition, subtraction, multiplication and division to support work role
2. Apply basic mathematical concepts to estimate workplace information	2.1. Estimation requirements are identified and appropriate estimation method is selected 2.2. Data is obtained from relevant sources and interpreted correctly. 2.3. Estimations are made to meet work requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify whether a calculation or estimation is required to meet workplace requirements
- carry out calculations involving basic addition, subtraction, division and multiplication to support work role (this may involve use of a calculator and conversion tables where required)
- use estimation techniques to check quantities, ratios, speed and other required data estimates
- use estimation techniques to check calculated results and workplace data
- record calculations and measurement information accurately according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- mathematical processes, including addition, subtraction, multiplication and division
- application of calculation and estimation techniques to meet work requirements
- units of measurement used in the workplace, including whole numbers, fractions and decimals (to one decimal point) (this may include use of conversion charts)
- representation of numerical information relevant to work requirements, such as charts, graphs and tables
- recording requirements and responsibilities where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • identify calculation or estimation requirements • carry out calculations involving basic addition, subtraction, division and multiplication • where estimations are used, estimated amounts must be consistent with process or product specification and demonstrate knowledge of measurement units used in the workplace • use estimation techniques to check calculated results and workplace data.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • work tasks requiring simple estimation and calculation • conversion tables, calculators and measuring instruments where required • workplace forms/documents used for recording data where required.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role. Example could be: <ul style="list-style-type: none"> • FDFOP2015A Apply principles of statistical process control.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Calculations	<p>Calculations may include:</p> <ul style="list-style-type: none"> the use of whole numbers, decimals, fractions and percentages <p>Calculations may be made:</p> <ul style="list-style-type: none"> manually or using calculators and other measuring instruments as appropriate to the task
Estimations	<p>Estimations can be used where the workplace tasks require only an approximate judgment of an amount, ratio, speed, and so on. Estimations can be made from:</p> <ul style="list-style-type: none"> observations of other amounts or measurements supplied data, such as volume or weight information on packaging of raw materials
Conversion charts	<p>Conversion charts are those in common use in the workplace</p>
Results	<p>Results may or may not be recorded depending on workplace requirements</p>
Numerical information	<p>Numerical information may be presented in forms, including:</p> <ul style="list-style-type: none"> simple run charts graphs

Co-requisite units		

FDFOP3001A Control contaminants and allergens in the workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to examine the risk of contaminants and allergens in a food production workplace and assess and implement control measures designed to manage risks.
------------------------	---

Application of the Unit

Application of the unit	This unit has application in a food production or packaging workplace. This unit is appropriate where the operator or supervisor requires a detailed understanding of contaminants and allergens in the workplace and the effect they have on product safety and quality in order to ensure work practices comply with safety and operational work standards. This unit is especially appropriate where work is conducted in an environment where contaminants or allergens present a significant risk to the quality of product and the safety of workers or consumers.
--------------------------------	--

Licensing/Regulatory Information

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess risk of physical contamination	<p>1.1.Types and sources of physical contamination in the workplace are identified</p> <p>1.2.Risks to operations, product and consumer are identified</p> <p>1.3.Control measures to eliminate or reduce risks of physical contamination are identified</p> <p>1.4.Workplace procedures and practices are assessed to determine level of risk for physical contaminants and opportunities for improvement identified</p>
2. Assess risk of chemical contamination	<p>2.1.Types and sources of chemical contamination in the workplace are identified</p> <p>2.2.Risks to operations, product and consumer are identified</p> <p>2.3.Control measures to eliminate or reduce risks of chemical contamination are identified</p> <p>2.4.Workplace procedures and practices are assessed to determine level of risk for chemical contaminants</p>

ELEMENT	PERFORMANCE CRITERIA
	and opportunities for improvement identified
3. Assess risk of microbiological contamination	3.1.Types and sources of microbiological contamination in the workplace are identified 3.2.Risks to operations, product and consumer are identified 3.3.Control measures to eliminate or reduce risks of microbiological contamination are identified 3.4.Workplace procedures and practices are assessed to determine level of risk for microbiological contaminants and opportunities for improvement identified
4. Assess risk of allergens in the workplace	4.1.Types and sources of allergens are identified 4.2.Risks to operations, product and consumer are identified 4.3.Control measures to eliminate or reduce risks of allergens are identified 4.4.Workplace procedures and practices are assessed to determine level of risk for allergens and opportunities for improvement identified
5. Implement control measures to manage contaminants and allergens	5.1.Control measures are implemented as part of work operations 5.2.Emergency procedures and conditions for implementation are identified 5.3.Reporting and documentation associated with controls is identified and undertaken as required 5.4.Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify the types of physical, chemical and microbiological contaminants and allergens that present a risk in the workplace
- identify sources of risks

REQUIRED SKILLS AND KNOWLEDGE

- examine control measures
- describe the appropriate monitoring requirements for each risk, including the method or procedure to be followed, the frequency and timing, the person responsible, and the information to be recorded (procedures to be followed would typically be specified in the form of a standard operating procedure (SOP) or work instruction)
- describe corrective action requirements in the event that acceptable limits or requirements of controls are not met
- develop or review documentation relating to the food safety program, such as process flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- communicate food safety responsibilities within level of responsibility
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose and intent of food safety legislation and control measures
- roles and responsibilities for development and maintenance of the control measures
- food processing methods used in the workplace or work area and the risks of contamination
- sources of technical expertise on contaminants and allergens
- the role of control measures in the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety contamination likely to occur given the type of product and processing methods used
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- validation and verification processes and techniques and responsibilities

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • identify potential physical, chemical and microbiological contaminants in the workplace and their likely sources • identify risks associated with these contaminants and the control measures to manage risks • describe allergens and control measures that relate to workplace • identify workplace procedures to control risks and assess effectiveness in practice • implement workplace control measures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • workplace food safety program documentation • advice on quality and food safety legislation • procedures for implementing control measures and other advice on food safety requirements • other recording requirements.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT

work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Physical contaminants

Physical contaminants include all foreign objects that are caused by or come from:

- the raw material source
- processing systems
- processing equipment
- housekeeping standards

Sources of contamination include:

- employees (e.g. hair, bandaids, glasses, jewellery and coins or other contaminants, such as dirt, pests, food and raw materials)
- maintenance and cleaning procedures (e.g. metal shavings, grease from equipment, nuts and bolts, dirty equipment from previous products and glass breakages)
- packaging materials (e.g. ink, dye, staples, paper, cardboard and plastic)
- pests (e.g. evidence of rodents gnawing on packages, rodent hair, droppings and debris)
- incorrectly labelled or packaged raw materials
- industrial sabotage (e.g. tampering anywhere through the production process)
- accumulation of dusts from unclean environments

Control measures for physical contaminants

Control measures to reduce contamination may include:

- use of personal protective equipment
- clothing standards (e.g. enclosed hair and no jewellery)
- metal detectors
- rulings against glass in production or packaging areas
- covering of raw materials and equipment
- maintenance, cleaning and housekeeping programs
- inspection schedules

RANGE STATEMENT	
	<ul style="list-style-type: none"> • reporting requirements and procedures • emergency procedures
Chemical contaminants	<p>Chemical contamination includes the introduction of unwanted substances or an unplanned reaction between different products.</p> <p>Sources of chemical contamination include:</p> <ul style="list-style-type: none"> • unwanted chemicals remaining on food preparation surfaces (e.g. cleaning chemicals) • chemicals remaining in food material after processing • too much or the wrong chemical added during manufacture • insecticide, pesticides, herbicides and antibiotics that build up during the growth cycle of the food source
Control measures for chemical contaminants	<p>Control measures for chemical contaminants include safe handling of chemical contaminants, such as:</p> <ul style="list-style-type: none"> • storing chemicals away from food production areas • using correct containers for storing and dispensing chemicals • correctly labelling chemicals in containers • calculating and applying correct quantities • ensuring chemical record sheets are filled in correctly
Microbiological contaminants	<p>Microbiological contaminants include micro-organisms that in food that poison or spoil it.</p> <p>Types of micro-organisms associated with microbiological risks include:</p> <ul style="list-style-type: none"> • fungi • yeasts • moulds • viruses • bacteria
Control measures for biological contaminants	<p>Control measures for biological contaminants include:</p> <ul style="list-style-type: none"> • temperature and climate controls

RANGE STATEMENT	
	<ul style="list-style-type: none"> • personal hygiene standards • storage and processing conditions • chemical controls • housekeeping standards • pest controls
Allergens	Allergens include: <ul style="list-style-type: none"> • food substances, such as nuts, milk products • pollen and grain

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for line setup	<p>1.1. Materials are confirmed and available to meet production requirements</p> <p>1.2. Equipment and related accessories are confirmed, available and fit for use to meet production requirements</p> <p>1.3. Tools and equipment required for line setup are available, operational and fit for use</p> <p>1.4. Processing parameters and settings are identified to meet production or packaging requirements</p>
2. Set up the line for operation	<p>2.1. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>2.2. Equipment is inspected to confirm condition</p> <p>2.3. Machine settings are selected or adjusted as required to meet safety and production requirements</p> <p>2.4. Processing or packaging parameters are entered as required to meet production requirements</p> <p>2.5. Equipment performance is checked and adjusted as required</p> <p>2.6. Pre-start checks are carried out as required by workplace requirements</p> <p>2.7. Line setup is completed to match production or packaging schedule and operating requirements</p> <p>2.8. The line is ready and safe to operate and any</p>

ELEMENT	PERFORMANCE CRITERIA
	<p style="text-align: center;">maintenance requirements are reported according to workplace reporting requirements</p> <p style="text-align: center;">2.9. Work is conducted in accordance with workplace environmental guidelines</p> <p style="text-align: center;">2.10. Relevant personnel are notified of setup completion</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access production/packing schedule and related information to identify line setup/changeover requirements, such as checking product sequencing and compatibility, confirming that the required cleaning and/or sanitation has occurred and required packaging components and consumables are available as appropriate
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary equipment and related attachments, materials and services for production
- confirm supply of necessary equipment and services to carry out setup operations
- set and/or adjust equipment to meet production/packaging requirements, including selecting the required parameters or equipment settings, and changing processing set points as required
- position safety guards and cancel isolation/lockouts ready for operation
- confirm that sensors and related feedback instruments are correctly positioned and operational
- operate equipment to confirm equipment setup and make final adjustments as required
- time setup activities to meet production requirements
- advise affected work areas/personnel of completion of setup
- maintain work area to meet housekeeping standards
- load and/or position materials/ingredients/product and/or packaging consumables according to enterprise procedures
- use the control panel/system to set and adjust equipment components according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as

REQUIRED SKILLS AND KNOWLEDGE

specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge***Knowledge of:***

- basic operating principles of equipment and related accessories, including equipment adjustment points, range and location/alignment requirements of sensors and related feedback instruments, and status and purpose of guards
- operating capacities of equipment used in the work area, such as different types of equipment and/or components as required by processing operations
- nature of setup/changeover requirements, such as product compatibility and related cleaning requirements, impact of variation in materials or product on setup requirements, equipment and/or attachment changeovers related to given products
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- pre-start checks required by setup/changeover
- related processes and personnel dependent on line setup, and communication responsibilities
- isolation, lock out and tag out procedures and responsibilities
- occupational health and safety (OHS) hazards and controls
- procedures and responsibility for reporting equipment performance information
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance requirements and procedures where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and

Evidence of ability to:

EVIDENCE GUIDE	
evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • conduct pre-start checks on machinery used for production to determine cleaning, maintenance and operation readiness • determine production parameters and requirements • set up line according to production requirements • take corrective action in response to typical faults and inconsistencies • complete workplace records and communicate line status with other personnel as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • production/packaging schedule and related advice on setup/changeover requirements • cleaning records/clearance as required • information on equipment capacity and operating parameters • process/packaging equipment and related accessories and services • materials/consumables required by the process • hand tools as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2011A Conduct routine maintenance • FDFOP2030A Operate a process control interface.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements

Legislative requirements

Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:

- the Food Standards Code, including labelling, weights and measures legislation
- legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production schedules and instructions
- standard forms and reports

Equipment adjustment

Equipment adjustment may include:

- limited use of hand tools, such as Allen keys and screwdrivers, within level of responsibility

Confirming cleaning requirements and status

Confirming cleaning requirements and status may involve:

- accessing cleaning records

Pre-start checks are carried out as required by workplace requirements</p> <p>1.7. Equipment performance is checked and adjusted as required</p> <p>1.8. Equipment is ready and safe to operate</p>
2. Operate and monitor the production system	<p>2.1. The system is started up and operated according to company procedures</p> <p>2.2. System equipment components are monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The production system is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p>
3. Hand over production system operation	<p>3.1. Workplace records are maintained according to workplace recording requirements</p> <p>3.2. Handover is carried out according to workplace procedures</p> <p>3.3. Process operators are aware of system and related equipment status at completion of handover</p>
4. Shut down the production system	<p>4.1. The appropriate shutdown procedure is identified</p> <p>4.2. The system is shut down according to workplace procedures</p> <p>4.3. Maintenance requirements are identified and reported</p>
5. Contribute to continuous	<p>5.1. System performance is reviewed against output</p>

ELEMENT	PERFORMANCE CRITERIA
improvement of the production system	plan/targets 5.2.Opportunities for system improvement are identified and investigated 5.3.Proposals for improvement are developed and implemented within company planning arrangements, authority levels and according to company procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access production schedule and related information to identify system output and operating requirements, such as planning daily production schedules and/or modifying plans to respond to operating conditions and customer requirements
- liaise with relevant work areas to confirm and/or secure necessary materials, services, equipment and labour to meet production requirements
- confirm supply of necessary equipment and related attachments, materials and services
- select, fit and use personal protective clothing and/or equipment
- set and/or adjust equipment to meet process output requirements, including inspecting equipment condition to identify any signs of wear, confirming selection of appropriate settings and/or related parameters, ensuring that isolation or lock outs are cancelled as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational (checks may be done by the system operator or involve observing/supporting others setting and adjusting equipment and conducting pre-start checks)
- load and/or position materials, ingredients and/or product as required
- operate and monitor the production system, such as use of a process control system and/or observing/supporting others to follow correct operating procedures
- monitor materials flow and work-in-progress through the system
- confirm that the system operates within specified parameters and inspection/control points are monitored
- determine responses to out-of-specification results or non-conformance within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- monitor operating efficiencies of the system, including recognition of signs and symptoms of faulty equipment and early warning signs of other potential problems
- investigate, resolve and/or report problems and faults
- plan scheduled events to minimise disruption to production
- conduct/coordinate product or batch changeovers
- conduct/coordinate shift handovers
- review and maintain procedures to support system improvements
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the production system, including the system process flow, the interrelationships of each process to identify the impact of variation on related processes, and optimisation options
- basic operating principles of equipment and related accessories used by the system, including equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments
- operating capacities of equipment used in the system, such as different types of equipment and/or components as required by processing/packaging operations
- related systems and responsibilities for interaction, such as related production systems, services supply, packaging/warehousing, maintenance, laboratory/quality assurance and planning and scheduling
- product characteristics and common types of variation in materials and/or ingredients used, including the effect of variation on each stage of the system and scope to adjust or correct
- typical production related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials, incorrect settings and poor operator control
- relevant procedures, specifications and operating parameters for the system and the individual processes
- isolation, lock out and tag out procedures and responsibilities
- hazards, risks, controls and methods for monitoring processes within the system, including occupational health and safety (OHS), food safety, quality and environmental hazards and risks
- workplace system and approach to equipment maintenance
- process improvement procedures and related consultative arrangements
- troubleshooting procedures and problem solving techniques
- communication responsibilities to inform related work areas/support functions and

REQUIRED SKILLS AND KNOWLEDGE

- other shifts of operational status and production issues
- procedures and responsibility for reporting production and performance information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on production system components
- confirm machine setup is ready to achieve production requirements
- correctly use required personal protective equipment
- start, operate, monitor and adjust process equipment throughout the system to achieve required quality outcomes
- identify system problems and take corrective action
- conduct operational handovers
- shut down system
- identify and investigate opportunities for operational improvements within areas of responsibility
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • production schedule and related advice on system requirements • information on equipment capacity and operating parameters • production system equipment and related accessories and services • materials/consumables required by the process • communication and recording systems and procedures.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2030A Operate a process control interface • FDFPPL3003A Support and mentor individuals and groups.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</p>
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling,

RANGE STATEMENT	
	<p>weights and measures legislation</p> <ul style="list-style-type: none"> • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity <p>When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP</p>
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • performance records and reports
Systems	<p>A system typically involves:</p> <ul style="list-style-type: none"> • a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome
System operation	<p>System operation may involve:</p> <ul style="list-style-type: none"> • coordination of operators of system components
Handovers	<p>Handovers may be done:</p> <ul style="list-style-type: none"> • in person or via recording/communication systems according to workplace arrangements
Operation and monitoring of equipment and system processes	<p>Operation and monitoring of equipment and system processes typically requires:</p> <ul style="list-style-type: none"> • the use of control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Confirming cleaning requirements and status	<p>Confirming cleaning requirements and status may involve:</p> <ul style="list-style-type: none"> • accessing cleaning records

Co-requisite units		

FDFOP3004A Operate interrelated processes in a packaging system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate and adjust interrelated processes in a packaging system.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to senior operators who are applying skills and knowledge of the operational requirements of the packaging system for the industry in which it is applied.</p> <p>While the unit does not have specific prerequisites, it is not an entry level unit covering skills and knowledge required for operation of individual items of equipment and individual processes. The unit instead provides the skill and knowledge required for the coordination of multiple processes in a packaging system at an operational level. Where sector-specific senior operator technical skills are required, a relevant sector specific specialist elective unit should be selected.</p> <p>The system will typically involve a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome. Individual processes may be directly operated, automated and/or operated by others. System operation requires higher level planning and problem solving skills applied to the series of processes than is required when operating an individual unit of equipment or multiple pieces of the same equipment.</p> <p>This unit does not supply skills related to the implementation of lean and competitive manufacturing</p>
--------------------------------	---

	related skills to improve system performance. Where these skills are required the relevant Manufacturing Skills Australia (MSA) competitive manufacturing elective units should be selected.
--	--

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the packaging system for operation	1.1. Equipment, materials and services are confirmed and available to meet packaging requirements 1.2. Cleaning requirements and equipment status is

ELEMENT	PERFORMANCE CRITERIA
	<p>identified and confirmed</p> <p>1.3. Machine settings are selected or adjusted as required to meet safety and production requirements</p> <p>1.4. Operating parameters are entered as required to meet production requirements</p> <p>1.5. Product and/or packaging components and consumables are loaded or positioned as required to meet packaging requirements</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p> <p>1.7. Equipment performance is checked and adjusted as required</p> <p>1.8. Equipment is ready and safe to operate</p>
2. Operate and monitor the packaging system	<p>2.1. The system is started up and operated according to company procedures</p> <p>2.2. System equipment components are monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The system is monitored to confirm that packaging specifications are met</p> <p>2.5. Out-of-specification product/packaging outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p>
3. Hand over packaging system operation	<p>3.1. Workplace records are maintained according to workplace recording requirements</p> <p>3.2. Handover is carried out according to workplace procedures</p> <p>3.3. Process operators are aware of system and related equipment status at completion of handover</p>
4. Shut down the packaging system	<p>4.1. The appropriate shutdown procedure is identified</p> <p>4.2. The system is shut down according to workplace procedures</p> <p>4.3. Maintenance requirements are identified and reported</p>
5. Contribute to	5.1. System performance is reviewed against output

ELEMENT	PERFORMANCE CRITERIA
continuous improvement of the system	plan/targets 5.2. Opportunities for system improvement are identified and investigated 5.3. Proposals for improvement are developed and implemented within company planning arrangements, authority levels and according to company procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access production/packaging schedule and related information to identify packaging output and operating requirements, such as establishing daily packaging priorities and/or modifying plans to respond to customer requirements
- liaise with relevant work areas to confirm and/or secure necessary materials, services, equipment and labour to meet production requirements
- confirm supply of necessary equipment and related attachments, materials and services
- select, fit and use personal protective clothing and/or equipment
- set and/or adjust equipment to meet packaging requirements, such as inspecting equipment condition to identify any signs of wear, confirming selection of appropriate settings and/or related parameters, ensuring that isolation or lock outs are cancelled as required, confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational (checks may be done by the system operator or involve observing/supporting others setting and adjusting equipment and conducting pre-start checks)
- load and/or position product, packaging components and consumables as required
- operate and monitor the packaging system, such as use of a process control system and/or observing/supporting others to follow correct operating procedures
- monitor materials flow and work-in-progress to and from the packaging system
- confirm that the packaging system operates within specified parameters and inspection/control points are monitored
- determine responses to out-of-specification packaging or non-conformance within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- monitor operating efficiencies of the system, including recognition of signs and symptoms of faulty equipment and early warning signs of other potential problems
- investigate, resolve and/or report problems and faults
- plan scheduled events to minimise disruption to production
- conduct/coordinate product/packaging changeovers
- conduct/coordinate shift handovers
- review and maintain procedures to support system improvements
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the packaging system, including the process flow and the interrelationships of each previous processes that can affect packaging outcomes, packaging technology, and packaging equipment components
- basic operating principles of equipment and related accessories used by the system, including equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments
- operating capacities of equipment used in the system, such as different types of equipment and/or components as required by processing/packaging operations
- related systems and responsibilities for interaction, such as related production and further packaging/storage stages, services supply, maintenance, laboratory/quality assurance and planning and scheduling
- technical knowledge of product/packaging characteristics and the main factors that impact on shelf-life
- typical packaging related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials and finished product, incorrect settings and poor operator control
- relevant procedures, specifications and operating parameters for the system and the individual processes
- isolation, lock out and tag out procedures and responsibilities
- hazards, risks, controls and methods for monitoring processes within the system, including occupational health and safety (OHS), food safety, quality and environmental hazards and risks
- workplace system and approach to equipment maintenance
- process improvement procedures and related consultative arrangements
- troubleshooting procedures and problem solving techniques
- communication responsibilities to inform related work areas/support functions and other shifts of operational status and production issues

REQUIRED SKILLS AND KNOWLEDGE

- procedures and responsibility for reporting production and performance information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on packaging system components
- confirm machine set up is ready to achieve packing requirements
- correctly use required personal protective equipment
- start, operate, monitor and adjust process equipment throughout the system to achieve required quality outcomes
- identify system problems and take corrective action
- conduct operational handovers
- shut down system
- identify and investigate opportunities for operational improvements within areas of responsibility
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- production schedule and related advice on system

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and handle cooking tools and equipment	<p>1.1. Work area is prepared for operations and hygiene standards confirmed</p> <p>1.2. Cooking utensils required for work are identified, handled and stored safely and according to workplace procedures</p> <p>1.3. Equipment and machinery required for cooking operation is identified and prepared</p> <p>1.4. Maintenance requirements for knives and other utensils are identified and implemented</p> <p>1.5. Food safety requirements are implemented at all times when handling and using cooking utensils and equipment</p>
2. Prepare ingredients	<p>2.1. Major food group classifications are identified</p> <p>2.2. Range of ingredients typically used in the workplace are identified, and their characteristics and effect on food quality and taste described</p> <p>2.3. Recipe is examined and required ingredients identified</p> <p>2.4. Sequence for preparation is determined</p> <p>2.5. Ingredients are selected and quantity and quality confirmed using measuring or weighing devices or sensory analysis techniques</p> <p>2.6. Ingredients are prepared and assembled according to</p>

ELEMENT	PERFORMANCE CRITERIA
	recipe requirements 2.7. Ingredients are stored according to workplace procedures
3. Use basic cooking methods	3.1. Range of basic cooking methods are identified and their effect on quality, taste and nutritional value described 3.2. Cooking methods required by recipe are identified and sequence determined 3.3. Cooking method is applied to achieve quality standards for food item 3.4. Typical problems are identified and addressed 3.5. Cooking utensils and equipment is used according to manufacturer's instructions 3.6. Waste minimisation and environmental considerations are applied during cooking process 3.7. Cooking area, utensils and equipment are cleaned and stored according to workplace standards
4. Finish product	4.1. Cooked ingredients are transferred for further processing 4.2. Final product is assembled and presented or packed according to recipe or operating requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify and access ingredients
- identify the major food group classifications
- read and interpret recipe requirements
- safely and correctly use work utensils and equipment
- interpret numerical information on quantities and conduct measurements
- apply safe work and food safety standards
- select, fit and use personal protective clothing and/or equipment
- plan operations
- identify cooking problems and take corrective action, such as reporting

REQUIRED SKILLS AND KNOWLEDGE
<p>abnormalities or problems, repeating processes and/or making required adjustments</p> <ul style="list-style-type: none"> • maintain work area to meet housekeeping standards
Required knowledge
<p><i>Knowledge of:</i></p> <ul style="list-style-type: none"> • uses and characteristics of basic food ingredients • major food groups and classifications • principles of basic cookery • food safety standards in the workplace • common terminology used in cooking

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify cultural and religious requirements of customers	1.1.Cultural and religious practices and events that influence food production requirements are identified 1.2.Food production methods and food products that cater for cultural and religious practices and events are identified 1.3.The suitability of current food production methods and current food products against cultural and religious requirements are assessed 1.4.If required, alternative processes and products are identified
2. Identify dietary requirements of	2.1.A range of specific dietary requirements and their impact on food production are identified

ELEMENT	PERFORMANCE CRITERIA
customers	2.2. Food products that cater for dietary requirements are identified 2.3. The suitability of current food production methods and current food products are assessed against dietary requirements 2.4. If required alternative processes and products are identified
3. Identify common food-related allergies	3.1. Common food-related allergies are identified 3.2. Risk assessment is made of current products and processes against common food-related allergies 3.3. Procedures to avoid contamination with allergens are identified

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- use communication skills to interpret customer requests and suggest appropriate products that meet customer requirements
- access information on cultural, religious and dietary needs
- apply product knowledge to determine appropriate food products and processes to comply with cultural, religious or dietary considerations

Required knowledge

Knowledge of:

- ingredients of available products
- food production processes

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • identify the food products commonly associated cultural, religious and dietary requirements • identify food processes commonly associated cultural religious and dietary requirements • identify common food allergens and contamination risks in the production process.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • work procedures, including advice on relevant product requirements, safe work practices, food safety, quality and environmental requirements • recipes and customer specifications • production equipment appropriate to product type • materials/ingredients to meet recipe requirements • ingredient pricing information • personal protective clothing, equipment and material safety data sheets (MSDS) as required • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</p>
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards, Code including labelling, weights and measures legislation • legislation covering food safety, environmental management, occupational health and safety (OHS), anti-discrimination and equal opportunity
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • verbal or written operating procedures • specifications • production schedules • recipe instructions
Specific cultural and religious needs	<p>Specific cultural and religious needs may include:</p> <ul style="list-style-type: none"> • foods prepared to cultural and religious dietary laws (e.g. Kosher and Halal) • national and regional food products • foods that mark significant events (e.g. Christmas, Ramadan, Easter, Rosh Hashanah, Passover, Zul Hijjah and weddings) • feasting • fasting • alcohol-free beverages • pork-free foods • beef-free foods • vegetarian

RANGE STATEMENT	
Specific dietary needs	Specific dietary needs may include: <ul style="list-style-type: none"> • low GI • sugar free and/or fat free • dairy free • gluten free • flourless • rice flour • yeast free • low fat • low salt • vegetarian • vegan
Common allergies	Common allergies include allergies to: <ul style="list-style-type: none"> • dairy products • peanuts • wheat

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the chickway system for operation	1.1.Computer program is selected and loaded to suit product 1.2.Line start up is controlled 1.3.Bird drop requirements are identified 1.4.System is set to meet production requirements
2. Monitor system operation	2.1.New orders are entered and system parameters set to meet requirements through the day 2.2.Priorities are adjusted to meet production and customer requirements 2.3.Weight ranges are monitored and system settings adjusted to meet customer orders 2.4.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.5.The system is monitored to confirm that specifications are met 2.6.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification
3. Handover system operation	3.1.Workplace records are maintained according to workplace recording requirements 3.2.Handover is carried out according to workplace procedures 3.3.Process operators are aware of system and related equipment status at completion of handover
4. Shut down the	4.1.The appropriate shutdown procedure is identified

ELEMENT	PERFORMANCE CRITERIA
system	4.2. The system is shut down according to workplace procedures 4.3. Maintenance requirements are identified and reported 4.4. Work is conducted according to workplace environmental guidelines
5. Contribute to continuous improvement of the system	5.1. System performance is reviewed against output plan/targets 5.2. Opportunities for system improvement are identified and investigated 5.3. Proposals for improvements are developed and implemented within company planning arrangements and according to company procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access kill plan, customer orders and related information to plan order priorities
- select and load required program
- apply basic standard deviation to analyse weight distribution of flock
- operate control system to start conveyors
- confirm that birds available match production order requirements
- select system settings to deliver birds of required weight, type, grade and number to required production areas at the time required
- modify system parameters to respond to operating conditions and bird supply
- monitor system operation, such as monitoring:
 - timely flow and delivery of birds to meet production requirements
 - pace of delivery to production area to match work flow
 - system alarms
 - weight ranges to confirm match with delivery requirements
- liaise with relevant departments to respond to customer requirements
- identify out-of-specification performance and take corrective action, such as responding to out-of-specification weight, drop position and sensor errors
- demonstrate system shutdown procedure

REQUIRED SKILLS AND KNOWLEDGE

- monitor operating efficiencies of the system and investigate, resolve and/or report problems
- report on system performance as required by workplace reporting arrangements
- conduct computer system maintenance as required to clear computer for new start
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- system configuration, including system flow, layout and drop points
- customer ordering procedures, including common terms used to describe product and order requirements, and criteria to apply to prioritise customer orders
- basic operating principles of equipment and programs used to deliver the required birds to the correct locations within constraints of birds available and to generate system reports
- the main alarms and corrective action required
- location/alignment requirements of sensors and related feedback instruments located in the system hardware
- limits and ranges to adjust for weight distribution
- related systems/activities and responsibilities for interaction, such as related planning and scheduling, sales/customer service, bird receipt, kill and evisceration, and packing
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- isolation, lock out and tag out procedures and responsibilities
- hazards, risks, controls and methods for monitoring processes within the system, including occupational health and safety (OHS), food safety, quality and environmental hazards and risks
- workplace system and approach to equipment maintenance
- process improvement procedures and related consultative arrangements (e.g. an understanding of options to minimise giveaway)
- troubleshooting procedures and problem solving techniques
- procedures and responsibility for reporting production and performance information

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on chickway system • set computer settings to meet production requirements • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • conduct production handover • safely shut down equipment • apply food safety procedures to work practices • contribute to workplace improvements.
Context of and specific resources for assessment	Assessment must occur in the workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment • kill schedules, customer orders and related advice on system requirements • information on equipment capacity and operating parameters • system equipment, software and related accessories and services • birds and packing hall • communication and recording systems and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: <ul style="list-style-type: none"> • FDFOP2015A Apply principles of statistical process

EVIDENCE GUIDE	
	<p>control</p> <ul style="list-style-type: none"> • FDFOP2030A Operate a process control interface.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standard Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • kill plan • customer orders • performance records and reports
Chickway system operation	<p>Chickway system operation typically involves:</p> <ul style="list-style-type: none"> • planning, coordination and troubleshooting

RANGE STATEMENT	
	<p>within level of authority</p> <p>System operation may involve:</p> <ul style="list-style-type: none"> • coordination of other operators <p>A chickway system involves:</p> <ul style="list-style-type: none"> • use of a computer to control the conveyor system that delivers birds of a given size, weight and grade to the required locations for packing or further processing
Handovers	<p>Handovers may be done:</p> <ul style="list-style-type: none"> • in person or via recording/communication systems as required by workplace arrangements
Operation and monitoring of equipment and system processes	<p>Operation and monitoring of equipment and system processes requires:</p> <ul style="list-style-type: none"> • the use of control panels and systems

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the deboning/filleting equipment and process for operation	<p>1.1. Washed and chilled carcasses or pieces are available to meet production requirements</p> <p>1.2. Equipment components are clean and set to meet operating requirements</p> <p>1.3. Equipment performance is checked and adjusted as required</p> <p>1.4. Pre-start checks are carried out as required by workplace requirements</p>
2. Monitor deboning/filleting process operation	<p>2.1. Carcasses or pieces are delivered to the boning area</p> <p>2.2. Carcasses or pieces are inspected to confirm quality specifications are met</p> <p>2.3. Bones are removed and fillets prepared to meet specification</p> <p>2.4. Equipment is monitored to identify variation in operating conditions</p> <p>2.5. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.6. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.7. Workplace is maintained according to housekeeping standards</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the deboning/filleting process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting</p>

ELEMENT	PERFORMANCE CRITERIA
	requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify deboning/filleting process requirements
- select, fit and use personal protective clothing and/or equipment, including wearing of mesh gloves or similar protective clothing
- confirm supply of necessary carcasses or pieces and related equipment, such as tubs, crates and/or bins
- conduct pre-start checks, such as inspecting knife and related equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, confirming that equipment is clean and correctly configured for deboning/filleting process requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- debone and fillet product to meet specifications, including demonstration of a range of cuts to required quality, time and yield
- monitor boning and filleting process, such as:
 - product quality
 - clean removal of skin and bones as required
 - removal of fat, gristle, spots or bruised flesh
 - no bone fragments remain in product
 - yield
 - knife sharpness
- monitor supply and flow of carcasses/pieces to the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose of the deboning/filleting process, including the skeletal structure of poultry products and the effect of this process on portion control and yield
- quality characteristics to be achieved for the different types of cuts required, including the consequences of failing to remove bones and prepare fillets to specification
- quality requirements of carcasses/pieces suitable for processing and effect of variation on process performance
- basic operating principles of equipment used, including knife techniques, as well as related equipment components, such as conveyors
- knife handling, sharpening, cleaning and storage procedures
- the flow of the deboning/filleting process and the effect of outputs on downstream processes
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- contamination/food safety risks associated with the deboning/filleting process and related control measures
- occupational health and safety (OHS) hazards and controls, including safety related to use of knives
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the deboning and filleting process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on equipment used for deboning • assess carcass or pieces to ensure quality • manually debone and fillet poultry • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • clean equipment • apply food safety procedures to work practices.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • deboning/filleting and related equipment and services • carcasses/pieces to be filleted • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify team objectives	<p>1.1. Team tasks, responsibilities and performance measures are identified and agreed</p> <p>1.2. Tasks required to achieve goals and performance standards are discussed and agreed</p>
2. Participate in planning work activity	<p>2.1. Personal work tasks and roles are negotiated to ensure team goals and performance standards are met</p> <p>2.2. Information is provided to contribute to planning work group activities</p> <p>2.3. Personal skills are assessed to identify match with team skill needs</p> <p>2.4. Personal workload is planned to meet team goals and performance standards</p>
3. Complete work tasks and roles to meet team requirements	<p>3.1. Work is undertaken to achieve team goals and performance standards</p> <p>3.2. Communication between team members and with other work areas is appropriate and timely</p> <p>3.3. Timely requests are made for assistance as required to meet team goals and performance standards</p> <p>3.4. Assistance is provided to other team members to achieve team goals and performance standards</p> <p>3.5. Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify team objectives, responsibilities and performance standards
- confirm and agree on work roles and responsibilities within the team
- complete work responsibilities within agreed timelines
- assess time and other resource requirements related to achieving own work responsibilities
- identify problems and request assistance in a timely manner to achieve personal and team goals
- use communication techniques appropriate to the audience
- exchange constructive feedback with team members
- participate effectively in team processes, including working with own team members and with other teams and work areas
- support other team members to achieve team goals
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- procedures for establishing team goals and performance standards
- methods used to measure achievement of personal and team goals
- team goals and personal role in achieving work outcomes
- group processes, including basic facilitation, negotiation and conflict resolution

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.

EVIDENCE GUIDE	
	Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify team goals and expectations and personal role within the team • plan work to maximise outcomes for team • apply communication skills to engage with other participants • participate in and support the achievement of team goals.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • opportunities to participate in team processes • workplace arrangements for establishing company, workplace and team goals • methods used to measure and report on performance against targets or standards • resources required to achieve personal work requirements.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT	
Policies and procedures	Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements
Personal and team measures	<p>Personal measures may include:</p> <ul style="list-style-type: none"> • achievement of work outcomes • performance appraisal systems <p>Team measures may include</p> <ul style="list-style-type: none"> • performance indicators
Teams	<p>Teams refer to:</p> <ul style="list-style-type: none"> • both defined teams and to work groups who interact to achieve work outcomes and/or to address a specific function or issue
Achieving team goals	<p>Achieving team goals typically involves:</p> <ul style="list-style-type: none"> • cooperation with own team members and with other teams and work areas
Workplace language	<p>Everyday workplace language is used and may include:</p> <ul style="list-style-type: none"> • commonly used technical terms
Communication systems	<p>Communication systems reflect the culture of the workplace and the workforce. This may include:</p> <ul style="list-style-type: none"> • communicating with people from diverse cultural backgrounds and with people with limited English language and literacy skills

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify opportunities for improvement	<p>1.1. Barriers to good practice or optimal performance are identified</p> <p>1.2. Scope of issue or problem to be addressed is clearly defined</p>
2. Identify information requirements	<p>2.1. Data required to investigate improvement opportunity is identified</p> <p>2.2. Appropriate data collection methods are selected</p> <p>2.3. Additional resources available to support investigation are identified</p>
3. Analyse the issue or problem	<p>3.1. Techniques required to investigate nature of issue or problem are selected and applied</p> <p>3.2. A detailed description of the issue or problem is developed</p> <p>3.3. Possible causes are identified and tested</p> <p>3.4. Options for improvement are identified and assessed</p>
4. Recommend options for improvement	<p>4.1. Preferred options are identified and described</p> <p>4.2. Recommendations are presented in formats appropriate to the issue and the audience</p> <p>4.3. Recommendations are consistent with data collected and analysed</p>
5. Participate in implementing	<p>5.1. Improvement trials are supported</p> <p>5.2. Improvement proposals are evaluated and refined</p>

ELEMENT	PERFORMANCE CRITERIA
improvement proposals	5.3. Operating procedures are updated and communicated to reflect implementation of improved practices 5.4. Improvement in performance is monitored

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify nature and scope of improvement opportunity
- consult others to confirm improvement opportunity definition
- determine data collection requirements and appropriate collection methods
- identify resources requirements to support investigation, such as negotiating access to resources as required, and where required, identifying expertise or improvement team members
- collect data, such as collecting samples and taking measurements
- determine and apply appropriate data analysis techniques
- draw conclusions based on the data collected and analysed
- communicate findings in forms appropriate to the nature of the issue and the audience
- receive and take account of feedback
- participate in related trials and/or changes to work practices arising from improvement proposals
- monitor and document results of trials/implementation and participate in modifying change to support ongoing improvement
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- objectives to be addressed by improvement proposals, such as quality, occupational health and safety (OHS), environmental management, cost, efficiency and job satisfaction

REQUIRED SKILLS AND KNOWLEDGE

- the context in which improvement occurs, including capital expenditure and labour budgets, equipment capacity and production targets
- workplace approach to structuring improvement processes
- resources available to the workplace to support improvement processes, including both internal and external resources
- data collection and analysis techniques appropriate to the nature of the improvement opportunity and the workplace
- communication techniques to support data collection, consultation and teamwork required to participate in improvement processes
- documentation management systems to support changes in work practices to reflect improvement processes

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify opportunities for improvement and develop objectives and parameters for investigation
- plan study and data collection methods
- collect and analyse data and evidence to test ideas
- present improvement plans with evidence to support rationale
- implement and monitor improvement processes
- apply safe work practices and identify OHS hazards and controls
- ensure improvement plans reflect overall organisational objectives.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- information storage and retrieval systems

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • relevant technical information and personnel resources • opportunities to interact with others using typical workplace communication processes • relevant workplace documentation.
Method of assessment	<p>This unit should be assessed together with other units of competency relevant to the work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2015A Apply principles of statistical process control • FDFOP2064A Provide and apply workplace information • FDFPPL2001A Participate in work teams and groups • PMBQUAL390A Solve problems using quality tools.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Process improvement	<p>Process improvement is typically investigated and developed in consultation with others</p>
Data analysis	<p>Data analysis typically involves:</p> <ul style="list-style-type: none"> • use of computer programs but may also be carried out manually
Problem solving tools	<p>Problem solving tools can include but are not limited to:</p> <ul style="list-style-type: none"> • fishbone diagrams/cause and effect diagrams

RANGE STATEMENT

	<ul style="list-style-type: none"> • workflow analysis • Pareto diagrams • SWOT analysis

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify recording and reporting requirements	<p>1.1. The purpose of recording performance-related information is identified</p> <p>1.2. Recording and reporting responsibilities are identified</p> <p>1.3. Recording and reporting systems and formats are identified</p>
2. Maintain workplace information	<p>2.1. Records are complete, timely and accurate</p> <p>2.2. Performance information is recorded in required format to meet workplace reporting requirements</p> <p>2.3. Errors or discrepancies in recording are identified and corrected or notified to appropriate personnel</p> <p>2.4. Variances are identified, investigated and reported according to workplace procedure</p> <p>2.5. Requests for information are assessed, prioritised and addressed to meet required timelines</p>
3. Maintain security of workplace information	<p>3.1. Access levels and authorities are identified</p> <p>3.2. Security of workplace records and reports is maintained</p> <p>3.3. Security breaches are identified and reported to appropriate personnel</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify and use recording/reporting formats and systems
- identify information security requirements and procedures for responding to/reporting a security breach
- collect and collate information to be recorded as required
- assess information to confirm that it is complete and accurate and follow up inaccurate recording with relevant personnel
- identify significant performance variation, investigate and report cause/s
- prepare reports in required format to meet reporting timelines
- respond to information requests on a timely basis
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose and responsibilities for the information records and reports to be maintained or produced, including accuracy levels and timeliness of recording and reporting
- techniques used to collate and assess information, including typical recording outcomes to identify unusual or incorrectly recorded information
- likely causes of variation and related reporting responsibilities
- information system access levels and codes, such as levels within software
- communication skills relevant to reporting role

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the

EVIDENCE GUIDE	
	assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • describe the reporting and recording systems and procedures for work area • record information on work performance in accordance with reporting procedures • report variances and inconsistencies • maintain security of work documentation.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • advice on workplace policies, codes of practice and procedures • workplace information/records • recording/reporting formats and systems.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Support others in the work area	1.1. Individuals are mentored to meet work requirements 1.2. Performance that is inappropriate is identified and corrective action taken 1.3. Feedback on performance is provided
2. Facilitate group processes	2.1. Purpose of group process is identified 2.2. Meeting procedures required to achieve an agreed outcome are determined and applied 2.3. Group members are engaged in the process 2.4. Clear outcomes are reached in a timely manner

Required Skills and Knowledge

<p>REQUIRED SKILLS AND KNOWLEDGE</p> <p>This section describes the skills and knowledge required for this unit.</p>
<p>Required skills</p> <p><i>Ability to:</i></p> <ul style="list-style-type: none"> • model behaviour consistent with company policies and procedures • identify behaviour or performance that is unacceptable • structure interventions and feedback to clearly convey required standard of performance • apply appropriate explanation, demonstration, questioning and active listening techniques when interacting with others

REQUIRED SKILLS AND KNOWLEDGE

- provide feedback appropriate to the audience requirements
- recognise and respond appropriately to difference and diversity in the workplace
- provide and/or arrange opportunities to develop/practice appropriate skills
- plan group processes, including clearly identifying the purpose of the discussion or meeting, confirming the appropriate people are available and planning a basic outline of the approach and/or agenda
- facilitate meetings, including confirming with group members the purpose of the discussion or meeting, engaging people in discussion and assisting the group to reach an agreed outcome within the allotted timeframe
- record meeting outcomes
- follow up group processes, including identifying actions required to follow up outcomes of a discussion or meeting
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- company policies and procedures as they apply to the work area, including areas covered by legislation, such as sexual harassment, equal employment opportunity (EEO)/affirmative action, anti-discrimination, racial vilification and workplace bullying, occupational health and safety (OHS), food safety and environmental management
- industry awards and enterprise agreements to develop an awareness of the main issues covered as they affect day-to-day work arrangements
- systems and programs in the workplace to support development and mentoring of others
- relevant resources to support mentoring role and responsibilities
- techniques for structuring and explaining work-related information to meet the needs of people in the work area
- interpersonal skills, including appropriate questioning, listening and feedback techniques
- training/assessment arrangements in the workplace and related responsibilities
- boundaries of responsibility and related procedures for feedback, counselling and disciplinary procedures
- formal arrangements and responsibilities for consulting others relating to work role
- meeting procedures and recording requirements as relevant in the workplace

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Negotiate and communicate team objectives	<p>1.1. Team goals, tasks and responsibilities are communicated and agreed with team members</p> <p>1.2. Team performance standards and measures are communicated and agreed with team members</p>
2. Plan the work activity	<p>2.1. Individual roles and responsibilities of team members are assigned in consultation with others</p> <p>2.2. Work roles are allocated to take account of team goal and the skills and expertise of each team member</p> <p>2.3. Resources required to achieve work outcomes are identified and secured</p> <p>2.4. Development needs of team members are identified and addressed</p>
3. Manage team work to achieve required outcomes	<p>3.1. Work progress is monitored against timelines and performance measures</p> <p>3.2. Team members are kept informed of progress towards achieving team performance indicators</p> <p>3.3. Potential barriers to achieving team goals are identified and corrective action taken</p> <p>3.4. Team performance variances are identified, investigated and reported according to workplace reporting requirements</p> <p>3.5. Team members are encouraged to actively contribute to team growth and development</p> <p>3.6. Workplace information systems and procedures are followed to record and report on team performance</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- communicate and agree on team goals, performance standards and performance measures within the context of workplace arrangements for team or group work
- establish and secure resources, such as labour (crew levels and competency profiles) and other resources as required
- develop plans and schedules to achieve team goals, including the ability to assess impact of planning decisions on related issues, such as impact on other work areas, resource utilisation and costs
- facilitate group processes, including mediating and resolving different interests, personal and work styles as required and encouraging/providing opportunities for active participation of team members
- allocate and negotiate work roles and responsibilities in consultation with team members to match work requirements and skills and abilities of team members
- identify and address learning needs of team members
- provide a mentoring role to team members
- monitor team outputs against objectives and make adjustments as required to achieve plan
- monitor resource utilisation against plan
- provide feedback on team and individual performance according to workplace feedback procedures
- represent and advocate on behalf of the team in other workplace forums as required
- use communication techniques appropriate to the audience, such as communicating with people from diverse cultural backgrounds and with people with limited ability to speak or understand English
- record information on team performance as required
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- facilitation techniques and communication skills to support the active engagement and participation of team members in team processes
- work procedures relevant to team tasks and related occupational health and safety (OHS), food safety, quality and environmental management issues, hazards and control measures

REQUIRED SKILLS AND KNOWLEDGE

- workplace planning and performance measurement systems and processes
- methods used to measure achievement of personal and team goals
- resource allocation systems used in the workplace as appropriate to secure relevant resources required by the team or group
- work capacity, skills and knowledge of team or work group members in order to allocate roles appropriate to skill level and plan development opportunities
- competency requirements of work functions, including any special work conditions that may be covered by additional licensing or certification requirements
- duty of care when allocating work roles and responsibilities
- competency identification and training arrangements in the workplace
- communication skills required to represent and advocate on behalf of the team or work group
- stages of team development
- recording and reporting system and responsibilities

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- ensure all team members understand and agree to team goals and expectations and their personal responsibilities
- plan team activity to take into account team goals, timelines, individual capabilities and resources
- monitor outcomes against timelines and communicate progress with team members
- apply interpersonal communication skills to engage and support team members
- support positive outcomes for the individual and team.

EVIDENCE GUIDE	
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • opportunities to facilitate team processes • workplace arrangements for establishing company, workplace and team goals • methods used to measure and report on performance against target • planning processes • resource management and allocation systems as appropriate • resources required to achieve team outcomes • competency recording and workplace training arrangements.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. An example could be:</p> <ul style="list-style-type: none"> • FDFPPL3003A Support and mentor individuals and groups.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out in accordance with company procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements</p>

Co-requisite units

Co-requisite units	

FDFPPL3005A Participate in an audit process

Modification History

November 2011: update to imported unit.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to participate in an internal audit process and is appropriate where internal audit processes are conducted to support externally audited programs.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit has application where auditing occurs in an area that the person is not directly responsible for and where they are required to follow a formal, structured process. It is designed to support participation in auditing a range of programs designed to identify hazards, assess risk and implement control measures. These may include but are not limited to occupational health and safety (OHS), quality and environmental management. At this level, the person would typically work under direction and may be required to operate within established audit procedures, such as those outlined in ISO 10011.</p> <p>Participation implies that the person can participate in all stages of an audit but is not responsible for negotiating audit scope, allocating audit tasks to others or reporting on audit outcomes.</p> <p>When applied to the pharmaceutical industry, FDFPH2001A Apply Good Manufacturing Practice procedures should be selected to support the application of this unit. FDFPH2001A incorporates content covered in FDFOP2063A Apply quality systems and procedures, and can be used as an alternative to this prerequisite unit for this sector.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFOHS2001A	Participate in OHS processes
	FDFOP2063A	Apply quality systems and procedures
	MSAENV272B	Participate in environmentally sustainable work practices

Employability Skills Information

Employability skills	
	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in planning an audit	1.1.Roles and responsibilities for participating in the audit are identified 1.2.The purpose and scope of the audit is identified 1.3.Information and resources required to conduct the audit are identified and located
2. Participate in	2.1.Information is collected that is adequate,

ELEMENT	PERFORMANCE CRITERIA
conducting an audit	<p>representative and meets audit requirements</p> <p>2.2.Information is analysed to assess adequacy of performance against program</p> <p>2.3.Records are reviewed to confirm compliance with the program</p> <p>2.4.Compliance with the program is observed in the workplace</p> <p>2.5.Areas requiring corrective action are identified</p>
3. Report and follow up audit outcomes	<p>3.1.Situations presenting an imminent and serious risk to the program objectives are identified and reported immediately in accordance with reporting requirements</p> <p>3.2.Audit reports are prepared to address audit scope requirements</p> <p>3.3.The results of the audit are communicated according to audit purpose and requirements</p> <p>3.4.A corrective action plan is developed</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify personal roles and responsibilities for participating in the audit process
- identify audit purpose, scope, steps and timelines
- identify and locate information required to conduct the audit
- review workplace documentation to confirm that required information is available
- prepare tools as required to collect information, such as checklists and interview schedules
- identify any changes that have occurred in the workplace since initiating the program or since the last program audit that could affect program outcomes
- apply appropriate questioning, observation and related communication skills to support information collection
- review records, conduct interviews, observe workplace practice and collect other relevant information as required to assess compliance with program requirements
- take immediate action to report non-conformities that present an imminent and

REQUIRED SKILLS AND KNOWLEDGE

- serious risk to the program objectives within level of responsibility
- identify, investigate and record evidence of non-conformance and judge significance
- assess the adequacy of the program by analysing the information collected against the program objectives
- form conclusions on audit outcomes based on an objective assessment of evidence collected
- report the findings of the audit in appropriate format
- communicate audit outcomes within level of responsibility using techniques and presentation styles appropriate to the audience
- where findings indicate either a failure to comply with the program or inadequacy of the program, participate in investigation of causes of failure and identification of corrective action options
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose and intent of the program being audited
- personal roles and responsibilities in the audit process and related responsibilities of other members of the audit team
- the purpose and stages involved in the audit process
- workplace information and related information management systems
- techniques for collecting information, including options, relevance and strengths and weaknesses of each method to ensure data is adequate and representative
- data analysis methods relevant to the audit process
- communication skills and techniques appropriate to the workplace
- technical knowledge relevant to the program being audited in order to verify compliance and assess adequacy of existing control measures, including relevant industry standards
- purpose and responsibilities for maintaining records

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • identify the requirements and procedures for participating in the audit • identify the purpose and scope of the audit • collect, assess and provide information as required by the audit process • identify and act on inconsistencies or issues which may affect audit processes or outcomes • comply with audit requirements • follow up on audit outcomes.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • workplace program documentation • audit procedures and standards as applied in the workplace • advice on related legislation, industry standards and codes of practice • information systems and data collection technology • reporting formats/requirements • workplace/personnel as required to collect data/observe compliance.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. In addition, the following optional unit may be relevant: <ul style="list-style-type: none"> • BSBRES401A Analyse and present research information.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Co-requisite units		

FDFSUG222A Operate a waste water treatment system

Modification History

New Unit based on *SUGPWWT2A Operate a waste water treatment system*.

Unit Descriptor

This unit describes the outcomes required to operate waste water treatment systems to comply with workplace requirements, trade waste agreements and site environmental authority.

Application of the Unit

This unit has application in the sugar milling industry.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

There are no pre-requisite units for this competency standard.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Prepare the waste water treatment

1.1 Chemicals and test equipment are available and ready for use

ELEMENT	PERFORMANCE CRITERIA
process for operation	1.2 Services are confirmed as available and ready for operation 1.3 Pre-operational checks are conducted 1.4 Instrumentation and test equipment is calibrated to manufacturer's specifications to meet workplace requirements 1.5 Health and safety hazards/maintenance requirements are identified and reported to appropriate personnel according to workplace reporting procedures
2 Operate and monitor the waste water treatment process	2.1 The waste water system is started up according to company procedures 2.2 Plant is operated within limits of manufacturer's specifications to meet workplace requirements 2.3 Equipment is monitored to confirm operating condition 2.4 Waste water quality is monitored, tested and adjusted as required to meet water standards as defined by site licence 2.5 First flush systems are operated during rainfall events 2.6 The workplace meets housekeeping standards
3 Analyse and respond to abnormal performance	3.1 Water condition and plant operating conditions are analysed to identify causes of abnormal performance 3.2 Corrective action is taken in accordance with workplace procedures in response to hazards, out-of-specification test results and/or plant performance 3.3 Emergency procedures are implemented as required according to workplace procedures and manufacturer's recommendations
4 Handover waste water treatment system	4.1 Workplace records are maintained in accordance with statutory requirements and workplace procedures 4.2 Handover is carried out according to workplace procedure 4.3 Waste water treatment operators are aware of system status and related equipment at completion of handover
5 Shutdown the waste water treatment system	5.1 The waste water treatment system is shut down according to workplace procedures 5.2 The waste water treatment system is prepared for storage in shut down mode 5.3 Maintenance requirements are identified and reported according to workplace reporting procedure

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- access workplace information to identify waste treatment requirements
- select, fit and use personal protective clothing and/or equipment
- confirm services are available and equipment is clean and ready for operation
- handle chemicals safely including follow correct preparation, handling and storage procedures and use of appropriate protective clothing and equipment
- conduct pre-start checks
- liaise with other work areas as required
- demonstrate wastewater system operating procedures in both manual and automatic modes
- demonstrate first flush system operating procedures in both manual and automatic modes
- monitor waste water system operation including monitoring:
 - chemical addition rates and residuals
 - temperatures
 - flow rates
 - equipment condition including calibration of instruments
 - tests as required
 - dissolved oxygen levels
 - pH levels
- conduct water quality tests
- take corrective action in response to out-of-specification results or non-compliance
- monitor supply and quality of waste water to and from the process
- report and/or record corrective action as required
- demonstrate emergency procedures to control chemical spills or other major incidents relevant to the workplace
- demonstrate shift handover procedure
- demonstrate an operational shut down procedure
- maintain workplace records to meet the requirements of the workplace and site environmental authority
- maintain work area to meet housekeeping standards

Required knowledge includes:

Knowledge of:

- relevant state OHS legislation, environmental acts and policies, standards and codes of practice relating to work responsibilities including awareness of standards set out in site license arrangements
- safe work procedures including awareness of health and safety hazards related to waste water system operation and associated control measures
- hierarchy of hazard control measures
- purpose and limitations of protective clothing and equipment
- methods used to render equipment safe to inspect, maintain and/or clean including lock-out,

tag-out and isolation procedures

- water cycles for trade waste, storm water and sewerage including sources and flow patterns
- purpose and standards required by environmental agreements and responsibilities
- company policy relating to environmental performance
- consequences of non-conformance
- waste characteristics and treatment methods
- sampling and test procedures as appropriate
- purpose of chemicals used
- purpose of first flush systems and their relationship with the wastewater treatment system
- operating requirements and parameters
- water quality sampling and test procedures including the purpose of test and safe use, care and storage of relevant test equipment, interpretation and recording of results
- typical causes of non-conforming water quality and corrective action required
- equipment purpose and basic operating principles of waste water treatment equipment and methods
- requirements of both operational and long term shut down conditions to ensure the equipment is left in a safe state for the period of the shutdown and to minimise any delays in future start up
- housekeeping standards for the work area
- reporting and recording systems including both statutory and workplace requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • handle chemicals safely • demonstrate wastewater system operating procedures • demonstrate first flush system operating procedures • conduct water quality tests • take corrective action in response to out-of-specification results or non-compliance • monitor supply and quality of waste water • report and/or record corrective action • demonstrate emergency procedures • demonstrate shift handover procedure

	<ul style="list-style-type: none"> demonstrate an operational shut down procedure.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> Waste water treatment systems and related chemicals Test equipment Relevant advice on environmental agreements Operating procedures and related advice on equipment operation Personal protective clothing and equipment Communication systems and equipment Housekeeping standards and procedures Workplace information recording systems, requirements and procedures.
Method of assessment	Other units of competency relevant to the work role should be assessed in conjunction with this unit.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with company policies and procedures, manufacturer's recommendations, legislative requirements, site licenses and trade waste service agreements and industrial awards and agreements. Legislation refers to environmental acts and regulations.
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> Standard Operating Procedures (SOPs) manufacturer's specifications
Equipment	Equipment may include

	<ul style="list-style-type: none"> • screens • pH correction • oil/grease skimmers • settling and treatment ponds • aeration units • lagoons • first flush systems and wetlands • pumps and valves.
Equipment status	<p>Confirming equipment status involves</p> <ul style="list-style-type: none"> • conducting relevant pre-start checks • confirming that housekeeping standards are met • all safety guards are in place • equipment is operational.
Hazards	<p>Hazards typically include handling chemicals, manual handling and flammable gases.</p>
Equipment operation and monitoring	<p>Operation and monitoring of equipment and processes typically requires the use of control panels and systems.</p>
Tests	<p>Typical tests may include</p> <ul style="list-style-type: none"> • pH • solids • colour/turbidity • flow rate • settling rate • settled volume • DO • BOD/COD levels.
Teamwork	<p>Work may require the ability to work within a team environment.</p>
Information systems	<p>Information systems may be print or screen based.</p>

Unit Sector(s)

Sugar Milling.

FDFTEC3001A Participate in a HACCP team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to participate in the development and/or review of a HACCP-based food safety program under direction.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit is appropriate where the operator requires a detailed understanding of the steps and techniques used to develop and review a HACCP-based food safety program.</p> <p>This unit can be aligned at either AQF 3 or 4. When aligned at AQF 3 the person would typically participate in the development of the food safety program as part of a group. The scope of contribution would typically be limited to their immediate work area. When this unit is applied at AQF 4 the person may take a lead role in facilitating the development of the food safety program and would apply an understanding of food safety across more diverse operations or work areas.</p> <p>This unit is based on and achieves part of the guideline food safety unit GFSDFSPA Develop food safety programs.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to develop and/or review a food safety program	<p>1.1.Roles and responsibilities for participating in, developing or reviewing a food safety program are identified</p> <p>1.2.The scope of the food safety program is identified</p>
2. Identify and/or review food safety hazards	<p>2.1.Processes to be covered by the food safety program are identified and steps within each process are described</p> <p>2.2.Food safety hazards that are reasonably expected to occur are identified for each process</p> <p>2.3.Handling methods, processing techniques and existing support programs used in the workplace are identified</p>
3. Establish and/or	3.1.Acceptable methods of control are established for

ELEMENT	PERFORMANCE CRITERIA
review methods to monitor and control food safety hazards	<p>each food safety hazard that is reasonably expected to occur</p> <p>3.2. Control methods are validated</p> <p>3.3. Procedures for taking preventative action are established</p> <p>3.4. Appropriate methods for monitoring that processes remain within control are established</p> <p>3.5. Required corrective action to respond to situations where hazards are not effectively controlled is established</p> <p>3.6. Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify personal roles and responsibilities for participating in the development or review of a food safety program
- identify processes and steps to be covered
- identify hazards that are reasonably expected to occur and establish appropriate methods of control, such as participating in validating existing control methods and where there is no adequate control method in place, establishing an appropriate method
- establish or review procedures for implementing preventative action, such as revision of materials, processes and/or food handling procedures, and where required, the revision of workplace practices and documentation, such as specifications, operating procedures and approved supplier programs
- describe the appropriate monitoring requirements for each food safety hazard, including the method or procedure to be followed, the frequency and timing, the person responsible, and the information to be recorded (procedures to be followed would typically be specified in the form of a standard operating procedure or work instruction)
- describe corrective action requirements in the event that acceptable limits or

REQUIRED SKILLS AND KNOWLEDGE

requirements of support programs are not met

- develop or review documentation relating to the design and maintenance of the food safety program, such as flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- develop or review documentation to communicate food safety responsibilities, such as standard operating procedures (SOPs), processing parameters and recording devices (e.g. log sheets)
- communicate food safety responsibilities within level of responsibility using techniques and presentation styles appropriate to the audience
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose and intent of food safety legislation
- purpose and responsibilities for maintaining records as required by legislation and workplace procedures
- roles and responsibilities for development and maintenance of the food safety program, including roles of internal and external auditors and of authorised officers
- techniques for applying HACCP-based principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredient and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards/contamination likely to occur given the type of

REQUIRED SKILLS AND KNOWLEDGE

- product and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition, time and temperature as relevant to food handled
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability and personal hygiene, and how they can be used as part of a food safety program
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- validation and verification processes and techniques and responsibilities

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify components and parameters of a food safety program
- identify food safety hazards in production processes
- establish and validate control standards and methods for each hazard
- establish procedures for unpredicted hazards
- communicate and document hazards and control procedures
- complete workplace records
- apply safe work practices and identify occupational health and safety (OHS) hazards and controls
- apply food safety procedures.

Context of and specific resources for

Assessment must occur in a real or simulated workplace

EVIDENCE GUIDE	
assessment	<p>where the assessee has access to:</p> <ul style="list-style-type: none"> • workplace food safety program documentation • advice on quality and food safety legislation • procedures for developing or modifying specifications and other advice on food safety requirements • procedures for developing or modifying documentation, such as work instructions and procedures, log sheets and other recording requirements • review/audit arrangements • consultative mechanisms • communication systems • training system • reporting/recording system.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Food safety programs	A food safety program is a written document that specifies how a business will control all food safety hazards that are reasonably expected to occur in the food business. The food safety program must provide for the systematic

RANGE STATEMENT	
	monitoring of the controls as well as appropriate corrective action if a hazard is found not to be under control. Records must be kept to demonstrate action in relation to, or in compliance with, the food safety program. A food safety program may be developed as a stand-alone program or may be integrated with the quality program in a workplace
Methods used to control hazards	<p>Methods used to control hazards include:</p> <ul style="list-style-type: none"> • both support programs and specific hazard control limits or requirements <p>Typical examples of support programs include:</p> <ul style="list-style-type: none"> • product recall • cleaning schedules • pest control programs • personal hygiene practices • calibration procedures and related operating procedures
Food safety hazards	<p>Food safety hazards include:</p> <ul style="list-style-type: none"> • microbiological • chemical • physical hazards
Validation	<p>Validation refers to:</p> <ul style="list-style-type: none"> • the use of objective evidence in order to prove that materials, processes, procedures or equipment used are capable of delivering the intended result
Verification	<p>Verification refers to:</p> <ul style="list-style-type: none"> • reviewing all aspects of the food safety program and related records to determine compliance with and adequacy of the food safety program <p>At a minimum, food safety programs must be verified annually</p>
Scope of the HACCP based plans	The scope of the HACCP-based plan depends on workplace requirements and may extend outside the direct area of responsibility of the team participants

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor the implementation of pest prevention measures	<p>1.1. Inspections are conducted to monitor the effectiveness of pest prevention measures</p> <p>1.2. Signs of pest infestation are identified, analysed and reported</p> <p>1.3. Hygiene standards are maintained to meet company requirements</p>
2. Implement pest elimination procedures	<p>2.1. Control measures suited to infestation are selected</p> <p>2.2. Procedures for the elimination of pests are implemented</p> <p>2.3. Records are maintained</p> <p>2.4. Waste is collected, treated and disposed of according to company procedures</p> <p>2.5. Work is conducted in accordance with workplace environmental guidelines</p>

ELEMENT	PERFORMANCE CRITERIA
3. Review pest control programs	3.1. Pest infestation is monitored to confirm effectiveness of treatment method 3.2. The treatment program is modified within level of responsibility 3.3. Changes to the treatment program are reported to the appropriate personnel

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- recognise indicators of pest invasion
- select appropriate control method according to the control program in place
- select, fit and use personal protective clothing and/or equipment
- follow pest elimination procedures, such as preparing pesticides for use, applying pesticides according to company procedures and licensing arrangements, setting up and operating equipment, such as fumigation and other pesticide application equipment, and preparing and placing baits as required
- follow procedures to measure and monitor pest populations, such as sampling, testing and recording data
- review effectiveness of control methods and amend or recommend changes to program as required
- safely dispose of pesticides, residues, empty containers and pests
- monitor the implementation of housekeeping and cleaning standards
- conduct tests according to enterprise procedures, such as using instrumentation to measure the presence of airborne pesticides
- carry out basic maintenance required to support pest prevention measures according to enterprise procedures
- liaise with external contractors according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- basic principles of integrated pest management (IPM), including identification of pest hazards, establishment of pest elimination methods and monitoring the effectiveness of these measures
- methods used to prevent pest invasion suited to workplace and typical pest invasion, including appropriate work area and storage design features to minimise the possibility of pest infestation through building access points, packaging materials/requirements to protect product from pests and other physical and mechanical control measures
- housekeeping and cleaning standards to minimise conditions which attract pests
- food safety issues relating to the use of pesticides in a food handling area
- characteristics and behaviour of each type of pest at each life cycle stage
- conditions required by pests for survival
- methods and procedures used to minimise pest resistance to elimination methods
- range of pesticides used in the workplace
- legislation, codes of practice and procedures relating to the purchase, transport, storage, use and disposal of pesticides
- safe procedures for handling, using and storing pesticides and dangerous goods, identifying identification of information provided on labels, and where required, handling of gas cylinders
- purpose, application and limitations of protective clothing and equipment
- test methods where relevant
- basic maintenance procedures where relevant
- contractor service arrangements where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate

- Evidence of ability to:
- conduct pest inspections

EVIDENCE GUIDE	
competency in this unit	<ul style="list-style-type: none"> • identify pest infestations and select suitable control measures • implement pest control measures in accordance with procedure • monitor effectiveness of controls • assess control procedures and contribute to improvement of pest control • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • apply food safety procedures
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • work procedures, including advice on safe work practices, food safety and environmental requirements • pesticide labels • MSDS and personal protective clothing and equipment • pest management program and procedures • pest management compounds and equipment • housekeeping procedures and cleaning schedules in the work area, such as storage, production and/or packaging areas • documentation and record keeping system.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and respond to non-conforming ingredients/raw materials	<p>1.1. Non-conformance in raw materials/ingredients is identified and reported according to workplace reporting requirements</p> <p>1.2. Causes of non-conformance are investigated and reported according to workplace reporting requirements</p> <p>1.3. Corrective action is determined and implemented within level of responsibility and workplace procedures</p> <p>1.4. Action is taken to prevent recurrence of non-conformance</p> <p>1.5. Action is reported according to workplace reporting requirements</p>
2. Identify and respond to non-conforming product and processes	<p>2.1. Processing parameters, stages and changes which occur during processing are monitored</p> <p>2.2. Non-conformance in processing, handling and/or storage is identified and corrective action taken according to workplace requirements</p> <p>2.3. Causes of non-conformance relating to processing, handling and/or storage are investigated and reported according to workplace reporting requirements</p> <p>2.4. Corrective action is determined and implemented within level of responsibility and workplace procedures</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Action is taken to prevent recurrence of non-conformance</p> <p>2.6. Action is reported according to workplace reporting requirements</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify requirements of ingredient/raw material characteristics within level of responsibility
- follow procedures to identify, remove/isolate and report non-conforming ingredients/materials and/or product according to workplace reporting requirements
- determine likely causes of non-conformance of ingredients/raw materials
- recognise indicators of unacceptable or non-conforming processing, handling and/or storage outcomes
- act promptly to identify, remove/isolate and report non-conforming product and/or processes
- access and apply workplace information relating to process troubleshooting
- investigate non-conformance to determine likely causes and report findings to appropriate personnel
- identify action required to correct non-conformance and implement within level of responsibility
- identify action required to prevent or minimise and control recurrence of non-conformance and implement within level of responsibility
- complete workplace records, including reporting non-conformance and documenting corrective actions according to workplace recording procedures
- conduct tests to confirm raw material/ingredient and/or final product quality characteristics according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Knowledge of:

- basic composition and function of each main raw material/ingredient used, such as awareness of ingredient grades or types
- common causes of contamination/unacceptable quality of raw materials/ ingredients
- methods used to confirm quality standard, such as accessing information (e.g. certificates of analysis and/or laboratory clearance information)
- the effect of variation in raw materials/ingredients on processing stages and final product outcome, including factors likely to cause variation, and scope to adjust or correct for variation at each processing stage
- appropriate handling and storage requirements for raw materials/ingredients and final product, and the effect of failing to meet required storage conditions
- the changes and reactions that occur through processing stages, including the signs and symptoms of poor/unacceptable processing or equipment operation
- factors that affect the shelf-life of product
- the inter-relationships between processing stages and the effect of variation in processing parameters on process outcome and on final product, including factors likely to cause variation, and scope to adjust or correct for variation at subsequent process stages
- procedures for identifying and isolating non-conforming product
- troubleshooting information and techniques
- procedures and related documentation required to amend or introduce a new method or procedure, such as short term procedures for amending or updating specifications and processing parameters
- reporting requirements and responsibilities
- test methods to confirm raw material/ingredient and/or final product quality characteristics where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.

EVIDENCE GUIDE	
	Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • describe required quality characteristics for raw materials and ingredients • describe required processes to achieve production specifications • identify common non-conforming materials and ingredients and causes • identify common non-conforming processes and causes • determine and undertake corrective action for non-conformances • complete workplace documentation and report non-conformances • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • ingredient/raw materials specifications and related advice, such as certificates of analysis • ingredients/raw materials and final product and related processing equipment and stores areas • troubleshooting information relevant to workplace processes • sampling and test equipment and procedures as required • system for managing and updating workplace documents, such as Standard Operating Procedures (SOPs) and log sheets/processing parameters • reporting and recording system and procedures.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2013A Apply sampling procedures • FDFPPL3002A Report on workplace performance • MSL973001A Perform basic tests • PMBQUAL390A Solve problems using quality tools.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of</p>

EVIDENCE GUIDE

circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements.

Legislative requirements

Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:

- the Food Standards Code, including labelling, weights and measures legislation
- legislation covering food safety, environmental management, occupational health and safety (OHS), anti-discrimination and equal opportunity

When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP

Ingredients/raw materials

Ingredients/raw materials are those used to manufacture product

Typical processing and related techniques

Typical processing and related techniques include but are not limited to:

- raw materials/ingredient dispensing
- preparation
- mixing and blending
- conditioning

RANGE STATEMENT	
	<ul style="list-style-type: none"> • primary and further processing • wrapping • packing and storage
Typical process parameters	Typical process parameters include but are not limited to: <ul style="list-style-type: none"> • temperature • time • pressure • flow rate
Typical reactions	Typical reactions depend on processing method. Examples include but are not limited to: <ul style="list-style-type: none"> • gelatinisation and hydration
Problem minimisation	Where recurrence of a problem cannot be prevented, procedures should be established to minimise the likelihood of recurrence and to identify any further incidents

Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAID003 Provide first aid

Modification History

Release	Comments
Release 6	Updated: <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
 - conducted a visual and verbal assessment of the casualty
 - demonstrated safe manual handling techniques
 - post-incident debrief and evaluation
 - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - envenomation, using pressure immobilisation
 - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements

- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - chain of survival
 - standard precautions
 - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
 - abdominal injuries
 - allergic reaction
 - anaphylaxis
 - basic care of a wound
 - bleeding control
 - burns
 - cardiac conditions, including chest pain
 - choking and airway obstruction
 - crush injuries
 - diabetes
 - dislocations
 - drowning
 - envenomation
 - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
 - eye and ear injuries
 - fractures
 - febrile convulsions
 - head, neck and spinal injuries
 - minor skin injuries
 - needle stick injuries
 - poisoning and toxic substances
 - respiratory distress, including asthma
 - seizures, including epilepsy
 - shock
 - soft tissue injuries, including strains and, sprains
 - stroke

- unconsciousness
- basic anatomy and physiology relating to:
 - how to recognise a person is not breathing normally
 - chest
 - response/consciousness
 - upper airway and effect of positional change
 - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

MEM13003B Work safely with industrial chemicals and materials

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using personal protective equipment (PPEs), identifying the particular hazards and emergency procedures, and observing safe working practices in that environment.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit may be applied in a workplace in which materials and chemicals which are subject to codes and regulations are stored and used, for example, chemicals, solvents, dangerous materials, acids, noxious waste products etc.</p> <p>Evidence of competency is to encompass the satisfactory application of current State/Territory OHS legislation, standards and codes of practice, and the hierarchy of hazard control measures with elimination, substitution, isolation and engineering control measures being selected before safe work practices and PPEs.</p> <p>This unit describes the competencies which are beyond those safety requirements normally applied in the workplace as described in Unit MEM13014A (Apply principles of occupational health and safety in the work environment) or specifically described in individual units such as welding.</p> <p>Band: A</p> <p>Unit Weight: 2</p>
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use personal protective equipment	1.1. Correct and appropriate safety clothing including personal protective equipment is selected and used correctly based on information in relevant material safety data sheet (MSDS).
2. Identify emergency procedures	2.1. Emergency procedures and plan relevant to the particular work environment are documented, understood and demonstrated as laid down in approved safety instructions.

ELEMENT	PERFORMANCE CRITERIA
3. Observe safe working practices	3.1. Hazardous areas and materials are identified and special handling procedures are identified and understood. 3.2. Permits to work (if necessary) are obtained. 3.3. All equipment and hazardous materials are used in accordance with relevant OHS legislation, manufacturers' instructions and standard operating procedures. 3.4. All site-specific safety policies, safety signs, symbols and labels are correctly identified and understood. 3.5. Material safety data sheets are understood and applied. 3.6. Safe manual handling procedures (including equipment) are used. 3.7. Decanted chemicals and storage is to State/Territory dangerous goods and OHS legislation and requirements. 3.8. Housekeeping duties are performed according to standard operating procedures to maintain a safe working environment.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- undertaking risk assessment
- communicating with others
- performing proper manual handling techniques
- interpreting safety signage, labelling and placarding

Required knowledge

Look for evidence that confirms knowledge of:

- dangerous goods classification and labelling/placarding
- testing, use and maintenance of PPE

REQUIRED SKILLS AND KNOWLEDGE

- inherent hazardous properties of the chemicals to be used
- interpretation of the relevant MSDS
- basic fire fighting procedures
- site-specific emergency plan procedures
- chemical spill confinement procedures
- dangerous occurrence (near miss) reporting procedures
- hierarchy of control

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to work safely and efficiently with various chemicals.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with working safely with industrial chemicals and materials or other units requiring the exercise of the skills and knowledge covered by this unit.

EVIDENCE GUIDE	
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Personal protective equipment	Personal protective may include appropriate: <ul style="list-style-type: none"> • goggles/face shields • respirators • air supplied or self-contained helmets • safety boots, gloves and appropriate clothes/garments
Safe working practices	<ul style="list-style-type: none"> • Environment is inspected • Hazards (and chemical reactive hazards) are assessed and controlled using hierarchy of hazard control • Properly maintained PPE is available • Emergency management plan is documented/understood

RANGE STATEMENT	
	<ul style="list-style-type: none"> Work to be undertaken in safe 'thermal' environments and all possible ignition sources are to be identified and controlled
Storage	All storage containers (minor quantities and in consumer packages) are suitable for chemical exposure and are properly labelled and/or placarded. Chemical manifests are updated at completion of work activity
State or Territory legislative requirements	Appropriate OHS, dangerous goods acts and regulations, Australian standards, Australian Code for the Transport of Dangerous Goods by Road and Rail (ADGC), NOHSC codes of practice

MSL904001 Perform standard calibrations

Modification History

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Application

This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.

This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Calibration

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 **Prepare items for** 1.1 Select the authorised calibration procedure in

- calibration** accordance with workplace procedures
- 1.2 Identify hazards and use appropriate personal protective equipment (PPE), safety equipment and procedures
 - 1.3 Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure
 - 1.4 Assemble and set up specified reference standards and associated equipment prior to testing
 - 1.5 Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary
 - 1.6 Identify and minimise potential sources of measurement error
- 2 **Perform calibration**
- 2.1 Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement
 - 2.2 Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment)
 - 2.3 Adjust device under test to bring readings within specification and record data (as-left or after adjustment) where required
 - 2.4 Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results
 - 2.5 Seek appropriate advice when interpretation of results is outside authorised scope of approval
- 3 **Document results**
- 3.1 Estimate and document uncertainty of measurement in accordance with workplace procedures, where required
 - 3.2 Document compliance/non-compliance with test requirements and/or specifications
 - 3.3 Record the results of each test/calibration accurately, unambiguously and objectively

- 3.4 Ensure confidentiality of workplace information
- 4 **Finalise calibration**
- 4.1 Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information as required
- 4.2 Report any non-compliance and verify next course of action with supervisor
- 4.3 Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in workplace procedures
- 4.4 Store test equipment/measurement standards and results in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace procedures include the current version of one or more of:

- Australian and international standards and codes covering:
 - general requirements for the competence of testing and calibration laboratories, laboratory safety, quality and environmental management
 - accuracy of measurement methods and results, expression of uncertainty (GUM), quantifying uncertainty in analytical measurement, quality assurance of measurement equipment
- national work health and safety (WHS) standards and codes of practice

- registration/licensing and/or National Association of Testing Authorities (NATA) accreditation requirements
- safety requirements for equipment, materials or products; material safety data sheets (MSDS); and incident and accident/injury reports
- standard operating procedures (SOPs), recording and reporting procedures
- quality manuals, equipment and operating/technical manuals
- test methods and calibration procedures (validated and authorised)
- test methods and calibration procedures published by international, national or regional standards, reputable technical organisations, scientific texts or journals and equipment manufacturers
- laboratory layout, work flows and schedules

Standard calibrations

Standard calibrations include, but are not limited to, testing and/or calibrating the following equipment and reference materials using standard methods and procedures:

- test equipment, such as anemometers, balances, barometers, callipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments
- electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references
- working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers

Hazards

Hazards include, but are not limited to, one or more of:

- electric shock

- disturbance or interruption of services
- manual handling of heavy equipment boxes
- sources of electromagnetic radiation (lasers and RF generators/transmitters)
- fluids under pressure
- heat sources, such as ovens

Safety procedures Safety procedures include, but are not limited, to one or more of:

- ensuring access to service shut-off points
- use of PPE, such as hearing protection, gloves, safety glasses and coveralls
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

Reference materials Reference materials include, but are not limited to, one or more of:

- colour standards
- graded granular materials
- hardness blocks

WHS and environmental management requirements WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL904001 Perform standard calibrations

Modification History

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- selecting and applying appropriate test methods and calibration procedures
- safely calibrating test and measurement equipment in accordance with standard calibration procedures and documented test methods on at least two (2) occasions
- maintaining close attention to all relevant procedures, regulatory requirements and the accuracy and precision of measurement to ensure the quality and integrity of test/calibration results
- critically examining each calibration step to ensure repeatability and validity of data
- using calibration and correction charts
- performing calculations to give results in appropriate accuracy, precision and units
- using statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement, where required (can use software)
- preparing test/calibration documentation that is accurate and complies with requirements
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and reporting opportunities for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures and applications
- National Association of Testing Authority's (NATA) and National Measurement Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- reporting procedures and legislative requirements

- handling, transport, storage and operation of reference and working standards
- work health and safety (WHS) and laboratory environmental control requirements.

Additional knowledge requirements relevant to the workplace context that apply for different calibration fields must be assessed, including testing and calibration conducted in the following fields:

- acoustic and vibration measurement
- chemical testing
- construction materials testing
- electrical testing
- heat and temperature measurement
- mechanical testing
- metrology
- non-destructive testing
- optics and radiometry
- pressure measurement.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- This unit of competency may be assessed with:
 - MSL924001 Process and interpret data
 - relevant MSL974000 series unit/s of competency
 - relevant MSL975000 series unit/s of competency
- Holistic assessment methods include:
 - review of calibration results, uncertainty calculations and workplace documentation completed by the candidate
 - feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate

- observation of the candidate performing standard calibrations
- oral or written questioning to check required knowledge of standard calibration procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - specialised calibration/test equipment, reference standards and laboratory facilities
 - calibration methods, procedures and equipment specifications
 - workplace quality manual and procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL916005 Manage complex projects

Modification History

Release 1. Supersedes and is equivalent to MSL916005A Manage complex projects

Application

This unit of competency covers the ability to interpret complex technical briefs, determine project methodologies and resource requirements, establish project plans, manage projects to successful conclusions and evaluate project outcomes.

This unit of competency is applicable to senior technical officers and laboratory supervisors working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Communication/organisation

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Interpret brief and design feasible project plan	1.1	Interpret and confirm project objectives, deliverables, constraints and principal work activities
		1.2	Determine resource requirements, including personnel, equipment and materials, and access to operational systems
		1.3	Develop a detailed implementation plan for the project

- outlining methodology, milestones and budget
- 1.4 Identify roles, responsibilities and required capabilities of project team members
 - 1.5 Analyse project plan and principal work activities to ensure compliance with relevant standards
 - 1.6 Develop risk management strategies and risk management plans to ensure successful and timely outcomes
 - 1.7 Secure project approval
- 2 **Establish and implement approved project plan**
- 2.1 Secure team members and brief them about the project and allocate roles and responsibilities, balancing job roles and skills development opportunities
 - 2.2 Secure necessary equipment, materials and access to operational systems
 - 2.3 Establish communication and reporting mechanisms
 - 2.4 Implement agreed time-management strategies to ensure milestones are met
 - 2.5 Apply agreed quality requirements to measure performance and outcomes
- 3 **Manage project**
- 3.1 Monitor and report progress of activities in relation to the project plan
 - 3.2 Ensure income and expenditure is in line with the agreed project plan and budget
 - 3.3 Work with the team to analyse and diagnose problems and to determine corrective actions
 - 3.4 Make agreed variations to the plan to suit changing situations
 - 3.5 Maintain accurate records and communication with stakeholders and project team members

- | | | | |
|---|-------------------------------------|-----|---|
| 4 | Finalise project | 4.1 | Ensure project objectives are met and deliverables are provided on time and within budget |
| | | 4.2 | Complete all reporting requirements |
| 5 | Evaluate project methodology | 5.1 | Assess the effectiveness of resource management in delivering project outcomes |
| | | 5.2 | Evaluate the effectiveness of communication processes used throughout the project |
| | | 5.3 | Recommend improvements for future projects |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the competence of testing and calibration laboratories, laboratory safety, and quality and environmental management
- national work health and safety (WHS) standards and codes of practice
- registration/licensing and/or National Association of Testing Authorities (NATA) accreditation requirements

Complex projects

Complex projects include one or more of:

- development or modification of products and services
- acquisition and commissioning of new equipment or

- laboratory facilities
- appraisal of supplies
- development of applications for customers
- validation of analytical methods and/or equipment
- quality improvement or corrective action teams
- restructuring of laboratory services
- reclassification of staff and staffing levels

Records

Records include, but are not limited to, one or more of:

- lists of potential costs, invoices and payment records
- project and/or workplace files and records
- reports to clients, personnel and senior management
- risk management plans and log books
- diaries, scheduling charts and other project management charts

Resources

Resources include:

- personnel
- budget
- equipment
- materials and facilities
- project planning software
-

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Assessment Requirements for MSL916005 Manage complex projects

Modification History

Release 1. Supersedes and is equivalent to MSL916005A Manage complex projects

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- managing at least one (1) complex project
- analysing a complex technical brief
- preparing a detailed, feasible project implementation plan containing the methodology, principal work activities, resource requirements, quality and risk management strategies/plans, budget and timelines
- establishing a capable project team with clear roles and responsibilities
- selecting and establishing operational systems and resources required for the project
- consulting and communicating effectively to ensure project outcomes are achieved on time and within budget
- monitoring and reporting project progress against the plan and making agreed variations as necessary
- maintaining accurate records and documentation in accordance with workplace procedures
- evaluating project outcomes and processes to identify opportunities for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- how the project fits in with the laboratory's business goals and key performance indicators (KPIs)
- principles of project planning and management
- techniques for monitoring timelines, expenditure and team performance
- techniques for achieving effective communication and cooperation
- techniques for troubleshooting, problem solving and conflict resolution
- techniques for evaluation and continuous improvements
- reporting requirements
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL916002 Manage and develop teams
 - MSL936001 Maintain quality system and continuous improvement processes within work or functional area
- Holistic assessment methods include:
 - review of project reports, budgets and plans generated by the candidate
 - review of feedback from managers and/or customers about the quality of project outcomes and processes
 - review of feedback from project team members about the effectiveness of project planning, teamwork, resource management and communication
 - review of documented examples of quality performance improvements achieved and examples of significant problems solved
 - observation of the candidate's interaction with project team
 - questioning/interview to assess required knowledge.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - project management processes and procedures typically used by the workplace
 - sample business plans, project plans, budgets, reports and project management charts (e.g. GANTT)
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL922001 Record and present data

Modification History

Release 1. Supersedes and is equivalent to MSL922001A Record and present data

Application

This unit of competency covers the ability to record and store data, perform simple calculations of scientific quantities and present information in tables and graphs. The unit of competency requires personnel to solve predictable problems using clear information or known solutions. Where alternatives exist, they are limited or apparent.

This unit of competency is applicable to production operators, field assistants and laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Data

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|------------------------------|-----|--|
| 1 | Record and check data | 1.1 | Enter data into laboratory information system or record sheets as directed |
| | | 1.2 | Check data to identify transcription errors or atypical entries |
| | | 1.3 | Rectify errors in data using workplace procedures |

2	Calculate simple scientific quantities	2.1	Calculate simple scientific quantities using given formulae and data
		2.2	Ensure calculated quantities are consistent with estimations and expectations
		2.3	Report all calculated quantities with appropriate precision and units
3	Present data	3.1	Present data accurately in tables, charts and graphs using given formats and scales
		3.2	Recognise and report obvious features and trends in data
4	Store and retrieve data	4.1	File and store data in accordance with workplace procedures
		4.2	Maintain workplace confidentiality standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:

- relevant Australian and international standards, such as the international system of units (SI) and its application
- national measurement regulations and guidelines

Data

Data includes:

- worksheets, spreadsheets or databases linked to information management systems
- results of observations, tests and measurements, or surveys
- graphs, tables and control charts
- semi quantitative observations expressed on a scale e.g. 1 to 4 or + to ++++

Work health and safety (WHS) and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL922001A Record and present data

Assessment Requirements for MSL922001 Record and present data

Modification History

Release 1. Supersedes and is equivalent to MSL922001A Record and present data

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accurately coding, checking, recording and storing data in the required format
- performing simple calculations involving scientific quantities, with or without a calculator or computer software. The following must be performed:
 - decimals, fractions, ratios, proportions and percentages
 - unit conversion, multiples and submultiples
 - use of significant figures, rounding off, estimation and approximation
 - substitution of data in formulae
 - conversions between SI units
 - performing at least five (5) of the following calculations:
 - perimeters
 - angles
 - areas (m²) and volumes (mL, L, m³) of regular shapes (e.g. packaging and moulds)
 - average mass, mass %, density, specific gravity, moisture, relative and absolute humidity
 - ratios, such as mass to mass, mass to volume and volume to volume percentages
 - industry specific ratios, such as g/cm³, kg/m³
 - concentration (e.g. g/100mL, mg/L, mg/L)
 - dilution
 - statistical values, such as mean, median, mode and standard deviation
 - average count, colonies per swab surface and cell counts (live and dead/total)
 - process variables, such as pressure, velocity and flow rates
 - % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
 - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability
- preparing and interpreting straightforward tables, graphs and charts of data
- recognising obvious features and trends in data, including:
 - maximum and minimum values
 - spread of data

- increasing/decreasing data, rate of change
- outliers, data beyond control limits or normal range
- presenting accurate results in the required format
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- concepts of metrology, including:
 - that all measurements are estimates
 - repeated measurements belong to a sample of the measured parameter
 - repeatability, precision, accuracy and significant figures
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and security of data

work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment, and assessment evidence must be relevant to the particular workplace context. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in either case).
- This unit may be assessed with technical units, such as:
 - MSL973001 Perform basic tests
 - MSL973002 Prepare working solutions
 - MSL973007 Perform microscopic examination
- Holistic assessment methods include:

- review of data worksheets, calculations, graphs and tables prepared by the candidate
- review of records transcribed, maintained or stored by the candidate
- feedback from supervisors and peers
- observation of the candidate as they record data and perform calculations
- questions to assess understanding of relevant procedures and trends in data.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - data sets and records
 - computer and relevant software or laboratory information system
 - relevant workplace procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL924001 Process and interpret data

Modification History

Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Application

This unit of competency covers the ability to retrieve data, evaluate formulae and perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

This unit of competency is applicable to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Data

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|----------------------------------|---|
| 1 Retrieve and check data | 1.1 Store and retrieve data using appropriate files and/or application software |
| | 1.2 Verify the quality of data using workplace procedures |
| | 1.3 Rectify errors in data using workplace procedures |

- | | | |
|---|---|---|
| 2 | Calculate scientific quantities | 2.1 Calculate statistical values for given data |
| | | 2.2 Calculate scientific quantities using given formulae and data and estimate uncertainties |
| | | 2.3 Ensure calculated quantities are consistent with estimations and expectations |
| | | 2.4 Report all calculated quantities using the appropriate units and correct number of significant figures |
| | | |
| 3 | Present data | 3.1 Present data in clearly labelled tables, charts and graphs |
| | | 3.2 Graph data using appropriate scales to span the range of data or display trends |
| | | 3.3 Report all data using the appropriate units and number of significant figures |
| | | |
| 4 | Interpret data | 4.1 Interpret significant features of tables, charts and graphs, including gradients, intercepts, maximum and minimum values, and limit lines |
| | | 4.2 Recognise and report trends in data |
| | | |
| 5 | Keep accurate records and maintain confidentiality | 5.1 Transcribe information accurately |
| | | 5.2 Verify the accuracy of records following workplace procedures |
| | | 5.3 File and store workplace records in accordance with workplace procedures |
| | | 5.4 File all reference documents logically and keep them up-to-date and secured |
| | | 5.5 Observe workplace confidentiality standards |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:

- Australian and international standards, guides and the National Association of Testing Authorities (NATA) Technical Notes that cover the application of international system of units (SI), accuracy of measurement methods and results, and quantifying uncertainty in measurement
- national measurement regulations and guidelines
- validated sampling and test procedures and spreadsheets developed in-house for assay and process calculations where applicable
- workplace procedures, manuals and/or plans covering quality assurance, customer service, material safety data sheets (MSDS), equipment, supplier catalogues and handbooks

Data

Data includes:

- worksheets, spreadsheets and/or databases linked to information management systems
- results of observations, tests and measurements, analyses, surveys and/or quality assurance and control assessments
-

Calculations

Calculations are performed with or without a calculator and using computer software, spreadsheets, databases and statistical packages

Records

Records include information associated with one or more of:

- purchase of equipment and materials, service records

- safety procedures
- history of calibration and test results

Work health and safety (WHS) and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL924001 Process and interpret data

Modification History

Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- retrieving coding, recording and checking data
- calculating scientific and statistical quantities with or without a calculator or computer software, including the following items:
 - converting units involving multiples and submultiples
 - scientific notation, significant figures, round off, estimate and approximate
 - transposing and evaluating formulae
 - fractions, decimals, proportions and percentages
 - mean
 - median
 - mode
 - standard deviation
- performing at least five (5) of the following calculations:
 - perimeters and angles
 - percentage and absolute uncertainties in measurements and test results
 - areas (m^2) and volumes (mL , L , m^3) of regular shapes, such as packaging
 - dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability
 - ratios, such as mass to mass, mass to volume and volume to volume percentages
 - concentration, such as molarity, $g/100mL$, mg/L , mg/L , ppm, ppb, dilution mL/L
 - average count, colonies per swab surface and cell counts, such as live and dead/total
 - process variables, such as pressure, gauge pressure, velocity and flow rates
 - biological oxygen demand (BOD), chemical oxygen demand (COD) and total organic carbons (TOC)
 - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability, % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
 - mechanical properties, such as stress, strain, moduli and force
 - presenting accurate results in the required format (significant figures, uncertainty units)
- preparing and presenting data in the following formats:

- tables
- graphs
- line graphs
- histograms
- pie charts, bar charts and control charts
- semi-quantitative observations expressed on a scale (e.g. 1 to 4 or + to ++++)
- recognising and interpreting significant points, anomalies and trends in data
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements
- keeping accurate records that are up-to-date and secure.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- concepts of metrology, including:
 - that all measurements are estimates
 - measurements belong to a population of measurements of the measured parameters
 - repeatability, precision, accuracy and significant figures
 - sources of error, and uncertainty associated with measurement steps
 - traceability
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and maintaining security of data
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL924002 Use laboratory application software
 - technical units, such as:
 - relevant MSL973000 series units of competency
 - relevant MSL974000 series units of competency.
- Holistic assessment methods include:
 - review of data worksheets, calculations, computer files (such as spreadsheets, databases and statistical analysis), graphs, tables and/or charts prepared by the candidate
 - review of records transcribed, maintained or stored by the candidate
 - feedback from supervisors and peers
 - questions to assess understanding of calculations, relevant procedures and trends in data
 - observation of the candidate as they process data, file and store records.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - data sets and records
 - a calculator
 - spreadsheets, computer software, databases and statistical packages
 - computer and relevant software or laboratory information system
 - relevant workplace procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL925001 Analyse data and report results

Modification History

Release 1. Supersedes and is equivalent to MSL925001A Analyse data and report results

Application

This unit of competency covers the ability to perform scientific calculations, analyse trends and uncertainty in data and report results within the required timeframe.

This unit of competency is applicable to technical officers and laboratory technicians working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

MSL924001 Process and interpret data

Competency Field

Data

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|--|
| 1 | Perform scientific calculations | 1.1 | Ensure raw data are consistent with expectations and reasonable ranges |
| | | 1.2 | Calculate scientific quantities involving algebraic, power, exponential and/or logarithmic functions |
| | | 1.3 | Ensure calculated quantities are consistent with |

- estimations
- 1.4 Present results using the appropriate units, uncertainties and number of significant figures
- 2 **Analyse trends and relationships in data**
- 2.1 Determine linear and non-linear relationships between sets of data
- 2.2 Prepare and analyse control charts to determine if a process is in control
- 2.3 Identify possible causes for out-of-control condition
- 2.4 Follow workplace procedures to return process to in-control operation
- 3 **Determine variation and/or uncertainty in data distributions**
- 3.1 Organise raw data into appropriate frequency distributions
- 3.2 Calculate means, medians, modes, ranges and standard deviations for ungrouped and grouped data
- 3.3 Interpret frequency distributions to determine the characteristics of the sample or population
- 3.4 Calculate standard deviations and confidence limits for means and replicates
- 3.5 Estimate the uncertainty in measurements using statistical analysis
- 3.6 Determine data acceptability using statistical tests and workplace procedures
- 4 **Check for aberrant results**
- 4.1 Identify results that cannot be reconciled with sample, sample documentation, testing procedures and/or expected outcomes
- 4.2 Determine appropriate actions in consultation with supervisor as required
- 5 **Report results**
- 5.1 Use charts, tables and graphs to present results in the required format

- 5.2 Verify that entry of data and results are correct
- 5.3 Prepare reports and records in a format and style consistent with their intended use and workplace guidelines
- 5.4 Communicate results within the specified time and in accordance with workplace confidentiality and security guidelines

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:

- Australian and international standards, guides and the National Association of Testing Authorities (NATA) Technical Notes that cover the application of international system of units (SI), accuracy of measurement methods and results, and quantifying uncertainty in measurement
- national measurement regulations and guidelines
- validated sampling and test procedures and spreadsheets developed in-house for assay and process calculations where applicable
- workplace procedures, manuals and/or plans covering quality assurance, customer service, material safety data sheets (MSDS), equipment, supplier catalogues and handbooks

Data

Data includes:

- worksheets, spreadsheets or databases linked to information

- management systems
- the results of tests, measurements, analyses or surveys

Records

Records include information associated with one or more of:

- purchase of equipment and materials
- service records
- safety procedures
- history of calibration and test results

Work health and safety (WHS) and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL925001 Analyse data and report results

Modification History

Release 1. Supersedes and is equivalent to MSL925001A Analyse data and report results

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- performing laboratory computations involving:
 - evaluation of formulae containing algebraic, logarithmic, exponential and power functions
 - calculation of uncertainties
- calculating scientific quantities, including at least five (5) of the following:
 - percentage and absolute uncertainties in measurements and test results
 - pH, [H⁺], [OH⁻], buffer calculations, K_a, pK_a, K_b, pK_b and K_w
 - solubility constants K_s and pK_s
 - radioactivity (half life, dose, activity and exposure)
 - optical properties (absorbance/transmittance, path length, extinction coefficient, concentration (Beers law) and detection limits)
 - electrical properties (conductivity, resistivity and dielectric constants)
 - mechanical properties (stress, strain, elastic moduli, yield strength and hardness)
 - thermal properties (heat capacity, thermal expansion, thermal conductivity and thermal resistance)
 - food content (%) of water, ash, dietary and crude fibre, carbohydrate, protein, fat and specific vitamin
 - quantities associated with quality control monitoring, assessment and reporting
- using and interpreting statistical analysis and significance tests including at least five (5) of the following:
 - mean, median, mode, range, variance and standard deviation
 - measures of central tendency and dispersion
 - histograms, frequency plots, stem and leaf plots, boxplots and scatter plots
 - probability and normal probability plots
 - Pareto diagrams, Stewhart control charts and CuSum control charts
 - regression methods for calibration, linearity checks and comparing analytical methods
 - data acceptability tests, such as Q, T and Youden
 - t-test, f-test, analysis of variance (ANOVA)
- using and interpreting graphical analysis including at least three (3) of the following:

- preparation and interpretation of linear, semi-log and log-log graphs
- determination of linear, logarithmic, exponential and power relationships
- regression lines and interpretation of correlation coefficients
- preparation of frequency distributions for given data
- preparation of complex control charts
- analysing trends and uncertainty in data
- analysing data to determine relationships between variables
- reporting accurate results in the required formats and expected timeframe
- storing, retrieving and manipulating data following document traceability procedures
- maintaining the security and confidentiality of data in accordance with workplace and regulatory requirements

Knowledge Evidence

- Must provide evidence that demonstrates knowledge of:
- scientific and technical terminology, such as variables, dispersion, central tendency, process control, process stability, normal distribution, confidence level and replication
- the characteristics of a valid measurement
- relevance/importance of the national measurement legislation and guidelines to laboratory measurement
- sources and estimates of uncertainty in measurements
- procedures for data traceability
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and maintaining security of data work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:

- MSL924002 Use laboratory application software
- technical units, such as:
 - relevant MSL974000 series units of competency
 - relevant MSL975000 series units of competency
- Holistic assessment methods include:
 - review of data worksheets, calculations, computer files (such as spreadsheets and databases), statistical analysis, graphs and/or tables prepared by the candidate
 - questions to assess understanding of relevant procedures, trends in data and sources of uncertainty
 - review of reports and records prepared by the candidate
 - feedback from supervisors and peers regarding the candidate's ability to analyse and report data in accordance with workplace procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - data sets and records
 - calculator
 - computer and relevant software, including spreadsheets, databases and statistical packages or laboratory information system
 - relevant workplace procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Application

This unit of competency covers the general cleaning of work surfaces, cleaning and storage of equipment and the monitoring of laboratory stocks under direct supervision.

This unit of competency is applicable to laboratory assistants and instrument operators working in all industry sectors.

This unit of competency forms a major part of the work of laboratory assistants. They work in accordance with work instructions and standard operating procedures (SOPs) which incorporate all relevant aspects of work health and safety (WHS) legislation and the codes, guidelines, regulations and Australian Standards applying to environmental hazards and dangerous goods.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Quality

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Clean work preparation areas | 1.1 | Clean preparation areas using appropriate cleaning agents and equipment according to workplace procedures |
| | | 1.2 | Remove spillages, if they occur, using appropriate agents, personal protective equipment (PPE) and workplace procedures |
| | | 1.3 | Collect and segregate wastes in accordance with workplace procedures, relevant codes and regulations |
| 2 | Clean, maintain and store equipment | 2.1 | Collect used equipment, inspect for faults and, where necessary, remove from service |
| | | 2.2 | Use appropriate agents, apparatus and techniques to clean equipment |
| | | 2.3 | Store clean equipment in the designated locations and manner |
| 3 | Monitor stocks of materials and equipment | 3.1 | Perform stock checks and maintain records of usage as directed |
| | | 3.2 | Store labelled stocks for safe and efficient retrieval |
| | | 3.3 | Inform appropriate personnel of impending stock shortages to maintain continuity of supply |
| 4 | Maintain a safe work environment | 4.1 | Use established safe work practices and PPE to ensure personal safety and that of other personnel |
| | | 4.2 | Report potential hazards and/or maintenance issues in own work area to designated personnel |
| | | 4.3 | Minimise the generation of waste and environmental impacts |
| | | 4.4 | Dispose of waste in accordance with workplace procedures, relevant codes and regulations |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards, guidelines and codes covering WHS; laboratory design and construction; occupational protective equipment; labelling of workplace substances; storage, handling and transport of dangerous goods; environmental management; physical containment levels and facility types
- industry specific codes, regulations and guidelines, such as Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice, Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations and Import Guidelines, gene technology regulations, National Health and Medical Research Council (NHMRC) Guidelines, and animal welfare

Typical equipment

Typical equipment includes, but is not limited to, one or more of:

- balances; glassware; plastic ware; glass, plastic and quartz cuvettes, pipettes, burettes and volumetric glassware
- blending, mixing and separating equipment, such as sieves and centrifuges
- autoclaves, dishwashers, refrigerators, freezers, ovens, hotplates, mantles, burners and muffle furnaces, microwave ovens, ultrasonic cleaners, incubators and water baths, and gas cylinders
- fume hoods, biohazard containers and biological safety cabinets
- microtomes and tissue processors, cell counters and staining machines
- colorimeters/spectrometers and polarimeters, light and fluorescence microscopes
- thermometers, thermohygrographs, hydrometers, conductivity meters and pH meters and ion-selective electrodes, noise meters,

melting point apparatus, viscometers and instrument chart recorders

- steel ruler/tapes and spirit levels, shovels, scoops, plates, rods, cylinder moulds and buckets
- rifflers and splitters and mixers, compaction rammers and soil classification equipment, penetrometers, force measuring equipment and tensiometers, and hardness testing equipment
- animal cages
- vehicles

Typical materials

Typical materials include, but are not limited to, one or more of:

- consumable items, such as syringes, pipette tips and weigh boats
- PPE
- distilled water, reagents, chemicals, disinfectants, detergents, agar media and plates
- equipment spares, such as fuses, bulbs and batteries
- oils/lubricants, fuels, industrial gases and cryogenics, such as dry ice and liquid nitrogen
- paper and stationery
- reference samples and standards

Cleaning requirements

Cleaning requirements include one or more of:

- decontamination and/or disinfection
- hygiene monitoring
- minimising environmental impacts
- operation of automatic cleaning apparatus, such as pipette washers, ultrasonic cleaners and dishwashers
- sterilisation and disposal of wastes using boiling, high pressure air or steam, microwaves, chemicals, gas, filtration, ultraviolet radiation and autoclaving
- use of specialised techniques, such as chromic acid baths and soaking in hypochlorite

Preparation areas

Preparation areas include one or more of:

- benches
- fume cupboards
- sheds
- sinks
-

Agents for cleaning Agents for cleaning include one or more of:

- cleaning solutions
- decontaminants
- organic solvents

Spillages Spillages include one or more of:

- chemicals
- radioactive materials
- biologically active materials

Waste Waste includes, but is not limited to, one or more of:

- broken glass and sharps
- disposable PPE
- spent reagents, spent or excess samples and test pieces, solvents and batteries
- used containers, boxes, bags and palettes, plastic and metals
- microorganisms

Stock records Stock records include one or more of:

- calibration and maintenance history
- data sheets
- handbooks, warranty documents, catalogues, manuals and material safety data sheets (MSDS)
- records of usage, loans and breakages

Maintenance issues Maintenance issues include, but are not limited to, one or more of:

- hygiene issues, prevention of contamination, cleaning, recycling and waste disposal
- checking materials and equipment are fit for purpose, equipment malfunction, and checking serviceability before storage
- potential hazards, incidents and emergencies, spillages, leakages, breakages and contamination
- stock requirements and shortages, and storage constraints

Hazards Hazards include, but are not limited to, one or more of:

- sharps, broken glassware and hand tools

- aerosols from broken centrifuge tubes and pipetting
- microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids
- chemicals, such as acids, heavy metals, pesticides and hydrocarbons
- sources of ignition, flammable liquids and gases
- cryogenic agents, such as dry ice and liquid nitrogen
- electric shock
- fluids under pressure, such as steam and industrial gas cylinders
- crushing, entanglement and cuts associated with moving machinery or falling objects
- manual handling, working at heights and working in confined spaces
- occupational overuse syndrome, slips, trips and falls
- pedestrian and vehicular traffic
- solar radiation, dust and noise

Established safe work practices

Established safe work practices include, but are not limited to, one or more of:

- applying containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets, and Class PCII, PCIII, and PCIV physical containment facilities
- ensuring access to service shut-off points
- following established manual handling procedures for tasks involving manual handling
- handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer instructions
- identifying and reporting operating problems or equipment malfunctions
- labelling of samples, reagents, aliquoted samples and hazardous materials
- recognising and observing hazard warnings and safety signs
- reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/wastewater, gases, smoke, vapour, fumes, odours and particulates
- use of PPE, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c63a03b-4a6b-4ae5-9560-1e3c5f462baa>

Assessment Requirements for MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
- following workplace procedures, relevant codes and guidelines when maintaining the laboratory/field workplace
- applying information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
- working safely and minimising exposure of hazards to self, others and the laboratory
- safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
- safely removing spillages and disposing of wastes
- safely storing equipment and materials using workplace procedures, relevant codes and guidelines
- monitoring and reporting stock levels and the condition of laboratory materials and equipment
- keeping accurate, up-to-date records

reporting potential hazards and maintenance issues using workplace procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures for the cleaning of work preparation areas, materials and equipment
- storage requirements for specific materials and equipment
- workplace procedures for minimisation and disposal of waste
- workplace procedures for monitoring of laboratory stocks
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL943002 Participate in laboratory or field workplace safety
- Holistic assessment methods include:
 - observation of the candidate's techniques for cleaning and/or removal of spillages and waste disposal
 - review of stock records completed by the candidate
 - feedback from supervisors and peers
 - questioning to assess required knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - work preparation areas, stocks, materials and equipment, cleaning, decontamination and/or disinfection agents and equipment
 - personal protective equipment (PPE)
 - stock order forms, labels and records/forms.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Application

This unit of competency covers the ability to perform set-up, pre-use and in-house calibration/validation checks on equipment and assist with its maintenance.

This unit of competency is applicable to laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Perform set-up and pre-use checks of laboratory equipment	1.1	Perform laboratory equipment set-up and pre-use checks in accordance with workplace procedures
	1.2	Perform safety checks in accordance with relevant workplace and instrumental procedures
	1.3	Identify faulty or unsafe components and equipment and report to appropriate personnel
	1.4	Complete equipment log books/records to meet

- workplace requirements
- | | | |
|---|--|--|
| 2 | Perform calibration checks | 2.1 Start up equipment according to operating procedures |
| | | 2.2 Use specified standards for calibration check |
| | | 2.3 Check equipment in accordance with calibration procedures and schedules |
| | | 2.4 Record all calibration data accurately and legibly |
| | | 2.5 Compare data with specifications and/or previous records to identify non-compliant equipment |
| | | 2.6 Quarantine out-of-calibration equipment |
| | | |
| 3 | Assist with equipment maintenance | 3.1 Ensure all equipment work areas are clean during and after equipment use |
| | | 3.2 Perform basic maintenance in accordance with workplace procedures |
| | | 3.3 Clean and store equipment according to workplace and/or manufacturer's specifications/procedures |
| | | 3.4 Identify and replace, repair or dispose of damaged/worn equipment as appropriate |
| | | |
| 4 | Maintain records | 4.1 Record and report information on unsafe or faulty equipment according to workplace procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- national work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines
- industry specific codes, regulations and guidelines, such as good laboratory practice (GLP)
- workplace documents, such as standard operating procedures (SOPs), quality and equipment manuals, calibration check and maintenance schedules, material safety data sheets (MSDS) and safety procedures, material, production and product specifications, production and laboratory schedules, workplace recording and reporting procedures, and waste minimisation and safe disposal procedures

Typical equipment

Typical equipment includes, but is not limited to, one or more of:

- balances; glassware; plastic ware; glass, plastic and quartz cuvettes, pipettes, burettes and volumetric glassware
- blending, mixing and separating equipment, such as sieves and centrifuges
- autoclaves, dishwashers, refrigerators, freezers, ovens, hotplates, mantles, burners and muffle furnaces, microwave ovens, ultrasonic cleaners, incubators and water baths, and gas cylinders
- fume hoods, biohazard containers and biological safety cabinets
- microtomes and tissue processors, cell counters and staining machines
- colorimeters/spectrometers and polarimeters, light and fluorescence microscopes
- thermometers, thermohygrographs, hydrometers, conductivity meters and pH meters and ion-selective electrodes, noise meters, melting point apparatus, viscometers and instrument chart recorders
- steel ruler/tapes and spirit levels, shovels, scoops, plates, rods, cylinder moulds and buckets
- riffles and splitters and mixers, compaction rammers and soil classification equipment, penetrometers, force measuring

equipment and tensiometers, and hardness testing equipment

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- performing set-up and pre-use checks for at least three (3) items of equipment
- recognising non-standard behaviour of equipment
- performing calibration checks for at least two (2) items of basic equipment using standard procedures
- obtaining reliable calibration data with the required accuracy and precision
- identifying non-compliant equipment by comparing calibration data with specifications and/or previous data records
- following workplace data recording and reporting procedures
- performing basic cleaning and/or maintenance tasks for at least three (3) items of equipment
- following all relevant work health and safety (WHS) and environmental management requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- role and importance of regular calibration checks and maintenance of equipment
- function of key components of the equipment and details of the pre-use, calibration and safety checks and operating procedures for items of equipment used
- sources of uncertainty in equipment operation and their control
- basic equipment cleaning, maintenance and storage procedures for items of equipment used
- workplace procedures for recording data and reporting results
- relevant hazards, WHS and environmental management requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL973001 Perform basic tests
- Holistic assessment methods include:
 - review of equipment log book entries, calibration data and maintenance records generated by candidate
 - feedback from peers and supervisors about the candidates ability to perform calibration checks and assist with basic maintenance
 - observation of the candidate performing equipment set-up, pre-use checks, shutdown procedures, calibration checks, cleaning and maintenance tasks
 - oral or written questioning to check required knowledge of workplace procedures for the safe use, cleaning and maintenance of the items of equipment used.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - standard laboratory equipped with appropriate equipment and reference materials; cleaning, decontamination and/or disinfection agents and equipment; and personal protective equipment (PPE)
 - workplace procedures, equipment manuals and information/records management system.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL934003 Maintain and control stocks

Modification History

Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Application

This unit of competency covers the ability to order, maintain and control the use of laboratory materials and/or equipment in the work area.

This unit of competency is applicable to technicians and technical officers working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Quality

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Maintain and control stocks of materials or equipment	1.1	Label, document and store stocks in accordance with relevant standards and specific safety requirements
		1.2	Follow stock rotation procedures to maximise use of stocks within permitted shelf life
		1.3	Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level

- 1.4 Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate
 - 1.5 Initiate quality control sampling and testing procedures when appropriate
 - 1.6 Report stock problems outside own knowledge and authority limitations to relevant personnel
- 2 **Order and receive materials and equipment**
- 2.1 Determine requirements of customers and suppliers using appropriate communication and interpersonal skills
 - 2.2 Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions
 - 2.3 Place and/or follow up approved orders using workplace systems and procedures
 - 2.4 Check condition of received goods and take appropriate action
- 3 **Maintain stock records**
- 3.1 Record all relevant details accurately using the specified forms/computer system
 - 3.2 Ensure that written information is legible and indelible
 - 3.3 File all records in the designated place
- 4 **Maintain a safe work environment**
- 4.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
 - 4.2 Minimise the generation of wastes and environmental impacts
 - 4.3 Ensure the safe collection of redundant/outdated stocks for subsequent disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory design and construction; laboratory safety; quality and environmental management; and labelling, storage, handling and transport of hazardous substances
- national work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines, and national environmental protection measures
- specific legislation, regulations, codes, guidelines, procedures and methods, such as Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), dangerous goods, animal welfare, Australian Quarantine and Inspection Service (AQIS) Export Control Orders and Import Guidelines, Australian Radiation Protection and Nuclear Safety Agency (ARPANSA), gene technology, and National Health and Medical Research Council (NHMRC)
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- customer database and supplier catalogues, customer-specific requirements/standards, internal/external stock orders and overdue actions

Workplace

Workplace procedures include, but are not limited to, one or more of:

procedures

- ordering, purchase and receipt of stocks
- verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes)
- organisation of compatible batch or lot numbers
- storage of stocks, stock control and rotation of stock
- quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins)
- reporting non-conformances

Records

Records include, but are not limited to, one or more of:

- current inventories, stock usage, orders and progress of orders
- equipment servicing and repairs
- quality control sampling, testing and stock rotation

Hazards

Hazards include, but are not limited to, one or more of:

- electric shock
- chemicals, such as acids and hydrocarbons
- microbiological organisms associated with blood and blood products
- radioisotopes
- sharps, such as broken glassware
- disturbance or interruption of services
- manual handling of heavy boxes
- fluids under pressure and industrial gas bottles

Safety procedures

Safety procedures include:

- use of personal protective equipment (PPE), such as hearing protection, gloves, safety glasses, coveralls and safety boots
- ensuring access to service shut-off points
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be

compromised at any time

- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL934003 Maintain and control stocks

Modification History

Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accessing online databases and/or catalogues efficiently
- following workplace procedures for predicting and/or determining demand for stock; and researching, ordering and receiving stock, materials and equipment
- maintaining stocks of materials and equipment at prescribed levels for the work area, through regular inspections, timely ordering of replacement items and follow-up of late orders
- performing quality control sampling and testing and rotating stock in accordance with workplace procedures
- managing peak and seasonal variations in stock usage and production conditions
- interpreting labelling information (lot number, batch and date) and material safety data sheets (MSDS) correctly
- applying procedures for safe (manual) handling, storage and transport of stocks
- completing and recording all stock records and documentation accurately
- demonstrating effective communication and interpersonal skills when dealing with customers and suppliers.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- terminology associated with ordering and storage of stocks
- laboratory stock, product and service information relevant to job role
- types of hazardous chemical reactions and the rationale for recommended storage systems
- workplace procedures and quality system requirements for stock control
- codes of practice and regulations concerning the labelling, handling, storage and transport of stock relevant to job role
- relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL935004 Maintain instruments and equipment
- Holistic assessment methods include:
 - review of documentation for orders prepared by the candidate
 - examination of stock records maintained by the candidate
 - feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers
 - oral or written questioning to check knowledge of the maintenance and control requirements for a selection of stock
 - observation of the candidate handling stock and conducting quality control sampling and testing.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - stocks of materials and equipment
 - stock order forms and documentation
 - sampling and testing equipment
 - online information systems, inventories, print records, databases and catalogues
 - codes of practice and regulations concerning the handling, storage and transport of the stock.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL935002 Assist in the maintenance of reference materials

Modification History

Release 1. Supersedes and is equivalent to MSL935002A Assist in the maintenance of reference materials

Application

This unit of competency covers the ability to assist in the maintenance of reference materials that can be used in tests and the identification of new specimens as part of quality control of laboratory procedures. The unit of competency does not cover the scientific identification of species or specimens.

This unit of competency is applicable to technical officers and laboratory technicians working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked

Pre-requisite Unit

Nil

Competency Field

Quality

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|------------------------------------|-----|--|
| 1 | Acquire reference materials | 1.1 | Confirm that required transit conditions were maintained |
| | | 1.2 | Apply quarantine or isolation arrangements as necessary |
| | | 1.3 | Record data of accessioned reference material in the collection database |

- 1.4 Label material to ensure that its identity is maintained during storage and issue
- 2 **Maintain reference materials**
 - 2.1 Monitor storage conditions to ensure that they comply with suppliers' warranty specifications
 - 2.2 Monitor storage conditions to ensure materials remain true to specification
 - 2.3 Test material during storage and before release, where relevant and appropriate, to report on reference characteristics and specificity
 - 2.4 Report findings that suggest reference specimens may be deteriorating
- 3 **Dispense reference materials to clients**
 - 3.1 Verify requests with supervisor before requests for reference materials are processed
 - 3.2 Supply reference material without contamination of stock material
 - 3.3 Keep records of materials issued in accordance with workplace procedures
- 4 **Maintain a safe work environment**
 - 4.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
 - 4.2 Follow safety protocols when handling and processing reference materials
 - 4.3 Minimise the generation of wastes and environmental impacts
 - 4.4 Ensure the safe collection of redundant/outdated stocks for subsequent disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory design and construction; laboratory safety; quality and environmental management; and labelling, storage, handling and transport of hazardous substances
- national work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines, and national environmental protection measures
- specific legislation, regulations, codes, guidelines, procedures and methods, such as Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), dangerous goods, animal welfare, Australian Quarantine and Inspection Service (AQIS) Export Control Orders and Import Guidelines, Australian Radiation Protection and Nuclear Safety Agency (ARPANSA), gene technology, National Health and Medical Research Council (NHMRC) and Therapeutic Goods Regulations
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; waste minimisation and safe disposal procedures; and cleaning, hygiene and personal hygiene requirements
- sampling procedures (labelling, preparation, storage, transport and disposal)
- test procedures (validated and authorised)
- schematics, work flows and laboratory layouts

- Reference materials** Reference materials include, but are not limited to, one or more of:
- Process manufacturing and construction industry sector:
- drill (core) samples for mineral identification
 - concrete samples for analysis of composition and/or strength and suitability for application
- Biomedical and environmental industry sector:
- specimens, including cells, tissues and samples of aqueous or proteinaceous standards
 - bacterial cultures related to colony and microscopic morphology, specificity and reliability of staining reaction, biochemical characteristics and immunological characteristics
 - cell suspensions and cell and tissue preparations that can act as quantitative or qualitative controls in tests and procedures
 - plasma and other body fluids with known attributes or quanta that can act as standards and controls in quantitative and qualitative tests and procedures
- Food and beverage processing industry sector:
- aggregates, grains and powders
 - materials for testing viability of enzymes used in process
 - bacterial or yeast cultures relating to colony and microscopic morphology for culturing purpose
 - grain samples used in identification of cereal specimens (e.g. barley varieties, such as Proctor, Franklin and Stirling)
 - food samples used in allergy testing (e.g. nuts, wheat, milk and fish)

- Equipment, materials and systems** Equipment, materials and systems include, but are not limited to, one or more of:
- laboratory glassware and measuring equipment, centrifuges, water baths and incubators, lyophilisers and humidifiers
 - equipment and material for storage and/or transport, such as storage boxes, dry ice or ice packs and liquid nitrogen
 - storage and display cabinets
 - information management systems, databases, record and filing systems
 - equipment suitable for the safe collection and disposal of biological and non-biological wastes

Hazards

Hazards include, but are not limited to, one or more of:

- chemicals, reagents
- microorganisms associated with soil, air, water, blood and blood products and human or animal tissue and fluids
- sharps, such as broken glassware
- disturbance or interruption of services
- manual handling of heavy boxes

Safety procedures

Safety procedures include, but are not limited to, one or more of:

- use of PPE, such as hearing protection, gloves, safety glasses and coveralls
- ensuring access to service shut-off points
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions and workplace procedures and regulations
- regular cleaning of equipment and work areas

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL935002A Assist in the maintenance of reference materials

Links

Assessment Requirements for MSL935002 Assist in the maintenance of reference materials

Modification History

Release 1. Supersedes and is equivalent to MSL935002A Assist in the maintenance of reference materials

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- maintaining reference materials so that their reference characteristics and attributes are stable in storage and manifest in use after retrieval
- maintaining material identity during storage and transport
- testing stored material for reference characteristics before release
- performing all tests and manipulations safely
- communicating appropriately with customers.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- the nature and purpose of certified reference materials (i.e. what they are, when and why they should be used)
- the storage requirements of biological and non-biological materials
- quarantine or isolation procedures relevant to work area
- the labile nature of chemical and biological materials
- the rationale for testing reference characteristics before issuing reference materials
- reasons for testing before accession of reference materials
- relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL916003 Supervise laboratory operations in work or functional area
 - MSL975001 Perform microbiological tests
 - MSL976003 Evaluate and select appropriate test methods and procedures
- Holistic assessment methods include:
 - review of records for the supply of reference materials by the candidate
 - observation of the candidate performing tests of stored reference material prior to release and review of results
 - review of responses to reference material case studies or ‘what if’ scenarios
 - oral/written questioning about receipt, testing during storage and release of reference materials.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - equipment and materials related to the workplace task for which the reference material is relevant
 - reference materials
 - standard operating procedures (SOPs).
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL935003 Authorise the issue of test results

Modification History

Release 1. Supersedes and is equivalent to MSL935003A Authorise the issue of test results

Application

This unit of competency covers the ability to critically assess the accuracy of data and validity of test results prior to formally authorising their release to the client. It involves the statistical analysis of data and information generated during calibration, sampling and testing to determine whether quality and/or process parameters have been achieved. Personnel are required to investigate and, if necessary, rectify results that are not consistent with expected values.

This unit of competency is applicable to laboratory personnel working in all industry sectors who are approved by their organisation to authorise the results obtained for specific test methods. In many instances these personnel are known as 'signatories' or 'delegates' for the tests involved. The scope of tests authorised in each case will be determined by the specialised knowledge, technical competence and experience of the personnel involved.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

MSL925001 Analyse data and report results

MSL924001 Process and interpret data

Competency Field

Quality

Unit Sector

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element.
- 1 **Verify the accuracy of data and technical records**
 - 1.1 Access relevant job instructions, data and technical records in laboratory information management system (LIMS)
 - 1.2 Confirm that technical records provide sufficient information to ensure traceability for the tests involved
 - 1.3 Compare data with expected values and identify any outliers
 - 1.4 Inspect data records to check the integrity of data entry, alterations, transfers and calculations
 - 1.5 Correct and initial any incorrect data records
 - 1.6 Sign off data records as correct

 - 2 **Determine if results are acceptable and within expectation**
 - 2.1 Compare results with expected values and identify any significant differences
 - 2.2 Check the reliability of results by examining data, statistical analysis of data and results from repeat tests or duplicate samples
 - 2.3 Assess the significance of any documented observations of atypical test conditions or environment and/or sample appearance
 - 2.4 Check that all calculations are free from error
 - 2.5 Check that estimates of uncertainty are reasonable and consistent with the test method, client and/or product specification requirements
 - 2.6 Authorise the issue of results that meet the organisation's quality standards and are consistent with expectations

 - 3 **Investigate unexpected or unacceptable results**
 - 3.1 Examine records of pre-use checks and calibration performance to ensure that the equipment and/or instruments used meet test specifications and workplace requirements
 - 3.2 Establish whether human and/or environmental factors could have affected the reliability of results

- 3.3 Check for obvious sources of interferences that may have occurred during measurements
 - 3.4 Retrieve stored samples (if available) and assess whether they are atypical or contaminated
 - 3.5 Perform control tests using the same, or new, samples to check unexpected results
 - 3.6 Authorise the issue of unexpected results that meet the organisation's quality standards
 - 3.7 Identify possible root causes of unacceptable results and appropriate preventative/corrective actions
 - 3.8 Report investigation outcomes and recommendations for improvements in accordance with workplace procedures
- 4 **Liaise with clients about results**
- 4.1 Establish whether sampling procedures used by the client could contribute to unexpected/unacceptable results
 - 4.2 Arrange for new samples and/or re-testing as necessary
 - 4.3 Explain investigation outcomes and confidence level for unexpected test results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

workplace requirements

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, quality management systems and plans, measurement management, accuracy of measurement methods and results, expression of uncertainty of measurement (GUM), quantifying uncertainty in analytical measurement, and sampling and testing methods
- National Association of Testing Authorities (NATA) accreditation program requirements and any supplementary requirements for the relevant field of testing, NATA technical notes, policy circulars and guidelines
- national measurement regulations and guidelines
- specific codes, regulations guidelines, procedures and methods, such as Australia New Zealand Food Standards (ANZFS) Code, Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), National Health and Medical Research Council (NHMRC) Guidelines, and Therapeutic Goods Regulations
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; waste minimisation and safe disposal procedures; inspection test plans and sampling plans for sites
- customer-specific requirements/standards and customer quality plan

Technical records

Technical records include, but are not limited to, one or more of:

- request forms, service agreements and contracts, clients notes, papers and feedback
- worksheets, work books, check sheets and work notes, original observations, derived data and calculations, and control graphs
- external and internal test reports, and calibration certificates
- listing of data and the personnel responsible for sampling, performance of each test/calibration and checking of results

Statistical tests

Statistical tests include, but are not limited to, one or more of:

- standard deviation, standard deviation of the mean, histograms and frequency plots
- probability and normal probability plots
- run charts and control charts, such as Shewhart and CuSum
- regression methods for calibration, linearity checks and comparing analytical methods
- analysis of variance (ANOVA)
- data acceptability tests, such as T and F

Estimates of uncertainty

Estimates of uncertainty include, but are not limited to, one or more of:

- calibration uncertainty
- instability or drift in the calibrated instrument
- repeatability of the results
- resolution or readability of the instrument
- environmental influences, such as temperature, air pressure, humidity, vibration, electrical noise and gravity
- reference material uncertainty
- factors arising from using an instrument under a different operating environment or procedures (e.g. orientation of a transducer and immersion depth of a temperature probe)
- reproducibility of quality control data

Human and environmental factors

Human and environmental factors include, but are not limited to, one or more of:

- technician preparing the sample and/or performing the test did not apply the test method correctly
- inadequate attention to detail, fatigue and stress
- inadequate hygiene and sterility
- unacceptable dust, humidity, temperature and illumination levels
- electromagnetic disturbances
- variations to gas, electricity and water supply
- unacceptable sound and vibration levels
-

Sources of interference

Sources of interference include, but are not limited to, one or more of:

- spectral interference

- physical interference
- matrix effects
- presence of contaminants
- masking of analytes

Sample collection and preparation problems

Sample collection and preparation problems include, but are not limited to, one or more of:

- use of incorrect sample containers
- incorrect sample handling, storage or conditioning (filtered/non-filtered, temperature control and preservation), sample disturbance and sample segregation
- incomplete sample preparation
- incorrect particle size
- incorrect matrix
- incomplete digest

Preventative/corrective actions

Preventative/corrective actions include, but are not limited to, one or more of:

- regular use of certified reference materials
- internal quality controls using secondary reference materials
- participation in inter-laboratory comparison or proficiency testing programs
- replicate tests or calibrations using the same or different methods
- re-testing or recalibration of retained items
- correlation of results for different characteristics of an item
- additional audits and management reviews
- regular quality checks on consumables
- increased staff observation, supervision and/or training
- more detailed sample specifications, test methods and procedures

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples

- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL935003A Authorise the issue of test results

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL935003 Authorise the issue of test results

Modification History

Release 1. Supersedes and is equivalent to MSL935003A Authorise the issue of test results

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- verifying the accuracy and completeness of at least one (1) set of data, results and technical records for specified tests
- issuing at least one (1) set of specified test results in accordance with authorisation and workplace procedures
- reviewing at least one (1) set of records of sampling, sample preparation, testing and/or calibration activities to identify potential causes of unacceptable data/results
- using statistical tests to estimate uncertainties and determine data acceptability
- recognising unexpected or unacceptable data and results and then investigating the occurrence in a logical and efficient manner using effective problem-solving strategies
- rectifying results that are not consistent with expected values
- recommending appropriate preventative/corrective actions to control potential/actual non-conforming work
- explaining technical details of sampling, test methods and results to clients
- maintaining a professional approach and positive company/organisation image, including maintaining independence and an ability to resist improper influences.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures for authorising the issue of specified test results
- relevant reporting requirements, such as the *ISO Guide to the Expression of Uncertainty in Measurement*, National Association of Testing Authorities (NATA) and/or test methods
- the confidence level required according to the National Measurement Act 1960 (e.g. 95% for most applications, but it may be higher)
- scientific and technical knowledge of the samples, procedures, equipment, materials and instrumentation used to generate the specified test results and data
- at least three (3) statistical tests used to estimate uncertainties and determine data acceptability
- expected values for data and results and the uncertainty components for specified test methods
- common sources of interference, human and environmental factors, sample preparation problems and relevant preventative/corrective actions associated with specified test results

- confidentiality requirements relevant to job role
- work health and safety (WHS) and environmental management requirements relevant to job role.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL935001 Monitor the quality of test results and data
 - relevant MSL974000 and MSL975000 series units of competency that cover the ability to perform the tests involved, relevant data analysis and quality assurance procedures.
- Holistic assessment methods include:
 - review of records and test results verified and issued by the candidate
 - feedback from supervisors and clients regarding the candidate's ability to issue authorised test results
 - review of recommendations and reports prepared by the candidate
 - questions to assess understanding of procedures governing the authorised issue of test results, acceptability of data/results, sources of uncertainty and preventative/corrective actions.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - sampling and test methods, description of test set-up, data sets, results and technical records
 - calculator
 - spreadsheets and databases
 - computer, relevant software or laboratory information system
 - workplace quality procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL952002 Handle and transport samples or equipment

Modification History

Release 1. Supersedes and is equivalent to MSL952002A Handle and transport samples or equipment

Application

This unit of competency covers the ability to pick up and transport samples or test/calibration equipment in a way that ensures the integrity of subsequent test results.

This unit of competency is applicable to couriers and laboratory and field assistants in all industry sectors. The person transporting the items is not necessarily responsible for sampling or testing. This unit does not cover sample collection or the ability to handle and transport animals as might be defined under prevailing animal care and ethics legislation and practices.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Sampling

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|-----------------------------|--|
| 1 Prepare for pickup | 1.1 Confirm pickup sequence and any licence or permit requirements with supervisor |
| | 1.2 Check that vehicle and communication devices are in working order |

- | | | | |
|---|---|-----|--|
| | | 1.3 | Check that required transport containers and materials are in the vehicle |
| 2 | Pick up and transport items | 2.1 | Confirm the number and nature of items to be picked up on arrival |
| | | 2.2 | Ensure items match documentation |
| | | 2.3 | Apply workplace requirements to the transport of samples and/or equipment |
| | | 2.4 | Alert laboratory personnel to any special needs that are identified on documents accompanying the items |
| | | 2.5 | Complete required documentation at pickup point |
| | | 2.6 | Stow items in the specified transport containers and under the required conditions |
| | | 2.7 | Maintain sample integrity at all times |
| | | 2.8 | Deliver items to reception point in accordance with workplace procedures |
| | | 2.9 | Maintain confidentiality of information |
| 3 | Maintain transport equipment | 3.1 | Maintain vehicle according to workplace requirements |
| | | 3.2 | Maintain state of transport containers to ensure they are fit for purpose |
| | | 3.3 | Requisition stocks of consumable materials as required |
| | | 3.4 | Replenish stocks of collecting equipment at collection centres as required |
| 4 | Maintain a safe work environment | 4.1 | Use established work safety practices and personal protective equipment (PPE) to ensure personal safety and that of others |
| | | 4.2 | Clean up spills, if they occur, using workplace procedures |
| | | 4.3 | Minimise the generation of waste |

- 4.4 Dispose of all waste in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory safety; quality management and environmental management; and labelling, storage, transport and disposal of hazardous materials
- national work health and safety (WHS) standards and codes of practice, and national environmental protection measures
- specific codes, guidelines and procedures, such as Australian Dangerous Goods Code, Australia Post Guides and International Air Transport Association (IATA) Regulations
- workplace documents, such as standard operating procedures (SOPs); material safety data sheets (MSDS); safety procedures for specific materials and equipment; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; spillage and waste containment and disposal protocols; maps and site plans; protocols regarding customer liaison and use of communication devices; vehicle log books and incident/accident report forms

Workplace requirements for the transport of samples

Workplace requirements for the transport of samples and/or equipment include, but are not limited to, one or more of:

- using appropriate sample containers (glass, plastic and opaque)

and/or equipment

and preservatives

- using appropriate sample and equipment boxes (insulated, shockproof and waterproof)
- wrapping containers in foil to exclude light
- using temperature control, which may involve prevention of direct contact between the sample and coolant
- restraining containers to prevent movement
- checking sample viability during transport while avoiding unnecessary handling

Work safety procedures

Work safety procedures include, but are not limited to, one or more of:

- using safe vehicle driving practices
- handling, labelling and storing hazardous material and equipment in accordance with labels, MSDS, manufacturer instructions and workplace procedures and regulations, and signage
- using PPE
- regular cleaning and/or decontamination of equipment and vehicle
- containing and cleaning up spillage or breakages
- using appropriate techniques and equipment to safely dispose of waste materials

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL952002A Handle and transport samples or equipment

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL952002 Handle and transport samples or equipment

Modification History

Release 1. Supersedes and is equivalent to MSL952002A Handle and transport samples or equipment

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
- planning the pickup of items in conjunction with a supervisor on at least one (1) occasion
- safely picking up and transporting samples or test/calibration equipment on at least two (2) occasions in a way that ensures the integrity of subsequent test results
- checking that the vehicle, transport containers and materials, and communication devices are present and fit for purpose prior to departure
- using communication devices to maintain contact between the courier, reception centre and routine pickup locations
- communicating effectively and courteously with individuals, customers, clients and reception staff
- maintaining confidentiality and reporting problems, accidents and incidents in accordance with procedures
- recording details of item exchange in relevant sections of chain of custody forms, as required
- maintaining stocks of consumables and collecting equipment at collection centres, as required
- cleaning up spills, if they occur, and minimising and disposing of waste in accordance with workplace procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- need for appropriate and timely transport and the importance of effective communication with clients and customers to workplace business
- nature of samples and/or equipment transported and the effects of changes in environmental conditions, vibration and shock on them
- control measures for minimising exposure to hazardous materials and equipment
- procedures for safe, efficient containment and clean up of spillages and breakages and their disposal
- maintenance requirements of vehicle and equipment used in the handling and transporting samples and equipment
- workplace procedures for responding to emergencies

- relevant hazards, work health safety (WHS) and environment requirements

Additional knowledge requirements will apply for different industry sectors. For example for biomedical samples:

- labile nature of biological and environmental samples
- possible infectivity of biological materials
- effects of exposure to radioactive materials.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL943002 Participate in laboratory or field workplace safety
- Holistic assessment methods include:
 - review of the candidate's job sheets or logs of completed activities
 - review of the quality of results traceable to the transport of samples or equipment by candidate
 - feedback from supervisors, other laboratory personnel and customers about the candidate's ability to communicate effectively and safely handle and transport samples and equipment in accordance with workplace procedures and schedules
 - direct observation of the candidate's work as a courier
 - oral or written questions to assess knowledge of workplace requirements for the handling and transport of samples and equipment
 - simulated role plays covering interactions between a courier and personnel at a reception desk or customer pickup centre.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - transport vehicle, containers for transporting samples and test/calibration equipment, and communication devices

- workplace protocols and procedures covering the handling and transport of samples or equipment.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL953001 Receive and prepare samples for testing

Modification History

Release 1. Supersedes and is equivalent to MSL953001A Receive and prepare samples for testing

Application

This unit of competency covers the ability to log samples, check sample documentation, and schedule and prepare samples for testing in accordance with workplace procedures. This unit does not include testing, tissue processing or similar techniques.

This unit of competency is applicable to field and laboratory assistants in all industry sectors who receive and prepare samples as part/all of their job in a sample reception area.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Sampling

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|----------|--------------------|-----|--|
| 1 | Log samples | 1.1 | Record date (and time of arrival, if required) of samples at workplace |
| | | 1.2 | Check and match samples with request forms before they are accepted |
| | | 1.3 | Enter samples into the laboratory information |

- management system (LIMS)
- 1.4 Apply required document tracking procedures
 - 1.5 Process 'urgent' test requests according to workplace requirements
 - 1.6 Ensure security and traceability of all information, laboratory data and records
- 2 **Address client and customer service issues**
- 2.1 Report to referring client when samples and request forms do not comply with workplace requirements
 - 2.2 Refer to supervisor for instruction where 'return to source' is inappropriate or not possible
 - 2.3 Maintain confidentiality of all client/workplace data and information
 - 2.4 Ensure that information provided to customers is accurate, relevant and authorised for release
 - 2.5 Deal with customers politely and efficiently and in accordance with workplace procedures
- 3 **Prepare samples for testing**
- 3.1 Perform physical separation of the samples, as required
 - 3.2 Prepare the required number of sub-samples
 - 3.3 Perform chemical separation of the samples, as required
 - 3.4 Place samples in appropriate transport media, if appropriate
 - 3.5 Monitor and control sample conditions before, during and after processing
- 4 **Distribute samples**
- 4.1 Group samples requiring similar testing requirements
 - 4.2 Distribute samples to workstations maintaining sample integrity
 - 4.3 Distribute request forms for data entry or filing in accordance with workplace procedures

- | | | | |
|---|--|-----|---|
| | | 4.4 | Check that samples and relevant request forms have been received by laboratory personnel |
| 5 | Maintain a safe work area and environment | 5.1 | Apply safe work practices to ensure personal safety and that of other laboratory personnel |
| | | 5.2 | Use appropriate personal protective equipment (PPE) to ensure personal safety when sampling, processing, transferring or disposing of samples |
| | | 5.3 | Report all accidents and spillages to supervisor |
| | | 5.4 | Clean up splashes and spillages immediately using appropriate techniques and precautions |
| | | 5.5 | Minimise the generation of wastes and environmental impacts |
| | | 5.6 | Ensure the safe disposal of hazardous materials and other laboratory wastes |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory safety; quality and environmental management; and labelling, storage, transport and disposal of hazardous materials
- national work health and safety (WHS) standards and codes of

- practice, and national environmental protection measures
- specific codes, guidelines and procedures, such as Australian Dangerous Goods Code, Australia Post Guides, International Air Transport Association (IATA) Regulations, and Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice
- workplace documents, such as standard operating procedures (SOPs); material safety data sheets (MSDS); safety procedures for specific materials and equipment; incident/accident report forms; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; spillage and waste containment and disposal protocols; and customer service standards
- procedure sheets indicating how samples and sub-samples are to be labelled, prepared, processed, distributed, flagged for urgent testing or for other non-routine requirements, including referral to external laboratories, transport and storage requirements

Samples received

Samples received include, but are not limited to, one or more of:

- gas or air samples
- liquid samples, such as water and wastewater, stormwater, sludges, and complex mixtures and sewage
- solid samples, such as soils and sediments, rocks/minerals, concrete, quarry or mining products
- solid wastes, such as hazardous, non-hazardous, domestic, commercial, industrial, mining and agricultural
- biological specimens, such as tissue and blood
- raw materials, start, middle, end of production run samples and final products

Safe work practices

Safe work practices include, but are not limited to, one or more of:

- using MSDS and standard precautions when dealing with potentially hazardous materials
- handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer instructions, and workplace procedures and regulations
- using biohazard containers and laminar flow cabinets
- labelling of reagents and hazardous materials correctly
- regularly cleaning and/or decontaminating equipment and work areas
- using PPE, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL953001A Receive and prepare samples for testing

Links

Assessment Requirements for MSL953001 Receive and prepare samples for testing

Modification History

Release 1. Supersedes and is equivalent to MSL953001A Receive and prepare samples for testing

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely receiving and preparing samples for testing in accordance with workplace procedures on at least three (3) occasions
- receiving and preparing at least three (3) different types of samples
- logging samples and checking samples for history, acceptable transport conditions and complete documentation
- promptly addressing client and customer service issues in consultation with appropriate personnel
- labelling, preparing, sub-sampling and storing samples to maintain sample integrity and traceability
- distributing samples for efficient testing in accordance with workplace procedures
- recognising and dealing with problems according to workplace procedures
- dealing with customers politely and efficiently
- disposing of samples following required procedures
- maintaining confidentiality of all data and information
- providing information to customers that is accurate, relevant and authorised for release
- maintaining equipment and ensuring a clean and safe work area.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures for the receipt, labelling, preparation, processing, documentation, distribution and storage of samples used in job role
- requirements of specified sample types for specific tests handled in job role
- potentially hazardous and unstable nature of samples
- importance of maintaining effective customer relations
- relevant hazards, work health and safety (WHS) and environment requirements.

Additional knowledge applies to industry sectors, for example, biomedical laboratories:

- potentially infective nature of all biological materials

- nature of unstable solutions, such as anti-coagulated whole blood
- non-conformance of clotted samples for procedures, such as routine haematological tests.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL913001 Communicate with other people
 - MSL943002 Participate in laboratory or field workplace safety
- Holistic assessment methods include:
 - review of sample receipt and preparation records prepared by the candidate
 - feedback from supervisors and peers about the candidate's ability to receive and prepare samples in accordance with workplace procedures
 - observation of the candidate receiving and preparing samples
 - oral or written questions to assess required knowledge of receiving and preparing samples for testing.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a laboratory information management system (LIMS) system and workplace procedures covering the receipt and preparation of samples for testing
 - sample containers, tubes, request forms and sample documentation
 - simulated samples when an authentic sample is unavailable or inappropriate.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:

- performing the competency being assessed as part of current employment OR
- having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL954001 Obtain representative samples in accordance with sampling plan

Modification History

Release 1. Supersedes and is equivalent to MSL954001A Obtain representative samples in accordance with sampling plan

Application

This unit of competency covers the ability to obtain a range of samples that are representative of the source material (e.g. raw ingredients, product in process and final product) and to prepare the samples for testing. All sampling activities are conducted in accordance with a defined sampling plan. This unit does not cover the subsequent testing of the samples.

This unit of competency is applicable to laboratory technicians in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Sampling

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 **Prepare for sampling**

1.1 Confirm the sampling location, number and type of samples, and timing and frequency of sampling from workplace or client's sampling plan

1.2 Liaise with relevant personnel to arrange site access and

- all necessary clearances and/or permits as required
- 1.3 Select sampling equipment and conditions to achieve representative samples and preserve sample integrity during collection, storage and transit
 - 1.4 Check that all procedures are in accordance with client or workplace requirements, relevant standards and codes
 - 1.5 Identify site and sampling hazards and review workplace safety procedures
 - 1.6 Assemble and check all sampling equipment, materials, containers and safety equipment
 - 1.7 Arrange suitable transport to, from and around site as required
- 2 **Conduct sampling and log samples**
- 2.1 Locate sampling sites and, if required, services at the site
 - 2.2 Conduct representative sampling in accordance with sampling plan and defined procedures
 - 2.3 Record all information and label samples in accordance with traceability requirements
 - 2.4 Record environment or production conditions and any atypical observations made during sampling that may impact on sample representativeness or integrity
 - 2.5 Transport all samples back to base according to standard operating procedures (SOPs) and relevant codes
- 3 **Prepare samples for testing**
- 3.1 Prepare sub-samples and back-up sub-samples that are representative of the source
 - 3.2 Label all sub-samples to ensure traceability and store in accordance with SOPs
 - 3.3 Follow defined preparation and safety procedures to limit hazard or contamination to samples, self, work area and environment
 - 3.4 Distribute sub-samples to defined workstations maintaining sample integrity and traceability requirements

- | | | | |
|---|---|-----|---|
| 4 | Address client issues | 4.1 | Enter approved information into laboratory information management system (LIMS) |
| | | 4.2 | Report all relevant aspects of the sampling and preparation phases in accordance with workplace procedures |
| | | 4.3 | Ensure that information provided to client is accurate, relevant and authorised for release |
| | | 4.4 | Maintain security and confidentiality of all client/workplace data and information |
| 5 | Maintain a safe work environment | 5.1 | Clean all equipment, containers, work area and vehicles according to workplace procedures |
| | | 5.2 | Check serviceability of all equipment before storage |
| | | 5.3 | Use defined safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other personnel |
| | | 5.4 | Minimise the generation of wastes and environment impacts |
| | | 5.5 | Ensure the safe collection of all hazardous wastes for appropriate disposal |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory safety; quality and environmental management; sampling of materials; and labelling, storage, handling and transport of hazardous materials
- national work health and safety (WHS) standards and codes of practice, national environmental protection measures, and national measurement regulations and guidelines
- specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements and principles of good laboratory practice (GLP)
- workplace documents, such as SOPs; quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS); safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; waste minimisation and safe disposal procedures; and maps and site plans
- sampling procedures for specific samples, sites and clients (labelling, preparation, storage, transport and disposal)
- methods and procedures which may be written to meet workplace, client and/or regulatory/certifying body requirements

Materials sampled

Materials sampled include one or more of:

- gas or air samples
- water, groundwater, wastewater, stormwater, sludges and sewage
- soil, sediments, rocks, concrete, quarry and mining material, solid wastes
- raw materials, start, middle, end of production run samples, final products and materials used in production processes, such as flocculants
- plants, animals and microbiological samples

Types of samples

Types of samples include one or more of:

- grab samples
- composite samples
- quality control samples
- research or one-off samples
- environmental or survey samples
-

Sampling tools and equipment	<p>Sampling tools and equipment include, but are not limited to, one or more of:</p> <ul style="list-style-type: none">• shovels, augers, chain saws, front-end loader, backhoe, excavator and drill rig• sampling frames, sampling tubes, dip tubes, spears, flexible bladders and syringes, sample thief, pumps and stainless steel bailers• sample bottles or containers, plastic containers and disposable buckets• access valves• auto samplers• traps and cages• sterile containers, pipettes, inoculating loops and disposable spoons
Maintenance of integrity of samples	<p>Maintenance of integrity of samples includes one or more of:</p> <ul style="list-style-type: none">• use of appropriate containers and lids, sealing of sample containers• purging of sample lines and bores• decontamination of sampling tools between collection of consecutive samples• use of appropriate preservatives• temperature control, which may involve insulation of the container in foil or wet newspaper, cloth, sand or sawdust, and separation of the sample and coolant• transfer of sterile sample into sterile container• handling and transport of samples to avoid disturbance or damage• monitoring of storage conditions• workplace/legal traceability through appropriate sample labelling and records
Safety procedures	<p>Safety procedures include, but are not limited to, one or more of:</p> <ul style="list-style-type: none">• use of biohazard containers and laminar flow cabinets• correct labelling of reagents and hazardous materials• use of PPE• handling, and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer instructions, and workplace procedures and regulations• regular cleaning and/or decontamination of equipment and work areas• machinery guards

- signage, barriers, service isolation tags, traffic control and flashing lights
- lock out and tag-out procedures

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Assessment Requirements for MSL954001 Obtain representative samples in accordance with sampling plan

Modification History

Release 1. Supersedes and is equivalent to MSL954001A Obtain representative samples in accordance with sampling plan

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- using a range of site sampling plans, samples and sampling procedures
- sampling from a range of sampling points and locations
- obtaining samples that are representative of the source material in accordance with a sampling plan on at least three (3) occasions
- obtaining at least three (3) different types of samples in accordance with sampling plans
- collecting the specified quantity of sample to enable all processing and testing to occur and back-up samples to be stored
- preparing samples for testing
- labelling samples and sub-samples and maintaining the integrity and security of samples following workplace and/or legal traceability requirements
- identifying atypical materials and samples and taking appropriate action
- maintaining sampling equipment in appropriate condition
- completing sampling records using workplace procedures
- following safety regulations and work health and safety (WHS) procedures during sampling, transport and storage
- following requirements for the disposal of waste and the preservation of the environment.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- principles of representative sampling, including:
- representative samples
- preservation of integrity of samples
- maintaining identification of samples relative to their source, workplace and legal traceability
- cost-effectiveness of sampling
- consistency of sampling procedures
- sampling principles, including random, systematic and stratified sampling
- characteristics of product/materials sampled as part of job role and likely contaminants
- function of key sampling equipment/materials and principles of operation

- sampling procedures covering labelling, preparation, storage, transport and disposal, workplace and/or legal traceability requirements
- links between quality control, quality assurance, quality management systems and sampling procedures
- workplace procedures dealing with legislative requirements for the handling, labelling and transport of hazardous goods
- site and sampling hazards and the links between following WHS procedures and personal and environmental safety, particularly at high risk sites.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL924001 Process and interpret data
 - MSL943002 Participate in laboratory or field workplace safety
 - relevant MSL974000 series units of competency
 - relevant MSL975000 series units of competency relevant to the sampling
- Holistic assessment methods include:
 - inspection of samples collected by the candidate
 - review of sampling documentation completed by the candidate
 - observation of the candidate taking and preparing a range of samples
 - feedback from peers, customers and supervisors that sampling plans were followed
 - questioning to assess required knowledge of representative sampling procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - source material, including raw ingredients, product in process and final products
 - a variety of sample types, sampling plans and procedures, sampling containers and sampling equipment, and sample preparation materials and equipment.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973001 Perform basic tests

Modification History

Release 1. Supersedes and is equivalent to MSL973001A Perform basic tests

Application

This unit of competency covers the ability to prepare samples and perform tests and measurements using standard methods with access to readily available advice from supervisors.

This unit of competency is applicable to laboratory/field assistants working in all industry sectors. In general, they do not calibrate equipment and make only limited adjustments to the controls. They do not interpret or analyse results or troubleshoot equipment problems.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

| | | 5.4 | Clean, care for and store equipment and reagents as |

required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- national work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- standard methods for basic tests
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules, workplace recording and reporting procedures; and waste minimisation and safe disposal procedures

Sample preparation

Sample preparation processes include one or more of:

- sub-sampling or splitting using procedures, such as riffing, coning and quartering, manual and mechanical splitters
- diluting samples
- physical treatments, such as ashing, dissolving, filtration, sieving, centrifugation and comminution
- moulding, casting or cutting specimens

Typical basic tests carried out by laboratory/field assistants

Typical basic tests carried out by laboratory/field assistants include, but are not limited to, one or more of:

- visual/optical tests of appearance, such as colour, texture, identity, turbidity and refractive index (alcohol content and Baume/Brix)
- physical tests, such as:
 - density, specific gravity and compacted density
 - moisture content and water activity
 - particle size, particle shape and size distribution
- chemical tests, such as:
 - gravimetric, colorimetric, electrical conductivity (EC) and pH
 - specific ions using dipsticks and kits
 - nutrients (e.g. nitrates and orthophosphates) using kits
 - ashes, including sulphated ashes
- biological/environmental tests, such as:
 - pH, oxygen reduction potential (ORP), dissolved oxygen (DO) and EC
 - E coli using test kits, and surface hygiene/presence of microbes
- packaging tests, such as:
 - tearing resistance, bursting strength and impact resistance
 - permeability and/or leakage
- mechanical tests, such as:
 - Emerson class
 - concrete slump

Measurements

Measurements include, but are not limited to, one or more of:

- simple ground surveys
- meteorological parameters, such as wind direction/strength, rainfall, maximum/minimum temperature, humidity and solar radiation
- simple background radiation survey
- production/process parameters, such as temperature, flow and pressure
- gas levels in a confined space

WHS and environmental management

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through

requirements state/territory or federal legislation. These requirements must not be compromised at any time

- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL973001A Perform basic tests

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL973001 Perform basic tests

Modification History

Release 1. Supersedes and is equivalent to MSL973001A Perform basic tests

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accurately interpreting workplace procedures and standard methods
- preparing samples using at least three (3) different processes
- performing at least five (5) basic tests or measurements using standard methods and procedures
- checking test equipment before use
- completing all tests within the required timeline without sacrificing safety, accuracy or quality
- demonstrating close attention to the accuracy and precision of measurements and the data obtained
- calculating simple quantities using appropriate equations, units, uncertainties and precision
- recording and presenting results accurately and legibly
- maintaining the security, integrity and traceability of all samples, data/results and documentation
- following procedures for working safely and minimising environmental impacts.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- concepts of metrology, including:
 - all measurements are estimates
 - measurements belong to a population of measurements of the measured parameters
 - precision, accuracy and significant figures
 - sources of error, uncertainty and repeatability
 - traceability
- international system of units (SI)
- purpose of tests performed as part of job role and principles of the standard methods/specifications used
- function of key components of the test equipment, pre-use equipment and safety checks
- sources of uncertainty in measurement and methods for control
- workplace and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations

- procedures for recognising and reporting of unexpected or unusual results
- relevant hazards, work health safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL922001 Record and present data
- Holistic assessment methods include:
 - review of the quality of test data/results achieved by the candidate over time
 - inspection of records and workplace documentation completed by the candidate
 - observation of the candidate performing a range of basic tests
 - feedback from peers and supervisors
 - oral or written questioning to check required knowledge of basic test procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory equipped with basic test equipment, common measuring instruments, materials, standard methods, workplace procedures, MSDS and equipment manuals.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973002 Prepare working solutions

Modification History

Release 1. Supersedes and is equivalent to MSL973002A Prepare working solutions

Application

This unit of competency covers the ability to prepare working solutions and to check that existing stocks of solutions are suitable for use. Working solutions include those required to perform laboratory tests. Personnel are required to calculate quantities and make dilutions.

This unit of competency is applicable to laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Make up working solutions	1.1	Identify the relevant standard methods for solution preparation
		1.2	Assemble specified laboratory equipment
		1.3	Select and prepare materials and solvent of specified purity
		1.4	Measure appropriate quantities of reagents for solution

- preparation and record data
- 1.5 Prepare labels and log solution details in laboratory register
 - 1.6 Transfer solutions to appropriately labelled containers
- 2 **Check existing stock of solutions**
- 2.1 Monitor shelf life of working solutions and identify those that are unfit for use according to laboratory procedures
 - 2.2 Replace out-of-date or reject solutions according to laboratory procedures
- 3 **Maintain a safe work environment**
- 3.1 Use appropriate safety procedures and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
 - 3.2 Store reagents and clean/store glassware and equipment in accordance with workplace procedures
 - 3.3 Minimise generation of waste and environmental impacts
 - 3.4 Clean up spills using appropriate techniques
 - 3.5 Ensure the safe collection of laboratory and hazardous waste for subsequent disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety, quality management and laboratory glassware
- national work health and safety (WHS) standards and codes of practice, national environmental protection measures, and national measurement regulations and guidelines
- specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements and principles of good laboratory practice (GLP)
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS); safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- workplace procedures and standard methods for preparing working solutions

Working solutions

Working solutions include, but are not limited to, one or more of:

- solutions required for diagnostic/analytical and limit tests in food and chemical laboratories, such as sulphates, chlorides and heavy metals
- staining solutions for standard diagnostic/analytical procedures in biomedical/environmental laboratories, such as cell staining, fixation of cells and tissues, suspension of cells and titrimetric indicators
- solutions required for laboratory maintenance and disinfection, such as 70% ethanol and hypochlorite

Safety procedures

Safety procedures include, but are not limited to, one or more of:

- use of PPE, such as safety glasses, gloves and coveralls
- correctly labelling reagents and hazardous materials
- handling and storing hazardous material and equipment in accordance with labels, MSDS, manufacturer instructions and workplace procedures and regulations
- regular cleaning and/or decontamination of equipment
- prompt clean-up of spills in accordance workplace procedures

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL973002A Prepare working solutions

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL973002 Prepare working solutions

Modification History

Release 1. Supersedes and is equivalent to MSL973002A Prepare working solutions

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely preparing at least five (5) examples of correctly labelled working solutions, including calculation of the quantities involved and any dilutions required
- checking that existing stocks of working solutions and identifying those unfit for use, including:
 - noting turbidity to exclude absorption of moisture
 - noting deposits to exclude microbial contamination or chemical degradation
 - noting crystals to exclude evaporation
 - noting colour changes indicating a pH shift with solutions containing indicators
 - checking expiry dates on solution containers
- following workplace procedures for the safe use of hazardous chemicals, laboratory glassware and equipment
- accurately labelling and storing solutions in accordance with workplace procedures
- safely cleaning up spills and collecting/disposing of waste in accordance workplace procedures
- recording and presenting data accurately and legibly.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- concepts of metrology, including:
 - all measurements are estimates
 - measurements belong to a population of measurements of the measured parameters
 - precision, accuracy and significant figures
 - sources of error, uncertainty and repeatability
 - traceability
- international system of units (SI)
- concentration terms, such as % w/w, % w/v, % v/v, ppm (mg/L) and molarity
- basic theory of acids, bases, salts, buffers and neutralisation
- what affects solubility
- difference between aqueous and organic solutions

- periodic table, symbols of the elements, atomic weights, and difference between elements and compounds
- chemical formulae
- workplace procedures for preparing solutions
- calculations required to prepare specified amounts of solutions of specified concentration
- use of material safety data sheets (MSDS) and workplace procedures for preparing, handling and disposing of solutions and cleaning up spillages
- relevant hazards, work health safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL922001 Record and present data
 - MSL943002 Participate in laboratory or field workplace safety
- Holistic assessment methods include:
 - inspection of working solutions prepared, labelled and stored by the candidate
 - review of solution records and workplace documentation completed by the candidate
 - feedback from peers and supervisors
 - observation of the candidate preparing working solutions
 - review of calculations for concentration and dilutions completed by the candidate
 - oral or written questioning about solution preparation steps, calculations, common hazards and safety procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory equipped with appropriate reagents and equipment, such as pH meters; balances; magnetic stirrers, water baths and hot plates; measuring cylinders, beakers, conical flasks, volumetric flasks, pipettes and burettes; filter papers and funnels; and fume cupboards
 - standard methods and workplace procedures

- containers and storage facilities.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973003 Prepare culture media

Modification History

Release 1. Supersedes and is equivalent to MSL973003A Prepare culture media

Application

This unit of competency covers the ability to prepare culture media which is free of contamination to facilitate optimal growth of organisms and cells. It includes the ability to organise the materials, equipment and work environment and follow standard methods. Media may be prepared from formulated powders obtained from microbiological companies or by first principles under supervision of a technical officer or scientist.

This unit of competency is applicable to laboratory assistants in the biomedical, biological, environmental, food processing and pharmaceutical industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked

Pre-requisite Unit

Nil

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|------------------------------|-----|---|
| 1 | Prepare culture media | 1.1 | Prepare mixture of media and solvent to ensure solution and even settling of heat soluble materials |
| | | 1.2 | Label media to allow tracking in subsequent processes |
| | | 1.3 | Use a vessel large enough to endure adequate mixing |

- and heating of the media
- 1.4 Dispense media into vessels for sterilisation, leaving room for expansion during heating and cooling
- 2 **Sterilise media**
 - 2.1 Load the steriliser in keeping with maximum permitted loads and appropriate positioning of materials
 - 2.2 Ensure a sterilisation indicator is correctly placed with the load to monitor sterilisation process
 - 2.3 Operate sterilisation cycle in accordance with manufacturer requirements to achieve sterilisation at the required settings
 - 2.4 Cool media to the temperature specified in the media formulation procedures
- 3 **Pour, label and store media**
 - 3.1 Add labile constituents where necessary, under conditions that will not lead to their denaturation or contamination of media
 - 3.2 Ensure even mixing of additives and media before dispensing
 - 3.3 Aseptically dispense media to minimise occurrence of procedural contamination
 - 3.4 Label media to allow for selection, avoiding areas of the culture vessel required for examination of colony growth
 - 3.5 Store media to maximise shelf life and minimise contamination
 - 3.6 Date batch media to ensure correct batch rotation
 - 3.7 Incubate control plates as a sterility check
- 4 **Perform quality control checks**
 - 4.1 Inspect media for any evidence of possible contamination or problems with structure or sterilisation
 - 4.2 Check useability of selective media by growth of expected organism

- | | | | |
|---|--|-----|---|
| | | 4.3 | Check stored stocks at regular intervals for conformance to required standards |
| 5 | Maintain work area and equipment to prevent cross-infection and contamination | 5.1 | Use personal protective equipment (PPE) and safe work practices to ensure personal safety and that of other laboratory personnel |
| | | 5.2 | Place disposable and reusable items into relevant receptacles |
| | | 5.3 | Clean and disinfect work area and equipment after use |
| | | 5.4 | Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety, quality management and environmental management
- Australian standards covering the requirements for cleaning, disinfecting and sterilising reusable medical and surgical instruments and equipment; and maintenance of associated environments in health care facilities
- national work health and safety (WHS) standards and codes of practice, national environmental protection measures, and

national measurement regulations and guidelines

- specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements, principles of good laboratory practice (GLP), Australia New Zealand Food Standards (ANZFS) Code, Australian code of good manufacturing practice for medicinal products (GMP) and Australian Dangerous Goods Code
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS); safety procedures; material, client and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- workplace procedures and standard methods for preparing culture media, and operation and maintenance manuals for automated media preparation equipment

Cell and tissue culture media

Cell and tissue culture media include, but are not limited to, one or more of:

- agars, broths and solutions
- slopes
- basic balanced salt solutions, such as Hank's or Krebs-Ringer's
- deeps
- enriched media, such as blood sugar, chocolate agar, tetrathionate broth and selenite broth
- control media
- differential media, such as eosin-methylene blue agar and MacConkey's agar
- selective media, such as deoxycholate-citrate agar and Lowenstein-Jensen medium
- tissue culture media
- labile constituents, such as blood, hormones or antibodies

Sterilisation techniques

Sterilisation techniques include, but are not limited to, one or more of:

- boiling, high temperature, high pressure steam and autoclaving
- steam and membrane filtration
- microwave, radiation, gas and/or chemical treatments

Safety procedures

Safety procedures include, but are not limited to, one or more of:

- use of PPE, such as safety glasses, gloves and coveralls
- use of biohazard containers and laminar flow cabinets
- correctly labelling reagents and hazardous materials
- handling and storing hazardous material and equipment in accordance with labels, MSDS, manufacturer instructions and workplace procedures and regulations
- closely following safe autoclave operating procedures to avoid accidents and prevent damage to culture media
- regular cleaning, sterilisation and/or disinfecting of equipment
- prompt clean-up of spills in accordance workplace procedures

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL973003A Prepare culture media

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c63a03b-4a6b-4ae5-9560-1e3c5f462baa>

Assessment Requirements for MSL973003 Prepare culture media

Modification History

Release 1. Supersedes and is equivalent to MSL973003A Prepare culture media

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- using standard methods to safely prepare at least three (3) different batches of culture media that meet specifications and are free of contamination
- using appropriate sterilisation techniques, including maintaining adequate space between containers to prevent cross-contamination
- performing quality assurance checks on media, including streaking out of cultures to a single colony and lawn cultures
- performing post-sterilisation procedures, including dispensing or adding using aseptic technique
- recognising and reporting non-compliances, anomalies or out-of-specification results
- labelling and storing culture media according to workplace procedures
- accurately recording data and completing workplace documentation
- following workplace procedures for the safe use of hazardous equipment and materials during the preparation of culture media
- following workplace procedures for safe removal of disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- basic microbiological concepts and terminology, including growth rates in culture, and production of gas and haemolysis of red cells in media
- growth requirements of microorganisms and tissue, such as bacteria, fungi, protozoans, viruses and multi-cellular parasites, in terms of their laboratory culture
- purpose, content and features of culture media prepared in job role, and the relationship between the correct preparation of culture media and the optimal growth of organisms or cells
- nature, properties and use of a range of biological media
- relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- the effect of physical requirements, such as pH and temperature on optimal growth of organisms and cells
- the effect of inappropriate storage on culture media quality and performance
- cleaning and sanitising requirements for equipment and work area

- relevant hazards, such as microorganisms and agents; sharps and broken glassware; sources of heat, such as ovens, burners and autoclaves; fluids under pressure, such as steam; and radiation used for sterilisation
- relevant work health safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL943002 Participate in laboratory or field workplace safety
 - MSL973004 Perform aseptic techniques
- Holistic assessment methods include:
 - review of quality assurance results and examination of batches of media prepared by the candidate
 - observation of the candidate preparing and dispensing culture media
 - written and/or oral questioning about culture media preparation methods, typical quality problems, common hazards and safety procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory equipped with appropriate reagents and equipment, such as pH meters; balances; stirrers, water baths and hot plates; burners, autoclave and Arnold steamer; measuring cylinders, flasks and glassware; Falcon dishes; Petri dishes; media storage bottles and tissue culture bottles; self-refilling syringes; membrane filtration equipment; automatic agar pourers; labelling equipment; distilled water apparatus; refrigerators; sterilisation equipment and indicators
 - workplace schedules and procedures, MSDS and documented safe work practices.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR

- relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973004 Perform aseptic techniques

Modification History

Release 1. Supersedes and is equivalent to MSL973004A Perform aseptic techniques

Application

This unit of competency covers the ability to perform aseptic techniques to maintain the integrity of both the sample source and the sample. It applies to sampling techniques in tissue culture and to generic microbiological procedures.

This unit of competency is applicable to laboratory assistants and technicians working in the field or laboratory in the biomedical, biological, food processing and environmental industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked

Pre-requisite Unit

Nil

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---|-----|--|
| 1 | Prepare for aseptic sampling or transfer | 1.1 | Ensure that any sampling procedure conforms with the requirements of the sampling plan |
| | | 1.2 | Use specified personal protective equipment (PPE) |
| | | 1.3 | Prepare the work area for safe and effective sample transfer |

- 1.4 Select equipment and materials specified by the procedure
 - 1.5 Organise equipment to minimise contamination during manipulations
 - 1.6 Label containers for clear identification
 - 1.7 Record details in relevant log or database
- 2 **Transfer materials aseptically**
- 2.1 Protect the integrity of the sample source by sterilising the sampling site and the mouth of transport or culture vessel
 - 2.2 Sterilise inoculating loops and/or pipette where used to prevent contamination
 - 2.3 Perform transfer while minimising opportunities for contamination and cross-infection
 - 2.4 After transfer, and before sealing the transport or culture vessel, flame the vessel mouth to maintain sterility
 - 2.5 Re-sterilise inoculating loops, minimising the generation of aerosols
 - 2.6 Perform quality control checks as required
 - 2.7 Label transport or culture vessels for clear identification
- 3 **Maintain work area and equipment to prevent cross-infection and contamination**
- 3.1 Place disposable and reusable items into relevant receptacles
 - 3.2 Clean and disinfect work area and equipment after use
 - 3.3 Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety, quality management and environmental management
- Australian standards covering the requirements for occupational personal protection; cleaning, disinfecting and sterilising reusable medical and surgical instruments and equipment; and maintenance of associated environments in health care facilities
- national work health and safety (WHS) standards and codes of practice, national environmental protection measures, and national measurement regulations and guidelines
- specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements, principles of good laboratory practice (GLP), Australia New Zealand Food Standards (ANZFS) Code, Australian code of good manufacturing practice for medicinal products (GMP), Australian Dangerous Goods Code and labelling of workplace substances
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS); safety procedures; material, client and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- workplace procedures and standard methods for preparing culture media, and operation and maintenance manuals for automated media preparation equipment

PPE

PPE includes, but is not limited to, one or more of:

- gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits and respirators
- biohazard containers and laminar flow cabinets

Sample pot and transfer media and the subculturing and/or passaging of culture

Sample pot and transfer media and the subculturing and/or passaging of culture to include, but are not limited to, one or more of:

- sterile broth
- media for isolation of colony
- tissue culture media
- media for continuous culture systems

Samples

Samples include, but are not limited to, one or more of:

- body fluids and liquids
- water and soil
- sterile pharmaceuticals
- yeasts and moulds
- milk and yoghurt
- swabs and smears
- propagation tissue
- plant material
- fermented foods and beverages

Sterilisation techniques

Sterilisation techniques include, but are not limited to, one or more of:

- flaming
- high temperature, high pressure steam, boiling and autoclaving
- steam and membrane filtration
- microwave, radiation, gas and/or chemical treatments

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples

- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL973004A Perform aseptic techniques

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL973004 Perform aseptic techniques

Modification History

Release 1. Supersedes and is equivalent to MSL973004A Perform aseptic techniques

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely performing aseptic techniques that maintain the integrity of both the sample source and the sample on at least three (3) occasions using different samples
- preventing cross-contamination of sample source and sample
- manipulating laboratory equipment and glassware to prevent contamination of culture medium during transfer
- cleaning and disinfecting work surfaces and equipment to prevent cross-contamination of work area, personnel and environment
- performing quality control checks, including streaking out of cultures to a single colony and lawn cultures
- labelling and storing culture media according to workplace procedures
- recognising and reporting non-compliance, anomalies or out-of-specification results
- accurately recording data, labelling samples and completing workplace documentation
- consistently using appropriate personal protective equipment (PPE) and workplace procedures for aseptic transfer
- following workplace procedures for the sorting, collecting, treating, recycling and/or disposing of waste.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- growth requirements of microorganisms (bacteria, fungi, protozoans, viruses and multi-cellular parasites) and tissue in terms of their laboratory culture
- relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- importance of pure culture techniques and aseptic transfer to the successful microbiological investigation and correct interpretation of laboratory results
- cleaning and sanitising requirements of equipment and work area, and effects of physical and chemical agents on microbial growth and death
- disinfection and sterilisation procedures used in the collection, processing and safe disposal of samples and materials
- principles of infection control related to work health and safety (WHS), and sampling and transfer of materials in microbiological investigations

- relevant hazards, such as accessing the sample from difficult or dangerous areas; injuries from sharps, burners, molten agar, dry ice and liquid nitrogen vapour; ultraviolet (UV) light sources; and exposure to hazardous substances and/or infectious agents
- relevant WHS and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL943002 Participate in laboratory or field workplace safety
 - MSL973003 Prepare culture media
- Holistic assessment methods include:
 - observation of the candidate aseptically transferring a range of samples
 - review of quality assurance results and examination of samples transferred by the candidate
 - written and/or oral questioning about aseptic transfer techniques, typical quality problems, common hazards and safe work practices.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory
 - appropriate equipment, such as:
 - transfer equipment, such as inoculating loops, pipettes (quantitative and qualitative), flasks, tubes and spatulas
 - Bunsen burners and bench incinerators
 - anaerobic jars
 - incubators, water baths, refrigerators, freezers and dry ice and liquid nitrogen cylinders, if required
 - laminar flow units and biohazard cabinets
 - autoclave or pressure cooker
 - swabs

- a continuous culture system
- appropriate materials, such as:
 - solid and/or liquid media
 - supplied media, such as media manufactured in the workplace or raw material supplies for media
 - disinfecting and sterilising agents and materials, such as methylated spirits, ethanol and ether
 - disposable equipment and clothing
 - tissue culture media
 - growth media in broths, plates, deeps or slopes
 - receptacles for safe disposal of wastes and for processing of reusable materials
 - bar coding material and labels
- workplace schedules, procedures and standard methods, MSDS and documented safe work practices.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973007 Perform microscopic examination

Modification History

Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Application

This unit of competency covers the ability to set up a light microscope for optimum resolution, to prepare routine samples and to observe, identify and report sample characteristics.

This unit of competency is applicable to laboratory or technical assistants in all industry sectors. The unit of competency covers limited interpretation and analysis of results. Troubleshooting of equipment and procedures is not required.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--------------------------------------|--|
| 1 Interpret test requirements | 1.1 Review test request to identify samples to be tested, test method and equipment involved |
| | 1.2 Identify hazards associated with the sample, preparation methods and equipment, and implement workplace control measures |

- | | | | |
|---|--|-----|---|
| 2 | Set up work area for preparation and examination of samples | 2.1 | Collect equipment and arrange the workspace so that equipment can be used safely and efficiently |
| | | 2.2 | Perform pre-use and safety checks to ensure equipment is fit for purpose and report faulty or unsafe equipment to appropriate personnel |
| 3 | Prepare samples for examination | 3.1 | Log and label samples according to workplace procedures to ensure traceability |
| | | 3.2 | Check suitability of the original and prepared sample for the examination, and report unsuitable samples to appropriate personnel |
| | | 3.3 | Prepare and store the sample for examination following workplace methods |
| 4 | Set up and use a light microscope | 4.1 | Set up the light path to optimise resolution |
| | | 4.2 | Select the appropriate objectives and filter for the sample being examined |
| | | 4.3 | Ensure that the lenses are clean |
| | | 4.4 | Adjust settings and alignment of the light path to optimise performance |
| | | 4.5 | Place sample correctly on the stage |
| 5 | Observe, identify and report sample characteristics | 5.1 | Recognise and identify significant sample characteristics |
| | | 5.2 | Perform required calculations accurately |
| | | 5.3 | Prepare and view control samples and check that results are consistent with expected values |
| | | 5.4 | Identify and report out-of-specification or atypical results promptly to appropriate personnel |
| | | 5.5 | Record and report data in accordance with workplace procedures |

- | | | | |
|---|---|-----|---|
| 6 | Maintain a safe work environment | 6.1 | Ensure safety and minimise cross-contamination through the use of personal protective equipment (PPE) |
| | | 6.2 | Handle all samples and equipment in accordance with workplace safety protocols |
| | | 6.3 | Clean up spills using appropriate techniques to protect personnel, work area and environment |
| | | 6.4 | Minimise generation of waste and environmental impacts |
| | | 6.5 | Collect and dispose of all wastes safely |
| | | 6.6 | Report hazards and incidents to designated personnel using workplace procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- national work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements, principles of good laboratory practice (GLP), and Australian code of good manufacturing practice for medicinal

products (GMP)

- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- workplace procedures for microscopic examination of samples

Preparation of samples

Preparation of samples includes, but is not limited to, one or more of:

- drying and cooling
- physical separation, centrifugation, filtration and chemical separation
- sub-sampling
- labelling
- aseptic transfer of specimen
- thin film or smear on a slide
- fixing of films to minimise cell damage and the production of artefacts
- staining of fixed material to illustrate required characteristics
- mounting of stained films, sections and whole mounts to ensure long-term preservation
- permanent labels for smears, films and sections for presentation, storage and retrieval
- selection of diluent to preserve or enhance visibility of the cells to be counted
- serial dilution to enable individual cells to be reliably counted
- filling a counting chamber in one continuous flow without bubbles or overflow
- selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling

Biological samples

Biological samples include, but are not limited to, one or more of:

- smears, impression smears, sections, squashes, films and whole mounts
- a monolayer of cells in smears and films
- fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques
- blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes
- stained sections of animal tissues using regressive haematoxylin

- and eosin to differentiate cytoplasmic and nuclear detail
- differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium)
 - stained whole mounts of helminths
 - whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae
 - pond water organisms
 - onion root tip squash
 - midstream sample of urine

Physical samples

Physical samples include, but are not limited to, one or more of:

- sand
- asbestos fibres
- coal samples
- construction materials for testing
- geological specimens

Sample characteristics

Sample characteristics are restricted to what can be viewed by bright light microscopy and include, but are not limited to, one or more of:

- shape and size of particles
- presence of contamination
- colour
- consistency and variability
- number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains)
- type of cells, percentage of atypical cells, presence/absence of cells, size of cells, viable and non-viable cells and trajectory
- presence of stained material, such as starch
- colour/staining and morphology
- motility

Workplace safety procedures

Workplace safety procedures include, but are not limited to, one or more of:

- ergonomic layout, correct illumination and organisation of workbench
- use of biohazard containers and laminar flow cabinet
- correctly labelling reagents and hazardous materials
- use of PPE, such as safety glasses, gloves and coveralls
- handling and storing hazardous materials and equipment in

- accordance with labels, MSDS and manufacturer instructions
- regularly cleaning and decontaminating equipment and work areas

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Assessment Requirements for MSL973007 Perform microscopic examination

Modification History

Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely performing microscopic examination of at least three (3) different samples and correctly identifying and reporting the characteristics of each
- checking suitability of samples, such as labelling, spillage, spoilage due to incorrect storage and transport conditions, temperature control and suitability for the examination
- safely preparing routine biological and/or physical samples in accordance with workplace procedures or standard methods
- checking the quality of prepared samples, such as:
 - clean and scratch-free microscope slides to reduce artefacts
 - preparation according to specified procedure/method
 - homogeneous suspension of sample
 - films and smears that have been fixed rapidly
 - thin films with a monolayer of cells
 - appropriate whole mounts for intact organisms
 - correct sample identification during and after processing
- performing pre-use checks of equipment, such as calibration, routine cleaning and maintenance, and use by dates of reagents
- setting up a light microscope for optimal resolution
- accurately observing, identifying and reporting sample characteristics
- performing counts on samples and basic measurements using grids
- performing accurate calculations as required by the method, such as:
 - dilutions
 - percentage viability
 - number of cells in original sample after dilution
 - calculation of cells/ml in a number of squares of a counting chamber
- interpreting and recording test results reliably
- logging and tracking samples through all steps from sample receipt to completion of the examination and reporting
- minimising cross-contamination and contamination of the laboratory and environment
- using personal protective equipment (PPE) and safety procedures to maintain personal safety and that of others

- handling/storing samples and equipment and collecting/disposing of waste in accordance with workplace procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- nature of samples, sample preparation methods, methods of examination and associated hazards
- parts and functions of a light microscope and steps taken to optimise the resolution of images
- importance and appropriate use of controls and certified reference materials
- workplace and/or legal traceability requirements
- relevant work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL922001 Record and present data
 - MSL933002 Contribute to the achievement of quality objectives
 - MSL943002 Participate in laboratory or field workplace safety
 - MSL953001 Receive and prepare samples for testing
- Holistic assessment methods include:
 - review of data records prepared by the candidate, such as counts, observations and results
 - feedback from supervisors and peers about adherence to workplace procedures and sample preparation/examination methods
 - observation of the candidate performing microscopic examinations
 - oral/written questions about workplace procedures covering safe preparation and examination of samples.

- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory equipped with appropriate equipment, including light microscopes and samples
 - workplace procedures, standard methods and materials
 - equipment, such as glass slides, counting chambers (e.g. haemocytometer), optical graticules and stage micrometers, and tissue culture flasks
 - a light microscope, such as:
 - bright field illumination microscope up to 1000 x magnification
 - stereomicroscopes and dissection microscopes
 - compound microscope
 - phase contrast microscope
 - inverted microscope.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL974004 Perform food tests

Modification History

Release 1. Supersedes and is equivalent to MSL974004A Perform food tests

Application

This unit of competency covers the ability to interpret food test requirements, prepare samples, conduct pre-use and calibration checks on equipment, and perform routine testing of raw food materials, in-process materials and final products. These tests will involve several measurement steps. The unit includes data processing and some interpretation of results and tracking of obvious test malfunctions where the procedure is standardised. However, personnel are not required to analyse data, optimise tests/procedures for specific samples or troubleshoot equipment problems where the solution is not apparent.

This unit of competency is applicable to laboratory or technical assistants and instrument operators working in the food and beverage processing industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|----------|---|-----|--|
| 1 | Interpret and schedule test requirements | 1.1 | Review test request to identify samples to be tested, test method and equipment/instruments involved |
| | | 1.2 | Identify hazards and workplace controls associated with |

- the sample, preparation/test methods, reagents and/or equipment
- 1.3 Plan parallel work sequences to optimise throughput of multiple sets of samples
- 2 **Receive and prepare food samples**
- 2.1 Log samples using standard operating procedures (SOPs)
- 2.2 Record sample description, compare with specification and note and report discrepancies
- 2.3 Prepare samples and standards in accordance with food testing requirements
- 2.4 Ensure traceability of samples from receipt to reporting of results
- 3 **Check equipment before use**
- 3.1 Set up equipment/instruments in accordance with test method requirements
- 3.2 Perform pre-use and safety checks in accordance with relevant workplace and operating procedures
- 3.3 Identify faulty or unsafe components and equipment and report to appropriate personnel
- 3.4 Check equipment calibration using specified standards and procedures
- 3.5 Quarantine out-of-calibration equipment/instruments
- 3.6 Ensure reagents required for the test are available and meet quality requirements
- 4 **Test samples to determine food components and characteristics**
- 4.1 Operate equipment/instruments in accordance with test method requirements
- 4.2 Perform tests/procedures on all samples and standards in accordance with specified methods
- 4.3 Shut down equipment/instruments in accordance with operating procedures

- | | | |
|---|---|--|
| 5 | Process data | 5.1 Record test data noting atypical observations |
| | | 5.2 Construct calibration graphs and compute results for all samples from these graphs |
| | | 5.3 Ensure calculated values are consistent with reference standards and expectations |
| | | 5.4 Estimate and document uncertainty of measurement in accordance with workplace procedures |
| | | 5.5 Record and report results in accordance with workplace procedures |
| | | 5.6 Interpret trends in data and/or results and report out-of-specification or atypical results promptly to appropriate personnel |
| | | 5.7 Determine if basic procedure or equipment problems have led to atypical data or results |
| | | |
| 6 | Maintain a safe work environment | 6.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel |
| | | 6.2 Minimise the generation of wastes and environmental impacts |
| | | 6.3 Ensure the safe collection of laboratory and hazardous waste for subsequent disposal |
| | | 6.4 Care for and store equipment and reagents as required |
| | | |
| 7 | Maintain laboratory records | 7.1 Enter approved data into laboratory information management system (LIMS) |
| | | 7.2 Maintain confidentiality and security of workplace information and laboratory data |
| | | 7.3 Maintain equipment and calibration logs in accordance with workplace procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- national work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- standard methods for determining food components and characteristics
- specific codes, guidelines procedures and methods, such as:
 - Australia New Zealand Food Standards (ANZFS) Code
 - Royal Australian Chemical Institute (RACI) or American Association of Cereal Chemists (AACI) methods for colour, moisture, total ash, fats and proteins, nitrogen, fibre, microorganisms and viscosity
 - Australian code of good manufacturing practice for medicinal products (GMP), and principles of good laboratory practice (GLP)
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations and Import Guidelines
- gene technology regulation

Sample preparation processes

Sample preparation processes include one or more of:

- grinding and milling
- preparation of discs
- digestion, dissolving, extracting, refluxing and degassing
- washing, drying, ashing and temperature equilibration
- precipitation and centrifugation, filtration, flocculation and evaporation
- culturing of selected microorganisms

Food tests and procedures

Food tests and procedures include one or more of:

- sensory tests, such as appearance, taste, texture, colour and odour of foods, and browning (sugar content)
- visual tests, such as detection of sediments and scorched particles, foreign matter, damage to packaging and compatibility of packaging
- physical/mechanical tests, such as:
 - melting point, boiling point and freezing point
 - mass, volume, density, specific gravity and particle size, and homogenisation
 - rheology, viscosity and gel strength
 - dispersability, 'wettability' and 'whipability'
 - elasticity, hardness, compressibility and strength
 - starch quality
- chemical analysis, such as:
 - pH, conductivity and moisture content
 - solids, fats, proteins and carbohydrates
 - ash analysis and salt analysis
 - titratable acids, iodine values and peroxide values
 - enzyme activity
 - specific ions and active ingredients
- microbiological tests and procedures, such as:
 - isolation, detection, classification to genera and some species or microorganisms
 - enumeration and nomenclature of desirable/non-desirable microorganisms
 - propagation and maintenance of yeast, bacteria and cultures used in food processing
 - measurement of spoilage and contamination
 - sterility, hygiene and sanitation checks
- optical/spectrometric tests, such as ultraviolet-visible (UV-VIS),

- refractive index and optical rotation
- thermal tests, such as calorific values, stability of products and effectiveness of heat treatments

Tests

Tests include one or more methods for:

- control of starting materials, in-process materials and finished products
- health monitoring
- basic troubleshooting of production processes

Safe work practices

Safe work practices include:

- ensuring access to service shut-off points
- recognising and observing hazard warnings and safety signs
- labelling of samples and hazardous materials
- handling and storage for hazardous materials and equipment in accordance with labelling, MSDS and manufacturer instructions
- identifying and reporting operating problems or equipment malfunctions
- cleaning equipment and work areas regularly using workplace procedures
- using PPE, such as hard hats, hearing protection, gloves, safety glasses, coveralls and safety boots
- following established manual handling procedures
- reporting abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/wastewater, gases, smoke, vapour, fumes, odour and particulates, to appropriate personnel

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL974004A Perform food tests

Assessment Requirements for MSL974004 Perform food tests

Modification History

Release 1. Supersedes and is equivalent to MSL974004A Perform food tests

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- performing at least five (5) routine food tests or procedures involving several measurement steps
- interpreting food testing methods and procedures accurately
- preparing samples using at least three (3) different processes
- maintaining and evaluating reagents
- conducting pre-use and calibration checks on equipment, and quarantining out-of-calibration equipment and instruments
- safely operating test equipment and instruments to workplace standards and manufacturer specification
- processing data, interpreting gross features of data/results and making relevant conclusions
- preparing calibration graphs and calculating results using appropriate equations, units, uncertainties and precision
- identifying atypical results as either out-of-normal range or an artefact
- tracing and sourcing obvious causes of an artefact, tracking obvious test malfunctions for standardised procedures, and troubleshooting basic equipment and methods
- communicating problems to a supervisor or outside service technician
- recording and communicating results in accordance with workplace procedures
- maintaining security, integrity and traceability of samples, sub-samples, test data, results and documentation
- following workplace safety procedures

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- principles and concepts underpinning the food tests or procedures performed, such as:
 - ions, atoms, molecules, bonding, affinities and related properties
 - chemical reactions (acid/base and complexometric)
 - structure and properties of proteins, lipids, carbohydrates, vitamins and minerals
 - food additives, flavourings and essences
 - nutrient value of major food groups
 - interaction of water with food components

- microbiology, including incubation characteristics, selective media, growth stages of bacterial cultures and reference organisms
- microbiology of organisms with public health significance
- chemical and microbial changes in food
- food preservation techniques
- fermentation process
- packaging and controlled atmosphere
- elastic properties of materials and hardness
- cohesive/adhesive forces, fluid flow and viscosity
- changes of state, energy content and enthalpy change
- electromagnetic spectrum and absorption, emission and refraction of light
- quality control program for raw materials, process control and finished product inspection
- genetically modified foods
- purpose of the food tests or procedures conducted
- concepts of metrology, principles and concepts related to equipment and instrument operation and tests or procedures
- function of key components of the equipment/instrument used
- effects on the test of modifying equipment/instrument variables
- workplace and/or legal traceability requirements
- relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgment of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL924001 Process and interpret data
- Holistic assessment methods include:

- review of test data/results obtained by the candidate over a period of time to check accuracy, consistency and timeliness of results
- review of test records and workplace documentation completed by the candidate
- feedback from peers and supervisors
- observation of candidate conducting a range sample preparations and food tests and procedures
- oral or written questioning of food technology concepts and principles, food tests and procedures and workplace procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory equipped with test equipment, instruments, standards and materials
 - workplace procedures and standard methods
 - records, including:
 - test and calibration results
 - equipment use, maintenance and servicing history.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL974006 Perform biological procedures

Modification History

Release 1. Supersedes and is equivalent to MSL974006A Perform biological procedures

Application

This unit of competency covers the ability to interpret work requirements, prepare samples, conduct pre-use and calibration checks on equipment, and perform routine biological procedures. These procedures may involve several steps and are used to classify cell types, species and biologically active compounds by analysing their biological and chemical characteristics. This unit includes data processing, interpretation of results and troubleshooting obvious departures from standard procedures.

This unit of competency is applicable to technical assistants working in the biomedical, environmental, biotechnology and education industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Interpret and schedule work requirements	1.1	Review work request to identify samples, required procedures and materials/equipment/instruments involved
		1.2	Identify hazards and workplace control measures

- associated with the sample, preparation methods, reagents and/or equipment
- 1.3 Plan parallel work sequences to optimise throughput of multiple sets of samples
- 2 **Receive and prepare biological samples**
- 2.1 Log samples using standard operating procedures (SOPs)
- 2.2 Record sample description, compare with specification and note and report discrepancies
- 2.3 Prepare samples in accordance with testing requirements
- 2.4 Ensure traceability of sample from receipt to reporting of results
- 3 **Perform techniques that assist in the classification of a cell or species**
- 3.1 Select suitable techniques in accordance with workplace requirements and methods
- 3.2 Set up and use equipment and reagents in accordance with the method
- 3.3 Perform techniques in accordance with the method
- 4 **Perform techniques that analyse biological activity**
- 4.1 Select suitable techniques in accordance with workplace requirements and methods
- 4.2 Set up and use equipment and reagents in accordance with the method
- 4.3 Perform techniques in accordance with the method
- 5 **Process and interpret data**
- 5.1 Record test data noting atypical observations
- 5.2 Construct calibration graphs and compute results for all samples from these graphs
- 5.3 Ensure calculated values are consistent with expectations
- 5.4 Record and report results in accordance with workplace procedures

- | | | | |
|---|---|-----|--|
| | | 5.5 | Estimate and document uncertainty of measurement in accordance with workplace procedures |
| | | 5.6 | Interpret trends in data and/or results and report out-of-specification or atypical results promptly to appropriate personnel |
| | | 5.7 | Determine if obvious procedure or equipment problems have led to atypical data or results |
| 6 | Maintain a safe work environment | 6.1 | Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel |
| | | 6.2 | Minimise the generation of waste |
| | | 6.3 | Ensure the safe disposal of biohazardous wastes |
| | | 6.4 | Clean, care for and store equipment and reagents as required |
| 7 | Maintain laboratory records | 7.1 | Record approved data into workplace system |
| | | 7.2 | Maintain confidentiality and security of workplace information and laboratory data |
| | | 7.3 | Maintain equipment and calibration logs in accordance with workplace procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory safety; quality management; volumetric glassware; chemical analysis using techniques, such as ultraviolet-visible (UV-VIS) spectrophotometry or atomic absorption spectrometry
- national work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- specific codes, guidelines, procedures and methods, such as the Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), Royal Australian Chemical Institute (RACI) and/or American Association of Cereal Chemists (AACC) methods for inorganic constituents
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures

Techniques for preparation of samples

Techniques for preparation of samples include, but are not limited to, one or more of:

- dissection, such as preparation of thymus extracts from mice
- extraction (e.g. solvent extraction)
- filtration (e.g. filter water samples and plate the sediment onto agar plates for incubation and growth of *E. coli*)
- separation (e.g. dialysis)
- precipitation and flocculation
- centrifugation (excluding ultra centrifugation)
- chromatography, such as:
 - gel filtration chromatography (e.g. crude purification of proteins)
 - affinity chromatography (e.g. purification of immunoglobulins)
- electrophoresis, such as:
 - polyacrylamide gel electrophoresis for separation of DNA segments
 - agarose gel electrophoresis
 - capillary electrophoresis
 - gradient gel electrophoresis

Techniques to classify cells or species

Techniques to classify cells or species include, but are not limited to, one or more of:

- classification of species according to taxa
- classification of cells according to microscopic or staining characteristics
- characteristics of bacterial colonies:
 - growth on differential media
 - colony morphology (size and shape)
- biochemical reactions, such as miniaturised test strips, redox reactions and sugar tests

Techniques to analyse chemical and biological characteristics

Techniques to analyse chemical and biological characteristics include, but are not limited to, one or more of:

- staining, such as:
 - Gram stain for gram negative and positive bacteria
 - Romanowsky stain for blood films
 - Haematoxylin and Eosin for tissue sections
 - Oil red O for fatty cellular inclusions
 - spore staining
 - flagella staining
- microscopic examination, such as:
 - light
 - phase contrast
 - bright field
 - dark ground
 - enumeration
- colorimetry and spectrophotometry, such as:
 - UV-VIS
 - fluorimetric
 - infrared
 - flame emission
 - atomic absorption spectrometry
- electrochemistry, such as:
 - pH
 - ion selective electrodes and polarography (e.g. concentration of chloride ions)
- chromatography, such as:
 - column and thin layer analytical and preparative chromatography
 - gas and liquid chromatography for purity, raw material and formulation checks

- Safe work practices** Safe work practices include, but are not limited to, one or more of:
- ensuring access to service shut-off points
 - recognising and observing hazard warnings and safety signs
 - labelling of samples, reagents, aliquoted samples and hazardous materials
 - handling and storage of hazardous materials and equipment in accordance with labelling, MSDS and manufacturer instructions
 - identifying and reporting operating problems or equipment malfunctions
 - cleaning and decontaminating equipment and work areas regularly using workplace procedures
 - using PPE, such as gloves, safety glasses, coveralls and gowns
 - using containment facilities (e.g. PCII, PCIII and PCIV physical containment laboratories), containment equipment (e.g. biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets) and containment procedures
 - following established manual handling procedures
 - reporting abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates, to appropriate personnel

WHS and environmental management requirements

- WHS and environmental management requirements include:
- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
 - applying standard precautions relating to the potentially hazardous nature of samples
 - accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Assessment Requirements for MSL974006 Perform biological procedures

Modification History

Release 1. Supersedes and is equivalent to MSL974006A Perform biological procedures

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely performing at least five (5) routine biological techniques that involve several steps to classify cell types, species and biologically active compounds by analysing their biological and chemical characteristics
- accurately interpreting work requirements and following test procedures and safe work practices
- safely preparing samples and using separation techniques
- conducting pre-use and calibration checks on equipment
- safely operating test equipment and instruments for qualitative and quantitative analysis in accordance with workplace procedures and manufacturer specifications
- maintaining and evaluating reagents
- processing data, estimating uncertainties, preparing calibration graphs and calculating results in appropriate units and precision
- applying basic theoretical knowledge to interpret gross features of data and making relevant conclusions
- troubleshooting obvious departures from standard procedures
- identifying atypical results as out-of-normal range or an artefact using reference material or quality control sera
- tracing and sourcing obvious causes of an artefact
- communicating problems to a supervisor or outside service technician
- recording and communicating results according to workplace procedures
- maintaining security, integrity, traceability and identity of samples, sub-samples and documentation
- safely collecting, storing and disposing of biohazardous wastes.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- biological principles and concepts underpinning tests and procedures associated with job role, such as:
 - chemical and biochemical characteristics of lipids, carbohydrates, nucleic acids and proteins influencing structure, function and reactivity both in vitro and in vivo

- molecular interactions within the compounds of nucleic acids and nucleotides, proteins and amino acids, carbohydrates, lipids and vitamins, influencing structure, activity, chemical reactivity and physical properties, including solubility, energy levels and emission/absorption spectra
- chemical significance of biologically significant ions, such as calcium, zinc, iron, magnesium, sodium, potassium, chloride and phosphate
- basic structure and function of organelles, cells, plant and animal tissue and organs relevant to the testing requirements
- interrelationships of biological systems (carbon cycle, energy cycle, eutrophication and the web of life)
- classification and taxonomy of organisms, such as bacteria, viruses, yeasts, single cell, multi-cellular, plants, animals, prions, helminths, prokaryotes and eukaryotes
- phases of the cell cycle
- Mendelian genetics, such as inheritance, meiosis, karyotypes, dominant and recessive traits, genotypes and phenotypes, and pedigrees
- significance of the genetic code and transcription and translation
- cell membrane activity, including diffusion (passive, facilitated and active), osmosis, tonicity and plasmolysis
- staining reactions involving acid/base, redox, complex ion formation, solubility and equilibrium
- operating principles and function of key components of the equipment and instruments used as part of job role
- effects of modifying equipment and instrument variables
- basic equipment and method troubleshooting procedures
- calculation steps to give results in appropriate units and precision
- sources of uncertainty in measurement and methods for control
- importance and appropriate use of controls and certified reference materials
- workplace and legal requirements for traceability
- relevant hazards and risks in biological laboratories, work health and safety (WHS) and environmental requirements.

Assessment Conditions

- Judgment of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL924001 Process and interpret data
 - MSL974003 Perform chemical tests and procedures
- Holistic assessment methods include:
 - review of results obtained by the candidate over a period of time to ensure accuracy, consistency and timeliness
 - review of testing records and workplace documentation completed by the candidate
 - feedback from peers and supervisors about the candidate's ability to perform biological procedures safely and reliably
 - observation of candidate conducting a range of biological procedures
 - oral or written questioning of biological concepts and principles, techniques and methods and workplace procedures relevant to candidate's job role.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory equipped with appropriate test equipment and instruments, safety equipment, reagents and materials
 - standard operating procedures (SOPs) and testing methods
 - records, including:
 - test calibration results
 - equipment use, maintenance and servicing history
 - faulty or unsafe equipment
 - batch number, catalogue number and use-by-date for analytical kits.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL975001 Perform microbiological tests

Modification History

Release 1. Supersedes and is equivalent to MSL975001A Perform microbiological tests

Application

This unit of competency covers the ability to contribute to the culture, isolation and identification of microorganisms, such as bacteria, fungi, viruses, protozoans, algae and parasites, in order to investigate the physiology and pathology of plants and animals, monitor the natural environment, and to assist in the production of foods, pharmaceutical goods and other manufactured materials.

This unit of competency is applicable to laboratory technicians and technical officers working in the biomedical, biotechnology, environmental, manufacturing and food processing industry sectors. The results of work performed by technical personnel would normally be integrated, interpreted and reported on by scientists, medical, veterinary or plant pathologists or other responsible officers in a workplace. Although a supervisor may not always be present, the technician will follow standard operating procedures (SOPs) that will clearly describe the scope of permitted practice in modifying testing procedures, interpreting of data and for communicating test results to people outside the laboratory.

It is applicable to investigations as well as addressing the broader needs of biotechnology and tissue culture applications.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

MSL973007 Perform microscopic examination

MSL973004 Perform aseptic techniques

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---|-----|---|
| 1 | Receive samples and process associated request forms | 1.1 | Check samples and request form details before they are accepted |
| | | 1.2 | Return samples and request forms that do not comply with requirements to source with reasons for non-acceptance |
| | | 1.3 | Log samples, recording details that allow accurate tracking and chain of custody |
| | | 1.4 | Distribute samples for local testing or dispatch samples to other testing facilities |
| | | 1.5 | Store samples appropriately where testing or transport is to be delayed |
| 2 | Prepare for safe microbiological work and aseptic applications | 2.1 | Select work area and equipment required for the safe handling of materials that may contain microorganisms of specified risk groups |
| | | 2.2 | Wear protective apparel, replacing it when contamination is suspected |
| | | 2.3 | Apply correct disinfection procedures to work areas before and after use |
| | | 2.4 | Locate relevant emergency equipment for timely response to microbiological accidents |
| | | 2.5 | Apply standard precautions when handling biological materials |
| | | 2.6 | Minimise the production and release of aerosols, using biological safety cabinets where necessary |
| | | 2.7 | Clean spills, and report all spills and suspected incidents to supervisor |
| | | 2.8 | Wash hands before and after laboratory work and when contamination is suspected |

- 2.9 Ensure the safe disposal of biohazardous materials and other laboratory wastes in accordance with workplace procedures
- 3 **Process samples for direct examination**
- 3.1 Prepare thin smears of samples for subsequent staining to enable microscopic identification of cells
- 3.2 Prepare liquid films of specimens for direct observation for motility or cell structure
- 3.3 Prepare samples to concentrate material for subsequent staining or microscopy
- 4 **Prepare pure cultures for microbiological work and aseptic applications**
- 4.1 Select culture media to maximise growth of microorganisms and cells
- 4.2 Inoculate media aseptically, applying techniques suitable for purpose of culture
- 4.3 Incubate inoculated media in conditions to optimise growth of organisms and cells
- 4.4 Subculture on suitable media to optimise production of pure cultures
- 5 **Perform procedures that can assist in the identification of microorganisms**
- 5.1 Select staining techniques to demonstrate required cellular characteristics
- 5.2 Stain prepared films to demonstrate diagnostically useful characteristics
- 5.3 Inoculate and incubate media with pure cultures to assist in the biochemical and immunological identification of microorganisms
- 5.4 Perform tests on pure cultures to assist in the biochemical and immunological identification of microorganisms
- 5.5 Perform antibiotic sensitivity testing, if required
- 6 **Estimate the**
- 6.1 Count cells in undiluted samples to indicate the dilution

number and/or size of micro-organisms in samples	6.2	necessary to reliably count organisms in culture Prepare serial dilutions of samples aseptically for culture and colony counting
	6.3	Count colonies for calculating number of viable organisms per unit volume
	6.4	Count microorganisms in samples and cultures using spectrometric and electronic methodologies, where relevant
	6.5	Estimate and document uncertainty of measurement in accordance with workplace procedures, where relevant
7 Maintain records of laboratory work	7.1	Make entries on report forms or into computer systems, accurately calculating, recording or transcribing data as required
	7.2	Maintain instrument logs as required by accreditation checklists
	7.3	Maintain security and confidentiality of all clinical information, laboratory data and records

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards, guidelines and codes covering laboratory safety; competence of testing and

calibration laboratories; occupational protective equipment; labelling of workplace substances; storage, handling and transport of dangerous goods; environmental management; physical containment levels and facility types; and safety cabinets

- national work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- specific codes, guidelines and methods covering microbiological procedures, and small scale genetic manipulation work in accordance with gene technology regulations
- workplace documents, such as SOPs; quality procedures; equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; laboratory schedules; workplace recording and reporting procedures; waste minimisation, containment and safe disposal procedures; cleaning, hygiene and personal hygiene requirements
- instructions to comply with new legislation, standards, guidelines and codes
- sampling procedures (labelling, preparation, storage, transport and disposal)
- test procedures (validated and authorised)
- schematics, work flows and laboratory layouts

Communication

Communication includes interactions with one or more of:

- supervisors and managers (laboratory, quality and customer service)
- personnel in other laboratories in the workplace or in other workplaces to which work may be referred
- customers, patients and clients
- external auditors and accreditation agencies (e.g. National Association of Testing Authorities (NATA))

Safe work practices

Safe work practices include, but are not limited to, one or more of:

- ensuring access to service shut-off points
- recognising and observing hazard warnings and safety signs
- labelling of samples, reagents, aliquoted samples and hazardous materials
- handling and storage of hazardous materials and equipment in accordance with labelling, MSDS and manufacturer instructions
- identifying and reporting operating problems or equipment malfunctions

- cleaning and decontaminating equipment and work areas regularly using workplace procedures
- using personal protective equipment (PPE), such as gloves, safety glasses, coveralls and gowns
- using containment facilities (e.g. PCII, PCIII and PCIV physical containment laboratories), containment equipment (e.g. biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets) and containment procedures

WHS and environmental management requirements

WHS and environmental management requirements include:

- applying standard precautions relating to the potential infectivity of samples and materials presented for laboratory processing
- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL975001A Perform microbiological tests

Assessment Requirements for MSL975001 Perform microbiological tests

Modification History

Release 1. Supersedes and is equivalent to MSL975001A Perform microbiological tests

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely performing at least five (5) microbiological tests/procedures for the culturing, isolating, identifying and counting microorganisms
- consistently and accurately describing different bacterial colony forms on common media
- preparing and staining thin smears and preparing liquid films
- estimating the number and size of microorganisms in samples
- selecting, inoculating and incubating culture media
- performing biochemical and immunological identification tests on pure cultures to assist in the of microorganisms
- not contaminating self, other people, the work area, equipment or the samples or materials under test
- not contaminating media or reagents during manipulations involving the transfer of cultures
- identifying artefacts or image aberrations attributable to misalignment or obstruction of light paths or condensers used in microscopy, or with other steps in microscopic examinations
- consistently and accurately performing Gram staining of bacteria
- accurately and concisely preparing data and documentation that is in accordance with workplace requirements
- reporting all incidents or accidents
- disinfecting any spillages and safely disposing of all contaminated materials
- decontaminating the work area upon completion of work.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- microbiological terminology, including bacteriology, parasitology, virology and mycology
- disinfection and sterilisation as applied to practical aspects of microbiology
- microbial diversity
- microorganisms of importance in medicine, in production of foods and other manufactured goods, and in assessment of the natural environment

- cell biology and chemistry related to laboratory phenomena, such as growth and isolation of organisms for identification
- microbial genetics
- rationale for sample dilution when preparing materials for enumerating organisms and other pure culture work (e.g. Most Probable Number (MPN) technique)
- need for accurate identification of sample source (e.g. body, specimen, process line and field location)
- relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgment of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL934002 Apply quality system and continuous improvement processes
- Holistic assessment methods include:
 - review of results/data/records generated by the candidate
 - feedback from peers and supervisors to confirm that the candidate consistently follows workplace procedures and generates results that meet workplace requirements
 - oral and/or written questions associated with laboratory determinations and record keeping
 - integrated assessment with a case study focus, such as the isolation and identification of bacterial species in a specimen containing two or more species by relating sample, cultural, morphological and biochemical data from other relevant tests and procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard microbiology laboratory with relevant samples; reagents; protective and physical containment equipment; sample preparation and storage equipment; test equipment, such as microscopes and counters; and sterilising equipment, such as autoclaves
 - workplace procedures, test methods and equipment manuals.

- Under duty of care requirements, off-the-job training providers will only use samples and organisms of a risk category compatible with their laboratory as defined in *AS/NZS 2243.3 Set:2006 Safety in laboratories*.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSMENV172 Identify and minimise environmental hazards

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP172A Identify and minimise environmental hazards

Application

This unit of competency covers the skills and knowledge required to identify activities and/or materials that present an environmental threat and to take the appropriate action according to procedures.

This unit of competency applies to all personnel who are required to work within environmental regulatory requirements which are reflected in the organisation's policies and procedures.

It applies to an individual working alone or as part of a team or group and working in liaison with other team members and supervisors.

This unit of competency applies to all plants and areas of operation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- | | | | |
|---|--|-----|--|
| 1 | Identify environmental threats | 1.1 | Recognise the type and severity of environmental threat posed by the materials and processes used for own work |
| | | 1.2 | Identify ways materials used may enter the environment |
| | | 1.3 | Identify sensitive features of the local environment and their impact on work practice and procedures |
| | | 1.4 | Recognise abnormal or unacceptable emission levels |
| 2 | Identify workplace procedures and policies to minimise environmental threats | 2.1 | Identify workplace policy for environmental protection |
| | | 2.2 | Identify environmental protection measures within standard operating procedures (SOPs) relevant to work |
| | | 2.3 | State contact procedures for personnel involved in environmental response teams |
| 3 | Follow procedures to minimise environmental threats | 3.1 | Implement environmental protection measures in relevant procedures |
| | | 3.2 | Report abnormal emissions/environmental issues to appropriate personnel |
| | | 3.3 | Apply containment procedures in accordance with SOPs, where appropriate |
| | | 3.4 | Implement waste management procedures and practices |
| | | 3.5 | Follow safety procedures and use personal protective equipment (PPE) |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- SOPs
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Tools and equipment Tools and equipment include:

- personal protective equipment (PPE)
- spill kits

Emissions Abnormal or unacceptable emission levels include one or more of the following:

- excessive noise
- light
- odours
- gases/vapours
- visible smoke/vapour
- liquid and solids

- particulates
- fumes

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP172A Identify and minimise environmental hazards

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMENV172 Identify and minimise environmental hazards

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP172A Identify and minimise environmental hazards

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- recognise and report environmental threats
- communicate using in-plant reporting systems (verbal, electronic or written)
- select and use containment equipment
- select and use personal protective equipment (PPE).

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
 - environmental protection and reporting requirements
 - safety, emergency and hazard controls
- type and severity of environmental threats, including contribution to climate change and other macro threats that can arise from materials and work processes used
- environmental protection measures required to minimise threats
- types of emissions relevant to job role and permissible levels.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems

- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Application

This unit of competency covers the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices, and to implement improvements and monitor their effectiveness.

This unit of competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes identifying areas for improvement, developing plans to make improvements, and implementing and monitoring improvements in environmental performance.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Investigate current practices in relation to resource usage	1.1	Identify environmental regulations applying to the enterprise
		1.2	Assess procedures for assessing compliance with environmental regulations
		1.3	Collect information on environmental and resource efficiency systems and procedures and provide to the work group, as required
		1.4	Measure and record current resource usage by members of the work group
		1.5	Analyse and record current purchasing strategies
		1.6	Analyse current work processes to access information and data, and assist in identifying areas for improvement
2	Set targets for improvements	2.1	Seek input from stakeholders, key personnel and specialists
		2.2	Access external sources of information and data as required
		2.3	Evaluate alternative solutions to workplace environmental issues
		2.4	Set efficiency targets
3	Implement performance	3.1	Source and use techniques/tools to assist in achieving targets

- | | |
|-------------------------------|---|
| improvement strategies | <ul style="list-style-type: none"> 3.2 Apply continuous improvement strategies to own work area of responsibility, and communicate ideas and possible solutions to the work group and management 3.3 Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them 3.4 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate 3.5 Implement costing strategies to fully value environmental assets |
| 4 Monitor performance | <ul style="list-style-type: none"> 4.1 Document outcomes and communicate reports on targets to key personnel and stakeholders 4.2 Evaluate strategies and environmental performance, including breaches or potential breaches of regulations and occurrences outside of standard procedure which may lead to lower environmental performance 4.3 Set new targets and investigate and apply new tools and strategies 4.4 Promote successful strategies and reward participants where possible |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- investigate/analyse resource usage
- evaluate improvement alternatives and set targets
- implement improvements within the limit of own authority
- monitor the performance of improvements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant environmental and resource efficiency issues, specific to industry practices, including:
 - contribution to climate change and other macro threats that can arise from materials and work processes used
 - regulated environmental issues
 - issues relevant to licencing conditions
- best practice environmental approaches relevant to own area of responsibility
- methods for measuring and calculating resource usage.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - will typically include the use of appropriate tools, equipment and documents

- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP300 Identify and apply process improvements

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP300A Identify and implement opportunities to maximise production efficiencies

Application

This unit of competency covers the skills and knowledge required to identify, monitor and participate in strategies to improve production efficiencies.

It applies to experienced personnel, such as experienced operators, team leaders or supervisors, who are required to provide input into process improvement initiatives for a team or work area.

This unit of competency applies to all work environments and sectors within the industry. It applies to a wide range of processes and equipment. In large plants with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

No licensing, legislative or certification requirements apply to this unit at the time of

Pre-requisite Unit

| that affect process efficiency | 1.2 | Determine potential/actual sources of wastage |
| | 1.3 | Identify or develop appropriate performance measurement indicators |
| | 1.4 | Identify hazards and required controls associated with the process |
| 2 Monitor and measure process efficiency | 2.1 | Monitor performance of process/equipment/raw material usage |
| | 2.2 | Identify variations and divergence from trends |
| | 2.3 | Identify factors inhibiting process efficiency |
| 3 Participate in developing methods for improving process efficiencies | 3.1 | Analyse problems/areas for improvement in process efficiencies |
| | 3.2 | Utilise appropriate problem-solving tools and techniques for identifying areas for improvement |
| | 3.3 | Identify and take into account external factors |
| | 3.4 | Identify required changes to process, standards and procedures |
| | 3.5 | Recommend strategies for improvement to relevant personnel |
| 4 Participate in implementing process improvement strategies | 4.1 | Implement developed strategies to improve process efficiency. |
| | 4.2 | Monitor performance of changes |
| | 4.3 | Evaluate results of changes |
| | 4.4 | Report results to relevant personnel |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Sources of information

Sources of information include one or more of the following:

- yearly, monthly, weekly and daily production targets
- business objectives and goals

- control charts, run charts and graphs
- enterprise manuals and procedures
- equipment specifications

Identifying process inefficiencies

Identifying process inefficiencies requires consideration of one or more of the following:

- equipment downtime
- spillages
- leaks
- contamination
- raw material quality
- utilities usage
- production quality, rejects and re-work
- wasted materials and other resources
- productivity issues
- incorrect work allocation/priorities/planning
- incorrect processes/procedures

Problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and known solutions are drawn from one or more of:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Non-routine problems are unexpected problems, or variations of previous problems and include one or more of the following:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP300A Identify and implement opportunities to maximise production efficiencies

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMSUP300 Identify and apply process improvements

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP300A Identify and implement opportunities to maximise production efficiencies

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- read and interpret information from a range of sources to identify production inefficiencies and strategies to minimise them
- complete workplace forms and production reports
- use problem-solving tools to identify strategies for improvements
- apply operational knowledge to non-routine problems
- communicate effectively with relevant personnel at all levels to:
 - identify and recommend improvement strategies
 - implement the strategies
 - evaluate and report the results of implementation.
-

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- duty of care
- organisation procedures
- information systems and data collation
- measures of process efficiency
- hazards that may arise in the job/work environment, including:
 - their possible causes
 - potential consequences
 - appropriate risk controls
- relevant equipment and operational processes.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:

- a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
- multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace. Where this is not possible or practical assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP303 Identify equipment faults

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP303A Identify equipment faults

Application

This unit of competency covers the skills and knowledge required to plan and carry out checks to identify and deal with equipment faults and to determine solutions.

This unit of competency applies to experienced personnel, such as experienced operators, team leaders or supervisors, who are required to apply knowledge of materials, product purpose and processes to identify and deal with routine and non-routine faults in equipment, propose solutions, carry out solutions within scope of authority and competence and complete logs and reports.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade-level skills. It is not intended that this competency would cover maintenance that is carried out in a workshop.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify scope of operational check	<p>1.1 Identify and classify equipment components and operating systems</p> <p>1.2 Match appropriate checks and procedures to the equipment operating systems</p> <p>1.3 Identify special checking procedures and parameters in manufacturer specifications and procedures</p> <p>1.4 Identify sources of information and data relevant to key variables</p> <p>1.5 Identify and control hazards</p> <p>1.6 Observe and undertake checks on the physical condition of equipment in accordance with procedures</p> <p>1.7 Record preliminary observations</p> <p>1.8 Discuss checking procedures with appropriate personnel and obtain necessary permission where required</p>
2	Plan operational checks	<p>2.1 Check specifications and notes from preliminary observations and identify areas to be clarified</p> <p>2.2 Plan sequence for checks, noting areas where results and observations should be recorded</p> <p>2.3 Ensure area is safe for operational check</p> <p>2.4 Make arrangements for any additional resources, including other employees</p>
3	Check unit through full	<p>3.1 Undertake operational checks observing relevant safety and operational requirements</p>

	operational range	3.2	Confirm results and findings
		3.3	Identify faults to be dealt with
4	Identify faults and formulate recommendations	4.1	Identify impact of faults on work schedule
		4.2	Record proposals for equipment repair based on faults found, cost/time implications and workplace approval systems
		4.3	Explain proposals to relevant workplace personnel, including any options and recommendations
		4.4	Take appropriate action to return equipment to full operation in accordance with procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- plant description manuals
- manufacturer instructions and specifications
- service manuals
- machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits
- any similar instructions provided for the smooth running of the plant

Tools and equipment

Tools and equipment include one or more of the following:

- hand tools specific for the task
- product testing equipment (e.g. flowmeter, scales, tape measure, micrometer, calliper and ultrasonic thickness)
- equipment checking equipment (e.g. vibration meter, tachometer, current tester, thermal imaging and temperature gauge)

Hazards

Hazards include one or more of the following:

- rotating and moving machinery
- process materials, solids, fluids and gases under pressure or flowing
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out-of-specification operation
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures

- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Faults

Faults may arise from routine and non-routine causes and must be resolved by applying operational knowledge to apply existing, or develop new solutions, either individually or in collaboration with relevant experts to:

- determine faults needing action
- determine possible fault causes
- develop solutions to faults which do not have a known solution
- follow through items initiated until final resolution has occurred
- report faults outside area of responsibility/expertise to designated person

Non-routine faults are unexpected faults, or variations of previous faults and are associated with one or more of the following:

- out-of-specification product or variations
- response of equipment to materials variations
- new or changed materials
- changed equipment settings (e.g. higher speed or throughput)
- equipment breakdown or in need of maintenance

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information such as journals, engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

Variables Key variables to be monitored include one or more of the following:

- equipment performance (e.g. speed, output and variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired)

Sources of information and data Sources of information and data include one or more of the following:

- plant data
- log sheets
- operational and performance reports
- physical aspects, such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP303A Identify equipment faults

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSMSUP303 Identify equipment faults

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP303A Identify equipment faults

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- check and identify a fault within an item of equipment/plant
- ensure workplace is safe for checking and maintenance of equipment
- communicate effectively with personnel and all levels
- evaluate the impact of fault in terms of work schedule, cost/time and approvals needed and make recommendations for repairs
- apply operational knowledge to non-routine problems
- take appropriate action within scope of authority in accordance with procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
 - work permit systems
 - safety, emergency and hazard control
 - standard operating procedures (SOPs)
- hazards that may arise in the job/work environment, including:
- their possible causes
- potential consequences
- appropriate risk controls/ hierarchy of control
- principles of the operation of the equipment to be maintained:
 - operating principles for mechanical, hydraulic, pneumatic and electrical/electronic systems
 - functions and troubleshooting of internal components and their problems
 - routine and non-routine causes of equipment failures and the service conditions which may increase maintenance
- types and application of testing procedures and equipment.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.

- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry-based case studies/scenarios
 - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP330 Develop and adjust a production schedule

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP330A Develop and adjust a production schedule

Application

This unit of competency covers the skills and knowledge required to plan, schedule and prioritise production to meet operational requirements.

This unit of competency applies to experienced operators, team leaders or similar who are required to optimise plant production and costs of production using daily and weekly run plan guidelines/production schedules.

The person will have detailed operational and process knowledge but is not required to demonstrate 'hands on' operation of equipment as part of this competency.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Identify resources to meet production requirements	1.1	Determine demand for product
		1.2	Access and verify information on orders, stocks and delivery
		1.3	Determine plant/production equipment capacity
		1.4	Determine material requirements
		1.5	Determine human resource requirements
		1.6	Identify and control hazards
2	Develop schedules	2.1	Determine production priorities
		2.2	Identify production opportunities ('windows')
		2.3	Develop production schedules in accordance with procedures taking account of health, safety and environment (HSE) requirements
		2.4	Communicate and distribute production schedules to appropriate personnel
3	Monitor production schedules	3.1	Monitor production output against schedule
		3.2	Identify variations between production and schedule
		3.3	Record operational variation and discuss with appropriate personnel
		3.4	Identify possible cause of variation
4	Adjust schedules	4.1	Adjust schedules in response to operational variation

- 4.2 Adjust schedules in response to unexpected events
- 4.3 Distribute adjusted/amended schedules to appropriate personnel
- 4.4 Maintain product output in accordance with production and HSE requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form,

and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Hazards

Hazards include one or more of the following:

- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Assessment Requirements for MSMSUP330 Develop and adjust a production schedule

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP330A Develop and adjust a production schedule

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify production objectives, priorities, targets and resource requirements
- plan, sequence and schedule production taking account of health, safety and environment (HSE) priorities
- monitor and adjust schedules in response to operational variations
- communicate effectively with other personnel.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures
- hazards that may arise in the job/work environment, including:
 - their possible causes
 - potential consequences
 - appropriate risk controls
 - hierarchy of control
- customer and quality requirements
- routine and non-routine causes of production variation
- relevant equipment and operational processes
- types of adjustments that can be made and their likely impact on process/plant efficiencies and production outcomes/targets.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs

MSS024006 Perform sampling and testing of water

Modification History

Release 1. Supersedes and is equivalent to MSS024006A Perform sampling and testing of water

Application

This unit of competency covers the ability to sample natural, polluted and process water for both chemical and microbiological parameters and perform field measurements on them.

This unit of competency is applicable to environmental technicians working in a range of industry sectors, such as environmental services (e.g. sampling and monitoring of water); clean water (e.g. catchments, supply and environmental flows); natural resource management; water treatment, storm and wastewater management; environmental compliance, auditing and inspection; solid and hazardous waste management; site remediation; management of contaminated sites; geotechnical services and civil engineering.

While no specific licensing or certification requirements apply to this unit at the time of publication, environmental monitoring and management activities are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------|-----|---|
| 1 | Confirm | 1.1 | Confirm the sampling location, number and type of |
|---|----------------|-----|---|

- sampling and testing requirements**
- 1.2 Check that all sampling and testing procedures are in accordance with client or workplace requirements, relevant standards and codes.
- 2 **Prepare for water sampling**
- 2.1 Identify site and sampling hazards and review workplace safety procedures.
- 2.2 Liaise with relevant personnel to arrange site access and all necessary clearances and/or permits.
- 2.3 Select sampling equipment and conditions to achieve representative samples and preserve sample integrity during collection, storage and transit.
- 2.4 Ensure all reagents, solutions, standards and blanks (as appropriate) are obtained and/or prepared ready for field use.
- 2.5 Select field test equipment/instruments and check operation and calibration, as required, in accordance with procedures and manufacturer instructions.
- 2.6 Assemble and check all sampling equipment, field test equipment, materials, containers and safety equipment.
- 2.7 Arrange suitable transport to, from and/or around site as required.
- 3 **Conduct sampling of water**
- 3.1 Locate sampling sites and, if required, services at the site.
- 3.2 Conduct representative sampling in accordance with sampling plan and defined procedures for field and/or laboratory testing, as required.
- 3.3 Ensure all controls, blanks and replicate samples are properly integrated into the sampling process.
- 3.4 Record all information and label samples in accordance with traceability requirements.
- 3.5 Record environmental conditions and any atypical observations made during sampling that may impact on

- sample representativeness or integrity.
- 3.6 Transport all samples back to base according to workplace procedures and relevant codes.
 - 3.7 Distribute samples/sub-samples to required destinations for testing, maintaining sample integrity, traceability and chain of custody requirements, as necessary.
- 4 **Conduct field testing of water**
- 4.1 Obtain sample or sub-sample for designated field test, or locate testing location for in-situ testing.
 - 4.2 Check equipment/instruments set-up and reagents and calibrate, as necessary, to ensure safe operation and valid results.
 - 4.3 Run quality control (QC) samples to check method validity.
 - 4.4 Operate equipment/instruments in accordance with test method requirements.
 - 4.5 Perform tests/procedures/observations on all samples, and standards, if appropriate, in accordance with specified methods.
 - 4.6 Record all field observations and results and ensure that they are accurately transferred to workplace information database.
- 5 **Maintain a safe work environment**
- 5.1 Use defined safe work practices and personal protective equipment to ensure personal safety and that of others.
 - 5.2 Minimise the generation of waste.
 - 5.3 Rehabilitate sampling site to render it safe and minimise environmental impacts.
 - 5.4 Clean all equipment, containers, work area and vehicles according to workplace procedures.
 - 5.5 Check serviceability of all equipment before storage.
 - 5.6 Ensure the safe collection of all hazardous wastes for appropriate disposal.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Legislation, regulations, standards, codes, workplace procedures and requirements include the latest version of one or more of:

- federal legislation, such as the Environment Protection and Biodiversity Conservation Act and National Environmental Protection Measures
- state/territory government legislation and local government by-laws, policies, regulations and plans dealing with land use; environmental protection; cultural/heritage sites; vegetation management; nature conservation and wildlife/plant protection; water and water management; soil conservation; pollution and contaminated sites; fisheries, forestry and mining operations
- legislation, standards and codes of practice for work health and safety (WHS)
- Australian and international standards covering environmental management such as AS/NZS ISO 14000 Basic Set:2007 Environmental Management Basic Set, and the sampling and analysis of water, such as AS/NZS 2031, AS 3550 series, AS/NZS 4276 series, AS/NZS 5667 series
- industry methods and guidelines, such as US Environmental Protection Authority (EPA) Methods and guidance for the analysis of water; American Public Health Association (APHA) Standard methods for the examination of waters and wastewaters; ANZECC Guidelines for fresh and marine water quality; and Australian guidelines for water quality monitoring and reporting
- registration/licensing and/or accreditation requirements
- site-specific requirements; workplace procedures for sampling, monitoring and in-field testing; recording, processing, presenting and reporting data
- workplace documents, such as standard operating procedures (SOPs), work schedules, recording and

reporting procedures, equipment manuals and warranties, supplier catalogue and handbooks; safety data sheets (SDS) and safety procedures; waste minimisation, containment, processing and safe disposal procedures.

Common field test parameters include one or more of:

- pH
- electrical conductivity
- dissolved oxygen
- salinity
- temperature
- turbidity
- Secchi disk depth.

Laboratory and/or field test parameters include one or more of:

- total suspended solids
- volatile suspended solids
- nitrogen (nitrate, organic, ammonia and Kjeldahl)
- phosphorus (total and soluble reactive)
- chlorophyll and phaeophytin
- total organic carbon (TOC)
- biological oxygen demand (BOD)
- chemical oxygen demand (COD)
- silica
- metals (total and dissolved)
- organic and inorganic pollutants
- microorganisms.

Workplace procedures for field activities include one or more of:

- use of field notebooks or log books
- SOPs covering fieldwork, sampling and testing
- equipment operating manuals, calibration procedures, instrument fault-finding procedures and general maintenance and repair procedures
- emergency, first aid and survival procedures
- requirements related to protection of the environment
- incident/accident/injury report forms.

Equipment includes one or more of:

- navigation and communication equipment (e.g. compass, maps, global positioning system (GPS), two-way radio and mobile phone)
- survey equipment
- data loggers

- sampling equipment and containers, filters and sieves and animal cages
- parameter specific meter or multi-probes (e.g. dissolved oxygen, electrical conductivity, pH, turbidity, nitrates, phosphates and temperature)
- field test kits to determine such parameters as dissolved gases, chemical anions and cations, heavy metals, E. coli and BOD
- portable colorimeters and field microscopes
- soil monitoring kits
- first aid equipment.

Hazards include one or more of:

- solar radiation, dust and noise
- personnel getting lost
- accidents, emergencies and incidents, such as snake, insect or animal bites
- exposure to severe weather conditions
- manual handling of heavy objects
- vehicle and boat handling in rough/remote conditions.

WHS and environmental management requirements include:

- compliance with relevant federal/state/territory WHS legislation at all times
- assuming that samples are potentially hazardous and applying standard precautions
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and state/territory Departments of Health, where relevant.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS024006A Perform sampling and testing of water

Links

Assessment Requirements for MSS024006 Perform sampling and testing of water

Modification History

Release 1. Supersedes and is equivalent to MSS024006A Perform sampling and testing of water

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- sampling natural, polluted and/or process water for both chemical and microbiological parameters and conducting field-testing of samples on at least two (2) occasions
- accurately interpreting a sampling plan, relevant standards and codes and associated sampling, testing and data quality procedures
- selecting and checking all required field equipment, instruments and materials and safely transporting them to and from site
- safely setting-up and using field instruments and/or equipment, including field calibration
- obtaining reliable, representative water samples in accordance with sampling plan and close attention to any pre-treatment, containers, preservation, storage, labelling and traceability requirements
- obtaining and recording valid and reliable field test data in accordance with test methods
- accurately recording site features, environmental conditions and any observations that may impact on reliability of field data
- identifying atypical results as out-of-normal range or an artefact
- identifying and rectifying basic instrument faults
- calculating results using appropriate units and precision
- checking the acceptability of environmental data using specified quality tests or procedures
- completing field records, presenting and reporting results in accordance with workplace procedures
- seeking advice when issues/problems are beyond scope of competence/responsibility
- transporting, cleaning, maintaining and storing field equipment in accordance with workplace procedures
- following procedures for working safely and minimising environmental impacts/waste.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- scientific terminology used in job role covering water chemistry, biology and microbiology
- hydrologic cycle

- fundamentals of aquatic chemistry, including:
 - physical and chemical properties of water
 - chemical equilibria in natural, polluted and process waters
 - biogeochemical processes in freshwater and marine systems
 - water analytical environmental chemistry
 - environmental contaminants in water (fate, transport and bioaccumulation)
- fundamentals of hydrobiology, including:
 - aquatic and benthic flora and fauna
 - aquatic microorganisms
 - marine, estuarine and freshwater ecosystems
 - stratification and eutrophication in water bodies
 - aquatic microbiology
- principles of representative sampling
- principles and procedures for random, systematic and stratified sampling, including consistency of sampling procedures
- preservation of the integrity of samples
- maintaining identification of samples relative to their source
- workplace and/or legal traceability requirements
- cost-effectiveness of sampling
- common characteristics of water to be sampled and likely contaminants
- links between quality control, quality assurance, quality management systems and sampling procedures
- workplace procedures dealing with legislative requirements for the handling, labelling and transport of hazardous goods
- relevant hazards; health and safety and site environmental management requirements; importance of personal and environmental safe work procedures particularly at high risk sites.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace, or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept in each case).
- Holistic assessment methods include:
 - inspection of water samples collected by the candidate against given sampling requirements
 - review of water sampling and testing records completed by the candidate for accuracy and completeness
 - feedback from supervisors that the candidate can safely sample and test natural, polluted and/or process water for both chemical and microbiological parameters and provide reliable test results within the agreed timeframe
 - oral and/or written questions to check the candidate's knowledge of water sampling and testing procedures, set-up and use of equipment; normal ranges; troubleshooting of common sampling and testing problems.
- Access is required to all instruments, equipment, materials, workplace documentation, procedures, and specifications associated with this unit including, but not limited to:
 - vehicles, survey/test equipment, water sampling and monitoring equipment, camera, consumables
 - documentation, including work program, maps and field protocols, codes of practice, user manuals, workplace safety procedures and sampling/test/survey methods.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing environmental monitoring, management or technology related services about performing the competency being assessed within the last twelve months.

MSS403011 Facilitate implementation of competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403011A Facilitate implementation of competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by individuals who facilitate, lead or mentor others in competitive systems and practices implementation in a work area.

This unit applies to people responsible for facilitating others in implementing competitive systems and practices in their work. It may apply to formally designated team leaders or people given special roles in the implementation process that go beyond their own work and which involve guiding, facilitating or mentoring others. The unit applies to competitive systems and practices implementation activities at the work area or section level.

The unit requires an individual to integrate a range of competitive systems and practices knowledge and skills as part of their role. The unit covers assisting others to understand and apply a holistic view of their job and their role within an organisation, including the objectives that must be met as part of competitive systems and practices used by the organisation.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, planning and organising, and self-management. This unit has a strong emphasis on planning and implementation, and also requires an ability to learn from experience and feed new information back into strategies to improve own performance and that of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Facilitate the development of process and competitive systems and practices knowledge | 1.1 | Ensure necessary technical documentation and information about the process and competitive systems and practices is available. |
| | | 1.2 | Assist and mentor others in accessing information. |
| | | 1.3 | Identify work activities which may inhibit the ongoing development of competitive systems and practices skills and knowledge of others. |
| | | 1.4 | Arrange for the provision of workforce development and training for self and others, as appropriate. |
| | | 1.5 | Encourage others to apply technical knowledge to the improvement process. |
| 2 | Facilitate commitment to efficiency improvements | 2.1 | Ensure budgets, operating procedures and other related documentation is available. |
| | | 2.2 | Assist others to apply this information to their work responsibilities. |
| | | 2.3 | Encourage the identification of waste. |
| | | 2.4 | Encourage an environment where efficiency improvements are recommended by fellow employees. |
| 3 | Encourage a competitive systems and practices | 3.1 | Encourage and, where necessary, develop communications between specialists and work group members. |
| | | 3.2 | Lead development of strategies to monitor and deal with |

- | | |
|--|--|
| approach to work | identified waste issues. |
| 3.3 | Resource and encourage other employees to identify and take action on potential problems. |
| 3.4 | Arrange for workforce development and training for self and others, as required, in relevant competitive systems and practice procedures and techniques. |
| 3.5 | Guide others in relating identified problems to the maintenance strategy, and developing any required changes, to ensure awareness, learning and commitment. |
| 4 Implement process and organisation improvements | 4.1 Plan the implementation of work group suggestions and externally suggested improvements. |
| | 4.2 Facilitate commitment to, and involvement in, the implementation planning of improvements and to follow improvements to their conclusion. |
| | 4.3 Encourage the application of the 'plan, do, measure, improve, control' approach to the job. |
| | 4.4 Arrange for workforce development and training, as required, to facilitate continued involvement by others in improvement processes. |
| | 4.5 Involve work group and other key personnel in identification of skill needs and means of skills acquisition to fill any identified gaps. |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
 - agile operations
 - preventative and predictive maintenance approaches
 - statistical process control systems, including six sigma and three sigma
 - Just in Time (JIT), kanban and other pull-related operations control systems
 - supply, value, and demand chain monitoring and analysis
 - 5S
 - continuous improvement (kaizen)
 - breakthrough improvement (kaizen blitz)
 - cause/effect diagrams
 - overall equipment effectiveness (OEE)
 - takt time
 - process mapping
 - problem solving
 - run charts
 - standard procedures
 - current reality tree.

- Budgets include one or more of:**
- financial
 - time
 - materials/products
 - other business plans which are relevant to the team and the work area.

- Categories of waste include one or more of:**
- excess production and early production
 - delays
 - movement and transport
 - poor process design
 - inventory
 - inefficient performance of a process
 - making defective items
 - activities which do not yield any benefit to the organisation or any benefit to the organisations customers.

- Key reliability issues include one or more of:**
- cleanliness
 - poor lubrication

of:

- incorrect adjustment
- poor training and instructions for employees.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS403011A Facilitate implementation of competitive systems and practices

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSS403011 Facilitate implementation of competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403011A Facilitate implementation of competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more organisation improvements which include the facilitation of competitive systems and practices, to:

- identify processes and products of the organisation and work area
- analyse future skill development needs of work group
- mentor effectively in a one-on-one situation
- facilitate communication between work group and external competitive systems and practices specialists and managers
- lead work group in identifying efficiency improvements and elimination of waste.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- information technology systems used in the organisation
- features of competitive operational practices in own work area
- monitoring and data gathering systems in work area (e.g. SCADA, ERP and MRP)
- methods of gathering data against key performance indicators (KPIs)
- facilitation techniques to encourage work group development and improvement.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
 - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency

- must include facilitation of competitive systems and practices implementation in own workplace
- will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403013 Lead team culture improvement

Modification History

Release 1. Supersedes and is equivalent to MSS403013A Lead team culture improvement

Application

This unit of competency covers the skills and knowledge required by a team leader or other person responsible for developing a culture within a team appropriate for supporting competitive systems and practices.

This unit applies where an organisation has embarked on competitive systems and practices and a team leader or other responsible person is required to change or improve the team culture to maximise the benefits from competitive systems and practices.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, planning and organising, and self-management in order to provide leadership in a changing team environment. This unit has a strong emphasis on planning and change management, but also requires an ability to learn from experience and feed new information back into strategies to improve performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---|-----|--|
| 1 | Facilitate the team's understanding of the competitive systems and practices strategy | 1.1 | Communicate with all team members the objectives and benefits of the competitive systems and practices strategy. |
| | | 1.2 | Review with team members the techniques and methods that will be used in achieving the competitive systems and practices strategy. |
| | | 1.3 | Using a systems approach, help team members understand how the team fits into the organisation. |
| | | 1.4 | Establish appropriate communication and teamwork within the team and with other teams. |
| | | 1.5 | Develop a work structure with the team that allows for everyone to participate in the application of the competitive systems and practices strategy. |
| 2 | Facilitate application of knowledge about the importance of controlling variation in competitive systems and practices | 2.1 | Develop the application of a statistical approach by all team members to all relevant facets of the system with a view to reducing variation. |
| | | 2.2 | Encourage the approach of building quality and ensuring team members assist each other in meeting requirements. |
| 3 | Facilitate the development of skills and knowledge within the team | 3.1 | Encourage appropriate training for all team members. |
| | | 3.2 | Involve team members in identification of skill needs and skill gaps, and in development of a strategy for training, skills acquisition and self-improvement so as to ensure awareness, learning and commitment. |
| 4 | Facilitate the development of commitment within the team to the competitive systems and practices strategy | 4.1 | Ensure that the team has sufficient resources and adequate equipment available to meet the requirements of the competitive systems and practices strategy. |
| | | 4.2 | Encourage the adoption of continuous improvement. |
| | | 4.3 | Encourage employee acceptance of responsibility for the quality of own work. |

- 4.4 Provide continuous feedback and communication of progress at all levels in implementing the strategy.
- 4.5 Involve team members in relating identified problems and opportunities for improvement to the competitive systems and practices strategy, and involve them in developing any required changes, to ensure awareness, learning and commitment.
- 4.6 Establish and monitor indicators of team culture.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
 - agile operations
 - preventative and predictive maintenance approaches
 - statistical process control systems, including six sigma and three sigma
 - Just in Time (JIT), kanban and other pull-related operations control systems
 - supply, value, and demand chain monitoring and analysis
 - 5S
 - continuous improvement (kaizen)
 - breakthrough improvement (kaizen blitz)
 - cause/effect diagrams
 - overall equipment effectiveness (OEE)
 - takt time
 - process mapping
 - problem solving

- run charts
- standard procedures
- current reality tree.

Systems approach includes consideration of the role and requirements of one or more of:

- customers
- suppliers
- employees
- other value stream members
- members of the public and community groups
- other external individual, group or organisation
- technical processes and equipment
- statutory and regulatory requirements, including work health and safety (WHS) and environment legislation and regulations
- quality standards.

Team culture can be monitored by one or more of:

- surveys
- evaluation of toolbox or other regular meetings
- direct discussion with team members
- monitoring of other indicators (e.g. error rates and absenteeism)
- analysis of root cause related to status of team culture.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS403013A Lead team culture improvement

Assessment Requirements for MSS403013 Lead team culture improvement

Modification History

Release 1. Supersedes and is equivalent to MSS403013A Lead team culture improvement

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more team culture changes, to:

- identify the competitive systems and practices used by the team
- identify changes to the work of the team flowing from the implementation of the relevant competitive systems and practices
- facilitate and monitor changes designed to improve team culture
- communicate effectively with team members providing relevant feedback.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- features of competitive operational practices in the team's work area
- principles of change management
- facilitation techniques to encourage team development and improvement.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Application

This unit of competency covers the skills and knowledge required to analyse manual handling in terms of its efficiency and safety.

This unit applies to an individual who is required to examine the manual handling component of a job and improve it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others or it may be for the person's own job.

This unit primarily requires the application of skills associated with problem solving, initiative and enterprise to identify safe and efficient manual handling, and planning and organising to ensure processes are implemented. This unit also requires communication with, and involvement of, others to ensure they understand the approach and to facilitate training.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Assess manual	1.1	Identify manual handling hazards in work area.
---	----------------------	-----	--

	handling risks	1.2	Assess risks arising from manual handling hazards.
2	Analyse physical effort requirements of job	2.1	Determine basic manual handling requirements of job.
		2.2	Analyse requirements in terms of components, such as lift, move, place and hold.
		2.3	Analyse items to be handled in terms such as weight, size, shape or other hazards.
3	Determine time/effort components of physical effort	3.1	Break required movement pattern down into movement components.
		3.2	Determine time and effort requirements for movements.
		3.3	Develop alternative movement patterns.
		3.4	Determine time and effort requirements for alternative movements.
		3.5	Determine handling aids required to assist movement.
		3.6	Determine preferred movement pattern.
4	Analyse the ergonomics of physical effort	4.1	Analyse the ergonomics of the preferred movement pattern.
		4.2	Develop substitute movements for any movement which is not ergonomically sound.
		4.3	Determine handling aids required to improve ergonomics of required movements.
5	Optimise application of physical effort	5.1	Select movement patterns which are ergonomically sound and time and effort efficient.
		5.2	Ensure all relevant people are trained to use these methods.
		5.3	Ensure procedures and practices reflect the optimum methods.

- 5.4 Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
 - agile operations
 - preventative and predictive maintenance approaches
 - statistical process control systems, including six sigma and three sigma
 - Just in Time (JIT), kanban and other pull-related operations control systems
 - supply, value, and demand chain monitoring and analysis
 - 5S
 - continuous improvement (kaizen)
 - breakthrough improvement (kaizen blitz)
 - cause/effect diagrams
 - overall equipment effectiveness (OEE)
 - takt time
 - process mapping
 - problem solving
 - run charts
 - standard procedures
 - current reality tree.
- Procedures (written,**
- work instructions

- verbal, visual, computer based, etc.) include one or more of:**
- standard operating procedures (SOPs)
 - safe work method statements
 - formulas/recipes
 - batch sheets
 - temporary instructions
 - any similar instructions provided for the smooth running of the plant.

- Manual handling hazards include one or more of**
- loads that pose a risk of injury
 - ergonomically unsound movements
 - hazard requirements as defined by relevant work health and safety (WHS) Acts and regulations, industry standards and best practice.

- Ergonomically unsound movements include one or more of**
- awkward and repetitive movements
 - carrying, pushing, pulling or lifting of heavy loads
 - carrying or movement of hard, sharp, slippery or other difficult to grasp loads.

- Ergonomically sound movements include one or more of**
- keeping loads close to the body and near the person's centre of gravity
 - using diagonal foot positions for lifting
 - moving loads at waist height rather than directly from the floor.

Assessment Requirements for MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for at least (1) one job/process, to:

- analyse manual handling requirements and risks
- distinguish between ergonomically sound and unsound movement
- analyse manual handling movements and risks for an individual
- relate manual handling requirements to job efficiency.

Knowledge Evidence

- Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:
- principles of ergonomics/safe movement
- principles of work analysis
- relevant work health and safety (WHS) Acts and regulations as they apply to manual handling
- principles of job and work method design as applied to efficient and safe movement
- aids that can assist with or substitute for manual handling.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
 - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include analysing manual handling processes in own workplace

- will typically include the use of appropriate manual handling guides, tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS407001 Prepare for and implement change

Modification History

Release 1. Supersedes and is equivalent to MSS407001A Prepare for and implement change

Application

This unit of competency covers the skills and knowledge required to establish the preconditions for the implementation of a change, such as a 'step change' or a change resulting from a problem-solving exercise, such as a kaizen blitz. The unit can be applied to subsections of an organisation, such as a team, area or department, or a small or medium sized enterprise (SME).

This unit is intended for team leaders and people with a similar sphere of influence/scope of authority and responsibility. It applies to individuals who are already familiar with change leadership in a competitive systems and practices environment through either previous study or industry experience.

Skills covered by this unit are applied in an organisation after a desired change has already been identified. This unit may also be applied in service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

- essential outcomes. demonstrate achievement of the element.
- 1 **Define the change**
 - 1.1 Determine the purpose of the change.
 - 1.2 Identify key change project personnel.
 - 1.3 Record the current state that the change is addressing.
 - 1.4 Develop a consensus view of the intended future state, including indicators of a successful change.
 - 1.5 Develop an agreed statement of the solution.
 - 1.6 Identify the health, safety and environment (HSE) impacts of the change.
 - 1.7 Determine the scope of the change project, including taking into account the impact of the solution on any codes of practice, standards, contracts and commercial or industrial agreements.
 - 1.8 Obtain sign-off from key change project personnel.
 - 2 **Identify personnel required to implement the change and their roles**
 - 2.1 Develop a high level change network map.
 - 2.2 Identify employees, suppliers or customers who may be required to implement the change.
 - 2.3 Identify other demands on these people during the change.
 - 2.4 Investigate priorities, synergies and conflicts.
 - 2.5 Take action to resolve conflicts.
 - 3 **Assess and manage the change-related risks**
 - 3.1 Identify organisational capacity for the change, including available resources and ability to absorb any disruption during the change.
 - 3.2 Clarify specific risk dimensions for this change.
 - 3.3 Develop appropriate transition approach.
 - 4 **Build high level**
 - 4.1 Develop high level involvement plan.

- | | | |
|---|-----|--|
| change plans | 4.2 | Develop high level communication plan to all stakeholders. |
| | 4.3 | Develop high level competency development plan for all implementers. |
| | 4.4 | Develop high level alignment plan. |
| 5 Implement and sustain the change | 5.1 | Implement change plans. |
| | 5.2 | Check change objectives have been met. |
| | 5.3 | Transfer ownership of post-change operations from change agents, where relevant. |
| | 5.4 | Ensure support structures are in place. |
| | 5.5 | Check alignments have been obtained. |
| | 5.6 | Check competencies have been developed and will be maintained. |
| | 5.7 | Ensure base line is defined for continuous improvement. |
| | 5.8 | Review project and capture learning from the project. |
| | 5.9 | Take action to sustain improvement by standardising. |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
 - agile operations
 - preventative and predictive maintenance approaches
 - statistical process control systems, including six sigma and three sigma
 - Just in Time (JIT), kanban and other pull-related operations control systems
 - supply, value, and demand chain monitoring and analysis
 - 5S
 - continuous improvement (kaizen)
 - breakthrough improvement (kaizen blitz)
 - cause/effect diagrams
 - overall equipment effectiveness (OEE)
 - takt time
 - process mapping
 - problem solving
 - run charts
 - standard procedures
 - current reality tree.
- High level change network includes one or more of:**
- sponsors
 - cascading change sponsors
 - targets
 - agents
 - advocates
 - enablers
 - impiders.
- Organisation includes:**
- any part of a manufacturing or service organisation
 - companies, government bodies or other body of people aiming to produce a product to service a customer.
- Key change project personnel include one or more of:**
- project sponsors
 - cascading sponsors
 - relevant managers
 - change agents.
- Risks include one or more of:**
- business risks (e.g. over-spending)
 - market risk (e.g. loss of market share)
 - HSE risks

- relationship risks (e.g. to shareholders, employees, suppliers, customers or the community).
- Organisation capacity includes one or more of:**
- organisation history of implementing change
 - capability in change implementation
 - adaptability of people to change
 - demand for the change in the part of the organisation.
- Specific risk dimensions include one or more of:**
- impact of the solution (its potential for disruption to production, quality, delivery and budgets)
 - readiness of people to accept the change, including readiness to accept changes in role and responsibilities
 - availability of resources, including financial, plant and equipment, and dedicated personnel.
- Transition approach includes one or more of:**
- transition style (top down/pilot/process focused/delegated change)
 - degree of sponsorship to be cascaded
 - balance of engagement/involvement
 - internal and/or external resources
 - use of change to build organisation capacity.
- High level involvement plans involve groups within defined constraints which include one or more of:**
- objectives for involvement
 - decision parameters
 - timing of involvement
 - problem/opportunity identification
 - solution design
 - implementation/transition planning
 - solution building
 - solution testing
 - solution piloting
 - training design
 - training delivery
 - communication roll out
 - solution roll out.
- Alignment plan ensures alignment and sustainability between:**
- policies, processes and procedures
 - incentives and rewards (KPIs and intended outcomes)
 - consequences and penalties for non-compliance
 - preventing pre-change behaviours and patterns recurring.

Sustaining improvement includes one or more of:

- standard procedures and work instructions
- standard practice
- other relevant documents and practices.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS407001A Prepare for and implement change

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5b04f318-804f-4dc0-9463-c3fb9a3fe998>

Assessment Requirements for MSS407001 Prepare for and implement change

Modification History

Release 1. Supersedes and is equivalent to MSS407001A Prepare for and implement change

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more teams/areas/departments, to:

- prepare for and deliver change
- communicate with all stakeholders
- develop consensus among stakeholders
- undertake risk analysis of proposed changes
- develop and implement change management plans that have objectives, measurable KPIs and tested solutions to anticipated contingencies.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to prepare for and implement change, including knowledge of:

- competitive systems and practices principles
- change management
- workplace strategy and vision
- methods of determining competency gaps in team members
- project planning and management.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where a desired change has been identified and is implemented in an operational workplace.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS407006 Build relationships between teams in an operations environment

Modification History

Release 1. Supersedes and is equivalent to MSS407006A Build relationships between teams in an operations environment

Application

This unit of competency covers the skills and knowledge required to develop an attitude of respect for individuals in teams and trust between individuals, teams, supervisors and management in order to develop a suitable culture for implementing and sustaining competitive systems and practices initiatives.

This unit is intended for team leaders and people with a similar sphere of influence/scope of authority and responsibility. It builds on more general competitive systems and practices graduate units and specifically addresses inter-team issues. The unit also encompasses intra-team issues where these are a barrier. The unit envisages a specialist facilitation role in assisting with implementing an organisation competitive systems and practices culture.

This unit is also about developing a 'whole of value stream' view so that there is not competition between individuals or teams, but rather cooperation to achieve organisation and value stream goals with competition being directed towards other organisations competing in the marketplace.

This unit may also be applied to service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Identify organisational relationships | 1.1 | Map actual and intended process flows within and between teams. |
| | | 1.2 | Map actual and intended communication/information/data flows within and between teams. |
| | | 1.3 | Identify and map other interactions (actual and intended) within and between teams. |
| | | 1.4 | Determine the consequences in terms of customer benefit of intended flows/interactions. |
| | | 1.5 | Determine the consequences in terms of customer benefit of the actual flows/interactions. |
| 2 | Foster cooperation within team | 2.1 | Present relationships information to team members. |
| | | 2.2 | Discuss areas where greater cooperation would yield benefits. |
| | | 2.3 | Agree on ways to achieve greater cooperation in these areas. |
| | | 2.4 | Facilitate team implementation of agreed changes. |
| 3 | Foster cooperation between teams | 3.1 | Present relationships information to teams/team representatives. |
| | | 3.2 | Discuss areas where greater cooperation would yield benefits. |
| | | 3.3 | Agree on ways to achieve greater cooperation in these areas. |
| | | 3.4 | Obtain any necessary approvals for proposed changes. |

- 3.5 Facilitate implementation by teams of agreed changes.
- 4 **Identify sources of tension, conflict or competition**
 - 4.1 Examine team and individual key performance indicators (KPIs) for sources of conflict/competition.
 - 4.2 Examine flows and interactions for possible sources of conflict and competition.
 - 4.3 Observe interactions between team members and identify tensions, conflicts and competition.
 - 4.4 Observe interactions between teams and identify tensions, conflicts and competition.
 - 4.5 Observe response to change and resistance to change.
- 5 **Reduce causes of tension, conflict or competition**
 - 5.1 Draft modified KPIs to reduce causes of conflict and competition.
 - 5.2 Draft modified systems causing conflicting flows and interactions.
 - 5.3 Facilitate discussions within and between teams to identify causes of tensions, conflicts and competition.
 - 5.4 Facilitate discussions to develop a consensus solution to identified causes of tensions, conflicts and competition.
 - 5.5 Obtain any required approvals for suggested/drafted changes.
 - 5.6 Facilitate the implementation of the agreed solutions.
 - 5.7 Take actions to ensure agreed changes become standard practice.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Organisational teams include one or more of:

- downstream customer teams (internal or external)
- upstream supplier teams (Internal or external)
- support teams (e.g. maintenance and information technology (IT)).

Cooperation within teams includes one or more of:

- assistance with problem solving
- dealing with disruptions to flow
- dealing with variations of flow level/volume
- dealing with variations in quality/quantity/timeliness.

KPIs include one or

- reward systems
- systems (formal and informal) which encourage some types of

more of: behaviour over others.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS407006A Build relationships between teams in an operations environment

Assessment Requirements for MSS407006 Build relationships between teams in an operations environment

Modification History

Release 1. Supersedes and is equivalent to MSS407006A Build relationships between teams in an operations environment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more teams, to:

- critically examine relationships within and between downstream, upstream and support teams and to take action to improve them
- identify relationships/relationship maps
- identify sources of conflict/tension
- consensus development of improvement plans, including setting of KPIs
- implement improvement plans and rechecking subsequent relationships

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to facilitate healthy relationships within and between teams, including knowledge of:

- competitive systems and practices principles, strategies and techniques
- organisational goals, products and processes
- types of KPIs, their applications and limits
- approval processes within organisation
- communication methods across a variety of media and formats, including preparation of formal proposals and negotiations
- continuous improvement
- process mapping, communication and people interaction mapping
- customer perception of value.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

- multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where both intra-team and inter-team issues are identified and addressed where they constitute a barrier in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS408003 Develop models of future state operations practice

Modification History

Release 1. Supersedes and is equivalent to MSS408003A Develop models of future state operations practice

Application

This unit of competency covers the skills and knowledge required to establish processes for identifying future state models of best practice for operations that are then used as the template for both strategic decision making and goal setting. It may be applied to whole organisations or significant sections of the value stream.

This unit applies in an environment where operations practices are standardised and there is a culture that accepts sustaining improvements and building on them. It is intended for managers and people with a similar sphere of influence.

This unit applies to individuals who are familiar with competitive systems and practices, value stream mapping and culture improvement.

This unit may also be applied to non-production areas and service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|--|--|
| 1 | Develop a shared future state model | <p>1.1 Establish an appropriate representative team.</p> <p>1.2 Analyse a value stream map of an appropriate section of the value stream.</p> <p>1.3 Determine the current state of practice across the value stream.</p> <p>1.4 Identify overall organisation strategy, direction and competitive systems and practices philosophy.</p> <p>1.5 Validate view with process/system owner.</p> |
| 2 | Develop and review a collaborative best practice model | <p>2.1 Develop a future state model of practice.</p> <p>2.2 Review model with process/system owners and other stakeholders across the value stream as appropriate.</p> <p>2.3 Modify model to deliver better results for the customer and reduce muda.</p> <p>2.4 Develop implementation plan in consultation with stakeholders.</p> |
| 3 | Provide the resources necessary to move to the future state | <p>3.1 Identify changes required to infrastructure.</p> <p>3.2 Determine benefit/cost for required changes.</p> <p>3.3 Prioritise required changes.</p> <p>3.4 Obtain required authorisations.</p> <p>3.5 Facilitate the provision of resources needed to implement plan.</p> |
| 4 | Review future state model | <p>4.1 Manage the implementation of improvements.</p> <p>4.2 Identify measures of progress towards agreed future state.</p> |

- 4.3 Review progress towards future state.
- 4.4 Agree methods of improving areas which could progress better.
- 4.5 Agree on methods for evaluating future state.
- 4.6 Validate measures and methods with relevant managers.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
 - agile operations
 - preventative and predictive maintenance approaches
 - statistical process control systems, including six sigma and three sigma
 - Just in Time (JIT), kanban and other pull-related operations control systems
 - supply, value, and demand chain monitoring and analysis
 - 5S
 - continuous improvement (kaizen)
 - breakthrough improvement (kaizen blitz)
 - cause/effect diagrams
 - overall equipment effectiveness (OEE)
 - takt time
 - process mapping
 - problem solving
 - run charts
 - standard procedures

- current reality tree.
- Organisation includes one or more of:**
- any part of a manufacturing or service organisation
 - companies, government bodies or other body of people aiming to produce a product to service a customer.
- Representative team includes members from one or more of:**
- the value stream representing key parts of that chain
 - inside the organisation
 - outside the organisation.
- Infrastructure includes consideration of all of:**
- policies and procedures
 - plant and equipment
 - materials, energy, utilities and other consumables
 - workforce arrangements, including employee numbers, organisation structure, competencies and competency mix.
- The purpose(s) of the future state model of practice includes consideration of all of:**
- the required organisation strategy and philosophy
 - the direction of improvements and actions
 - forecasts of key indicators.
- Measures of progress include one or more of:**
- metrics and other indicators defined and agreed before the commencement of implementation
 - metrics which provide feedback on the progress towards the future state.
- Manager includes one or more of:**
- a person who has a formal, permanent position
 - a person with an ad hoc role in facilitating the function of multiple teams in a workplace, departments or entire organisations.

Assessment Requirements for MSS408003 Develop models of future state operations practice

Modification History

Release 1. Supersedes and is equivalent to MSS408003A Develop models of future state operations practice

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop one (1) or more models of future state operations practice and to:

- develop a shared future state model
- develop a collaborative best practice model
- facilitate the provision of resources allowing for the implementation of the improvement
- review progress towards the future state.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop models of future state operations practice, including knowledge of:

- key indications of current position or progress towards the future state, such as output quantities and qualities, variability in quality and quantity, uptime, investment hurdle rates and actual rates of return, sustainability indicators, reliability indicators, other key performance indicators (KPIs) appropriate to the organisation and its technology and processes
- value stream mapping and analysis
- types of muda (waste), causes and costs
- competitive systems and practices tools relevant to the organisation and process
- techniques for creating and evaluating future state models.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real activity developing models of future state operations practice for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSTGN3007 Monitor and operate trade waste

Modification History

Release 1. Supersedes and is equivalent to LMTGN3007B Monitor and operate trade waste

Application

This unit of competency covers the skills and knowledge required to monitor, operate, measure and report on trade waste system performance and process quality control.

This unit of competency applies to processing plant operations and inspection of work areas, monitoring, operating, measuring and reporting on trade waste systems.

Work may be conducted in restricted spaces or exposed conditions or controlled or open environments.

This unit of competency is applicable to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Generic

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 | Monitor treatment plant performance | 2.1 | Conduct and assess routine plant inspections in accordance with organisational and plant requirements |
| | | 2.2 | Collect and conduct tests of process samples |
| | | 2.3 | Collect and report process data according to organisational and plant requirements and workplace procedures |
| | | 2.4 | Identify corrosion damage |
| 3 | Control chemical use | 3.1 | Use, handle and store chemicals in accordance with organisational and statutory requirements |
| | | 3.2 | Prepare chemical dosing in accordance with plant processes and organisational and statutory requirements |
| | | 3.3 | Maintain information related to chemical supply and usage in accordance with statutory requirements |
| | | 3.4 | Interact and communicate with other employees and relevant authorities |
| 4 | Operate and control processes | 4.1 | Monitor processes to maintain parameters of operation |
| | | 4.2 | Identify and report process faults and operational conditions of plant in accordance with organisational and statutory requirements |

- 4.3 Assess basic system adjustments to enhance system performance in accordance with organisational and statutory requirements
- 4.4 Compile reports compiled from plant and system data to meet organisational and statutory requirements

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Process includes, but is not limited to, one or more of the following:

- chemical precipitation
- activated sludge
- biodegradable reduction
- solids handling

Data includes, but is not limited to, one or more of the following:

- plant performance data
- chemical usage

Tests include, but are not limited to, one or more of the following:

- settling tests
- pH
- dissolved oxygen

System adjustments include, but are not limited to, one or more of the following:

- pH correction
- dissolved oxygen levels

Equipment includes, but is not limited to, one or more of the following:

- electronic monitoring and metering systems
- manual chart recording systems
- laboratory testing and sampling equipment
- computerised equipment

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTGN3007B Monitor and operate trade waste

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSTGN3007 Monitor and operate trade waste

Modification History

Release 1. Supersedes and is equivalent to LMTGN3007B Monitor and operate trade waste

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- conducting routine plant inspections, assessing processes, and collecting and conducting tests of process samples, in accordance with organisational and plant requirements
- complying with organisational and statutory requirements to use, handle and store chemicals, prepare and apply chemical and biological dosing
- maintaining accurate records of test results/work records
- communicating effectively within the workplace and maintaining information related to chemical supply and usage
- interpreting and applying established procedures
- identifying and reporting process faults and operational conditions of plant in accordance with organisational and statutory requirements
- compiling reports compiled from plant and system data to meet organisational and statutory requirements
- applying workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry process and equipment
- system hydraulics and layout, control systems
- chemical dosing processes
- hazardous material handling procedures
- work health and safety (WHS) and environmental aspects of relevant testing processes
- workplace procedures and reporting processes
- quality practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in monitoring and operating trade waste, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The unit is applicable to all TCF sectors and assessment must ensure it is delivered to suit the industry it is being applied to.

NWP208A Perform basic wastewater tests

Modification History

NWP208A Release 2: Layout adjusted. No changes to content.

NWP208A Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to perform basic wastewater tests.

Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff with responsibility for preparing for, conducting and reporting on basic wastewater tests in wastewater treatment and system operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for basic wastewater tests.	<p>1.1 Receive instructions for conducting and recording <i>basic wastewater tests</i> and confirm with appropriate personnel.</p> <p>1.2 Confirm <i>testing details</i> and <i>plan testing work</i> according to <i>legislative and organisational requirements</i>.</p> <p>1.3 Select, fit and use personal protective equipment specified for routine wastewater tests.</p> <p>1.4 Prepare and check <i>testing equipment</i> according to organisational requirements.</p>
2 Conduct basic wastewater tests.	<p>2.1 Locate and identify correct samples for testing and report <i>abnormal sample characteristics</i>.</p> <p>2.2 Conduct basic wastewater tests according to organisational requirements.</p> <p>2.3 <i>Maintain integrity of samples</i> during testing.</p> <p>2.4 Identify <i>atypical data</i> and take appropriate action.</p>
3 Finalise work.	<p>3.1 Record relevant <i>information</i> according to organisational requirements.</p> <p>3.2 Dispose of samples and clean and store test equipment according to organisational procedures.</p> <p>3.3 Clear and restore work area according to organisational requirements.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- conduct basic wastewater tests
- calibrate testing equipment
- operate testing equipment
- conduct sub-sampling
- dispose of samples and waste
- communicate effectively
- produce reports and logs
- perform relevant work-related calculations
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- interpret work requirements

Required knowledge:

- range and purpose of basic wastewater testing
- procedures for the use of instruments and other field-testing equipment
- test procedures
- relevant work-related calculations
- maintenance and storage of reagents
- sub-sampling and basic wastewater test methods
- documentation procedures for test results
- sample and waste disposal procedures
- relevant legislative and organisational requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to perform basic wastewater tests by:

- interpreting testing requirements and procedures
- preparing, checking and using equipment correctly
- conducting at least three different tests safely while maintaining the integrity of samples
- recording all relevant information

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning

experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice

- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Basic wastewater tests include:

- range of tests required for competent performance of work tasks in the organisational context, which should comprise at least three of the following types of test:
 - pH
 - temperature
 - electrical conductivity
 - dissolved oxygen
 - microscopy
 - thirty minute settleability
 - settleable solids concentration (cone test)
 - turbidity

- Testing details** may include:
- locations, including:
 - on-site testing
 - field-based testing
 - laboratory
 - range of testing procedures and techniques that apply to organisational, plant or field sites
 - variety of samples to be tested
 - testing equipment
 - test reporting systems
- Planning of testing work** may include:
- interpretation of instructions and directions
 - timelines
 - interaction and communication with team members and individuals
 - interpretation of legislative and organisational requirements
- Legislative and organisational requirements** may include:
- relevant federal and state or territory legislation and regulations
 - codes of practice, associated standards and guidance material
 - documented organisational policies, manuals and induction programs
 - relevant community planning and development agreements, such as land care agreements
- Testing equipment** may include:
- portable meters, such as:
 - pH meters
 - electrical conductivity meters
 - thermistors
 - comparators
 - pocket colorimeters
 - dissolved oxygen meters
 - test kits
 - microscopes
 - thermometers
 - Imhoff cones
 - graduated cylinders and settling apparatus
- Abnormal sample characteristics** may include:
- insufficient sample volume
 - odour
 - visible contaminants, such as:
 - scum
 - debris
 - discolouration

Maintaining integrity of samples may include application of correct:

- holding time
- storage procedures
- sub-sampling procedures

Atypical data may include:

- results that fall outside organisational range requirements
- results that fall outside legislated range requirements

Information may include:

- time and logging of sample receipt and testing
- visual observations
- equipment identification
- atypical results
- test results

NWP262A Monitor and report wastewater treatment processes

Modification History

NWP262A Release 2: Layout adjusted. No changes to content.

NWP262A Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to monitor and report on wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas. The ability to monitor processes to ensure that wastewater disposal or re-use meets state or territory licensing requirements is essential to performance.

Application of the Unit

This unit supports the attainment of skills and knowledge required for operational staff in wastewater treatment plants with responsibility for monitoring wastewater treatment processes.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify sources and characteristics of wastewater and reasons for wastewater treatment.	<p>1.1 Identify <i>wastewater sources</i> and characteristics.</p> <p>1.2 Identify <i>reasons</i> and <i>statutory requirements</i> for wastewater treatment.</p>
2 Monitor and report on wastewater quality.	<p>2.1 Identify <i>wastewater treatment processes</i> and determine their application.</p> <p>2.2 Check <i>characteristics of wastewater</i> according to organisational procedures.</p> <p>2.3 Record and report wastewater quality according to organisational procedures.</p>
3 Follow safety requirements for work in a wastewater treatment plant.	<p>3.1 Identify and record hazards of working in a wastewater treatment plant.</p> <p>3.2 Identify operational requirements for safe and effective use of <i>equipment</i>.</p> <p>3.3 Select, fit and use safety equipment, including personal protective equipment.</p> <p>3.4 Identify and apply safe work practices when handling <i>chemicals</i> and working in a wastewater treatment plant.</p>
4 Monitor and report on wastewater treatment.	<p>4.1 Identify operating principles used in wastewater treatment processes.</p> <p>4.2 Complete records required for effective operation of a wastewater treatment plant.</p> <p>4.3 Identify, record and report range of <i>data</i> routinely collected.</p> <p>4.4 Carry out, record and report <i>process calculations</i>.</p> <p>4.5 Identify data that falls outside normal operating <i>parameters</i> and report for further action.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- apply policies, procedures and standards
- recognise and report operational problems

- use safety equipment and personal protective equipment
- select, collect and test samples
- interpret material safety data sheets (MSDS)
- receive and apply instructions
- use literacy skills in regard to verbal and written communication in the workplace
- communicate with other employees and people that interact within the work environment

Required knowledge:

- sources of wastewater
- physical, chemical and microbiological characteristics and operating principles related to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plant processes
- major chemicals and equipment used
- wastewater treatment plant hazards
- safety equipment
- reasons for data and information collection

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to monitor and report on wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas including:

- performing, recording and reporting process measurements and calculations
- demonstrating procedures for starting and stopping plant and locking out control equipment
- adjusting process controls according to specific plant procedures
- recording and reporting faults and breakdowns
- identifying common process faults and following procedures to rectify these

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include

equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Wastewater sources may include:

- domestic
- industrial
- storm
- ground

Reasons for treatment may include:

- ensuring conformity with legislation, regulations, standards and codes
- removal of impurities and contaminants to enable discharge or re-use
- reducing impact of impurities on the environment and public health

Statutory requirements are defined by:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

Wastewater treatment processes may include:

- grit removal
- aeration
- screening
- sedimentation
- disinfection
- granular and membrane filtration
- thickening and dewatering
- suspended and fixed media aerobic bioreactor processes
- anaerobic processes
- lagoons and wetlands
- gas scrubbers
- biosolids and effluent disposal and re-use
- dilution
- chemical dosing
- nutrient removal
- reverse osmosis

Characteristics of wastewater may include:

- types of impurities, such as:
 - organic
 - inorganic
- micro-organisms
- public health considerations

Equipment used may include:

- pumps, including:
 - centrifugal
 - positive displacement

- airlift
- blowers
- screens
- control valves
- electronic digital monitoring systems
- recording systems
- chemical testing and analysis equipment
- communication equipment
- belt press
- centrifuge
- comminutor
- flow meters
- flow recorders
- manual or hydraulic equipment
- personal protective equipment
- chemicals and lime
- sodium hypochlorite
- aluminium and iron coagulants
- polymers

Chemicals and major equipment used may include:

Data may include:

- instantaneous flow rate
- flow records
- temperature
- sand and grit
- pH
- chemical oxygen demand
- dissolved oxygen
- settleable solids concentration (cone test)
- thirty minute settleability test
- sludge blanket level
- residual chlorine
- microscopic examination
- conductivity

Process calculations may include:

- average dry weather flow
- peak dry weather flow
- chemical feed rate and concentration
- process efficiency

Wastewater quality *parameters* may include:

- physical
- chemical
- microbiological

NWP263A Operate and maintain wastewater treatment plant and equipment

Modification History

NWP263A Release 2: Layout adjusted. No changes to content.

NWP263A Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to operate and maintain wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas. The ability to operate wastewater treatment processes to ensure that wastewater disposal or re-use meets state or territory licensing requirements is essential to performance.

Application of the Unit

This unit supports the attainment of skills and knowledge required for operational staff in wastewater treatment plants with responsibility for the practical and safe operation of plant, equipment and processes.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate wastewater treatment processes.	1.1 Identify <i>reasons and requirements</i> for treatment of wastewater. 1.2 Identify major components of wastewater treatment processes. 1.3 Identify and apply practices undertaken in <i>wastewater treatment processes</i> . 1.4 Operate <i>mechanical equipment</i> used in wastewater treatment according to manufacturer specifications and organisational requirements. 1.5 Handle, use, store and dose <i>chemicals</i> according to relevant legislation and organisational procedures.
2 Maintain items of equipment used in wastewater treatment processes.	2.1 Identify maintenance requirements and schedules according to standard operating procedures. 2.2 Meet maintenance and cleaning requirements of equipment.
3 Follow safety requirements for work in a wastewater treatment plant.	3.1 Identify and record hazards of working in a wastewater treatment plant. 3.2 Identify and record operational requirements for safe and effective use of equipment. 3.3 Select, fit and use safety equipment, including personal protective equipment. 3.4 Identify and apply safe work practices when handling chemicals and working in a wastewater treatment plant.
4 Record wastewater treatment plant data.	4.1 Complete records required for effective operation of a wastewater treatment plant. 4.2 Identify, record and report range of data routinely collected. 4.3 Identify data that falls outside normal operating parameters and report for further action.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- recognise and report operational problems

- apply policies, procedures and standards
- use safety equipment and personal protective equipment
- collect and test samples
- interpret material safety data sheets (MSDS)
- receive and apply instructions
- use literacy skills in regard to verbal and written communication in the workplace
- communicate with other employees and people that interact within the work environment

Required knowledge:

- sources and characteristics of wastewater
- physical, chemical and microbiological characteristics and basic principles related to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plants and processes
- major chemical types and equipment used
- wastewater treatment plant hazards
- safety equipment
- reasons for data and information collection
- MSDS

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to operate and maintain wastewater treatment processes within domestic and industrial wastewater treatment plants in urban and rural areas including:

- applying wastewater treatment processes, including operating mechanical equipment
- using chemicals safely, as required and according to organisational procedures
- conducting regular routine inspection of mechanical equipment
- identifying hazards and applying appropriate safety procedures
- gathering and recording data
- reporting anomalies

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a

water industry organisation

- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if

used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Reasons and requirements for treatment may include:

- ensuring conformity with legislation, standards and guidelines
- removing impurities and contaminants to enable discharge and re-use
- reducing impact of impurities on environment and public health
- relevant environmental protection legislation and regulations and trade waste agreements

Wastewater treatment processes may include:

- grit removal
- aeration
- screening
- sedimentation
- disinfection
- granular and membrane filtration
- thickening and dewatering
- anoxic processes
- sludge digestion
- suspended and fixed media aerobic bioreactor processes
- anaerobic processes
- lagoons and wetlands
- gas scrubbers
- biosolids and effluent disposal and re-use
- dilution
- chemical dosing
- nutrient removal
- reverse osmosis

Mechanical equipment used may include:

- pumps, including:
 - centrifugal
 - positive displacement
 - airlift
- blowers
- screens
- control valves
- electronic digital monitoring systems
- recording systems
- chemical testing and analysis equipment
- communication equipment
- manual and hydraulic equipment
- personal protective equipment

Chemicals and aids used
may include:

- lime
- sodium hypochlorite
- polymers
- aluminium and iron coagulants
- carbon sources

NWP704A Lead a project development

Modification History

NWP704A Release 2: Layout adjusted. No changes to content.

NWP704A Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required for the effective management of a complex project within the water industry. The ability to plan a project logically, control a project, manage risks and deliver quality outcomes is essential to performance.

Application of the Unit

This unit supports the attainment of skills and knowledge required for managers and senior technical practitioners from a variety of disciplines and backgrounds who are applying their skills to the management of a function, team or division within the water organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <i>bold italicised</i> text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
---	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan the project	<p>1.1 Clarify project brief with relevant personnel.</p> <p>1.2 Identify and quantify human and financial resources to support management of project.</p> <p>1.3 Assemble and brief project team.</p> <p>1.4 Negotiate and finalise organisational requirements and procedures for management of project.</p> <p>1.5 Identify and address <i>legislative requirements</i> relevant to project in the planning process.</p> <p>1.6 Develop project goals, objectives and performance indicators in consultation with relevant personnel and stakeholders and follow organisational procedures.</p> <p>1.7 <i>Plan project</i> according to organisational requirements and using appropriate <i>planning tools</i>.</p>
2 Manage the project	<p>2.1 Communicate project plan to project team and clarify and allocate resourcing and accountabilities.</p> <p>2.2 Monitor, record and report progress of project against milestones of project plan and according to organisational requirements.</p> <p>2.3 Integrate range of tasks that comprise project to ensure efficient completion.</p> <p>2.4 Consult stakeholders regarding progress of project and inform development.</p> <p>2.5 Negotiate, record and communicate required changes to project plan.</p> <p>2.6 Finalise project according to project plan and organisational procedures.</p>
3 Manage project risk	<p>3.1 Identify potential risks to successful completion of project through extensive consultation with relevant stakeholders and personnel.</p> <p>3.2 Analyse identified risks for likelihood of occurrence and their potential consequences.</p> <p>3.3 Develop risk management or control plans to eliminate or reduce potential for risk events and consequences.</p> <p>3.4 Review risk management or control plans periodically during life of the project and assess them for their adequacy, timeliness and effectiveness in risk mitigation.</p>
4 Deliver quality project outcomes	<p>4.1 Identify and record quality requirements for successful completion of project and communicate them to project team members.</p> <p>4.2 Identify and use quality management methods, techniques</p>

ELEMENT**PERFORMANCE CRITERIA**

and tools to support and manage project.

4.3 Assess outcomes of project for compliance with required quality standards.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- apply advanced project management skills
- apply quality management principles and techniques
- apply risk management principles and techniques
- use project management software and tools
- coordinate activities
- communicate effectively with a wide audience inside and outside the workplace
- plan effectively
- prepare a range of internal and external reports
- solve problems.

Required knowledge:

- technical and industry knowledge relevant to project being managed
- legislation relevant to project being managed
- project management, quality management and risk management techniques
- relevant industry trends, including emerging technologies
- infrastructure capacity and capacity planning
- organisational processes and reporting requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to lead a complex project within the water industry including:

- managing a complex project and delivering required project outcomes
- effectively coordinating activities of project team

- members to deliver required outcomes
- preparing, monitoring and revising plans
- applying principles of quality and risk management to completion of project
- communicating with stakeholders.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the

work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislative requirements may include:

- relevant federal legislation, including:
 - National Water Commission Act 2004
 - Environment Protection and Biodiversity Conservation Act 1999
- relevant state or territory legislation relating to water and resource management
- relevant state or territory legislation and regulations relating to OHS, including:
 - protective clothing and equipment
 - use of tools and equipment
 - workplace environment and safety
 - handling of materials
 - use of fire fighting equipment
 - use of first aid equipment
 - hazard control and hazardous materials and substances
 - relevant local government by-laws
- relevant government and non-government policies and regulations such as:
 - National Water Initiative
 - Murray Darling Basin Water Agreement
- relevant community planning and development agreements, such as land care agreements

Plan project to address all facets of activity, which may include:

- budgets
- timelines
- human resource requirements
- project milestones
- project accountabilities
- project reporting processes and schedules
- contingency arrangements

Planning tools used to support project:

- risk management requirements
- quality requirements
- may be:
 - proprietary software packages
 - commercial software packages
- may generate and track:
 - project milestones
 - resourcing lists
 - staffing lists
 - budgets

NWP706A Review and evaluate water and wastewater sustainability objectives

Modification History

NWP706A Release 2: Layout adjusted. No changes to content.

NWP706A Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to enable analysis and identification of solutions to issues such as the sustainable use of water, drinking water safety and quality, water recycling and the effectiveness of wastewater treatment. This requires the ability to be able to integrate technical and scientific knowledge of water conservation and recycling, power needs for different technology options, catchment management, domestic and industry requirements for different grades of water, and the environmental impact of various options chosen.

Application of the Unit

This unit supports the attainment of skills and knowledge required for senior managers, water treatment and resource planners and related senior staff.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the

competency. range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse water resource issues	<p>1.1 Analyse <i>economic</i> and <i>social issues</i> relevant to sustainable <i>water</i> use to determine implications for specific situations.</p> <p>1.2 Identify and analyse <i>community attitudes</i> to use of recycled water for their impact on future initiatives.</p> <p>1.3 Identify and analyse <i>legislation, regulations and policies</i> on <i>sustainability</i> and water recycling issues for relevance to specific situation.</p> <p>1.4 Determine <i>water sustainability objectives</i> and targets for specific situation.</p>
2 Determine treatment options for recycling	<p>2.1 Determine water catchment and groundwater protection and management principles for surface and groundwater sources, and recycled water.</p> <p>2.2 Analyse hydrometric cycle and types and percentage of water use to determine sustainability of specific water resources.</p> <p>2.3 Analyse impact of stormwater and industrial, agricultural, aquaculture and domestic water use on water quality.</p> <p>2.4 Analyse <i>sustainability issues</i> and effect of reduced and more concentrated sewage flows for a specific situation.</p> <p>2.5 Evaluate treatment options for recycling of treated wastewater and <i>alternative water sources</i> for their suitability in meeting quality standards for a <i>range of uses</i>.</p>
3 Develop environmental strategies and targets	<p>3.1 Analyse designs of <i>model sustainable water systems</i> to determine their viability in specific situations.</p> <p>3.2 Analyse costs and benefits of recycling schemes most appropriate to situation.</p> <p>3.3 Evaluate existing and planned water recycling systems against <i>Australian and international benchmarks</i>.</p> <p>3.4 Undertake risk assessment to determine strategies for managing hazards and risks.</p> <p>3.5 Recommend integrated water resource planning to achieve water sustainability objectives and targets, with consideration of costs.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- perform complex research
- analyse technical information
- analyse financial information
- analyse trend data
- research and interpret social trends
- perform relevant statistical analysis
- identify potential or actual operational problems
- undertake evidence-based short, medium and long-range planning
- prepare complex reports
- use computer systems

Required knowledge:

- political, economic and social aspects of water sustainability
- principles of cost benefit analysis
- concept of virtual water in agricultural and manufactured products
- legislative and regulatory requirements relevant to a sustainable water industry
- hydrometric cycle
- methods for evaluating risks to water quality, assets and services
- water sustainability issues and ecosystem quality
- recycling models and performance benchmarks
- water sustainability in domestic, industrial, agricultural and aquaculture contexts, including stormwater
- legislative and regulatory framework for water industry
- relevant Australian standards, international guidelines and best practice systems applicable to water sustainability

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to analyse and identify solutions to issues such as the sustainable use of water, drinking water safety and quality, water recycling and the effectiveness of wastewater treatment including:

- analysing complex technical, social and legislative

issues affecting water sustainability

- determining water and wastewater treatment options
- researching and reviewing information and developing evidence-based recommendations for the development of relevant policies relating to environmental sustainability

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions,

and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Economic issues may include:

- costs and benefits of various options
- public and private ownership
- costing models
- increased costs of new developments

Social issues may include:

- land resumption
- cost of water supply
- damage to ecosystems
- equity issues
- political exploitation

Water includes:

- water in a watercourse, lake or spring
- underground water
- overland flow water
- water that has been collected in a dam
- wastewater of domestic, commercial, industrial or agricultural origin

Community attitudes may include:

- revulsion or fear of contamination
- fear of diseases
- resistance to change

Legislation, regulations and policies relevant to the State or Territory may include:

- Environmental Protection and Biodiversity Conservation Act 1999
- relevant state and territory environmental protection legislation
- relevant water legislation and regulations
- Australian Drinking Water Guidelines
- water recycling guidelines
- water quality guidelines
- National Water Quality Management Strategy

Sustainability may include:

- replenishment of resources
- maintaining resources

- Water and wastewater sustainability objectives*** may include:
- assault on diminishing resource
 - sustainable use of water
 - drinking water safety
 - water recycling
 - long-term certainty of sources
- Sustainability issues*** may include:
- leakage
 - evaporation
 - sewer mining
 - grey water use
 - recycling
 - intelligent use
 - alternatives
- Alternative water sources*** may include:
- stormwater
 - bore water
 - brackish water
 - process water
- Range of uses*** may include:
- irrigation
 - aquaculture
 - industry
 - fire fighting
 - recreation
 - domestic
 - replenishing raw surface water or groundwater resources
- Model sustainable water systems*** may include examples that are:
- specific to locations (e.g. Australia, Singapore, Israel and California)
 - specific to industries (e.g. paper, cooling and food processing)
 - existing or planned
 - local and international
- Australian and International benchmarks*** may include:
- data from existing systems
 - published research

NWP707A Analyse and review water treatment plant technology

Modification History

NWP707A Release 2: Layout adjusted. No changes to content.

NWP707A Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to understand water quality and sustainability technology, and provide high-level advice on meeting legislative and regulatory requirements. A detailed understanding is required of the planning, design, testing and operation of advanced processes, incorporating new or novel technologies, together with the ability to identify problems and suggest viable cost-effective solutions within the constraints of legislation and regulations.

Application of the Unit

This unit supports the attainment of skills and knowledge required for senior managers, water treatment and resource planners and related senior staff.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse fundamentals of water science	<p>1.1 Analyse natural and engineered water cycles to establish their <i>components, features</i> and <i>variables</i>.</p> <p>1.2 Carry out <i>water testing</i> according to procedures in order to determine water and wastewater parameters, including nitrogen, phosphorus and microbiological indicators.</p> <p>1.3 Identify <i>substances commonly found in natural water sources</i> and analyse their <i>interactions</i>.</p> <p>1.4 Identify <i>substances commonly found in range of wastewater sources</i> and analyse their <i>environmental</i> and <i>epidemiological effects</i>.</p> <p>1.5 Identify <i>microbial species</i> found in water and wastewater and determine their activities and effects as <i>agents of disease</i> or <i>agents for removing organic matter</i>.</p>
2 Determine design features of water treatment plants	<p>2.1 Determine purpose of <i>water treatment</i> and quality standards required in providing water for human consumption, industry, agriculture and aquaculture.</p> <p>2.2 Analyse fundamentals of <i>separation processes</i> to determine their role in water treatment.</p> <p>2.3 Research microbial metabolism systems and determine their role in removing organic and inorganic constituents of water.</p> <p>2.4 Analyse <i>input and output parameters</i> of water and wastewater treatment systems.</p> <p>2.5 Determine <i>fundamental features</i> of water and wastewater <i>reticulation systems</i> to establish their role and function in water treatment.</p>
3 Analyse application of government legislation and policies to water industry	<p>3.1 Research <i>legislation and regulations</i> for Australian water industry to identify evolutionary framework and <i>forces of change</i>.</p> <p>3.2 Identify key principles and provisions of water-related legislation and regulations and analyse them for their impact on current practice.</p> <p>3.3 Analyse the Environment Protection Agency conditions for water and wastewater treatment plant licences, and Australian drinking water quality parameters to identify operational standards required.</p> <p>3.4 Identify changes required to meet legislative and regulatory requirements and communicate to relevant stakeholders.</p>

ELEMENT	PERFORMANCE CRITERIA
4 Prepare strategic advice	<p>4.1 Synthesise and evaluate design, operation and management of water treatment plants and processes.</p> <p>4.2 Consult relevant personnel to inform the framing of policy advice for the water organisation.</p> <p>4.3 Prepare and present strategic advice on current and potential policies and procedures and the design, operation and management of water treatment plants and processes.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- perform complex research
- analyse technical information
- use technology, including the internet, to access current legislative and regulatory requirements for water industry
- identify potential or actual operational problems
- undertake evidence-based short, medium and long-range planning
- communicate with employees, senior management, external industry experts and other stakeholders
- prepare complex reports
- use communication systems
- give and receive instructions.

Required knowledge:

- fundamental aspects of physics, chemistry, biology and microbiology relevant to water and wastewater treatment and requisite laboratory skills
- water sources and resources relevant to water and wastewater treatment
- substances in natural water sources and their interactions
- environmental and epidemiological effects of substances found in wastewater sources
- microbial species and effects
- purposes of water treatment
- fundamentals of separation processes and disinfection
- microbial metabolism
- input and output parameters of treatment systems
- reticulation systems and hydraulic modelling
- legislative and regulatory framework for water industry
- Environment Protection Authority requirements for treatment plant licenses and

drinking water

- OHS legislation, risk management and procedures
- relevant water treatment policies and procedures
- communication systems
- relevant Australian standards, international guidelines and best practice systems applicable to water treatment plants and plant technologies.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to understand water quality and sustainability technology, and provide high-level advice on meeting legislative and regulator requirements including:

- analysing and applying principles of water science
- analysing and applying principles associated with design of water treatment plants and processes
- reviewing and refining current practices associated with water treatment plant technologies
- preparing clear and accurate reports
- contributing to development of water treatment planning within organisation.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning

experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice

- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

- Components*** may include:
- natural water cycles, including:
 - rivers and lakes
 - artesian and aquifers
 - brackish and salt water
 - stormwater
 - engineered water cycles, including:
 - reticulation systems
 - dams
 - collection systems
 - bores and wells

- Features*** may include:
- natural water cycles:

- rainfall patterns
- size and protection
- retention time in catchment
- evaporation rate
- types of source:
 - bore
 - river
 - dam
 - engineered water cycles
- type of user:
 - domestic
 - industrial
 - aquaculture
 - agriculture
 - type of water or wastewater treatment system:
 - urban
 - non-urban
 - length and volume of collection and reticulation system

Variables may include:

- natural water cycles, including:
 - rainfall
 - temperature
 - pH, hardness and alkalinity
 - taste, odour, colour and turbidity
 - nature and quantity of total dissolved and suspended matter
 - dissolved oxygen
- engineered water cycles, including:
 - flow rates
 - industrial and agricultural uses and inputs
 - input and output parameters
 - availability and uses of recycling

Water testing may include:

- pH, chlorine, suspended solids and dissolved oxygen
- alkalinity and volatile acids
- mixed liquor suspended solids
- mixed liquor volatile suspended solids
- colour, turbidity and conductivity
- biological oxygen demand (BOD) and chemical oxygen demand (COD), total organic carbon (TOC), phosphorus (P), nitrogen (N), other ions and organic

- compounds
- Substances commonly found in natural water sources*** may include:
- identification and enumeration of bacteria, cyanobacteria and protozoa.
 - metal ions
 - salts
 - N and P
 - microorganisms and algae
 - organic and inorganic compounds producing colour, turbidity, odour or taste
 - radiation emitters.
- Interactions*** may include:
- oxidation of metal ions
 - settling of suspended matter
 - ultraviolet destruction of microorganisms
 - growth of nuisance organisms, such as cyanobacteria
- Substances commonly found in range of wastewater sources*** may include:
- toxins
 - metals
 - domestic or industrial organic matter
 - other dissolved and suspended solids
 - toxic, flammable and asphyxiating gases
 - disinfection by-products
- Range of wastewater sources*** may include:
- domestic
 - industry
 - aquaculture
 - agriculture
 - stormwater
- Environmental effects*** may include:
- serious:
 - material environmental harm to air, water or land
 - nuisance environmental harm
- Epidemiological effects*** may include:
- faecal-oral route of infection
 - infection and transmission of infectious agents
 - effects of biological, chemical or physical toxins on animals and plants
- Microbial species*** may include:
- E. Coli
 - salmonella
 - campylobacter
 - Shigella
 - Yersinia
 - protozoa
 - adenovirus
 - enterovirus
 - hepatitis virus

Agents of disease may include:

- bacteria
- viruses
- protozoa
- microbial toxins
- chemical toxins

Agents for removing organic matter may include:

- aerobic bacteria
- facultative bacteria
- anaerobic bacteria

Water treatment may include:

- coagulation
- flocculation
- sedimentation
- filtration
- disinfection
- natural systems
- designed wetlands
- lagoons
- Imhoff tanks
- small septic tanks
- bio-filters
- contactors
- activated sludge processes
- special treatment processes

Separation processes may include:

- filtration
- presses
- centrifuges
- sedimentation
- gravity settling
- flocculation
- chemically assisted processes

Input and output parameters may include:

- Biological Oxygen Demand and Chemical Oxygen Demand
- suspended solids
- biomass as mixed liquor suspended solids (MLSS) or mixed liquor volatile suspended solids (MLVSS)
- pH
- dissolved oxygen (DO)
- N, P and other chemical species
- toxins
- chlorine
- faecal coliforms, such as E. Coli
- colour

- Fundamental features*** may include:
- turbidity
 - pipe networks
 - gravity and pressure systems
 - pumps and pump wells
 - reservoirs
 - residual disinfection
 - oxygenation
 - hydraulic modelling
 - leak detection
 - leak prevention
- Reticulation systems*** may include:
- sewage collection systems
 - water distribution systems
- Legislation and regulations*** relevant to the State or Territory may include:
- Environmental Protection and Biodiversity Conservation Act 1999
 - relevant state and territory environmental protection legislation
 - relevant water legislation and regulations
 - Australian Drinking Water Guidelines
 - Water recycling guidelines
 - Water quality guidelines
 - National Water Quality Management Strategy
- Forces of change*** may include:
- community expectations
 - availability of technology
 - climatic change
 - diminishing fresh water sources

NWPNET025 Coordinate and manage maintenance and repair of network assets

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP303A Monitor and control maintenance of water and wastewater system assets.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • PC 3.1 removed

Application

This unit of competency describes the skills required to inspect asset condition, to plan for asset repairs and to monitor and report on maintenance and repair work completion. The ability to identify faults, gather data, interpret technical information, assess risks and produce technical work plans and reports are essential to performance.

This unit applies to those working as field staff with responsibility for ensuring that water collection, distribution, storage and transfer assets are regularly monitored and for conducting scheduled maintenance and repair work on assets.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, in a familiar context, while performing routine tasks ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Networks

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Analyse asset condition and determine remedial action	1.1 Schedule routine inspections of assets and monitor fault reporting. 1.2 Collect and analyse data on asset and infrastructure condition. 1.3 Determine and cost asset maintenance and repair methods. 1.4 Select, fit and use equipment including personal protective equipment.
2. Plan and prepare for asset repair	2.1 Schedule and plan work site investigations and repair activities. 2.2 Develop repair plans and procedures and communicate to all stakeholders. 2.3 Assess and record environmental and WHS risks and specify appropriate preventative measures. 2.4 Select equipment, materials, prefabricated components and fittings and make available for use on site.
3. Monitor and report maintenance activities	3.1 Monitor repair and maintenance progress and keep records. 3.2 Inspect, confirm and report completion of repair and maintenance.
4. Complete records and reports	4.1 Complete workplace records and reports. 4.2 Make recommendations which contribute to the continuous improvement and quality of the organisation's systems.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP303A Monitor and control maintenance of water and wastewater system assets.

Assessment Requirements for NWPNET025 Coordinate and manage maintenance and repair of network assets

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and solving operational problems
- undertaking calculations
- determining work requirements
- monitoring system operations and processes
- producing reports and logs
- using safety equipment and personal protective equipment
- interpreting plans and instructions
- interpreting the organisation's policies, standard operating procedures and standards for monitoring and maintenance of assets
- calculating water pressures and flows
- conducting operational and maintenance inspections
- monitoring fault reports
- collecting and analysing operational and mechanical data
- identifying and assessing work methods effectiveness
- planning investigations and repairs
- developing repair procedures
- assessing risks and specifying preventive methods
- selecting equipment, materials, prefabricated components and fittings

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- environmental aspects of water distribution systems and infrastructure
- WHS procedures
- lock out procedures for mechanical and electrical installations
- cleaning and protection of assets
- policies and standard operating procedures for monitoring and maintenance of assets
- relevant utilities and service bodies
- communication systems
- environment, landscape and ground structure of work area
- risk factors and potential hazards involved with water pressures and flows
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of supply infrastructure
- system pipes and fittings
- pumping and valving systems
- system layout, process, operation
- gravity systems
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for NWPNET042 Monitor and operate wastewater collection and transfer systems

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- responding to and correcting operational problems
- interpreting plans, charts, service search diagrams, instructions, policies and specifications
- controlling system operations
- identifying control system faults
- monitoring and coordinating the operation of wastewater collection and/or wastewater transfer systems
- preparing equipment for monitoring and inspections
- monitoring the system and collecting, analysing and reporting data according to organisational procedures
- reviewing samples and records
- adjusting flow regulating systems
- monitoring volumes and flows
- controlling, integrating and optimising processes
- identifying and reporting process faults
- measuring wastewater flows
- completing relevant workplace documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- system hydraulics
- coordination and control of processes
- system layout and processes
- environmental aspects of wastewater collection and transfer systems
- infiltration and inflow sources
- illegal inflows
- discharges
- disinfection and chemical use
- policies, standard operating procedures and legislation
- relevant utilities and service bodies
- communication systems
- risk factors and potential hazards involved with wastewater pressures and flows
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of collection and transfer systems
- pipes and fittings
- gravity systems
- pumping and valving systems
- control systems
- forces including gravitational, valve operation, hydraulic and pumps

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP268B Monitor, operate and report chlorine disinfection systems.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • Elements 2 and 3 reworded • One new PC added to Elements 1 and 3 • PC 2.3 removed • PC 3.1 revised and renumbered • PC 2.4 and 3.3 renumbered • PC 3.2 and 4.1 revised

Application

This unit describes the skills required to monitor and operate hypochlorite disinfection systems and report on process quality control. This includes the skills required to working safely with sodium hypochlorite solutions and calcium hypochlorite solids, including their safe handling, transport and storage and implementation of emergency response procedures.

This unit applies to those working as operational staff with specific responsibility for hypochlorite disinfection systems in water and wastewater treatment plants.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and handling of dangerous goods.

Those undertaking this unit would work under supervision, while performing routine tasks, in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Treatment

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Determine work requirements from job specification and plans. 1.2 Select and check equipment and hypochlorite supplies to meet safety requirements of task and site. 1.3 Select, fit and use personal protective equipment. 1.4 Handle and store hypochlorite chemicals to maximise shelf life and reduce loss of available chlorine. 1.5 Conduct the percentage available chlorine test.
2. Monitor process performance	2.1 Monitor hypochlorite disinfection <i>processes</i> according to agreed schedule and procedures. 2.2 Collect samples and conduct process tests. 2.3 Make process adjustments as required to maintain effectiveness of hypochlorite disinfection.
3. Apply chemical dosing	3.1 Prepare and apply hypochlorite chemicals. 3.2 Control hypochlorite <i>dosing</i> to maintain required residual.
4. Complete documentation	4.1 Maintain information relating to hypochlorite supply and usage. 4.2 Collect and record process data. 4.3 Report observations outside defined parameters for further action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

Processes include:	<ul style="list-style-type: none"> sodium hypochlorite solution sodium hypochlorite
Technologies include:	<ul style="list-style-type: none"> calcium hypochlorite granules calcium hypochlorite tablets
Dosing procedures include:	<ul style="list-style-type: none"> chlorinator shutdown, start up and isolation purging operations leak testing dosing pump checks

Unit Mapping Information

This unit supersedes and is equivalent to NWP268B Monitor, operate and report chlorine disinfection systems.

Assessment Requirements for NWPTRT052 Operate and control hypochlorite disinfection processes

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least one type of process, in at least one type of technology and in at least one type of dosing procedure listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying policies, standard operating procedures and regulatory standards
- performing work-related calculations
- identifying and responding to process faults and control system faults
- identifying hazards
- performing hypochlorite tests and chlorine residual sampling and testing
- interpreting safety data sheets (SDS)
- monitoring, operating and reporting on hypochlorite disinfection systems
- selecting and using appropriate tools and equipment, including personal protective equipment
- collecting and reporting process data
- preparing and applying hypochlorite dosing safely
- performing process calculations, including at least one of:
 - feed rate
 - dosage
 - Ct

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- properties and chemistry of hypochlorite chemicals
- effects of pH, time, temperature, UV exposure and impurities on hypochlorite breakdown
- microbiological guidelines
- reactions with water to produce hypochlorous acid/hypochlorite ion
- impact of pH
- chlorine demands, including:
 - ammonia
 - natural organic matter (NOM)
 - turbidity
 - iron, manganese and nitrite
- disinfection by-products (DBP)
- breakpoint
- contact time
- hypochlorite dosing system layout for sodium hypochlorite and/or calcium hypochlorite dosing systems
- hazardous substances handling
- risk factors and potential hazards associated with hypo chlorination
- work-related hypochlorite calculations
- hypochlorite dosing processes
- automatic feed rate control systems
- SDS

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Some components of this unit require assessment in a workplace environment therefore the unit is not suitable for fully external or electronic based assessment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for NWPTRT054 Operate and control chloramination processes

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- operating control and chemical dosing equipment
- performing chloramination process calculations including at least one of:
 - chlorine and ammonia dose rate
 - chlorine to ammonia ratio
 - dichloramine concentration
- collecting samples and conducting tests including at least one of:
 - total chlorine
 - free chlorine
 - monochloramine
 - ammonia and hypochlorite strength
 - pH
- analysing tests
- identifying and reporting process and operational faults
- monitoring chloramination systems
- making appropriate system adjustments including at least one of:
 - flow rate
 - chlorine feed rate
 - ammonia feed rate
 - chlorine to ammonia ratio
 - calibration of chemical dosing equipment
- preparing and applying chloramination chemical dosing, including at least one of:

- liquefied chlorine gas
- sodium hypochlorite
- anhydrous ammonia
- aqua ammonia
- pH correcting chemicals including lime soda ash
- sodium hydroxide

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- microbiological aspects of water quality
- chloramination process theory
- chlorine and ammonia dosing equipment
- operational problems including nitrification
- lockout procedures for mechanical and electrical installations
- risk factors and potential hazards associated with chloramination processes
- equipment operation, capacity and limitations
- control and communications systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Some components of this unit require assessment in a workplace environment therefore the unit is not suitable for fully external or electronic based assessment.

Consideration must be given to holistic assessment for this unit. Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for NWPTRT061 Operate and control wastewater processes

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least one of the processes listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- conducting routine plant inspections
- interpreting safety data sheets (SDS)
- applying basic mathematical formulae
- completing logs
- determining chemical dosing requirements

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- sources of wastewater
- water cycle
- basic hydraulics and organic loading in wastewater plants
- basic chemistry and microbiology
- types of components
- relevant technologies
- weather influence on wastewater plants
- odour control
- physical, chemical and microbiological characteristics and operating principles relating to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plant processes

- major chemicals and equipment used
- risk factors and potential hazards relating to wastewater treatment
- chemical and biological principles that form the basis of wastewater treatment
- chemical dosing processes
- relevant guidelines and standards
-

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPTRT062 Operate and control reclaimed water irrigation

Modification History

Release	Comments
1	<p>This unit was released in NWP National Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP362B Monitor, operate and control reclaimed water irrigation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes

Application

This unit describes the skills required to operate and control reclaimed water irrigation and the use of reclaimed water for irrigation practices.

This unit applies to those working as staff members with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, performing routine tasks in a familiar context, ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Treatment

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess sites for reclaimed water irrigation	1.1 Identify soil/water interactions and soil properties important for plant growth. 1.2 Identify soil sampling sites, collect samples and conduct soil testing. 1.3 Classify soils using field texture, pH and structure analysis. 1.4 Monitor and determine the water holding capacity of the soil.
2. Assess quality of reclaimed water for irrigation	2.1 Sample and test reclaimed water and interpret quality parameters. 2.2 Determine crops suitable for the quality of reclaimed water and site conditions.
3. Implement reclaimed water irrigation	3.1 Identify basic features of irrigation systems. 3.2 Operate and maintain irrigation equipment. 3.3 Identify and apply irrigation scheduling options for reclaimed water. 3.4 Produce water budgets using crop factors and climate data. 3.5 Apply irrigation water and collect and monitor tail water or runoff.
4. Respond to water or soil quality issues	4.1 Develop irrigation management options to respond to water quality issues. 4.2 Identify and apply requirements and options for soil ameliorants. 4.3 Monitor infiltration and drainage.
5. Compile reclaimed water irrigation records	5.1 Compile reports from system data. 5.2 Report observations outside defined parameters for further action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP362B Monitor, operate and control reclaimed water irrigation.

Assessment Requirements for NWPTRT062 Operate and control reclaimed water irrigation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP National Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- monitoring and managing soil
- solving operational problems
- accessing, interpreting and applying relevant legislation
- apply environmental policies, plans and procedures
- assessing environmental risks at the work site
- identifying soil groups
- using safety and personal protective equipment
- sampling and testing soil and water
- monitoring, operating and controlling reclaimed water irrigation
- analysing critical aspects of reclaimed water reuse management relating to the project or site
- implementing reclaimed water reuse irrigation
- identifying environment, health and safety risks and impact on soil, stock and operators
- applying environmental procedures
- participating in and contributing to reviews of reclaimed water reuse procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- key principles of irrigation practices, including irrigation scheduling

- key characteristics of reclaimed water
- relevant legislative requirements
- standard operating procedures
- primary agencies involved in drinking water quality management
- water quality performance indicators
- an overview of the water supply system
- water hazardous agents and preventative strategies
- community and agency roles and responsibilities in monitoring water quality
- best management practices for the use of reclaimed water for irrigation purposes
- reclaimed water usage licensing procedures and requirements
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site or plant
- interpretation and use of material safety data sheets
-

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPREG412A Gather and manage evidence

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor, evidence guide and range statement edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake all activities involved in gathering and managing evidence. It includes planning and activating evidence collection, identifying persons of interest, collecting and storing evidence, and summarising and reporting on evidence.

Licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to individuals in a range of regulatory work environments whose role includes gathering and managing physical or documentary evidence from a range of sources such as search and seizure activities, online research, interviews with persons of interest, audits

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and activate evidence collection	1.1 <i>Evidence</i> requirements are researched to establish the type and standard of evidence and <i>resources</i> required when the size of investigation and/or type of offence/s require this.
	1.2 Approval to commence investigation is obtained in accordance with organisational policy and procedures.
	1.3 Plan of action is agreed in accordance with organisational policy and procedures, and communication and review processes are established.
	1.4 Evidence recording process is put in place in accordance with organisational guidelines and legislative requirements.
2. Identify persons of interest	2.1 Possible witnesses are identified, located and contacted to request that they provide information.
	2.2 Particulars of witness/es are documented according to correct evidentiary procedures.
	2.3 <i>Responsible parties</i> are identified, located and their <i>particulars</i> are recorded in accordance with correct evidentiary procedures.
	2.4 Responsible parties are contacted for interview in accordance with organisational procedures and legislative requirements, and informed of the nature of the investigation, if required by law.
3. Collect and store evidence	3.1 <i>Authority to search</i> is obtained/verified, involving other organisations where necessary.
	3.2 Evidence is identified, <i>collected, labelled</i> , recorded and preserved according to exhibit management principles for later use in proceedings.
	3.3 Evidence is <i>managed</i> in accordance with the principles of continuity of possession, <i>legislation and standards</i> .
	3.4 Corroboratory evidence is collected, documented and preserved.
	3.5 <i>Expert</i> skills and knowledge are accessed when necessary to

ELEMENT	PERFORMANCE CRITERIA
4. Summarise and report on evidence	<p>further assist staff in areas where they cannot or are not authorised to act.</p> <p>3.6 Constant review is implemented during evidence collection to enable gaps and inadequacies to be addressed in accordance with organisational policy and procedures.</p> <p>4.1 Verbal and written summaries/<i>reports</i> are made in accordance with legislative and organisational requirements.</p> <p>4.2 Outcomes of investigation are entered into data management systems according to organisational guidelines.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- organising and problem solving
- liaising and negotiating
- communicating with people from diverse backgrounds
- responding to diversity, including gender and disability
- making comparisons and exercising judgment about facts in written materials
- report writing using formal structures and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of gathering and managing evidence

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- rules of evidence relevant to the jurisdiction
- evidence legislation relevant to the jurisdiction
- legislation which contains the offence/s under investigation
- document management systems
- exhibit management principles
- organisational policies, guidelines and regulations
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to gathering and management of evidence

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms consistency of performance in gathering and managing evidence.

This will include evidence of:

planning for, collecting, storing and reporting on evidence (including through interview) for at least three actual or simulated situations on three separate occasions or for three different situations/contexts

adhering to legal, ethical and organisational requirements relating to gathering and managing evidence.

Context of specific resources for assessment

Assessment must ensure access to a real or simulated workplace environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered while gathering and managing evidence, including coping with difficulties, irregularities and breakdowns in routine.

Access is required to resources such as:

- applicable legislation, policies and procedures
- case studies and workplace scenarios to capture the range of requirements for situations likely to be encountered

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit of competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- written or oral questions
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

Guidance information for assessment

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Evidence may include:

- real, oral, computer data or documentary
- photographic or video
- new evidence which results in reopening an investigation
- requirements identified in an evidence guide or evidence matrix

Establishing resource requirements may require:

- an estimate of the costs of gathering evidence

Responsible parties may include:

- suspects
- alleged offenders
- obligation holders
- employers
- principal contractors
- owners
- operators

Particulars of responsible parties may include:

- personal details
- identification of assets and entitlements for criminal or civil recovery purposes

Authority to search may include:

- warrant already issued
- no requirement for search warrant under powers of enabling legislation
- affidavit
- confirming the legal basis for the search and seizure

- appropriate information to ground a warrant
 - requirement to obtain search/seizure warrant before proceeding
 - organisational approval/s to undertake search and seizure
 - completion/submission of organisational documents relating to planned search and seizure
 - the need for assistance from other agencies/jurisdictions
 - referral to other agencies
- Evidence collection*** may include:
- voluntary submission
 - acquisition through legislative powers
 - following new lines of inquiry suggested during the process of gathering evidence
 - cautions
 - safeguards
- Labelling of evidence*** may include:
- date
 - time
 - location
 - details of person/s giving the evidence
 - person/s collecting the evidence
- Evidence management*** may include:
- systematic recording (such as dating and numbering)
 - indexing and labelling system
 - using written or electronic database systems
 - referral to prosecution organisations at any stage
 - constant reviews during an investigation
 - restricting access to evidence
 - and must follow the principals of chain of evidence/rules of evidence
- Legislation and standards*** may include:
- relevant Commonwealth/State/Territory legislation and guidelines
 - ethical and conduct standards
 - judicial standards which must be followed in evidence collection to ensure the continuity of possession and admissibility of the evidence
 - organisational policies and procedures
- Expert skills and knowledge*** may include:
- police, other law enforcement agencies
 - private provider
 - standards setting organisation
 - input such as:
 - search warrant
 - surveillance

Reports may be:

- scientific analysis
- to finalise case
- to inform team members and management
- to refer to other sections or organisations
- to prepare for final summation in proceedings
- edited and security coded for a particular audience

SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Maintain stock handling and storage

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Maintain cleanliness of stock handling and storage areas.
- 1.2.Ensure correct environmental conditions for storage of

- areas. perishable and other stock to prevent loss or damage as required.
- 1.3.Remove and dispose of waste to minimise safety risks and environmental impacts.
 - 1.4.Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.
 - 2.1.Check incoming stock quantities against order documentation.
 - 2.2.Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.
 - 2.3.Record stock delivery, and report discrepancies with orders as required.
 - 2.4.Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.
 - 2.5.Store or display stock promptly in designated location.
 3. Replenish stock levels.
 - 3.1.Rotate, replenish and present stock according to organisational requirements for stock levels.
 - 3.2.Record stock waste or shrinkage according to organisational procedures.
 - 3.3.Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - plain English documents that outline organisational policies and procedures for stock control
 - basic order and delivery documentation and stock labels.
- Numeracy skills to:
- calculate stock levels.
- Planning and organising skills to:
- complete stock control activities in a logical and time efficient sequence.
- Technology skills to:
- use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
 - receive and process incoming stock
 - store retail stock
 - maintain retail stock levels
 - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
 - stock quality is poor
 - stock quantity errors
 - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
 - rotation and replenishment
 - product life cycle
- organisational stock control policies and procedures for:
 - receiving stock from suppliers
 - recording incoming stock
 - recording and reporting stock discrepancies and quality issues
 - recording stock waste and shrinkage
 - stock quality standards
 - unpacking, storage and display of stock
 - damaged or missing stock

- key features of retail products that relate to handling and storage:
 - handling techniques to minimise damage
 - general care
 - optimum storage conditions
 - features of damaged or spoiled stock
 - correct disposal methods
- safe manual handling techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
 - delivery dockets
 - orders
 - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRV002 Control stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor stock receipt and dispatch.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.
1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

- correctly.
- 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
 - 1.4. Act on variations to quantity and quality of delivered stock.
 - 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.
 - 2.1. Monitor stock and maintain stock at required levels.
 - 2.2. Maintain, monitor and adjust stock reorder cycles as required.
 - 2.3. Provide clear information to team members about individual stock recording responsibilities.
 - 2.4. Maintain stock storage and movement records.
 - 2.5. Record and report stock discrepancies.
 - 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.
 - 3.1. Process and raise stock orders according to organisational procedures.
 - 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
 - 3.3. Liaise with suppliers to ensure continuity of supply.
 - 3.4. Resolve routine supply problems or refer to appropriate personnel for action.
 - 3.5. Distribute stock within the organisation according to required allocations.
 - 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.
 - 4.1. Regularly check storage of stock and ensure its protection.
 - 4.2. Identify, record and report stock losses.
 - 4.3. Identify avoidable losses and establish reasons for them.
 - 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.
 - 5.1. Explain procedures for stocktake and cyclical counts to team members.
 - 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
 - 5.3. Provide team members with clear directions for performance of each task.
 - 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.
Numeracy skills to:	<ul style="list-style-type: none">calculate:<ul style="list-style-type: none">supplier costs and complex order costscomplex details of stock on hand and stock losses and produce complex numerically-based reportsreconcile incoming stock and invoices against purchase orders.
Technology skills to:	<ul style="list-style-type: none">use business technology for inventory management.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
 - receipt
 - dispatch
 - ordering
 - stock level monitoring
 - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - receipt and dispatch of goods, including inspection for quantity and quality
 - stock ordering and reordering
 - stock replenishment
 - stock rotation
 - reporting of stock discrepancies, damage and loss
 - safe transport, handling and storage of goods
 - stock control
 - stocktaking and cyclical counts
 - pricing, labelling and packaging
 - stock security
- key aspects of legislation and codes of practice relevant to stock control:
 - Australian Consumer Law
 - Work Health and Safety (WHS)

- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
 - rotation and replenishment
 - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to coordinate store visual merchandising activities and ensure adherence to organisational standards, policies and procedures for the display of merchandise.

It applies to individuals working in frontline roles in a diverse range of retail industry sectors and business contexts that display retail products for sale. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Coordinate visual merchandise requirements.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Access and interpret organisational visual merchandising guidelines, and policies and procedures.
- 1.2. Communicate visual merchandising standards and display

- requirements to team members.
- 1.3. Plan appropriate timing for producing and dismantling visual merchandise displays.
 - 1.4. Communicate roles and responsibilities for visual merchandising to team members.
 - 1.5. Plan and coordinate promotional and special event displays as directed by management.
2. Supervise visual merchandise activities.
 - 2.1. Supervise construction and maintenance of displays to achieve balance and visual impact.
 - 2.2. Ensure display information accurately depicts product or service being promoted.
 - 2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow.
 - 2.4. Ensure displays meet organisational standards and visual merchandise guidelines.
 - 2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.
 3. Review impact of visual merchandise activities.
 - 3.1. Evaluate promotions or special event displays and determine impact on sales results.
 - 3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Problem solving skills to:

- overcome difficulties relevant to the display of merchandise.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- for each of the above visual merchandising activities:
 - communicate requirements with team members
 - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
 - types of displays and their impact

- display location
- display lighting
- display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
 - customer complaints
 - profitability
- safe work practices for displaying merchandise with particular emphasis on:
 - safe use of equipment
 - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
 - price
 - features
 - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
 - organisational visual merchandise display guidelines
 - organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
 - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- team members; these can be:
 - individuals in an industry workplace, or

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Retail Financials

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Balance and secure takings.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Perform register or terminal balance at designated times.
- 1.2.Separate cash float from takings prior to balancing and secure takings.

- 1.3. Supply change to register or terminal and accurately record.
 - 1.4. Obtain and interpret register or terminal reading or print-out.
 - 1.5. Secure cash and non cash documents according to organisational procedures.
2. Reconcile takings.
- 2.1. Count cash accurately.
 - 2.2. Calculate non cash documents accurately.
 - 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
 - 2.4. Investigate or report discrepancies between register or terminal reading and sum of cash and non cash transactions to relevant personnel.
 - 2.5. Record takings and file records according to organisational procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
 - balance a register or terminal on three occasions with complete accuracy
 - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
 - identify and resolve three different types of balancing discrepancies
 - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - balancing
 - clearance of terminal and transference of tender
 - recording takings
 - consumables required by system
 - security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- organisational policies and procedures for non-cash transactions:
 - credit cards
 - EFTPOS

- vouchers
- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
 - cash handling
 - cash float
 - operation of point-of-sale equipment
 - register or terminal balance
 - security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXCLM402 Manage store facilities

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXCLM002A Manage store facilities.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves managing the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts, and identifying and locating facilities requirements.

The unit covers the application of store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment.

Application of the Unit

This unit applies to staff with managerial responsibility in a retail environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Manage store maintenance program.	<p>1.1. Monitor and maintain premises, fittings, fixtures and equipment, according to <i>store policy and procedures</i> and <i>relevant legislation</i>.</p> <p>1.2. Identify deficiencies in store maintenance procedures and take remedial action as required.</p> <p>1.3. Obtain <i>expert or specialist advice</i> as required, according to store policy.</p> <p>1.4. Initiate contingency plan within scope of authority in the event of maintenance problems.</p>
2. Manage retail equipment maintenance.	<p>2.1. Develop and implement procedures to ensure retail equipment is maintained according to store policy.</p> <p>2.2. Monitor and implement maintenance program for retail equipment, according to manufacturer design specifications and store policy.</p> <p>2.3. Identify and rectify equipment faults where possible, without undue delay.</p> <p>2.4. Report equipment faults or failures, according to service agreements and store policy.</p>
3. Negotiate maintenance contracts.	<p>3.1. Negotiate maintenance <i>contracts</i> with contractors and suppliers according to store policy and procedures.</p> <p>3.2. Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to <i>relevant personnel</i>.</p> <p>3.3. Monitor maintenance procedures to ensure products and tasks meet contract specifications.</p>
4. Identify facilities and space requirements.	<p>4.1. Identify facilities and space requirements to reflect business needs and volume, according to store policy and budget requirements.</p> <p>4.2. Locate suitable facilities and space to facilitate expansion or change of use in line with store policy and procedures.</p> <p>4.3. Consult, as required, with senior manager or business owner to determine optimum strategy for store space and location.</p>

4.4. Maximise use of space, with consideration to existing configuration, to optimise the merchandising of existing and incoming stock.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - ensure listening and understanding
 - negotiate contracts and relay contractual requirements to staff
 - obtain expert or specialist advice
 - report faults
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- negotiation skills to negotiate maintenance contracts with contractors and suppliers
- literacy and numeracy skills to:
 - apply accounting processes and record data
 - develop, document and record procedures
 - estimate measurements and volumes
 - maintain records
 - read and interpret manufacturer instructions
 - work within a budget

Required knowledge

- store policy and procedures in regard to:
 - maintenance of store facilities
 - maintenance of retail equipment
- maintenance contract terms and options
- contract specifications
- relevant legislation and statutory requirements relating to managing store facilities, including:
 - work health and safety (WHS) legislation
 - food safety legislation and regulations
- relevant industry codes of practice relating to managing store facilities
- principles and techniques in:

- monitoring performance of contracts
- negotiating, in particular contract negotiation
- interpersonal communication

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and uses space and facilities effectively
- evaluates and reports on effectiveness of maintenance contracts.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - maintenance contracts
 - store policy and procedures on maintenance of facilities, and contract negotiation
 - relevant legislation and statutory requirements
 - WHS
 - legislation and industry codes of practice
- a team
- equipment and technology.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- case study or research report
- written or verbal questioning to assess knowledge and understanding

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Store policy and procedures*** in regard to:
- store maintenance
 - facilities management
 - reporting mechanisms
 - WHS
 - food safety.
- Relevant legislation*** may include:
- federal, state or territory and local legislation
 - food safety regulations
 - WHS.
- Expert or specialist advice*** may be sought regarding:
- point-of-sale terminals
 - EFTPOS terminals
 - computers, scanners and printers
 - pricing equipment
 - electronic bar coding equipment
 - portable data entry
 - electronic ordering equipment
 - wrapping and packing equipment
 - equipment for carrying or moving merchandise
 - equipment for storage of merchandise, including refrigerators
 - weighing machines
 - thermometers
 - security tag systems
 - trolley return equipment
 - fixtures and fittings
 - food preparation equipment.
- Faults may be ***reported***:
- verbally
 - in writing
 - by email
 - to service personnel

- to contractors
 - to relevant managers
 - to supervisor.
- Contracts:**
- may be negotiated internally and externally
 - may involve:
 - quality standards
 - building maintenance services
 - cleaning
 - security
 - electrical services
 - plumbing services
 - equipment maintenance.
- Relevant personnel** may include:
- managers
 - supervisors
 - specialist staff.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop an electronic sales strategy.	1.1. Determine online <i>sales strategy</i> . 1.2. Confirm performance indicators for online sales strategy. 1.3. Set online sales budget. 1.4. Establish <i>mechanisms to collate and report</i> online sales data. 1.5. Maximise conversion of <i>customer contact</i> into improved sales through an online sales strategy.
2. Develop an electronic service strategy.	2.1. Establish impact of online service strategy on market share. 2.2. Assess impact of service strategy on <i>suppliers</i> . 2.3. Assess appropriateness of the existing product and service profile and range as part of the online service strategy. 2.4. Determine means to acquire <i>customers</i> online. 2.5. Determine means to improve retention of <i>online customers</i> . 2.6. Establish revenue benefits of an online service strategy. 2.7. Determine means to use <i>information and communication technologies</i> to improve customer satisfaction.
3. Optimise retail web presence.	3.1. Integrate sales and service strategies. 3.2. Confirm customer segments. 3.3. Determine personal preferences and needs of customers within market segment on an ongoing basis. 3.4. Establish pricing rules for online products and services. 3.5. Ensure web presence attracts target customers. 3.6. Construct <i>web presence</i> and systems to permit customer preferences and needs to be determined in an ongoing manner.
4. Build relationships with online customers.	4.1. Analyse customer relationship management systems and models. 4.2. Manage online relationships to retain customers. 4.3. Manage sales and service strategies to reinforce relationships with online customers. 4.4. Collect <i>diagnostic data</i> to support the delivery of services to meet customer behaviours and expectations. 4.5. Share <i>strategic data</i> on customer behaviour with vendors and web designers.

4.6. Optimise loyalty of online customers.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- analytical skills to:
 - determine online customer preferences and needs
 - seek out value adding opportunities
 - identify special events and anticipating customer demands
- planning and management skills to:
 - benchmark the positioning of major competitors for online sales and services
 - establish systems to measure the ability of online strategies to meet specific customer requests and preferences
 - implement joint online sales and service plans with business partners
 - develop online sales and service reports
 - provide recommendations for improving online sales and service
- literacy and numeracy skills to:
 - interpret diagnostic and strategic marketing data
 - generate reports

Required knowledge

- customer relationship management systems
- data collection and processing technologies, techniques and tools
- means to share data with suppliers and business partners, according to legal provisions and business policies
- impact of sales and service systems on operational cost efficiencies
- impact of online customer retention and retrieval strategies on revenue
- analysis and reporting requirements for a range of online customer sales and service strategies
- strategies that reinforce online service relationships
- business policy and procedures that can hinder capacity of online systems to meet customer preferences
- relevant privacy, world wide web standards, commercial law and legislation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sales and service targets are set according to all factors affecting online markets and product or service delivery
- online market share is determined and maximised through implementation of agreed strategy
- accurate and careful research on the basis for online positioning
- analysis of the impact of web presence on business relationships
- online sales and service strategy designed to maximise customer retention and brand loyalty
- online customers preferences are identified
- establishes data collection and processing tools and techniques that can determine current and future online service and sales strategies.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - business and marketing plans
 - industry codes of practice
 - information and performance data on existing business model and IT infrastructure
- information on:
 - markets
 - competitors
 - products and services
 - suppliers
 - new technology.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- a research report
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Sales strategy may vary according to:

- product or service range
- marketing focus
- target market
- duration of campaign
- business policy and procedures in regard to selling products and services
- form of web presence and level of e-commerce readiness
- current and emerging applications and technology
- territory coverage
- industry codes of practice
- market position
- planning cycles and timing
- cost and price analysis.

Mechanisms to collate and report online sales data may include:

- online traffic monitors
- online customer registration
- inventory tracking
- online customer account management.

Customer contact may occur

- email
- post

via:

- newsletters
- telephone
- face-to-face.

Arrangements with *suppliers* may relate to:

- commercial enterprises
- public agencies or organisations
- governments
- community and not-for-profit organisations
- internal
- delivery of products
- provision of services
- maintenance and support agreements
- leasing agreements and consultancies
- research and development.

Customers may include:

- new or repeat contacts
- internal and external contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- business customers or individuals
- domestic or international customers.

Means to retain or acquire *online customers* may include consideration of:

- retention campaigns and programs
- resource planning
- sales strategies
- pricing strategies
- promotion and distribution strategies
- retention and loyalty programs
- web search and access relationships
- competitor activities
- online customer preferences and buying behaviours.

Information and communication technologies may include:

- personal computers or terminals (stand-alone or networked)
- scanning equipment
- bar coding equipment
- point-of-sale terminals
- hand-held equipment
- software, including:
 - word processing
 - databases
 - spreadsheets
 - financial

Web presence may include:

- inventory
- electronic data interchange (EDI).
- website
- advertising
- web search and access relationships
- referring links
- email.

Diagnostic data may be:

- qualitative
- quantitative.

Strategic data may include:

- response times
- scalability
- traffic
- security
- customer demographics
- customer confidence
- customer expectations.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Control costs.	<p>1.1. Implement cost reduction measures according to <i>store policy and procedures</i>.</p> <p>1.2. Assess and interpret <i>information</i> on costs and <i>resource</i> allocation.</p> <p>1.3. Encourage <i>team members</i> actively to control costs in their areas of responsibility.</p> <p>1.4. Promptly implement recommendations for improving cost reduction or <i>communicate to relevant personnel</i>.</p>
2. Control budget.	<p>2.1. Monitor and maintain expenditure within budget targets according to store policy.</p> <p>2.2. Compare actual income and expenditure to budget targets at regular intervals, according to store policy.</p> <p>2.3. Monitor, analyse and compare gross profit and loss figures by department or section and store, with budget targets.</p> <p>2.4. Monitor and analyse net profit figures, including floor space profitability, according to budget targets.</p> <p>2.5. Monitor and analyse stock turnover figures according to budget targets.</p> <p>2.6. Promptly inform relevant personnel, where potential occurs for budget under or overspend.</p> <p>2.7. Take prompt corrective action where significant deviations from budget occur.</p> <p>2.8. Negotiate necessary changes or allocations to agreed budget in advance of requirement.</p> <p>2.9. Ensure modifications to existing budgets are authorised according to store policy.</p>
3. Propose expenditure.	<p>3.1. Ensure estimates of costs and benefits are supported by valid, relevant information.</p> <p>3.2. Ensure final recommendations are supported by realistic alternatives and contain accurate, clear <i>proposals</i>.</p> <p>3.3. Ensure recommendations clearly indicate net benefits over designated timeframe and related changes in operations.</p> <p>3.4. Clarify contentious issues by further explanation.</p>

- 3.5. Compare estimates to actual costs and benefits to improve future proposals.
4. Maintain store accounting systems.
- 4.1. Manage and maintain store policy and procedures in regard to **record-keeping systems**.
- 4.2. Monitor and maintain store systems for recording sales figures, revenue and expenditure.
- 4.3. Monitor and maintain systems for recording and retrieving financial, personnel and payroll information as required by store policy.
5. Prepare store sales budgets.
- 5.1. Maintain store policy and procedures in regard to preparation of **budget or target figures**.
- 5.2. Compare, analyse, document and report budget and actual sales revenue and expenditure figures, according to budget targets and store policy.
- 5.3. Maintain accurate records on past sales budgets or targets according to store policy.
- 5.4. Present proposed budgets or targets accurately and concisely.
- 5.5. Justify variations to proposed targets and report according to store policy.
6. Negotiate budgets.
- 6.1. Conduct budget negotiations within a set timeframe and in a manner likely to promote good relationships.
- 6.2. Ensure budget negotiations reflect the overall store policies and objectives relevant to the manager's area of responsibility.
- 6.3. Seek clarification, where areas of uncertainty or disagreement occur.
- 6.4. Inform all relevant personnel promptly of budget decisions.
- 6.5. Present proposals clearly, concisely, in an appropriate form, and emphasising benefits to store operation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - encourage team members to control costs
 - provide information to relevant personnel where potential occurs for budget under or overspend
 - negotiate budgets and provide information on budget decisions through clear and direct communication
 - ask questions to identify and confirm requirements

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- time management skills to prepare, negotiate and complete budgets within set timeframes
- literacy and numeracy skills to:
 - write and present reports
 - compile and analyse budgetary figures

Required knowledge

- store policy and procedures in regard to:
 - financial management
 - resource utilisation
- store revenue
- capital and overhead costs
- interest rates
- pricing policies, including GST requirements
- cost of stock, materials and equipment
- staffing costs
- operational costs
- principles and techniques in:
 - interpersonal communication
 - monitoring resource utilisation and costs
 - analysing efficiency and effectiveness
 - cost-benefit analysis
 - differential analysis
 - risk analysis

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- consistently negotiates, develops and implements store budgets according to store policy and procedures
- monitors, analyses and reports on income and expenditure against budgets according to store policy and procedures
- manages and maintains accurate accounting systems according to store policy and procedures
- develops and maintains store policy and procedures in

regard to store sales budgets or targets.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- store or sample policy and procedures in regard to financial management
- an accounting system
- budgetary information
- a team involved in budget control.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research project
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- financial management
- reporting mechanisms.

Information may include:

- resource utilisation
- capital and overhead costs
- interest rates
- stock, materials and equipment
- staffing levels
- operational costs.

Information may be obtained by:

- direct observation
- written reports
- numerical data.

Resources may include:

- people

- materials
 - equipment and technology
 - finances
 - time.
- Team members*** may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Communication*** may be:
- formal and informal
 - with individuals or groups
 - written, faxed, emailed or spoken.
- Relevant personnel*** may include:
- relevant managers
 - supervisor
 - team leader.
- Proposals*** may include:
- profitability
 - productivity
 - quality of service
 - environmental impact
 - working conditions
 - working relationships
 - team motivation
 - long-term goals
 - short-term goals.
- Record keeping systems*** may include:
- manual
 - computerised.
- Budget or target figures*** may encompass:
- sales
 - cash flow
 - net profit
 - payroll
 - staff expenditure
 - capital
 - maintenance
 - advertising and promotion.

SIRXINV004A Buy merchandise

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit

Application of the unit

This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Nil

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse market.	<p>1.1 Identify and analyse <i>store merchandise and marketing policy and procedures</i>.</p> <p>1.2 Monitor <i>customer requirements</i> formally and informally in order to evaluate market trends and customer needs.</p> <p>1.3 Research new products and services.</p> <p>1.4 Identify, evaluate, implement and review opportunities to improve sales.</p> <p>1.5 Monitor <i>merchandise range</i> to identify the demand for individual items and seasonal variations.</p> <p>1.6 Monitor market competition.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Analyse factors affecting stock levels and range requirements.	2.1 Apply mathematical calculations to measure analyse and report on existing and potential stock loss and dissipation and its <i>impact on business operations</i> . 2.2 Analyse store or department sales figures to determine contribution rates of product lines. 2.3 Determine store or department space requirements and brand product mix according to store policy. 2.4 Determine future directions for merchandise ranges according to store policy.
3 Plan merchandise ranges.	3.1 Develop and implement buying plan according to outcomes of analysis and store policy. 3.2 Determine future directions for merchandise ranges according to store policy. 3.3 Liaise with <i>relevant personnel</i> to coordinate promotional and marketing activities. 3.4 Analyse store or department sales figures to determine contribution rates of product lines. 3.5 Determine investment levels with reference to previous years' sales figures, predicted demand and projected gross profit. 3.6 Identify and act upon contribution improvement opportunities. 3.7 Determine store or department space requirements and brand product mix according to store policy. 3.8 Determine stock levels according to peak seasons, special events and supplier lead time. 3.9 Analyse, evaluate and amend merchandise range and sources of supply according to management, staff and customer <i>feedback</i> .
4 Establish supplier relations.	4.1 Develop cooperative relationships with supplier representatives according to store policy. 4.2 Continuously review existing suppliers in regard to quality, profitability, service and delivery status. 4.3 Identify new suppliers and delete existing suppliers according to <i>performance indicators</i> .

ELEMENT	PERFORMANCE CRITERIA
5 Negotiate supply of goods.	<p>5.1 <i>Negotiate</i> and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.</p> <p>5.2 Authorise special <i>pricing arrangements</i> and customer payment agreements and communicate to relevant staff and management personnel according to store policy.</p> <p>5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.</p> <p>5.4 Identify <i>market factors</i> affecting supply and communicate to relevant personnel.</p> <p>5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.</p> <p>5.6 Take immediate corrective action where potential or actual problems with supply are indicated.</p> <p>5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.</p> <p>5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback.</p>
6 Monitor quality control.	<p>6.1 Establish merchandise quality standards with suppliers according to <i>legal requirements</i>, customer requirements and store policy.</p> <p>6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.</p> <p>6.3 Record and analyse stock return figures against target figure.</p>
7 Introduce product ranges.	<p>7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.</p> <p>7.2 Implement <i>staff training</i> in product knowledge to introduce product range.</p> <p>7.3 Demonstrate or display new ranges to <i>staff</i> according to store merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
8 Maximise profit.	<p>8.1 Calculate or estimate individual product range contributions against budget and targets.</p> <p>8.2 Develop and implement product range assessment checks against budget and targets.</p> <p>8.3 Calculate or estimate overall selling space contributions according to store merchandising plan.</p> <p>8.4 Maximise profit margins in negotiations with suppliers.</p> <p>8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law.</p> <p>8.6 Negotiate specifications for <i>terms of trade</i>.</p>
9 Rationalise stock.	<p>9.1 Review and update stock range at regular intervals.</p> <p>9.2 Identify stock lines to be <i>deleted</i> and take action to minimise adverse effect on profit.</p> <p>9.3 <i>Consolidate stock</i> as required to maximise sales potential.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
 - market trends and projections
 - sales figures and investment levels
 - space requirements
- negotiation skills
 - interpersonal communication skills to:
 - liaise with relevant personnel
 - establish supplier relationships, negotiate supply of goods
 - provide information and training on product range
 - provide feedback and coaching through clear and direct communication

REQUIRED SKILLS AND KNOWLEDGE

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
 - developing pricing policies
 - calculating and estimating product range contributions
 - calculating the cost of stock loss and dissipation
 - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - marketing
 - buying
 - profit margins
 - quality control
 - stock inventory levels: current and future
 - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
 - market needs
 - range of merchandise available
 - market competition
 - existing and possible new suppliers
 - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
 - pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
 - store policy and procedures
 - legislation and statutory requirements
 - industry codes of practice
 - merchandise and supplier data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback

EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store merchandise and marketing policies may include:

- store culture
- current market position
- target market.

Customer requirements may be monitored by:

- questionnaires
- surveys
- observation.

Merchandise range may include:

- existing stock
- new stock.

RANGE STATEMENT

Impact on business operations may include:

- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:

- verbally
- in writing
- in groups
- individually.

Performance indicators may include:

- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:

- face-to-face
- correspondence
- meetings
- telephone or electronic media.

Pricing arrangements may include:

- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

Market factors may include:

- fashion trends

RANGE STATEMENT

- product availability
 - sales performance.
- Legal requirements* may include:
- sale of second-hand goods
 - Trade Practices and Fair Trading Acts
 - licence, patent or copyright arrangements
 - pricing procedures, including GST requirements.
- Staff training* may include:
- on-the-job
 - off-the-job
 - one-on-one coaching
 - any combination of the above.
- Staff* may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Terms of trade* may include:
- special buys
 - payment terms
 - promotional deals with supplier.
- Stock lines may be *deleted* due to:
- changes in store policy and culture
 - sales performance
 - customer requirements
 - fashion trends
 - product availability
 - problems with supply.
- Methods to *consolidate stock* may include:
- movement of stock between departments or stores.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Communicate and implement mission statement.	1.1. Communicate <i>mission statement</i> , according to store's stated purpose and values. 1.2. Interpret mission statement in active consultation with <i>team members and management</i> .
2. Set objectives and targets.	2.1. Develop objectives and targets after active consultation with team members and management according to <i>store policy and procedures</i> . 2.2. Ensure <i>strategies and objectives</i> accurately reflect the overall <i>store mission and values</i> . 2.3. Ensure strategies and objectives are attainable, cost-efficient and realistic within a designated timeframe and allow for continuous improvement planning. 2.4. Ensure strategies and objectives contain sufficient detail to allow development of specific projects. 2.5. Clearly acknowledge <i>constraints upon objectives</i> .
3. Develop action plans	3.1. Develop, evaluate and implement action plans according to store policy and procedures. 3.2. Ensure action plans contain, clear, comprehensive and concise details. 3.3. Ensure action plans take account of appropriate operational and other relevant considerations. 3.4. Ensure proposals identify targets, standards and implementation methods.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- analytical and management skills to implement and evaluate plans
- interpersonal communication skills to:

- interpret and communicate mission statement
- develop objectives and targets in consultation with team members and management through clear and direct communication
- ask questions to identify and confirm requirements
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- present reports
- conduct group presentations
- conduct consultative processes
- literacy skills to:
 - document strategic plans
 - interpret information
- numerical skills in regard to financial and budget planning

Required knowledge

- store policy and procedures in regard to strategic planning
- store purpose and values
- store mission statement
- internal and external operating environment
- principles and techniques in strategic planning

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- interprets, communicates and implements store's mission statement
- collaboratively develops team objectives reflecting the store's mission statement
- collaboratively develops strategies for achieving team objectives
- collaboratively develops effective action plans to implement strategies, including targets, standards and implementation methods.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:

- strategic plans
- store mission statement
- store value statement
- information on the internal and external operating environment
- a team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Mission statements may be:

- formal
- informal
- communicated verbally
- communicated in writing.

Team members and management may include:

- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Store policy and procedures in regard to:

- strategic planning

Strategies and objectives may relate to:

- technology
- time management

- standards of work
- quality
- quantity
- human relations, personal development
- legal issues
- internal and external operating environments
- implementation of policy and procedures
- development and communication of ideas
- development of product and service provision
- problem solving
- financial control and accounting
- profits
- management systems
- inventory control
- loss prevention.
- customer relationships
- supplier relationships
- legal requirements
- WHS
- equal opportunity
- ethics
- employment
- human relations
- training
- environment.
- internal considerations
- external considerations.

Store mission and values may include:

Constraints upon objectives may include:

SIRXMGT006A Initiate and implement change

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to initiate and implement change in a retail environment.

Application of the Unit

This unit applies to management personnel who identify opportunities for increased sales and service, and evaluate, negotiate and implement changes consistent with the store's overall aims and objectives.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify opportunities for increased sales and service.	1.1.Regularly obtain relevant, reliable <i>information</i> from a variety of sources and analyse with regard to requirements of store operations. 1.2.Accurately report information on developments to <i>appropriate personnel</i> . 1.3.Use information related to current practices to identify opportunities for growth in sales and service. 1.4.Continuously monitor and evaluate operations, and take action to improve where indicated. 1.5.Accurately identify obstacles to change and take action to alleviate problems. 1.6.Use evaluation of previous development outcomes to identify a range of <i>opportunities for improvement and change</i> .
2. Evaluate changes.	2.1.Ensure information on current and proposed merchandise and service range and operating systems is complete, accurate and accessible. 2.2.Compare advantages and disadvantages of current and proposed operations. 2.3.Assess <i>implications</i> of introducing changes using appropriate <i>analysis measures</i> . 2.4.Ensure proposed changes take account of previous evaluations. 2.5. <i>Communicate</i> recommendations to appropriate people within designated timeframes. 2.6.Analyse responses to recommendations and make appropriate alterations.
3. Negotiate changes.	3.1.Promptly communicate information on projected change to appropriate people in sufficient detail for them to evaluate the implications for their areas of responsibility. 3.2.Maintain good working relationships during <i>negotiations</i> . 3.3.Ensure agreements reached include detailed implementation plans in line with <i>store policy and procedures</i> . 3.4.Communicate complete and accurate records of negotiations and agreements to appropriate people.

- 3.5. Where compromise necessary, ensure it is mutually acceptable and in line with store policy.
 - 3.6. Convey reasons for non acceptance of proposals positively to relevant staff.
 - 3.7. Encourage relevant people to understand and participate in changes.
4. Implement and evaluate change.
 - 4.1. Communicate relevant details of implementation plans within designated timeframes to appropriate people in a manner and at a level and pace suitable for their needs.
 - 4.2. Use resources effectively to meet the requirements of operational changes.
 - 4.3. Monitor operational changes according to implementation plans.
 - 4.4. Evaluate outcomes of changes against expectations and previous sales and service records.
 - 4.5. Modify implementation process to resolve *problems* if required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- analytical skills to:
 - evaluate and forecast
 - collect and organise information
- interpersonal communication skills to:
 - report information and communicate recommendations
 - negotiate changes and communicate details of implementation plans through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - conduct presentations
- literacy skills to document plans and reports

Required knowledge

- store policy and procedures in regard to:
 - initiating and implementing change
 - applying relevant legislation and organisational rules
- changes to technology and resources

- market needs and marketing opportunities
- resource utilisation and costs
- analysing efficiency and effectiveness
- assessing alternatives in areas of change, including contingency planning
- using financial analysis techniques, including cost and benefit, differential and risk analysis
- quality assurance and control

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- reviews relevant information and identifies opportunities for increased sales and service
- evaluates proposals for changes to merchandise and service range and operating systems
- negotiates for the successful implementation of change
- collaboratively implements changes
- evaluates implemented change against the initial proposal.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures in regard to initiating and implementing change
 - resource utilisation
 - proposals for changes
 - market analysis data
- a team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Information may be gathered from:

- external sources
- higher-level managers
- subordinates
- colleagues
- specialists
- staff in other departments.

Appropriate personnel may include:

- supervisor and manager
- team members.

Opportunities for improvement and change may include:

- personnel requirements and team composition
- employment and work practices
- work methods and patterns
- cost factors
- nature and availability of services and products
- quality of services and products
- methods to reduce waste
- new equipment and technology
- design of systems.

Implications of change may affect:

- profitability
- productivity
- quality of service and product
- environmental impact
- working conditions
- working relationships
- reactions of individual employees.

Analysis measures may be:

- qualitative
- quantitative.

Communication and

- higher-level managers

negotiations may include:

- subordinates
- colleagues
- specialists
- staff in other departments
- representatives from external organisations.

Negotiations may be conducted:

- verbally in formal or informal meetings
- by telephone or fax
- written correspondence
- email.

Store policy and procedures in regard to:

- initiating and implementing changes
- communication techniques.

Problems in implementing change may relate to:

- internal considerations
- external considerations.

SIRXRSK002 Maintain store security

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to maintain store security in a retail environment.

It applies to individuals working in frontline management roles in a diverse range of industry sectors and business contexts. They operate independently with some responsibility for others and decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor and maintain store security.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Implement organisational policies and procedures to ensure store security is maintained.

1.2. Monitor and review security procedures continually and act on opportunities to improve store security.

1.3. Maintain security of merchandise, cash, points of sale and

- keys.
- 1.4.Ensure store security equipment is used and in correct working order.
 - 1.5.Report matters impacting store security to relevant personnel.
 - 1.6.Document breaches of security as required.
2. Facilitate security awareness.
- 2.1.Inform team members of organisational policies and procedures for security.
 - 2.2.Provide team members with feedback on their implementation or non-implementation of security procedures.
 - 2.3.Provide team members with ongoing supervision and training to facilitate security awareness.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
 - monitoring adherence to organisational security policies and procedures
 - responding to two occurrences of non-adherence to security policies and procedures
 - communicating security policies and procedures to one team member
 - ensuring security equipment is utilised and in correct working order
 - reporting on opportunities for improved store security.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - use of security equipment
 - suspicious customer behaviour
 - suspicious team member behaviour
 - armed robbery
 - cash and non-cash security
 - merchandise security
 - theft
 - responding to security breaches
 - reporting security risks and breaches
 - surveillance of merchandise
 - personal security
 - general store security
 - team members' security training
 - security for opening and closing premises
 - reporting problems and faults
 - security of visitors, sales representatives, contractors and vendors
 - security risks likely to endanger customers or team members

- legislation as relevant to store security and own level of responsibility:
 - privacy laws
 - Australian Consumer Law
 - reporting procedures
- impacts of security breaches on individuals and organisation:
 - emotional distress
 - financial loss
 - commercial impacts
- common security risks within the retail workplace and techniques to:
 - identify risk
 - minimise risk
- types of store alarms and security systems used in industry.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant equipment:
 - alarm systems
 - surveillance equipment
 - point-of-sale equipment
 - communication equipment
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
 - organisational policies and procedures as listed in the Knowledge Evidence
- customers and team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Establish customer needs.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Connect with the customer within designated response times and establish rapport.
- 1.2. Use questioning and active listening to facilitate effective two-way communication.

- 1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.
- 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.
 - 2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.
 - 2.2. Clearly explain and promote product and service features and benefits where relevant.
 - 2.3. Advise on promotional events where relevant.
 - 2.4. Provide additional information to address customer questions and objections.
 - 2.5. Offer comparisons to competitor product or service range as required.
 - 2.6. Collaborate with the customer to determine product or service option most suited to their needs.
 - 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.
 - 3.1. Select and use appropriate techniques to close sale.
 - 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.
 - 3.3. Farewell customer on leaving, and invite to return.
 - 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - detailed in-house and supplier product information documents
 - plain English documents that outline organisational customer service policy and procedures.
- Numeracy skills to:
- interpret basic fee information from in-house documents and complete basic pricing calculations.
- Problem-solving skills to:
- respond to customer objections and provide appropriate solutions to satisfy customer needs.
- Technology skills to:
- use technologies equipped with search functionality and information systems to source product and service information.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
 - appropriate communication
 - establishment and clarification of customer needs, wants and expectations
 - product and/or service knowledge
 - appropriate sales approach to sell benefits and features of products and/or services
 - overcome objections and close sales
 - upsell and/or cross sell additional products and/or services that complement the sale
 - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
 - cultural diversity
 - special needs
- sales techniques:
 - opening techniques
 - recognising buying signals
 - strategies to focus customer on specific products and services
 - selling add-ons and complementary products
 - overcoming customer objections
 - closing techniques

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
 - professional service standards and protocols for retail industry personnel
 - attitudes and attributes expected by the retail industry to work with customers
 - different customer service needs and expectations
- for the particular retail organisation:
 - product and service knowledge:
 - product and service range offering
 - product specifications, features and benefits
 - designated response times for providing customer service
 - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for:
 - customer service
 - sale of products and services
 - resolving customer complaints
 - collection and storage of customer details
 - organisational product information and price lists
 - supplier brochures, information sheets and price lists
 - promotional activity information
 - current plain English regulatory documents distributed by government regulators for:
 - consumer protection law
 - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

TAEASS301 Contribute to assessment

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to contribute to the assessment process.

It applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role, and for whom collecting the evidence for assessment is an adjunct to principal work responsibilities. The unit applies to those involved in collecting evidence for assessment against units of competency or accredited courses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Clarify role and responsibilities in the assessment process	<p>1.1 Discuss and confirm the purpose of the assessment with relevant people</p> <p>1.2 Discuss and confirm benchmarks for assessment with the qualified assessor</p> <p>1.3 Access, read and clarify assessment plan with the qualified assessor</p> <p>1.4 Discuss and agree with the qualified assessor specific responsibilities in gathering evidence, and the types of evidence to be gathered</p>
2. Confirm organisational arrangements for evidence gathering	<p>2.1 Access and confirm relevant assessment system policies and procedures, organisational, legal and ethical requirements, and other relevant advice on assessment</p> <p>2.2 Clarify the nominated assessment tools and methods for collecting evidence with the qualified assessor, to ensure that the procedures to be followed, and the instruments to be used are clear</p> <p>2.3 Discuss and confirm with the relevant people the assessment context, including the candidate's characteristics and any need for reasonable adjustments</p> <p>2.4 Confirm and arrange resource requirements in consultation with relevant people</p>
3. Collect evidence in accordance with the assessment plan	<p>3.1 Explain the assessment process to the candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to the qualified assessor, prior to undertaking assessment activities</p> <p>3.2 Use assessment instruments to gather quality evidence within the available time and resources, according to organisational, legal and ethical requirements</p>
4. Record and report findings	<p>4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to the assessment system's policies and procedures</p> <p>4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment, and whether the evidence collected meets the rules of evidence</p> <p>4.3 Document areas for improvement in collecting evidence for future assessment activities</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.2	<ul style="list-style-type: none"> Seeks feedback to build knowledge to improve process and professional practice
Reading	1.3, 2.1, 2.2, 2.4, 3.2	<ul style="list-style-type: none"> Sources and interprets procedural, and compliance information
Writing	1.1, 1.2, 1.3, 2.1, 2.3, 2.4, 3.2, 4.1, 4.3	<ul style="list-style-type: none"> Completes workplace documentation accurately using the appropriate language
Oral Communication	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> Communicates information and process requirements clearly, based on techniques appropriate to the audience and environment Uses appropriate speaking and listening techniques to obtain specific information, and to support the assessment process
Navigate the world of work	2.1, 2.2, 3.2, 4.1	<ul style="list-style-type: none"> Accesses, confirms and takes responsibility for adherence to policies, procedures, and legal and ethical requirements
Interact with others	4.2	<ul style="list-style-type: none"> Asks questions to clarify understanding, and seeks feedback and further information
Get the work done	3.1, 4.1	<ul style="list-style-type: none"> Organises work according to defined requirements, taking some responsibility for decisions regarding the format of information

Assessment Requirements for TAEASS301 Contribute to assessment

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- clarifying the role to be taken during the assessment
- clarifying the assessment plan with the qualified assessor, including agreement about:
 - what evidence will be collected
 - how the evidence will be collected
- carrying out a minimum of three evidence-gathering activities and, on each occasion:
 - document evidence in a clear and concise manner
 - document feedback from others involved in the assessment

reporting findings to the qualified assessor, including an explanation of how the assessment meets the rules of evidence on each of the three occasions.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment
- the principles of assessment
- the rules of evidence
- the different purposes of assessment
- the diversity of assessment contexts
- different types of evidence
- evidence-gathering methods
- the purpose and features of assessment tools, and assessment plans

- potential barriers and processes relating to evidence-gathering procedures, and assessment processes
- the organisational policies and procedures relevant to this unit of competency.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to qualified assessors for consultation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to plan the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system.

It applies to individuals with assessment planning responsibilities.

In planning activities and processes, individuals are required to identify the components of assessment tools, analyse and interpret assessment tools, and develop assessment instruments (also known as assessment tasks) and assessment plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the assessment approach	1.1 Identify the candidate and confirm the purposes and context of the assessment with relevant people according to legal, organisational and ethical requirements 1.2 Identify and access applicable industry or workplace standards for the assessment, and any specific assessment requirements
2. Prepare the assessment	2.1 Analyse units of competency and assessment requirements to

ELEMENT	PERFORMANCE CRITERIA
plan	<p>identify evidence needed to demonstrate competence, according to the rules of evidence</p> <p>2.2 Select assessment methods and instruments to support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3 Develop the assessment plan and gain approval from relevant stakeholders</p>
3. Identify modification and contextualisation requirements	<p>3.1 Use information from the candidate and, where relevant, the candidate's workplace to identify contextualisation needs</p> <p>3.2 Check advice provided by the training package or course developer relevant to identified contextualisation needs</p> <p>3.3 Analyse existing assessment tools and record amendments required to address identified contextualisation needs</p> <p>3.4 Determine opportunities for integrated assessment activities and record any changes required to assessment tools</p>
4. Develop the assessment instruments	<p>4.1 Analyse available assessment instruments for their suitability for use, and identify any required modifications</p> <p>4.2 Develop assessment instruments to meet the required standard and specific workplace/candidate needs</p> <p>4.3 Map assessment instruments against the unit or course requirements</p> <p>4.4 Write clear instructions for the candidate and assessor regarding the use of assessment instruments</p> <p>4.5 Check and confirm that draft assessment instruments meet required standards and specific workplace/candidate needs and record outcomes of checks</p>

Assessment Requirements for TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions

following organisational arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards
- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency

- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

TAEASS402 Assess competence

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to implement an assessment plan, and gather quality evidence to assess the competence of a candidate using compliant assessment tools.

It applies to teachers, trainers and assessors in enterprises and registered training organisations (RTOs) and those providing assessment advisory services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the assessment	1.1 Interpret assessment planning documentation and applicable organisational, legal and ethical requirements for conducting the assessment and confirm with the relevant people 1.2 Access and interpret units of competency that are to be used as benchmarks for assessment, and the nominated assessment tools, to confirm the requirements for the evidence to be collected 1.3 Determine opportunities for integrated assessment activities

ELEMENT	PERFORMANCE CRITERIA
	<p>and document any changes to the assessment instruments, where required</p> <p>1.4 Determine opportunities for evidence-gathering in actual or simulated activities, through consultation with the candidate and relevant personnel</p> <p>1.5 Conduct a candidate briefing and explain, discuss and agree on the details of the planned assessment</p> <p>1.6 Arrange identified material and physical resource requirements</p> <p>1.7 Identify any specialist support requirements for the assessment, and organise if necessary</p>
2. Gather quality evidence	<p>2.1 Use agreed assessment methods and tools to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence</p>
3. Support the candidate	<p>3.1 Discuss and guide candidates in gathering their own evidence to support the recognition of prior learning (RPL)</p> <p>3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to individual differences and enables two-way feedback</p> <p>3.3 Make decisions on reasonable adjustments with the candidate, based on the candidate's needs and characteristics</p> <p>3.4 Access specialist support, if required, in accordance with the assessment plan</p> <p>3.5 Address any workplace health and safety (WHS) risk to a person or equipment immediately</p>
4. Make the assessment decision	<p>4.1 Assess the collected evidence, and to evaluate whether it reflects the evidence required to demonstrate competence</p> <p>4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3 Make the assessment decision in line with agreed assessment procedures and according to the agreed assessment plan</p> <p>4.4 Provide clear and constructive feedback to the candidate regarding the assessment decision, and clearly document follow-up, if required</p>
5. Record and report the assessment decision	<p>5.1 Record assessment outcomes promptly and accurately</p> <p>5.2 Complete and submit required assessment documentation,</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>according to assessment procedures and confidentiality conventions</p> <p>5.3 Inform other relevant parties of the assessment decision, according to confidentiality conventions</p>
6. Review the assessment process	<p>6.1 Review the assessment process in consultation with candidates and other relevant people to improve future practice</p> <p>6.2 Document and record the review according to relevant assessment system policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 4.1	<ul style="list-style-type: none"> Accesses and interprets procedural and compliance documentation relevant to the assessment process Examines and evaluates assessment evidence
Writing	1.1, 1.3, 1.5, 2.1, 3.1, 5.1, 5.2, 5.3, 6.2	<ul style="list-style-type: none"> Completes workplace documentation accurately using appropriate language and following organisational requirements
Oral Communication	1.1, 1.4, 1.5, 3.1, 3.4, 4.4, 5.3, 6.1	<ul style="list-style-type: none"> Communicates information and assessment process requirements clearly, using techniques appropriate to the audience and environment Interacts appropriately with candidates to build rapport and understanding, and obtain specific information to support the assessment process
Navigate the world of work	1.1, 3.5, 5.3	<ul style="list-style-type: none"> Identifies, confirms and takes responsibility for adherence to legal and ethical requirements Recognises, and follows, explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.1, 1.4, 1.5, 3.1, 3.2, 3.4, 5.3, 6.1	<ul style="list-style-type: none"> Adjusts personal communication style in recognition of the values and experiences of others to build rapport Cooperates and collaborates with others and contributes to activities requiring joint responsibility

		and accountability
Get the work done	1.1, 1.2, 1.3, 1.4, 1.6, 1.7, 2.1, 2.2, 3.3, 3.4, 4.1, 4.2, 4.3, 6.1, 6.2	<ul style="list-style-type: none"> • Uses systematic, analytical processes in complex, non-routine situations, gathering information, and identifying and evaluating options against agreed criteria • Organises work according to specific requirements taking some responsibility for decisions regarding the format of information • With guidance, reviews the effectiveness of solutions in relation to the set goals

Assessment Requirements for TAEASS402 Assess competence

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements

reviewing the assessment process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment, including:
 - VET as a competency-based system
 - how competency based assessment differs from other types of assessment
 - competency standards as the basis of qualifications

- structure and application of competency standards
- the principles of assessment and how they are applied
- the distinction between assessment tools and assessment instruments
- the rules of evidence and how they are applied
- the range of assessment purposes and assessment contexts, including RPL
- different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
- reasonable adjustments and when they are applicable
- types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
- the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations in assessment activities
- current legislative requirements relevant to the assessor and the assessment process
- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for the use of relevant personal protective equipment
 - the safe use and maintenance of relevant equipment
 - sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes Asks questions in order to clarify understanding, and to provide and seek feedback Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
 - different learning objectives
 - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA2009 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete and check import and export documentation in accordance with the requirements of Customs and related legislation and workplace procedures.

It includes identifying procedures required for documenting import/export of goods, completing documentation to meet legislative and workplace requirements, checking documentation to ensure it meets legislative requirements and lodging documentation for processing.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments including small to large worksites in the customs broking and freight forwarding industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for TLIA2009 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when completing import and export documentation
- completing and checking documentation and records to meet relevant Customs legislation, related legislation and workplace requirements
- completing and/or assessing accuracy of import and export documentation
- identifying procedures required for documentation for import/export of goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- providing customer/client service
- reading, interpreting and following import and export instructions, procedures and labels
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment when completing import and export documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes, conventions and regulations relevant to importing and exporting cargo and freight
- Customs Act 1901 and related legislation
- documentation requirements for importing and exporting cargo and freight
- focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation

- problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- workplace procedures and policies for completing import and export documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

Assessment Requirements for TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in products and services in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when handling, transporting and storing products and providing information on products and services
- completing documentation related to work activities
- estimating the size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- reading and comprehending simple statements in English
- reading, interpreting and following instructions, procedures, information and signs relevant to handling, transporting, storing products and providing information on products and services
- selecting and using relevant communications, computing and load handling equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations relevant to products being identified, handled, transported, stacked and/or stored as part of work operations
- categories or groups of products and requirements for special handling, stacking and storage
- documentation requirements including reports and records concerning damaged or contaminated goods
- focus of operation of work systems, equipment, management and site operating systems for packaging goods
- housekeeping standards and procedures
- purpose and use of cataloguing and labelling systems
- site layout and obstacles
- strategies to seek out sources of product knowledge and to use this information to inform work
- types of equipment and storage areas appropriate for different categories of goods including perishable, fragile, dangerous, composition/state goods
- workplace procedures and policies for identifying, handling, stacking and storing particular categories of products.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Analyse order to identify

1.1 Order request and consignment note documentation is

- work requirements** interpreted
- 1.2 Required schedules for despatch are identified
 - 1.3 Product(s) in order are identified
 - 1.4 Workplace and product knowledge is used to plan sequence of work
 - 1.5 Appropriate materials handling equipment is selected within required work health and safety (WHS)/occupational health and safety (OHS) regulations and timeframe for the despatch
- 2 Follow workplace order picking processes to prepare goods for despatch**
- 2.1 Goods for despatch are selected and checked against product knowledge, labels and other identification systems
 - 2.2 Products are sorted, assembled and consolidated
 - 2.3 Orders are secured and placed in storage/despatch zones, in accordance with schedule
 - 2.4 Order is checked against despatch schedule and order form
- 3 Complete despatch following workplace procedures and schedules**
- 3.1 Workplace records are completed, and labels and appropriate documentation are attached
 - 3.2 Load labels and documentation are checked and loading is organised in accordance with workplace procedures and Australian Dangerous Goods (ADG) Code as required
 - 3.3 Final check of load labels and documentation is completed in accordance with requirements
 - 3.4 Transportation requirements are communicated to driver as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2021A Despatch stock.

Assessment Requirements for TLIA2021 Despatch stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when organising despatch operations
- completing documentation related to organising despatch operations
- estimating size, shape and special requirements of goods and loads
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in goods and equipment in accordance with standard operating procedures
- reading, interpreting and following instructions, procedures and labels relevant to organising despatch operations
- selecting and using relevant equipment and communications technology when organising despatch operations
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation and record requirements for despatch operations
- equipment used during despatch operations and the precautions and procedures that should be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for despatching goods
- problems that may occur when despatching goods and appropriate action that can be taken to resolve these problems
- regulations relevant to despatch operations, including the Australian Dangerous Goods (ADG) Code and relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for organising despatch operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA3015 Complete receipt/despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete receipt/despatch documentation in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Analyse order to identify work requirements to fill order

- 1.1 Order request documentation is interpreted
- 1.2 Product/s in order are noted and workplace location/s are identified
- 1.3 Workplace and product knowledge are used to organise documentation
- 1.4 Required schedules for order movement are identified and noted as required
- 1.5 Special aspects of order such as dangerous/hazardous goods or temperature controlled goods are identified and information on required documentation procedures and relevant regulatory requirements is identified, accessed and interpreted

2 Follow workplace order documentation processes

- 2.1 Workplace procedures for order documentation are identified
- 2.2 Workplace documentation is completed in accordance with workplace procedures and relevant regulatory requirements

3 Finalise documentation

- 3.1 Order is checked against schedule and order form
- 3.2 Workplace records are completed, and labels and appropriate documentation are attached in accordance with workplace procedures and relevant regulatory requirements
- 3.3 Special transportation requirements are identified and conveyed to appropriate personnel
- 3.4 Required documentation for dangerous goods and hazardous materials is completed in accordance with relevant regulations and current Australian Dangerous Goods (ADG) Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for TLIA3015 Complete receival/despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing receival and despatch documentation
- estimating size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) Code markings and emergency information panels
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant computer, communications and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and International Standards, codes and regulations relevant to completing receival/despatch documentation, including current ADG Code and relevant bond, quarantine or other legislative requirements
- documentation requirements for receiving and despatching goods
- focus of operation of work systems, equipment, management and site operating systems for receiving and despatching goods
- housekeeping standards and procedures
- problems that may occur when completing receival and despatch documentation and

appropriate action that can be taken to resolve these problems

- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- site layout and obstacles
- specifications and standards for checking and inspecting received and despatched goods
- workplace procedures and policies for completing receival/despatch documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA3016 Use inventory systems to organise stock control

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use inventory systems to organise stock control in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes identifying inventory and stock control systems in use in the workplace, using re-order procedures to maintain stock levels, organising cyclical stock counts and reporting discrepancies or variances.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify inventory

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Workplace inventory and stock control equipment, software

and stock control systems in use in the workplace		and systems are identified
	1.2	Reasons for common database approach to inventory records and documentation in the warehouse are explained
	1.3	Procedures for identifying and reporting discrepancies or variances are identified
2 Use re-order procedures to maintain stock levels	2.1	Stock level maintenance checking is conducted
	2.2	Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures
	2.3	Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures
3 Organise cyclical stock counts and report discrepancies or variances	3.1	Process for cyclical stock count is planned and work is allocated to team members
	3.2	Clear directions on tasks to be performed are given
	3.3	Stocktake activities are conducted in accordance with workplace procedures
	3.4	Types and causes of record discrepancies are identified
	3.5	Procedures for noting and correcting minor discrepancies are used
	3.6	Major discrepancies are reported in accordance with workplace procedures
	3.7	Workplace documentation is completed
4 Produce reports on record keeping and inventory functions	4.1	Types of reports to be produced from inventory records systems are identified
	4.2	Reports are produced in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3016A Use inventory systems to organise stock control.

- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and using relevant communications, computing and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applications of different types of inventory systems and stock management approaches
- Australian codes and regulations relevant for organising stock control
- computer records and documentation requirements for stock control, including forms, checklists and inventory reports
- housekeeping standards and procedures
- operational inventory systems, equipment, management and site operating systems for controlling stock
- principles of operation and functions of inventory systems
- workplace procedures and policies for using inventory systems to organise stock control
- workplace processes for records management and producing inventory reports.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

TLIA3017 Identify products and store to specifications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify products and store to specifications, in accordance with relevant regulations and workplace requirements, as part of work operations in the transport and logistics industry.

It includes identifying and categorising products, matching products to locations based on specified criteria, and assisting individuals to solve stock identification and location problems.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify and categorise

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products are identified in terms of specified criteria in

- products** accordance with workplace procedures
- 1.2 Products are categorised in terms of specified criteria in accordance with workplace requirements
- 2 Match products to locations based on specified criteria**
- 2.1 Locations for products are determined based on specified criteria
- 2.2 Labels, inventory systems and other information sources are used to assist in identifying products, and handling and storage requirements
- 3 Assist individuals to solve stock identification and location problems**
- 3.1 New stock items are identified and particular product information is brought to the attention of relevant personnel
- 3.2 Stock queries are predicted and team members are assisted to locate and assimilate information relevant to these products
- 3.3 Personnel are assisted with routine and non-routine stock enquiries and actions are taken to update product information for relevant personnel
- 3.4 Personnel are encouraged to maintain and build product knowledge by accessing product information and applying problem solving and information analysis skills
- 4 Identify appropriate transfer and handling requirements**
- 4.1 Resources used to transfer different products through the storage zones are identified and evaluated
- 4.2 Work in receipt and despatch areas is supported by identifying and reporting variances
- 4.3 Stock re-ordering is informed by knowledge of product source, frequency of pick destination or seasonality of products and potential for supply problems
- 4.4 Relevant documentation is completed in accordance with workplace procedures
- 5 Contribute to continuous improvement**
- 5.1 Knowledge of customer requirements is used to determine work design
- 5.2 Potential problems are predicted and notified to appropriate personnel
- 5.3 Opportunities for improvements to own work methods are identified and notified to appropriate personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3017A Identify products and store to specifications.

Assessment Requirements for TLIA3017 Identify products and store to specifications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing, reading and interpreting relevant product information, policies and regulatory requirements
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in products and services in accordance with operating procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment
- using information on products/stock to determine, plan and organise processes used for receipt, storage, goods movement, despatch, stock levels and re-ordering processes
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- codes of practice and regulations relevant to workplace activities
- documentation requirements including reports and records concerning damaged or contaminated goods
- housekeeping standards and procedures
- information on various categories or groups of products including their key characteristics and hazards, and any special handling, stacking and storage requirements
- operational work systems, equipment, management and site operating systems
- product sources, destinations and potential problems
- re-ordering procedures and just-in-time planning principles
- requirements for workplace documentation, inventory systems and records
- site layout and obstacles
- sources of product information
- strategies to seek out sources of product knowledge and to use this information to inform work
- types of equipment and storage areas appropriate for different types of goods including perishable, fragile and/or dangerous/hazardous goods
- workplace procedures and policies relevant to the application of product knowledge to the organisation of workplace operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine site

1.1 Layout of storage facilities, work flow and activities undertaken

functions and operations

in each zone are identified

- 1.2 Hazards are identified, risks are assessed and control measures are implemented
- 1.3 Type of storage facilities, their purpose and associated risk factors are identified
- 1.4 Inventory lists are accessed through record management system
- 1.5 Storage separations and co-storage applications are identified

2 Monitor storage operations

- 2.1 Inventory data is confirmed to match goods/freight and applicable storage requirements
- 2.2 Storage areas are supervised to ensure movement of personnel and goods/freight are in accordance with workplace procedures
- 2.3 Storage facilities are checked to ensure appropriate operational capacity
- 2.4 Integrity of goods/materials are monitored to ensure appropriate quality is maintained
- 2.5 Discrepancies/changes to storage requirements and/or inventory lists are noted and action is undertaken in accordance with workplace procedures
- 2.6 Appropriate action/s are initiated in response to breaches of operational procedures or to an emergency/incident
- 2.7 Operational actions and investigative outcomes are documented in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3026A Monitor storage facilities.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIA3026 Monitor storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- monitoring equipment performance
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures and signs
- using information on products and stock to determine, plan and organise processes used for monitoring storage facilities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations, permit and licence requirements relevant to workplace activities
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- operational work systems, equipment, management and site operating systems
- housekeeping standards and procedures
- information on various categories or groups of products including their key characteristics and hazards, and the special handling, stacking and storage requirements for each
- problems that may occur and appropriate action that can be taken
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

- requirements for workplace documentation reports and records
- site layout
- types of storage areas and related equipment appropriate for different types of goods including perishable, fragile and/or hazardous/dangerous goods
- workplace procedures and policies relevant to the monitoring of storage facilities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIA3038 Control and order stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to control and order stock for a workplace store in accordance with relevant codes of practice, regulations and workplace procedures.

It specifically covers maintaining stock levels and records, organising and administering stocktakes, identifying stock losses, processing stock orders and following up orders.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Maintain stock levels

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Stock levels are monitored and maintained at levels

- and records** prescribed by workplace specifications
- 1.2 Stock security systems are monitored and adjusted as required
 - 1.3 Stock re-order cycles are maintained, monitored and adjusted as required
 - 1.4 Colleagues are informed about their individual responsibilities for recording stock
 - 1.5 Stock storage and movement records are maintained in accordance with workplace procedures
 - 1.6 Stock performance is monitored and fast/slow moving items are identified and reported in accordance with workplace procedures
- 2 Organise and administer stocktakes**
- 2.1 Stocktakes are organised at the appropriate time and responsibilities are allocated to staff
 - 2.2 Accurate reports on stocktake data are produced within designated timelines
- 3 Identify stock losses**
- 3.1 Losses are accurately identified, recorded and assessed against potential loss as forecast, on a regular basis
 - 3.2 Identified losses are reported in accordance with workplace procedures
 - 3.3 Avoidable losses are identified, reasons are established, and appropriate solutions are recommended and implemented to prevent future avoidable losses
- 4 Process stock orders**
- 4.1 Orders for stock are accurately processed in accordance with workplace procedures
 - 4.2 Stock ordering and recording systems are accurately maintained
 - 4.3 Purchase and supply agreements are correctly used and appropriate details are recorded
 - 4.4 Negotiated purchase and supply agreements are recorded accurately and filed for retrieval
- 5 Follow up orders**
- 5.1 Delivery process is monitored to meet agreed deadlines
 - 5.2 Appropriate liaison is undertaken with colleagues and suppliers to ensure continuity of supply

5.3 Routine supply problems are followed up or referred to the appropriate person in accordance with workplace policy

5.4 Stock is distributed in accordance with agreed allocations

6 Complete documentation

6.1 Required records and documentation are confirmed

6.2 Required records and documentation are completed clearly and proofread

6.3 Required records and documentation are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3038A Control and order stock.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIA3038 Control and order stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in stock and systems in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- monitoring stock levels
- reading and interpreting relevant instructions, procedures and labels
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications and computing equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- contacts and sources of information and documentation needed when controlling and ordering stock
- customer service policies and procedures
- how to interpret workplace specifications and orders for supplies
- principles of stock control
- problems that may occur and appropriate action that can be taken to resolve these problems
- procedures for ordering stock
- protocols and procedures for liaising with supplier representatives, drivers and colleagues using appropriate technology
- relevant codes of practice and legislative requirements (for example dangerous goods regulations, health and hygiene regulations)

- site layout
- stock control documentation and systems used in workplace stores
- stock security systems
- systems for completing relevant records and documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA3039 Receive and store stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to receive and store stock for a workplace store in an enterprise/organisation in a transport, logistics, production, hospitality, retail or other relevant industry sector, in compliance with relevant codes of practice, regulations and workplace procedures.

Work must be carried out for receiving and storing stock in a workplace store. It specifically covers taking delivery of stock, storing, rotating and maintaining stock received, and completing documentation.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Take delivery of stock

- 1.1 Incoming stock is accurately checked against orders and delivery documentation in accordance with workplace procedures
- 1.2 Variations are accurately identified, recorded and communicated to appropriate person
- 1.3 Items are inspected for damage, quality, use-by dates, breakages and discrepancies, and records are made in accordance with workplace policy

2 Store stock

- 2.1 Hazards are identified, risks are assessed and control measures are implemented
- 2.2 Stock is promptly and safely transported to appropriate storage area without damage
- 2.3 Stock is stored in appropriate location within area and in accordance with workplace security procedures
- 2.4 Appropriate personal protective equipment is correctly used during receipt and storage operations
- 2.5 Stock levels are accurately recorded in accordance with workplace procedures
- 2.6 Stock is labelled in accordance with workplace procedures

3 Rotate and maintain stock

- 3.1 Stock is rotated as required in accordance with workplace policy
- 3.2 Stock is moved using appropriate equipment in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements, relevant regulations and workplace procedures
- 3.3 Quality of stock is checked and reported
- 3.4 Appropriate action is taken where stock quality is identified as outside specified standards
- 3.5 Stock is placed in storage or disposed of in accordance with workplace policy

4 Complete documentation

- 4.1 Required documentation procedures and processes are confirmed
- 4.2 Records and documentation are completed legibly and proofread
- 4.3 Records and documentation are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

TLIA4025 Regulate temperature controlled stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to regulate temperature controlled stock in accordance with relevant regulations and workplace procedures within the transport and logistics industry.

It includes identifying goods requiring temperature control, monitoring temperature of goods, and identifying and rectifying identified problems.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Identify goods requiring temperature control

- 1.1 Goods requiring temperature control are identified
- 1.2 Temperature for short-term and long-term storage is selected to match product type
- 1.3 Upper and lower limits for temperature control are identified
- 1.4 Storage separations and co-storage applications are identified for products

2 Monitor temperature

- 2.1 Appropriate methods for determining temperature of goods are identified
- 2.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 2.3 Storage areas are monitored for temperatures within range for product types
- 2.4 Products are monitored to ensure compliance with temperature storage requirements
- 2.5 Short-term storage times are identified for transit goods
- 2.6 Documentation is completed in accordance with workplace procedures

3 Identify and rectify problems

- 3.1 Implications of incorrect temperature are identified
- 3.2 Damaged goods are identified and appropriate action is taken in accordance with workplace procedures
- 3.3 Causes of out-of-temperature range are identified
- 3.4 Appropriate personnel are notified for problem rectification
- 3.5 Goods handling workplace procedures for maintenance of stock under temperature control are identified and implemented

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances in accordance with relevant work health safety (WHS)/occupational health and safety (OHS) regulations concerning the safe handling of dangerous goods and hazardous substances, within the transport and logistics industry.

It includes identifying requirements for working with dangerous goods and/or hazardous substances, confirming site incident procedures and selecting handling techniques.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

Assessment Requirements for TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others
- completing relevant documentation
- determining required permits
- estimating weight and dimensions of load and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
- identifying and selecting safety requirements for handling dangerous goods/hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport storage selected
- identifying dangerous goods/hazardous substances using labels, International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- maintaining workplace records and documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule, predicting consequences and identifying improvements
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- recognising hazards and applying precautions and required action to minimise, control or eliminate recognised hazards
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures

- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems including PPE
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- permit and licence requirements
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- relevant aspects of current Australian Dangerous Goods (ADG) Code and relevant Australian Standards
- relevant regulations and codes concerning handling dangerous goods/hazardous substances
- risks when handling dangerous goods/hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods/hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Load and unload goods/cargo**
 - 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
 - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
 - 1.4 Load is packed/unpacked to make safe and effective use of available spaces
 - 1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
 - 1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
 - 1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
 - 1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
 - 1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
- 2 Secure and protect load**
 - 2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
 - 2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
 - 2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
 - 2.4 Load is protected in accordance with legal and workplace safety requirements
- 3 Complete**
 - 3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

documentation

and current ADG Code, as required

- 3.2 All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2004A Load and unload goods/cargo.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national Load Restraint Guide (LRG), codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

industry.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check forklift condition

- 1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
- 1.2 Attachments are checked to ensure appropriate adjustment and operation
- 1.3 Mirrors and seats are adjusted for safe operation by driver
- 1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements

2 Drive forklift

- 2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
- 2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
- 2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
- 2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures

3 Operate forklift to handle loads

- 3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
- 3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures

4 Monitor site conditions

- 4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
- 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

5 Monitor and maintain forklift performance

- 5.1 Performance and efficiency of vehicle operation is monitored during use
- 5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
- 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, low level order pickers, conveyor systems and mechanised pallet movers.

It includes selecting appropriate mechanical moving equipment, moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning moving materials mechanically using automated equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select load moving equipment	1.1 Mechanised handling equipment, route to be taken and procedures to be used are selected appropriate to goods characteristics
	1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, WHS/OHS requirements and workplace procedures
2 Move goods	2.1 Hazards are identified, risks are assessed and control measures are implemented
	2.2 Goods are moved using selected materials handling equipment in accordance with WHS/OHS regulations, manufacturer instructions and workplace procedures
	2.3 Problems moving goods and materials using automated equipment are identified and reported in accordance with workplace procedures
3 Check goods and complete documentation	3.1 Relocated goods are inspected for possible damage during transit/movement and appropriate action is taken
	3.2 Appropriate documentation is completed to track moved goods in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2013A Move materials mechanically using automated equipment.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- ensuring servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- implementing contingency plans
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of automated equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for using automated equipment to move materials mechanically
- problems that may occur and appropriate action that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of automated materials moving equipment
- relevant regulations, workplace procedures and policies for using automated equipment to move materials mechanically
- relevant WHS/OHS and environmental protection procedures and guidelines
- risks when using automated equipment to move materials and related precautions to control the risks
- site layout and obstacles.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID3020 Care for livestock in transit

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and care for livestock in transit, in accordance with relevant regulations and industry codes of practice for caring for livestock in transit.

It includes making preparations to transport livestock, caring for and controlling livestock in transit, and using appropriate animal husbandry techniques, as required.

Work is performed under limited or minimum supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Prepare to transport livestock**
 - 1.1 Condition, quality and quantity of livestock to be transported is checked prior to transport operation, in accordance with client requirements and workplace procedures
 - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.3 Poor quality livestock is identified and reported to specified personnel in accordance with workplace procedures
 - 1.4 Feed provisions and other requirements for livestock, prior to and during transit, are identified and organised
 - 1.5 Portable stockyards are assembled as required
- 2 Care for and control livestock in transit**
 - 2.1 Condition of livestock is regularly monitored during loading, transit and unloading, and appropriate action is taken in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
 - 2.2 Working dogs and appropriate handling equipment are used to aid handling of livestock during loading and unloading operations, in accordance with regulations and workplace procedures
 - 2.3 Required action is taken for care and wellbeing of animals in an accident during transit
 - 2.4 Distressed stock is handled in an appropriate manner in accordance with government regulations and workplace procedures
- 3 Use animal husbandry techniques**
 - 3.1 Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
 - 3.2 Documentation is completed and proofread in accordance with workplace procedures
 - 3.3 Prescribed medication is administered to livestock in accordance with veterinary directions and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3020A Care for livestock in transit.

Links

Assessment Requirements for TLID3020 Care for livestock in transit

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit
- insurance rights and responsibilities
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- work health and safety (WHS)/ occupational health and safety (OHS) procedures and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIF3003 Implement and monitor work health and safety procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor work health and safety (WHS)/occupational health and safety (OHS) procedures, in compliance with relevant WHS/OHS regulations.

It includes accessing information about WHS/OHS workplace policies and procedures, and implementing and monitoring procedures for identifying and assessing hazards and controlling risks. It also includes planning and supervising housekeeping arrangements, and implementing and monitoring procedures for dealing with hazardous events.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Access information about WHS/OHS and workplace policies and procedures

- 1.1 Relevant provisions of WHS/OHS legislation and codes of practice are accurately followed
- 1.2 Information on workplace WHS/OHS health and safety policies, procedures and programs is stored in a readily accessible location and manner
- 1.3 Information is accurately and clearly explained to work team
- 1.4 Information about risk identification outcomes and control procedures is provided to appropriate personnel

2 Implement and monitor procedures for identifying and assessing hazards

- 2.1 Existing and potential hazards in work area are identified and reported
- 2.2 Identified hazards are assessed in relation to relative risk
- 2.3 Appropriate action is initiated to minimise and control risks/hazards

3 Implement and monitor procedures for controlling risks

- 3.1 Incorporation of hierarchy of risk control measures within hazard register is checked
- 3.2 Existing risk control measures are implemented, monitored and reviewed
- 3.3 Work procedures to control risks are implemented and adherence to them by work group is monitored
- 3.4 Required improvements to existing risk control measures are identified, including required resources for implementation, and reported to appropriate personnel

4 Plan and supervise housekeeping arrangements

- 4.1 Housekeeping tasks are identified and incorporated in enterprise work roles
- 4.2 Housekeeping equipment is maintained
- 4.3 Team members are allocated housekeeping tasks and are supervised in performing allocated tasks

- 4.4 Housekeeping practices are planned to conform with environmental and WHS/OHS health and safety requirements
- 5 Implement and monitor procedures for dealing with hazardous events**
- 5.1 Workplace procedures for dealing with hazardous events are implemented as required to ensure prompt control action is taken
- 5.2 Hazardous events are investigated to identify causes
- 5.3 Risk control measures are implemented to prevent recurrence and to minimise risks of hazardous events or issues, and are reported to appropriate personnel for implementation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF3003A Implement and monitor occupational health and safety procedures.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIF3003 Implement and monitor work health and safety procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- ensuring that precautions and required action are taken to minimise, control or eliminate identified hazards
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency and evacuation procedures
- HAZCHEM symbols and implications for safe work and storage
- hierarchy of risk controls
- housekeeping standards and procedures
- location and use of safety alarms, manifests, emergency shut-off systems, emergency communications systems
- manual and mechanically operated lifting and load shifting procedures
- procedures for storing and using flammable materials
- procedures for storing and using hazardous substances
- relevant WHS/OHS procedures and guidelines
- reporting procedures for unsafe situations, fire hazards, broken or damaged equipment or fittings, sickness and accidents
- risks when using manually-operated equipment to shift loads and related precautions to control these risks
- signs and signals for WHS/OHS warnings
- site layout and obstacles
- terms used in safety data sheets (SDSs)/material safety data sheets (MSDSs)
- transport requirements for transporting goods within a workplace.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use infotechnology devices in the workplace in accordance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures, within the transport and logistics industry.

It includes identifying infotechnology equipment and systems; setting up, using and shutting down computer based equipment and systems; and inputting, storing and presenting files/data. It also involves implementing workplace procedures for managing and securing data.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

K – Technology

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify infotechnology systems 1.1 Types of infotechnology equipment used in the

work area are identified

- 1.2 Functions of equipment, component parts and accessories are identified
- 1.3 Applications for workplace activities of different infotechnology equipment and systems are interpreted
- 1.4 Routine faults in operating systems, software applications and operator errors are identified
- 1.5 Sources of information on rectifying/reporting faults with operating equipment, systems and application are identified

2 Access and operate computer-based equipment and systems

- 2.1 Work environments and equipment are adjusted to meet ergonomic requirements and workplace policies and procedures
- 2.2 Systems are accessed and checked as required for viruses
- 2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturers guidelines
- 2.4 Infotechnology equipment and software operating manuals and/or help screens are used to inform work practices
- 2.5 Required application software packages and accessories are selected and accessed
- 2.6 Required file and/or data to be accessed is identified
- 2.7 Files/data are filed in accordance with workplace procedures
- 2.8 Shut-down procedures for files, applications and equipment are followed

3 Input, store and present files/data

- 3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader, touch screen or other system
- 3.2 Accurate input is confirmed
- 3.3 Files are accessed in accordance with workplace

procedures

3.4 Data is manipulated to suit work requirements and is checked for accuracy

3.5 Saved files are accessed through relevant directories

3.6 Information and disk/s are stored as required

3.7 Information is presented using computerised projection facilities as required

4 Implement workplace procedures for managing and securing data

4.1 Security procedures are followed in accordance with workplace procedures

4.2 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIK2010A Use infotechnology devices in the workplace.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and/or completing electronic documentation through the use of infotechnology devices in the workplace
- adapting to differences in software and equipment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices in the workplace
- applying relevant legislation and workplace procedures
- identifying and using computer equipment, software, processes and procedures required within the job context
- identifying fault-finding procedures
- implementing contingency plans when using infotechnology devices in the workplace including using security and backup software and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- operating infotechnology devices used within the workplace in accordance with operational requirements
- reading and interpreting instructions, procedures, information, operational instructions and manuals relevant to using infotechnology devices in the workplace
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- work health and safety (WHS)/occupational health and safety (OHS) risks and hazards when using computer equipment for work tasks, and ways of controlling these risks/hazards
- relevant WHS/OHS procedures and guidelines for using computer equipment in the workplace
- typical problems that can occur when using infotechnology devices, and computer applications in the workplace and related appropriate action that can be taken to prevent or solve these problems
- workplace procedures for using computer equipment and application software appropriate for work role.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

UEENEED101A Use computer applications relevant to a workplace

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

1) Scope:

1.1) Descriptor

This unit covers the basic use of personal computers application relevant to a work function. It encompasses switching the computer on, applying user preferences, selecting basic applications, entering and retrieving information and printing files.

Note:

This unit applies to all aspects of Electrotechnology – engineering applications only. For general competencies related to Information Technologies refer to the latest endorsed IT Training Package.

Application of the Unit

Application of the Unit 2)

This unit is intended for competency development entry-level employment-based programs incorporated in approved contracts of training. It may be used to augment previously acquired competencies.

Licensing/Regulatory Information

License to practice 3)

The skills and knowledge described in this unit do not require a license to practice in the workplace. However, practice in this unit is subject to regulations directly

License to practice 3)

related to occupational health and safety and where applicable contracts of training such as apprenticeships.

Pre-Requisites**Prerequisite Unit(s) 4)****Competencies 4.1)**

Granting competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

UEENEEED101A Apply Occupational Health Safety regulations, codes and practices in the workplace.

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve competency in this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 'Literacy and Numeracy'

Reading 3 Writing 3 Numeracy 3

Employability Skills Information**Employability Skills 5)**

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

- 6) Elements describe the essential outcomes of a competency standard unit. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1 Prepare to use computer applications. | 1.1 OHS procedures for a given work area are identified, obtained and understood through established routines and procedures. |
| | 1.2 Established OHS risk control measures and procedures in relation to computer and keyboard use are followed. |
| | 1.3 Information required for the use of the application is obtained from appropriate sources. |
| | 1.4 Computer is started up and desktop icons are manipulated to access desired application, directories and files. |
| | 1.5 On-screen instructions in relation to any anomaly such as a virus warning are followed. |
| | 1.6 Help directory is used to resolve any straightforward start up or access issues or anomalies. |
| 2 Use computer basic application. | 2.1 Established OHS risk control measures and procedures for carrying out the work are followed. |
| | 2.2 Information is added, altered or deleted as needed in accordance with application user instructions. |
| | 2.3 Routine checks are made to ensure accuracy of information in accordance with quality requirements. |
| 3 Output information | 3.1 Completed files are stored appropriately in |

ELEMENT	PERFORMANCE CRITERIA
from an application.	accordance with enterprise requirements.
	3.2 Files are printed for a formal record and/or to forward to others.
	3.3 Files are sent via email in a readable format.
4 Shut down computer.	4.1 Files are named, arranged, saved and backed up in accordance with enterprise requirements.
	4.2 Computer shutdown procedures are followed and computer switched off.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of safe working practices using basic computer applications relevant to a workplace.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-ED101A

Basic Computer Applications

Evidence shall show an understanding of computer use basics to an extent indicated by the following aspects:

- T1 Starting up
- T2 Selecting application
- T3 Entering information
- T4 Saving
- T5 Printing

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the unit and must be read in

EVIDENCE GUIDE

conjunction with the performance criteria and the range statement of the unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this unit. It must be used in conjunction with all parts of this unit and performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment 9.1)

Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment intervention. It is the industry-preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accordance with industry and regulatory policy.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Sources of evidence need to be 'rich' in nature to minimise error in judgment.

Activities associated with normal everyday work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its 'richness'. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practised. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required to demonstrate competency in this unit 9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated performance criteria shall be demonstrated on at least two occasions in accordance with the 'Assessment Guidelines – UEE11'. Evidence shall also comprise:

- A representative body of work performance demonstrated within the timeframes typically expected of the discipline, work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:
 - Implement Occupational Health and Safety workplace procedures and practices, including the use of risk control measures as specified in the performance criteria and range statement
 - Apply sustainable energy principles and practices as specified in the performance criteria and range statement
 - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit. It may be required by some jurisdictions that RTOs provide a percentile graded result for the purpose of regulatory or licensing requirements.
 - Demonstrate an appropriate level of skills enabling employment
 - Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures
- Demonstrated consistent performance across a representative range of contexts from the prescribed items below:
 - Use basic computer applications relevant to workplace as described in 8) and including:

- A Correctly starting-up a computer.
- B Dealing with anomalies appropriately.
- C Following application instructions to input and output information.
- D Storing information appropriately.

- E Outputting information to a printer.
- F Forwarding information via email and/or web mail in a readable format.
- G Producing, storing and forwarding engineering related reports and/or results using at least three computer applications according to requirements
- H Shutting down a computer correctly
- I Dealing with unplanned events by drawing on essential knowledge and skills to provide appropriate solutions incorporated in a holistic assessment with the above listed items.

Note:

Successful completion of relevant vendor training may be used to contribute to evidence on which competency is deemed. In these cases the alignment of outcomes of vendor training with performance criteria and critical aspects of evidence shall be clearly identified.

Context of and specific resources for assessment **9.3)**

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to undertake actual work as prescribed in this unit.

These should be used in the formal learning/assessment environment.

Note:

Where simulation is considered a suitable strategy for assessment, conditions for assessment must be authentic and as far as possible reproduce and replicate the workplace and be consistent with the approved industry simulation policy.

In addition to the resources listed above, evidence should show demonstrated competency to produce, store and forward engineering related reports and/or results using a range of

computer applications.

**Method of
assessment 9.4)**

This unit shall be assessed by methods given in Volume 1, Part 3 'Assessment Guidelines'.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this unit applies. This requires assessment in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and skills described in this unit.

**Concurrent
assessment and
relationship with
other units 9.5)**

There are no concurrent assessment recommendations for this unit.

Range Statement

RANGE STATEMENT

10) This relates to the unit as a whole providing the range of contexts and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

This unit shall/may be demonstrated in relation to at least three of the following using computer applications to produce, store and forward engineering related reports and/or results at a basic level.

- Word processing
- Spread sheet
- Drawings
- Business management
- Apparatus set-up
- Note:

Apparatus set-up applications are invariably vendor specific and include

RANGE STATEMENT

icon-based integration and control applications.

Generic terms used throughout this Vocational Standard shall be regarded as part of the Range Statement in which competency is demonstrated. The definition of these and other terms that apply are given in Volume 2, Part 2.1.

Unit Sector(s)

Not applicable.

AMPSS00001 Animal Welfare Officer Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to manage an animal welfare team.

Pathways Information

The units of competency comprising the Animal Welfare Officer Skill Set are drawn from AQF levels II and IV in the meat industry qualifications, and can be counted towards these qualifications and qualifications from other Training Packages, where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AMPA2006	Apply animal welfare and handling requirements
AMPA411	Oversee humane handling of animals

Target Group

Typically the Animal Welfare Officer is a company employee who manages the company's animal welfare team and therefore is able to:

- understand and articulate the regulatory and technical issues associated with animal welfare
- represent the company with regard to the approach taken to address animal welfare issues
- influence company policies, procedures, training regimes, Key Performance Indicators (KPIs) and Quality Assurance (QA) documentation as they relate to procedures impacting on animal welfare
- review, as part of their duties, the results of the routine monitoring of procedures impacting on animal welfare
- review the results of internal and external audits to assess the performance of the company in relation to animal welfare
- oversee the implementation of corrective actions and preventative measures
- monitor the effectiveness of corrective actions and preventative measures
- implement animal welfare assessment criteria and perform an abattoir animal welfare assessment
- recognise operative training needs and implement training for animal handlers

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for managing animal welfare.

AMPSS0002 Bandsaw Operator (Meat Retail) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to operate a bandsaw to prepare meat cuts in a meat retailing or wholesaling enterprise.

Pathways Information

The Units of Competency comprising the Bandsaw Operator (Meat Retail) Skill Set are drawn from AQF levels II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPX201	Prepare and operate bandsaw

Target Group

Typically the trainee is a meat retailing employee who is required to regularly operate a bandsaw to prepare meat cuts in a meat retailing or wholesaling enterprise.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the meat processing industry requirements for operation of a bandsaw to prepare meat cuts in a meat retailing or wholesaling enterprise.

AMPSS00003 Bandsaw Operator (Small Stock) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to operate a bandsaw to split small stock carcasses and/or prepare meat cuts.

Pathways Information

The Units of Competency comprising the Bandsaw Operator (Small Stock) Skill Set are drawn from AQF levels II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA3054	Break carcass using a bandsaw
AMPX201	Prepare and operate bandsaw

Target Group

Typically the trainee is a company employee who is required to regularly operate a bandsaw to split small stock carcasses and/or prepare meat cuts.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the meat processing industry requirements for operation of a bandsaw to split small stock carcasses and/or prepare meat cuts.

AMPSS0004 Basic Bandsaw Operator Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge for the basic operation of a bandsaw in the meat industry.

Pathways Information

The Units of Competency comprising the Basic Bandsaw Operator Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPX201	Prepare and operate bandsaw

Target Group

Typically the trainee is a company employee who is required to regularly operate a bandsaw.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for basic operation of a bandsaw in the meat industry.

AMPSS00005 Basic Meat Industry Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge for commencing workers in the Australian meat industry to work safely and hygienically.

Pathways Information

The Units of Competency comprising the Basic Meat Industry Skill Set are drawn from AQF levels I and II in the qualifications, and can be counted towards other qualifications, where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures

Target Group

Typically the trainee is a new employee commencing work in the meat industry.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for working safely and applying hygiene and sanitation requirements for commencing workers in the Australian meat industry.

AMPSS00006 Carcase Trimming (Contamination Trim) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to trim contamination from a carcase in a meat processing plant.

Pathways Information

The Units of Competency comprising the Carcase Trimming (Contamination Trim) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPA2044	Trim neck
AMPA2047	Inspect hindquarter and remove contamination
AMPA2048	Inspect forequarter and remove contamination
AMPX209	Sharpen knives

Target Group

Typically the trainee is an existing employee who will be able to trim a carcass to remove contamination.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements to trim contamination from a carcass in a meat processing plant.

AMPSS00007 Carcase Trimming (Retain Rail) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to trim a carcase on a retain rail.

Pathways Information

The Units of Competency comprising the Carcase Trimming (Retain Rail) Skill Set are drawn from AQF levels II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2047	Inspect hindquarter and remove contamination
AMPA2048	Inspect forequarter and remove contamination
AMPA3046	Undertake retain rail operations
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who trims carcasses on the retain rail.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for trimming a carcass on a retain rail.

AMPSS00008 Carcase Trimming (Specifications Trim - Knife)

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to trim a carcase to specification using a knife.

Pathways Information

The Units of Competency comprising the Carcase Trimming (Specifications Trim) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2045	Trim forequarter to specification
AMPA2046	Trim hindquarter to specification
AMPX209	Sharpen knives

Target Group

Typically the trainee is an existing employee who will be able to trim a carcass to achieve a carcass specification using a knife.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for trimming a carcass to specification using a knife.

AMPSS00009 Carcase Trimming (Specifications Trim - Whizzard Knife) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to trim a carcase to specification using a whizzard knife.

Pathways Information

The Units of Competency comprising the Carcase Trimming (Specifications Trim – Whizzard Knife) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2026	Operate whizzard knife
AMPA2045	Trim forequarter to specification
AMPA2046	Trim hindquarter to specification
AMPX209	Sharpen knives

Target Group

Typically the trainee is an existing employee who will be able to trim a carcass to achieve a carcass specification trim using a whizzard knife.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for trimming a carcass to specification using a whizzard knife.

AMPSS00010 Carcase Trimming (SRM Removal) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to trim a carcase to remove Specified Risk Material (SRM).

Pathways Information

The Units of Competency comprising the Carcase Trimming (SRM Removal) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2049	Remove spinal cord
AMPX209	Sharpen knives

Target Group

Typically the trainee is an existing employee who will be able to trim a carcass to remove specified risk material.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for trimming a carcass to remove specified risk material.

AMPSS00011 Cheek Meat Recovery Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to recover cheek meat in a meat processing plant.

Pathways Information

The Units of Competency comprising the Cheek Meat Recovery Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AMPA2084	Remove cheek meat
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who works in a slaughtering establishment recovering cheek meat from heads.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for recovering cheek meat in a meat processing plant.

AMPSS00012 Cook and Process Meats for Meat Retail Product Range Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to include previously cooked or processed meats in a meat retailing product range.

Pathways Information

The units of competency comprising the Cook and Process Meats for Meat Retail Product Range Skill Set are drawn from AQF levels II, III and IV in the meat processing qualifications, and can be counted towards these qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 7 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR404	Facilitate hygiene and sanitation performance
AMPR321	Collect and prepare standard samples
AMPS207	Slice product using simple machinery
AMPX214	Package meat and smallgoods product for retail sale

AMPX402	Monitor and overview the production of processed meats and smallgoods
AMPX420	Participate in the ongoing development and implementation of a HACCP and Quality Assurance system

Target Group

This Skill Set is for meat retailers who wish to include cooked and/or processed meats with their existing product range.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the inclusion of cooked or processed meats in a meat retailing product range.

AMPSS00013 Despatch Carcase from the Slaughter Floor Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to weigh, grade and then ticket carcasses prior to them leaving the slaughter floor.

Pathways Information

The Units of Competency comprising the MTM11 Despatch Carcase from the Slaughter Floor Skill Set are drawn from AQF level II in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPA2060	Grade carcase
AMPA2061	Weigh carcase
AMPA2062	Operate semi-automatic tagging machine

Target Group

Typically the trainee is an enterprise employee who weighs, grades and tickets carcasses prior to chilling.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for enterprise employees who weigh, grade and then ticket carcasses prior to them leaving the slaughter floor.

AMPSS00014 Effective Stunning (Captive Bolt) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to stun livestock using a captive bolt in an Australian meat processing plant.

Pathways Information

The units of competency comprising the Effective Stunning (Captive Bolt) Skills Set are drawn from AQF levels II and III in the qualifications, and can be counted towards other qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPCOR204	Follow safe work policies and procedures
AMPA2002	Restrain animal
AMPA2006	Apply animal welfare and handling requirements
AMPA3000	Stun animal

Target Group

Typically the trainee is a company employee who is engaged in the stunning of livestock using a captive bolt and has responsibility to monitor animal welfare during this process.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the stunning of livestock using a captive bolt in an Australian meat processing plant.

AMPSS00015 Effective Stunning (Electrical Stunning) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to perform electrical stunning of livestock in an Australian meat processing plant.

Pathways Information

The units of competency comprising the Effective Stunning (Electrical Stunning) Skills Set are drawn from AQF levels II and III in the qualifications, and can be counted towards other qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR204	Follow safe work policies and procedures
AMPA2006	Apply animal welfare and handling requirements
AMPA3000	Stun animal

Target Group

Typically the trainee is a company employee who electrically stuns livestock and has responsibility to monitor animal welfare during this process.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the electrical stunning of livestock in an Australian meat processing plant.

AMPSS00016 Effective Stunning (Gas Stunning) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to perform gas stunning of livestock in an Australian meat processing plant.

Pathways Information

The units of competency comprising the Effective Stunning (Gas Stunning) Skills Set are drawn from AQF levels II and III in the qualifications, and can be counted towards other qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR204	Follow safe work policies and procedures
AMPA2006	Apply animal welfare and handling requirements
AMPA3000	Stun animal

Target Group

Typically the trainee is a company employee who is responsible for the gas stunning of livestock and has responsibility to monitor animal welfare during this process.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the gas stunning of livestock in an Australian meat processing plant.

AMPSS00017 Fellmongering Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge carry out basic fellmongering tasks to prepare skins for sale

Pathways Information

The Units of Competency comprising the Fellmongering Skill Set are drawn from AQF level II in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AMPA2136	Overview fellmongering operations
AMPA2137	Chemically treat skins for fellmongering process
AMPA2138	Prepare chemicals for fellmongering process
AMPA2140	Perform sweating operation on fellmongered skins
AMPA2146	Perform skin fleshing operation

Target Group

Typically the trainee is an enterprise employee who is required to carry out basic fellmongering tasks to prepare skins for sale.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for enterprise employees who are required to carry out basic fellmongering tasks to prepare skins for sale.

AMPSS00018 Game Harvester Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to short and harvest wild game animals.

Pathways Information

The Units of Competency comprising the Game Harvester Skill Set are drawn from AQF level II and III in the meat processing qualifications, and can be counted towards other meat processing qualifications, where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPG300	Overview wild game meat industry
AMPG301	Operate a game harvesting vehicle
AMPG302	Eviscerate, inspect and tag wild game carcass in the field
AMPG306	Use firearms to harvest wild game
AMPX209	Sharpen knives

Target Group

Game harvesters who field shoot wild game animals, including macropods, possums, camels, horses, deer, feral goats and wild boar, for further processing.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for shooters harvesting wild game animals.

AMPSS00019 Game Industry Depot Management Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to manage the receipt, chilling, storage and loadout of wild game carcasses at chiller boxes.

Pathways Information

The Units of Competency comprising the Game Industry Depot Management Skill Set are drawn from AQF levels II and III in the meat processing qualifications, and can be counted towards other meat processing qualifications, where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPG300	Overview wild game meat industry
AMPG303	Receive and inspect wild game carcasses from the field
AMPG305	Store wild game carcasses
AMPA2108	Loadout meat product
AMPX204	Maintain production records

Target Group

The target group for this skill set is game depot managers responsible for the receipt, chilling, storage and loadout of wild game carcasses from chiller boxes. However, individual Units are applicable to operators responsible for the receipt of wild game carcasses directly from the field and into a processing plant.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for managing the receipt, chilling, storage and loadout of wild game carcasses at chiller boxes.

AMPSS00020 Game Pre-dressing Inspection Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to perform a pre-dressing inspection on wild game carcasses at a wild game processing plant.

Pathways Information

The Units of Competency comprising the Game Pre-dressing Inspection Skill Set are drawn from AQF levels II and III in the meat processing qualifications, and can be counted towards other meat processing qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPG300	Overview wild game meat industry
AMPG304	Receive and inspect wild game carcasses at a processing plant

Target Group

The nominated and authorised operator responsible for the inspection of wild game carcasses prior to processing at a game processing plant. The operator may or may not also be responsible for the receipt of carcasses into the plant, the weighing of carcasses and the keeping of detailed records.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for those operators responsible for performing a pre-dressing inspection on wild game carcasses at a wild game processing plant.

AMPSS00021 Green Offal Processing (Clean Tripe Room) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to further process tripe.

Pathways Information

The Units of Competency comprising the Green Offal Processing (Clean Tripe Room) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 Units of Competency.

Unit Code	Unit Title
AMPA2100	Overview offal processing
AMPA2103	Further process tripe
AMPA2104	Trim processed tripe
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who works in further processing of tripe.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for further processing of tripe.

AMPSS00022 Green Offal Processing (Maws Processing) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to recover pig paunches.

Pathways Information

The Units of Competency comprising the Green Offal Processing (Maws Processing) Skill Set drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 Units of Competency.

Unit Code	Unit Title
AMPA2100	Overview offal processing
AMPA2107	Process maws
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who works in the recovering of pig paunches.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for recovering pig paunches.

AMPSS00023 Green Offal Processing (Paunch Opening and Trim - Beef) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to process and recover beef paunches.

Pathways Information

The Units of Competency comprising the Green Offal Processing (Paunch Opening and trim – Beef) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AMPA2100	Overview offal processing
AMPA2101	Prepare and trim honeycomb
AMPA2102	Recover mountain chain
AMPA2152	Process paunch
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who works in the paunch room of a beef processing plant.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for processing and recovering beef paunch.

AMPSS00024 Green Offal Processing (Paunch Opening and Trim - Sheep & Goats) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to process and recover sheep and goat paunches.

Pathways Information

The Units of Competency comprising the Green Offal Processing (Paunch Opening and Trim – Sheep/Goats) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPA2100	Overview offal processing
AMPA2105	Process small stock tripe
AMPXC209	Sharpen knives

Target Group

Typically the trainee is a company employee who empties paunches and recovers tripe for processing.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for processing and recovering sheep and goat paunch.

AMPSS00025 Green Offal Processing (Runner Room) Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to process and recover runners in a slaughtering establishment.

Pathways Information

The Units of Competency comprising the Green Offal Processing (Runner Room) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPA2089	Process runners
AMPA2100	Overview offal processing
AMPXC209	Sharpen knives

Target Group

Typically the trainee is a company employee who works in the recovery and processing of runners in a slaughtering establishment.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for recovery and processing of runners in a slaughtering establishment.

AMPSS00026 Head Chain Operator Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to recover the head meat in meat processing plants.

Pathways Information

The Units of Competency comprising the Head Meat Recovery Skill Set are drawn from AQF level II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AMPA2081	Drop tongue
AMPA2082	Wash head
AMPA2084	Remove cheek meat
AMPA3043	Prepare head for inspection
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who responsible for the recovery of head meat in a meat processing plant.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for recovering the head meat in meat processing plants.

AMPSS00027 Humane Slaughter of Animals Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to meet the industry requirements for the humane slaughter of animals in an Australian meat processing plant.

Pathways Information

The units of competency comprising the Humane Slaughter of Animals Skill Set are drawn from AQF levels II and III in the qualifications, and can be counted towards other qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPCOR204	Follow safe work policies and procedures
AMPA2006	Apply animal welfare and handling requirements
AMPA3001	Stick and bleed animal
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who is engaged in the bleeding of livestock and has responsibility to monitor animal welfare during this process.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the humane slaughter of animals in an Australian meat processing plant.

AMPSS00028 Knife Sharpening Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to safely sharpen and handle knives in the meat processing industry.

Pathways Information

The Units of Competency comprising the Knife Sharpening Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR204	Follow safe work policies and procedures
AMPX209	Sharpen knives

Target Group

Typically the trainee is a meat industry employee who is required to regularly use a knife during the slaughtering, boning, slicing or further processing of meat cuts.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the safe sharpening and use of knives in the meat industry.

AMPSS00029 Lairage Supervisor Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to supervise and manage the lairage operations in a meat processing enterprise.

Pathways Information

The units of competency comprising the Lairage Supervisor Skill Set are drawn from AQF levels II, III and IV in the qualifications, and can be counted towards other qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 12 units of competency.

Unit Code	Unit Title
AHCBIO302	Identify and report unusual disease or plant pest signs
BSBITU101	Operate a personal computer
AMPCOR205	Communicate in the workplace
AMPCOR401	Manage own work performance
AMPCOR403	Participate in workplace health and safety risk control process
AMPA2006	Apply animal welfare and handling requirements

AMPA2007	Identify animals using electronic systems
AMPA411	Oversee humane handling of animals
AMPX423	Supervise new recruits
AMPA3002	Handle animals humanely while conducting ante-mortem inspection
AMPA3069	Perform ante-mortem inspection and make disposition
AMPX204	Maintain production records

Target Group

Typically the lairage supervisor/manager is a company employee whose responsibilities include:

- overall accountability for stock welfare in lairage
- interaction with auditors
- making/carrying out disposition decisions
- authority to deal with transportation/unloading issues
- supervision of other stockpersons

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for lairage supervisors/managers in processing plants.

AMPSS00030 Loadout Carcase Product Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to prepare carcasses for loadout from a cold storage area.

Pathways Information

The Units of Competency comprising the Loadout Carcase Product Skill Set are drawn from AQF level II and III in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPA2108	Loadout meat product
AMPA2109	Store carcase product
AMPA2111	Locate storage areas and product
AMPA3068	Prepare and despatch meat products

Target Group

Typically the trainee is an enterprise employee who is required to consolidate and then despatch carcase orders including the loading of trucks, containers, etc.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for enterprise employees who work in cold storage areas consolidating orders and despatching carcasses for transportation.

AMPSS00031 Loadout Carton Product Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to prepare cartons for loadout from a cold storage area.

Pathways Information

The Units of Competency comprising the Loadout Carton Product Skill Set are drawn from AQF level II and III in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPA2108	Loadout meat product
AMPA2110	Store carton product
AMPA2111	Locate storage areas and product
AMPA3068	Prepare and despatch meat products

Target Group

Typically the trainee is an enterprise employee who is required to work in cold storage areas to consolidate orders then prepare and despatch carton product for transportation.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for enterprise employees who work in cold storage areas consolidating orders and despatching carton products for transportation.

AMPSS00032 Meat Hygiene Assessment (Carcase) Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to conduct a carcass Meat Hygiene Assessment in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Hygiene Assessment (Slaughter Floor) Skill Set are drawn from AQF levels II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPA3072	Perform carcass Meat Hygiene Assessment

Target Group

Typically the Meat Hygiene Assessment data is gathered by a company QA or regulatory officer who assesses carcass hygiene.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for conducting carcass Meat Hygiene Assessment in a meat processing plant.

4	AMPv1	Units recoded
3	MTM11v3.1	Name change to unit: MTMCOR203A Apply Quality Assurance practices is now MTMCOR203B Comply with Quality Assurance and HACCP requirements
2	MTM11v3	Replaced missing information in Skill Set Requirements
1	MTM11v1.1	Initial release

Description

This Skill Set describes the skills and knowledge to conduct a carton meat product Meat Hygiene Assessment in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Hygiene Assessment (Boning Room) Skill Set are drawn from AQF levels II, III and IV in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency:

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements

AMPA3074	Perform boning room Meat Hygiene Assessment
----------	---

Target Group

Typically the Meat Hygiene Assessment data is gathered by a company QA or regulatory officer who assesses carton meat for contamination.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for conducting carton meat product Meat Hygiene Assessment in a meat processing plant.

AMPSS00034 Meat Hygiene Assessment (Offal Room) Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to conduct an offal room Meat Hygiene Assessment in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Hygiene Assessment (Offal Room) Skill Set are drawn from AQF levels II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPA3081	Perform offal Meat Hygiene Assessment

Target Group

Typically the Meat Hygiene Assessment data is gathered by a company QA or regulatory officer who assesses offal product for contamination.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for conducting offal room Meat Hygiene Assessment in a meat processing plant.

AMPSS00035 Meat Hygiene Assessment (Process Monitoring) Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to conduct a process monitoring Meat Hygiene Assessment in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Hygiene Assessment (Process Monitoring) Skill Set are drawn from AQF levels II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPA3073	Perform process monitoring for Meat Hygiene Assessment

Target Group

Typically the Meat Hygiene Assessment data is gathered by a company QA or regulatory officer who assesses operator compliance with work instructions and Standard Operating Procedures documented in the company's Approved Arrangement.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for conducting process monitoring Meat Hygiene Assessment in a meat processing plant.

AMPSS00036 Meat Hygiene Assessment Officer Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to manage a Meat Hygiene Assessment program in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Hygiene Assessment Officer Skill Set are drawn from AQF levels II and IV in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPA401	Implement a Meat Hygiene Assessment program

Target Group

Typically the Meat Hygiene Assessment data is gathered by a company QA or regulatory officer who manages Meat Hygiene Assessment processes.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for managing Meat Hygiene Assessment in a meat processing plant.

AMPSS00037 Meat Industry Microbiological Testing Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to conduct rapid tests for pathogens in meat processing laboratories as described in the Department of Agriculture's approved methods for microbiological testing of meat and meat products.

Applicant students would preferably have completed Certificate III in Meat Processing (General) which includes some of the Units required. Alternatively, applicant students will have substantial experience at a meat processing plant, including work in Quality Assurance (QA) or a laboratory, and have demonstrated skills commensurate with AQF III.

Pathways Information

These competencies can provide credit towards:

MSL44109 Certificate IV in Laboratory Techniques (Meat Processing) and

MSL54109 Diploma of Laboratory Technology (Meat Processing)

Qualifications from the vocational training and education sector articulate directly into tertiary qualifications, so advanced standing would be given towards a degree level qualification.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 15 units of competency.

Unit Code	Unit Title
MSL933001	Maintain the laboratory/field workplace fit for purpose

MSL973002	Prepare working solutions
MSL973003	Prepare culture media
MSL973004	Perform aseptic techniques
MSL933004	Perform calibration checks on equipment and assist with its maintenance
MSL934003	Maintain and control stocks
MSL935002	Assist in the maintenance of reference materials
MSL953001	Receive and prepare samples for testing
MSL974006	Perform biological procedures
MSL973007	Perform microscopic examination
MSL974004	Perform food tests
MSL975001	Perform microbiological tests
MSL924001	Process and interpret data
MSL925001	Analyse data and report results
MSL935003	Authorise the issue of test results

Target Group

This Skill Set is for meat industry laboratory workers who are required to perform rapid tests for pathogens as described in the Department of Agriculture approved methods for microbiological testing of meat and meat products.

Suggested words for Statement of Attainment

These Units from the MSL09 Laboratory Operations Training Package meet the requirements for conducting rapid tests for pathogens in meat processing laboratories as described in the Department of Agriculture's approved methods for microbiological testing of meat and meat products.

AMPSS00038 Meat Packer (Boning Room) Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to handle and pack meat products at a meat processing boning room.

Pathways Information

The Units of Competency comprising the Meat Packer (Boning Room) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2068	Inspect meat for defects
AMPA2070	Identify cuts and specifications
AMPA2071	Pack meat products

Target Group

Typically the trainee is a company employee who is engaged in the handling and packing of meat products in a meat processing boning room.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the handling and packing of meat products at a meat processing boning room.

AMPSS00039 Meat Packer (Offal Room) Skill Set

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Description

This Skill Set describes the skills and knowledge to handle and pack meat products at a meat processing offal room.

Pathways Information

The Units of Competency comprising the Meat Packer (Offal Room) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2068	Inspect meat for defects

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the handling and packing of meat products at a meat processing offal room.

AMPSS00040 Meat Processing Cleaner (Amenities) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to clean amenities in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Processing Cleaner (Amenities) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
CPPCLO3035	Maintain cleaning storage areas
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2172	Clean amenities and grounds
AMPA2173	Overview cleaning program

Target Group

Typically the trainee is an existing employee who will be able to clean amenities in a meat processing plant.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for cleaning amenities in a meat processing plant.

AMPSS00041 Meat Processing Cleaner (Boning Room) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to clean after operations in a boning room.

Pathways Information

The Units of Competency comprising the Meat Processing Cleaner (Boning Room) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
CPPCLO3035	Maintain cleaning storage areas
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2173	Overview cleaning program
AMPA2174	Clean after operations – boning room

Target Group

Typically the trainee is an existing employee who will be able to undertake a post-production clean including immobilizing machinery and operating cleaning equipment in a boning room.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for cleaning after operations in a boning room.

AMPSS00042 Meat Processing Cleaner (Chiller) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to clean chillers in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Processing Cleaner (Chiller) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
CPPCLO3035	Maintain cleaning storage areas
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2173	Overview cleaning program
AMPX205	Clean chillers

Target Group

Typically the trainee is an existing employee who will be able to clean chillers in a meat processing plant.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for cleaning chillers in a meat processing plant.

AMPSS00043 Meat Processing Cleaner (Slaughter Floor) Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to clean the slaughter floor after operations in a meat processing plant.

Pathways Information

The Units of Competency comprising the Meat Processing Cleaner (Slaughter Floor) Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
CPPCLO3035	Maintain cleaning storage areas
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPA2173	Overview cleaning program
AMPA2175	Clean after operations – slaughter floor

Target Group

Typically the trainee is an existing employee who will be able to undertake a post-production clean including immobilizing machinery and operating cleaning equipment.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for cleaning the slaughter floor after operations in a meat processing plant.

AMPSS00044 Meat Processing Core Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the core skills and knowledge required to work in a meat processing enterprise.

Pathways Information

The Units of Competency comprising the Meat Processing Core Skill Set are core Units for most AQF level II and III Qualifications, and can be counted towards these Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry

Target Group

Typically the trainee is an enterprise employee who is new to the industry or the enterprise.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for core operator skills to work in a meat processing enterprise.

AMPSS00045 Meat Processing Livestock Handler Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to handle animals when preparing for slaughter in meat processing plants, feedlots or saleyards.

Pathways Information

The units of competency comprising the Meat Processing Livestock Stock Handler Skill Set are drawn from AQF levels II and III in the qualifications, and can be counted towards other qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCLSK204	Carry out regular livestock observation
AHCLSK205	Handle livestock using basic techniques
AMPCOR204	Follow safe work policies and procedures
AMPA2000	Prepare animals for slaughter
AMPA2006	Apply animal welfare and handling requirements

Target Group

Typically the trainee is a company employee who is engaged in the handling and management of stock at a meat processing plant, feedlots or sale yards.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for humane handling of animals when preparing for slaughter in meat processing plants, feedlots or saleyards.

AMPSS00046 Pack Meat Products Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to pack meat products into cartons ready for chilling and freezing prior to transport.

Pathways Information

The Units of Competency comprising the Pack Meat Products Skill Set are drawn from AQF level II in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AMPA2068	Inspect meat for defects
AMPA2070	Identify cuts and specifications
AMPA2071	Pack meat products

Target Group

Typically the trainee is an enterprise employee who is required to pack meat or offal products into cartons ready for chilling and freezing.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for enterprise employees who are required to pack meat products into cartons ready for chilling and freezing prior to transport.

AMPSS00047 Prepare Head for Inspection Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to prepare a head for inspection by an authorised officer.

Pathways Information

The Units of Competency comprising the Prepare Head for Inspection Skill Set are drawn from AQF levels II and III in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AMPA3043	Prepare head for inspection
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who works on the slaughter floor preparing heads for inspection by an authorised officer.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for preparing a head for inspection by an authorised officer.

AMPSS00048 Process Animal Covering Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to trim hides, pelts or skins before grading and then despatch hides, pelts or skins from a slaughtering establishment.

Pathways Information

The Units of Competency comprising the Process Animal Covering Skill Set are drawn from AQF level II in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AMPA2128	Overview hide or pelt or skin processing
AMPA2129	Trim hide or skin
AMPA2131	Grade hide or skin
AMPA2132	Despatch hide or skin

Target Group

Typically the trainee is an enterprise employee who is required to trim, grade and despatch hides, pelts or skins from an abattoir.

Suggested words for Statement of Attainment

---------	---

Target Group

This Skill Set is for meat retailers who wish to include Uncooked Comminuted Fermented Meat (UCFM) products with their existing product range.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the inclusion of UCFM products in a meat retailing product range.

AMPSS00054 Tongue Meat Recovery Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to recover tongues in a meat processing plant.

Pathways Information

The Units of Competency comprising the Tongue Meat Recovery Skill Set are drawn from AQF level II in the Qualifications, and can be counted towards other Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AMPA2081	Drop tongue
AMPX209	Sharpen knives

Target Group

Typically the trainee is a company employee who works on a slaughter floor recovering tongues.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for recovering tongues in a meat processing plant.

AMPSS00055 Transport Livestock Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to transport livestock to a meat processing plant.

Pathways Information

The Units of Competency comprising the Transport Livestock Skill Set are drawn from AQF levels II and III in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AHCLSK205	Handle livestock using basic techniques
AHCLSK207	Load and unload livestock
TLID3020	Care for livestock in transit

Target Group

Typically the trainee is a transport operator who has responsibility for transporting livestock to a meat processing plant.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry animal welfare and handling requirements for transport operators who have responsibility for transporting livestock to a meat processing plant.

AMPSS00056 Meat Processing New Supervisor Skill Set

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge required to lead and supervise small groups or teams, including new recruits, in a meat processing enterprise.

Pathways Information

The Units of Competency comprising the New Supervisor Skills Set are drawn from AQF level IV in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to monitor the operation of wastewater plant and equipment, including the collection and testing of water samples.

Pathways Information

The Units of Competency comprising the Meat Processing Waste Water Operator Skill Set (level 1) are drawn from AQF level II in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPX208	Apply environmentally sustainable work practices
NWP208A	Perform basic wastewater tests
NWP262A	Monitor and report wastewater treatment processes
NWP263A	Operate and maintain wastewater treatment plant and equipment

Target Group

Typically the trainee has responsibility for the daily operations and monitoring of wastewater plant and equipment, including the collection and testing of water samples.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the daily operations and monitoring of wastewater plant and equipment, including the collection and testing of water samples.

AMPSS00058 Meat Processing Waste Water Irrigation Skill Set (level 2)

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to operate and monitor meat processing wastewater treatment processes where the water is used for irrigation.

Pathways Information

The Units of Competency comprising the Meat Processing Waste Water Irrigation Skill Set (level 2) are drawn from AQF levels II and III in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
NWPTRT061	Operate and control wastewater treatment processes
NWPTRT062	Operate and control reclaimed water irrigation

Target Group

Typically the trainee has responsibility for the daily operations and monitoring of meat processing wastewater treatment processes where the water is used for irrigation.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for operating and monitoring meat processing wastewater treatment processes where the water is used for irrigation.

AMPSS00059 Meat Processing Waste Water Non-irrigation Skill Set (level 2)

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to undertake the treatment, collection and transfer of waste water in a meat processing plant

Pathways Information

The Units of Competency comprising the Meat Processing Waste Water Non-irrigation Skill Set (level 2) are drawn from AQF levels II and III in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete four units of competency.

Unit Code	Unit Title
NWPTRT061	Operate and control wastewater processes
NWPTRT052	Operate and control hypochlorite disinfection processes
NWPNET042	Monitor and operate waste water collection and transfer systems
NWPTRT054	Operate and control chloramination processes

Target Group

Typically the trainee has responsibility for the daily tasks and monitoring associated with the treatment, collection and transfer of waste water in a meat processing plant.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for the treatment, collection and transfer of waste water in a meat processing plant.

AMPSS00060 Meat Processing Waste Water Environment Officer Skill Set (level 3)

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Description

This Skill Set describes the skills and knowledge to monitor and control water and wastewater system assets in a meat processing enterprise.

People wishing to undertake this Skill Set should have completed either

- Meat Processing Waste Water Irrigation Skill Set (level 2), or
- Meat Processing Waste Water Non-irrigation Skill Set (level 2)

or be able to demonstrate equivalence in industry knowledge and experience prior to commencement.

Pathways Information

The Units of Competency comprising the Meat Processing Waste Water Environment Officer Skill Set (level 3) are drawn from AQF levels II, III and IV in the Qualifications and can be counted towards meat processing Qualifications where this is in accordance with the Qualification requirements.

Licensing/Regulatory Information

Nil.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AMPCOR206	Overview the meat industry

MSL973001	Perform basic tests
MSL954001	Obtain representative samples in accordance with sampling plan
NWPNET025	Coordinate and manage maintenance and repair of network assets
AMPX410	Facilitate achievement of enterprise environmental policies and goals
MSMENV172	Identify and minimise environmental hazards

Target Group

Typically the trainee has responsibility for monitoring and control of meat processing enterprise water and wastewater system assets.

Suggested words for Statement of Attainment

This Skill Set from the AMP Australian Meat Industry Training Package meets the industry requirements for monitoring and control of meat processing enterprise water and wastewater system assets.
