AMP Australian Meat Processing Training Package

Release: 2.2

CONTENTS

AMP Australian Meat Processing Training Package	29
AMP20116 Certificate II in Meat Processing (Food Services)	30
AMP20216 Certificate II in Meat Processing (Smallgoods)	41
AMP20316 Certificate II in Meat Processing (Abattoirs)	45
AMP20415 Certificate II in Meat Processing (Meat Retailing)	56
AMP30116 Certificate III in Meat Processing (Boning Room)	60
AMP30216 Certificate III in Meat Processing (Food Services)	63
AMP30316 Certificate III in Meat Processing (Meat Safety)	73
AMP30416 Certificate III in Meat Processing (Rendering)	78
AMP30516 Certificate III in Meat Processing (Slaughtering)	81
AMP30616 Certificate III in Meat Processing (General)	87
AMP30716 Certificate III in Meat Processing (Quality Assurance)	96
AMP30815 Certificate III in Meat Processing (Retail Butcher)	100
AMP30916 Certificate III in Meat Processing (Smallgoods - General)	106
AMP31016 Certificate III in Meat Processing (Smallgoods - Manufacture)	112
AMP31116 Certificate III in Meat Processing (Livestock Handling)	118
AMP31216 Certificate III in Meat Processing (Packing Operations)	123
AMP40215 Certificate IV in Meat Processing (General)	127
AMP40315 Certificate IV in Meat Processing (Leadership)	132
AMP40415 Certificate IV in Meat Processing (Quality Assurance)	135
AMP40516 Certificate IV in Meat Processing (Meat Safety)	138
AMP50115 Diploma of Meat Processing (Meat Retailing)	144
AMP50215 Diploma of Meat Processing	147
AMP60115 Advanced Diploma of Meat Processing	150
AMP80115 Graduate Certificate in Agribusiness	154
AMP80215 Graduate Diploma of Agribusiness	157
AHCBIO302 Identify and report unusual disease or plant pest signs	160
Assessment Requirements for AHCBIO302 Identify and report unusual disease or plant pest signs	162
AHCLSK204 Carry out regular livestock observation	164
Assessment Requirements for AHCLSK204 Carry out regular livestock observation	167
AHCLSK205 Handle livestock using basic techniques	169
Assessment Requirements for AHCLSK205 Handle livestock using basic techniques	172
AHCLSK207 Load and unload livestock	174
Assessment Requirements for AHCLSK207 Load and unload livestock	177
AHCLSK212A Ride horses to carry out stock work	179
AHCLSK320 Coordinate and monitor livestock transport	184
Assessment Requirements for AHCLSK320 Coordinate and monitor livestock transport	187
AHCMOM202 Operate tractors	189
Assessment Requirements for AHCMOM202 Operate tractors	192
AHCMOM212 Operate quad bikes	194
Assessment Requirements for AHCMOM212 Operate quad bikes	197
AMPA2000 Prepare animals for slaughter	199
Assessment Requirements for AMPA2000 Prepare animals for slaughter	202
AMPA2001 Feed race	204
Assessment Requirements for AMPA2001 Feed race	206
AMPA2002 Restrain animal	208
Assessment Requirements for AMPA2002 Restrain animal	210
AMPA2003 Perform emergency kill	212

Assessment Requirements for AMPA2003 Perform emergency kill.....	214
AMPA2004 Assess, purchase and transport calves.....	216
Assessment Requirements for AMPA2004 Assess, purchase and transport calves.....	219
AMPA2005 Unload livestock.....	221
Assessment Requirements for AMPA2005 Unload livestock.....	224
AMPA2006 Apply animal welfare and handling requirements.....	226
Assessment Requirements for AMPA2006 Apply animal welfare and handling requirements.....	229
AMPA2007 Identify animals using electronic systems.....	231
Assessment Requirements for AMPA2007 Identify animals using electronic systems.....	233
AMPA2008 Shackle animal.....	235
Assessment Requirements for AMPA2008 Shackle animal.....	237
AMPA2009 Operate electrical stimulator.....	239
Assessment Requirements for AMPA2009 Operate electrical stimulator.....	242
AMPA2010 Remove head.....	244
Assessment Requirements for AMPA2010 Remove head.....	246
AMPA2011 Cut hocks.....	248
Assessment Requirements for AMPA2011 Cut hocks.....	250
AMPA2012 Mark brisket.....	252
Assessment Requirements for AMPA2012 Mark brisket.....	254
AMPA2013 Complete changeover operation.....	256
Assessment Requirements for AMPA2013 Complete changeover operation.....	258
AMPA2014 Trim pig pre evisceration.....	260
Assessment Requirements for AMPA2014 Trim pig pre evisceration.....	262
AMPA2015 Number carcass and head.....	264
Assessment Requirements for AMPA2015 Number carcass and head.....	266
AMPA2016 Punch pelts.....	268
Assessment Requirements for AMPA2016 Punch pelts.....	270
AMPA2017 Remove brisket wool.....	272
Assessment Requirements for AMPA2017 Remove brisket wool.....	274
AMPA2018 Prepare hide or pelt for removal.....	276
Assessment Requirements for AMPA2018 Prepare hide or pelt for removal.....	278
AMPA2019 Bag tail.....	280
Assessment Requirements for AMPA2019 Bag tail.....	282
AMPA2020 Remove and record tag.....	284
Assessment Requirements for AMPA2020 Remove and record tag.....	286
AMPA2021 Seal or drain urinary tract.....	288
Assessment Requirements for AMPA2021 Seal or drain urinary tract.....	290
AMPA2022 Singe carcass.....	292
Assessment Requirements for AMPA2022 Singe carcass.....	294
AMPA2023 Shave carcass.....	296
Assessment Requirements for AMPA2023 Shave carcass.....	298
AMPA2024 Flush carcass.....	300
Assessment Requirements for AMPA2024 Flush carcass.....	302
AMPA2025 Operate scalding and de-hairing equipment.....	304
Assessment Requirements for AMPA2025 Operate scalding and de-hairing equipment.....	306
AMPA2026 Operate whizzard knife.....	308
Assessment Requirements for AMPA2026 Operate whizzard knife.....	310
AMPA2027 Operate rise and fall platform.....	312
Assessment Requirements for AMPA2027 Operate rise and fall platform.....	314
AMPA2028 Operate vacuum blood collection process.....	316
Assessment Requirements for AMPA2028 Operate vacuum blood collection process.....	318
AMPA2029 Operate nose roller.....	320

Assessment Requirements for AMPA2029 Operate nose roller	322
AMPA2030 Operate pneumatic cutter.....	324
Assessment Requirements for AMPA2030 Operate pneumatic cutter	326
AMPA2031 Operate circular saw	328
Assessment Requirements for AMPA2031 Operate circular saw.....	330
AMPA2032 Prepare carcass and equipment for hide or pelt puller.....	332
Assessment Requirements for AMPA2032 Prepare carcass and equipment for hide or pelt puller	334
AMPA2035 Operate new technology or process	336
Assessment Requirements for AMPA2035 Operate new technology or process.....	338
AMPA2036 Operate sterivac equipment.....	340
Assessment Requirements for AMPA2036 Operate sterivac equipment	342
AMPA2037 De-rind meat cuts.....	344
Assessment Requirements for AMPA2037 De-rind meat cuts.....	346
AMPA2038 De-nude meat cuts.....	348
Assessment Requirements for AMPA2038 De-nude meat cuts.....	350
AMPA2039 Operate rib puller	352
Assessment Requirements for AMPA2039 Operate rib puller.....	354
AMPA2040 Operate frenching machine	356
Assessment Requirements for AMPA2040 Operate frenching machine.....	358
AMPA2041 Operate cubing machine.....	360
Assessment Requirements for AMPA2041 Operate cubing machine	362
AMPA2042 Cure and corn product in a meat processing plant.....	364
Assessment Requirements for AMPA2042 Cure and corn product in a meat processing plant	366
AMPA2043 Operate head splitter.....	368
Assessment Requirements for AMPA2043 Operate head splitter	370
AMPA2044 Trim neck.....	372
Assessment Requirements for AMPA2044 Trim neck	374
AMPA2045 Trim fore quarter to specification	376
Assessment Requirements for AMPA2045 Trim fore quarter to specification.....	378
AMPA2046 Trim hindquarter to specification	380
Assessment Requirements for AMPA2046 Trim hindquarter to specification.....	382
AMPA2047 Inspect hindquarter and remove contamination.....	384
Assessment Requirements for AMPA2047 Inspect hindquarter and remove contamination.....	386
AMPA2048 Inspect fore quarter and remove contamination.....	388
Assessment Requirements for AMPA2048 Inspect fore quarter and remove contamination.....	390
AMPA2049 Remove spinal cord	392
Assessment Requirements for AMPA2049 Remove spinal cord.....	394
AMPA2050 Operate jaw breaker	396
Assessment Requirements for AMPA2050 Operate jaw breaker.....	398
AMPA2060 Grade carcass.....	400
Assessment Requirements for AMPA2060 Grade carcass	402
AMPA2061 Weigh carcass	404
Assessment Requirements for AMPA2061 Weigh carcass	406
AMPA2062 Operate semi-automatic tagging machine.....	408
Assessment Requirements for AMPA2062 Operate semi-automatic tagging machine	410
AMPA2063 Measure fat	412
Assessment Requirements for AMPA2063 Measure fat.....	414
AMPA2064 Label and stamp carcass	416
Assessment Requirements for AMPA2064 Label and stamp carcass	418
AMPA2065 Wash carcass.....	420
Assessment Requirements for AMPA2065 Wash carcass	422

AMPA2066 Operate a decontamination unit.....	424
Assessment Requirements for AMPA2066 Operate a decontamination unit.....	426
AMPA2067 Remove tenderloin	428
Assessment Requirements for AMPA2067 Remove tenderloin	430
AMPA2068 Inspect meat for defects.....	432
Assessment Requirements for AMPA2068 Inspect meat for defects	434
AMPA2069 Assemble and prepare cartons.....	436
Assessment Requirements for AMPA2069 Assemble and prepare cartons	438
AMPA2070 Identify cuts and specifications.....	440
Assessment Requirements for AMPA2070 Identify cuts and specifications	442
AMPA2071 Pack meat products.....	444
Assessment Requirements for AMPA2071 Pack meat products.....	447
AMPA2072 Operate carton sealing machine	449
Assessment Requirements for AMPA2072 Operate carton sealing machine	451
AMPA2073 Operate carton scales	453
Assessment Requirements for AMPA2073 Operate carton scales	456
AMPA2074 Operate strapping machine	458
Assessment Requirements for AMPA2074 Operate strapping machine.....	460
AMPA2075 Operate carton forming machine	462
Assessment Requirements for AMPA2075 Operate carton forming machine	464
AMPA2076 Operate automatic CL determination machine	466
Assessment Requirements for AMPA2076 Operate automatic CL determination machine	468
AMPA2077 Operate bag forming equipment	470
Assessment Requirements for AMPA2077 Operate bag forming equipment	472
AMPA2080 Assess dentition.....	474
Assessment Requirements for AMPA2080 Assess dentition.....	476
AMPA2081 Drop tongue	478
Assessment Requirements for AMPA2081 Drop tongue	480
AMPA2082 Wash head.....	482
Assessment Requirements for AMPA2082 Wash head	484
AMPA2083 Bone head.....	486
Assessment Requirements for AMPA2083 Bone head	488
AMPA2084 Remove cheek meat.....	490
Assessment Requirements for AMPA2084 Remove cheek meat.....	492
AMPA2085 Bar head and remove cheek meat.....	494
Assessment Requirements for AMPA2085 Bar head and remove cheek meat	496
AMPA2086 Process thick skirts	498
Assessment Requirements for AMPA2086 Process thick skirts	500
AMPA2087 Process thin skirts	502
Assessment Requirements for AMPA2087 Process thin skirts	504
AMPA2088 Process offal	506
Assessment Requirements for AMPA2088 Process offal	508
AMPA2089 Process runners.....	510
Assessment Requirements for AMPA2089 Process runners.....	512
AMPA2100 Overview offal processing.....	514
Assessment Requirements for AMPA2100 Overview offal processing	516
AMPA2101 Prepare and trim honeycomb.....	518
Assessment Requirements for AMPA2101 Prepare and trim honeycomb.....	520
AMPA2102 Recover mountain chain.....	522
Assessment Requirements for AMPA2102 Recover mountain chain	524
AMPA2103 Further process tripe.....	526
Assessment Requirements for AMPA2103 Further process tripe	528
AMPA2104 Trim processed tripe	530

Assessment Requirements for AMPA2104 Trim processed tripe	532
AMPA2105 Process small stock tripe.....	534
Assessment Requirements for AMPA2105 Process small stock tripe	536
AMPA2106 Process bibles	538
Assessment Requirements for AMPA2106 Process bibles.....	540
AMPA2107 Process maws	542
Assessment Requirements for AMPA2107 Process maws	544
AMPA2108 Loadout meat product.....	546
Assessment Requirements for AMPA2108 Loadout meat product	549
AMPA2109 Store carcass product.....	551
Assessment Requirements for AMPA2109 Store carcass product.....	553
AMPA2110 Store carton product	555
Assessment Requirements for AMPA2110 Store carton product.....	557
AMPA2111 Locate storage areas and product.....	559
Assessment Requirements for AMPA2111 Locate storage areas and product	562
AMPA2112 Complete re-pack operation.....	564
Assessment Requirements for AMPA2112 Complete re-pack operation.....	566
AMPA2113 Bag carcass	568
Assessment Requirements for AMPA2113 Bag carcass	570
AMPA2114 Overview offal processing on the slaughter floor	572
Assessment Requirements for AMPA2114 Overview offal processing on the slaughter floor	574
AMPA2115 Separate offal	576
Assessment Requirements for AMPA2115 Separate offal	578
AMPA2116 Trim offal fat.....	580
Assessment Requirements for AMPA2116 Trim offal fat	582
AMPA2117 Separate and tie runners	584
Assessment Requirements for AMPA2117 Separate and tie runners	586
AMPA2118 Recover thin skirts	588
Assessment Requirements for AMPA2118 Recover thin skirts	590
AMPA2125 Remove thick skirts.....	592
Assessment Requirements for AMPA2125 Remove thick skirts.....	594
AMPA2126 Remove flares	596
Assessment Requirements for AMPA2126 Remove flares	598
AMPA2127 Recover offal	600
Assessment Requirements for AMPA2127 Recover offal	602
AMPA2128 Overview hide or pelt or skin processing.....	604
Assessment Requirements for AMPA2128 Overview hide or pelt or skin processing.....	606
AMPA2129 Trim hide or skin.....	608
Assessment Requirements for AMPA2129 Trim hide or skin.....	610
AMPA2130 Salt hide or skin.....	612
Assessment Requirements for AMPA2130 Salt hide or skin.....	614
AMPA2131 Grade hide or skin.....	616
Assessment Requirements for AMPA2131 Grade hide or skin	618
AMPA2132 Despatch hide or skin.....	620
Assessment Requirements for AMPA2132 Despatch hide or skin.....	622
AMPA2133 Treat hides chemically.....	624
Assessment Requirements for AMPA2133 Treat hides chemically	626
AMPA2134 Chill or ice hides.....	628
Assessment Requirements for AMPA2134 Chill or ice hides	630
AMPA2135 Crop pelts.....	632
Assessment Requirements for AMPA2135 Crop pelts	634
AMPA2136 Overview fellmongering operations	636

Assessment Requirements for AMPA2136 Overview fellmongering operations.....	638
AMPA2137 Chemically treat skins for fellmongering process	640
Assessment Requirements for AMPA2137 Chemically treat skins for fellmongering process	642
AMPA2138 Prepare chemicals for fellmongering process	644
Assessment Requirements for AMPA2138 Prepare chemicals for fellmongering process	646
AMPA2139 Operate wool drier and press	648
Assessment Requirements for AMPA2139 Operate wool drier and press.....	651
AMPA2140 Perform sweating operation on fellmongered skins	653
Assessment Requirements for AMPA2140 Perform sweating operation on fellmongered skins.....	655
AMPA2146 Perform skin fleshing operation	657
Assessment Requirements for AMPA2146 Perform skin fleshing operation.....	659
AMPA2147 Skirt and weigh fellmongered wool.....	661
Assessment Requirements for AMPA2147 Skirt and weigh fellmongered wool	663
AMPA2148 Operate wool puller.....	665
Assessment Requirements for AMPA2148 Operate wool puller	667
AMPA2149 Dispose of condemned carcass.....	669
Assessment Requirements for AMPA2149 Dispose of condemned carcass	671
AMPA2150 Skin condemned carcass.....	673
Assessment Requirements for AMPA2150 Skin condemned carcass	675
AMPA2151 Eviscerate condemned carcass	677
Assessment Requirements for AMPA2151 Eviscerate condemned carcass	679
AMPA2152 Process paunch.....	681
Assessment Requirements for AMPA2152 Process paunch	683
AMPA2153 Process slink by-products.....	685
Assessment Requirements for AMPA2153 Process slink by-products.....	688
AMPA2154 Process pet meat.....	690
Assessment Requirements for AMPA2154 Process pet meat	692
AMPA2155 Skin slinks	694
Assessment Requirements for AMPA2155 Skin slinks.....	696
AMPA2156 Process blood.....	698
Assessment Requirements for AMPA2156 Process blood	701
AMPA2157 Overview rendering process	703
Assessment Requirements for AMPA2157 Overview rendering process.....	705
AMPA2158 Operate hogger.....	707
Assessment Requirements for AMPA2158 Operate hogger.....	710
AMPA2159 Operate blow line	712
Assessment Requirements for AMPA2159 Operate blow line	715
AMPA2160 Operate meat meal mill	717
Assessment Requirements for AMPA2160 Operate meat meal mill.....	719
AMPA2161 Operate waste recovery systems	721
Assessment Requirements for AMPA2161 Operate waste recovery systems.....	724
AMPA2162 Pack and despatch rendered products.....	726
Assessment Requirements for AMPA2162 Pack and despatch rendered products	729
AMPA2163 Break down and bone carcass for pet meat or rendering	731
Assessment Requirements for AMPA2163 Break down and bone carcass for pet meat or rendering	733
AMPA2170 Operate air filtration system	735
Assessment Requirements for AMPA2170 Operate air filtration system.....	737
AMPA2171 Clean carcass hanging equipment	739
Assessment Requirements for AMPA2171 Clean carcass hanging equipment.....	742
AMPA2172 Clean amenities and grounds.....	744

Assessment Requirements for AMPA2172 Clean amenities and grounds	746
AMPA2173 Overview cleaning program	748
Assessment Requirements for AMPA2173 Overview cleaning program	751
AMPA2174 Clean after operations - boning room.....	753
Assessment Requirements for AMPA2174 Clean after operations - boning room.....	756
AMPA2175 Clean after operations - slaughter floor.....	758
Assessment Requirements for AMPA2175 Clean after operations - slaughter floor.....	761
AMPA2176 Transport meat and meat products	763
Assessment Requirements for AMPA2176 Transport meat and meat products.....	765
AMPA2177 Handle working dogs in stock yards.....	767
Assessment Requirements for AMPA2177 Handle working dogs in stock yards.....	770
AMPA3000 Stun animal	772
Assessment Requirements for AMPA3000 Stun animal.....	775
AMPA3001 Stick and bleed animal	777
Assessment Requirements for AMPA3001 Stick and bleed animal	780
AMPA3002 Handle animals humanely while conducting ante-mortem inspection.....	782
Assessment Requirements for AMPA3002 Handle animals humanely while conducting ante-mortem inspection	785
AMPA3003 Assess effective stunning and bleeding.....	787
Assessment Requirements for AMPA3003 Assess effective stunning and bleeding	789
AMPA3004 Monitor the effective operations of electrical stimulation.....	791
Assessment Requirements for AMPA3004 Monitor the effective operations of electrical stimulation.....	794
AMPA3005 Rod weasand	796
Assessment Requirements for AMPA3005 Rod weasand.....	798
AMPA3006 Seal weasand	800
Assessment Requirements for AMPA3006 Seal weasand.....	802
AMPA3007 Ring bung.....	804
Assessment Requirements for AMPA3007 Ring bung	806
AMPA3008 Seal bung.....	808
Assessment Requirements for AMPA3008 Seal bung	810
AMPA3009 Split carcass	812
Assessment Requirements for AMPA3009 Split carcass	814
AMPA3010 Overview legging operation.....	816
Assessment Requirements for AMPA3010 Overview legging operation.....	818
AMPA3012 Make first leg opening cuts.....	820
Assessment Requirements for AMPA3012 Make first leg opening cuts	822
AMPA3013 Make second leg opening cuts.....	824
Assessment Requirements for AMPA3013 Make second leg opening cuts	826
AMPA3014 Perform legging on small stock.....	828
Assessment Requirements for AMPA3014 Perform legging on small stock	830
AMPA3020 Bone neck.....	832
Assessment Requirements for AMPA3020 Bone neck.....	834
AMPA3021 Perform 'Y' cut	836
Assessment Requirements for AMPA3021 Perform 'Y' cut	838
AMPA3022 Skin head.....	840
Assessment Requirements for AMPA3022 Skin head.....	842
AMPA3023 Explain opening cuts	844
Assessment Requirements for AMPA3023 Explain opening cuts	846
AMPA3024 Perform flanking cuts.....	848
Assessment Requirements for AMPA3024 Perform flanking cuts	850
AMPA3025 Perform brisket cuts.....	852
Assessment Requirements for AMPA3025 Perform brisket cuts	854

AMPA3026 Perform rumping cuts	856
Assessment Requirements for AMPA3026 Perform rumping cuts.....	858
AMPA3027 Perform rosette cuts	860
Assessment Requirements for AMPA3027 Perform rosette cuts.....	862
AMPA3028 Perform midline cuts.....	864
Assessment Requirements for AMPA3028 Perform midline cuts.....	866
AMPA3029 Scald and dehair carcass	868
Assessment Requirements for AMPA3029 Scald and dehair carcass.....	870
AMPA3030 Operate pelt puller	872
Assessment Requirements for AMPA3030 Operate pelt puller.....	874
AMPA3031 Operate hide puller	876
Assessment Requirements for AMPA3031 Operate hide puller.....	879
AMPA3032 Remove pelt manually	881
Assessment Requirements for AMPA3032 Remove pelt manually	883
AMPA3033 Bed dress carcass	885
Assessment Requirements for AMPA3033 Bed dress carcass	888
AMPA3034 Eviscerate animal carcass.....	890
Assessment Requirements for AMPA3034 Eviscerate animal carcass	892
AMPA3040 Operate brisket cutter or saw.....	894
Assessment Requirements for AMPA3040 Operate brisket cutter or saw	896
AMPA3041 Eviscerate wild game animal carcass.....	898
Assessment Requirements for AMPA3041 Eviscerate wild game animal carcass	900
AMPA3042 Backdown pig carcass	902
Assessment Requirements for AMPA3042 Backdown pig carcass	904
AMPA3043 Prepare head for inspection.....	906
Assessment Requirements for AMPA3043 Prepare head for inspection	908
AMPA3044 Operate air knife	910
Assessment Requirements for AMPA3044 Operate air knife.....	912
AMPA3045 Drop sock and pull shoulder pelt.....	914
Assessment Requirements for AMPA3045 Drop sock and pull shoulder pelt	916
AMPA3046 Undertake retain rail operations	918
Assessment Requirements for AMPA3046 Undertake retain rail operations	920
AMPA3047 Prepare and present viscera for inspection.....	922
Assessment Requirements for AMPA3047 Prepare and present viscera for inspection ..	924
AMPA3048 Bone small stock carcass - leg.....	926
Assessment Requirements for AMPA3048 Bone small stock carcass - leg	929
AMPA3049 Slice and trim leg - small stock	931
Assessment Requirements for AMPA3049 Slice and trim leg - small stock.....	933
AMPA3050 Bone large stock carcass - fore quarter.....	935
Assessment Requirements for AMPA3050 Bone large stock carcass - fore quarter.....	938
AMPA3051 Bone large stock carcass - hindquarter	940
Assessment Requirements for AMPA3051 Bone large stock carcass - hindquarter	943
AMPA3052 Slice and trim large stock fore quarter.....	945
Assessment Requirements for AMPA3052 Slice and trim large stock fore quarter.....	947
AMPA3053 Slice and trim large stock hindquarter	949
Assessment Requirements for AMPA3053 Slice and trim large stock hindquarter.....	951
AMPA3054 Break carcass using a bandsaw	953
Assessment Requirements for AMPA3054 Break carcass using a bandsaw	955
AMPA3061 Operate leg boning machine	957
Assessment Requirements for AMPA3061 Operate leg boning machine.....	959
AMPA3062 Operate trunk boning machine.....	961
Assessment Requirements for AMPA3062 Operate trunk boning machine	963
AMPA3063 Bone small stock carcass - shoulder.....	965

Assessment Requirements for AMPA3063 Bone small stock carcass - shoulder	968
AMPA3064 Bone small stock carcass - middle	970
Assessment Requirements for AMPA3064 Bone small stock carcass - middle	973
AMPA3065 Slice small stock carcass - shoulder	975
Assessment Requirements for AMPA3065 Slice small stock carcass - shoulder.....	978
AMPA3066 Slice small stock carcass - middle	980
Assessment Requirements for AMPA3066 Slice small stock carcass - middle.....	983
AMPA3067 Bone carcass using mechanical aids (large stock)	985
Assessment Requirements for AMPA3067 Bone carcass using mechanical aids (large stock)	988
AMPA3068 Prepare and despatch meat products	990
Assessment Requirements for AMPA3068 Prepare and despatch meat products	993
AMPA3069 Perform ante-mortem inspection and make disposition.....	995
Assessment Requirements for AMPA3069 Perform ante-mortem inspection and make disposition.....	998
AMPA3071 Implement food safety program	1001
Assessment Requirements for AMPA3071 Implement food safety program.....	1005
AMPA3072 Perform carcass Meat Hygiene Assessment.....	1008
Assessment Requirements for AMPA3072 Perform carcass Meat Hygiene Assessment	1010
AMPA3073 Perform process monitoring for Meat Hygiene Assessment.....	1012
Assessment Requirements for AMPA3073 Perform process monitoring for Meat Hygiene Assessment.....	1014
AMPA3074 Perform boning room Meat Hygiene Assessment	1016
Assessment Requirements for AMPA3074 Perform boning room Meat Hygiene Assessment.....	1018
AMPA3081 Perform offal Meat Hygiene Assessment.....	1020
Assessment Requirements for AMPA3081 Perform offal Meat Hygiene Assessment....	1022
AMPA3082 Operate batch cooker.....	1024
Assessment Requirements for AMPA3082 Operate batch cooker.....	1027
AMPA3083 Operate continuous cooker.....	1029
Assessment Requirements for AMPA3083 Operate continuous cooker	1031
AMPA3084 Operate press	1033
Assessment Requirements for AMPA3084 Operate press.....	1035
AMPA3085 Operate wet rendering process.....	1037
Assessment Requirements for AMPA3085 Operate wet rendering process.....	1039
AMPA3086 Monitor boiler operations.....	1041
Assessment Requirements for AMPA3086 Monitor boiler operations	1043
AMPA3087 Operate tallow processing plant	1045
Assessment Requirements for AMPA3087 Operate tallow processing plant	1048
AMPA3088 Operate blood processing plant	1050
Assessment Requirements for AMPA3088 Operate blood processing plant.....	1052
AMPA3089 Produce rendered products hygienically	1054
Assessment Requirements for AMPA3089 Produce rendered products hygienically	1056
AMPA3090 Render edible products	1058
Assessment Requirements for AMPA3090 Render edible products	1061
AMPA3091 Implement a Quality Assurance program for rendering plant	1063
Assessment Requirements for AMPA3091 Implement a Quality Assurance program for rendering plant	1065
AMPA3092 Grade beef carcasses using Meat Standards Australia standards	1067
Assessment Requirements for AMPA3092 Grade beef carcasses using Meat Standards Australia standards.....	1070
AMPA3093 Use standard product descriptions - sheep and goats	1072

Assessment Requirements for AMPA3093 Use standard product descriptions - sheep and goats	1075
AMPA3094 Use standard product descriptions - beef.....	1077
Assessment Re quirements for AMPA3094 Use standard product descriptions - beef...	1079
AMPA3095 Use standard product descriptions - pork.....	1081
Assessment Re quirements for AMPA3095 Use standard product descriptions - pork ..	1083
AMPA3096 Use standard product descriptions - kangaroos.....	1085
Assessment Re quirements for AMPA3096 Use standard product descriptions - kangaroos	1087
AMPA3100 Perform manual chemical lean testing.....	1089
Assessment Re quirements for AMPA3100 Perform manual chemical lean testing	1092
AMPA3101 Overview of the NLIS for sheep and goats.....	1094
Assessment Re quirements for AMPA3101 Overview of the NLIS for sheep and goats .	1097
AMPA3102 Overview of the NLIS program utilising RFIDs	1099
Assessment Re quirements for AMPA3102 Overview of the NLIS program utilising RFIDs	1102
AMPA3103 Manage NLIS data for livestock in lairage	1104
Assessment Re quirements for AMPA3103 Manage NLIS data for livestock in lairage .	1106
AMPA3104 Manage NLIS data for sheep and goats in lairage	1108
Assessment Re quirements for AMPA3104 Manage NLIS data for sheep and goats in lairage	1110
AMPA3105 Manage NLIS for direct purchase of stock identified with an RFID.....	1112
Assessment Re quirements for AMPA3105 Manage NLIS for direct purchase of stock identified with an RFID	1114
AMPA3106 Manage NLIS for direct purchase of sheep or goats	1116
Assessment Re quirements for AMPA3106 Manage NLIS for direct purchase of sheep or goats	1118
AMPA3107 Manage NLIS data for saleyard purchase of livestock.....	1120
Assessment Re quirements for AMPA3107 Manage NLIS data for saleyard purchase of livestock.....	1123
AMPA3108 Manage NLIS for saleyard purchase of sheep or goats	1125
Assessment Re quirements for AMPA3108 Manage NLIS for saleyard purchase of sheep or goats	1128
AMPA3109 Manage, report and upload NLIS slaughter data from RFIDs	1130
Assessment Re quirements for AMPA3109 Manage, report and upload NLIS slaughter data from RFIDs.....	1133
AMPA3110 Manage, report and upload mob based NLIS data for sheep and goats.....	1135
Assessment Re quirements for AMPA3110 Manage, report and upload mob based NLIS data for sheep and goats.....	1137
AMPA3111 Conduct start up procedures and pre operational checks on slaughter floor NLIS data e quipment.....	1139
Assessment Re quirements for AMPA3111 Conduct start up procedures and pre operational checks on slaughter floor NLIS data e quipment	1142
AMPA3112 Manage NLIS data from RFIDs on the slaughter floor.....	1144
Assessment Re quirements for AMPA3112 Manage NLIS data from RFIDs on the slaughter floor	1147
AMPA3113 Prepare a kill sheet.....	1149
Assessment Re quirements for AMPA3113 Prepare a kill sheet	1152
AMPA3114 Undertake pre slaughter checks of NVDs and PICs for NLIS for sheep and goats	1154
Assessment Re quirements for AMPA3114 Undertake pre slaughter checks of NVDs and PICs for NLIS for sheep and goats.....	1156
AMPA3115 Undertake pre slaughter checks of NVDs, PICs and RFIDs	1158
Assessment Re quirements for AMPA3115 Undertake pre slaughter checks of NVDs, PICs and RFIDs	1161

AMPA3116 Supervise meat packing operation.....	1163
Assessment Requirements for AMPA3116 Supervise meat packing operation	1166
AMPA3117 Oversee product loadout	1168
Assessment Requirements for AMPA3117 Oversee product loadout.....	1171
AMPA3118 Monitor pH and temperature decline	1173
Assessment Requirements for AMPA3118 Monitor pH and temperature decline.....	1176
AMPA3119 Apply food animal anatomy and physiology to inspection processes.....	1178
Assessment Requirements for AMPA3119 Apply food animal anatomy and physiology to inspection processes	1181
AMPA3120 Perform ante and post-mortem inspection - Ovine and Caprine	1183
Assessment Requirements for AMPA3120 Perform ante and post-mortem inspection - Ovine and Caprine.....	1187
AMPA3121 Perform ante and post-mortem inspection - Bovine.....	1190
Assessment Requirements for AMPA3121 Perform ante and post-mortem inspection - Bovine.....	1194
AMPA3122 Perform ante and post-mortem inspection - Porcine	1197
Assessment Requirements for AMPA3122 Perform ante and post-mortem inspection - Porcine.....	1201
AMPA3123 Perform ante and post-mortem inspection - Poultry.....	1204
Assessment Requirements for AMPA3123 Perform ante and post-mortem inspection - Poultry.....	1208
AMPA3124 Perform ante and post-mortem inspection - Ratites	1211
Assessment Requirements for AMPA3124 Perform ante and post-mortem inspection - Ratites.....	1215
AMPA3125 Perform ante and post-mortem inspection - Camels.....	1218
Assessment Requirements for AMPA3125 Perform ante and post-mortem inspection - Camels.....	1222
AMPA3127 Perform post-mortem inspection - Wild game.....	1225
Assessment Requirements for AMPA3127 Perform post-mortem inspection - Wild game.....	1228
AMPA3128 Perform ante and post-mortem inspection - Rabbits	1230
Assessment Requirements for AMPA3128 Perform ante and post-mortem inspection - Rabbits	1234
AMPA3129 Perform ante and post-mortem inspection - Deer.....	1237
Assessment Requirements for AMPA3129 Perform ante and post-mortem inspection - Deer.....	1241
AMPA3130 Perform ante and post-mortem inspection - Horses.....	1244
Assessment Requirements for AMPA3130 Perform ante and post-mortem inspection - Horses.....	1248
AMPA3131 Identify and report emergency diseases of food animals	1251
Assessment Requirements for AMPA3131 Identify and report emergency diseases of food animals	1254
AMPA3132 Perform ante and post-mortem inspection - Alpacas or Llamas	1256
Assessment Requirements for AMPA3132 Perform ante and post-mortem inspection - Alpacas or Llamas	1261
AMPA3133 Manage NLIS data for pigs in lairage.....	1264
Assessment Requirements for AMPA3133 Manage NLIS data for pigs in lairage	1266
AMPA3134 Overview of the NLIS Pork	1268
Assessment Requirements for AMPA3134 Overview of the NLIS Pork.....	1271
AMPA3135 Perform ante and post-mortem inspection - Calves.....	1273
Assessment Requirements for AMPA3135 Perform ante and post-mortem inspection - Calves	1278
AMPA400 Utilise refrigeration index	1281
Assessment Requirements for AMPA400 Utilise refrigeration index	1284

AMPA401 Implement a Meat Hygiene Assessment program.....1286
Assessment Requirements for AMPA401 Implement a Meat Hygiene Assessment program1289
AMPA402 Oversee plant compliance with the Australian standards for meat processing1291
Assessment Requirements for AMPA402 Oversee plant compliance with the Australian standards for meat processing1294
AMPA403 Apply meat science.....1296
Assessment Requirements for AMPA403 Apply meat science1299
AMPA404 Conduct and validate pH and temperature declines to MSA standards1301
Assessment Requirements for AMPA404 Conduct and validate pH and temperature declines to MSA standards.....1304
AMPA405 Develop and implement Quality Assurance program for a rendering plant1306
Assessment Requirements for AMPA405 Develop and implement Quality Assurance program for a rendering plant.....1308
AMPA406 Inspect transportation container or vehicle1310
Assessment Requirements for AMPA406 Inspect transportation container or vehicle..1312
AMPA407 Contribute to abattoir design and construction processes1314
Assessment Requirements for AMPA407 Contribute to abattoir design and construction processes.....1316
AMPA411 Oversee humane handling of animals.....1318
Assessment Requirements for AMPA411 Oversee humane handling of animals1321
AMPA412 Conduct an animal welfare audit of a meat processing plant.....1323
Assessment Requirements for AMPA412 Conduct an animal welfare audit of a meat processing plant.....1327
AMPCOR201 Maintain personal equipment.....1329
Assessment Requirements for AMPCOR201 Maintain personal equipment.....1331
AMPCOR202 Apply hygiene and sanitation practices.....1333
Assessment Requirements for AMPCOR202 Apply hygiene and sanitation practices ..1335
AMPCOR203 Comply with Quality Assurance and HACCP requirements.....1337
Assessment Requirements for AMPCOR203 Comply with Quality Assurance and HACCP requirements.....1339
AMPCOR204 Follow safe work policies and procedures1341
Assessment Requirements for AMPCOR204 Follow safe work policies and procedures1344
AMPCOR205 Communicate in the workplace1346
Assessment Requirements for AMPCOR205 Communicate in the workplace1348
AMPCOR206 Overview the meat industry.....1350
Assessment Requirements for AMPCOR206 Overview the meat industry1353
AMPCOR401 Manage own work performance1355
Assessment Requirements for AMPCOR401 Manage own work performance.....1358
AMPCOR402 Facilitate Quality Assurance Process.....1360
Assessment Requirements for AMPCOR402 Facilitate Quality Assurance Process.....1363
AMPCOR403 Participate in workplace health and safety risk control process.....1366
Assessment Requirements for AMPCOR403 Participate in workplace health and safety risk control process.....1369
AMPCOR404 Facilitate hygiene and sanitation performance.....1371
Assessment Requirements for AMPCOR404 Facilitate hygiene and sanitation performance1373
AMPG300 Overview wild game meat industry.....1375
Assessment Requirements for AMPG300 Overview wild game meat industry.....1377
AMPG301 Operate a game harvesting vehicle.....1379
Assessment Requirements for AMPG301 Operate a game harvesting vehicle1381
AMPG302 Eviscerate, inspect and tag wild game carcass in the field.....1383
Assessment Requirements for AMPG302 Eviscerate, inspect and tag wild game carcass in the field.....1386

AMPG303 Receive and inspect wild game carcasses from the field.....	1388
Assessment Requirements for AMPG303 Receive and inspect wild game carcasses from the field.....	1390
AMPG304 Receive and inspect wild game carcasses at a processing plant.....	1392
Assessment Requirements for AMPG304 Receive and inspect wild game carcasses at a processing plant.....	1395
AMPG305 Store wild game carcasses.....	1398
Assessment Requirements for AMPG305 Store wild game carcasses.....	1400
AMPG306 Use firearms to harvest wild game.....	1402
Assessment Requirements for AMPG306 Use firearms to harvest wild game.....	1405
AMPMGT501 Design and manage the food safety system.....	1407
Assessment Requirements for AMPMGT501 Design and manage the food safety system.....	1410
AMPMGT502 Manage new product or process development.....	1413
Assessment Requirements for AMPMGT502 Manage new product or process development.....	1417
AMPMGT503 Develop and assess a meat retailing business opportunity.....	1419
Assessment Requirements for AMPMGT503 Develop and assess a meat retailing business opportunity.....	1422
AMPMGT504 Develop, manage and maintain quality systems.....	1424
Assessment Requirements for AMPMGT504 Develop, manage and maintain quality systems.....	1428
AMPMGT505 Manage maintenance systems.....	1431
Assessment Requirements for AMPMGT505 Manage maintenance systems.....	1434
AMPMGT506 Manage utilities and energy.....	1437
Assessment Requirements for AMPMGT506 Manage utilities and energy.....	1440
AMPMGT507 Manage and improve meat industry plant operations.....	1443
Assessment Requirements for AMPMGT507 Manage and improve meat industry plant operations.....	1446
AMPMGT508 Manage environmental impacts of meat processing operations.....	1449
Assessment Requirements for AMPMGT508 Manage environmental impacts of meat processing operations.....	1453
AMPMGT509 Manage, maintain and continuously improve workplace health and safety plans and systems.....	1456
Assessment Requirements for AMPMGT509 Manage, maintain and continuously improve workplace health and safety plans and systems.....	1460
AMPMGT510 Manage transportation of meat, meat products and meat by-products.....	1463
Assessment Requirements for AMPMGT510 Manage transportation of meat, meat products and meat by-products.....	1466
AMPMGT601 Benchmark to manage and improve enterprise performance.....	1468
Assessment Requirements for AMPMGT601 Benchmark to manage and improve enterprise performance.....	1471
AMPMGT602 Monitor and manage organisational legal responsibilities.....	1473
Assessment Requirements for AMPMGT602 Monitor and manage organisational legal responsibilities.....	1476
AMPMGT603 Manage meat processing systems to maintain and improve product quality.....	1478
Assessment Requirements for AMPMGT603 Manage meat processing systems to maintain and improve product quality.....	1481
AMPMGT604 Manage effective operation of meat enterprise cold chain and refrigeration systems.....	1484
Assessment Requirements for AMPMGT604 Manage effective operation of meat enterprise cold chain and refrigeration systems.....	1487
AMPMGT605 Assess and purchase livestock.....	1490
Assessment Requirements for AMPMGT605 Assess and purchase livestock.....	1493

AMPMGT606 Analyse and develop enterprise systems for new opportunities	1496
Assessment Requirements for AMPMGT606 Analyse and develop enterprise systems for new opportunities	1499
AMPMGT607 Establish new markets	1502
Assessment Requirements for AMPMGT607 Establish new markets	1505
AMPMGT801 Manage financial performance.....	1507
Assessment Requirements for AMPMGT801 Manage financial performance	1510
AMPMGT802 Provide strategic leadership.....	1512
Assessment Requirements for AMPMGT802 Provide strategic leadership.....	1515
AMPMGT803 Communicate and negotiate in a culturally diverse context	1517
Assessment Requirements for AMPMGT803 Communicate and negotiate in a culturally diverse context.....	1520
AMPMGT804 Develop and enhance collaborative partnerships and relationships.....	1522
Assessment Requirements for AMPMGT804 Develop and enhance collaborative partnerships and relationships.....	1525
AMPMGT805 Develop and manage international business operations.....	1528
Assessment Requirements for AMPMGT805 Develop and manage international business operations	1531
AMPMGT806 Commercialise research and technology product or idea	1533
Assessment Requirements for AMPMGT806 Commercialise research and technology product or idea	1536
AMPMGT807 Manage change to organisational electronic technology systems	1539
Assessment Requirements for AMPMGT807 Manage change to organisational electronic technology systems.....	1542
AMPMGT808 Undertake research project.....	1544
Assessment Requirements for AMPMGT808 Undertake research project	1546
AMPMGT809 Analyse data for business decision making.....	1548
Assessment Requirements for AMPMGT809 Analyse data for business decision making.....	1551
AMPR101 Identify species and meat cuts	1553
Assessment Requirements for AMPR101 Identify species and meat cuts.....	1555
AMPR102 Trim meat for further processing.....	1557
Assessment Requirements for AMPR102 Trim meat for further processing	1559
AMPR103 Store meat product.....	1561
Assessment Requirements for AMPR103 Store meat product	1563
AMPR104 Prepare minced meat and minced meat products.....	1565
Assessment Requirements for AMPR104 Prepare minced meat and minced meat products.....	1568
AMPR105 Provide service to customers	1570
Assessment Requirements for AMPR105 Provide service to customers	1573
AMPR106 Process sales transactions	1575
Assessment Requirements for AMPR106 Process sales transactions	1577
AMPR107 Undertake minor routine maintenance.....	1579
Assessment Requirements for AMPR107 Undertake minor routine maintenance	1582
AMPR108 Monitor meat temperature from receipt to sale	1584
Assessment Requirements for AMPR108 Monitor meat temperature from receipt to sale.....	1587
AMPR201 Break and cut product using a bandsaw.....	1589
Assessment Requirements for AMPR201 Break and cut product using a bandsaw	1591
AMPR202 Provide advice on cooking and storage of meat products	1593
Assessment Requirements for AMPR202 Provide advice on cooking and storage of meat products	1596
AMPR203 Select, weigh and package meat for sale	1598
Assessment Requirements for AMPR203 Select, weigh and package meat for sale.....	1600
AMPR204 Package products using manual packing and labelling equipment.....	1602

Assessment Requirements for AMPR204 Package products using manual packing and labelling equipment.....	1604
AMPR205 Use basic methods of meat cookery	1606
Assessment Requirements for AMPR205 Use basic methods of meat cookery.....	1608
AMPR206 Vacuum pack products in a retail operation	1610
Assessment Requirements for AMPR206 Vacuum pack products in a retail operation.....	1613
AMPR207 Undertake routine preventative maintenance.....	1615
Assessment Requirements for AMPR207 Undertake routine preventative maintenance.....	1618
AMPR208 Make and sell sausages.....	1620
Assessment Requirements for AMPR208 Make and sell sausages	1623
AMPR209 Produce and sell value-added products	1625
Assessment Requirements for AMPR209 Produce and sell value-added products.....	1628
AMPR210 Receive meat products.....	1630
Assessment Requirements for AMPR210 Receive meat products	1632
AMPR211 Provide advice on meal solutions in a meat retail outlet	1634
Assessment Requirements for AMPR211 Provide advice on meal solutions in a meat retail outlet.....	1637
AMPR212 Clean meat retail work area.....	1639
Assessment Requirements for AMPR212 Clean meat retail work area.....	1642
AMPR301 Prepare specialised cuts	1644
Assessment Requirements for AMPR301 Prepare specialised cuts	1646
AMPR302 Assess carcass or product quality	1648
Assessment Requirements for AMPR302 Assess carcass or product quality	1650
AMPR303 Calculate yield of carcass or product	1652
Assessment Requirements for AMPR303 Calculate yield of carcass or product	1654
AMPR304 Manage stock	1656
Assessment Requirements for AMPR304 Manage stock.....	1659
AMPR305 Meet customer needs.....	1661
Assessment Requirements for AMPR305 Meet customer needs.....	1663
AMPR306 Provide advice on nutritional role of meat.....	1665
Assessment Requirements for AMPR306 Provide advice on nutritional role of meat.....	1667
AMPR307 Merchandise products, services.....	1669
Assessment Requirements for AMPR307 Merchandise products, services	1672
AMPR308 Prepare, roll, sew and net meat.....	1674
Assessment Requirements for AMPR308 Prepare, roll, sew and net meat.....	1676
AMPR309 Bone and fillet poultry.....	1678
Assessment Requirements for AMPR309 Bone and fillet poultry	1680
AMPR310 Cost and price meat products.....	1682
Assessment Requirements for AMPR310 Cost and price meat products	1684
AMPR311 Prepare portion control to specifications	1686
Assessment Requirements for AMPR311 Prepare portion control to specifications	1688
AMPR312 Bone game meat.....	1690
Assessment Requirements for AMPR312 Bone game meat.....	1692
AMPR313 Order stock in a meat enterprise	1694
Assessment Requirements for AMPR313 Order stock in a meat enterprise.....	1696
AMPR314 Calculate and present statistical data in a meat enterprise	1698
Assessment Requirements for AMPR314 Calculate and present statistical data in a meat enterprise.....	1700
AMPR315 Utilise the Meat Standards Australia system to meet customer requirements.....	1702
Assessment Requirements for AMPR315 Utilise the Meat Standards Australia system to meet customer requirements.....	1705
AMPR316 Cure, corn and sell product.....	1707
Assessment Requirements for AMPR316 Cure, corn and sell product	1710

AMPR317 Assess and sell poultry products.....	1713
Assessment Requirements for AMPR317 Assess and sell poultry products	1716
AMPR318 Break carcase for retail sale	1718
Assessment Requirements for AMPR318 Break carcase for retail sale.....	1720
AMPR319 Locate, identify and assess meat cuts.....	1722
Assessment Requirements for AMPR319 Locate, identify and assess meat cuts	1725
AMPR320 Assess and address customer preferences.....	1727
Assessment Requirements for AMPR320 Assess and address customer preferences	1729
AMPR321 Collect and prepare standard samples	1731
Assessment Requirements for AMPR321 Collect and prepare standard samples	1734
AMPR322 Prepare and produce value added products	1736
Assessment Requirements for AMPR322 Prepare and produce value added products.	1739
AMPR323 Break small stock carcasses for retail sale	1741
Assessment Requirements for AMPR323 Break small stock carcasses for retail sale	1743
AMPR324 Break large stock carcasses for retail sale.....	1745
Assessment Requirements for AMPR324 Break large stock carcasses for retail sale	1747
AMPR325 Prepare cooked meat product for retail sale.....	1749
Assessment Requirements for AMPR325 Prepare cooked meat product for retail sale	1752
AMPS101 Handle materials and products.....	1754
Assessment Requirements for AMPS101 Handle materials and products.....	1756
AMPS102 Pack smallgoods product.....	1758
Assessment Requirements for AMPS102 Pack smallgoods product.....	1761
AMPS201 Package product using thermoform process	1763
Assessment Requirements for AMPS201 Package product using thermoform process.	1766
AMPS203 Operate bar and coder systems.....	1768
Assessment Requirements for AMPS203 Operate bar and coder systems	1770
AMPS205 Select, identify and prepare casings	1772
Assessment Requirements for AMPS205 Select, identify and prepare casings	1774
AMPS206 Manually shape and form product.....	1776
Assessment Requirements for AMPS206 Manually shape and form product	1779
AMPS207 Slice product using simple machinery.....	1781
Assessment Requirements for AMPS207 Slice product using simple machinery	1784
AMPS208 Rotate stored meat.....	1786
Assessment Requirements for AMPS208 Rotate stored meat	1788
AMPS209 Rotate meat product.....	1790
Assessment Requirements for AMPS209 Rotate meat product.....	1792
AMPS210 Inspect carton meat	1794
Assessment Requirements for AMPS210 Inspect carton meat.....	1796
AMPS211 Prepare dry ingredients.....	1798
Assessment Requirements for AMPS211 Prepare dry ingredients.....	1800
AMPS212 Measure and calculate routine workplace data.....	1802
Assessment Requirements for AMPS212 Measure and calculate routine workplace data	1804
AMPS213 Manually link and tie product	1806
Assessment Requirements for AMPS213 Manually link and tie product.....	1808
AMPS300 Operate mixer or blender unit.....	1810
Assessment Requirements for AMPS300 Operate mixer or blender unit.....	1813
AMPS301 Cook, steam and cool product.....	1816
Assessment Requirements for AMPS301 Cook, steam and cool product	1819
AMPS302 Prepare dried meat.....	1821
Assessment Requirements for AMPS302 Prepare dried meat.....	1824
AMPS303 Fill casings	1826
Assessment Requirements for AMPS303 Fill casings.....	1829
AMPS304 Thaw product - water	1831

Assessment Requirements for AMPS304 Thaw product - water.....	1833
AMPS305 Thaw product - air.....	1835
Assessment Requirements for AMPS305 Thaw product - air	1837
AMPS307 Sort meat.....	1839
Assessment Requirements for AMPS307 Sort meat.....	1841
AMPS308 Batch meat.....	1843
Assessment Requirements for AMPS308 Batch meat	1845
AMPS309 Operate product forming machinery	1847
Assessment Requirements for AMPS309 Operate product forming machinery	1850
AMPS310 Operate link and tie machinery	1852
Assessment Requirements for AMPS310 Operate link and tie machinery	1855
AMPS311 Operate complex slicing and packaging machinery	1857
Assessment Requirements for AMPS311 Operate complex slicing and packaging machinery.....	1860
AMPS312 Prepare meat-based pates and terrines for commercial sale	1862
Assessment Requirements for AMPS312 Prepare meat-based pates and terrines for commercial sale	1865
AMPS313 Prepare product formulations	1867
Assessment Requirements for AMPS313 Prepare product formulations	1869
AMPS314 Ferment and mature product.....	1871
Assessment Requirements for AMPS314 Ferment and mature product.....	1873
AMPS315 Blend meat product	1875
Assessment Requirements for AMPS315 Blend meat product	1878
AMPX201 Prepare and operate bandsaw.....	1880
Assessment Requirements for AMPX201 Prepare and operate bandsaw.....	1882
AMPX202 Clean work area during operations.....	1884
Assessment Requirements for AMPX202 Clean work area during operations.....	1886
AMPX203 Operate scales and semi-automatic labelling machinery	1888
Assessment Requirements for AMPX203 Operate scales and semi-automatic labelling machinery.....	1890
AMPX204 Maintain production records.....	1892
Assessment Requirements for AMPX204 Maintain production records	1894
AMPX205 Clean chillers	1896
Assessment Requirements for AMPX205 Clean chillers	1898
AMPX206 Operate forklift in a specific workplace.....	1900
Assessment Requirements for AMPX206 Operate forklift in a specific workplace	1903
AMPX207 Vacuum pack product.....	1905
Assessment Requirements for AMPX207 Vacuum pack product.....	1908
AMPX208 Apply environmentally sustainable work practices	1910
Assessment Requirements for AMPX208 Apply environmentally sustainable work practices.....	1912
AMPX209 Sharpen knives.....	1914
Assessment Requirements for AMPX209 Sharpen knives	1916
AMPX210 Prepare and slice meat cuts.....	1918
Assessment Requirements for AMPX210 Prepare and slice meat cuts.....	1920
AMPX211 Trim meat to specifications	1922
Assessment Requirements for AMPX211 Trim meat to specifications.....	1924
AMPX212 Package product using automatic packing and labelling equipment	1926
Assessment Requirements for AMPX212 Package product using automatic packing and labelling equipment.....	1929
AMPX213 Despatch meat product	1931
Assessment Requirements for AMPX213 Despatch meat product.....	1933
AMPX214 Package meat and smallgoods product for retail sale	1935

Assessment Requirements for AMPX214 Package meat and smallgoods product for retail sale.....	1938
AMPX215 Operate tenderiser	1940
Assessment Requirements for AMPX215 Operate tenderiser.....	1942
AMPX216 Operate mincer.....	1944
Assessment Requirements for AMPX216 Operate mincer.....	1946
AMPX217 Package product using gas flushing process	1948
Assessment Requirements for AMPX217 Package product using gas flushing process.....	1951
AMPX218 Operate metal detection unit.....	1953
Assessment Requirements for AMPX218 Operate metal detection unit.....	1955
AMPX301 Assess product in chillers	1957
Assessment Requirements for AMPX301 Assess product in chillers	1959
AMPX302 Cure and corn product.....	1961
Assessment Requirements for AMPX302 Cure and corn product	1964
AMPX303 Break carcase into primal cuts	1966
Assessment Requirements for AMPX303 Break carcase into primal cuts.....	1968
AMPX304 Prepare primal cuts.....	1970
Assessment Requirements for AMPX304 Prepare primal cuts	1972
AMPX305 Smoke product.....	1974
Assessment Requirements for AMPX305 Smoke product.....	1977
AMPX306 Provide coaching.....	1980
Assessment Requirements for AMPX306 Provide coaching.....	1983
AMPX307 Provide mentoring.....	1985
Assessment Requirements for AMPX307 Provide mentoring	1988
AMPX308 Follow and implement an established work plan.....	1990
Assessment Requirements for AMPX308 Follow and implement an established work plan.....	1993
AMPX309 Identify and repair equipment faults.....	1995
Assessment Requirements for AMPX309 Identify and repair equipment faults	1998
AMPX310 Perform pre-operations hygiene assessment.....	2000
Assessment Requirements for AMPX310 Perform pre-operations hygiene assessment	2003
AMPX311 Monitor production of packaged product to customer specifications	2005
Assessment Requirements for AMPX311 Monitor production of packaged product to customer specifications	2008
AMPX313 Contribute to energy efficiency	2010
Assessment Requirements for AMPX313 Contribute to energy efficiency	2013
AMPX401 Monitor meat preservation process	2015
Assessment Requirements for AMPX401 Monitor meat preservation process.....	2018
AMPX402 Monitor and overview the production of processed meats and smallgoods..	2020
Assessment Requirements for AMPX402 Monitor and overview the production of processed meats and smallgoods	2023
AMPX403 Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM).....	2025
Assessment Requirements for AMPX403 Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM).....	2030
AMPX404 Conduct an internal audit of a documented program.....	2032
Assessment Requirements for AMPX404 Conduct an internal audit of a documented program.....	2035
AMPX405 Conduct statistical analysis of process.....	2037
Assessment Requirements for AMPX405 Conduct statistical analysis of process	2039
AMPX406 Manage or oversee an external audit of the establishment's quality system.....	2041
Assessment Requirements for AMPX406 Manage or oversee an external audit of the establishment's quality system.....	2044
AMPX407 Oversee export requirements	2046

Assessment Requirements for AMPX407 Oversee export requirements	2049
AMPX408 Coordinate contracts	2051
Assessment Requirements for AMPX408 Coordinate contracts	2054
AMPX409 Prepare and evaluate resource proposals	2056
Assessment Requirements for AMPX409 Prepare and evaluate resource proposals	2059
AMPX410 Facilitate achievement of enterprise environmental policies and goals	2061
Assessment Requirements for AMPX410 Facilitate achievement of enterprise environmental policies and goals.....	2064
AMPX411 Foster a learning culture in a meat enterprise	2066
Assessment Requirements for AMPX411 Foster a learning culture in a meat enterprise.....	2069
AMPX412 Build productive and effective workplace relationships	2071
Assessment Requirements for AMPX412 Build productive and effective workplace relationships	2074
AMPX413 Manage and maintain a food safety plan.....	2076
Assessment Requirements for AMPX413 Manage and maintain a food safety plan.....	2079
AMPX414 Assess and evaluate meat industry requirements and processes	2081
Assessment Requirements for AMPX414 Assess and evaluate meat industry requirements and processes.....	2084
AMPX415 Specify beef product using AUS-MEAT language	2086
Assessment Requirements for AMPX415 Specify beef product using AUS-MEAT language.....	2089
AMPX416 Specify sheep product using AUS-MEAT language.....	2091
Assessment Requirements for AMPX416 Specify sheep product using AUS-MEAT language.....	2094
AMPX417 Specify pork product using AUS-MEAT language	2096
Assessment Requirements for AMPX417 Specify pork product using AUS-MEAT language.....	2099
AMPX418 Lead communication in the workplace.....	2101
Assessment Requirements for AMPX418 Lead communication in the workplace	2104
AMPX419 Participate in product recall.....	2106
Assessment Requirements for AMPX419 Participate in product recall	2108
AMPX420 Participate in the ongoing development and implementation of a HACCP and Quality Assurance system.....	2110
Assessment Requirements for AMPX420 Participate in the ongoing development and implementation of a HACCP and Quality Assurance system.....	2113
AMPX421 Establish sampling program.....	2115
Assessment Requirements for AMPX421 Establish sampling program	2117
AMPX422 Develop and implement work instructions and SOPs.....	2119
Assessment Requirements for AMPX422 Develop and implement work instructions and SOPs	2122
AMPX423 Supervise new recruits	2125
Assessment Requirements for AMPX423 Supervise new recruits	2128
AMPX424 Raise and validate requests for export permits and Meat Transfer Certificates.....	2130
Assessment Requirements for AMPX424 Raise and validate requests for export permits and Meat Transfer Certificates.....	2133
AMPX425 Conduct a document review.....	2135
Assessment Requirements for AMPX425 Conduct a document review.....	2138
AMPX426 Undertake chiller assessment to AUS-MEAT requirements.....	2140
Assessment Requirements for AMPX426 Undertake chiller assessment to AUS-MEAT requirements.....	2143
AMPX427 Dry age meat.....	2145
Assessment Requirements for AMPX427 Dry age meat.....	2148
BSBCOM501 Identify and interpret compliance requirements	2150

Assessment Requirements for BSB COM501 Identify and interpret compliance requirements.....	2154
BSB COM601 Research compliance requirements and issues	2156
Assessment Requirements for BSB COM601 Research compliance requirements and issues	2160
BSB CUS402 Address customer needs.....	2162
Assessment Requirements for BSB CUS402 Address customer needs	2165
BSB DES801 Research and apply design theory.....	2167
Assessment Requirements for BSB DES801 Research and apply design theory.....	2170
BSB DIV601 Develop and implement diversity policy	2172
Assessment Requirements for BSB DIV601 Develop and implement diversity policy	2176
BSB FIM501 Manage budgets and financial plans	2178
Assessment Requirements for BSB FIM501 Manage budgets and financial plans	2181
BSB FIM601 Manage finances.....	2183
Assessment Requirements for BSB FIM601 Manage finances	2187
BSB FLM312 Contribute to team effectiveness	2189
Assessment Requirements for BSB FLM312 Contribute to team effectiveness	2192
BSB HRM405 Support the recruitment, selection and induction of staff	2194
Assessment Requirements for BSB HRM405 Support the recruitment, selection and induction of staff.....	2198
BSB INM302 Utilise a knowledge management system.....	2200
Assessment Requirements for BSB INM302 Utilise a knowledge management system.....	2203
BSB INM401 Implement workplace information system.....	2205
Assessment Requirements for BSB INM401 Implement workplace information system.....	2208
BSB INN301 Promote innovation in a team environment.....	2210
Assessment Requirements for BSB INN301 Promote innovation in a team environment.....	2214
BSB INN801 Lead innovative thinking and practice.....	2216
Assessment Requirements for BSB INN801 Lead innovative thinking and practice	2220
BSB ITU101 Operate a personal computer.....	2222
Assessment Requirements for BSB ITU101 Operate a personal computer	2225
BSB LDR403 Lead team effectiveness	2227
Assessment Requirements for BSB LDR403 Lead team effectiveness.....	2230
BSB LED401 Develop teams and individuals.....	2232
Assessment Requirements for BSB LED401 Develop teams and individuals	2236
BSB MGT402 Implement operational plan	2238
Assessment Requirements for BSB MGT402 Implement operational plan	2242
BSB MGT403 Implement continuous improvement	2244
Assessment Requirements for BSB MGT403 Implement continuous improvement.....	2247
BSB MGT605 Provide leadership across the organisation.....	2249
Assessment Requirements for BSB MGT605 Provide leadership across the organisation.....	2253
BSB MGT617 Develop and implement a business plan.....	2255
Assessment Requirements for BSB MGT617 Develop and implement a business plan.....	2259
BSB MKG414 Undertake marketing activities.....	2261
Assessment Requirements for BSB MKG414 Undertake marketing activities.....	2264
BSB MKG502 Establish and adjust the marketing mix.....	2266
Assessment Requirements for BSB MKG502 Establish and adjust the marketing mix.....	2269
BSB RES801 Initiate and lead applied research	2271
Assessment Requirements for BSB RES801 Initiate and lead applied research.....	2275
BSB RKG404 Monitor and maintain records in an online environment.....	2277
Assessment Requirements for BSB RKG404 Monitor and maintain records in an online environment.....	2280
BSB SMB405 Monitor and manage small business operations	2282
Assessment Requirements for BSB SMB405 Monitor and manage small business operations	2286

BSBSMB407 Manage a small team.....	2288
Assessment Requirements for BSBSMB407 Manage a small team	2293
CPPCLO3020 Pressure wash and clean surfaces	2295
Assessment Requirements for CPPCLO3020 Pressure wash and clean surfaces	2300
CPPCLO3035 Maintain cleaning storage areas	2303
Assessment Requirements for CPPCLO3035 Maintain cleaning storage areas.....	2309
CPPCLO3036 Clean at heights.....	2312
Assessment Requirements for CPPCLO3036 Clean at heights	2317
CPPCLO3038 Clean food-handling areas.....	2320
Assessment Requirements for CPPCLO3038 Clean food-handling areas	2326
FDFAU4001A Assess compliance with food safety programs	2329
FDFAU4002A Communicate and negotiate to conduct food safety audits	2340
FDFAU4003A Conduct food safety audits	2348
FDFAU4004A Identify, evaluate and control food safety hazards	2363
FDFV3001A Conduct chemical wash for fresh produce	2373
FDFV3002A Program fresh produce grading equipment	2381
FDFOP1003A Carry out manual handling tasks	2387
FDFOP2001A Work effectively in the food processing industry	2394
FDFOP2002A Inspect and sort materials and product.....	2402
FDFOP2003A Clean equipment in place	2409
FDFOP2004A Clean and sanitise equipment.....	2417
FDFOP2005A Work in a socially diverse environment.....	2424
FDFOP2007A Work in a freezer storage area	2430
FDFOP2010A Work with temperature controlled stock.....	2436
FDFOP2011A Conduct routine maintenance.....	2443
FDFOP2012A Maintain food safety when loading, unloading and transporting food...2450	
FDFOP2013A Apply sampling procedures.....	2457
FDFOP2014A Participate in sensory analyses	2463
FDFOP2015A Apply principles of statistical process control.....	2469
FDFOP2016A Work in a food handling area for non-food handlers.....	2474
FDFOP2018A Operate a case packing process	2480
FDFOP2019A Fill and close product in cans	2488
FDFOP2020A Operate a form, fill and seal process.....	2497
FDFOP2021A Operate a fill and seal process	2507
FDFOP2022A Operate a high speed wrapping process.....	2516
FDFOP2023A Operate a packaging process	2524
FDFOP2026A Operate a forming or shaping process	2533
FDFOP2027A Dispense non-bulk ingredients.....	2542
FDFOP2028A Operate a mixing or blending process	2550
FDFOP2029A Operate a baking process	2560
FDFOP2030A Operate a process control interface	2569
FDFOP2031A Operate a coating application process	2575
FDFOP2032A Work in a clean room environment.....	2584
FDFOP2033A Operate a depositing process	2590
FDFOP2034A Operate an evaporation process	2599
FDFOP2035A Operate an enrobing process	2607
FDFOP2036A Operate an extrusion process	2616
FDFOP2037A Operate a filtration process	2625
FDFOP2038A Operate a grinding process.....	2633
FDFOP2039A Operate a frying process.....	2642
FDFOP2040A Operate a heat treatment process	2650
FDFOP2041A Operate a mixing or blending and cooking process	2659
FDFOP2042A Operate a drying process.....	2668

FDFOP2043A Operate an homogenising process.....	2677
FDFOP2044A Operate a retort process.....	2685
FDFOP2045A Operate pumping equipment.....	2694
FDFOP2046A Operate a production process.....	2701
FDFOP2047A Operate a portion saw.....	2709
FDFOP2048A Pre-process raw materials.....	2716
FDFOP2049A Operate a reduction process.....	2724
FDFOP2050A Operate a separation process.....	2733
FDFOP2051A Operate a spreads production process.....	2742
FDFOP2052A Operate a chocolate tempering process.....	2751
FDFOP2053A Operate a washing and drying process.....	2759
FDFOP2054A Operate a water purification process.....	2768
FDFOP2056A Operate a freezing process.....	2777
FDFOP2057A Operate a membrane process.....	2785
FDFOP2058A Operate a holding and storage process.....	2793
FDFOP2059A Operate a continuous freezing process.....	2802
FDFOP2060A Operate an automated cutting process.....	2811
FDFOP2061A Use numerical applications in the workplace.....	2819
FDFOP3001A Control contaminants and allergens in the workplace.....	2825
FDFOP3002A Set up a production or packaging line for operation.....	2833
FDFOP3003A Operate interrelated processes in a production system.....	2840
FDFOP3004A Operate interrelated processes in a packaging system.....	2849
FDFOP3005A Prepare food products using basic cooking methods.....	2858
FDFOP3006A Identify cultural, religious and dietary considerations for food production.....	2865
FDFPO3001A Operate a chickway system.....	2872
FDFPO3002A Debone and fillet product (manually).....	2880
FDFPPL2001A Participate in work teams and groups.....	2887
FDFPPL3001A Participate in improvement processes.....	2893
FDFPPL3002A Report on workplace performance.....	2899
FDFPPL3003A Support and mentor individuals and groups.....	2904
FDFPPL3004A Lead work teams and groups.....	2910
FDFPPL3005A Participate in an audit process.....	2917
FDFPPL3006A Establish compliance requirements for work area.....	2924
FDFSUG222A Operate a waste water treatment system.....	2929
FDFTEC3001A Participate in a HACCP team.....	2935
FDFTEC3002A Implement the pest prevention program.....	2943
FDFTEC3003A Apply raw materials, ingredient and process knowledge to production problems.....	2950
HLTAID003 Provide first aid.....	2958
Assessment Requirements for HLTAID003 Provide first aid.....	2961
MEM13003B Work safely with industrial chemicals and materials.....	2965
MSL904001 Perform standard calibrations.....	2971
Assessment Requirements for MSL904001 Perform standard calibrations.....	2977
MSL916005 Manage complex projects.....	2980
Assessment Requirements for MSL916005 Manage complex projects.....	2985
MSL922001 Record and present data.....	2988

MSL924001 Process and interpret data.....	2994
Assessment Requirements for MSL924001 Process and interpret data.....	2998
MSL925001 Analyse data and report results.....	3001
Assessment Requirements for MSL925001 Analyse data and report results.....	3005
MSL933001 Maintain the laboratory/field workplace fit for purpose.....	3008

Assessment Requirements for MSL933001 Maintain the laboratory/field workplace fit for purpose3015

MSL933004 Perform calibration checks on equipment and assist with its maintenance3018

Assessment Requirements for MSL933004 Perform calibration checks on equipment and assist with its maintenance3022

MSL934003 Maintain and control stocks.....3025

Assessment Requirements for MSL934003 Maintain and control stocks3030

MSL935002 Assist in the maintenance of reference materials.....3033

Assessment Requirements for MSL935002 Assist in the maintenance of reference materials3038

MSL935003 Authorise the issue of test results3040

Assessment Requirements for MSL935003 Authorise the issue of test results.....3047

MSL952002 Handle and transport samples or equipment.....3050

Assessment Requirements for MSL952002 Handle and transport samples or equipment3055

MSL953001 Receive and prepare samples for testing3058

Assessment Requirements for MSL953001 Receive and prepare samples for testing....3063

MSL954001 Obtain representative samples in accordance with sampling plan3066

Assessment Requirements for MSL954001 Obtain representative samples in accordance with sampling plan.....3072

MSL973001 Perform basic tests.....3075

Assessment Requirements for MSL973001 Perform basic tests3080

MSL973002 Prepare working solutions3083

Assessment Requirements for MSL973002 Prepare working solutions.....3087

MSL973003 Prepare culture media3090

Assessment Requirements for MSL973003 Prepare culture media.....3095

MSL973004 Perform aseptic techniques3098

Assessment Requirements for MSL973004 Perform aseptic techniques.....3103

MSL973007 Perform microscopic examination3106

Assessment Requirements for MSL973007 Perform microscopic examination.....3112

MSL974004 Perform food tests.....3115

Assessment Requirements for MSL974004 Perform food tests3122

MSL974006 Perform biological procedures3125

Assessment Requirements for MSL974006 Perform biological procedures3132

MSL975001 Perform microbiological tests3136

Assessment Requirements for MSL975001 Perform microbiological tests3142

MSMENV172 Identify and minimise environmental hazards3145

Assessment Requirements for MSMENV172 Identify and minimise environmental hazards3149

MSMENV472 Implement and monitor environmentally sustainable work practices....3151

Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices.....3155

MSMSUP300 Identify and apply process improvements3157

Assessment Requirements for MSMSUP300 Identify and apply process improvements3162

MSMSUP303 Identify equipment faults3164

Assessment Requirements for MSMSUP303 Identify equipment faults.....3170

MSMSUP330 Develop and adjust a production schedule.....3173

Assessment Requirements for MSMSUP330 Develop and adjust a production schedule3178

MSS024006 Perform sampling and testing of water3180

Assessment Requirements for MSS024006 Perform sampling and testing of water3186

MSS403011 Facilitate implementation of competitive systems and practices3189

Assessment Requirements for MSS403011 Facilitate implementation of competitive systems and practices.....3194

MSS403013 Lead team culture improvement3196

Assessment Requirements for MSS403013 Lead team culture improvement.....	3200
MSS40302 Analyse manual handling processes	3202
Assessment Requirements for MSS40302 Analyse manual handling processes.....	3206
MSS407001 Prepare for and implement change	3208

AMP20116 Certificate II in Meat Processing (Food Services)

Modification History

Release Number	TP Version	Comments
1	AMP v2	Initial release

Qualification Description

This qualification covers work activities undertaken by workers commencing work in meat enterprises which undertake specialised services, such as preparing shelf ready retail products, meat wholesalers, specialty meat cuts, gourmet meat, bulk value-added products, and providing meat preparation customer service.

The AMP20116 Certificate II in Meat Processing (Food Services) is a highly flexible qualification enabling selections to be made from a wide range of units.

Graduates from this qualification will be able to:

- access, record and act on a defined range of information from a range of sources
- apply and communicate known solutions to a limited range of predictable problems
- use a limited range of equipment to complete tasks involving known routines and procedures with a limited range of options

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification

Packaging Rules

Total number of units = 14*

- Core Units = 6

- Elective Units = 8

Core Units

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry

Elective Units

- Select 6 units from Group A, B, C, D, or E.

* **Important note:** Units selected from Group A must be worth 2 or more points (if a 1-point unit is selected, then an additional unit must be selected to make up the 2 points).

The remaining 2 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course. Selected units must be relevant to job outcomes in Food Services and must be chosen to ensure the integrity of the qualification outcome at AQF level 2.

Group A (Units from the abattoirs sector)

Unit Code	Unit Title	Points
Operate mechanical aids		
AMPA2026	Operate whizzard knife	2
AMPA2031	Operate circular saw	1
AMPA2035	Operate new technology or process	2

AMPA2037	De-rind meat cuts	2
AMPA2038	De-nude meat cuts	2
AMPA2039	Operate rib puller	1
AMPA2040	Operate frenching machine	1
AMPA2041	Operate cubing machine	1
AMPA2042	Cure and corn product in a meat processing plant	2
Trim carcase		
AMPA2044	Trim neck* <i>AMPX209 Sharpen knives</i>	2
AMPA2045	Trim forequarter to specification* <i>AMPX209 Sharpen knives</i>	2
AMPA2046	Trim hindquarter to specification* <i>AMPX209 Sharpen knives</i>	2
AMPA2047	Inspect hindquarter and remove contamination* <i>AMPX209 Sharpen knives</i>	2
AMPA2048	Inspect forequarter and remove contamination* <i>AMPX209 Sharpen knives</i>	2
AMPA2049	Remove spinal cord* <i>AMPX209 Sharpen knives</i>	2
Despatch carcase from the slaughter floor		
AMPA2060	Grade carcase	8
AMPA2061	Weigh carcase	2
AMPA2062	Operate semi-automatic tagging machine	4
AMPA2063	Measure fat* <i>AMPX209 Sharpen knives</i>	2
AMPA2064	Label and stamp carcase	2
AMPA2065	Wash carcase	1

AMPA2066	Operate a decontamination unit	1
AMPA2067	Remove tenderloin* <i>AMPX209 Sharpen knives</i>	2
Pack meat products		
AMPA2068	Inspect meat for defects* <i>AMPX209 Sharpen knives</i>	4
AMPA2069	Assemble and prepare cartons	2
AMPA2070	Identify cuts and specifications	6
AMPA2071	Pack meat products	6
AMPA2073	Operate carton scales	2
Operate packaging machinery		
AMPA2072	Operate carton sealing machine	2
AMPA2074	Operate strapping machine	2
AMPA2075	Operate carton forming machine	2
AMPA2076	Operate automatic CL determination machine	2
AMPA2077	Operate bag forming equipment	1
Loadout product		
AMPA2108	Loadout meat product	4
AMPA2109	Store carcass product	2
AMPA2110	Store carton product	2
AMPA2111	Locate storage areas and product	2
AMPA2112	Complete re-pack operation	4
AMPA2113	Bag carcass	1
Clean work area		
AMPA2171	Clean carcass hanging equipment	4
Clean after operations		

AMPA2172	Clean amenities and grounds	2
AMPA2173	Overview cleaning program	2
AMPA2174	Clean after operations – boning room	4
Operate vehicle		
AMPA2176	Transport meat and meat products	4

Group B (Units from the meat retailing sector)

Unit Code	Unit Title
AMPR101	Identify species and meat cuts
AMPR102	Trim meat for further processing* <i>AMPX209 Sharpen knives</i>
AMPR103	Store meat product
AMPR104	Prepare minced meat and minced meat products* <i>AMPX209 Sharpen knives</i>
AMPR105	Provide service to customers
AMPR106	Process sales transactions
AMPR107	Undertake minor routine maintenance
AMPR108	Monitor meat temperature from receipt to sale
AMPR203	Select, weigh and package meat for sale
AMPR212	Clean a meat retail work area
AMPR201	Break and cut product using a bandsaw
AMPR202	Provide advice on cooking and storage of meat products
AMPR204	Package product using manual packing and labelling equipment
AMPR205	Use basic methods of meat cookery* <i>AMPX209 Sharpen knives</i>
AMPR206	Vacuum pack product in a retail operation

AMPR207	Undertake routine preventative maintenance
AMPR208	Make and sell sausages
AMPR209	Produce and sell value-added products* <i>AMPX209 Sharpen knives</i>
AMPR210	Receive meat product

Group C (Units from the Smallgoods sector)

Unit Code	Unit Title
AMPS201	Package product using thermoform process
AMPS203	Operate bar and coder systems
AMPS205	Select, identify and prepare casings
AMPS206	Manually shape and form product
AMPS207	Slice product using simple machinery
AMPS208	Rotate stored meat
AMPS209	Rotate meat product
AMPS210	Inspect carton meat
AMPS211	Prepare dry ingredients
AMPS212	Measure and calculate routine workplace data
AMPS213	Manually link and tie product

Group D (Meat Processing cross-sectoral units)

AMPX201	Prepare and operate bandsaw
AMPX202	Clean work area during operations
AMPX203	Operate scales and semi-automatic labelling machinery
AMPX204	Maintain production records
AMPX205	Clean chillers

AMPX206	Operate forklift in a specific workplace
AMPX207	Vacuum pack product
AMPX208	Apply environmentally sustainable work practices
AMPX209	Sharpen knives
AMPX210	Prepare and slice meat cuts* <i>AMPX209 Sharpen knives</i>
AMPX211	Trim meat to specifications* <i>AMPX209 Sharpen knives</i>
AMPX212	Package product using automatic packing and labelling equipment
AMPX213	Despatch meat product
AMPX214	Package meat and smallgoods product for retail sale
AMPX215	Operate tenderiser
AMPX216	Operate mincer
AMPX217	Package product using gas flushing process
AMPX218	Operate metal detection unit

Group E (Units from the food processing sector)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

FDFOP1003A	Carry out manual handling tasks
FDFOP2001A	Work effectively in the food processing industry
FDFOP2002A	Inspect and sort materials and product
FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2005A	Work in a socially diverse environment
FDFOP2007A	Work in a freezer storage area

FDFOP2010A	Work with temperature controlled stock
FDFOP2011A	Conduct routine maintenance
FDFOP2012A	Maintain food safety when loading, unloading and transporting food
FDFOP2013A	Apply sampling procedures
FDFOP2014A	Participate in sensory analyses
FDFOP2015A	Apply principles of statistical process control* <i>FDFOP2061A Use numerical applications in the workplace</i>
FDFOP2016A	Work in a food handling area for non-food handlers
FDFOP2018A	Operate a case packing process
FDFOP2019A	Fill and close product in cans
FDFOP2020A	Operate a form, fill and seal process
FDFOP2021A	Operate a fill and seal process
FDFOP2022A	Operate a high speed wrapping process
FDFOP2023A	Operate a packaging process
FDFOP2026A	Operate a forming or shaping process
FDFOP2027A	Dispense non-bulk ingredients
FDFOP2028A	Operate a mixing or blending process
FDFOP2029A	Operate a baking process
FDFOP2030A	Operate a process control interface
FDFOP2031A	Operate a coating application process
FDFOP2032A	Work in a clean room environment* <i>FDFFS2001A Implement the food safety program and procedures OR FDFPH2001A Apply Good Manufacturing Practice procedures</i>
FDFOP2033A	Operate a depositing process
FDFOP2034A	Operate an evaporation process
FDFOP2035A	Operate an enrobing process

FDFOP2036A	Operate an extrusion process
FDFOP2037A	Operate a filtration process
FDFOP2038A	Operate a grinding process
FDFOP2039A	Operate a frying process
FDFOP2040A	Operate a heat treatment process
FDFOP2041A	Operate a mixing or blending and cooking process
FDFOP2042A	Operate a drying process
FDFOP2043A	Operate an homogenising process
FDFOP2044A	Operate a retort process
FDFOP2045A	Operate pumping equipment
FDFOP2046A	Operate a production process
FDFOP2047A	Operate a portion saw
FDFOP2048A	Pre-process raw materials
FDFOP2049A	Operate a reduction process
FDFOP2050A	Operate a separation process
FDFOP2051A	Operate a spreads production process
FDFOP2052A	Operate a chocolate tempering process
FDFOP2053A	Operate a washing and drying process
FDFOP2054A	Operate a water purification process
FDFOP2056A	Operate a freezing process
FDFOP2057A	Operate a membrane process
FDFOP2058A	Operate a holding and storage process
FDFOP2059A	Operate a continuous freezing process
FDFOP2060A	Operate an automated cutting process
FDFOP2061A	Use numerical applications in the workplace

FDFPPL2001A	Participate in work teams and groups
FDFSUG222A	Operate a waste water treatment system

Group F (Imported Units from Other Training Packages)

CPPCLO3020	Pressure wash and clean surfaces
CPPCLO3036	Clean at heights
CPPCLO3035	Maintain cleaning storage areas
CPPCLO3038	Clean food-handling areas
BSBITU101	Operate a personal computer
HLTAID003	Provide first aid
MSL922001	Record and present data
SIRRRTF001	Balance and secure point-of-sale terminal
TLIA2009	Complete and check import/export documentation
TLIA2014	Use product knowledge to complete work operations
TLIA2021	Despatch stock
TLIA4025	Regulate temperature controlled stock
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID2013	Move materials mechanically using automated equipment
TLIK2010	Use infotechnology devices in the workplace

Qualification Mapping Information

Equivalent to MTM20411 Certificate II in Meat Processing (Food Services).

AMP20216 Certificate II in Meat Processing (Smallgoods)

Modification History

Release Number	TP Version	Comments
1	AMP v2	Initial release

Qualification Description

This qualification covers work activities undertaken by workers in smallgoods establishments.

A substantial component of this qualification must be assessed on the job.

Graduates from this qualification will be able to:

- access, record and act on a defined range of information from a range of sources
- apply and communicate known solutions to a limited range of predictable problems
- use a limited range of equipment to complete tasks involving known routines and procedures with a limited range of options

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 5
- Elective Units = 11

Core Units

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices

AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry

Elective Units

- Select 3 units from Group A
- Select 6 units from Group B
- The remaining 2 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course. Selected units must be relevant to job outcomes in Smallgoods processing and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Group A

Unit Code	Unit Title
AMPS101	Handle materials and products
AMPS102	Pack smallgoods product
AMPX202	Clean work area during operations
FDFOP2061A	Use numerical applications in the workplace
HLTAID003	Provide first aid

Group B

Unit Code	Unit Title
AMPA2047	Inspect hindquarter and remove contamination* <i>AMPX209 Sharpen knives</i>
AMPA2048	Inspect forequarter and remove contamination* <i>AMPX209 Sharpen knives</i>
AMPA2109	Store carcass product

AMPA2110	Store carton product
AMPA2174	Clean after operations – boning room
AMPS201	Package product using thermoform process
AMPS203	Operate bar and coder systems
AMPS205	Select, identify and prepare casings
AMPS206	Manually shape and form product
AMPS207	Slice product using simple machinery
AMPS208	Rotate stored meat
AMPS209	Rotate meat product
AMPS210	Inspect carton meat
AMPS211	Prepare dry ingredients
AMPS212	Measure and calculate routine workplace data
AMPS213	Manually link and tie product
AMPX203	Operate scales and semi-automatic labelling machinery
AMPX205	Clean chillers
AMPX206	Operate forklift in a specific workplace
AMPX207	Vacuum pack product
AMPX209	Sharpen knives
AMPX210	Prepare and slice meat cuts* <i>AMPX209 Sharpen knives</i>
AMPX211	Trim meat to specifications* <i>AMPX209 Sharpen knives</i>
AMPX212	Package product using automatic packing and labelling equipment
AMPX213	Despatch meat product
AMPX214	Package meat and smallgoods product for retail sale
AMPX217	Package product using gas flushing process

AMPX218	Operate metal detection unit
AMPX301	Assess product in chillers
CPPCLO3038	Clean food-handling areas
FDFOP2007A	Work in a freezer storage area
FDFOP2010A	Work with temperature controlled stock
MSL922001	Record and present data
TLID2013	Move materials mechanically using automated equipment

AMP20316 Certificate II in Meat Processing (Abattoirs)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by workers commencing work in an abattoir.

Graduates from this qualification will be able to:

- access, record and act on a defined range of information from a range of sources
- apply and communicate known solutions to a limited range of predictable problems
- use a limited range of equipment to complete tasks involving known routines and procedures with a limited range of options

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = a minimum of 9, to a minimum value of 40 points

- Core Units = 6 (20 points)
- Elective Units = a minimum of 3, to a minimum value of 20 points

Core Units

Unit Code	Unit Title	Points
AMPCOR201	Maintain personal equipment	2

AMPCOR202	Apply hygiene and sanitation practices	4
AMPCOR203	Comply with Quality Assurance and HACCP requirements	4
AMPCOR204	Follow safe work policies and procedures	4
AMPCOR205	Communicate in the workplace	4
AMPCOR206	Overview the meat industry	2

Elective Units

- Select at least elective 3 units, to a minimum of 20 points
- Units with a value of up to fifteen points can be selected from a Certificate III in Meat Processing qualification in Slaughtering, Boning Room, Rendering, General, Packing Room, Livestock Handling, Quality Assurance or Meat Safety
- A maximum of four units can be selected from other Certificate II level qualifications in this Training Package, or from another Training Package or accredited course. Units selected will be worth 2 points
Selected units must be relevant to job outcomes in an abattoir and must be chosen to ensure the integrity of the qualification outcome at AQF level 2
- Units marked with an (ϕ) must be undertaken with at least one other unit from the same section

Unit Code	Unit Title	Points
Handle animals		
AMPA2000	Prepare animals for slaughter	4
AMPA2001	Feed race	1
AMPA2002	Restrain animal	1
AMPA2003	Perform emergency kill	2
AMPA2004	Assess, purchase and transport calves	5
AMPA2005	Unload livestock	1
AMPA2006	Apply animal welfare and handling requirements	4
AMPA2007	Identify animals using electronic systems	2

AMPA2177	Handle working dogs in stock yards	3
AHCLSK205	Handle livestock using basic techniques	3
AHCLSK212A	Ride horses to carry out stock work	5
Prepare the carcase		
AMPA2008	Shackle animal	2
AMPA2009	Operate electrical stimulator	1
AMPA2010	Remove head* <i>AMPX209 Sharpen knives</i>	1
AMPA2011	Cut hocks* <i>AMPX209 Sharpen knives</i>	1
AMPA2012	Mark brisket* <i>AMPX209 Sharpen knives</i>	1
AMPA2013	Complete changeover operation	1
AMPA2014	Trim pig pre evisceration* <i>AMPX209 Sharpen knives</i>	4
AMPA2015	Number carcase and head	1
AMPA2016	Punch pelts	2
AMPA2017	Remove brisket wool* <i>AMPX209 Sharpen knives</i>	1
AMPA2018	Prepare hide or pelt for removal	2
AMPA2019	Bag tail* <i>AMPX209 Sharpen knives</i>	1
AMPA2020	Remove and record tag	1
AMPA2021	Seal or drain urinary tract	1
AMPA2022	Singe carcase	1
AMPA2023	Shave carcase* <i>AMPX209 Sharpen knives</i>	1

AMPA2024	Flush carcase	2
AMPA2032	Prepare carcase and equipment for hide or pelt puller	1
Operate mechanical aids		
AMPA2025	Operate scalding and dehairing equipment	4
AMPA2026	Operate whizzard knife	2
AMPA2027	Operate rise and fall platform	1
AMPA2028	Operate vacuum blood collection process	2
AMPA2029	Operate nose roller	2
AMPA2030	Operate pneumatic cutter	1
AMPA2031	Operate circular saw	1
AMPA2035	Operate new technology or process	2
AMPA2036	Operate sterivac equipment	2
AMPA2037	De-rind meat cuts	2
AMPA2038	De-nude meat cuts	2
AMPA2039	Operate rib puller	1
AMPA2040	Operate frenching machine	1
AMPA2041	Operate cubing machine	1
AMPA2042	Cure and corn product in a meat processing plant	2
AMPA2043	Operate head splitter	1
AMPA2050	Operate jaw breaker	1
AMPX201	Prepare and operate bandsaw	2
AMPX210	Prepare and slice meat cuts* <i>AMPX209 Sharpen knives</i>	1
AMPX215	Operate tenderiser	1
AMPX216	Operate mincer	2

Trim carcase		
AMPA2044	Trim neck* <i>AMPX209 Sharpen knives</i>	2
AMPA2045	Trim forequarter to specification* <i>AMPX209 Sharpen knives</i>	2
AMPA2046	Trim hindquarter to specification* <i>AMPX209 Sharpen knives</i>	2
AMPA2047	Inspect hindquarter and remove contamination* <i>AMPX209 Sharpen knives</i>	2
AMPA2048	Inspect forequarter and remove contamination* <i>AMPX209 Sharpen knives</i>	2
AMPA2049	Remove spinal cord* <i>AMPX209 Sharpen knives</i>	2
AMPX209	Sharpen knives	4
Despatch carcase from the slaughter floor		
AMPA2060	Grade carcase	8
AMPA2061	Weigh carcase	2
AMPA2062	Operate semi-automatic tagging machine	4
AMPA2063	Measure fat* <i>AMPX209 Sharpen knives</i>	2
AMPA2064	Label and stamp carcase	2
AMPA2065	Wash carcase	1
AMPA2066	Operate a decontamination unit	1
AMPA2067	Remove tenderloin* <i>AMPX209 Sharpen knives</i>	2
Pack meat products		
AMPA2068	Inspect meat for defects*	4

	<i>AMPX209 Sharpen knives</i>	
AMPA2069	Assemble and prepare cartons	2
AMPA2070	Identify cuts and specifications	6
AMPA2071	Pack meat products	6
AMPA2073	Operate carton scales	2
Operate packaging machinery		
AMPA2072	Operate carton sealing machine	2
AMPA2074	Operate strapping machine	2
AMPA2075	Operate carton forming machine	2
AMPA2076	Operate automatic CL determination machine	2
AMPA2077	Operate bag forming equipment	1
AMPX203	Operate scales and semi-automatic labelling machinery	8
AMPX207	Vacuum pack product	5
AMPX217	Package product using gas flushing process	2
AMPX218	Operate metal detection unit	1
Dress Head		
AMPA2080	Assess dentition	1
AMPA2081	Drop tongue* <i>AMPX209 Sharpen knives</i>	1
AMPA2082	Wash head	1
AMPA2083	Bone head* <i>AMPX209 Sharpen knives</i>	4
AMPA2084	Remove cheek meat* <i>AMPX209 Sharpen knives</i>	2
AMPA2085	Bar head and remove cheek meat* <i>AMPX209 Sharpen knives</i>	2

Process offal

AMP20415 Certificate II in Meat Processing (Meat Retailing)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release
2	AMPv2.0	Selected superseded imported units updated

Qualification Description

This qualification covers work activities undertaken by workers working in meat retailing enterprises.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

Nil.

Packaging Rules

Total number of units = 27

- Core units = 5
- Elective units = 22

Core Units

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry
FDFOP2061A	Use numerical applications in the workplace

Elective Units

Select:

- 8 units from Group A
- 8 units from Group A or Group B
- 6 additional units from the elective list, or this or any other endorsed Training Package or Accredited Course. Selected units must be relevant to job outcomes in meat retailing and must be chosen to ensure the integrity of the qualification outcome at AQF level 2.

Group A

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPR101	Identify species and meat cuts
AMPR102	Trim meat for further processing* <i>AMPX209 Sharpen knives</i>
AMPR103	Store meat product
AMPR104	Prepare minced meat and minced meat products* <i>AMPX209 Sharpen knives</i>
AMPR105	Provide service to customers
AMPR106	Process sales transactions
AMPR107	Undertake minor routine maintenance
AMPR108	Monitor meat temperature from receipt to sale
AMPR203	Select, weigh and package meat for sale
AMPR212	Clean a meat retail work area
AMPX209	Sharpen knives
HLTAID003	Provide first aid

Group B

Unit Code	Unit Title
------------------	-------------------

AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPR201	Break and cut product using a bandsaw* <i>AMPX201 Prepare and operate bandsaw</i>
AMPR202	Provide advice on cooking and storage of meat products* <i>AMPR105 Provide service to customers</i>
AMPR204	Package product using manual packing and labelling equipment
AMPR205	Use basic methods of meat cookery* <i>AMPX209 Sharpen knives</i>
AMPR206	Vacuum pack product in a retail operation
AMPR207	Undertake routine preventative maintenance
AMPR208	Make and sell sausages
AMPR209	Produce and sell value-added products* <i>AMPX209 Sharpen knives</i>
AMPR210	Receive meat products
AMPX201	Prepare and operate bandsaw
AMPX210	Prepare and slice meat cuts* <i>AMPX209 Sharpen knives</i>
AMPX211	Trim meat to specifications* <i>AMPX209 Sharpen knives</i>
AMPX212	Package product using automatic packing and labelling equipment
AMPX213	Despatch meat product
AMPX214	Package meat and smallgoods product for retail sale
BSBITU101	Operate a personal computer
SIRRRTF001	Balance and secure point-of-sale terminal

AMP30116 Certificate III in Meat Processing (Boning Room)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by workers in boning rooms or in meat wholesale enterprises which prepare meat cuts from whole carcasses.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = a minimum of 9 units to a minimum of 54 points

- Core Units = 7 (24 points)
- Elective Units = a minimum of 2 units to a minimum value of 30 points

Core Units

Unit Code	Unit Title	Points
AMPCOR201	Maintain personal equipment	2
AMPCOR202	Apply hygiene and sanitation practices	4
AMPCOR203	Comply with Quality Assurance and HACCP requirements	4
AMPCOR204	Follow safe work policies and procedures	4
AMPCOR205	Communicate in the workplace	4
AMPCOR206	Overview the meat industry	2
AMPX209	Sharpen knives	4

Elective Units

- Select at least elective 2 units to a minimum value of 30 points
- A maximum of three units can be selected from other Certificate III qualifications in this Training Package, or from another Training Package or accredited course
Selected units must be relevant to job outcomes in a boning room and must be chosen to ensure the integrity of the qualification outcome at AQF level 3
- Selected units which do not already carry points will be worth 2 points

Unit Code	Unit Title	Points
AMPA3048	Bone small stock carcass – leg* <i>AMPX209 Sharpen knives</i>	10
AMPA3049	Slice and trim leg – small stock* <i>AMPX209 Sharpen knives</i>	10
AMPA3050	Bone large stock carcass – forequarter* <i>AMPX209 Sharpen knives</i>	15
AMPA3051	Bone large stock carcass – hindquarter* <i>AMPX209 Sharpen knives</i>	15
AMPA3052	Slice and trim large stock forequarter* <i>AMPX209 Sharpen knives</i>	15

AMPA3053	Slice and trim large stock hindquarter* <i>AMPX209 Sharpen knives</i>	15
AMPA3054	Break carcass using a bandsaw* <i>AMPX201 Prepare and operate a bandsaw</i>	15
AMPA3061	Operate leg boning machine	10
AMPA3062	Operate trunk boning machine* <i>AMPX209 Sharpen knives</i>	10
AMPA3063	Bone small stock carcass – shoulder* <i>AMPX209 Sharpen knives</i>	10
AMPA3064	Bone small stock carcass – middle* <i>AMPX209 Sharpen knives</i>	10
AMPA3065	Slice small stock carcass – shoulder* <i>AMPX209 Sharpen knives</i>	10
AMPA3066	Slice small stock carcass – middle* <i>AMPX209 Sharpen knives</i>	10
AMPA3067	Bone carcass using mechanical aids (large stock)* <i>AMPX209 Sharpen knives</i>	15

Qualification Mapping Information

AMP30216 Certificate III in Meat Processing (Food Services)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by workers in meat enterprises which undertake specialised services, such as preparing shelf ready packs from wholesalers or boning rooms, specialty meat cuts, gourmet meat, bulk value-added products, providing meat preparation customer service, and so on.

The AMP30216 Certificate III in Meat Processing (Food Services) is a highly flexible qualification enabling selections to be made from a wide range of units.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 6

- Elective Units = 6

Core Units

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry

Elective Units

- Select 4 units from Group A, B, C, D, E or F
- The remaining 2 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in Food Services and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A (Units from the Abattoirs sector)

Unit Code	Unit Title
AMPA3048	Bone small stock carcass – leg* <i>AMPX209 Sharpen knives</i>
AMPA3049	Slice and trim leg – small stock* <i>AMPX209 Sharpen knives</i>
AMPA3050	Bone large stock carcass – forequarter* <i>AMPX209 Sharpen knives</i>
AMPA3051	Bone large stock carcass – hindquarter*

	<i>AMPX209 Sharpen knives</i>
AMPA3052	Slice and trim large stock forequarter* <i>AMPX209 Sharpen knives</i>
AMPA3053	Slice and trim large stock hindquarter* <i>AMPX209 Sharpen knives</i>
AMPA3054	Break carcass using a bandsaw* <i>AMPX201 Prepare and operate a bandsaw</i>
AMPA3061	Operate leg boning machine
AMPA3062	Operate trunk boning machine* <i>AMPX209 Sharpen knives</i>
AMPA3063	Bone small stock carcass – shoulder* <i>AMPX209 Sharpen knives</i>
AMPA3064	Bone small stock carcass – middle* <i>AMPX209 Sharpen knives</i>
AMPA3065	Slice small stock carcass – shoulder* <i>AMPX209 Sharpen knives</i>
AMPA3066	Slice small stock carcass – middle* <i>AMPX209 Sharpen knives</i>
AMPA3067	Bone carcass using mechanical aids (large stock)* <i>AMPX209 Sharpen knives</i>
AMPA3068	Prepare and despatch meat products
AMPA3071	Implement food safety program
AMPA3072	Perform carcass Meat Hygiene Assessment* <i>AMPX209 Sharpen knives</i>
AMPA3073	Perform process monitoring for Meat Hygiene Assessment
AMPA3074	Perform boning room Meat Hygiene Assessment
AMPA3081	Perform offal Meat Hygiene Assessment
AMPA3092	Grade beef carcasses using Meat Standards Australia standards

AMPA3093	Use standard product descriptions – sheep and goats
AMPA3094	Use standard product descriptions – beef
AMPA3095	Use standard product descriptions – pork
AMPA3096	Use standard product descriptions – kangaroos
AMPA3100	Perform manual chemical lean testing
AMPA3101	Overview of the NLIS for sheep and goats
AMPA3102	Overview of the NLIS program utilising RFIDs
AMPA3116	Supervise meat packing operation
AMPA3117	Oversee product loadout
AMPA3118	Monitor pH and temperature decline

Group B (Units from the meat retailing sector)

Unit Code	Unit Title
AMPR301	Prepare specialised cuts* <i>AMPX209 Sharpen knives</i>
AMPR302	Assess carcass or product quality
AMPR303	Calculate yield of carcass or product
AMPR304	Manage stock
AMPR305	Meet customer needs* <i>AMPRI05 Provide service to customers</i>
AMPR306	Provide advice on nutritional role of meat
AMPR307	Merchandise products, services
AMPR308	Prepare, roll, sew and net meat
AMPR309	Bone and fillet poultry* <i>AMPX209 Sharpen knives</i>

AMPR310	Cost and price meat products
AMPR311	Prepare portion control to specifications* <i>AMPX209 Sharpen knives</i>
AMPR312	Bone game meat* <i>AMPX209 Sharpen knives</i>
AMPR313	Order stock in a meat enterprise
AMPR314	Calculate and present statistical data in a meat enterprise
AMPR315	Utilise the Meat Standards Australia system to meet customer requirements* <i>AMPX209 Sharpen knives</i>
AMPR316	Cure, corn and sell product
AMPR317	Assess and sell poultry product
AMPR318	Break carcass for retail sale* <i>AMPX209 Sharpen knives</i> <i>AMPR319 Locate, identify and assess cuts</i>
AMPR319	Locate, identify and assess meat cuts
AMPR320	Assess and address customer preferences
AMPR321	Collect and prepare standard samples
AMPR322	Prepare and produce value added products* <i>AMPX209 Sharpen knives</i>
AMPR323	Break small stock carcasses for retail sale* <i>AMPX209 Sharpen knives</i> <i>AMPR319 Locate, identify and assess meat cuts</i>
AMPR324	Break large stock carcasses for retail sale* <i>AMPX209 Sharpen knives</i> <i>AMPR319 Locate, identify and assess meat cuts</i>
AMPR325	Prepare cooked meat product for retail sale

Group C (Units from the Smallgoods sector)

Unit Code	Unit Title
AMPS300	Operate mixer or blender unit
AMPS301	Cook, steam and cool product
AMPS302	Prepare dried meat
AMPS303	Fill casings
AMPS304	Thaw product – water
AMPS305	Thaw product – air
AMPS307	Sort meat
AMPS308	Batch meat
AMPS309	Operate product forming machinery
AMPS310	Operate link and tie machinery
AMPS311	Operate complex slicing and packaging machinery
AMPS312	Prepare meat-based pates and terrines for commercial sale
AMPS313	Prepare product formulations
AMPS314	Ferment and mature product
AMPS315	Blend meat product

Group D (Meat Processing cross-sectoral units)

Unit Code	Unit Title
AMPX301	Assess product in chillers
AMPX302	Cure and corn product
AMPX303	Break carcass into primal cuts* <i>AMPX209 Sharpen knives</i>

AMPX304	Prepare primal cuts* <i>AMPX209 Sharpen knives</i>
AMPX305	Smoke product
AMPX306	Provide coaching
AMPX307	Provide mentoring
AMPX308	Follow and implement an established work plan
AMPX309	Identify and repair equipment faults
AMPX310	Perform pre-operations hygiene assessment
AMPX311	Monitor production of packaged product to customer specifications
AMPX313	Contribute to energy efficiency

Group E (Food Processing units)

Unit Code	Unit Title
FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system
FDFV3001A	Conduct chemical wash for fresh produce
FDFV3002A	Program fresh produce grading equipment
FDFOP3001A	Control contaminants and allergens in the workplace* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3005A	Prepare food products using basic cooking methods* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3006A	Identify cultural, religious and dietary requirements for food products
FDFPO3001A	Operate a chickway system
FDFPO3002A	Debone and fillet product (manually)
FDFOP3002A	Set up a production or packaging line for operation

FDFPPL3001A	Participate in improvement processes
FDFPPL3002A	Report on workplace performance
FDFPPL3003A	Support and mentor individuals and groups
FDFPPL3004A	Lead work teams and groups
FDFPPL3005A	Participate in an audit process* <i>FDFOHS2001A Participate in OHS processes</i> <i>FDFOP2063A Apply quality systems and procedures</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FDFPPL3006A	Establish compliance requirements for work area
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFTEC3002A	Implement the pest prevention program
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems

Group F (Imported units from other Training Packages)

Unit Code	Unit Title
BSBFLM312	Contribute to team effectiveness
BSBINM302	Utilise a knowledge management system
BSBSMB405	Monitor and manage small business operations
BSBSMB407	Manage a small team
HLTAID003	Provide first aid
MSTGN3007	Monitor and operate trade waste process
MEM13003B	Work safely with industrial chemicals and materials
MSMENV172	Identify and minimise environmental hazards
MSMSUP300	Identify and apply process improvements

MSMSUP303	Identify equipment faults
MSMSUP330	Develop and adjust a production schedule
MSMENV472	Implement and monitor environmentally sustainable work practices
MSL904001	Perform standard calibrations
MSL922001	Record and present data
MSL933001	Maintain the laboratory/field workplace fit for purpose
MSL952002	Handle and transport samples or equipment
MSL954001	Obtain representative samples in accordance with sampling plan
MSL973001	Perform basic tests
MSL973002	Prepare working solutions
MSL973003	Prepare culture media
MSL973004	Perform aseptic techniques
MSS403011	Facilitate implementation of competitive systems and practices
MSS403013	Lead team culture improvement
MSS403032	Analyse manual handling processes
SIRRINV002A	Control stock
SIRXSLS001	Sell to the retail customer
SIRRMER003	Coordinate visual merchandising activities
SIRXRSK002	Maintain store security
TAEASS301	Contribute to assessment
TAEDEL301	Provide work skill instruction
TLIA2009	Complete and check import/export documentation
TLIA3015	Complete receipt/despatch documentation
TLIA3016	Use inventory systems to organise stock control
TLIA3017	Identify products and store to specifications

TLIA3018	Organise despatch operations
TLIA3019	Organise receival operations
TLIA3026	Monitor storage facilities
TLIA3038	Control and order stock
TLIA3039	Receive and store stock
TLIF3003	Implement and monitor occupational health and safety procedures
UEENEED101A	Use computer applications relevant to a workplace

AMP30316 Certificate III in Meat Processing (Meat Safety)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by meat inspectors in meat processing enterprises whose duties include performing a post-mortem inspection and in some cases ante-mortem inspection.

People seeking registration as a meat inspector should check the current requirements with their state or territory food authority or the Australian Government – Agriculture, as appropriate, when selecting electives.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12 or 15, depending on elective selections

- Core Units = 10
- Elective Units = 2 or 5, depending on elective selections

Core Units

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry
AMPX209	Sharpen knives
AMPA3071	Implement food safety program
AMPA3119	Apply food animal anatomy and physiology to inspection processes
AMPA3131	Identify and report emergency diseases of food animals

Elective Units

- Select 2 units from Group A **or**
- Select 1 unit from Group A and 4 units from Group B

Group A

Unit Code	Unit Title
AMPA3120	Perform ante and post-mortem inspection - Ovine and Caprine* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3121	Perform ante and post-mortem inspection – Bovine* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem</i>

	<i>inspection</i>
AMPA3122	Perform ante and post-mortem inspection – Porcine* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3123	Perform ante and post-mortem inspection – Poultry* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3124	Perform ante and post-mortem inspection – Ratites* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3125	Perform ante and post-mortem inspection – Camels* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3127	Perform post-mortem inspection – Wild game* <i>AMPX209 Sharpen Knives</i>
AMPA3128	Perform ante and post-mortem inspection – Rabbits* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3129	Perform ante and post-mortem inspection – Deer* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3130	Perform ante and post-mortem inspection – Horses * <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3132	Perform ante and post-mortem inspection– Alpacas or Llamas*

	<i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3135	Perform ante and post-mortem inspection – Calves* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>

Group B

Unit Code	Unit Title
AMPA3002	Handle animals humanely while conducting ante-mortem inspection
AMPA3003	Assess effective stunning and bleeding
AMPA3043	Prepare head for inspection* <i>AMPX209 Sharpen Knives</i>
AMPA3047	Prepare and present viscera for inspection* <i>AMPX209 Sharpen knives</i>
AMPA3072	Perform carcass Meat Hygiene Assessment* <i>AMPX209 Sharpen Knives</i>
AMPA3073	Perform process monitoring for Meat Hygiene Assessment
AMPA3074	Perform boning room Meat Hygiene Assessment
AMPA3081	Perform offal Meat Hygiene Assessment
AMPA402	Oversee plant compliance with the Australian Standards for meat processing
AMPA406	Inspect transportation container or vehicle
AMPG300	Overview wild game meat industry
AMPG303	Receive and inspect wild game carcasses from the field
AMPG304	Receive and inspect wild game carcasses at a processing plant
AMPG305	Store wild game carcasses

AMPX404	Conduct an internal audit of a documented program
BSBFLM312	Contribute to team effectiveness
MSL904001	Perform standard calibrations
MSL922001	Record and present data
MSL954001	Obtain representative samples in accordance with sampling plan

Qualification Mapping Information

This qualification is not equivalent to previous versions of the Certificate III in Meat Processing (Meat Safety).

AMP30416 Certificate III in Meat Processing (Rendering)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by workers in rendering plants.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = a minimum of 10 units to a maximum of 50 points

- Core Units = 6 (20 points)
- Elective Units = Minimum 4 units to a maximum of 30 points

Core Units

Unit Code	Unit Title	Points
AMPCOR201	Maintain personal equipment	2
AMPCOR202	Apply hygiene and sanitation practices	4
AMPCOR203	Comply with Quality Assurance and HACCP requirements	4
AMPCOR204	Follow safe work policies and procedures	4
AMPCOR205	Communicate in the workplace	4
AMPCOR206	Overview the meat industry	2

Elective Units

- Select at least 4 elective units, to a minimum value of 30 points
- Units to a minimum value of 20 points must be selected from the elective list
- The remaining units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in a rendering plant and must be chosen to ensure the integrity of the qualification outcome at AQF level 3
- Selected units which do not already carry points will be worth 2 points

Unit Code	Unit Title	Points
AMPA3082	Operate batch cooker	8
AMPA3083	Operate continuous cooker	7
AMPA3084	Operate press	5
AMPA3085	Operate wet rendering process	10
AMPA3086	Monitor boiler operations	4
AMPA3087	Operate tallow processing plant	6
AMPA3088	Operate blood processing plant	6
AMPA3089	Produce rendered products hygienically	6
AMPA3090	Render edible products	2
AMPA3091	Implement a Quality Assurance program for rendering plant	4

MSMENV172	Identify and minimise environmental hazards	2
-----------	---	---

Qualification Mapping Information

Equivalent to MTM30411 Certificate III in Meat Processing (Rendering).

AMP30516 Certificate III in Meat Processing (Slaughtering)

Modification History

Release Number	TP Version	Comments
2	AMP v2.1	New release to correct prerequisite requirements
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by workers undertaking slaughtering duties in abattoirs.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems.

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = a minimum of 12 units to a total value of 54 points

- Core Units = 7 (24 points)
- Elective Units = Select at least 5 elective units to a minimum value of 30 points

Core Units

Unit Code	Unit Title	Points
AMPCOR201	Maintain personal equipment	2
AMPCOR202	Apply hygiene and sanitation practices	4
AMPCOR203	Comply with Quality Assurance and HACCP requirements	4
AMPCOR204	Follow safe work policies and procedures	4
AMPCOR205	Communicate in the workplace	4
AMPCOR206	Overview the meat industry	2
AMPX209	Sharpen knives	4

Elective Units

- Select at least 5 elective units to a minimum value of 30 points
- At least 3 units must be selected from the elective list
- The remaining two units may be selected from the elective list, this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in slaughtering and must be chosen to ensure the integrity of the qualification outcome at AQF level 3
- Selected units which do not already carry points will be worth 2 points
- Units marked with an (ϕ) must be undertaken with at least one other unit from the same section

Unit Code	Unit Title	Points
Slaughter floor operations		
AMPA3000	Stun animal	4
AMPA3001	Stick and bleed animal* <i>AMPX209 Sharpen knives</i>	4
AMPA3003	Assess effective stunning and bleeding	2
Seal digestive tract		

AMPA3005	Rod weasand	2
AMPA3006	Seal weasand* <i>AMPX209 Sharpen knives</i>	1
AMPA3007	Ring bung* <i>AMPX209 Sharpen knives</i>	4
AMPA3008	Seal bung	2
Perform opening cuts		
AMPA3009	Split carcase	4
AMPA3020	Bone neck* <i>AMPX209 Sharpen knives</i>	3
AMPA3021	Perform ‘Y’ cut* <i>AMPX209 Sharpen knives</i> <i>AMPA3023 Explain opening cuts</i>	2
AMPA3022	Skin head* <i>AMPX209 Sharpen knives</i>	4
AMPA3023	Explain opening cuts † <i>AMPX209 Sharpen knives</i> <i>AMPA3044 Operate air knife</i>	1

AMP30716 Certificate III in Meat Processing (Quality Assurance)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release. No equivalent qualification.

Qualification Description

This qualification covers the work activities undertaken by Quality Assurance Officers in a meat processing enterprise. Typically people undertaking this qualification will be responsible for the day-to-day monitoring, testing and application of a QA program.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units: 17

- Core Units: 8
- Elective Units: 9

Core Units

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry
AMPA3071	Implement food safety program
AMPX404	Conduct an internal audit of a documented program

Elective Units

- A minimum of 9 elective units must be completed.
- Select a minimum of 6 units from Group A
- Select a maximum of 3 units from Group A or Group B, or from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in meat processing Quality Assurance and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A

Unit Code	Unit Title
AMPA2006	Apply animal welfare and handling requirements
AMPA3003	Assess effective stunning and bleeding
AMPA3072	Perform carcass Meat Hygiene Assessment* <i>AMPX209 Sharpen knives</i>
AMPA3073	Perform process monitoring for Meat Hygiene Assessment
AMPA3074	Perform boning room Meat Hygiene Assessment
AMPA3081	Perform offal Meat Hygiene Assessment

AMPA3091	Implement a Quality Assurance program for rendering plant
AMPA3092	Grade beef carcasses using Meat Standards Australia standards
AMPA3093	Use standard product descriptions - sheep/goats
AMPA3094	Use standard product descriptions - beef
AMPA3095	Use standard product descriptions - pork
AMPA3096	Use standard product descriptions – kangaroos
AMPA3100	Perform manual chemical lean testing
AMPA3111	Conduct start up procedures and preoperational checks on slaughter floor NLIS data equipment* <i>AMPA3102 Overview of the NLIS program utilising RFIDs</i>
AMPA3118	Monitor temperature and pH decline
AMPA402	Oversee plant compliance with the Australian Standards for meat processing
AMPA406	Inspect transportation container or vehicle
AMPA411	Oversee humane handling of animals
AMPA412	Conduct an animal welfare audit of a meat processing plant* <i>AMPA2006 Apply animal welfare and handling requirements</i> <i>AMPA411 Oversee humane handling of animals</i> <i>AMPX404 Conduct an internal audit of a documented program</i>

AMP30815 Certificate III in Meat Processing (Retail Butcher)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release
2	AMPv2.0	Selected superseded imported units updated

Qualification Description

This qualification is the trade qualification for butchers.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

Nil.

Packaging Rules

Total number of units = 44

- Core units = 37
- Elective units = 7

Core Units

Stage 1

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace

AMPCOR206	Overview the meat industry
AMPR101	Identify species and meat cuts
AMPR102	Trim meat for further processing* <i>AMPX209 Sharpen knives</i>
AMPR103	Store meat product
AMPR104	Prepare minced meat and minced meat products* <i>AMPX209 Sharpen knives</i>
AMPR105	Provide service to customers
AMPR203	Select, weigh and package meat for sale
AMPR212	Clean a meat retail work area
AMPX209	Sharpen knives
FDFOP2061A	Use numerical applications in the workplace

Core Units

Stage 2

Unit Code	Unit Title
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPR201	Break and cut product using a bandsaw* <i>AMPX201 Prepare and operate bandsaw</i>
AMPR202	Provide advice on cooking and storage of meat products* <i>AMPR105 Provide service to customers</i>
AMPR204	Package product using manual packing and labelling equipment
AMPR205	Use basic methods of meat cookery* <i>AMPX209 Sharpen knives</i>
AMPR208	Make and sell sausages
AMPR209	Produce and sell value-added products* <i>AMPX209 Sharpen knives</i>

AMPX201	Prepare and operate bandsaw
AMPX210	Prepare and slice meat cuts* <i>AMPX209 Sharpen knives</i>
AMPX211	Trim meat to specifications* <i>AMPX209 Sharpen knives</i>

Core Units

Stage 3

Unit Code	Unit Title
AMPR301	Prepare specialised cuts* <i>AMPX209 Sharpen knives</i>
AMPR302	Assess carcase or product quality
AMPR303	Calculate yield of carcase or product
AMPR304	Manage stock
AMPR305	Meet customer needs* <i>AMPRI05 Provide service to customers</i>
AMPR306	Provide advice on nutritional role of meat
AMPR307	Merchandise products, services
AMPR316	Cure, corn and sell product
AMPR317	Assess and sell poultry product
AMPR319	Locate, identify and assess meat cuts
AMPR320	Assess and address customer preferences
AMPR322	Prepare and produce value added products
AMPX304	Prepare primal cuts* <i>AMPX304 Prepare primal cuts</i>

Elective Units

Select:

- 1 unit from Group A (Stage 1)
- 1 unit from Group B (Stage 2)
- 1 unit from Group C (Stage 3)
- 4 units from Groups C or D

Group A: Stage 1

Unit Code	Unit Title
AMPR106	Process sales transactions
AMPR107	Undertake minor routine maintenance
AMPR108	Monitor meat temperature from receipt to sale

Group B: Stage 2

Unit Code	Unit Title
AMPR206	Vacuum pack product in a retail operation
AMPR207	Undertake routine preventative maintenance
AMPR210	Receive meat product
AMPR211	Provide advice on meal solutions in a meat retail outlet
AMPX212	Package product using automatic packing and labelling equipment
AMPX213	Despatch meat product
BSBITU101	Operate a personal computer
SIRRRTF001	Balance and secure point-of-sale terminal

Group C: Stage 3

Unit Code	Unit Title
AMPR312	Bone game meat* <i>AMPX209 Sharpen knives</i>

AMPR323	Break small stock carcasses for retail sale* <i>AMPX209 Sharpen knives</i> <i>AMPR319 Locate, identify and assess meat cuts</i>
AMPR324	Break large stock carcasses for retail sale* <i>AMPX209 Sharpen knives</i> <i>AMPR319 Locate, identify and assess meat cuts</i>

Group D: Stage 3

Unit Code	Unit Title
AMPR308	Prepare, roll, sew and net meat
AMPR309	Bone and fillet poultry* <i>AMPX209 Sharpen knives</i>
AMPR310	Cost and price meat products
AMPR311	Prepare portion control to specifications* <i>AMPX209 Sharpen knives</i>
AMPR313	Order stock in a meat enterprise
AMPR314	Calculate and present statistical data in a meat enterprise
AMPR315	Utilise the Meat Standards Australia system to meet customer requirements
AMPR321	Collect and prepare standard samples
AMPR325	Prepare cooked meat product for retail sale
AMPX305	Smoke product

AMPX306	Provide coaching
AMPX307	Provide mentoring
AMPX309	Identify and repair equipment faults
HLTAID003	Provide first aid
SIRXSLS001	Sell to the retail customer
SIRRMER003	Coordinate visual merchandising activities
TAEDEL301	Provide work skill instruction

Qualification Mapping Information

Equivalent to MTM30813 Certificate III in Meat Processing (Retail Butcher)

AMP30916 Certificate III in Meat Processing (Smallgoods - General)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by smallgoods producers working in larger, factory-type smallgoods enterprises. Factories will often have specialised lines of production, (for example, hams and bacons) and use complex production machinery, and may not encompass the range of smallgoods production techniques found in traditional smallgoods enterprises.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 25

- Core Units = 5
- Elective Units =20

Core Units

Unit Code	Unit Title
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry

Elective Units

- Select 2 units from Group A
- Select 7 units from Group B
- Select 7 units from Group C
- The remaining 4 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in smallgoods processing and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A

Unit Code	Unit Title
AMPS101	Handle materials and products
AMPS102	Pack smallgoods product
AMPX202	Clean work area during operations
FDFOP2061A	Use numerical applications in the workplace
HLTAID003	Provide first aid

Group B

Unit Code	Unit Title
AMPA2047	Inspect hindquarter and remove contamination* <i>AMPX209 Sharpen knives</i>
AMPA2048	Inspect forequarter and remove contamination* <i>AMPX209 Sharpen knives</i>
AMPA2109	Store carcase product
AMPA2110	Store carton product
AMPA2174	Clean after operations – boning room
AMPS201	Package product using thermoform process
AMPS203	Operate bar and coder systems
AMPS205	Select, identify and prepare casings
AMPS206	Manually shape and form product
AMPS207	Slice product using simple machinery
AMPS208	Rotate stored meat
AMPS209	Rotate meat product
AMPS210	Inspect carton meat
AMPS211	Prepare dry ingredients
AMPS212	Measure and calculate routine workplace data
AMPS213	Manually link and tie product
AMPX203	Operate scales and semi-automatic labelling machinery
AMPX205	Clean chillers
AMPX206	Operate forklift in a specific workplace
AMPX207	Vacuum pack product
AMPX209	Sharpen knives
AMPX210	Prepare and slice meat cuts* <i>AMPX209 Sharpen knives</i>

AMPX211	Trim meat to specifications* <i>AMPX209 Sharpen knives</i>
AMPX212	Package product using automatic packing and labelling equipment
AMPX213	Despatch meat product
AMPX214	Package meat and smallgoods product for retail sale
AMPX217	Package product using gas flushing process
AMPX218	Operate metal detection unit
AMPX301	Assess product in chillers
CPPCLO3038	Clean food-handling areas
FDFOF2007A	Work in a freezer storage area
FDFOF2010A	Work with temperature controlled stock
MSL922001	Record and present data
TLID2013	Move materials mechanically using automated equipment

Group C

AMPA3094	Use standard product descriptions – beef
AMPA3095	Use standard product descriptions – pork
AMPS300	Operate mixer or blender unit
AMPS301	Cook, steam and cool product
AMPS302	Prepare dried meat
AMPS303	Fill casings
AMPS304	Thaw product – water
AMPS305	Thaw product – air
AMPS307	Sort meat
AMPS308	Batch meat

AMPS309	Operate product forming machinery
AMPS310	Operate link and tie machinery
AMPS311	Operate complex slicing and packaging machinery
AMPS312	Prepare meat-based pates and terrines for commercial sale
AMPS313	Prepare product formulations
AMPS314	Ferment and mature product
AMPS315	Blend meat product
AMPX204	Maintain production records
AMPX302	Cure and corn product
AMPX303	Break carcass into primal cuts* <i>AMPX209 Sharpen knives</i>
AMPX304	Prepare primal cuts* <i>AMPX209 Sharpen knives</i>
AMPX305	Smoke product
AMPX306	Provide coaching
AMPX307	Provide mentoring
AMPX309	Identify and repair equipment faults
BSBINM302	Utilise a knowledge management system
FDFO3002A	Set up a production or packaging line for operation
MSL904001	Perform standard calibrations
MSL952002	Handle and transport samples or equipment
MSL954001	Obtain representative samples in accordance with sampling plan
MSL973001	Perform basic tests
TAEDEL301	Provide work skill instruction
TLIA2009	Complete and check import/export documentation

AMP31216 Certificate III in Meat Processing (Packing Operations)

Modification History

Release Number	TP Version	Comments
1	AMPv2	Initial release. No equivalent qualification.

Qualification Description

This qualification covers the work activities undertaken by team leaders in a packing room of a meat processing operation. Typically people undertaking this qualification will have responsibility for a group of people and for the smooth, safe and efficient running of the packing process. They will frequently be called upon to train new recruits or to implement new processes or customer specifications.

Graduates from this qualification will have a wide range of cognitive, technical and communication skills to select and apply a specialised range of tools, materials and information to:

- complete routine activities
- provide and transmit solutions to predictable and sometimes unpredictable problems

Graduates will apply knowledge and skills to demonstrate autonomy and judgement and to take limited responsibility in known and stable contexts within established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

Candidates must have completed the following units or their equivalent:

AMPA2068 Inspect meat for defects

AMPA2070 Identify cuts and specifications

AMPA2071 Pack meat product

Packaging Rules

Total number of units = 18

- Core Units = 7
- Elective Units = 11

Core Units

Unit Code	Unit Title
AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry
AMPA3116	Supervise meat packing operation

Elective Units

- Select a minimum of 11 units
 - 8 units must be selected from the elective list
 - The remaining units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in a meat processing packing operation and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AMPA3072	Perform carcass Meat Hygiene Assessment* <i>AMPX209 Sharpen knives</i>
AMPA3073	Perform process monitoring for Meat Hygiene Assessment

AMPA3074	Perform boning room Meat Hygiene Assessment
AMPA3093	Use standard product descriptions - sheep/goats
AMPA3094	Use standard product descriptions - beef
AMPA3095	Use standard product descriptions - pork
AMPA3096	Use standard product descriptions – kangaroos
AMPA3117	Oversee product loadout
AMPX301	Assess product in chillers
AMPX308	Follow and implement an established work plan
AMPX309	Identify and repair equipment faults
AMPX310	Perform pre-operations hygiene assessment
AMPX311	Monitor production of packaged product to customer specifications
AMPX404	Conduct an internal audit of a documented program
FDFO3002A	Set up a production or packaging line for operation
MSS403032	Analyse manual handling processes
MSL904001	Perform standard calibrations
MSL922001	Record and present data
MSL954001	Obtain representative samples in accordance with sampling plan
MSMENV172	Identify and minimise environmental hazards
MSMSUP300	Identify and apply process improvements

Qualification Mapping Information

No equivalent qualification.

AMP40215 Certificate IV in Meat Processing (General)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release
2	AMPv2.0	Selected superseded imported units updated New unit AMPX427 Dry age meat added to Elective Group A Technical Units

Qualification Description

This qualification covers work activities undertaken by workers at supervisory or post-trade level in the meat industry. It is designed to enable candidates to select a mix of technical and leadership units to suit their job roles and career requirements. This qualification is also designed to enable candidates to gain cross-sectoral experience in the meat industry.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

Nil.

Packaging Rules

Total number of units = 12

- Core units = 4
- Elective units = 8

Core Units

Unit Code	Unit Title
AMPCOR401	Manage own work performance
AMPCOR402	Facilitate Quality Assurance process

AMPCOR403	Participate in workplace health and safety risk control process
AMPCOR404	Facilitate hygiene and sanitation performance

Elective Units

Select:

- 1 unit from Group A
- 1 unit from Groups B or C or D or E
- 3 units from the elective list (any group)
- 3 additional units from the elective list, or this or any other endorsed Training Package or Accredited Course. Selected units must be relevant to job outcomes in meat processing and must be chosen to ensure the integrity of the qualification outcome at AQF level 4.

Group A: Technical Units

Unit Code	Unit Title
AMPA400	Utilise refrigeration index
AMPA401	Implement a Meat Hygiene Assessment program
AMPA402	Oversee plant compliance with the Australian standards for meat processing
AMPA403	Apply meat science
AMPA404	Conduct and validate pH and temperature declines to MSA standards
AMPA407	Contribute to abattoir design and construction processes
AMPA411	Oversee humane handling of animals
AMPX401	Monitor meat preservation process
AMPX402	Monitor and overview the production of processed meats and smallgoods
AMPX403	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)* <i>AMPCOR202 Apply hygiene and sanitation practices</i> <i>AMPCOR404 Facilitate hygiene and sanitation practices</i>
AMPX405	Conduct statistical analysis of process
AMPX407	Oversee export requirements

AMPX415	Specify beef product using AUS-MEAT language
AMPX416	Specify sheep product using AUS-MEAT language
AMPX417	Specify pork product using AUS-MEAT language
AMPX420	Participate in the ongoing development and implementation of a HACCP and Quality Assurance system
AMPX421	Establish sampling program
AMPX424	Raise and validate requests for export permits and Meat Transfer Certificates
AMPX426	Undertake chiller assessment to AUS-MEAT requirements
AMPX427	Dry age meat

Group B: Management units

Unit Code	Unit Title
AMPA405	Develop and implement Quality Assurance program for a rendering plant
AMPX406	Manage or oversee an external audit of the establishment's quality system
AMPX408	Coordinate contracts
AMPX409	Prepare and evaluate resource proposals
AMPX410	Facilitate achievement of enterprise environmental policies and goals
AMPX413	Manage and maintain a food safety plan
AMPX414	Assess and evaluate meat industry requirements and processes
AMPX419	Participate in product recall
AMPX422	Develop and implement work instructions and SOPs
BSBCUS402	Address customer needs
BSBHRM405	Support the recruitment, selection and induction of staff
BSBINM401	Implement workplace information system
BSBMGT402	Implement operational plan

BSBMGT403	Implement continuous improvement
BSBMKG414	Undertake marketing activities
BSBRKG404	Monitor and maintain records in an online environment
PSPREG412A	Gather and manage evidence
SIRXEBS001A	Acquire and retain online customers
SIRXFIN004A	Manage financial resources
SIRXINV004A	Buy merchandise
SIRRINV001	Receive and handle retail stock

Group C: Leadership units

Unit Code	Unit Title
AMPX411	Foster a learning culture in a meat enterprise
AMPX412	Build productive and effective workplace relationships
AMPX418	Lead communication in the workplace
AMPX423	Supervise new recruits
BSBINN301	Promote innovation in a team environment
BSBLDR403	Lead team effectiveness
BSBLED401	Develop teams and individuals

Group D: Auditing units

Unit Code	Unit Title
AMPA412	Conduct an animal welfare audit of a meat processing plant* <i>AMPA411 Oversee of humane handling of animals</i> <i>AMPX404 Conduct an internal audit of a documented program</i> <i>MTMP2010A Apply animal welfare and handling requirements</i>
AMPX404	Conduct an internal audit of a documented program

AMPX425	Conduct a document review
FDFAU4001A	Assess compliance with food safety programs
FDFAU4002A	Communicate and negotiate to conduct food safety audits
FDFAU4003A	Conduct food safety audits
FDFAU4004A	Identify, evaluate and control food safety hazards

AMP40415 Certificate IV in Meat Processing (Quality Assurance)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Qualification Description

This qualification covers work activities undertaken by Quality Assurance officers in meat processing enterprises.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

The following units must be completed prior to commencing this qualification:

- AMPCOR201 Maintain personal equipment
- AMPCOR202 Apply hygiene and sanitation practices
- AMPCOR203 Comply with Quality Assurance and HACCP requirements
- AMPCOR204 Follow safe work policies and procedures
- AMPCOR205 Communicate in the workplace
- AMPCOR206 Overview the meat industry

Packaging Rules

Total number of units = 12

- Core units = 6
- Elective units = 6

Core Units

Unit Code	Unit Title
AMPCOR401	Manage own work performance

AMPCOR402	Facilitate Quality Assurance process
AMPCOR403	Participate in workplace health and safety risk control process
AMPCOR404	Facilitate hygiene and sanitation performance
AMPX404	Conduct an internal audit of a documented program
AMPX420	Participate in the ongoing development and implementation of a HACCP and Quality Assurance system

Elective Units

Select:

- 4 units from the elective list
- 2 additional units from the elective list, or this or any other endorsed Training Package or Accredited Course. Selected units must be relevant to job outcomes in Quality Assurance and must be chosen to ensure the integrity of the qualification outcome at AQF level 4.

Unit Code	Unit Title
AMPA400	Utilise refrigeration index
AMPA401	Implement a Meat Hygiene Assessment program
AMPA402	Oversee plant compliance with the Australian standards for meat processing
AMPA403	Apply meat science
AMPA405	Develop and implement Quality Assurance program for a rendering plant
AMPA412	Conduct an animal welfare audit of a meat processing plant* <i>AMPA411 Oversee of humane handling of animals</i> <i>AMPX404 Conduct an internal audit of a documented program</i> <i>MTMP2010A Apply animal welfare and handling requirements</i>
AMPX403	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)* <i>AMPCOR202 Apply hygiene and sanitation practices</i> <i>AMPCOR404 Facilitate hygiene and sanitation performance</i>

AMPX405	Conduct statistical analysis of process
AMPX406	Manage or oversee an external audit of the establishment's quality system
AMPX415	Specify beef product using AUS-MEAT language
AMPX416	Specify sheep product using AUS-MEAT language
AMPX417	Specify pork product using AUS-MEAT language
AMPX419	Participate in product recall
AMPX422	Develop and implement work instructions and SOPs
AMPX424	Raise and validate requests for export permits and Meat Transfer Certificates
AMPX425	Conduct a document review
AMPX426	Undertake chiller assessment to AUS-MEAT requirements
FDFAU4001A	Assess compliance with food safety programs
FDFAU4002A	Communicate and negotiate to conduct food safety audits
FDFAU4003A	Conduct food safety audits
FDFAU4004A	Identify, evaluate and control food safety hazards

AMP40516 Certificate IV in Meat Processing (Meat Safety)

Modification History

Release Number	TP Version	Comments
2	AMP v2.2	Update to packaging rules to correct unit title
1	AMPv2	Initial release

Qualification Description

This qualification covers work activities undertaken by meat inspectors in meat processing enterprises, usually at export processing plants. It covers the duties of a meat inspector performing post-mortem inspection and, in some cases, ante-mortem inspection.

People seeking registration as a meat inspector should check the current requirements with their state or territory food authority or the Australian Government – Agriculture, as appropriate, when selecting electives.

This qualification differs from the *Certificate III in Meat Processing (Meat Safety)* in that it addresses the skills and knowledge necessary to oversee the implementation of Approved Arrangements and workplace health and safety programs.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 21 or 24 (depending on elective selection)

- Core Units = 14
- Elective Units = 7 or 10 (depending on elective selection)

Core Units

Unit Code	Unit Title
-----------	------------

AMPCOR201	Maintain personal equipment
AMPCOR202	Apply hygiene and sanitation practices
AMPCOR203	Comply with Quality Assurance and HACCP requirements
AMPCOR204	Follow safe work policies and procedures
AMPCOR205	Communicate in the workplace
AMPCOR206	Overview the meat industry
AMPCOR401	Manage own work performance
AMPCOR402	Facilitate Quality Assurance process
AMPCOR403	Participate in workplace health and safety risk control process
AMPCOR404	Facilitate hygiene and sanitation performance
AMPX209	Sharpen knives
AMPA3119	Apply food animal anatomy and physiology to inspection processes
AMPA3071	Implement food safety program
AMPA3131	Identify and report emergency diseases of food animals

Elective Units

- Select 2 units from Group A **or**
- Select 1 unit from Group A and 4 units from Group B
- Select 5 units from Group C

Group A

Unit Code	Unit Title
AMPA3120	Perform ante and post-mortem inspection - Ovine and Caprine* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3121	Perform ante and post-mortem inspection – Bovine*

	<p><i>AMPX209 Sharpen Knives</i></p> <p><i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i></p>

AMPA3123	<p>Perform ante and post-mortem inspection – Poultry*</p> <p><i>AMPX209 Sharpen Knives</i></p> <p><i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i></p>
AMPA3124	<p>Perform ante and post-mortem inspection – Ratites*</p> <p><i>AMPX209 Sharpen Knives</i></p> <p><i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i></p>
AMPA3125	<p>Perform ante and post-mortem inspection – Camels*</p> <p><i>AMPX209 Sharpen Knives</i></p> <p><i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i></p>
AMPA3127	<p>Perform post-mortem inspection – Wild game*</p> <p><i>AMPX209 Sharpen Knives</i></p>
AMPA3128	<p>Perform ante and post-mortem inspection – Rabbits*</p> <p><i>AMPX209 Sharpen Knives</i></p> <p><i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i></p>
AMPA3129	<p>Perform ante and post-mortem inspection – Deer*</p> <p><i>AMPX209 Sharpen Knives</i></p> <p><i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i></p>
AMPA3130	<p>Perform ante and post-mortem inspection – Horses *</p> <p><i>AMPX209 Sharpen Knives</i></p> <p><i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i></p>

AMPA3132	Perform ante and post-mortem inspection– Alpacas or Llamas* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>
AMPA3135	Perform ante and post-mortem inspection – Calves* <i>AMPX209 Sharpen Knives</i> <i>AMPA3002 Handle animals humanely while conducting ante-mortem inspection</i>

Group B

Unit Code	Unit Title
AMPA3002	Handle animals humanely while conducting ante-mortem inspection
AMPA3003	Assess effective stunning and bleeding
AMPA3043	Prepare head for inspection* <i>AMPX209 Sharpen Knives</i>
AMPA3047	Prepare and present viscera for inspection* <i>AMPX209 Sharpen knives</i>
AMPA3072	Perform carcass Meat Hygiene Assessment* <i>AMPX209 Sharpen Knives</i>
AMPA3073	Perform process monitoring for Meat Hygiene Assessment
AMPA3074	Perform boning room Meat Hygiene Assessment
AMPA3081	Perform offal Meat Hygiene Assessment
AMPA402	Oversee plant compliance with the Australian Standards for meat processing
AMPA406	Inspect transportation container or vehicle
AMPG300	Overview wild game meat industry
AMPG303	Receive and inspect wild game carcasses from the field
AMPG304	Receive and inspect wild game carcasses at a processing plant

AMPG305	Store wild game carcasses
AMPX404	Conduct an internal audit of a documented program
BSBFLM312	Contribute to team effectiveness
MSL904001	Perform standard calibrations
MSL922001	Record and present data
MSL954001	Obtain representative samples in accordance with sampling plan

Group C

Unit Code	Unit Title
AMPA400	Utilise refrigeration index
AMPA401	Implement a Meat Hygiene Assessment program
AMPA402	Oversee plant compliance with the Australian Standards for meat processing
AMPA407	Contribute to abattoir design and construction processes
AMPA411	Oversee humane handling of animals
AMPA412	Conduct an animal welfare audit of a meat processing plant* <i>AMPA2006 Apply animal welfare and handling requirements</i> <i>AMPA411 Oversee humane handling of animals</i> <i>AMPX404 Conduct an internal audit of a documented program</i>
AMPX401	Monitor meat preservation process
AMPX402	Monitor and overview the production of processed meats and smallgoods
AMPX403	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)* <i>AMP COR202 Apply hygiene and sanitation practices</i> <i>MTM COR404 Facilitate hygiene and sanitation performance</i>
AMPX404	Conduct an internal audit of a documented program
AMPX406	Manage or oversee an external audit of the establishment's quality system

AMPX407	Oversee export requirements
AMPX412	Build productive and effective workplace relationships
AMPX420	Participate in ongoing development and implementation of a HACCP and Quality Assurance system
AMPX421	Establish sampling program
AMPX424	Raise and validate requests for export permits and Meat Transfer Certificates
AMPX425	Conduct a document review
FDFAU4001A	Assess compliance with food safety programs
FDFAU4003A	Conduct food safety audits
FDFAU4002A	Communicate and negotiate to conduct food safety audits
PSPREG412A	Gather and manage evidence

Qualification Mapping Information

This qualification is not equivalent to previous versions of the Certificate IV in Meat Processing (Meat Safety).

AMP50115 Diploma of Meat Processing (Meat Retailing)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Qualification Description

The qualification is for people who are in a management position or who have the potential to move into these positions. People who enter this qualification will usually have substantial experience in a meat retailing sector, and will be seeking to improve their business expertise and experience.

People who are considering undertaking this qualification need to be aware that it requires extensive reading, writing of assignments and project work.

The Diploma qualification is designed for people who are already employed in the industry and who have the opportunity to draw upon workplace experiences and to carry out assignments and projects in the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

The following units must be completed prior to commencement of this qualification:

- AMPCOR401 Manage own work performance
- AMPCOR402 Facilitate Quality Assurance process
- AMPCOR403 Participate in workplace health and safety risk control process
- AMPCOR404 Facilitate hygiene and sanitation performance

Or deemed equivalence in industry skills and knowledge

Packaging Rules

Total number of units = 6

- Core units = 0

- Elective units = 6

Elective Units

Select:

- 4 units from the elective list
- 2 additional units from the elective list, or this or any other endorsed Training Package or Accredited Course. Selected units must be relevant to job outcomes in meat retailing management and must be chosen to ensure the integrity of the qualification outcome at AQF level 5.

Unit Code	Unit Title
AMPMGT501	Design and manage the food safety system
AMPMGT502	Manage new product or process development
AMPMGT503	Develop and assess a meat retailing business opportunity
BSBCOM501	Identify and interpret compliance requirements
BSBFIM501	Manage budgets and financial plans
BSBMGT617	Develop and implement a business plan
BSBMKG502	Establish and adjust the marketing mix
SIRXCLM402	Manage store facilities
SIRXMGT005A	Set strategic plans
SIRXMGT006A	Initiate and implement change

AMP80115 Graduate Certificate in Agribusiness

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release
2	AMPv2.0	Selected superseded imported units updated

Qualification Description

This qualification provides a general vocational outcome in agribusiness. It reflects the role of individuals who apply substantial specialised knowledge and skills to the managerial role in an organisation or business area. In these roles they make significant high-level independent judgements in major planning, research, design, operational, compliance and management functions within highly varied or specialised agribusiness contexts.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

Candidates must enter the qualification through one of the following entry points which demonstrate their potential to undertake study at graduate level:

- an Advanced Diploma or Diploma qualification relevant to an agrifood industry
- relevant extensive vocational experience in middle management in an agrifood industry at a skill level commensurate with the AQF level 6 attributes and criteria
- higher education qualification (e.g. Bachelor Degree), with relevant vocational experience in an agrifood industry

Packaging Rules

Total number of units = 4

- Core units = 0
- Elective units = 4

Elective Units

Select:

- 3 units of competency from Group A: Business Leadership Stream
- 1 unit of competency from either Group A, not previously selected, or Group B: Technical Stream, or from a relevant Graduate Certificate or Diploma from this Training Package or any other Training Package or accredited course. Selected units must be relevant to job outcomes in agribusiness and must be chosen to ensure the integrity of the qualification outcome at AQF level 8.

Group A: Business Leadership Stream

Unit Code	Unit Title
AMPMGT801	Manage financial performance
AMPMGT802	Provide strategic leadership
AMPMGT803	Communicate and negotiate in a culturally diverse context
AMPMGT804	Develop and enhance collaborative partnerships and relationships
BSBDES801	Research and apply design theory
MSS407001	Prepare for and implement change
MSS407006	Build relationships between teams in an operations environment
NWP704A	Lead a project development

Group B: Technical Stream

Unit Code	Unit Title
AMPMGT605	Assess and purchase livestock
AMPMGT805	Develop and manage international business operations
AMPMGT806	Commercialise research and technology product or idea
BSBCOM601	Research compliance requirements and issues
NWP706A	Review and evaluate water and wastewater sustainability objectives
NWP707A	Analyse and review water treatment plant technology

AMP80215 Graduate Diploma of Agribusiness

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release
2	AMPv2.0	Selected superseded imported units updated

Qualification Description

This qualification provides a general vocational outcome in agribusiness. It reflects the role of individuals who apply substantial specialised knowledge and skills to the senior managerial and leadership role in an organisation or business area. In these roles they are required to generate and evaluate complex ideas, and to initiate, design and execute the major planning, research, design, operational, compliance and management functions within highly varied or specialised agribusiness contexts. Typically, they would have full responsibility and accountability for the personal output and work of others.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

Candidates must enter the qualification through one of the following entry points which demonstrate their potential to undertake study at graduate level:

- an Advanced Diploma or Diploma qualification relevant to an agrifood industry
- relevant extensive vocational experience in middle management in an agrifood industry at a skill level commensurate with the AQF level VI attributes and criteria
- higher education qualification (e.g. Bachelor Degree), with relevant vocational experience in an agrifood industry

Packaging Rules

Total number of units = 8

- Core units = 0
- Elective units = 8

Elective Units

Select:

- 3 units from Group A: Business Leadership Stream 1
- 1 unit from either Group A, not previously selected, or Group B: Technical Stream 1, or from a relevant Graduate Certificate from this Training Package or any other Training Package or accredited course (the selected unit must not duplicate units already contained within the qualification)
- 3 units from Group C: Business Leadership Stream 2
- 1 unit from Group D: Technical Stream 2 or from any other group, or from a relevant Graduate Diploma from this Training Package or any other Training Package or accredited course (the selected unit must not duplicate units already contained within the qualification).

Selected units must be relevant to job outcomes in agribusiness and must be chosen to ensure the integrity of the qualification outcome at AQF level 8

Group A: Business Leadership Stream 1

Unit Code	Unit Title
AMPMGT801	Manage financial performance
AMPMGT802	Provide strategic leadership
AMPMGT803	Communicate and negotiate in a culturally diverse context

AHC BIO302 Identify and report unusual disease or plant pest signs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.

The unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.

This unit applied to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify signs of unusual disease or a plant pest	1.1 Identify signs of disease or a plant pest 1.2 Compare signs of disease or a plant pest with own experience of common endemic disease or a plant pest in the species 1.3 Assess severity and extent of the problem in the species where signs indicate an unusual disease or a plant pest 1.4 Seek immediate advice from supervisors, professionals or appropriate authorities when signs indicate an unusual disease or a plant pest
2. Report signs of unusual disease or a plant pest	2.1 Report signs of unusual disease or a plant pest to appropriate authorities immediately 2.2 Implement biosecurity measures according to enterprise biosecurity plans and instructions from appropriate authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO302A Identify and report unusual disease or plant pest signs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHC BIO302 Identify and report unusual disease or plant pest signs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify unusual disease or pest signs
- assess the severity and extent of problem in the disease or pest species
- seek advice from supervisors or professionals
- notify appropriate authorities
- implement appropriate biosecurity measures.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- signs of common endemic diseases or plant pests in the species
- signs indicating unusual disease or plant pests
- methods for assessing severity and extent of problem
- biosecurity measures associated with enterprise biosecurity plans
- the process of reporting any unusual findings to appropriate authorities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSK204 Carry out regular livestock observation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out regular livestock observation.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with livestock	1.1 Discuss work to be undertaken with supervisor and seek clarification where necessary 1.2 Discuss tasks with other workers who may be affected to ensure continued smooth operation of the process 1.3 Select and check tools and equipment suitable for the work to be undertaken and maintain if necessary 1.4 Select, use and maintain suitable personal protective equipment in line with work health and safety policies 1.5 Identify hazards and report to supervisor
2. Carry out livestock checks	2.1 Check livestock for signs of illness, injuries and abnormalities and report to supervisor 2.2 Use safe handling techniques while handling livestock 2.3 Carry out all husbandry and handling activities in line with enterprise animal welfare policies
3. Deal with livestock emergencies	3.1 Follow enterprise biosecurity policies where required 3.2 Recognise common signs of livestock injury or life threatening conditions and report to supervisor 3.3 Use basic emergency and livestock first aid procedures until professional help arrives 3.4 Report serious cuts and abrasions to livestock to the supervisor or veterinarian
4. Provide veterinary procedure support	4.1 Treat cuts, abrasions and bruises under instruction from the veterinarian or supervisor 4.2 Examine animals for signs of distress, injury, illness and abnormal behaviours after completing procedures and report to supervisor 4.3 Apply appropriate treatment as instructed by a supervisor or veterinarian

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK204A Carry out regular livestock observation

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK204 Carry out regular livestock observation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe operating procedures
- check livestock regularly
- handle livestock safely and humanely
- identify signs of ill health, injury and abnormality
- identify symptoms of ill health or injury
- deal efficiently and calmly with livestock emergencies
- complete basic livestock first aid procedures
- record and report serious issues or injuries.
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- range of ailments that may occur or affect livestock
- application of a range of basic treatments under veterinary supervision
- behaviour of the relevant species
- environmental controls and codes of practice applicable to the enterprise
- organisations livestock production and management plans
- relevant work health and safety legislative requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK205 Handle livestock using basic techniques

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely move, draft and control livestock using basic methods and procedures in an agricultural enterprise.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to handle livestock	1.1 Confirm work plan with supervisor 1.2 Identify, prepare and maintain livestock handling areas, gates and access routes 1.3 Select, check and prepare handling equipment for use and report missing equipment, malfunctions and need for maintenance as required 1.4 Recognise hazards in the workplace and report safety concerns 1.5 Select appropriate personal protective equipment and ensure correct fit
2. Handle livestock	2.1 Locate and identify livestock for handling 2.2 Observe and anticipate behavioural characteristics of livestock and use appropriate handling methods 2.3 Move livestock to designated handling areas and carry out procedures to control, draft and sort livestock with due care and in line with enterprise animal welfare policies 2.4 Carry out restraint procedures safely and with minimum stress and discomfort to livestock and in line with enterprise animal welfare policies 2.5 Monitor and anticipate continually livestock behaviour during moving and drafting processes to ensure wellbeing of livestock and safety of handlers 2.6 Conduct or tally livestock numbers or livestock count of groups/mobs and record or report as required 2.7 Recognise and report environmental implications associated with livestock production
3. Complete handling procedure	3.1 Confirm livestock dispersal plan with supervisor as required 3.2 Prepare gates and access routes for livestock departure 3.3 Move livestock to designated areas safely and with minimal stress 3.4 Ensure adequate clean water and feed at destination as required 3.5 Clean and maintain handling areas and equipment and store surplus materials 3.6 Report handling area maintenance requirements and equipment faults or malfunctions 3.7 Dispose of livestock residues and waste in accordance with environmental practices 3.8 Record and report relevant information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK205 Handle livestock using basic techniques

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare handling areas, gates and access routes for livestock movement
- monitor and anticipate livestock behaviour
- recognise enterprise livestock identification systems
- identify and draft livestock during handling operations
- move and control livestock using low stress livestock handling techniques
- minimise undue stress and risk to livestock and handlers
- recognise livestock abnormalities
- assess, calculate and record livestock numbers
- control the environmental impacts associated with livestock production within the limitations of own responsibility
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production
- regulatory controls with regard to handling livestock on public roads where required
- common livestock breeds

- basic nutritional and welfare requirements
- range of common livestock abnormalities, illnesses and injuries and associated signs
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check facilities and equipment for sound working conditions	1.1 Identify facilities and equipment required for the task and confirm with supervisor 1.2 Prepare loading facilities and equipment according to enterprise procedures 1.3 Check the work site, facilities and equipment for hazards and operation, control risks where appropriate and report safety concerns to supervisor 1.4 Carry out or organise repairs and maintenance of facilities and equipment required for loading or unloading livestock where necessary 1.5 Select appropriate personal protective equipment and ensure correct fit
2. Load animals	2.1 Identify, muster, yard or secure animals using safe working methods in line with enterprise animal welfare policies 2.2 Inspect animals for signs of ill health, injury or abnormal behaviours and separate animals unsuitable for transport 2.3 Prepare animals for transport 2.4 Record identification details of animals and fit individual animal tags as required 2.5 Count, record and load livestock safely and with minimal stress to ensure no injury to co-workers or animals in line with enterprise animal welfare policies 2.6 Complete vendor declarations and any other required documentation
3. Unload animals	3.1 Unload livestock in a safe manner to ensure no injury to other workers or animals 3.2 Record numbers and individual identification details of livestock 3.3 Inspect livestock for signs of ill health, injury or abnormal behaviours and report to appropriate persons 3.4 Check documentation and reach agreement on condition of animals with the receiving or dispatching party where required
4. Perform appropriate animal health procedure	4.1 Sort stock, and separate distressed, injured or ill livestock if required 4.2 Undertake animal health treatments off truck if required 4.3 Feed and water animals as instructed 4.4 Apply enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK207 Load and unload livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check loading facilities for correct operation and hazards to animals and workers
- sort livestock as required and separate unsuitable animals for transport
- load and unload livestock
- anticipate animal behaviour
- provide and maintain appropriate animal feed and water
- complete relevant documentation and affix individual tags if required
- monitor animal health and welfare
- read and interpret mustering, work and loading plans and maps
- calculate animal numbers to assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity policies as required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal handling and movement methods and techniques
- basic animal health and nutritional requirements
- animal herding and flocking behaviour
- techniques and uses of working dogs where appropriate
- types of animal health treatments that may be required
- common diseases and injuries in livestock
- common abnormal livestock behaviours

- causes of livestock being unfit for transport
- legislative documentation requirements for livestock transport
- relevant work health and safety, biosecurity and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK212A Ride horses to carry out stock work

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of performing basic horsemanship activities such as riding a horse for the first time and preparing a horse for work using basic methods and procedures and defines the standard required to: prepare horses for work; select and maintain equipment for riding; monitor and anticipate horse behaviour when riding; recognise and report hazards or movement problems for remedial action; care for saddlery and equipment.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to working under routine supervision within organisation guidelines.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare horses for work	<p>1.1. Occupational Health and Safety (OHS) hazards are continually identified when working with horses, risks are assessed and suitable controls implemented.</p> <p>1.2. Equipment suitable for the work to be undertaken is selected, checked, and maintained if necessary.</p> <p>1.3. Suitable personal protective equipment is selected, used and maintained.</p> <p>1.4. Feeds are mixed and offered in the quality and quantities instructed by the manager.</p> <p>1.5. Horses are groomed before and after work to ensure their coat condition and health are maintained.</p> <p>1.6. Hoof care and cleaning is completed before working the horses, according to the organisations procedures.</p> <p>1.7. Vices of horses are identified and corrective action is taken to maintain control of the horses.</p> <p>1.8. Horse education is carried out in association with stock working routines.</p>
2. Ride horses	<p>2.1. Stock horses suitable for the task and rider ability are identified and selected.</p> <p>2.2. Unhealthy or unsound horses are identified and reported to foreman or manager.</p> <p>2.3. Selected horses are approached, caught and restrained as instructed.</p> <p>2.4. Gear to manage and control the horse for the required work is selected and fitted.</p> <p>2.5. OHS procedures are followed for working with and riding horses.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.6. Horses are handled and restrained safely and within the organisation's and industry guidelines for animal health and welfare.</p> <p>2.7. Livestock are checked, mustered and moved by horseback.</p> <p>2.8. Educated horses are controlled and worked as an integral part of stock husbandry routines.</p> <p>2.9. Horses are handled safely and within the organisations and industry guidelines for animal health and welfare.</p>
3. Care for saddlery and equipment	<p>3.1. Basic working gear to suit the individual horse is selected and fitted.</p> <p>3.2. Working gear is cleaned and checked as a part of regular daily routines.</p> <p>3.3. Working gear is maintained or repaired as required to ensure safe horse working conditions.</p> <p>3.4. Working gear and saddlery is stored after use in line with organisation policy.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and implement safe operating procedures
- horse handling skills
- ride horses
- complete basic hoof care procedures
- groom horses
- care for saddlery and equipment
- measuring quantities required for feed
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures

REQUIRED SKILLS AND KNOWLEDGE

- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

Required knowledge

- horses and horse husbandry
- horse riding and handling safety when riding
- horse health, behaviour and psychology
- anatomy and physiology of the horse
- care and maintenance of hooves and the lower limbs
- environmental controls and codes of practice applicable to the organisation
- the organisation's livestock production and management plans
- sound management practices and processes to minimise noise, odours and debris from the livestock operations
- relevant legislation and regulations relating to waste and environment management, animal health and welfare
- relevant OHS legislation, regulations and codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare horses for work
- select and maintain equipment for riding
- monitor and anticipate horse behaviour when riding
- recognise and report hazards or movement problems for remedial action
- care for saddlery and equipment.

Context of and specific resources for

Competency requires the application of work practices

EVIDENCE GUIDE

assessment	under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.
-------------------	--

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Horses may include:	<ul style="list-style-type: none"> those suitable for beginning riders and novice handlers, but can be of any type and breed used for riding work.

AHCLSK320 Coordinate and monitor livestock transport

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely and efficiently transport livestock to a destination within specified timeframes.

Animal welfare and low stress stock handling principles and practices are to be observed at all times.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for the transport of livestock	1.1 Check the transport directions and calculate load 1.2 Determine transport requirements and engage a suitable carrier 1.3 Identify required equipment and resources and move livestock to loading facility 1.4 Assemble and prepare livestock for transport 1.5 Identify existing and potential hazards and report to supervisor
2. Load livestock	2.1 Observe industry and enterprise work health and safety policies and procedures 2.2 Ensure documentation is signed by the relevant person and check that the required animal identification is in place 2.3 Obtain relevant permits and comply with movement restrictions where required 2.4 Record animal details and identification as required using technology where applicable 2.5 Load and secure prepared livestock in accordance with industry and enterprise animal welfare and work health and safety procedures and requirements
3. Monitor transport and unload livestock	3.1 Communicate with the carrier to ensure livestock are transported with minimal stress and discomfort according to animal welfare requirements 3.2 Ensure livestock are checked regularly throughout the journey and unloaded for feeding and watering appropriately 3.3 Unload livestock using appropriate equipment and facilities, such as National Livestock Identification System (NLIS) readers where applicable 3.4 Monitor livestock condition and welfare post transport and provide feed and water appropriately
4. Complete transportation operations	4.1 Clean, maintain and secure vehicle, equipment and facilities appropriately 4.2 Complete required records according to legislative and enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK320A Coordinate and monitor livestock transport

Assessment Requirements for AHCLSK320 Coordinate and monitor livestock transport

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- interpret transport plan requirements
- coordinate the transport of livestock
- safely, load livestock while maintaining load within specifications
- distribute animals on transport to prevent overcrowding and minimise risk of injury
- obtain relevant permits and comply with movement restrictions
- ensure documentation and livestock identification is in place
- ensure appropriate recording including use of technology where applicable
- safely unload livestock
- review health and condition of livestock after transit
- demonstrate safe and humane handling of livestock according to animal welfare codes of practice
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and legislative requirements for the transport of livestock
- model codes of practice for the welfare of animals Land transport (various species)

- animal welfare, biosecurity and work health and safety legislative requirements
- environmental codes of practice with regard to vehicle operation and livestock transport
- market requirements in relation to the quality and condition of livestock
- process of sourcing and costing transportation alternatives
- livestock transport recording and documentation requirements
- enterprise policies with regard to the use of vehicles and equipment
- relevant documentation requirements and procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM202 Operate tractors

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate tractors with and without attached equipment.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all work health and safety aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare tractor for operation	1.1 Confirm the activity to be undertaken with supervisor, including identifying potential hazards and implementation of safe working procedures 1.2 Read the relevant machinery operation manual and observe manufacturer's instructions 1.3 Use and maintain personal protective equipment 1.4 Select and attach equipment required to carry out work 1.5 Conduct safety pre operational checks on both tractor and attached equipment and report faults or malfunctions for repair 1.6 Attach equipment and loads that do not exceed the weight limitations or change the dynamic stability of the tractor
2. Operate tractor	2.1 Recognise and control risks to self and others 2.2 Steer, manoeuvre and position tractor in a smooth and controlled manner 2.3 Operate tractor according to low risk operating procedures in a controlled manner and monitored for performance and efficiency 2.4 Undertake work in accordance with the agreed plan and within the operating capacities and manufacturer's specifications 2.5 Recognise and minimise environmental impacts associated with tractor operation
3. Complete and check tractor operation	3.1 Conduct shut-down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, decontaminate, secure and store tractor and attached equipment 3.5 Apply enterprise biosecurity policies where required 3.6 Maintain tractor and equipment use records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

An induction process for the use of the tractor must be followed, including reading and observing the manufacturer's manual when using a different tractor or on a different property.

Assessments must be conducted on candidates performing a range of activities, using a range of attachments and implements, in a range of surface and terrain conditions.

Unit Mapping Information

This unit is equivalent to AHCMOM202A Operate tractors.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCMOM202 Operate tractors

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating a tractor with a range of attached equipment and implements, in a range of surface and terrain conditions.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- carry out pre-operational checks and maintenance including tagging defects
- set and secure attachments according to manufacturer's directions
- steer, manoeuvre and position the tractor in a safe and controlled manner
- utilise the various components and controls of the tractor
- secure, adjust and calibrate attachments and implements for operation
- operate tractors in a range of surface and terrain conditions, with and without attachments and implements
- carry out shut down procedures
- minimise environmental impacts associated with tractor operation
- follow enterprise work health and safety policies
- follow enterprise biosecurity protocols where required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- tractor components, controls and features and operational functions
- tractor operators manuals
- tractor steering systems and features
- features and operational functions and procedures of attachments and implements

- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities
- effects of various surface and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- relevant legislation with regard to machinery operation and licensing requirements
- environmental Codes of Practice with regard to machinery operation
- enterprise work health and safety requirements to operate a tractor safely
- enterprise biosecurity procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessment should take place in a range of surface and terrain conditions, including adverse conditions.

AHCMOM212 Operate quad bikes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate and maintain quad bikes as well as load and unload them onto trailers or other vehicles used for their transport.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and operator manuals and sustainability practices.

Working with quad bikes is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all work health and safety aspects of operating quad bikes.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a quad bike for operation	1.1 Confirm the activity to be undertaken with supervisor, including potential hazards and implementation of safe working procedures 1.2 Select, fit correctly, use and maintain personal protective equipment including helmets 1.3 Conduct safety pre operational checks on quad bike and report faults or malfunctions for repair 1.4 Identify safe work areas and applications (loads and attachments) from workplace safety plan and operators manual 1.5 Unload quad bike safely from the trailer or transportation device
2. Operate a quad bike	2.1 Recognise and control risks to self and others 2.2 Steer, manoeuvre, position and stop quad bike in a smooth and controlled manner 2.3 Apply hand-eye coordination and transfer of body weight appropriately (active riding) to maintain bike stability 2.4 Identify and avoid riding surfaces, terrains and slopes that are dangerous to safe operation 2.5 Identify environmental implications associated with machinery operation and minimise impact 2.6 Identify and account for biosecurity implications associated with machinery operation
3. Complete and check quad bike operation	3.1 Conduct shut-down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, secure and store quad bike 3.5 Follow wash-down procedures in line with biosecurity guidelines where required 3.6 Maintain quad bike use records for servicing purposes 3.7 Load and secure quad bike safely

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

No passengers, no riders under 16 years of age, no towing, helmets must be worn at all times.

Candidates must NOT be under the influence of any alcohol or drugs. Candidates must NOT be taking any medication (prescribed or otherwise) that may impair judgement.

Unit Mapping Information

This unit is equivalent to AHCMOM212A Operate quad bikes.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCMOM212 Operate quad bikes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating a quad bike using safe work procedures.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and risks associated with quad bike use
- identify safe work areas
- select, fit correctly, use and maintain personal protective equipment including helmets
- operate quad bikes in a range of riding surface conditions and terrain conditions
- steer, manoeuvre, position and stop the quad bike in a smooth and controlled manner
- apply hand-eye coordination and correctly transfer body weight (active riding) to maintain bike stability including riding on uneven or steep terrain
- follow enterprise work health and safety procedures
- unload and load quad bike safely
- follow wash-down procedures in line with biosecurity guidelines

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hazards and risks associated with quad bike use
- components, controls and features of quad bikes and their functions
- a range of quad bikes and functional applications
- operating principles and operating methods of quad bikes
- manufacturer's instructions, including but not exclusive to the operating manual
- load limits and the principles of weight distribution with regard to load shifting and bike movement including riding on uneven or steep terrain
- loading and unloading safely from a trailer or other transportation device

- effects of different riding surfaces and terrain conditions on the operation of quad bikes

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessment must be conducted in a range of riding surface conditions and in a range of terrains appropriate for the safe use of quad bikes.

Assessors must satisfy current standards for RTOs.

AMPA2000 Prepare animals for slaughter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manage and handle animals in lairage prior to slaughter.

This unit is applicable to stock handlers in a slaughtering establishment.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPA2000 Prepare animals for slaughter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manage and handle animals in lairage prior to slaughter.

The candidate must:

- plan and maintain the flow and order of animals to meet production requirements
- ensure mob or lot separation and comply with regulatory or importing country's requirements
- utilise stock identification systems accurately and comply with regulatory requirements related to the identification of stock
- follow workplace recordkeeping procedures for receipt of animals
- keep accurate stock receipt records
- move stock around pens and lairage in accordance with workplace requirements
- comply with animal welfare requirements for animals kept in lairage
- deal with sick and injured stock in accordance with workplace and regulatory requirements
- check condition of yards and report maintenance requirements
- work cooperatively with other stock handlers
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- fulfil workplace health and safety requirements for handling stock in lairage

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace Standard Operating Procedures (SOPs) and work instructions for animal handling
- animal welfare requirements
- regulatory and workplace requirements

Assessment Conditions

Competency must be demonstrated when meeting the demands of moving stock to supply normal production requirements. Assessment must be undertaken in an operating abattoir.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2001 Feed race

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must move animals along a race and into the slaughter floor.

The candidate must:

- feed the race to maintain production requirements
- feed the race without causing undue stress to the animals
- maintain segregation according to workplace requirements
- maintain the flow of animals to meet production requirements
- use goads in accordance with work instructions, workplace health and safety and animal welfare requirements
- restrain the animal to workplace and workplace health and safety requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- cooperate and communicate with other stock handlers to move stock

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- animal welfare requirements
- correct use of goads
- regulatory requirements for segregation
- required segregation of animals
- Standard Operating Procedures (SOPs) and work instructions relevant to feeding the race
- workplace requirements related to feeding the race and the reasons for these requirements
- characteristics of breeds, sex and age of animals as they relate to work duties

Assessment Conditions

Competency must be demonstrated while complying with workplace and regulatory requirements and at normal production speed at the plant. Assessment must be conducted at an operating abattoir.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2003 Perform emergency kill

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to kill sick or injured stock in lairage under the direction of an authorised Department of Agriculture officer or other person with appropriate company or regulatory authority.

This unit is applicable to stock handlers who are responsible for killing sick and injured livestock at abattoirs while they are still in pens or holding areas.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

Where firearms are used to perform emergency kills the unit must only be undertaken by individuals already holding a current firearms licence.

No other occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Assessment Requirements for AMPA2003 Perform emergency kill

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must kill sick or injured stock in lairage under the direction of an authorised Department of Agriculture officer or other person with appropriate company or regulatory authority.

The candidate must:

- identify animals requiring emergency kill
- comply with the regulatory and company requirements for the isolation of the identified animal, the performance of the emergency kill and disposal of the carcass
- perform emergency kills safely and humanely in accordance within company and regulatory requirements
- make arrangements for the disposal of the carcass according to workplace and regulatory requirements
- follow the regulatory and company requirements for the authorisation and documentation of emergency kills
- apply relevant communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- complete relevant documentation

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the regulatory and company requirements for the authorisation and documentation of emergency kills
- the relevant animal welfare, workplace and regulatory requirements covering emergency kills
- regulatory and company requirements for the isolation of the identified animal, the performance of the emergency kill and disposal of the carcass

Assessment Conditions

Emergency kills must be demonstrated as a normal part of the duties of the individual handling stock.

This unit must be assessed at an operating abattoir.

As a minimum the following three forms of assessment must be used:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee report or verified work log or diary

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2004 Assess, purchase and transport calves

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must humanely, hygienically and safely assess, purchase and transport young (bobby) calves.

The candidate must:

- identify calves fit for transport and processing
- communicate to explain reasons for refusing selection of calves
- load, transport and unload bobby calves humanely, safely and hygienically
- accurately complete relevant paperwork
- plan pick up runs to meet regulatory and company requirements for time off feed
- identify and observe workplace health and safety requirements when handling calves
- read and interpret relevant workplace documents
- share information
- manage time and priorities

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- relevant company and regulatory requirements
- relevant calf behaviour
- animal welfare issues associated with handling and transporting young calves
- relevant paperwork for purchasing
- record keeping requirements
- NLIS requirements

Assessment Conditions

Competencies for handling, loading, transport and unloading of calves must be demonstrated using live animals. Assessment must be conducted under normal operating conditions.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2005 Unload livestock

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to unload animals from transport. It requires a working knowledge of animal handling techniques and associated facilities and equipment. The work is likely to be carried out under routine supervision within enterprise guidelines.

This unit is applicable to those responsible for unloading stock from transport at abattoirs.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations, in particular legislative requirements with regard to animal welfare.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check facilities and equipment	1.1 Identify required facilities and equipment 1.2 Check the work site, facilities and equipment for hazards 1.3 Carry out or report (as appropriate) repairs and maintenance of facilities and equipment required for the unloading of livestock 1.4 Use and store Personal Protective Equipment (PPE) and clothing
2. Unload animals	2.1 Unload animals in a safe manner to comply with animal welfare, company and regulatory requirements 2.2 Identify, count and record livestock according to enterprise procedures 2.3 Maintain workplace records according to workplace and regulatory requirements 2.4 Complete documentation according to regulatory and transporter requirements 2.5 Reach agreement on condition of animals with the transporter
3. Perform appropriate animal health procedures	3.1 Sort stock, if required, with sick or injured stock segregated according to workplace and regulatory requirements 3.2 Perform animal health treatments off truck as instructed 3.3 Feed and water animals to enterprise requirements

Assessment Requirements for AMPA2005 Unload livestock

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must unload animals from transport demonstrating a working knowledge of animal handling techniques and associated facilities and equipment.

The candidate must:

- safely and humanely unload animals in a calm and controlled manner
- anticipate animal behaviour
- provide and maintain appropriate animal health and nutritional requirements
- prepare equipment and working dogs (when used) for handling animals
- monitor animal behaviour and recognise irregularities
- provide due care and handle animals safely and humanely
- use goads (where applicable), in accordance with work instructions, workplace health and safety, and animal welfare requirements
- calculate animal numbers and assess and calculate feed and water requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- cooperate and communicate with others to facilitate unloading stock
- comply with relevant workplace health and safety and animal welfare legislative requirements
- work effectively with others to facilitate unloading of stock

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- animal basic health and nutritional requirements
- animal herding and flocking behaviour
- working dogs' uses and handling techniques (where appropriate)
- animal handling and movement methods and techniques
- animal welfare standards
- Standard Operation Procedures (SOPs) and work instruction relevant to unloading stock
- relevant workplace health and safety and animal welfare legislative requirements

Assessment Conditions

Evidence must also be demonstrated in the employment of safe workplace and positive environmental practices.

Assessment must occur in the workplace under normal production conditions.

As a minimum the following three forms of assessment must be used:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third- party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2006 Apply animal welfare and handling requirements

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must identify animal welfare issues and comply with the necessary requirements when handling animals.

The candidate must:

- identify sick or injured animals
- identify out-of-specification animals
- accurately complete records of livestock movement
- communicate effectively and appropriately with fellow workers (e.g. to exchange information with stockperson)
- identify signs and causes of stress in animals
- comply with workplace procedures and requirements for handling livestock and minimising livestock stress
- maintain flow of livestock with minimal livestock stress
- identify the relevant sections of the animal welfare standard and code
- identify relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace procedures for receipt and/or dispatch of animals
- workplace requirements for maintaining flow and order of animals
- impact of stress and injury on the animal
- impact of stress and injury on product quality, including carcasses, hides and skins
- stock identification systems including National Livestock Identification System (NLIS)
- lot identification of stock and its importance with regard to trace back
- workplace health and safety hazards of handling stock
- feed and water requirements where relevant
- the relevant sections of the animal welfare standard and code

- relevant work instructions and Standard Operating Procedures (SOPs) associated with tasks undertaken
- customer and community expectations
- workplace and regulatory requirements

Assessment Conditions

Competency must be demonstrated utilising the most current legislation and codes.

Assessment must involve some practical demonstration of competency in the relevant workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2007 Identify animals using electronic systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must identify animals using electronic systems.

The candidate must:

- complete start-up procedures for electronic readers and recordings
- identify the steps in animal identification
- scan stock electronically in yards and pens (where applicable)
- operate the identification and recording system according to work instructions
- identify the sources of errors in identification and/or malfunction of the system
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, and regulatory requirements
- undertake routine maintenance, cleaning and monitoring according to workplace requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the consequences of incorrect identification of animals
- the National Livestock Identification System (NLIS)
- the reasons for animal identification
- relevant workplace health and safety, and regulatory requirements
- animal identification requirements

Assessment Conditions

Competency must be demonstrated at normal rates of production.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2008 Shackle animal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to shackle and hang an animal on a processing rail after stunning.

This unit is applicable to shackling any species either by the front or hind legs either before or after sticking.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Shackle animal	1.1 Shackle animal in accordance with workplace and workplace health and safety requirements 1.2 Check animal for consciousness (where part of the work instruction) 1.3 Hang animal at a height and rate suitable for next operator 1.4 Where applicable, use a hoist according to workplace requirements 1.5 Check equipment for faults in accordance with work instructions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2012C Shackle animal.

Assessment Requirements for AMPA2008 Shackle animal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must shackle and hang an animal on a processing rail after stunning.

The candidate must:

- check all equipment for faults to allow safe operation of shackling equipment
- identify defects in shackling gear and equipment
- shackle an animal according to workplace and workplace health and safety requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- take corrective action immediately if animals are ineffectively stunned
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements related to the shackling of animals
- the consequences of incorrect shackling of animals
- relevant regulatory requirements
- work instructions related to shackling animals

Assessment Conditions

This unit must be assessed on a working chain and at normal production speed.

The candidate must be competent at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2009 Operate electrical stimulator

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate manual carcase stimulation equipment or monitor automatic carcase stimulation equipment.

The unit is applicable to slaughter floor operatives responsible for the operation or monitoring of manual or automatic carcase stimulators.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Conduct pre-operational check of stimulation equipment	1.1 Regularly check electrical stimulation unit to ensure it is in good working order 1.2 Maintain equipment by cleaning electrodes (where applicable) 1.3 Replace circuit boards or cards if a fault develops (where this forms part of operator's work instructions)
2. Follow effective electrical stimulation procedures	2.1 Apply electrical stimulation within the required time after stunning 2.2 Ensure constant contact with electrodes during stimulation 2.3 Identify and meet workplace health and safety requirements 2.4 Run stimulation to its full time in accordance with the workplace or manufacturer's specifications for the type of stimulation equipment 2.5 When using the nasal or rail methods, maintain the carcass contact with the rubbing bar during electrical stimulation to ensure stimulation is effective 2.6 Prevent loss of voltage by keeping carcasses separated during stimulation 2.7 Check and maintain peak voltage levels to ensure effective stimulation 2.8 Stimulate carcass in accordance with workplace requirements
3. Check for ineffective stimulation	3.1 Check electrical stimulation unit regularly to ensure that current is maintained to specified level, stimulation is applied within specified time limits after stunning, and duration of stimulation meets workplace requirements 3.2 Check electrodes to ensure they are attached during stimulation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2013C Operate electrical stimulator.

Links

Assessment Requirements for AMPA2009 Operate electrical stimulator

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must consistently operate an electrical stimulator in the workplace during production.

The candidate must:

- conduct pre-operational checks
- conduct effective electrical stimulation of carcasses according to workplace requirements
- stimulate carcasses within the correct time after stunning
- ensure correct voltage levels are used as well as minimum and maximum stimulation times
- check for ineffective stimulation
- keep stimulation units well maintained and in good working order
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- comply with the workplace health and safety requirements for operating electrical stimulation equipment
- apply relevant regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the basic operations of the stimulator
- the benefits of effective stimulation
- the purpose of electrically stimulating a carcass
- events which would indicate that the stimulation is ineffective
- the relevant work instruction
- relevant regulatory and workplace requirements
- workplace health and safety requirements

Assessment Conditions

Competency must be demonstrated in the workplace at normal chain speed.

Assessment must be conducted in the workplace under normal production conditions.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2010 Remove head

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to remove the head manually and with the aid of mechanical cutters. This unit may also be used to cover the competencies required to monitor and perform routine maintenance on automated head removing machinery.

This unit is applicable to workers in a slaughter floor, knackery or wild game processing establishments where heads are removed mechanically or manually.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Remove the head	1.1. Sever head at the base of the jaw (i.e. the atlanto-occipital joint) 1.2 Remove head in accordance with work instructions including, where relevant, compliance with Specified Risk Material (SRM) requirements 1.3 Remove head according to workplace health and safety requirements 1.4 Forward head for further processing, or disposed of, according to workplace requirements 1.5 Prepare, operate and maintain machinery for removal of head in accordance with work instructions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2014C Remove head.

Assessment Requirements for AMPA2010 Remove head

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove the head either manually and with the aid of mechanical cutters.

The candidate must:

- use correct cutting lines for removing head
- remove head in accordance with work instructions
- use safe and hygienic practices to remove head
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements
- comply with workplace health and safety requirements related to removing head

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- basic anatomy of muscles, bones and joints of head for relevant species
- cutting lines for removing head
- how and when problems with equipment are reported
- the work instruction for removing heads
- relevant regulatory requirements
- potential contamination and cross-contamination associated with removing head
- issues associated with SRM material

Assessment Conditions

Competency must be demonstrated at normal chain speed.

Assessment of skills must take place during production time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2011 Cut hocks

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must cut off front legs, back legs or dew claws manually and with the aid of mechanical cutters.

The candidate must:

- demonstrate safe and hygienic use of tools and equipment
- dispose of off-cuts in accordance with work instructions
- recognise and report equipment difficulties
- keep work area neat and tidy
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- potential contamination and cross-contamination
- relevant work instructions
- relevant regulatory requirements
- the basic anatomy of legs from relevant joints

Assessment Conditions

Assessment must be conducted in the workplace under normal production conditions.

Competency must be demonstrated at the normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2013 Complete changeover operation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must re-position carcasses on a processing chain.

The candidate must:

- complete changeover in accordance with work instructions
- complete changeover operation to workplace health and safety requirements
- treat iron work such as gambrels, spreaders and rollers in accordance with workplace requirements
- identify relevant defects in iron work (e.g. spreader, rollers), if used
- use correct manual handling techniques for changeover operation
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements including manual handling procedures associated with changeover
- the consequences of incorrectly re-positioning the carcase on the chain
- work instructions for the changeover operation
- relevant regulatory requirements
- appropriate reporting procedures for defects

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2023C Remove brisket wool.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5e2e56b7-698f-4822-84bb-25adbb8443a7>

Assessment Requirements for AMPA2017 Remove brisket wool

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must clear the brisket area mechanically and manually.

The candidate must:

- clear the brisket area in accordance with work instructions, hygiene and sanitation and workplace health and safety requirements
- remove pelt cleanly without damage to the carcass
- remove brisket piece without contamination of carcass
- maintain brisket rollers (where used)
- dispose of waste in accordance with workplace requirements
- keep work area clean and tidy
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the maintenance requirements for brisket rollers
- the workplace health and safety hazards associated with the brisket roller
- the purpose of the brisket roller
- the results of contamination and workplace requirements for reporting contamination
- the workplace requirements associated with clearing the brisket
- relevant regulatory requirements

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2018 Prepare hide or pelt for removal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to complete the opening cuts on the points of a hide or pelt prior to removal. These include such cuts as marking the muzzle, marking the hocks and the fluffy anus cut on sheep.

This unit is applicable to workers on a slaughter floor or in a knackery or wild game meat processing establishment.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Explain opening cuts	1.1 Identify steps involved in opening hide or pelt in accordance with workplace requirements 1.2 Identify and manage sources of contamination and cross-contamination according to workplace requirements 1.3 Identify and explain quality implications of defective opening cuts for product and hide
2. Perform opening cuts	2.1 Perform opening cuts releasing the hide or pelt in accordance with workplace requirements 2.2 Perform opening cuts releasing the hide or pelt in accordance with hygiene and sanitation requirements 2.3 Perform opening cuts releasing the hide or pelt in accordance with workplace health and safety requirements 2.4 Free hide or pelt to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2024C Prepare hide/pelt for removal.

Links

Assessment Requirements for AMPA2018 Prepare hide or pelt for removal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must complete the opening cuts on the points of a hide or pelt prior to removal.

The candidate must:

- demonstrate the performance of opening cuts to release the hide or pelt in accordance with work instructions, hygiene and sanitation and workplace health and safety requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the quality implications for product and hide of defective opening cuts
- sources of contamination and cross-contamination
- the steps involved in opening hide or pelt in accordance with work instructions
- relevant regulatory requirements

Assessment Conditions

Assessment of skills needs to be conducted in the workplace.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2019 Bag tail

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must bag the tail to prevent contamination.

The candidate must:

- demonstrate bagging of tails and removal of brush
- demonstrate the capacity (at production speed) to maintain and monitor stocks of bags and ties, using estimation and calculation
- use a knife safely to remove tail brushes, where applicable
- follow work instructions for bagging tails
- apply relevant workplace health and safety and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the reason for bagging tails
- relevant workplace health and safety and regulatory requirements

Assessment Conditions

Assessment must be conducted on the slaughter floor.

Competency must be demonstrated at chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2020 Remove and record tag

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove, dispose of and record stock identification tags.

The candidate must:

- follow work instructions for the removal of tags
- record tags accurately
- apply relevant workplace health and safety requirements
- use communication skills as appropriate to the task

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the function and importance of tags
- the importance of maintaining correlation between carcass and tags
- the need for correct disposal of tags
- the regulations with regard to tags
- the relationship between tags and residue testing

Assessment Conditions

Assessment must be conducted in an operating abattoir.

Competency must be demonstrated at chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2021 Seal or drain urinary tract

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to seal or drain the urinary tract of a carcass during the dressing procedure on a slaughter floor.

This unit is applicable to workers on a slaughter floor required to either drain a urinary tract using a probe and vacuum pump or seal a pizzle using clips or a mechanical device. The mechanical device is usually a set of heated tongs or cutters.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Seal or drain urinary tract	1.1 Drain or seal urinary tract according to work instruction 1.2 Drain or seal urinary tract according to workplace health and safety requirements 1.3 Undertake start-up procedures for pumps or mechanical aids, if required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA2021 Seal or drain urinary tract

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must seal or drain the urinary tract of a carcase during the dressing procedure on a slaughter floor.

The candidate must:

- drain and/or seal urinary tract according to workplace requirements
- maintain a stock of consumables, where relevant, for sealing urinary tracts (pizzles)
- maintain equipment used in sealing and/or draining urinary tracts
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- relevant regulatory requirements
- hygiene and workplace health and safety issues associated with the task

Assessment Conditions

Competency must be assessed in the workplace under normal production conditions.

Competency must be demonstrated at the normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2028 Operate vacuum blood collection process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a vacuum blood collection system.

This unit is applicable to slaughter floor operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element.
1. Operate a vacuum blood collection system	1.1 Identify and follow start-up procedures 1.2 Operate vacuum recovery system and collect blood according to work instructions 1.3 Identify and comply with specific hygiene and sanitation requirements for blood collection 1.4 Identify and comply with specific workplace health and safety requirements for blood collection 1.5 Explain, identify and manage sources of contamination according to workplace requirements 1.6 Identify and meet regulatory requirements and customer specifications for blood collection
2. Clean, maintain and monitor a vacuum blood collection system	2.1 Undertake routine maintenance, cleaning and monitoring according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2034C Operate vacuum blood collection process.

Assessment Requirements for AMPA2028 Operate vacuum blood collection process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a vacuum blood collection system.

The candidate must:

- operate vacuum blood collection system in accordance with work instructions
- explain, identify and manage sources of contamination according to workplace requirements
- comply with workplace health and safety requirements
- apply relevant workplace and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- steps in blood collection
- uses and markets for blood collected
- consequences of contamination and resulting damage to blood
- requirements related to blood collection:
 - hygiene and sanitation
 - workplace health and safety QA
 - regulatory
 - customer specifications

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at chain speed.

As a minimum, the following here forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2029 Operate nose roller

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a nose roller or similar machine to mechanically skin a sheep head.

The candidate must:

- demonstrate the basic start-up operations and routine maintenance as prescribed in the work instructions
- operate the nose roller in accordance with work instructions
- operate the nose roller in accordance with workplace health and safety requirements
- clean and sanitise, and follow basic maintenance program for the nose roller in accordance with workplace requirements
- dispose of waste in accordance with workplace requirements
- keep work area clean and tidy
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements associated with nose roller
- basic operation of nose roller
- uses of head meat and offal
- work instruction for operating a nose roller
- relevant regulatory requirements
- sources of contamination of heads

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at chain speed.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2030 Operate pneumatic cutter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must maintain and operate a mechanical cutter or scissors.

The candidate must:

- operate cutter in accordance with workplace health and safety requirements
- operate pneumatic cutter to workplace requirements for one work station
- demonstrate procedures for disposal of off-cuts
- demonstrate maintenance and sterilisation of cutter
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- basic operating principles of pneumatic cutter
- workplace health and safety requirements
- issues associated with use of the cutter
- relevant regulatory requirements
- potential sources of contamination and cross-contamination

Assessment Conditions

Assessment must be conducted in the workplace under normal conditions.

Competency must be demonstrated at a work station using a cutter at normal chain speed. The pneumatic cutter must be operated for at least one workstation (e.g. cutting hocks, horns or trimming necks) at the speed of the chain.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2031 Operate circular saw

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate and maintain a circular saw to perform a task such as cutting horns.

The candidate must:

- operate the circular saw to workplace requirements at a work station
- demonstrate safe use of a circular saw in accordance with workplace health and safety requirements
- demonstrate maintenance and sterilisation of circular saw
- demonstrate procedures for disposal of off-cuts
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- operation of a circular saw
- maintenance and sterilisation processes for circular saw
- procedures for disposal of off-cuts
- possible sources of contamination to the product
- maintenance requirements for circular saw
- workplace health and safety issues associated with operating a circular saw
- work instruction for the task to be performed
- relevant regulatory requirements

Assessment Conditions

Assessment must be carried out in an operating meat processing plant.

Competency must be demonstrated at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2032 Prepare carcase and equipment for hide or pelt puller

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must secure hides and pelts to the puller, dispose of hides and pelts and store the belts and chains.

The candidate must:

- demonstrate the preparation of the carcase and equipment for the operation of removal of the hide and/or pelt
- store and maintain pelts and chains according to work instructions
- locate emergency switches
- keep work area neat and tidy
- follow work instructions
- perform duties in accordance with workplace health and safety requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- how hide and/or pelt puller works
- emergency switches procedures
- possible sources of contamination to carcase
- consequences of incorrect clearance of hide or pelt
- ways of minimising contamination hazards
- relevant regulatory requirements
- disposal arrangements for hides and pelts
- workplace health and safety hazards associated with working with and around the hide and/or pelt puller

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2035 Operate new technology or process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a new technology or process in a meat processing operation.

This unit will be utilised when new technology (not covered by other units) is introduced and structured training is delivered. Any associated training and/or assessment materials will need detailed customisation to address the requirements for each specific piece of technology.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for new equipment or process	1.1 Prepare new equipment or process for operation in accordance with work instructions and manufacturer's specifications
2. Operate new equipment or process	2.1 Operate equipment or undertake new process in accordance with work instructions 2.2 Operate equipment or undertake process in accordance with workplace health and safety requirements 2.3 Identify potential sources of contamination and cross-contamination and employ preventative measures
3. Clean and maintain equipment and/or work area	3.1 Monitor performance of equipment or new process and report faults either verbally or in writing in accordance with work instructions 3.2 Clean and maintain equipment and/or work area to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

- undertake pre-operational checks according to workplace requirements
- operate the rib puller in accordance with workplace health and safety requirements, Standard Operating Procedures (SOPs) and work instructions
- undertake routine maintenance according to workplace requirements
- clean rib puller in accordance with workplace requirements
- report equipment faults to supervisor either verbally or in writing in accordance with workplace requirements
- apply relevant regulatory requirements
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- cleaning and maintenance requirements of the rib puller
- work instructions for operating the rib puller
- relevant regulatory requirements
- potential sources of contamination and cross-contamination
- ways of minimising contamination

Assessment Conditions

Assessment must take place in an operating meat processing plant.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2040 Operate frenching machine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a frenching machine in a meat processing plant.

This unit is applicable to workers required to operate a frenching machine on, for example, racks of lamb.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element.
1. Operate frenching machinery	1.1 Perform start-up procedures 1.2 Select cuts for frenching according to workplace requirements 1.3 Operate frenching machine according to work instructions 1.4 Operate frenching machine according to workplace health and safety requirements 1.5 Monitor own work to ensure cuts are to workplace specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2047B Operate frenching machine.

Assessment Requirements for AMPA2040 Operate frenching machine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a frenching machine in a meat processing plant.

The candidate must:

- operate a frenching machine according to workplace requirements
- inspect product to ensure it meets specifications
- report equipment faults to supervisor either verbally or in writing in accordance with workplace requirements
- apply relevant regulatory requirements
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- relevant meat cut specifications
- relevant workplace health and safety requirements
- relevant work instructions
- relevant regulatory requirements

Assessment Conditions

Assessment must be conducted in an operating meat processing plant.

Competency must be demonstrated at the normal chain speed over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2042 Cure and corn product in a meat processing plant

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to cure and corn product in a meat processing plant.

This unit is applicable to workers in boning rooms who are required to operate corning equipment but who do not take responsibility for the whole process including preparing meat cuts, preparing ingredients and brines as well as the corning process. If the worker is responsible for all these duties then the unit *AMPX302 Cure and corn product* is applicable.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Process meat	1.1 Perform pre-operational checks according to workplace requirements 1.2 Cure or corn meat according to product specifications, health regulations and workplace requirements at a speed that is the same as production requirements 1.3 Monitor processing regularly 1.4 Make adjustments to processing as required to achieve product specifications
2. Store meat product	2.1 Store processed product according to product specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2049B Cure and corn in a meat processing plant.

Assessment Requirements for AMPA2042 Cure and corn product in a meat processing plant

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must cure and corn product in a meat processing plant.

The candidate must:

- activate processing equipment to assess its readiness for operational use
- perform running adjustments according to workplace requirements and manufacturer's specifications
- operate adjustment tools and equipment correctly
- report any equipment faults and adjustments required either verbally or in writing to supervisor, according to workplace procedures
- apply relevant workplace health and safety and regulatory requirements
- use mathematical applications relevant to the task
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- selection criteria for meat for curing or corning process
- the meat curing process
- the term 'osmosis' in relation to the curing process
- effects of curing on shelf life and taste of product
- purpose and effect of brine on meat
- purpose of correct water temperature and correct additive sequence
- purpose and use of processing equipment used in curing and corning products
- reasons for pickling to correct pump percentage and yield requirements
- safe and correct operation of processing equipment
- conditions under which equipment may need adjusting
- relevant workplace health and safety and regulatory requirements

- procedures for cleaning processing equipment

Assessment Conditions

Assessment must be conducted in an operating meat processing plant.

Competency must be demonstrated under typical production conditions and at the normal speed of production.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2049 Remove spinal cord

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove the spinal cord from carcasses after splitting.

The candidate must:

- identify spinal cord and dura mater to be removed
- remove spinal cord cleanly and safely according to workplace requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- QA specifications for spinal cord removal
- reasons for the removal of the spinal cord
- where relevant, SRM and Bovine spongiform encephalopathy (BSE)
- relevant work instructions and workplace health and safety requirements
- relevant regulatory requirements
- customer specifications

Assessment Conditions

Assessment has to be demonstrated in a meat processing plant.

Competency must be demonstrated at the normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2050 Operate jaw breaker

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a mechanical jaw breaker.

This unit is applicable to workers using a jaw breaker prior to boning a head.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Operate jaw breaking equipment	1.1 Operate jaw breaker according to the work instructions 1.2 Safely operate jaw breaker according to workplace health and safety requirements 1.3 Store heads according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2058B Operate jaw breaker.

Links

Assessment Requirements for AMPA2050 Operate jaw breaker

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a mechanical jaw breaker.

The candidate must:

- identify potential workplace health and safety hazards
- operate the equipment to break jaws according to all workplace requirements
- store heads correctly prior to boning
- apply relevant regulatory requirements
- use communication skills appropriate to the task

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- potential sources of contamination and cross-contamination
- methods of minimising contamination and cross-contamination
- workplace health and safety requirements for operating the equipment
- work instructions for operating a jaw breaker
- relevant regulatory requirements
- Personal Protective Equipment (PPE) requirements of this job

Assessment Conditions

Assessment must be conducted in an operating meat processing plant.

Competency must be demonstrated at normal production speeds.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2062 Operate semi-automatic tagging machine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate electronic equipment that generates carcass tags, records carcass grades and generates production reports.

The candidate must:

- generate carcass tags according to workplace requirements
- monitor operation of equipment and stocks of consumables
- recognise, select and record information accurately according to workplace requirements
- where applicable, generate reports of recorded information
- report equipment faults to supervisor
- apply relevant workplace health and safety requirements for tagging carcasses
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- regulatory requirements for tagging carcasses
- purpose of tagging information
- relevant workplace health and safety requirements for tagging carcasses
- types of tags used and information recorded

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used;

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2063 Measure fat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must measure fat for the purposes of carcase grading.

The candidate must:

- measure fat according to workplace requirements
- check and maintain equipment in accordance with work instructions
- observe relevant workplace health and safety requirements
- report equipment faults to supervisor
- read, record and report measurement information
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- purpose of fat measurements and regulatory requirements
- relevant workplace health and safety requirements
- sites for possible damage including hide stripper, air knife, bruising, excessive trim, wavy finish and soft siding, and appropriate actions to ensure incorrect measurements are not recorded
- possible causes of error in measurement such as contact plate not flat, blunt blade, bent blade, wrong site, dirty light diode and incorrect measuring action

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant.

Competency must be demonstrated while complying with a set standard for fat measurement such as AUS-MEAT.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2068 Inspect meat for defects

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must routinely inspect meat cuts for defects, contamination and out-of-specification product prior to packing or further processing.

The candidate must:

- trim product free of defects in accordance with workplace requirements (where laid down in the employee's work instructions)
- inspect cuts for defects to workplace requirements
- follow the dropped meat policy
- identify trim out-of-specification meat
- detect contamination including ingesta, excreta, rail dust, grease, bruising, bone chips and fibres
- deal with contaminated meat cuts promptly to ensure segregation from meat to be packaged or further processed
- communicate with trimmers and/or supervisors regarding defect problems as needed and accept feedback
- dispose of contaminated trimmings into inedible product tubs
- apply relevant regulatory requirements
- observe relevant workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- nature and types of contaminants
- results of allowing contaminated meat to be packaged or further processed
- results of allowing out-of-specification cuts to be packaged or further processed
- workplace requirements for reporting consistent or repeated contamination of cuts or cuts out-of-specification
- relevant regulatory requirements
- relevant workplace health and safety requirements

Assessment Conditions

Assessment must occur in a registered processing plant or establishment.

Competency must be demonstrated at normal speed of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2069 Assemble and prepare cartons

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to prepare cartons and liners in response to production requirements.

This unit is applicable to workers in boning rooms, offal rooms, smallgoods factories, pet food premises, food services operations and wholesale butchery premises.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPA2069 Assemble and prepare cartons

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must prepare cartons and liners in response to production requirements.

The candidate must:

- assemble cartons and place liners in accordance with work instructions and specifications
- maintain the flow of assembled cartons
- demonstrate the safe usage of any mechanical aids
- follow relevant importing country requirements
- report any shortages of consumables or get more consumables in accordance with work instructions
- perform any routine maintenance or monitoring of machines according to the work instructions
- maintain a safe, neat and clean work area
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- work instructions for assembling and preparing cartons
- importance of maintaining the integrity of packaging
- levels of consumables to be maintained
- relevant regulatory requirements
- relevant importing country requirements
- relevant workplace health and safety requirements for assembling and preparing cartons
- range and uses of packaging
- safe usage of any mechanical aids

Assessment Conditions

Assessment must occur in a registered processing plant or establishment.

Competency must be demonstrated at the normal speed of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2070 Identify cuts and specifications

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must accurately identify and select the meat cuts sliced and packed or retailed at a particular workplace.

The candidate must:

- sort products by specification
- demonstrate methods of accurately classifying product by measurement and describing products to specification
- identify out-of-specification meat cuts and take corrective action according to workplace requirements
- apply relevant workplace health and safety requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- methods of accurately classifying product by measurement and describing products to specification
- hygiene and sanitation requirements
- consequences of out-of-specification meat cuts being packed and despatched or sold to a customer
- relevant workplace health and safety requirements
- relevant regulatory requirements
- cut and trim specifications employed in the workplace

Assessment Conditions

Competency must be demonstrated for the full range of meat cuts at a premises.

Assessment documentation must be endorsed for species and cuts.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2071 Pack meat products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must pack meat products in accordance with regulatory, workplace and customer requirements.

The candidate must:

- demonstrate the inspection and selection of meat products prior to packaging
- select and blend meat cuts and trimmings to meet customer specifications (where appropriate)
- pack and arrange product to workplace, customer and regulatory requirements
- accurately weigh a variety of products
- inspect packaging for defects and take appropriate action
- comply with workplace health and safety requirements for packing including safe handling
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- how a variety of products may need to be arranged for packing
- relevant labelling requirements
- requirements for inspection and grading of meat prior to packaging and the action to be taken if meat is outside specifications
- packaging requirements for the range of meat products to be packaged
- workplace, customer and regulatory requirements related to packing products

Assessment Conditions

Assessment must be conducted in an operating meat processing plant.

Competency must be demonstrated at a rate of packing that meets workplace requirements over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- start-up and operating procedures for bag forming machinery
- relevant regulatory requirements
- hygiene requirements for forming bags
- workplace health and safety hazards associated with machinery operation
- different packaging specifications

Assessment Conditions

Assessment must be conducted in a meat processing plant.

Bag forming machinery must be operated to meet normal production requirements.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2080 Assess dentition

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to assess dentition and record the results.

This unit is applicable to meat workers on a slaughter floor.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element.
1. Expose all incisor teeth	1.1 Expose incisor teeth 1.2 Differentiate permanent incisors from milk teeth 1.3 Count the number of permanent incisors correctly 1.4 Assess dentition to workplace, regulatory and workplace health and safety requirements 1.5 Follow sterilisation techniques prior to, and during, the assessment of dentition
2. Record the dentition	2.1 Identify the number of permanent incisor teeth and accurately record or mark carcase in accordance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2091C Assess dentition.

Assessment Requirements for AMPA2080 Assess dentition

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must assess dentition and record the results.

The candidate must:

- work cleanly to assess dentition and to avoid the risks of contamination of the carcass
- identify and record the number of permanent incisor teeth according to work instructions
- apply numeracy skills relevant to relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- dentition as a measure of animal age
- anatomical aspects of dentition
- importance and value of accurate dentition assessment
- workplace requirements for recording dentition

Assessment Conditions

Assessment must occur in an operating abattoir under normal processing conditions.

Dentition assessment must be performed at a pace that is the same as the pace of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2081 Drop tongue

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove the tongue from the head of an animal in accordance with specifications.

The candidate must:

- use appropriate knife skills to remove tongue
- work cleanly to avoid the risks of contamination of the head meat
- use appropriate sterilisation techniques prior to, and during, the removal of tongue
- follow workplace health and safety requirements to remove tongue
- apply relevant workplace health and safety and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- relevant anatomy of tongue
- work instructions for dropping tongue
- customer specifications and workplace requirements for tongue
- relevant workplace health and safety and regulatory requirements
- possible sources of contamination and measures used to avoid it

Assessment Conditions

Assessment must be conducted on a slaughter floor.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2083 Bone head

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to remove recoverable meat from a head (including but not limited to cheek meat).

This unit is applicable to workers recovering head meat in excess of exterior cheek meat. This work usually (but not always) involves removing meat from the outside of the upper and lower jaws and inside the lower jaw, jaw sockets and atlanta bone area.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify steps in head dressing	1.1 Identify and explain steps in head dressing to workplace requirements and customer specifications 1.2 Identify sources of potential contamination 1.3 Identify types of head meat for recovery according to workplace requirements 1.4 Identify and explain specific hygiene and sanitation requirements for work instructions
2. Bone head	2.1 Clean and sterilise equipment to workplace requirements 2.2 Identify and follow workplace health and safety requirements 2.3 Bone head according to workplace requirements 2.4 Bone head to maximise yield

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2094C Bone head.

Assessment Requirements for AMPA2083 Bone head

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove recoverable meat from a head (including but not limited to cheek meat).

The candidate must:

- identify types of head meat for recovery according to workplace requirements
- follow steps in head dressing to workplace requirements and customer specifications
- follow specific hygiene and sanitation requirements
- clean and sterilise equipment to workplace requirements
- follow workplace health and safety requirements
- bone head according to workplace requirements
- bone head to maximise yield
- identify sources of potential contamination
- work cleanly to avoid the risks of contamination of the head meat
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- importance of maximising yield
- relevant regulatory requirements
- relevant anatomy of head
- sources of potential contamination and cross-contamination
- head meat to be boned

Assessment Conditions

Assessment of skills must occur in an operating meat processing plant.

Competency must be demonstrated under normal production conditions and at normal speed of production over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

- comply with hygiene and sanitation requirements
- demonstrate measures to minimise contamination
- identify defects in runners including disease, damage and contamination
- store runners according to workplace procedures and specifications
- dispose of runners not fit for consumption in the appropriate chute or bin
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene and sanitation requirements
- runner specifications and grading
- sources of contamination and cross-contamination
- relevant regulatory requirements

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2100 Overview of offal processing

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to develop an understanding of the processing of offal in abattoirs, the uses of offal and the hygiene, Quality Assurance (QA) and workplace health and safety requirements for offal processing areas.

This unit is applicable to workers employed in meat processing plants where offal is recovered, washed, trimmed and packed.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element
1. Identify the steps in offal processing in the plant	1.1 Identify types of offal processed, their uses and markets 1.2 Identify steps in processing, packing and storage of offal 1.3 Identify types of packaging 1.4 Identify chutes and bins used in the offal room 1.5 Identify storage locations and requirements
2. Identify production requirements	2.1 Identify and explain production requirements for offal 2.2 Identify regulatory requirements and customer specifications for offal 2.3 Identify and explain specific hygiene and sanitation requirements for offal processing areas 2.4 Identify and explain specific workplace health and safety requirements for offal processing areas 2.5 Identify types and sources of offal contamination

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Equivalent to MTMP2118B Overview of offal processing.

Assessment Requirements for AMPA2100 Overview of offal processing

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain processing of offal in abattoirs, the uses of offal and the hygiene, Quality Assurance (QA) and workplace health and safety requirements for offal processing areas.

The candidate must:

- identify types of offal processed at the plant
- identify and explain all the steps in offal processing in the plant
- identify and explain all the plant offal processing production requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- defects in offal and procedures for reporting defects
- importance of the storage procedures for offal
- nature and importance of customer trim specifications and grades
- uses of edible offal including for pharmaceuticals and human consumption

Assessment Conditions

Assessment must be conducted in an abattoir.

Competency must be demonstrated at the normal chain speed over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2108 Loadout meat product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must load meat products onto trucks and/or containers.

The candidate must:

- ensure that all points leading to the loadout area are open and relevant points are closed when handling carcasses on the rail
- loadout product to workplace, health and safety and regulatory requirements and customer specifications.
- use loading machinery and technology according to workplace and manufacturer's specifications
- check brands and correctly label product when part of loadout procedures
- correctly identify products
- accurately record temperatures
- accurately weigh product where part of loadout procedures
- identify and comply with regulatory requirements for loadout including security arrangements for containers and trucks
- identify causes of cross contamination of carcasses during manual handling
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety, regulatory, hygiene and sanitation requirements related to loadout of product
- purpose and nature of relevant documentation
- security requirements related to loadout
- impact of weather conditions at loadout from wild game depots e.g. rain (where applicable)

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant or game depot.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

The candidate must:

- measure and record temperature if part of workplace requirements
- move carcase according to workplace, health and safety, hygiene and sanitation, Quality Assurance (QA) and regulatory requirements
- store carcase product according to workplace, health and safety, hygiene and sanitation, QA and regulatory requirements
- explain workplace requirements related to storing carcase product
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- handling procedures for carcase product
- hygiene and sanitation requirements related to storing carcase product
- methods of product transfer
- workplace health and safety requirements to reduce potential risks
- potential workplace health and safety risks related to storing carcase product, transferring carcasses on a rail, and working in a cold environment
- regulatory requirements related to storing carcase product
- importance of storing product at the required ambient temperature

Assessment Conditions

Assessment must be conducted in a large-scale chilling or freezing facility.

Competency must be demonstrated under normal operating conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2110 Store carton product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to safely and hygienically store and refrigerate carton meat in chillers and freezers.

This unit is applicable to those working in chiller or freezer meat storage facilities at boning rooms, meat processing plants, wholesalers, wild game processing plants, food services operations, cold stores or smallgoods processing enterprises.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Store carton meat product	1.1 Transport, rack or palletise carton meat product in accordance with workplace and health and safety requirements 1.2 Identify carton meat product according to labelling 1.3 Store carton meat product in appropriate area in accordance with workplace requirements 1.4 Store carton meat product at required temperature 1.5 Check temperature (if part of work instructions) 1.6 Meet workplace health and safety requirements related to working in refrigerated areas

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2134C Store carton product

Assessment Requirements for AMPA2110 Store carton product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must safely and hygienically store and refrigerate carton meat in chillers and freezers.

The candidate must:

- identify types of product stored
- use correct handling techniques for storing carton product
- demonstrate methods of racking, palletising and transferring product in accordance with workplace, health and safety, hygiene and sanitation, and Quality Assurance (QA) requirements
- store carton product in accordance with workplace, health and safety, hygiene and sanitation, and QA requirements
- identify and apply relevant regulatory requirements
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements related to manual handling of carton meat products
- workplace health and safety requirements related to working in refrigerated areas
- importance of storing meat at required temperature
- meat storage requirements
- possible causes of contamination of carton meat
- specific workplace health and safety risks related to storage of carton product and working in a cold environment

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2111 Locate storage areas and product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to identify and nominate specific storage locations and the product stored in them.

This unit is applicable to workers in a registered meat processing premises such as a cold storage business, chilling and freezing areas of the abattoirs, food service operations, smallgoods factory, wholesale butchery, game meat processing establishment or pet food premises.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Locate storage area	1.1 Receive and apply information containing stock location to workplace requirements. 1.2 Follow and apply workplace signs, codes and labels to workplace standards and regulatory requirements.
2. Identify product	2.1 Correctly identify product in accordance with workplace documentation, signs, codes, labels and brands. 2.2 Assess information on product location either electronically or manually from company records. 2.3 Check product for quality in accordance with workplace quality standards.
3. Check product	3.1 Check product storage to ensure workplace requirements are met. 3.2 Pick, count, consolidate, replenish or adjust product to meet workplace, customer and regulatory requirements. 3.3 Identify routine problems with product storage area and take corrective action in accordance with workplace requirements.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2135C Locate storage areas and product

Assessment Requirements for AMPA2111 Locate storage areas and product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must identify and nominate specific storage locations and the product stored in them. The candidate must:

- identify any problems related to storage of products and take the corrective action detailed in work instruction
- locate storage areas for a variety of products
- identify products accurately
- apply relevant workplace health and safety requirements
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- purpose of product segregation
- relevant workplace health and safety requirements
- products stored and their storage requirements

Assessment Conditions

Assessment must occur in the workplace under normal operating conditions.

Competency must be demonstrated under normal utilisation of chiller or freezer facilities.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2112 Complete re-pack operation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must re-pack carton meat products after the carton is damaged.

The candidate must:

- identify carton defects
- identify cartons to be re-packed
- re-pack cartons in accordance with workplace requirements
- generate new labels for re-pack
- complete all necessary documentation correctly
- identify possible types and sources of contamination and cross-contamination and explain preventative measures
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- consequences of incorrect re-pack procedure
- documentation requirements for re-pack operations
- re-pack procedures

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2113 Bag carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must bag carcasses in a chiller.

The candidate must:

- observe workplace health and safety requirements for working in chillers
- maintain product segregation as required
- move carcasses around chillers and into freezers in accordance with workplace requirements
- use communication skills relevant to work instructions
- use workplace equipment and technology according to workplace requirements
- bag carcasses according to workplace and regulatory requirements
- apply work instruction for the bagging of carcasses
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- labelling requirements for different markets and customers
- potential sources of contamination and control methods to minimise contamination
- relevant regulatory requirements
- bagging requirements for different markets and customers

Assessment Conditions

Assessment must be conducted in a meat processing plant.

Competency must be demonstrated at normal with the speed of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2114 Overview of offal processing on the slaughter floor

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to process offal on the slaughter floor.

This unit is applicable to slaughter floor operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify the types of offal	1.1 Identify types of offal 1.2 Identify sources of contamination and cross-contamination of offal 1.3 Explain consequences of damage or contamination of offal
2. Identify the flow of offal and processing steps on the slaughter floor	2.1 Follow steps for handling offal on the slaughter floor 2.2 Identify procedures for inspecting offal 2.3 Identify chutes and bins used for edible and inedible offal
3. Identify the requirements for processing offal on the slaughter floor	3.1 Identify and follow workplace, regulatory and health and safety requirements for workers handling offal

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA2114 Overview of offal processing on the slaughter floor

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain the steps required to process offal on the slaughter floor.

The candidate must:

- explain the steps for processing offal
- identify condemnation marks on offal
- identify edible offal
- identify the various organs processed on the viscera table

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- inspection process
- contamination to offal caused by bile, ingesta, excreta and paunch content
- procedures for the disposal of inedible offal in appropriate bins or chutes
- workplace, health and safety, hygiene and sanitation, and Quality Assurance (QA) requirements related to processing offal on the slaughter floor
- sources of contamination
- general uses of offal
- impact of contamination of edible offal on further processing.
-

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2125 Remove thick skirts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove thick skirts (diaphragm).

The candidate must:

- remove thick skirts in accordance with workplace, health and safety and Quality Assurance (QA) requirements
- identify and manage defects, contamination and cross-contamination in accordance with workplace requirements
- dispose of trimmed skirts to workplace requirements
- apply relevant regulatory requirements
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- cutting lines for thick skirts
- purpose of skirt removal indicator
- uses and further processing of thick skirts
- workplace, health and safety and QA requirements for removing thick skirts
- possible sources of contamination and cross-contamination

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2126 Remove flares

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to remove flares from pig carcasses.

This unit is applicable to slaughter floor operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Remove flares	1.1 Remove flares according to workplace and health and safety requirements 1.2 Identify and manage defects in flares according to workplace requirements 1.3 Identify sources of contamination and cross-contamination and take preventative action according to workplace requirements 1.4 Handle and dispose of flares according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2149B Remove flares

AMPA2127 Recover offal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to recover offal on a slaughter floor.

This unit is applicable to workers recovering at least three types of offal from the slaughter floor. A wide range of offal such as uterus, rectums, thymus gland, heart, kidneys, livers, testicles, and pizzles can be recovered.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Recover offal	1.1 Identify and recover offal according to workplace requirements 1.2 Recover offal safely according to workplace health and safety requirements 1.3 Inspect offal for defects according to workplace Quality Assurance (QA) requirements 1.4 Keep knives, when used, sharp

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA2127 Recover offal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must recover at least three different types of offal on a slaughter floor.

The candidate must:

- inspect offal for defects
- recover offal according to workplace requirements
- recover offal safely according to workplace health and safety requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- types of offal recovered
- methods of avoiding or dealing with contamination
- sources of contamination and cross-contamination
- work instructions and Standard Operating Procedures (SOPs) relevant to the recovery of offal
- relevant regulatory requirements
- types of defects and contamination of offal

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2128 Overview hide or pelt or skin processing

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain the treatment of hides, skins and pelts (or any other exterior covering) at a particular plant or processing centre.

The candidate must:

- identify steps in processing animal coverings
- identify requirements and specifications for the processing of hides
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- methods of stacking and storing animal coverings
- methods of treating animal coverings
- importance of maintaining the quality of hides processed
- storage of animal coverings and the goals of such storage
- types of defects that occur in hides, pelts and skins and what causes these defects
- uses of animal coverings
- workplace health and safety requirements for hide or skin processing
- customer requirements for hides, pelts and skins
- steps in processing of hides, pelts and skins

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal chain speed.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

- report equipment faults to supervisor in accordance with workplace procedures
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety policies and procedures
- sheep pelts specifications
- operating instructions for cropping machinery
- relevant regulatory requirements
- steps in work instructions
- possible pelt contaminants.

Assessment Conditions

Assessment should be conducted in an operating plant.

Competency must be demonstrated at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA2136 Overview fellmongering operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to understand the operation of a fellmongering plant.

This unit is applicable to workers employed in any part of a fellmongering operation.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element.
1. Identify steps in fellmongering	1.1 Identify steps and machinery employed in the fellmongering process. 1.2 Identify types and sources of defects in fellmongered products. 1.3 Identify quality requirements and customer specifications related to pelts and pulled wool. 1.4 Identify environmental hazards and preventative measures associated with fellmongering.
2. Follow safety requirements for this area	2.1 Identify safety hazards in the fellmongering area. 2.2 Identify and follow workplace health and safety requirements for the fellmongering area.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA2136 Overview fellmongering operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain the operation of a fellmongering plant.

The candidate must:

- identify steps in fellmongering
- follow safety requirements related to fellmongering
- apply relevant regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- machinery used in the fellmongering plant
- fellmongering process
- methods and goals of storage of skins
- use of skins and pulled wool
- workplace, quality and workplace health and safety requirements, and customer specifications for pelts and pulled wool
- relevant regulatory requirements.

Assessment Conditions

Assessment must be conducted in an operating fellmongering plant.

Competency must involve demonstrated ability to work safely in a fellmongering plant.
Competency must be demonstrated at normal production speed.

As a minimum, three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2137 Chemically treat skins for fellmongering process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must apply chemicals to skins in a fellmongering process.

The candidate must:

- spray skins with chemicals in accordance with workplace health and safety requirements and workplace and customer specifications
- operate spraying equipment to workplace and workplace health and safety requirements
- cite and locate the safety data sheets for the chemicals used and explain how they relate to the use and disposal of the chemicals
- apply relevant regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- environmental risks and controls related to the use of chemicals
- protective equipment to be used for each chemical and relevant emergency procedures
- purpose of chemically treating skins in fellmongering
- relationship between concentration of chemicals and different types of skins
- relevant regulatory requirements.

Assessment Conditions

Assessment must be conducted in an operating fellmongering plant.

Competency must be demonstrated at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Application

This unit describes the skills and knowledge required to remove the skin or hide of a condemned carcass.

This unit is applicable to workers in abattoirs, knackeries or game processing establishments.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Assessment Requirements for AMPA2150 Skin condemned carcass

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove the skin or hide of a condemned carcass.

The candidate must:

- hoist and skin carcass in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements related to skinning a condemned carcass
- risks to hide quality through inaccurate skinning cuts

Assessment Conditions

Assessment must be conducted in an operating processing plant.

Competency must be demonstrated at the speed required in an operating processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2156 Process blood

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must collect blood from the slaughter floor, process it using equipment such as a centrifuge to recover blood plasma and package the product.

The candidate must:

- collect and process blood hygienically, safely and in accordance with:
 - relevant regulatory requirements
 - SOPs
 - work instructions
 - workplace health and safety requirements
- operate processing equipment in accordance with workplace and manufacturer's requirements
- use relevant workplace machinery correctly
- pack and store blood products according to workplace requirements
- apply relevant mathematical skills to ensure processing, packaging and storage requirements are met

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- nature and uses of blood products produced
- relevant work instructions and SOPs
- ways of minimising contamination and cross-contamination
- workplace health and safety policies and procedures
- workplace and manufacturer's requirements for operating processing equipment
- workplace health and safety hazards and ways of minimising them
- sources of contamination and cross-contamination

Assessment Conditions

Assessment must involve processing one or more blood products.

Competency in this unit must be demonstrated under normal workplace conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2159 Operate blow line

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a blow line to transport raw materials for rendering operations.

The candidate must:

- operate blow line to workplace requirements
- monitor blow line operations
- monitor product flow
- fulfil workplace health and safety requirements for the operation of the blow line
- monitor product transported
- apply relevant regulatory requirements
- report equipment faults in accordance with workplace requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements of blow line operation
- operation and purpose of the blow line
- relevant regulatory requirements
- workplace health and safety requirements for the operation of the blow line

Assessment Conditions

Assessment must be undertaken in an operating rendering plant.

Competency must be demonstrated under normal operating conditions for the rendering plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA2160 Operate meat meal mill

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a meat mill plant including loading, drying and monitoring the quality of the finished meal.

This unit is applicable to rendering plant workers who operate a meat mill plant.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Operate meat meal mill	1.1 Monitor meat meal fed into mill feeder bin 1.2 Monitor mill operation in accordance with workplace requirements 1.3 Monitor mill operation in accordance with workplace health and safety requirements 1.4 Maintain housekeeping for meat meal mill area 1.5 Monitor quality of meat meal and report problems accordance with workplace requirements 1.6 Produce meat meal to workplace requirements and customer specifications 1.7 Take meat meal samples for testing in accordance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2184C Operate meat meal mill.

Assessment Requirements for AMPA2160 Operate meat meal mill

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a meat mill plant including loading, drying and monitoring the quality of the finished meal.

The candidate must:

- operate meat meal mill to workplace health and safety requirements
- monitor the operation of the meat meal mill to workplace requirements
- monitor the quality of meat meal
- produce meat meal to workplace requirements and customer specifications
- report equipment faults in accordance with workplace requirements
- carry out routine maintenance on meat meal mill as specified in workplace requirements
- apply relevant regulatory requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- defects in meat meal
- meat meal processing
- workplace health and safety hazards of operation of the meat meal mill
- relevant regulatory requirements
- workplace requirements and customer specifications for meat meal

Assessment Conditions

Assessment must be conducted in an operating rendering plant.

Competency has to be demonstrated by operating a meat meal mill at normal production rates.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2161 Operate waste recovery systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to recover material from waste water so that solids are not pumped into waste water systems.

This unit is applicable to workers employed at abattoir, independent boning rooms, rendering plant, casing factories, smallgoods factory and game meat processing establishment.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor waste recovery systems	1.1 Monitor system regularly to ensure solid waste is contained within the system 1.2 Monitor system to ensure it complies with environmental and workplace requirements 1.3 Identify environmental impact of systems failure 1.4 Take corrective action in response to systems failure in accordance with workplace and regulatory requirements
2. Operate waste recovery systems	2.1 Operate and monitor system according to workplace requirements 2.2 Recover material from waste water according to workplace requirements 2.3 Dispose of material in accordance with workplace requirements
3. Maintain waste recovery systems	3.1 Maintain waste recovery system in accordance with workplace requirements and manufacturer's specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2185C Operate waste recovery systems.

Assessment Requirements for AMPA2161 Operate waste recovery systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must recover material from waste water so that solids are not pumped into waste water systems.

The candidate must:

- operate waste recovery systems in accordance with workplace requirements
- consistently observe workplace health and safety requirements
- operate mechanised system so that solids are not pumped into the waste system

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- environmental and workplace requirements related to the operation of waste recovery systems.

Assessment Conditions

Assessment must involve demonstrated competency monitoring a functioning waste recovery system.

Competency must be demonstrated in an operating facility.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2162 Pack and despatch rendered products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to pack and despatch a range of rendered products such as meat meal, blood meal and tallow.

This unit is applicable to rendering plant workers responsible for packing product either in bulk or in bags for despatch.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Package rendered products	1.1 Inspect rendered products to workplace requirements prior to packaging 1.2 Package rendered products to workplace requirements using correct packaging procedures and effective storage materials 1.3 Package meat meal in bulk and/or bags, if applicable 1.4 Check packaging and labelling in accordance with customer specifications 1.5 Palletise packaged products where required 1.6 Package rendered products are packaged to workplace health and safety requirements
2. Despatch rendered products	2.1 Label products accurately, to customer specifications, in preparation for storage, sales or distribution 2.2 Transfer products to storage areas 2.3 Despatch packaged products
3. Check Quality Assurance (QA) aspects of delivery trucks	3.1 Identify QA requirements for trucks leaving the plant 3.2 Identify environmental and commercial impact of a spill during transportation 3.3 Undertake QA check of truck according to work instructions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA2171 Clean carcass hanging equipment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must clean hanging equipment such as rollers, gambrels, spreaders, shackles and hooks which are either iron or plastic.

The candidate must:

- inspect hanging equipment thoroughly for damage
- correctly use mechanical handling aids where appropriate
- demonstrate the capacity to clean hanging equipment
- adjust cleaning materials and process to suit the variety of materials to be cleaned
- maintain a clean and neat work area
- follow the cleaning procedure for iron work as described in work instructions
- despatch hanging equipment promptly to slaughter floor
- maintain the flow of hanging equipment through the cleaning process
- report damage of hanging equipment requiring repair or disposal either orally or in writing according to work instructions
- report any difficulties to supervisor
- co-operate and communicate with team members to maintain flow through the cleaning process
- apply relevant regulatory requirements
- use relevant communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- work in a safe manner with due regard to the cleaning chemicals used, manual handling dangers and any other workplace health and safety requirements.

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- cleaning and sanitising process for hanging equipment
- function of hanging equipment in production

- need for adequate sanitising of the hanging equipment
- need for oiling of the iron work (where applicable)
- relevant regulatory requirements
- workplace health and safety requirements for cleaning hanging equipment
- workplace health and safety hazards and precautions of working in this area
- consequences of not returning the hanging equipment promptly to the slaughter floor
- repercussions of faulty or damaged hanging equipment returning to the slaughter floor

Assessment Conditions

Assessment must be undertaken at an operating meat or pet meat processing premises.

Competency must be demonstrated when meeting the normal demands of the processing area.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA2173 Overview cleaning program

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain cleaning programs that are carried out in the workplace.

The candidate must:

- identify and follow a cleaning schedule
- correctly use cleaning chemicals for the work site and conditions
- correctly transfer waste materials to workplace requirements
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- steps in a cleaning program
- workplace health and safety requirements for cleaning with chemicals
- common hazards and the importance of maintaining a sanitary work environment
- importance of correct waste disposal
- importance of cleaning the whole work area when product has been removed
- importance of following a cleaning schedule
- purpose and action of detergents and sanitisers
- workplace requirements relevant to cleaning
- equipment used to transfer waste
- factors inhibiting achieving adequate standards of cleanliness
- waste materials for transfer and explain waste transfer requirements and conditions
- housekeeping tasks to be completed according to workplace procedures

Assessment Conditions

Assessment must occur in the workplace for established cleaning programs.

Competency must be demonstrated for specific plant cleaning programs.

As a minimum, three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

AMPA2174 Clean after operations - boning room

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to clean and sanitise a boning room. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids in the boning room (e.g. packing machinery, conveyors, elevators, scales, recording and labelling machines). It also involves the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant.

This unit is applicable to workers cleaning boning rooms after production has finished. The boning rooms may be attached to abattoirs or in smallgoods plants or part of food services, game processing or wholesaling operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Clean boning room	1.1 Clean boning room in accordance with cleaning schedule and work instructions 1.2 Undertake cleaning procedures to minimise condensation 1.3 Use cleaning chemicals in accordance with manufacturer's specifications and workplace health and safety requirements 1.4 Identify major areas of contamination 1.5 Ensure cleaning procedures meet pre-operational hygiene requirements 1.6 Ensure surfaces are left free of excess moisture
2. Clean boning room machinery	2.1 Isolate machinery in accordance with workplace requirements 2.2 Clean boning room packing machinery in accordance with workplace requirements and manufacturer specifications 2.3 Isolate and clean conveyers and elevators 2.4 Clean electronic scales, recording and labelling machines in accordance with workplace requirements and manufacturer's specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2197C Clean after operations – boning room.

Links

Assessment Requirements for AMPA2174 Clean after operations - boning room

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must clean and sanitise a boning room.

The candidate must:

- clean boning room in accordance with workplace requirements
- clean boning room machinery in accordance with workplace requirements
- observe workplace health and safety requirements for cleaning the boning room
- identify and apply relevant regulatory requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- monitor program for boning room hygiene and sanitation including surface swabbing and pre-operational checks

Knowledge Evidence

The candidate must clean and sanitise a boning room.

The candidate must:

- importance of drying, and of avoiding condensation in boning rooms
- cleaning schedule for the boning room
- major sources and locations of contamination in the boning room
- specific cleaning programs and workplace health and safety requirements for boning room machinery and conveyor systems

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant.

Competency must be demonstrated during normal cleaning operations.

As minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2175 Clean after operations - slaughter floor

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to clean and sanitise a slaughter floor after operations. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids on the slaughter floor (e.g. knocking or stunning equipment, hoists, rails, chutes, bins, viscera tables). It also includes the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant.

This unit is applicable to workers in abattoirs, knackereries and game processing establishments.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Clean slaughter floor	1.1 Clean slaughter floor in accordance with cleaning schedule and work instructions. 1.2 Use cleaning chemicals according to manufacturer's specifications and workplace health and safety requirements. 1.3 Undertake post-cleaning monitoring in accordance with workplace requirements. 1.4 Conduct slaughter floor cleaning to workplace health and safety requirements. 1.5 Identify and clean specific areas of contamination risk according to workplace requirements.
2. Clean equipment and fittings	2.1 Clean knocking or stunning area and isolate and/or immobilise equipment. 2.2 Tag out and immobilise equipment during cleaning. 2.3 Isolate, strip down, clean and sanitise machinery according to work instructions. 2.4 Check cleaned areas according to workplace requirements.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2198C Clean after operations – slaughter floor.

Assessment Requirements for AMPA2175 Clean after operations - slaughter floor

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must clean and sanitise a slaughter floor after operations.

The candidate must:

- identify significant areas of contamination on slaughter floor
- clean slaughter floor effectively in accordance with cleaning program
- clean slaughter floor equipment in accordance with work instructions and workplace health and safety requirements
- apply relevant regulatory requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- implications for production if slaughter floor fails to meet pre-operational check requirements
- cleaning schedule for slaughter floor
- hygiene and sanitation monitoring program for slaughter floor
- relevant regulatory requirements
- significant areas of contamination on slaughter floor
- specific workplace health and safety risks associated with cleaning machinery on slaughter floor

Assessment Conditions

Assessment must be conducted in an abattoir under normal working conditions.

Competency must be demonstrated throughout the process area and in cleaning all items of equipment.

As minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2176 Transport meat and meat products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to transport meat and/or meat products. It relates to the transportation of meat where the transport operator has physical contact with meat.

This unit is applicable to the transport of meat products by truck.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Assessment Requirements for AMPA2176 Transport meat and meat products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must transport meat and/or meat products.

The candidate must:

- prepare to transport food, including:
 - confirming that food holding containers or receptacles meet workplace hygiene standards
 - confirming that equipment used to maintain the required environment during transport is ready for use
 - food parameters (including temperature, loading and unloading areas, and containers and receptacles) are met prior to loading, transporting and unloading
 - confirming vehicle and associated equipment are ready to transport food
- load and unload food as required by work responsibility by following procedures to ensure that food is loaded and unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food or non-food items
- maintain work area and vehicles in a tidy state to meet workplace requirements
- transport food safely
- observe relevant workplace health and safety requirements
- locate and follow workplace information relating to food safety responsibilities
- identify and implement the methods and procedures used to control food safety hazards
- monitor food safety hazards as required by workplace requirements
- record results of monitoring and maintain records as required by the food safety program
- report non-conformance and/or unusual circumstances which could affect food safety
- take appropriate corrective action in response to failure to meet food safety requirements as required by workplace procedures
- undertake record-keeping responsibilities relating to food safety
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- use work instructions to find advice on food safety responsibilities relating to own work

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- characteristics of food transported as they affect loading and handling of food and the potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported
- procedures and responsibilities for food safety relating to own work
- non-conformance and/or unusual circumstances which could affect food safety
- microbiological, physical and chemical hazards that can occur when loading, transporting and unloading food, including the types of hazards likely to occur, the conditions under which they occur and possible consequences
- environmental conditions necessary to maintain food safety
- methods and procedures used to control food safety hazards

Assessment Conditions

Competency must be demonstrated utilising trucks usually used for delivery.

Assessment must occur in the workplace under normal despatch and delivery conditions.

As minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2177 Handle working dogs in stock yards

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to use and manage working dogs in stock yards and holding paddocks.

This unit is applicable to stock handlers using working dogs in yards and holding paddocks on farms, at saleyards and at abattoirs. Activities undertaken may including mustering holding paddocks, drafting stock, loading and unloading stock and feeding a race.

This Unit is not applicable to the training of working dogs or the use of working dogs on open range pastoral operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare yards and dogs for work	1.1 Identify workplace health and safety hazards in stock yards 1.2 Identify hazards to the welfare of working dogs in stock yards 1.3 Routinely check yards for animal welfare hazards, assess risks, and implement suitable controls 1.4 Select, use and maintain suitable Personal Protective Equipment (PPE). 1.5 Check dogs before and after work to ensure their condition and health are maintained 1.6 Identify and report unhealthy or injured dogs to foreman or manager
2. Muster and move livestock using working dogs	2.1 Identify and explain the relevant sections of applicable animal welfare standards and regulations 2.2 Use dogs suitable for the task for working livestock 2.3 Explain and demonstrate principles of low stress livestock handling 2.4 Follow workplace health and safety and workplace procedures for working with dogs and livestock 2.5 Check, muster and move livestock in holding pens, yards and laneways
3. Care for working dogs	3.1 Explain and follow workplace requirements for housing dogs 3.2 Explain workplace health and safety risks associated with working and handling dogs and follow workplace requirements 3.3 Explain and meet dietary requirements of working dogs 3.4 Clean and check kennels as a part of regular daily routines 3.5 Identify common working dog conditions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit -no equivalent unit.

Assessment Requirements for AMPA2177 Handle working dogs in stock yards

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must use and manage working dogs in stock yards and holding paddocks.

The candidate must:

- identify hazards and follow safe operating procedures in stock yards
- be observed safely checking working dogs prior to handling animals
- be able to identify signs of ill health or injury to the working dog
- be observed providing due care and handling animals safely and humanely
- observe, identify and react appropriately to WHS hazards
- observe, identify and assess hazards that may impact on animal welfare to the dog and livestock
- be able to explain and apply relevant regulatory requirements as applicable
- be able to describe and apply the principles of low stress stock handling
- be observed moving stock around pens, yards and laneways in lairage in accordance with workplace procedures
- be observed cleaning and maintain housing for dogs
- provide sufficient and suitable feed and fresh water for the working dog
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use, maintain and store suitable personal protective equipment for working in yards

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- basic nutritional and welfare requirements of working dogs
- common working dog conditions including injury or illness and reporting procedures
- livestock behavioural characteristics and movement in handling areas
- dog suitability for the task

- principles of low stress handling when using a working dog
- WHS risks with working dogs and adhere to animal welfare legislative requirements
- the impact of stress and injury on livestock
- Standard Operating Procedures (SOPs) and work instructions for animal handling

Assessment Conditions

Competency should be demonstrated at the normal speed of production.

Assessment should take place in an operating meat processing plant.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration or project
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3000 Stun animal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required for the humane, effective and hygienic stunning of animals.

This unit is applicable to workers in registered slaughtering establishments.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Restrain animal	1.1 Restrain animal humanely and safely in appropriate position in accordance with animal welfare regulatory and workplace requirements 1.2 Restrain animal in correct position for stunning as required 1.3 Restrain animal with appropriate restraining equipment
2. Operate stunning equipment	2.1 Operate stunning equipment in accordance with workplace and regulatory requirements 2.2 Maintain stunning equipment and facilities in effective working order 2.3 Operate stunning equipment humanely in accordance with animal welfare regulatory and workplace requirements
3. Stun the animal	3.1 Stun animal in accordance with animal welfare regulatory and workplace requirements 3.2 Stun animal to workplace and health and safety requirements 3.3 Check stun where part of work instructions, and take corrective action when effective stun is not achieved 3.4 Ensure stunning effectiveness is in accordance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3001C Knock and stun animal.

Assessment Requirements for AMPA3000 Stun animal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must humanely, effectively and hygienically stun animals.

The candidate must:

- restrain animal effectively and safely, with minimum stress to the animal
- stun animal effectively in accordance with workplace health and safety, workplace and regulatory requirements
- correctly use measuring equipment for voltage and/or gas levels, as applicable
- demonstrate procedures to be taken if stun is not effective
- check, operate and maintain stunning equipment according to workplace requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- report equipment faults according to workplace requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- alternative methods of stunning
- animal welfare requirements including importing country requirements and religious considerations where appropriate
- purpose of stunning animal
- risks of potential contamination and cross-contamination during stunning
- workplace health and safety consequences of not achieving an effective stun
- purpose of having a back-up procedures
- impact of ineffective restraining and stunning on product quality
- relevant regulatory requirements

Assessment Conditions

Assessment must be performed in an operating abattoir or knackerery.

Competency must be demonstrated at normal production speed with a range of types of stock (which can be from a single species).

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA3001 Stick and bleed animal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required for the humane, effective and hygienic bleeding of animals.

This unit is applicable to workers in registered slaughtering establishments.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Stick and bleed the animal	1.1 Accurately locate and identify major blood vessels, trachea and/or oesophagus 1.2 Use knife to sever the major blood vessels safely and hygienically to workplace requirements 1.3 Stick animal in manner to avoid undue and unnecessary suffering to the animal in accordance with animal welfare requirements 1.4 Make incision exposing the trachea or oesophagus in accordance with animal welfare, regulatory and workplace requirements, where part of work instruction 1.5 Conduct sticking procedures to minimise risk of contamination to the carcase and to maintain product quality 1.6 Identify and explain threats of contamination and cross-contamination in the sticking process 1.7 Bleed animal in a fast and complete process to avoid undue suffering 1.8 Bleed carcase in accordance with workplace and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3002C Stick and bleed animal.

Assessment Requirements for AMPA3001 Stick and bleed animal

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must humanely, effectively and hygienically bleed animals.

The candidate must:

- demonstrate effective sticking of animal in accordance with workplace health and safety and workplace requirements
- maintain, clean and handle knives safely and hygienically
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- religious requirements, where relevant
- animal welfare considerations and animal welfare requirements
- consequences of an incomplete bleed for the quality of the product
- purpose of sticking
- purpose of a fast and complete bleed
- anatomical structures relevant to sticking, including variations between species
- relevant regulatory requirements
- potential causes of contamination and cross-contamination
- requirements of the Animal Welfare standards and regulations, and enterprise ethical standards relating to the bleeding of animals

Assessment Conditions

Assessment must occur in a registered slaughtering establishment under normal production conditions.

Competency must be demonstrated at normal chain speed.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required for the safe and humane handling of animals prior to slaughter.

This unit is for workers who are employed to undertake ante-mortem inspection or who assist those undertaking ante-mortem inspection. Such inspection may occur in a slaughtering establishment or stockyard or lairage.

All work should be carried out to comply with workplace procedures, regulatory and customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

NIL

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify animal species and breeds, and their behavioural characteristics	1.1 Identify common breeds 1.2 Identify normal behavioural characteristics of relevant species
2. Identify and comply with animal welfare requirements for stock handling and lairage facilities	2.1 Identify and comply with animal welfare regulatory requirements 2.2 Identify workplace and regulatory requirements for lairage and confirm as suitable for use 2.3 Identify facilities and equipment and confirm as suitable for use
3. Handle animals to achieve objective or outcome required	3.1 Move and process animals (e.g. for ante-mortem inspection) and sort as required by workplace and regulatory standards 3.2 Identify and comply with workplace health and safety requirements for handling animals 3.3 Handle animals appropriately to prevent injury, minimise stress and maintain the quality of meat, hides or skins
4. Handle contingencies	4.1 Handle suspect sick or injured stock in accordance with workplace and regulatory requirements 4.2 Handle wild or uncooperative animals humanely without disturbing or injuring other animals or people
5. Deal with affected animals appropriately	5.1 Treat affected animals in accordance with regulatory, workplace and health and safety requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3003A Handle animals humanely while conducting ante-mortem inspection.

Assessment Requirements for AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must safely and humanely handle animals while conducting ante-mortem inspection.

The candidate must:

- take steps to minimise stress and injury to stock during handling procedures
- handle animals humanely during ante-mortem inspection
- handle sick and injured animals in accordance with workplace and regulatory requirements
- apply emergency procedures as required
- use effective interpersonal skills in a range of contexts, including stressful situations
- comply with workplace health and safety requirements for handling stock
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- enterprise arrangements for emergency kill and humane destruction
- methods to handle livestock in a calm and low-stress manner
- impact of stress during handling on the ultimate pH and quality of meat
- impact of poor handling
- workplace health and safety requirements for handling stock
- regulatory and workplace requirements for animal welfare
- documentation required for ante-mortem inspection
- regulatory requirements when dealing with animals affected by common and exotic or notifiable diseases including:
 - animal welfare legislation
 - Department of Agriculture and/or state meat authority regulation

- company procedures
- any specific company requirements.
- procedures for dealing with animal-handling emergencies

Assessment Conditions

Competency must be assessed in a stockyard or lairage under real working conditions.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3003 Assess effective stunning and bleeding

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to assess the humane and effective stunning and slaughter of animals.

This Unit is applicable to the assessment of the effectiveness of stunning and bleeding in a slaughtering establishment. The training would normally be undertaken by Quality Assurance officers and supervisors who monitor the humane slaughtering of animals.

This Unit will fulfil the importing country requirements for meat processing establishments exporting to the European Union, and meets the European Union Regulation EC 1099/2009 training requirements for the assessment of effective stunning and bleeding.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the effective stunning of an animal prior to bleeding	1.1 Check animal for an effective stun prior to bleeding 1.2 Take corrective action when effective stun is not achieved 1.3 Keep records of the assessment of effective stunning according to workplace requirements 1.4 Assess stunning against the applicable work instruction and Standard Operating Procedures to ensure it is effective and humane
2. Check for bleed chain insensibility	2.1 Check animals for insensibility on the bleed chain 2.2 Immediately report signs of sensibility and take immediate corrective action 2.3 Keep records of the assessment of effective stunning and bleeding according to workplace requirements 2.4 Assess bleeding against the applicable work instruction and Standard Operating Procedures to ensure it is effective and humane

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3004A Assess effective stunning and bleeding.

Assessment Requirements for AMPA3003 Assess effective stunning and bleeding

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must assess the humane and effective stunning and slaughter of animals.

The candidate must:

- assess effectiveness of animal stunning in accordance with workplace and regulatory requirements
- record assessment of bleed chain insensibility according to the workplace requirements
- identify the causes of bleed chain insensibility
- read and interpret electronic data (where applicable)
- monitor bleed chain insensibility according to workplace requirements
- implement procedures if stun or bleeding is not effective
- record monitoring and assessment results of stunning and or bleed chain insensibilities
- report stunning and bleeding failures
- apply relevant regulatory and work place requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- follow workplace health and safety procedures

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- methods of stunning and their application
- animal welfare requirements including importing country requirements where appropriate
- purpose of stunning animal
- the indicators of an effective stun
- signs of an ineffective stun
- animal welfare implications of ineffective stunning and bleeding
- workplace and regulatory requirements for monitoring stunning
- the causes of ineffective stunning and bleeding

- signs of bleed chain insensibility
- procedures for the assessment of stunning
- procedures for the assessment of bleed chain insensibility
- workplace and regulatory requirements for monitoring bleed chain insensibility
- workplace health and safety consequences of not achieving an effective stun
- impact of ineffective restraining and stunning on product quality
- relevant regulatory requirements
- corrective actions for an ineffective stun

Assessment Conditions

Assessment must be performed in an operating abattoir or knackery, at production speed.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3004 Monitor the effective operations of electrical stimulation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to monitor an automated or manual electrical carcass stimulation unit to ensure that the carcasses are receiving the optimal stimulation.

This Unit is applicable to workers monitoring electrical stimulation units in slaughtering establishments.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor electrical stimulation unit	1.1 Monitor the electrical stimulation unit using the correct procedure to check electrical stimulation equipment operation 1.2 Use dummy load across each of the electrical inputs to check operation in accordance with work instructions and manufacturers' specifications 1.3 Observe for and describe the normal reaction of carcasses to electrical stimulation 1.4 Observe for and respond to any abnormal reaction of carcasses to electrical stimulation 1.5 Follow up on requests for maintenance and check operation is normal 1.6 Follow workplace health and safety requirements for working around electrical stimulation units
2. Ensure routine checks of equipment by technicians are performed	2.1 Arrange or oversee routine checks to ensure a full check of the equipment is made including: electrical parameters, stored programs, electrical safety, electrodes and equipment integration 2.2 Review maintenance and equipment reports detailing the findings and recommendations and implement corrective actions
3. Respond to audits of carcase specification compliance	3.1 Describe the pH/temperature window and its importance to meat quality 3.2 Describe the audit process for electrical stimulation unit performance and the various potential findings 3.3 Respond to adverse audit findings including recommendations to alter stimulation inputs, alter stimulation time and adjust chilling regime

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3005A Monitor the effective operations of electrical stimulation.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AMPA3004 Monitor the effective operations of electrical stimulation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must monitor an automated or manual electrical carcass stimulation unit to ensure that the carcasses are receiving the optimal stimulation.

The candidate must:

- observe and recognise normal and abnormal carcass responses to electrical stimulation
- instruct workers in and around electrical stimulation units to recognise and report abnormal carcass responses
- work safely around electrical stimulation units
- monitor the electrical stimulation unit using the correct procedure including readouts
- use dummy load across each of the electrical inputs to check operation
- request and schedule maintenance
- review maintenance and performance audit reports and ensure follow up action has been taken
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- purpose of electrical stimulation
- pH/temperature window and its importance to meat quality
- causes of heat toughening and cold shortening and the impacts on meat quality
- correct procedures to check electrical stimulation equipment operation
- purpose of dummy loads to check operation
- relevant work instructions and manufacturers' specifications
- normal and abnormal reactions of carcasses to electrical stimulation
- required routine checks for electrical parameters, stored programs, electrical safety, electrodes and equipment integration

- use of an oscilloscope to ensure that the waveform parameters are as specified
- maintenance and equipment reports
- audit process for electrical stimulation unit performance and the various potential findings
- how to respond to adverse audit findings of electrical stimulation unit performance
- workplace health and safety issues associated in working around electrical stimulation units

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise **or** production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3005 Rod weasand

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must rod the weasand.

The candidate must:

- rod the weasand to workplace requirements
- comply with workplace health and safety requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- anatomy relevant to rodding weasand
- workplace health and safety requirements for rodding weasand
- potential for contamination and cross-contamination
- purpose of rodding the weasand
- ways of minimising contamination and cross-contamination
- work instructions for rodding the weasand
- relevant regulatory requirements

Assessment Conditions

Assessment must be performed in an operating abattoir or knackery.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3006 Seal weasand

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must seal the weasand.

The candidate must:

- select and prepare appropriate equipment according to workplace requirements
- report equipment faults according to workplace requirements
- seal weasand according to work instruction
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- anatomy relevant to sealing weasand
- importance of correctly sealing weasand
- methods used for sealing weasand
- potential for contamination and cross-contamination
- applicable work instructions
- workplace health and safety requirements
- equipment required
- relevant regulatory requirements

Assessment Conditions

Assessment must be conducted in an operating abattoir or knackery.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessment Requirements for AMPA3007 Ring bung

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must open the hide/pelt from around the bung and free the bung.

The candidate must:

- remove hide or pelt cleanly from around the bung and without damage, according to workplace requirements
- free the bung with minimal damage and contamination
- cut the bung to workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- purpose of ringing the bung
- work instruction for ringing the bung
- consequences of incorrectly performing this procedure
- relevant regulatory and workplace requirements
- sources of contamination and cross-contamination

Assessment Conditions

Assessment must be carried out in an operating abattoir or knackery.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3009 Split carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must split the carcase.

The candidate must:

- split carcasses accurately with no soft siding
- split carcasses in accordance with workplace and health and safety requirements
- perform routine cleaning and maintenance as specified in the work instructions
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- routine maintenance that forms part of the work instructions for splitting the carcase
- operation of the carcase splitting saw (where applicable)
- problems caused by soft siding carcasses
- relevant work instructions and Standard Operating Procedures (SOPs)
- workplace health and safety requirements for operating, cleaning and maintaining the saw
- regulatory requirements
- sources of contamination and cross-contamination for carcase splitting

Assessment Conditions

Competency must be assessed at the normal speed of production and over a period of time.

Competency must be demonstrated in accordance with workplace requirements.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3010 Overview legging operation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain the sequence and workplace requirements of a legging operation.

The candidate must:

- prepare and maintain equipment required during legging operation
- report equipment faults according to workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- legging process
- use and importance of the spear cut during legging operations
- possible product or hide defects caused in legging operations
- consequences to product or hide of inaccurate opening cuts
- regulatory or importing country requirements
- relevant regulatory and workplace requirements
- sources of contamination and cross-contamination of product during legging process
- equipment used in legging and explain its purpose and care
- specific workplace health and safety requirements in the legging area

Assessment Conditions

This unit must be undertaken with another legging unit and cannot be assessed in isolation.

Assessment must involve the understanding of workplace work instructions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3012 Make first leg opening cuts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform first leg opening cuts and to remove udders, pizzles and testicles of cattle, buffalo, deer, camels or horses.

The candidate must:

- cut the leg so that all cuts through the hide are directed outwards (spear cut)
- complete first leg opening cuts in accordance with work instructions
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- methods used to achieve a hide with good shape and consistency
- equipment sterilisation requirements
- consequences of cutting the hide muscle structure and surfaces
- relevant workplace health and safety requirements
- sources of contamination and cross-contamination
- relevant anatomy of the species processed

Assessment Conditions

Assessment must be conducted on a slaughter floor or processing floor of a registered meat processing enterprise.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3013 Make second leg opening cuts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform second leg opening cuts on the hind leg of cattle, buffalo, camels, horses or deer.

The candidate must:

- demonstrate methods used to achieve a hide with good shape and consistency
- follow the requirements of the relevant work instruction
- dispose of any trimmings in accordance with work instructions
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- anatomical features of livestock relevant to second leg opening cuts
- second leg operations and work instructions
- equipment sterilisation requirements
- relevant workplace health and safety requirements
- enterprise quality requirements for hides
- relevant regulatory and workplace requirements

Assessment Conditions

Assessment has to be conducted in an operating meat processing plant.

Competency must be demonstrated at the normal chain speed over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3014 Perform legging on small stock

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform hind legging operations on small stock such as sheep and goats.

This unit is applicable to those performing legging on the hind legs of small stock.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

AMPA3010 Overview legging operation

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Open the pelt	<p>1.1 Open pelt down the inside of the hind leg from the hock to the pit area in accordance with work instructions.</p> <p>1.2 Open pelt applying the technique of cuts aimed outwards to minimise damage to tissue or pelt in accordance with work instructions.</p>
2. Remove udders, testicles and pizzles	2.1 Open pelt between the tail and the cod or udder area, and remove pizzle and testicles or udder with zero spillage in accordance with work instructions.
3. Remove the pelt	<p>3.1 Remove pelt from the outside of the leg down to the flank maintaining minimal damage to pelt or tissue in accordance with work instructions.</p> <p>3.2 Remove hock in accordance with workplace procedures and related equipment is sterilised to avoid cross-contamination, where this forms part of the work instruction.</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3014C Perform legging on small stock.

Links

Assessment Requirements for AMPA3014 Perform legging on small stock

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform hind legging operations on small stock such as sheep and goats.

The candidate must:

- perform legging cuts in accordance with work instructions
- direct all cuts through the pelt outwards (spear cuts)
- achieve a hide with good shape and consistency using appropriate methods
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory and workplace requirements
- comply with workplace health and safety requirements for the legging area

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- equipment sterilisation requirements
- methods used to avoid contamination
- impact of damage to the carcase on product quality
- consequences of cutting the muscle structure and surfaces
- relevant regulatory and workplace requirements
- workplace health and safety requirements for the legging area
- sources of contamination and cross-contamination

Assessment Conditions

Assessment must be conducted in an operating meat processing plant.

Competency must be demonstrated at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3020 Bone neck

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to bone a neck. This task is usually, but not necessarily, performed on the slaughter floor.

This unit is applicable to workers boning necks on a slaughter floor or in a boning room, smallgoods plant or retail butchery premises.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Bone neck	1.1 Identify neck meat to be boned. 1.2 Identify and trim defects and contaminants in accordance with work instructions. 1.3 Bone neck in accordance with work instructions. 1.4 Bone neck to maximise yield. 1.5 Identify and comply with workplace health and safety requirements.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3015A Bone neck.

Links

Assessment Requirements for AMPA3020 Bone neck

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must bone a neck.

The candidate must:

- identify relevant anatomical structure of the neck and neck area
- identify neck meat to be recovered
- bone neck in accordance with work instructions to maximise yield
- comply with workplace health and safety requirements
- apply relevant workplace and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of

- techniques required to maximise yield
- potential sources of contamination and cross-contamination
- relevant workplace and regulatory requirements
- specific workplace health and safety requirements

Assessment Conditions

Assessment must be conducted in an operating meat processing enterprise.

Competency must be demonstrated at chain/production speed and over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs

AMPA3021 Perform 'Y' cut

Modification History

Release	TP Version	Comment
2	AMP v2.1	New release to correct prerequisite requirements
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform the 'Y' cut on sheep and goat slaughter floors.

This unit is applicable to those performing 'Y' cuts on sheep and goat slaughter floors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3023 Explain opening cuts

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Open the pelt on forelegs	1.1 Open pelt on both forelegs in accordance with workplace requirements. 1.2 Open pelt in accordance with workplace health and safety requirements.
2. Open the pelt	2.1 Open pelt on the neck and brisket in accordance with workplace requirements to avoid the risks of damage and contamination to the carcass. 2.2 Open pelt is opened on the neck and brisket following workplace health and safety requirements.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3016B Perform 'Y' cut.

Links

Assessment Requirements for AMPA3021 Perform 'Y' cut

Modification History

Release	TP Version	Comment
2	AMP v2.1	New release to correct prerequisite requirements
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform the 'Y' cut on sheep and goat slaughter floors.

The candidate must:

- demonstrate correct cutting lines
- open the pelt in accordance with the work instruction and at production speed
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- equipment sterilisation requirements
- general economic impact of nicked, soiled or damaged hide or pelt and scored meat
- relevant work instructions for opening the foreleg and the brisket area
- relevant workplace health and safety, regulatory and workplace requirements
- general anatomy of carcase relevant to the task

Assessment Conditions

Assessment must occur in an operating meat processing plant.

Competency must be demonstrated under normal production conditions at the usual speed of production and according to workplace requirements.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3022 Skin head

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manually remove the hide or pelt from a head.

The candidate must:

- use sterilisation techniques required prior to and during the skinning of the head
- skin the head to workplace requirements
- work cleanly and to avoid the risks of contamination of the head and carcass
- use communication techniques relevant to work instructions and Standard Operating Procedures (SOPs)
- keep work area clean and tidy
- dispose of hide or pelt in accordance with work instructions
- identify sources of contamination and cross-contamination and rectify accordingly

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- workplace requirements for removing hide or pelt from head
- consequences of incorrectly removing hide or pelt from head
- use of head meat
- relevant regulatory requirements
- workplace health and safety requirements related to removing hide or pelt from head

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal chain speed for the meat processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3023 Explain opening cuts

Modification History

Release	TP Version	Comment
2	AMP v2.1	New release to correct prerequisite requirements
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to explain the opening cut process, and to identify sources of contamination and the risks to hides, pelts and product.

This unit is applicable to workers making opening cuts in hides or pelts abattoirs, knackery or game processing establishments.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Explain opening cuts	1.1 Identify steps involved in opening carcase hide or pelt in accordance with work instructions. 1.2 Identify sources of contamination and cross-contamination in accordance with hygiene and sanitation policies. 1.3 Identify hygiene and sanitation requirements. 1.4 Explain purpose of spear cuts. 1.5 Identify and explain quality implications of defective opening cuts for product and hide or pelt 1.6 Identify and explain workplace health and safety requirements associated with opening hides or pelts.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3021C Explain opening cuts.

Links

Assessment Requirements for AMPA3023 Explain opening cuts

Modification History

Release	TP Version	Comment
2	AMP v2.1	New release to correct prerequisite requirements
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain the opening cut process, and identify sources of contamination and the risks to hides, pelts and product.

The candidate must:

- clearly explain the steps, processes and equipment associated with opening cuts
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- equipment sterilisation requirements
- economic impact for the enterprise of nicked, soiled or damaged hides or pelts and scored meat
- hygiene, sanitation and workplace health and safety requirements
- possible sources of contamination and cross-contamination during opening cut process
- relevant work instructions
- process of opening hide prior to removal
- use of spear cuts in opening cuts
- relevant workplace requirements
- implications of poor opening cuts on product or hide quality
- regulatory or importing country requirements

Assessment Conditions

Competency must be demonstrated under normal production conditions and at the normal speed of production.

Competency must be assessed in an operating processing plant.

As a minimum, three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform midline cuts to open and release the hide or pelt from the belly area of a carcass.

The candidate must:

- locate and demonstrate correct cutting lines and techniques for midline cuts
- separate hides or pelts from belly area according to the work instruction
- avoid damage to the hide or pelt and meat
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct cutting lines and techniques for midline cuts
- relevant work instructions
- workplace health and safety requirements
- causes of damaged hides or pelts and meat cuts
- relevant regulatory requirements
- sources of contamination and cross-contamination
- consequence for the business of damaged or contaminated hides, pelts or meat cuts

Assessment Conditions

Assessment must be performed in an operating processing plant.

Competency must be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3029 Scald and dehair carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to scald and de-hair pigs and other species such as goats.

This unit is applicable to workers in abattoirs and knackeries.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1.Scald exterior covering	1.1 Scald carcass according to workplace requirements 1.2 Carry out scalding procedures according to workplace health and safety requirements
2. Remove hair	2.1 Remove hair according to workplace requirements 2.2 Remove hair according to workplace health and safety requirements
3. Clean/shave carcass	3.1 Clean or shave carcass according to workplace health and safety requirements 3.2 Trim contaminants from carcass

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3031C Scald and de-hair carcass.

Assessment Requirements for AMPA3029 Scald and dehair carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must scald and de-hair pigs and other species such as goats.

The candidate must:

- demonstrate de-hairing procedures to workplace requirements
- demonstrate shaving, washing, trimming and cleaning of carcase to meet workplace requirements
- demonstrate trimming of contaminants and correct disposal of trimming
- demonstrate correct use of hair removal equipment
- apply relevant workplace health and safety and regulatory requirements
- monitor the scalding process including water temperature, where part of the workplace requirements
- report equipment faults according to workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct use of hair removal equipment
- implications of knife stalls
- potential for contamination and cross-contamination
- work instructions relevant to the task
- relevant workplace health and safety and regulatory requirements

Assessment Conditions

Assessment must be conducted in an operating processing plant.

Competency must be demonstrated at the normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3030 Operate pelt puller

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a pelt puller.

The candidate must:

- operate a pelt puller to workplace standards
- apply relevant workplace health and safety and regulatory requirements
- report defective operation of puller clearly, accurately and promptly
- report malfunctions of puller or pelt removal not achieving workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- take corrective action as specified in work instructions

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- general operation of the puller
- work instructions for the operation and routine maintenance of the pelt puller
- relevant workplace health and safety and regulatory requirements
- emergency procedures relating to pelt puller and positioning of carcase
- potential for contamination and cross-contamination and the required corrective actions

Assessment Conditions

Competency must be demonstrated at normal chain speed.

Assessment must be conducted in an operating processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3031 Operate hide puller

Modification History

Release	TP Version	Comment
2	AMP v2.1	New release to correct prerequisite requirements
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a hide puller.

The candidate must:

- position carcass securely and safely, where part of work instructions
- comply with workplace health and safety requirements
- operate a hide puller according to workplace requirements
- operate a hide puller to achieve a hide with good shape and consistency
- remove hide without damage to carcass
- use correct maintenance procedures for hide pulling equipment
- report defects when hides are not coming off cleanly to supervisor in accordance with workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- general operation of the puller
- work instructions
- potential for contamination and cross-contamination
- relevant regulatory requirements
- maintenance requirements for hide puller
- workplace health and safety issues related to the operation of the hide puller

Assessment Conditions

Competency must be demonstrated at the normal rate of production.

Assessment must be conducted on an operating slaughter floor or game meat processing establishment.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3033 Bed dress carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to bed dress cattle, deer or buffalo.

This unit is applicable to slaughter floors where hide pullers are not used and the hide is removed while the carcase is lying in a cradle. This unit may also cover bed dressing of buffalo and other large species of animals processed for either human consumption or pet food.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Position carcass	1.1 Position carcass correctly in cradle to provide good access by operators in accordance with workplace requirements. 1.2 Position carcass in accordance with workplace health and safety requirements.
2 Complete opening cuts	2.1 Perform opening cuts in accordance with workplace requirements. 2.2 Identify and meet workplace health and safety requirements. 2.3 Split hide correctly from the udder/cod and to the point of the brisket with outward cuts to avoid contamination and puncturing. 2.4 Flank carcass with both left and right sides split from the flank to the shoulder area. 2.5 Carefully make opening cuts around both forelegs with incision from pit to hock. 2.6 Clear hide from both forelegs in accordance with workplace procedures. 2.7 Open hide to the neck along the length of the brisket. 2.8 Clear hide from both sides of neck and deep into the neck and shoulders clearing the brisket.
3 Remove hide	3.1 Remove hide employing measures and techniques to avoid damage to, or contamination of, carcass. 3.2 Dispose of hide in accordance with workplace requirements. 3.3 Perform all operations in accordance with workplace health and safety requirements.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA3033 Bed dress carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must bed dress cattle, deer or buffalo.

The candidate must:

- position carcase correctly in the cradle
- remove hide without damage to hide or carcase
- bed dress carcase according to work instructions
- work with bed dressing partner to remove hide smoothly and safely (where applicable)
- apply relevant workplace health and safety and regulatory requirements
- operate, clean and maintain equipment according to workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- general economic impact of nicked, soiled or damaged hide and scored meat
- importance of correctly placing carcase in cradle
- relevant work instructions
- relevant workplace health and safety and regulatory requirements
- general anatomy of carcase relevant to the task

Assessment Conditions

Assessment must occur in a registered meat processing plant.

Competency must be demonstrated at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must do the preparatory knife work marking a pig carcass prior to splitting.

The candidate must:

- backdown a pig carcass to workplace requirements and at the speed of production
- identify and minimise contamination risks
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- purpose of backing down
- relevant regulatory requirements
- potential sources of contamination and cross-contamination

Assessment Conditions

Assessment must be conducted in an operating processing plant.

Competency must be demonstrated in the workplace at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3043 Prepare head for inspection

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to prepare a head for inspection by exposing the required glands and lymph nodes.

This unit is applicable to those preparing heads for inspection by specifically exposing nominated glands.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare heads for inspection	1.1 Identify glands and lymph nodes to be exposed 1.2 Cut away tissue to expose glands and lymph nodes in accordance with work instructions and regulatory requirements 1.3 Identify and minimise sources of potential contamination and cross-contamination 1.4 Identify and follow workplace health and safety requirements for the preparation of heads for inspection

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3042C Prepare head for inspection.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5e2e56b7-698f-4822-84bb-25adbb8443a7>

Assessment Requirements for AMPA3043 Prepare head for inspection

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must prepare a head for inspection by exposing the required glands and lymph nodes.

The candidate must:

- prepare head for inspection in accordance with work instructions and regulatory requirements
- identify contamination and take appropriate action
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- basic anatomy associated with the location of glands and lymph nodes
- procedures for minimising contamination of product according to workplace requirements
- purpose of head inspection procedures

Assessment Conditions

Assessment must occur in a registered meat processing plant or facility.

Competency must be demonstrated in an operating meat processing plant or facility at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time
- Assessors must satisfy the current standards for RTOs.

AMPA3044 Operate air knife

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate an air knife.

This unit is applicable to workers using an air knife in a range of jobs in abattoirs, knackeries and game processing establishments.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Operate air knife	1.1 Use air knife in accordance with workplace requirements 1.2 Operate air knife in accordance with workplace health and safety requirements 1.3 Perform basic maintenance of the knife

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3043B Operate air knife.

Links

Assessment Requirements for AMPA3044 Operate air knife

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate an air knife.

The candidate must:

- use an air knife competently and safely in accordance with the work instructions for one work station in a meat processing operation
- perform basic maintenance of the knife
- report equipment faults to supervisor in accordance with workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply the hygiene and sanitation requirements for that work station

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- basic operating principles of the air knife
- hygiene and sanitation requirements for that work station
- work instructions for a particular work station
- relevant regulatory requirements
- potential sources of contamination and ways of minimising them

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at the normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3045 Drop sock and pull shoulder pelt

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform the opening cut drop sock and pull shoulder pelt on sheep and goats.

This unit is applicable to the slaughter floor task involving the freeing of the pelt from the forequarter of sheep or goats.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Open pelt	1.1 Open pelt in accordance with workplace requirements 1.2 Open pelt in accordance with workplace health and safety requirements
2. Clear pelt	2.1 Clear pelt from around both forelegs in accordance with workplace requirements 2.2 Clear pelt from shoulder area following workplace health and safety requirements to avoid the risks of damage and contamination to the carcass

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3044B Drop sock and pull shoulder pelt.

Links

Assessment Requirements for AMPA3045 Drop sock and pull shoulder pelt

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform the opening cut drop sock and pull shoulder pelt on sheep and goats.

The candidate must:

- use correct cutting lines
- open and clear the pelt according to workplace requirements and at production speed
- apply relevant workplace health and safety and regulatory requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- general economic impact of nicked, soiled or damaged hide/pelt and scored meat
- relevant work instructions for opening and clearing the foreleg and shoulder area
- relevant workplace health and safety and regulatory requirements
- potential sources of contamination and cross-contamination
- ways of minimising contamination
- general anatomy of carcase relevant to the task

Assessment Conditions

Competency must be assessed in an operating processing plant.

Competency must be demonstrated at the normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3046 Undertake retain rail operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform retain rail operations to remove contamination, pathology and dressing defects identified by inspection staff.

This unit is applicable to workers on a slaughter floor or in a game processing plant.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Trim carcase on retain rail	1.1 Identify and explain retain rail procedure 1.2 Identify defects that need trimming under a meat inspector's supervision 1.3 Trim defects in accordance with work instructions and meat inspector's direction 1.4 Trim defects in accordance with hygiene and sanitation requirements. 1.5 Trim defects in accordance with workplace health and safety requirements 1.6 Satisfy inspectors' requests and maximise yield when defects are trimmed 1.7 Dispose of trimmings in accordance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3045B Undertake retain rail.

Links

Assessment Requirements for AMPA3046 Undertake retain rail operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform retain rail operations to remove contamination, pathology and dressing defects identified by inspection staff.

The candidate must:

- trim defects on carcasses (on retain rail) in accordance with meat inspector's or Quality Assurance (QA) officer's direction and work instructions
- demonstrate trim which meets regulatory requirements and maintains yield
- dispose of trim in accordance with work instructions
- communicate appropriately with meat inspectors and other relevant workplace personnel
- apply relevant regulatory requirements
- provide and accept feedback in order to improve performance from colleagues and meat inspectors

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- potential sources of contamination or cross-contamination
- retain rail procedures
- relevant regulatory requirements
- types of defects which result in carcasses being retained.
-

Assessment Conditions

Assessment must be undertaken in an operating abattoir or game processing plant.

Competency must be demonstrated when the chain is working at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3047 Prepare and present viscera for inspection

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to prepare and present offal (viscera) to a government authorised meat safety officer for inspection.

This unit is applicable to abattoirs and game processing plants.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare offal and internal tissues for inspection	1.1 Identify offal and internal tissue to be inspected 1.2 Separate hearts and lungs for inspection according to workplace requirements 1.3 Identify and minimise sources of potential contamination and cross-contamination 1.4 Handle offal and internal tissue without causing damage and/or contamination
2. Present offal and internal tissue for inspection	2.1 Present viscera for inspection according to workplace and regulatory requirements 2.2 Identify and follow workplace health and safety requirements for the presentation of offal for inspection, including those for manual handling

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3046A Prepare and present viscera for inspection.

Links

Assessment Requirements for AMPA3047 Prepare and present viscera for inspection

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must prepare and present offal for inspection to a government authorised meat safety officer.

The candidate must:

- handle offal to avoid bile, ingesta, excreta or content contamination
- present offal for inspection in accordance with regulatory, workplace health and safety, hygiene and sanitation, and workplace requirements
- identify the organs processed on the viscera table

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- inspection process
- workplace, health and safety, hygiene and sanitation, and regulatory requirements for the presentation of offal for inspection

Assessment Conditions

Assessment must be conducted on an operating slaughter floor.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3048 Bone small stock carcass - leg

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to remove primal cuts from the leg of a small stock carcass.

This unit is applicable to workers boning small stock legs in boning rooms, food services operations, smallgoods plants, wholesale and retail operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify specifications for cuts	1.1 Determine specifications for cuts using cut descriptions according to regulatory requirements, customer specifications and workplace requirements.
2. Bone leg	2.1 Slice and remove primal cuts from leg according to work instructions and specifications. 2.2 Cut primal lines in compliance with regulatory requirements. 2.3 Handle meat safety and quality hazards according to workplace procedures. 2.4 Cut primals to maximise yield. 2.5 Bone product in accordance with workplace health and safety requirements including the use of safe manual handling techniques and the safe and effective use of a knife.
3. Identify and remove defects	3.1 Identify, remove and report defects according to government regulations and workplace standards. 3.2 Report persistent defects to supervisor in accordance with work instructions.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3052C Bone small stock carcase – leg.

Links

Assessment Requirements for AMPA3048 Bone small stock carcass - leg

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove primal cuts from the leg of a small stock carcass.

The candidate must:

- bone out the legs according to specifications and work instructions
- check the accuracy of cutting lines
- identify contamination and take corrective action
- identify primals containing contamination or abnormalities and handle according to workplace and regulatory requirements
- identify finished primal cuts
- comply with workplace health and safety requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisors and interacting with team members
- use equipment correctly

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- dropped meat procedures
- workplace health and safety requirements for boning small stock
- procedure for cuts required to maximise yields for a given carcass
- structure of the carcass and cutting lines
- work instruction for the removal of all primals to desired specifications
- workplace and customer specifications
- carcass defects and corrective actions to be taken
- sources of contamination and cross-contamination and the ways of minimising the contamination

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant or facility.

Competency must be demonstrated at a normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3049 Slice and trim leg - small stock

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to slice and trim relevant cuts of meat from small stock legs, including sheep, pigs, goats, game animals such as kangaroos, wallabies and other small stock processed for human consumption or pet meat.

This unit is applicable to workers in boning rooms, food service operations, smallgoods plants, wholesale and retail operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify specifications for cuts	1.1 Determine specifications for cuts using cut descriptions according to regulatory requirements, customer specifications and workplace requirements
2. Slice and trim primary meat cuts	2.1 Slice primary meat cuts into finished meat cuts according to specifications and work instructions 2.2 Meet workplace health and safety requirements including the safe and effective use of knives and safe manual handling techniques 2.3 Follow dropped meat procedures in accordance with workplace requirements
3. Identify and remove defects	3.1 Identify, remove and report defects according to government regulations and workplace standards 3.2 Report persistent defects to supervisor in accordance with work instructions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3054C Slice and trim leg – small stock.

Assessment Requirements for AMPA3049 Slice and trim leg - small stock

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must slice and trim relevant cuts of meat from small stock legs, such as from sheep, pigs, goats, game animals such as kangaroos, wallabies and other small stock processed for human consumption or pet meat.

The candidate must:

- slice and trim the legs according to specifications and work instructions
- check the accuracy of cutting lines
- identify contamination and take corrective action
- identify contamination or abnormalities and handle according to workplace and regulatory requirements
- identify finished cuts
- comply with workplace health and safety requirements
- apply relevant communication skills when reporting to supervisors and interacting with team members

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- basic anatomy of small stock relevant to cutting lines
- how yield is calculated and why it is important
- regulatory requirements as they relate to carcass cutting lines
- relevant specifications for meat cuts sliced and trimmed from legs

Assessment Conditions

Assessment must be conducted in an operating and registered meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3050 Bone large stock carcass - forequarter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove primal cuts from the forequarter of large stock carcasses, such as beef, horse, buffalo

The candidate must:

- demonstrate the procedure for boning large stock carcass forequarter primal cuts in accordance with workplace requirements
- bone product in safe and hygienic manner
- identify primals containing contamination or abnormalities and handle according to workplace and regulatory requirements
- maintain the accuracy of cutting lines
- use equipment correctly
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisor or interacting with team members

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- personal hygiene, dropped meat and workplace health and safety procedures
- primal cutting lines as they relate to the structure of the large stock carcass
- regulatory, workplace and meat safety procedures and specifications
- boning procedure for cuts that is required to maximise yield for a given carcass
- procedure for removal of all forequarter primals to desired specifications
- carcass defects and the corrective action to be taken

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises

Competency must be demonstrated at the normal rate of production for that plant

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs

AMPA3051 Bone large stock carcass - hindquarter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to remove primal cuts from the hindquarter of large stock carcasses, including beef, horse and buffalo.

This unit is applicable to workers in boning rooms, food service operations, smallgoods plants, wholesale and retail operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify specifications for cuts	1.1 Identify specifications for hindquarter cuts, including those from the silverside, rumps and flanks, using cut descriptions according to regulatory requirements, customer and workplace requirements
2. Remove primal cuts from hindquarter of carcass	2.1 Remove primal cuts from the hindquarter including those from the silverside, rumps and flanks according to work instructions and specifications 2.2 Bone product in accordance with workplace health and safety requirements including the use of safe manual handling techniques and the safe and effective use of a knife 2.3 Cut primal lines in compliance with regulatory requirements 2.4 Deal with meat safety and quality hazards according to work instruction procedures 2.5 Cut primals to maximise yield
3. Identify and remove defects	3.1 Trim and deal with defects and contamination according to workplace requirements 3.2 Report persistent defects to supervisors in accordance with work instructions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPA3051 Bone large stock carcase - hindquarter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove primal cuts from the hindquarter of large stock carcasses, such as beef, horse and buffalo.

The candidate must:

- demonstrate procedure for boning a hindquarter into a broad range of primal cuts from the rump, silverside and flank of large stock in accordance with workplace requirements
- check and correct the accuracy of cutting lines
- use equipment safely and hygienically
- identify primals containing contamination or abnormalities and handle according to workplace and regulatory requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisors and interacting with team members.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- structure of the carcase as it relates to cutting lines
- personal hygiene and dropped meat procedures
- primal cutting lines as they relate to the structure of the carcase
- primal specifications
- procedure for cuts required to maximise yield for a given carcase
- procedure for the removal of all primals to desired specifications
- relevant workplace health and safety requirements.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA3052 Slice and trim large stock forequarter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to slice and trim forequarter cuts from large carcasses to specification.

This unit is applicable to workers in boning rooms, food services, smallgoods plants, wholesale and retail operations. The unit may be used for a variety of species.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element
1. Identify specifications for cuts	1.1 Determine specifications for cuts using cut descriptions according to regulatory requirements, customer and workplace requirements
2. Slice and trim forequarter primary meat cuts into finished meat cuts	2.1 Slice primary meat cuts into finished meat cuts according to specifications and work instructions 2.2 Slice primary meat cuts in accordance with workplace health and safety requirements including safe knife and manual handling techniques 2.3 Report persistent defects to supervisor in accordance with work instructions
3. Follow dropped meat procedures	3.1 Follow dropped meat procedures according to workplace requirements
4. Identify and remove defects	4.1 Identify, remove and report defects according to government regulations and workplace standards

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3057C Slice and trim large stock forequarter

Links

Assessment Requirements for AMPA3052 Slice and trim large stock forequarter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must slice and trim forequarter cuts from large carcasses to specification.

The candidate must:

- slice and trim all forequarter primals prepared at the workplace according to work instructions including those from the chuck, brisket, blade, spencer roll and chuck tender
- report defects according to work instructions promptly, accurately and clearly
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisors and interacting with team members
- follow dropped meat procedures according to workplace requirements.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- carcass anatomy of species as it relates to cutting lines
- how yield is calculated and why it is important
- personal hygiene and sanitation, and dropped meat procedures
- nature of defects that can occur on forequarters and the corrective action required for each
- workplace health and safety requirements for slicing
- product slicing and trimming requirements as identified in customer and workplace specifications.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA3053 Slice and trim large stock hindquarter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to slice and trim hindquarter cuts to specification, from large carcasses such as beef, horse and buffalo.

This unit is applicable to workers in boning rooms, food services, smallgoods plants, wholesale and retail operations. The unit may be used for a variety of species including cattle, buffalo, deer and horses.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Assessment Requirements for AMPA3053 Slice and trim large stock hindquarter

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must slice and trim hindquarter cuts to specification, from large carcasses such as beef, horse and buffalo.

The candidate must:

- slice and trim all hindquarter primals to work instructions including those derived from the flank, the knuckle, the silverside, the rump and the tenderloin
- accurately follow cutting lines according to specifications
- follow dropped meat procedures in accordance with workplace requirements
- meet workplace health and safety requirements, including safe knife and manual handling techniques
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- recognise and explain mathematical information contained in specifications.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- personal hygiene and sanitation and dropped meat procedures
- relevant specifications for the slicing and trimming of all hindquarter primals prepared in the workplace.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA3054 Break carcass using a bandsaw

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to break a carcass using a bandsaw.

This unit is applicable to workers in abattoirs, boning rooms, knackeries, food services, smallgoods plants, wholesale and retail operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX201 Prepare and operate a bandsaw

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify specifications for cuts	1.1 Determine specifications for cuts using cut descriptions according to regulatory requirements, customer specifications and workplace requirements.
2. Break carcass using a bandsaw	2.1 Position carcass securely and safely. 2.2 Split carcass, then remove shoulders, middles and legs according to work instructions and specifications. 2.3 Split carcass in accordance with workplace health and safety requirements including the use of safe manual handling techniques and the safe use of a bandsaw.
3. Identify and remove defects	3.1 Trim defects and contamination and deal with according to workplace requirements. 3.2 Report persistent defects to supervisors in accordance with work instructions.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA3054 Break carcass using a bandsaw

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must break a carcass using a bandsaw.

The candidate must:

- break a carcass using a bandsaw according to work instructions and specifications for one or more species
- apply workplace health and safety requirements
- check and adjust the accuracy of cutting lines
- use correct techniques for handling hot and/or chilled product
- identify primals containing a contamination or abnormalities and handle according to workplace and regulatory requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- workplace health and safety requirements relevant to the task
- cutting lines as they relate to the structure of the carcass
- dropped meat procedures
- how yield is calculated and why it is important
- procedure for removal of all primals to desired specifications
- work instructions for breaking a carcass in the workplace.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3061 Operate leg boning machine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a leg boning machine.

The candidate must:

- prepare leg boning machine for operation
- perform preparatory cuts according to work instructions
- trim defects as required in work instructions
- disassemble, clean, sanitise and maintain machine to workplace requirements
- operate boning machine including routine checks and maintenance included in workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisors and interacting with team members
- apply relevant regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- how yield is calculated and why it is important
- hygiene and sanitation requirements for the operation of a mechanical boner
- workplace health and safety requirements for mechanical boning, include emergency shut-down procedures
- specifications for mechanically boned leg product
- purpose and location of preparatory cuts on leg to be boned
- relevant regulatory requirements as they apply to the task
- work instructions relating to mechanical leg boning
- potential defects and explain their causes.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment Requirements for AMPA3063 Bone small stock carcase - shoulder

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently bone small stock carcase shoulders at production speed.

Candidates must:

- operate equipment in accordance with workplace requirements
- correctly identify the cut specifications
- bone the shoulder in accordance with workplace requirements
- check and correct, where necessary, the accuracy of cutting lines
- identify and remove defects
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- structure of the carcase and identify primal cutting lines
- procedure for removal of all primals to desired specifications
- sources of contamination and cross-contamination and the ways of minimising it
- importance of and technique required to maximise yield from a carcase
- work instructions and dropped meat procedures
- carcase defects and appropriate corrective actions.

Assessment Conditions

Competency must be demonstrated in an operating meat processing plant or facility at normal production speed.

Assessment must occur in a registered meat processing plant or facility.

As a minimum, the following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3065 Slice small stock carcase - shoulder

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must slice and trim the relevant cuts of meat from the shoulder of a small stock carcase.

The candidate must:

- slice and trim small stock shoulder as specified in the work instruction
- check and adjust the accuracy of small stock cutting lines
- identify primal cuts
- identify out-of-specification product
- apply relevant regulatory requirements
- report defects accurately, promptly and in accordance with work instructions
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisors and interacting with team members.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- basic anatomy relevant to cutting lines
- how yield is calculated and why it is important
- causes of defects and out-of-specification products
- relevant regulatory requirements.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3066 Slice small stock carcase - middle

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must slice and trim relevant cuts of meat from the middle (trunk) of a small stock carcase.

The candidate must:

- check and adjust the accuracy of small stock cutting lines
- identify primal cuts
- slice primary meat cuts into finished meat cuts following the work instruction and at production speed
- identify out-of-specification product
- apply relevant regulatory requirements
- report defects accurately, promptly and in accordance with work instructions
- apply relevant communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisors and interacting with team members.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- primal or sub primal cutting lines as they relate to workplace specifications and regulatory requirements
- basic anatomy relevant to cutting lines
- how yield is calculated and why it is important
- causes of defects and out-of-specification product
- workplace health and safety requirements
- relevant regulatory requirements.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AMPA3067 Bone carcass using mechanical aids (large stock)

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to remove all the primal cuts from a large stock carcass including those from beef, horse and buffalo while utilising mechanical aids.

This unit is applicable to workers in boning rooms, food service operations, smallgoods plants, wholesale and retail operations where a mechanical assisted boning system is utilised.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify specifications for cuts	1.1 Identify specifications for cuts including those from the hindquarter and forequarter using cut descriptions according to regulatory standards, customer and workplace requirements
2. Remove primal cuts from the carcass	2.1 Remove primal cuts from carcass including those from the hindquarter and forequarter according to work instructions and specifications 2.2 Bone product in accordance with workplace health and safety requirements including those associated with the activation and use of mechanical aids, safe manual handling techniques, and the safe and effective use of a knife 2.3 Cut primal lines in compliance with regulatory requirements 2.4 Deal with meat safety and quality hazards according to work instructions and workplace procedures 2.5 Cut primals to maximise yield 2.6 Follow workplace requirements for the activation and use of mechanical aids
3. Identify and remove defects	3.1 Trim and deal with defects and contamination according to workplace requirements 3.2 Report persistent defects to supervisors in accordance with work instructions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3066B Bone carcass using mechanical aids (large stock)

Assessment Requirements for AMPA3067 Bone carcass using mechanical aids (large stock)

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must remove all the primal cuts from a large stock carcass such as from beef, horse and buffalo while utilising mechanical aids.

The candidate must:

- confirm specifications including customer and workplace requirements
- demonstrate correct equipment set up, handling and basic maintenance requirements, where part of work instructions
- bone a carcass into a broad range of primal cuts from the forequarter and hindquarter in accordance with workplace requirements
- use mechanical aids in the boning process in accordance with workplace requirements
- identify contamination and handle according to workplace requirements
- check and correct the accuracy of cutting lines
- comply with workplace health and safety requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- structure of the carcass as it relates to cutting lines
- personal hygiene and dropped meat procedures
- primal cutting lines as they relate to the structure of the carcass
- primal specifications
- procedure for cuts required to maximise yield for a given carcass
- work instruction for the removal of all primals to desired specifications.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA3068 Prepare and despatch meat products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to assemble the product for despatch, supervise the preparation of the order, manage preparation of documentation and ensure regulatory requirements are met.

This unit is appropriate for all sectors of the meat industry where product is despatched.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify product required for meat product orders	1.1 Identify and label products in accordance with trade descriptions 1.2 Identify products in accordance with company requirements
2. Check customer requirements for delivery of order	2.1 Confirm customer requirements to determine product order delivery arrangements 2.2 Check customer requirements to confirm whether the order is domestic or export so as to comply with appropriate regulatory and importing country requirements 2.3 Confirm temperature and storage requirements for product order and arrange in accordance with workplace requirements
3. Arrange orders	3.1 Identify products for an order and confirm chiller location 3.2 Assemble product and check against documentation to ensure correct order is sent out 3.3 Prepare meat orders in accordance with workplace health and safety, hygiene and sanitation, Quality Assurance (QA) and regulatory requirements 3.4 Identify cartons and/or carcasses unsuitable for loadout and take appropriate action
4. Complete documentation	4.1 Correctly complete despatch documentation either manually or electronically to workplace and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3067A Prepare and despatch meat products

Assessment Requirements for AMPA3068 Prepare and despatch meat products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must assemble the product for despatch, supervise the preparation of the order, manage preparation of documentation and ensure regulatory requirements are met.

The candidate must:

- consistently and accurately identify and select products
- read and interpret customer specifications to check accuracy of product selection
- interpret and apply specified temperature and storage requirements
- identify defective product and take appropriate action
- follow relevant regulatory, workplace health and safety, and workplace requirements
- use communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs) to read and interpret customer specifications, confirm correct temperatures and complete required documentation.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- types of cartons and carcasses which are unsuitable for loadout
- export and domestic regulatory requirements related to the despatch of meat products
- procedures to deal with contingencies
- relevant security arrangements
- temperature requirements for despatch of product
- work instruction for preparing and despatching meat products.

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPA3069 Perform ante-mortem inspection and make disposition

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to detect abnormalities and diseases in one or more of the major livestock species (cattle, sheep and pigs) prior to slaughter. The skills component of this unit will be assessed for ante-mortem inspection of a specific species for which competency is demonstrated in the workplace and the outcome and the species will be recorded appropriately on the assessment sheet.

This unit is applicable to meat inspectors and/or stock handlers responsible for ante-mortem inspection.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element
1. Identify types of stock and market requirements of food animals commonly slaughtered for meat	1.1 Identify major breeds of commonly slaughtered domestic animals 1.2 Identify distinguishing features of major breeds 1.3 Identify market requirements of commonly slaughtered domestic animals
2. Identify the main reasons for ante-mortem inspection	2.1 Explain reasons for ante-mortem inspection 2.2 Identify regulatory requirements associated with ante-mortem inspection
3. Perform ante-mortem inspection on live animals	3.1 Identify and explain procedures and principles of humane handling of animals 3.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem 3.3 Identify procedures for humane destruction 3.4 Identify procedures for emergency and suspect slaughter 3.5 Perform ante-mortem inspection on at least one species according to relevant workplace health and safety and regulatory requirements 3.6 Identify Quality Assurance aspects of ante-mortem inspection
4. Identify and isolate animals requiring testing for residue	4.1 Explain reasons for residue testing 4.2 Follow procedures for identifying and isolating animals for testing
5. Make disposition as a result of inspection and take appropriate action	5.1 Detect, identify and document common diseases and conditions responsible for abnormalities on at least one species 5.2 Segregate suspect stock according to regulatory and workplace requirements 5.3 Identify signs of emergency or notifiable diseases 5.4 Follow emergency or notifiable disease procedures in accordance with regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3071C Perform ante-mortem inspection and make disposition

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AMPA3069 Perform ante-mortem inspection and make disposition

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform ante-mortem and post-mortem inspection to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- estimate size of stock pens
- estimate number and density of stock in a pen
- identify the common breeds of stock processed
- explain relevant animal identification systems that use brands, tags, tattoos and electronic identification devices
- identify common diseases and conditions in the species slaughtered at the workplace
- describe appropriate dispositions for common diseases and conditions in the species slaughtered at the workplace
- identify major emergency or notifiable diseases
- demonstrate procedures for humane handling of livestock
- perform ante-mortem inspection to Australian Standards and other relevant regulatory requirements on at least one major domestic food species in a workplace environment under normal operating conditions
- identify suspect animals that may be suffering from an emergency and notifiable disease on ante-mortem examination according to Australian Standards
- make disposition according to workplace and regulatory requirements
- report notifiable diseases promptly and accurately according to regulatory requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) including written and verbal reporting, communicating with other staff and regulatory authorities, interpreting and applying written guidelines
- perform tasks to workplace requirements
- work cooperatively with company stock handlers to ensure smooth flow of stock.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- regulatory requirements for suspect stock, hygiene and sanitation standards, and workplace standards associated with ante-mortem inspection
- segregation requirements for suspect animals
- sources of information to keep up-to-date with current theories or findings
- steps and procedures for emergency and suspect kill
- steps and procedures for humane destruction
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of common diseases and conditions found at ante mortem
- symptoms of major emergency/notifiable diseases (including Johne's Disease (JD))
- principles and procedures for humane handling of livestock
- regulatory requirements associated with emergency/notifiable diseases
- steps to be taken to notify of suspect emergency or notifiable disease.

Assessment Conditions

Competency in the practical aspects of this unit must be assessed under normal production conditions.

Assessment must include demonstration of competency in an operating abattoir. Assessment of the diagnosis of the less common conditions can be undertaken by simulation.

Candidates must be able to perform ante-mortem inspection on at least one species.

The identification of diseases and conditions in other species can be undertaken in a simulated situation utilising samples and photographs.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3071 Implement food safety program

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to maintain food safety in a meat processing plant.

This unit is applicable to those intending to work as supervisors, meat inspectors and Quality Assurance (QA) officers in meat processing plants.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify microbiological hazards for meat and meat safety	1.1 Identify types of micro-organisms (e.g. bacteria, virus, yeast and mould) 1.2 Identify major microbiological threats to meat (i.e. bacteria and relevant yeasts or moulds) and assess to determine the risk level and control requirements 1.3 Identify types of bacteria causing food poisoning and meat spoilage 1.4 Identify effects of bacterial contamination in relation to food poisoning (i.e. impact on people) and food spoilage (i.e. shelf life) 1.5 Identify sources of bacterial contamination 1.6 Identify and explain growth characteristics and requirements of bacteria 1.7 Identify Critical Control Points (CCP) and control points for prevention and control of bacterial contamination 1.8 Determine and implement control methods required to prevent or reduce microbiological hazards 1.9 Identify customer and regulatory requirements for microbiological contamination levels 1.10 Identify relevant microbiological tests and assess test results
2. Identify chemical hazards for meat and meat safety	2.1 Identify chemical hazards which may affect meat 2.2 Identify common sources of chemical hazards or contamination (e.g. cleaning chemicals and drug residues) and assess to determine the risk level and control requirements 2.3 Determine and implement control methods which prevent or reduce chemical contamination to acceptable levels including national programs (e.g. residue testing) 2.4 Explain effects of chemical residues on meat (e.g. poisoning, tainting, and rejections) 2.5 Identify chemical residue testing programs and level requirements
3. Identify physical hazards on meat and meat products	3.1 Explain physical hazards which may affect meat 3.2 Identify common sources of physical hazards and/or contamination and assess to determine the risk level and control

Element	Performance criteria
	requirements 3.3 Determine and implement control methods to prevent contamination reaching an unacceptable level 3.4 Explain effects of physical hazards on meat
4. Calibrate thermometers	4.1 Calibrate thermometers according to regulatory requirements
5. Identify the components of a Hazard Analysis Critical Control Point (HACCP)-based QA program for meat processing plants	5.1 Identify and explain regulatory basis for compliance with a HACCP-based QA program 5.2 Identify and explain steps in the development of a HACCP program 5.3 Identify nature and importance of work instructions or task descriptions and operating procedures and coach workers in their implications 5.4 Identify elements of a HACCP program 5.5 Identify nature and importance of Good Manufacturing Practices (GMP) and pre-requisite programs 5.6 Identify and explain mechanisms for validation, monitoring and verification
6. Conduct pre-operational hygiene check	6.1 Identify pre-operational checklists 6.2 Identify and explain corrective action procedures 6.3 Conduct pre-operational hygiene check
7. Conduct microbiological test swabbing	7.1 Identify appropriate microbiological testing regimes 7.2 Perform swabbing for microbiological testing according to workplace and regulatory requirements 7.3 Assess microbiological test results and where necessary take appropriate corrective action

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3073B Implement food safety program.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AMPA3071 Implement food safety program

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must maintain meat processing plant food safety within the scope of their daily work responsibilities.

The candidate must:

- identify and describe features of major types of micro-organisms affecting the meat industry
- undertake food safety hazard risk assessments
- conduct a pre-operational hygiene check
- conduct microbiological test swabbing to workplace and regulatory requirements
- interpret microbiological test results and take appropriate action
- complete hygiene/food safety reports as required by regulators or the enterprise
- identify and interpret relevant food safety regulations and Australian Standards
- identify and utilise sources of information
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- read, interpret and implement a food safety plan
- calibrate a thermometer
- use relevant problem-solving skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- major types and sources of microbial contamination
- aerobic and anaerobic requirements of micro-organisms
- growth traits of different types of micro-organisms
- habitat of different types of micro-organisms and their ability to survive outside the host animal
- bacterial contamination testing programs used in abattoirs

- how bacterial contamination can be prevented or limited
- how bacterial growth can be controlled
- how hazard risk assessment is undertaken
- effect each requirement has on microbial growth
- effects of incorrect removal of contamination
- effects on microbial growth of refrigeration and handling techniques
- effects on microbial growth of wet carcase surfaces
- impact of chemicals on meat and meat products
- importance of food chain security and the implications of a break down in control
- symptoms, effects and means of prevention of microbial infection contamination of meat
- major sources of physical contamination
- function of the elements of a HACCP-based QA system
- major chemical contamination control programs
- major sources of chemical contamination
- monitoring and control methods employed such as inspection and metal detectors
- relevant workplace health and safety, regulatory and workplace requirements
- elements of a HACCP-based QA program including hazard identification, control points, CCP, critical limits, control measures, preventative measures, GMP, pre-requisite programs, verification, monitoring, documentation and validation
- habitat of different types of micro-organisms and their ability to survive outside the host animal
- actions to prevent or limit physical and chemical contamination of meat
- conditions under which food poisoning occurs
- symptoms of bacterial food poisoning

Assessment Conditions

Competency must be demonstrated while complying with a current HACCP and approved program regulations in an operating meat processing plant.

Assessment must involve reference to an actual or simulated meat processing HACCP program.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

AMPA3072 Perform carcass Meat Hygiene Assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to monitor carcass hygiene.

This unit is applicable to workers monitoring carcass hygiene either on the slaughter floor or performing a pre-boning carcass assessment at either integrated or independent boning rooms.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor carcass product	1.1 Select samples for assessment according to the approved sampling plan for sample size and frequency 1.2 Conduct assessment utilising appropriate facilities, lighting and time 1.3 Monitor carcasses for defects according to the agreed criteria and classification 1.4 Scan carcasses using the approved scanning lines 1.5 Record defects accurately using the correct forms or electronic system 1.6 Implement immediate corrective action according to the Meat Hygiene Assessment (MHA) program's requirements 1.7 Monitor carcasses according to the workplace requirements for hygiene and sanitation, and workplace health and safety

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3074B Perform carcass meat hygiene assessment.

Assessment Requirements for AMPA3072 Perform carcass Meat Hygiene Assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must monitor carcass hygiene.

The candidate must:

- instigate corrective actions when appropriate
- monitor product for defects according to the MHA program
- calculate defect ratings
- record the monitoring results accurately
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- how carcass monitoring is to be undertaken
- how defect ratings are detected
- hygiene and sanitation requirements when monitoring product
- workplace health and safety requirements when monitoring product
- types of defects to be identified on carcass product
- when and how corrective actions are to be taken in response to monitoring outcomes
- how the approved sample plan is implemented for product monitoring
- classification of defects
- purpose of an MHA program
- relevant regulatory and workplace requirements

Assessment Conditions

Assessment must take place in a meat processing plant under real working conditions.

Competency must be demonstrated while complying with:

- Australian Government - Agriculture and/or state meat authority regulations
- company procedures

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3073 Perform process monitoring for Meat Hygiene Assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must monitor processes in a meat processing plant as part of a Meat Hygiene Assessment (MHA) program.

The candidate must:

- accurately gather monitoring data and calculate compliance ratings
- use weighting and cumulative scores to calculate compliance ratings
- identify when trigger points have been reached and corrective actions are to be implemented
- develop corrective actions
- liaise effectively with supervisors who are responsible for implementing corrective actions
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- hygiene and workplace health and safety requirements associated with process monitoring
- how the monitoring program is developed
- purpose and nature of work instructions and SOPs
- purpose of an MHA process monitoring program
- relevant regulatory and workplace requirement

Assessment Conditions

Assessment must take place in a meat processing plant under real working conditions.

Competency must be demonstrated while actually complying with:

- Australian Government - Agriculture and/or state meat authority regulations

- company procedures

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3074 Perform boning room Meat Hygiene Assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform quality control and Meat Hygiene Assessment (MHA) checks (or equivalent) on carton meat or offal for contamination or defects as part of a Quality Assurance (QA) program. It deals with the understanding and implementation of specifications, critical limits, tolerances and sampling programs.

This unit is applicable to QA staff responsible for MHA and quality control checks on carton meat and offal.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect samples of carton meat for defects	1.1 Take samples of product from each line of product according to a pre-determined sampling plan 1.2 Inspect sample for defects in accordance with regulatory and workplace requirements as established in a government approved Hazard Analysis Critical Control Point (HACCP) program 1.3 Report defects in accordance with workplace requirements
2. Assess samples against pre-determined defect tolerances	2.1 Assess levels of defects against established tolerances 2.2 Report samples outside tolerance to supervisor and take corrective action 2.3 Adhere to sampling program and record results according to workplace requirements 2.4 Keep sampling area clean and neat to avoid contamination between samples 2.5 Identify and follow dropped meat procedures according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3076B Perform boning room meat hygiene assessment.

Assessment Requirements for AMPA3074 Perform boning room Meat Hygiene Assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform quality control and Meat Hygiene Assessment (MHA) checks (or equivalent) on carton meat or offal for contamination or defects as part of a Quality Assurance (QA) program.

The candidate must:

- inspect, identify and record defects
- identify defects and explain the relevant critical limits and specifications
- interpret information including details of out of tolerance samples
- take corrective action if defect tolerances are exceeded
- follow re-inspection procedures to workplace requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- follow relevant workplace health and safety, hygiene and sanitation and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- defect tolerance
- relevant work instructions and SOPs
- procedures for reporting defects and samples outside tolerance
- sampling program and consequence of not following procedures
- relevant workplace health and safety requirements

Assessment Conditions

Assessment must take place in a meat processing plant under real working conditions.

Competency must be demonstrated while complying with:

- Australian Government - Agriculture and/or state meat authority regulations
- company procedures

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3081 Perform offal Meat Hygiene Assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to monitor hygiene assessment of offal.

This unit is applicable to workers performing offal product hygiene assessment on the slaughter floor or in dedicated offal rooms.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor offal	1.1 Select samples for assessment according to the approved sampling plan for sample size and frequency 1.2 Conduct assessment utilising appropriate facilities, lighting and time 1.3 Conduct assessment according to workplace requirements 1.4 Monitor offal for defects according to agreed criteria and classification 1.5 Record defects accurately using the correct forms or electronic system 1.6 Identify levels for triggering corrective actions 1.7 Implement immediate corrective action according to the Meat Hygiene Assessment (MHA) program's requirements 1.8 Monitor offal according to the workplace requirements for hygiene and sanitation, and workplace health and safety

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3077B Perform offal Meat Hygiene Assessment.

Links

Assessment Requirements for AMPA3081 Perform offal Meat Hygiene Assessment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must monitor hygiene assessment of offal.

The candidate must:

- monitor product for defects according to the MHA program
- record the monitoring results accurately
- calculate defect ratings
- instigate corrective actions when appropriate
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- how process compliance monitoring is to be undertaken
- how the approved sample plan is implemented for product monitoring
- hygiene and sanitation requirements when monitoring product
- workplace health and safety requirements when monitoring product
- types of defects to be identified in carcase, offal and carton product
- when and how corrective actions are to be taken in response to monitoring outcomes
- how defect ratings are detected
- classification of defects
- purpose of an MHA program
- relevant regulatory requirements

Assessment Conditions

Assessment must take place in a meat processing plant under real working conditions.

Competency must be demonstrated while actually complying with:

- Australian Government - Agriculture and/or state meat authority regulations
- company procedures

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3082 Operate batch cooker

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a batch cooker.

The candidate must:

- load and unload cooker to specifications, workplace and regulatory requirements
- manage quality and flow of raw materials
- test product samples to ensure cooked specifications
- monitor environmental emissions in accordance with workplace and regulatory requirements
- apply mathematical skills to monitoring procedures
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- workplace health and safety requirements of operating batch cooker
- operating principles and requirements of cooker
- Quality Assurance (QA) aspects of cooked product
- effects of overcooking
- implications on product quality and productivity of incorrect load in cooker

Assessment Conditions

Assessment must be conducted in a registered, operating meat rendering plant.

Competency must be demonstrated at the normal rate of production for that rendering plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3089 Produce rendered products hygienically

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must produce rendered product hygienically.

The candidate must:

- implement cleaning program
- apply relevant regulatory and workplace requirements
- consistently control bacteria in rendered products to workplace requirements
- identify production problems and out-of-specification product and take corrective action
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- assess hygiene risks and take preventative action

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- cleaning program for rendering process
- relevant regulatory and workplace requirements
- critical control points for monitoring hygiene and sanitation of the process
- micro-organisms affecting meat meal and the control measures for these

Assessment Conditions

Assessment must be conducted using meat and the meat by-products must be prepared to a specification.

Competency must be demonstrated over a period of time and at a relevant rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3090 Render edible products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate rendering equipment and produce an edible product.

This unit is applicable to workers in a meat rendering plant.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and maintain equipment	1.1 Perform pre-operational checks in accordance with workplace, health and safety and hygiene and sanitation requirements 1.2 Perform routine maintenance in accordance with workplace requirements
2. Monitor and control flow of raw materials	2.1 Monitor nature and quality of the raw materials to ensure compliance with workplace and regulatory requirements 2.2 Report defects in raw materials promptly and take corrective action in accordance with workplace requirements 2.3 Control flow of raw materials into bulk bins and/or the processing equipment in accordance with work instructions
3. Render edible product	3.1 Operate equipment in accordance with workplace regulations, workplace health and safety requirements and manufacturer's specifications 3.2 Render edible product to workplace and customer specifications 3.3 Perform routine monitoring, record keeping and sampling to ensure compliance with product specifications 3.4 Identify sources of potential contamination of the product and preventative and take corrective measures in accordance with work instructions 3.5 Maintain cleanliness of work area in accordance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3089C Render edible products.

Assessment Requirements for AMPA3090 Render edible products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate rendering equipment and produce an edible product.

The candidate must:

- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply the regulatory requirements for the rendering of the edible product
- identify production problems and out-of-specification product and take corrective action
- render product in accordance with work instructions, hygiene and sanitation and regulatory requirements
- sample and monitor product quality to ensure product meets workplace and customer requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- regulatory requirements for the rendering of the edible product
- operating and maintenance procedures for the rendering equipment
- relevant work instructions for the operation of the equipment
- workplace health and safety requirements for the operation of the rendering equipment
- relevant product specifications
- sampling and monitoring procedures relevant to the product
- possible sources of contamination of the product and the relevant preventative measures

Assessment Conditions

Assessment must be conducted using edible meat by-products prepared to a specification.

Competency must be demonstrated over a period of time and at a relevant rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3091 Implement a Quality Assurance program for rendering plant

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to implement a Quality Assurance (QA) program in a rendering plant.

This unit is applicable to workers in a rendering plant responsible for overseeing or being part of the implementation of a QA program.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement the QA program for the rendering plant	1.1 Clearly explain QA procedures and requirements to relevant personnel 1.2 Coach and monitor staff in the introduction of work instructions and operating procedures 1.3 Introduce and monitor verification and recording procedures 1.4 Conduct internal audit to validate the QA program

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3090B Implement a Quality Assurance program for rendering plant.

Links

Assessment Requirements for AMPA3091 Implement a Quality Assurance program for rendering plant

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must implement a Quality Assurance (QA) program in a rendering plant.

The candidate must:

- implement the QA program
- identify and implement corrective action
- verify the program using sampling, testing and auditing
- mentor staff implementing the procedures
- apply relevant communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hazards likely to be encountered in a rendering plant
- critical control points for QA monitoring
- process flow chart for the rendering operation
- relevant workplace health and safety, regulatory and workplace requirements
- verification and validation procedures

Assessment Conditions

Competency must be assessed in an operating rendering plant.

Competency must be demonstrated when implementing a functioning QA program.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3092 Grade beef carcasses using Meat Standards Australia standards

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to grade beef to Meat Standards Australia (MSA) standards.

It is an MSA requirement that enterprises with a Level 1 licence have company graders who have a Statement of Attainment in this unit of competency or an MSA approved equivalent unit.

The skills and knowledge gained from this unit allow AUSMEAT chiller assessors to grade beef to MSA standards. MSA grading can only be carried out in MSA licensed processing establishments.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply the MSA system	1.1 Identify consumer preferences for eating quality traits 1.2 Identify factors impacting on eating quality
2. Grade beef carcasses to MSA standards	2.1 Accurately identify and allocate reasons for non-compliance 2.2 Identify default inputs required for MSA grading 2.3 Assess maturity, MSA marbling, hump height, fat distribution and hide puller damage to MSA standards 2.4 Calibrate, maintain and operate equipment used for measuring ultimate pH and record calibration results 2.5 Measure ultimate pH 2.6 Identify hanging method 2.7 Record AUS-MEAT chiller assessment measurements of the carcass to be graded 2.8 Generate an eating quality outcome for graded carcasses
3. Operate MSA software and hardware to record grading details and generate eating quality outcomes	3.1 Access and operate MSA software and hardware 3.2 Enter, store, sort, retrieve, check and validate, interpret and forward data 3.3 Generate grading reports
4. Apply vendor declaration information to MSA grading	4.1 Identify and interpret essential information on vendor declarations and delivery paperwork 4.2 Manage MSA vendor declarations in accordance with the MSA Standards 4.3 Activate Data Capture Unit (DCU) defaults in accordance with the vendor declaration
5. Identify MSA graded carcass product to demonstrate traceability	5.1 Identify system for identifying graded product 5.2 Apply slaughter floor ticket information 5.3 Identify carcasses appropriately for carcass sorting and cuts harvesting
6. Adhere to the MSA Standards Manual	6.1 Complete all aspects of MSA grading in accordance with the Standards Manual and Licensing requirements 6.2 Grade carcasses according to the MSA system 6.3 Identify and resolve grading problems
7. Comply with	7.1 Comply with applicable workplace health and safety, workplace

Element	Performance criteria
workplace requirements	and regulatory requirements whilst grading

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3095B Grade beef carcasses using Meat Standards Australia standards.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5e2e56b7-698f-4822-84bb-25adbb8443a7>

Assessment Requirements for AMPA3092 Grade beef carcasses using Meat Standards Australia standards

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must grade beef to Meat Standards Australia (MSA) standards.

The candidate must be viewed by the assessor or in the workplace at least once.

The candidate must:

- demonstrate proficiency with all aspects of the DCU system
- demonstrate proficiency with all aspects of handling MSA grading data
- describe all carcass attributes that are collected
- accurately assess all carcass attributes required to generate an eating quality outcome
- apply an appropriate carcass identification system
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) and problem-solving skills
- apply relevant workplace health and safety, regulatory and workplace requirements
- maintain currency of knowledge through independent research or professional development
- apply all MSA grading reports

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- requirements of the MSA Standards Manual
- carcass hanging methods and their impact on eating quality
- importance of subcutaneous fat coverage
- the impact of hump height and tropical breed content on eating quality
- MSA marbling requirements
- Determining carcass maturity
- Determining hide puller damage requirements and the impact on eating quality

- essential operating conditions for use of the MSA system, including the equipment required for grading
- information on a carcass ticket that is necessary for MSA Grading
- MSA vendor declaration system
- relationship between DCU, plant boning runs, and cut x cook outcomes
- how ageing affects eating quality and how its effect is incorporated onto the MSA system
- MSA feedback requirements
- pH requirements and the impact on eating quality
- AUS-MEAT chiller assessment standards
- What a MQ4 score is and its relationship with MSA bands of eating quality
- link between carcass ticket information and grading results
- MSA minimum requirements
- Palatability Analysis Critical Control Points (PACCP) approach to eating quality
- relationship between cut and cooking method
- role of plant boning runs
- Minimum standards for MSA livestock eligibility minimum standards for MSA grader performance
- potential grading problems and suggest solutions
- MSA grading reports

Assessment Conditions

Competency is to be assessed in a representative workplace environment. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

AMPA3093 Use standard product descriptions - sheep and goats

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to utilise a standardised product description language such as AUS-MEAT.

This unit is designed to give workers in boning rooms an understanding of how a standardised product description system is used in a specific workplace. It can be used to improve the skills and knowledge of product description for packers, slicers and boners.

This unit does not have to be delivered as part of an AUS-MEAT Standards Officer course (language). However it does align with the AUS-MEAT Statement of Attainment for the Sheep Specification course.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify anatomical features of a sheep or goat carcass	1.1 Describe directions on a carcass using the anatomical direction format 1.2 Locate and identify bones relevant to meat specifications in a sheep or goat skeleton 1.3 Locate and identify relevant glands and cartilage on a sheep or goat carcass 1.4 Locate and identify muscles relevant to sheep or goat specifications
2. Identify and name meat products using the standard product description	2.1 Explain nature and format of product specifications 2.2 Correctly identify, name and spell meat products using the standardised cut description 2.3 Identify major muscles that make up each meat cut 2.4 Identify correct cutting lines for each product using the anatomical terms to describe cutting lines 2.5 Identify necessary changes required for any given meat product to comply with the company product description

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3099B Use standard product descriptions – sheep/goats.

Assessment Requirements for AMPA3093 Use standard product descriptions - sheep and goats

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must utilise a standardised product description language such as AUS-MEAT.

The candidate must:

- Identify anatomical features of a sheep or goat carcass
- Identify and name meat products using the standard product description
- undertake measurements and checking against specification requirements
- identify non-conforming product in accordance with specifications
- apply communication relevant to work instructions and Standard Operating Procedures (SOPs) and problem-solving skills
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- product specification requirements
- corrective action procedures for non-conforming product
- relevant workplace health and safety, regulatory and workplace requirements
- language specifications of sheep or goat product
- product specification points
- skeletal and anatomical structures and features of sheep or goat product to be specified

Assessment Conditions

Competency must be assessed in an operating meat processing plant.

Competency must be demonstrated when applying the language to actual carcasses and meat cuts.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3100 Perform manual chemical lean testing

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform chemical lean (CL) testing on carton meat.

This unit is applicable to workers in boning rooms taking samples and performing CL testing manually.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Take samples for testing	1.1 Select cartons for testing according to sampling plan 1.2 Handle cartons according to workplace hygiene and health and safety requirements 1.3 Identify products to be sampled 1.4 Take samples according to workplace requirements
2. Test samples	2.1 Perform pre-operational checks on scales according to workplace requirements 2.2 Blend meat samples according to workplace requirements 2.3 Tare scales or weigh beaker according to work instruction 2.4 Cook and weigh samples according to workplace requirements 2.5 Dispose of samples according to workplace requirements
3. Calculate CL	3.1 Calculate CL percentage using prescribed formula 3.2 Withhold or release cartons depending on CL results and workplace requirements 3.3 Record and report CL results according to workplace requirements 3.4 Identify corrective action and retesting requirements for out-of-specification product

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3107B Perform manual chemical lean testing.

Assessment Requirements for AMPA3100 Perform manual chemical lean testing

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform chemical lean (CL) testing on carton meat.

The candidate must:

- select, take, prepare and test samples according to workplace requirements
- accurately use the formula for calculating CL
- apply relevant regulatory requirements
- prepare and use testing scales and taring scales (if required) according to manufacturer's specifications and workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) and problem-solving skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- concept of CL and why it is important in specifications
- corrective actions required if CL results are not within specification
- work instruction for sampling and testing
- relevant regulatory requirements

Assessment Conditions

Assessment should be performed in an operating boning room and across the full range of product specifications.

Competency must be demonstrated at the normal speed of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3101 Overview of the NLIS for sheep and goats

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to work with the mob based National Livestock Identification System (NLIS) for sheep and goats.

This Unit is applicable for those purchasing livestock, receiving and managing livestock in lairage, livestock clerks, Quality Assurance managers, slaughter floor supervisors, reader and NLIS terminal operators on the slaughter floor, meat authority staff and auditors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Describe the history of the NLIS and its benefit to industry	1.1 Explain why the industry has implemented an NLIS for sheep and goats 1.2 Explain the benefits of the NLIS to industry
2. Describe the nature and function of a Property Identification Code (PIC)	2.1 Identify the component parts of a PIC 2.2 Explain the importance of the PIC to the NLIS
3. Describe and interpret the data contained on a National Vendor Declaration (NVD)	3.1 Explain the purpose of an NVD 3.2 Explain the information contained on an NVD 3.3 Interpret the importance of the various details on the NVD for an abattoir 3.4 Identify the various mistakes that can be made by producers when completing NVDs 3.5 Describe the actions that have to be taken when NVDs are incomplete or incorrectly filled in 3.6 Describe the path of the NVD from producer to processor
4. Complete a review of an NVD as received by a meat processor	4.1 Identify the important information on an NVD 4.2 Identify errors 4.3 Describe the corrective actions to be taken
5. Identify the various types of NLIS devices for sheep and goats	5.1 Explain the purpose of an NLIS device and the information on it 5.2 Identify and explain the purpose of breeder and post-breeder tags
6. Identify the various NLIS regulations that apply to producers, saleyards and meat processors	6.1 Identify and explain the role of the various bodies associated with the NLIS 6.2 Describe the NLIS regulatory obligations for slaughtering establishments 6.3 Describe the corrective action to be taken with untagged sheep 6.4 Describe the corrective action to be taken with untagged mobs
7. Describe the function of the kill sheet	7.1 Explain the purpose of a kill sheet and who prepares it 7.2 Identify the various component parts of a kill sheet and the information contained in it 7.3 Explain the importance of following the kill sheet schedule and

Element	Performance criteria
	of validating the kill sheet to the NLIS
8. Explain the role of Post-Sale Summaries (PSSs)	8.1 Explain why PSSs are forwarded to abattoirs 8.2 Explain how PICs are confirmed by abattoirs with the NLIS database

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3108A Overview of the NLIS for sheep and goats.

Assessment Requirements for AMPA3101 Overview of the NLIS for sheep and goats

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must work with the mob based National Livestock Identification System (NLIS) for sheep and goats.

The candidate must:

- describe the history of the NLIS and its benefit to industry
- describe the nature and function of a PIC
- describe and interpret the data contained on an NVD
- complete a review of an NVD as received by a meat processor
- identify the various types of NLIS devices for sheep and goats
- identify the various NLIS regulations that apply to producers, saleyards and meat processors
- describe the function of the kill sheet
- explain the role of Post Sale Summaries (PSSs)
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- the fundamental benefits of the NLIS to industry
- NLIS devices including RFIDS and boluses, and their purpose and function in the NLIS
- NLIS regulatory requirements in relation to abattoirs
- the function of NLIS devices
- the purpose of an NVD
- the information contained on an NVD
- the role of Post Sale Summaries (PSSs)

- the function of the kill sheet
- the purpose and types of ear tags for sheep and goats
- the data contained on a National Vendor Declaration
- purpose, nature of and regulations underpinning the use of PICs
- how to deal with problems originating from consignment PIC
- status, abbreviations and what they mean, and the required actions to be taken in response

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3102 Overview of the NLIS program utilising RFIDs

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to work with the National Livestock Identification System (NLIS), utilising data carried in a Radio Frequency Identification Device (RFID).

This Unit is applicable for those purchasing livestock, receiving and managing livestock in lairage, livestock clerks, Quality Assurance managers, slaughter floor supervisors, reader and NLIS terminal operators on the slaughter floor, meat authority staff and auditors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Describe the history of the NLIS and its benefit to industry	1.1 Explain why the industry has implemented an RFID based identification system 1.2 Explain the benefits of the NLIS to industry
2. Describe the nature and function of a Property Identification Code (PIC)	2.1 Identify the component parts of a PIC 2.2 Explain the business rules for the use of a PIC 2.3 Explain the importance of the PIC to the NLIS
3. Describe and interpret the data contained on a National Vendor Declaration (NVD)	3.1 Explain the purpose of an NVD 3.2 Explain the information contained on an NVD 3.3 Interpret the importance of the various details on the NVD for an abattoir 3.4 Identify the various mistakes that can be made by producers when completing NVDs 3.5 Describe the actions that have to be taken when NVDs are incomplete or incorrectly filled in 3.6 Describe the path of the NVD from producer to processor and the impact of incorrect information being recorded on the NVD
4. Complete a review of an NVD as received by a meat processor	4.1 Identify the important information on an NVD 4.2 Identify errors 4.3 Describe the corrective actions to be taken
5. Identify the various NLIS devices	5.1 Explain the purpose of an NLIS device and the information on it 5.2 Describe the relationship between an RFID and an NLIS identification device 5.3 Explain the difference between an RFID ear tag and bolus 5.4 Identify the factors that can influence the readability of an NLIS device
6. Identify the various NLIS regulations that apply to producers, saleyards and meat processors	6.1 Identify and explain the role of the key organisations associated with the NLIS 6.2 Describe the NLIS regulatory obligations for producers, saleyards and slaughtering establishments 6.3 Describe the corrective action to be taken with non-identified stock

Element	Performance criteria
	6.4 Describe the corrective action to be taken with non-reading devices
7. Describe the function of the kill sheet	7.1 Explain the purpose of a kill sheet and who prepares it 7.2 Identify the various component parts of a kill sheet and the information contained in it 7.3 Explain the importance of following the kill sheet schedule and of validating the kill sheet to the NLIS data gathered 7.4 Explain how untagged animals are dealt with prior to and during the slaughter process
8. Explain the role of Post-Sale Summaries (PSSs)	8.1 Explain what data is contained in a pre-sale catalogue and why it is important 8.2 Explain why PSSs are forwarded to abattoirs from saleyards 8.3 Explain how and why PICs are confirmed by abattoirs with the NLIS database

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3109A Overview of the NLIS program utilising RFIDs.

Assessment Requirements for AMPA3102 Overview of the NLIS program utilising RFIDs

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must work with the National Livestock Identification System (NLIS), utilising data carried in a Radio Frequency Identification Device (RFID).

The candidate must:

- describe the history of the NLIS and its benefit to industry
- describe the nature and function of a PIC
- describe and interpret the data contained on an NVD
- complete a review of an NVD as received by a meat processor
- identify the various NLIS devices
- identify the various NLIS regulations that apply to producers, saleyards and meat processors
- describe the function of the kill sheet
- explain the role of pre-sale catalogues and post-sale summaries
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- purpose and benefits of the NLIS to industry
- NLIS data base and its management
- NLIS devices including RFIDs and boluses, and their purpose and function in the NLIS
- NLIS regulatory requirements in relation to abattoirs
- purpose and types of NLIS tags for sheep and goats
- information printed on the NLIS cattle ear devices
- purpose, nature of and regulations underpinning the use of PICs

- how to deal with problems originating from consignment PIC
- purpose of an NVD
- information recorded on an NVD
- regulatory responsibilities of the various parties in the supply chain
- role of pre-sale catalogues and PSSs
- function of the kill sheet
- the function of post breeder tags
- status, abbreviations and what they mean, and the required actions to be taken in response

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3103 Manage NLIS data for livestock in lairage

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manage National Livestock Identification System (NLIS) data for stock identified with Radio Frequency Identification Devices (RFIDs) from the point of arrival at an abattoir and whilst they are in lairage.

This Unit is applicable for those managing and identifying livestock fitted with RFIDs in lairage.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3102 Overview of the NLIS program utilising RFIDs

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Receive stock	1.1 Receive accompanying documentation and check for completeness 1.2 Carry out physical check of received stock (head count) against the National Vendor Declaration (NVD), Post Sale Summary (PSS) or Waybill 1.3 Check PSS for statuses and implement company procedures where relevant
2. Check NLIS devices	2.1 Check for presence of NLIS devices 2.2 Implement workplace procedure for untagged stock 2.3 Record information for state jurisdictions (if required) 2.4 Notify state authority (if required) when non-compliance is detected
3. Communicate issues/matters arising to internal management	3.1 Use established workplace communication processes 3.2 Complete records of issues/matters arising and actions taken according to enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3110A Manage NLIS data for livestock in lairage.

Assessment Requirements for AMPA3103 Manage NLIS data for livestock in lairage

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manage (National Livestock Identification System (NLIS) data for stock identified with Radio Frequency Identification Devices (RFIDs) from the point of arrival at an abattoir and whilst they are in lairage.

The candidate must:

- receive stock
- check NLIS devices
- communicate issues/matters arising to internal management
- read and interpret a pre-sale catalogue or vendor declaration
- read and interpret an NVD and PSS
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to interact with agents or transporters, raise and explain issues and problems
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or Property Identification Codes (PICs)
- use mathematical skills to verify stock arriving against number listed on NVD/PSS
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including Radio Frequency Identification Devices (RFIDs) and boluses, and their purpose and function in the NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response

- how to deal with problems of original location

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

- confirm destination information
- complete purchase
- secure PSS or buyer's reconciliation report
- notify receiving plant of stock transfer details
- read and interpret a pre-sale catalogue
- read and interpret an NVD
- read and interpret a PSS
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to interact with agents, raise and explain issues and problems
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or PICs
- use mathematical skills to validate data on PSS
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- purpose, nature of and regulations underpinning the use of PICs
- role and responsibilities of regulators, and other bodies such as MLA in relation to NLIS

- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of original location

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3108 Manage NLIS for saleyard purchase of sheep or goats

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manage the National Livestock Identification System (NLIS) responsibilities for sheep or goats purchased at a saleyard, prior to their arrival at an abattoir.

This unit applies to stock buyers who are responsible for purchasing livestock from saleyards.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3101 Overview of the NLIS for sheep goats

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. ew and assess pre-sale information	1.1 Identify stock that meet the workplace or customer requirements prior to the sale
2. Confirm destination information	2.1 Ensure buyer's destination Property Identification Code (PIC) is known to the saleyard operators
3. Check the National Vendor Declaration (NVD)	3.1 Determine whether the mob is vendor-bred or non-vendor-bred 3.2 Conduct additional required checks for non-vendor bred sheep
4. Complete purchase	4.1 Confirm all required documentation is completed correctly 4.2 Complete purchase according to enterprise requirements
5. Secure Post Sale Summary (PSS) or buyer's reconciliation report	5.1 Check PSS for consistency with purchase decisions 5.2 Confirm that all National Vendor Declarations (NVDs) from which stock have been sourced are held by the agent 5.3 Obtain hard copies if required 5.4 Ensure PSS lists of mobs purchased are transferred to abattoir Property Identification Code (PIC) via NLIS account within the legal timeframe 5.5 Take corrective action as appropriate
6. Notify receiving plant of stock transfer details	6.1 Communicate stock transfer information according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3115A Manage NLIS for saleyard purchase of sheep or goats.

Assessment Requirements for AMPA3108 Manage NLIS for saleyard purchase of sheep or goats

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manage the National Livestock Identification System (NLIS) responsibilities for sheep or goats purchased at a saleyard, prior to their arrival at an abattoir.

The candidate must:

- view and assess pre-sale information
- confirm destination information
- check the NVD
- complete purchase
- secure PSS or buyer's reconciliation report
- notify receiving plant of stock transfer details
- read and interpret an NVD
- read and interpret a PSS
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to interact with agents, raise and explain issues and problems
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or PICs
- use mathematical skills to validate data on PSS
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the role of the NVD
- NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to producers, agents, saleyards and abattoirs
- purpose, nature of and regulations underpinning the use of PICs

- role and responsibilities of producers, agents, saleyards and abattoirs
- role and responsibilities of regulators, and other bodies such as Meat and Livestock Australia (MLA) in relation to NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of consignment PIC

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3109 Manage, report and upload NLIS slaughter data from RFIDs

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manage the reporting of slaughter data to the National Livestock Identification System (NLIS) data base.

This unit applies to Quality Assurance managers or livestock clerks who are responsible for reconciling actual slaughter data with the shift kill sheet. The unit also covers the uploading of data to the NLIS data base.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3102 Overview of the NLIS program utilising RFIDs

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Validate the kill sheet with slaughter floor staff	1.1 Liaise with slaughter staff floor to correct kill sheet discrepancies such as out of sequence stock, emergency kills, non-identified stock or non-reading devices 1.2 Validate slaughter numbers prior to upload of NLIS data
2. Upload data to the NLIS database	2.1 Access the NLIS database 2.2 Upload slaughter floor carcase feedback data
3. Check NLIS data upload history	3.1 Access the NLIS database 3.2 Ensure successful upload of data
4. Respond to email errors	4.1 Respond to emails from the NLIS database 4.2 View and respond to error reports 4.3 Resolve upload issues 4.4 Record and save resolution of errors 4.5 Implement corrective actions in response to ongoing non-compliance issues

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3116A Manage, report and upload NLIS slaughter data from RFIDs.

Assessment Requirements for AMPA3109 Manage, report and upload NLIS slaughter data from RFIDs

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manage the reporting of slaughter data to the National Livestock Identification System (NLIS) data base.

The candidate must:

- validate the kill sheet with slaughter floor staff
- upload data to the NLIS database
- check NLIS data upload history
- respond to email errors
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to:
 - validate the kill sheet
 - upload slaughter data to the NLIS database
 - resolve upload problems
 - raise and explain issues and problems with slaughter floor staff
- use negotiation skills to resolve issues
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- sources of errors with slaughter data
- NLIS uploading procedures
- NLIS rules for responding to error emails
- on-site data storage procedures

- status, abbreviations and what they mean, and the required actions to be taken in response

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3111 Conduct start up procedures and preoperational checks on slaughter floor NLIS data equipment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to conduct start-up procedures and undertake pre-operational checks on slaughter floor National Livestock Information System (NLIS) data equipment such as Radio Frequency Information Devices (RFID) readers and NLIS data terminals.

The unit is applicable to slaughter floor staff responsible for turning on RFID readers and NLIS data terminals and then conducting pre operational checks.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3102 Overview of the NLIS program utilising RFIDs

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement start-up procedures	1.1 Follow work and manufacturer's instructions to start-up readers and NLIS data terminals 1.2 Check back up reader
2. Perform pre-operational checks	2.1 Check operation of reader using test RFID 2.2 Check terminal is connected to RFID reader and server 2.3 Report issues promptly to relevant supervisors
3. Ensure testing and maintenance regimes	3.1 Check routine testing and maintenance of readers is being performed
4. Perform basic troubleshooting on hardware and software	4.1 Identify and isolate issue and check start-up procedures 4.2 Follow basic trouble shooting tests using workplace procedures and manufacturer's instructions
5. Implement corrective action when hardware or software fails	5.1 Inform all relevant staff when hardware or software fails 5.2 Implement fall-back plan including use of back-up readers and terminals 5.3 Instruct operators as to new arrangements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3118A Conduct start up procedures and preoperational checks on slaughter floor NLIS data equipment.

Assessment Requirements for AMPA3111 Conduct start up procedures and preoperational checks on slaughter floor NLIS data equipment

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must conduct start-up procedures and undertake pre-operational checks on slaughter floor National Livestock Information System (NLIS) data equipment such as Radio Frequency Information Devices (RFID) readers and NLIS data terminals.

The candidate must:

- perform start-up operations for RFID readers
- perform pre-operational checks
- ensure testing and maintenance regimes
- perform basic trouble shooting on hardware and software
- implement corrective action when hardware or software fails
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to interact with people such as maintenance staff, equipment providers, supervisors and other operators to overcome operating problems
- take appropriate steps to minimise workplace health and safety risks

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- start up procedures on readers and NLIS data terminals
- pre-operational checks on readers and NLIS data terminals
- manufacturer's instructions
- workplace procedures
- routine testing and maintenance requirements
- standard simple trouble shooting on software and hardware

- role and responsibilities of regulators, and other bodies such as MLA in relation to NLIS

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3112 Manage NLIS data from RFIDs on the slaughter floor

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to capture National Livestock Identification System (NLIS) data from Radio Frequency Identification Devices (RFIDs), record data and align NLIS details with carcase number.

This unit is used to train slaughter floor operators who undertake the collection of NLIS data on the slaughter floor from RFIDs.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3102 Overview of the NLIS program utilising RFIDs

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Start up readers and computer terminal	1.1 Follow workplace requirements to start up RFID readers and terminals including procedures for boot-up, ensuring main frame connection and log-in 1.2 Troubleshoot any problems with start up 1.3 Obtain kill sheet 1.4 Ensure consumables are available (e.g. carcass tickets)
2. Manage and monitor RFID reading process	2.1 Ensure RFIDs are being read 2.2 Check mobs against the kill sheet to ensure stock is in order, the right numbers, and in the right consignment sequence 2.3 Interpret screens and messages 2.4 Diagnose and resolve any issues rapidly 2.5 Immediately implement back-up system if main system appears to be failing or has failed 2.6 Liaise with kill floor supervisor and make corrections for mobs that are out of sequence 2.7 Maintain communication with on-floor staff
3. Take corrective actions when NLIS data is not read	3.1 Respond to non-readers by implementing workplace procedures to manually capture NLIS data 3.2 Implement workplace procedures for missing RFIDs 3.3 Manage multiple NLIS devices by implementing workplace procedures 3.4 Deal with rumen boluses that do not read by implementing workplace procedures
4. Respond to a carcass with an Extended Residue Program (ERP) status	4.1 Follow workplace procedures for dealing with a carcass with an ERP status alert 4.2 Report the status to slaughter floor supervisor 4.3 Implement company's procedures for monitoring and managing stock with a status
5. Follow break and end of shift procedures	5.1 Follow procedures for break and end of shift shut down
6. Validate shift slaughter details	6.1 Liaise with the livestock clerk to validate the slaughter floor data 6.2 Note and explain any differences between the kill sheet and

Element	Performance criteria
	slaughter operations 6.3 Diarise problems and resolve discrepancies of the shift such as missed bodies and animals out of order
7. Implement workplace procedures to deal with a software or hardware failure	7.1 Trouble shoot the problem 7.2 Implement corrective actions e.g. use wand reader if panel reader fails

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3119A Manage NLIS data from RFIDs on the slaughter floor.

Links

Assessment Requirements for AMPA3112 Manage NLIS data from RFIDs on the slaughter floor

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must capture National Livestock Identification System (NLIS) data from Radio Frequency Identification Devices (RFIDs), record data and align NLIS details with carcase number.

The candidate must:

- start up readers and computer terminal
- manage and monitor RFID reading process
- operate RFID readers and recorders
- check connection with terminal and server
- monitor RFID reader
- take corrective actions when NLIS data is not read
- respond to a carcase with an ERP status
- follow break and end of shift procedures
- validate shift slaughter details
- implement work place procedures to deal with a software or hardware failure
- read and interpret a kill sheet
- communicate clearly and with relevance to work instructions and Standard Operating Procedures (SOPs) with supervisors, livestock clerks and slaughter floor operators
- generate reports
- perform simple trouble shooting on software and hardware
- take appropriate steps to minimise workplace health and safety risks

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs

- purpose, nature of and regulations underpinning the use of PICs
- NLIS devices including Radio Frequency Identification Devices (RFIDs) and boluses, and their purpose and function in the cattle NLIS
- status, abbreviations and what they mean, and the required actions to be taken in response
- when and how tail tags are used
- start up procedures
- recognising and interpreting NLIS screens
- ERP status and responses
- corrective actions for non-readers, missing tags, out of order stock, multiple devices, boluses
- relevant work instructions and Standard Operating Procedures (SOPs)
- shut down procedures
- tailtag procedures

Assessment Conditions

Assessment must be completed in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3113 Prepare a kill sheet

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to prepare a kill sheet for a slaughter floor.

This unit is applicable to staff in a processing plant who are responsible for the preparation of a kill sheet which sets the order for processing livestock for a shift.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Review stock arrival documentation	1.1 Check all relevant paperwork has been received, e.g., National Vendor Declarations (NVDs) or Post-Sale Summaries (PSSs)
2. Prepare kill sheet	2.1 Prepare kill sheet according to workplace requirements and livestock advice 2.2 Liaise with livestock staff to determine correct order for stock presentation to slaughter 2.3 Ensure relevant staff receive kill sheet in a timely manner according to work place requirements
3. Make adjustments to the kill sheet throughout the day	3.1 Liaise with slaughter floor staff to ensure kill sheet is modified if stock are presented out of order, e.g. emergency kills 3.2 Modify kill sheet as and when livestock or on-floor issues alter the order or number of stock to be processed 3.3 Ensure relevant staff received modified kill sheets in a timely manner according to work place requirements
4. Identify NLIS requirements that apply to meat processors	4.1 Explain the company's NLIS reporting requirements 4.2 Ensure the kill sheet reconciliations are completed and enable an accurate upload of NLIS data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3120A Prepare a kill sheet.

Assessment Requirements for AMPA3113 Prepare a kill sheet

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must prepare a kill sheet for a slaughter floor.

The candidate must:

- review stock arrival documentation
- prepare kill sheet
- modify a kill sheet to meet changes to production scheduling
- make adjustments to the kill sheet throughout the day
- interpret an abattoir's kill sheet
- reconcile kill sheets at the end of production
- explain the importance of the Property Identification Code (PIC) and NVD
- read and interpret NVDs
- advise livestock and slaughter floor staff of changes in the kill sheet and provide support as required
- communicate relevant to work instructions and Standard Operating Procedures (SOPs) effectively with slaughter floor and livestock supervisors
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and reporting requirements, role in traceability
- NLIS status, abbreviations and what they mean, and the required actions to be taken in response
- regulatory requirements which impact on when stock must be presented for processing
- workplace requirements that impact on the order in which categories of stock are presented
- workplace arrangements for dealing with non-tagged animals
- kill sheet distribution requirements

- impact of kill sheet changes on lairage and production staff

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3114 Undertake pre slaughter checks of NVDs and PICs for NLIS for sheep and goats

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to undertake a pre-slaughter check of Post Sale Summaries (PSSs), National Vendor Declarations (NVDs) and Property Identification Codes (PICs) against the mob-based National Livestock Identification System (NLIS) database to verify the PICs and confirm eligibility of stock for slaughter.

These tasks are typically undertaken by a Quality Assurance manager or a livestock clerk reporting to a Quality Assurance manager. The work is undertaken prior to the preparation of a kill sheet to ensure that stock are eligible for slaughter according to regulatory and workplace requirements.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3101 Overview of the NLIS for sheep and goats

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Log-in to NLIS database	1.1 Access NLIS database 1.2 Troubleshoot accessing issues
2. Review NVDs	2.1 Review the NVDs against regulatory, market and workplace requirements
3. Check PICs against the NLIS database	3.1 Enter PICs to be checked against NLIS Database 3.2 Identify any invalid PICs and implement response action according to workplace procedures 3.3 Store records of checks according to workplace requirements
4. Implement response to any stock not eligible for slaughter	4.1 Inform appropriate Quality Assurance, lairage and production staff according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3121A Undertake pre slaughter checks of NVDs and PICs for NLIS for sheep and goats.

1	AMPv2.0	Initial release

Performance Evidence

The candidate must undertake a pre-slaughter check of Post Sale Summaries (PSSs), National Vendor Declarations (NVDs) and Property Identification Codes (PICs) against the mob-based National Livestock Identification System (NLIS) database to verify the PICs and confirm eligibility of stock for slaughter.

The candidate must:

- log-in to NLIS data base
- review NVDs
- check PICs against the NLIS data base
- implement response to any stock not eligible for slaughter
- conduct a PIC enquiry on the NLIS data base to check PIC
- store print outs and electronic records according to workplace requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to interact with producers, Quality Assurance and production staff
- use negotiation skills to resolve issues such as invalid PICs and NVD issues
- use mathematical skills to verify stock arriving against number listed on NVD/PSS
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS devices and their purpose and function in the NLIS
- NLIS regulatory requirements in relation to abattoirs
- the purpose and intent of NVDs
- the effect of an Livestock Producer Assurance (LPA) status
- what makes stock ineligible for slaughter

- purpose, nature of and regulations underpinning the use of PICs
- status, abbreviations and what they mean, and the required actions to be taken in response
- how to deal with problems of original location

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3115 Undertake pre slaughter checks of NVDs, PICs and RFIDs

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to undertake a pre-slaughter check of National Vendor Declarations (NVDs) and Property Identification Codes (PICs) against the National Livestock Identification System (NLIS) database and where appropriate to identify stock with an actual or potential Extended Residue Program (ERP) status.

These tasks are typically undertaken by a Quality Assurance manager or a livestock clerk reporting to a Quality Assurance manager. The work is undertaken prior to the preparation of a kill sheet to ensure that where appropriate stock that have a potential residue issue are dealt with according to regulatory and workplace requirements.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3102 Overview of the NLIS program utilising RFIDs

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Log-in to NLIS database	1.1 Access NLIS database 1.2 Troubleshoot accessing issues
2. Review NVDs and/or Post-Sale Summary (PSS)	2.1 Review the NVDs against regulatory, market and workplace requirements 2.2 Enter PICs off NVDs into the NLIS Database 2.3 Print NVDs results and store 2.4 Review PSSs for any statuses
3. Check PICs against the NLIS database	3.1 Identify any invalid PICs and implement response action according to workplace procedures 3.2 Identify relevant Early Warning (EW) status 3.3 Identify ERP status 3.4 Identify LPA status 3.5 Verify Life-Time (LT) status where required 3.6 Identify test requirements
4. Implement response to EW or ERP status	4.1 Interpret the requirements for an EW or ERP status 4.2 Inform appropriate Quality Assurance, lairage and production staff according to workplace requirements
5. Review status of cattle on an abattoir's PIC	5.1 Access NLIS database where applicable and review the status of cattle on the abattoir PIC

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3122A Undertake pre slaughter checks of NVDs, PICs and RFIDs.

Assessment Requirements for AMPA3115 Undertake pre slaughter checks of NVDs, PICs and RFIDs

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must undertake a pre-slaughter check of National Vendor Declarations (NVDs) and Property Identification Codes (PICs) against the National Livestock Identification System (NLIS) database and where appropriate to identify stock with an actual or potential Extended Residue Program (ERP) status.

The candidate must:

- log-in to NLIS database
- review NVDs and/or PSS
- check PICs against the NLIS database
- implement response to EW or ERP status
- review status of cattle on an abattoir's PIC
- interrogate the NLIS database to check PICs, current holdings on abattoir PIC
- store print outs and electronic records according to workplace requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to interact with lairage, Quality Assurance and production staff
- use negotiation skills to resolve issues such as problems with original location, incomplete NVDs or Property Identification Codes (PICs)
- use mathematical skills to verify stock arriving against number listed on NVD/PSS
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS regulatory requirements in relation to abattoirs
- NLIS devices including Radio Frequency Identification Devices (RFIDs) and boluses, and their purpose and function in the NLIS

- NLIS Database Helpline contact details
- purpose, nature of and regulations underpinning the use of PICs
- status, abbreviations and what they mean, and the required actions to be taken in response, including:
 - purpose and intent of NVDs
 - effect of an LPA status
 - nature of an Early Warning (EW) status
 - workplace response to an EW status
 - nature of an Extended Residue Program (ERP) status
 - regulatory and workplace response to an ERP status

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3116 Supervise meat packing operation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to oversee and supervise the packing of meat products in accordance with regulatory, workplace and customer requirements.

This unit is applicable for supervisors and team leaders on slaughter floors (where meat is packed), boning rooms, offal rooms, tripe rooms, pet food premises and food service operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check and prepare packing area	1.1 Check packing area for hygiene and operational requirements prior to commencing work, in accordance with workplace and regulatory requirements 1.2 Ensure required packaging materials are correctly selected and are in place 1.3 Ensure team members are in allocated positions and prepared
2. Check product instructions and specifications prior to operation	2.1 Ensure product specifications are clearly identified 2.2 Ensure packers are aware of packing specifications
3. Oversee packing process	3.1 Check packaging for defects and take corrective action where necessary 3.2 Monitor production speed and make adjustments where required 3.3 Monitor workplace health and safety requirements and make adjustments where required 3.4 Regularly check packaged product against customer and workplace specifications and take corrective action where necessary 3.5 Regularly check labelling for accuracy and positioning and make adjustments where required 3.6 Ensure out of specification products are handled according to workplace requirements
4. Provide support to team members	4.1 Provide guidance and support to individual team members where necessary 4.2 Monitor speed and accuracy of team members and provide additional guidance and support where necessary 4.3 Ensure new staff receive additional support where required 4.4 Use communication skills to give clear instructions and advice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA3116 Supervise meat packing operation

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must oversee and supervise the packing of meat products in accordance with regulatory, workplace and customer requirements.

The candidate must:

- check and prepare packing area
- perform pre-operational hygiene check
- check product meets specifications prior to packing and take corrective action where necessary
- oversee packing process to ensure process runs smoothly
- oversee hygiene requirements during production and ensure compliance with workplace requirements
- provide support to team members including advice, guidance and additional assistance where required
- ensure packaged product meets customer and workplace specifications
- read and interpret product and packaging specifications and product labels
- ensure team compliance with workplace health and safety requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- monitor quality control

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- labelling systems used in the workplace
- relevant workplace health and safety and regulatory requirements
- the nature and sources of micro, physical and chemical contamination
- hygiene and sanitation requirements of the packaging process
- team member roles and responsibilities

- workplace requirements for handling defective packaging, contamination product and out-of-specification product

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3117 Overseer product loadout

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to supervise the loading of meat products onto trucks and/or containers.

This unit is applicable to loading out product from abattoirs, boning rooms, smallgoods plants, wild game depots, game processing plants, food services and wholesaling operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and check products to be loaded	1.1 Check that identified product has been correctly selected, is complete, and meets workplace requirements and customer specifications 1.2 Check temperature records to ensure that product meets workplace and customer requirements 1.3 Check brands or labels against order 1.4 Ensure packaging is intact 1.5 Ensure re-packs meet company and regulatory requirements 1.6 Check that loadout area and equipment meet workplace health and safety and regulatory requirements 1.7 Check that transportation vehicle or container meets hygiene and sanitation, workplace health and safety and regulatory requirements 1.8 Take corrective action where necessary
2. Monitor loadout process	2.1 Ensure required temperatures are maintained 2.2 Ensure product is loaded according to workplace health and safety, workplace and regulatory requirements 2.3 Check loadout documentation for accuracy and completeness 2.4 Identify and resolve problems to ensure safe and efficient loadout processes are in place and followed 2.5 Meet security requirements for products (e.g. seals on trucks and containers) in accordance with regulatory requirements 2.6 Ensure loadout area is kept clean and tidy and clear of obstructions 2.7 Provide advice and support to team members where necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA3117 Oversee product loadout

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must supervise the loading of meat products onto trucks and/or containers.

The candidate must:

- consistently ensure products to be loaded meet workplace and customer specifications
- conduct checks on product, labels, loadout area and transportation vehicles to ensure accuracy, compliance with hygiene and sanitation, workplace health and safety and regulatory requirements
- monitor loadout process to ensure smooth running of process and compliance with workplace requirements
- identify problems and take appropriate corrective action
- oversee re-pack operations
- ensure loadout documentation is accurate and complete
- monitor product security
- provide support to team members where required
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- relevant workplace, health and safety and regulatory requirements
- loadout documentation
- labelling requirements
- problems likely to arise during the loadout process (e.g. weather conditions, dropped product, incorrect labels) and the corrective actions to be taken

Assessment Conditions

Assessment must be conducted in the loadout area of a registered operating meat processing plant, game depot, food service or wholesaling operation.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3118 Monitor pH and temperature decline

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to conduct pH and temperature declines and weekly monitoring, as well as to validate results to ensure conformance to the pH and temperature window.

It is a licence requirement for Meat Standards Australia (MSA) enterprises to achieve the pH and temperature window.

This unit is for Quality Assurance Officers who have responsibility for monitoring pH or temperature window to AUS-MEAT and MSA standards. This unit is suitable for people working in Quality Assurance (QA) or a company grading role.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Explain purpose of pH monitoring	1.1 Explain nature and purpose of pH monitoring 1.2 Explain the impact stress in an animal can have on pH 1.3 Explain the pH/temperature window and its importance to meat quality 1.4 Explain relationship of pH and temperature window to MSA standards (if applicable) 1.5 Explain the concepts of hot and cold shortening and the impact on meat quality 1.6 Describe corrective actions which can be taken if window performance is not achieved 1.7 Describe the process for pH and temperature monitoring 1.8 Explain hygiene and sanitation, contamination, and workplace health and safety considerations associated with pH and temperature decline monitoring
2. Conduct monitoring of the pH or temperature window	2.1 Demonstrate correct technique for pH and temperature measurement according to workplace requirements 2.2 Collect necessary information for validating monitoring 2.3 Collect valid and sufficient readings 2.4 Record and report results

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Assessment Requirements for AMPA3118 Monitor pH and temperature decline

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must conduct pH and temperature declines and weekly monitoring, as well as validate results to ensure conformance to the pH and temperature window.

The candidate must:

- collect information on live animals to be used in pH and temperature monitoring
- conduct monthly and weekly monitoring of the pH and temperature window
- consistently collect valid information and readings
- observe, time and follow carcasses through the slaughter floor recording the following:
 - carcass information
 - chiller number
 - immobiliser information (if applicable)
 - rigidity probe information (if applicable)
 - stimulation information (if applicable)
 - time into the chiller
 - time stunned
- analyse results to verify conformance
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- identify and apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the scope and nature of MSA standards
- how electrical stimulation impacts on pH decline
- impact chilling factors have on the rate of pH and temperature decline
- how the time it takes a carcass to reach the chiller can impact on the rate of pH decline

- pH and temperature window
- how cold shortening occurs and the characteristics of cold shortened product
- how heat shortening occurs and the characteristics of heat shortened product
- how other electrical inputs can impact on the rate of pH decline
- the impact the temperature of the slaughter floor can have on the rate of the pH and temperature decline
- what glycogen is and the relationship between stress and pH
- what pH is and why pH is important for eating quality

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

The application of competency is to be assessed in the workplace. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3119 Apply food animal anatomy and physiology to inspection processes

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to apply knowledge of the anatomy and physiology of food animals in recognition of diseases and undertaking meat inspection procedures.

This unit is suitable for students undertaking meat safety (inspection) training and is a prerequisite for the post mortem inspection units in the Australian Meat Industry Training Package.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Describe the physiology and anatomy of food animals as they relate to meat inspection	1.1 Describe the cells, body tissue and general body plan of food animals 1.2 Describe the skeletal and muscular system of food animals 1.3 Explain the blood and circulatory system 1.4 Explain and describe the lymphatic system of food animals 1.5 Describe the respiratory system 1.6 Describe the digestive system 1.7 Describe the excretory system 1.8 Describe the reproductive system 1.9 Describe the nervous system 1.10 Explain the function of skin and the endocrine glands
2. Describe the nature, signs and causes of pathology in food animals	2.1 Identify the nature, signs and causes of inflammation 2.2 Identify the nature and causes of physical abnormalities 2.3 Describe the nature and causes of neoplasms 2.4 Describe the ways in which food animals can be poisoned and the signs of poisoning 2.5 Describe the common microbiological diseases found in food animals 2.6 Describe the nature, life cycle and signs of common parasitic diseases in food animals
3. Apply knowledge of anatomy and physiology to the interpretation of post mortem procedures	3.1 Identify the physiological and anatomical features required to be inspected in the Australian Standard for the major food species 3.2 Identify abnormalities that may impact on food safety and wholesomeness of meat

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Assessment Requirements for AMPA3119 Apply food animal anatomy and physiology to inspection processes

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be able to apply knowledge of food animal anatomy and physiology at a production speed when conducting inspections.

The candidate must:

- identify the major elements of the skeletal and muscular system of a food animal species
- identify the major lymph nodes on a food animal species
- identify the major elements of the respiratory system of food animal species
- identify the major elements of the digestive and excretory system of food animals
- identify the major elements of the reproductive system of food animals
- identify signs of inflammation
- apply knowledge of the anatomy and physiology of food animals when interpreting post mortem inspection requirements as set out in the Australian Standard, importing country requirements, work instructions and Standard Operating Procedures
- interpret the impact of diseases and conditions on the wholesomeness of meat

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the skeletal and muscular system of food animals
- the lymph nodes on a food animal
- the respiratory system of food animals
- the digestive and excretory system of food animals
- the cells, body tissue and general body plan of food animals
- the excretory system of food animals
- the reproductive system of food animals
- the nervous system of food animals
- the function of skin and the endocrine glands
- the function of blood and circulatory system

- the function of lymphatic system of food animals
- the nature, signs and causes of inflammation
- the nature and causes of physical abnormalities
- the nature and causes of neoplasms
- the signs and causes of poisoning in animals
- the common microbiological diseases in food animals
- the nature, life cycle and signs of common parasitic diseases in food animals

Assessment Conditions

Competency must be demonstrated on the actual carcase and viscera of at least one species of food animal as well as models or diagrams of the other food animal species.

Assessment may occur in the work place or in a suitable teaching environment for the handling of carcasses and viscera.

A minimum of three different forms of assessment must be used. These should include:

- a written examination of knowledge
- physical demonstration of the ability to identify physiological and anatomical features of an actual carcase and viscera for one species
- identification of physiological and anatomical features on other species from images and diagrams

Assessors must satisfy the current standards for RTOs.

AMPA3120 Perform ante and post-mortem inspection - Ovine and Caprine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform ante-mortem and post mortem inspection duties on lambs, sheep and/or goats in an abattoir in accordance with the Australian Standard.

This unit is applicable to those who seek employment and registration as a meat inspector in either the domestic or export processing sectors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen Knives

AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify breeds and types of sheep and/or goats and describe market requirements	1.1 Identify major breeds of commonly slaughtered sheep or goats 1.2 Identify distinguishing features of major breeds 1.3 Describe market requirements for sheep or goats
2. Identify the main reasons for ante-mortem inspection	2.1 Explain reasons for ante-mortem inspection 2.2 Identify regulatory requirements associated with ante-mortem inspection
3. Perform ante-mortem inspection on lambs or sheep or goats	3.1 Identify and explain procedures and principles of humane handling of lambs, sheep or goats 3.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem 3.3 Identify procedures for humane destruction 3.4 Identify procedures for emergency and suspect slaughter 3.5 Perform ante-mortem inspection on lambs or sheep according to relevant workplace health and safety and regulatory requirements 3.6 Identify Quality Assurance aspects of ante-mortem inspection
4. Make disposition as a result of inspection and take appropriate action	4.1 Identify and describe common diseases and conditions responsible for abnormalities in lamb, sheep or goats 4.2 Segregate suspect stock according to regulatory and workplace requirements 4.3 Identify signs of emergency or notifiable diseases 4.4 Describe emergency or notifiable disease procedures as set out in the relevant regulations
5. Identify base anatomical structure systems of sheep and or goats	5.1 Identify organs of ovine/caprine species 5.2 Identify and explain lymphatic, circulatory, digestive, urinary, nervous and respiratory systems 5.3 Identify basic skeletal structure of ovine/caprine species
6. Identify the main reasons for post-mortem inspection	6.1 Identify reasons for post-mortem inspection 6.2 Identify regulatory requirements associated with post-mortem inspection

Element	Performance criteria
7. Perform post-mortem inspection of ovine/caprine species	7.1 Follow procedures for post-mortem inspection 7.2 Identify and detect abnormalities 7.3 Perform post-mortem inspection on at least one species (ovine or caprine) in accordance with regulatory requirements, hygiene and sanitation requirements and workplace health and safety requirements, in a work environment and under normal production conditions 7.4 Identify Quality Assurance (QA) issues of post-mortem inspection
8. Make disposition	8.1 Identify, detect and document common diseases and conditions responsible for abnormalities for at least one species 8.2 Identify and explain symptoms of emergency diseases
9. Treat affected carcass appropriately	9.1 Treat carcass in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements 9.2 Demonstrate anatomical knowledge of carcass in the disposition process
10. Monitor stunning and slaughter of animals	10.1 Identify requirements for effective stunning and slaughter 10.2 Check that animals are stunned and bled according to workplace and regulatory requirements 10.3 Ensure corrective action is taken in the event of ineffective stunning or bleeding
11. Describe the procedures followed for retained carcass on the slaughter floor	11.1 Identify and describe procedures for retained carcass as set out workplace and regulatory requirements
12. Identify and use Personal Protective Equipment (PPE) required to perform post-mortem inspection	12.1 Identify and describe equipment for post-mortem inspection 12.2 Use equipment in accordance with QA and workplace requirements 12.3 Use, maintain and store PPE to workplace health and safety requirements
13. Take pathological and residue samples to assist in determining disposition	13.1 Identify lesions and tissues necessary for determining dispositions 13.2 Collect and submit specimens according to workplace procedures 13.3 Interpret results 13.4 Retain carcasses awaiting results according to workplace procedures

Assessment Requirements for AMPA3120 Perform ante and post-mortem inspection - Ovine and Caprine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform the ante-mortem and post-mortem inspection of lambs, sheep and or goats to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- perform ante-mortem inspection in accordance with the Australian Standard and where relevant other importing country requirements
- describe principles and procedures for humane handling
- identify common diseases and conditions found at ante-mortem
- describe symptoms of emergency or notifiable diseases
- make correct dispositions for the emergency, notifiable and common diseases and conditions found at ante mortem in accordance with the Australian Standard
- segregate suspect animals in accordance with the Australian Standard and/or importing country requirements
- identify the steps and procedures for humane destruction, emergency and suspect kills
- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe the symptoms of emergency and notifiable diseases found at post mortem
- make correct dispositions for the common, emergency and notifiable diseases and conditions in accordance with the Australian Standard
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor restraint, stunning and bleeding in order to detect, assess and report animal welfare issues
- take and dispatch samples for mandated testing

- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of lambs, sheep and or goats
- the Australian Standard procedures for the ante and post mortem inspection of lambs, sheep and or goats
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- humane and efficient slaughtering techniques including restraint, stunning and bleeding
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and workplace requirements
- role of equipment for meeting hygiene and sanitation and workplace requirements
- correct technique for incision of parts and organs
- procedures for disposal of condemned carcass
- procedures for identifying, collecting and submitting specimens
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of common diseases and conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant

Assessment Conditions

Assessment of ante and post mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected). The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases

- on-the-job assessment with assessor observation

Assessors must satisfy the current standards for RTOs.

AMPA3121 Perform ante and post-mortem inspection - Bovine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform ante-mortem and post mortem inspection duties on calves, steers, cows or bulls in an abattoir processing cattle and/or Asian buffalo in accordance with the Australian Standard.

This unit is applicable to those who seek employment and registration as a meat inspector in either the domestic or export processing sectors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen Knives

AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify breeds and types of cattle and describe market requirements	1.1 Identify major breeds of commonly slaughtered cattle 1.2 Identify distinguishing features of major breeds 1.3 Describe market requirements for cattle
2. Identify the main reasons for ante-mortem inspection	2.1 Explain reasons for ante-mortem inspection 2.2 Identify regulatory requirements associated with ante-mortem inspection
3. Perform ante-mortem inspection on cattle and/or buffalo	3.1 Identify and explain procedures and principles of humane handling of cattle and/or buffalo 3.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem 3.3 Identify procedures for humane destruction 3.4 Identify procedures for emergency and suspect slaughter 3.5 Perform ante-mortem inspection on cattle and/or buffalo according to relevant workplace health and safety and regulatory requirements 3.6 Identify Quality Assurance aspects of ante-mortem inspection
4. Make disposition as a result of inspection and take appropriate action	4.1 Identify and describe common diseases and conditions responsible for abnormalities in cattle and/or buffalo 4.2 Segregate suspect stock according to regulatory and workplace requirements 4.3 Identify signs of emergency or notifiable diseases that could be seen at ante-mortem 4.4 Describe emergency or notifiable disease procedures as set out in the relevant regulations
5. Identify base anatomical structure systems of cattle or buffalo	5.1 Identify organs of cattle and/or buffalo 5.2 Identify and explain lymphatic, circulatory, digestive, urinary, nervous and respiratory systems 5.3 Identify basic skeletal structure of cattle and/or buffalo
6. Identify the main reasons for post-mortem inspection	6.1 Identify reasons for post-mortem inspection. 6.2 Identify regulatory requirements associated with post-mortem inspection.

Element	Performance criteria
7. Perform post-mortem inspection of cattle or buffalo	7.1 Follow procedures for post-mortem inspection 7.2 Identify and detect abnormalities 7.3 Perform post-mortem inspection on at least one species (cattle or buffalo) in accordance with regulatory requirements, hygiene and sanitation requirements and workplace health and safety requirements, in a work environment and under normal production conditions 7.4 Identify Quality Assurance (QA) issues of post-mortem inspection
8. Make disposition	8.1 Detect and identify common diseases and conditions responsible for abnormalities for at least one species (cattle or buffalo) 8.2 Identify and explain symptoms of major emergency diseases
9. Treat affected carcass appropriately	9.1 Treat carcass in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements 9.2 Demonstrate anatomical knowledge of carcass in the disposition process
10. Monitor stunning and slaughter of animals	10.1 Identify requirements for effective stunning and slaughter 10.2 Ensure animals are stunned and bled according to workplace and regulatory requirements 10.3 Take corrective action in the event of ineffective stunning or bleeding
11. Describe the procedures followed for retained carcass on the slaughter floor	11.1 Identify and describe procedures for retained carcass in accordance with workplace and regulatory requirements
12. Identify and use Personal Protective Equipment (PPE) required to perform post-mortem inspection	12.1 Identify and explain the purpose of the PPE required for post-mortem inspection 12.2 Use equipment in accordance with QA and workplace requirements 12.3 Use, maintain and store Personal Protective Equipment (PPE) in accordance with workplace health and safety requirements
13. Take pathological and residue samples to assist in determining disposition	13.1 Identify lesions and tissues necessary for determining dispositions 13.2 Collect and submit specimens according to workplace procedures 13.3 Interpret results 13.4 Retain carcasses awaiting results according to workplace procedures

Assessment Requirements for AMPA3121 Perform ante and post-mortem inspection - Bovine

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform the ante-mortem and post-mortem inspection of cattle and/or buffalo to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- perform ante-mortem inspection in accordance with the Australian Standard and where relevant other importing country requirements
- describe principles and procedures for humane handling
- identify common diseases and conditions found at ante-mortem
- describe symptoms of emergency or notifiable diseases
- make correct dispositions for the emergency, notifiable and common diseases and conditions found at ante mortem in accordance with the Australian Standard
- segregate suspect animals in accordance with the Australian Standard and / or importing country requirements
- identify the steps and procedures for humane destruction, emergency and suspect kills
- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe the symptoms of emergency and notifiable diseases found at post mortem
- make correct dispositions for the common, emergency and notifiable diseases and conditions in accordance with the Australian Standard
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor restraint, stunning and bleeding in order to detect, assess and report animal welfare issues
- take and dispatch samples for mandated testing

- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of cattle and/or buffalo
- the Australian Standard procedures for the ante and post mortem inspection of cattle and/or buffalo
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- humane and efficient slaughtering techniques including restraint, stunning and bleeding
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and workplace requirements
- role of equipment for meeting hygiene and sanitation and workplace requirements
- correct technique for incision of parts and organs
- procedures for disposal of condemned carcass
- procedures for identifying, collecting and submitting specimens

Assessment Requirements for AMPA3124 Perform ante and post-mortem inspection - Ratites

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform ante-mortem and post-mortem inspection of ratites to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- perform ante-mortem inspection in accordance with the Australian Standard and where relevant other importing country requirements
- describe principles and procedures for humane handling
- identify common diseases and conditions found at ante-mortem
- describe symptoms of emergency or notifiable diseases
- make correct dispositions for the emergency, notifiable and common diseases and conditions found at ante mortem in accordance with the Australian Standard
- segregate suspect animals in accordance with the Australian Standard and/or importing country requirements
- identify the steps and procedures for humane destruction, emergency and suspect kills
- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe the symptoms of emergency and notifiable diseases found at post mortem
- make correct dispositions for the common, emergency and notifiable diseases and conditions in accordance with the Australian Standard
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor restraint, stunning and bleeding in order to detect, assess and report animal welfare issues
- take and dispatch samples for mandated testing

- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of ratites
- the Australian Standard procedures for the ante and post mortem inspection of ratites
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- humane and efficient slaughtering techniques including restraint, stunning and bleeding
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and work place requirements
- role of equipment for meeting hygiene and sanitation and workplace requirements
- correct technique for incision of parts and organs
- procedures for disposal of condemned carcass
- procedures for identifying, collecting and submitting specimens
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of common diseases and conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant

Assessment Conditions

Assessment of ante and post mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected). The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor.
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases
- on-the-job assessment with assessor observation

Assessors must satisfy the current standards for RTOs.

AMPA3125 Perform ante and post-mortem inspection - Camels

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform ante-mortem and post-mortem inspection duties on camels in a slaughtering establishment processing in accordance with the Australian Standard.

This unit is applicable to those who will seek employment and registration as a meat inspector in either the domestic or export processing sectors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen Knives

AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the main reasons for ante-mortem inspection	1.1 Explain reasons for ante-mortem inspection 1.2 Identify regulatory requirements associated with ante-mortem inspection
2. Perform ante-mortem inspection on camels	2.1 Identify and explain procedures and principles of humane handling of camels 2.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem 2.3 Identify procedures for humane destruction 2.4 Identify procedures for emergency and suspect slaughter 2.5 Perform ante-mortem inspection on camels according to relevant workplace health and safety and regulatory requirements 2.6 Identify Quality Assurance aspects of ante-mortem inspection
3. Make disposition as a result of inspection and take appropriate action	3.1 Identify and document common diseases and conditions responsible for abnormalities in camels 3.2 Segregate suspect stock according to regulatory and workplace requirements 3.3 Identify signs of emergency or notifiable diseases that could be seen at ante-mortem 3.4 Describe emergency or notifiable disease procedures as set out in the relevant regulations
4. Identify base anatomical structure systems of camels	4.1 Identify organs of camels 4.2 Identify and explain lymphatic, circulatory, digestive, urinary, nervous and respiratory systems 4.3 Identify basic skeletal structure of camels
5. Identify the main reasons for ante-mortem inspection	5.1 Identify the main reasons for ante-mortem inspection 5.2 Identify regulatory requirements associated with ante-mortem inspection
6. Perform ante-mortem inspection on camels and make disposition	6.1 Identify procedures and principles of humane handling of animals 6.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem

Element	Performance criteria
	6.3 Describe the symptoms of the major emergency diseases 6.4 Identify reporting procedures for emergency diseases 6.5 Segregate suspect camels according to regulatory and workplace requirements 6.6 Ante-mortem inspection is performed according to relevant workplace health and safety, workplace and regulatory requirements 6.7 Identify Quality Assurance aspects of ante-mortem inspection
7. Identify and isolate animals requiring testing	7.1 Identify reasons for testing 7.2 Procedures for identifying and isolating animals for testing are followed
8. Identify the main reasons for post-mortem inspection	8.1 Identify reasons for post-mortem inspection 8.2 Identify regulatory requirements associated with post-mortem inspection
9. Perform post-mortem inspection of camels	9.1 Follow procedures for post-mortem inspection 9.2 Identify and detect abnormalities 9.3 Perform post-mortem inspection camels in accordance with regulatory requirements, hygiene and sanitation requirements and workplace health and safety requirements, in a work environment and under normal production conditions 9.4 Identify Quality Assurance (QA) issues of post-mortem inspection
10. Make disposition	10.1 Detect and identify common diseases and conditions responsible for abnormalities in camels 10.2 Identify and explain symptoms of major emergency diseases 10.3 Make disposition in accordance with the Australian Standard or any relevant importing country requirement
11. Treat affected carcase appropriately	11.1 Treat carcase in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements 11.2 Demonstrate anatomical knowledge of carcase in the disposition process
12. Monitor stunning and slaughter of animals	12.1 Identify requirements for effective stunning and slaughter 12.2 Ensure animals are stunned and bled according to workplace and regulatory requirements 12.3 Take corrective action in the event of ineffective stunning or bleeding
13. Describe the procedures followed	13.1 Identify and describe procedures for retained carcase in accordance with workplace and regulatory requirements

Element	Performance criteria
for retained carcase on the slaughter floor	
14. Identify and use Personal and Protective Equipment (PPE) required to perform post-mortem inspection	14.1 Identify and explain the purpose of the PPE equipment required for post-mortem inspection 14.2 Use equipment in accordance with QA and workplace requirements 14.3 Use, maintain and store Personal Protective Equipment (PPE) in accordance with workplace health and safety requirements
15. Take pathological and residue samples to assist in determining disposition	15.1 Identify lesions and tissues necessary for determining dispositions 15.2 Collect and submit specimens according to workplace procedures 15.3 Retain carcasses awaiting results according to workplace procedures 15.4 Interpret results

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPA3125 Perform ante and post-mortem inspection - Camels

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform ante-mortem and post-mortem inspection of camels to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform ante-mortem inspection to Australian Standards and other relevant regulatory requirements
- identify common diseases and conditions in camels seen at ante mortem inspection
- describe appropriate dispositions for common diseases and conditions in camels
- identify major emergency or notifiable diseases
- demonstrate procedures for humane handling of livestock
- identify suspect animals that may be suffering from a notifiable disease on ante-mortem examination according to Australian Standards
- make disposition according to workplace and regulatory requirements
- report notifiable diseases promptly and accurately according to regulatory requirements
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe appropriate dispositions for common diseases and conditions in camels
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor stunning in order to detect, assess and report animal welfare issues
- follow safe work practices as laid down in work place requirements
- take and dispatch samples for mandated testing
- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of camels
- the Australian Standard procedures for the post and ante mortem inspection of camels
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- the potential impact of emergency diseases
- common diseases and their symptoms as seen at ante and post mortem inspection
- humane and efficient slaughtering techniques
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and work place requirements
- principles and procedures for humane handling of camels
- regulatory requirements for suspect camels, hygiene and sanitation standards, and workplace standards associated with ante-mortem inspection
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant

Assessment Conditions

Assessment of ante and post mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected). The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases
- on-the-job assessment with assessor observation

Assessors must satisfy the current standards for RTOs.

AMPA3127 Perform post-mortem inspection - Wild game

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform post mortem inspection duties on wild game, such as kangaroos, wallabies, wild boar and possums, in a processing establishment operating in accordance with the Australian Standard.

This unit is applicable to those who will seek employment and registration as a meat inspector in either the domestic or export processing sectors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen Knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify base anatomical structure systems of wild game	1.1 Identify organs of wild game 1.2 Identify and explain lymphatic, circulatory, digestive, urinary, nervous and respiratory systems 1.3 Identify basic skeletal structure of wild game
2. Inspect carcasses prior to processing	2.1 Identify reasons for pre-processing inspection and the grounds for carcasses being unfit for processing 2.2 Procedures for identifying and condemning carcasses unfit for processing are followed
3. Identify the main reasons for post-mortem inspection	3.1 Identify reasons for post-mortem inspection 3.2 Identify regulatory requirements associated with post-mortem inspection
4. Perform post-mortem inspection of wild game	4.1 Follow procedures for post-mortem inspection 4.2 Identify and detect abnormalities 4.3 Perform post-mortem inspection wild game in accordance with regulatory requirements, hygiene and sanitation requirements and workplace health and safety requirements, in a work environment and under normal production conditions 4.4 Identify Quality Assurance (QA) issues of post-mortem inspection
5. Make disposition	5.1 Detect and identify common diseases and conditions responsible for abnormalities in wild game 5.2 Identify and explain symptoms of major emergency diseases 5.3 Make disposition in accordance with the Australian Standard or any relevant importing country requirement
6. Treat affected carcass appropriately	6.1 Treat carcass in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements 6.2 Demonstrate anatomical knowledge of carcass in the disposition process
7. Describe the procedures followed for retained carcass on the slaughter floor	7.1 Identify and describe procedures for retained carcass in accordance with workplace and regulatory requirements
8. Identify and use	8.1 Identify and explain the purpose of the PPE equipment required

Element	Performance criteria
Personal and Protective Equipment (PPE) required to perform post-mortem inspection	for post-mortem inspection 8.2 Use equipment in accordance with QA and workplace requirements 8.3 Use, maintain and store Personal Protective Equipment (PPE) in accordance with workplace health and safety requirements
9. Take pathological and residue samples to assist in determining disposition	9.1 Identify lesions and tissues necessary for determining dispositions 9.2 Collect and submit specimens according to workplace procedures 9.3 Retain carcasses awaiting results according to workplace procedures 9.4 Interpret results

10. Perform post-mortem inspection of deer	10.1 Follow procedures for post-mortem inspection 10.2 Identify and detect abnormalities 10.3 Perform post-mortem inspection deer in accordance with regulatory requirements, hygiene and sanitation requirements and workplace health and safety requirements, in a work environment and under normal production conditions 10.4 Identify Quality Assurance (QA) issues of post-mortem inspection
11. Make disposition	11.1 Detect and identify common diseases and conditions responsible for abnormalities in deer 11.2 Identify and explain symptoms of major emergency diseases 11.3 Make disposition in accordance with the Australian Standard or any relevant importing country requirement
12. Treat affected carcass appropriately	12.1 Treat carcass in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements 12.2 Demonstrate anatomical knowledge of carcass in the disposition process
13. Monitor stunning and slaughter of animals	13.1 Identify requirements for effective stunning and slaughter 13.2 Ensure animals are stunned and bled according to workplace and regulatory requirements 13.3 Take corrective action in the event of ineffective stunning

Element	Performance criteria
	or bleeding
14. Describe the procedures followed for retained carcass on the slaughter floor	14.1 Identify and describe procedures for retained carcass in accordance with workplace and regulatory requirements
15. Identify and use Personal and Protective Equipment (PPE) required to perform post-mortem inspection	15.1 Identify and explain the purpose of the PPE equipment required for post-mortem inspection 15.2 Use equipment in accordance with QA and workplace requirements 15.3 Use, maintain and store Personal Protective Equipment (PPE) in accordance with workplace health and safety requirements
16. Take pathological and residue samples to assist in determining disposition	16.1 Identify lesions and tissues necessary for determining dispositions 16.2 Collect and submit specimens according to workplace procedures 16.3 Retain carcasses awaiting results according to workplace procedures 16.4 Interpret results

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPA3129 Perform ante and post-mortem inspection - Deer

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform ante-mortem and post-mortem inspection of deer to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- perform ante-mortem inspection in accordance with the Australian Standard and where relevant other importing country requirements
- describe principles and procedures for humane handling
- identify common diseases and conditions found at ante-mortem
- describe symptoms of emergency or notifiable diseases
- make correct dispositions for the emergency, notifiable and common diseases and conditions found at ante mortem in accordance with the Australian Standard
- segregate suspect animals in accordance with the Australian Standard and / or importing country requirements
- identify the steps and procedures for humane destruction, emergency and suspect kills
- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe the symptoms of emergency and notifiable diseases found at post mortem
- make correct dispositions for the common, emergency and notifiable diseases and conditions in accordance with the Australian Standard
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor restraint, stunning and bleeding in order to detect, assess and report animal welfare issues
- take and dispatch samples for mandated testing

- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of deer
- the Australian Standard procedures for the ante and post mortem inspection of deer
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- humane and efficient slaughtering techniques including restraint, stunning and bleeding
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and work place requirements
- role of equipment for meeting hygiene and sanitation and workplace requirements
- correct technique for incision of parts and organs
- procedures for disposal of condemned carcass
- procedures for identifying, collecting and submitting specimens
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of common diseases and conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant

Assessment Conditions

Assessment of ante and post mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected) The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases
- on-the-job assessment with assessor observation

Assessors must satisfy the current standards for RTOs.

AMPA3130 Perform ante and post-mortem inspection - Horses

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform ante-mortem and post-mortem inspection duties on horses (domesticated) in a slaughtering establishment processing in accordance with the Australian Standard.

This unit is applicable to those who seek employment and registration as a meat inspector in either the domestic or export processing sectors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen Knives

AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify breeds and types of horse and describe market requirements	1.1 Identify major breeds of commonly slaughtered horse 1.2 Identify distinguishing features of major breeds 1.3 Describe market requirements for horse
2. Identify the main reasons for ante-mortem inspection	2.1 Explain reasons for ante-mortem inspection 2.2 Identify regulatory requirements associated with ante-mortem inspection
3. Perform ante-mortem inspection on horses	3.1 Identify and explain procedures and principles of humane handling of horses 3.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem 3.3 Identify procedures for humane destruction 3.4 Identify procedures for emergency and suspect slaughter 3.5 Perform ante-mortem inspection on horses according to relevant workplace health and safety and regulatory requirements 3.6 Identify Quality Assurance aspects of ante-mortem inspection
4. Make disposition as a result of inspection and take appropriate action	4.1 Identify and document common diseases and conditions responsible for abnormalities in horses 4.2 Segregate suspect stock according to regulatory and workplace requirements 4.3 Identify signs of emergency or notifiable diseases that could be seen at ante-mortem 4.4 Describe emergency or notifiable disease procedures as set out in the relevant regulations
5. Identify base anatomical structure systems of horses	5.1 Identify organs of horses 5.2 Identify and explain lymphatic, circulatory, digestive, urinary, nervous and respiratory systems 5.3 Identify basic skeletal structure of horses
6. Identify the main reasons for ante-mortem inspection	6.1 Identify the main reasons for ante-mortem inspection 6.2 Identify regulatory requirements associated with ante-mortem inspection
7. Perform ante-mortem	7.1 Identify procedures and principles of humane handling of

Element	Performance criteria
inspection on horses and make disposition	animals 7.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem 7.3 Describe the symptoms of the major emergency diseases 7.4 Identify reporting procedures for emergency diseases 7.5 Segregate suspect horses according to regulatory and workplace requirements 7.6 Perform ante-mortem inspection according to relevant workplace health and safety, workplace and regulatory requirements 7.7 Identify Quality Assurance aspects of ante-mortem inspection
8. Identify and isolate animals requiring testing	8.1 Identify reasons for testing 8.2 Follow procedures for identifying and isolating animals for testing
9. Identify the main reasons for post-mortem inspection	9.1 Identify reasons for post-mortem inspection 9.2 Identify regulatory requirements associated with post-mortem inspection
10. Perform post-mortem inspection of horses	10.1 Follow procedures for post-mortem inspection 10.2 Identify and detect abnormalities 10.3 Perform post-mortem inspection horses in accordance with regulatory requirements, hygiene and sanitation requirements and workplace health and safety requirements, in a work environment and under normal production conditions 10.4 Identify Quality Assurance (QA) issues of post-mortem inspection
11. Make disposition	11.1 Detect and identify common diseases and conditions responsible for abnormalities in horses 11.2 Identify and explain symptoms of major emergency diseases 11.3 Make disposition in accordance with the Australian Standard or any relevant importing country requirement
12. Treat affected carcass appropriately	12.1 Treat carcass in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements 12.2 Demonstrate anatomical knowledge of carcass in the disposition process

Assessment Requirements for AMPA3130 Perform ante and post-mortem inspection - Horses

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform ante-mortem and post-mortem inspection of horses to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- perform ante-mortem inspection in accordance with the Australian Standard and where relevant other importing country requirements
- describe principles and procedures for humane handling
- identify common diseases and conditions found at ante-mortem
- describe symptoms of emergency or notifiable diseases
- make correct dispositions for the emergency, notifiable and common diseases and conditions found at ante mortem in accordance with the Australian Standard
- segregate suspect animals in accordance with the Australian Standard and / or importing country requirements
- identify the steps and procedures for humane destruction, emergency and suspect kills
- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe the symptoms of emergency and notifiable diseases found at post mortem
- make correct dispositions for the common, emergency and notifiable diseases and conditions in accordance with the Australian Standard
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor restraint, stunning and bleeding in order to detect, assess and report animal welfare issues
- take and dispatch samples for mandated testing

- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of horses
- the Australian Standard procedures for the ante and post mortem inspection of horses
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- humane and efficient slaughtering techniques including restraint, stunning and bleeding
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and work place requirements
- role of equipment for meeting hygiene and sanitation and workplace requirements
- correct technique for incision of parts and organs
- procedures for disposal of condemned carcass
- procedures for identifying, collecting and submitting specimens
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of common diseases and conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant

Assessment Conditions

Assessment of ante and post mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected) The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases
- on-the-job assessment with assessor observation

Assessors must satisfy the current standards for RTOs.

AMPA3131 Identify and report emergency diseases of food animals

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to recognise the symptoms of emergency diseases and conditions as might be seen during the performance of meat inspection procedures.

This unit is suitable for students undertaking meat safety (inspection) training and is a co-requisite for the post-mortem inspection and ante-mortem inspection Units in the Australian Meat Industry Training Package.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Competency should be reassessed every five years.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Describe the symptoms of the major emergency diseases as they relate to food animals	1.1 Identify the major emergency diseases of food animals processed in Australia 1.2 Describe the impact of emergency diseases on the meat industry 1.3 Describe the symptoms of these major emergency diseases as they may be seen at ante-mortem 1.4 Describe the symptoms of these major emergency diseases as they may be seen at post-mortem
2. Identify the reporting process for suspected emergency diseases	2.1 Explain the responsibilities for reporting emergency disease suspects as set out in the enterprise's emergency disease preparedness plan 2.2 Describe a meat processing enterprise's responsibilities after reporting a suspected emergency disease outbreak 2.3 Explain the role of AUSVET Plan in controlling emergency diseases 2.4 Describe the potential impact of emergency diseases on the livestock and meat industry

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Assessment Requirements for AMPA3131 Identify and report emergency diseases of food animals

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must recognise the symptoms of emergency diseases and conditions which might be seen during the performance of meat inspection procedures.

The candidate must:

- identify the major emergency disease risks to the food animal species relevant to the students duties
- identify the symptoms of these emergency diseases
- explain the reporting requirements when an emergency disease is suspected in livestock or carcasses
- explain the steps to be taken by a meat processing company in the event of a suspected outbreak of an emergency disease
- explain the steps to be taken by regulators when there is a suspected outbreak of an emergency disease

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the major emergency diseases of food species animals
- the symptoms of the major emergency diseases of food species animals
- the reporting requirements when an emergency disease is suspected in livestock or carcasses
- the steps to be taken by a meat processing enterprise in the event of a suspected outbreak of an emergency disease and how they are to be implemented
- the AUSVET plan and the role of regulators, companies and producers in the event of an the reporting requirements when an emergency disease is suspected in livestock or carcasses
- the steps to be taken by regulators when there is a suspected outbreak of an emergency disease
- the enterprise's emergency disease preparedness plan

Assessment Conditions

Competency must be demonstrated on the actual carcase and viscera of at least one species of food animal as well as from models or diagrams of the other food animal species. The species covered must include as a minimum cattle, sheep, goats, pigs, poultry and kangaroos. Other food species could include any other species slaughtered or harvested legally in Australia for human consumption.

Assessment may occur in the workplace or in a suitable teaching environment.

A minimum of three different forms of assessment must be used. These should take the form of:

- quiz of underpinning knowledge
- identification of signs and symptoms of diseases in different species from images and diagrams
- assignment

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPA3132 Perform ante and post-mortem inspection - Alpacas or Llamas

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform ante-mortem and post-mortem inspection of llamas or alpacas to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- perform ante-mortem inspection in accordance with the Australian Standard and where relevant other importing country requirements
- describe principles and procedures for humane handling
- identify common diseases and conditions found at ante-mortem
- describe symptoms of emergency or notifiable diseases
- make correct dispositions for the emergency, notifiable and common diseases and conditions found at ante mortem in accordance with the Australian Standard
- segregate suspect animals in accordance with the Australian Standard and / or importing country requirements
- identify the steps and procedures for humane destruction, emergency and suspect kills
- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe the symptoms of emergency and notifiable diseases found at post mortem
- make correct dispositions for the common, emergency and notifiable diseases and conditions in accordance with the Australian Standard
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor restraint, stunning and bleeding in order to detect, assess and report animal welfare issues
- take and dispatch samples for mandated testing

- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of llamas or alpacas
- the Australian Standard procedures for the ante and post mortem inspection of llamas or alpacas
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- humane and efficient slaughtering techniques including restraint, stunning and bleeding
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and work place requirements
- role of equipment for meeting hygiene and sanitation and workplace requirements
- correct technique for incision of parts and organs
- procedures for disposal of condemned carcass
- procedures for identifying, collecting and submitting specimens
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of common diseases and conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant

Assessment Conditions

Assessment of ante and post mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected) The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases

- on-the-job assessment with assessor observation

Assessors must satisfy the current standards for RTOs.

AMPA3133 Manage NLIS data for pigs in lairage

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manage National Livestock Identification System (NLIS) data for pigs from the point of arrival at an abattoir and whilst they are in lairage.

This Unit is applicable for those managing and identifying the source of pigs in lairage.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPA3134 Overview of the NLIS pork

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Receive pigs	1.1 Receive accompanying documentation and check for completeness 1.2 Take corrective action for pigs that are accompanied by deficient documentation according to regulatory and workplace requirements 1.3 Carry out physical check of received stock (head count)
2. Check tags or tattoos	2.1 Check for presence of tattoos or tags to meet regulatory and company requirements 2.2 Record required information for state jurisdictions 2.3 Take corrective action for pigs that are lacking correct identification tattoos or tags according to regulatory and workplace requirements
3. Communicate issues/matters arising to internal management	3.1 Use established enterprise communication processes 3.2 Complete records of issues/matters arising and actions taken according to enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Assessment Requirements for AMPA3133 Manage NLIS data for pigs in lairage

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manage National Livestock Identification System (NLIS) data for pigs from the point of arrival at an abattoir and whilst they are in lairage.

The candidate must:

- read and interpret a National Vendor Declaration(NVD)
- read and interpret a Post Sale Summary (PSS) where relevant
- receive pigs
- check tags and tattoos
- check relevant documentation
- communicate issues/matters arising to internal management
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs) to interact with agents, saleyards or transporters, raise and explain issues and problems
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS(Pork) system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- NLIS(Pork) regulatory requirements in relation to producers and abattoirs
- Tags and shoulder tattoos, their purpose and function in the NLIS (Pork)
- purpose, nature of and regulations underpinning the use of Property Identification Codes (PICs)
- how to deal with problems relating to consignment PICs
- role and responsibilities of regulators, and other bodies in relation to PigPass and NLIS(Pork)
- status, abbreviations and what they mean, and the required actions to be taken in response

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3134 Overview of the NLIS Pork

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to work with the mob based National Livestock Identification System (NLIS) Pork.

This Unit is applicable for those purchasing livestock, receiving and managing pigs in lairage, livestock clerks, Quality Assurance managers, slaughter floor supervisors, meat authority staff and auditors.

All work should be carried out to comply with regulatory requirements, workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Describe the history of the NLIS(Pork) and its benefit to industry	1.1 Explain why the industry has implemented NLIS (Pork) 1.2 Explain the benefits of the NLIS (Pork) to industry
2. Describe the nature and function of a Property Identification Code (PIC)	2.1 Identify the component parts of a PIC 2.2 Explain the importance of the PIC to the NLIS
3. Describe and interpret the data contained on a National Vendor Declaration (NVD)	3.1 Explain the purpose of an NVD 3.2 Explain the information contained on an NVD 3.3 Interpret the importance of the various details on the NVD for an abattoir 3.4 Identify the various mistakes that can be made by producers when completing NVDs 3.5 Describe the actions that have to be taken when NVDs are incomplete or incorrectly filled in 3.6 Describe the path of the NVD from producer to processor
4. Complete a review of an NVD as received by a meat processor	4.1 Identify the important information on an NVD 4.2 Identify errors 4.3 Describe the corrective actions to be taken
5. Explain the purpose of tattoos and tags for pig and identification	5.1 Explain the purpose of tattoos and tags and the information that this provides
6. Identify the various NLIS regulations that apply to producers, saleyards and meat processors	6.1 Identify and explain the role of the various bodies associated with the NLIS 6.2 Describe the NLIS regulatory obligations for slaughtering establishments 6.3 Describe the corrective action to be taken with pigs not appropriately tagged or tattooed
7. Describe the function of the kill sheet	7.1 Explain the purpose of a kill sheet and who prepares it 7.2 Identify the various component parts of a kill sheet and the information contained in it 7.3 Explain the importance of following the kill sheet schedule

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Assessment Requirements for AMPA3134 Overview of the NLIS Pork

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must describe the mob based National Livestock Identification System (NLIS) for pigs.

The candidate must:

- describe the history of the NLIS and its benefit to industry
- describe the nature and function of a PIC
- describe and interpret the data contained on an NVD
- complete a review of an NVD as received by a meat processor
- identify the various types of NLIS identification (tattoos and tags) for pigs
- identify the various NLIS regulations that apply to producers, saleyards and meat processors
- describe the function of the kill sheet
- take appropriate steps to minimise workplace health and safety risks when working with livestock

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the NLIS(Pork) system, including the origin and nature of the system, its commercial importance, role in food safety and importing country requirements, role in traceability
- the fundamental benefits of the NLIS to industry
- NLIS identification systems (tattoos and tags) and their purpose and function in the NLIS
- NLIS regulatory requirements in relation to abattoirs
- the purpose of a (National Vendor Declaration) NVD
- the information contained on an NVD
- the nature and purpose of Property Identification Codes
- purpose, nature of and regulations underpinning the use of PICs
- the role of Post-Sale Summaries (PSSs)

- the function of the kill sheet

Assessment Conditions

Assessment must be conducted in the workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA3135 Perform ante and post-mortem inspection - Calves

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform ante-mortem and post-mortem inspection duties on calves in accordance with the Australian Standard.

This unit is applicable to those who seek employment and registration as a meat inspector in either the domestic or export processing sectors.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen Knives

AMPA3002 Handle animals humanely while conducting ante-mortem inspection

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify regulatory requirements for calves	1.1 Explain sources of calves for slaughter 1.2 Identify regulatory requirements for the handling and processing of calves
2. Identify the main reasons for ante-mortem inspection	2.1 Explain reasons for ante-mortem inspection 2.2 Identify regulatory requirements associated with ante-mortem inspection
3. Perform ante-mortem inspection on cattle and/or buffalo	3.1 Identify and explain procedures and principles of humane handling of calves 3.2 Detect and identify signs of common conditions responsible for abnormalities at ante-mortem 3.3 Identify procedures for humane destruction 3.4 Identify procedures for emergency and suspect slaughter 3.5 Perform ante-mortem inspection on calves according to relevant workplace health and safety and regulatory requirements 3.6 Identify Quality Assurance aspects of ante-mortem inspection
4. Make disposition as a result of inspection and take appropriate action	4.1 Identify and describe common diseases and conditions responsible for abnormalities in calves 4.2 Segregate suspect stock according to regulatory and workplace requirements 4.3 Identify signs of emergency or notifiable diseases that could be seen at ante-mortem 4.4 Describe emergency or notifiable disease procedures as set out in the relevant regulations

Element	Performance criteria
5. Identify base anatomical structure systems of cattle or buffalo	5.1 Identify organs of calves 5.2 Identify and explain lymphatic, circulatory, digestive, urinary, nervous and respiratory systems 5.3 Identify basic skeletal structure of cattle and/or buffalo
6. Identify the main reasons for post-mortem inspection	6.1 Identify reasons for post-mortem inspection 6.2 Identify regulatory requirements associated with post-mortem inspection
7. Perform post-mortem inspection of cattle or buffalo	7.1 Follow procedures for post-mortem inspection 7.2 Identify and detect abnormalities 7.3 Perform post-mortem inspection on calves in accordance with regulatory requirements, hygiene and sanitation requirements and workplace health and safety requirements, in a work environment and under normal production conditions 7.4 Identify Quality Assurance (QA) requirements of post-mortem inspection
8. Make disposition	8.1 Detect and identify common diseases and conditions responsible for abnormalities for calves 8.2 Identify and explain symptoms of notifiable diseases

Element	Performance criteria
9. Treat affected carcass appropriately	9.1 Treat carcass in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements 9.2 Demonstrate anatomical knowledge of carcass in the disposition process
10. Monitor stunning and slaughter of animals	10.1 Identify requirements for effective stunning and slaughter 10.2 Ensure animals are stunned and bled according to workplace and regulatory requirements 10.3 Take corrective action in the event of ineffective stunning or bleeding
11. Describe the procedures followed for retained carcass on the slaughter floor	11.1 Identify and describe procedures for retained carcass in accordance with workplace and regulatory requirements
12. Identify and use Personal and Protective Equipment (PPE) required to perform post-mortem inspection	12.1 Identify and explain the purpose of the PPE equipment required for post-mortem inspection 12.2 Use equipment in accordance with QA and workplace requirements 12.3 Use, maintain and store Personal Protective Equipment (PPE) in accordance with workplace health and safety requirements

Element	Performance criteria
13. Take pathological and residue samples to assist in determining disposition	13.1 Identify tissue necessary for determining dispositions and/or routine testing 13.2 Collect and submit specimens according to workplace procedures 13.3 Interpret results 13.4 Retain carcasses awaiting results according to workplace procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent unit.

Assessment Requirements for AMPA3135 Perform ante and post-mortem inspection - Calves

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must perform the ante-mortem and post-mortem inspection of calves to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- perform ante-mortem inspection in accordance with the Australian Standard and where relevant other importing country requirements
- describe principles and procedures for humane handling
- identify common diseases and conditions found at ante-mortem
- describe symptoms of emergency or notifiable diseases
- make correct dispositions for the emergency, notifiable and common diseases and conditions found at ante mortem in accordance with the Australian Standard
- segregate suspect animals in accordance with the Australian Standard and / or importing country requirements
- identify the steps and procedures for humane destruction, emergency and suspect kills
- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
- perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
- identify common diseases and conditions found at post-mortem
- describe the symptoms of emergency and notifiable diseases found at post mortem
- make correct dispositions for the common, emergency and notifiable diseases and conditions in accordance with the Australian Standard
- treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
- monitor restraint, stunning and bleeding in order to detect, assess and report animal welfare issues
- take and dispatch samples for mandated testing

- treat carcasses being held for test results in accordance with regulatory or importing country requirements
- perform inspection duties in accordance with workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of cattle and/or buffalo
- the Australian Standard procedures for the ante and post mortem inspection of calves
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- humane and efficient slaughtering techniques including restraint, stunning and bleeding
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and work place requirements
- role of equipment for meeting hygiene and sanitation and workplace requirements
- correct technique for incision of parts and organs
- procedures for disposal of condemned carcass
- procedures for identifying, collecting and submitting specimens
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of common diseases and conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant

Assessment Conditions

Assessment of ante and post mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected) The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases
- on-the-job assessment with assessor observation

Assessors must satisfy the current standards for RTOs.

AMPA400 Utilise refrigeration index

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to use the Refrigeration Index (RI) to validate compliance of a chilling and freezing process.

The Export Control Orders (ECO), which came into effect in July 2005, require the validation of all chilling processes using the RI.

This unit is applicable to Quality Assurance (QA) staff and regulators who utilise the RI to validate compliance of a chilling or freezing process.

The unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Define the RI	1.1 Explain RI measure and the uses of predictive microbiological model 1.2 Identify regulatory requirements for process compliance using the RI 1.3 Identify factors affecting microbial growth 1.4 Identify RI model parameters
2. Collect temperature data for RI	2.1 Set up data logger correctly 2.2 Place temperature sensor in product, taking into account the point of microbiological concern and recommended placement 2.3 Process time-temperature data into correct format for RI calculator
3. Select and define process to be validated	3.1 Define process in terms of output 3.2 Define production lot 3.3 Identify variables in the process 3.4 Identify number of measurements required 3.5 Identify when and where data collection should occur 3.6 Identify RI criteria
4. Calculate RI index	4.1 Load and open software 4.2 Select correct calculator options for process being validated 4.3 Calculate RI for process to be validated
5. Utilise RI to validate process	5.1 Compare RI with ECO requirements 5.2 Assess appropriateness of the data where RI does not comply 5.3 Take action to correct a non-conforming process 5.4 Make decisions on production disposition for a refrigeration breakdown
6. Document a validation process using the RI	6.1 Describe purpose, process and arrangements for validation 6.2 Describe data collection methods and calculation options used and summarise data collected 6.3 State validation decision

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA400 Utilise refrigeration index

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must use the Refrigeration Index (RI) to validate compliance of a chilling and freezing process.

The candidate must demonstrate ability to:

- define a process and the relevant variables
- plan and manage the collection of data for a validation exercise
- arrange and document the validation of a chilling process using the RI
- input data into the RI index
- identify and resolve data inconsistencies
- process data into the correct format for the RI calculator
- review RI calculated and make decisions on process validation or product disposition
- maintain currency of knowledge and techniques through informal learning and personal research utilising resources including the internet, industry journals, Department of Agriculture notices and conference workshops
- identify and apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- growth phases of microbes
- purpose of predictive microbiological models
- how and why RI is used
- parameters of the RI model
- product disposition using the RI

- ECO criteria for RI
- requirements for data collection
- different RI calculator options
- documentation requirements for process validation using RI
- factors affecting the growth of microbes
- meaning of log values
- regulatory requirements underpinning use of the RI

Assessment Conditions

Competency must be demonstrated utilising the RI calculator.

Assessment may involve processing real or simulated data.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPA401 Implement a Meat Hygiene Assessment program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to implement all aspects of a product and process monitoring system in a slaughter floor and/or boning room.

Process and product monitoring systems are mandatory in all meat industry export works and staff undertaking monitoring duties must be trained in these systems.

This unit is applicable to regulatory, Quality Assurance (QA) and supervisory staff overseeing the implementation of a Meat Hygiene Assessment (MHA) program in a meat processing plant.

All work is carried out to comply with workplace procedures, MHA program requirements and appropriate legislation.

This unit applies to individuals who take responsibility for their own work and undertake a range of routine and non-routine activities.

This unit must be delivered in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor carcass product	1.1 Select samples for assessment according to approved sampling plan 1.2 Conduct assessment using appropriate facilities, lighting and time 1.3 Monitor products for defects according to agreed criteria and classification 1.4 Scan carcasses using approved scanning lines 1.5 Record defects using correct forms or electronic system 1.6 Implement immediate corrective action 1.7 Monitor carcasses according to workplace requirements for hygiene and sanitation, and workplace health and safety
2. Monitor offal and/or assess carton meat	2.1 Select samples for assessment according to approved sampling plan 2.2 Conduct assessment using appropriate facilities, lighting and time 2.3 Monitor offal and/or carton meat for defects according to agreed criteria and classification 2.4 Record defects using correct forms or electronic system 2.5 Identify levels for triggering corrective actions 2.6 Implement corrective action immediately 2.7 Monitor offal and/or carton meat according to workplace requirements for hygiene and sanitation, and workplace health and safety
3. Monitor process	3.1 Monitor process according to enterprise monitoring plan 3.2 Record results on appropriate process monitoring sheets 3.3 Rate process according to established criteria 3.4 Implement corrective action immediately 3.5 Calculate and record a conformity index after each process monitoring exercise 3.6 Monitor process according to workplace requirements for hygiene and sanitation, and workplace health and safety 3.7 Track results of process monitoring over time and reconcile with product monitoring outcomes

Element	Performance criteria
4. Analyse data gathered	4.1 Plot product and process monitoring results on simple trend charts 4.2 Plot product and process monitoring result on control charts 4.3 Interpret trends and take remedial or corrective actions where necessary
5. Implement MHA program	5.1 Prepare and implement work instructions for monitoring activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA401 Implement a Meat Hygiene Assessment program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must implement a Meat Hygiene Assessment program.

The candidate must:

- monitor product for defects according to the MHA program
- identify and resolve data inconsistencies
- monitor the process for conformity with the plant's HACCP-based QA system in accordance with the MHA program
- observe hygiene and sanitation requirements when monitoring product and process
- graph and interpret trends in product and process monitoring results
- instigate corrective and preventative actions when appropriate
- apply relevant communication and mathematical skills
- comply with workplace health and safety requirements when monitoring product and process
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- provide relevant information to work colleagues to facilitate understanding of, and compliance with, the applicable standards and regulations
- record the monitoring results accurately

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- purpose of an MHA program
- classification of defects
- when and how corrective actions should be taken in response to monitoring outcomes

- types and purposes of control charts
- purpose of trend charts
- what a trend is and why it is important when monitoring process and product
- how to undertake process compliance monitoring
- how to implement the approved sample plan for product monitoring
- purpose of the process conformity index
- types of defects to be identified in carcase, offal and carton product
- relevant regulatory requirements

Assessment Conditions

Assessment must occur in an operating abattoir or boning room. This unit must be delivered in the context of Australian meat processing standards and regulations.

Competency must be demonstrated when implementing a real MHA program.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPA402 Oversee plant compliance with the Australian standards for meat processing

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to oversee compliance with the relevant Australian Standards for meat processing in abattoirs and boning rooms.

Some state meat authorities will require competency in this unit to prove currency when meat inspectors, who have been out of the industry for some time, seek re-registration.

This unit is applicable to meat inspectors, supervisors and Quality Assurance personnel responsible for ensuring a meat processing plant complies with the relevant Australian Standards.

This unit must be delivered in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPA402 Oversee plant compliance with the Australian standards for meat processing

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must oversee plant compliance with the Australian standards for meat processing.

The candidate must:

- apply relevant communication and mathematical skills
- identify and resolve data inconsistencies
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to close out corrective action requests
- identify and apply relevant workplace health and safety, and workplace requirements
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the Australian Standards and associated regulations
- use technology to access information, prepare reports, and to access and prepare relevant data

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the legislation and regulations relevant to meat processing in their jurisdiction
- the Australian Standard for the hygienic production and transportation of meat and meat products for human consumption
- livestock identification processes and procedures
- how to prepare for an internal or external audit
- meat industry data collection systems and reporting requirements
- how to close out corrective action requests from external or internal audits

- reporting requirements for emergency and notifiable diseases
- Animal Welfare Standards and requirements as called up by State regulations

Assessment Conditions

Competency must be demonstrated in terms of specific legislation relevant to export or domestic meat processing plants.

Assessment must occur in the context of simulated breaches and simulated review processes. Assessment must involve using the current Australian Standards.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPA403 Apply meat science

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to apply meat science to the eating quality of meat and to interpret scientific data to predict probable impacts on meat eating quality.

It is a Meat Standards Australia (MSA) requirement that enterprises with a licence Level 1(b) have a MSA Coordinator who has completed this unit or a MSA approved equivalent unit.

The skills and knowledge gained from this unit will enable an individual to interpret meat processing data and to recommend improvements to control and enhance the eating quality of meat products.

This unit is suitable for people working in the red meat industry in a Quality Assurance (QA) or management role.

MSA requirements include adherence to the MSA Standards Manual for Grading, MSA Standards Manual for Slaughter Consignment and MSA Standards Manual for Trade Mark Usage.

This unit must be delivered in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply knowledge of muscle structure and biochemistry to meat quality and the factors that affect it	1.1 Explain biological mechanisms (both pre and post slaughter) that affect meat quality in beef 1.2 Identify the pattern of tissue development in the body and the pattern of deposition within the muscle and fat deposits, including the extent to which the composition of fat deposits can be manipulated by production factors 1.3 Identify structure of skeletal muscles in terms of the myofibre and connective tissue components and the effect these structures have on eating quality 1.4 Identify biochemical events that occur in muscle early post-mortem and their significance in subsequent meat quality
2. Identify production and pre-slaughter factors that affect meat quality	2.1 Identify impacts of production factors on meat quality 2.2 Explain pre-slaughter factors
3. Identify processing factors that impact eating quality	3.1 Explain pH/temperature window and how it impacts palatability 3.2 Describe role of electrical stimulation in controlling the rate of glycolysis in the carcass 3.3 Explain impact of stretching muscles pre-rigor on palatability 3.4 Describe process of ageing, its impact on tenderness and methods for extending the storage life of fresh meat including the application of packaging technologies 3.5 Describe impact of cooking on palatability of meat
4. Describe quality attributes of meat	4.1 Identify factors that control changes in colour of fresh meat 4.2 Describe development of marbling fat and its impact on palatability 4.3 Explain impact of drip on both the appearance and palatability of meat
5. Identify and evaluate the MSA cuts based grading scheme	5.1 Explain Palatability Analysis Critical Control Points (PACCP) approach to meat grading 5.2 Describe principles behind the development of the MSA carcass pathways system, including tasting protocols 5.3 Establish impact of various production, processing and value-adding inputs on the palatability of beef using the MSA model

Element	Performance criteria
	5.4 Evaluate potential benefits of a cuts-based grading system to various industry sectors 5.5 Analyse alternative grading schemes and their various attributes
6. Interpret and analyse data to predict probable impacts on meat eating quality	6.1 Predict probable impacts of production and processing on meat quality 6.2 Identify potential solutions for eating quality problems

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA403 Apply meat science

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must apply meat science.

The candidate must:

- explain the processing factors that impact on eating quality, including pH, electrical stimulation, ageing and stretching, to relevant personnel involved in the production process
- apply relevant communication skills when explaining scientific principles simply and clearly
- collate and analyse eating quality data
- maintain currency of knowledge through independent research or professional development
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify and recommend improvements that could be made to improve meat eating quality to management

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- consumer taste testing protocols and how they have been used to set grade standards and develop the cuts-based grading system
- factors that control changes in colour of fresh meat and other quality factors including drip and marbling which impact on both appearance and palatability
- factors that occur between the knocking box and chiller assessment and their impact on meat palatability
- visual and palatability attributes of meat quality that are important to customers
- physical and chemical changes that occur when meat is cooked
- anatomical and biochemical determinants of meat palatability

- factors in animal husbandry, transport, lairage, slaughter, carcase storage, packaging, further processing and cooking that will impact on tenderness and palatability
- minimum standards of enterprise performance as specified in relevant regulations

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Competency must be assessed in the workplace or under simulated conditions. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPA404 Conduct and validate pH and temperature declines to MSA standards

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit covers the skills and knowledge required to accurately calibrate and maintain pH equipment, conduct pH and temperature declines and weekly monitoring, as well as to validate results to ensure conformance to the pH and temperature window.

It is a license requirement for Meat Standards Australia (MSA) enterprises to achieve the pH and temperature window.

The skills and knowledge gained from this unit will allow individuals to monitor pH or temperature window to AUS-MEAT and MSA standards. This unit is suitable for people working in Quality Assurance (QA) or a company grading role.

This unit must be delivered and assessed using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Operate and calibrate pH equipment	1.1 Conduct temperature calibrations 1.2 Conduct pH calibrations
2. Conduct monthly and weekly monitoring of the pH or temperature window	2.1 Demonstrate correct technique for pH and temperature measurement 2.2 Collect necessary information for validating monitoring 2.3 Collect valid and sufficient readings 2.4 Record and report results
3. Analyse results of pH and temperature monitoring	3.1 Recognise effects of heat shortening and cold shortening 3.2 Identify pH and temperature window
4. Suggest corrective action plans for window non-conformance	4.1 Identify and evaluate factors impacting on pH or temperature window conformance 4.2 Identify reasons for non-conformance 4.3 Conduct trials to achieve window conformance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

MTMP405B Conduct and validate pH/temperature declines to Meat Standards Australia standards	E

Assessment Requirements for AMPA404 Conduct and validate pH and temperature declines to MSA standards

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must conduct and validate pH and temperature declines to MSA standards.

The candidate must:

- collect information on live animals for use in pH and temperature monitoring
- conduct monthly and weekly monitoring of the pH and temperature window
- observe, time and follow carcasses through the slaughter floor recording the following:
 - carcass information
 - chiller number
 - immobiliser information (if applicable)
 - rigidity probe information (if applicable)
 - stimulation information (if applicable)
 - time entering the chiller
 - time stunned
- analyse results to verify conformance
- apply relevant communication and mathematical skills
- generate individual and lot average graphs to show pH and temperature window conformance
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- maintain currency of knowledge through professional development or self-directed research
- operate and calibrate pH and temperature readings
- suggest corrective action procedures

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the scope and nature of MSA standards
- impact of electrical stimulation on pH decline
- impact of chilling factors on pH and temperature decline
- how the time it takes a carcass to reach the chiller can impact on the rate of pH decline
- pH and temperature window
- how cold shortening occurs and characteristics of cold shortened product
- how heat shortening occurs and characteristics of heat shortened product
- how other electrical inputs can impact the rate of pH decline
- the impact of slaughter floor temperature on rate of pH and temperature decline
- glycogen and the relationship between stress and pH
- what pH is and its importance for eating quality

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

The application of competency is to be assessed in the workplace. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

A minimum of three forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPA405 Develop and implement Quality Assurance program for a rendering plant

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop and implement a Quality Assurance (QA) program for a rendering plant.

This unit is suitable for people working in the rendering sector. Work must involve interaction between staff and the individual and a detailed understanding of the rendering process.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a QA program for rendering plant	1.1 Develop process flow chart for rendering plant 1.2 Identify Control and Critical Control Points (CCPs) 1.3 Identify procedures to be carried out at control and CCPs

Element	Performance criteria
	1.4 Validate critical limits 1.5 Develop operations manual, monitoring sheets and verification procedures
2. Implement the QA program at the rendering plant	2.1 Clearly explain QA procedures and requirements to relevant personnel 2.2 Coach and mentor staff when introducing work instructions and operating procedures 2.3 Introduce and monitor verification and recording procedures 2.4 Conduct internal audit to verify program

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

MTMP406A Develop and implement Quality Assurance program for a rendering plant	E

Assessment Requirements for AMPA405 Develop and implement Quality Assurance program for a rendering plant

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

Candidates must be able to develop and implement a QA program that meet the requirements of current Australian Standards and relevant legislation.

The candidate must:

- develop an implementation plan
- develop and document work instructions and Standard Operating Procedures (SOPs)
- establish and validate critical limits
- explain the process flow chart for the rendering operation
- form, instruct and lead a Hazard Analysis Critical Control Point (HACCP) team
- identify and observe workplace health and safety requirements
- identify and manage environmental hazards
- identify corrective action
- identify CCPs for QA monitoring
- identify hazards
- implement the QA program
- mentor staff implementing the procedures
- prepare a HACCP chart for rendering operations
- use relevant communication skills
- verify the program using sampling, testing and auditing

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- verification and validation procedures
- regulations, standards and workplace requirements affecting rendering operations

Assessment Conditions

Assessment can be conducted in actual or simulated environments.

The following three forms of assessment must be used:

- written test or quiz
- workplace referee report
- on the job assessment with assessor observation

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AMPA406 Inspect transportation container or vehicle

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to apply regulatory and workplace requirements for the inspection of meat transport containers and vehicles.

Inspection of containers and trucks prior to the transport of meat products is a mandatory requirement and is undertaken by meat safety and/or Quality Assurance (QA) officers.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect meat transport container or vehicle	1.1 Identify regulatory and workplace requirements for vehicles and containers 1.2 Identify and explain sources of potential contamination 1.3 Inspect meat transport vehicle or container for compliance with licensing requirements 1.4 Inspect meat transport vehicle or container for compliance with regulatory and workplace requirements 1.5 Take corrective action if vehicles or containers do not meet workplace or regulatory requirements 1.6 Complete reports to workplace requirements 1.7 Observe workplace health and safety requirements whilst conducting inspections

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP408A Inspect transportation container/vehicle.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5e2e56b7-698f-4822-84bb-25adbb8443a7>

Assessment Requirements for AMPA406 Inspect transportation container or vehicle

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must apply regulatory and workplace requirements for the inspection of meat transport containers and vehicles.

The candidate must:

- assess vehicle against workplace and regulatory standards and requirements
- identify non-conformance in hygiene and sanitation, workplace health and safety, and licensing requirements
- apply mathematical applications relevant to work instructions and Standard Operating Procedures (SOPs)
- follow enterprise and regulatory inspection procedures for meat transport vehicles
- prepare reports clearly and concisely in standard formats
- follow workplace health and safety requirements whilst conducting inspections
- take corrective action if vehicle or container does not meet workplace or regulatory requirements

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- potential sources of contamination
- regulatory and enterprise hygiene and sanitation requirements related to inspection of meat transport vehicles or containers
- licensing and registration requirements for meat transport vehicles

Assessment Conditions

Assessment has to utilise actual containers or vehicles for inspection activities.

Candidates must be able to implement current regulatory requirements.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA407 Contribute to abattoir design and construction processes

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This describes the skills and knowledge required to assess the suitability of abattoir design and construction.

This unit is applicable to individuals who review and approve abattoir designs. It is also applicable to individuals who are responsible for planning new meat establishments or extensions to existing plants.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess proposed site for a meat processing	1.1 Identify workplace production requirements 1.2 Assess site suitability for a meat processing establishment in

Element	Performance criteria
plant	terms of regulatory requirements 1.3 Identify factors that will affect key stakeholders in the site
2. Assess the design and construction of a proposed meat processing establishment	2.1 Identify and apply relevant regulations and importing country requirements, for the design and construction of a meat processing establishment 2.2 Identify and apply all statutory and practical requirements for Quality Assurance (QA), animal welfare, workplace health and safety, and hygiene and sanitation to the design 2.3 Assess yard design in terms of achieving safe, effective and efficient movement of stock 2.4 Assess design in terms of achieving effective and efficient product flow and separation of edible and inedible products

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

MTMP409A Maintain abattoir design and construction standards	E

Assessment Requirements for AMPA407 Contribute to abattoir design and construction processes

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must maintain abattoir design and construction standards.

The candidate must:

- assess plans for a meat processing establishment against regulatory requirements
- describe the layout, operation, stock and product flow of a range of meat processing establishments
- identify elements of production process design that demonstrate efficient, hygienic and practical production procedures for edible and inedible products
- consult with relevant stakeholders to ensure all requirements are addressed
- identify and apply relevant workplace requirements
- interpret flow charts and plans relating to the design and construction of meat processing plants
- prepare reports relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- relevant statutory requirements for design and construction of abattoirs to meet hygienic production, workplace health and safety, and animal welfare requirements
- critical points in meat processing establishments that relate to design

Assessment Conditions

Plans can be assessed in simulated situations but must be assessed against current legislation and codes.

Assessment must be undertaken utilising realistic plans for slaughtering or boning facilities.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPA411 Oversee humane handling of animals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to oversee the handling and, where applicable, the slaughtering of animals by a range of company personnel and/or government inspection staff to meet regulatory requirements.

Ensuring animals are produced, handled and slaughtered humanely is the responsibility of both regulatory authorities and companies. This unit is therefore applicable to meat safety officers, lairage supervisors, Animal Welfare Officers and Quality Assurance (QA) Officers in meat processing establishments, and livestock transport and saleyard staff.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Oversee humane	1.1 Identify potential animal welfare risks and existing

Element	Performance criteria
handling of animals	management procedures 1.2 Identify animal welfare requirements in legislation, regulation and workplace procedures 1.3 Oversee handling of animals in accordance with workplace and regulatory requirements 1.4 Monitor procedures for minimising animal stress and preventing injury
2. Oversee humane euthanasia or slaughter of animals	2.1 Oversee effective restraint and stunning (where appropriate), prior to euthanasing or slaughtering of animals to ensure compliance with workplace and regulatory requirements 2.2 Oversee bleeding of animals to ensure compliance with workplace and regulatory requirements 2.3 Oversee monitoring of bleed chain insensibility to ensure compliance with workplace and regulatory requirements
3. Oversee facilities, equipment and people involved with the handling of animals	3.1 Oversee facilities, equipment, and people handling and slaughtering animals in accordance with workplace and regulatory requirements 3.2 Monitor data about bruising and hide or pelt damage and take corrective action where appropriate
4. Handle contingencies	4.1 Oversee handling of sick or injured stock in accordance with workplace and regulatory requirements 4.2 Oversee handling of wild or uncooperative animals in accordance with workplace and regulatory requirements 4.3 Interpret and implement contingency plans for managing animal welfare

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA411 Oversee humane handling of animals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- explain consequences of incorrect animal handling techniques
- explain why correct animal handling helps ensure that meat attains an acceptably low ultimate pH
- work effectively as an individual and as part of a team
- ensure bruising and/or hide or pelt damage due to livestock handling is minimised
- ensure stock handlers remain calm and are not injured or put at risk of injury
- ensure stress in animals is minimised through correct handling
- identify and apply relevant animal welfare and workplace health and safety requirements
- monitor the handling of livestock to ensure minimisation of stress
- identify sick and injured stock
- identify features of effective restraint, stun and bleed and/or oversee humane destruction
- monitor bleed chain insensibility
- plan stock movement to meet production requirements and minimise stress
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- regulatory and workplace requirements for the humane handling and slaughtering of animals
- animal welfare standards and regulations
- strategies to minimise stress to livestock
- the stunning and bleeding process and/or humane destruction requirements
- causes of ineffective stunning and bleeding

- regulatory and workplace requirements for monitoring stunning and bleeding

Assessment Conditions

Competency must be demonstrated against the current animal welfare codes and regulations. Assessment must involve handling livestock in working stockyards or slaughtering premises. This may take the form of supervising or auditing livestock handling or slaughtering operations.

A minimum of three different forms of evidence is required to demonstrate competency.

As a minimum, these must include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy current standards for RTOs.

AMPA412 Conduct an animal welfare audit of a meat processing plant

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to conduct an audit of animal welfare prior of slaughter and an animal welfare audit of the slaughter process.

This unit is for individuals who are employed to undertake animal welfare audits at a slaughtering establishment.

It is anticipated that this unit will complement existing auditor training by providing animal welfare related information.

Animal welfare audits conducted under this unit must be carried out in accordance with the Industry Animal Welfare Standards for Livestock Processing Establishments Preparing Meat for Human Consumption.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPA411 Oversee humane handling of animals

AMPX404 Conduct an internal audit of a documented program

MTMP2010A Apply animal welfare and handling requirements

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify relevant animal welfare regulations and standards	1.1 Identify and interpret relevant regulations and legislation about animal welfare/cruelty 1.2 Identify the responsibilities of business operators and personnel under relevant legislation 1.3 Identify relevant animal welfare standards, voluntary codes of practice and quality systems 1.4 Identify sections of acts, regulations, voluntary Codes of Practice or equivalent standards relevant to species being processed 1.5 Identify relevant and applicable animal welfare measures for receival, lairage, stunning and slaughtering during audit
2. Audit the animal welfare component of an Approved Arrangement for compliance with regulatory and relevant standard requirements	2.1 Audit Approved Arrangement or equivalent quality assurance systems for compliance with customer, commercial and regulatory requirements 2.2 Identify and confirm that workplace procedures for livestock receival, unloading, lairage, handling, restraining, stunning, slaughter, personnel training and animal welfare monitoring comply with relevant regulations and standards
3. Audit transport and unloading arrangements for livestock	3.1 Check the establishment's Approved Arrangement to ensure that it incorporates procedures and practices that enable compliance with customer, corporate and regulatory requirements 3.2 Audit the unloading and receival or ante-mortem inspection, sorting and yarding against workplace, customer, commercial and regulatory requirements 3.3 Identify facilities and equipment as operational, appropriately maintained and confirm their suitability for use
4. Audit management of livestock in lairage prior to slaughter	4.1 Assess inputs into the welfare of livestock in lairage against regulatory, customer and workplace requirements including facilities, handling practices, inspections, access to feed and water and pen density 4.2 Assess welfare of animals against pre-determined welfare measures
5. Audit treatment of sick/injured or uncooperative animals	5.1 Assess the handling of suspect, sick, injured or uncooperative stock against workplace and customer standards and regulatory requirements
6. Audit stunning of	6.1 Review inputs into the stunning process including equipment

Element	Performance criteria
livestock	<p data-bbox="603 309 1398 376">maintenance, training and facilities for compliance with work place, standards and regulatory requirements</p> <p data-bbox="555 387 1433 454">6.2 Assess effectiveness of restraint and stunning against workplace, customer and regulatory requirements</p> <p data-bbox="555 465 1410 533">6.3 Assess monitoring of effective stunning by company personnel against workplace, customer and regulatory requirements</p>

Assessment Requirements for AMPA412 Conduct an animal welfare audit of a meat processing plant

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed throughout the process of conducting at least one complete animal welfare audit at a meat processing facility.

The candidate must:

- assess the welfare of livestock at receipt and in lairage
- assess livestock handling against requirements during unloading and handling in the lead up to slaughter
- assess the handling of sick/injured and uncooperative animals against workplace and regulatory requirements
- make an assessment of effective restraint, stunning and humane slaughter of livestock
- use of effective interpersonal skills in a range of contexts, including audit interview situations
- comply with Workplace Health and Safety (WHS) requirements for working around livestock
- read and interpret relevant legislation, regulations, standards and Codes of Practice
- effectively record and communicate audit findings to relevant stakeholders

The candidate must explain and interpret a range of relevant animal welfare measures relevant to the audit situation.

Knowledge Evidence

The candidate must:

- be able to locate, read and interpret relevant animal welfare and cruelty legislation (Acts) and regulations
- have a working knowledge of relevant voluntary industry animal welfare standards for processing establishments
- have a working knowledge of relevant codes of practice or equivalent animal welfare standards (underpinning the Acts)

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- humane destruction and emergency slaughter arrangements
- relevant measures of animal welfare
- acceptable livestock handling techniques and measures
- impact of stress during handling on the ultimate pH and quality of meat
- WHS requirements for handling stock
- regulatory and workplace requirements for animal welfare
- regulatory requirements when dealing with sick and injured animals
- requirements for contingency plans for dealing with animal-handling emergencies

Assessment Conditions

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of evidence is required to demonstrate competency.

This must include as a minimum:

- written test or quiz
- a complete onsite mock audit of animal welfare.

Assessment must be conducted in a slaughtering establishment under real working conditions.

Assessors must satisfy current standards for RTOs.

AMPCOR201 Maintain personal equipment

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to maintain, clean and store personal equipment, including Personal Protective Equipment (PPE).

This unit can be used as part of a worker's induction to a meat processing establishment, smallgoods producer, retail premises or other meat establishment.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain personal equipment	1.1 Maintain personal equipment to ensure manufacturer specifications are met, where relevant 1.2 Meet workplace health and safety, hygiene and sanitation, workplace and regulatory requirements

Element	Performance criteria
2. Store personal equipment	2.1 Carry out appropriate maintenance for the equipment used 2.2 Store personal equipment in accordance with workplace and regulatory requirements
3. Clean personal equipment	3.1 Clean personal equipment to ensure that workplace requirements, workplace health and safety, hygiene and sanitation requirements, and manufacturer's specifications are all met, where relevant

Assessment Requirements for AMPCOR201 Maintain personal equipment

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The individual must be observed, on at least three separate occasions, following accepted workplace requirements for the maintenance of personal equipment.

The candidate must:

- apply communication skills relevant to the task
- demonstrate procedures for maintaining personal equipment
- check and prepare equipment in time for the start of work
- apply hygiene and sanitation, workplace health and safety requirements when using, cleaning and storing personal equipment, including Personal Protective Equipment (PPE)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- maintenance techniques for personal equipment
- relevant work instructions, Standard Operating Procedures (SOPs) and reports
- hygiene and sanitation, workplace health and safety, workplace and regulatory requirements related to maintaining, cleaning and storing personal equipment
- manufacturer specifications for use, maintenance, cleaning and storage of personal equipment, where relevant

Assessment Conditions

All assessment must be conducted against Australian meat industry standards and regulations.

Competency must be demonstrated during the normal operations of a meat processing workplace.

Competency must be assessed using the personal equipment issued to the individual.

The following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPCOR202 Apply hygiene and sanitation practices

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit covers the skills and knowledge workers require to apply personal hygiene and sanitation practices in a meat operation. It also covers appropriate methods for cleaning equipment and immediate work areas during operations.

This unit is applicable to workers in abattoirs, boning rooms, smallgoods plants, wild game harvester operations, wild game depots, game processing plants, knackeries, food service premises, wholesalers and retail meat establishments.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Clean own work area and equipment during	1.1 Hygienically clean worksite during operations to workplace health and safety, workplace and regulatory requirements

Element	Performance criteria
operations	1.2 Hygienically clean equipment and surfaces to regulatory and workplace requirements 1.3 Monitor cleanliness of work area according to workplace requirements
2. Identify sources of contamination and spoilage	2.1 Identify contamination and cross-contamination risks and take steps to reduce the risk 2.2 Take corrective action, in accordance with workplace and regulatory requirements, when contamination is identified
3. Follow workplace hygiene and sanitation requirements	3.1 Follow personal hygiene practices to workplace requirements 3.2 Handle product in accordance with workplace, and hygiene and sanitation requirements 3.3 Conduct work hygienically in accordance with workplace requirements 3.4 Process products in accordance with regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPCOR202 Apply hygiene and sanitation practices

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed consistently applying required workplace hygiene and sanitation practices under normal production conditions.

The candidate must:

- consistently follow workplace hygiene and sanitation procedures
- keep work areas clean, while working as an individual and as part of a team
- demonstrate basic hygiene and sanitation practices in all workplace activities
- use communication skills relevant to the task
- use and mix cleaning chemicals (if used) according to manufacturer specifications, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene and sanitation requirements for own area
- procedures for reporting contamination
- chemical contamination risks to product and how they are controlled
- consequences of contaminated or spoiled meat leaving the establishment
- consequences of failing to follow workplace requirements for hygienic handling and processing of meat
- time, temperature and moisture requirements for microbial growth
- causes of food spoilage and poisoning
- possible sources of contamination and cross-contamination in the worksite
- visual evidence of contamination
- microbes which may affect meat
- the scope and coverage of AS 4696:2007 *Hygienic production and transportation of meat and meat products for human consumption*

- sources of physical and microbiological contamination in meat establishments and how these hazards are controlled
- monitoring methods (including site, scent and use of protein sticks)

Assessment Conditions

Assessment must include demonstration of on-the-job competency in the workplace.

The following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPCOR203 Comply with Quality Assurance and HACCP requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed consistently complying with Quality Assurance and HACCP requirements in the workplace under normal production conditions.

The candidate must:

- comply with regulatory requirements
- determine critical control points
- follow workplace requirements related to HACCP and QA
- identify hazards to food safety
- inspect own work
- identify and apply relevant workplace health and safety requirements
- monitor critical control points

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- corrective actions relevant to critical control points
- nature of food safety hazards
- purpose of a HACCP program
- requirements for, and the nature of a HACCP plan
- regulatory requirements relevant to own work area
- nature and importance of work instructions, Standard Operating Procedures (SOPs), explanations and reports
- potential risk, loss or damage if the required actions are not performed
- control points for a specific task or activity and how hazards are controlled
- hazards to food safety and quality for specific work areas
- reasons for quality control, including inspection and sampling

Assessment Conditions

As a minimum, the following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPCOR204 Follow safe work policies and procedures

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed consistently complying with workplace health and safety requirements in the workplace under normal production conditions.

The candidate must:

- work safely as an individual and as a member of a team
- explain and report on workplace health and safety issues
- demonstrate safe work practices in all worksite activities
- follow workplace health and safety policies and procedures
- identify and apply relevant regulatory requirements as applicable
- identify and follow emergency procedures, including evacuation procedures, according to workplace requirements
- identify workplace health and safety hazards especially slips, falls and manual handling
- list hazards at the work site and control measures that have been implemented
- outline and observe own workplace health and safety legal responsibilities
- outline the employer's workplace health and safety legal requirements
- seek advice from more experienced colleagues or from manuals in order to operate new machinery and equipment safely
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- use, maintenance and storage of PPE required for different areas of the worksite, according to workplace requirements and manufacturer specifications
- ways of minimising manual handling hazards
- safe operating procedures for machinery at own work station
- procedures for reporting accidents at the work site
- functions of workplace health and safety committees and representatives at the work site

- PPE that must be worn for different areas at the work site
- process for making suggestions for improvement

Assessment Conditions

As a minimum, the following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPCOR205 Communicate in the workplace

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to carry out workplace communication practices. It includes the competencies to identify the enterprise's communication channels, use communication skills to undertake and complete workplace requirements, and contribute to positive workplace relations.

This unit can be used as part of a meat establishment workplace induction program introducing an individual to the industry and workplace communication requirements.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPCOR205 Communicate in the workplace

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed consistently complying with workplace communication requirements under normal production conditions.

The candidate must:

- copy and record workplace information accurately in routine formats and proformas
- demonstrate effective communication techniques with supervisors and colleagues
- demonstrate the exchange of relevant routine information with others to:
 - explain issues or problems
 - meet quality and food safety requirements
 - offer suggestions for improvement
 - reach conclusions
- describe forms of feedback provided to colleagues and key personnel
- participate in, and contribute to, meetings and discussions
- read and write to a level typically required in the workplace
- use appropriate communication styles when:
 - negotiating sensitive issues
 - obtaining views and information from others
 - working with cultural, social and ethnic groups

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- roles of key personnel in the workplace
- sources of information relevant to own work, including workplace health and safety, regulatory, work instructions and workplace requirements
- workplace standards of behaviour

Assessment Conditions

As a minimum, the following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

AMPCOR206 Overview the meat industry

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to provide employees with an understanding of the structure of the meat industry, their own workplace and the policies, procedures and conditions relevant to their employment.

This unit provides an introduction to the meat industry and all its sectors. It gives the individual an introduction to the types of products produced in a meat company, the conditions workers enjoy and their responsibilities to follow the company's policies and procedures.

This unit can be used as part of an employee's induction or pre-employment training program.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPCOR401 Manage own work performance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must manage own work performance.

The candidate must:

- apply judgement, experience and knowledge of enterprise deadlines and targets
- develop strategies for minimising and managing stress
- document professional development and training achievements
- identify and apply relevant Workplace Health and Safety (WHS), regulatory and workplace requirements
- identify personal career path and opportunities
- keep up-to-date with enterprise procedures and processes
- make decisions within own responsibility and accountability
- manage time effectively
- participate in internal and external networks to develop own knowledge, skills and competence
- plan and sequence tasks and activities

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- characteristics of an effective leader in the meat industry
- enterprise goals, directions, ethical standards and values
- how personal goals contribute to the achievement of enterprise goals
- own role in achieving organisation's goals
- career paths available in the industry

Assessment Conditions

Assessment must include demonstration of on-the-job competency in the workplace, and be supported by a referee's report.

The following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPCOR402 Facilitate Quality Assurance Process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to oversee a Hazard Analysis Critical Control Point (HACCP)-based Quality Assurance (QA) program. This unit is suitable for retailers, smallgoods producers, processors and food service establishments producing meat and meat products for domestic and export markets.

This unit is applicable to supervisors or those with responsibility for all or part of a meat establishment HACCP-based QA program.

Work in this unit must be carried out in accordance with AS4696 Australian Standard for the hygienic production and transportation of meat and meat products for human consumption.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Facilitate the ongoing implementation of the QA program in the	1.1 Identify regulatory basis for compliance with the company's HACCP-based QA program 1.2 Identify nature and importance of work instructions and

Element	Performance criteria
workplace	<p>Standard Operating Procedures (SOPs) and coach workers in their implications</p> <p>1.3 Write work instructions and SOPs to comprehensively document requirements for competent performance</p> <p>1.4 Review work instructions and SOPs for accuracy</p> <p>1.5 Monitor implementation of work instructions and operating procedures</p>
2. Monitor inspection and test records	<p>2.1 Identify control and critical control points in the HACCP program</p> <p>2.2 Identify and implement appropriate procedures for monitoring products and processes</p> <p>2.3 Identify critical limits and causes for product or process not conforming</p> <p>2.4 Monitor inspection and test records to verify product quality and identify performance trends</p> <p>2.5 Include descriptions of proposals in status reports to introduce improved processes or procedures</p>
3. Assessment Requirements for AMPCOR402 Facilitate Quality Assurance Process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

Evidence must demonstrate the candidate's consistency of performance over time at production speed. The candidate must facilitate Quality Assurance process.

The candidate must:

- apply appropriate mathematical concepts and measures
- assemble product and process inspection, test and other quality data in prescribed format
- calibrate equipment accurately and verify calibrations
- communicate quality system and/or food safety system requirements to workers with clarity and precision
- determine and take corrective and preventative action
- establish and manage relevant project teams to develop and implement or update the necessary elements of the quality system and food safety system
- explain actual and potential problems evident from trend analysis
- apply the HACCP principles and the process for developing a QA or food safety program
- identify and apply relevant Workplace Health and Safety (WHS) requirements
- interpret the results and trends of process monitoring
- prepare reports recommending improvements to processes and procedures
- prepare reports using primary and summary data, and appropriate language
- use relevant communication skills
- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- utilise available technology to record, manipulate, analyse and present or report data
- explain the data the enterprise uses to record performance
- interpret the resulting trends of product monitoring and testing
- monitor records and documentation for accuracy and compliance

- monitor the accurate and timely recording of quality data

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- workplace, regulatory and customer requirements critical to the workplace's operation and success
- enterprise recall and traceability procedures
- post-collection procedures for handling samples
- purpose of the HACCP development and review process
- risks associated with samples and how to minimise them
- actual/potential problems which can occur if SOPs or work instructions or their equivalent are non-existent or inaccurate
- document controls associated with procedural change
- necessary scope of the QA system and food safety system to ensure requirements are met
- purpose of calibrating equipment
- purpose of SOPs and work instructions
- sampling procedure
- implementation process for a change in the process
- causes of variation and non-conformance and appropriate courses of action to rectify problems
- critical limits for enterprise product or processes
- actual and potential risks associated with uncontrolled procedural changes
- legal obligations of the enterprise and individuals to maintain the QA system
- team requirements and team management processes or strategies

Assessment Conditions

Assessment must involve a demonstration of skills in the workplace.

Assessment must include demonstration of on-the-job competency in the workplace.

Competency must be demonstrated in terms of current regulatory requirements.

The following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPCOR403 Participate in workplace health and safety risk control process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to participate in the reduction of workplace health and safety risks in a meat processing plant.

This unit is applicable to supervisors or those with workplace health and safety responsibilities in abattoirs, boning rooms, knackeries, game processing plants, smallgoods plants, food services operations, wholesalers and retailers.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Participate in workplace inspections	1.1 Facilitate group processes to identify potential workplace health and safety hazards

Element	Performance criteria
	1.2 Participate in workplace inspections to identify potential hazards 1.3 Fulfil reporting obligations 1.4 Implement risk control processes
2. Participate in workplace health and safety risk control process	2.1 Participate in risk assessment processes 2.2 Control hazards in accordance with hierarchy of controls 2.3 Initiate workplace procedures for dealing with hazardous events 2.4 Inform relevant parties about any action taken and/or report it to designated personnel
3. Monitor implementation of safe work practices	3.1 Demonstrate, by example, compliance with safe work practices 3.2 Monitor safe work performance by employees 3.3 Implement safe work practices in accordance with regulatory requirements
4. Assist development of safe work practices	4.1 Develop changes to work procedures or Standard Operating Procedures (SOPs) in accordance with risk control processes and regulatory requirements 4.2 Consult employees in relation to the development of safe work practices 4.3 Reinforce employee understanding of safe work procedures on-the-job
5. Contribute to participative arrangements for the management of workplace health and safety	5.1 Implement and monitor consultation procedures about workplace health and safety issues to ensure that all workers may contribute 5.2 Deal with, resolve promptly, or refer to appropriate personnel issues raised through consultation in accordance with workplace procedures 5.3 Disseminate outcomes of consultation over WHS issues to the work group promptly
6. Contribute to workplace rehabilitation program as appropriate	6.1 Contribute to workplace rehabilitation programs in accordance with the requirements of a rehabilitation co-ordinator and/or provider

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPCOR403 Participate in workplace health and safety risk control process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply participative problem-solving techniques to identify and resolve workplace health and safety issues
- identify and apply extent of responsibility
- identify and apply relevant WHS and workplace requirements
- demonstrate safe work practices associated with work tasks
- identify WHS hazards in the workplace
- identify relevant hazard control equipment and explain function, safe operation, maintenance and storage requirements
- use facilitation skills to ensure participation from all group members
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- procedures for reporting hazards, accidents and incidents
- risk management principles
- process for developing and altering work procedures or SOPs
- current workplace health and safety legislative requirements

Assessment Conditions

Assessment must include demonstration of on-the-job competency in the workplace.

Competency must be demonstrated while exercising an appropriate level of involvement in the risk control process. Assessment must include demonstration of competence in a meat establishment.

The following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPCOR404 Facilitate hygiene and sanitation performance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to monitor the hygiene and sanitation performance of a plant.

This unit is applicable to supervisors or those with responsibilities overseeing hygiene and sanitation in meat processing establishments such as Quality Assurance (QA) officers and meat safety officers. It is applicable to meat processing, wholesaling, smallgoods and retailing operations.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret statutory and workplace requirements relating	1.1 Explain hygiene and sanitation, regulatory and workplace requirements to other workers to assist their workplace

Element	Performance criteria
to hygiene and sanitation	performance 1.2 Implement employer and employee rights, responsibilities and obligations to achieve hygiene and sanitation compliance
2. Monitor hygiene and sanitation performance	2.1 Monitor hygiene and sanitation to verify compliance with workplace and statutory requirements 2.2 Report situations requiring action to improve hygiene and sanitation compliance as part of the continuous improvement process 2.3 Evaluate impact of process and product monitoring on hygiene and sanitation
3. Respond to hygiene and sanitation problems	3.1 Investigate hygiene and sanitation issues using established processes and procedures to resolve problems 3.2 Follow up and report recommended action arising from the investigation to ensure reinforcement and documentation of the outcomes
4. Evaluate results of microbiological testing	4.1 Analyse results of microbiological testing in terms of regulatory and workplace requirements 4.2 Take corrective action in response to microbiological results when required by workplace and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPCOR404 Facilitate hygiene and sanitation performance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Competency is demonstrated by taking an appropriate level of responsibility for the implementation of hygiene and sanitation SOPs. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- define the problem being investigated
- understand and apply HACCP systems
- identify and apply workplace health and safety requirements
- plan an approach to the investigation
- evaluate the problem
- explain and monitor workplace hygiene and sanitation policies, practices and procedures
- report outcomes of the investigation
- follow up post-investigation issues
- identify action required to strengthen hygiene and sanitation compliance
- implement the monitoring procedures
- report monitoring outcomes
- use techniques for individual and team resolution of the problem
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- purpose of hygiene and sanitation monitoring
- regulatory and commercial implications of inadequate control of hygiene and sanitation
- company processes and procedures to conduct a hygiene and sanitation investigation
- employer and employee rights, responsibilities and obligations regarding hygiene and sanitation
- statutory requirements specific to the site of employment

Assessment Conditions

Assessment must include demonstration of on-the-job competency in the workplace.

Assessment should involve analysis of real or simulated data for a meat processing operation.

The following three forms of evidence must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPG300 Overview wild game meat industry

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to interpret and operate in the commercial and regulatory environment of the game meat industry.

This unit is applicable to workers in game processing plants, field depot managers and wild game harvesters.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the sequence	1.1 Explain the importance of a professional image for wild game

Element	Performance criteria
of operations for wild game harvesting in Australia	meat industry 1.2 Describe the sequence of operations from harvesting to end product 1.3 Identify the range of wild game meat products produced in Australia 1.4 Explain the impact of customer expectations on the wild game harvesting process
2. Interpret the commercial and regulatory environment of wild game meat harvesting	2.1 Explain the role of Department of Agriculture and relevant state and territory regulatory authorities 2.2 Explain the importance of the relevant approved arrangement, food safety plan or management plan 2.3 Explain relevant sections of AS 4464:2007 Hygienic Production of Wild Game Meat for Human Consumption 2.4 Explain the nature of prohibited areas/locations for harvesting 2.5 Describe auditing, review and micro-testing programs which affect the industry
3. Operate effectively as an individual in the wild game harvesting industry	3.1 Use appropriate communication skills and styles 3.2 Identify workplace health and safety hazards and take appropriate precautions 3.3 Manage time and delivery obligations 3.4 Describe personal hygiene requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMG300A Overview wild game meat industry.

Assessment Requirements for AMPG300 Overview wild game meat industry

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must be able to demonstrate an understanding that the wild game industry is highly regulated and reviewed with high standards of hygiene expected by customers of both the product and workers.

Candidates must:

- identify the sequence of operations for wild game harvesting in Australia
- interpret the commercial and regulatory environment of wild game meat harvesting
- operate effectively as an individual in the wild game harvesting industry
- use appropriate communication styles
- read and interpret workplace related documentation
- maintain the professional image of the industry in the performance of duties

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- application of Approved Arrangement or management plan to the individual's duties
- implications of company, regulator and international reviews of game harvesting industry
- role of the state and federal regulators
- the steps in the wild game supply chain
- markets for the wild game products

Assessment Conditions

Competencies for this unit can be demonstrated either in the workplace or in a simulated environment.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

AMPG301 Operate a game harvesting vehicle

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a game harvesting vehicle safely and hygienically.

This unit is suitable for vehicle operators who are harvesting wild game for commercial purposes. Operators will have responsibility for the operation and maintenance of the wild game harvesting vehicle, the loading and unloading of carcasses and the safe handling of cleaning chemicals and equipment.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and maintain wild game harvesting	1.1 Clean wild game harvesting vehicle and check hygiene prior to harvesting operation

Element	Performance criteria
vehicle and equipment	1.2 Check and replenish consumables, as required 1.3 Check and maintain equipment
2. Load, transport and deliver to field depot or wild game meat processing premises	2.1 Load carcasses according to management plan and regulatory requirements 2.2 Load and transport carcasses to avoid contamination 2.3 Plan delivery times to meet regulatory and company requirements
3. Unload field dressed wild game animal carcase	3.1 Unload carcasses according to management plan and regulatory requirements 3.2 Unload carcasses to minimise contamination 3.3 Plan and achieve delivery times at field depots or processing plants to meet regulatory and company requirements
4. Clean truck and equipment	4.1 Clean vehicle to meet regulatory requirements 4.2 Use cleaning chemicals that meet regulatory requirements in accordance with manufacturer instructions 4.3 Clean kit and hanging pins in accordance with the management plan 4.4 Store kit and hanging pins so as to avoid contamination

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMG301A Operate a game harvesting vehicle.

Assessment Requirements for AMPG301 Operate a game harvesting vehicle

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a game harvesting vehicle safely and hygienically.

The candidate must:

- clean vehicle and equipment to a required standard
- maintain the vehicle
- operate the vehicle safely
- avoid contamination of carcasses during loading and unloading
- hang carcasses according to regulatory and corporate requirements
- plan transport to the field depot to meet company and regulatory requirements
- complete required paperwork to a satisfactory standard
- use communication skills applicable to communicating with depot managers and/or processing company personnel and regulatory representatives
- clean and sanitise vehicle
- avoid contamination of kit and equipment in storage

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- regulations covering game harvesting vehicles
- supply of required consumables
- relevant sections of the Australian Standard
- potable water supply requirements
- lighting requirements
- hanging requirements
- importance of air flow
- regulations associated with transport, loading and unloading of carcasses
- causes of contamination during loading, transport and unloading
- methods for minimising contamination

- time requirements for refrigeration after death and sunrise
- regulatory requirements for identification and traceability of carcasses
- reporting and documentation requirements
- hygiene and sanitation during unloading
- personal hygiene Standard Operating Procedures (SOP)
- work instruction for carcass receipt
- depot requirements for receipt of carcasses
- workplace health and safety hazards associated with handling carcasses
- ways of minimising workplace health and safety hazards associated with handling carcasses
- hygiene and sanitation requirements for game harvesting vehicles
- the purpose and uses of particular cleaning and sanitising chemicals
- importance of sanitising
- suitability of chemicals
- workplace health and safety hazards associated with cleaning chemicals
- storage requirements for kit and hanging pins

Assessment Conditions

This competency has to be demonstrated under actual work conditions while harvesting wild game animals.

The assessment must address the candidate's ability to maintain, operate, load and unload carcasses during a wild game harvesting exercise.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration (face to face or video)
- workplace referee or third-party (field depot or wild game processing premises) report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPG302 Eviscerate, inspect and tag wild game carcase in the field

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to partially or fully eviscerate a wild game animal carcase in the field.

This unit is applicable to field harvesters who are required to partially or fully eviscerate wild game animal carcasses in the field prior to delivery of wild game carcasses to a field depot or wild game processing premises. Tagging will be carried out according to company and regulatory requirements.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Eviscerate carcase	1.1 Perform post-harvesting inspection to identify any abnormality and disease 1.2 Eviscerate carcasses hygienically to company and regulatory requirements 1.3 Consistently follow a set routine for evisceration 1.4 Identify abnormal conditions and conditions that exclude carcasses 1.5 Maintain hygiene between carcasses
2. Inspect carcase	2.1 Perform post-evisceration inspection for contamination 2.2 Identify diseases and conditions that exclude carcasses 2.3 Comply with trimming requirements
3. Tag animal and complete documentation	3.1 Accurately complete tagging requirements, where applicable to the species and regulatory requirement 3.2 Identify property by name and/or property identification code (PIC) 3.3 Identify species for the purposes of completing tags

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMG302A Eviscerate, inspect and tag wild game carcase in the field.

Assessment Requirements for AMPG302 Eviscerate, inspect and tag wild game carcase in the field

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must partially or fully eviscerate a game animal carcase in the field.

The candidate must:

- demonstrate competent evisceration of carcasses without guidance or supervision
- recognise diseases and abnormal conditions
- eviscerate carcasses hygienically and avoid contamination
- consistently follow a set routine for evisceration
- handle knives safely and hygienically
- identify species
- read and interpret required documentation
- apply numeracy skills relevant to completion of documentation
- develop practical solutions to workplace problems
- adapt to new situations
- manage time and priorities

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- types and causes of contamination
- trimming requirements
- relevant State Regulations
- relevant sections of the Australian Standard
- rejection and disposal processes
- hygiene and sanitation requirements
- company and regulatory requirements
- causes of contamination and cross contamination
- time requirements for evisceration

- workplace health and safety hazards associated with the field during evisceration of wild game carcasses
- corporate requirements for tagging procedures
- state wildlife/conservation authority requirements for tagging
- property/location identification protocols

Assessment Conditions

This competency must be demonstrated under actual work conditions while eviscerating, inspecting and tagging wild game carcase in the field.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration (face to face or video)
- workplace referee or third-party (field depot or wild game processing premises) report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPG303 Receive and inspect wild game carcasses from the field

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to receive and inspect wild game animal carcasses directly from the harvester at a depot or wild game meat processing premises.

This unit applies to the receipt and inspection of fresh field shot wild game animal carcasses at field depots or straight to a wild game meat processing works. The receiver will have responsibility for the inspection of carcasses and make a disposition on the carcasses, including the rejection of carcasses not suitable for processing. They will check that the tagging and time requirements are also met.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Receive wild game meat carcasses at a field depot or wild game meat processing premises	1.1 Manage receipt of carcasses according to depot management plan 1.2 Inspect tags to ensure compliance with company and regulatory requirements 1.3 Check and store paperwork associated with carcasses from each harvester's load received
2. Inspect wild game animal carcasses	2.1 Inspect carcasses for contamination and accept or reject according to company and regulatory requirements 2.2 Explain reasons for rejection of carcasses to game harvester 2.3 Prepare relevant records of receipt of carcasses
3. Weigh wild game animal carcasses, where applicable	3.1 Prepare scales in accordance with company and regulatory requirements 3.2 Weigh carcasses 3.3 Complete and store records in accordance with company and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPG303 Receive and inspect wild game carcasses from the field

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must receive and inspect fresh field shot game carcasses directly from the harvester at a depot or processing plant.

The candidate must:

- demonstrate competent receipt and inspection of carcasses without guidance or supervision
- recognise diseases and abnormal conditions and make dispositions
- inspect carcasses and make accurate dispositions
- identify:
 - faecal material
 - abnormal carcasses
 - enlarged or discoloured kidneys
 - slimy or smelly meat surface
 - emaciated carcasses
 - abnormal animals
 - fly strike
 - mould
 - unacceptable contamination by other foreign matter
 - inadequate dressing
 - evidence of animal welfare issues
- receive and record harvester's paperwork, where applicable
- check tags for compliance
- prepare records of carcass receipt
- communicate issues relevant to work instructions and Standard Operating Procedures (SOPs) with game harvesters and processing companies
- weigh carcasses (where appropriate)
- read and interpret workplace related documentation
- apply numeracy skills to workplace requirements

- share information
- show independence in identifying problems
- collect, analyse and organise information
- take initiative and make decisions within workplace role
- use technology and workplace-related equipment

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- causes of contamination at receipt
- hygiene and workplace health and safety risks associated with carcass receipt
- relevant sections of AS 4464:2007 Australian Standard for Hygienic Production of Wild Game Meat for Human Consumption
- identification and traceability requirements
- eligible carcasses
- tag requirements
- Shire requirements
- areas prohibited to field harvesters
- lighting lux requirements to ensure adequate inspection at night
- workplace health and safety hazards specific to receipt

Assessment Conditions

This competency has to be demonstrated either at field depots or at wild game processing premises receiving wild game animal carcasses straight from the field.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration (face to face or video)
- workplace referee or third-party (field depot or wild game processing premises) report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPG304 Receive and inspect wild game carcasses at a processing plant

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must make a disposition on wild game animal carcasses as they are received at a game processing plant.

The candidate must:

- demonstrate competent pre-dressing inspection of carcasses following presentation without guidance or supervision
- recognise diseases and abnormal conditions and make dispositions
- assess harvester tags for completeness, eligibility and accuracy
- assess temperature of carcasses (where required)
- identify:
 - faecal material
 - ingesta
 - enlarged or discoloured kidneys
 - indication of any decomposition process
 - emaciated carcasses
 - abnormal animals
 - fly strike
 - mould
 - unacceptable contamination by other foreign matter
 - faulty dressing
 - evidence of animal welfare issues
- determine which carcase needs to be retained
- communicate and record inspection results
- ensure requirements of the work instruction have been addressed
- read and interpret workplace related documentation
- apply numeracy skills relevant to work instructions
- share information

- show independence during inspection
- work without supervision
- where necessary delegate
- collect, analyse and organise information
- take initiative and make decisions within workplace role
- use technology and workplace-related equipment

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- relevant sections of AS 4464:2007 Hygienic Production of Wild Game Meat for Human Consumption
- importance of the process and the need to control the unloading process to ensure adequate inspection
- relevant work instruction and Standard Operating Procedures (SOPs)
- state wildlife/conservation authority requirements
- company Food Safety Approved Program requirements
- workplace health and safety hazards associated with unloading
- lighting requirements
- temperature requirements
- sampling and temperature check procedures and reporting requirements
- micro testing arrangements
- rejection and disposal processes
- carcass retain procedures
- calibration requirements
- processes for scales preparation and carcass weighing
- weight requirements and underweight reporting procedures
- company and regulatory reporting requirements
- approved tag requirements
- inspection records requirements
- evidence of diseases and conditions
- causes of contamination
- anatomy of game animals sufficient to provide meaningful and objective feedback to harvesters and depot managers
- identification and traceability regulations/requirements
- nature of data logger information

Assessment Conditions

This competency has to be demonstrated under actual work conditions at a wild game processing premises receiving wild game animal carcasses either from field depots or direct from the field.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPG305 Store wild game carcasses

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must move carcasses safely and hygienically into and out of wild game carcasses depots.

The candidate must:

- move and store wild game animal carcass according to workplace, health and safety, hygiene and sanitation, Quality Assurance (QA) and regulatory requirements
- perform basic refrigeration maintenance
- measure and record temperature if part of workplace requirements
- explain workplace requirements related to storing carcass product

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- handling procedures for carcass product
- hygiene and sanitation requirements related to storing carcass product
- methods of product transfer
- workplace health and safety requirements to reduce potential risks
- potential workplace health and safety risks related to storing carcass product, transferring carcasses on a rail, and working in a cold environment
- regulatory requirements related to storing carcass product
- importance of storing product at the required ambient temperature

Assessment Conditions

Assessment must be conducted in an accredited field depot environment.

Competency must be demonstrated under normal operating conditions.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration (face to face or video)
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPG306 Use firearms to harvest wild game

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to harvest animals humanely and defines the standard required to:

- identify the species to be harvested
- prepare and handle ammunition and weapons safely
- ensure the harvesting area is clear and notifications have been made where necessary
- harvest the animal using a shot to a body site appropriate to the target species that causes instant death and is prescribed in the relevant code of practice

This unit is applicable to training field harvesters who are harvesting wild game.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

Individuals undertaking this unit must hold a current firearms/shooters licence and the relevant State permits to harvest wild game.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan harvesting of wild game animals	1.1 Confirm anatomy and physical features of target animal, including location of vulnerable organs of target animal 1.2 Identify location of habitats, habits and range of movements of target animal 1.3 Determine timing of the harvest based on the activity patterns of the target animal 1.4 Identify hazards associated with the harvest in accordance with workplace health and safety standards 1.5 Identify environmental and public safety risks associated with the harvest are identified
2. Prepare for the harvesting operations	2.1 Determine location and boundaries for the harvest in accordance with the animal management plan 2.2 Check time and duration of the harvest and notify relevant personnel, where applicable 2.3 Take precautions to minimise hazards associated with the harvest in accordance with workplace health and safety standards 2.4 Take precautions to minimise environmental risks associated with the harvest 2.5 Confirm firearm licences, harvesting permits or exemptions as current in accordance with statutory requirements 2.6 Select firearm and ammunition types to comply with those recommended for the target animal in accordance with regulatory requirements and animal ethics guidelines 2.7 Zero and test-fire firearm in accordance with industry practice 2.8 Stow firearm unloaded and in safety mode for transport
3. Harvest animals	3.1 Use Personal Protective Equipment (PPE) in accordance with workplace health and safety standards and statutory requirements 3.2 Carry firearm safely with muzzle pointing in safe direction at all times in accordance with statutory requirements and industry practice 3.3 Load, discharge and unload firearm safely in accordance with regulatory requirements 3.4 Inspect target animal pre-harvest for suitability

Element	Performance criteria
	3.5 Aim firearm at vulnerable sites on the animal according to target species 3.6 Kill each target animal using a minimum of shots 3.7 Check each target animal to ensure it is dead prior to selecting the next target animal 3.8 Cleanly destroy target animals that have not been killed in a humane manner in accordance with animal welfare regulations and statutory requirements 3.9 Bleed carcasses in accordance with industry practice
4. Clean and store equipment and material	4.1 Maintain and store firearms in accordance with manufacturer instructions and statutory requirements 4.2 Store ammunition in accordance with statutory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMG306A Use firearms to harvest wild game.

Assessment Requirements for AMPG306 Use firearms to harvest wild game

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must harvest wild game animals humanely.

The candidate must:

- confirm the species to be harvested
- prepare and handle ammunition and weapons safely
- ensure the harvesting area is clear and notifications have been made where necessary
- shoot the animal in a body site appropriate to the target species that causes instant death and is prescribed in the relevant code of practice
- identify hazards and implement safe operating procedures
- maintain and store weapons
- handle weapons
- assess viability of shot
- use weapons to harvest accurately
- minimise animal trauma

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- workplace health and safety, environment, public risk and animal welfare legislative and enterprise requirements
- common law principles relating to property, stock, duty of care and due diligence
- animal life cycles and behaviours
- anatomy and physical features of the animal
- firearms safety
- suitable firearms and ammunition for target species
- emergency procedures appropriate to the firearms handling

Assessment Conditions

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

The harvesting of animals can be assessed in the field culling game or utilising a realistic simulation in the field.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

AMPMT501 Design and manage the food safety system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to design and manage food safety programs for meat industry enterprises including meat processing, smallgoods, retail and food services operations. The unit also describes the skills and knowledge for working with customers and consumers on food safety issues.

This unit is appropriate for all managers in a food safety and/or Quality Assurance (QA) role, and for those working in production roles with responsibility for food safety and QA.

Food safety is a critical element of product quality and is a priority for all sectors of the meat processing industry. Food safety is also a community issue and public perceptions of the safety of meat and meat products affect the viability of meat processing enterprises.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced, skilled activities.

All work in this area must be conducted in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish enterprise meat or food safety system requirements	1.1 Determine the goals, scope and requirements of the food safety system, in accordance with customer, enterprise and regulatory requirements 1.2 Evaluate alternative food safety systems against enterprise requirements and identify the preferred system 1.3 Plan the development of the food safety system using team and consultative approaches 1.4 Identify and obtain resource requirements, including staff training requirements, for effective systems operation and maintenance
2. Develop food safety systems	2.1 Identify food safety responsibilities, obligations and roles and clearly explain them to stakeholders 2.2 Identify and describe processes covered by the food safety system 2.3 Identify food safety hazards for all processes within the scope of the food safety system 2.4 Identify, develop and validate hazard control measures 2.5 Develop procedures for preventative action
3. Establish monitoring procedures and corrective actions	3.1 Develop monitoring procedures and use monitoring information to inform corrective actions 3.2 Develop and implement corrective actions for effective hazard control 3.3 Develop, maintain and secure recording and documentation procedures 3.4 Develop, resource and implement strategies to support routine and consistent application of food safety systems in the workplace
4. Evaluate food safety system	4.1 Establish audit procedures and monitor audits 4.2 Establish verification procedures and schedules and use verification information when reviewing the food safety system 4.3 Review and update the food safety system to reflect changes to Australian Standards, technical information (including verification data) and process information according to established procedures

Element	Performance criteria
	4.4 Prepare food safety systems for external review and approval by relevant authorities 4.5 Use relevant information to measure performance against policies and goals
5. Communicate food safety outcomes	5.1 Conduct interactions with the public, regulatory authorities and agencies in a positive, cooperative and open manner 5.2 Promptly report food safety incidents and non-compliance to relevant authorities 5.3 Gather and analyse customer and consumer feedback and include findings in the review of the food safety system 5.4 Document food safety system outcomes to promote public confidence in enterprise products and services

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT501 Design and manage the food safety system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must design and manage the food safety system.

The candidate must:

- analyse performance information to determine progress and areas for review or improvement
- consult with stakeholders to determine the scope of the food safety systems, procedures and controls and identify food handling practices, processing techniques and support programs in use
- determine measures for correcting processes, outcomes outside acceptable limits, including relevant procedures, when to implement corrective action, who is responsible for taking corrective action and information necessary to record
- develop and validate control measures using objective data, industry guidelines and codes of practice
- develop performance standards and criteria for the food safety system
- develop strategies to support the workforce in implementing the food safety system
- establish internal audit processes and schedules, including developing and leading the audit team
- establish procedures to monitor, review and secure record-keeping systems consistent with regulatory requirements
- establish verification procedures and schedules and identify action required if the outcomes of verification indicate that the program requirements have not been met or that the original program was inadequate
- establish, monitor and continuously improve food safety support systems consistent with regulatory requirements
- evaluate alternative food and/or meat safety systems for suitability for enterprise goals and directions, enterprise operations, enterprise product, cost and customer and regulatory requirements

- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify monitoring requirements and develop monitoring procedures for food safety hazards identified in the enterprise
- identify workforce training needs and negotiate and schedule training to support system requirements and operation
- liaise with suppliers to establish and monitor enterprise food safety and quality requirements for products and processes
- maintain currency of knowledge through independent research or professional development
- monitor public health requirements and concerns and prepare reports for the enterprise, public health authorities, customers and consumers on progress and outcomes of the food safety system
- monitor the implementation of preventative action measures, controls and actions to correct non-compliance or non-conformance
- prepare accurate reports for senior management detailing compliance breaches/incidents, actions and outcomes and the implications for the enterprise
- prepare action plans for the development and review of the food safety system, which include timelines, establishing, leading and supporting the HACCP team
- prepare and present food safety system information, procedures, documentation and reports in languages, formats and styles appropriate for the audience and purpose
- prepare communication strategies to inform internal and external stakeholders of progress and outcomes of the food safety system
- prepare HACCP plans and support documentation including hazard analysis charts and tables, manuals, data analysis reports, corrective action reports and verifications reports, Standard Operating Procedures (SOPs) and work instructions where appropriate for the enterprise system
- provide feedback to the workforce or team on food safety performance
- use appropriate communication skills and strategies for informing and confirming the roles, responsibilities and obligations of all participants in the operation of the enterprise
- use available technology and data management systems to gather, record, manipulate, interpret and report food safety data and information

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- validation and verification (including audit) purposes and processes
- product and process and the microbiological, physical and chemical impacts on the safety of enterprise meat and meat products in the identification of hazards and the assessment and control of food safety risks
- Hazard Analysis Critical Control Point HACCP principles and techniques and where appropriate to the enterprise, Good Manufacturing Practices (GMP)
- the enterprise's ethical standards and the implications for the food safety system
- the roles, responsibilities and obligations of the enterprise and individuals in the food safety system

- regulatory requirements for food safety, including HACCP-based programs, support programs, record-keeping, verification and internal/external audits, and the implications for enterprise operations
- scope, auditor role and responsibility, and scheduling requirements for internal and external audit process
- legal responsibilities for reporting audit findings, including breaches and non-compliances, to enforcement agencies, and for conflicts of interest, confidentiality, rights of appeal and giving evidence in court

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority, under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify potential for new product or process development	1.1 Analyse internal and external environments including legislative frameworks, industry directions, enterprise goals and consumer trends to identify emerging opportunities 1.2 Describe enterprise goals for the development of new product or process 1.3 Identify and evaluate potential products or processes consistent with the goals and directions of the enterprise 1.4 Obtain enterprise estimates and forecasts of required production levels, costs, sales and required rate of return 1.5 Identify regulatory requirements for the development and sale of new product or process
2. Develop and test product or process	2.1 Prepare schedules and plans for the development and trial of new product 2.2 Identify sources of technical expertise and information 2.3 Research and refine product or process concept 2.4 Develop prototype and evaluate it for impact on meat quality and food safety 2.5 Refine and confirm specifications for new product or process
3. Evaluate feasibility of product or process for the enterprise	3.1 Prepare samples of new products 3.2 Coordinate, monitor and evaluate trials and tests of product or processes for commercial operation 3.3 Gather and analyse customer and consumer feedback 3.4 Assess enterprise capacity to support new product or process and identify system strengths and weaknesses 3.5 Prepare resource analyses and proposals for the introduction of new product or process 3.6 Cost new product for commercial implementation and evaluate it against enterprise forecasts of production, costs, sales and rate of return 3.7 Conduct risk assessment 3.8 Prepare and present recommendations including risk management strategies
4. Scale up operations for	4.1 Obtain and schedule resources for commercial operation

Element	Performance criteria
commercial implementation	4.2 Prepare action plans for the scale up to commercial operations in consultation with enterprise personnel 4.3 Prepare and implement communication and consultation strategies to inform stakeholders of progress and gain their commitment to the process 4.4 Identify food safety requirements of new product or process and include them in food safety system and plans 4.5 Develop and implement monitoring and control systems 4.6 Prepare contingency plans 4.7 Train personnel in new product or processes, systems and procedures 4.8 Commission product or process with minimum disruption to other operations
5. Evaluate market impact of new product	5.1 Prepare product information and samples for marketing and promotion 5.2 Determine targets for new product or process in consultation with relevant personnel, in accordance with enterprise goals and operations 5.3 Measure product or process performance against targets 5.4 Analyse causes for not achieving targets and prepare recommendations for improvement 5.5 Gather and analyse customer or consumer feedback and include results in recommendations for improvement

Assessment Requirements for AMPMGT502 Manage new product or process development

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must manage the development of a new product or process.

The candidate must:

- analyse product or process performance against enterprise targets, including identifying company goals, setting targets, collecting and analysing performance data including customer feedback
- apply relevant communication and mathematical skills
- work effectively as an individual and as a team member
- describe and comply with the legal, ethical and regulatory requirements relating to the development, testing and trialling, packaging, labelling and distribution of meat and meat products
- develop commitment and capacity of personnel, including identification of training requirements and provision of training; consultation with personnel when planning and resolving problems; teamwork; and the use of effective communication strategies with all stakeholders
- develop concept proposals based on detailed technical and product knowledge and an evaluation of alternative products or processes
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- outline sampling, testing and evaluation procedures and assess their appropriateness to the development of new product
- plan and implement the commercial operation of the new product or process, including obtaining and scheduling resources, the development of Standard Operating Procedures (SOPs), work instructions, product specifications and their integration with plant systems
- prepare product descriptions for a range of audiences (including regulatory authorities, importing countries, enterprise marketing and/or sales personnel, customers and consumers)

- prepare product or process development strategy
- prepare resource proposals based on the calculation and estimation of costs, sales, payback periods and potential rates of return
- present reports according to legal and enterprise requirements
- research and describe current technical and product information relating to potential new product (including processing and manufacturing techniques, functional ingredients, additives, and consumer and industry trends)
- utilise a range of communication and information technologies for the development, testing, monitoring and analysis of new products

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- the impact of pre and post slaughter factors and the major physical, chemical, biochemical and microbiological characteristics and changes that affect the quality of meat and meat products
- nutritional qualities of meat and meat products
- risk assessment processes

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPMT503 Develop and assess a meat retailing business opportunity

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to identify, develop and assess a new business activity or opportunity for a meat retailing enterprise.

Owners, managers or senior staff of meat retailing enterprises may wish to develop their business, start new ventures or explore potential to create new products and services for an existing organisation.

Individuals might be self-employed, or working for a business of any size, where they develop opportunities as part of a broader role within the enterprise.

This unit does not cover implementing or financing the new venture, or managing the growing business.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Assessment Requirements for AMPMGT503 Develop and assess a meat retailing business opportunity

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must provide evidence that they have identified, developed and assessed the initial feasibility of at least one new business or activity idea. Evidence should be documented and show that consultation occurred.

Evidence will cover processes used to identify a range of ideas, select ideas for assessment of initial feasibility and consult with prospective partners. It will also cover documentation of idea conception and feasibility assessment.

- The candidate must:
- relate to people from a range of social, cultural and ethnic backgrounds, and with varying physical and mental abilities
- use suitable thinking techniques
- use research and analytical skills to:
 - conduct basic research
 - conduct initial feasibility assessment
 - prepare basic business planning estimates
- apply negotiation skills for exploring partnerships
- use verbal and written communication skills to:
 - document ideas, business planning estimates and feasibility assessment
 - negotiate with potential partners
- determine legal, workplace health and safety and non-legal requirements
- work with employees and family where relevant
- calculate business planning estimates
- assess risk and plan for contingencies
- solve problems as they arise in negotiations
- use technology to manage information
- identify and develop fresh business opportunity ideas
- document a range of ideas
- assess and evaluate relevant market, client, product and service information

- communicate ideas to supervisors, managers and other employees

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of :

- general characteristics and traits of successful entrepreneurs
- biographies and case studies of particular individuals, in own or related industries
- relevant legal and non-legal requirements
- basic methods of business planning
- personal characteristics of successful entrepreneurs
- risk assessment strategies

Assessment Conditions

Assessment must include access to relevant records, personnel and documentation.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPMT504 Develop, manage and maintain quality systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to establish, maintain and control an enterprise quality system. It also describes the skills and knowledge needed to lead people, manage systems and ensure quality in all enterprise systems and operations. The development and management of quality systems affects enterprise ability to operate in specific markets and influences customer and consumer confidence in products.

This unit will be of particular interest to Quality Assurance (QA) managers and personnel, production managers and supervisors, operating in a meat industry context.

At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make significant contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their worksite or department. They may be assisted by external experts to develop plans and strategies.

This unit must be delivered using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish requirements of the quality system	1.1 Develop policies expressing the organisation's commitment to the quality system and processes 1.2 Identify legislative requirements for enterprise quality systems 1.3 Determine scope and objectives of the quality system, including links with all enterprise operations, customers, suppliers and contractors 1.4 Establish Quality performance standards, including customer and supplier service standards, in accordance with enterprise goals and directions 1.5 Identify resource requirements and include them in financial, human resource and operational plans
2. Design and prepare for the quality system	2.1 Select and design Quality systems to meet enterprise, customer and regulatory requirements 2.2 Ensure Quality principles underpin all enterprise operations to achieve business goals and performance standards 2.3 Clearly define and communicate responsibilities for development, implementation and operation of the system 2.4 Involve personnel from all levels and areas of the organisation in the development and implementation of the quality system 2.5 Develop and validate system components, procedures and supporting documentation 2.6 Develop consultative and communication strategies to link the quality system with all aspects of enterprise operations 2.7 Determine and negotiate supplier or contractor service standards and audit requirements 2.8 Develop performance measures and indicators to assess performance against policies, goals and relevant standards
3. Implement and monitor the quality system	3.1 Prepare and resource implementation plan 3.2 Prepare and resource training plans to provide personnel at all levels with quality concepts and skills 3.3 Address Quality system requirements and customer focus in the establishment, operation and evaluation of all enterprise systems 3.4 Identify and validate control and preventative action measures

Element	Performance criteria
	3.5 Develop and monitor corrective action procedures 3.6 Establish procedures for reporting, recording and responding to non-conformances and non-compliances 3.7 Monitor and document customer and supplier service standards 3.8 Collect, analyse and report implications of Quality data 3.9 Monitor Quality costs and performance 3.10 Prepare Quality system for external review and approval by relevant authorities
4. Continuously improve the quality system	4.1 Monitor and review impacts of the quality system on enterprise operations 4.2 Resolve responses to customer complaints and requests and use feedback to improve the system 4.3 Establish procedures for the ongoing identification and resolution of issues 4.4 Update Quality system for changes in process, technical information, customer and regulatory requirements 4.5 Include stakeholders in decision making and continuous improvement processes and strategies 4.6 Feed Quality system results, findings and conclusions into improvement processes 4.7 Analyse costs and benefits of the quality system 4.8 Continuously review Quality goals and targets
5. Communicate quality outcomes	5.1 Complete certification of products and processes consistent with quality outcomes according to customer and regulatory requirements 5.2 Promptly notify regulatory authorities and agencies of breaches and non-compliance incidents 5.3 Use Quality outcomes to promote public confidence in enterprise products and services

Assessment Requirements for AMPMGT504 Develop, manage and maintain quality systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- analyse complex statistical data and prepare corrective responses to non-conformances and variations identified in the data, where relevant to enterprise quality systems and operations
- apply quality concepts and tools to problem solving and the development of quality data collection, data management systems and analysis strategies
- apply substantial product and process knowledge to the development of the quality system and the interpretation of quality data
- apply relevant communication and mathematical skills
- communicate quality goals, requirements and findings to stakeholders in formats and styles appropriate to the context and purpose
- develop quality policies for the enterprise in consultation with senior management and other stakeholders
- develop procedures for consultation and feedback and opportunities for identification and resolution of quality issues and problems
- develop continuous improvement processes and team building using the 'plan, do, check, act cycle'
- consult, negotiate with and report to regulatory authorities openly and promptly, consistent with enterprise ethical standards, including the notification of breaches and the preparation of non-compliance reports
- develop workforce commitment, capability and responsibility for quality system, including identifying, negotiating and scheduling training; inclusion of responsibilities and duties relating to quality system implementation and integration in all job descriptions and work instructions; clear communication of responsibilities and requirements; delegation of tasks and responsibilities; and inclusion of workforce in consultative and continuous improvement processes
- ensure the quality system meets legislative and regulatory requirements

- exercise judgement, pragmatism and quality knowledge in managing and resolving quality issues and problems
- identify and apply relevant workplace, workplace health and safety, environmental sustainability, animal welfare and biosecurity requirements
- identify appropriate monitoring systems and strategies to support the enterprise quality system
- identify, research and update sources of quality information and advice, including technical and regulatory information to support enterprise quality system
- lead personnel (including Hazard Analysis Critical Control Point (HACCP) team, management, quality team, meat inspection team, laboratory, maintenance teams, processors and operators) in the implementation and improvement of the quality system
- monitor and certify processes and products to ensure they meet relevant standards, including importing country, customer and public health requirements
- oversee internal and external audit processes, act on audit findings and provide feedback to personnel to improve system
- oversee preparation for third party certification where appropriate
- plan and resource enterprise training strategy, in accordance with regulatory requirements, to assist personnel at all levels in implementation of quality system
- prepare and sign off on quality policies, manuals and documentation for enterprise, including preparation and updating of preventive, corrective and responsive procedures and strategies, supplier criteria and specifications and supplier and contractor audit requirements
- prepare and sign off quality policies, manuals and documentation for the enterprise, including the preparation and updating of preventative, corrective and responsive procedures and strategies, supplier criteria and specifications, supplier and contractor audit requirements
- prepare quality implementation plans, identifying goals, key personnel and areas, resources, strategies, timelines and milestones
- present reports according to legal and enterprise requirements
- resolve customer complaints promptly and provide corrective action responses
- use appropriate questioning, observation, listening and recording skills when collecting and monitoring data
- where quality systems are based on HACCP principles or Good Manufacturing Practice (GMP), explain principles and their implications for enterprise quality system

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- key concepts, philosophies and tools of quality management
- impact of enterprise management and organisational structures on enterprise systems
- role of audits in quality system
- documentation requirements of the quality system, including levels, and their roles in the functioning of the system, including the requirement for effective and secure quality record keeping systems
- implications of enterprise goals and directions for quality system

- process capability
- applicable quality standards, regulations, codes, legislation and customer requirements for the quality system and their implications for the enterprise
- legal requirements for the establishment and maintenance of the enterprise QA system including responsibilities for reporting breaches to authorities and implementing audit findings
- principles and functions of hazard analysis and control and validation, including auditing, and verification in quality system

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority and under typical operating and production conditions for the enterprise.

Assessment must include:

- third party referee report of sustained performance at an appropriate level of authority and responsibility
- written assignment focusing on understanding and applying principles and theory to workplace operations
- workplace projects which focus on the enterprise environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMGT505 Manage maintenance systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop maintenance strategies which cause minimal disruption to plant operations and are cost efficient. An enterprise's maintenance system influences the cost and quality of products and the safety of the workforce and environment.

At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their site or department. They may be assisted by external experts to develop plans and strategies.

This unit is particularly useful for maintenance managers, plant engineers and production managers working in a meat industry context.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare maintenance policies	1.1 Identify and quantify maintenance costs, including the cost of poor maintenance procedures 1.2 Negotiate and confirm management commitment to a productive maintenance strategy 1.3 Benchmark enterprise performance against agreed standards, and develop maintenance policies and priorities 1.4 Develop maintenance system goals through negotiation with stakeholders 1.5 Establish communication strategies to build positive workforce attitude and commitment to maintenance
2. Implement maintenance management system	2.1 Identify and secure resource requirements and include them in enterprise budgets and operational plans 2.2 Determine location of the maintenance function and/or team within enterprise structures 2.3 Determine profile of the maintenance function and/or team within enterprise structures 2.4 Clarify roles and responsibilities of equipment users and the maintenance team and include them in position descriptions and work instructions 2.5 Provide mentoring and training in the use and care of technology and equipment to support the maintenance strategy 2.6 Prepare maintenance procedures and schedules to minimise negative impacts on production, costs, waste and the environment 2.7 Develop and maintain record keeping systems 2.8 Analyse potential risks and recommend management strategies 2.9 Prepare contingency plans in collaboration with the workforce, suppliers and customers 2.10 Effectively communicate maintenance schedules and procedures to the team
3. Monitor and review maintenance management system	3.1 Develop continuous improvement strategies 3.2 Determine performance criteria for maintenance goals and establish data collection strategies 3.3 Analyse performance information and outcomes and report implications to stakeholders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT505 Manage maintenance systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time under normal operating conditions.

The candidate must:

- consult with key personnel, people on the floor, delegates, suppliers, contractors and equipment manufacturers to determine appropriate maintenance strategies, procedures and schedules
- develop maintenance policies and strategies, including establishment of criteria for determining maintenance priorities and planning and scheduling routine equipment and overhead maintenance to meet quality system requirements
- establish and monitor performance targets for maintenance teams within performance planning and appraisal processes
- develop workforce commitment to effective maintenance strategies, including implementing strategies for devolving the identification of maintenance needs to the floor, developing consultative and cooperative problem-solving strategies, and negotiating changes in work practices
- develop secure record keeping procedures to document maintenance costs, problems, priorities, solutions, schedules and completions
- apply relevant communication and mathematical skills
- evaluate and recommend alternative maintenance policies and strategies, including evaluation of the costs and benefits of internal and consultant service models, changes in work roles and responsive/preventative models for maintenance
- determine and recommend the need for capital expenditure to replace plant and equipment
- identify and apply relevant workplace health and safety, environmental, regulatory and workplace requirements
- manage maintenance costs, including determining total maintenance costs based on maintenance service cost and machine breakdown cost, setting, justifying, and achieving maintenance budgets

- monitor performance of the system, including establishing indicators, setting up data collection strategies, analysing data to identify trends and isolate problems or problem areas, and measuring progress against targets
- prepare and implement contingency plans for dealing with risks, including equipment breakdowns and failures, and negotiation with production personnel
- present reports according to legal and enterprise requirements
- review maintenance strategies and goals within the enterprise, continuous improvement and planning processes.

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- plant and equipment falling under the scope of the maintenance program, including steam generation systems, refrigeration systems, water and effluent systems, processing and production equipment, and building
- maintenance issues related to the enterprise and their impact on the productivity of the plant
- cost elements in maintenance system costing and budgeting
- relevant legislation and regulations (including food safety and food standards), and industrial agreements, and explain the implications for plant and equipment maintenance
- costs resulting from poor maintenance and the benefits of a preventative maintenance system
- impacts of poor maintenance on meat safety, meat and/or product quality, occupational and environmental safety

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Assessment for this unit must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects with focus on company environment and conditions

Assessors must satisfy relevant standards for RTOs.

AMPMT506 Manage utilities and energy

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to identify enterprise utilities and energy requirements, manage their use and control waste and costs.

Utilities and energy are a significant cost component in the production of meat and meat products. Their efficient use affects the quality of the product, costs and profits.

This unit is particularly applicable to maintenance, engineering, production, environment and finance personnel working in a meat industry context.

At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their site or department. They may be assisted by external experts to develop plans and strategies.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify enterprise utility and energy requirements and costs	1.1 Identify utility and energy requirements for all areas and operations of the enterprise in accordance with workplace, customer and regulatory requirements 1.2 Measure current utility and energy costs and identify impact on profitability 1.3 Determine enterprise's future utility or energy requirements in accordance with enterprise goals and directions 1.4 Include utility and energy requirements and costs in all forward planning
2. Monitor and control enterprise utility and energy use	2.1 Establish performance standards and indicators using agreed benchmarks and best practice methods 2.2 Develop team commitment to utility or energy management using consultative approaches 2.3 Develop systems for the accurate monitoring of utility and energy use and costs 2.4 Audit enterprise operations to assess use, misuse and waste of utilities and energy 2.5 Monitor enterprise performance and adjust or correct systems and operations 2.6 Prepare contingency plans for failure of utility or energy supply and service 2.7 Update workplace safety systems and procedures to include requirements for safe use of utilities or energy
3. Review performance and utility or energy costs	3.1 Identify, evaluate and recommend strategies and procedures for wastage minimisation and more efficient use of utilities and energy 3.2 Assess alternative utility or energy sources and services for availability, suitability, contribution to sustainability, efficiency of operations and effectiveness of costs 3.3 Recommend appropriate utility or energy services and negotiate utility or energy supply conditions and charges 3.4 Monitor and measure enterprise utility and energy performance 3.5 Analyse and report performance information, including team feedback, to stakeholders 3.6 Prepare and implement recommendations for further

Assessment Requirements for AMPMGT506 Manage utilities and energy

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- analyse utility or energy tariffs and charges and options available to the enterprise
- apply relevant mathematical and communication skills
- communicate effectively with internal and external personnel with diverse roles, communication skills and cultural backgrounds to determine utility or energy requirements and use
- calculate and analyse enterprise utility or energy costs and their impact on production costs
- consult with personnel across the enterprise to identify and resolve utility or energy waste problems
- determine current and future utility or energy requirements for enterprise operations, including analysing company goals, conducting utility or energy audits to identify consumption inefficiencies and measuring consumption and cost, including waste, against agreed benchmarks
- develop performance measures and indicators for utility or energy consumption and costs, based on benchmarks and enterprise goals
- develop strategies for minimising and optimising utility or energy usage, including assessing and monitoring equipment performance, introducing energy efficient plant and equipment, comparing sources and recommending utility or energy substitution, changes to procedures, and assessing and minimising non-working day use of utilities (including lighting)
- evaluate, cost and recommend alternative plant, equipment, procedures and utility or energy sources to improve efficiency, including researching sources, reviewing enterprise procedures, evaluating suitable alternatives, and calculating initial and maintenance costs and payback periods
- identify and apply relevant workplace health and safety requirements
- include safety requirements for use of utility or energy in workplace health and safety systems and procedures

- interpret and review performance information and recommend strategies for improvement
- manage utility and energy costs, including calculating current utility or energy charges, comparing and recommending supply sources and costs, monitoring utility or energy budget, determining the impact of changes in utility or energy costs on budgets and profitability and taking actions to correct budget variations
- prepare contingency plans relating to utility or energy supply failures or incidents, including emergency and safety procedures, alternative supply sources and communication strategies
- prepare strategies to spread utility or energy use to avoid supplier peak demand or cost periods
- prepare reports, resource proposals and recommendations in styles, formats and language appropriate for relevant audiences
- present reports according to legal and enterprise requirements
- recommend utility or energy suppliers and negotiate supply and costs
- research best practice models in utility or energy assessment, planning, use and sustainability, and assess their applicability for the enterprise
- use information and communications technology, including budget and cost modelling software

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- principles and methods of heat transfer and how they impact on utility or energy use, waste and cost
- concepts of base load and variable load
- principles of demand control, including co-generation or outage, peak load shedding and shifting to minimise costs
- use of steam generation process as an energy source for plant
- cost components related to the use of utility or energy including capital, purchase, replacement and maintenance costs for plant and equipment, payback periods and net utility or energy costs
- enterprise appropriate procedures and systems for measuring utility and energy use and waste
- utility or energy supply status and sources available to the enterprise

Assessment Conditions

The candidate must demonstrate competency through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Assessment must be conducted in a workplace context under normal production and operating conditions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPMT507 Manage and improve meat industry plant operations

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to plan and monitor an enterprise's operations from receipt of stock and materials, through to processing and manufacturing options, transport, distribution and storage and customer delivery. It also describes the skills and knowledge required to ensure operations are managed in a cost efficient and effective way.

This unit is applicable to operations managers, or production managers, with plant or department level responsibility for operations within a meat industry context. It provides all production personnel with an integrated approach to operations management.

At this level individuals exercise considerable autonomy, responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their site or department. They may work with the assistance of external experts to develop plans and strategies.

This unit must be delivered using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess operational requirements	1.1 Analyse enterprise directions, goals and forecasts to establish the parameters of enterprise operations 1.2 Gather and analyse industry, market and enterprise information to determine short and medium term implications for enterprise operations 1.3 Prepare operational budgets and strategies to achieve forecasts and obtain resource requirements 1.4 Determine operational productivity and performance measures to meet enterprise goals
2. Plan operations for optimum efficiency and effectiveness	2.1 Review work organisation and performance patterns for safety, efficiency and maximisation of team contribution and satisfaction 2.2 Develop systems and technologies to facilitate cost efficient and effective operations and to meet production, quality, waste, environmental and safety targets 2.3 Review product/process flows for optimum performance 2.4 Establish systems monitoring and control procedures to maximise performance 2.5 Prepare contingency plans 2.6 Identify operational assets and recommend asset management strategies 2.7 Prepare action plans to implement change
3. Manage operations	3.1 Identify operational requirements for inputs, personnel, equipment and transport 3.2 Prepare plans and schedules to meet customer requirements 3.3 Implement systems to control costs, energy consumption, waste, environmental impact, and food safety and quality 3.4 Plan and review work organisation strategies in consultation with the workforce 3.5 Identify and evaluate opportunities to maximise yield and gain commercial value from total production 3.6 Monitor and adjust operations, in accordance with operational plans and budgets 3.7 Use consultation and collaboration strategies to identify and resolve problems promptly, efficiently and effectively

Element	Performance criteria
4. Evaluate performance	4.1 Collect and analyse data to determine achievement of operational performance targets 4.2 Convey performance information and implications to stakeholders 4.3 Include recommendations and outcomes in the review of enterprise business plans, directions and goals 4.4 Review systems and procedures to facilitate the achievement of enterprise plans and goals

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT507 Manage and improve meat industry plant operations

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- analyse enterprise forecasts for orders, livestock and raw material availability and prices, and determine the operational requirements to achieve enterprise goals
- analyse performance data to determine achievement of targets
- analyse the implications of blockages or stoppages (including breakdowns, no stock or materials and staff shortages) at particular points in the process flow, including upstream and downstream effects and costs
- outline enterprise directions, goals and ethical standards and analyse the implications for enterprise operations
- assess current operational capability to achieve enterprise goals, including through analysis of current technology, configurations, mixes of personnel and process and review of procedures to identify gaps or shortfalls
- apply methods and theories of workplace or work team organisation and job design, and review to enterprise operations
- apply relevant communication skills
- apply scheduling techniques and principles to enterprise operations
- consult, collaborate and negotiate with personnel from all levels and areas of the plant
- maintain currency of knowledge through independent research and/or professional development
- develop action plans to implement changes to improve performance
- evaluate and recommend strategies for achieving enterprise goals and forecasts, including assessment of alternative configurations/mixes of personnel, processes and work organisation structures and calculating the impact changes in operations have on the productivity of the enterprise/department and the preparation of resource proposals
- evaluate the costs, benefits, consequences and implications of adopting alternative risk management strategies and make recommendations to senior management
- identify and apply relevant workplace health and safety and workplace requirements

- manage operations for area of responsibility, including developing operational strategies and schedules in response to short, medium and long term enterprise plans; obtaining and scheduling required resources, including raw materials, personnel, equipment, refrigeration, storage and transport; and monitoring product or process flow
- maximise value of enterprise operations, including identifying opportunities for gaining commercial value from co-products and by-products, evaluating relative returns on enterprise products to determine overall impact on profitability, and control of waste and energy consumption
- minimise workplace conflict and build positive relationships using consultation, negotiation and problem-solving strategies
- monitor enterprise performance, including developing productivity and operational performance measures for enterprise operations, linking monitoring systems to quality requirements and performance measures, interpreting performance information and taking/authorising corrective action
- prepare and monitor operational budgets, including identification of operational cost components, calculation of resource requirements, calculation of cost per unit of finished product monitoring of costs, adjusting budget variations and including budget requirements and projections in enterprise financial planning
- prepare contingency plans to minimise disruption to production
- present reports according to legal and enterprise requirements
- research and evaluate available technologies and systems for suitability in accordance with enterprise directions, plans and products
- use detailed product knowledge to describe processing or production requirements necessary for maintenance of quality of enterprise products (including handling, processing methods, equipment, and storage for different species and breeds)
- use mathematical skills to analyse performance in relation to cost, waste, production level, and yield
- use available information and communications technology, including productivity analysis and scheduling software

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- enterprise operational scope
- enterprise budget planning and management processes and cycles
- regulatory requirements affecting enterprise operations
- impact of operational changes on personnel and need to develop strategies minimising negative effects on individual, team and enterprise operations
- factors which affect the productivity of the enterprise, including workforce costs, capital investment, materials, waste and overheads

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and applying principles and theory to workplace operations
- workplace projects with focus on company environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMGT508 Manage environmental impacts of meat processing operations

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to assess the potential impacts of enterprise operations on the environment and implement cost effective strategies. Management of environmental impact is a priority across all sectors of the industry, which has invested considerably in developing best practice systems for the management and minimisation of environmental impact. The scope of the unit includes water quality, usage and waste, air quality, emissions, noise, odour, and the minimisation and disposal of solid wastes.

This unit is applicable to managers with responsibility for environmental matters and to plant engineers, production managers, chiller managers and quality managers working in a meat industry context.

At this level individuals exercise considerable autonomy, responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their site or department. They may be assisted by external experts to develop plans and strategies.

This unit must be delivered using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPMGT508 Manage environmental impacts of meat processing operations

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- analyse and interpret current regulatory requirements, including local, state, national and international, for environmental management, such as environmental tolerance levels, and their implications for enterprise operations
- assess viability of gaining commercial value from waste, including the determination of commercial quantities, costs, returns and payback periods
- apply relevant mathematical and communication skills
- communicate effectively with internal and external personnel with diverse roles and cultures
- comply with regulatory requirements for managing enterprise environmental impact, including negotiation of agreements, plans, permits and licences with relevant environmental management authorities, confinement of environmental impacts within permissible limits and preparation of the enterprise for external audit where specified
- consult with internal/external stakeholders and independent agencies to prepare contingency plans and emergency response procedures for environmental incidents
- develop individual and team capacity to achieve enterprise management policies and goals, including clear communication of individual and team responsibilities for minimising environmental impact, development of consultative processes and strategies to identify and resolve environmental issues, and identification and provision of appropriate training programs
- develop procedures for responding to community complaints and concerns
- evaluate and recommend environmental management systems to meet enterprise needs, including identification and audit of enterprise creation of waste and environmental impacts and evaluation of control and treatment systems, comparative costs, savings and minimisation of environmental impacts
- identify and apply relevant workplace health and safety, regulatory and workplace requirements

- implement enterprise environmental management systems to minimise environmental impact, including the establishment of monitoring and testing regimes and record keeping systems; development of procedures for identifying, reporting and analysing the causes of environment non-conformances and incidents; development of control measures to prevent recurrence of environmental incidents, hazardous events and non-conformances
- monitor performance of the enterprise environmental management system, including the identification of performance standards based on industry best practice; collection and analysis of qualitative and quantitative performance data; benchmarking; and assessment of performance against standards and recommendations for improvement
- prepare and update enterprise environmental impact statements and management plans
- prepare information about enterprise's environmental management strategy and progress for public release in accordance with enterprise ethical standards and regulatory requirements
- prepare reports and recommendations for senior management using complex language analysis and appropriate presentation styles
- present reports according to legal and enterprise requirements
- use effective communication, negotiation and problem-solving skills in interactions with all stakeholders, including environmental authorities, agencies and community representatives
- use information and communications technology for research and data collection, analysis and reporting

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- potential costs of prevention, assessment and control of environmental impact
- customer and consumer, including importing country, requirements for effective environmental management and their implications for enterprise operations
- enterprise requirements for expert advice, assistance and support
- major air, water and solid waste environmental impacts generated by the meat industry
- relevant environmental authorities, their jurisdictions, powers and the implications for enterprise operations

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and applying of principles and theory to workplace operations

- workplace projects with focus on company environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMGT509 Manage, maintain and continuously improve workplace health and safety plans and systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare and manage workplace health and safety (WHS) plans and systems. It includes the development of a positive culture and the development of systems, procedures and controls. Improved workplace health and safety is a meat industry priority.

Effective WHS management produces a safe environment and reduces the financial liabilities of the enterprise.

This unit is applicable to managers within a meat industry context. They may have responsibilities for general WHS, or WHS practices within production, HR or other areas.

At this level individuals exercise considerable responsibility and accountability and are required to make primary contributions to enterprise values, goals and operations. They will typically have responsibility for establishing and reviewing systems for their site or department and may be assisted by external experts to develop plans and systems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Scope the WHS program	1.1 Identify and interpret relevant legal requirements and obligations for WHS 1.2 Determine scope of enterprise operations in relation to WHS systems, including establishing requirements for managing hazardous events 1.3 Document current enterprise systems and measure performance against internal and external benchmarks
2. Develop WHS policies and plans	2.1 Develop policies documenting and defining the commitment of CEO and enterprise to WHS 2.2 Set short, medium and long term enterprise goals and targets for WHS performance 2.3 Identify and commit to resource requirements for operating the system 2.4 Prepare implementation plan detailing resources and strategies 2.5 Prepare and implement communication strategy for informing stakeholders of policies, obligations and responsibilities
3. Develop enterprise commitment to WHS	3.1 Incorporate WHS responsibilities and duties in all relevant policies, position descriptions, operating procedures and work instructions 3.2 Ensure enterprise WHS policies, strategies and requirements include all enterprise personnel, contractors, suppliers and work site visitors 3.3 Establish consultative and participative mechanisms to facilitate the identification and prevention of WHS issues and their prompt, effective resolution 3.4 Consider WHS issues, including hazard and risk identification and control, in planning, designing and evaluating job design, procedure, technology, work/process flow, plant layout and construction
4. Develop and maintain procedures for identifying hazards	4.1 Analyse WHS records to determine trends 4.2 Correctly identify existing and potential hazards 4.3 Develop hazard identification procedures and integrate into enterprise procedures and systems
5. Manage and maintain	5.1 Correctly determine risks through identifying hazards

Element	Performance criteria
risk assessment procedures	5.2 Develop risk assessment procedures and integrate into enterprise systems
6. Manage and maintain risk control procedures	6.1 Develop and implement risk control measures in accordance with the hierarchy of control and regulatory requirements 6.2 Establish procedures for control of risks on the hierarchy of control and integrate them into enterprise procedures and systems 6.3 Replace interim control measures with permanent measures to control risks at the source 6.4 Identify and incorporate resources enabling implementation of new or permanent control measures in enterprise planning processes
7. Maintain enterprise commitment to WHS goals	7.1 Resource, plan and deliver training to support commitment to and compliance with regulatory and enterprise WHS requirements 7.2 Clearly present and regularly update enterprise, team and individual obligations for meeting WHS goals 7.3 Monitor enterprise operations and procedures to ensure the effective adoption of WHS procedures in accordance with enterprise and regulatory requirements
8. Manage and maintain hazardous event procedures	8.1 Correctly identify potential hazardous events 8.2 Identify and appropriately notify potential community health hazards 8.3 Consult local communities, emergency and community health services and authorities about procedures to control hazardous events and community health incidents
9. Continuously improve WHS performance	9.1 Maintain and secure WHS data and record keeping systems 9.2 Collect and analyse performance data, including team feedback, against enterprise goals and targets 9.3 Convey performance implications to stakeholders 9.4 Monitor and report compliance with enterprise and WHS requirements 9.5 Update systems and procedures for legislative, technical, procedural or operational changes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT509 Manage, maintain and continuously improve workplace health and safety plans and systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- access, where appropriate, specialist external advice to assist in developing WHS systems and plans
- analyse the impact of workforce characteristics, enterprise communication patterns and culture on WHS system design, implementation and operation
- use analysis of enterprise culture, including ethical standards and values, communication systems and workforce characteristics, to develop effective WHS consultative processes
- apply principles and procedures for hazard identification, risk analysis and hierarchy of controls in any or all areas of the workplace
- apply problem-solving strategies, including developing practical and creative solutions, showing independence, developing a range of strategies to resolve problems, testing assumptions, and addressing customer and workplace concerns
- collect, analyse and report complex WHS information to stakeholders using formats appropriate for the purpose and the audience
- consult with the community to develop strategies to minimise impact of enterprise operations, including Q fever from stockyards, on community health and safety
- maintain currency of knowledge through independent research and/or professional development
- develop and monitor systems to ensure workforce owns and complies with enterprise safety procedures, including establishing WHS consultative strategies and processes, implementing workplace safety committees and providing relevant training
- develop hazardous events plans in consultation with appropriate personnel and external agencies, including emergency services and government agencies
- establish record management systems to monitor compliance, including mandatory notifications and reporting, mandatory licences and certificates, registers, listings and labelling of regulated materials

- identify and apply relevant communication and mathematical skills
- identify and apply relevant workplace and regulatory requirements
- identify and interpret the implications, obligations and requirements established by relevant legislation, regulations, guidelines, codes of practice, Australian standards for health and safety for the enterprise's directors, management and workforce
- identify appropriate industry or enterprise benchmarks for WHS performance
- improve health and safety performance, including developing WHS plans and strategies, acting on performance information, developing continuous review processes, including recommendations in the WHS planning process
- integrate enterprise WHS policies and procedures with relevant organisation management systems, including incorporating WHS responsibilities into all relevant workplace documents and strategies for ensuring visitors and contractors comply with enterprise health and safety policies
- monitor enterprise health and safety performance, including analysing health and safety information and measuring performance against enterprise goals, targets and benchmarks
- observe standard workplace WHS requirements while performing duties
- prepare action plans identifying WHS goals, managerial responsibilities and operational strategies
- prepare and monitor enterprise training plan for all levels of organisation to enable workforce commitment to workplace health and safety
- present reports according to legal and enterprise requirements
- establish enterprise health and safety goals and targets through consultation with stakeholders and analysis of enterprise WHS data
- systematically analyse the causes of accidents, incidents and work-related injuries and illnesses and take corrective action by identifying and introducing programs for reduction of accidents and injuries
- update enterprise policies, plans and practices to account for changes to relevant legislation, regulation, codes of practice and guidelines
- use available information and communications technology, including modelling and evaluation software, to collect, monitor, analyse and report enterprise safety data

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- enterprise requirements for using external experts to assist in developing WHS systems and plans
- impacts of enterprise WHS policies, systems and procedures on all organisation management systems and operations, including processing, production, maintenance, contracting, distribution and administration
- WHS hazards, risks and controls relevant to enterprise operations, procedures and products

Assessment Conditions

The candidate must demonstrate competency through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Assessment must be conducted in a workplace context under normal production and operating conditions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPMGT510 Manage transportation of meat, meat products and meat by-products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to schedule and monitor the hygienic, safe and secure transportation of meat, meat products and meat by-products, for domestic or international markets. The efficient transportation of meat, meat products and meat by-products results in the satisfaction of customer requirements.

This unit is of use to livestock buyers and coordinators, transport managers and finance managers operating in a meat industry context.

At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their site or department. They may be assisted by external experts to develop plans and strategies.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement requirements for the transportation of meat, meat products and meat by-products	1.1 Identify and follow regulatory, customer and enterprise requirements for the hygienic, safe and timely transportation of meat, meat products and meat by-products 1.2 Assess and allocate resource requirements
2. Establish transportation policies and procedures	2.1 Develop systems and procedures for the operation of meat transport vehicles for the hygienic and safe transport of meat, meat products and meat by-products 2.2 Develop security procedures and systems 2.3 Establish and maintain reporting and recording procedures 2.4 Develop and monitor supplier quality requirements and standards 2.5 Inform and mentor personnel, including contractors, in the performance of their obligations and responsibilities, including workplace health and safety
3. Manage transportation logistics	3.1 Analyse and select transport options 3.2 Prepare and negotiate contracts and schedules according to customer and production requirements 3.3 Complete documentation according to enterprise, customer and regulatory requirements 3.4 Maintain vehicles to ensure the hygienic transportation of meat 3.5 Operate storage facilities according to enterprise and regulatory requirements 3.6 Track and monitor consignments
4. Determine and manage transportation costs	4.1 Calculate cost of storage and transport 4.2 Prepare and monitor transport budget 4.3 Review procedures for cost savings
5. Manage contingencies	5.1 Develop contingency plans according to enterprise requirements 5.2 Analyse changing circumstances, and prioritise and clarify responses 5.3 Communicate impacts of changed schedules to all relevant parties
6. Review transportation of meat, meat products and meat by-products to improve customer	6.1 Monitor and review resources, procedures and schedules for effectiveness and efficiency 6.2 Include customer feedback and requirements in review of

Element	Performance criteria
service	transportation procedures and schedules 6.3 Involve team in continuous improvement processes
7. Establish effective communication with customers	7.1 Determine customer requirements 7.2 Resolve customer complaints promptly 7.3 Ensure communication strategies are inclusive of the cultural, ethnic and social diversity of individuals and groups
8. Produce reports	8.1 Produce reports according to legal and enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPMGT510 Manage transportation of meat, meat products and meat by-products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- analyse throughput, production, storage requirements, meat safety requirements, product specifications, customer requirements, orders and the purchasing or scheduling of appropriate transportation services
- apply problem-solving skills to resolve transportation issues
- communicate effectively with regulatory authorities and stakeholders
- maintain currency of knowledge through independent research or personal development
- develop supplier quality criteria, including audit requirements, for purchasing transport services
- establish systems for completing and certifying documentation of product transportation
- identify and analyse transportation options; develop procedures to inform enterprise personnel, customers and contractors of changes in schedules
- apply relevant mathematical skills
- identify and apply relevant WHS requirements
- present reports according to legal and enterprise requirements
- use available communication and information technology systems to monitor transportation purchase, schedule and track consignments, and collect and analyse performance information
- work effectively as an individual and as a team member

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- food safety requirements for meat and meat product transportation
- regulatory and workplace requirements relating to the transportation of meat, meat products and meat by-products

- potential impact and costs of inappropriate transportation of meat, meat products and meat by-products, including public liability and loss of custom
- public and workplace health and safety obligations relating to the transportation of meat, meat products and meat by-products
- requirements for maintaining product quality during transportation

Assessment Conditions

The candidate must demonstrate competency through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Assessment must be conducted in a workplace context under normal production and operating conditions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPMGT601 Benchmark to manage and improve enterprise performance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to conduct benchmarking exercises through the identification of appropriate benchmarks. It also describes the skills required to use benchmarking to focus enterprise operations and improve performance. In the meat industry, benchmarking is a tool for informing, measuring and developing an enterprise's performance.

This unit is suitable for all managers working in a meat industry context and supports them in fulfilling their responsibility to measure, evaluate and improve enterprise performance. This unit is applicable to engineers, refrigeration/chiller managers, production and operations managers, workplace health and safety, environment, quality, Human Resources (HR), finance, livestock, and logistics managers.

At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their site or department. They may work with the assistance of external experts to develop plans and strategies.

This unit must be delivered using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the need for benchmarking	1.1 Identify benchmarking as a tool for achieving strategic goals in enterprise planning processes 1.2 Analyse customer requirements, perceptions and satisfaction data to identify the need for improvement 1.3 Analyse competitor's products or processes to identify the need for improvement 1.4 Analyse company processes to determine potential improvements to efficiency 1.5 Analyse regulatory requirements to identify the need for improvement
2. Prepare for benchmarking	2.1 Determine scope and parameters of the benchmarking exercise according to enterprise priorities and plans 2.2 Estimate benchmarking resource requirements and include them in budgets and operational plans 2.3 Plan benchmarking strategies around realistic time frames and enterprise planning cycles 2.4 Identify and plan communication and mathematical requirements 2.5 Develop benchmarking goals in consultation with stakeholders 2.6 Select benchmarking teams according to agreed criteria 2.7 Confirm team roles and responsibilities and deliver training accordingly 2.8 Schedule and document benchmarking activities following consultation with stakeholders 2.9 Establish and agree criteria for internal and external benchmarking with benchmarking team 2.10 Identify internal and external benchmarking partners or sources, according to the scope, parameters and goals of the benchmarking exercise 2.11 Develop cooperative and open relationships with benchmark partners
3. Undertake benchmarking activity	3.1 Identify and negotiate logistical requirements and impacts of the benchmarking exercise with stakeholders 3.2 Develop statistical analysis and measurement frameworks 3.3 Develop and agree problem-solving processes

Element	Performance criteria
	3.4 Analyse and document own enterprise or department functions, processes and operations according to agreed criteria 3.5 Analyse and document benchmarking partner's functions, processes, operations and performance outcomes 3.6 Compare performance to identify compatibility of measurement data, commonalities, trends, differences and gaps 3.7 Communicate comparisons or benchmarking reports to benchmarking partners according to agreement 3.8 Develop strategies for change from analysing and evaluating divergences and gaps
4. Capitalise on benchmarking outcomes	4.1 Identify opportunities for using benchmarking and benchmarking data in continuous improvement processes 4.2 Build customer consultation and feedback into continuous improvement processes 4.3 Support enterprise personnel during the change process 4.4 Measure and report improvements resulting from the benchmarking processes to stakeholders 4.5 Use benchmarking information to develop the enterprise's competitive advantage and market profile

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

MTMPSR601A Benchmark to manage/improve enterprise performance	E

Assessment Requirements for AMPMGT601 Benchmark to manage and improve enterprise performance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Effective management and/or facilitation of a benchmarking process, including related improvement activities, must be demonstrated.

The candidate must:

- determine criteria identifying appropriate benchmarking partners and maintaining positive partner relationships, in accordance with enterprise goals and directions
- access industry and enterprise benchmarking data
- analyse and interpret a range of complex qualitative and quantitative data relating to enterprise operations and benchmarking activities
- apply relevant communication and mathematical skills
- identify enterprise goals and directions and explain the role of benchmarking in achieving enterprise goals
- develop and maintain positive relationships with benchmarking partners
- work effectively as an individual and as a member of a team
- use effective communication, negotiation and leadership skills in a range of benchmarking interactions, including with benchmarking teams, benchmarking partners and internal stakeholders
- use problem-solving skills in a range of situations
- use information and communications technology including performance management, project management, statistical and modelling software
- prepare a strategy for gathering and analysing customer feedback
- develop a financial model for measuring Return On Investment (ROI) for benchmarking processes
- develop and implement a communication and marketing strategy to inform stakeholders (including senior management, personnel at all levels of the organisation and customers) of benchmarking goals, progress and outcomes
- prepare benchmarking action plans that specify resource requirements, methodologies, milestones, communication strategies and timelines, including mechanisms for linking with enterprise planning cycles and continuous improvement strategies

- develop and implement strategies for the resolution of logistic, resource, cultural, ethical and political issues raised during the benchmarking process, including scheduling team member release and involvement, supporting individuals through change, managing group dynamics, handling confidentiality and commercially sensitive information, and dealing with diversity
- develop performance indicators for the enterprise, function, department or process being benchmarked
- implement the findings of benchmarking exercise including interpreting benchmarking results, identifying areas for improvements, building findings into targets and planning,

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- the role of performance indicators in benchmarking
- the difference between performance and process benchmarking
- relevant workplace health and safety, environmental, animal welfare and biosecurity, workplace and regulatory requirements
- the critical factors required for successful and effective benchmarking processes and outcomes, and the implications of enterprise benchmarking activities

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- simulation, workplace or industry projects focusing on company/industry environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMT602 Monitor and manage organisational legal responsibilities

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to monitor and manage an enterprise's legal responsibilities. It also describes the skills and knowledge required to manage risks associated with business operation and the provision of goods and services. It includes working with enterprise personnel and monitoring and reviewing systems to achieve compliance and minimise risk.

This unit is appropriate for all managers with responsibility for production, workplace health and safety, human resources, environmental or financial management systems and procurement, sales and marketing functions, in all meat industry sectors.

This unit must be delivered using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Gather legal information required for business compliance	1.1 Gather and analyse relevant , appropriately sourced legal information 1.2 Seek, analyse and evaluate expert advice 1.3 Clearly explain employer and employee obligations and responsibilities to management
2. Identify legal risks	2.1 Evaluate workplace policies, systems, controls and practices in terms of enterprise and legal requirements 2.2 Analyse workplace policies, procedures and systems for compliance with contractual and legal obligations 2.3 Identify key risk areas 2.4 Analyse risk level
3. Ensure enterprise compliance with legal requirements	3.1 Analyse current strategies for compliance with legal requirements 3.2 Provide feedback on compliance record to stakeholders 3.3 Develop, implement and communicate strategies to ensure compliance with legal requirements and minimise risk 3.4 Maintain currency of legal information
4. Report enterprise compliance	4.1 Maintain and secure records relating to systems, training, communication and non-compliance with legal requirements 4.2 Prepare compliance reports for internal personnel and external authorities as required 4.3 Record and make timely reports on non-compliance incidents to relevant internal personnel and external authorities 4.4 Prepare compliance reports and enterprise presentations for external authorities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT602 Monitor and manage organisational legal responsibilities

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must demonstrate ability to identify, understand and interpret legal information in the context of the enterprise's business. Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- analyse and maintain currency of legal information through independent research and/or professional development
- read, analyse and interpret complex legal information
- access relevant mathematical information
- interpret monitoring data and prepare compliance reports
- apply legal concepts, including duty of care, in developing and implementing enterprise operations and systems
- apply teamwork strategies to foster stakeholder commitment and compliance with legal requirements
- communicate legal information and requirements to all stakeholders, in a language and style suitable for the purpose and audience
- determine the enterprise's level of legal and statutory compliance
- interact and communicate with external authorities in a professional and open manner
- promptly report non-compliance to relevant external authorities and enterprise personnel
- determine corrective actions appropriate for the circumstances
- present reports according to legal and enterprise requirements
- use assertiveness, persuasion and negotiation as required
- determine the responsibilities and liabilities of managers, directors, owners and employees and the consequences of non-compliance
- maintain and secure records and record keeping systems to meet legal or statutory requirements
- prepare briefing information for specialist legal advisors
- identify enterprise requirements for specialist legal advice

Knowledge Evidence

Candidates must demonstrate an in depth technical and theoretical knowledge of:

- relevant workplace health and safety, environmental, biosecurity, animal welfare and workplace requirements
- sources of legal information
- legal concepts including social justice, tort, negligence, consumer and employment law
- legal requirements concerning food safety
- relevant trade practices requirements

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects focusing on company environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMGT603 Manage meat processing systems to maintain and improve product quality

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to manage enterprise quality systems and maintain product quality. It also describes the skills and knowledge required to monitor, review, evaluate and improve enterprise operations to ensure that delivery of meat and meat products satisfies customer demand.

This unit is applicable to Quality Assurance (QA) personnel, production managers, cold chain coordinators and transport coordinators. Many factors impact on the quality, including eating quality, of meat and meat products. Quality, in turn, affects meat prices and sales.

This unit must be delivered using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Define meat quality	1.1 Research and analyse relevant regulatory, scientific, industry and market information on meat quality, and factors affecting meat quality 1.2 Identify and analyse customer and consumer perceptions, expectations and requirements 1.3 Define and balance meat quality against enterprise requirements for yield, cost and meat safety 1.4 Prepare enterprise meat quality specifications for suppliers or supplied product and end product 1.5 Establish performance standards, including specifications, and put in place data collection strategies
2. Analyse impact of production processes and systems on meat quality	2.1 Identify meat quality control points along the value chain, including pre-slaughter and post-slaughter factors 2.2 Analyse production processes and systems against agreed criteria 2.3 Analyse and evaluate the impact of enterprise operations including inputs, processes and technology, on meat quality, yield and cost 2.4 Prepare and present recommendations to improve operations for product quality 2.5 Establish alliances with suppliers and customers to improve quality at all points in the value chain 2.6 Identify and allocate resource requirements to achieve meat quality specifications
3. Monitor meat product quality	3.1 Prepare, implement and analyse sampling and testing procedures and schedules 3.2 Investigate non-conformances with meat quality requirements 3.3 Develop and implement preventative and control measures
4. Evaluate meat quality outcomes	4.1 Analyse and assess performance against relevant standards 4.2 Develop continuous improvement strategies and prepare implementation strategies 4.3 Analyse and act on consumer feedback in accordance with continuous improvement framework 4.4 Develop and communicate recommendations to improve operations for maintaining and enhancing the quality of meat and meat products to appropriate personnel
5. Promote enterprise meat quality outcomes	5.1 Report meat quality outcomes to stakeholders, including employees, customers and consumers 5.2 Use enterprise meat quality specifications to identify market edge

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

MTMPSR603A Manage meat processing systems to maintain and improve product quality	E

Assessment Requirements for AMPMGT603 Manage meat processing systems to maintain and improve product quality

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- evaluate impact of current plant, equipment and processes on meat and meat product quality
- assess and monitor the efficiency of improvements to meat and meat product quality
- apply relevant communication and mathematical skills
- monitor operations and develop criteria for assessing meat and meat product quality
- evaluate product quality outcomes through the development of specifications and performance standards, analysis and interpretation of performance information including costs and sales
- improve product input and service quality by developing alliances, supplier specifications, audit processes and by monitoring input quality
- maintain currency of knowledge through independent research or professional development
- prepare and communicate information on meat and meat product quality outcomes to workforce, consumers and customers
- prepare recommendations for improving operations to maintain and enhance meat and meat product quality
- prepare specifications for enterprise product, including specifications for end product where not provided by customer, supplier and supplied product specifications, product description, labelling and claims
- research best practice in meat processing, meat manufacturing, meat preparation techniques and technology including computerised, mechanical and manual systems, and their impact on product quality

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- Hazard Analysis Critical Control Point (HACCP) principles, systems and food safety requirements for enterprise product.
- nutritional content and value of meat and meat products
- negative physiological changes of meat and their prevention (including Dark, Firm and Dry (DFD) and Pale, Soft, Exudative (PSE))
- impact of species, breed, sex, age (dentition and ossification) and nutrition of livestock on meat and meat product quality
- enterprise requirements for product costs, prices and sales and their influence on enterprise definition and achievement of product quality
- major physical, chemical/biochemical and microbiological characteristics and changes affecting the quality of meat and meat products
- relevant workplace health and safety, environmental, animal welfare, biosecurity and workplace requirements
- optimum testing and sampling regimes to monitor and measure the quality of enterprise product
- meat tenderisation techniques and their suitability for enterprise operations and products, including:
 - advanced technological processes
 - calcium activated tenderisation
 - conditioning, including elevated temperature conditioning
 - electrical stimulation
 - further processing (including cooking and smoking)
 - mechanical tenderisers (including knife tenderisers)
 - product ageing processes (including rigor mortis, shear force and post mortem including calcium dependent) proteolysis
 - tenderstretching
- pre-slaughter and post-slaughter factors and their impact on meat and meat product quality
- biological and anatomical structures of major species processed in Australia for human consumption
- meat and meat product description and grading systems used in the Australian market, including:
 - AUS-MEAT
 - Japan Beef Grading System
 - Meat Standards Australia (MSA)
 - United States Department of Agriculture (USDA) Grading System
- regulatory requirements impacting on enterprise operations and product quality.

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- case study, workplace project or audit with focus on company environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMGT604 Manage effective operation of meat enterprise cold chain and refrigeration systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to plan and oversee the effective operation of enterprise cold chain and refrigeration systems, ensuring product quality and food safety. It also describes ways to manage and reduce the costs of cold chain operations. Cold chain systems and operations are critical to the quality and food safety of enterprise products. Managing them efficiently will minimise production costs and facilitate regulatory compliance.

This unit is applicable to production managers, plant engineers, Quality Assurance (QA), maintenance and chiller managers or coordinators.

At this level, individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for establishing and reviewing systems for their site or department. They may work with the assistance of external experts to develop plans and strategies.

This unit must be delivered using Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess enterprise cold chain system requirements	1.1 Analyse enterprise goals, directions and forecasts and determine the implications for cold chain requirements 1.2 Document enterprise refrigeration systems, cold chain, operations and technical support team activities 1.3 Identify regulatory and customer requirements regarding operating and maintaining refrigeration systems 1.4 Determine enterprise requirements for accessing specialised refrigeration advice and expertise 1.5 Determine optimum refrigeration requirements to maintain quality and safety of products 1.6 Establish performance standards and targets, including those relating to food safety, cost, quality and waste
2. Manage and control cold chain systems	2.1 Develop procedures for safely and hygienically operating and maintaining refrigeration or cold chain systems according to quality, food safety, manufacturer specifications and customer and enterprise requirements 2.2 Prepare contingency plans and procedures for systems failure or overload and convey to relevant personnel 2.3 Prepare emergency procedures and plans and incorporate into health and safety systems, procedures, training and work instructions 2.4 Prepare strategies for communicating and resolving system problems and failures with stakeholders
3. Monitor refrigeration and cold chain system performance	3.1 Determine and develop performance information requirements and data collection strategies 3.2 Establish and maintain monitoring procedures for operating refrigeration or cold chain systems 3.3 Investigate and report non-conformances and implement corrective action 3.4 Develop and implement preventative and control procedures to prevent future non-conformance
4. Improve refrigeration system performance	4.1 Analyse and measure performance data against relevant performance standards, including product quality and cost requirements 4.2 Calculate and monitor energy costs of refrigeration systems

Element	Performance criteria
	4.3 Develop and implement strategies to improve performance and minimise costs 4.4 Include refrigeration system requirements in budgets and plans

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- assess requirements for enterprise refrigeration or cold chain systems in terms of enterprise goals, directions and forecasts, detailed product knowledge and regulatory requirements
- apply mathematical skills and budget principles to refrigeration costs
- apply relevant communication and mathematical skills including, as appropriate:
- assertiveness, persuasion and negotiation skills
- face-to-face, technological and electronic communication
- communicating in sensitive, conflictive, collaborative and supportive environments
- analysing and presenting complex concepts, technical information, mathematical information and other data in simple or complex formats
- complex actual and hypothetical technical and financial modelling, calculations, interpretation or analysis
- develop and maintain the operating system
- prepare manuals and procedures for operating refrigeration systems, chillers and freezers according to hygiene, safety, quality and customer requirements and determine corrective actions for systems variations and non-conformances
- identify key personnel for the resolution and communication of systems problems and failures
- maintain currency of knowledge through independent research or professional development
- maintain the quality of products in the cold chain by monitoring chillers or freezers and interpreting refrigeration data to maintain appropriate temperature or humidity for product types and quantities
- manage maintenance of enterprise refrigeration systems including the negotiation and preparation of maintenance schedules; monitoring repairs; conformance with regulatory and quality requirements; and replacement requirements

- manage refrigeration costs by monitoring the costs of refrigeration including internal or external service models, maintenance costs, lost time costs, product losses and energy costs
- monitor and report system performance including setting performance standards and measures for refrigeration system, that are consistent with enterprise goals and products; analysing performance information; and making recommendations for systems improvement to include in enterprise forward planning
- operate refrigeration or cold chain systems efficiently, including: identifying and implementing strategies for reducing heat load in enterprise chiller or freezer; minimising energy costs; maximising availability and minimising down time; maintaining temperatures according to quality and food safety requirements
- prepare safety procedures for chillers or refrigeration systems, including: emergency plans and procedures for incidents and accidents associated with refrigerants (leaks and spills); and procedures for the safe and efficient operation of equipment, including forklifts and lights, in chillers and freezers
- utilise information and communications technology including statistical and modelling software for research, data collection and analysis, and reporting

Knowledge Evidence

Candidates must demonstrate an in depth technical and theoretical knowledge of:

- refrigeration concepts and terms including:
 - ambient temperature
 - Biot number: ratio of conductive (internal) resistance to heat transfer to the convective (external) resistance
 - half cooling time
 - surface heat transfer
 - thermal properties of meat including conductivity
- strategies for reducing heat loads, including:
 - air curtains
 - automatic door closers
 - improved insulation to prevent heat filtration through wall
 - no lights, people, machinery inside
 - plastic strips
 - removal of heat load caused by fans
- impact of high and low humidity on eating quality, production and storage of meat and meat products
- impact of moisture transfer during chilling and freezing on quality, production and storage of meat and meat products
- impact of packaging on chilling and freezing rates of meat and meat product
- concept of heat load and the implications for product quality and energy requirements for refrigeration system
- methods of chilling and freezing meat and meat products including:

- air (including natural convection, forced convection and spray chilling)
- air freezing
- contact freezing
- cryogenic (including gaseous, solid and liquid - liquid nitrogen and solid carbon dioxide)
- cryogenic freezing
- direct contact (including plate freezing and conduction)
- direct freezing systems
- liquid immersion (including chilled water or glycol solution)
- the impact of chilling, chilling rates, freezing and freezing rates on quality, production and storage of meat and meat products
- qualities of humidity including changes in evaporation, pH levels, saturation humidity, saturation vapour pressure
-

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects with focus on company environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMT605 Assess and purchase livestock

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to identify, select and purchase livestock according to customer requirements and within enterprise livestock budgets. The selection, purchase and transport of livestock has implications for product quality and enterprise profitability.

In a meat industry context, individuals working at this level exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise.

This unit is of particular interest to livestock buyers but may also have relevance for production and finance personnel.

All work in this area must be conducted in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify livestock markets	1.1 Identify and select livestock markets and methods to meet enterprise requirements 1.2 Analyse risks associated with purchasing inappropriate livestock and identify risk management strategies 1.3 Identify regulatory requirements relating to selling and purchasing livestock 1.4 Establish networks and alliances, in accordance with legal and enterprise requirements, to ensure access to markets and gain market intelligence
2. Select livestock	2.1 Confirm enterprise specifications and requirements for livestock, including Quality Assurance (QA) arrangements for and with producers 2.2 Conduct livestock inspection procedures in accordance with workplace health and safety and animal welfare requirements 2.3 Select livestock according to enterprise and customer specifications
3. Purchase livestock	3.1 Analyse market conditions and monitor trends in livestock quality and prices 3.2 Negotiate terms of sale according to enterprise requirements 3.3 Monitor livestock budget and take corrective action to address variations 3.4 Address requirements of the National Livestock Identification System (NLIS) 3.5 Complete documentation relating to purchase or sale
4. Transport livestock	4.1 Negotiate transport of livestock according to enterprise and animal welfare requirements 4.2 Negotiate transport of livestock according to enterprise production schedules and requirements
5. Evaluate livestock purchases	5.1 Monitor quality of livestock against customer specifications and enterprise requirements 5.2 Recommend and implement strategies for improving purchase quality

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT605 Assess and purchase livestock

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- apply relevant communication and mathematical skills
- assess livestock against enterprise specifications and determine fitness for purpose (suitability for customer requirements and ability to meet customer specifications), including the identification of species and breeds in stockyards or paddocks and calculating dressed carcass weight to determine yield and product price
- communicate effectively with producers to provide feedback on enterprise requirements including the presentation of livestock
- complete purchase documents accurately
- develop open and constructive relationships with key livestock sales and transport personnel
- estimate expected yield from species and breeds
- evaluate industry methods for purchasing livestock and determine methods suitable for the enterprise
- gather and interpret processing and sales data, including customer feedback to analyse quality of livestock purchased
- identify and apply relevant workplace health and safety, animal welfare, and workplace requirements
- identify potential alliances, key stakeholder networks and information sources to facilitate enterprise access to required livestock and livestock markets
- interpret the implications of enterprise ordering and sales forecasts for the purchase of livestock
- manage livestock budget including analysis of livestock market trends and enterprise purchase history to determine quality and price parameters, calculating average purchase price per kilo and balancing purchase prices to achieve livestock budget targets
- negotiate enterprise requirements for transport of livestock with carrier including animal welfare requirements, enterprise production schedules and enterprise budget requirements

- obtain and secure documentation relating to livestock status, purchase and transport
- prepare livestock purchasing plans to meet enterprise forecasts of orders and sales including liaison with enterprise personnel to identify production livestock schedules and requirements, analysing enterprise orders and sales, and confirming livestock specifications
- present reports according to legal and enterprise requirements
- use available communication and information technology to record, monitor and analyse livestock purchase data, including fat scores, prices and pricing structures
- address NLIS requirements

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- characteristics of different species and breeds and their suitability for the enterprise's product
- identification of animals using brands, tags and tattoos
- the requirements of the NLIS system
- international, national and local factors affecting the livestock market and describe the implications for the enterprise's operations
- livestock classification and conformation or scoring system
- customer specifications and their implications for selecting and purchasing stock, including required product or cuts, European Union (EU) closed system, Japanese ox
- enterprise ethical standards and the implications for operations in the livestock market
- producer QA programs, including 'Cattle Care' and 'Flock Care'
- regulatory requirements affecting the purchase and transportation of livestock
- effects of transportation on livestock and product quality
- symptoms of infectious and non-infectious diseases to be identified or eliminated when assessing livestock

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at an appropriate level of authority and responsibility
- assignment focusing on the understanding and application of principles and theory to workplace operations
- simulation or workplace projects with focus on enterprise environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMT606 Analyse and develop enterprise systems for new opportunities

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to evaluate and develop production systems that are cost efficient and suitable to a company's products and goals. It also describes the skills and knowledge required to ensure products meet enterprise and customer specifications. The design of production systems affects the quality of the products processed. Analysing and developing enterprise production systems provides enterprises with the flexibility to become an innovative organisation, take on new opportunities and strengthen or expand their market.

At this level individuals exercise considerable autonomy, responsibility and accountability within enterprise structures and are required to make primary contributions to enterprise values, goals and operations. They will typically have responsibility for establishing and reviewing systems for their site or department. They may be assisted by external experts to develop plans and strategies.

This unit is suitable for senior managers, Chief Executive Officers (CEOs), Chief Finance Officers (CFOs) and directors of meat processing and smallgoods enterprises, who seek to build a culture of innovation in a meat industry context.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Analyse effectiveness of enterprise production system to meet enterprise goals	1.1 Identify enterprise mission, direction and objectives 1.2 Determine impact of current market trends, future market trends and business environment on enterprise goals and operations 1.3 Determine production system requirements to meet enterprise goals 1.4 Assess capacity of the existing system to meet enterprise goals 1.5 Analyse existing systems to identify system strengths, weaknesses and issues
2. Identify and evaluate alternatives	2.1 Research new, reconfigured or redesigned systems and their components 2.2 Evaluate new, reconfigured or redesigned systems and their components (for suitability, feasibility and cost), and report outcomes to stakeholders 2.3 Obtain enterprise commitment to a new, reconfigured or redesigned system 2.4 Identify, agree upon and include resource requirements in enterprise planning 2.5 Identify and evaluate sources of resource support
3. Implement solutions	3.1 Develop specifications for new, reconfigured or redesigned system 3.2 Commission new, reconfigured or redesigned system 3.3 Plan, negotiate and communicate implementation strategy, including redesigned system, with stakeholders 3.4 Identify impact on personnel and prepare strategies facilitating change 3.5 Develop, resource and implement training plans 3.6 Develop, test and refine procedures and controls
4. Monitor production process	4.1 Establish performance criteria for the new, reconfigured or redesigned system 4.2 Collect, analyse and report performance data 4.3 Report progress and performance to stakeholders

Element	Performance criteria
	4.4 Identify strategies for improvement in consultation with the team and integrate them into continuous improvement and planning processes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance of this unit of competency.

Assessment Requirements for AMPMGT606 Analyse and develop enterprise systems for new opportunities

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- flowchart the movement of products and resources along the chain or process line to identify strengths and weaknesses
- apply in-depth product knowledge in determining the processing requirements for species or products according to customer and enterprise requirements, including methods, technology, quality, speed of production
- analyse the organisation's environment to assess capacity for, and potential impact of, systems and operations
- establish goals and performance criteria for operation of the production system
- determine criteria for evaluating alternative production systems and system components including reference to product specifications, yield and quality, technical requirements and cost
- develop data collection and recording systems linked to systems performance criteria
- analyse performance information and prepare reports for stakeholders
- apply relevant communication and mathematical skills
- develop a communication strategy for involving the workforce, negotiating changes and reporting progress
- assess alternative configurations of technology, labour, processes, organisation and layouts for process flow effectiveness
- compare capability of existing production system with market potential and capability of alternative systems
- estimate the impacts of enterprise forecasts and changes in the industry, including technology and in the market on enterprise resource requirements, operation and sales
- evaluate the consequences and change implications of adopting new, reconfigured or redesigned systems on overall operation of the plant, including the impact on personnel
- identify and apply relevant workplace health and safety, animal welfare, biosecurity, environmental and workplace and regulatory requirements

- identify and resolve industrial relations issues related to changes in systems
- prepare action plans for the implementation of new systems including commissioning of the new system, timelines, resources, training and change facilitation strategies to assist personnel implement new, reconfigured or redesigned systems
- prepare and justify budgets for the introduction of new systems or components including calculating the costs of retaining the current system and the costs of setting up and operating new, reconfigured or redesigned systems, including initial costs, ongoing costs and payback periods
- prepare and present recommendations in formats, language and styles appropriate for the audience
- present reports according to legal and enterprise requirements
- quantify and cost the resources required for optimum operation of existing systems, including utilities and energy, personnel, equipment and stock
- research and analyse market intelligence, trends and forecasts to identify enterprise possibilities
- research and evaluate available systems (including technology and equipment, processing methods and techniques and work design) appropriate for enterprise product
- research and evaluate sources of support including government and private, financial and other support
- review existing procedures and controls or develop new ones to facilitate systems operations in accordance with enterprise and regulatory requirements including integration with enterprise quality and food safety systems
- seek external advice where appropriate (including from technology and equipment manufacturers, architects, engineers and tradespeople)
- use a range of quality and evaluative tools to analyse the capability of enterprise systems to meet future projections
- use available communication and information technology to complete forecasts, analyses and modelling, where required

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- enterprise goals and directions and their implications for enterprise operations
- budgeting strategies including calculating the costs of maintaining the current system and the operational and set-up costs for new, reconfigured or redesigned systems, including initial costs, ongoing costs and payback periods
- report formats and styles and their appropriateness for various audiences

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects with focus on enterprise environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMT607 Establish new markets

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to assess enterprise potential and capacity for entering new markets. It also describes the skills and knowledge required to identify new markets, research regulatory requirements and negotiate contracts.

Decisions to enter new markets should be based on extensive research and planning. Management's understanding of the risks and benefits of new markets and their implications for the business is essential.

This unit would benefit managers responsible for marketing and production and Quality Assurance (QA) managers required to supply product for new markets. This unit is relevant for all industry sectors.

This unit must be delivered in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research and determine viability of entering new markets	1.1 Identify and evaluate sources of assistance for locating and establishing new markets 1.2 Analyse characteristics of potential markets 1.3 Review enterprise products and service range in terms of potential market and customer requirements 1.4 Assess competitive position of enterprise product and prepare sales projections 1.5 Determine licensing and other regulatory requirements 1.6 Evaluate costs, benefits and risks of entering new markets
2. Develop a market entry strategy	2.1 Develop resourcing strategies for new market entry 2.2 Identify risk management strategies 2.3 Develop marketing strategies in association with relevant internal and external personnel 2.4 Plan distribution strategies to ensure profile of product in the new market
3. Identify contract and service requirements	3.1 Establish enterprise terms of payment and administrative requirements 3.2 Identify documentary and commercial requirements of new markets 3.3 Identify finance and insurance requirements 3.4 Identify contractual requirements relating to transport and distribution to ensure product quality and safety
4. Develop evaluation strategy for new market entry	4.1 Identify targets and determine performance indicator requirements 4.2 Prepare strategies for collecting and analysing performance data 4.3 Identify strategies for reporting outcomes, including future planning recommendations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT607 Establish new markets

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- apply relevant communication and mathematical skills
- communicate and negotiate clearly, ethically and effectively with a range of representatives (including internal personnel, government agents, financial agencies, distributors, export control agencies, brokers, customers) and other stakeholders
- research potential markets including competitors, products, customers and market regulations, legislation and controls
- evaluate feasibility of entering new markets
- identify the cultural requirements of the new market and clients
- identify strategies for financial risk management
- prepare, negotiate and implement strategies and action plans for entering new markets
- determine and obtain resources required to support new market strategy
- establish infrastructure requirements for new market
- use teamwork strategies to prepare work team to support new market strategy
- evaluate and report market entry performance
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- maintain currency of knowledge through independent research or professional development
- prepare enterprise strategies and plans which include resource requirements, timelines, milestones and communication strategies
- present reports according to legal and enterprise requirements
- research, collate and analyse information relating to the individual business, domestic and international context (as applicable)
- use available information and communication technology and systems (including forecasting software, budgets, research material) to assist planning, monitoring and reporting

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- purpose and features of distribution and marketing strategies
- role of new markets in achieving enterprise goals and plans
- enterprise budgetary and planning cycles and processes; methods of production analysis; and sales records and costs; and enterprise methods for estimating and forecasting sales and production requirements

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects which focus on enterprise environment and conditions

Assessors must satisfy current standards for RTOs.

AMPMG T801 Manage financial performance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to manage financial performance in an organisation or business unit.

Leaders in agri-business are typically required to forecast future financial resource needs, analyse current asset performance and capacity to commercial standards and set business targets. They are also required to manage compliance mechanisms, manage financial risk within agreed plans and mechanisms, and monitor compliance with financial projections.

This unit is specifically relevant to leaders or managers working in a competitive commercial environment.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Forecast future financial resource	1.1 Establish and assess the capacity of existing financial systems 1.2 Forecast financial data and business system requirements

Element	Performance criteria
needs	1.3 Analyse forecasted requirements 1.4 Prepare and plan budget forecasts according to organisational and statutory requirements 1.5 Prepare and present recommendations for budget expenditure or for modifying existing projections
2. Analyse current asset performance and capacity	2.1 Analyse costs and returns associated with assets and liabilities using standard accounting reports to identify the extent of debt and equity financing 2.2 Identify management responsibilities and legal reporting requirements in consultation with relevant enterprise staff 2.3 Analyse and interpret financial reports and key information 2.4 Analyse and evaluate the effects of financial decisions on organisational ability to meet planned outcomes in relation to specific activities or timeframes
3. Set business targets and compliance mechanisms	3.1 Collect comparative and trend information and confirm needs for future budget and associated resources 3.2 Complete consultation on relevant short-term and long-term needs 3.3 Allocate resources for the budget to maximise organisation's performance 3.4 Maintain accurate and up-to-date records of resource allocation and usage in accordance with organisational requirements 3.5 Develop and review management systems which enable the timely collection, management and processing of information 3.6 Complete and accurately report records of budget performance and expenditure in accordance with organisational procedures and statutory requirements 3.7 Evaluate and improve budget audit mechanisms and compliance requirements
4. Manage financial risk	4.1 Identify deviations from budget that adversely affect organisational objectives 4.2 Promptly develop action plans to remedy significant deviations from budget objectives and projections 4.3 Monitor and review financial documentation against organisational objectives 4.4 Revise and renew budget priorities to meet operational contingencies and manage risk 4.5 Manage costs in accordance with budget targets

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT801 Manage financial performance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- prepare a financial resource plan/budget
- monitor and manage financial resources over a full planning cycle
- effectively communicate financial reports and operational execution
- make adjustments to suit changing circumstances and respond to unusual situations.
- identify and analyse potential risks of any type
- identify financial information and to follow relevant accounting procedures
- apply decision making skills
- use interpersonal skills to:
 - maintain appropriate relationships with colleagues
 - establish trust
 - value and be open to, the opinions of others
 - work as part of a team
 - listening actively
 - negotiate effectively
- timetable and schedule reports and lodgements
- use problem-solving, initiative and enterprise skills to prepare budgets and to monitor their implementation
- use research skills to identify asset management valuations
- apply applicable professional standards
- manage risk

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- accounting, financial statements and cash flow

- communication processes and methods
- compliance requirements
- cost of capital, capital structure and working capital
- finance and investment decisions
- goals of financial resource management
- legislation, codes and by-laws relevant to organisation's operations
- principles of financial management
- relevant legislation
- risk and return

Assessment Conditions

Assessment must ensure:

- access to workplace contractual and procurement documentation
- competence is consistently demonstrated over time, and over a range and variety of situations
- access to appropriate documentation and resources normally used in the workplace
- access to an appropriate operating environment

Assessors must satisfy current standards for RTOs.

AMPMT802 Provide strategic leadership

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to analyse and improve leadership style and professional competence, and to lead organisational strategic development and deployment. The unit also describes the skills and knowledge required to lead transformational practices, cultivate collaborative practices and provide strategic leadership in dynamic contexts.

This unit applies to leaders or managers, with professional expertise and personal integrity, who wish to develop strategic capabilities. They often act as role models for others within the organisation.

This unit relates to learning activities within small to medium-sized organisations and significant activities within large organisations.

Individuals must be able to respond strategically and act as leaders of change. They must seek to improve competitive advantage through transformation of individual, team and operational capabilities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Reflect on personal effectiveness and efficacy	1.1 Identify and apply strategies to create a culture that encourages receiving and giving effective feedback 1.2 Regularly review personal efficacy and attainment of professional and personal development objectives and priorities 1.3 Review capacity as a role model in terms of ability to gain the trust, confidence and respect of diverse and relevant individuals and groups 1.4 Evaluate personal efficacy and capability to build an effective organisational and workplace culture 1.5 Analyse and evaluate personal effectiveness in developing the competence required to achieve operational responsibilities 1.6 Model personal responsibility for environmental sustainability and develop capability in others
2. Lead in a transformational manner	2.1 Apply transformational leadership practices 2.2 Demonstrate empathy in personal relationships and day-to-day leadership 2.3 Demonstrate leadership which is inclusive and respectful of individual differences 2.4 Control, and appropriately regulate, own potentially disruptive emotions and impulses 2.5 Effectively manage work-based relationships
3. Cultivate collaborative thinking	3.1 Display judgement and common sense in undertaking day-to-day leadership role 3.2 Analyse relevant legislation, information and intelligence sources when evaluating business opportunities 3.3 Draw upon personal expertise and relevant individuals to achieve strategic results 3.4 Seek and encourage contributions from relevant individuals 3.5 Use collaborative communication and learning approaches to model and encourage their broader use in the workplace 3.6 Cultivate collaborative and participative work relationships
4. Provide strategic leadership during change processes	4.1 Positively convey business direction and values to relevant individuals and stakeholders 4.2 Analyse impact and role of leadership during organisational

Element	Performance criteria
	change 4.3 Analyse and confirm capability and competence of relevant individuals in terms of their ability to contribute to change processes and plans 4.4 Develop learning and communication solutions to address problems and risks arising for individuals during organisational change 4.5 Identify leadership styles and develop approaches to best respond impacts of change on people and processes

Assessment Requirements for AMPMGT802 Provide strategic leadership

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must provide strategic leadership by acting as leaders of change and seeking to improve competitive advantage through transformation of individual, team and operational capabilities. Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- improve own development, personal leadership style and self-management skills
- demonstrate application of leadership style and approach appropriate to individuals involved, outcomes being sought and context
- use problem-solving, initiative and enterprise skills to:
 - direct, motivate, consult and delegate appropriately
 - collect, analyse and interpret data using a range of methods
 - shape strategic thinking and inspire others with a shared vision
 - work with teams with diverse emotional intelligence and cognitive skills
- use teamwork skills to lead a team, workgroup or unit, with awareness of employee needs and requirements
- use provide leadership in workplace health and safety practice, ethical standards, legislative requirements and governance
- review own personal and professional competence against personal development objectives
- support and use participative arrangements aimed at establishing trust to:
 - maintain appropriate relationships with colleagues and others
 - value and be open to the opinions of others
 - work as part of a team
 - model collaborative communication and learning
 - use active listening and negotiation skills
 - encourage participation across all levels of personnel and clients
 - seek opinions and elicit feedback from a range of stakeholders

- develop plain English written texts which deal with complex ideas and concepts
- use workplace technology

Knowledge Evidence

The candidate must demonstrate an in depth technical and theoretical knowledge of:

- legislation relevant to business operations, especially regarding workplace health and safety, environmental issues, Equal Employment Opportunity (EEO), anti-discrimination, industrial relations and regulatory requirements
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- leadership styles
- personal development and planning methodologies
- data collection methods
- external environment scanning relating to social, political, economic, regulatory and technological developments
- emotional intelligence and its relationship to individual and team effectiveness
- organisational transformation and management of change
- organisational design and building in response to changes in customer or market conditions
- environmental sustainability principles

Assessment Conditions

Assessment must ensure:

- access to an actual workplace or simulated environment
- competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations
- access to resources normally used in the workplace, including organisational policies and procedures, and relevant legislation
- access to clients

Assessors must satisfy current standards for RTOs.

1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to communicate and negotiate in multicultural business contexts, which require an understanding of cultural diversity.

This unit applies to leaders or managers who need to apply sound cross-cultural communication and negotiation strategies in their business practice and develop these skills in others. They will typically undertake negotiations with other organisations in areas such as marketing, partnership and commercial agreements. These organisations could be onshore or offshore.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPMGT803 Communicate and negotiate in a culturally diverse context

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be observed using an understanding of cultural diversity to communicate and negotiate in multicultural business contexts. Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- interact and negotiate in a range of cross-cultural contexts relevant to the business of the enterprise
- interact appropriately with partners, customers, governments and other stakeholders
- identify the organisation's approach to accommodating cultural diversity
- identify the strengths and weaknesses in models of cultural analysis
- use initiative and enterprise skills account for cultural contexts, similarities and differences
- apply knowledge to identify and apply multiple perspectives and interpretations, and appropriate protocols and language
- research academic theories of culture and present them in plain English
- use problem-solving skills to negotiate in difficult and complex situations
- communicate and negotiate through an interpreter in a culturally appropriate manner
- work effectively with groups and teams
- research online and to use libraries to gain cultural knowledge and information

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- communication styles and methods, and the protocols of people from a range of cultures
- definitions of culture and cultural diversity based on a numerous theoretical models
- cultural biases inherent in any relevant conceptual models of culture
- implicit and explicit similarities and differences within and between countries and cultures
- important features of relevant cultures

- workplace health and safety protocols for interactions with people at work, particularly duty of care requirements
- personal cultural assumptions shaping expectations and outcomes
- sources of assistance for international visitors, including access to interpreters
- types of communication specific to cross-cultural business environments

Assessment Conditions

Assessment must ensure:

- activities are related to a business context
- access to workplace context in which cross-cultural communication and negotiation skills are required

Assessors must satisfy current standards for RTOs.

AMPMGT804 Develop and enhance collaborative partnerships and relationships

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop and enhance collaborative partnerships and relationships with business, community and industry stakeholders. The unit also describes the skills and knowledge required to communicate to influence others, enhance new and existing partnerships, establish positive collaborative relationships, lead the development of a partnership program and establish reporting mechanisms.

This unit applies to leaders or managers working in an enterprise where collaborative partnerships and relationships are used to build capabilities. It includes forming partnerships, or other collaborative arrangements, to achieve improved product, marketing, workforce development, business outcomes or community relationships.

Enterprise leaders should gain the respect of colleagues, contacts, clients and the community by demonstrating professionalism in all aspects of their work. Their professionalism should be underpinned by their management expertise and effective interpersonal and communication skills.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPMGT804 Develop and enhance collaborative partnerships and relationships

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be observed developing and enhancing collaborative partnerships and relationships with business, community and industry stakeholders. Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must:

- use analysis and interpretation skills to:
 - evaluate organisational information management systems, policies and procedures
 - select and evaluate relevant information and documentation
 - identify any current and potential non-compliance
 - access and interpret organisation's standards and values
 - analyse records or notes of the evaluation process
 - analyse business, political, economic and organisational contexts influencing the nature and impact of partnership arrangements
 - make judgements relating to the success and deficiencies of existing arrangements
 - generate and evaluate ideas by analysing information and concepts at an abstract level
- use initiative and enterprise skills to initiate and establish collaborative partnerships and relationships
- used interpersonal and communication skills to negotiate, question, direct, listen and investigate, network and clarify issues
- use planning and organising skills to:
 - research and evaluate validation processes, and to determine and implement improvements
 - develop and establish agreed plans
 - use problem-solving skills to undertake risk assessment, review feedback and plan improvements
 - lead and motivate a team in establishing productive networks, partnerships and other relationships
- foster partnerships, conduct stakeholder consultation and use strategic and personally enhancing communication skills

- use accepted strategies and assess and analyse personal performance
- develop collaborative approaches to enhance individual, team and organisational outcomes
- initiate and implement external partnerships in accordance with relevant regulatory, employment and organisational requirements

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- legislation relevant to business operation, especially in regard to workplace health and safety and environmental issues, Equal Employment Opportunity (EEO) and anti-discrimination, industrial relations, food safety and trade
- organisation mission, purpose and values
- organisation objectives, plans and strategies
- leadership techniques, including:
 - leadership styles
 - emotional intelligence and its relationship to individual and team effectiveness
 - organisational transformation and management of change
 - personal development planning methodologies
 - strategies to evaluate and analyse effectiveness of personal performance
- data collection methods
- external environment scanning relating to social, political, economic and technological developments
- models for effective consultation and collaboration within a partnership
- organisational design and building in response to changing market or customer conditions
- risk assessment and monitoring strategies
- strategies to evaluate and enhance effectiveness of partnership arrangements

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Methods of assessment must include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations
- workplace projects focusing on company environment and conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPMGT805 Develop and manage international business operations

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must use their knowledge of the international business context to respond to factors impacting business activity. Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must demonstrate ability to:

- use analytical skills to identify potential risks and opportunities, and assess market dynamics
- use culturally appropriate communication skills to relate to people with diverse backgrounds and abilities
- make decisions
- use interpersonal skills to:
 - maintain appropriate relationships with colleagues
 - establish trust
 - value and be open to, the opinions of others
 - work as part of a team
 - listen actively
 - demonstrate cultural sensitivity
 - negotiate effectively
- use planning and organisational skills to develop and implement business strategies
- use problem-solving, initiative and administrative skills to seek and develop international business opportunities
- use research skills to identify international business trends and opportunities
- manage risk
- use a range of tools to monitor business performance
- effectively integrate international business challenges and opportunities within and across functional business areas

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- relevant legislation, codes of practice and standards that affect international business
- nature and scope of international business
- international trade and investment theory
- international monetary system and balance of payments
- foreign exchange and financial markets
- national trade and investment policy
- co-operation between nation's legal and political forces
- cultural diversity, interpersonal relations and human resource management
- strategic management
- modes of entry and strategic alliances
- organisational design and control
- international marketing and operations management
- international finance, accounting and taxation
- key concepts of international business and their application within an enterprise
- key trends in international business

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:

- access to an actual workplace or simulated environment
- competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations
- access to resources normally used in the workplace, including organisational policies and procedures, and relevant legislation

Assessors must satisfy current standards for RTOs.

AMPMGT806 Commercialise research and technology product or idea

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to undertake the fundamentals of product/idea commercialisation. It describes the process from conception to launch to full production.

Competency requires developing the skills and knowledge to successfully research, analyse, cost and develop a business opportunity for a product/idea. This unit also describes the skills required to manage commercialisation and evaluate product success.

This unit applies to leaders or managers responsible for developing a commercialisation strategy for an innovative product or technique, which has been developed through research.

Leaders undertaking product commercialisation must investigate and negotiate the legal and partnership implications of commercialisation, undertake market testing and develop commercialisation strategies.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate commercialisation options	1.1 Describe product/innovation to be commercialised 1.2 Analyse innovation alignment against organisation's innovation objectives 1.3 Research, analyse and test market opportunities 1.4 Investigate optimum business structure and funding options
2. Develop commercialisation proposal	2.1 Determine resourcing requirements 2.2 Develop marketing plan 2.3 Determine supply chain strategy 2.4 Determine strategies for managing Intellectual Property (IP) 2.5 Determine environmental sustainability of proposed product/idea 2.6 Develop risk mitigation plan 2.7 Negotiate proposal modifications with key stakeholders
3. Prepare for implementation	3.1 Develop project implementation plan 3.2 Determine monitoring process 3.3 Establish and develop required business processes 3.4 Assemble project team

Assessment Requirements for AMPMGT806 Commercialise research and technology product or idea

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must undertake the fundamentals of product/idea commercialisation from conception to launch to full production.

Candidates must demonstrate ability to:

- analyse market trends
- budget, including forecasting, capacity and asset analysis, setting targets and compliance mechanisms
- negotiate licensing IP (in and out), contractual supply chain arrangement and partnerships
- use communication skills to:
 - maintain appropriate relationships with colleagues and others
 - value and be open to the opinions of others
 - work as part of a team
 - model collaborative communication and learning
 - use active listening and negotiation skills
 - present and negotiate proposals
 - seek opinions and feedback from a range of stakeholders
 - develop plain English texts dealing with complex ideas and concepts
- generate and evaluate ideas by analysing information and concepts at an abstract level
- provide strategic leadership during change and negotiation processes
- use problem-solving, initiative and enterprise skills to:
 - direct, motivate, consult and delegate appropriately
 - collect, analyse and interpret data using a range of methods
 - shape strategic thinking and inspire others with a shared vision
 - work with teams with diverse emotional intelligence and cognitive ability
- provide leadership in workplace health and safety practice, ethical standards and legislative requirements

- review own personal and professional competence against personal development objectives
- support and use participative arrangements aimed at establishing trust
- to develop, negotiate and structure an agreed commercialisation strategy
- to apply leadership style and approach appropriate to individuals involved, outcomes being sought and contextual factors

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- relevant legislation
- business strategies and legal requirements underpinning trademarks, copyright and patents
- legal requirements underpinning partnership arrangements, contracts and taxation
- commercial environmental analysis techniques, including Strengths, Weaknesses, Opportunities, Threats (SWOT)/TOWS
- market testing strategies and techniques
- strategies for analysing and assessing the upstream and downstream implications of an innovation
- risk assessment strategies and techniques
- team selection, management and support strategies
- environmental sustainability principles

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:

- access to an actual workplace or simulated environment
- assessment over a sufficient timeframe to allow holistic assessment of the candidate's capacity to lead the development of a commercialisation strategy
- resources normally used in the workplace, including organisational policies and procedures, and relevant legislation
- access to stakeholders, potential partners and clients

Assessors must satisfy current standards for RTOs.

AMPMT807 Manage change to organisational electronic technology systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to improve business outcomes through implementing the introduction or upgrade of advanced electronic technologies.

This unit applies to leaders or managers whose role is to manage the introduction of advanced electronic technologies to enhance business practices.

Leaders and managers should manage the implementation of advanced electronic technologies, such as those associated with electronic business (e-business) models; financial systems, information management systems, mobile and wireless technologies; and technologies relating to managing customer and regulatory requirements.

Operational management in relation to introducing technologies to enhance business processes may involve complex judgements.

This unit may relate to the business activities of a small to medium-sized organisation or to a significant unit of activity in a large organisation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare organisational change management strategy for implementation of advanced electronic technologies	1.1 Analyse proposed changes in relation to current operational practices, infrastructure and strategic plans 1.2 Evaluate, cost and prioritise identified changes 1.3 Identify evaluate and manage risks associated with implementation 1.4 Develop implementation strategies, including change management and communication strategies 1.5 Engage, assemble and brief implementation team
2. Manage implementation	2.1 Communicate implementation strategies to stakeholders and clarify timelines and accountabilities 2.2 Monitor, record and report implementation progress against planned milestones 2.3 Identify and manage potential risks through consultation with stakeholders and review of testing outcomes 2.4 Review and revise implementation strategy, as necessary 2.5 Finalise installation according to implementation strategy and organisational procedures 2.6 Identify and implement training programs required to support new technologies
3. Evaluate implementation outcomes	3.1 Review and evaluate implementation process 3.2 Debrief implementation team 3.3 Assess outcomes of implementation process against organisational requirements 3.4 Report project outcomes to key stakeholders
4. Develop and implement ongoing management processes	4.1 Develop business processes required for ongoing electronic technology management 4.2 Implement business processes required for ongoing electronic technology management

Foundation Skills

Assessment Requirements for AMPMGT807 Manage change to organisational electronic technology systems

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must provide evidence of managing change to organisational electronic technology systems. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must demonstrate ability to:

- apply change management theory
- use effective communication and teamwork skills to consult with stakeholders and system users
- apply planning and reporting skills
- use problem-solving, initiative and enterprise skills to:
 - assess vulnerabilities in electronic technology proposals
 - manage risks
 - monitor stakeholder satisfaction
 - develop strategies to respond to system, personnel and technology problems
- provide leadership in workplace health and safety practice and observance of ethical, legislative and good corporate governance requirements
- apply technology skills to:
 - use appropriate technology to achieve system and business outcomes
 - use appropriate terminology
 - use high levels of accounting (mathematical), technological and e-commerce systems
 - assess advice relating to suitability and reliability of hardware and software
 - analyse and assess potential of new technology solutions to improve organisational outcomes
- research and evaluate potential impact of a proposed electronic technology system
- analyse, develop and implement plans for introducing an electronic technology system with minimal interruption to business processes
- identify, analyse and address problems in a timely and effective manner

Knowledge Evidence

The candidate must demonstrate specialised and integrated technical and theoretical knowledge of:

- business policies and procedures that impact on job role or function
- change management theory
- capabilities and limitations of infrastructure
- business needs
- facilities and infrastructure management
- methods for assessing and analysing electronic technology proposals
- planning techniques
- quality measures and principles
- relevant legislation, codes and regulations that affect business operations, especially in regard to workplace health and safety and environmental issues, Equal Employment Opportunity (EEO), industrial relations and anti-discrimination
- written policies and internal procedures on electronic technology management and associated contractual documents

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority, under typical operating and production conditions for the enterprise.

Assessment must ensure:

- competence is consistently demonstrated over time, and over a range and variety of situations
- access to required assessment facilities and resources.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPMGT808 Undertake research project

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must undertake an independent research project directed towards an agri-business issue or problem.

The candidate must demonstrate ability to:

- use analysis and interpretation skills to:
 - critically review other research strategies, analyses and findings
 - apply research findings to a current issue
 - select relevant information and documentation
- use communication and negotiation skills to:
 - present and explain research ideas
 - gain commitment to participate in research activity
 - present findings
- develop and conduct research activity
- undertake risk assessment and resolve blockages

The candidate must provide evidence of:

- comprehensive literature review
- formulated research proposal or plan including:
 - specific research questions or hypotheses
 - valid population or sample size
 - description of the geographical, cultural, social or institutional context within which the research will be undertaken
 - full description of the data collection methods
- analysis of the limitations to research design
- design appropriate tools and techniques
- research report with analysis of data, and valid and reliable findings
- utility and relevance of the research results

Knowledge Evidence

The candidate must demonstrate specialised and integrated technical and theoretical knowledge of:

- relevant legislation and regulatory requirements impacting on research activity
- research strategies and techniques
- data collection methods
- risk assessment and monitoring strategies, including environmental risk analysis
- strategies to evaluate and analyse effectiveness of research approach
- environmental sustainability principles

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:

- research activity relates to an actual workplace or industry context and topic
- competence is demonstrated using a range of tools and techniques appropriate to the given situations and research topic

Assessors must satisfy current standards for RTOs.

AMPMT809 Analyse data for business decision making

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the statistical skills and knowledge required to support decision making for a business or business unit.

This unit applies to leaders or managers who use data analysis and decision-making skills and techniques in the management of their day-to-day work. They must assemble or obtain raw data, process that data and analyse and interpret it in a way that enables sound decision-making.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and access data sources available to the business	1.1 Scope and define data collection requirements of the business question or issue 1.2 Identify and assess data sources 1.3 Research and/or collate data in accordance with legislation, policies and guidelines 1.4 Evaluate accuracy and appropriateness of data

Element	Performance criteria
	1.5 Record data in the desired format in accordance with professional, business and task requirements
2. Apply data analysis and decision making techniques to analyse business data	2.1 Collect, store and retrieve data using software in accordance with legislation, policy and guidelines 2.2 Use spreadsheet tools to retrieve data and present it in suitable formats 2.3 Display graphical data in accordance with presentation principles 2.4 Perform quantitative and/or qualitative analysis to obtain required outcome 2.5 Use analysis and descriptive tools and techniques appropriately given the nature of the information and the required outcomes 2.6 Identify and describe methodological limitations 2.7 Calculate summary statistics from the given data set in accordance with the business requirement
3. Produce information for business decision making	3.1 Interpret data summaries and trends in accordance with accepted standards 3.2 Interpret and explain statistical tests 3.3 Interpret data to enable informed business decision-making 3.4 Present data, charts and maps clearly for ease of understanding 3.5 Include glossaries, technical notes and referencing, where required 3.6 Prepare and present reports that include statistical concepts, tables, charts and maps in accordance with enterprise policies and procedures 3.7 Present findings appropriately for the audience 3.8 Use charts appropriately in presentations, taking into account the variables being charted and accepted standards 3.9 Communicate assumptions informing interpretation in accordance with audience needs

Assessment Requirements for AMPMGT809 Analyse data for business decision making

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must complete workplace-relevant activities which involve assembling or obtaining raw data, processing it, and analysing and interpreting it in a way that enables sound decision-making. Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must demonstrate ability to:

- analyse and interpret data
- identify sources of data, collect data, follow analysis procedures and explain results
- apply decision making skills
- negotiate effectively
- collect data and produce reports
- use problem-solving, initiative and enterprise skills to produce information relevant to business decision making
- use research skills to identify and collect data
- manage risk
- differentiate between different types of data
- differentiate between inferential and descriptive statistics
- apply linear regression and correlation analysis techniques
- provide advice for business decision making based on the results of statistical analysis

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- relevant legislation, codes of practice and standards
- use of statistical data for business decision making
- methods of data presentation
- methods of describing data

- risk and uncertainty
- interval estimation
- hypothesis testing
- comparing group differences
- simple linear regression and correlation
- multiple regression
- time-series analysis
- the strengths and limitations of results produced by each statistical technique (error correction and hypothesis testing)

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:

- competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations
- access to resources normally used in the workplace including organisational policies and procedures, relevant legislation

Assessors must satisfy current standards for RTOs.

AMPR101 Identify species and meat cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to identify species and meat cuts.

This unit is applicable to boning rooms, smallgoods manufacturing and meat retail operations.

All training must be conducted according to Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Meat retailing

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element
1. Identify meat cuts	1.1 Correctly identify meat cuts by cut name and species according to workplace requirements and specifications 1.2 Correctly select meat cuts by cut name and species according to workplace requirements
2. Identify primal cuts	2.1 Correctly identify primal cuts by name and species according to workplace requirements 2.2 Correctly select primal cuts by name and species according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR101 Identify species and meat cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to select and identify primal and secondary cuts correctly by species and cut for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing.

The candidate must demonstrate ability to:

- identify meat cuts according to label on cartons (as appropriate)
- apply relevant regulatory requirements
- select and handle products according to workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of (for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing):

- primal cuts used for different cuts of meat
- principles of product selection by species, primal and cut type
- relevant regulatory requirements
- appropriate sources of information on new species or cuts
- different species and categories of meat and meat cuts

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

The following three forms of assessment must be used

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR102 Trim meat for further processing

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to use a knife for trimming lesser-valued cuts of meat.

The trim is usually performed prior to further processing such as mincing and sausage-making.

This unit is applicable to workers in boning rooms, smallgoods manufacturing and meat retail operations.

All training must be conducted according to Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Trim meat to workplace specifications	1.1 Trim meat to workplace specifications 1.2 Trim meat to workplace health and safety hygiene and sanitation, and workplace requirements
2. Handle product hygienically	2.1 Handle product to meet hygiene requirements
3. Handle knife effectively	3.1 Handle knife safely, hygienically and effectively

Assessment Requirements for AMPR102 Trim meat for further processing

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must trim a variety of lesser-valued cuts of meat to workplace specifications.

The candidate must:

- demonstrate effective use of a knife to workplace health and safety, and hygiene requirements
- give examples of workplace specifications for trimming meat
- apply relevant regulatory and workplace requirements
- seek further advice from supervisor when uncertain about work instructions
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- hygiene and safety requirements for use of a knife
- steps in checking and preparing a knife
- workplace requirements for use of a knife
- relevant regulatory and workplace requirements
- hygiene requirements for the handling of meat products
-

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR103 Store meat product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must demonstrate the ability to:

- demonstrate storage techniques which minimise risk of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products
- monitor refrigerated temperature on a regular basis
- recognise and interpret codes, date tags and labels
- identify and report unacceptable temperatures either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products
- use correct manual handling techniques for transferring product to storage facilities
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- storage techniques which minimise risks of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products
- appropriate storage facilities for individual products
- recommended refrigerated temperature for each product stored
- regulatory requirements related to storing meat products
- species and various meat products for storage

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time.

Assessors must satisfy current standards for RTOs.

AMPR104 Prepare minced meat and minced meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare minced meat and minced meat products in accordance with regulatory requirements.

This unit is applicable to workers in boning rooms, smallgoods manufacturing and meat retail operations.

All training must be conducted according to Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who undertake routine activities in highly structured and stable contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX209 Sharpen knives

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Clean and prepare processing equipment used in the preparation of minced meat products	1.1 Prepare mincing equipment according to manufacturer specifications and workplace health and safety, and hygiene and sanitation requirements 1.2 Clean mincing equipment according to manufacturer specifications, and workplace health and safety requirements 1.3 Adjust mincing equipment as required in accordance with manufacturer specifications and workplace, health, safety and hygiene requirements
2. Mince meat	2.1 Select trimmings according to workplace policy 2.2 Cut trimmings to manufacturer specifications and workplace requirements to avoid blockages in mincer 2.3 Feed trimmings through mincer efficiently to avoid blockages and heat build-up 2.4 Accurately identify species 2.5 Separately store species according to product description 2.6 Maintain product at correct temperature during processing 2.7 Handle and store products at correct temperature and conditions
3. Prepare minced meat products	3.1 Prepare minced meat products according to regulatory, workplace, hygiene, health and safety requirements 3.2 Combine ingredients to workplace requirements 3.3 Measure fat content 3.4 Process meat in preparation for forming to product specifications and regulatory requirements 3.5 Form product to specifications and regulatory requirements 3.6 Maintain correct temperature of product during processing and handling 3.7 Store product at correct temperature and conditions

Assessment Requirements for AMPR104 Prepare minced meat and minced meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed preparing minced meat and minced meat products in accordance with regulatory requirements. Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- activate mincing equipment to assess its readiness for operational use
- identify different species and categories of meat
- start-up and shut-down equipment when necessary according to manufacturer, workplace and health and safety, requirements
- operate a mincer to manufacturer, workplace health and safety, and hygiene and sanitation requirements
- tighten front plate on mincer as required
- operate adjustment tools and equipment correctly
- interpret time and temperature measuring equipment
- accurately copy and record temperature, weights and time, according to workplace requirements
- clean mincer between species to avoid cross-contamination
- use tools and cleaning agents appropriate to the cleaning activity or manufacturer's specifications
- report faults and adjustments required either verbally or in writing according to workplace requirements
- list minced meat products
- seek advice from appropriate sources when working with new products
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- conditions under which equipment may need adjusting
- fat content using chemical lean measures or visual lean estimation
- the purpose and use of processing equipment used in making minced meat products
- temperature requirements for product
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- procedure for cleaning equipment

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace or in a simulated environment under normal operating conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be observed carrying out minor, routine preventative workplace maintenance. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- access workplace information to identify routine maintenance requirements
- clean preventative maintenance tools and equipment
- prepare equipment and work area to conduct preventative maintenance
- select, fit and use personal protective clothing and/or equipment
- ensure appropriate supplies prior to commencement of task
- seek advice from other team members or manuals prior to working with new equipment
- consistently apply isolation procedures
- address common problems in conducting routine preventative maintenance
- demonstrate purpose and use of common hand and power tools used in routine preventative maintenance
- locate and refer to workplace information including lubrication schedules
- identify faults in routine preventative maintenance
- identify relevant plant and equipment
- observe food safety factors for maintenance and servicing
- rectify or report faulty maintenance
- report or record maintenance information as required
- apply relevant regulatory and workplace requirements
- follow relevant workplace health and safety requirements
- observe roles of and relationships with others involved in carrying out maintenance functions
- maintain work area to meet housekeeping standards
- use communication skills relevant to enterprise requirements

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- the purpose and use of common hand and power tools for routine preventative maintenance
- the purpose of routine preventative maintenance
- isolation procedures
- food safety factors for maintenance and servicing
- environmental issues and controls related to routine preventative maintenance
- links between routine preventative maintenance and other enterprise objectives
- relevant regulatory and workplace requirements
- relevant workplace health and safety requirements

- advise customers of suitable storage temperatures of meat product
- apply workplace health and safety requirements for working in refrigerated areas
- seek advice from appropriate sources when working with new products
- explain effect of incorrect storage temperatures on meat products
- use relevant communication skills
- use mathematical skills relevant to the task
- work effectively individually or as part of a team

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- suitable temperature range for meat products stored in warehouse chillers, transportation, cool rooms and display cabinets
- effects of incorrect storage temperatures on meat products
- recommended refrigerated temperature for products stored
- regulatory requirements related to storing meat products
- workplace health and safety requirements for working in refrigerated areas

Assessment Conditions

Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR201 Break and cut product using a bandsaw

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to break and cut products using a bandsaw.

This unit is applicable to workers in meat processing plants, smallgoods factories, boning rooms, food services operations, knackeries, game processing plants, wholesale and retail operations.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out according to workplace and hygiene requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX201 Prepare and operate bandsaw

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Break carcass into specified cuts using a bandsaw	1.1 Follow cutting lines for breaking of product according to workplace health and safety, hygiene, Quality Assurance (QA), and workplace requirements 1.2 Cut carcass into standard primal cuts according to workplace, workplace health and safety, hygiene and QA requirements
2. Cut product using a bandsaw	2.1 Cut product according to workplace, workplace health and safety, and hygiene and sanitation requirements
3. Hang and store product	3.1 Hang product according to workplace requirements 3.2 Store product according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR201 Break and cut product using a bandsaw

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- assemble and operate a bandsaw to manufacturer's, workplace and workplace health and safety requirements
- complete a safety check on the bandsaw
- ensure the safety of team members while working with a bandsaw
- report equipment faults, either verbally or in writing, according to workplace requirements
- use hanging and hooking techniques according to workplace health and safety, hygiene and sanitation, QA and workplace requirements
- store and rotate meat product according to workplace requirements
- seek advice from appropriate resources before using bandsaw on new products
- work effectively individually or as part of a team
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- primal cuts of carcass
- principles of storage and rotation of product according to workplace and regulatory requirements
- cutting lines for breaking carcass according to specifications
- safety procedures related to use of bandsaw

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

Where the candidate cannot use a bandsaw in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR202 Provide advice on cooking and storage of meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to provide information about cooking methods for various cuts of meat, in accordance with customer requirements.

This unit is applicable to workers in meat retailing operations.

All training must be conducted according to Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPR105 Provide service to customers

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide information on cooking specific meat cuts	1.1 Identify cooking method for various meat cuts to maximise eating quality 1.2 Provide information for cooking times for various meat cuts to meet customer needs 1.3 Provide information on complementary herbs, spices, vegetables, sauces or other flavours according to customer needs
2. Provide information on specific cuts for cooking methods	2.1 Identify available meat cuts for specific cooking method according to customer needs 2.2 Provide information for cooking times for various meat cuts to meet customer needs
3. Provide information on storage and shelf life of fresh meat and cooked meat products	3.1 Provide information on the storage and shelf life of fresh meat and cooked meat products
4. Provide hygiene information on handling of meat products	4.1 Provide information on the safe and hygienic handling, storage and preparation of meat products

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR202 Provide advice on cooking and storage of meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- acknowledge customer's presence
- greet customer
- establish customer needs by enquiry, listening and summarising
- be aware of cultural and ethnic differences and respond accordingly
- attend to customer needs promptly and courteously, displaying tact, satisfying customer needs ethically and maintaining professional standards of dress and personal hygiene
- explain cooking times and temperatures for roasting and microwaving meat to achieve rare, medium or well done results
- provide advice on cooking methods, times, temperatures, and efficiently and courteously meet customer needs
- relay information to customer
- acknowledge complaints
- demonstrate polite and efficient telephone technique (if required)
- follow up customer enquiries
- refer customer to more experienced staff if necessary, listen and learn from colleagues
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- operate telephone system, if required
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- effects of each cooking technique on tenderness of meat

- flavours which enhance various cuts and how to achieve the flavours
- how to interact with others in an appropriate way when providing advice
- moist cooking, dry cooking and microwave cooking techniques
- serving suggestions including suitable accompaniments
- properties and effects of animal fats in cooking
- which cuts are suitable for dry cooking techniques including roasting, grilling and stir-frying
- which cuts are suitable for microwave cooking techniques
- which cuts are suitable for moist cooking techniques including casseroles and stewing
- cooking times and temperatures for roasting and microwaving meat to achieve rare, medium or well done results
- storage times, temperatures and shelf life of fresh and cooked meat products
- workplace complaints policies and procedures
- relevant workplace health and safety, regulatory and workplace requirements
- sources of information on new cooking techniques

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- identify meat products
- identify the most appropriate packaging for products
- prepare meat order to customer requirements
- identify sub-standard products and take required action
- weigh items correctly following regulatory requirements
- over wrap meat items according to weather conditions and customer requirements
- use wrapping materials appropriately
- price items accurately according to displayed price
- use, read and interpret scales, calculators, cash registers
- explain regulatory requirements related to weighing products
- work with team members
- apply relevant workplace health and safety and regulatory requirements
- record mathematical information accurately
- report equipment faults, either verbally or in writing according to workplace requirements
- seek advice from colleagues when working with new products or equipment
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- regulatory requirements related to weighing products
- the effects of poor wrapping techniques on meat quality
- relevant workplace health and safety and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- select packaging equipment according to customer specifications and workplace requirements
- assemble the packaging unit
- check the unit to ensure cleanliness and working order
- adjust equipment settings as required for packaging instructions or schedules
- check safety features are in place
- set weight controls on scales
- load product according to specifications
- operate packaging equipment to package products to manufacturer's and customer specifications, workplace, workplace health and safety and hygiene and sanitation requirements
- complete packaging records, documents and labels accurately
- identify and report faults in equipment either verbally or in writing according to workplace requirements
- work with team members or individually
- seek advice from manuals or team members before repairing faults
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- methods of recording production
- regulatory requirements related to packaging

- features of the packaging unit, including parts, safety features, start-up and shut-down procedures and possible faults and adjustments
- production schedule

Assessment Requirements for AMPR205 Use basic methods of meat cookery

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to cook meat dishes using all the following cooking methods:

- boiling or simmering
- stewing
- braising
- roasting
- grilling
- shallow frying

The candidate must:

- identify the most appropriate cooking methods for a range of cuts of meat
- select appropriate cooking equipment
- follow recipes accurately
- apply hygiene and safety principles and procedures during the cooking process
- follow safe work practices, particularly in relation to bending, lifting and using cutting implements, appliances, heated surfaces and other equipment which carry a risk of burns
- seek advice from appropriate sources when working with new products/equipment
- report equipment faults, either verbally or in writing according to workplace requirements
- explain logical and time-efficient workflow
- apply relevant workplace health and safety, regulatory and workplace requirements
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must be able to demonstrate a basic factual, technical and procedural knowledge of:

- the effects of different cookery methods on the nutritional value of food
- underlying principles of all basic methods of meat cookery

- waste minimisation techniques and environmental considerations in relation to different cookery methods
- logical and time-efficient workflow
- use and characteristics of a range of equipment used for the required methods of meat cookery
- relevant workplace health and safety, regulatory and workplace requirements
- major food groups, culinary terminology and equipment as they relate to the required methods of meat cookery

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- assignments
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR207 Undertake routine preventative maintenance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to carry out routine maintenance in the workplace.

Routine preventative maintenance is undertaken by workers in the retail, smallgoods, meat processing and food services sectors. It may involve tasks such as:

- vehicle and equipment checks
- cleaning and lubrication of equipment
- adjustments and repairs to plant and equipment

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct routine checks of plant and equipment	1.1 Perform visual checks of plant and equipment to detect signs of defects and damage in accordance with preventative maintenance documentation and procedures 1.2 Make requirements for the adjustments and repairs to plant and equipment within workplace procedures and agreements
2. Implement routine preventative maintenance	2.1 Make routine adjustments and repairs to plant and equipment within workplace procedures and agreements 2.2 Carry out greasing, lubrication and other regular servicing of plant and equipment in accordance with workplace schedules, procedures and agreements, and according to maintenance instructions 2.3 Return cleaned equipment to operating order after maintenance is complete 2.4 Identify, rectify and/or report out-of-specification preventative maintenance 2.5 Collect, treat and dispose/recycle waste arising from preventative maintenance according to company procedures 2.6 Record routine maintenance information in the company reporting system

Assessment Requirements for AMPR207 Undertake routine preventative maintenance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply isolation procedures
- conduct pre-operational checks and requirements
- calculate down time for preventative maintenance
- select, fit and use personal protective clothing and equipment
- access services used in preventative maintenance
- seek advice from manuals and colleagues before working with new equipment
- prepare equipment and work area to conduct preventative maintenance
- resolve common problems in conducting preventative maintenance
- clean preventative maintenance tools and equipment
- observe cleaning requirements
- maintain a clean and safe work area
- rectify and report out-of-specification faulty maintenance
- apply waste handling requirements
- report and record maintenance information
- follow workplace health and safety requirements hazards and controls
- explain and follow roles and relationships with others involved in planning and carrying out maintenance functions
- use communication and mathematical skills appropriate to the task
- work with team members when appropriate to carry out tasks and solve problems

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- services used in preventative maintenance
- isolation procedures

- waste handling requirements
- pre-operational checks and requirements
- cleaning requirements
- workplace health and safety requirements, hazards and controls
- common problems in conducting preventative maintenance
- operational requirements of equipment including cleaning and sanitation following servicing
- purpose of preventative maintenance and possible consequences of poor preventative maintenance
- workplace information, systems and schedules for conducting preventative maintenance
- environmental aspects related to preventative maintenance
- impact of operating and cleaning procedures on maintenance requirements (including impact of not removing product from belts during cleaning)
- quality parameters to be achieved
- relationship of preventative maintenance to other work activities in the meat processing plant
- food safety factors in maintaining and servicing plant and equipment
- relevant regulatory and workplace requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating or production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR208 Make and sell sausages

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to make at least four varieties of sausages including two gourmet varieties.

The candidate must:

- identify different species and categories of meat used in sausages
- make a range of at least four different varieties of sausages
- seek advice from appropriate sources before working with new equipment or products
- operate adjustment tools and equipment
- apply mathematical skills relevant to the task
- report faults and required adjustments, verbally or in writing according to workplace requirements
- explain cooking methods for a range of sausages
- answer customer enquiries, for at least four different varieties of sausage, relating to:
 - cooking methods
 - cooking times
 - storage
 - shelf life
 - ingredients
 - nutritional value, including fat content
- work with team members
- apply relevant workplace health and safety requirements
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- sausage filler types
- materials used for hanging and storing sausages
- protective covering for sausages and its purpose

- conditions under which equipment may need adjusting
- function and operation of sausage filler machines
- safe and correct operation of sausage making equipment
- cooking methods for a range of sausage varieties
- shelf life of a range of sausage varieties
- temperature for storing a range of sausage varieties
- filling yields of various sizes and types of casings
- purpose and storage needs of collagen casings and natural casings
- purpose and use of processing equipment used in making sausages
- purpose and use of ingredients used in sausage making
- relevant workplace health and safety requirements
- ingredients used in at least four different varieties of sausage
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- regulatory requirements in relation to sausage making
- procedures for cleaning sausage making equipment
- properties of correct blending of ingredients

Assessment Conditions

Competency must be demonstrated over time under typical operating conditions.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Where the candidate cannot make and sell sausages in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR209 Produce and sell value-added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to produce and sell value-added products such as stir-fries, sprinkles, glazes, pre-marinated meat, satays, and forced, stuffed and seasoned meat. The products may be made with pre-prepared ingredients, such as commercially-prepared marinades and ready-cut meat, or by following recipes and preparing ingredients.

This unit is applicable to workers in meat retail and food services operations.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select ingredients for formulation of value-added products	1.1 Select ingredients according to workplace recipes, policy and practice 1.2 Weigh ingredients according to regulatory requirements 1.3 Label unused ingredients according to workplace and regulatory requirements
2. Prepare meat, stuffings, seasonings and forcemeat for value-added products	2.1 Prepare meat according to recipes, policy and practices 2.2 Prepare stuffings, seasonings and forcemeat according to recipes, policy and practices
3. Mix ingredients	3.1 Add ingredients according to recipe and product specifications 3.2 Blend ingredients to achieve product consistency or substance according to recipe and product specifications
4. Produce value-added products	4.1 Add ingredients to meat according to instructions or recipe 4.2 Formulate product according to product specifications and workplace, hygiene and sanitation, and Quality Assurance (QA) requirements 4.3 Present product according to product specifications and workplace requirements 4.4 Label product according to product specifications, and regulatory and workplace requirements
5. Store products and ingredients	5.1 Store product according to workplace and regulatory requirements 5.2 Store ingredients according to workplace and regulatory requirements 5.3 Identify shelf life of product 5.4 Identify effects of ingredients on shelf life
6. Sell meat product	6.1 Provide information, including cooking, preparation, storage and serving suggestions, to customers on meat product 6.2 Promote product to customers

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR209 Produce and sell value-added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must demonstrate the ability to make a minimum of five different value-added products from at least three species.

The candidate must:

- follow recipes accurately
- select, measure and weigh meat and ingredients according to recipes and workplace requirements
- perform calculations as required for production of value-added products
- explain permissible use of additives and ingredients in value-added products
- mix ingredients to achieve product consistency according to recipe and product specifications
- produce at least five value-added products from a minimum of three species including stuffing, seasoned and forcemeat
- identify quality requirements related to production of value-added products, including limits to value-adding options
- present and label products to workplace requirements
- record information, including mathematical information, accurately
- store meat and ingredients to workplace and regulatory requirements
- apply workplace health and safety and hygiene requirements related to producing value-added products
- prepare, operate, adjust, shut down and clean preparation equipment.
- use mathematical skills relevant to the task (including estimating measures to verify calculations)
- work effectively individually or as part of a team
- work with other team members to develop new value-added products
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and the effect of different ingredients on shelf life
- range of effects on the product and consumer of the use of both incorrect and inadequate quantities of ingredients
- permissible use of additives and ingredients in value-added products
- properties of correct blending
- use and purposes of ingredients in producing value-added products
- reasons for poor product consistency and rectify problem
- workplace health and safety and hygiene requirements related to producing value-added products

Assessment Conditions

Competency must be demonstrated over time under typical operating conditions.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Where the candidate is unable to produce the required volume of value-added products in their workplace they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- Quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR210 Receive meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- receive incoming stock
- follow equipment and material requirements
- follow health and hygiene requirements
- follow workplace requirements
- identify and minimise safety hazards
- apply relevant workplace health and safety and regulatory requirements
- calibrate equipment correctly
- use different types of weighing machines
- complete documentation for weighing and receiving goods
- explain the features and purpose of a stock control sheet
- work with diverse individuals and groups
- use mathematical skills relevant to the task
- use relevant communication skills
-

Knowledge Evidence

The candidate must demonstrate a basic, factual, technical and procedural knowledge of:

- principles of the relevant health Acts and regulatory requirements in relation to stock control
- differences in quality of carcasses
- differences in types of weighing machines
- indications of meat contamination and workplace procedures for handling contamination
- storage requirements for a range of species and meat cuts
- features and purpose of a stock control sheet
- purpose of each item of data on invoices and delivery dockets

- relevant workplace health and safety and regulatory requirements
- limits of weight individuals are allowed to carry according to legislative and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal workplace conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR211 Provide advice on meal solutions in a meat retail outlet

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to create meat-based menu ideas for customers. It requires the ability to match meat recipes with complementary products, such as condiments and vegetables; create menu ideas appropriate to the season; cost the menu; and evaluate the success of the menu.

This unit is applicable to workers in meat retailing enterprises.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare range of meal ideas based on particular meat products	1.1 Seek advice from supervisor on product lines to be promoted. 1.2 Generated a range of meal ideas for the specified meat cuts and species, taking into account seasonality, festivals or local events.
2. Cost menus	2.1 Cost meal ideas for the consumer based on ingredient retail prices. 2.2 Calculate total meal costs. 2.3 Calculate average cost of meal per person.
3. Promote meal ideas	3.1 Write meal suggestions to provide information on complimentary products, cooking techniques and costs. 3.2 Hand write or type meal suggestions to customer and workplace requirements. 3.3 Use correct names for cuisines. 3.4 Write explanations on cuisines. 3.5 Use descriptive writing to promote the sale of meal ingredients items. 3.6 Promote meal ingredients sold in the meat retail outlet through effective display techniques.
4. Evaluate menu success.	4.1 Seek feedback from customers and other team members on meal success. 4.2 Seek feedback from supervisor on impact of meal promotion on sales of the meat product being promoted. 4.3 Improve meal suggestions based on customer and supervisor feedback.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR211 Provide advice on meal solutions in a meat retail outlet

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- Apply communication skills appropriate to the task
- apply mathematical skills for calculating costs of ingredients
- explain different methods of cooking, times of cooking, accompanying condiments and presentation of the cooked product
- write clear descriptions of products and meals
- provide accurate advice in a courteous manner to customers on the use of products and services
- explain cooking meat products as required
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- work with team members
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- menus or recipes, portion requirements, cooking
- products and services to suit customer needs
- enterprise ethical and customer service standards
- relevant workplace health and safety, regulatory and workplace requirements
- sources of information to further meet customer needs
- products and how they may be cooked and served
- seasonality of cooking methods, species and meat cuts and fresh produce

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions. Where the candidate does not interact with customers in their usual place of work, they must undertake alternative work placement or simulated work experience to meet the requirements of this unit.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace project
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR212 Clean meat retail work area

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed cleaning a meat retail area.

The candidate must

- read and interpret directions and safety instructions, including:
 - chemical labels
 - equipment manuals
 - safety data sheets (SDS)
- request advice or further information
- plan and organise work
- skills to work safely when:
 - handling and disposing of chemicals
 - identifying food contamination hazards and controlling risks
 - manual handling
 - selecting chemicals to suit surface type
- self-management skills to work alone and in a team
- follow workplace health and safety, regulatory and workplace policies and procedures
- clean a meat retail area to meet workplace health and safety, regulatory and workplace requirements
- dispose of waste according to enterprise, regulatory and environmental requirements

Knowledge Evidence

The candidate must demonstrate a basic, factual, technical and procedural knowledge of:

- cleaning and sanitation requirements of meat retail areas, including:
 - chemicals
 - cleaning methods
 - personal hygiene practices

- clothing and footwear requirements associated with working and moving in and between food-handling areas and non food-handling areas
- environmental protection procedures
- workplace health and safety procedures
- equipment and chemicals for use in meat retail areas
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning meat retail areas
- safe work practices for using:
 - chemicals
 - equipment, including PPE
- types of contamination and prevention methods
- waste collection, recycling and handling procedures
- workplace information on food-safety policies and procedures

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR301 Prepare specialised cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed preparing specialised cuts from a minimum of two species.

The candidate must:

- establish customer requirements by questioning, active listening and clarifying of customer comments where applicable
- seek advice from appropriate sources when developing new cuts
- select and weigh meats for a range of specialised cuts
- prepare specialised meat cuts to workplace health and safety and hygiene requirements
- identify sub-standard products and rectify as appropriate
- apply communication skills relevant to the task
- apply mathematical skills relevant to the task
- explain food safety, Quality Assurance (QA) and product quality requirements for specialised cuts
- apply relevant workplace health and safety and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- what specialised cuts are
- food safety, QA and product quality requirements for specialised cuts
- requirements for a range of specialised cuts according to workplace and customer requirements
- types of specialised cuts to meet customer requirements
- relevant workplace health and safety and regulatory requirements
- why meat retailers sell specialised cuts
- why customers request specialised cuts
- costing and pricing calculations

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Where the candidate does not prepare specialised cuts in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR304 Manage stock

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must demonstrate the ability to:

- Receive incoming stock
- follow equipment and material requirements
- follow workplace health and safety and hygiene requirements
- identify and minimise safety hazards
- use different types of weighing machines
- check and interpret electronic labels
- calibrate equipment
- complete documentation for weighing and receipt of goods
- perform stock control tasks
- identify and minimise safety hazards
- work with diverse individuals and groups
- apply relevant workplace health and safety and regulatory requirements
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- principles of the relevant health acts and regulatory requirements in relation to stock control
- ageing process and the shelf life of various products
- bacterial process in ageing and deterioration of meat
- differences in quality of carcasses
- differences in types of weighing machines
- features and purpose of the stock control sheet
- indications of meat contamination, and workplace procedures for handling contamination
- principles and procedures of stock rotation

- procedures for meat disposal
- purpose of each item of data on invoices and delivery dockets
- relevant workplace health and safety and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR305 Meet customer needs

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to identify customer needs. It also describes the use diverse sales techniques to satisfy these needs and promote enterprise products and services.

This unit is applicable to workers in meat retailing enterprises.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under broad supervision and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPR305 Meet customer needs

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must demonstrate the ability to:

- apply communication skills appropriate to the task
- apply mathematical skills appropriate to the task
- demonstrate a variety of sales techniques
- explain different methods of cooking, times of cooking, accompanying condiments and presentation of the cooked product
- provide accurate advice in a courteous manner to customers on the use of products and services
- provide advice on cooking meat products as required
- provide clear descriptions and advice to customers, demonstrating use of appropriate language and showing sensitivity to cultural differences
- suit advice to customer needs
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- handle information from external clients with discretion and confidentiality
- refer customers to a more experienced team member if unable to meet their needs
- demonstrate effective interpersonal skills in providing advice to customers and when handling complaints
- work with team members
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- catering needs, new lines, menus or recipes, portion requirements, cooking, carving and meat presentation
- products and services to suit customer needs
- methods of cooking, times of cooking, accompanying condiments and presentation of the cooked product

- enterprise ethical and customer service standards
- relevant workplace health and safety, regulatory and workplace requirements
- sources of information to further meet customer needs
- products and explain how they may be cooked and served

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions. Where the candidate does not interact with customers in their usual place of work, they must undertake alternative work placement or simulated work experience to meet the requirements of this unit.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply communication skills appropriate to the task
- explain cooking times and temperatures for roasting and microwaving meat to achieve rare, medium and well-done
- provide advice on the nutritional role of meat as appropriate
- follow up customer enquiries
- assist other staff to provide advice to customers when able
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- apply relevant workplace health and safety, regulatory and workplace requirements
- maintain currency of reference materials and information to give to customers
- refer customers to more experienced or knowledgeable staff member, when required
- relay information to customer

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- cooking times and temperatures for roasting and microwaving meat to achieve rare, medium and well-done
- cooking methods that will reduce fat
- dry cooking techniques
- major nutrients required for a healthy diet
- workplace customer service standards, complaints policy and procedures
- sources of information on new cooking techniques
- major nutrients found in meat
- meat cuts recommended by the National Heart Foundation

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Where the candidate is unable to interact with customers in their usual work environment, they must undertake alternative work placement or simulation to meet the requirements of the unit.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR307 Merchandise products, services

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- plan a display:
 - follow health and hygiene requirements
 - plan a cabinet layout
 - plan window displays
 - select products to be displayed
 - trim meat for display purposes
- portion products in display to increase sales of particular items
- weigh products accurately
- label products according to workplace and regulatory requirements
- mark prices on stock to match stock records
- demonstrate the effective and attractive laying out of a cabinet or window according to a pre-determined plan
- position displays to gain attention of customers
- demonstrate a range of merchandising strategies
- explain a range of advertising and seasonal promotions
- work with team members to carry out tasks
- evaluate effectiveness of display for selling products
- apply relevant workplace health and safety requirements
- use communication skills appropriate to the task
- use mathematical skills appropriate to the task

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- key positions to display products for maximum sales effect

- merchandising strategies
- methods of maintaining product quality of displays
- workplace policy for cabinet and window displays
- relevant workplace health and safety requirements

Assessment Conditions

Competency in this unit must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR311 Prepare portion control to specifications

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be able to demonstrate cutting, slicing and trimming techniques to workplace requirements and customer specifications for a minimum of two species.

The candidate must:

- select primal cuts for maximum yield and suitability to portion control specification
- demonstrate cutting, slicing and trimming techniques to workplace requirements and customer specifications for a minimum of two species
- demonstrate safe use of bandsaw, as required
- demonstrate sorting procedures to gain maximum yield
- explain and demonstrate hygiene standards and procedures for preparing portion control cuts
- explain and demonstrate QA standards and procedures for preparing portion control cuts
- slice portions evenly
- apply mathematical skills relevant to the task
- explain and demonstrate correct procedure for achieving and maintaining weights while cutting
- identify sub-standard product and rectify appropriately
- demonstrate the ability to listen actively and ask questions to confirm understanding when customers are explaining new cuts and/or specifications
- work with team members
- explain and demonstrate sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- apply workplace health and safety and regulatory requirements
- use communication skills relevant to the task

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct procedure for achieving and maintaining weights while cutting

- hygiene standards and procedures for preparing portion control cuts
- QA standards and procedures for preparing portion control cuts
- sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- pre-portioning processes
- criteria for selection of meat to suit specification
- hygiene requirements for preparation of cuts
- portion specification
- quality requirements for preparation of cuts
- relationship between primal cut size, dimensions, order specification and yield
- value of off-cuts
- workplace health and safety and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR312 Bone game meat

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- identify the main parts of the carcass
- demonstrate equipment used to bone carcass
- apply relevant regulatory requirements
- use communication skills appropriate to the task

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- different methods of boning
- equipment used to bone carcass
- relevant regulatory requirements
- main parts of the carcass

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment

- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR313 Order stock in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to order stock while working under the supervision of the store buyer in a meat enterprise.

This unit is applicable to workers in the retailing, processing and smallgoods sectors of the meat industry. Employees may be involved in the ordering of stock such as:

- cleaning materials
- food preparation requirements
- meat products
- packaging
- Personal Protective Equipment (PPE) supplies and safety equipment
- rendering materials.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Process order	1.1 Process or raise orders for stock as requested according to workplace requirements 1.2 Maintain ordering and recording system according to workplace requirements 1.3 Record and file orders and delivery requirements for retrieval according to workplace procedures
2. Follow up order	2.1 Monitor delivery process to meet agreed deadlines 2.2 Handle routine supply problems or refer to management as required by workplace requirements 2.3 Maintain continuous liaison with buyers and suppliers to ensure continuity of supply 2.4 Distribute stock according to workplace allocation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR313 Order stock in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply problem-solving skills where necessary
- work with team members and individually
- demonstrate communication and mathematical skills in regard to:
 - maintaining delivery and supply records
 - maintaining stock ordering and recording system
 - processing or raising stock orders
 - stock distribution records
- apply workplace requirements in regard to:
 - current and future stock levels
 - existing suppliers
 - quality control procedures and requirements
 - range of stock
 - workplace merchandising and marketing
- apply relevant workplace health and safety and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- workplace requirements in regard to:
 - current and future stock levels
 - existing suppliers
 - quality control procedures and requirements
 - range of stock
 - workplace merchandising and marketing

- relevant workplace health and safety and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR314 Calculate and present statistical data in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to calculate and present statistical information commonly used in meat enterprises.

Skills to calculate and present statistical data are used widely throughout the retail and smallgoods sectors of the meat industry, for example:

- calculating and presenting production statistics
- calculating consumption and replacement requirements of gloves, caps and other personal protective equipment
- calculating quantities
- preparing process control data and sheets

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Design and complete statistical tables and charts	1.1 Design frequency tables and charts to record and present statistical information 1.2 Analyse statistical tables and charts to provide a description and interpretation of their contents
2. Calculate measures of central tendency	2.1 Calculate measures of central tendency and use to explain the average of a set of data
3. Calculate measures of dispersion	3.1 Calculate measures of dispersion and use to explain the pattern of variation of data
4. Graph statistical data	4.1 Structure graphs to present meat processing data in a form suitable for analysis and interpretation 4.2 Interpret meat processing performance and trends from graphs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR314 Calculate and present statistical data in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- accurately calculate averages, average range and standard deviation
- consistently use estimation processes
- consistently use mathematical processes
- consistently use mathematical symbols and diagrams
- consistently prepare and interpret statistical charts and tables including frequency charts and tables.
- consistently prepare and interpret graphs
- apply relevant workplace health and safety, regulatory and workplace requirements
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- estimation processes
- mathematical processes
- mathematical symbols and diagrams
- purpose and structure of statistical charts and tables including frequency charts and tables
- purpose and structure of graphs
- purpose of calculating averages
- purpose of measuring the dispersion of values
- relevant workplace health and safety, regulatory and workplace requirements

Assessment Conditions

Competency must be demonstrated under typical operating conditions for the enterprise and within the parameters of the role and responsibilities.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR315 Utilise the Meat Standards Australia system to meet customer requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to utilise the Meats Standards Australia (MSA) system in order to improve demand for beef and sheep products and achieve an associated shift in price and volume.

Participants in the MSA program must be licensed to use the Trade Mark and Certified products.

This unit is suitable for people working in food services, boning rooms or meat retailing enterprises.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement the MSA system	1.1 Describe how and why MSA was developed 1.2 Identify factors that affect eating quality 1.3 Cut product for each approved cooking method
2. Describe the licensing requirements for an MSA end user	2.1 Use MSA Standards Manual 2.2 Identify accurate methods of MSA product identification 2.3 Interpret carton end panels and carcass cut and cook reports accurately 2.4 Describe the MSA customer complaint system
3. Explore value adding opportunities through eating quality principles	3.1 Identify primals and sub-primal cuts 3.2 Value-add primals by seaming into individual muscles 3.3 Prepare product according to MSA approved eating quality and cooking methods
4. Investigate potential profit opportunities through value adding techniques	4.1 Investigate variation in yield differences between preparing product traditionally versus value-adding 4.2 Investigate gross profit of preparing product traditionally versus value-adding 4.3 identify differences in portion sizes between traditionally prepared product and value-added product

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR315 Utilise the Meat Standards Australia system to meet customer requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- accurately identify MSA products
- apply value adding techniques to a range of beef or sheepmeat primal using MSA eating quality principles
- investigate gross profit percentages of selling sub-primal cuts versus traditionally sliced
- demonstrate active listening in relation to customer complaints
- complete an MSA customer complaint form and provide all necessary information
- apply relevant workplace health and safety, regulatory and workplace requirements
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- differences between the MSA beef and sheepmeat programs
- variables that impact on eating quality
- key elements of the MSA program
- relationship between cut and cooking method
- consumer taste test system on which MSA is based
- relevant workplace health and safety, regulatory and workplace requirements
- primals that have variable eating quality
- sources of information on the MSA program
- benefits of MSA
- MSA approved cooking methods and describe their preparation requirements
- value-added options using muscle seaming

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR316 Cure, corn and sell product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to cure, corn and sell various meat products.

This unit is suitable for all sectors of the meat industry. Smallgoods and value-adding establishments may prepare products for wholesale customers, meat retail establishments and retail customers.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out in accordance with workplace requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare, operate and clean processing equipment used for curing and corning product	1.1 Prepare processing equipment according to manufacturer specifications, and workplace health and safety, hygiene and workplace requirements 1.2 Operate processing equipment according to manufacturer specifications, workplace health and safety, hygiene and workplace requirements 1.3 Clean processing equipment according to manufacturer specifications, workplace health and safety, hygiene and workplace requirements
2. Prepare meat	2.1 Select meat according to product specifications 2.2 Prepare meat according to product specifications, and hygiene and workplace requirements
3. Prepare ingredients	3.1 Select and prepare ingredients according to product specifications, and hygiene and workplace requirements
4. Prepare brines	4.1 Add required amount of water and other liquid and solid additives in correct order and mix according to product specifications, and hygiene and workplace requirements 4.2 Prepare brine solutions according to product specifications, and hygiene and workplace requirements 4.3 Use hydrometer (salinometer) to check brine solution
5. Process meat	5.1 Cure or corn meat according to product specifications, health regulations and workplace requirements at a speed appropriate for production requirements 5.2 Regularly monitor processing 5.3 Make adjustments to processing as required to achieve product specifications
6. Store meat product	6.1 Store product on completion of processing, according to product specifications, and hygiene, regulatory and workplace requirements
7. Sell meat product	7.1 Provide information, including cooking, storage and serving suggestions, to customers on meat product 7.2 Promote product to customers

Assessment Requirements for AMPR316 Cure, corn and sell product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- activate processing equipment to assess its readiness for operational use
- follow recipes and procedures accurately
- explain the curing and corning processes for a variety of meat products
- mix curing ingredients for required length of time
- perform running adjustments according to workplace requirements and manufacturer specifications
- pump meat to increase original weight according to workplace requirements
- pump meat correctly to avoid air pockets
- demonstrate the correct pickling procedure, according to product specifications and workplace requirements
- perform curing and corning according to workplace, workplace health and safety, hygiene and regulatory requirements
- wash residue from cured meats following removal from holding brine
- identify sub-standard product and address the problem according to workplace requirements
- operate adjustment tools and equipment correctly
- seek advice from appropriate sources when working with new products or equipment
- report any faults and adjustments required to processing equipment, either verbally or in writing, according to workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer specifications
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the term 'osmosis' in relation to the curing process
- different salts, cures and brines used in the curing process
- conditions under which equipment may need adjusting
- function of various additives and ingredients
- purpose and effect of brine on meat
- safe and correct operation of processing equipment
- health regulations that apply to curing and corning meats
- curing and corning processes for a variety of meat products
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corning products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling to correct pump percentage and yield requirements
- selection criteria for meat for the curing or corning process
- relevant regulatory requirements
- meat cuts used in curing and corning
- various ingredients for curing meat and their use and purpose
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment

Assessment Conditions

Competency must be demonstrated over time under typical operating conditions.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Where the candidate does not cure or corn meat product in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR317 Assess and sell poultry products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- identify poultry cuts according to label on cartons as appropriate
- select cuts correctly by species and cut according to workplace requirements
- select poultry to customer and workplace requirements
- identify cuts correctly by species and cut, according to workplace specifications
- remove defects from products according to workplace, hygiene and regulatory requirements
- record and communicate outcomes of poultry product assessment according to workplace requirements
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements in relation to selling poultry

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- normal causes of contamination of poultry
- hygiene requirements specific to poultry (including salmonella risk)
- methods of assessing poultry according to specifications
- legislation regarding growth promotants in poultry
- workplace health and safety implications of the slippery and moist nature of poultry
- difference between growth promotants and antibiotics
- difference between organic, free range and conventional poultry products
- workplace, workplace health and safety, hygiene and sanitation requirements in relation to assessing poultry
- relevant regulatory requirements in relation to selling poultry

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal workplace conditions or in a simulated environment.

The following three forms of assessment must be used:

AMPR318 Break carcase for retail sale

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to break carcasses for retail sale.

This unit is applicable to meat tradespersons in the retail industry, who may be required to separate carcasses into primal cuts for further processing or preparation.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Assessment Requirements for AMPR318 Break carcass for retail sale

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Competency must be demonstrated over time and under typical operating conditions for the enterprise and must include:

- breaking carcass into primal cuts for a minimum of three species, including beef and sheep
- identifying primary cut specifications for at least three species, including beef and sheep

The candidate must:

- prepare equipment for breaking carcass correctly and safely
- position or fasten carcass securely for separation
- demonstrate the separation of carcass into primal cuts on a range of meat cuts for a minimum of three species including beef, sheep and one other species, according to workplace, workplace health and safety, and hygiene requirements and customer specifications
- use acceptable cutting lines to produce primary cuts to workplace requirements
- demonstrate safe manual-handling techniques
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- sanitise equipment according to workplace requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene, workplace health and safety and workplace requirements when breaking carcasses
- quality requirements for breaking carcasses
- principles of contamination in regard to primary cuts

- primary cut specifications for beef, sheep and one other species
- major anatomical structures of the carcass of each species
- relevant regulatory requirements

Assessment Conditions

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPR320 Assess and address customer preferences

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- undertake market research, including determining:
 - demographic make-up of local area
 - specific religious needs of local area, including halal or kosher meats
 - specific cuts of meat preferred by major local cultural groups
 - preferences for organic meats
 - preferences for value-added products or basic meat cuts
 - more sophisticated expectations of product including brands that promote good animal welfare practices, environmentally-friendly production and processing, Australian made and owned products
 - preferences for particular species, including game meat
 - prices they are prepared to pay for meat
 - what is sold by competitors
- use appropriate research methodology, including internet research, questionnaires, observations, conversations with customers, other local residents, local council data, suppliers or other industry members, existing market research data
- research suppliers and brands for product features and supply chain policies and practices
- seek advice from appropriate sources when introducing/investigating new product lines
- apply communication skills relevant to the task
- apply mathematical skills to determine economic viability of various product lines
- apply relevant workplace health and safety and regulatory requirements
- report findings and make recommendations based on market research and accurate cost/price/profit calculations to senior staff members
- provide sound information to customers about product lines, brands and supply chain, using appropriate language and showing sensitivity to cultural differences
- research and follow cutting specifications for non-standard meat cuts

- provide sound information to customers on link between specialised brands and product cost
- demonstrate effective interpersonal skills in providing advice to customers
- demonstrate awareness of cultural and ethnic differences and respond appropriately

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- requirements of whole of supply-chain practices required for a product to achieve brandings including RSPCA, free-range, organic, enviomeat and MSA
- range of species, including game
- difference between dry-aged and wet-aged meat
- requirements of whole of supply-chain practices required for a product to meet religious requirements including halal (for Muslim consumers) or kosher (for Jewish consumers)
- enterprise ethical and customer service standards
- relevant workplace health and safety requirements
- sources of information to further meet customer needs and expectations
- features of new and existing product lines
- mathematical formulas for determining product selling prices
- problem-solving techniques

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace project
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR321 Collect and prepare standard samples

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to collect and prepare standard samples.

This unit is applicable to workers in the meat industry who are required to collect samples for testing.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work must be carried out in accordance with workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPR321 Collect and prepare standard samples

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time. Sample collection techniques must comply with the relevant meat industry regulations and standards.

The candidate must:

- collect samples in accordance with workplace and regulatory requirements
- apply relevant workplace health and safety requirements
- use relevant communications skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- procedures for collecting, receiving, handling and storing specimens in accordance with laboratory procedures, universal precautions and legislative requirements
- use of aseptic techniques in collecting samples
- how sample collection has to be coordinated with workplace activities
- importance of obtaining representative samples and how this can be achieved
- procedures for documenting all pertinent sample information in the required format
- workplace Standard Operating Procedures (SOPs) for collecting and preparing samples
- relevant workplace health and safety requirements
- steps in preparing samples and sub-samples to comply with required procedures
- workplace procedures to recognise sampling equipment and, as required, maintain it in a sterile condition
- correct disposal procedures

Assessment Conditions

Sample collection techniques must comply with the relevant meat industry regulations and standards.

Assessment may be conducted in a real or simulated situation.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR322 Prepare and produce value added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare and produce more complex value added products, such as those employing pastry, dairy products or cooking. It includes preparing ingredients and following recipes. The operation of processing equipment to produce value-added products may also be required.

This unit is applicable to workers in meat retailing and food services enterprises.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and operate processing equipment used in producing value-added products	1.1 Prepared and operate processing equipment according to hygiene, and health and safety requirements 1.2 Identify faults in line with manufacturer and workplace requirements 1.3 Use equipment according to manufacturer, workplace and workplace health and safety requirements 1.4 Performed start-up and shut-down procedures according to manufacturer and workplace requirements
2. Clean processing equipment	2.1 Clean equipment to manufacturer's, workplace health and safety, hygiene and workplace requirements
3. Follow recipe	3.1 Follow recipes to prepare and produce value-added products to product specifications
4. Select ingredients for formulation of value-added products	4.1 Select ingredients in accordance with recipes, policy and practice, and regulatory requirements 4.2 Weigh ingredients in accordance with recipe specifications and regulatory requirements 4.3 Label ingredients according to workplace and regulatory requirements
5. Prepare meat, stuffings, seasonings and force meat for value-added products	5.1 Prepare meat according to recipes, policy and practice 5.2 Prepare stuffings, seasonings and force meat in accordance with recipes, policy and practice
6. Prepare pastry, marinades, sauces, and glazes for value-added product	6.1 Prepare pastry, marinades, sauces and glazes in accordance with recipes, policy and practice
7. Mix ingredients	7.1 Weigh ingredients in accordance with recipe requirements 7.2 Add ingredients to meat according to recipes, product specifications and regulatory requirements 7.3 Blend ingredients to achieve product consistency according to recipes and product specifications
8. Produce value-added products	8.1 Formulate product according to product specifications 8.2 Present product according to product specifications and policy and procedures

Element	Performance criteria
	8.3 Use pastry types according to recipes and workplace requirements 8.4 Skewer meat according to recipes and workplace requirements
9. Store products and ingredients	9.1 Store product according to workplace and regulatory requirements 9.2 Store ingredients according to workplace and regulatory requirements 9.3 Identify shelf life of products and take appropriate action 9.4 Identify effects of ingredients on shelf life and take appropriate action

Assessment Requirements for AMPR322 Prepare and produce value added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to produce value-added meat products from a minimum of three species, using pastry, fresh produce, dried herbs and spices and marinades.

The candidate must:

- make adjustments to equipment when necessary according to manufacturer's, workplace and workplace health and safety requirements
- describe shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- explain the permissible use of additives and ingredients in value-added products
- identify suitable alternatives from existing stock where quantities of required ingredients are not available, as applicable
- work with team members to develop new value-added products
- identify sub-standard product and rectify appropriately
- label value-added products according to workplace and regulatory requirements
- provide advice to customers on ingredients in value-added products
- seek advice on new recipes and products from appropriate sources
- use communication skills appropriate to the task
- use mathematical skills as required for production of value-added products
- estimate measures to verify calculations

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- range of effects on the product and on consumer health of the use of incorrect and inadequate quantities of ingredients
- properties of correct blending

- purpose and use of processing equipment in the preparation of value-added products
- use and purpose of stuffings, seasoning and force meat in producing value-added products
- use and purposes of ingredients in producing value-added products
- quality requirements related to production of value-added products
- effect of various ingredients on product shelf life
- procedures for cleaning processing equipment
- workplace health and safety and hygiene requirements related to producing value-added products

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Where the candidate does not produce value-added products in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR323 Break small stock carcasses for retail sale

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to demonstrate:

- breaking carcass into primal cuts for at least one small stock species
- identifying primary cut specifications for at least one small stock species
- using knife skills to enterprise speed and requirements

The candidate must:

- demonstrate safe manual-handling techniques
- breaking carcass into primal cuts for at least one small stock species
- identify primary cut specifications for at least one small stock species
- apply relevant communication skills
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene, workplace health and safety or workplace requirements when breaking carcasses
- quality requirements for breaking carcasses
- principles of contamination in regard to primary cuts
- primary cut specifications for appropriate species
- major anatomical structures of the carcass of appropriate species
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR325 Prepare cooked meat product for retail sale

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- trim and prepare meat product to be cooked to workplace requirements
- follow workplace health and safety, regulatory and hygiene and sanitation requirements for preparing meat
- follow workplace recipes and procedures for preparing meat to be cooked
- identify sub-standard or contaminated meat product during preparation
- take corrective action if sub-standard or contaminated product is identified
- identify the most appropriate cooking methods for meat products
- select appropriate cooking equipment
- calculate required weights and quantities
- follow recipes accurately
- apply hygiene and safety principles and procedures during the cooking process
- follow safe work practices, particularly in relation to bending, lifting and using cutting implements, appliances, heated surfaces and other equipment which carry a risk of burns
- seek advice from appropriate sources when working with new products/equipment
- report equipment faults, either verbally or in writing according to workplace requirements
- monitor and record temperature of product throughout the cooking process
- store meat product appropriately
- apply relevant workplace health and safety, regulatory and workplace requirements
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- workplace health and safety, and regulatory requirements for cooked meat products
- workplace procedures for cooking meat products
- temperature requirements for cooking meat products to meet regulatory and quality assurance requirements
- use and characteristics of a range of equipment used for the required methods of meat cookery
- regulatory requirements for the storage of cooked, ready to eat and cook and cool meat products
- storage life of cooked meat products
- effects of different ingredients on storage life of cooked meat products

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- verified work log or diary
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPS102 Pack smallgoods product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must hand-weigh, arrange and bag meat products in a meat processing establishment.

The candidate must:

- inspect and grade of a variety of products prior to packaging
- accurately weigh a variety of products
- package and arrange product into containers according to workplace requirements
- bag and seal product to workplace, hygiene and sanitation, and QA requirements
- inspect bagged product for defects and take appropriate action for defects
- apply relevant workplace health and safety requirements
- use communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- process for inspection and grading of meat prior to packaging and the action to be taken if meat is outside specifications
- procedures for packing products into containers for a variety of different products
- bagging requirements for a variety of products
- labelling requirements
- requirements for inspecting bagged products and the action to be taken if defects are found
- relevant workplace health and safety requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise. Assessment must occur in the workplace under normal operating conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS201 Package product using thermoform process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to package processed meat products using a thermoform process.

Operators in smallgoods manufacturing, value-adding and food services establishments may require this unit to package product and extend shelf life.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Assessment Requirements for AMPS201 Package product using thermoform process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must package processed meat products using a thermoform process.

Candidates must:

- identify where labels and other raw materials are stored
- demonstrate correct loading procedure at machine speed
- demonstrate correct loading procedure for labels
- change dates on the coders
- correctly load and unload films
- join films
- line up printed film
- identify flaws in packaging film
- demonstrate a full label change
- set machine to different product specifications
- perform a full changeover within the specified time
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- implement the hygiene procedures for the thermoforming machinery

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- relevant regulatory requirements
- how the thermoforming machine works
- reasons for changing the different settings
- temperature requirements and the importance of correct temperature
- hygiene requirements and their importance when changing between uncooked and cooked products
- need to adjust tracking and the procedure to make adjustment

- packaging specifications for a range of products for cartons, tubs and pouches
- principles of thermoforming
- use of oxygen absorbers if required under work instructions
- use-by date or packed-on date for a range of products and the importance of these dates
- which films are used for which products
- causes and corrective actions for re-packs
- thermoforming equipment and accessories

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS203 Operate bar and coder systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a bar and coder system.

This unit is suitable for operators, labourers, counter hands in all sectors of the meat industry where bar and coding systems are used to identify product and facilitate trace-back.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This Unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPS203 Operate bar and coder systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a bar and coder system.

The candidate must:

- use bar and coder system on a variety of products
- change dates on the coders
- use the correct procedures for manually entering new product details into the product coding system
- demonstrate the correct maintenance procedures for bar and coder system components
- identify the common causes of printing problems
- demonstrate the correct procedures for fixing common printing problems
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- functions performed by solvent and water in the printing process
- safety procedures for handling solvents
- start-up procedures for the coding system
- common causes of printing problems
- correct procedures for fixing common printing problems
- use-by date or packed-on date for a range of products and the importance of these dates
- components of the coding system and their maintenance requirements
- correct procedures for re-booting the computer system

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS205 Select, identify and prepare casings

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must select, identify and prepare casings.

The candidate must:

- identify casing size requirements according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify, remove and report defective product according to workplace procedures
- apply relevant communication and mathematics skills
- follow the requirements of the work instruction
- work to production speed

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- storage requirements of soaked casings carried over from production
- storage requirements of both natural and synthetic casings
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation
- possible faults in skins and their effect on the product
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS206 Manually shape and form product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manually shape and form products into a particular shape.

This unit is suitable for operators preparing boneless ham, bacon, salami, corned beef or any other product that is formed manually into a particular shape. Operators in smallgoods manufacturing and value-adding food services operations would use this unit.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select meat product	1.1 Select meat product to be placed in casing to product specifications, hygiene and sanitation, workplace and Quality Assurance (QA) requirements
2. Fill casings	2.1 Select appropriate casings and filling nozzle (where appropriate) according to workplace requirements and product specifications 2.2 Fill casings to consistency required by product specifications, hygiene and sanitation, workplace and QA requirements 2.3 Identify, remove and report defective product to workplace requirements
3. Operate metal detector	3.1 Operate metal detector (where appropriate) to workplace requirements and manufacturer's specifications
4. Form product	4.1 Shape and form product according to product specifications, workplace, hygiene and sanitation, QA and customer requirements 4.2 Shape and form a variety of products to production requirements
5. Link or twist, clip and net product	5.1 Link or twist product to meet product specifications 5.2 Perform clipping according to specifications 5.3 Form product according to specifications 5.4 Shape and net products (if required) according to product specifications 5.5 Remove defective products from production and report according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPS206 Manually shape and form product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manually shape and form products into a specified shape.

The candidate must:

- follow the requirements of the work instruction
- work to production speed
- correctly fill a range of product lines in terms of:
 - casing
 - clips
 - length
 - tension
 - weight
- shape and form a range of products to product specifications, workplace, hygiene and sanitation, QA and customer requirements
- demonstrate operation, adjustments and actions of filling machine to address faults
- operate a metal detector if a detector is included in the operation
- identify, remove and rectify faulty product
- identify defects in natural casings
- clean equipment according to workplace requirements
- apply relevant communication and mathematical skills
- explain filling to required product specifications for a variety of products
- apply relevant workplace health and safety, and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene requirements for forming products
- filling to required product specifications for a variety of products
- how and why products must be formed and shaped

- possible faults in skins and their effect on the product
- procedures for dealing with waste product and broken casings
- relevant workplace health and safety, and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise. Assessment must occur in the workplace under normal operating conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS207 Slice product using simple machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to set up, load, clean and operate manually set and adjusted slicing equipment in a smallgoods manufacturing establishment.

A skilled operator in a smallgoods establishment would slice meat to customer specifications. This unit is not applicable for operators of large-scale production slicing machinery.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Assessment Requirements for AMPS207 Slice product using simple machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must set up, load, clean and operate manually set and adjusted slicing equipment in a smallgoods manufacturing establishment.

The candidate must:

- follow the requirements of the work instruction
- work at production speed
- identify slicing equipment and accessories
- identify product and slicing faults in a range of products
- adjust weight control mechanisms if a part of work instructions
- demonstrate procedure for preparing slicing equipment for new product
- slice products to workplace requirements and customer specifications for a variety of products
- clean and maintain slicing equipment if required in work instructions
- observe safety requirements for cleaning slicing equipment if required in work instructions
- sharpen a slicing blade if a part of work instructions
- weigh and bag products with weight specifications
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- explain and demonstrate checks on products if a part of work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace procedures when metal is detected in a product
- how and why product is prepared for slicing
- how products are weighed and bagged when they have a weight specification
- how weight control mechanisms are adjusted

- illegal weights
- maximum and minimum allowable weights
- operating procedures for various types of slicing equipment
- importance of cutting blade maintenance in the slicing process
- procedure for sharpening a slicing blade if a part of work instructions
- procedures for handling faulty product
- procedures for reporting faults in slicing equipment
- safety considerations when setting up slicing equipment
- use-by and packed-on dates and their importance
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS210 Inspect carton meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform routine carton meat inspection prior to further processing.

The candidate must:

- meet the requirements of the work instruction
- use sample program, where applicable
- perform inspection according to workplace requirements for hygiene and safety
- report defects, where appropriate
- apply defect reporting procedures
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- take appropriate corrective action when defects are found
- apply relevant workplace health and safety policies and procedures
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- appropriate inspection procedures
- defect reporting procedures
- Standard Operating Procedures (SOPs) for personal hygiene
- likely defects to be encountered
- work instructions for carton inspection

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration
- workplace referee's observation of performance over time
- quiz, question and answer

Assessors must satisfy the current standards for RTOs.

AMPS211 Prepare dry ingredients

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to prepare dry ingredients in a smallgoods manufacturing establishment.

Operators require these skills and knowledge to prepare dry ingredients in preparation for further processing of meat and meat products.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element.
1. Select ingredients	1.1 Select ingredients a by type and quality according to product specifications 1.2 Select dry ingredients according to the formulation specification 1.3 Handle ingredients hygienically at all times to prevent contamination
2. Weigh and batch ingredients	2.1 Correctly calibrate scales for precise measurement 2.2 Place ingredients in specific containers for weighing 2.3 Weigh ingredients according to daily production requirements 2.4 Sort and weight ingredients into batch quantities according to recipes and product requirements 2.5 Mix spices according to recipe
3. Record usage	3.1 Store ingredients in a safe and hygienic manner 3.2 Accurately record usage of ingredients to workplace requirements 3.3 Reconcile usage of ingredients to production specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS217A Prepare dry ingredients.

Assessment Requirements for AMPS211 Prepare dry ingredients

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must prepare dry ingredients in a smallgoods manufacturing establishment.

The candidate must:

- follow the requirements of the work instruction
- work at production speed
- calibrate scales (where required)
- follow a recipe correctly
- select ingredients according to product specifications
- weigh ingredients to product specifications and daily production requirements
- record usage of ingredients to workplace requirements
- explain and demonstrate batching in accordance with food standards code
- apply mathematical skills appropriate to the task
- apply relevant workplace health and safety, workplace and regulatory requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- possible effects on product and on consumer health of using incorrect ingredients
- health and hygiene factors relating to the preparation of dry ingredients
- ingredient batches
- workplace health and safety requirements related to the preparation of dry ingredients
- relevant workplace and regulatory requirements
- various additives, spices, binders and ingredients and explain their functions in the product
- procedure for checking scale accuracy

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS212 Measure and calculate routine workplace data

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to calculate and record workplace measurements commonly used in the meat industry and includes the use of measuring instruments.

Skills to measure and calculate statistical data are used widely throughout the retail, smallgoods and processing sectors of the meat industry, for example:

- measuring and calculating production statistics
- recording production statistics
- calculating consumption and replacement requirements of gloves, caps and other safety equipment
- estimating or measuring quantities of ingredients

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Use routine measuring instruments	1.1 Select and use measuring instruments a to measure common workplace units 1.2 Identify and report faults with measuring instruments according to standard procedures
2. Calculate routine workplace measures	2.1 Use basic mathematical processes to calculate routine workplace measures of product characteristics 2.2 Verify calculations by using estimating techniques
3. Calculate performance measures	3.1 Calculate percentages, ratios and proportions to derive information about workplace requirements and performance 3.2 Identify and measure deviations in performance to determine the extent of variations
4. Record routine workplace data	4.1 Record results on standard graphs or charts 4.2 Identify and rectify errors in recording information on charts 4.3 Interpret graphs or charts to identify trends and variations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS218B Measure and calculate routine workplace data.

Assessment Requirements for AMPS212 Measure and calculate routine workplace data

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must calculate and record workplace measurements commonly used in the meat industry.

The candidate must:

- select, operate and explain the purpose of measuring instruments
- identify routine faults in measuring instruments
- use and apply the principles and units of measurement
- achieve consistent levels of accuracy
- interpret mathematical symbols and diagrams
- explain the purpose of graphs or charts
- source and apply new ideas and techniques to address unfamiliar situations or resolve problems
- explain the relationship between different measurement scales
- apply relevant workplace health and safety, workplace and regulatory requirements whenever undertaking numeracy tasks in a meat industry environment
- present mathematical data for use in the workplace
- use estimation processes
- use numeracy skills and mathematical concepts to solve workplace problems
- verify calculations

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- purpose of graphs or charts
- relationship between different measurement scales
- relevant workplace health and safety, workplace and regulatory requirements
- principles and units of measurement

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Three different forms of assessment must be used. This must include:

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS213 Manually link and tie product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manually link and tie meat products.

The candidate must:

- follow the requirements of the work instruction
- work at production speed
- link and tie product to workplace, health and safety, and hygiene requirements
- handle knives safely and effectively (as required)
- identify, remove and report defective products to workplace requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- rationale for linking, tying and hanging products
- workplace requirements for dealing with waste products and broken casings
- applicable regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration

- workplace referee's observation of performance over time
- quiz, question and answer

Assessors must satisfy the current standards for RTOs.

AMPS300 Operate mixer or blender unit

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to deal with specialist processing technologies to comminute meat and ingredients for further processing in a meat establishment.

A skilled operator in a smallgoods establishment may have responsibility for comminution of products such as devon, bloodwurst, salamis and berlinas.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Set up specialist cutting equipment	1.1 Check blades for sharpness and correct sequence in accordance with workplace, and workplace health and safety requirements 1.2 Take corrective action as necessary 1.3 Wash down and sanitise equipment according to hygiene and workplace requirements 1.4 Load ingredients according to product specifications and workplace health and safety requirements
2. Operate specialist cutting equipment	2.1 Check ingredients to ensure conformity to product and customer specifications 2.2 Program equipment to product specification and workplace health and safety requirements 2.3 Load ingredients in a specified regime for the style of the product 2.4 Process product according to product and manufacturer's specifications, and workplace health and safety requirements 2.5 Operate silent or bowl cutter to produce a variety of specified products to meat production requirements 2.6 Judge timing of the process for correct texture according to product specifications 2.7 Control temperature to product specifications, and hygiene and sanitation requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS300B Operate mixer, blender unit.

Assessment Requirements for AMPS300 Operate mixer or blender unit

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must use specialist processing technologies to comminute meat and ingredients for further processing in a meat establishment.

The candidate must:

- follow the requirements of the work instruction
- work at production speed
- identify various additives, spices and binders
- calculate quantities and weights in order to meet product specifications
- operate bowl cutter to produce a variety of products to:
 - workplace requirements
 - workplace health and safety requirements
 - hygiene and sanitation requirements
 - product specifications
 - production requirements
- demonstrate the difference in cutting techniques between raw meat emulsions and pre-cooked meat emulsions
- identify any unhygienic meat ingredients
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- health and hygiene factors related to operating a bowl cutter
- corrective action to be taken in situations such as:
 - incorrect loading of ingredients
 - machinery malfunction
 - temperature malfunction

- unhygienic meat ingredients
- common tests for blade sharpness such as:
 - no feathered edges
 - cutting paper without tearing
 - checking for ragged edges
- appropriate quantities of water or ice to ensure temperature is maintained according to product specifications
- consequences of loading ingredients in the incorrect order including:
 - fat separation caused by over-heating
 - red colour after cooking
 - temperature control
- health and hygiene factors related to operating a bowl cutter
- importance of protein extraction
- effects on product and on health and safety of incorrectly placing product in equipment
- effect of meat temperature when cutting meat for salami
- effect on product of the temperature of the cutting equipment
- importance of blade sharpness for the cutting process and the consequences of blunt blades
- purpose of the following additives:
 - anti-oxidant
 - curing ingredients
 - phosphate
 - salt
 - water
- difference in cutting techniques between raw meat emulsions and pre-cooked meat emulsions
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS301 Cook, steam and cool product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to prepare products with the application of heat treatment in a meat establishment.

A skilled operator would require this unit to prepare cooked and steamed products including trimmed meats, ready to cut meats, frankfurters and hams.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Place product in cooking or steaming facility	1.1 Identify individual product and place correctly in cooking or steaming facility for even cooking or steaming 1.2 Space product in cooking facility according to product and manufacturer's specifications
2. Cook or steam product	2.1 Determine correct cooking or steaming procedure 2.2 Set and maintain cooking or steaming cycle according to specifications and workplace requirements 2.3 Regularly monitor cooking or steaming process and adjust as necessary to fulfil product specifications 2.4 Check internal temperature of product on completion of cooking or steaming cycle to ensure correct process has been achieved 2.5 Cook or steam a variety of products to workplace requirements and customer specifications at a speed similar to production requirements 2.6 Correctly record process and results of cooking or steaming 2.7 Dye product to achieve a uniform colour when required by product specifications
3. Chill or cool product	3.1 Weigh product immediately on completion of cooking or steaming cycle 3.2 Chill product immediately or cool at ambient temperature before chilling according to product specifications 3.3 Identify and store product according to product specifications and workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS301B Cook, steam and cool product.

Assessment Requirements for AMPS301 Cook, steam and cool product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently cook, steam and cool product to workplace requirements in the workplace.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- cook or steam of a variety of products to product specifications, to workplace, customer, Quality Assurance (QA) and hygiene and sanitation requirements
- identify the cause and effects of, and explain the appropriate action for:
 - cycle out of sequence
 - drops during cooking
 - excess cooking or steaming
 - excess humidity
 - insufficient cooking or steaming
 - low humidity
- operate cooking or steaming facility in a safe and hygienic manner
- demonstrate storage procedures
- apply relevant communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct cooking or steaming procedure for specific products
- procedure followed to measure product internal temperatures correctly
- chilling or cooling requirements for different products
- dye addition procedures for a given range of products

- effect of incorrect chilling on yield
- effects of incorrect spacing or placement of product for cooking or steaming
- recording requirements for the cooking or steaming process
- relevant workplace health and safety, and regulatory requirements
- cause and effects of
 - cycle out of sequence
 - drops during cooking
 - excess cooking or steaming
 - excess humidity
 - insufficient cooking or steaming
 - low humidity

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS302 Prepare dried meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to select and dry meat cuts for the production of dried meat products.

This unit is applicable to workers producing products such as jerky, biltong and dried pet treats (e.g. pigs' ears).

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and prepare meat for drying	1.1 Select meats cuts for drying according to workplace specifications 1.2 Inspect meat for defects 1.3 Identify defects and take corrective action according to workplace requirements 1.4 Prepare and store meat prior to processing according to workplace requirements
2. Dry meat products	2.1 Perform pre-operational checks on drier according to workplace requirements 2.2 Load drier according to workplace requirements, including hygiene and sanitation, and workplace health and safety requirements 2.3 Operate drier according to workplace requirements, including observing time and temperature specifications 2.4 Maintain records according to workplace requirements 2.5 Empty drier according to workplace requirements
3. Inspect and store dried meat	3.1 Inspect dried product according to workplace requirements 3.2 Store dried product prior to packing according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPS302 Prepare dried meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare at least two different types of dried meat to workplace requirements.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- select and prepare meat for drying
- identify defects and take appropriate corrective action
- identify contamination
- dry a minimum of three different types of meat products according to workplace requirements
- inspect and store dried meat products according to workplace requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sources and causes of contamination
- ways of preventing contamination
- workplace health and safety hazards associated with operating a drier
- workplace specifications for meat to be dried
- drying processes for at least three different kinds of dried meat products
- relevant regulatory requirements
- time and temperature requirements for the variety of products produced

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS303 Fill casings

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently fill casings to workplace requirements.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- identify casing size requirement according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify possible faults in natural and synthetic casings
- correctly fill a range of product lines in terms of:
 - casing
 - clips
 - length
 - tension
 - weight
- perform filling to required product specifications
- identify over-filled and under-filled products
- identify, remove and report defective product according to workplace procedures
- match clip size to casing
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- describe storage requirements of soaked casings carried over from production
- explain storage requirements of both natural and synthetic casings

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- procedures followed to set up filling machine to correct specifications

- appropriate corrective action for:
 - casing breakages and bent nozzles
 - jammed clips or loops
 - poorly-printed casings
- storage requirements of soaked casings carried over from production
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation
- possible faults in skins and explain their effect on the product
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS304 Thaw product - water

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently carry out the thawing process according to workplace and regulatory requirements.

Candidates must:

- follow the requirements of the work instruction
- work to production speed
- check and prepare tanks for thawing
- identify contaminated product prior to thawing and take corrective action according to workplace requirements
- thaw product according to workplace and regulatory requirements
- maintain control of the flow of product through thawing and dispatch to further processing
- follow workplace health and safety and hygiene requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sources of contamination and cross-contamination
- ways of minimising contamination
- regulations dealing with thawing of product
- workplace requirements for thawing product including:
 - workplace health and safety requirements.
 - Standard Operating Procedures (SOPs)
- principles of stock rotation

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS305 Thaw product - air

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to thaw product using air for further processing or re-working.

This unit is applicable to workers in smallgoods plants who have to thaw frozen product using air prior to further processing. It may also be applicable in boning rooms where carton product fails Quality Assurance (QA) requirements and has to be re-worked.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Thaw product in air	1.1 Select product to be thawed and move to thawing chillers according to workplace requirements 1.2 Check chillers according to workplace requirements 1.3 Thaw product according to work instructions and regulatory requirements 1.4 Complete product monitoring and recording according to workplace requirements 1.5 Undertake thawing in accordance with workplace health and safety requirements 1.6 Identify and minimise potential sources of contamination and cross-contamination
2. Store and despatch thawed product	2.1 Store and rotate thawed product according to workplace and regulatory requirements 2.2 Maintain product segregation as required 2.3 Keep records according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS305B Thaw product – air.

Assessment Requirements for AMPS305 Thaw product - air

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently thaw product according to workplace and regulatory requirements.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- check and prepare chillers for thawing
- thaw product according to workplace and regulatory requirements
- maintain control of the flow of product through thawing and despatch to further processing
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- keep records to workplace requirements
- follow workplace hygiene and workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sources of contamination and cross-contamination
- ways of minimising contamination
- regulations dealing with the thawing of product
- workplace requirements for thawing product including:
 - workplace health and safety
 - Standard Operating Procedures (SOPs)
- principles of stock rotation
- work instructions

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS307 Sort meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to select and sort meat products to specification in a meat establishment.

A skilled operator in a smallgoods establishment would sort meat prior to batching and further processing.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Sort products	1.1 Correctly select products by specification according to customer and workplace requirements 1.2 Identify and deal with contaminated products according to workplace and hygiene requirements 1.3 Sort products by specification according to workplace requirements
2. Classify products	1.1 Accurately measure products to specification according to workplace requirements 1.2 Describe products to specification according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS307A Sort meat.

Assessment Requirements for AMPS307 Sort meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must select and sort meat products to specification in a meat establishment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- identify a range of meat cuts related to sorting meat
- consistently sort and classify meat products to:
 - customer requirements
 - hygiene and sanitation requirements
 - quality requirements
 - workplace health and safety requirements
 - workplace requirements
- explain and demonstrate methods of accurately measuring and describing products to specification
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene requirements for sorting meat
- likely contaminants
- regulatory requirements
- workplace requirements for sorting meat

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS308 Batch meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to batch meat products to specification in a meat establishment.

A skilled smallgoods operator would batch meat already sorted to specification, in readiness for further processing.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select sorted meat	1.1 Select sorted meat by type according to product and customer specifications 1.2 Select sorted meat according to workplace health and safety and hygiene and sanitation requirements 1.3 Select correct meat, by-product and stock according to the formulation specification and workplace requirements
2. Prepare batched meat	2.1 Calibrate scales in accordance with product specifications and workplace requirements 2.2 Place meat in appropriate containers and weigh according to production specifications 2.3 Batch meat according to workplace hygiene requirements
3. Record usage of meat	3.1 Store meat in accordance with workplace, health and safety, and hygiene and sanitation requirements 3.2 Record usage of meat in accordance with workplace and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS308A Batch meat.

Assessment Requirements for AMPS308 Batch meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must batch meat products to specification in a meat establishment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- prepare equipment and work area prior to batching meat
- calibrate scales correctly
- follow a recipe correctly
- batch product to specifications at a speed similar to the speed of production
- demonstrate accurate record keeping practices for meat usage
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, workplace and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- batching requirements for the workplace
- consequences of using incorrect meat for both the product and the consumer
- hygiene and sanitation factors associated with the selection of meat
- relevant workplace health and safety, workplace and regulatory requirements
- critical information within the Australia New Zealand Food Standards Code relevant to immediate work environment

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS309 Operate product forming machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to operate and control a production line using product-forming machinery.

This unit is applicable to smallgoods manufacturing operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Set up product forming equipment	1.1 Set up all processing equipment according to production requirements 1.2 Use appropriate Personal and Protective Equipment (PPE) as provided 1.3 Conduct routine pre-start checks prior to commencement of operation 1.4 Ensure required product materials are in place
2. Operate product forming machinery	2.1 Use product forming machinery is used according to workplace requirements 2.2 Take appropriate remedial action to correct any faults in process or product 2.3 Monitor process to confirm that specifications are met, and variations in operating conditions are addressed 2.4 Meet daily production schedule 2.5 Maintain workplace records according to workplace recording requirements
3. Ensure smooth operation of process	3.1 Identify potential dangers from hazards and ensure actions taken reflect the required precautions 3.2 Communicate clearly and accurately with team members 3.3 Promptly, clearly and accurately report faults and variances outside the job holder's area of responsibility to an appropriate authority 3.4 Encourage and support team members to work as an effective team 3.5 Follow safe working procedures at all times
4. Shut-down the process	4.1 Identify appropriate shut-down procedure 4.2 Shut-down process according to workplace procedures 4.3 Promptly, clearly and accurately report faults and variances outside area of responsibility to an appropriate authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMS309B Operate product forming machinery.

Assessment Requirements for AMPS309 Operate product forming machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must operate and control a production line using product-forming machinery.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- set up processing equipment to workplace requirements
- operate machinery to ensure that product consistently meets required specifications
- take appropriate corrective action as required
- follow production documentation requirements and procedures
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- observe relevant Quality Assurance (QA) and inspection procedures and systems
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- relevant QA and inspection procedures and systems
- materials and equipment specifications
- Standard Operating Procedures (SOPs)
- food safety and Hazard Analysis Critical Control Points HAACP requirements
- precautions necessary to ensure safety
- how output is maximised while still meeting quality and safety requirements
- limits of authority
- tolerance allowable in the quality system and when action should be taken
- production documentation requirements and procedure
- relevant workplace health and safety, regulatory and workplace requirements
- potential dangers in specific plant and equipment

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
