AMPP302 Debone and fillet poultry product (manually)

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Industry Training Package Version 4.0.
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to manually debone and fillet poultry within a poultry production environment.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of manual deboning and filleting equipment and processes in a poultry production environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety, and environmental codes, regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Poultry Processing (P)

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the deboning	1.1 Confirm washed and chilled carcases or pieces are available

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance criteria
and filleting equipment and process for operation	1.2 Clean and set equipment components to meet requirements 1.3 Identify and fit personal protective clothing and equipment as required by workplace safety procedures 1.4 Check and adjust equipment performance to meet the process requirements 1.5 Conduct pre-start checks according to workplace procedures
2. Operate deboning and filleting process	2.1 Deliver carcases or pieces to the boning area according to process requirements 2.2 Inspect carcases or pieces to confirm quality specifications 2.3 Remove bones and prepare fillets to specification 2.4 Identify variation in equipment operation and rectify or report variation according to workplace requirements 2.5 Identify, rectify or report out-of-specification product or process outcomes according to workplace procedures 2.6 Clean equipment and maintain the work area according to workplace sanitation and hygiene procedures 2.7 Maintain workplace records in required format
3. Shut down the deboning/filleting process	3.1 Identify and implement the appropriate shutdown procedure 3.2 Identify and report maintenance requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret directions for the safe operation of manual deboning and filleting equipment
Writing	• Complete records according to workplace guidelines
Numeracy	• Monitor supply and flow of carcases and pieces to the manual deboning and filleting process
Navigate the world of work	• Apply workplace procedures relevant to own role and responsibilities • Understand main tasks, responsibilities and boundaries of own

© Commonwealth of Australia, 2025 Skills Insight

	role, including use of personal protective clothing and equipment, housekeeping standards and environmental care requirements
Interact with others	• Use appropriate vocabulary, including technical language directly relevant to role • Report manual deboning process performance using required communication method
Get the work done	• Identify and address routine problems according to workplace guidelines

Assessment Requirements for AMPP302 Debone and fillet poultry product (manually)

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Industry Training Package Version 4.0.
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated all steps of the manual deboning and filleting process at least once, including:

- selecting, fitting and using appropriate personal protective equipment
- conducting pre-start checks on equipment used for deboning
- assessing carcase or pieces to ensure quality
- manually deboning and filleting poultry
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identifying work health and safety hazards and controls
- cleaning deboning equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of the deboning and filleting process, including the skeletal structure of poultry products and the effect of this process on portion control and yield
- the flow of the deboning and filleting process and the effect of outputs on downstream processes
- quality characteristics to be achieved for the different types of cuts required, including the consequences of failing to remove bones and preparing fillets to specification
- quality requirements of carcases and pieces suitable for processing and effect of variation on process performance

© Commonwealth of Australia, 2025 Skills Insight

- knife techniques and handling, sharpening, cleaning and storage procedures
- basic operating principles of equipment components used in the deboning and filleting process
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- contamination and food safety risks associated with the deboning and filleting process and related control measures
- work health and safety hazards and controls, including safety related to use of knives
- procedures and responsibility for recording and reporting production and performance information
- environmental issues and controls relevant to the deboning and filleting process, including waste collection and handling procedures related to the process
- workplace maintenance, cleaning and sanitation procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - deboning and filleting equipment and services
  - carcases and pieces to be filleted
  - cleaning equipment and materials
  - workplace information recording system
- specifications:
  - work procedures, including advice on safe work practices, food safety, cleaning, quality and environmental requirements
  - information on equipment capacity, processing and operating parameters
  - production schedule/batch instructions
  - sampling schedules and test procedures
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AMPR101 Identify species and meat cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to identify species and meat cuts.

This unit is applicable to boning rooms, smallgoods manufacturing and meat retail operations.

All training must be conducted according to Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Meat retailing

Assessment Requirements for AMPR101 Identify species and meat cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to select and identify primal and secondary cuts correctly by species and cut for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing.

The candidate must demonstrate ability to:

- identify meat cuts according to label on cartons (as appropriate)
- apply relevant regulatory requirements
- select and handle products according to workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of (for a minimum of three species for meat retailing and at least one species for smallgoods manufacturing):

- primal cuts used for different cuts of meat
- principles of product selection by species, primal and cut type
- relevant regulatory requirements
- appropriate sources of information on new species or cuts
- different species and categories of meat and meat cuts

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

The following three forms of assessment must be used

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third party report of performance over time

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy current standards for RTOs.

AMPR102 Trim meat for further processing

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to use a knife for trimming lesser-valued cuts of meat.

The trim is usually performed prior to further processing such as mincing and sausage-making.

This unit is applicable to workers in boning rooms, smallgoods manufacturing and meat retail operations.

All training must be conducted according to Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPR102 Trim meat for further processing

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must trim a variety of lesser-valued cuts of meat to workplace specifications.

The candidate must:

- demonstrate effective use of a knife to workplace health and safety, and hygiene requirements
- give examples of workplace specifications for trimming meat
- apply relevant regulatory and workplace requirements
- seek further advice from supervisor when uncertain about work instructions
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- hygiene and safety requirements for use of a knife
- steps in checking and preparing a knife
- workplace requirements for use of a knife
- relevant regulatory and workplace requirements
- hygiene requirements for the handling of meat products
-

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Assessment Requirements for AMPR103 Store meat product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must demonstrate the ability to:

- demonstrate storage techniques which minimise risk of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products
- monitor refrigerated temperature on a regular basis
- recognise and interpret codes, date tags and labels
- identify and report unacceptable temperatures either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products
- use correct manual handling techniques for transferring product to storage facilities
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- storage techniques which minimise risks of cross-contamination from drips from upper shelves to products on lower shelves, bottoms of cartons, or tubs stacked on top of other cartons, tubs or other products
- appropriate storage facilities for individual products
- recommended refrigerated temperature for each product stored
- regulatory requirements related to storing meat products
- species and various meat products for storage

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment Requirements for AMPR104 Prepare minced meat and minced meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed preparing minced meat and minced meat products in accordance with regulatory requirements. Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- activate mincing equipment to assess its readiness for operational use
- identify different species and categories of meat
- start-up and shut-down equipment when necessary according to manufacturer, workplace and health and safety, requirements
- operate a mincer to manufacturer, workplace health and safety, and hygiene and sanitation requirements
- tighten front plate on mincer as required
- operate adjustment tools and equipment correctly
- interpret time and temperature measuring equipment
- accurately copy and record temperature, weights and time, according to workplace requirements
- clean mincer between species to avoid cross-contamination
- use tools and cleaning agents appropriate to the cleaning activity or manufacturer's specifications
- report faults and adjustments required either verbally or in writing according to workplace requirements
- list minced meat products
- seek advice from appropriate sources when working with new products
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- conditions under which equipment may need adjusting
- fat content using chemical lean measures or visual lean estimation
- the purpose and use of processing equipment used in making minced meat products
- temperature requirements for product
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- procedure for cleaning equipment

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace or in a simulated environment under normal operating conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge

Assessment Requirements for AMPR107 Undertake minor routine maintenance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed carrying out minor, routine preventative workplace maintenance. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- access workplace information to identify routine maintenance requirements
- clean preventative maintenance tools and equipment
- prepare equipment and work area to conduct preventative maintenance
- select, fit and use personal protective clothing and/or equipment
- ensure appropriate supplies prior to commencement of task
- seek advice from other team members or manuals prior to working with new equipment
- consistently apply isolation procedures
- address common problems in conducting routine preventative maintenance
- demonstrate purpose and use of common hand and power tools used in routine preventative maintenance
- locate and refer to workplace information including lubrication schedules
- identify faults in routine preventative maintenance
- identify relevant plant and equipment
- observe food safety factors for maintenance and servicing
- rectify or report faulty maintenance
- report or record maintenance information as required
- apply relevant regulatory and workplace requirements
- follow relevant workplace health and safety requirements
- observe roles of and relationships with others involved in carrying out maintenance functions
- maintain work area to meet housekeeping standards
- use communication skills relevant to enterprise requirements

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- the purpose and use of common hand and power tools for routine preventative maintenance
- the purpose of routine preventative maintenance
- isolation procedures
- food safety factors for maintenance and servicing
- environmental issues and controls related to routine preventative maintenance
- links between routine preventative maintenance and other enterprise objectives
- relevant regulatory and workplace requirements
- relevant workplace health and safety requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- workplace project
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR108 Monitor meat temperature from receival to sale

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to monitor temperatures of meat products from the receival area to the display cabinet in a meat retail outlet.

The unit is applicable to workers in meat retail operations.

All training must be conducted according to Australian meat industry standards and regulations.

All work must be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPR108 Monitor meat temperature from receival to sale

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- measure temperature of meat products and storage areas, including receival area, cool room and display cabinets
- monitor refrigerated temperatures on a regular basis
- advise customers of suitable storage temperatures of meat product
- apply workplace health and safety requirements for working in refrigerated areas
- seek advice from appropriate sources when working with new products
- explain effect of incorrect storage temperatures on meat products
- use relevant communication skills
- use mathematical skills relevant to the task
- work effectively individually or as part of a team

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- suitable temperature range for meat products stored in warehouse chillers, transportation, cool rooms and display cabinets
- effects of incorrect storage temperatures on meat products
- recommended refrigerated temperature for products stored
- regulatory requirements related to storing meat products
- workplace health and safety requirements for working in refrigerated areas

Assessment Conditions

Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.

© Commonwealth of Australia, 2025 Skills Insight

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR201 Break and cut product using a bandsaw

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to break and cut products using a bandsaw.

This unit is applicable to workers in meat processing plants, smallgoods factories, boning rooms, food services operations, knackeries, game processing plants, wholesale and retail operations.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out according to workplace and hygiene requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX201 Prepare and operate bandsaw

© Commonwealth of Australia, 2025 Skills Insight

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Break carcase into specified cuts using a bandsaw	1.1 Follow cutting lines for breaking of product according to workplace health and safety, hygiene, Quality Assurance (QA), and workplace requirements 1.2 Cut carcase into standard primal cuts according to workplace, workplace health and safety, hygiene and QA requirements
2. Cut product using a bandsaw	2.1 Cut product according to workplace, workplace health and safety, and hygiene and sanitation requirements
3. Hang and store product	3.1 Hang product according to workplace requirements 3.2 Store product according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR201 Break and cut product using a bandsaw

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- assemble and operate a bandsaw to manufacturer's, workplace and workplace health and safety requirements
- complete a safety check on the bandsaw
- ensure the safety of team members while working with a bandsaw
- report equipment faults, either verbally or in writing, according to workplace requirements
- use hanging and hooking techniques according to workplace health and safety, hygiene and sanitation, QA and workplace requirements
- store and rotate meat product according to workplace requirements
- seek advice from appropriate resources before using bandsaw on new products
- work effectively individually or as part of a team
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- primal cuts of carcase
- principles of storage and rotation of product according to workplace and regulatory requirements
- cutting lines for breaking carcase according to specifications
- safety procedures related to use of bandsaw

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

Where the candidate cannot use a bandsaw in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR202 Provide advice on cooking and storage of meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- acknowledge customer's presence
- greet customer
- establish customer needs by enquiry, listening and summarising
- be aware of cultural and ethnic differences and respond accordingly
- attend to customer needs promptly and courteously, displaying tact, satisfying customer needs ethically and maintaining professional standards of dress and personal hygiene
- explain cooking times and temperatures for roasting and microwaving meat to achieve rare, medium or well done results
- provide advice on cooking methods, times, temperatures, and efficiently and courteously meet customer needs
- relay information to customer
- acknowledge complaints
- demonstrate polite and efficient telephone technique (if required)
- follow up customer enquiries
- refer customer to more experienced staff if necessary, listen and learn from colleagues
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- operate telephone system, if required
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- effects of each cooking technique on tenderness of meat

© Commonwealth of Australia, 2025 Skills Insight

- flavours which enhance various cuts and how to achieve the flavours
- how to interact with others in an appropriate way when providing advice
- moist cooking, dry cooking and microwave cooking techniques
- serving suggestions including suitable accompaniments
- properties and effects of animal fats in cooking
- which cuts are suitable for dry cooking techniques including roasting, grilling and stir-frying
- which cuts are suitable for microwave cooking techniques
- which cuts are suitable for moist cooking techniques including casseroling and stewing
- cooking times and temperatures for roasting and microwaving meat to achieve rare, medium or well done results
- storage times, temperatures and shelf life of fresh and cooked meat products
- workplace complaints policies and procedures
- relevant workplace health and safety, regulatory and workplace requirements
- sources of information on new cooking techniques

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR205 Use basic methods of meat cookery

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to cook meat dishes using all the following cooking methods:

- boiling or simmering
- stewing
- braising
- roasting
- grilling
- shallow frying

The candidate must:

- identify the most appropriate cooking methods for a range of cuts of meat
- select appropriate cooking equipment
- follow recipes accurately
- apply hygiene and safety principles and procedures during the cooking process
- follow safe work practices, particularly in relation to bending, lifting and using cutting implements, appliances, heated surfaces and other equipment which carry a risk of burns
- seek advice from appropriate sources when working with new products/equipment
- report equipment faults, either verbally or in writing according to workplace requirements
- explain logical and time-efficient workflow
- apply relevant workplace health and safety, regulatory and workplace requirements
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must be able to demonstrate a basic factual, technical and procedural knowledge of:

- the effects of different cookery methods on the nutritional value of food
- underlying principles of all basic methods of meat cookery

© Commonwealth of Australia, 2025 Skills Insight

- waste minimisation techniques and environmental considerations in relation to different cookery methods
- logical and time-efficient workflow
- use and characteristics of a range of equipment used for the required methods of meat cookery
- relevant workplace health and safety, regulatory and workplace requirements
- major food groups, culinary terminology and equipment as they relate to the required methods of meat cookery

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- assignments
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR206 Vacuum pack products in a retail operation

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 1.0.

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- prepare for vacuum packaging according to workplace health and safety and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- explain defects that can occur during packaging
- identify sub-standard or contaminated product
- clean equipment according to hygiene requirements
- work with team members
- apply relevant regulatory and workplace requirements
- report equipment faults, either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace procedures for dealing with sub-standard or contaminated products
- defects that can occur during packaging
- packaging requirements
- specific workplace health and safety requirements for vacuum packing
- the purpose of vacuum packaging
- general machine operating principles, including start-up and shut-down procedures

© Commonwealth of Australia, 2025 Skills Insight

- manufacturer and workplace requirements for vacuum packaging of product
- relevant regulatory and workplace requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR207 Undertake routine preventative maintenance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to carry out routine maintenance in the workplace.

Routine preventative maintenance is undertaken by workers in the retail, smallgoods, meat processing and food services sectors. It may involve tasks such as:

- vehicle and equipment checks
- cleaning and lubrication of equipment
- adjustments and repairs to plant and equipment

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct routine checks of plant and equipment	1.1 Perform visual checks of plant and equipment to detect signs of defects and damage in accordance with preventative maintenance documentation and procedures 1.2 Make requirements for the adjustments and repairs to plant and equipment within workplace procedures and agreements
2. Implement routine preventative maintenance	2.1 Make routine adjustments and repairs to plant and equipment within workplace procedures and agreements 2.2 Carry out greasing, lubrication and other regular servicing of plant and equipment in accordance with workplace schedules, procedures and agreements, and according to maintenance instructions 2.3 Return cleaned equipment to operating order after maintenance is complete 2.4 Identify, rectify and/or report out-of-specification preventative maintenance 2.5 Collect, treat and dispose/recycle waste arising from preventative maintenance according to company procedures 2.6 Record routine maintenance information in the company reporting system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR207 Undertake routine preventative maintenance

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply isolation procedures
- conduct pre-operational checks and requirements
- calculate down time for preventative maintenance
- select, fit and use personal protective clothing and equipment
- access services used in preventative maintenance
- seek advice from manuals and colleagues before working with new equipment
- prepare equipment and work area to conduct preventative maintenance
- resolve common problems in conducting preventative maintenance
- clean preventative maintenance tools and equipment
- observe cleaning requirements
- maintain a clean and safe work area
- rectify and report out-of-specification faulty maintenance
- apply waste handling requirements
- report and record maintenance information
- follow workplace health and safety requirements hazards and controls
- explain and follow roles and relationships with others involved in planning and carrying out maintenance functions
- use communication and mathematical skills appropriate to the task
- work with team members when appropriate to carry out tasks and solve problems

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- services used in preventative maintenance
- isolation procedures

© Commonwealth of Australia, 2025 Skills Insight

- waste handling requirements
- pre-operational checks and requirements
- cleaning requirements
- workplace health and safety requirements, hazards and controls
- common problems in conducting preventative maintenance
- operational requirements of equipment including cleaning and sanitation following servicing
- purpose of preventative maintenance and possible consequences of poor preventative maintenance
- workplace information, systems and schedules for conducting preventative maintenance
- environmental aspects related to preventative maintenance
- impact of operating and cleaning procedures on maintenance requirements (including impact of not removing product from belts during cleaning)
- quality parameters to be achieved
- relationship of preventative maintenance to other work activities in the meat processing plant
- food safety factors in maintaining and servicing plant and equipment
- relevant regulatory and workplace requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating or production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR208 Make and sell sausages

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to make at least four varieties of sausages including two gourmet varieties.

The candidate must:

- identify different species and categories of meat used in sausages
- make a range of at least four different varieties of sausages
- seek advice from appropriate sources before working with new equipment or products
- operate adjustment tools and equipment
- apply mathematical skills relevant to the task
- report faults and required adjustments, verbally or in writing according to workplace requirements
- explain cooking methods for a range of sausages
- answer customer enquiries, for at least four different varieties of sausage, relating to:
  - cooking methods
  - cooking times
  - storage
  - shelf life
  - ingredients
  - nutritional value, including fat content
- work with team members
- apply relevant workplace health and safety requirements
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- sausage filler types
- materials used for hanging and storing sausages
- protective covering for sausages and its purpose

© Commonwealth of Australia, 2025 Skills Insight

- conditions under which equipment may need adjusting
- function and operation of sausage filler machines
- safe and correct operation of sausage making equipment
- cooking methods for a range of sausage varieties
- shelf life of a range of sausage varieties
- temperature for storing a range of sausage varieties
- filling yields of various sizes and types of casings
- purpose and storage needs of collagen casings and natural casings
- purpose and use of processing equipment used in making sausages
- purpose and use of ingredients used in sausage making
- relevant workplace health and safety requirements
- ingredients used in at least four different varieties of sausage
- purposes and processes for undertaking emergency stops, machine lockouts and isolation procedures
- regulatory requirements in relation to sausage making
- procedures for cleaning sausage making equipment
- properties of correct blending of ingredients

Assessment Conditions

Competency must be demonstrated over time under typical operating conditions.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Where the candidate cannot make and sell sausages in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR209 Produce and sell value-added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to produce and sell value-added products such as stir-fries, sprinkles, glazes, pre-marinated meat, satays, and forced, stuffed and seasoned meat. The products may be made with pre-prepared ingredients, such as commercially-prepared marinades and ready-cut meat, or by following recipes and preparing ingredients.

This unit is applicable to workers in meat retail and food services operations.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPR209 Produce and sell value-added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must demonstrate the ability to make a minimum of five different value-added products from at least three species.

The candidate must:

- follow recipes accurately
- select, measure and weigh meat and ingredients according to recipes and workplace requirements
- perform calculations as required for production of value-added products
- explain permissible use of additives and ingredients in value-added products
- mix ingredients to achieve product consistency according to recipe and product specifications
- produce at least five value-added products from a minimum of three species including stuffing, seasoned and forcemeat
- identify quality requirements related to production of value-added products, including limits to value-adding options
- present and label products to workplace requirements
- record information, including mathematical information, accurately
- store meat and ingredients to workplace and regulatory requirements
- apply workplace health and safety and hygiene requirements related to producing value-added products
- prepare, operate, adjust, shut down and clean preparation equipment.
- use mathematical skills relevant to the task (including estimating measures to verify calculations)
- work effectively individually or as part of a team
- work with other team members to develop new value-added products
- use relevant communication skills

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and the effect of different ingredients on shelf life
- range of effects on the product and consumer of the use of both incorrect and inadequate quantities of ingredients
- permissible use of additives and ingredients in value-added products
- properties of correct blending
- use and purposes of ingredients in producing value-added products
- reasons for poor product consistency and rectify problem
- workplace health and safety and hygiene requirements related to producing value-added products

Assessment Conditions

Competency must be demonstrated over time under typical operating conditions.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Where the candidate is unable to produce the required volume of value-added products in their workplace they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- Quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR210 Receive meat products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- receive incoming stock
- follow equipment and material requirements
- follow health and hygiene requirements
- follow workplace requirements
- identify and minimise safety hazards
- apply relevant workplace health and safety and regulatory requirements
- calibrate equipment correctly
- use different types of weighing machines
- complete documentation for weighing and receiving goods
- explain the features and purpose of a stock control sheet
- work with diverse individuals and groups
- use mathematical skills relevant to the task
- use relevant communication skills
-

Knowledge Evidence

The candidate must demonstrate a basic, factual, technical and procedural knowledge of:

- principles of the relevant health Acts and regulatory requirements in relation to stock control
- differences in quality of carcases
- differences in types of weighing machines
- indications of meat contamination and workplace procedures for handling contamination
- storage requirements for a range of species and meat cuts
- features and purpose of a stock control sheet
- purpose of each item of data on invoices and delivery dockets

AMPR211 Provide advice on meal solutions in a meat retail outlet

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to create meat-based menu ideas for customers. It requires the ability to match meat recipes with complementary products, such as condiments and vegetables; create menu ideas appropriate to the season; cost the menu; and evaluate the success of the menu.

This unit is applicable to workers in meat retailing enterprises.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPR211 Provide advice on meal solutions in a meat retail outlet

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- Apply communication skills appropriate to the task
- apply mathematical skills for calculating costs of ingredients
- explain different methods of cooking, times of cooking, accompanying condiments and presentation of the cooked product
- write clear descriptions of products and meals
- provide accurate advice in a courteous manner to customers on the use of products and services
- explain cooking meat products as required
- demonstrate awareness of cultural and ethnic differences and respond appropriately
- work with team members
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- menus or recipes, portion requirements, cooking
- products and services to suit customer needs
- enterprise ethical and customer service standards
- relevant workplace health and safety, regulatory and workplace requirements
- sources of information to further meet customer needs
- products and how they may be cooked and served
- seasonality of cooking methods, species and meat cuts and fresh produce

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions. Where the candidate does not interact with customers in their usual place of work, they must undertake alternative work placement or simulated work experience to meet the requirements of this unit.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace project
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR212 Clean meat retail work area

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed cleaning a meat retail area.

The candidate must

- read and interpret directions and safety instructions, including:
  - chemical labels
  - equipment manuals
  - safety data sheets (SDS)
- request advice or further information
- plan and organise work
- skills to work safely when:
  - handling and disposing of chemicals
  - identifying food contamination hazards and controlling risks
  - manual handling
  - selecting chemicals to suit surface type
- self-management skills to work alone and in a team
- follow workplace health and safety, regulatory and workplace policies and procedures
- clean a meat retail area to meet workplace health and safety, regulatory and workplace requirements
- dispose of waste according to enterprise, regulatory and environmental requirements

Knowledge Evidence

The candidate must demonstrate a basic, factual, technical and procedural knowledge of:

- cleaning and sanitation requirements of meat retail areas, including:
  - chemicals
  - cleaning methods
  - personal hygiene practices

© Commonwealth of Australia, 2025 Skills Insight

    - clothing and footwear requirements associated with working and moving in and between food-handling areas and non food-handling areas
- environmental protection procedures
- workplace health and safety procedures
- equipment and chemicals for use in meat retail areas
- legislation, regulations, codes of practice and industry advisory standards that apply to cleaning meat retail areas
- safe work practices for using:
    - chemicals
    - equipment, including PPE
- types of contamination and prevention methods
- waste collection, recycling and handling procedures
- workplace information on food-safety policies and procedures

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR301 Prepare specialised cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed preparing specialised cuts from a minimum of two species.

The candidate must:

- establish customer requirements by questioning, active listening and clarifiying of customer comments where applicable
- seek advice from appropriate sources when developing new cuts
- select and weigh meats for a range of specialised cuts
- prepare specialised meat cuts to workplace health and safety and hygiene requirements
- identify sub-standard products and rectify as appropriate
- apply communication skills relevant to the task
- apply mathematical skills relevant to the task
- explain food safety, Quality Assurance (QA) and product quality requirements for specialised cuts
- apply relevant workplace health and safety and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- what specialised cuts are
- food safety, QA and product quality requirements for specialised cuts
- requirements for a range of specialised cuts according to workplace and customer requirements
- types of specialised cuts to meet customer requirements
- relevant workplace health and safety and regulatory requirements
- why meat retailers sell specialised cuts
- why customers request specialised cuts
- costing and pricing calculations

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Where the candidate does not prepare specialised cuts in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR309 Bone and fillet poultry

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- cut product according to workplace, workplace health and safety and hygiene requirements
- demonstrate correct cutting, slicing and trimming techniques
- demonstrate cutting lines to produce cuts to workplace requirements
- demonstrate safe and effective knife skills
- bone poultry safely, effectively, and with consideration for maximising yield
- demonstrate the ability to work with team members
- explain hygiene requirements specific to poultry (including salmonella risk)
- operate and clean equipment according to workplace requirements
- remove defects from products according to workplace, hygiene and regulatory requirements
- use communication skills appropriate to the task

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene requirements specific to poultry (salmonella risk)
- boning procedure
- workplace health and safety implications of the slippery and moist nature of poultry

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

© Commonwealth of Australia, 2025 Skills Insight

Assessment must occur in the workplace under normal operating conditions or in simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR310 Cost and price meat products

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to calculate costs and set prices of meat and meat products.

This unit is applicable to workers in meat retail operations.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Cost product	1.1 Calculate cost price of product
2. Price product to achieve business goals	2.1 Calculate prices to achieve enterprise sales, stock and profitability targets

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPR310 Cost and price meat products

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 1.0.

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- alter electronic scales to show correct sales price
- apply mathematical skills appropriate to the task
- calculate margins required to return gross profit targets
- calculate product cost price based on invoice price and cost price based on yield
- calculate sale price to achieve required return according to enterprise targets and goals
- explain concepts of 'break-even point', and 'gross' and 'net profit' margins
- apply relevant workplace health and safety, regulatory and workplace requirements
- identify overhead cost per kilogram
- mark ticket prices to show correct sales price
- use communication skills relevant to the task.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- concepts of 'break-even point', and 'gross' and 'net profit' margins
- reasons for prices calculated to achieve more than or less than gross profit margin
- relevant workplace health and safety, regulatory and workplace requirements
- elements contributing to the total cost of the product (total cost of purchase, preparing or selling product).

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time.

Assessors must satisfy current standards for RTOs.

AMPR311 Prepare portion control to specifications

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to break and prepare carcases and primal cuts to portion control specifications. The products are cut to meet the specifications of the hospitality industry, including restaurants, hotels or airlines.

This unit is applicable to workers in boning rooms and meat retail operations.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPR311 Prepare portion control to specifications

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be able to demonstrate cutting, slicing and trimming techniques to workplace requirements and customer specifications for a minimum of two species.

The candidate must:

- select primal cuts for maximum yield and suitability to portion control specification
- demonstrate cutting, slicing and trimming techniques to workplace requirements and customer specifications for a minimum of two species
- demonstrate safe use of bandsaw, as required
- demonstrate sorting procedures to gain maximum yield
- explain and demonstrate hygiene standards and procedures for preparing portion control cuts
- explain and demonstrate QA standards and procedures for preparing portion control cuts
- slice portions evenly
- apply mathematical skills relevant to the task
- explain and demonstrate correct procedure for achieving and maintaining weights while cutting
- identify sub-standard product and rectify appropriately
- demonstrate the ability to listen actively and ask questions to confirm understanding when customers are explaining new cuts and/or specifications
- work with team members
- explain and demonstrate sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- apply workplace health and safety and regulatory requirements
- use communication skills relevant to the task

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct procedure for achieving and maintaining weights while cutting

© Commonwealth of Australia, 2025 Skills Insight

- hygiene standards and procedures for preparing portion control cuts
- QA standards and procedures for preparing portion control cuts
- sorting procedures for achieving and maintaining weights while cutting to gain maximum yield
- pre-portioning processes
- criteria for selection of meat to suit specification
- hygiene requirements for preparation of cuts
- portion specification
- quality requirements for preparation of cuts
- relationship between primal cut size, dimensions, order specification and yield
- value of off-cuts
- workplace health and safety and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR313 Order stock in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to order stock while working under the supervision of the store buyer in a meat enterprise.

This unit is applicable to workers in the retailing, processing and smallgoods sectors of the meat industry. Employees may be involved in the ordering of stock such as:

- cleaning materials
- food preparation requirements
- meat products
- packaging
- Personal Protective Equipment (PPE) supplies and safety equipment
- rendering materials.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPR314 Calculate and present statistical data in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to calculate and present statistical information commonly used in meat enterprises.

Skills to calculate and present statistical data are used widely throughout the retail and smallgoods sectors of the meat industry, for example:

- calculating and presenting production statistics
- calculating consumption and replacement requirements of gloves, caps and other personal protective equipment
- calculating quantities
- preparing process control data and sheets

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPR314 Calculate and present statistical data in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- accurately calculate averages, average range and standard deviation
- consistently use estimation processes
- consistently use mathematical processes
- consistently use mathematical symbols and diagrams
- consistently prepare and interpret statistical charts and tables including frequency charts and tables.
- consistently prepare and interpret graphs
- apply relevant workplace health and safety, regulatory and workplace requirements
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- estimation processes
- mathematical processes
- mathematical symbols and diagrams
- purpose and structure of statistical charts and tables including frequency charts and tables
- purpose and structure of graphs
- purpose of calculating averages
- purpose of measuring the dispersion of values
- relevant workplace health and safety, regulatory and workplace requirements

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated under typical operating conditions for the enterprise and within the parameters of the role and responsibilities.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR315 Utilise the Meat Standards Australia system to meet customer requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to utilise the Meats Standards Australia (MSA) system in order to improve demand for beef and sheep products and achieve an associated shift in price and volume.

Participants in the MSA program must be licensed to use the Trade Mark and Certified products.

This unit is suitable for people working in food services, boning rooms or meat retailing enterprises.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPR315 Utilise the Meat Standards Australia system to meet customer requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- accurately identify MSA products
- apply value adding techniques to a range of beef or sheepmeat primal using MSA eating quality principles
- investigate gross profit percentages of selling sub-primal cuts versus traditionally sliced
- demonstrate active listening in relation to customer complaints
- complete an MSA customer complaint form and provide all necessary information
- apply relevant workplace health and safety, regulatory and workplace requirements
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- differences between the MSA beef and sheepmeat programs
- variables that impact on eating quality
- key elements of the MSA program
- relationship between cut and cooking method
- consumer taste test system on which MSA is based
- relevant workplace health and safety, regulatory and workplace requirements
- primals that have variable eating quality
- sources of information on the MSA program
- benefits of MSA
- MSA approved cooking methods and describe their preparation requirements
- value-added options using muscle seaming

Assessment Requirements for AMPR316 Cure, corn and sell product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- activate processing equipment to assess its readiness for operational use
- follow recipes and procedures accurately
- explain the curing and corning processes for a variety of meat products
- mix curing ingredients for required length of time
- perform running adjustments according to workplace requirements and manufacturer specifications
- pump meat to increase original weight according to workplace requirements
- pump meat correctly to avoid air pockets
- demonstrate the correct pickling procedure, according to product specifications and workplace requirements
- perform curing and corning according to workplace, workplace health and safety, hygiene and regulatory requirements
- wash residue from cured meats following removal from holding brine
- identify sub-standard product and address the problem according to workplace requirements
- operate adjustment tools and equipment correctly
- seek advice from appropriate sources when working with new products or equipment
- report any faults and adjustments required to processing equipment, either verbally or in writing, according to workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer specifications
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the term 'osmosis' in relation to the curing process
- different salts, cures and brines used in the curing process
- conditions under which equipment may need adjusting
- function of various additives and ingredients
- purpose and effect of brine on meat
- safe and correct operation of processing equipment
- health regulations that apply to curing and corning meats
- curing and corning processes for a variety of meat products
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corning products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling to correct pump percentage and yield requirements
- selection criteria for meat for the curing or corning process
- relevant regulatory requirements
- meat cuts used in curing and corning
- various ingredients for curing meat and their use and purpose
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment

Assessment Conditions

Competency must be demonstrated over time under typical operating conditions.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

Where the candidate does not cure or corn meat product in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR317 Assess and sell poultry products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- identify poultry cuts according to label on cartons as appropriate
- select cuts correctly by species and cut according to workplace requirements
- select poultry to customer and workplace requirements
- identify cuts correctly by species and cut, according to workplace specifications
- remove defects from products according to workplace, hygiene and regulatory requirements
- record and communicate outcomes of poultry product assessment according to workplace requirements
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements in relation to selling poultry

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- normal causes of contamination of poultry
- hygiene requirements specific to poultry (including salmonella risk)
- methods of assessing poultry according to specifications
- legislation regarding growth promotants in poultry
- workplace health and safety implications of the slippery and moist nature of poultry
- difference between growth promotants and antibiotics
- difference between organic, free range and conventional poultry products
- workplace, workplace health and safety, hygiene and sanitation requirements in relation to assessing poultry
- relevant regulatory requirements in relation to selling poultry

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal workplace conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPR318 Break carcase for retail sale

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to break carcases for retail sale.

This unit is applicable to meat tradespersons in the retail industry, who may be required to separate carcases into primal cuts for further processing or preparation.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

AMPR319 Locate, identify and assess cuts

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Assessment Requirements for AMPR318 Break carcase for retail sale

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Competency must be demonstrated over time and under typical operating conditions for the enterprise and must include:

- breaking carcase into primal cuts for a minimum of three species, including beef and sheep
- identifying primary cut specifications for at least three species, including beef and sheep

The candidate must:

- prepare equipment for breaking carcase correctly and safely
- position or fasten carcase securely for separation
- demonstrate the separation of carcase into primal cuts on a range of meat cuts for a minimum of three species including beef, sheep and one other species, according to workplace, workplace health and safety, and hygiene requirements and customer specifications
- use acceptable cutting lines to produce primary cuts to workplace requirements
- demonstrate safe manual-handling techniques
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- sanitise equipment according to workplace requirements
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene, workplace health and safety and workplace requirements when breaking carcases
- quality requirements for breaking carcases
- principles of contamination in regard to primary cuts

© Commonwealth of Australia, 2025 Skills Insight

- primary cut specifications for beef, sheep and one other species
- major anatomical structures of the carcase of each species
- relevant regulatory requirements

Assessment Conditions

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPR320 Assess and address customer preferences

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- undertake market research, including determining:
  - demographic make-up of local area
  - specific religious needs of local area, including halal or kosher meats
  - specific cuts of meat preferred by major local cultural groups
  - preferences for organic meats
  - preferences for value-added products or basic meat cuts
  - more sophisticated expectations of product including brands that promote good animal welfare practices, environmentally-friendly production and processing, Australian made and owned products
  - preferences for particular species, including game meat
  - prices they are prepared to pay for meat
  - what is sold by competitors
- use appropriate research methodology, including internet research, questionnaires, observations, conversations with customers, other local residents, local council data, suppliers or other industry members, existing market research data
- research suppliers and brands for product features and supply chain policies and practices
- seek advice from appropriate sources when introducing/investigating new product lines
- apply communication skills relevant to the task
- apply mathematical skills to determine economic viability of various product lines
- apply relevant workplace health and safety and regulatory requirements
- report findings and make recommendations based on market research and accurate cost/price/profit calculations to senior staff members
- provide sound information to customers about product lines, brands and supply chain, using appropriate language and showing sensitivity to cultural differences
- research and follow cutting specifications for non-standard meat cuts

© Commonwealth of Australia, 2025 Skills Insight

- provide sound information to customers on link between specialised brands and product cost
- demonstrate effective interpersonal skills in providing advice to customers
- demonstrate awareness of cultural and ethnic differences and respond appropriately

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- requirements of whole of supply-chain practices required for a product to achieve brandings including RSPCA, free-range, organic, enviromeat and MSA
- range of species, including game
- difference between dry-aged and wet-aged meat
- requirements of whole of supply-chain practices required for a product to meet religious requirements including halal (for Muslim consumers) or kosher (for Jewish consumers)
- enterprise ethical and customer service standards
- relevant workplace health and safety requirements
- sources of information to further meet customer needs and expectations
- features of new and existing product lines
- mathematical formulas for determining product selling prices
- problem-solving techniques

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace project
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR321 Collect and prepare standard samples

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time. Sample collection techniques must comply with the relevant meat industry regulations and standards.

The candidate must:

- collect samples in accordance with workplace and regulatory requirements
- apply relevant workplace health and safety requirements
- use relevant communications skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- procedures for collecting, receiving, handling and storing specimens in accordance with laboratory procedures, universal precautions and legislative requirements
- use of aseptic techniques in collecting samples
- how sample collection has to be coordinated with workplace activities
- importance of obtaining representative samples and how this can be achieved
- procedures for documenting all pertinent sample information in the required format
- workplace Standard Operating Procedures (SOPs) for collecting and preparing samples
- relevant workplace health and safety requirements
- steps in preparing samples and sub-samples to comply with required procedures
- workplace procedures to recognise sampling equipment and, as required, maintain it in a sterile condition
- correct disposal procedures

Assessment Conditions

Sample collection techniques must comply with the relevant meat industry regulations and standards.

Assessment Requirements for AMPR322 Prepare and produce value added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to produce value-added meat products from a minimum of three species, using pastry, fresh produce, dried herbs and spices and marinades.

The candidate must:

- make adjustments to equipment when necessary according to manufacturer's, workplace and workplace health and safety requirements
- describe shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- explain the permissible use of additives and ingredients in value-added products
- identify suitable alternatives from existing stock where quantities of required ingredients are not available, as applicable
- work with team members to develop new value-added products
- identify sub-standard product and rectify appropriately
- label value-added products according to workplace and regulatory requirements
- provide advice to customers on ingredients in value-added products
- seek advice on new recipes and products from appropriate sources
- use communication skills appropriate to the task
- use mathematical skills as required for production of value-added products
- estimate measures to verify calculations

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- range of effects on the product and on consumer health of the use of incorrect and inadequate quantities of ingredients
- properties of correct blending

© Commonwealth of Australia, 2025 Skills Insight

- purpose and use of processing equipment in the preparation of value-added products
- use and purpose of stuffings, seasoning and force meat in producing value-added products
- use and purposes of ingredients in producing value-added products
- quality requirements related to production of value-added products
- effect of various ingredients on product shelf life
- procedures for cleaning processing equipment
- workplace health and safety and hygiene requirements related to producing value-added products

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Where the candidate does not produce value-added products in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPR324 Break large stock carcases for retail sale

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 1.0.

Performance Evidence

The candidate must be able to demonstrate:

- breaking carcase into primal cuts for one large stock species
- identifying primary cut specifications for one large stock species
- using knife skills to enterprise speed and requirements.

The candidate must:

- demonstrate safe manual-handling techniques
- break carcase into primal cuts for one large stock species.
- identify primary cut specifications for one large stock species
- apply relevant communication skills
- identify contaminated product and take the appropriate corrective action according to workplace requirements
- sanitise equipment according to workplace requirements
- apply relevant regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene, workplace health and safety or workplace requirements when breaking carcases
- quality requirements for breaking carcases
- principles of contamination in regard to primary cuts
- primary cut specifications for beef and one other species
- major anatomical structures of the carcase of each species
- relevant regulatory requirements.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- demonstration in the workplace or simulated environment
- workplace referee or third-party report of performance over time.

Assessors must satisfy current standards for RTOs.

AMPR325 Prepare cooked meat product for retail sale

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare cooked meat products in a retail establishment.

This unit is applicable to workers in meat retailing. Cookery methods are used to prepare, cook and store meat products for retail sale.

This unit must be delivered in accordance with Australian meat industry standards and regulations.

All work should be carried out in accordance with workplace requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPR325 Prepare cooked meat product for retail sale

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- trim and prepare meat product to be cooked to workplace requirements
- follow workplace health and safety, regulatory and hygiene and sanitation requirements for preparing meat
- follow workplace recipes and procedures for preparing meat to be cooked
- identify sub-standard or contaminated meat product during preparation
- take corrective action if sub-standard or contaminated product is identified
- identify the most appropriate cooking methods for meat products
- select appropriate cooking equipment
- calculate required weights and quantities
- follow recipes accurately
- apply hygiene and safety principles and procedures during the cooking process
- follow safe work practices, particularly in relation to bending, lifting and using cutting implements, appliances, heated surfaces and other equipment which carry a risk of burns
- seek advice from appropriate sources when working with new products/equipment
- report equipment faults, either verbally or in writing according to workplace requirements
- monitor and record temperature of product throughout the cooking process
- store meat product appropriately
- apply relevant workplace health and safety, regulatory and workplace requirements
- use mathematical skills relevant to the task
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- workplace health and safety, and regulatory requirements for cooked meat products
- workplace procedures for cooking meat products
- temperature requirements for cooking meat products to meet regulatory and quality assurance requirements
- use and characteristics of a range of equipment used for the required methods of meat cookery
- regulatory requirements for the storage of cooked, ready to eat and cook and cool meat products
- storage life of cooked meat products
- effects of different ingredients on storage life of cooked meat products

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- verified work log or diary
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPS101 Handle materials and products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must handle raw materials and products in a meat establishment.

The candidate must:

- handle meat products safely and hygienically, and in accordance with the work instruction
- handle raw materials safety and hygienically, and in accordance with the work instruction
- maintain a clean holding room
- check work for accuracy
- identify problems and refer to the appropriate person for resolution
- use communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- work at the level of speed and accuracy required by the enterprise

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- the work instruction
- relevant workplace, health and safety, and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise. Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration
- quiz, question and answer
- workplace referee's observation of performance over time

Assessment Requirements for AMPS102 Pack smallgoods product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must hand-weigh, arrange and bag meat products in a meat processing establishment.

The candidate must:

- inspect and grade of a variety of products prior to packaging
- accurately weigh a variety of products
- package and arrange product into containers according to workplace requirements
- bag and seal product to workplace, hygiene and sanitation, and QA requirements
- inspect bagged product for defects and take appropriate action for defects
- apply relevant workplace health and safety requirements
- use communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic functional knowledge of:

- process for inspection and grading of meat prior to packaging and the action to be taken if meat is outside specifications
- procedures for packing products into containers for a variety of different products
- bagging requirements for a variety of products
- labelling requirements
- requirements for inspecting bagged products and the action to be taken if defects are found
- relevant workplace health and safety requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise. Assessment must occur in the workplace under normal operating conditions.

Assessment Requirements for AMPS201 Package product using thermoform process

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 4.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Performance Evidence

The individual must package processed meat products using a thermoform process.

Individuals must:

- identify where labels and other raw materials are stored
- demonstrate correct loading procedure at machine speed
- demonstrate correct loading procedure for labels
- change dates on the coders
- correctly load and unload films
- join films
- line up printed film
- identify flaws in packaging film
- demonstrate a full label change
- set machine to different product specifications
- perform a full changeover within the specified time
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- implement the hygiene procedures for the thermoforming machinery.

Knowledge Evidence

The individual must demonstrate a basic factual, technical and procedural knowledge of:

- relevant regulatory requirements
- how the thermoforming machine works
- reasons for changing the different settings
- temperature requirements and the importance of correct temperature

© Commonwealth of Australia, 2025 Skills Insight

- hygiene requirements and their importance when changing between uncooked and cooked products
- need to adjust tracking and the procedure to make adjustment
- packaging specifications for a range of products for cartons, tubs and pouches
- principles of thermoforming
- use of oxygen absorbers if required under work instructions
- use-by date or packed-on date for a range of products and the importance of these dates
- which films are used for which products
- causes and corrective actions for re-packs
- thermoforming equipment and accessories.

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS203 Operate bar and coder systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a bar and coder system.

The candidate must:

- use bar and coder system on a variety of products
- change dates on the coders
- use the correct procedures for manually entering new product details into the product coding system
- demonstrate the correct maintenance procedures for bar and coder system components
- identify the common causes of printing problems
- demonstrate the correct procedures for fixing common printing problems
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- functions performed by solvent and water in the printing process
- safety procedures for handling solvents
- start-up procedures for the coding system
- common causes of printing problems
- correct procedures for fixing common printing problems
- use-by date or packed-on date for a range of products and the importance of these dates
- components of the coding system and their maintenance requirements
- correct procedures for re-booting the computer system

Assessment Requirements for AMPS206 Manually shape and form product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must manually shape and form products into a specified shape.

The candidate must:

- follow the requirements of the work instruction
- work to production speed
- correctly fill a range of product lines in terms of:
  - casing
  - clips
  - length
  - tension
  - weight
- shape and form a range of products to product specifications, workplace, hygiene and sanitation, QA and customer requirements
- demonstrate operation, adjustments and actions of filling machine to address faults
- operate a metal detector if a detector is included in the operation
- identify, remove and rectify faulty product
- identify defects in natural casings
- clean equipment according to workplace requirements
- apply relevant communication and mathematical skills
- explain filling to required product specifications for a variety of products
- apply relevant workplace health and safety, and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene requirements for forming products
- filling to required product specifications for a variety of products
- how and why products must be formed and shaped

© Commonwealth of Australia, 2025 Skills Insight

- possible faults in skins and their effect on the product
- procedures for dealing with waste product and broken casings
- relevant workplace health and safety, and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise. Assessment must occur in the workplace under normal operating conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS207 Slice product using simple machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to set up, load, clean and operate manually set and adjusted slicing equipment in a smallgoods manufacturing establishment.

A skilled operator in a smallgoods establishment would slice meat to customer specifications. This unit is not applicable for operators of large-scale production slicing machinery.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element.
1. Prepare slicing equipment	1.1 Set up equipment and accessories in accordance with product specifications and workplace health and safety requirements 1.2 Clean equipment and machinery in accordance with hygiene and workplace requirements 1.3 Conduct pre-start safety checks in accordance with workplace and regulatory requirements and corrective action for identified faults
2. Prepare product for slicing	2.1 Prepare product for slicing to workplace requirements 2.2 Handle out-of-specification product to workplace requirements
3. Operate slicing equipment	3.1 Adjust equipment to suit product specifications in accordance with workplace and health and safety requirements 3.2 Operate equipment to slice a range of products to specifications at a speed similar to production requirements and in accordance with manufacturer's specifications 3.3 Change equipment from the slicing of one product to the slicing of another to workplace requirements 3.4 Identify, record and report equipment malfunctions or faults in accordance with workplace requirements
4. Weigh and bag products within weight specifications	4.1 Weigh and bag products with weight specifications to specifications, workplace, hygiene and sanitation, Quality Assurance (QA) and customer requirements 4.2 Adjust weight control mechanisms to specifications and workplace requirements
5. Clean and maintain slicing equipment	5.1 Clean and maintain slicing equipment according to workplace and manufacturer's specifications 5.2 Implement cleaning procedures to workplace requirements when changing product to be sliced

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPS207 Slice product using simple machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must set up, load, clean and operate manually set and adjusted slicing equipment in a smallgoods manufacturing establishment.

The candidate must:

- follow the requirements of the work instruction
- work at production speed
- identify slicing equipment and accessories
- identify product and slicing faults in a range of products
- adjust weight control mechanisms if a part of work instructions
- demonstrate procedure for preparing slicing equipment for new product
- slice products to workplace requirements and customer specifications for a variety of products
- clean and maintain slicing equipment if required in work instructions
- observe safety requirements for cleaning slicing equipment if required in work instructions
- sharpen a slicing blade if a part of work instructions
- weigh and bag products with weight specifications
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- explain and demonstrate checks on products if a part of work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace procedures when metal is detected in a product
- how and why product is prepared for slicing
- how products are weighed and bagged when they have a weight specification
- how weight control mechanisms are adjusted

© Commonwealth of Australia, 2025 Skills Insight

- illegal weights
- maximum and minimum allowable weights
- operating procedures for various types of slicing equipment
- importance of cutting blade maintenance in the slicing process
- procedure for sharpening a slicing blade if a part of work instructions
- procedures for handling faulty product
- procedures for reporting faults in slicing equipment
- safety considerations when setting up slicing equipment
- use-by and packed-on dates and their importance
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS212 Measure and calculate routine workplace data

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to calculate and record workplace measurements commonly used in the meat industry and includes the use of measuring instruments.

Skills to measure and calculate statistical data are used widely throughout the retail, smallgoods and processing sectors of the meat industry, for example:

- measuring and calculating production statistics
- recording production statistics
- calculating consumption and replacement requirements of gloves, caps and other safety equipment
- estimating or measuring quantities of ingredients

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations**.**

Assessment Requirements for AMPS212 Measure and calculate routine workplace data

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must calculate and record workplace measurements commonly used in the meat industry.

The candidate must:

- select, operate and explain the purpose of measuring instruments
- identify routine faults in measuring instruments
- use and apply the principles and units of measurement
- achieve consistent levels of accuracy
- interpret mathematical symbols and diagrams
- explain the purpose of graphs or charts
- source and apply new ideas and techniques to address unfamiliar situations or resolve problems
- explain the relationship between different measurement scales
- apply relevant workplace health and safety, workplace and regulatory requirements whenever undertaking numeracy tasks in a meat industry environment
- present mathematical data for use in the workplace
- use estimation processes
- use numeracy skills and mathematical concepts to solve workplace problems
- verify calculations

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- purpose of graphs or charts
- relationship between different measurement scales
- relevant workplace health and safety, workplace and regulatory requirements
- principles and units of measurement

  - workplace requirements
  - workplace health and safety requirements
  - hygiene and sanitation requirements
  - product specifications
  - production requirements
- demonstrate the difference in cutting techniques between raw meat emulsions and pre-cooked meat emulsions
- identify any unhygienic meat ingredients
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- health and hygiene factors related to operating a bowl cutter
- corrective action to be taken in situations such as:
  - incorrect loading of ingredients
  - machinery malfunction
  - temperature malfunction

© Commonwealth of Australia, 2025 Skills Insight

    - unhygienic meat ingredients
- common tests for blade sharpness such as:
    - no feathered edges
    - cutting paper without tearing
    - checking for ragged edges
- appropriate quantities of water or ice to ensure temperature is maintained according to product specifications
- consequences of loading ingredients in the incorrect order including:
    - fat separation caused by over-heating
    - red colour after cooking
    - temperature control
- health and hygiene factors related to operating a bowl cutter
- importance of protein extraction
- effects on product and on health and safety of incorrectly placing product in equipment
- effect of meat temperature when cutting meat for salami
- effect on product of the temperature of the cutting equipment
- importance of blade sharpness for the cutting process and the consequences of blunt blades
- purpose of the following additives:
    - anti-oxidant
    - curing ingredients
    - phosphate
    - salt
    - water
- difference in cutting techniques between raw meat emulsions and pre-cooked meat emulsions
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the current standards for RTOs.

AMPS301 Cook, steam and cool product

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Application

This unit covers the skills and knowledge required to prepare products with the application of heat treatment in a meat establishment.

A skilled operator would require this unit to prepare cooked and steamed products including trimmed meats, ready to cut meats, frankfurters and hams.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Place product in cooking or steaming facility	1.1 Identify individual product and place correctly in cooking or steaming facility for even cooking or steaming 1.2 Space product in cooking facility according to product and manufacturer's specifications
2. Cook or steam product	2.1 Determine correct cooking or steaming procedure 2.2 Set and maintain cooking or steaming cycle according to specifications and workplace requirements 2.3 Regularly monitor cooking or steaming process and adjust as necessary to fulfil product specifications 2.4 Check internal temperature of product on completion of cooking or steaming cycle to ensure correct process has been achieved 2.5 Cook or steam a variety of products to workplace requirements and customer specifications at a speed similar to production requirements 2.6 Correctly record process and results of cooking or steaming 2.7 Dye product to achieve a uniform colour when required by product specifications
3. Chill or cool product	3.1 Weigh product immediately on completion of cooking or steaming cycle 3.2 Chill product immediately or cool at ambient temperature before chilling according to product specifications 3.3 Identify and store product according to product specifications and workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPS301 Cook, steam and cool product

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Performance Evidence

Candidates must consistently cook, steam and cool product to workplace requirements in the workplace.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- cook or steam of a variety of products to product specifications, to workplace, customer, Quality Assurance (QA) and hygiene and sanitation requirements
- identify the cause and effects of, and explain the appropriate action for:
  - cycle out of sequence
  - drops during cooking
  - excess cooking or steaming
  - excess humidity
  - insufficient cooking or steaming
  - low humidity
- operate cooking or steaming facility in a safe and hygienic manner
- demonstrate storage procedures
- apply relevant communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, and regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct cooking or steaming procedure for specific products
- procedure followed to measure product internal temperatures correctly

© Commonwealth of Australia, 2025 Skills Insight

- chilling or cooling requirements for different products
- dye addition procedures for a given range of products
- effect of incorrect chilling on yield
- effects of incorrect spacing or placement of product for cooking or steaming
- recording requirements for the cooking or steaming process
- relevant workplace health and safety, and regulatory requirements
- cause and effects of:
  - cycle out of sequence
  - drops during cooking
  - excess cooking or steaming
  - excess humidity
  - insufficient cooking or steaming
  - low humidity.

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPS302 Prepare dried meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to select and dry meat cuts for the production of dried meat products.

This unit is applicable to workers producing products such as jerky, biltong and dried pet treats (e.g. pigs' ears).

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Assessment Requirements for AMPS302 Prepare dried meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare at least two different types of dried meat to workplace requirements.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- select and prepare meat for drying
- identify defects and take appropriate corrective action
- identify contamination
- dry a minimum of three different types of meat products according to workplace requirements
- inspect and store dried meat products according to workplace requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sources and causes of contamination
- ways of preventing contamination
- workplace health and safety hazards associated with operating a drier
- workplace specifications for meat to be dried
- drying processes for at least three different kinds of dried meat products
- relevant regulatory requirements
- time and temperature requirements for the variety of products produced

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

© Commonwealth of Australia, 2025 Skills Insight

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS303 Fill casings

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently fill casings to workplace requirements.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- identify casing size requirement according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify possible faults in natural and synthetic casings
- correctly fill a range of product lines in terms of:
  - casing
  - clips
  - length
  - tension
  - weight
- perform filling to required product specifications
- identify over-filled and under-filled products
- identify, remove and report defective product according to workplace procedures
- match clip size to casing
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- describe storage requirements of soaked casings carried over from production
- explain storage requirements of both natural and synthetic casings

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- procedures followed to set up filling machine to correct specifications

© Commonwealth of Australia, 2025 Skills Insight

- appropriate corrective action for:
  - casing breakages and bent nozzles
  - jammed clips or loops
  - poorly-printed casings
- storage requirements of soaked casings carried over from production
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation
- possible faults in skins and explain their effect on the product
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS304 Thaw product - water

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently carry out the thawing process according to workplace and regulatory requirements.

Candidates must:

- follow the requirements of the work instruction
- work to production speed
- check and prepare tanks for thawing
- identify contaminated product prior to thawing and take corrective action according to workplace requirements
- thaw product according to workplace and regulatory requirements
- maintain control of the flow of product through thawing and dispatch to further processing
- follow workplace health and safety and hygiene requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sources of contamination and cross-contamination
- ways of minimising contamination
- regulations dealing with thawing of product
- workplace requirements for thawing product including:
  - workplace health and safety requirements.
  - Standard Operating Procedures (SOPs)
- principles of stock rotation

Assessment Requirements for AMPS308 Batch meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must batch meat products to specification in a meat establishment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- prepare equipment and work area prior to batching meat
- calibrate scales correctly
- follow a recipe correctly
- batch product to specifications at a speed similar to the speed of production
- demonstrate accurate record keeping practices for meat usage
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, workplace and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- batching requirements for the workplace
- consequences of using incorrect meat for both the product and the consumer
- hygiene and sanitation factors associated with the selection of meat
- relevant workplace health and safety, workplace and regulatory requirements
- critical information within the Australia New Zealand Food Standards Code relevant to immediate work environment

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Set up product forming equipment	1.1 Set up all processing equipment according to production requirements 1.2 Use appropriate Personal and Protective Equipment (PPE) as provided 1.3 Conduct routine pre-start checks prior to commencement of operation 1.4 Ensure required product materials are in place
2. Operate product forming machinery	2.1 Use product forming machinery is used according to workplace requirements 2.2 Take appropriate remedial action to correct any faults in process or product 2.3 Monitor process to confirm that specifications are met, and variations in operating conditions are addressed 2.4 Meet daily production schedule 2.5 Maintain workplace records according to workplace recording requirements
3. Ensure smooth operation of process	3.1 Identify potential dangers from hazards and ensure actions taken reflect the required precautions 3.2 Communicate clearly and accurately with team members 3.3 Promptly, clearly and accurately report faults and variances outside the job holder's area of responsibility to an appropriate authority 3.4 Encourage and support team members to work as an effective team 3.5 Follow safe working procedures at all times
4. Shut-down the process	4.1 Identify appropriate shut-down procedure 4.2 Shut-down process according to workplace procedures 4.3 Promptly, clearly and accurately report faults and variances outside area of responsibility to an appropriate authority

Assessment Requirements for AMPS309 Operate product forming machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must operate and control a production line using product-forming machinery.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- set up processing equipment to workplace requirements
- operate machinery to ensure that product consistently meets required specifications
- take appropriate corrective action as required
- follow production documentation requirements and procedures
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- observe relevant Quality Assurance (QA) and inspection procedures and systems
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- relevant QA and inspection procedures and systems
- materials and equipment specifications
- Standard Operating Procedures (SOPs)
- food safety and Hazard Analysis Critical Control Points HAACP requirements
- precautions necessary to ensure safety
- how output is maximised while still meeting quality and safety requirements
- limits of authority
- tolerance allowable in the quality system and when action should be taken
- production documentation requirements and procedure
- relevant workplace health and safety, regulatory and workplace requirements
- potential dangers in specific plant and equipment

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPS310 Operate link and tie machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit covers the skills and knowledge required to operate and control the use of link and tie machinery in a smallgoods manufacturing operation.

This unit is applicable to smallgoods manufacturing operations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPS312 Prepare meat-based pates and terrines for commercial sale

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must prepare a minimum of three different types of meat-based pâtés and terrines for commercial sale.

The candidate must:

- follow recipes and work instructions
- assess the freshness and suitability of ingredients for pâtés and terrines
- pre-prepare meat and offal using safe knife skills
- cook meat emulsions
- poach or boil products, as required
- apply presentation skills for pâtés and terrines, including pastry decoration, glazing and layering of ingredients
- correctly package and store finished products
- consistently prepare at least three different products suitable for commercial sale
- develop commercially viable new recipes for at least two products
- use communication and numeracy skills required to read, write and interpret written documentation, such as recipes and regulatory requirements
- listen to, interpret and correctly carry out instructions

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- ingredients suitable for making pâtés and terrines and their characteristics
- culinary terms related to pâtés and terrines commonly used in the industry
- properties and outcomes of the various seasonings, additives, binding agents and processes used in the preparation of pâtés and terrines
- core temperature requirements associated with the various stages of pâté production
- heating and cooling processes required to ensure end product is safe for consumption and meets regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

- safe work practices, in particular in relation to using chopping and mincing equipment
- food safety requirements for the handling and separation of cooked and raw meats
- hygiene requirements particularly relating to possible bacterial spoilage in the preparation, storage and service of pâté and terrine products
- casings and containers suitable for commercial use and storage of pâtés and terrines
- three-stage cooling program or regime specified in the Australian standard
- principles of nutrition, in particular, the food values of pâtés and terrines and the effects of cooking on the nutritional value of food
- packing and storage requirements for pâtés and terrines
- organisation's food safety plan

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPS313 Prepare product formulations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare product formulations in a meat establishment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- follow recipes and product specifications to formulate products
- formulate products consistently and accurately
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, and hygiene and sanitation requirements
- use equipment according to manufacturer's specifications and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- functions, dangers and legal implications of various ingredients
- usage and purpose of various additives, spices, binders and ingredients in the products
- potential sources of contamination and ways to minimise risk of contamination
- relevant workplace health and safety and regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

Assessment Requirements for AMPS314 Ferment and mature product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare semi-dried and fermented products such as salami, mettwurst or prosciutto in a smallgoods manufacturing establishment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- ferment and mature product to workplace requirements, and product and customer specifications, within workplace time frames
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- demonstrate familiarity with the regulatory requirements related to fermenting product
- apply relevant workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- possible effects on health of inadequate finishing of maturation process
- possible effects of temperature fluctuations, relative humidity and air circulation on product
- effect pH has on the maturation process
- purpose and effect of smoking salamis
- air circulation requirements of specific products
- impact of Aw on the shelf life of fermented products
- relevant workplace health and safety requirements
- importance of check-weighing at the end of drying
- relationship between pH, Aw and humidity
- requirements of product spacing for specific product
- various types of fermented products

Assessment Requirements for AMPS315 Blend meat product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must prepare and operate blending equipment.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- use blending equipment to blend a variety of products to production requirements
- demonstrate effective operation of tools and equipment used for adjusting blending equipment
- demonstrate safe handling procedures for operating blending equipment
- operate equipment to manufacturer's specifications, workplace and health and safety requirements
- clean and maintain blending equipment as required in work instructions
- apply mathematical and communication skills relevant to the task
- learn new techniques, operate new equipment and adjust to workplace change as required
- apply relevant regulatory requirements
- take corrective action to improve own work performance

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- safe handling procedures for operating blending equipment
- conditions under which processing equipment might need adjusting
- cleaning and maintenance procedures for blending equipment if required in work instructions
- relevant regulatory requirements
- purpose and use of equipment used in blending

Assessment Requirements for AMPX201 Prepare and operate bandsaw

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Assessment must involve cutting meat products over a period of time.

The candidate must:

- assemble and operate a bandsaw to manufacturer's, workplace, workplace health and safety, and hygiene and sanitation requirements
- carry out a pre-operational safety check on the bandsaw
- cut products using the bandsaw according to workplace, workplace health and safety and hygiene requirements
- use the bandsaw according to workplace health and safety, hygiene and sanitation, Quality Assurance (QA) and workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- demonstrate effective use of all cutting guides and safety guards
- report equipment faults either verbally or in writing to supervisor in accordance with workplace requirements
- work safely and effectively as an individual and as part of a team
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- purpose and effective use of all cutting guides and safety guards
- purpose and use of the bandsaw
- safety procedures related to use of the bandsaw
- relevant regulatory requirements
- workplace health and safety requirements for operating a bandsaw
- workplace requirements related to:
  - cleaning a bandsaw
  - disassembly and reassembly of the bandsaw

© Commonwealth of Australia, 2025 Skills Insight

- operating a bandsaw
- routine maintenance of a bandsaw

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX202 Clean work area during operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to perform ongoing cleaning and housekeeping tasks for a production area during working hours.

This unit is applicable to workers in meat processing plants, smallgoods factories, knackeries, food service operations and wholesale operations.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Remove waste from work areas	1.1 Deposit waste into correct bins, hoppers and chutes in accordance with workplace requirements 1.2 Use correct shovels, brooms and bins when gathering waste material to avoid cross-contamination of product and work areas 1.3 Keep work area free from waste or trimmings to ensure a safe working environment for fellow workers 1.4 Maintain segregation of edible and inedible product at all

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	times (where applicable) 1.5 Perform work without contaminating edible product (where applicable) 1.6 Shift waste in bins and tubs in accordance with manual handling procedures
2. Clean areas during production	2.1 Clean work areas in accordance with workplace requirements including Quality Assurance (QA) and workplace health and safety requirements 2.2 Clean work areas while avoiding contamination of product 2.3 Use cleaning chemicals as directed and in accordance with standard workplace procedures (where part of an individual's duties)
3. Wash and store cleaning equipment, tubs and bins	3.1 Roll and store hoses safely in accordance with workplace requirements 3.2 Clean and store brooms, shovels and scrubbing brushes appropriately when not in use 3.3 Store chemicals, if used, in accordance with workplace requirements in designated locations 3.4 Sanitise all bins, tubs etc in accordance with workplace requirements (where applicable)

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPS201C Clean work area during operations.

Assessment Requirements for AMPX202 Clean work area during operations

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- follow work instructions which may require the employee to:
  - communicate to supervisor any problems or difficulties
  - maintain cleanliness of work areas and surfaces to workplace requirements
  - sort and dispose of waste in accordance with workplace requirements
  - store equipment and chemicals (where applicable) safely
  - use cleaning materials and equipment in a safe and hygienic manner
  - use hoses in a manner that effectively cleans without contaminating surfaces, edible or inedible product
- apply relevant regulatory requirements
- apply relevant communication skills
- demonstrate a broad understanding of the inedible waste processing that occurs in the meat industry
- explain potential threat to the edible product of inadequate cleaning demonstrate the capacity to clean the work area safely during operations

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements associated with the work e.g. using very hot water, using correct manual handling procedures, and maintaining a safe work environment for others
- potential threat to the edible product of inadequate cleaning
- correct usage of chemicals (as required)
- importance of dealing with or reporting problems associated with waste disposal e.g. blocked chutes or drains
- relevant regulatory requirements
- workplace health and safety issues associated with cleaning during operations
- impact of incorrect disposal of waste on the environment and on by-products processing

© Commonwealth of Australia, 2025 Skills Insight

- importance of following the documented cleaning procedure or schedule
- importance of, and difference between, wet and dry cleaning procedures

Assessment Conditions

Competency must be demonstrated under normal production conditions.

Assessment must occur in a registered meat processing or food handling premises.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX203 Operate scales and semi-automatic labelling machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate carton scales and electronic label-generating and record-keeping equipment, and, where appropriate, recover data and produce reports where this forms part of work instructions.

This unit is applicable to workers using carton scales and labelling machinery in boning rooms, offal rooms, pet meat packing rooms, smallgoods and food service operations.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select meat product	1.1 Identify meat products for weighing and labelling according to workplace requirements 1.2 Place carton on scales in accordance with manufacturer's specifications and workplace requirements
2. Enter product data	2.1 Enter codes for specific cuts into the system 2.2 Recover data in report form where this is part of work

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	instructions
3. Weigh carton	3.1 Weigh carton and record details according to workplace requirements 3.2 Monitor equipment operation to ensure correct information is recorded on label
4. Label carton	4.1 Remove label from labelling equipment and place on carton according to workplace and regulatory requirements 4.2 Label carton clearly for loadout 4.3 Monitor labelling of cartons for accuracy in correlation with products

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPS203C Operate scales and semi-automatic labelling machinery.

Assessment Requirements for AMPX203 Operate scales and semi-automatic labelling machinery

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- perform pre-start checks and routine maintenance as specified in work instructions
- monitor operation of equipment
- weigh and label meat product cartons in accordance with workplace and regulatory requirements
- check carton contents against labelling
- apply relevant communication and mathematical skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety requirements related to labelling
- regulatory requirements with regard to labelling
- consequences of incorrect labelling
- monitoring of consumables
- purpose of labelling information

Assessment Conditions

Competency must be demonstrated under normal rate of production.

Assessment must be conducted in a registered meat processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the current standards for RTOs.

AMPX204 Maintain production records

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to maintain records required for workplace and regulatory agencies by the stock person, boning room or chiller clerk, or the person responsible for maintaining smallgoods production records. It covers major record-keeping and report generating activities.

This unit is applicable to workers who are responsible for keeping detailed records relating to production such as kill sheets, chiller records, boning room records and loadout records. These record-keeping duties should form a significant part of the individual's responsibilities.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare production records	1.1 Identify workplace and regulatory requirements for record-keeping 1.2 Prepare production recording equipment or materials in accordance with work instructions 1.3 Update records on an electronic or manual system in accordance with work instructions 1.4 Correct shortcomings of the recording system if applicable
2. Generate reports	2.1 Prepare data summaries and reports in accordance with workplace

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	requirements 2.2 Generate major reports detailing inventory, production or staffing data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX204 Maintain production records

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Competency must be demonstrated while collecting and recording significant data over a period of time. The data should involve some complexity in categories and require accurate recording.

The candidate must:

- follow all work instructions effectively
- generate reports to meet workplace and regulatory requirements
- apply relevant workplace health and safety requirements
- maintain stocks of consumables for use
- prepare all recording equipment for use (where relevant)
- use all recording equipment properly (where relevant)
- record data according to data requirements
- update records as required
- prepare all summaries required
- apply relevant communication and mathematical skills
- describe the workplace and/or regulatory requirements for record-keeping

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace requirements for reports
- relevant security arrangements such as Department of Agriculture or company requirements
- function and uses of the reports generated
- possible shortcomings of recording and how to correct them
- purposes of keeping production records
- relevant workplace health and safety requirements

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment should be undertaken in an operating meat processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace project
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX205 Clean chillers

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to clean and sanitise chillers when empty of product.

This unit is applicable to workers at abattoirs, boning rooms, smallgoods factories, game meat processing plants, food services, smallgoods establishments and wholesale operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

The unit must be delivered and assessed using Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Clean chillers	1.1 Clean chillers in accordance with cleaning program and workplace, workplace health and safety and regulatory

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	requirements 1.2 Workplace health and safety risks and requirements are identified specifically for chillers 1.3 Identify specific areas of contamination risk for the products 1.4 Handle and store chemicals according to workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMPS205C Clean chillers.

Assessment Requirements for AMPX205 Clean chillers

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must clean and sanitise chillers when empty of product.

The candidate must:

- implement cleaning regime for chillers in accordance with workplace, workplace health and safety, and regulatory requirements
- apply relevant communication and mathematical skills

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene and sanitation monitoring programs for chillers
- importance of avoiding condensation in chillers
- chiller cleaning program
- potential contamination risks for product in chillers and freezers
- workplace health and safety hazards of working in a cold environment

Assessment Conditions

Competency must be demonstrated when the chillers and plant are operating during normal production.

Assessment must occur in a registered meat processing plant or premises.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the current standards for RTOs.

AMPX206 Operate forklift in a specific workplace

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate forklifts in specific work areas, which may require fitting forklifts with specialised lifting attachments or shifting hazardous materials. These areas include freezers, cold stores, loadouts, skin sheds, smallgoods and rendering plants.

This unit is applicable to workers in meat processing plants and smallgoods enterprises who operate forklifts in environments requiring specific competencies. Prior to undertaking this unit, individuals should have gained the necessary licence or permit to operate a forklift.

This unit must be delivered in the context of Australian meat industry processing standards and regulations.

All work should be carried out in relation to workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX206 Operate forklift in a specific workplace

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- gain a licence and satisfy traffic authority examiner, where required by government regulation
- explain operational safety requirements including workplace health and safety requirements
- operate a forklift in a specific workplace to requirements of that workplace
- operate a forklift in accordance with workplace requirements, and workplace health and safety, and manufacturer's specifications
- transport and store a variety of products to meet production requirements
- maintain equipment records
- apply hand-eye coordination
- apply relevant communication and mathematical skills
- assess, interpret and apply technical information

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- characteristics, capabilities and limitations of the forklift
- operational safety requirements including workplace health and safety requirements
- QA considerations for transporting product within the plant
- critical aspects of:
  - identification of damage or leaks which may compromise operational capability or safety
  - operational safety
- specific features of the workplace that impact on the operation of the forklift (e.g. operating in a cold environment)
- workplace operating procedures

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated in specific meat processing plant environments such as freezers and under normal operating conditions.

Assessment must be conducted in an operating meat processing plant and assessment tools must be customised to the workplace-specific workplace health and safety procedures and work instructions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPX207 Vacuum pack product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be observed vacuum packing products.

The candidate must:

- prepare for vacuum packaging according to workplace health and safety, and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- explain defects that can occur during packaging
- demonstrate hygienic cleaning of equipment
- demonstrate hygienic work practices for vacuum packing
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements
- manage time and priorities

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific workplace health and safety requirements for vacuum packing
- purpose of vacuum packaging
- relevant communication and mathematical skills
- relevant regulatory requirements
- general operating principles, including start-up and shut-down procedures
- manufacturer's and workplace requirements for vacuum packaging of product

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency should be demonstrated at the normal speed of production.

Assessment should take place in an operating meat processing plant or food service operation.

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration or project
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX208 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to reduce negative environmental impacts of meat industry work practices.

This unit addresses the knowledge, processes and techniques necessary to support environmentally sustainable work practices. It is applicable to personnel in all sectors and areas, and at all levels of the meat processing industry. It is particularly applicable to production personnel in meat processing, smallgoods operators and meat retailing personnel.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
1. Identify current resource use	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Identify wastes and emissions created by own work role
2. Comply with environmental regulations	2.1 Follow regulatory requirements, work instructions and procedures to ensure compliance 2.2 Identify non-conformances and follow corrective action procedures
3. Seek opportunities to improve resource efficiency	3.1 Follow enterprise plans to improve environmental practices and resource efficiency 3.2 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX208 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must:

- demonstrate a basic understanding of sustainability
- interpret workplace information
- report non-conformances
- recognise and follow procedures, follow instructions and respond to change
- relate to people from a range of social, cultural, ethnic backgrounds, and physical and mental abilities
- apply relevant communication and mathematical skills
- ask questions and clarify work requirements
- follow good housekeeping procedures and practices
- apply relevant workplace health and safety, regulatory and workplace requirements
- take corrective action according to workplace requirements
- work with others to solve problems relating to environmental performance

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- environmental and resource efficiency hazards and risks associated with own workplace and own work area
- workplace environmental management strategies affecting own work practice
- relevant environmental and resource efficiency systems and procedures for own work area
- relevant workplace health and safety, regulatory and workplace requirements

Assessment Conditions

Competency in this unit must be demonstrated under conditions that are the same as the speed of production and within the parameters of the role responsibilities.

© Commonwealth of Australia, 2025 Skills Insight

Assessment should be undertaken in an operating meat processing plant or food service operation.

The following three forms of assessment must be used:

- demonstration - snapshot of performance
- quiz, question and answer
- observation of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX209 Sharpen knives

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to maintain knives for safe and effective use in a meat establishment.

This unit is applicable to any worker who is required to sharpen a knife to use in a processing, wholesaling or retail meat establishment. This unit is a pre-requisite for any other unit where a knife is used to perform a task.

This unit must be delivered in the context of Australian meat industry standards and regulations.

All work should be carried out in accordance with workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX209 Sharpen knives

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed maintaining knives for safe and effective use in a meat establishment. Competency must be demonstrated in conjunction with a skill or task requiring the use of a knife. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- steel a knife correctly
- use safe techniques of knife sharpening to workplace, hygiene and sanitation, and health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- steps in steeling a knife to maintain edge
- technique to sharpen a knife with an appropriate bevel edge
- theory of knife sharpening
- sterilisation, and hygiene and sanitation requirements related to knife sharpening
- workplace health and safety issues related to the use and sharpening of knives
- relevant regulatory requirements

Assessment Conditions

Assessment can be carried out in an actual or simulated workplace.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third party report of performance over time

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy current standards for RTOs.

AMPX210 Prepare and slice meat cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare and slice meat into finished meat cuts.

This unit is applicable to operators in smallgoods, food services and meat retail businesses where products are prepared for sale.

This unit must be delivered in the context of Australian meat industry standards.

All work should be carried out in relation to workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX210 Prepare and slice meat cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be observed preparing and slicing meat into finished cuts.

For meat retailing:

- prepare and slice meat cuts for all primals for three species (including beef and sheep) to workplace and regulatory requirements, similar to the speed of production.

For smallgoods manufacturing:

- prepare and slice meat cuts for all primals for one species to workplace and regulatory requirements, similar to the speed of production.

The candidate must:

- demonstrate correct cutting, slicing and trimming techniques
- use safe and effective knife skills
- identify and name examples of finished meat cuts
- apply relevant regulatory requirements
- slice and trim meat in preparation for sale according to workplace health and safety, hygiene and workplace requirements and customer specifications
- prepare finished meat cuts from all primals relevant to meat retailing and/or smallgoods manufacturing
- remove defects from products according to workplace and regulatory requirements
- seek advice from relevant sources when working with new cutting equipment or products
- use communication skills appropriate to the task

Knowledge Evidence

The candidate must demonstrate a factual, technical and procedural knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- principles of QA, hygiene and sanitation, and workplace health and safety in relation to slicing meat
- workplace requirements related to slicing meat
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX211 Trim meat to specifications

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must be observed trimming a selection of meat cuts in accordance with workplace specifications.

The candidate must:

- prepare equipment appropriately prior to the commencement of the task
- give examples of customer and workplace specifications for trimming meat
- trim meat to specifications as follows:
  - for meat retailing, meat must include beef, sheep meat and one other species
  - for smallgoods manufacturing, meat must include a minimum of one species
- use a knife to workplace, health and safety, and hygiene requirements
- maintain a sharp knife
- apply relevant communication skills
- apply relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- hygiene requirements for the handling of meat products
- steps in sharpening a knife
- workplace, health and safety and hygiene requirements for use of a knife
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Assessment Requirements for AMPX212 Package product using automatic packing and labelling equipment

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed packing and labelling meat products, using relevant equipment. Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- assemble the packaging unit
- check safety features are in place
- check the unit to ensure cleanliness and working order
- accurately enter information in labelling equipment
- set weight controls
- load product according to specifications
- operate packaging equipment to package products according to manufacturer's specifications, workplace, health and safety, hygiene and sanitation requirements
- adjust equipment settings according to packaging instructions or schedules
- complete packaging and labelling records accurately
- package product to customer specifications
- identify and report faults in equipment
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements
- use estimation and manual scales to check-weigh product

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- methods of recording production
- regulatory requirements related to packaging
- features of the packaging unit including parts, safety features, start-up and shut-down procedures, possible faults and adjustments

© Commonwealth of Australia, 2025 Skills Insight

- production schedule for automatic packaging and labelling equipment
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated using automated packaging equipment under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX213 Despatch meat product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed placing orders at a despatch point and loading products into transport.

The candidate must:

- identify species and various meat products for storage
- handle product according to hygiene requirements
- monitor refrigerated temperature on a regular basis
- rotate stock
- apply relevant communication and mathematical skills
- arrange and consolidate orders to customer and workplace requirements
- record information accurately and legibly
- seek advice where necessary from relevant sources when working with new products, technology or changes in work practices
- use correct manual handling techniques for transferring product to storage facilities
- maintain clean holding rooms

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- storage requirements for products
- recording procedures for loadout of product
- regulatory requirements related to storage and handling of product
- temperatures for storage of meat products
- workplace requirements for despatch of meat
- appropriate storage facilities for individual products

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- use a range of packaging equipment to package processed meats and smallgoods for retail sale
- identify food safety hazards in packaging processed meat and take appropriate preventative or corrective action
- identify sub-standard or contaminated product
- clean equipment according to hygiene requirements
- work with team members
- apply relevant regulatory and workplace requirements
- report equipment faults, either verbally or in writing, according to workplace requirements
- seek advice from appropriate sources when working with new products or equipment
- use mathematical skills relevant to the task
- use relevant communication skills.

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- effect of packaging materials and processes on quality, safety and shelf life of product
- regulatory requirements for packaging and labelling
- packaging processes
- workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements

© Commonwealth of Australia, 2025 Skills Insight

- specific workplace health and safety requirements for vacuum packing
- general operating principles, including start-up and shut-down procedures.

Assessment Conditions

Competency must be demonstrated under conditions similar to the speed of production and within the parameters of the role and responsibilities.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

The candidate must operate packaging processes that incorporate gas flushing.

The candidate must:

- set up and place the requirements for packaging in appropriate positions on packaging line to workplace, health and safety, and hygiene and sanitation requirements
- set up and check gas cylinders to workplace requirements and supplier's specifications
- set up the machinery for packaging process to workplace, health and safety, hygiene and sanitation requirements and manufacturer's specifications
- conduct gas flushing process to workplace requirements
- operate packaging machinery to throughput requirements for a variety of products to manufacturer's specifications and workplace, health and safety, QA, and hygiene and sanitation requirements
- assess packaged product to workplace, and hygiene and sanitation requirements
- label packaged product to workplace requirements
- take appropriate action if product is out-of-specification
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- explain the gas flushing process
- apply relevant health and safety and regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- types of packaging where gas flushing is included
- workplace requirements related to checking the packaged product against specifications
- workplace requirements related to the gas flushing process of packaging
- relevant health and safety and regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX218 Operate metal detection unit

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to operate a metal detection unit.

This unit is suitable for operators working in packaging in boning rooms, smallgoods manufacturing, value-adding and food services establishments.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX218 Operate metal detection unit

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate a metal detection unit to production requirements.

The candidate must:

- follow the requirements of the work instruction
- work at production speed
- set up a metal detection unit
- operate a metal detection unit
- clean a metal detection unit
- maintain metal detection unit
- comply with workplace health and safety, hygiene and sanitation, and manufacturer's requirements
- apply relevant regulatory requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- operation of the metal detection unit
- reasons for having metal detection units and their location at the work site
- workplace procedures when metal is detected in a product
- relevant regulatory requirements

Assessment Conditions

Competency in this unit must be demonstrated over time and under typical operating and production conditions for the enterprise.

© Commonwealth of Australia, 2025 Skills Insight

Candidates must have access to metal detection equipment which meets workplace health and safety requirements.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX301 Assess product in chillers

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to manage product in chillers, in terms of specifications and hygienic storage.

This unit is applicable to supervisors and Quality Assurance (QA) staff responsible for managing, assessing and monitoring product in chillers.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX301 Assess product in chillers

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must be observed assessing products in chillers.

The candidate must:

- assess meat colour, fat colour and marbling
- ensure the chiller cleaning program is followed
- monitor chiller temperature
- monitor product handling and identification
- apply mathematical concepts to monitoring procedures (e.g. temperature checks and adjustments)
- apply relevant communication skills
- assess carcases according to workplace and regulatory requirements
- complete documentation, including accurate and legible labelling
- identify and apply relevant workplace health and safety requirements
- identify product chiller requirements
- identify product health and hygiene requirements
- use available technology to record, gather and interpret product-monitoring data

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the carcase grading system employed in an enterprise
- product transfer and storage methods
- the process involved in assessing chillers in the workplace
- product quality monitoring processes
- the importance of fat depth, marbling, carcase colour and other grading parameters
- rejection procedures

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in an operating meat processing enterprise.

As a minimum, the following three forms of evidence must be used:

- Workplace Referee report
- Knowledge test
- Assessor observation of performance on the job

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPX302 Cure and corn product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be observed curing and corning various meat products.

The candidate must:

- identify meat cuts used in curing and corning
- identify various ingredients used in curing and explain their purposes
- identify sub-standard product and address the problem according to workplace requirements
- follow recipes and procedures accurately
- activate processing equipment to assess its readiness for operational use
- operate mixing machines for required length of time
- operate adjustment tools and equipment correctly
- perform running adjustments in accordance with workplace requirements and manufacturer's specifications
- pump meat correctly to avoid air pockets
- pump meat to increase weight in accordance with workplace requirements
- perform curing and corning in accordance with workplace, workplace health and safety, hygiene and regulatory requirement
- demonstrate correct pickling procedures in accordance with product specifications and workplace requirements
- wash residue from cured meats following removal from holding brine
- report any faults and required adjustments to processing equipment in accordance with workplace procedures
- use tools and cleaning agents appropriate to the cleaning activity and manufacturer's specifications
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements
- seek advice from appropriate sources when working with new products or equipment

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- conditions under which equipment may need adjusting
- function of various additives and ingredients
- meat curing process
- purpose and effect of brine on meat
- health regulations which apply to curing and corning of meats
- effects of curing on shelf life and taste of product
- purpose and use of processing equipment used in curing and corning products
- purpose of correct water temperature and correct additive sequence
- reasons for pickling in accordance with pump percentage and yield requirements
- selection criteria for meat for the curing or corning process
- relevant regulatory requirements
- maximum amount of nitrite allowed in cured, corned or salted meats
- procedures for cleaning processing equipment
- 'osmosis' in relation to the curing process

Assessment Conditions

Competency must be demonstrated under typical operating conditions within the parameters of role and responsibilities.

Assessment must occur in the workplace under normal production conditions.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX303 Break carcase into primal cuts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to break the carcase into primals and trim in accordance with relevant specifications.

This unit is applicable to smallgoods operators and meat tradespersons in the retail industry who are required to separate primal cuts for further processing or preparation.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements, regulatory requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

Pre-requisite Unit

Assessment Requirements for AMPX303 Break carcase into primal cuts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be observed breaking carcases into primals and trim cuts in accordance with relevant specifications.

For **meat retail** the candidate must be able to:

- break carcase into primal cuts for a minimum of three species (including beef and sheep)
- identify primary cut specifications for beef and at least two species of small stock

For **smallgoods** manufacturing the candidate must be able to:

- break carcase into primal cuts for a minimum of one species
- identify primary cut specifications for at least one species

The candidate must:

- identify the major anatomical structures of the carcase of each species
- prepare equipment for breaking carcase correctly and safely
- position or fasten carcase securely for separation
- separate carcases into primal cuts for a range of meat cuts (minimum of three species for meat retailing and one species for smallgoods manufacturing), in accordance with workplace, workplace health and safety, hygiene requirements and customer specifications
- use acceptable cutting lines to produce primary cuts to workplace requirements
- identify contaminated product and take appropriate corrective action
- demonstrate safe manual handling techniques
- sanitise equipment according to workplace requirements
- apply relevant communication skills
- apply relevant regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hygiene, workplace health and safety, and workplace requirements when breaking carcases
- quality requirements for breaking carcases
- principles of contamination in regard to primary cuts
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPX304 Prepare primal cuts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed boning and trimming primals into specific meat products (cuts).

For **meat retail** the candidate must be able to:

- identify meat cut specifications for a minimum of three species using cut descriptions according to customer specifications and regulatory requirements

For **smallgoods** manufacturing the candidate must be able to:

- identify meat cut specifications for a minimum of one species

Where the candidate does not prepare primal cuts in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The candidate must:

- correctly use personal protective equipment (PPE) when boning
- position cuts securely for boning
- using knives and other cutting tools safely and effectively when separating primals
- use safe manual handling techniques
- identify contaminated product and take corrective action according to workplace requirements
- sterilise or sanitise equipment according to regulatory and workplace requirements
- apply relevant communication and mathematical skills
- describe meat cut specifications in accordance with customer specifications and regulatory requirements
- apply relevant regulatory requirements
- seek advice from appropriate sources where necessary, particularly when working with new species, technology or changed regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- principles of hygiene and sanitation, and workplace health and safety in relation to cutting meat product
- food safety, QA and product quality requirements for boning primals
- principles of cross-contamination in relation to cutting
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal enterprise or production conditions or in a simulated environment.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX305 Smoke product

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed preparing smoked products including ham, bacon and smallgoods products. Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- produce commercially suitable smoked products
- demonstrate correct loading procedure for both a full and less-than-full smokehouse
- activate and operate machinery according to manufacturer's and workplace instructions
- measure and monitor product internal temperature correctly to ensure it meets product specifications
- monitor smoking of meat on a regular basis to meet product specifications (including, where relevant, the interpretation of graphs or flow charts or mimic panels and controls)
- interpret cooking records where appropriate with respect to relevant product
- adjust processing as required to achieve product specifications
- apply relevant communication and mathematical skills
- operate smoke facility according to workplace health and safety, hygiene, regulatory, product specifications and workplace requirements, and meet production requirements
- report machine faults according to workplace specifications
- store meat according to workplace health and safety, hygiene, regulatory, product specifications and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- correct smoking procedure for specific product
- storage procedures for smoked products
- meat smoking process
- the purpose and effect of smoking processes on meat
- health regulations that apply to smoking of meats
- chilling requirements for different products

© Commonwealth of Australia, 2025 Skills Insight

- the possible effects of inconsistent temperature on product
- the effects of smoking on shelf life and product taste
- the purpose of correct water temperature and correct additive sequence, especially phosphate and smoke
- recording requirements for the smoking/cooking process
- relevant workplace requirements related to:
  - appropriate humidity levels
  - effect of moisture on casings
  - smoke generator
  - smoke jet
  - sock
  - wet bulb sock
- the use and purpose of raw materials for smoking meat
- the use and purpose of ingredients for smoking meat
- mathematical information in work instructions, specifications and recipes
- meat cuts used in smoking
- cause and effects of, and explain the appropriate corrective action for:
  - cycle out of sequence
  - excess smoke
  - insufficient smoke

Assessment Conditions

Competency must be demonstrated over time and under normal operating conditions for the enterprise, within the parameters of the role and responsibilities, and according to workplace requirements.

Assessment may occur in the workplace under normal operating conditions or in a simulated environment.

As a minimum, the following three forms of assessment are required:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs

AMPX306 Provide coaching

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to act as a coach to others in the workplace.

Coaching is used when experienced personnel are teamed with new recruits or employees new to a position. The role of a coach is to provide advice, support and guidance as the employee learns new tasks and skills, and becomes familiar with the position and the working environment. In many enterprises, this is referred to as a 'buddy' system. Coaching or buddying is used throughout the meat industry.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene and sanitation standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX306 Provide coaching

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed acting as a coach to others in the workplace. Evidence must demonstrate the candidate’s consistency of performance over time.

The candidate must:

- apply communication skills in giving, receiving and analysing feedback relevant to the process of coaching
- apply the organisation's policies, procedures and plans
- apply relevant problem-solving skills
- assist another individual to achieve their goals and development needs through the use of significant workplace knowledge
- create a learning environment that allows for open discussion, feedback, tolerance of mistakes during learning within a safe environment, and affirmation of the individual's worthiness
- demonstrate effective methods of coaching
- demonstrate effective planning skills to organise activities
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- use appropriate methods and techniques for eliciting and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- effective learning styles and methods of coaching
- methods for identifying development opportunities
- enterprise's Standard Operating Procedures (SOPs), work instructions and relevant regulatory requirements, and apply them to the coaching process
- principles of coaching for development of competence

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under typical operating or production conditions for the enterprise.

Assessment must occur in the workplace and under normal enterprise or production conditions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX307 Provide mentoring

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to act as a mentor to others in the workplace. Mentoring is a strategy to promote individual well-being in the workplace and to facilitate retention.

In the meat industry, mentors play a key role. Mentors may be from all areas and levels of the organisation. Mentors may be the people champions or change champions on-site. Mentors can be found in all sectors of the meat industry.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene and sanitation standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish mentoring relationship	1.1 Identify areas for development in accordance with organisational and individual requirements 1.2 Use effective communication styles to develop trust, confidence and rapport 1.3 Make mentoring arrangements on how the relationship will be conducted 1.4 Agree upon expectations and goals 1.5 Seek input from relevant personnel if required
2. Provide mentoring support	2.1 Assist individual to identify and evaluate opportunities to achieve agreed goals and development activities 2.2 Share personal experiences and knowledge with individuals to assist in progress to agreed goals and development 2.3 Provide a supportive environment to allow individuals to progress towards achieving their goals 2.4 Encourage individuals to make decisions and take responsibility for the courses of action or solutions under consideration 2.5 Provide assistance and guidance in a manner that allows individuals to retain responsibility for achieving their goals
3. Evaluate effectiveness of mentoring	3.1 Recognise and openly discuss changes in the mentoring relationship 3.2 Make adjustments to the relationship to take account of the needs of both the mentor and the individual 3.3 Seek feedback from the individual and other relevant personnel to identify and implement improvements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX307 Provide mentoring

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed acting as a mentor to others in the workplace. Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must:

- establish, maintain and appropriately modify a mentoring relationship
- use effective planning skills to organise activities
- apply communication skills in giving, receiving and analysing feedback relating to the mentoring process
- apply relevant problem-solving skills
- assist another individual to achieve their goals and development needs using significant workplace knowledge and experience
- demonstrate effective methods of mentoring
- apply relevant workplace health and safety, regulatory and workplace requirements
- demonstrate methods and techniques for eliciting and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- methods for identifying development opportunities
- enterprise Standard Operating Procedures (SOPs), work instructions, relevant regulatory requirements and how they apply to mentoring processes
- principles of mentoring
- role and benefits of mentoring
- relevant workplace health and safety, regulatory and workplace requirements
- methods and techniques for eliciting and interpreting feedback

AMPX308 Follow and implement an established work plan

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available procedures and advice. Work plans may need to be modified with supervisor/team leader agreement to suit changing conditions and priorities.

Team leaders and Quality Assurance (QA) Officers in the meat industry are required to implement a wide variety of work plans such as schedules, work instructions, customer orders and daily plans. They will be required to interpret, prioritise, communicate and implement plans in the context of a team environment.

Work and tasks may be allocated through managers, supervisors, work schedules or plans. They may be individual tasks and jobs or team function work schedules.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPX308 Follow and implement an established work plan

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must develop, implement and modify a work plan to suit their daily work activities.

The candidate must:

- use communication skills appropriate to the task, including reading, writing, numeracy, listening and speaking skills
- identify and control hazards
- interpret work schedules and follow instructions
- follow relevant procedures
- effectively and efficiently utilise resources and time
- recognise potential disruptions or changed circumstances and modify work plans in conjunction with relevant personnel
- seek assistance from relevant personnel when difficulties arise
- apply problem-solving skills relevant to work instructions and Standard Operating Procedures (SOPs)
- interpret and apply enterprise's standard operating procedures, work instructions and relevant regulatory requirements
- use appropriate methods and techniques for obtaining and interpreting feedback
- work effectively with individuals who have diverse work styles, aspirations, cultures and perspectives

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- enterprise quality, operational and safety procedures
- regulatory requirements and customer specifications
- importance of workplace documentation
- routine work planning processes
- potential safety implications of modifying the work plan

© Commonwealth of Australia, 2025 Skills Insight

- job outcomes, standards and priorities
- equipment and processes used in the workplace
- hazards associated with the process
- methods of controlling the hazards according to procedures

Assessment Conditions

Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AMPX309 Identify and repair equipment faults

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be observed locating and repairing or replacing faulty equipment in accordance with agreed upon workplace practices. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- prepare equipment and work area to conduct maintenance
- wear personal protective clothing for maintenance work
- apply relevant regulatory requirements
- follow instructions in undertaking agreed maintenance task
- diagnose and repair or replace faulty equipment according to workplace health and safety, hygiene and sanitation, workplace requirements and manufacturer's specifications
- apply fault diagnosis techniques and procedures
- demonstrate the use of common hand and power tools for component repair or replacement
- verify completion of repair or replacement
- clean maintenance tools or equipment
- maintain a clean and safe work area
- pack or store tools in designated location
- apply relevant communication and mathematical skills including reporting and describing faults, calculating weights, measures, quantities and time
- seek advice from others and relevant sources, including manuals, to learn new skills and techniques

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- common problems in conducting maintenance
- consequences of incorrect or inadequate maintenance
- environmental aspects related to maintenance

© Commonwealth of Australia, 2025 Skills Insight

- equipment isolation requirements
- food safety factors in maintaining equipment
- workplace health and safety hazards and controls
- purpose and use of common hand and power tools for component repair or replacement
- fault diagnosis techniques and procedures
- purpose of routine preventative maintenance
- quality parameters to be achieved
- recording or reporting systems and processes
- relationship of maintenance to other work activities in the meat or enterprise plant
- roles of and relationships with others involved in carrying out maintenance functions
- services used in maintenance
- significance of minimising equipment down time
- waste handling requirements
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating and production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX310 Perform pre-operations hygiene assessment

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Performance Evidence

The candidate must undertake a pre-operations hygiene assessment prior to the commencement of production.

The candidate must:

- prepare for and conduct pre-operations hygiene assessment according to workplace, hygiene and sanitation, workplace health and safety and regulatory requirements
- use testing equipment correctly
- accurately interpret and record results
- consistently identify areas of non-conformance and take corrective action
- comply with workplace health and safety requirements
- apply relevant communication skills when reporting to supervisors and interacting with team members.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- process for conducting pre-operational hygiene assessment
- likely causes of contamination
- corrective action to be taken when contamination is identified
- workplace record-keeping requirements
- regulatory requirements as they relate to pre-operational inspection processes
- relevant workplace health and safety requirements.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in an operating and registered meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.

AMPX311 Monitor production of packaged product to customer specifications

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to monitor packers and packaged product to ensure it meets customer and workplace specifications.

This unit is applicable to products packaged in abattoirs, boning rooms, smallgoods plants, game processing plants, food services and wholesaling operations. This role will usually be performed by persons with leading hand responsibilities.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Assessment Requirements for AMPX311 Monitor production of packaged product to customer specifications

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must monitor packers and packaged product to ensure it meets customer and workplace specifications.

The candidate must:

- identify, explain and apply customer and workplace specifications
- check and assess packaged product according to workplace requirements
- address non-conformance in a timely manner
- identify and apply relevant regulatory requirements
- follow workplace health and safety, and hygiene and sanitation requirements
- maintain monitoring records to workplace requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- customer specifications
- relevant workplace and regulatory requirements
- workplace monitoring requirements and processes
- causes of contamination and corrective actions
- workplace labelling systems and requirements
- actions to be taken for out-of-specification product

Assessment Conditions

Assessment must be conducted in an operating meat packing room.

© Commonwealth of Australia, 2025 Skills Insight

Competency must be demonstrated at a rate of packing that meets workplace requirements over a period of time.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX312 Calculate carcase yield in a boning room

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to calculate carcase and product yield rates in a boning room. It also covers the causes of variation in yields achieved in a boning room.

This unit is applicable to Quality Assurance officers and boning room supervisors who are required to calculate carcase and product yields for a variety of classes of stock. Individuals work under broad direction and take responsibility for their own work and provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

All work must be carried out to comply with workplace procedures, customer requirements, product specifications, work health and safety and hygiene requirements and Australian meat processing standards and regulations.

Pre-requisite Unit

Nil

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. List classes of stock for yield calculation	1.1 Establish the classes of stock that impact on carcase yields 1.2 Determine the variables that impact on carcase yields
2. Calculate yield of a single carcase	2.1 Establish the carcase weight to be used for calculation according to workplace specifications 2.2 Confirm class of stock to be assessed according to workplace

Assessment Requirements for AMPX312 Calculate carcase yield in a boning room

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

The individual must complete calculations for classes of stock relevant to the enterprise and the range of cuts used by the company to make up a full set in carcase and product yield calculations. The individual must demonstrate that he/she has:

- managed the planning required for calculating individual carcase and product yield calculation
- weighed individual products accurately
- collected carcase weights
- collected production run weights for carcases and cuts
- calculated percentages accurately
- reported on differences between actual and expected yields and possible methods for achieving expected yields
- identified and applied work health and safety and regulatory requirements relevant to calculating yield in a boning room.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. The individual must demonstrate knowledge of:

- the significance of yield calculations to productivity and profitability of an operation
- the range of cuts that make up a full set
- the potential causes for differences between actual and expected yields
- the ways of correcting differences between actual and expected yields.

Assessment Conditions

Assessment of skills must take place under the following conditions.

© Commonwealth of Australia, 2025 Skills Insight

- physical conditions:
  - operating boning room where the calculation of yield can be demonstrated in an operating environment
- resources, equipment and materials:
  - real or simulated data which specify expected enterprise yields
  - real or simulated data for actual yields to enable the calculation of percentages
- relationships:
  - personnel to whom analysis of discrepancies between actual and expected yields need to be explained.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AMPX313 Contribute to energy efficiency

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must maintain energy efficient work practices and contribute to systems improvement with regard to energy efficiency in the meat processing industry.

The candidate must:

- follow relevant workplace health and safety, environmental, and organisational policies and procedures relevant to maintaining and contributing to energy efficiency
- measure and interpret enterprise energy consumption using established data collection systems
- contribute to workplace energy efficiency practices
- support other workers to achieve workplace environmental policies and procedures
- apply relevant communication skills, including interpreting and explaining enterprise energy polices; communicating new ideas and information
- recognise and explain mathematical information as part of data collection and analysis processes

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- relevant enterprise policies and procedures
- applicable regulatory requirements
- enterprise data collection and analysis systems
- current industry practices and developments related to energy efficiency
- relevant enterprise equipment maintenance and replacement schedules

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

© Commonwealth of Australia, 2025 Skills Insight

As a minimum, three different forms of assessment must be used, including:

- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPX401 Monitor meat preservation process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to monitor the hygienic preservation of meat and ensure compliance with quality standards and regulatory requirements.

This unit is applicable to meat safety officers (inspectors) and Quality Assurance (QA) managers responsible for overseeing meat preservation.

All work is carried out to comply with product specifications, customer requirements and workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Overview the meat preservation process	1.1 Identify and explain types of preservation processes used by the meat industry 1.2 Identify meat quality required for preservation processes according to customer and workplace requirements 1.3 Prepare ingredients and equipment required for the preservation process according to product specifications, hygiene and sanitation, and safety requirements
2. Monitor the meat preservation process	2.1 Inspect and monitor product and process to ensure meat is preserved to specifications, health, hygiene and customer requirements 2.2 Regularly monitor equipment or processes involved in the preservation process at critical control points 2.3 Monitor and follow procedures to ensure quality and hygiene of products at all times 2.4 Implement procedures for rejecting, reprocessing and/or recall for products which do not meet specifications or hygiene requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX401 Monitor meat preservation process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must monitor the meat preservation process on at least three separate occasions.

The candidate must demonstrate ability to:

- identify critical control points in the meat preservation process
- prepare ingredients and equipment required for the preservation process according to product specifications, hygiene and sanitation, and safety requirements
- apply relevant communication and mathematical skills
- maintain currency of knowledge through professional development and self-directed research
- determine and implement corrective action
- identify and apply relevant workplace health and safety requirements
- interpret monitoring data and identify out-of-specification performance or product
- monitor the preservation of meat to ensure compliance with workplace and regulatory requirements
- record monitoring information accurately
- report non-conformances to appropriate personnel

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the criteria for rejected, reprocessed or recalled product
- the process involved in preserving meat in own workplace
- critical aspects of meat safety and hygiene during the preservation process
- relevant procedures for ensuring the preserved meat product is safe and fit for human consumption
- rejection and recall procedures
- the impact of the preservation process on product quality, including eating quality

© Commonwealth of Australia, 2025 Skills Insight

- current regulatory requirements relating to the preservation of meat and meat products
- the appropriate Australian Standard and regulatory requirements

Assessment Conditions

Competency must be demonstrated while monitoring a commercial meat preservation operation.

Assessment of application of reject and recall procedures may involve a simulated monitoring role for the trainee.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

All evidence must be collected in the context of current Australian meat industry standards and regulations.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX402 Monitor and overview the production of processed meats and smallgoods

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must monitor the production of processed meats and smallgoods in the workplace on at least three separate occasions.

The candidate must:

- monitor production of processed meats and smallgoods to ensure compliance with workplace and regulatory requirements
- apply relevant communication and mathematical skills
- identify and apply relevant workplace health and safety requirements
- propose and implement solutions to a range of production problems

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- hazards to the safe and hygienic manufacture of smallgoods
- options for chilling product
- the process involved in manufacturing smallgoods
- procedures required to ensure products are fit for human consumption and meet regulatory and quality requirements
- critical limits in the manufacture of smallgoods
- recall procedures, including notification of appropriate authorities
- the appropriate Australian Standard and regulatory requirements

Assessment Conditions

Competency must be demonstrated while monitoring the commercial production of processed meats and smallgoods.

© Commonwealth of Australia, 2025 Skills Insight

All evidence must be collected in the context of current Australian meat industry standards and regulations.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX403 Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to understand and manage the production processes for Uncooked Comminuted Fermented Meat (UCFM).

This unit is applicable to personnel responsible for the outcomes of the production processes of UCFM in a smallgoods processing operation.

This unit relates to the Australia New Zealand Food Standards Code, Standard 3.2.2 Food Safety Practices and General Requirements, Clause 3 Food handling - skills and knowledge, which states:

'A food business must ensure that persons undertaking or supervising food handling operations have:

(a) skills in food safety and food hygiene matters; and

(b) knowledge of food safety and food hygiene matters,

commensurate with their work activities.'

All work is carried out to comply with product specifications, customer requirements, hygiene standards and workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian Meat industry standards and regulations.

© Commonwealth of Australia, 2025 Skills Insight

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPCOR202 Apply hygiene and sanitation practices

AMPCOR404 Facilitate hygiene and sanitation performance

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify microbiological hazards for UCFM products	1.1 Identify types of micro-organisms 1.2 Identify major threats to UCFM products 1.3 Identify types of bacteria that cause food poisoning and spoilage 1.4 Identify effects of bacterial contamination for food poisoning (impact on people) and food spoilage (shelf life) 1.5 Identify sources of bacterial contamination 1.6 Identify growth characteristics and requirements of bacteria
2. Identify chemical hazards for UCFM products	2.1 Identify chemical hazards which may affect UCFM products 2.2 Identify common sources of chemical hazards/contamination 2.3 Explain control methods which prevent chemical contamination including enterprise policies and relevant national programs (including residue testing) 2.4 Explain the impact of chemical residues on meat (including poisoning, tainting, rejections)
3. Identify physical hazards for UCFM products	3.1 Explain physical hazards which may affect meat 3.2 Identify common sources of physical hazards and/or contamination 3.3 Explain control methods to prevent contamination 3.4 Explain effects or impact of physical hazards on meat
4. Overview the production of UCFM products	4.1 Identify and explain the range of UCFM products 4.2 Identify and explain the processing techniques involved in producing UCFM 4.3 Identify and explain the hygiene and food safety hazards

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	associated with the production of UCFM products 4.4 Identify and explain the regulatory requirements associated with the production of UCFM products
5. Monitor the preparation of processing equipment and areas	5.1 Identify procedures for pre-operational equipment checks in accordance with workplace policies and procedures, and manufacturer's instructions 5.2 Carry out and monitor pre-operational checks and procedures in accordance with workplace, food safety and regulatory requirements
6. Manage the production of UCFM and further processed products	6.1 Identify ingredients by type, quality and safety in accordance with product specifications and explain their functions 6.2 Identify types of meat, by-product, stock, additive, binder and spices selected in accordance with formulation specifications 6.3 Demonstrate handling requirements for ingredients (including starter culture) to prevent food safety hazards and ensure product quality and safety 6.4 Identify relevant processing equipment and explain operating procedures in accordance with manufacturer specifications 6.5 Describe relevant time, temperature and humidity requirements for fermentation, maturation and monitoring in accordance with product specifications, regulatory requirements and industry guidelines 6.6 Describe relevant consistency, appearance, texture and monitoring requirements in accordance with product specifications and regulatory requirements 6.7 Identify and assess procedures for rejecting, reprocessing and recalling products which fail to meet specifications or hygiene and sanitation requirements as measured against industry guidelines 6.8 Identify and monitor relevant processing area hygiene and sanitation requirements as specified in workplace procedures and regulatory requirements
7. Overview the implementation of the Approved Hazard Analysis Critical Control Point (HACCP) plan for the production of UCFM products	7.1 Identify Critical Control Points (CCPs) and control points for preventing and controlling bacterial contamination, including process controls and systems 7.2 Explain and implement control methods to prevent microbiological contamination 7.3 Identify critical limits for CCPs and implement monitoring processes 7.4 Describe validation requirements for critical limits of HACCP programs 7.5 Implement documented procedures which ensure out of control

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	CCPs are brought back under control and affected products are suitably handled 7.6 Implement documented procedures to ensure the whole HACCP system is regularly audited and verified as working effectively 7.7 Keep all documents and records required for the system available, up-to-date and in use

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

UCFM products must include knowledge of:

- caccitora
- chorizo
- csabai
- landjaeger
- Lebanon Bologne
- mettwurst
- polnische
- salami
- some cabanossi
- summer sausage
- Teewurst

Assessment Requirements for AMPX403 Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must display an understanding of and manage the production processes for UCFM. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply relevant communication and mathematical skills
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research by using resources including the internet, industry journals, circulars from regulators and industry workshops
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to resolve problems
- identify and apply relevant workplace health and safety and workplace requirements
- monitor production of UCFM to ensure compliance with workplace and regulatory requirements
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the relevant Australian Standards and associated regulations
- use technology to access information, prepare reports, and to access and prepare relevant data

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- process involved in manufacturing UCFM
- purpose of fermentation
- raw materials storage and selection requirements
- fermentation control criteria for pH
- fermentation speed control
- purpose of maturation and drying
- maturation and drying speed control

© Commonwealth of Australia, 2025 Skills Insight

- impact of raw material on product quality and food safety
- water activity as a release criteria
- microbiological criteria in UCFM production and microbiological limits of UCFM, particularly the following significant microbial pathogens: enterohaemorrhagic Escherichia coli, Salmonella, enterotoxin of Staphylococcus aureus and Listeria monocytogenes
- physical hazards for UCFM products
- role of starter culture
- storage and handling requirements for starter culture
- product handling and release criteria
- impact of critical limits in a HACCP program for UCFM production
- procedures required to ensure products are fit for human consumption and meets regulatory, food safety and quality requirements
- implementation of the HACCP plan for the production of UCFM products

Assessment Conditions

Competency must be demonstrated through sustained performance over time, with an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

The following methods of assessment must be used:

- assignment focusing on understanding and application of principles and theory to workplace operations
- third-party referee report of sustained performance at appropriate level of authority and responsibility
- workplace project with a focus on enterprise environment and conditions

Assessors must satisfy current standards for RTOs.

AMPX404 Conduct an internal audit of a documented program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to conduct an internal audit of a documented program.

This unit is applicable to plant managers, Quality Assurance (QA) personnel, managers and marketing personnel who have a role in scheduling, preparing for and conducting an internal audit in a meat processing plant. The scope of the audit may include operational areas such as food safety, workplace health and safety, vendor and environmental programs. This may include industry standards and codes.

Work in this unit must be carried out to comply with the appropriate Australian Standard.

All work should be carried out to comply with workplace requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPX404 Conduct an internal audit of a documented program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must conduct an internal audit of at least one complete section of a documented program.

The candidate must:

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of the business
- locate relevant codes or compliance program requirements
- communicate the audit process, requirements and findings to relevant personnel clearly and accurately
- apply planning skills to ensure the smooth conduct of the audit process
- use negotiation skills to organise and facilitate audit processes, including following meeting procedures and resolving issues
- identify and follow an audit trail
- conduct research to identify, collect and analyse evidence
- gather, analyse and record data accurately
- plan and organise audit activities
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- interpret evidence and make a judgement on the level of compliance
- prepare well-balanced, factual and objective written audit reports

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- audit management processes to develop and implement an audit against an agreed plan, including an understanding of the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan
- legislation, regulations, orders, codes and standards applicable to the areas being audited
- communication methods relevant to different groups and audience

© Commonwealth of Australia, 2025 Skills Insight

- evidence appropriate for use in audit processes, including an understanding of the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- evidence collection methods including record sampling and sample analysis, including an understanding of the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range/extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
- legislation that impacts on acceptable communication methods and conduct including anti-discrimination, anti-harassment and privacy legislation
- methods used to identify Critical Control Points and establish critical limits, appropriate to the nature of the hazard, the requirements of the audit and the industry sector
- personal attributes required of an auditor
- the internal auditing policies and procedures of the workplace
- the structure, authority levels and lines of reporting within the organisation
- the underlying principles of risk-based approaches to controlling food safety hazards including HACCP as described in the Codex Alimentarius Guidelines
- vocabulary and terms relating to food safety, including terms and jargon used to describe technical processes, industry standards and common biological and chemical terms

Assessment Conditions

Competency must be demonstrated while conducting an internal audit of an operating meat processing enterprise.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX405 Conduct statistical analysis of process

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be collect and analyse statistical information relating to meat processing. The candidate must complete analysis and report on at least three data runs to achieve competency.

The candidate must:

- apply statistical information to the analysis and verification of a process
- calculate simple statistical measures
- cooperate with monitors to ensure accuracy and timeliness of data
- use a range of information and communications technology and software, including statistics management and analysis programs
- conduct trend analysis of meat processing data
- explain the verification process using statistical data
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- perform basic statistical calculations on data from samples drawn from the workplace
- prepare control graphs and use charts as relevant
- prepare reports on the outcomes of the statistical analysis of monitoring data
- use and explain simple statistical measures, including mean, range, frequency, mode and median
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- statistical measures, including mean, range, frequency, mode and median
- available software systems to assist with analysis and report preparation

Assessment Requirements for AMPX406 Manage or oversee an external audit of the establishment's quality system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must manage or oversee at least one complete external audit of the establishment’s quality system.

The candidate must:

- apply relevant communication and problem-solving skills
- work effectively as an individual and as part of a team
- demonstrate clear communication and interpersonal skills related to preparing for and participating in an external audit
- schedule, record the schedule and manage the planning for external audits
- ensure the quality systems covering the area to be audited are in place and effective as shown by internal audit reports
- identify and apply relevant workplace health and safety and regulatory requirements
- use available technology to prepare for and follow up external audits
- identify reports of internal and external audits and take corrective action
- maintain currency of knowledge through independent research and professional development

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- regulatory and other requirements for external audits
- technical and regulatory aspects covered by each external audit

Assessment Conditions

Competency must be demonstrated while managing or overseeing one complete external audit of the company’s quality system.

© Commonwealth of Australia, 2025 Skills Insight

As a minimum, the following thee forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

Assessors must satisfy current standards for RTOs.

AMPX407 Oversee export requirements

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to understand and identify export requirements for an Australian meat processing plant.

This unit is applicable to those employed in meat processing plants as government inspection staff, plant manager or Quality Assurance (QA) personnel.

All work should be carried out to comply with workplace, customer and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify major export legislation	1.1 Identify relevant legislation and describe its application to establishment 1.2 Identify export control orders and explain their application in accordance with customer specifications and work instructions 1.3 Access legislation on Electronic Legislation, Manuals and Essential References (ELMER)
2. Identify and describe importing country requirements	2.1 Access and apply information on importing country requirements 2.2 Perform specific importing country and export inspection procedures in accordance with regulatory requirements and workplace requirements
3. Identify the role of the federal Department of Agriculture	3.1 Describe the role of the Department of Agriculture 3.2 Identify the function of Department of Agriculture meat inspection staff 3.3 Identify the structure of the Department of Agriculture and the relevant chain of command
4. Identify Quality Assurance arrangements	4.1 Identify specific requirements for Department of Agriculture Approved Arrangement 4.2 Describe Department of Agriculture review, monitoring and auditing arrangements for Approved Arrangements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX407 Oversee export requirements

Modification History

Not applicable.

Performance Evidence

The candidate must oversee the export requirements for at least one enterprise section or department for a period of at least three months.

The candidate must:

- access and research legislation on the ELMER system and other appropriate electronic information systems
- gather, analyse and present complex information to colleagues
- identify and apply relevant workplace health and safety requirements
- identify orders relevant to specific operational situation
- use communication and information technology to access required information
- use relevant communication skills
- work with Department of Agriculture personnel

Knowledge Evidence

The candidate must demonstrate a broad factual, technical, procedural and theoretical knowledge of:

- role and jurisdiction of Department of Agriculture
- role and function of Department of Agriculture meat inspection staff
- ante-mortem and post-mortem inspection procedures for importing countries
- procedures for condemnation in export works
- main regulatory and legislative requirements for exporting product and their application to meat processing
- QA systems operating, monitored and audited by Department of Agriculture in export works

Assessment Conditions

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.

AMPX408 Coordinate contracts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to coordinate the production, packaging and transportation of products to contracted markets in accordance with enterprise, customer and legal requirements. This unit is relevant to contracts in local, national and international markets.

The breadth of this unit makes it particularly useful for small and micro businesses in the retail, meat processing, smallgoods manufacturing and food service areas. In a micro or small business one person would have responsibility for overseeing contract management.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX408 Coordinate contracts

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must coordinate the production, packaging and transportation of products to contracted markets in accordance with enterprise, customer and legal requirements. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- apply food safety and QA requirements where relevant
- apply problem-solving skills to resolve issues that impact on capacity to meet contractual obligations
- apply relevant mathematical skills
- calculate costs and prices for local, national and international markets, including the impacts of inter-market taxes, tariffs, duties, charges or exchange rates
- complete documentation accurately and on time
- use effective communication strategies, including cross cultural communication, to negotiate or confirm transactions in the marketplace including new, distant and diverse markets
- determine implications for the enterprise of information relevant to the sale of meat and meat products in a local, national and international context (including market regulations, agents' terms and conditions)
- identify and apply relevant workplace health and safety regulatory and workplace requirements
- identify and follow freight, insurance and banking procedures
- liaise, as required, with agents, representatives and brokers
- prepare schedules and coordinate supply, production, packaging and transhipment of product to meet contract specifications and deadlines
- review enterprise operations and processes to meet regulatory requirements
- use appropriate communication and information technology to complete communication, scheduling, monitoring and reporting tasks

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- legislation, regulations and codes of practice applicable to the production, sale, packaging and transportation of meat products in local, national or international markets, including legislative requirements and regulations for meat and other ingredients
- standard documentation required for local, national or international trade
- product specifications and enterprise contractual obligations
- negotiation and communication strategies appropriate for use with government agencies and business clients

Assessment Conditions

Competency must be demonstrated in the workplace while coordinating at least one complete contractual process, or coordinating ongoing contracts over a minimum period of three months. A workplace referee report could be used to confirm this.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX409 Prepare and evaluate resource proposals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare and evaluate the impact of resource proposals on enterprise operations and profitability. Resource proposals are prepared to determine potential costs and returns on investment in resources including personnel, new equipment, systems or procedures. The information presented in resource proposals assists in financial decision making and planning.

This unit is suitable for first line managers, supervisors and team leaders in all sectors of the meat industry.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPX409 Prepare and evaluate resource proposals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must prepare and present at least one resource proposal to meat processing enterprise management personnel.

The candidate must:

- assess potential impacts of the proposal on enterprise operations (including production and personnel)
- determine necessity and scope of the proposal in relation to enterprise directions and goals
- record, gather and consolidate financial information
- apply relevant mathematical skills
- assess risks associated with the proposal and recommend risk management strategies
- calculate net present value, internal rate of return and payback periods
- prepare departmental/section financial information for inclusion in enterprise/department budget
- interpret and prepare cash flow statements, profit and loss statements and asset and liabilities statements
- recommend strategies for obtaining resources including finance (including internal, external, re-allocation of resources, new resources or funds)
- prepare financial proposals which include costs, cash flow requirements, payback period and benefits
- consult and collaborate with colleagues and those potentially affected to refine the proposal
- promote the advantages and disadvantages of the proposal to relevant personnel and stakeholders
- develop performance indicators to measure outcomes of resource allocation/proposal
- identify and apply relevant workplace health and safety regulatory and workplace requirements
- research options, models and benchmarks relating to the proposal
- use communication skills to present and argue a case and prepare reports in language, style and format appropriate to the audience

© Commonwealth of Australia, 2025 Skills Insight

- use technology to analyse, prepare and present a range of data

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- variable and fixed costs relating to the operations of the department, cost centre or enterprise
- sources of information within the enterprise, including specialist personnel, information systems and documentation
- enterprise structure, scope of operations and relevant policies and procedures

Assessment Conditions

Resource proposals prepared for assessment must relate to an operating meat processing enterprise.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX410 Facilitate achievement of enterprise environmental policies and goals

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must facilitate the achievement of enterprise environmental policies and goals for at least one section or department of the enterprise for a period of at least three months.

The candidate must:

- adjust and improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- consult with stakeholders, individuals and teams to develop and review environmental procedures
- maintain currency of knowledge through independent research or professional development
- develop, in conjunction with managers, environmental targets for the section or department
- apply consultation, negotiation and mentoring skills in interactions with employees, managers, peers and technical experts
- determine and take corrective actions to eliminate or minimise environmental risks
- ensure that procedures are followed by all employees in the area of responsibility
- explain environmental management requirements, procedures and responsibilities clearly to individuals and teams, in appropriate styles, formats and language
- identify and apply relevant communication and mathematical skills
- identify environmental hazards and conduct risk analyses
- interpret monitoring information and take corrective action
- apply relevant workplace health and safety regulatory and workplace requirements
- investigate, analyse and report environmental incidents, in accordance with enterprise procedures
- measure and monitor pollutants, emission and waste levels for the area of responsibility
- prepare reports containing technical and mathematical information for employees, managers and peers
- recognise limits of own expertise seeking additional expertise when necessary

© Commonwealth of Australia, 2025 Skills Insight

- utilise informal and formal consultative strategies to build individual and team commitment to environmental goals and procedures

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise goals, targets and performance measures
- enterprise environmental management policies and legal obligations and responsibilities
- legal and regulatory requirements as applicable to enterprise

Assessment Conditions

All evidence must be collected in the context of current Australian meat industry standards and regulations.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX411 Foster a learning culture in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to integrate work and learning in a meat enterprise. This unit does not provide workplace trainer skills, but does describe the skills and knowledge required for people in leadership positions to monitor and facilitate workplace training and learning.

In the meat industry, workplace learning adds to performance and the competitive advantage of the business. The commitment of personnel in leadership roles to training and learning is essential.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX411 Foster a learning culture in a meat enterprise

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must foster a learning culture in a meat enterprise. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- communicate openly and sensitively when negotiating learning opportunities and plans
- define the workplace learning opportunities within areas of responsibility, taking into consideration the requirements and limitations of the enterprise
- identify the areas that require the training services provided by training professionals
- develop and review learning plans, linked with individual and team goals and enterprise needs, in consultation with relevant personnel
- develop simple targets, goals and performance measures for evaluating outcomes of learning and training
- estimate resources required to support learning and training within the department or enterprise (including personnel, time, cost)
- facilitate and monitor the implementation of training and assessment schedules (including negotiating time release)
- maintain currency of knowledge through independent research or professional development
- apply relevant communication and mathematical skills
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify and support internal coaches and mentors to provide support to individuals and teams
- identify learning opportunities and strategies which address the cultural, working and learning experiences and styles of individuals and team
- identify learning opportunities to support individual and team learning plans
- map learning and training strategies against individual, team and enterprise goals or priorities

© Commonwealth of Australia, 2025 Skills Insight

- negotiate training strategies and schedules with enterprise trainers and assessors and other training and development professionals, to meet enterprise needs
- promote and report the impact of training on the operation of the department or enterprise
- promote the sharing of skills and knowledge as a strategy for achieving personal and enterprise goals
- recognise the achievements of individuals promptly and appropriately, within enterprise requirements
- resource and encourage enterprise trainers and assessors (including ensure necessary equipment and materials are available) to provide and follow up training and assessment
- review learning plans, opportunities, strategies and outcomes with individuals or team

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise and employee obligations under industrial and training agreements relating to the provision of (workplace) training
- requirements and ethical considerations for the supervision of employees operating under formal training agreements and contracts (including trainees and apprentices)
- impact and outcomes of workplace learning on the competitive advantage of the enterprise
- range of internal and external learning opportunities available to enterprise personnel

Assessment Conditions

The candidate must demonstrate competency through sustained performance over time, at an appropriate level of responsibility and authority, and under typical enterprise operating and production conditions.

Assessment must be conducted under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX412 Build productive and effective workplace relationships

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must develop, maintain and model positive workplace relationships. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- accept and provide constructive feedback
- contribute to and support meetings (including team, department and maintenance meetings)
- cooperate with other supervisors and managers
- locate and evaluate information from a range of sources, using a range of available resources including the internet and journals
- maintain currency of knowledge through independent research or professional development
- demonstrate problem-solving and negotiation skills in a range of circumstances
- develop and implement consultative and participative approaches within own work practices
- encourage and respond to individual and team contributions
- gather and analyse alternative viewpoints, ideas and information to develop processes and strategies
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- introduce strategies for improving workplace relationships (including coaching and mentoring)
- mentor and counsel individuals and teams, within enterprise procedures
- model positive and effective communication and interaction strategies while performing responsibilities
- monitor and diffuse potential conflicts and disputes, applying a range of strategies including the enterprise's established procedures
- resolve differences between employees, within enterprise processes

© Commonwealth of Australia, 2025 Skills Insight

- observe and respect enterprise confidentiality requirements and individual's privacy requests
- provide direction, instruction and guidance in ways that encourage cooperation
- recognise and discuss alternative suggestions, viewpoints and proposals
- review own actions and attitudes and describe their impact on colleagues
- seek feedback from colleagues and networks on own ideas and performance
- use available information and communications technology to facilitate two-way communication and understanding

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the impact of enterprise social, ethical and business standards on workplace relationships
- factors which influence workplace relationships, including cultural and social characteristics, past experiences and industrial approaches
- networks and other sources of information which could assist in developing workplace relationships and building own knowledge and expertise
- strategies for building networks

Assessment Conditions

The candidate must demonstrate competency through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Assessment must be conducted under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX413 Manage and maintain a food safety plan

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to manage a food safety plan.

Food safety is critical to public health and safety and the successful operation of meat industry businesses. This unit is applicable to managers in meat retail establishments, and supervisors and team leaders in smallgoods, meat processing and food services establishments, who maintain a food safety plan or system in a designated work area.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage the implementation of the food safety plan	1.1 Explain food safety principles, procedures and requirements, including regulatory requirements, to the team 1.2 Develop team commitment to, and responsibility for, food safety 1.3 Develop and implement procedures to support the food safety plan 1.4 Provide training and mentoring to the team to assist implementation
2. Monitor the food safety plan and take corrective action	2.1 Monitor team implementation of the food safety plan 2.2 Complete records and reports accurately and on schedule 2.3 Take prompt action to correct non-conformance in accordance with enterprise and regulatory requirements 2.4 Identify and analyse causes of non-conformance 2.5 Implement control measures to prevent future non-conformance 2.6 Report non-conformance in accordance with enterprise requirements
3. Maintain the food safety plan	3.1 Seek feedback from all personnel to identify potential hazards, corrective actions and controls 3.2 Identify processes or conditions which could result in breaches of food safety procedures and take preventive or corrective action 3.3 Update corrective action and control procedures to improve food safety 3.4 Complete documentation in accordance with enterprise and regulatory requirements

Assessment Requirements for AMPX413 Manage and maintain a food safety plan

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must manage and maintain a food safety plan. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- collect, monitor and interpret data to identify trends and non-conformance
- communicate with a range of stakeholders, including customers, to convey information about food safety requirements and programs
- determine and take corrective action
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify and review operations and practices for food safety improvement
- lead personnel and team in investigation of food safety incidents
- maintain currency of knowledge through independent research or professional development
- monitor records and documentation for accuracy and conformance
- respond to food safety incidents and implement food recall procedures as required
- review communication systems to minimise potential of misreporting and misunderstanding of food safety requirements, procedures and plans
- use a range of communication and team building strategies to gain team commitment to food safety
- use detailed product knowledge, including product characteristics and the requirements for safe preparation, processing, storage, handling, display, to monitor food safety
- use required problem-solving strategies when investigating non-conformance and reviewing the food safety system

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise Standard Operating Procedures (SOPs) and their role in the food safety system

© Commonwealth of Australia, 2025 Skills Insight

- enterprise monitoring procedures (including sampling, testing and maintaining required records and documents) and their purposes
- current technical and process knowledge for controlling hazards and improving the food safety system
- enterprise recall and traceability procedures
- food safety requirements and their importance to team members
- food safety risk assessment procedures
- Hazard Analysis Critical Control Point (HACCP) principles and the process for developing a food safety plan
- regulatory requirements that apply to the enterprise's food safety plan

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs

AMPX414 Assess and evaluate meat industry requirements and processes

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to assess and evaluate the role of the Australian meat industry as a part of the food processing sector. It also describes the requirements for working in meat processing.

This unit applies to food technologists, industry researchers, and to middle management personnel who are new to the industry. It includes gaining an understanding of the economic and political structure of the industry, production stages and methods, and key factors affecting meat safety, quality and market access.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

Work in this unit must be carried out in accordance with Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPX414 Assess and evaluate meat industry requirements and processes

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must assess and evaluate meat industry requirements and processes. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- describe the livestock production and marketing, and retailing systems for the meat industry
- document the sequence of operations for livestock slaughter and meat processing
- define processes for a range of meat smallgoods
- describe production factors influencing meat quality and safety
- comply with industry requirements in relation to hygiene, workplace health and safety and other work practices.
- analyse and interpret work instructions, Standard Operating Procedures (SOPs), safety and hygiene procedures, and other workplace documentation
- identify livestock
- locate, and interpret industry information
- distinguish between meat products and production processes
- identify personal hygiene and operational sanitation procedures
- apply sustainable work practices

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- factors which impact on meat safety and quality through the supply chain
- the main animal welfare issues associated with producing and processing animals for human consumption
- main markets for meat
- common causes and impact of contamination
- the relationship between food safety and market access

© Commonwealth of Australia, 2025 Skills Insight

- the nature and structure of the Australian meat processing industry
- principles of Quality Assurance (QA) and traceability from paddock to retailer
- slaughtering and boning processes
- sources and nature of regulatory requirements that affect the meat processing industry
- nature and purpose of the AUS-MEAT and MSA programs
- customer requirements
- value adding of meat products

Assessment Conditions

Assessment must occur in a real or simulated workplace where the candidate has access to:

- production process and related equipment, manufacturers' advice and operating procedures
- equipment and facilities for carrying out slaughtering of livestock and processing of primary cuts of meat.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX415 Specify beef product using AUS-MEAT language

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to use AUS-MEAT language in defining beef specifications. Satisfactory completion of assessment conducted by AUS-MEAT is required before an individual can gain AUS-MEAT Accreditation for Beef Boning Room Standards Officers. Individuals who have satisfactorily completed AUS-MEAT Accreditation for Beef Boning Room Standards Officers will have satisfied the requirements for this unit of competency.

This unit prepares workers to work with beef cuts, specifications and cutting lines.

Individuals will be directly involved in demonstration and explanation of:

- achieving maximum yields and returns
- basic anatomy
- cutting lines
- detecting and recording defects
- product description
- specifications and verification

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPX415 Specify beef product using AUS-MEAT language

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must use AUS-MEAT language in defining beef specifications. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- identify and apply standard beef primal cut names
- apply relevant communication and problem-solving skills
- identify and monitor Critical Control Points (CCPs) in accordance with workplace requirements
- identify and apply relevant workplace and regulatory requirements
- assess product compliance
- measure and check product compliance against written specifications
- identify and explain AUS-MEAT language specifications on beef product label
- identify non-conforming product in accordance with relevant specifications

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- anatomical features of a beef carcase
- beef primal cut names
- correct cutting lines products and the correct anatomical terms for describing them
- sections of the workplace QA system related to ensuring beef product compliance with AUS-MEAT product description requirements
- corrective action procedures for non-conforming products
- product specification points
- AUS-MEAT language specifications

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Competency must be demonstrated over time and under normal enterprise or production conditions.

Assessment must consist of either:

- successful completion of standard AUS-MEAT assessment

or a minimum of:

- workplace demonstration
- quiz of underpinning knowledge
- workplace referee report of performance over time

Assessment must occur in the workplace under normal enterprise or production conditions.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AMPX418 Lead communication in the workplace

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must lead communication in the workplace. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must demonstrate competency while exercising suitable levels of authority in the workplace.

The candidate must:

- analyse written information from a variety of sources to assist in decision-making processes
- locate and extract relevant information from technical documentation
- convey information, which may be complex or technical or involve a change, to people who may not have a technical background
- explain and demonstrate communication styles relevant to conveying information to employees from a range of social, cultural and ethnic backgrounds
- convey workplace information, including work instructions, in a way that facilitates learning by others
- use relevant techniques to check that information has been understood
- use facilitation skills to ensure participation from all group members
- demonstrate conflict-resolution techniques
- demonstrate participative problem-solving techniques to resolve workplace problems
- resolve or progress issues in complex or hostile environments
- select and organise relevant routine information to:
  - clarify or explain issues or problems
  - offer suggestions for improvement
  - provide opinions
- identify and observe workplace health and safety requirements
- identify and observe regulatory and workplace requirements

© Commonwealth of Australia, 2025 Skills Insight

- prepare reports in a range of formats and language styles in accordance with audience needs
- utilise available information and communications technology to facilitate communication

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the purpose of feedback and forms of feedback suitable for the workplace
- the purpose of reports and other documentation used in the work area
- roles and expectations of customers, suppliers and participants in the work process

Assessment Conditions

Assessment must include demonstration of competency in the workplace under normal working conditions.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX419 Participate in product recall

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to initiate and participate in a product recall.

This unit is applicable to plant managers, Quality Assurance (QA) personnel, managers and marketing personnel who have a role in implementing a product recall.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context if Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Participate in decision about disposition	1.1 Participate in making the decision about whether to recall a product, in accordance with according to regulatory, workplace and product specifications
2. Simulate a product recall	2.1 Identify criteria for a product recall in accordance with product specifications and workplace requirements 2.2 Identify and trace product to be recalled according to product specifications and workplace requirements 2.3 Identify individuals or groups involved in a product recall and describe their roles 2.4 Identify and describe steps in recall 2.5 Review product development in consultation with relevant personnel 2.6 Review manufacturing methods and quality control methods to prevent problems re-occurring

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX419 Participate in product recall

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must participate in a real or simulated product recall.

The candidate must:

- identify and implement the procedures for a product recall
- use communications technology including computers and telephones to facilitate product recall
- complete records of simulated product recall exercise and review to improve recall procedures
- identify and apply relevant workplace health and safety and regulatory requirements
- identify records of product identification and traceability and use them for trace forward
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- steps involved in implementing a product recall
- reasons and procedures for initiating a product recall

Assessment Conditions

Competency must be demonstrated utilising a documented product recall procedure and realistic data. Assessment can be based on participation in a comprehensive simulation.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX420 Participate in the ongoing development and implementation of a HACCP and Quality Assurance system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop and manage a Hazard and Critical Control Point (HACCP)-based Quality Assurance (QA) program.

This unit is applicable to QA personnel and supervisors who are responsible for developing or implementing a HACCP-based QA system in a meat establishment.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

The unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Involve management and staff in developing the quality system	1.1 Involve relevant staff members and managers in clarifying purpose and scope of program 1.2 Clearly define enterprise needs and expectations 1.3 Incorporate other systems, including AUS-MEAT, workplace health and safety and meat inspection in accordance with workplace needs
2. Establish the scope of the system	2.1 Define the scope of the HACCP-based quality system to encompass food safety, quality, regulatory compliance, animal welfare and preventative maintenance 2.2 Set up the system to prevent and control food safety hazards and other hazards, including product quality and workplace health and safety hazards 2.3 Seek consensus from relevant workplace areas on coverage and scope of system
3. Conduct hazard analysis and assessment	3.1 Assess every step in the production process for potential food safety hazards 3.2 Establish Critical Control Points (CCPs) to identify methods for preventing and controlling significant hazards 3.3 Establish critical limits for each CCP 3.4 Assign measurable or recognisable standards for each CCP to define the critical limits 3.5 Technically and scientifically validate critical limits
4. Ensure all documents, work procedures and processes required for the system are developed, available and in use	4.1 Describe all products and processes covered by the HACCP-based quality system in a standardised format defining product characteristics relevant to food safety 4.2 Review work instructions and Standard Operating Procedures (SOPs) for accuracy, relevancy and sufficiency to prevent potential hazards 4.3 Implement documented procedures for monitoring CCPs 4.4 Implement documented procedures designed to ensure any CCPs which are out of control are brought back under control, and any affected products are suitably handled 4.5 Implement documented procedures to ensure the whole HACCP system is regularly audited and verified as working effectively 4.6 Ensure availability, currency and current usage of all documents

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	and records required for system
5. Audit, verify and validate the system	5.1 Routinely revise, verify and validate HACCP plan through reassessing hazards, CCPs, critical limits, testing methods, and all related HACCP system procedures, to ensure their ongoing relevancy to plant operations 5.2 Take corrective action and record follow up on audit findings 5.3 Review HACCP system to account for any process or product changes

Assessment Requirements for AMPX420 Participate in the ongoing development and implementation of a HACCP and Quality Assurance system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must participate in the ongoing development and implementation of an HACCP and QA system. The candidate must demonstrate competency in the workplace while using an existing approved HACCP plan.

The candidate must:

- conduct monitoring of a CCP
- validate CCPs and critical limits
- record and analyse monitoring and verification data
- use relevant communication skills
- use communications technology including computers, as relevant to the task
- develop and implement changes in a HACCP-based QA system
- identify and apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- objectives of a HACCP-based QA system
- the process for validating critical limits and CCPs
- the role of pre-requisite programs and Good Manufacturing Processes (GMPs) in a HACCP-based program
- the process of auditing and verifying a HACCP-based QA system
- the steps involved in developing a HACCP-based QA system
- the steps involved in systematically introducing a HACCP-based QA system
- the documentation required to support a HACCP-based QA system

© Commonwealth of Australia, 2025
Skills Insight

Assessment Conditions

Assessment must involve working with actual realistic data and in the context of a HACCP plan that meets regulatory requirements.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX421 Establish sampling program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to establish a sampling program in a meat processing plant.

This unit is applicable to Quality Assurance (QA) personnel and regulatory officers required to:

- establish a sampling plan for testing or monitoring meat and meat products
- prepare aseptic samples for testing
- report on testing results.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AMPX421 Establish sampling program

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must establish a sampling program. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- establish a sampling plan in accordance with relevant Australian Standards
- demonstrate aseptic sampling techniques for micro-samples or swabs
- apply an appropriate level of mathematical skills to undertake accurate sampling
- utilise available workplace technology to establish, record and monitor sampling program data
- work effectively as an individual and as part of a team
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- record sampling information accurately to meet workplace and regulatory requirements
- report test results to relevant personnel promptly
- use relevant communication skills

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- routine tests performed on meat or meat products in the plant
- preparation and analysis of specimens or samples
- requirements of relevant Australian Standards

Assessment Conditions

Competency must be demonstrated using the current Australian Standard and implementing an approved workplace procedure. Assessment must involve a demonstration of skills at a meat processing plant or related work situation.

© Commonwealth of Australia, 2025 Skills Insight

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX422 Develop and implement work instructions and SOPs

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to develop and implement work instructions and Standard Operating Procedures (SOPs). It addresses the planning and consultation process for development, validation and implementation of SOPs.

Work instructions and SOPs will be presented in written form and may utilise photographs or illustrations to emphasise a particular characteristic or feature required in the performance of the task. Format is sequential and uses a Plain English approach.

Work Instructions and SOPs will usually be developed by Quality Assurance Officers, regulators or supervisors in the meat processing industry, and will frequently address regulatory or customer requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX422 Develop and implement work instructions and SOPs

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must develop or revise, and implement at least one work instruction or SOP.

The candidate must:

- perform tasks necessary to develop and validate work instructions or SOP
- implement the work instructions or SOPs
- assess implementation against the product specifications, workplace health and safety requirements, and ability to meet learning needs of relevant staff.
- collect, record and analyse data
- communicate with work teams and management
- communicate complex technical information to culturally diverse staff
- interpret product specifications, standards and production information
- use enterprise procedures to control document versions
- use computers to develop, control and store documentation
- develop plans
- prioritise tasks
- solve problems
- apply literacy skills to:
  - compile reports
  - use Plain English
  - interpret complex technical specifications or data
  - prepare detailed specifications, procedures and work instructions
  - read and interpret information
  - record and analyse data
  - report progress and technical information
- use numeracy skills to:
  - calculate time and other production data
  - estimate volume, mass and weight

© Commonwealth of Australia, 2025 Skills Insight

- gather and record data
- prepare technical reports

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- enterprise Standard Operating Procedures (SOPs)
- product specifications, quality objectives and production parameters
- sources of information relating to equipment and personnel capability
- special language requirements of the workplace
- the nature and sequence of the tasks being documented, time required to perform the task and the relevant product specifications
- the processes for validating documents
- workplace health and safety requirements
- document version control
- workplace chain of communication
- implementation processes
- record keeping requirements.
- communication techniques appropriate for culturally diverse workforce
- Hazard Analysis Critical Control Point (HACCP) and food safety plan
- legal and regulatory requirements impacting the Australian meat processing industry
- methods available to regulate production flows and temperature control
- product and process specifications
- organisational communication systems
- production systems, including corrective actions and control points
- validation techniques

Assessment Conditions

Assessment must be conducted in the workplace.

A minimum of three different assessment tasks must be used.

As a minimum, assessment must consist of:

- project writing, rewriting, or modifying existing work instructions or SOPs (work or scenario based), completing a validation process and developing an implementation plan
- workplace referee's report.

Assessors must satisfy current standards for RTOs.

AMPX423 Supervise new recruits

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to support, mentor and develop new recruits. It includes an understanding of the roles and responsibilities of first line managers in defining and communicating expectations, providing appropriate learning environments, and providing mentoring and feedback to support the retention and development of new recruits.

This unit is applicable to individuals who are responsible for supervising, developing and managing new recruits. Typically this unit would be applicable to first line managers, including supervisors and may also apply to team leaders.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Communicate work requirements and expectations	1.1 Identify information requirements for new recruits 1.2 Communicate enterprise policies, performance requirements and responsibilities to new recruits 1.3 Make information available to new recruits in appropriate and accessible formats

© Commonwealth of Australia, 2025 Skills Insight

Element	Performance criteria
	1.4 Adjust communication methods to account for the purpose and the audience, factoring in social and cultural diversity 1.5 Model appropriate work behaviours and procedures in personal conduct 1.6 Identify, facilitate and resolve (within level of responsibility) individual and team issues in relation to developing and managing new recruits
2. Provide an appropriate learning environment for new recruits	2.1 Establish learning and development plans for new recruits and monitor progress in conjunction with human resources personnel 2.2 Estimate and secure resources required to support informal and formal learning and training 2.3 Monitor implementation of workplace policies to ensure the workplace and learning environment conforms with industrial, customer and legal requirements 2.4 Arrange opportunities for new recruits to develop and apply skills and knowledge 2.5 Establish patterns of work organisation and job rotation to reinforce learning
3. Provide regular and timely feedback on performance	3.1 Monitor progress and performance of new recruits 3.2 Identify signs of poor or unacceptable practices 3.3 Investigate reasons for poor or unacceptable performance 3.4 Provide structured feedback to new recruits 3.5 Identify and agree strategies for addressing the performance gap with the new recruit 3.6 Confirm progress or take appropriate follow up action through ongoing monitoring

Assessment Requirements for AMPX423 Supervise new recruits

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must supervise new recruits. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- establish effective relationships with new recruits in the nominated work area
- apply appropriate communication skills to manage conflict and facilitate resolution of issues, disagreements or disputes
- apply interpersonal skills including appropriate questioning, listening and feedback techniques
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- foster effective teamwork by recognising and utilising individual strengths
- ensure that appropriate behaviours and procedures are consistently observed by all personnel in the work area
- ensure that new recruits have adequate opportunity to learn, apply and practice new skills and knowledge
- ensure availability of relevant and appropriate information describing behaviour and performance expectations for new recruits; this includes information on policies and procedures, corporate values, and production targets or work outcomes
- identify and apply relevant workplace health and safety, regulatory and workplace requirements
- identify legal requirements and personal and company responsibilities in relation to managing new recruits
- identify and conform with enterprise and employee obligations under industrial arrangements and training agreements in relation to the provision of (workplace) training
- investigate causes of poor or unacceptable work performance in consultation with new recruits
- model behaviour consistent with company policies and procedures
- monitor individual performance, identify performance gaps and develop strategies in consultation with human resources personnel
- monitor progress towards achieving agreed conduct and/or performance improvements

© Commonwealth of Australia, 2025 Skills Insight

- plan and undertake structured feedback or appraisal of new recruits
- provide regular feedback to new recruits to foster confidence and appropriate workplace behaviours

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- workplace feedback and performance management systems and responsibilities in the workplace, including personal level of authority in relation to performance counselling and disciplinary procedures
- applicable legislation and Fair Work Australia requirements
- conflict management techniques
- workplace policies and procedures

Assessment Conditions

Competency must be demonstrated in the workplace whilst working with new recruits over time and under typical operating and production conditions for the enterprise.

A minimum of three different forms of assessment must be used.

Assessors must satisfy current standards for RTOs.

AMPX424 Raise and validate requests for export permits and Meat Transfer Certificates

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to raise and validate Requests For (export) Permits (RFPs) and Meat Transfer Certificates (MTCs).

This unit applies to enterprise personnel who have responsibility for preparing this documentation. These individuals require a knowledge and understanding of the entire process of training and validating RFPs etc. The importance of having a robust system in the enterprise's Approved Arrangement which fulfils the requirement for full traceability and accuracy of the information required for the generation of the RFPs and MTCs is also critical to this unit.

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX424 Raise and validate requests for export permits and Meat Transfer Certificates

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must raise and validate requests for (export) permits and Meat Transfer Certificates. Demonstration of consistency of performance over time is essential in this unit.

Candidates must:

- prepare export documentation accurately and consistently
- verify traceability from loadout back to producer(s)
- verify the accuracy of prepared documentation
- identify and correct errors in accordance with regulatory and enterprise requirements
- identify processes and information required to address specific customer requirements
- validate prepared documentation
- maintain required records
- use electronic systems associated with preparing export documentation
- identify required system improvements and work with relevant enterprise personnel to facilitate implementation
- follow workplace health and safety, biosecurity and equal employment requirements

Knowledge Evidence

Candidates must demonstrate a broad factual, technical and theoretical knowledge of:

- customer, regulatory and enterprise requirements related to preparing and validating export documentation
- enterprise responsibilities related to the preparation of export documentation under the Approved Arrangement
- roles and responsibilities of regulatory personnel
- enterprise traceability systems
- verification and validation processes and responsibilities
- the registration process for an RFP validator
- roles and responsibilities of an RFP validator

© Commonwealth of Australia, 2025 Skills Insight

- the consequences associated with inaccurate or incomplete export documentation
- the process associated with an RFP amendment request
- as appropriate, methods to identify and resolve issues related to timeline faults; trade description problems; cut codes; label printing and placement errors; electronic system failure; raising claims; incorrect dates; incorrect container numbers; wrong seal numbers

Assessment Conditions

Assessment must be conducted in a meat export establishment.

As a minimum, assessment must consist of the following three forms of assessment:

- workplace referee report
- knowledge test
- five test validations

Assessors must satisfy current standards for RTOs.

AMPX425 Conduct a document review

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to undertake a document review of a company's Approved Arrangement or Quality system for compliance with regulatory and commercial requirements.

Document reviews of an Approved Arrangement or Quality System may be carried out by a Quality Assurance Officer/team or a regulatory authority. They may also be carried out by third party providers.

Candidates must demonstrate industry recognised technical expertise in the area being audited.

This unit is applicable to individuals who are responsible for supervising, developing and managing new recruits. Typically this unit would be applicable to first line managers, including supervisors and may also apply to team leaders.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AMPX425 Conduct a document review

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidates must conduct a document review.

The candidate must:

- complete at least one document review of a section of the Approved Arrangement or Quality System within area of technical expertise
- establish the authenticity of the documents being audited
- identify and assemble documents for a minimum of one audit of an Approved Arrangement or Quality System
- develop and validate a checklist for the audit
- verify compliance with regulatory systems and/or commercial requirements
- explain the process of audit and the reasons for the findings made
- be able to reference the specific requirement that has not been met when a non-conformity is issued
- plan and organise audit activities to conduct the audit effectively
- use information systems, technologies and software, where applicable, to manage security, authorisation and distribution of audit data and records
- interpret evidence and make a judgment on the level of compliance
- prepare well-balanced, factual and objective written audit reports
- use communication methods relevant to different groups and audience

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- the specified regulatory and commercial requirements and their impact on the nominated enterprise
- audit management to develop an audit plan and audit processes
- legislation, regulations, orders, codes and standards applicable to the areas being audited
- the structure, authority levels and lines of reporting within the organisation

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment may take place using a sample Approved Arrangement or Quality Assurance system; however, all evidence collected must meet minimum regulatory and commercial requirements.

All evidence must be collected in the context of current Australian standards and regulations, as well as commercial standards which relate to the enterprise.

The assessor and/or assessment team must demonstrate a current working knowledge of the nature, structure and purpose of Approved Arrangements or Quality Assurance system and the regulatory and commercial requirements impacting the nominated enterprise.

The following three forms of assessment must be used:

- Written test or quiz
- Workplace Project
- Workplace referees report

Assessors must satisfy current standards for RTOs.

AMPX426 Undertake chiller assessment to AUS-MEAT requirements

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage product in chillers, in terms of product quality and specifications, in accordance with AUS-MEAT requirements.

AUS-MEAT chiller assessment provides a means of describing saleable meat characteristics including meat colour, fat colour, marbling, eye muscle area, subcutaneous and total rib fat measurements and maturity.

This unit is applicable to supervisors and Quality Assurance (QA) staff who wish to become AUS-MEAT accredited chiller assessors.

All work in this unit should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and the work of others within known parameters.

This unit must be delivered and assessed in the context of Australian meat industry standards and regulations.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

© Commonwealth of Australia, 2025 Skills Insight

Pre-requisite Unit

Nil.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Conduct AUS-MEAT chiller Assessment	1.1 Monitor product daily to ensure compliance with AUS-MEAT Chiller Assessment pre-conditions 1.2 Assess beef carcases for marbling, meat and fat colour scores in accordance with the AUS-MEAT chiller assessment standards 1.3 Assess beef carcases for eye muscle area, subcutaneous and total rib fat and carcase maturity 1.4 Correctly allocate the Grain Fed (GF) and Grain Feed Young Beef (GFYG) symbols to beef carcases 1.5 Manage chiller assessment equipment
2. Monitor chiller temperature	2.1 Monitor temperature of product daily to meet AUS-MEAT Chiller Assessment requirements and product specifications, workplace procedures and regulatory requirements 2.2 Maintain temperature of chiller to ensure product quality and to meet product specifications 2.3 Correct changes to temperature to maintain product quality and specifications
3. Monitor product handling and identification	3.1 Identify and label products in accordance with product specification, customer and workplace requirements 3.2 Identify and maintain AUS-MEAT requirements for carcase feedback

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX426 Undertake chiller assessment to AUS-MEAT requirements

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 3.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 1.0.

Performance Evidence

The candidate must undertake chiller assessment in relation to AUS-MEAT requirements.

Competency must be demonstrated by assessing beef carcases using the AUS-MEAT Chiller Assessment Standards. Candidates will be assessed for their accuracy in meeting the chiller assessment requirements by applying the correct techniques and measurement to the allocated carcases. Candidates will conduct runs on a significant number of carcases to achieve the outcomes required.

The candidate must:

- apply mathematical concepts to monitoring procedures (including temperature checks and adjustments)
- apply relevant communication skills
- identify AUS-MEAT Chiller Assessment pre-conditions
- assess carcases in accordance with AUS-MEAT requirements
- complete documentation, including accurate feedback outcomes
- use available technology to record, gather and interpret product-monitoring data
- correlate to the AUS-MEAT Chiller Assessment requirements using the Onsite Correlation and Practice Program (OSCAP).

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- AUS-MEAT Chiller Assessment requirements
- product quality monitoring processes
- Importance of AUS-MEAT Chiller Assessment

© Commonwealth of Australia, 2025 Skills Insight

- procedure for determining non-conformance.

Assessment Conditions

Assessment must be conducted in an operating meat processing plant.

Candidates will be required to complete the required correlations using the OSCAP program. This will be conducted in their own workplace.

Candidates must successfully complete the AUS-MEAT Chiller Assessment Course requirements.

Assessors must satisfy current standards for RTOs.

AMPX427 Dry age meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to dry age meat.

This unit is applicable to meat retailing.

This unit should be delivered and assessed using appropriate dry ageing equipment and controlled environments.

All relevant food safety regulations must be followed when delivering and assessing this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPX427 Dry age meat

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must undertake the entire process of dry ageing in a registered meat retail premises or simulated environment using appropriate dry ageing cabinets and equipment that meet all relevant regulatory requirements.

The candidate must:

- check, prepare and sanitise dry ageing cabinets and equipment prior to use
- select, weigh and prepare suitable meat for dry ageing to workplace requirements
- follow workplace health and safety, regulatory and for dry ageing meat
- demonstrate familiarity with regulatory requirements related to dry ageing meat products
- identify sub- standard or contaminated product throughout the entire dry ageing process and take corrective action
- hang/store meat for dry ageing appropriately
- monitor and record temperatures throughout the dry ageing process
- undertake testing according to regulatory requirements
- store dry-aged meat according to regulatory requirements
- follow manufacturers', workplace health and safety and hygiene and sanitation requirements for the use of machines and equipment used in the dry ageing process
- prepare dry aged meat for retail sale including:
  - boning carcase or primal
  - trimming fat
  - trimming dried surfaces
  - slicing
- identify the contamination risk associated with dry aged meat and take appropriate control measures
- calculate yield of dry aged meat
- cost and price dry aged meat

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- food safety and hygiene relevant to dry ageing of meat
- purpose of dry ageing
- difference between dry ageing and wet ageing processes
- cleaning and sanitation procedures for dry ageing cabinets and equipment
- possible effects on health of inadequate dry ageing processes
- possible effects of temperature fluctuations, humidity levels and air circulation on product
- workplace health and safety, regulatory and quality assurance requirements for dry ageing meat
- characteristics of meat that are suitable for dry ageing
- the effects of enzymes during dry ageing on meat proteins and connective tissue
- correct temperature and storage conditions for dry ageing meat
- cross contamination risks and controls
- workplace and regulatory requirements for recording information during the dry age process
- mathematical skills relevant to the task

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AHCMOM217 Operate quad bikes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely operate quad bikes including undertaking pre-start checks and shut down procedures.

The unit applies to individuals who operate quad bikes to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare a quad bike for operation	1.1 Confirm with supervisor activity to be undertaken and that the vehicle is fit for purpose 1.2 Identify potential hazards and risks and implement safe working practices to manage risks 1.3 Select and maintain personal protective equipment according to

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	workplace safety requirements 1.4 Use, wear and correctly fit personal protective equipment including quad bike helmet that is fit for purpose 1.5 Conduct routine pre-operational checks on quad bike according to operation and maintenance manual and report faults or malfunctions to supervisor 1.6 Identify and confirm no go areas with supervisor according to workplace safety plan 1.7 Identify quad bike applications, loads and fixed attachments according to operation and maintenance manual
2. Operate a quad bike	2.1 Start up, steer, manoeuvre, position and stop quad bike in a controlled manner 2.2 Identify environmental and any biosecurity implications associated with quad bike operation and minimise impact 2.3 Identify situations where quad bike active riding techniques are required 2.4 Apply quad bike active riding techniques to pre-position the operators body to assist bike stability 2.5 Identify and avoid riding surfaces, terrains and slopes that are dangerous to safe operation 2.6 Operate and manoeuvre over a variety of surfaces, slopes and terrain safely 2.7 Modify quad bike operation according to local weather conditions
3. Complete quad bike operation	3.1 Shut down quad bike 3.2 Park up and secure quad bike in line with workplace practices 3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor 3.4 Remove and store keys in the required location 3.5 Unload, load and secure quad bike safely

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Oral communication	• Use clear language to report malfunctions, faults and irregular performance or damage • Participate in verbal exchanges to respond to questions and clarify information
Numeracy	• Calculate quantities of vehicle fluids including oil and fuel • Calculate load volumes and weights • Identify correct tyre pressure
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	• a suitable quad bike helmet • enclosed toe shoes.
Pre-operational checks must include:	• vehicle damage and serviceability • fuel • brake effectiveness • throttle smooth operation and self-closing return • tyres including pressure and condition • vehicle controls.
Quad bike active riding techniques must include:	• pre-positioning, correct timing and appropriate adjustment of operator body weight when going uphill including body weight forward • pre-positioning, correct timing and appropriate adjustment of operator body weight when going downhill including body weight rearward • positioning of operator body weight centrally when cornering at

© Commonwealth of Australia, 2025 Skills Insight

	very slow speeds, and transition to positioning of operator body weight to the inside of the turn when cornering at higher speeds • positioning of operator body weight centrally when cornering at very slow speeds, and transition to positioning of operator body weight to the uphill side when riding across slopes • standing up to improve situational awareness and ability to exercise active riding technique, when operating in restricted visibility situations, rough terrains, crossing obstacles and avoiding hazards.
Unload, load and secure quad bike must include at least one of the following:	• trailer • transportation device • on-site vehicle storage.

Assessment Requirements for AHCMOM217 Operate quad bikes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a quad bike on at least two different riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with quad bike areas of operation
- identified and avoided riding surfaces, terrains and slopes that are dangerous to safe operation of quad bikes
- identified and confirmed quad bike no go areas
- selected, fitted and used quad bike helmet and other personal protective equipment that was fit for purpose
- maintained personal protective equipment in suitable condition for use
- unloaded the quad bike safely and checked it is safe to use
- operated and manoeuvred quad bikes in different riding surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a quad bike in a controlled manner
- applied quad bike active riding techniques to preposition operator body weight to assist bike stability
- parked the quad bike safely and checked for any damage, malfunctions and faults
- loaded and secured the quad bike safely
- minimised environmental impacts associated with quad bike operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with quad bike areas of operation including quad bike no go areas
- components, controls and features of quad bikes and their functions
- quad bike functional applications, including appropriate selection of machine for task

© Commonwealth of Australia, 2025 Skills Insight

- workplace safety plan for operating and maintaining quad bikes
- quad bike operator's manual
- operating principles and operating methods of quad bikes
- circumstances when quad bike active riding techniques should be applied
- quad bike active riding techniques, including both when and when not to apply quad bike active riding techniques
- effects of different riding surfaces and terrain conditions on the operation of quad bikes
- load limits and attachments specific to quad bike capabilities and the effects to dynamic stability of the quad bike, including:
  - weight distribution
  - load security
  - liquid or shifting loads
  - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
  - tie down devices
  - vehicle ramps
  - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to quad bike use
- environmental impacts associated with operating quad bikes and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - no passengers on single seat quad bikes
  - no riders under 16 years of age on adult sized quad bikes
  - no towing
  - helmets must be worn whilst operating quad bikes
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
  - quad bike
  - vehicle fuel
  - a suitable quad bike helmet
  - enclosed toe shoes

© Commonwealth of Australia, 2025 Skills Insight

- specifications:
  - quad bike operation and maintenance manual
  - industry and workplace biosecurity procedures applicable to quad bike operation
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation.

It applies to individuals who use their sound theoretical knowledge of compliance and skills in identifying compliance requirements to plan, carry out and evaluate their own work and/or the work of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, licensing and risk – compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Clarify the scope of operations	1.1 Identify and review the relevant range of operations and the sphere of business arrangements of the organisation 1.2 Conduct an analysis of the operations and business arrangements of the organisation and identify the functions, products and services that may be subject to compliance requirements 1.3 Develop and document work activity plans for determining

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	relevant compliance requirements 1.4 Obtain approval of plans from relevant organisational personnel
2 Identify compliance requirements	2.1 Conduct a search of information on internal and external compliance requirements using appropriate search resources, including relevant Australian and international standards 2.2 Ensure the search of compliance requirements scans across all relevant jurisdictions of laws, regulations, and industry and organisational codes and standards and identify pertinent compliance requirements 2.3 Progressively review information collected in terms of its relevance to the organisation's operations, services and products 2.4 Organise and store gathered information on relevant compliance requirements in an appropriate format for further analysis
3 Interpret, analyse and prioritise identified compliance requirements	3.1 Review and interpret collected information in terms of its relevance to the organisation's functions, services and products 3.2 Discuss and clarify with relevant internal or external personnel ambiguities, uncertainties and problems experienced in interpreting identified compliance information 3.3 Identify, analyse and prioritise relevant compliance requirements in terms of critical implications for the organisation and risks and consequence of possible breaches 3.4 Group pertinent compliance requirements into those that are critical and central to the organisation's operations, those that are important in some circumstances but are not central to the organisation's operations, and those that are pertinent but are incidental to the organisation's operations
4 Document compliance requirements	4.1 Organise and document outcomes of the identification and interpretation activities 4.2 Prepare and communicate reports of relevant compliance requirements and assessment of implications to relevant personnel performing specific compliance management functions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.3, 3.4	• Identifies, interprets, analyses or reviews complex texts from various sources to determine legal requirements, organisational operations, specific requirements and responsibilities
Writing	1.2, 1.3, 1.4, 2.4, 3.2, 3.3, 3.4, 4.1, 4.2	• Collates and compiles results of research and analysis using appropriate technical language and organisational formats • Develops materials to convey information, requirements or recommendations using language and structure appropriate to the audience
Oral Communication	1.4, 3.2, 4.2	• Presents specialised information using structure and language to suit the audience • Uses appropriate techniques, including active listening and questioning, to seek approvals and to confirm understanding
Navigate the world of work	1.2, 2.2, 3.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulations
Interact with others	1.4, 3.2, 4.2	• Identifies and uses appropriate conventions and practices when communicating with internal and external personnel
Get the work done	1.1, 1.3, 2.1-2.4, 3.1, 3.3, 3.4, 4.1, 4.2	• Plans, organises and implements activities required to identify, prioritise and document compliance requirements • Systematically gathers, analyses and evaluates all relevant information in order to make informed decisions about management of compliance breaches • Uses digital tools and systems to locate, organise and share information in effective ways

Assessment Requirements for BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse an organisation's operations to identify areas subject to compliance requirements
- interpret and analyse information from Australian and international standards, legislation, regulations, industry and organisational codes of practice to determine their relevance to the organisation
- document and store the outcomes of identification and interpretation activities related to the organisation's compliance requirements
- report on key compliance requirements and the implications of these for the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline elements of compliance programs and related management systems breaches
- identify relevant Australian and international standards.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- relevant Australian and international standards, laws, regulations, industry and organisational codes and standards
- appropriate computer resources for online searching
- case studies and, where possible, real situations.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCOM601 Research compliance requirements and issues

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore and investigate various aspects and issues associated with compliance requirements and a related compliance program/management system.

It applies to individuals in regulatory authorities or large organisations with responsibilities related to identifying and investigating impacts, issues and policy implications of various aspects of compliance. It also applies to internal or external consultants who carry out research activities for clients on various aspects of compliance as a compliance researcher or member of a compliance management team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Clarify the purpose and scope of the research	1.1 Confirm and clarify the purpose and scope of the required compliance related research in collaboration with the client/s and relevant internal and/or external personnel 1.2 Document the purpose and scope of the required research in accordance with organisational and/or client requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Develop the research plan	2.1 Develop a suitable research methodology to enable sufficiently valid and reliable outcomes for the required research 2.2 Prepare the research plan for the proposed project 2.3 Obtain approval of plan from relevant internal and/or external personnel
3 Gather required research data	3.1 Collect relevant research data using appropriate research techniques and sources in accordance with the agreed research plan 3.2 Gather and interpret from appropriate sources, information on relevant Australian and international standards pertaining to compliance requirements and related systems 3.3 Organise, interpret and review collected data in terms of its relevance to the project's purpose and objectives 3.4 Discuss ambiguities, uncertainties and problems experienced while interpreting collected data and address appropriately in conjunction with relevant internal or external personnel 3.5 Organise interpreted research data for later analysis
4 Analyse collected data	4.1 Analyse data in accordance with planned methodology 4.2 Review and discuss outcomes of the analysis with relevant internal or external personnel
5 Determine research findings and outcomes	5.1 Interpret the outcomes of the data analysis in accordance with the project objectives 5.2 Develop and discuss preliminary findings, identified issues and related recommendations with relevant internal and/or external personnel 5.3 Undertake any additional data collection and analysis required to clarify aspects of findings, issues and related action options
6 Document and disseminate research outcomes	6.1 Prepare a draft report of the research outcomes, findings and recommendations in accordance with the agreed structure and format, and distribute to relevant internal and/or external personnel for comment and feedback 6.2 Edit the report based on the feedback obtained 6.3 Proofread the report prior to publication 6.4 Ensure the outcomes, findings and recommendations in the report are signed off by authorised personnel 6.5 Produce and disseminate the report to nominated internal

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	and/or external personnel in accordance with agreed arrangements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 3.1, 3.2, 3.4, 3.5, 4.1, 5.2, 6.2, 6.3	• Comprehends and analyses texts to identify key requirements • Identifies, analyses, reviews and extracts relevant information from complex texts • Proofreads draft texts to identify changes required
Writing	1.2, 2.1-2.3, 3.2-3.4, 4.2, 5.2, 6.1-6.3	• Collates, summarises and compiles information from a range of sources • Develops reports for a specific audience using clear and detailed language to convey findings and recommendations • Edits and incorporates amendments to ensure compliance with regulatory or organisational requirements
Oral Communication	1.1, 2.3, 3.4, 4.2, 5.2	• Conveys information, in a format and style appropriate to a specific audience • Elicits the views and opinions of others by listening and questioning
Navigate the world of work	3.2	• Identifies organisational implications of legislative requirements and considers these when planning and implementing work
Interact with others	1.1, 2.3, 3.4, 4.2, 5.2	• Collaborates with others using effective interpersonal skills to facilitate shared understanding • Identifies and uses appropriate conventions and practices when communicating with internal and external personnel
Get the work done	1.2, 2.1, 2.2, 3.1-3.5, 4.1, 4,2, 5.1-5.3, 6.1-6.5	• Sequences and schedules complex activities, monitors implementation and manages required communication with others • Gathers and analyses data and feedback to improve outcomes • Utilises features and functions of digital tools to

Assessment Requirements for BSBCOM601 Research compliance requirements and issues

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and interpret information on relevant Australian and international standards
- collaborate with others to identify and document the purpose and scope of the compliance research
- plan the research requirements including:
  - selecting an appropriate research methodology
  - preparing a research plan
  - getting approval for the plan from appropriate people
- carry out the research according to the approved plan including:
  - collecting, organising, analysing and interpreting data
  - reviewing and discussing analysis and preliminary outcomes with relevant l personnel
- prepare and distribute report of the research outcomes according to organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain compliance requirements relevant to the organisational research methods
- explain elements of relevant compliance program/management systems
- describe quantitative and qualitative data analysis techniques relevant to compliance related research
- list relevant Australian and international standards
- identify relevant organisational policies and procedures
- identify sources of information relevant to compliance related research.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- organisational information and Australian and international standards related to compliance requirements
- relevant personnel
- computer resources and business equipment
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2 Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3 Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with organisational procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.3, 2.4, 3.2, 3.3, 3.4, 3.5	• Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements
Writing	1.1, 3.1, 3.2, 3.3, 3.4, 3.5	• Prepares written reports, up-to-date procedures and other workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 1.2, 1.3, 2.1,	• Clearly articulates customer's needs using language suitable to diverse audiences and employs listening

© Commonwealth of Australia, 2025 Skills Insight

Communication	2.2, 3.1, 3.2	and questioning techniques to confirm understanding
Navigate the world of work	3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1-1.3, 2.1, 2.2, 3.1, 3.2	• Selects and uses appropriate communication techniques to establish and maintain positive working relationships • Establishes connections and shares information with others who can contribute to effective work outcomes
Get the work done	2.3, 2.4, 3.3-3.5	• Develops and implements plans for routine and non-routine tasks recognising the importance of aligning goals and expectations to achieve outcomes • Recognises and takes responsibility for addressing predictable and non-predictable problems in own work context • Uses digital systems to organise and store information relevant to own work

Assessment Requirements for BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- communicate effectively with customers including
  - helping customers to articulate their needs and evaluate options
  - explaining products/services and how they match customer needs
  - establishing regular communication
  - explaining customer rights and responsibilities
- address customer's needs
- use organisational procedures to document customer satisfaction
- develop and maintain networks to support meeting customer needs
- identify potential difficulties in meeting customer needs and taking appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational procedures and standards for establishing and maintaining customer service relationships

© Commonwealth of Australia, 2025 Skills Insight

- describe informed consent
- explain consumer rights and responsibilities
- describe ways to establish effective regular communication with customers
- outline details of products or services including with reference to:
  - possible alternative products and services
  - variations within a limited product and service range.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and resources
- business technology
- organisational policies, procedures, quality systems, manuals and guidelines for customer management
- examples of products/services and promotional strategies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBDES801 Research and apply design theory

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research, in significant depth and breadth, and apply different theories of design.

It applies to individuals who use sophisticated research and critical analysis skills in the exploration of design, design theory and its application to professional design practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research design theory	1.1 Use a range of research techniques to source information about design theory 1.2 Identify and explore new, emerging and alternative sources of ideas and thinking on design 1.3 Expand own knowledge and understanding of design through review and critical analysis of information 1.4 Analyse, compare and contrast a range of theoretical perspectives and thinking on design

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Apply theories of design to professional practice	2.1 Evaluate the relevance and application of different theories of design based on analysis of own professional and personal experience 2.2 Analyse the ways different aspects of history, theory and other influences are applied, adapted or challenged in practice 2.3 Assess how theories and thinking about design may be applied to benefit individuals, businesses and communities
3 Develop, articulate and debate own perspectives on theories of design	3.1 Take a critical approach to different theories and reflect on own ideas and responses 3.2 Develop own substantiated positions in response to research and analysis 3.3 Articulate own positions, demonstrating clarity of thought and conceptual understanding of different theories and thinking 3.4 Debate positions on design showing belief in own ideas and a willingness to remain open to new perspectives

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.3, 2.1	• Draws on a range of strategies to facilitate personal and professional learning
Reading	1.1, 1.2, 1.4, 2.2	• Identifies and interprets complex concepts and theories from a range of sources
Writing	3.3	• Organises information and uses structure, language and context to clearly explain own ideas and positions
Oral Communication	3.3, 3.4	• Actively engages in critical discourse using appropriate vocabulary, tone and pace • Uses active listening techniques to gain input and feedback
Get the work done	1.2, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2	• Takes responsibility for planning and organising own tasks and workload, including how to link with the work of others • Systematically analyses information to aid in deciding

© Commonwealth of Australia, 2025 Skills Insight

		on own views and ideas • Keeps abreast of innovations and good practice beyond own context, using ideas to rethink current approaches

Assessment Requirements for BSBDES801 Research and apply design theory

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- conduct research into past, current and emerging theories of design
- develop substantiated positions on design and its application in own professional practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast different theories of design, including different historical perspectives and current and emerging thinking
- explain relationship between theories of design and design in practice with reference to a particular work or broader social context
- summarise the relationships, similarities and differences at a conceptual and practical level between the concepts of design, innovation and creativity
- rationalise the systemic impacts on design – social, economic, political and environmental.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to and use of current and emerging sources of information and thinking on design.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDIV601 Develop and implement diversity policy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research diversity and its importance to organisational activity and to draft, plan and implement diversity policy.

It applies to individuals working in organisations with staff and clients from different cultures, races or religions, multiple generations, or where there are other forms of diversity in the workforce.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Diversity

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research diversity	1.1 Analyse existing practices and information in relation to diversity 1.2 Identify potential benefits of diversity and analyse in relation to business objectives 1.3 Consult key stakeholders about their requirements for a diversity policy 1.4 Access diversity policies from similar organisations and review

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	for relevance to own organisation
2 Draft policy and plan for implementation	2.1 Draft diversity policy 2.2 Develop action plans for policy 2.3 Consult key stakeholders for feedback on draft policy and action plans 2.4 Determine relationships and links with other related policies 2.5 Revise policy for implementation
3 Implement diversity policy	3.1 Explain and interpret policy to key stakeholders 3.2 Promote policy across the organisation through a range of communication channels 3.3 Identify intended and unintended impacts of policy implementation 3.4 Develop tools, benchmarks and other indicators for planning and measuring impact of policy implementation 3.5 Monitor business activities, team plans and staff performance to ensure diversity policy is effectively implemented
4 Review diversity policy	4.1 Gather and analyse information about diversity, the policy and its implementation 4.2 Consult key stakeholders to provide feedback on the policy 4.3 Develop and approve recommendations for changes to the policy 4.4 Refine diversity policy in accordance with feedback and recommendations

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1, 3.3, 3.4, 3.5, 4.1, 4.3	• Identifies, analyses and evaluates complex information to determine business requirements • Monitors reported information to determine efficiency of policy

© Commonwealth of Australia, 2025 Skills Insight

Writing	1.3, 2.1, 2.2, 2.3, 2.5, 3.2, 3.4, 4.2, 4.3, 4.4	• Develops detailed procedural material according to organisational and legislative requirements • Records and collates feedback from stakeholders • Prepares factual and informative documentation to suit purpose and audience
Oral Communication	1.3, 2.3, 3.1, 3.2, 4.2	• Presents information and opinions using language and non-verbal features appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Navigate the world of work	1.2, 2.1, 2.5, 3.4, 4.3, 4.4	• Works autonomously making high level decisions to achieve and improve organisational goals • Develops and implements strategies that ensure organisational policies, procedures and regulatory requirements are being met • Monitors and reviews the organisation's policies, procedures and adherence to legislative requirements in order to implement and manage change
Interact with others	1.3, 2.3, 3.1, 3.2, 4.2	• Adapts personal communication style to build a positive working relationship and show respect for the opinions, values and particular needs of others • Plays a lead role in situations requiring effective collaborative skills, demonstrating high level negotiation skills and ability to influence others • Shares knowledge, information and experience openly as an integral part of the working relationship
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.2-3.5, 4.1, 4.3	• Develops plans for complex, high impact activities with strategic implications for the organisation • Gathers and analyses data and seeks feedback to improve plans and processes • Makes high impact decisions in a complex and diverse environment, using input from a range of sources • Identifies key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision making strategies where appropriate

Assessment Requirements for BSBDIV601 Develop and implement diversity policy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse information about diversity from a range of internal and external sources to identify:
  - existing practices
  - potential benefits of diversity and the fit with business objectives
- develop a comprehensive diversity policy with details of an implementation strategy and how the policy will be monitored and reviewed
- implement, evaluate and change the diversity policy based on recommendations for improvement
- consult with relevant stakeholders during development, implementation and review of the diversity policy and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain business operations that can be linked to diversity
- identify potential benefits of diversity to the organisation
- describe diversity within the business environment including:
  - cultures
  - beliefs
  - traditions and practices
- describe contemporary theory about diversity and its potential contribution to business advantage

© Commonwealth of Australia, 2025 Skills Insight

- outline legislation, codes of practice and national standards as they apply to development of diversity policy.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – diversity field of work and include access to:

- business technology
- legislation, regulations and codes of practice for managing diversity
- workplace diversity policies and procedures
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan financial management approaches	1.1 Access budget/financial plans for the work team 1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3 Negotiate any changes required to be made to budget/financial

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	plans with relevant personnel within the organisation 1.4 Prepare contingency plans in the event that initial plans need to be varied
2 Implement financial management approaches	2.1 Disseminate relevant details of the agreed budget/financial plans to team members 2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances 2.3 Determine and access resources and systems to manage financial management processes within the work team
3 Monitor and control finances	3.1 Implement processes to monitor actual expenditure and to control costs across the work team 3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4 Report on budget and expenditure in accordance with organisational protocols
4 Review and evaluate financial management processes	4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team 4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3	• Interprets and analyses information to determine activities required

© Commonwealth of Australia, 2025 Skills Insight

Writing	1.1, 1.4, 4.1-4.3	• Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures
Oral Communication	1.2, 1.3, 2.1-2.3	• Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to clarify information and to confirm understanding
Numeracy	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Navigate the world of work	2.2, 3.3, 3.4, 4.3	• Recognises, understands and adheres to organisational requirements in undertaking own work
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3	• Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Get the work done	1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3	• Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines • Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Skills Insight

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM601 Manage finances

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake budgeting, financial forecasting and reporting and to allocate and manage resources to achieve the required outputs for the business unit. It includes contributing to financial bids and estimates, allocating funds, managing budgets and reporting on financial activity.

It applies to individuals who have managerial responsibilities which include overseeing the management of financial and other resources across a business unit, a series of business units or teams, or an organisation. It covers all areas of broad financial management. In a larger organisation this work would be supported by specialists in financial management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan for financial management	1.1 Review and analyse previous financial data to establish areas which have generated a profit or loss 1.2 Undertake research to review reasons for previous profit and loss 1.3 Review business plan to establish critical dates and initiatives that will require or generate resources in the next financial cycle

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Analyse cash flow trends 1.5 Review statutory requirements for compliance and liabilities for tax 1.6 Review existing software and its suitability for financial management
2 Establish budgets and allocate funds	2.1 Use previous financial data to determine allocations for resources 2.2 Make informed estimates of new items for inclusion in budget 2.3 Prepare budgets in accordance with organisational requirements and statutory requirements
3 Implement budgets	3.1 Circulate budgets and ensure managers and supervisors are clear about budgets, reporting requirements and financial delegations 3.2 Manage risks by checking there are no opportunities for misappropriation of funds and that systems are in place to properly record all financial transactions 3.3 Review profit and loss statements, cash flows and ageing summaries 3.4 Revise budgets, as required, to deal with contingencies 3.5 Maintain audit trails to ensure accurate tracking and to identify discrepancies between agreed and actual allocations 3.6 Ensure compliance with due diligence
4 Report on finances	4.1 Ensure structure and format of reports are clear and conform to organisational and statutory requirements 4.2 Identify and prioritise significant issues in statements, including comparative financial performances for review and decision making 4.3 Prepare recommendations to ensure financial viability of the organisation 4.4 Evaluate the effectiveness of financial management processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Skills Insight

	Criteria	
Reading	1.1-1.6, 2.1-2.3, 3.2-3.5, 4.1-4.4	• Interprets, analyses and evaluates complex information to determine and adhere to organisational or legislative requirements and to assist with financial decision making
Writing	1.1-1.6, 2.1- 2.3, 3.1-3.5, 4.1-4.3	• Develops and records information which incorporates a detailed analysis of factual and forecasted information • Prepares documents using format, content and layout appropriate to audience, purpose and regulatory requirements
Oral Communication	3.1	• Explains financial decisions and outcomes clearly and uses listening and questioning techniques to exchange information and obtain agreement
Numeracy	1.1-1.6, 2.1-2.3, 3.2-3.5, 4.1-4.2	• Reviews and analyses numerical data embedded in organisational documentation and legislation • Compares and contrasts complex numerical data to analyse and evaluate financial position and processes. • Uses appropriate formulae to analyse financial data to assess and manage risk and identify discrepancies
Navigate the world of work	1.5, 2.3, 3.6, 4.1	• Recognises, understands and adheres to legislative and organisational requirements in undertaking own work
Interact with others	3.1	• Selects and uses appropriate conventions and protocols when communicating with supervisors and managers to share information or seek agreement
Get the work done	1.1-1.6, 2.1-2.3, 3.1-3.5, 4.1-4.4	• Uses logical processes in planning, implementing and evaluating complex tasks to achieve stated goals • Uses formal analytical thinking techniques to identify issues, investigate underlying causes and generate possible solutions, seeking input from others as required • Uses a range of digital technology to access, filter, compile, integrate and logically present complex information from multiple sources • Investigates new digital technologies and applications to manage and manipulate data

Assessment Requirements for BSBFIM601 Manage finances

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan for financial management
- read and review profit and loss statements, cash flows and aging summaries
- prepare, implement and revise a budget which aligns with the business plan, is based on research and analysis of previous financial data and cash flow trends, and meets all compliance requirements
- contribute to financial bids and estimates
- establish a budget and allocate funds in accordance with statutory and organisational requirements
- communicate with other people including:
  - reporting on financial activity and making recommendations
  - identifying and prioritising significant issues
  - ensuring managers and supervisors are clear about budgets.
- analyse the effectiveness of existing financial management approaches including reviewing financial management software, managing risks of misappropriation of funds, ensuring systems are in place to record all transactions, maintaining an audit trail and complying with due diligence.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the requirements for financial probity
- describe the principles of accounting and financial systems
- explain Australian, international and local legislation and conventions that are relevant to financial management in the organisation

© Commonwealth of Australia, 2025 Skills Insight

- outline the requirements of the Australian Tax Office, including Goods and Services Tax, Company Tax, Pay As You Go.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- financial data
- relevant legislation and Australian Tax Office requirements
- examples of business plans, profit and loss statements, cash flows and aging summaries
- organisational financial policies and procedures
- financial management software.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Contribute to team outcomes	1.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2 Support team members to meet expected outcomes

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Support team cohesion	2.1 Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility 2.2 Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward team members' efforts and contributions 2.4 Identify and address issues, concerns and problems identified by team members, or refer to relevant persons as required
3 Participate in work team	3.1 Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions 3.2 Support the team to identify and resolve problems which impede its performance 3.3 Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers
4 Communicate with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues to line manager/management and follow up to ensure action is taken in response to these matters

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.3, 2.4, 4.2, 4.3	• Uses appropriate vocabulary, grammatical structures and conventions to communicate information, matching style to purpose and audience
Oral	1.1, 1.2, 2.1-2.4, 3.1,	• Presents ideas and seeks feedback from others using vocabulary and non-verbal features appropriate to the

Assessment Requirements for BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
  - provides direction and leadership
  - assists individuals to achieve goals
  - motivates and builds team cohesion
  - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
  - group dynamics and processes
  - motivation

© Commonwealth of Australia, 2025 Skills Insight

  - negotiation
- explain why considering individual behaviour and differences is important to a manager.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate’s agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

© Commonwealth of Australia, 2025 Skills Insight

- explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM302 Utilise a knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to access a knowledge management system, use monitoring and review processes to provide feedback and improve own work practices using the system.

This includes a whole range of strategies, methods, activities and techniques used formally and informally by individuals and the organisation (as formalised in a knowledge management system) to identify, collect, organise, store, retrieve, analyse, share and apply knowledge to the work of the organisation.

It applies to individuals who apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of knowledge management to assist in increasing productivity, to improve quality or to recognise the benefits to the organisation through the improved use of knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Access and use	1.1 Access knowledge management system to assist with specific

BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to be an effective and proactive member of an innovative team.

It applies to individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. Teams may be formal or informal and may comprise a range of personnel.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Create opportunities to maximise innovation within the team	1.1 Evaluate and reflect on what the team needs and wants to achieve 1.2 Check out information about current or potential team members' work in the context of developing a more innovative team 1.3 Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross fertilising ideas

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 Acknowledge, respect and discuss the different ways that people may contribute to building or enhancing the team
2 Organise and agree effective ways of working	2.1 Jointly establish ground rules for how the team will operate 2.2 Agree and communicate responsibilities in ways that encourage and reinforce team-based innovation 2.3 Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4 Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5 Establish personal reward and stimulation as an integral part of the team's way of working
3 Support and guide colleagues	3.1 Model behaviour that supports innovation 3.2 Seek external stimuli and ideas to feed into team activities 3.3 Proactively share information, knowledge and experiences with other team members 3.4 Challenge and test ideas within the team in a positive and collaborative way 3.5 Proactively discuss and explore ideas with other team members on an ongoing basis
4 Reflect on how the team is working	4.1 Debrief and reflect on activities and on opportunities for improvement and innovation 4.2 Gather and use feedback from within and outside the team to generate discussion and debate 4.3 Discuss the challenges of being innovative in a constructive and open way 4.4 Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5 Identify, promote and celebrate successes and examples of successful innovation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Reading	1.2, 4.2	• Interprets and analyses textual information, from a wide range of sources, to identify information relevant to team activities
Writing	2.2, 3.3, 4.4	• Uses clear language and formats appropriate for the audience to highlight and present specific information
Oral Communication	1.2, 1.3, 1.4, 2.1, 2.2, 3.5, 4.1, 4.2, 4.3, 4.4, 4.5	• Actively participates in verbal exchanges of ideas and elicits the views and opinions of team members by listening and questioning • Uses clear language to clarify rules and roles relating to team activities in formal and informal situations
Numeracy	1.2, 4.2	• Interprets numeric information relevant to team activities
Navigate the world of work	1.1, 3.1, 3.2, 3.5	• Understands the nature and purpose of own role and how it affects others in the work context
Interact with others	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.4, 4.5	• Uses inclusive techniques to initiate, contribute and promote discussion amongst potentially diverse team members • Recognises the importance of establishing and building effective working relationships • Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.3, 1.4, 2.2, 2.4, 2.5, 3.2, 3.4, 4.2, 4.4, 4.5	• Plans, sequences and prioritises tasks for efficient and effective outcomes • Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking • Uses problem-solving processes to address less predictable problems, and when appropriate, seeking input from others • Reflects on outcomes and further explores own and the team’s role in implementing innovation

Assessment Requirements for BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply practices that promote innovation within a team including:
  - modelling open and respectful communications
  - contributing to the make-up and rules of the team
  - planning and scheduling of activities
  - reflecting on activities, feedback and challenges to identity improvement options
- encourage others to contribute to innovation in the team
- implement improvements and communicate about them.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain what innovation is, the different types of innovation and the benefits of innovation
- describe the internal and external factors that contribute to a team becoming and remaining innovative including:
  - team characteristics
  - the role of group dynamics and diversity
  - broader environmental factors
- explain how activities can encourage or hinder innovation in a team including:
  - allocation of time and activities
  - modelling behaviour
  - rewards and recognition
  - communications

© Commonwealth of Australia, 2025 Skills Insight

- feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies.

It applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area.

The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and innovation – innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify change requirements and opportunities	1.1 Identify strategic change needs through an analysis of organisational objectives 1.2 Review existing policies and practices against strategic objectives to identify where changes are required

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.3 Monitor the external environment to identify events or trends that impact on the achievement of organisational objectives 1.4 Identify major operational change requirements due to performance gaps, business opportunities or threats, or management decisions 1.5 Review and prioritise change requirements or opportunities with relevant managers 1.6 Consult stakeholders, specialists and experts to assist in the identification of major change requirements and opportunities
2 Develop change management strategy	2.1 Undertake cost-benefit analysis for high priority change requirements and opportunities 2.2 Undertake risk analysis and apply problem solving and innovation skills to identify barriers to change and agree and record mitigation strategies 2.3 Develop change management project plan 2.4 Obtain approvals from relevant authorities to confirm the change management process 2.5 Assign resources to the project and agree reporting protocols with relevant managers
3 Implement change management strategy	3.1 Develop communication or education plan, in consultation with relevant groups and individuals, to promote the benefits of the change to the organisation and to minimise loss 3.2 Arrange and manage activities to deliver the communication or education plans to relevant groups and individuals 3.3 Consult with relevant groups and individuals for input into the change process 3.4 Identify and respond to barriers to the change according to risk management plans 3.5 Action interventions and activities set out in project plan according to project timetable 3.6 Activate strategies for embedding the change 3.7 Conduct regular evaluation and review and modify project plan where appropriate to achieve change program objectives

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2	• Interprets detailed information that may deal with complex ideas related to issues both within and outside the workplace context
Writing	2.1, 2.2, 2.3, 2.4, 3.1	• Uses clear and precise language to develop information about objectives, requirements, activities and recommendations • Develops complex plans and strategies in appropriate format for the audience and purpose
Oral Communication	1.6, 2.2, 2.4, 2.5, 3.3	• Discusses and seeks information using appropriate structure and language for the particular audience • Uses questioning and active listening to clarify or confirm understanding
Numeracy	2.1, 2.3, 2.3	• Interprets, analyses and presents numeric/financial information in complex documents
Navigate the world of work	1.1-1.6, 2.4, 2.5, 3.1, 3.2	• Takes a lead role in the development of organisational strategic goals and associated roles and responsibilities
Interact with others	1.5, 1.6, 2.4, 2.5, 3.1-3.3	• Uses a variety of communication tools and strategies to build and maintain effective working relationships • Uses inclusive and collaborative techniques to seek feedback, negotiate and consult with a range of stakeholders
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2, 3.4-3.7	• Plans, organises and implements activities required to achieve strategic priorities and outcomes, including consulting with others and sequencing events to minimise uncertainty for staff • Uses problem-solving skills to identify and analyse issues or barriers, and develop responses • Develops new and innovative ideas through exploration and lateral thinking

Assessment Requirements for BSBINN601 Lead and manage organisational change

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and interpret information about the organisation's internal and external environment and consult with stakeholders to identify requirements and opportunities for changes that support organisational objectives
- prioritise opportunities for changes with input from managers
- develop a change management project plan for the priority changes incorporating resource requirements, risk management and timelines
- develop strategies to communicate or educate the changes and embed them
- obtain approvals and agree reporting protocols with relevant managers and implement the plan including addressing barriers to change
- review and evaluate the change management project plan and modify as needed to achieve objectives.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the change management process or cycle and strategies for communicating and embedding change
- explain how organisational behaviour and the external environment can impact on change strategies
- describe the components of a change management project plan
- list potential barriers to change and explain possible strategies to address barriers.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documentation and resources
- office equipment, materials and software packages
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN801 Lead innovative thinking and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate, lead and sustain innovative organisational thinking and practice.

It applies to individuals who initiate and lead innovation in any industry or community context. Each organisation's thinking and practice will be different depending on its core business, purpose, size, complexity and broader operating context.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Generate innovative thinking and creativity	1.1 Research and use a range of techniques and tools to generate new ideas and thinking 1.2 Research and analyse trends shaping organisation's current and future thinking and practice 1.3 Introduce and promote creative thinking techniques to foster personal and team innovation 1.4 Evaluate overall context for individual and collective

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	innovative thinking and creativity 1.5 Research and analyse specific conditions for innovation and issues that impact on individual and collective innovative thinking and creativity 1.6 Research and review innovation drivers and enablers
2 Lead innovative practices	2.1 Develop personal leadership style to model positive innovative thinking and practice 2.2 Review, challenge and refine own style and practice in relation to modelling and supporting innovation 2.3 Assess and determine the requirements to promote sustainable innovative activity for the operational context and people involved 2.4 Devise and implement most appropriate means to promote knowledge transfer 2.5 Identify, evaluate and manage risks associated with innovation within an organisation
3 Generate and support a culture of innovation	3.1 Introduce and promote innovative practices, processes, products or services appropriate to audience and organisational requirements 3.2 Establish ways to capture, communicate and share innovative ideas and practices 3.3 Initiate and foster communication, consultation and team development approaches that support innovation 3.4 Identify, assess and provide adequate resources for innovation to occur 3.5 Develop and apply strategies to foster a workplace culture capable of encouraging innovation 3.6 Establish mechanisms at system and process level that can support innovation
4 Sustain innovative thinking and practice	4.1 Develop strategies to make innovation an integral part of organisational activity 4.2 Develop and monitor processes to ensure ongoing awareness of individual and collective contributions to innovative thinking and practice 4.3 Analyse potential barriers and risks to innovation and devise strategies to respond 4.4 Analyse and reflect on innovation performance as a basis for developing strategies for improvement

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.1, 2.2, 4.4	• Evaluates and reflects on personal effectiveness to develop strategies to enhance own performance
Reading	1.1, 1.2, 1.5, 1.6	• Identifies, analyses, interprets and evaluates visual and textual information from a range of sources to identify innovation strategies, practices and trends
Writing	1.1, 1.2, 1.5, 1.6, 3.2	• Uses clear and precise language to document research findings for reference purposes • Develops complex plans, strategies and systems to integrate innovation into the organisation using appropriate formats for the audience and purpose
Oral Communication	1.3, 3.2, 3.3, 3.5	• Discusses, presents and seeks information using appropriate structure and language for the particular audience • Uses questioning and active listening to encourage discussion and to clarify or confirm understanding
Numeracy	1.1, 1.2, 1.5, 1.6, 3.2	• Interprets, analyses and presents numeric/financial information in complex documents
Navigate the world of work	2.1, 2.2, 2.3, 2.5, 3.1, 3.5, 4.1	• Understands how own role meshes with others and contributes to broader work goals • Leads in the development of strategies to integrate innovative practices into the organisation
Interact with others	1.3, 3.2, 3.3, 3.5	• Uses a variety of relevant communication tools and strategies to build and maintain effective working relationships • Uses inclusive and collaborative techniques to communicate, negotiate and consult effectively with a range of stakeholders • Actively seeks the perspectives of others as part of work role
Get the work done	1.1,1.2, 1.3-1.6, 2.3-2.5, 3.2-3.6, 4.1-4.4	• Plans, develops, implements and monitors practical strategies to introduce and support innovation in the workplace • Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking

© Commonwealth of Australia, 2025 Skills Insight

		• Uses formal analytical and lateral thinking techniques to identify issues, generate and evaluate possible solutions, and select most appropriate option

Assessment Requirements for BSBINN801 Lead innovative thinking and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use various techniques and tools to stimulate creative or innovative thinking
- research, review and critically analyse trends in thinking and emerging practices as they relate to an organisation's current thinking and practices
- develop own capacity to lead innovative thinking and practice in an organisational context
- complete a workplace project or case study to demonstrate a comprehensive understanding and application of key concepts, current theories and processes for introducing, communicating, promoting, supporting and sustaining innovative thinking and practices in an organisational context.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare and contrast current and past theories and thinking about innovation
- explain how theory and thinking on innovation and creativity can contribute to applied practice
- discuss the impact of leadership style on innovation in organisations, including how specific approaches may encourage or inhibit innovation
- discuss the relevance of organisational and industry context on innovation
- analyse the internal and external conditions or factors that impact on organisational innovation
- outline strategies for identifying, assessing and managing risks associated with innovation
- provide examples of innovation drivers in an organisation
- provide examples of innovation enablers in an organisation

© Commonwealth of Australia, 2025 Skills Insight

- list and describe mechanisms at system or process level that can support innovative practices
- discuss typical challenges and barriers to innovation within an organisation and ways of overcoming these challenges and barriers.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation field of work and include access to:

- workplace documentation and resources
- office equipment and materials
- case studies or, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU111 Operate a personal digital device

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on a personal digital device.

It applies to individuals who perform a range of routine digital tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Activate personal digital device and access features	1.1 Activate personal digital device, and access or log on according to user procedures 1.2 Identify basic functions and features using system information 1.3 Customise desktop or application configuration, if necessary, with assistance from appropriate persons 1.4 Access help functions as required
2. Navigate and organise	2.1 Open, close and access features by selecting correct desktop or

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
file or application environment	menu icons 2.2 Create shortcuts onto the desktop or menu, if necessary, with assistance from appropriate persons 2.3 Create folders/subfolders of files or applications (or similar) with suitable names for personal device 2.4 Download new applications (or similar), with assistance from appropriate persons 2.5 Rename and move folders/subfolders of files or applications (or similar) with suitable names 2.6 Use search functions to locate files or applications (or similar) 2.7 Remove files or applications (or similar) as required, with assistance from appropriate persons
3. Edit stored information	3.1 Open relevant file, document, application, or similar 3.2 Edit content of the file, document, application, or similar in accordance with simple instructions 3.3 Save changes to personal device
4. Shut down/deactivate personal digital device	4.1 Save and close all open applications 4.2 Shut down or deactivate personal digital device according to user procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Recognises textual information within internal procedures and technical documents to determine and complete work requirements
Writing	• Inputs information using familiar text types and records numerical and textual information for file naming conventions
Oral Communication	• Asks simple questions and comprehends answers that contain short and explicit information
Navigate the world of work	• Recognises and follows simple instructions
Interact with	• Uses appropriate communication practices to seek guidance from

© Commonwealth of Australia, 2025 Skills Insight

others	more experienced work colleagues
Get the work done	• With guidance, is beginning to understand and use the specific functions and features of digital systems and tools

Assessment Requirements for BSBITU111 Operate a personal digital device

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- follow user procedures to activate and access a personal digital device
- follow user procedures and system information when using the basic functions on a personal digital device, seeking assistance when necessary
- use desktop or menu icons and create shortcuts
- create and manipulate folders and subfolders
- update and save changes to files, documents, applications, or similar
- correctly shut down or deactivate applications and the device.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- User procedures for activating and accessing a personal digital device
- Key components of the digital system, including what each one does
- Key functions of the operating system organisational conventions for naming files

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

- device user and system information
- suitable workspace including a personal digital device.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

© Commonwealth of Australia, 2025 Skills Insight

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine development needs	1.1 Systematically identify and implement learning and development needs in line with organisational requirements 1.2 Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	implemented 1.3 Encourage individuals to self-evaluate performance and identify areas for improvement 1.4 Collect feedback on performance of team members from relevant sources and compare with established team learning needs
2. Develop individuals and teams	2.1 Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry 2.2 Ensure that learning delivery methods are appropriate to the learning goals, the learning style of participants, and availability of equipment and resources 2.3 Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate individual and team achievement of competencies 2.4 Create development opportunities that incorporate a range of activities and support materials appropriate to the achievement of identified competencies 2.5 Identify and approve resources and time lines required for learning activities in accordance with organisational requirements
3. Monitor and evaluate workplace learning	3.1 Use feedback from individuals or teams to identify and implement improvements in future learning arrangements 3.2 Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support 3.3 Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning 3.4 Document and maintain records and reports of competency according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Skills Insight

Learning	1.1-1.4, 2.1-2.4, 3.1, 3.3	• Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1-3.4	• Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	1.1, 1.2, 1.4, 2.1, 2.5, 3.1-3.4	• Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3	• Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives
Navigate the world of work	1.1, 2.5, 3.4	• Recognises and responds to explicit and implicit organisational procedures and protocols Understands how own role meshes with others and contributes to broader goals
Interact with others	1.2, 1.3, 1.4, 2.2, 2.3, 3.1, 3.3	• Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve joint/agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.4	• Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- systematically identify and implement learning opportunities for others
- collect feedback on team and individual performance
- give and receive feedback from team members to encourage participation in and effectiveness of the team
- collaboratively develop learning plans to match skill needs of individuals and groups
- provide mentoring and coaching assistance to teams and individuals
- monitor and review workplace learning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe facilitation techniques to encourage team development and improvement
- outline organisational policies, plans and procedures for developing teams
- identify career paths and competency standards relevant to the industry.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- office equipment and resources
- learning and development plans, policies and procedures
- case studies and, where available, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	• Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	• Identifies, interprets, analyses and reviews textual information related to the operational plan and

Assessment Requirements for BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
processes	making processes, assume responsibility and exercise initiative 1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback 1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes
2. Monitor and review performance	2.1 Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved 2.2 Improve customer service through continuous improvement techniques and processes 2.3 Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation
3. Provide opportunities for further improvement	3.1 Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan 3.2 Document work performance to aid the identification of further opportunities for improvement 3.3 Manage records, reports and recommendations for improvement within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.2, 3.3	• Evaluates and integrates facts and ideas to construct meaning from a range of text types in an effort to implement continuous improvement systems and processes
Writing	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	• Selects vocabulary, grammatical structures and conventions appropriate to text • Researches, plans and prepares continuous improvement documentation for relevant stakeholders
Oral	1.2, 1.3, 2.3	• Participates in a variety of spoken exchanges with a range of audiences using structure and language to suit

© Commonwealth of Australia, 2025 Skills Insight

Communication		the audience
Navigate the world of work	2.1	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact the work of others	1.2, 1.3, 2.3, 3.1	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to seek or share information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3	• Takes responsibility for planning and organising own workload to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals • Uses digital applications to access and filter data, extract, organise, integrate and share relevant information • Recognises the potential of new approaches to enhance work practices and outcomes

BSBMGT605 Provide leadership across the organisation

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to demonstrate senior leadership behaviour and personal and professional competence. Business ethics are also addressed in this unit.

It applies to individuals who have a role in inspiring and motivating others to achieve organisational goals and to model professionalism in their organisation and industry. Leadership is seen in the context of the organisational mission.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate organisational mission and goals	1.1 Clarify objectives, values and standards in accordance with organisation's strategic direction 1.2 Establish linkages between organisational objectives, values and standards and the responsibilities of relevant groups and individuals 1.3 Ensure media and language used is appropriate to individuals and group circumstances

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.4 State clear expectations of internal groups and individuals and explain in a manner which builds commitment to the organisation 1.5 Address expectations of the organisation 1.6 Investigate incidents promptly and communicate results clearly to relevant groups and individuals
2. Influence groups and individuals	2.1 Build trust, confidence and respect of diverse groups and individuals through positive role modelling and effective communication and consultation 2.2 Embrace, resource and effectively implement improvements to organisational and workplace culture 2.3 Demonstrate understanding of the global environment and new technology in work activities 2.4 Ensure actions convey flexibility and adaptability to change and accessibility 2.5 Ensure consultation and participation in decision making occurs with relevant groups and individuals where appropriate 2.6 Ensure decision making takes into account needs and expectations of both internal and external groups 2.7 Ensure decision making occurs in accordance with risk management plans for all options, and within appropriate timeframes 2.8 Ensure that the organisation is represented positively in the media and community
3. Build and support teams	3.1 Assign accountabilities and responsibilities to teams consistent with their competencies and operational plans 3.2 Ensure teams are resourced to allow them to achieve their objectives 3.3 Empower teams and individuals through effective delegation and support for their initiatives 3.4 Create and maintain a positive work environment 3.5 Encourage teams and individuals to develop innovative approaches to the performance of work
4. Demonstrate personal and professional competence	4.1 Model ethical conduct in all areas of work and encourage others to adopt business ethics 4.2 Adapt appropriate interpersonal and leadership styles to meet particular circumstances and situations 4.3 Set and achieve personal objectives and work program

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	outcomes 4.4 Ensure self-performance and professional competence is continuously improved through engagement in a range of professional development activities 4.5 Participate regularly in industry/professional networks and groups

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.3, 4.4, 4.5	• Actively looks for and accepts ways to maintain and improve own skills and knowledge
Reading	1.2, 1.3, 1.6, 2.7, 4.4, 4.5	• Evaluates and integrates facts and ideas to construct meaning from a range of text types
Writing	1.1, 1.2, 1.3, 1.4, 1.6, 3.1, 4.3	• Records and reports key information related to the outcomes of the job to interact effectively and appropriately with the team • Researches, plans and prepares documentation using format and language appropriate to the audience
Oral Communication	1.1, 1.2, 1.4, 1.5, 1.6, 2.1, 2.5, 3.1, 3.3, 3.4, 3.5, 4.1, 4.2	• Participates in a variety of spoken exchanges with clients, co-workers and stakeholders using structure and language appropriate to context and audience
Navigate the world of work	1.1, 1.2, 1.5, 1.6, 2.8, 3.1, 4.1	• Works autonomously making high level decisions related to the achievement of organisational goals • Reflects on designation of roles and responsibilities and how everyone's role contributes to broader organisational goals • Appreciates the implications of ethical and other organisational responsibilities in carrying out own role
Interact with others	1.3, 1.4, 1.6, 2.1, 2.4, 3.1, 3.3, 3.4, 3.5, 4.1, 4.2	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to achieve goals • Identifies strengths and limitations of own interpersonal skills and addresses areas that would benefit from further development

© Commonwealth of Australia, 2025 Skills Insight

		• Recognises the importance of building rapport in order to establish effective working relationships and inspire trust and confidence • Collaborates and cooperates with others, playing an active role in leading and facilitating effective group interaction and influencing direction • Facilitates a climate in which others feel comfortable to identify, explore and build on a variety of perspectives in order to achieve shared outcomes
Get the work done	1.1, 1.2, 1.6, 2.2-2.7, 3.1, 3.2, 3.5	• Accepts responsibility for planning and sequencing complex tasks and workload of self and others, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness • Applies problem solving processes to identify risks, evaluate options and determine solutions • Facilitates a climate in which creativity and innovation are accepted as an integral part of achieving outcomes • Actively identifies systems, devices and applications with potential to meet current and/or future needs

BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan.

It applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop business plan	1.1 Review and evaluate pre-existing strategic, business and operational plan, if available 1.2 Analyse and interpret business vision, mission, values and objectives 1.3 Consult with key stakeholders 1.4 Review market requirements for the product or service, profile customer needs and research pricing options

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.5 Develop performance objectives and measures through consultation with key stakeholders 1.6 Identify financial, human and physical resource requirements for the business 1.7 Consider any permits or licences that may be required for new activity 1.8 Write business plan
2. Monitor performance	2.1 Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2 Ensure skilled labour is available to implement plan 2.3 Test performance measurement systems and refine, if necessary 2.4 Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5 Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1 Analyse performance reports against planned objectives 3.2 Review performance indicators and refine if necessary 3.3 Ensure groups and individuals contributing to under-performance are coached, and provide training where appropriate 3.4 Review system processes and work methods regularly as part of continuous improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.7, 2.3, 3.1, 3.2, 3.4	• Gathers, interprets and analyses textual information when developing the business plan and monitoring operational performance • Utilises understanding of distinguishing structures and features of a range of text as well as recognising and

Assessment Requirements for BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements, marketing approaches and strategic, business and operational plans
- write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas
- implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate
- monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce
- consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers
- provide an analysis of the strengths and weaknesses of a business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline processes for developing business plans
- describe performance objectives and measures including key performance indicators
- identify key stakeholders.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- appropriate documentation and resources normally used in the workplace
- strategic, business and operational plans
- business information and data
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG414 Undertake marketing activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, implement and manage basic marketing and promotional activities. It is a foundation unit covering general and basic marketing and promotional activities that do not require detailed or complex planning or implementation.

It applies to people with no previous experience in marketing. It could be undertaken as part of a broader role of a person in a small enterprise, or as part of a marketing plan for a larger enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research marketing information	1.1 Research concept of marketing as it applies to the organisation 1.2 Identify and analyse organisation's marketing plan and relevant policies and procedures 1.3 Identify need for marketing activities from established marketing plan 1.4 Investigate previous marketing activities for relevant

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	information 1.5 Identify profile of market segment 1.6 Identify positioning and market mix for each target segment 1.7 Identify outcomes expected from marketing activities
2 Plan marketing activities	2.1 Undertake analysis of collected basic marketing information 2.2 Develop and document work activity plans for marketing activities 2.3 Obtain approval of plans from relevant enterprise personnel
3 Implement marketing activities	3.1 Determine and access resources required for work activities 3.2 Undertake marketing activities within job role 3.3 Assist with assigning responsibilities and functions to relevant personnel performing specific marketing functions 3.4 Monitor marketing activities, and review and amend activity plan as required
4 Review marketing activities	4.1 Measure and record outcomes of marketing activities 4.2 Review marketing activities against expected outcomes and record identified improvements 4.3 Prepare reports of marketing activities and communicate to relevant enterprise personnel

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.7, 2.1, 3.4, 4.2	• Interprets textual information obtained from a range of sources and determines how content may be applied to organisational requirements
Writing	2.2, 3.2, 3.4, 4.1-4.3	• Integrates information from a number of sources to develop material that supports purposes and format of documentation, using suitable grammatical structure and clear, logical language
Oral	2.3, 4.3	• Participates in a variety of spoken exchanges using

Assessment Requirements for BSBMKG414 Undertake marketing activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research marketing practices of the organisation
- plan and implement a marketing activity
- record activities and processes used in marketing activity
- review effectiveness of marketing plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic foundations of marketing practices
- describe organisational policies and procedures on marketing
- outline specific product knowledge related to products and services being marketed.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- examples of products or services to be marketed
- marketing plans, policies and procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG502 Establish and adjust the marketing mix

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine the optimum marketing mix for a business through analysis of interrelated marketing components.

It applies to individuals in marketing management roles who are responsible for developing marketing and promotional mix within an organisation. They may also adjust the marketing mix when new marketing opportunities are identified.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Evaluate each component of marketing mix	1.1 Identify key characteristics of products or services and estimate their significance to the market 1.2 Review pricing policy and analyse pricing variables to determine their effect on demand 1.3 Analyse promotional methods to determine their importance to marketing outcomes 1.4 Review channels of distribution and estimate their significance

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	to marketing outcomes 1.5 Identify and analyse level of customer service provision to determine its significance to marketing outcomes 1.6 Identify potential customer base and key pressure points 1.7 Analyse and test effect of components of marketing mix on each other, and establish their relative importance to customer base
2. Determine marketing mix for specific markets	2.1 Identify and assess environmental factors, and their impact on marketing mix 2.2 Identify consumer priorities, needs and preferences affecting marketing mix 2.3 Consider product, pricing, promotional, distribution and service variations, and evaluate these against marketing objectives, target market characteristics and desired positioning 2.4 Select marketing mix that best satisfies target market and meets marketing objectives 2.5 Ensure marketing mix decision meets organisational, strategic and operational marketing objectives
3. Monitor and adjust marketing mix	3.1 Monitor marketing mix against marketing performance and isolate components for testing 3.2 Evaluate implications of altering one or more components of marketing mix in relation to market factors and consumer response 3.3 Adjust components of marketing mix in response to test results and market-response evaluation 3.4 Ensure adjusted marketing mix meets budgetary requirements 3.5 Ensure adjusted marketing mix continues to meet organisational, strategic and operational marketing objectives, and desired positioning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.7, 2.1-2.5,	• Evaluates and comprehends textual information from a

Assessment Requirements for BSBMKG502 Establish and adjust the marketing mix

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- report on activities undertaken to establish a marketing mix in an organisation, including information on each element of the mix, such as:
  - customer service levels
  - product or service distribution
  - product or service pricing
  - additional products or services, if any
  - product or service promotion
- report on success of marketing mix activities developed, including coverage of any necessary adjustments made.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisational policies, procedures, products and services related to marketing
- describe principles and concepts of marketing such as consumer or buyer behaviour and elements of marketing mix
- outline and explain statistical techniques used to gather and analyse marketing information.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

© Commonwealth of Australia, 2025 Skills Insight

- office equipment and resources
- organisational and marketing strategic plans
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Construct an applied research strategy	1.1 Clarify and confirm applied research purpose and needs of the target group 1.2 Determine policies and procedures in relation to conducting applied research 1.3 Establish mechanisms for collecting and maintaining data in a

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	systematic manner 1.4 Analyse factors affecting the reliability and validity of data 1.5 Review relevant research ethics and codes of conduct 1.6 Prepare applied research strategy and hypothesis 1.7 Frame a research strategy in consideration of available tools and resources
2. Use a range of applied research techniques	2.1 Review and evaluate a range of applied research methods, theories and data collection techniques 2.2 Select appropriate methods to gather and analyse data 2.3 Use suitable technology and technology services to support data collection and analysis 2.4 Access appropriate sources of information and contributors relevant to the research 2.5 Optimise relevance of the research through integrity of the data collected and analysis tools used
3. Analyse and present findings	3.1 Evaluate how research findings such as trends and changes will impact on learning strategy 3.2 Review data and research findings for accuracy of details and adherence to any legal requirements 3.3 Collate and analyse data for relevance against the original applied research strategy 3.4 Document and present research findings in a clear and logical manner consistent with audience needs 3.5 Identify the need for and an appropriate approach to, further research

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.5	• Evaluates and reflects on the need for further research to contribute to ongoing organisational improvement

© Commonwealth of Australia, 2025 Skills Insight

Reading	1.1, 1.2, 1.5, 2.4, 3.1, 3.2	• Collects, analyses, compares and evaluates textual information from a range of resources to inform research strategies
Writing	1.6, 3.3, 3.4	• Develops texts dealing with complex ideas and concepts • Uses specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal, ethical and organisational requirements
Oral Communication	1.1, 3.4	• Uses specialised vocabulary appropriate to context and audience to discuss and confirm research requirements • Applies listening and questioning techniques to check or confirm understanding
Numeracy	3.2, 3.3	• Applies knowledge of mathematical information to statistically analyse data and identify possible trends and confirm reliability
Navigate the world of work	1.2, 1.5, 3.2	• Is highly autonomous, taking responsibility for determining applicable organisational policies and procedures and considering legal and ethical obligations • Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others
Interact with others	3.4	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals
Get the work done	1.1, 1.2, 1.3, 1.7, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3	• Develops plans for complex activities, regularly reviewing priorities and performance during implementation, identifying and addressing issues as they arise • Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks • Uses formal analytical thinking to make informed decisions about research strategies and techniques, seeking input, advice and feedback as required

Assessment Requirements for BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
  - specific research questions or hypotheses
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - full description of the data collection methods
  - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques

© Commonwealth of Australia, 2025 Skills Insight

- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations .

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRKG404 Monitor and maintain records in an online environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and assess records for storage, and maintain and monitor electronic business records.

It applies to individuals who use guidelines and processes to inform judgements on the status and classification of records in an existing business or records system. They work under supervision or in consultation with more senior staff or users of the system.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Recordkeeping

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm requirements for recordkeeping in an online environment	1.1 Identify and confirm system procedures for capturing and managing records 1.2 Identify and verify organisational and risk management requirements for classifying and storing online information 1.3 Identify legal, business, financial, socio-historical, and security requirements for recording online business transactions 1.4 Prepare a checklist of organisational requirements to assess

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	which electronic information should be captured, for how long and in what format
2. Identify and assess records for storage	2.1 Categorise incoming and outgoing records information in terms of key activities and responsible personnel 2.2 Assess information against the organisational checklist and records identified for capture 2.3 Dispose of information not to be stored, in accordance with organisational procedures 2.4 Determine storage methods and media in accordance with retention requirements
3. Monitor and maintain business records in an online environment	3.1 Classify, sentence and link records with other records in the system in accordance with system rules and organisational procedures 3.2 Assign unique identifiers and register records into the recordkeeping system in accordance with system rules and organisational procedures 3.3 Determine access and security status and disposal requirements of records and records in accordance with organisational procedures 3.4 Store records on required media in accordance with organisational and record retention requirements 3.5 Carry out migration of records from one medium to another in accordance with organisational procedures 3.6 Action and record archiving or disposal of records in accordance with disposal schedule and organisational procedures 3.7 Maintain records in a usable and accessible form in accordance with security conditions and legislative requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Assessment Requirements for BSBRKG404 Monitor and maintain records in an online environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- monitor usage of online business or records system
- monitor application of system procedures
- manage record creation, update, migration and disposal processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of relevant legislation that apply to a records system
- explain the general principles and processes of records management and records management systems, including, but not limited to;
  - systems of control
  - records continuum theory
  - mandate and ownership of business process
- explain the operation of the online recordkeeping environment including location and nature of transactions.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources

© Commonwealth of Australia, 2025 Skills Insight

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop staffing plan	1.1 Determine staffing requirements to allow the business to run effectively, in accordance with requirements outlined in the

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	business plan 1.2 Identify and compare existing skills of owner/s and staff with business requirements to identify any gaps 1.3 Develop policies and procedures for owner/s and staff, in accordance with the business plan
2. Recruit, induct, train and retain team	2.1 Develop job or position descriptions, competencies required and selection criteria to meet business' needs 2.2 Judge information obtained from each candidate against specified selection criteria, and select according to business needs and legal requirements 2.3 Induct new staff members in accordance with policies and procedures of the business 2.4 Make team members aware of their responsibilities and performance requirements as soon as practicable, and take opportunities to coach team members who are unfamiliar with procedures of the business 2.5 Develop and implement a staff development program and career paths based on requirements of business and staff competencies 2.6 Advertise staff vacancies appropriately in accordance with staffing plan
3. Comply with industrial relations obligations	3.1 Clarify workplace rights and obligations of employers and employees, in accordance with legal requirements and codes of practice 3.2 Counsel staff, if required, in a positive and constructive manner and record outcomes accurately
4. Maintain staff records	4.1 Develop staff records system to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements 4.2 Monitor and accurately maintain system for recording and retrieving personnel and payroll information, and seek specialist advice where required
5. Manage staff	5.1 Regularly review contribution and skills of self and other team members to ensure performance is in line with agreed performance measures 5.2 Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business 5.3 Support and encourage staff, and acknowledge and reward

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	their contribution 5.4 Regularly provide opportunities for staff to discuss work related issues 5.5 Develop contingency plans to cope with unexpected or extreme situations and take appropriate corrective action as required
6. Review team performance	6.1 Develop positive and constructive relationships with and between team members 6.2 Review and update team objectives in support of business goals on a regular basis in consultation with team members 6.3 Identify strengths and weaknesses of team against current and expected work requirements 6.4 Schedule time, on a regular basis, for team members to review work operations to maintain and improve operational efficiency 6.5 Encourage team members to monitor their own performance, suggest improvements and identify professional development needs, in accordance with personal and business requirements 6.6 Monitor and review staff turnover rate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.2, 2.3, 2.5, 2.6, 3.1, 4.1, 5.1, 6.3, 6.5, 6.6	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.3, 2.1-2.6, 3.1, 3.2, 4.1, 4.2, 5.5, 6.1-6.3, 6.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.2, 2.2-2.4, 3.1, 3.2, 4.2, 5.3, 5.4, 6.1, 6.2, 6.4, 6.5	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding • Participates in verbal negotiations and coaching using tone and language suitable to audience

© Commonwealth of Australia, 2025 Skills Insight

Numeracy	6.4	• Uses basic mathematical formulas to review staff performances within available work schedules
Navigate the world of work	1.3, 2.2. 3.1, 4.1	• Understands own legal rights and responsibilities and is extending understanding of general legal principles across work contexts • Monitors adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment
Interact with others	2.4, 2.6, 5.3, 6.1, 6.5	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Looks for ways of establishing connections and building genuine understanding with a diverse range of people • Actively identifies important communication exchanges, selecting appropriate channels, format, tone and context to suit purpose and audience, and monitors impact
Get the work done	1.1, 1.2, 2.2, 2.3, 2.5, 4.2, 5.1, 5.2, 5.5, 6.3, 6.6	• Uses digital technologies and systems safely, legally and ethically when gathering, storing, accessing and sharing information • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans

Assessment Requirements for BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use the business plan to:
  - determine staffing requirements
  - coordinate skill-gap training where required
  - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

© Commonwealth of Australia, 2025 Skills Insight

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB420 Evaluate and develop small business operations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to evaluate and develop small business operations.

It applies to individuals who operate a small business which stands alone, or that is part of a department within a larger organisation. Individuals in this role use problem-solving skills and take responsibility for developing approaches to evaluating and developing business operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review and evaluate operational strategies and procedures	1.1 Develop a detailed operational plan that sets out clear action points to fulfil on business goals and objectives 1.2 Identify work health and safety (WHS) and environmental issues and implement strategies to minimise risk factors 1.3 Review and evaluate, where appropriate, a quality assurance process for the business in line with industry standards, compliance requirements and cultural criteria 1.4 Develop operational KPIs that align with the business plan 1.5 Align KPIs to business strategies, including utilisation of

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	existing or new technologies, where practicable, to optimise business performance
2. Implement operational strategies and procedures	2.1 Implement systems to evaluate business performance and customer satisfaction, including by setting key performance indicators or targets 2.2 Implement systems to control stock, expenditure or cost, wastage or shrinkage and risks to health and safety in accordance with the business plan, incorporating new digital technologies where possible 2.3 Identify and manage staffing requirements, considering a range of permanent and flexible arrangements, and adhering to budgetary constraints 2.4 Provide goods or services in accordance with established legal, ethical cultural and technical standards 2.5 Provide goods or services in accordance with time, cost and quality specifications, and customer requirements, incorporating new digital technologies where possible 2.6 Apply quality procedures to address product or service and customer requirements
3. Evaluate business performance	3.1 Use digital technologies to regularly evaluate and review achievement of operational targets to ensure optimum business performance, in accordance with business goals and objectives 3.2 Review and document systems and structures, with a view to more effectively supporting business performance 3.3 Investigate and analyse operating problems to establish causes and implement changes as required, as part of the business quality system 3.4 Update operational policies and procedures to incorporate corrective action
4. Review business operations	4.1 Review and adjust business operations to increase business success, in accordance with business goals and objectives 4.2 Research new and emerging digital technologies periodically, implementing as relevant, in accordance with business goals and objectives 4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding
Numeracy	• Interprets numerical information to manage performance information and regulate cash flow
Navigate the world of work	• Evaluates adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment • Appreciates implications of legal and regulatory responsibilities related to own work with specific reference to safety
Get the work done	• Reflects on how digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications • Identifies concepts, principles and features of approaches in use in other contexts and considers how these may suit own situation • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Uses each experience to reflect on how variables impact decision outcomes, and to gain insights into what constitutes an effective decision in different contexts

Assessment Requirements for BSBSMB420 Evaluate and develop small business operations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an operational plan
  - identifying risk management procedures
  - developing a quality assurance process
  - developing and implementing performance measures
  - utilising existing, new and emerging digital technologies to optimise business performance
- implement and evaluate strategies and procedures developed, including:
  - controlling stock, expenditure, and work health and safety risks
  - identifying and meeting staffing requirements
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
- record and research business improvements, including the potential to implement new and emerging digital technologies
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of relevant legislation and industry codes of practice
- Key features of methods for implementing operation and revenue control systems

© Commonwealth of Australia, 2025 Skills Insight

- Key features of methods for evaluating performance and implementing improvements
- Key features of work health and safety (WHS) responsibilities and procedures for managing hazards
- Key features of relevant principles of risk management, including risk assessment
- Key features of quality assurance system principles and methods
- Key features of the role of digital technologies and innovation in modern business
- Key features of systems to manage staff, stock, expenditure, services and customer service
- Key features of required technical or specialist skills relevant to business operations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources, including business technology
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CPPCLO3020 Pressure wash and clean surfaces

Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3020A Clean using pressure washing. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

Application

This unit of competency specifies the outcomes required to set up and use pressure washing equipment to clean surfaces by producing a variable stream of water or cleaning chemical. The unit covers assessing the extent of the cleaning task, and selecting the equipment, chemicals and cleaning methods required for the task.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

© Commonwealth of Australia, 2025 Skills Insight

1.	Plan and prepare to clean using pressure washing.	1.1. Type and condition of ***surfaces*** to be pressure washed are assessed, job requirements are reviewed, and issues are clarified.
		1.2. Work site ***hazards*** are assessed and risks controlled according to company, legislative, and ***health and safety requirements***.
		1.3. ***Soil types*** are identified by observation and ***cleaning chemicals*** required for the task are selected and prepared.
		1.4. ***Equipment*** is selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
		1.5. ***Personal protective equipment*** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
		1.6. Signs and barricades are selected and installed according to health and safety, and company requirements.
		1.7. Pre-existing damage is identified and reported according to company requirements.
2.	Use pressure washing equipment and techniques.	2.1. Items requiring protection from pressure spray are covered and secured according to specified requirements.
		2.2. Heavily soiled areas are pre-sprayed according to manufacturer specifications and company requirements.
		2.3. Pressure washing is conducted using equipment and chemicals and according to manufacturer specifications.
		2.4. Hand washing is performed on areas requiring additional treatment, using suitable equipment and chemicals according to manufacturer specifications.
		2.5. Washed area is rinsed using required equipment and allowed to dry.
3.	Tidy work site.	3.1. Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
		3.2. Protective coverings are removed and items returned to position according to specified requirements.

© Commonwealth of Australia, 2025 Skills Insight

		3.3.	Signs and barricades are removed according to health and safety, and company requirements.
4.	Clean and safety check equipment, and store equipment and chemicals.	4.1.	Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
		4.2.	Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	• dilute and mix required chemicals using whole numbers and routine fractions.
Oral communication skills to:	• ask questions to clarify job requirements • respond clearly and concisely to client questions.

Reading skills to:	• interpret directions and safety instructions, including:
	  • equipment operating manuals
	  • product labels
	  • safety data sheets (SDS).

Writing skills to:	• document and report faults in equipment to manufacturer and other personnel.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Surfaces must include at least three of the following:	• brick, including rendered brick surfaces • concrete, including polished concrete • metal surfaces, including industrial kitchen equipment and industrial machinery

© Commonwealth of Australia, 2025 Skills Insight

- painted
- polyresin.

Hazards that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

Health and safety requirements must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

Soil types must include at least three of the following:

- graffiti
- grease and oil
- mould and mildew

© Commonwealth of Australia, 2025 Skills Insight

	• pollution marks.
Cleaning chemicals must include at least one of the following:	• acid cleaners • alkaline cleaners • low environmental impact chemicals • neutral cleaners • solvent cleaners.
Equipment must include at least two of the following:	• brooms • cloths • hoses • lances • pressure washers • squeegees • wet area electrical safety connections.
Personal protective equipment must include at least three of the following:	• ear muffs and plugs • gloves • eye protection • disposable respirators • safety shoes • sun protection • wet-work clothing.

Assessment Requirements for CPPCLO3020 Pressure wash and clean surfaces

Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO3020A Clean using pressure washing. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also pressure wash three of the following surface types:

- brick, including rendered brick surfaces
- concrete, including polished concrete
- metal surfaces, including industrial kitchen equipment and industrial machinery
- painted
- polyresin.

In doing the above work, the person must:

- remove three of the following different soil types:
  - graffiti
  - grease and oil
  - mould and mildew
  - pollution marks
- identify site hazards and control risks before commencing the task
- identify surface and soil types
- select and prepare required cleaning equipment, including personal protective equipment (PPE) and cleaning chemicals
- use safe and efficient cleaning methods using pressure washing.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- suitability of different surfaces for pressure washing
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning using pressure washing, including industry advisory standards and codes, such as dangerous goods codes
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - disposal of packaging
  - sweeping detritus
  - used containers
  - used or contaminated PPE
  - used or unused chemicals
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to safety data sheets (SDS)
- range and functionality of equipment used in pressure washing
- procedures for selecting and applying cleaning chemicals required for different surfaces, including:
  - acid cleaners
  - alkaline cleaners
  - low environmental impact chemicals
  - neutral cleaners
  - solvent cleaners.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
- specifications:
  - equipment operating manuals
  - product labels
  - SDS

© Commonwealth of Australia, 2025 Skills Insight

- physical conditions:
  - suitable work site with range of surfaces as listed in the performance evidence
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPPCLO3035 Maintain cleaning storage areas

Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2035A Maintain cleaning storage areas. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

Application

This unit of competency specifies the outcomes required to maintain cleaning consumable storage areas to ensure they are accessible to authorised personnel only, that their contents are safely stored, and that equipment is maintained in serviceable condition. It requires the ability to maintain and operate a safe and efficient cleaning storage area following established procedures for storing and using chemicals according to legislative and health and safety requirements. The unit includes the movement and control of equipment, chemicals and consumables used in the provision of cleaning services.

The unit supports cleaners who work alone or in teams. It applies to storage areas in a range of commercial and residential work sites, including cleaners' rooms at a client work site, chemical cupboards, equipment storage bays, and in-built vehicular storage arrangements to keep consumables and equipment secure during transportation.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

essential outcomes.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Ensure safety and security of cleaning storage area and its contents.	1.1. ***Storage area*** is secured from unauthorised access according to legislative, company, and ***health and safety requirements***.
	1.2. ***Hazards*** in storage area are assessed and risks controlled according to legislative, company, and health and safety requirements.
	1.3. Safety warning charts and labels are prominently displayed and ***safety information*** is made accessible according to legislative, company, and health and safety requirements.
	1.4. ***Equipment*** is stored, maintained and checked to enable ready access and re-use according to manufacturer specifications and legislative, company, and health and safety requirements.
	1.5. ***Cleaning chemicals*** and ***consumables*** are stored according to manufacturer specifications and legislative, company, and health and safety requirements.
	1.6. ***Personal protective equipment*** (PPE) is cleaned, safety checked and stored, and maintenance requirements are recorded, according to manufacturer specifications, and health and safety and company requirements.
	1.7. Communication tools are stored and used according to company requirements.
	1.8. Storage area is kept accessible and free of obstacles according to practical restrictions of site or vehicle, and health and safety and company requirements.
2. Control equipment, chemical and consumable stock.	2.1. Inventory system of equipment, PPE, chemicals and consumables with maximum and minimum holding levels is maintained according to company requirements.
	2.2. Usage patterns are monitored and chemicals and consumables are re-ordered to maintain required levels according to company requirements.
	2.3. Labelling system of containers is maintained according to manufacturer specifications and legislative, company, and health and safety requirements.

© Commonwealth of Australia, 2025 Skills Insight

		2.4.	Chemicals and consumables are issued on a first-in first-out basis according to company requirements.
3.	Handle waste.	3.1.	Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
		3.2.	Obsolete equipment and chemicals are identified, collected and disposed of according to manufacturer specifications, and environmental, legislative, company, and health and safety requirements.
4.	Respond to emergency situations.	4.1.	Spillages and emergency situations are responded to in line with emergency response procedures and according to environmental, legislative, company, and health and safety requirements.
		4.2.	Required documentation is completed following an emergency situation and submitted according to environmental, legislative, company, and health and safety requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	• identify and access a range of resources to assist in maintaining security and safety of cleaning storage area.
Numeracy skills to:	• calculate current and required levels of stock.
Oral communication skills to:	• ask questions to clarify job requirements.

Reading skills to:	• interpret simple, structured manufacturer instructions when using equipment and chemicals
	• interpret directions and safety instructions, including:
	  • equipment operating manuals
	  • product labels
	  • safety data sheets (SDS).

Writing skills to:	• report faults in equipment to manufacturer and other personnel • use legible handwriting when recording stock levels and completing incident reports.

© Commonwealth of Australia, 2025 Skills Insight

Teamwork skills to:	• work collaboratively with others accessing and using the same storage area.
Initiative and enterprise skills to:	• proactively report the need for additional products or equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Storage area must include at least one of the following:	• cleaners' room located at client work site • in-vehicular cleaning storage facility.

Health and safety requirements must include:	• access to communication devices when working alone
	• compliance with Safe Work Australia regulations and guidelines
	• electrical equipment test and tag compliance
	• emergency response procedures
	• environmental controls
	• hazard signs and barricades
	• health and safety induction and refresher training
	• manual handling techniques
	• processes for safely dispensing chemicals
	• risk assessment procedures, including:
	  • hazardous chemicals register
	  • hierarchy of control
	  • job safety analyses (JSA) for low-risk situations
	  • safe work method statements (SWMS) for high-risk situations
	  • incident reporting
	• SDS
	• selection and use of required PPE
	• storage and maintenance of equipment according to manufacturer specifications
	• use of first aid according to SDS information.

Hazards that must be assessed include:	• biological and environmental contaminants • chemical exposure via absorption, ingestion and inhalation • chemical reactivity • dust and fibre particulates

Assessment Requirements for CPPCLO3035 Maintain cleaning storage areas

Modification History

Release	Comment
Release 1	Replaces superseded equivalent CPPCLO2035A Maintain cleaning storage areas. This version first released with CPP Property Services Training Package Version 4.
Release 2	Minor update to typo in the Knowledge Evidence, replace 'distilling' with 'diluting'. This version released with CPP Property Services Training Package Version 5.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also maintain one of the following cleaning storage areas:

- cleaners' room located at client work site
- in-vehicular cleaning storage facility used to transport cleaning equipment from site to site.

In doing the above work, the person must:

- maintain cleaning storage area and stock levels, ensuring correct storage of equipment, chemicals and consumables required for work site and client requirements
- maintain the security and accessibility of storage area
- maintain accurate labelling of chemicals
- maintain legible stock control records and documentation
- access each of the following documentation:
  - accident and incident reporting documentation
  - job sheets
  - health and safety control procedures, forms and documentation
  - safety data sheets (SDS).

In doing the above work, the person must also implement correct emergency response procedures in the event of a chemical spillage on site or inside the cleaning storage area, including:

© Commonwealth of Australia, 2025 Skills Insight

- undertaking correct clean-up procedures, including erecting required signs and barricades
- accurately and legibly completing required incident reporting documentation.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- application and operation of on-site communication tools, including:
  - mobile telephones
  - noticeboards
  - two-way radios
  - whiteboards
- documentation requirements in the event of an incident or accident
- environmental requirements relating to maintaining cleaning storage areas, including:
  - clean-up, containment and isolation procedures
  - environmental protection agency requirements relating to maintaining cleaning storage areas
  - use of low-energy cleaning methods
  - use of low-moisture cleaning methods
  - use of low water-use equipment and water-efficient cleaning methods
  - use of non-chemical cleaning methods
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to maintaining cleaning storage areas, including:
  - health and safety legislation
  - industry advisory standards and codes, such as dangerous goods codes
- safe handling techniques for working with hazardous chemicals, including:
  - emergency chemical spill control measures
  - routes of entry and potential symptoms of exposure to chemicals
  - safe methods for diluting chemicals
  - working according to SDS
- procedures for safe treatment and handling of the following waste:
  - chemicals past their expiry date
  - obsolete equipment
  - packaging
  - used containers
  - used or contaminated personal protective equipment (PPE)
  - used or unused chemicals
- processes for inventory and stock control and ordering replenishment stock
- manufacturer specifications for equipment and chemicals being used.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
  - consumables as listed in the range of conditions
- contingencies:
  - handling of chemicals that are past expiry
  - disposal of contaminated PPE and materials
  - handling of emergency situations
- specifications:
  - equipment operating manuals
  - product labels
  - SDS
- physical conditions:
  - access to commercial or residential cleaning site with suitable cleaning storage area
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPPCLO3036 Clean at heights

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3036A Clean at high levels.

This version first released with CPP Property Services Training Package Version 4.

Application

This unit of competency specifies the outcomes required to clean at heights above two metres from the ground or from a solid floor construction. It covers assessing the extent of the cleaning task and selecting the required equipment, chemicals and cleaning methods. Cleaning at heights may occur indoors or outdoors and can involve the use of specialised equipment to access the area to be cleaned.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites. The unit does not apply to work requiring the use of elevated work platforms.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify work area	1.1. Work area and job requirements are identified and need

	requirements.		for access equipment is confirmed according to work instructions.
		1.2.	Method of accessing work area is identified according to ***safe work method statement*** (SWMS).
		1.3.	Access equipment is selected, set up and inspected for defects, and issues are reported and rectified before commencing cleaning tasks.
		1.4.	Safe work methods for moving cleaning equipment and chemicals are identified to minimise risks.
		1.5.	Personal protective equipment (PPE) is selected according to the work task, manufacturer specifications, and health and safety and company requirements.
		1.6.	Tasks are sequenced to ensure maximum efficiency for completing cleaning requirements.
		1.7.	Drop sheets are placed on floor, furniture and equipment as required and according to client and site requirements.
2.	Access area to be cleaned.	2.1.	***Fall protection system*** where required is correctly fitted, adjusted and anchored.
		2.2.	Work site ***hazards*** are assessed and risks controlled according to company, legislative, and ***health and safety requirements***.
		2.3.	Access equipment is inspected for defects, and issues are reported and rectified within scope of own responsibilities according to health and safety requirements.
		2.4.	Cleaning equipment and chemicals are positioned to eliminate risk of items falling.
3.	Conduct cleaning tasks.	3.1.	Cleaning is conducted following approved procedures and SWMS.
		3.2.	Communication with team members and other site personnel is maintained as required to progress cleaning tasks within agreed timelines.
		3.3.	Fall protection system is kept in place and adjusted to cater for movement during cleaning process.
		3.4.	Scaffold components and fall barriers are kept in place during cleaning process.

	3.5. Work area is exited following SWMS and supervisor-approved methods for moving self, cleaning equipment and chemicals to ground level.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	• dilute and mix chemicals required for cleaning tasks using whole numbers and routine fractions.
Oral communication skills to:	• ask questions to clarify job requirements.

Reading skills to:	• interpret safety instructions in a range of texts, including:
	  • equipment manuals
	  • safety data sheets (SDS).

Writing skills to:	• document and report faults in equipment to manufacturer and other personnel.
Planning and organising skills to:	• locate and apply instructions for cleaning tasks • plan and schedule cleaning tasks.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Safe work method statement must include:	• tools and equipment, including PPE prescribed by legislation, regulations, and work site and workplace requirements • establishing exclusion areas using signs and barricades • hazard identification and risk assessment for work site and job tasks • health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures • risk control measures to be implemented for job tasks • safe operating procedures for:

© Commonwealth of Australia, 2025 Skills Insight

- accessing, moving within, and leaving work site
- moving and placing tools, equipment and materials
- using tools and equipment at heights.

Fall protection systems must include at least one of the following:

- lanyards
- harness.

Hazards that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- syringes and sharps
- working in confined spaces.

Health and safety requirements must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - SWMS for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

Assessment Requirements for CPPCLO3036 Clean at heights

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3036A Clean at high levels.

This version first released with CPP Property Services Training Package Version 4.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also:

- identify, assess and manage risks while completing three different cleaning tasks at a height above two metres from the ground or from a solid floor construction, with one of the cleaning tasks requiring the use of a fall protection system
- transport cleaning equipment and chemicals to the above work areas
- complete the above cleaning tasks using the transported cleaning equipment and chemicals
- return the cleaning equipment and chemicals to ground level at job completion.

In doing the above work, the person must:

- locate, interpret and apply cleaning task information, standards and specifications
- select, prepare and use required access and fall protection system and work methods
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning at heights, including:
  - Australian standards and codes of practice for the safe use of ladders
  - work health and safety legislation when cleaning at heights
- preparation and safe use of access equipment when cleaning, including:
  - bosun chairs

© Commonwealth of Australia, 2025 Skills Insight

    - building maintenance units
    - extension poles
    - industrial rope access
    - ladders, including extension ladders
    - scaffolding
    - water-fed extension brooms
- processes for identifying and reporting faults in access equipment and fall protection systems.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
    - access equipment required for site
    - cleaning equipment required for task
    - fall protection systems required for site
    - signs and barricades required for task
- materials:
    - cleaning products required for task
- specifications:
    - safe work method statement (SWMS)
- physical conditions:
    - suitable venue with cleaning required at least two metres above ground or a solid floor construction
    - suitable weather conditions if task performed outdoors
- contingencies:
    - faults in access equipment
- relationships with team members and supervisor:
    - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPPCLO3038 Clean food-handling areas

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3038A Clean food-handling areas.

This version first released with CPP Property Services Training Package Version 4.

Application

This unit of competency specifies the outcomes required to clean areas where food is dispatched, handled, inspected, packaged, prepared, processed, received, stored and transported. The unit covers assessing the extent of the cleaning task and selecting required cleaning equipment, chemicals and methods.

The unit supports cleaners who work alone or in teams. It applies in a range of commercial and residential work sites, including food courts and commercial or industrial food-processing kitchens or plants.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit

Nil

Unit Sector

Cleaning operations

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Plan and prepare to clean	1.1. Work site ***hazards***, including cross-contamination, are assessed and risks controlled according to company,

	food-handling areas.		legislative, and ***health and safety requirements***.
		1.2.	Requirements of food-safety program applicable to the area are accessed, interpreted and applied to planning.
		1.3.	***Surfaces*** and ***soil types*** are identified by observation, and cleaning techniques and ***cleaning chemicals*** required for task are selected and prepared.
		1.4.	***Equipment*** is selected, checked for serviceability and compliance with cleaning and sanitation requirements of food-safety program, and faults are rectified or reported before starting work.
		1.5.	***Personal protective equipment*** (PPE) is sourced according to manufacturer specifications, and health and safety and company requirements.
		1.6.	***Consumables*** are obtained to meet anticipated usage patterns according to company requirements.
		1.7.	Signs and barricades are selected and installed according to health and safety, and company requirements.
2.	Replenish consumables and remove waste.	2.1.	Consumables are replenished according to client and company requirements.
		2.2.	Rubbish bins are emptied, cleaned and sanitised according to specified requirements, and new replacement bin liners are inserted.
		2.3.	Collected soil and waste are disposed of according to client and company specifications, and legislative, environmental, and health and safety requirements.
3.	Clean food-handling surfaces.	3.1.	Loose dirt and debris are removed from food-handling surfaces prior to applying cleaning treatment.
		3.2.	Physical movement around food-handling areas is conducted according to food-safety program.
		3.3.	Chemicals are applied to surfaces and allowed to dwell according to manufacturer specifications and company requirements.
		3.4.	Surfaces are thoroughly rinsed and allowed to dry according to company requirements.
		3.5.	Practices inconsistent with food-safety program are reported according to company requirements.

© Commonwealth of Australia, 2025 Skills Insight

4.	Sanitise food-handling surfaces.	4.1.	Chemical sanitisers or heat are applied to food-handling surfaces according to job requirements.
		4.2.	Surfaces are thoroughly rinsed and allowed to dry according to company requirements.
5.	Clean, safety check and store equipment.	5.1.	Signs and barricades are removed according to health and safety, and company requirements.
		5.2.	Equipment and PPE are cleaned, safety checked and stored according to manufacturer specifications and environmental, health and safety, and company requirements.
		5.3.	Unused chemicals are stored or disposed of according to manufacturer specifications, and health and safety and company requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	**Performance feature**
Learning skills to:	• source and apply requirements of different food-safety programs to different food-handling environments.
Numeracy skills to:	• perform calculations required for diluting and mixing chemicals as specified on product labels.
Oral communication skills to:	• ask questions to clarify job requirements.

Reading skills to:	• interpret manufacturer instructions when using equipment and preparing chemicals
	• read and interpret directions and safety instructions, including:
	  • chemical labels
	  • safety data sheets (SDS).

Writing skills to:	• document and report faults in equipment to manufacturer and other personnel.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Hazards that must be assessed include:

- biological and environmental contaminants
- chemical exposure via absorption, ingestion and inhalation
- chemical reactivity
- dust and fibre particulates
- electrical
- environmental allergens
- explosions
- fatigue
- fire
- manual handling
- noise
- poor ventilation
- slips, trips and falls
- sharps.

Health and safety requirements must include:

- access to communication devices when working alone
- compliance with Safe Work Australia regulations and guidelines
- electrical equipment test and tag compliance
- emergency response procedures
- environmental controls
- hazard signs and barricades
- health and safety induction and refresher training
- manual handling techniques
- processes for safely dispensing chemicals
- risk assessment procedures, including:
  - hazardous chemicals register
  - hierarchy of control
  - job safety analyses (JSA) for low-risk situations
  - safe work method statements (SWMS) for high-risk situations
  - incident reporting
- SDS
- selection and use of required PPE
- storage and maintenance of equipment according to manufacturer specifications
- use of first aid according to SDS information.

Surfaces must include

- ceramics and porcelain

© Commonwealth of Australia, 2025 Skills Insight

at least five of the following:	• chrome • concrete • floors and walls • fridge and freezer seals • glass • laminate • metal • paint • plastic • stainless steel • stone • terracotta • vinyl.
Soil types must include at least three of the following:	• baked-on food and grease • dust • food and drink stains • food and drink residue • grease and oil • litter • mould • rust • tannin stains.
Cleaning chemicals must include at least one of the following:	• acid cleaners • alkaline cleaners • low environmental impact chemicals • neutral cleaners • solvent cleaners.
Equipment must include at least five of the following:	• brooms • brushes and dustpan • buckets • cleaning trolleys • cloths • disposable wipes • doodle bugs • hoses and nozzles • mops • sharps disposal units • scourers • scrapers • scrubbing and polishing machines • scrubbing brushes • tongs

© Commonwealth of Australia, 2025 Skills Insight

	• squeegees.
Personal protective equipment must include at least two of the following:	• disposable respirators • eye protection • gloves • hair nets • safety shoes • tongs.
Consumables must include at least two of the following:	• air fresheners • bin liners • disposable gloves • paper hand towels • liquid hand-soap.

Assessment Requirements for CPPCLO3038 Clean food-handling areas

Modification History

Release 1.

Replaces superseded equivalent CPPCLO3038A Clean food-handling areas.

This version first released with CPP Property Services Training Package Version 4.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also clean three of the following different food-handling areas:

- commercial food-preparation area
- commercial food-processing area
- food court
- food storage area
- refrigeration area
- public food-handling area
- residential food-handling area.

In doing the above work, the person must:

- identify and control site hazards, including contamination hazards, before commencing cleaning, and take steps to prevent identified hazards
- identify type of surfaces and soil present in the work area
- select cleaning equipment required for the task
- fit and use personal protective equipment (PPE) as required by work tasks to meet food business requirements
- maintain housekeeping standards in food-handling area and dispose of waste to meet food-handling requirements
- maintain personal hygiene to ensure that food safety is not compromised
- replenish two different types of consumables.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- methods for cleaning food-handling areas, including the use of microfibre products
- methods for cleaning surfaces in food-handling areas
- cleaning and sanitation requirements of food-handling areas, including:
  - required chemicals, equipment and cleaning methods
  - personal hygiene practices, including:
    - clothing and footwear requirements associated with working and moving in and between food-handling and non food-handling areas
    - washing hands before entering food-handling areas
- key requirements of legislation, regulations, codes of practice and industry advisory standards relating to cleaning food-handling areas, including Food Safety Standard 3.2.2, Clause 17:3
- processes for safely handling and disposing of waste, including:
  - chemicals past their expiry date
  - obsolete equipment
  - disposal of packaging
  - sweeping detritus
  - used containers
  - used or contaminated PPE
  - used or unused chemicals
- processes for recording and reporting health conditions and illness as required by workplace food-safety procedures
- purpose and operation of food-safety program as it applies to cleaning food-handling areas, including specifications for:
  - how hazards can be controlled
  - how controls are monitored
  - corrective actions required if conditions are not met
  - information to be recorded and procedures to be signed off
  - key requirements of legislation and regulations relating to work in food-handling areas
  - responsibilities for any person visiting or working in food-handling areas
  - minimum procedures to ensure person does not:
    - contaminate food
    - have unnecessary contact with ready-to-eat food
    - spit, smoke or use tobacco or similar in food-handling areas
- range of potential contamination hazards in food-handling areas, including:
  - chemical contamination of food caused by cleaning and sanitation chemicals
  - microbiological contamination of food resulting from cross-contamination when moving into and between food-handling areas
  - physical contamination of food caused by metal, glass, plastic and cloths used in the cleaning process
- routes of entry and potential symptoms of exposure to chemicals

© Commonwealth of Australia, 2025 Skills Insight

- types and application of different signs and barricades to be installed prior to cleaning, including:
  - physical barricades and restraints erected to restrict access to site
  - signs complying with legislative requirements and Australian standards warning of danger or adverse conditions, including:
    - cleaning in progress
    - hazardous chemicals in use or present in work area.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - as listed in the range of conditions
  - PPE as listed in the range of conditions
- materials:
  - cleaning chemicals as listed in the range of conditions
  - consumables as listed in the range of conditions
- specifications:
  - Food Safety Standard 3.2.2, Clause 17:3
  - food-safety program
  - work instructions and schedules
- physical conditions:
  - work site with food-handling areas
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team.

Timeframe:

- as specified by the task.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

FBPAUD4001 Assess compliance with food safety programs

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to assess compliance against an approved food safety program, where the program is supported by a prescriptive template or tool, or where compliance is checked against a food safety program that has been validated by a technical expert.

This unit applies to individuals who undertake regulatory, commercial or internal audits.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

Pre-requisite Unit

Nil

Unit Sector

Food safety auditing (AUD)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan the audit	1.1 Develop an audit plan to meet the audit scope 1.2 Ensure the plan is capable of delivering the required outcomes

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	within resource and time allocations 1.3 Ensure the plan includes audit purpose, scope and relevant templates or approved food safety program 1.4 Identify activities and responsibilities for the audit 1.5 Identify audit timing, including timetable for each stage of the audit 1.6 Identify resource, personnel and reporting requirements 1.7 Identify follow-up and completion procedures 1.8 Identify and establish communication protocols to facilitate the effective exchange of information and suited to the auditee environment
2. Confirm that the food business has documented required preliminary work	2.1 Define the food and the method of distribution 2.2 Identify customers and intended use of food 2.3 Describe and document the process 2.4 Ensure the food business has checked their documentation for accuracy and completeness
3. Confirm the food safety program is supported by a tool or template or has been validated	3.1 Assess the documented food safety program and related procedures and prerequisite programs to confirm that they have a prescriptive tool or have been validated by a technical expert 3.2 Review the food business's method of identifying and analysing food safety hazards 3.3 Select templates, or the approved food safety program, to meet audit scope 3.4 Adapt templates, or the approved food safety program, to suit the needs of the business without adversely affecting food safety 3.5 Review documented verification records to confirm that the requirements of the food safety program are being met 3.6 Assess corrective actions required, where processes are identified as not meeting targets or critical limits, to confirm they meet the requirements of the template or food safety program 3.7 Assess food safety prerequisite programs to confirm they are appropriate for the food business or industry sector to maintain a safe food environment 3.8 Review food safety program documents to confirm currency, accuracy and adequacy to facilitate maintenance of an adequate food

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	safety program
4. Collect evidence to review and assess implementation of food safety programs	4.1 Collect evidence to confirm that documented programs and procedures are working effectively, reflect actual practice and are consistently applied 4.2 Collect evidence to confirm that food safety monitoring and corrective actions are carried out according to procedure 4.3 Collect evidence to confirm that safety prerequisite programs are effective and consistently followed 4.4 Collect evidence to confirm that food safety records are completed and provide an accurate record of events 4.5 Collect evidence to confirm that records are accessed and analysed to confirm effective program maintenance according to the template or food safety program 4.6 Collect evidence to confirm that food safety skills and knowledge of food business personnel is commensurate with their work role 4.7 Collect evidence to confirm that the food safety program has been internally monitored and assessed, updated and improved by a technical expert
5. Manage the audit process	5.1 Monitor audit progress against the audit plan, and identify and address any variation to plan 5.2 Identify and negotiate circumstances requiring the audit plan to be adjusted in a timely manner 5.3 Ensure audit addresses audit scope and is conducted within time and resource constraints to meet quality and professional standards 5.4 Review the audit process to identify opportunities for improvement
6. Consolidate audit outcomes	6.1 Analyse and assess audit evidence to identify any areas of non-compliance with legislation and/or the food safety program 6.2 Identify and classify non-conformities as agreed by the audit plan 6.3 Report non-conformities according to agreed client and/or legislative requirements 6.4 Prepare and submit audit reports and/or certificates or present as required to meet regulatory and client requirements 6.5 Ensure a corrective action implementation plan defining proposed actions and timelines developed by the auditee is reviewed to confirm

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	that template or food safety program requirements are met 6.6 Review audit findings to confirm that evidence is sufficient as defined by the template or approved food safety program
7. Confirm and close out corrective actions	7.1 Monitor and verify implementation and effectiveness of corrective action against the template or the approved food safety program 7.2 Maintain audit records to record corrective actions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret food safety guidelines and regulations • Interpret product quality and workplace procedures
Navigate the world of work	• Apply knowledge of regulations and policies relevant to workplace food safety programs • Monitor adherence to legal and regulatory standards and responsibilities
Get the work done	• Plan, monitor and manage relatively complex, routine and non-routine tasks, making adjustments as necessary • Use digital tools to monitor processes and access and organise complex data

Assessment Requirements for FBPAUD4001 Assess compliance with food safety programs

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has assessed a minimum of two different food safety programs, where the program is supported by a prescriptive template or tool, or where compliance is checked against a food safety program that has been validated by a technical expert, including:

- confirming that the food safety program and/or template is appropriate to the activities of the business and complies with requirements of the Australia New Zealand Food Standards Code
- reviewing food safety program records to assess compliance against the approved food safety program and/or template
- collecting and analysing evidence to confirm that the food safety program is consistently followed and controls all critical risks
- identifying circumstances where variation or customising of the template or food safety program requires further validation
- submitting at least one non-compliance report to clearly identify the aspects of the food safety program that have broken down or need further development in order to prevent recurrence.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australia New Zealand Food Standards Code, including information on labelling and product ingredients, relevant to the business
- required content and scope of food safety programs as defined in the National Food Safety Standard 3.2.1 or other relevant standards

© Commonwealth of Australia, 2025 Skills Insight

- purpose and minimum requirements of risk-based approaches to managing food safety hazards, including the role of prescriptive templates or approved food safety programs in supporting a risk-based approach and the process used to validate these tools
- guidelines on implementing industry templates or approved food safety programs
- legal requirements of food businesses, including underweights, true and accurate descriptions, and accuracy of claims (e.g. organic, free range)
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted, and insurance requirements
- audit activities and principles, including guidelines on audit stages and activities as outlined in International Organization for Standardization (ISO) 19011:2011
- existence of international standards that cover traceability of food and the food chain supply, consumer product recalls, quality and food safety management systems
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2011, and additional system owner requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
- information handling and management system protocols, including rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- evidence appropriate for use in audit processes, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- vocabulary and terms relating to food safety programs, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- common biological, physical and chemical hazards that may occur in the food business, and appropriate methods of control and critical limits as outlined in the approved food safety program or template
- the impact of (1) the design and construction of premises and (2) the selection, application and condition of equipment, on food safety as defined in Food Safety Standard 3.2.3
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches to controlling food safety hazards
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority to initiate cessation of an audit
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have knowledge of the food safety and food hygiene relevant to the food business.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

© Commonwealth of Australia, 2025 Skills Insight

    - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
    - plant and equipment that would typically be used in a commercial manufacturing business
- specifications:
    - food safety plans
    - food safety-related documentation required to implement and record the food safety plan
    - evidence and documentation relevant to processes that would typically be used to assess compliance with the food safety program.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD4002 Communicate and negotiate to conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to select and use appropriate methods of communication and negotiation to support audit processes.

This unit applies to individuals who undertake regulatory, commercial or internal audits. This includes taking responsibility for their own work and providing and communicating solutions to a range of predictable and sometimes unpredictable problems.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop a communication plan to support audit processes	1.1 Define and agree on scope of audit with client 1.2 Define, communicate and agree on roles and responsibilities of all personnel involved in the audit process, including those for whom English is a second language 1.3 Determine and agree on appropriate communication methods and protocols and specific arrangements, including reporting requirements 1.4 Document the communication plan
2. Select and use appropriate communication methods to conduct an audit	2.1 Select communication methods to take account of system owner and food business requirements, workplace culture and individual differences 2.2 Use appropriate communication methods to establish and maintain effective client relationships 2.3 Interpret information provided by the auditee in the context of the industry sector, language and culture of the business 2.4 Apply communication techniques to encourage all relevant parties to participate and express views throughout audit
3. Negotiate to achieve agreement on audit outcomes	3.1 Identify and clarify areas of disagreement over audit outcomes with the auditee 3.2 Seek understanding on actions to be followed to resolve outstanding issues 3.3 Treat auditee’s views with respect 3.4 Explore options for resolving differences to reach agreement and meet audit timeline and resource parameters 3.5 Explore appropriate issue resolution strategies to increase the likelihood of agreement on steps required to conclude the audit 3.6 Manage the negotiation process to maintain constructive client relationships 3.7 Report any areas of continuing non-compliance that result from unresolved differences to system owners and appropriate authorities as required

Assessment Requirements for FBPAUD4002 Communicate and negotiate to conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has used and applied appropriate communication methods in a food safety audit situation, with a minimum of two different clients or auditees, including:

- a situation where a number of workers have limited English language and literacy skills
- a conflict-based situation where the outcomes are contested by the auditee.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation that impacts on acceptable communication methods and conduct, including anti-discrimination, anti-harassment and privacy legislation
- language relevant to audit process, including terms and jargon to describe food safety legislation, technical processes and industry standards
- effective communication strategies to communicate at different stages of the audit, including to collect audit evidence, provide and present information, facilitate meeting processes, facilitate issue management and conflict resolution, and communicate audit findings
- confidentiality needs and expectations of food businesses
- strategies to communicate in culturally diverse environments
- dynamics of conflict and strategies to manage resolution
- the structure, authority levels and lines of reporting within a food business
- communication methods relevant to different groups and audiences
- reporting formats and requirements to meet client and legislative needs.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - case studies of audit findings, including those that involve workers with limited English language and literacy skills, and those that are disputed by the auditee
- relationships:
  - interactions with food production clients and workers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD4003 Conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements.

This unit applies to individuals who conduct on-site audits, and is relevant to regulatory and commercial food safety system auditors who may be auditing food safety in various contexts.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

Pre-requisite Unit

Nil

Unit Sector

Food safety auditing (AUD)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define the scope of the audit	1.1 Identify audit scope and define the extent of the audit to meet legislative and audit client requirements

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Ensure audit criteria meet legislative and client requirements 1.3 Ensure the definition and levels of non-conformity and related reporting responsibilities are identified as consistent with legislative requirements and client requirements 1.4 Identify evidence required to address audit scope and criteria, and select appropriate collection methods 1.5 Review food safety management system documents to determine adequacy for the purposes of the audit
2. Plan the audit	2.1 Develop an audit plan that includes definitions and levels of non-conformity to meet the audit scope 2.2 Identify activities and responsibilities for the audit 2.3 Identify audit timing, including timetable for each stage of the audit 2.4 Identify resource, personnel and reporting requirements 2.5 Identify follow-up and completion procedures 2.6 Establish communication protocols to facilitate the effective exchange of information and suited to the auditee environment
3. Conduct the audit	3.1 Communicate information on the audit scope and methodology in an effective and timely manner 3.2 Follow stages and activities of the audit process 3.3 Review methods used by the food business to carry out preliminary work, identify food safety hazards and assess level of risk to confirm that they are appropriate and correctly applied 3.4 Identify and evaluate evidence used by the food business to support identification of control measures and establish control limits to determine adequacy and relevance 3.5 Review methods used by the food business to control hazards and determine corrective action where processes are identified as not meeting targets or critical limits to confirm they are adequate, effective and appropriate 3.6 Collect evidence to confirm that the documented food safety policies and procedures are working effectively, reflect actual practice and are consistently applied
4. Manage the audit	4.1 Monitor audit progress against the audit plan, and identify and

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
process	address any variation to plan 4.2 Identify and negotiate circumstances requiring the audit plan to be adjusted in a timely manner 4.3 Ensure audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards 4.4 Review the audit process to identify opportunities for improvement
5. Consolidate audit outcomes	5.1 Analyse and assess evidence to identify any areas of non-compliance with legislation and/or client requirements as appropriate to the audit scope 5.2 Identify and classify non-conformities as agreed by the audit plan 5.3 Report non-conformities according to agreed client and/or legislative requirements 5.4 Communicate audit findings to the auditee 5.5 Prepare and submit audit reports and/or certificates or present as required to meet regulatory and client requirements 5.6 Review corrective actions proposed by the auditee in response to non-conformances for compliance with the template or food safety program 5.7 Review audit findings to confirm that evidence is appropriate and sufficient and findings are accurate 5.8 Review the food safety management system to identify areas of potential improvement of the system according to audit scope
6. Confirm and close out corrective actions	6.1 Monitor and verify implementation and effectiveness of corrective actions, and identify and address any variation to the food safety plan 6.2 Maintain audit records to record corrective actions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret legislation and audit guidelines
Interact with others	• Select and use communication strategies appropriate for purpose when interacting with work colleagues and customers
Get the work done	• Use problem-solving skills to identify and analyse non-conformance

Assessment Requirements for FBPAUD4003 Conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively planned and conducted a food safety audit, for a minimum of one client, that complies with legal and client requirements, including:

- preparing audit documentation
- preparing a final audit report that refers to:
  - non-conformity reports
  - corrective action reports
  - follow-up reports
  - suggestions for improvements to the food safety management system and to the audit process.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- auditor roles and responsibilities, including:
  - audit activities and stages, including guidelines on audit stages and activities as outlined in International Organization for Standardization (ISO) 19011:2011
  - personal attributes required of food safety auditors, including those outlined in ISO 19011:2011, and additional client requirements where required
  - role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories

© Commonwealth of Australia, 2025 Skills Insight

  - relevant competencies and certification/registration criteria and processes applying to both regulatory and commercial auditors
  - audit management to develop and implement an audit against an agreed plan, including the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan
- food safety management systems, including:
  - purpose and intent of each element of a food safety management system
  - the underlying principles of risk-based approaches to controlling food safety hazards, including using critical control points as described in the Codex Alimentarius Guidelines
  - vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
  - food safety management system knowledge relevant to the system being audited, including system requirements, definitions and levels of non-compliance and related reporting responsibilities as defined by legal and management system requirements
  - the interaction between different types of management systems, including the impact of food safety decisions on other management systems, including workplace health and safety, quality, environmental risk management and animal welfare
  - technical knowledge required to assess the adequacy of the food safety management system performance and corrective actions
  - role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, including using critical control points to control food safety hazards
  - information handling and management system protocols, including rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- food safety legislation, including:
  - the purpose and intent of food safety legislation, including sources of information on importing country requirements and of requirements of countries and retailer driven systems in importing markets
  - the content covered by the Australia New Zealand Food Standards Code and/or other relevant standards
  - the structure and responsibilities of Commonwealth, state and territory government departments and local government to manage and implement food safety legislation, including where to find information on relevant Commonwealth, state/territory legislative requirements, product or industry sector legislation and regulations and import and export market requirements
  - the regulatory framework and specific legislation relevant to the audit, including relevant risk profiling or classification systems where they apply
  - sources of information on legislation and codes governing primary production and primary processing
  - requirements for scheduling and conducting further auditing as determined by food safety legislation and/or client system requirements

© Commonwealth of Australia, 2025 Skills Insight

  - legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted, and insurance requirements
  - the role of auditors when called on to provide evidence as a witness in court
- food safety audit processes, including:
  - preliminary work required to identify food to be covered by the food safety program, define the food and the method of distribution, identify customers and intended use of food, describe the process (flow chart) and check accuracy and completeness
  - methods used to identify food safety hazards and assess food safety hazard risk levels, taking account of severity and likelihood of occurrence
  - methods used to identify critical control points and establish critical limits, suited to the nature of the hazard, the requirements of the audit and the industry sector
  - methods used to validate control techniques and critical limits, including industry or sector codes of practice, technical standards and research
  - types of evidence, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
  - evidence collection methods, including record sampling and sample analysis, the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range and extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
  - methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the required skills and knowledge of food safety and food hygiene relevant to the food business
  - circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
  - circumstances and authority of an auditor to initiate cessation of an audit
  - the context in which audits are conducted, including workplace culture and preferred communication methods, industry, process and/or product knowledge and related jargon
  - requirements for recording audit information and reporting.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - plant and equipment that would typically be used in a commercial food manufacturing business
- specifications:
  - food safety plans

© Commonwealth of Australia, 2025 Skills Insight

- food safety-related documentation typical of commercial food manufacturing businesses and used for the purpose of verification
- evidence and documentation relevant to processes that would typically be used by commercial manufacturing businesses to support validation processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD4004 Identify, evaluate and control food safety hazards

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to identify, evaluate and control food safety hazards for the purposes of validating specific control measures in a food safety program.

This unit applies to individuals who are responsible for auditing regulatory, commercial and internal food safety systems.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

Assessment Requirements for FBPAUD4004 Identify, evaluate and control food safety hazards

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has identified, evaluated and controlled food safety hazards for a minimum of one multi-staged food safety program, including:

- selecting a food supply chain and identifying:
  - known biological food safety hazards that could occur across the chain and could present a risk in food at the point of consumption
  - likely patterns of growth and transmission from source of contamination to onset of consumer symptoms for pathogens likely to occur in the supply chain, including threshold levels
  - sources of chemical and physical contamination that could present a food safety risk at the time of food consumption, across the chain
  - impact and indicators of the presence of biological or chemical food safety hazards throughout the food chain
  - impact and indicators of the presence of allergens that may present a hazard
  - acceptable levels of contamination (these may be established by reference to relevant legislation and/or reference to system requirements)
- selecting one stage in the food supply chain (which must be a medium or high risk business or process) and establishing or validating control measures and verification records and procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australia New Zealand Food Standards Code, including all chapters and sections relevant to the business

© Commonwealth of Australia, 2025 Skills Insight

- sources of advice and research on foods, processing methods, production technologies and associated food safety hazards and control methods, including allergens
- ways in which food can cause illness and injury, including incidence and trends in food-borne illness
- intrinsic and extrinsic factors that can impact on food safety
- common biological food safety hazards – including toxin production and spore formation – and conditions required for survival and growth of each, including growth rates, transmission routes, likely carriers and threshold levels
- sources of information on acceptable and legal levels of biological, chemical and physical contamination
- food supply chains and potential of a breakdown in control at one point to impact other parts of the chain
- survival and growth requirements of biological food safety hazards
- common allergenic substances as described by the Australia New Zealand Food Standards Code and which may be additionally defined by system owners
- existence of international standards that cover traceability of food and the food chain supply, consumer product recalls, quality and food safety management systems
- common control methods necessary to eliminate or reduce the risk of food-borne illness to acceptable levels for each common pathogen, including the role of food storage, temperature control, preservation and process methods, traceability, product shelf-life, cleaning and sanitation, and pest control
- methods to detect and minimise the risk of food contamination by personal carriers, including convalescent and symptomless carriers, and related minimum legal illness reporting requirements and personal hygiene procedures
- the role of microbiological sampling, swabbing and testing in assessing the presence of biological contamination
- methods to determine the appropriateness and effectiveness of control measures and critical limits, including identifying the effect of control measures on the identified food safety hazard, method and feasibility of monitoring, the relationship to other control measures, and the severity of consequences and required corrective action in the event of failure of control
- types and causes of acute and chronic chemical food-borne illness
- the food safety and legal impact of chemical contamination, including residual agricultural and environmental chemicals, residual industrial contamination, including cleaning chemicals, and chemical contamination as a result of packaging methods and materials
- physical hazards that pose a food safety risk
- common control methods to eliminate or reduce the risk of chemical or physical food-borne illness to acceptable levels for each common form of chemical and physical food safety hazard, including:
  - hazardous chemicals that pose a food safety risk
  - common food allergens
  - physical hazards
- the role and requirements of prerequisite programs and procedures to eliminate, prevent or reduce biological, chemical and physical food safety hazards to acceptable levels.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - supply chain that includes at least one medium or high risk business and/or process and provides opportunity to apply a depth and breadth of food safety knowledge
- specifications:
  - access to food safety programs for a multi-staged food supply chain that includes the point of delivery to the consumer.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFAV3001 Conduct chemical wash for fresh produce

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Application

This unit of competency describes the skills and knowledge required to implement a wash process for fresh produce where chemicals, including chlorine, are used to achieve quality standards.

This unit applies to individuals who set and monitor levels of cleaning chemicals while conducting wash operations in a food processing production environment. It typically applies to produce that includes leafy greens and fruit, where chemicals are used to ensure required cleaning outcomes.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Fruit and Vegetables (FAV)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm required use	1.1 Identify chemicals used for the washing of fresh produce and

of chemicals	confirm required levels 1.2 Identify hazards and risks associated with using chemicals and implement control measures throughout operations 1.3 Prepare and use personal protective equipment according to workplace safety procedures 1.4 Identify and apply storage and handling requirements for chemicals
2. Prepare for washing operation	2.1 Confirm and prepare raw materials for washing according to production specifications 2.2 Confirm equipment for operational readiness, and fit and adjust components and related attachments 2.3 Carry out pre-start checks according to operator instructions 2.4 Measure chemicals and add dose according to specifications 2.5 Check performance of chemical-dosing equipment to confirm accuracy 2.6 Check water quality and confirm for use
3. Operate and monitor the washing process	3.1 Start and operate the washing process according to operating instructions and work health and safety requirements 3.2 Inspect and wash raw materials to meet workplace specifications 3.3 Check water to confirm correct levels of chemicals 3.4 Transfer washed materials for further processing or packaging 3.5 Identify variation in equipment operation and report maintenance requirements 3.6 Identify, rectify or report out-of-specification product or process outcomes 3.7 Maintain the work area according to workplace procedures, food safety and work health and safety requirements 3.8 Maintain workplace records in required format
4. Shut down the washing process	4.1 Implement the appropriate shutdown procedure 4.2 Handle, store and dispose of chemicals according to workplace procedures and environmental regulations 4.3 Identify and report maintenance requirements according to workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Read and interpret standard operating procedures and directions for the safe operation of equipment when operating the chemical wash process
Writing	• Record maintenance requirements on paper-based and electronic media • Record equipment failure on paper-based and electronic media
Oral Communication	• Actively listen to clarify types of produce required for wash process
Numeracy	• Monitor correct ratios of chemicals to amount of water in the wash process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities, and seek clarification or other assistance when required • Maintain hygiene standards and hazard-free work area • Identify and describe own skills, knowledge and experience within context of job role
Interact with others	• Use appropriate vocabulary, including technical language directly relevant to role • Report chemical wash processing performance to relevant personnel using required communication method
Get the work done	• Monitor and maintain quality specifications when operating the chemical wash process • Identify routine problems and implement standard solutions according to workplace guidelines

Assessment Requirements for FBPFAV3001 Conduct chemical wash for fresh produce

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion:

- conducted pre-start checks on machinery used for washing fresh produce
- handled and applied chemicals according to specifications
- started, operated, monitored and adjusted process equipment to achieve required quality outcomes when washing fresh produce
- conducted water and chemical level checks
- taken corrective action in response to typical faults and inconsistencies
- completed workplace records in required format
- safely shut down equipment
- applied work health and food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the washing process, including the importance of water quality and the role of chemicals in the washing process
- basic operating principles of equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required for the chemical wash process and action to take if services are not available
- the flow of this process and the effect of outputs on downstream processes

© Commonwealth of Australia, 2025 Skills Insight

- quality characteristics to be achieved by the washing, including the consequences of out-of-specification moisture levels on further processing and final product
- quality requirements of raw materials and effect of variation on process performance, including how variation in microbial load can affect the washing process
- implications of incorrect chemical levels on fresh produce
- operating requirements, parameters and corrective action required, where operation is outside specified operating parameters
- typical equipment faults and related causes, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
- methods used to monitor the washing process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures, and recording requirements
- contamination and food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- workplace health and safety hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including:
- emergency and routine shutdowns
- procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product or process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control
- routine maintenance procedures for washing equipment
- cleaning and sanitation procedures for washing equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - washing equipment and services, including water and chemicals
  - raw materials to be processed
- specifications:

© Commonwealth of Australia, 2025 Skills Insight

  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule and batch instructions
  - specifications and inspection or control points
  - sampling schedules and test procedures and equipment
  - documentation and recording requirements and procedures
  - cleaning procedures, materials and equipment
- relationships:
  - interactions with team members and supervisors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFAV3002 Program fresh produce grading equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Application

This unit of competency describes the skills and knowledge required to program grading equipment to identify key characteristics of fresh produce, and sort accordingly.

This unit applies to individuals who operate mechanical and computer-based technology to sort fresh fruit and vegetables according to key characteristics, including size, weight, density, quality or colour.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Fruit and Vegetables (FAV)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm produce grading specifications	1.1 Identify features of the grading equipment and process 1.2 Examine characteristics of produce and confirm purpose for grading 1.3 Confirm customer and packaging requirements 1.4 Determine specifications for grading based on customer requirements

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Program grading equipment	2.1 Enter grading specifications into equipment 2.2 Use computer program or equipment components to enable a variety of grading outcomes to be achieved 2.3 Test or monitor program or equipment operation against specifications 2.4 Investigate problems or inconsistencies in grading outcomes to determine cause 2.5 Implement corrective action where applicable or report to appropriate personnel 2.5 Complete documentation and records of grading specifications for customer

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Read and interpret standard operating procedures and instructions for the safe operation of grading equipment
Writing	• Record maintenance requirements on paper-based and electronic media • Record equipment failure on paper-based and electronic media
Oral communication	• Actively listen to clarify types of fresh produce to be graded and sorted
Numeracy	• Estimate sizes and shapes of fresh produce to be graded and sorted
Navigate the world of work	• Apply workplace procedures to own role and responsibilities, and seek clarification or other assistance when required • Maintain hygiene standards and hazard-free work area • Identify and describe own skills, knowledge and experience within context of job role
Interact with others	• Use appropriate vocabulary, including technical language directly relevant to role • Report performance of grading equipment to relevant personnel

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
	using required communication method
Get the work done	• Monitor and maintain quality specifications when grading fresh produce • Identify routine problems and implement standard solutions according to workplace guidelines

Assessment Requirements for FBPFAV3002 Program fresh produce grading equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion:

- analysed grading requirements and confirmed specifications for grading equipment
- determined grading specifications for a variety of outcomes
- used computing or mechanical technology to achieve grading specifications of fresh produce
- verified program specifications for required outcomes
- analysed non-conformances and grading problems, and determined probable cause
- completed workplace records in required format.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- grading equipment features, processes and technologies
- factors that influence grading outcomes
- typical problems that occur in the grading process, and likely causes and appropriate response options
- characteristics of produce used for grading and the process of identification.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment

© Commonwealth of Australia, 2025 Skills Insight

    - produce, grading equipment and consumables
- specifications:
    - work procedures, including advice on safe work practices, standard operating procedures (SOP), food safety, quality and environmental requirements
    - grading specifications
    - workplace information recording systems, requirements and procedures
    - cleaning procedures, materials and equipment
- relationships:
    - interactions with team members and supervisors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY3002 Participate in a HACCP team

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to participate in the development and review of a hazard analysis critical control point (HACCP)-based food safety program.

The unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others, and who participate in the development of a food safety program typically limited to their immediate work area.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Food safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to develop and review a food safety program	1.1 Recognise roles and responsibilities for participating in, developing or reviewing a food safety program 1.2 Identify the scope of a food safety program
2. Identify and review food safety hazards	2.1 Identify processes to be covered by the food safety program and recognise the steps within each process

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	2.2 Identify food safety hazards that are reasonably expected for each critical control point 2.3 Review safety handling methods, processing techniques and existing support programs used in the workplace as part of a team
3. Establish or review methods to monitor and control food safety hazards	3.1 Establish acceptable methods of control for each food safety hazard that is reasonably expected to occur 3.2 Validate control methods against safety standards 3.3 Establish or review procedures for taking preventative action 3.4 Establish or review appropriate methods for monitoring that processes remain within control 3.5 Establish required corrective action to respond to situations where hazards are not effectively controlled

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Get the work done	• Recognise and respond to predictable safety problems, and implement standard or logical solutions • Identify ideas for improvements to safety processes, and consider them in current contexts

Assessment Requirements for FBPFSY3002 Participate in a HACCP team

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has actively participated in a food safety team on a minimum of two occasions, including:

- identifying food safety hazards in the critical control points (CCPs) of production processes
- establishing and validating control standards and methods for a minimum of two potential hazards
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and intent of food safety legislation, including Food Standards Code
- the roles and responsibilities for developing and maintaining the food safety program, including roles of internal and external auditors and authorised officers
- techniques for applying critical control point principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredients and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety

© Commonwealth of Australia, 2025 Skills Insight

- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards and contamination likely to occur given product type and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition and time and temperature as relevant to food handled
- acceptable control methods for identified hazards, and required corrective actions when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability, personal hygiene, and how they can be used as part of a food safety program
- validation and verification processes and techniques and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - workplace food safety program documentation
- specifications:
  - review/audit arrangements
  - advice on quality and food safety legislation
  - procedures for developing or modifying specifications and other advice on food safety requirements
  - reporting/recording system
- relationships (internal and/or external):
  - interactions with team members.

FBPOPR1010 Carry out manual handling tasks

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to identify manual handling requirements of a work function, use manual handling aids to lift or move items and identify and assess manual handling risks.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Participate in processes to identify and assess manual handling	1.1 Identify the manual handling components of a work function 1.2 Identify manual handling risks to self and others within level of responsibility and tell supervisor
2. Contribute to manual handling risk minimisation	2.1 Check that manual handling equipment is available and ready for use 2.2 Ensure that personal protective equipment, including clothing and

Assessment Requirements for FBPOPR1010 Carry out manual handling tasks

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively carried out a minimum of three, different manual handling tasks, including:

- identifying the risks associated with each manual handling task (to self and others)
- eliminating risks, including through movement, posture and effectively using equipment provided
- modifying work to eliminate or minimise risk
- applying safe work procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different types of manual handling activities, including lifting, reaching, pushing, pulling, holding, restraining, throwing and carrying
- types of injuries that can result from manual handling
- aspects of manual handling that may be risks (hazard identification), including:
  - repetitive or sustained application of force
  - repetitive or sustained awkward posture
  - repetitive or sustained movement
  - application of high force
- manual handling of unstable or unbalanced loads, such as liquids or animals
- workplace procedures and responsibilities for identifying and reporting manual handling hazards
- factors to be considered when assessing manual handling risks relevant to work role (refer to workplace risk assessment sheets and code of practice advice where available), including:

© Commonwealth of Australia, 2025 Skills Insight

  - postures
  - movements
  - force required
  - duration and frequency of manual handling activity
  - environmental conditions, such as hot and cold work environments
- procedures and responsibilities for conducting risk assessments of manual handling tasks
- typical options for eliminating or controlling manual handling risks associated with work functions, including principles of hierarchy of control and the advantages and disadvantages of different options
- types of equipment and/or techniques used to eliminate or reduce manual handling risks in the workplace, including when and how to use each type of technique/equipment relevant to manual handling tasks in work role
- level of authority to address health and safety issues related to manual handling and related workplace arrangements for managing safety issues
- sources of advice on manual handling relevant to work function
- equipment available to assist manual handling, related inspections required to identify faulty equipment and related reporting procedures
- personal protective equipment checks including:
  - check for correct fit
  - appropriate for task
  - undamaged
- movement and postures that increase the risk of injury, and movements and postures to minimise the force in the body as applied to specific tasks in the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - work procedures, including advice on manual handling requirements and safe work practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2001 Work effectively in the food processing industry

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to work effectively in the food processing industry by applying an understanding of the structure of the industry, workplace policies and procedures, and conditions relevant to the level of responsibility.

This unit applies to individuals who perform a defined range of routine and predictable activities under general supervision and exercise limited autonomy and accountability in any sector of the food processing industry.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify the food processing industry	1.1 Identify sectors within the food processing industry 1.2 Identify key sector representatives and their roles 1.3 Understand workplace procedures common to employment in the

	sector 1.4 Identify types of employment and key responsibilities in the food processing industry
2. Identify key production processes and supply chains	2.1 Recognise raw materials used in the workplace and their source 2.2 Recognise the range of products produced in the workplace 2.3 Identify workplace production processes for converting materials into products 2.4 Identify common products and supply chains in the food processing industry
3. Carry out work responsibilities according to policies and procedures	3.1 Operate according to basic conditions of employment 3.2 Apply workplace policies and procedures when carrying out work role 3.3 Identify rights, responsibilities and legal obligations relevant to own role 3.4 Identify key personnel and their roles in the workplace 3.5 Apply employability skills required for working effectively 3.6 Recognise the consequences of not following workplace environmental and safety policies and practices
4. Take responsibility for own skill development	4.1 Identify the skills required for work role and assess learning needs 4.2 Participate in opportunities for skill development 4.3 Take responsibility for own work tasks and role 4.4 Monitor own work against workplace standards and identify areas for improvement and take action 4.5 Use basic problem-solving strategies to address problems, inconsistencies or concerns when fulfilling work role

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Navigate the world of work	• Meet a limited range of explicit workplace conventions and protocols
Interact with others	• Ask simple questions and listen carefully to clarify understanding or seek further information • Follow basic communication protocols and conventions to contribute to basic workgroup processes • Recognise basic values, beliefs and cultural expectations of others • Use simple templates for routine tasks
Get the work done	• Recognise simple problems and seek guidance to correct • Take responsibility for and reflect on low-impact decisions • Recognise and support the application of new ideas

Assessment Requirements for FBPOPR2001 Work effectively in the food processing industry

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has worked effectively in the food processing industry on at least one occasion, including:

- identifying information on conditions of employment and workplace policies and procedures
- identifying and locating materials/storage areas in the workplace relevant to work role, and identifying special storage conditions
- identifying and locating production and packing processes/main work areas in the workplace
- displaying appropriate behaviour when interacting with others and moving around the workplace
- explaining employee responsibilities
- explaining the dispute resolution procedures in the workplace
- explaining the flow of product from receival to sale in own workplace
- explaining the nature and role of work instructions and standard operating procedures (SOPs)
- explaining the principles of equal employment opportunity (EEO) and policies to prevent sexual harassment and other forms of discrimination
- following relevant workplace policies
- identifying and explaining the relevance of work health and safety and regulatory requirements for food industry employees
- identifying workplace employment conditions
- identifying relevant workplace requirements, policies and procedures and explaining theirimplications for trainees
- listing the markets where products are distributed
- naming the products produced in own workplace
- outlining enterprise ethical standards and requirements for interacting with other employees and staff

© Commonwealth of Australia, 2025 Skills Insight

- relating to others in an effective and non-discriminatory way, showing mutual respect
- applying environmental practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace structure and key personnel
- rights and responsibilities of employees as defined in employment conditions
- workplace policies and procedures relating to work responsibilities, including areas covered by legislation and related responsibilities
- appropriate personal conduct in a work area, including minimum clothing and personal hygiene standards when entering and moving around a food processing area in order to protect both employees and product safety, and behaving appropriately towards others in the work area
- industrial representation arrangements
- site security arrangements, including responsibility to report when coming on-site and off-site
- site layout, including main facilities, including canteens, parking areas, storage areas, processing and packing areas and location of emergency exits and assembly areas
- the main products/product range produced in the workplace
- work health and safety hazards and controls in the workplace
- stages and processes used to manufacture and package products
- personal reporting roles and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - site maps
  - workplace access
- specifications:
  - workplace policies, codes of practice, procedures, structure and personnel
  - work roles and responsibilities, training and career information
  - conditions of employment and entitlements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2002 Inspect and sort materials and product

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to inspect and sort product and incoming materials ready for processing.

This unit has application in a production environment within the food processing industry. Inspection at this level is typically limited to visual inspection.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. This includes identifying and providing solutions to a limited range of predictable problems.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for FBPOPR2002 Inspect and sort materials and product

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has inspected and sorted product and incoming materials, on at least one occasion, including:

- accessing workplace information on materials specification/quality requirements
- selecting, fitting and using personal protective equipment
- inspecting quality of materials to confirm compliance with quality specifications, including:
  - product type and quantity
  - product condition, such as identifying any bruising, discolouration or other damage, confirming product is clean, and checking size and weight
- identifying out-of-specification or non-conforming product and following procedures to separate unacceptable product
- responding to and/or reporting equipment failure within level of responsibility
- maintaining work area to meet housekeeping standards
- completing workplace records as required according to workplace procedures
- procedures for operating materials transfer equipment as required according to workplace procedures
- following work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and standards to be met by the inspection and sorting process, including criteria and specifications as they apply to inspection and sorting requirements

© Commonwealth of Australia, 2025 Skills Insight

- the relationship between visual inspection and sorting and other inspection procedures, such as those that may be conducted by a laboratory or at subsequent processing stages
- typical causes of unacceptable or out-of-specification product, including causes of product damage that can occur prior to arrival at the plant and as part of the handling process
- the stages that occur in the inspection and sorting process and their effect on product, such as in-line cleaning or conditioning and product or materials transfer stages
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- contamination/food safety risks associated with the sorting process and related control measures
- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to equipment operation, including waste collection and handling procedures related to the process
- basic operating principles of equipment used, where relevant, including main equipment components, status and purpose of guards, emergency stop, isolation and lock-out controls, equipment operating capacities and applications
- services required and action to take if services are not available
- recording procedures and responsibilities for inspecting and sorting materials and product.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - product and incoming materials
  - appropriate personal protective equipment and othe equipment
  - reporting and monitoring systems
- specifications:
  - workplace information on materials specification/quality requirements
  - work instructions and procedures
  - basic operating principles of equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2007 Work in a freezer storage area

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to enter and work in a freezer storage or cold room area.

This unit applies to individuals working in in a food processing environment who work under general supervision and exercise limited autonomy, with some accountability for their own work.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to enter a freezer storage environment	1.1 Read or listen to work instructions from supervisor and clarify where required 1.2 Identify work health and safety hazards for working in a freezer

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has prepared to enter and worked in a freezer storage area on at least one occasion, including:

- locating and fitting appropriate PPE
- following procedures to enter and work in a freezer environment to ensure safety of self and others, including carrying out relevant checks and inspections prior to entry as required by workplace procedures
- following procedures to handle product to avoid product damage
- monitoring operating performance of equipment used in the freezer and identifying signs of unsafe or unfit operation
- conducting work in a manner appropriate to minimising risk of contamination
- maintain work area to meet housekeeping standards
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and conditions required in a freezer storage environment, including how temperature parameters are maintained in the freezer/cold room
- safety requirements and hazards associated with entering and working in a freezer storage/cold room area, including required PPE, limitations of PPE, and maximum work duration
- symptoms associated with hypothermia and action to take if these occur
- the effects of freezer/cold room temperatures and frozen condensation on equipment used in a freezer/cold room but designed for room temperature operation, including symptoms that equipment is unsafe or unfit for use

© Commonwealth of Australia, 2025 Skills Insight

- effects of room temperatures on equipment using hydraulic oils designed for freezer/cold room temperatures
- typical freezing rates for product handled, including products stacked on pallets
- handling requirements for moving pallets of frozen product and how this differs from moving pallets of fresh product
- the differences in product stability of pallets loaded with fresh compared with frozen product, and related wrapping requirements
- the effect of freezing on product packaging and related handling requirements
- cleaning requirements for a freezer storage area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - freezer storage/cold room area
  - stock to be held in frozen storage
- specifications:
  - work roles and responsibilities, training and career information
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2010 Work with temperature controlled stock

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to store and retrieve temperature controlled stock from appropriate storage facilities.

This unit applies to individuals who work in controlled temperature environments under general supervision and exercise limited autonomy with some accountability for their own work.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Store stock to meet temperature control requirements	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify work health and safety hazards and tell supervisor

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Wear appropriate personal protective equipment and ensure correct fit 1.4 Identify goods requiring temperature control according to workplace requirements 1.5 Locate goods in correct storage areas to meet storage temperature, stores handling and stock rotation requirements 1.6 Record stores information according to workplace procedures
2. Monitor and maintain temperature of stock within specifications	2.1 Monitor stock temperature to confirm temperature is within specified limits 2.2 Monitor storage areas to confirm temperature is within storage zone limits 2.3 Monitor residence time in temperature controlled stores to meet stock control requirements 2.4 Identify and report out-of-specification storage temperatures and take corrective action according to workplace procedures
3. Transfer temperature controlled stock	3.1 Handle and transfer goods to maintain temperature control and meet stock rotation requirements according to work health and safety and food safety requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Identify stock weights and quantities • Read instrumentation gauges
Reading	• Identify and locate stock • Identify requirements from basic order forms • Interpret workplace procedures and specifications
Writing	• Complete records of stock receival and transfer
Navigate the world of	• Apply workplace procedures relevant to own responsibilities • Understand main tasks, responsibilities and boundaries of own

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
work	role, including use of personal protective clothing and equipment, housekeeping standards and procedures, quality requirements and operating procedures • Take steps to develop skills and knowledge of stock
Interact with others	• Communicate and report operational and safety information to relevant persons • Select and use appropriate terminology when communicating with personnel • Participate in conversations relevant to role by responding and explaining as required
Get the work done	• Make routine decisions relating to freshness and handling of stock • Recognise and respond to non-conforming stock • Use digital technologies including thermometers and temperature probes

Assessment Requirements for FBPOPR2010 Work with temperature controlled stock

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has worked with temperature controlled stock on at least one occasion, including:

- accessing workplace information to determine stock handling and storage requirements
- identifying storage requirements, including temperature limits, minimum duration at given temperatures, and segregation and co-storage requirements
- identifying temperature controlled storage facilities and temperature zones available
- selecting, fitting and using PPE
- using materials handling equipment in a temperature controlled environment as required to undertake work functions
- following procedures to measure core and surface temperature of stock
- reading instrumentation
- identifying and reporting out-of-specification temperatures in stock and storage facilities
- taking corrective action in response to out-of-specification temperatures, including implementation of procedures to segregate damaged or potentially unsafe stock
- completing records of stock receival and transfer as required
- maintaining work area to meet workplace cleaning standards
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work health and safety hazards and controls, including the purpose and limitations of PPE
- temperature controlled storage facilities and capacities available in the work area

© Commonwealth of Australia, 2025 Skills Insight

- temperature control requirements of stock handled in the work area, including acceptable temperature ranges and consequences of failing to meet these ranges and, where required, requirements for gradual temperature change
- stock handling procedures for receiving and locating stock within a store, including stock rotation and procedures for identifying, segregating and disposing of damaged or potentially unsafe stock
- stock handling procedures for transferring temperature controlled stock from a temperature controlled environment, including maximum duration stock can be held outside a controlled environment
- food safety and quality consequences of stock temperature control requirements not being met
- monitoring procedures and instrumentation, including use of thermometers or other temperature measuring instrumentation
- notification, recording and reporting requirements for temperature controlled stock
- operating procedures for goods handling equipment as required
- workplace cleaning standards for the work area
- recording requirements and procedures for working with temperature controlled stock.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - controlled temperature storage facilities
  - stock requiring storage
  - load shifting equipment as required
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - temperature storage specifications
  - stock information recording system and procedures
  - stock handling and rotation systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2012 Maintain food safety when loading, unloading and transporting food

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to maintain food safety when loading and transporting temperature-sensitive ingredients and products.

This unit applies to loading, unloading and transport activities where the transport operator does not have direct physical contact with food. Where food is handled directly by the transport operator, the relevant food handling unit also applies.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to transport food	1.1 Read or listen to work instructions from supervisor and clarify where needed

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Identify work health and safety hazards and tell supervisor 1.3 Wear appropriate personal protective equipment and ensure correct fit 1.4 Confirm that food storage vehicles, containers and receptacles are appropriate for use 1.5 Prepare food storage vehicles and containers and receptacles for use according to workplace procedures and safety and food safety requirements 1.6 Load and secure food to meet transportation and temperature control requirements according to workplace procedures and food safety requirements 1.7 Follow hand washing and disinfecting procedures according to food safety requirements
2. Load, unload and transport food safely	2.1 Monitor food safety control measures to ensure that food safety is maintained during transport 2.2 Report incidents where food safety control requirements are not met and take corrective action as directed 2.3 Unload food according to workplace procedures and transportation and temperature control requirements 2.4 Record food safety information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	**Description**
Numeracy	• Assemble and sort product • Count accurately • Read a thermometer and temperature charts • Weigh product
Reading	• Check cleaning records • Interpret and follow food safety and work health and safety requirements

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Navigate the world of work	• Apply workplace procedures relevant to own responsibilities • Understand main tasks, responsibilities and boundaries of own role, including use of personal protective clothing and equipment, housekeeping standards and procedures, quality requirements and operating procedures • Take steps to develop skills and knowledge of temperature controlled food products
Interact with others	• Communicate and report operational and safety information to relevant persons • Select and use appropriate terminology when communicating with personnel • Participate in conversations relevant to role by responding and explaining as required
Get the work done	• Make routine decisions relating to temperature, freshness and handling of product • Recognise and respond to non-conforming product • Use digital technologies including electronic scales

Assessment Requirements for FBPOPR2012 Maintain food safety when loading, unloading and transporting food

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has maintained food safety when loading, unloading and transporting food on at least one occasion, including:

- accessing workplace information to determine food handling and transport requirements
- selecting, fitting and using PPE
- confirming that the vehicle and associated equipment are appropriate and ready for use, including confirming that vehicle type is capable of maintaining the required temperature range for product
- preparing transport containers (this will vary depending on the type of food and transport method), such as checking cleaning records and, where required, confirming product compatibility to ascertain that appropriate level of cleaning has occurred
- preparing the storage/holding environment as required, including confirming that temperature parameters for the loading and unloading areas are met
- following procedures to load/unload food to ensure that materials/product is loaded/unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food or non-food items that can cause contamination (osmosis)
- monitoring temperature parameters and related food safety control points before, during and after transporting food, and recording information in the required format
- taking appropriate corrective action in response to failure to meet temperature parameters or other food safety requirements as required by workplace procedures
- cleaning and sanitising food containers according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls, including the purpose and limitations of protective clothing and equipment
- food safety control points in the loading/unloading and transportation of food materials and product, and related methods of control
- characteristics of food transported and related transport environment requirements
- microbiological, physical and chemical hazards that can occur when loading, transporting and unloading food, appropriate to nature and method of food transported, including the types of hazards likely to occur, the conditions under which they occur, and possible consequences
- methods and procedures used to control food safety hazards (this depends on the type of controls and equipment used), including the purpose and operation of equipment procedures in place to maintain food safety and workplace records, such as temperature control charts and cleaning and sanitation records
- procedures used to confirm that transportation and related food safety equipment is appropriate for use and operational, such as equipment capacity to maintain a given temperature environment appropriate to the food product
- cleaning and sanitation requirements for maintaining food safety when loading, unloading and transporting food
- potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported, where contamination by osmosis is a possibility.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - workplace information, including temperature charts and cleaning records
  - food storage vehicles, containers and receptacles
  - food materials and product to be loaded/unloaded and transported
- specifications:
  - work procedures relevant to loading/unloading and transportation, including advice on required temperature parameters to be maintained
  - food safety information
  - loading/unloading and transport advice/schedules
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2014 Participate in sensory analyses

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to participate in sensory analyses of food products and ingredients.

This unit applies to individuals who work in the food processing industry under general supervision and with limited autonomy. It covers analyses of food product or ingredients using taste, texture, appearance and smell.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to conduct sensory analysis	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify work health and safety hazards and inform supervisor 1.3 Wear appropriate personal protective equipment and ensure

	correct fit 1.4 Ensure that personal conduct and the test environment are appropriate to conducting sensory analysis
2. Conduct sensory analysis	2.1 Ensure that samples are available for analysis 2.2 Use the correct method and criteria for sampling according to workplace procedures and requirements 2.3 Analyse samples using analysis criteria 2.4 Identify and report defects or abnormalities in sample 2.5 Record results according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Calculate sample quantities
Reading	• Interpret standard operating procedures (SOPs), specifications and sampling plans
Writing	• Use paper-based and electronic media to record sampling results
Navigate the world of work	• Apply workplace procedures relevant to own responsibilities
Interact with others	• Communicate and report sampling information to relevant persons • Select and use appropriate terminology when communicating with and explaining information to others
Get the work done	• Make routine decisions about sample conformance • Solve familiar and generally predictable problems within workplace guidelines • Use sampling tools and equipment

Assessment Requirements for FBPOPR2014 Participate in sensory analyses

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has participated in sensory analyses of food products and ingredients on at least one occasion, including:

- accessing and interpreting sensory analysis schedule and analysis criteria to identify requirements
- selecting, fitting and using personal protective equipment
- ensuring that personal conduct does not jeopardise analytical ability
- confirming that samples are available and in an appropriate condition for analysis
- following procedures to analyse samples provided
- recording and/or reporting results of analysis
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work health and safety hazards and controls, including the purpose and limitations of protective clothing and equipment
- principles of sensory analysis, including attributes that can be detected by taste and smell, how these different tastes are detected, and an understanding of attributes detected by mouth feel and appearance
- sensory analysis system and procedures
- specific criteria used to evaluate material/product samples and the associated descriptions
- sample preparation requirements, including the effect of sample temperature on sensory analysis
- the effect of personal conduct on analytical ability, including stimuli and conditions that can dull sensitivity
- requirements of the environment appropriate to conducting sensory analyses

© Commonwealth of Australia, 2025 Skills Insight

- the components of material/product sampled that contribute to flavour, aroma, appearance and texture
- the likely causes of variation in results, including typical variation that can occur in the material/product and how these occur, as well as how the method of analysis, environment and state of individual participants can affect the outcome
- procedures and responsibility for recording and reporting sensory analysis information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - recording and reporting media
  - product/source material to be sampled
- specifications:
  - documentation, including specifications, work instruction, sensory analysis criteria and other advice on sampling requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2018 Operate a case packing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a secondary packaging process used to form trays or boxes, load and position product, and seal the package.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing packing environment. It typically applies to the worker responsible for applying basic operating principles to the operation and monitoring of a case packing process and associated equipment. Case packers may be configured as side loading, wrap around, drop, or pick and place packers.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

packing equipment and process for operation	where needed 1.2 Identify work health and safety hazards and tell supervisor 1.3 Wear appropriate personal protective equipment (PPE) and ensure correct fit 1.4 Confirm that packaged product and packaging components and consumables are available to meet production and food safety requirements 1.5 Carry out pre-start checks on process and related equipment to confirm readiness for use according to workplace procedures 1.6 Load or position packaging components and consumables according to workplace procedures and safety requirements 1.7 Set parameters to meet safety and packaging requirements
2. Operate and monitor the case packing process	2.1 Start, operate and monitor the process for variation in operating conditions according to work health and safety and operating procedures 2.2 Report any variation in equipment operation according to workplace procedures 2.3 Monitor packaging quality and packaging appearance to confirm that specifications are met 2.4 Identify, rectify and report out-of-specification process outcomes according to workplace requirements 2.5 Follow and apply workplace cleaning and environmental procedures
3. Shut down the case packing process	3.1 Identify the appropriate shutdown procedure and implement safely according to operating procedures 3.2 Identify and report maintenance requirements according to workplace procedures 3.3 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2018 Operate a case packing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a case packing process on at least one occasion, including:

- accessing workplace information to identify case packing requirements
- selecting, fitting and using PPE
- confirming supply of necessary packaging components/consumables, including boxes/cartons and related consumables
- inspecting the quality of packaging components/consumables to confirm that standards are met
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters to suit product type
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for packaging requirements
  - loading packaging components/consumables
  - positioning electronic eyes and sensors correctly
  - ensuring all safety guards are in place and operational
  - confirming coders are correctly set for date and product requirements
- starting, operating, monitoring and adjusting pick-and-place equipment to achieve required outcomes, including monitoring control points and conducting inspections, as required, to confirm process remains within specification:
  - box formation
  - alignment, placement and quantity of units packed
  - operation of suction cups
  - operation of related equipment (e.g. box closers and sealers)

© Commonwealth of Australia, 2025 Skills Insight

  - operation of ink jet coders to confirm correct code and clarity/legibility
- following procedures to reference or align equipment against set-up parameters
- monitoring flow of product to the process, and packaged goods from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take case packing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing equipment for cleaning
- completing workplace records as required
- maintaining work area to meet workplace cleaning standards
- using process control systems according to enterprise procedures
- cleaning and sanitising equipment according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of secondary packaging, including the requirements of packaging materials used and coding requirements
- basic operating principles of case packing equipment, including main equipment components, status and purpose of guards, purpose and location of electronic eyes and sensors, equipment operating capacities and applications, and services required for operation of case packers used in the workplace
- the flow of product to this stage in the packing process and the effect of outputs on downstream processes
- quality characteristics and requirements of outer packaging materials and of the packaged product, including board quality and finished packaged product specifications
- methods used to monitor the process, including visual inspection of the process and of the quality of the packaged product
- inspection or test points (control points) in the process and the related procedures and recording requirements, and testing gluing or sealing of packages where required
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam-up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including the effect of variation in packaging components/consumables on performance
- contamination/food safety hazards and risks associated with this stage in the packaging process and related control measures
- work health and safety hazards and controls for operating a case packing process

© Commonwealth of Australia, 2025 Skills Insight

- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the packaging process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for operating a case packing process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - automated case packers and related equipment and services
  - product to be packaged, and board and related consumables
  - documentation
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems and production/packaging schedules
  - information on equipment capacity and operating parameters
  - specifications, control points and operating parameters
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2019 Fill and close product in cans

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a primary packaging process that fills product into cans and hermetically seals containers using a closer or seamer.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing packing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a filling and closing process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2019 Fill and close product in cans

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has filled and closed product in cans on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using PPE
- confirming supply of necessary materials and services for filling and closing product in cans
- preparing/conditioning product for filling in cans
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters to suit filling requirements
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for filling and seaming requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been completed
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting the filling process and equipment to achieve required outcomes, including monitoring control points, and conducting inspections, as required, to confirm process remains within specification, including:
  - fill temperatures
  - headspace
  - vacuum
  - visual appearance of the product
  - line speed/throughput
- monitoring supply and flow of materials to and from the process

© Commonwealth of Australia, 2025 Skills Insight

- starting, monitoring and adjusting the closer to confirm alignment and formation of the seam
- monitoring control points and conducting inspections related to the seaming/closing process, and confirming that coding is correct
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- conducting shift handover procedures
- maintaining work area to meet workplace cleaning standards
- using process control systems according to enterprise procedures
- inspecting seams according to enterprise procedures
- cleaning and sanitising equipment according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of filling and closing, including the properties and requirements of packaging materials used, hermetic sealing and properties of containers used for this purpose, coding requirements and related legal requirements, including product weight
- the flow of this process and the effect of the filling and seaming process on downstream processes
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- quality characteristics of the filled and closed container, including seam components and integrity requirements within level of responsibility for inspection
- effect of raw material characteristics on filling and seaming
- quality parameters for cans and ends
- methods used to prepare product for filling
- effect of process variables, including headspace, fill temperature and vacuum, on the process
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam-up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems

© Commonwealth of Australia, 2025 Skills Insight

- techniques used to monitor the production/packing process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety issues associated with filling and seaming, and related control measures
- common causes of variation and corrective action required
- work health and safety hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for filling and closing product in cans.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - filling and closing and related equipment and services
  - materials to be filled as required
  - packaging components/consumables
  - sampling schedules and test procedures and equipment as required
  - cleaning procedures, materials and equipment as required
  - documentation
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - production schedule
  - information on equipment capacity and operating parameters
  - specifications, control points and operating parameters
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2020 Operate a form, fill and seal process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a form, fill and seal process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing packing environment. It typically applies to the worker responsible for applying basic operating principles to the operation and monitoring of a forming, filling and sealing process and associated equipment. This is a primary packaging process to package product into appropriate packaging. It can apply to both aseptic and non-aseptic form and fill processes.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPOPR2020 Operate a form, fill and seal process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a form, fill and seal process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using PPE
- confirming supply of necessary packaging components/consumables and product
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for packaging requirements
  - loading packaging components/consumables
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been completed
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting the forming, filling and sealing process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - formation of container/packaging
  - flow rates
  - product weights and volumes
  - fill levels
  - temperature, including product and sealing temperatures
  - supply of packaging components/consumables

© Commonwealth of Australia, 2025 Skills Insight

    - packaging quality and seal integrity, including testing packaging integrity
- monitoring supply and flow of materials to and from the form, fill and seal process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take forming, filling and sealing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing forming, filling and sealing equipment for cleaning
- completing workplace records as required
- maintaining work area to meet workplace cleaning standards
- using process control systems according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of forming, filling and sealing, including:
    - the purpose and characteristics required of packaging materials used
    - the methods used to form packaging, fill and seal product (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of forming, filling and sealing equipment, including:
    - main equipment components
    - status and purpose of guards
    - equipment operating capacities and applications
    - the purpose and location of sensors and related feedback instrumentation
    - services required for operation of form, fill and seal equipment used in the workplace
- the flow of processes supplying the forming, filling and sealing process and the effect of process output on downstream processes
- quality characteristics and requirements of forming, filling and sealing, including:
    - quality requirements of product and packaging components/consumables
    - requirements of packaging forming stage, and filling, including fill levels and weights
    - requirements of seal formation and integrity, and integrity testing procedures, where required
- methods used to monitor the process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements

© Commonwealth of Australia, 2025 Skills Insight

- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam-up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including the effect of variation in both product characteristics and packaging components/consumables on forming, filling and sealing performance
- food safety hazards and risks associated with forming, filling and sealing, and related control measures
- work health and safety hazards and controls relevant to the form, fill and seal process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the forming, filling and sealing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- aseptic container preparation/forming, filling and sealing requirements
- cleaning and sanitation procedures for a form, fill and seal process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - forming, filling and sealing process and related equipment and services
  - materials and packaging components/consumables to be formed, filled and sealed
  - product
  - sampling schedules and test procedures and equipment as required
  - documentation
  - cleaning procedures, materials and equipment as required
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production/packaging schedules
  - information on equipment capacity and operating parameters
  - specifications, control points and operating parameters
  - recording requirements and procedures.

- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take filling and sealing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing filling and sealing equipment for cleaning
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to enterprise procedures
- cleaning and sanitising equipment according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of filling and sealing, including the purpose and characteristics required of packaging materials used and the method used to fill and seal product (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of filling and sealing equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
  - services required for operation of filling equipment used in the workplace
- the flow of processes supplying the filling and sealing process and the effect of outputs on downstream processes
- quality characteristics and requirements of filling and sealing, including:
  - quality requirements of product and packaging components/consumables
  - requirements of filling, including fill levels and weights
  - requirements of seal formation and integrity, and integrity testing procedures, where required
- methods used to monitor the process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including procedures to clear a breach and restart following a crash or jam-up, as appropriate

© Commonwealth of Australia, 2025 Skills Insight

- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including the effect of variation in both product and packaging components/consumables on filling and sealing performance, which also includes the effect of temperature variation on the filling process
- food safety hazards and risks associated with filling and sealing, and related control measures
- work health and safety hazards and controls requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the filling and sealing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- aseptic filling and sealing requirements
- cleaning and sanitation procedures for the filling and sealing process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - filling and sealing process and related equipment and services
  - materials and packaging components/consumables to be formed and filled
  - product
  - sampling schedules and test procedures and equipment as required
  - documentation
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems and production/packaging schedules
  - information on equipment capacity and operating parameters
  - specifications, control points and operating parameters
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2022 Operate a high speed wrapping process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a primary packaging process using high speed wrapping equipment to enclose product in a sealed, airtight film or cello package.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing packing environment. It typically applies to the worker responsible for applying basic operating principles to the operation and monitoring of a high speed wrapping process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a high speed wrapping process on at least one occasion, including:

- accessing workplace information to identify wrapping requirements
- selecting, fitting and using personal protective equipment
- confirming supply of necessary packaging materials/film/cello and product, including inspecting the quality of both product and wrapping material to confirm that standards are met
- conducting pre-start checks, including:
  - inspecting equipment and conveyor belt condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters to suit product type
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for packaging requirements
  - loading/threading packaging components/consumables
  - positioning electronic eyes and sensors correctly
  - ensuring all safety guards are in place and operational
  - confirming coders are correctly set for date and product requirements
- starting, operating, monitoring and adjusting wrapping equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - product alignment
  - product weights
  - packaging quality
  - packaging and product alignment
  - seal integrity, including testing packaging integrity

© Commonwealth of Australia, 2025 Skills Insight

    - codes, correct content and clarity/legibility
- monitoring flow of product to and from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take high speed wrapping process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing wrapping equipment and conveyors for cleaning
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to enterprise procedures
- cleaning and sanitising equipment according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of wrapping, including the properties and requirements of packaging materials used, coding requirements and related legal requirements (for example, product weight)
- basic operating principles of wrapping equipment, including:
    - main equipment components (for example, conveyors and related guides and alignment adjustments)
    - purpose and location of electronic eyes and sensors
    - status and purpose of guards
    - equipment operating capacities and applications, and services required for operation of wrapping equipment used in the workplace
- the flow of product to the wrapping process and the effect of outputs on downstream processes
- quality characteristics and requirements of product to be wrapped, wrapping materials and the final wrapped product
- methods used to monitor the process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including the effect of variation in both product and packaging components/consumables on performance

© Commonwealth of Australia, 2025 Skills Insight

- contamination/food safety hazards and risks associated with the wrapping process and related control measures
- work health and safety hazards and controls relevant to the high speed wrapping process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the filling and wrapping process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for a high speed wrapping process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - high speed wrapping machine and related equipment and services
  - materials to be wrapped, cello/film and other packaging components/consumables
  - documentation
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems and production/packaging schedules
  - information on equipment capacity and operating parameters
  - specifications, control points and operating parameters
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2023 Operate a packaging process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a packaging process or sub-system.

This unit applies to individuals who operate and monitor a packaging process and associated equipment in a food processing packaging environment. The unit applies in a food processing packaging environment where no other specific packaging unit is available.

A packaging process may relate to primary and secondary packaging activities. It typically requires the operation of a series of related items of equipment to achieve the required outcome.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a packaging process on at least one occasion, including:

- accessing workplace information to identify packaging requirements
- selecting, fitting and using PPE
- confirming supply of necessary packaging components/consumables, materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - setting coders and printers
  - selecting appropriate equipment settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for packaging requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been completed
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting packaging equipment to achieve required outcomes, including:
  - packaging components/consumables and/or product
  - monitoring control points (for example, weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity) as required to confirm process remains within specification
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment

- following isolation and lock-out/tag-out procedures as required to take packaging equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to enterprise procedures
- cleaning and sanitising equipment according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the packaging process, including:
  - the purpose and characteristics required of packaging materials used
  - the principles of the packaging process used (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of processes supplying the packaging process and the effect of outputs on downstream processes
- quality characteristics required of the packaging process, including seal integrity requirements
- effect of variation in inputs, including packaging components/consumables, materials and/or services, on process performance
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam-up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the packaging process, including visual inspecting, and measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks related to stages in the packaging process, and related control measures
- common causes of variation and corrective action required

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls relevant to the packaging process
- requirements of different shutdowns as appropriate to the packaging process, including;
  - emergency and routine shutdowns and procedures to follow in the event of a power outage
  - conducting basic equipment referencing where required
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for packaging equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - packaging and related equipment and services
  - materials to be packaged and packaging components/consumables
  - sampling schedules, test procedures and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - specifications, control points and operating parameters
  - documentation and recording procedures
  - cleaning procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2026 Operate a forming or shaping process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a biscuit forming or shaping process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a biscuit production environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of machines and equipment to form and shape biscuit dough. Biscuits may be for human consumption or animal feed.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPOPR2026 Operate a forming or shaping process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a forming or shaping process on at least one occasion, including:

- accessing workplace information to identify biscuit forming process requirements
- selecting, fitting and using PPE
- confirming supply and condition of necessary materials and services, including transferring and loading dough into hoppers
- confirming condition of dough, including:
  - dough type matches product specification
  - dough temperature, consistency/texture, moisture level, weight and colour
  - dough standing time
  - dough supply/quantities
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that related equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- confirming setting selection, including:
  - setting parameters for process type
  - setting equipment speeds
  - adjusting roller and web settings (as required)
  - adjusting depositing/extrusion settings (as required)

© Commonwealth of Australia, 2025 Skills Insight

- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including control points and conducting inspections as required to confirm process remains within specification, including:
  - biscuit size, shape and thickness
  - biscuit weight
  - dough temperature
- forming product to specification, including conducting a trial run in preparation for production run
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- conducting product/batch changeovers
- locating emergency stop functions on equipment
- shutting down equipment in response to an emergency situation
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of biscuit forming
- basic operating principles of equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the biscuit forming process and the effect of outputs on downstream processes
- effect of dough quality on process outcomes
- quality characteristics to be achieved by the process
- quality requirements of materials and effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including procedures for incorporating reworked dough and procedures for mending webs as required
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems

© Commonwealth of Australia, 2025 Skills Insight

- methods used to monitor the production process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- work health and safety hazards and controls relevant to operating a forming or shaping process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for biscuit forming and shaping equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - forming process and related equipment and services
  - biscuit dough to be formed
  - sampling and testing schedules and procedures and equipment

FBPOPR2027 Dispense non-bulk ingredients

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to weigh, measure and label non-bulk ingredients to meet production requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a production environment within the food processing industry. It typically applies to the production worker responsible for the dispensing of ingredients in order to support production operations. Ingredients may be highly concentrated materials, including colours, flavours, buffered acids and preservatives.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPOPR2027 Dispense non-bulk ingredients

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has dispensed non-bulk ingredients on at least one occasion, including:

- accessing workplace information to identify dispensing requirements
- selecting, fitting and using personal protective equipment, including use of breathing apparatus and fume cabinets
- confirming supply of necessary raw materials, including checking ingredient type, grade, quantity, use-by codes and quality clearance
- carrying out visual inspections and tests to confirm that raw materials are appropriate for use
- conducting pre-start checks on equipment, including:
  - inspecting the condition and cleanliness of equipment and utensils
  - taring scales and carrying out any related procedures to confirm that equipment is accurately calibrated and fit for use
  - confirming that any scheduled maintenance has been carried out
- identifying out-of-specification or unacceptable ingredient condition, and taking appropriate corrective action
- measuring materials and additives within specified accuracy range
- taking corrective action in response to out-of-specification results
- pacing dispensing to meet production requirements
- packing and labelling dispensed materials as required
- following labelling procedures, including identifying batch numbers, dates of preparation, contents and use-by information
- reconciling and recording materials dispensed against materials released, and returning unused materials to storage as required
- cleaning dispensing equipment and utensils according to workplace procedures
- responding to and/or reporting equipment failure within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

- completing dispensing records by workplace recording system
- maintaining work area to meet housekeeping standards
- using basic equipment to support the dispensing process according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quality characteristics and related handling requirements of raw materials/ingredients and additives used, including best-by/use-by codes, ingredient compatibility and common allergens used
- storage requirements and shelf-life of ingredients and additives, including ingredients with special storage and handling requirements and including hydroscopic ingredients
- relevant legislative responsibilities and workplace systems for recording and tracing the use of ingredients and additives and related workplace labelling requirements and purpose
- the relationship between the dispensing process and related operations, including accuracy and tolerance and consequence of error
- purpose, measuring and accuracy capacity of instrumentation and related equipment calibration responsibilities and procedures
- control points in the dispensing process
- contamination and food safety issues associated with dispensing and related control measures
- procedures for requisitioning, receiving and returning ingredients from stores
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- cleaning, care and storage of equipment and instrumentation used for dispensing non-bulk ingredients
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the dispensing process, including waste collection and handling procedures related to the process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - dispensing instrumentation and equipment

© Commonwealth of Australia, 2025 Skills Insight

  - containers, bags, labelling and storage facilities
  - raw materials, ingredients and additives to be dispensed
  - sampling schedules and test procedures and equipment as required
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch and recipe instructions
  - information on equipment and instrumentation capacity and operating parameters
  - dispensing schedule or batch instructions
  - documentation and recording requirements and procedures
  - cleaning and sanitation procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2028 Operate a mixing or blending process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to combine ingredients and additives in the correct quantities and sequence, and to operate and shut down mixing and blending equipment to achieve the required mix characteristics.

This unit applies to individuals who work under general supervision and exercise limited autonomy in the food processing industry. Mixes may include concentrated pre-mixes or bulk blends. The output of this process may be a product requiring further processing or for external use.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a mixing or blending process on at least one occasion, including:

- accessing workplace information to identify mixing/blending requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- adding/loading materials in correct quantities and sequence, including monitoring automatic ingredient addition and/or manual addition
- starting, monitoring and adjusting mixing or blending process equipment to achieve required outcomes, including monitoring flow rates/quantity, time or temperature and mix/blending settings
- monitoring control points and conducting inspections to confirm process remains within specification
- monitoring supply and flow of ingredients and additives to and from the mixing or blending process
- pacing mixing/blending to meet production requirements
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

- locating emergency stop functions on equipment
- following isolation and lock-out or tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- labelling and storing pre-mixes and/or mixes according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of preparing mixes and blends, including the characteristics and basic function of ingredients and additives used, method and sequence of ingredient addition required to achieve required blend characteristics and, where relevant, the purpose of conditioning, maturation or holding stages required prior to further processing of the mix
- specific gravity and bulk density as appropriate for ingredients used
- basic operating principles of mixing/blending equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
  - awareness of calibration schedules for scales and related weighing/measuring equipment
- services required and action to take if services are not available
- the flow of the mixing process and the effect of mix preparation on downstream processes
- procedures for requisitioning, receiving and returning ingredients from stores
- ingredient-handling requirements and shelf-life or coding
- quality characteristics required of ingredients and additives and their effect on mixing process performance, including methods used to condition or prepare ingredients prior to addition
- methods used to monitor the blending or mixing process, including inspecting, measuring and testing, by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements, including:
  - flow rates
  - ingredient/additive addition sequence
  - times/temperatures and agitator speeds
  - required characteristics of blend, including viscosity, appearance and temperature

© Commonwealth of Australia, 2025 Skills Insight

- required attributes of the mixed or blended output, including chemical, texture and flavour profiles as required
- the effect of the mixing or blending parameters, including temperature and length of mix time on mixing outcome
- contamination and food safety risks associated with the process and related control measures, including product compatibility and cross-contamination risks and associated cleaning requirements, as well as common allergens used in mixes prepared
- operating requirements and parameters, and corrective action required when operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required
- work health and safety hazards and controls relevant to the mixing and blending process
- requirements of different shutdowns as appropriate to the blending or mixing process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities relevant to the mixing and blending process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the mixing or blending process, including waste or rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- characteristics of solutions, suspensions and emulsions for the mixing and blending process
- product labelling and storage requirements for the mixing and blending process
- cleaning and sanitation procedures for mixing or blending equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - mixing/blending process equipment, services and related storage facilities as required
  - ingredients and additives required for the mixing/blending process
  - sampling schedules and test procedures and equipment as required
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions

© Commonwealth of Australia, 2025 Skills Insight

- information on equipment capacity and operating parameters
- production schedule/batch/recipe instructions
- specifications, control points and processing parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2029 Operate a baking process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down processes used to bake and depan baked products.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing production workplace. It typically applies to the production worker responsible for producing baked products that may include pastry, biscuits, cake and other dough-based products that may be fresh or frozen.

This unit does not apply to production of bread. For bread baking, refer to the relevant plant baking and/or retail baking units of competency.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPOPR2029 Operate a baking process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a baking process on at least one occasion, including:

- accessing workplace information to identify baking process requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- confirming condition and quality of ingredients
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational, and rework bins are positioned
- confirming settings and parameters, including:
  - correct oven settings for baking time
  - oven zone temperatures
  - conveyor speed, loaders and dischargers
  - circulation and exhaust fans
  - water seals
  - burner controls and steam
  - heights, guides and air blowers
  - pre-blast conveyor

© Commonwealth of Australia, 2025 Skills Insight

- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - baking output, including quantities and product appearance (colour and sheen, uniformity of shape, weight and size, and moisture)
- confirming product is cleanly removed from the pan (depanning stage) and/or belt/band
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on baking equipment
- following isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- sorting, collecting, treating, recycling or disposing of waste, including clearing dust extractors
- completing workplace records
- maintaining work area to meet housekeeping standards
- setting up, starting up and monitoring the proofer, including time and temperature, humidity and position of the loading arm
- monitoring the proving process according to workplace procedures, including dough condition/surface and dough size and height
- setting up and operating finishing equipment according to workplace procedures, including setting topping application equipment, water sprays and splitters (monitoring typically involves checking appearance to confirm even coverage and/or finish to product specification)
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of each stage of the baking process, including the stages of the baking process and changes that occur in the product, including starch gelatinisation, the effect of variables (e.g. time, temperature and humidity), and oven zones as appropriate to oven type
- basic operating principles of equipment, including:
  - the difference between convection and impingement ovens
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the baking process and the effect of outputs on customer satisfaction and downstream processes, including packaging

© Commonwealth of Australia, 2025 Skills Insight

- quality requirements of materials and the effect of variation on baking process performance
- quality characteristics to be achieved by the baked product
- process specifications, procedures and operating parameters for different baked pastry products
- operating requirements, parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the baking process, including inspecting, measuring and testing, by the process
- inspection or test points (control points) in the baking process and the related procedures and recording requirements, including the ability to conduct dew point and/or wet bulb tests
- contamination/food safety risks associated with the baking process and related control measures
- common causes of variation and corrective action required
- work health and safety hazards and controls, including risks of spontaneous combustion and limitations of protective clothing and equipment used
- requirements of different shutdowns as appropriate to the baking process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities relevant to operating a baking process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the baking process, including waste/rework collection and handling procedures related to the process
- purpose and operating procedures for related processes, including in-line proving and finishing equipment where relevant
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures for baking equipment
- cleaning and sanitation procedures for baking equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - baking and depanning equipment and services, and related equipment
  - product to be baked
  - sampling schedules and test procedures and equipment

© Commonwealth of Australia, 2025 Skills Insight

- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - specifications, control points and processing parameters
  - production schedule and recipe/batch instructions
  - documentation and recording requirements and procedures
  - cleaning procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2031 Operate a coating application process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a coating application process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- preparing coating materials as required
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting coating equipment to achieve required outcomes (this will depend on the nature of coating materials), including:
  - condition of coating materials, including checking grist/particle shape and size, and checking for dough balls or lumps in flour-based breaders
  - viscosity and temperature of batter-type breaders and glazes
  - condition of product to be coated
  - product orientation/indexing
  - conveyor positions and speeds
  - drum speed
  - compression roller settings (drum applicator)

© Commonwealth of Australia, 2025 Skills Insight

  - dip pond levels
  - air blow off settings
  - spread/evenness of coating
- monitoring supply and flow of materials to and from the coating process
- taking corrective action in response to out-of-specification results
- conducting product/batch changeovers
- reporting and/or recording corrective action as required
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing equipment for cleaning
- responding to and/or reporting equipment failure within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- preparing breaders and glazes according to workplace procedures
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of coating, including coating process, process design and operation to achieve the coating requirements, related requirements of product and coating condition and equipment settings
- basic operating principles of coating application equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- quality characteristics to be achieved by the coating process
- the flow of the coating process and the effect of product output on downstream processes
- quality requirements of coating materials and product to be coated, and effect of variation on process performance
- operating requirements and parameters of coating application equipment and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the coating process, including inspecting, measuring and testing as required by the process

© Commonwealth of Australia, 2025 Skills Insight

- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures relevant to the coating application process
- common causes of variation and corrective action required
- work health and safety hazards and controls relevant to the coating application process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the coating process, including waste collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for coating application equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - coating process and related equipment and services
  - coating materials and product
  - sampling schedules and test procedures and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule, batch/recipe instructions
  - documentation and recording requirements and procedures
  - cleaning procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2033 Operate a depositing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a depositing process to deposit into tins, onto belts or directly onto product, where a further processing outcome is required.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing production environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a depositing process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPOPR2033 Operate a depositing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a depositing process on at least one occasion, including:

- accessing workplace information to identify depositing processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services for production, including confirming condition of materials, including temperature, texture, appearance and holding times, prior to use
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - setting up depositor manifold and controls to meet production requirements and cancelling isolation or lock-outs
  - confirming that related equipment is clean and correctly configured for processing requirements
  - sensors and controls are correctly positioned
  - any scheduled maintenance has been carried out
  - all safety guards are in place and operational
- starting, operating, monitoring and adjusting depositing process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm the process remains within specification, including:
  - maintaining supply of materials to hopper
  - controlling weights
  - checking dimensions and positioning of deposited material
  - visual inspections to identify faults, including unacceptable placement
  - checking pump stroke settings
  - checking line speed

© Commonwealth of Australia, 2025 Skills Insight

- monitoring supply and flow of materials to and from the depositing process to confirm process remains within specification
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take depositing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the depositing process, including product preparation and conditioning requirements and product depositing
- basic operating principles of equipment used in the depositing process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
  - services required and action to take if services are not available
- the flow of the depositing process and the effect of outputs on downstream processes
- quality requirements of materials for depositing and the effect of variation on depositing process performance and outputs
- quality characteristics required of outputs from the depositing process
- operating requirements and parameters of the depositing process, and corrective action required where operation is outside specified operating parameters
- scope to adjust for weight variation within workplace quality parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the depositing process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the depositing process and related control measures
- common causes of variation in the operation of the depositing process and corrective action required

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls relevant to the operation of the depositing process
- requirements of different shutdowns as appropriate to the depositing process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the depositing process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the depositing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitising procedures required for the depositing process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - depositing and related equipment
  - ingredients/mix to be deposited
  - recipe/batch instructions
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - specifications, control points and processing parameters
  - sampling schedules and test procedures and equipment
  - documentation and recording requirements and procedures
  - cleaning procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2034 Operate an evaporation process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down an evaporation process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of an evaporation process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work in processing area	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Confirm materials are available to meet operating and food safety

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	requirements 1.3 Identify and confirm cleaning and maintenance requirements and status 1.4 Wear appropriate personal protective clothing and ensure correct fit according to work health and safety requirements
2. Prepare the evaporation process for operation	2.1 Enter processing and operating parameters as required to meet safety and production requirements 2.2 Check equipment performance and adjust according to operating requirements 2.3 Carry out pre-start checks according to operator instructions
3. Operate and monitor the evaporation process	3.1 Start, operate and monitor the process for variation in operating conditions according to work health and safety and operating requirements 3.2 Identify variation in equipment operation and report maintenance requirements 3.3 Monitor the process to confirm that specifications are met 3.4 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.5 Follow and apply workplace cleaning and environmental procedures
4. Shut down the evaporation process	4.1 Identify the appropriate shutdown procedure 4.2 Shut the process down safely according to operating procedures 4.3 Identify and report maintenance requirements 4.4 Maintain workplace records in appropriate format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	**Description**

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated an evaporation process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- preparing materials for an evaporation process
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting evaporation equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - temperatures
  - vacuum
  - motor amperage
  - condensate flow
  - steam flow and pressure
  - throughput
  - time/speed

© Commonwealth of Australia, 2025 Skills Insight

    - evaporated product characteristics
- monitoring supply and flow of materials to and from the evaporation process
- taking corrective action in response to out-of-specification results
- reporting and/or recording corrective action as required
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing equipment for cleaning
- responding to and/or reporting equipment failure within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of evaporation, including:
    - an understanding of the principles of steam
    - the relationship between boiling point and pressure as applied to evaporation
    - the changes that occur to product as it moves through the evaporation process
- basic operating principles of evaporation equipment, including:
    - main equipment components
    - status and purpose of guards
    - equipment operating capacities and applications
    - the purpose and location of sensors and related feedback instrumentation
- quality characteristics to be achieved by the evaporation process
- the flow of the evaporation process and the effect of product output on downstream processes
- quality requirements of materials and the effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the evaporation process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures relevant to the evaporation process

© Commonwealth of Australia, 2025 Skills Insight

- common causes of variation and corrective action required
- work health and safety hazards and controls relevant to the evaporation process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the evaporation process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for evaporation equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - evaporation process and related equipment and services
  - materials to be evaporated
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule, batch/recipe instructions
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated an enrobing process on at least one occasion, including:

- accessing workplace information to identify enrobing process requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of tempered chocolate and the relevant centres/biscuits are available at the correct temperature
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting enrobing process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - supply of chocolate to the enrobing reservoir
  - temperatures of chocolate and pipelines
  - chocolate temper
  - chocolate supply pump speed
  - curtain flow
  - blower and vibrator settings
  - temperature profile of cooling tunnel

    - chocolate coverage
    - backing off and tailing
    - product weight
    - appearance
    - cooling temperatures
- monitoring supply and flow of materials to and from the enrobing process and equipment operation to confirm process remains within specification
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take enrobing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the enrobing process, including the effect of chocolate viscosity on enrobing, and types of chocolate suitable/used for coverage and backing off
- basic operating principles of equipment used for the enrobing process, including:
    - main equipment components
    - status and purpose of guards
    - equipment operating capacities and applications
    - the purpose and location of sensors and related feedback instrumentation
- services required for the enrobing process and action to take if services are not available
- the flow of the enrobing process and the effect of outputs on downstream processes
- conditioning requirements for centres/bars/biscuits and chocolate, including understanding of temper test procedures
- quality characteristics of centres/bars/biscuits and chocolate for use in the enrobing process and the effect of variation on process performance and outputs
- quality characteristics to be achieved by the enrobing process
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the enrobing process, including inspecting, measuring and testing as required by the process

© Commonwealth of Australia, 2025 Skills Insight

- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the enrobing process and related control measures
- common causes of variation for the operation of the enrobing process and corrective action required
- work health and safety hazards and controls relevant to the operation of the enrobing process
- requirements of different shutdowns as appropriate to the enrobing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the enrobing process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the enrobing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitising procedures required for the enrobing process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - process and related equipment and services, including enrober and cooling equipment
  - materials to be processed, including tempered chocolate and conditioned centres to be enrobed
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - recipe/batch instructions
  - specifications, control points and processing parameters
  - sampling schedules and test procedures and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2036 Operate an extrusion process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated an extrusion process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials/ingredients and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting and fitting appropriate attachments where required
  - setting processing parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required at each stage of the extrusion process to confirm process remains within specification, including:
  - parameters, including throughput
  - load/work input as measured by rpm (revolutions per minute)
  - kilowatts
  - amps and/or Hz (hertz) at each stage of the process
- monitoring supply of materials to and from the extrusion process
- taking corrective action in response to out-of-specification results

© Commonwealth of Australia, 2025 Skills Insight

- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of each part of the process, including the purpose and methods used to achieve each stage of the extrusion process
- basic operating principles of equipment used for the extrusion process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required for the extrusion process and action to take if services are not available
- the flow of the extrusion process and the effect of outputs on downstream processes
- quality characteristics of extruded output, including required characteristics of mass or blend to be extruded, including:
  - gelatinisation and viscosity
  - dimensions, texture and hardness of extruded product
  - moisture content
- effect of variation in inputs and/or services on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including the effect of variation in key variables, including:
  - throughput and work input at each stage of the process
  - effect of time and temperature
  - barrel pressures and temperatures at each zone
- typical equipment faults for the extrusion process and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems, including:
  - screw and barrel assembly wear
  - die plate wear
  - wear of conditioner paddles
  - extruder knife condition

© Commonwealth of Australia, 2025 Skills Insight

- methods used to monitor the extrusion process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- common causes of variation in the operation of the extrusion process and corrective action required
- contamination risks related to the extrusion process and related control measures
- work health and safety hazards and controls relevant to the operation of the extrusion process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the extrusion process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the extrusion process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for the extrusion process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - extrusion and related equipment and services
  - ingredients/blend/mass to be extruded
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2037 Operate a filtration process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a filtration process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a filtration process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work in filtration processing area	1.1 Confirm materials are available to meet operating requirements 1.2 Identify and confirm cleaning and maintenance requirements and status according to work health and safety and food safety

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	requirements 1.3 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare the filtration equipment and process for operation	2.1 Fit and adjust machine components and related attachments to meet operating requirements 2.2 Enter processing and operating parameters to meet safety and production requirements 2.3 Check equipment performance and adjust according to production requirements 2.4 Carry out pre-start checks according to work health and safety and operating procedures
3. Operate and monitor the filtration process	3.1 Start, operate and monitor the filtration process for variation in operating conditions 3.2 Confirm separation of solids from solution meets specifications 3.3 Monitor the process to confirm that specifications are met 3.4 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.5 Follow and apply workplace housekeeping and environmental procedures
4. Shut down the filtration process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to work health and safety and operating procedures 4.3 Identify and report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2037 Operate a filtration process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a filtration process on at least one occasion, including:

- accessing workplace information to identify filtration processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting and fitting appropriate screens and equipment components
  - selecting settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting filtration process and equipment to achieve required outcomes, including:
  - flow rates
  - residence time
  - solids for in-feeds and out-feeds (this is typically done by conducting a spin test)
- monitoring supply and flow of materials to and from the filtration process
- taking corrective action in response to out-of-specification results, including identifying and responding to sieve or screen blockages or tears
- identifying and/or reporting equipment faults, including confirming condition screens and sieves and replacing damaged components within level of responsibility
- locating emergency stop functions on equipment

© Commonwealth of Australia, 2025 Skills Insight

- follow isolation and lock-out/tag-out procedures to take filtration and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- cleaning and sanitising filtration equipment
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of filtration, including stages and changes that occur during filtration
- basic operating principles of filtration equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications, including relevant screens and sieves by filtration equipment
  - the purpose and location of sensors and related feedback instrumentation
- services required for operation of filtration equipment used in the workplace
- the flow of the filtration process and the effect of product output on downstream processes
- effect of raw material characteristics on filtration performance
- quality characteristics required of filtration process output
- test methods used to monitor solids in in-feed and out-feed streams
- operating requirements and parameters for the filtration process and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems, including screen or sieve damage
- common causes of variation in the operation of the filtration process and corrective action required
- spoilage and other food safety risks associated with filtration
- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the filtration process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- cleaning procedures appropriate for the range of filtration components used
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the filtration process
- cleaning and sanitising methods and procedures required for the filtration process
- procedures and responsibility for reporting production and performance information

© Commonwealth of Australia, 2025 Skills Insight

- environmental issues and controls relevant to filtration, including handling of effluent
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - filtration and related equipment and services
  - materials required for filtration
  - sampling schedules and test procedures and equipment as required
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, and batch/recipe instructions
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a grinding process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services to the grinding process
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- operating stockfeed control panel to transfer and grind product
- monitoring and adjusting the grinding process and equipment operation to achieve required outcomes, including:
  - monitoring control points and conducting inspections as required to confirm process remains within specification
  - running adjustments to hammer mills and roller mills
- monitoring supply and flow of materials to and from the grinding process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment

© Commonwealth of Australia, 2025 Skills Insight

- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- sorting, collecting, treating, recycling or disposing of waste
- maintaining work area to meet housekeeping standards
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the grinding process, including the characteristics of materials, which can be reduced to a suitable form for product, including stockfeed
- basic operating principles of equipment used to operate the grinding process, including:
  - main equipment components
  - bulk materials transfer systems and equipment
  - dust collection equipment
  - grinding equipment operating capacities and applications
  - the purpose and location of magnets, sensors and related feedback instrumentation
- services required for the grinding process and action to take if services are not available
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- the flow of the grinding process and the effect of product output on downstream processes
- quality characteristics and uses of grinding process outputs
- effect of the grinding process on the end product
- effect of raw material characteristics on grinding process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults related to the grinding process and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the production process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the grinding process and related control measures
- common causes of variation for the grinding process and corrective action required
- work health and safety hazards and controls related to the grinding process, including:
  - the risk of dust explosion
  - an understanding of the limitations of protective clothing and equipment relevant to the work process

© Commonwealth of Australia, 2025 Skills Insight

- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the grinding process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- cleaning and sanitation procedures required for the operation of the grinding process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - grinding and related equipment and services
  - stock required for the grinding process
  - sampling schedules and test procedures and equipment as required
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions
  - specifications, control points and processing parameters
  - production schedule/batch instructions
  - information on equipment capacity and operating parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a frying process on at least one occasion, including:

- accessing workplace information to identify frying requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary oil type to meet product frying requirements, product to be processed and services
- preparing materials as required prior to frying
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and valves are correctly positioned for oil transfer and processing stages
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting the frying process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - product throughput/belt speeds
  - oil levels/temperatures
  - operation of oil filtration process
  - visual appearance of product, including breaking open to inspect
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results

© Commonwealth of Australia, 2025 Skills Insight

- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of frying, including optimal frying conditions and the role of oil filtration
- basic operating principles of equipment used in the operation of a frying process, including:
  - main equipment components
  - the configuration of valves, pumps and pipework
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- the flow of the frying process and the effect of product output on downstream processes
- quality characteristics to be achieved by the frying process
- effect of product and oil quality characteristics on the frying process, final product and shelf-life
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the frying process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the frying process and related control measures
- common causes of variation related to the frying process and corrective action required
- work health and safety hazards and controls, including the fire suppression system and procedures to follow if temperatures exceed the specified range
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage

© Commonwealth of Australia, 2025 Skills Insight

- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the frying process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the frying process, including procedures for recycling oil and for disposing of spent oil, and the consequences of incorrect disposal
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for the frying process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - in-line frying equipment and related equipment and services
  - frying oil suited to product type and product to be fried
  - sampling schedules and test procedures and equipment as required
  - cleaning procedures, materials and equipment as required
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- cleaning and sanitising equipment
- completing workplace records
- maintaining work area to meet housekeeping standards
- controlling related holding and cooling stages according to workplace procedures
- using process control systems according to workplace procedures
- following relevant work health and safety procedures.
-

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of heat treatment, including the effect of heat treatment on product and on microbiological characteristics
- the relationship between time, temperature and pressure in the heat treatment process, including associated holding and cooling profiles according to product requirements
- basic operating principles of equipment used in the heat treatment process, including:
  - main equipment components
  - types and characteristics of heating mediums used
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- the flow of the heat treatment process and the effect of product output on downstream processes
- quality characteristics required of the heat-treated product
- effect of raw material characteristics on the heat treatment process, including variation in viscosity/texture, microbial load and acidity
- heat treatment requirements for food to be treated, including low and/or high acid foods
- operating requirements and parameters for the heat treatment process, and corrective action required where operation is outside specified operating parameters
- typical equipment faults for the heat treatment process and related causes, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
- methods used to monitor the heat treatment process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation in the operation of the heat treatment process and corrective action required

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the heat treatment process
- procedures and responsibility for reporting production and performance information
- cleaning and sanitation procedures required for heat treatment process
- environmental issues and controls relevant to the heat treatment process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - heat treatment process and related equipment and services
  - materials to be heat treated
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2041 Operate a mixing or blending and cooking process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a mixing or blending and cooking process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a mixing or blending and cooking process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

cooking processing area	1.2 Confirm ingredients are available to meet operating requirements 1.3 Identify and confirm cleaning and maintenance requirements and status according to work health and safety and food safety requirements 1.4 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare mixing/blending and cooking equipment and process for operation	2.1 Fit machine components and related attachments and adjust to meet operating requirements 2.2 Enter processing and operating parameters to meet safety and production requirements 2.3 Check equipment performance and adjust according to production requirements 2.4 Carry out pre-start checks according to work health and safety and operating procedures
3. Operate and monitor the mixing/blending and cooking process	3.1 Introduce ingredients and additives in the required quantities and sequence to meet recipe specifications 3.2 Start, operate and monitor the process for variation in operating conditions 3.3 Monitor the process to confirm that specifications are met 3.4 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.5 Transfer mix to required production or storage location 3.6 Follow and apply workplace housekeeping and environmental procedures
4. Shut down the mixing/blending and cooking process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to work health and safety and operating procedures 4.3 Identify and report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2041 Operate a mixing or blending and cooking process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a mixing or blending and cooking process on at least one occasion, including:

- accessing workplace information to identify recipe requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that related equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- sequencing ingredient addition to meet recipe specifications, including manual addition and/or operating bulk materials transfer and automatic addition equipment
- starting, monitoring and adjusting processing equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - time and temperature
  - agitation settings
  - weights
  - flow rates
  - flow diversion
  - characteristics of the mix, including colour, viscosity, density and consistency

© Commonwealth of Australia, 2025 Skills Insight

- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of heat sterilisation and effect on physical, chemical, microbiological and organoleptic characteristics of the cooked product
- the flow of the mixing or blending and cooking process and the effect of product output on downstream processes
- basic operating principles of equipment used in the mixing/blending and cooking process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
  - calibration schedules for scales and related weighing/measuring equipment
- services required mixing/blending and cooking process and action to take if services are not available
- quality characteristics and conditioning required of ingredients used, and their role in the product, including reconstituting dry ingredients and bringing ingredients to a required temperature
- effect of ingredient quality/condition on the process, including variables including temperature, viscosity/texture, microbial load and acidity quality
- heat treatment requirements for low and/or high acid foods as appropriate to production requirements
- stages and changes that occur during the blending and heat treatment stages
- quality requirements of the cooked product, including chemical, textural and flavour profiles
- relationship between time and temperature in the cooking process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- procedures for requisitioning, receiving and returning ingredients from stores

© Commonwealth of Australia, 2025 Skills Insight

- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation in the mixing/blending and cooking process and corrective action required
- contamination/food safety issues associated with mixing and blending and related control measures
- work health and safety hazards and controls relevant to the mixing/blending and cooking process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the mixing/blending and cooking process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- food safety requirements when preparing products
- packaging requirements and procedures
- cleaning and sanitation procedures required for the mixing/blending and cooking process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - mixing/blending and cooking process and related equipment and services
  - ingredients to be cooked
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch/recipe instructions
  - specifications, control points and operating parameters
  - documentation and recording requirements and procedures.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a drying process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- preparing materials as required
- conducting pre-start checks, including:
  - inspecting equipment condition, including checking belts, chains, screens, seals and valves, and filters, to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - temperatures
  - moisture content
  - air flow
  - throughput
  - time/speed
  - pressure/vacuum

© Commonwealth of Australia, 2025 Skills Insight

  - product characteristics
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results or non-compliance
- responding to and/or reporting equipment failure within level of responsibility
- reporting and/or recording corrective action as required
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- preparing equipment for cleaning
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and basic principles of the drying process, including the stages that occur during the drying process and the effect on product structure of each stage
- basic operating principles of equipment used in the drying process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required to operate the drying process and action to take if services are not available
- quality characteristics to be achieved by the drying process
- materials preparation requirements and the effect of variation on the process
- the flow of the drying process and the effect of outputs on downstream processes
- operating requirements and parameters of the drying process, and corrective action required where operation is outside specified operating parameters
- typical equipment faults related to the operation of the drying process and related causes, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
- methods used to monitor the drying process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures

© Commonwealth of Australia, 2025 Skills Insight

- common causes of variation, including air temperature, air velocity, humidity and pressure, and corrective actions required if these are out-of-specification
- work health and safety hazards and controls, including limitations of protective clothing and equipment relevant to the operation of the drying process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the drying process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the drying process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for the drying process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - drying process and related equipment and services
  - product to be dried
  - sampling schedules and test procedures and equipment as required
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule, batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2043 Operate an homogenising process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated an homogenising process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm the homogenising process remains within specification, including:
  - temperature
  - pressure
  - throughput
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment

© Commonwealth of Australia, 2025 Skills Insight

- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of homogenising
- basic operating principles of equipment used in the operation of a homogenising process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- effect of raw materials on homogenisation, including variables, including solids (brix), acidity, temperature, consistency and colour on process outcomes
- quality requirements to be achieved by the homogenisation process
- the flow of the homogenising process and the effect of product output on downstream processes
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults related to the homogenising process and related causes, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
- techniques used to monitor the homogenising process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process, and the related procedures and recording requirements
- common causes of variation in the operation of the homogenising process and corrective action required
- work health and safety hazards and controls relevant to the operation of the homogenising process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the homogenising process

© Commonwealth of Australia, 2025 Skills Insight

- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the homogenising process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for the operation of the homogenising process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - homogenisation process and related equipment and services
  - materials to be homogenised
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

	1.2 Confirm materials are available to meet operating requirements 1.3 Identify and confirm cleaning and maintenance requirements and status according to work health and safety and food safety requirements 1.4 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare the retort equipment and process for operation	2.1 Fit machine components and related attachments and adjust to meet operating requirements 2.2 Enter processing and operating parameters as required to meet safety and production requirements 2.3 Check equipment performance and adjust according to production requirements 2.4 Carry out pre-start checks according to work health and safety and operating procedures
3. Operate and monitor the retort process	3.1 Start, operate and monitor the process for variation in operating conditions 3.2 Monitor the process to confirm that specifications are met 3.3 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.4 Follow and apply workplace housekeeping and environmental procedures
4. Shut down the retort process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to work health and safety and operating procedures 4.3 Identify and report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2044 Operate a retort process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a retort process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services, including confirming container coding, and treating or confirming availability of treated cooling water
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting the cooking and cooling process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - time
  - temperature
  - pressure at each stage
- cooling, cleaning and handling post-treated containers to meet requirements
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of heat treatment and retort process, including:
  - relationship between time and temperature in the retort process
  - changes and requirements of each stage, including cooking, cooling and post-treatment container handling
- the purpose and requirements of container coding
- basic operating principles of equipment required for operating a retort process, including main equipment components, including:
  - thermometers, chart recorder, temperature control system, clock and pressure gauges
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
- the flow of the retort process and the effect of product output on downstream processes
- quality characteristics required of the retorted product
- effect of raw material characteristics on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults for a retort process operation and related causes, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
- techniques used to monitor the retort process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures, including both the risks of contamination related to processing and to post-processing handling of containers
- common causes of variation and corrective action required, including the effects of variables, including container size, product particulates, pH, water activity, time/temperature and pressure on process outcomes

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls relevant to operating a retort process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for operating a retort process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for operating a retort process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - retort process and related equipment and services
  - materials to be processed
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2045 Operate pumping equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate and monitor pumping equipment.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of pumping and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare pumps for operation	1.1 Confirm pumps and related equipment are available to meet operating requirements

Assessment Requirements for FBPOPR2045 Operate pumping equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated pumping equipment on at least one occasion, including:

- accessing workplace information to identify pumping requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of materials to be pumped and necessary services
- conducting pre-start checks, including:
  - inspecting pump flanges, gaskets and seals to identify any signs of wear
  - checking related valve assemblies to identify any signs of leaks
  - cancelling isolation or lock-outs (where pumps have variable settings that involve selecting appropriate settings and confirming that related pipework is correctly configured for pumping requirements)
- monitoring and adjusting pump operation, including identifying variation in amperage and adjusting pump speeds/flow rates to meet pumping requirements
- monitoring supply and flow of materials to and from the pump
- following isolation and lock-out/tag-out procedures to take pumps and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- responding to and/or reporting pump equipment failure within level of responsibility
- locating stop and reset functions on pumps
- maintaining work area to meet housekeeping standards
- operating pumps using process control systems according to workplace procedures
- cleaning pumps and related equipment according to workplace procedures
- following relevant work health and safety requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic operating principles of pumps and related equipment, including:
  - main pump components
  - status and purpose of guards
  - pump system configuration, including valves, taps and pipework
- the effect of pumping system design on operating performance, including flow resistance, pressure and head
- operating capacities of pumps used in the work area, including different pump types to perform pumping operations
- effect of raw material characteristics on pump performance, including variables that include soluble solids, temperature and viscosity
- effect of pump operating parameters on product/materials pumped
- corrective action required where pump operation is outside specified operating parameters
- typical equipment faults and related causes relevant to operating pumping equipment, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
  - services required
- isolation, lock-out and tag-out procedures and responsibilities required for operating pumping equipment
- work health and safety hazards and controls relevant to operating pumping equipment
- procedures and responsibility for reporting problems
- environmental issues and controls, including action required in the event of significant leaks or spills
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning procedures required for operating pumping equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - pumps, related equipment and services
  - materials to be pumped
  - routine preventative maintenance schedule as required
  - cleaning procedures, materials and equipment

© Commonwealth of Australia, 2025 Skills Insight

- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2047 Operate a portion saw

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a portion saw on at least one occasion, including:

- accessing workplace information to identify portion requirements
- selecting, fitting and using personal protective clothing and/or equipment, including use of mesh gloves or similar protective clothing
- confirming supply of necessary poultry pieces, including inspecting and removing pieces of unacceptable quality
- conducting pre-start checks, including:
  - inspecting condition of the portion saw to identify blade sharpness and other signs of wear
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and all safety guards are in place and operational
  - ensuring that lighting, guarding and signage around the saw are in position
- collecting portions to be cut
- positioning portions to allow the blade to pass cleanly through
- achieving cut accuracy to meet specifications and workplace standards with minimal waste
- identifying faulty equipment operation and/or blunt blades, and taking corrective action
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take the portion saw and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- inspecting and cleaning the portion saw and reporting maintenance issues
- maintaining work area to meet housekeeping standards

© Commonwealth of Australia, 2025 Skills Insight

- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quality specifications and characteristics required of portioned product
- portion saw operating procedures, including correct positioning of guards, lighting and safe work practices when working with the saw
- work health and safety hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- contamination/food safety risks associated with the automated cutting process and related control measures, including hygiene and sanitation requirements when handling product
- grading/downgrading specifications for portioned product
- typical equipment faults and related causes for operating a portion saw, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
- isolation, lock-out and tag-out procedures and responsibilities for operating a portion saw
- procedures and responsibility for reporting production and performance information
- procedures for cleaning and for reporting maintenance requirements for operating a portion saw
- waste handling requirements and procedures for operating a portion saw
- routine maintenance procedures required for operating a portion saw.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment, including a mesh glove
  - portion saw and related equipment and services
  - carcasses/pieces to be cut into portions
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

	requirements 1.3 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare for pre-processing	2.1 Fit machine components and related attachments and adjust to meet operating requirements 2.2 Enter processing and operating parameters to meet safety and production requirements 2.3 Check equipment performance and adjust according to production requirements 2.4 Carry out pre-start checks according to work health and safety and operating procedures
3. Operate and monitor the pre-processing process	3.1 Start, operate and monitor the process for variation in operating conditions 3.2 Monitor the process to confirm that temperature specifications are met 3.3 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.4 Follow and workplace housekeeping and environmental procedures
4. Shut down the pre-processing process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to work health and safety and operating procedures 4.3 Identify and report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has pre-processed raw materials on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks on machinery and equipment required to pre-process raw materials, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- loading or transferring materials to pre-processing equipment
- starting, operating and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records

© Commonwealth of Australia, 2025 Skills Insight

- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of pre-processing raw materials
- basic operating principles of equipment used in the pre-process raw materials, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- the flow of the process and the effect of product output on downstream processes
- quality characteristics to be achieved at the pre-processing stage
- effect of raw material characteristics on process performance
- operating requirements and parameters of machinery used in the pre-processing of raw materials, and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with pre-processing and related control measures
- common causes of variation in the pre-processing of raw materials and corrective action required
- work health and safety hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for machinery and equipment used for the preparation of raw materials
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for pre-processing raw materials.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - raw materials
  - workplace records
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - production schedule and batch instructions
  - quality criteria, specifications and inspection procedures
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2049 Operate a reduction process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a reduction process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a reduction process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a reduction process on at least one occasion, including:

- accessing workplace information to identify reduction process requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that related equipment is clean and correctly configured for reduction process requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting reduction process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - correct product type/quantity
  - roll releases
  - even spread of feed across rolls
  - mill balance
  - even grind/correct particle size
- monitoring supply and flow of materials to and from the reduction process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take reduction process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the reduction process
- basic operating principles of equipment for the reduction process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the reduction process and the effect of outputs on downstream flour milling processes
- quality characteristics to be achieved by the reduction process
- quality requirements of materials and effect of variation on reduction process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes associated with operating a reduction process, including:
  - signs and symptoms of faulty equipment
  - early warning signs of potential problems
- methods used to monitor the reduction process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the reduction process and the related procedures and recording requirements
- contamination/food safety risks associated with the reduction process and related control measures
- common causes of variation associated with operating a reduction process and corrective action required
- work health and safety hazards and controls relevant to operating a reduction process, including limitations of protective clothing and equipment relevant to the work process

© Commonwealth of Australia, 2025 Skills Insight

- requirements of different shutdowns as appropriate to the reduction process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for operating a reduction process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the reduction process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required to operate a reduction process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - reduction process and related equipment and services
  - stock to be processed
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a separation process on at least one occasion, including:

- accessing workplace information to identify separation processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - confirming that the correct bowl is fitted
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting separation process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, including:
  - separation speed
  - solids in in-feed and out-feed streams (this is typically done by in-line refractometers, Baume tests and spin tests)
  - flow rates
  - time/temperatures
  - pressures
  - air/water/oil levels

© Commonwealth of Australia, 2025 Skills Insight

    - condition of seals and valves
    - discharge/desludging
- monitoring supply and flow of materials to and from the separation process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- shutting down separation process equipment in response to emergency situation
- following isolation and lock-out/tag-out procedures as required to take separation process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- cleaning and sanitising equipment
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the separation process, including stages and changes that occur during the separation process
- basic operating principles of equipment for the separation process, including:
    - safety hazards associated with separation equipment and the implications of interchanging parts/incorrect bowl balance
    - main equipment components
    - status and purpose of guards
    - equipment operating capacities and applications
    - the purpose and location of sensors and related feedback instrumentation
    - services required for operation of separation equipment used in the workplace
- the flow of the separation process and the effect of product output on downstream processes
- impact of in-feed quality and concentration levels on the separation process
- quality characteristics and uses of separation process outputs
- methods used to monitor the separation process, including inspecting, measuring and testing in-feed and out-feed solids, and other tests as required by the process
- inspection or test points (control points) in the separation process and the related procedures and recording requirements
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required, including how variation in temperature and solids affects the process

© Commonwealth of Australia, 2025 Skills Insight

- spoilage and other food safety risks associated with separation, and related control measures
- work health and safety hazards and controls, including limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for operating the separation process
- cleaning and sanitation procedures required for operating the separation process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the operation of the separation process, including handling of effluent
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - separation process and related equipment and services
  - materials required for the separation process
  - sampling schedules and test procedures and equipment as required
  - routine preventative maintenance schedule as required
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions
  - information on equipment capacity and operating parameters
  - production schedule and batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2051 Operate a spreads production process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a spreads production process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that related equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - temperature
  - work input
  - throughput
  - pressures
  - crystal formation
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

- locating emergency stop functions on equipment
- follow isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of spreads preparation, including:
  - crystallisation
  - relationship between stages of crystal formation, work input and temperature
  - stages involved in the process
- basic operating principles of equipment for the spreads production process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
- services required for the spreads production process and action to take if services are not available
- the flow of the spreads production process and the effect of outputs on downstream processes
- quality characteristics required of the finished product
- quality requirements of oil or emulsion for processing and the effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes of the spreads production process, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the spreads production process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation associated with a spreads production process and corrective action required
- work health and safety hazards and controls relevant to operating the spreads production process

© Commonwealth of Australia, 2025 Skills Insight

- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities for the spreads production process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures relevant to operating the spreads production process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - spread processing and related equipment and services
  - emulsion or oil to be processed
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2052 Operate a chocolate tempering process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a chocolate tempering process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a chocolate tempering process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work in processing area	1.1 Confirm chocolate for tempering is available to meet operating requirements

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Identify and confirm cleaning and maintenance requirements and status according to work health and safety and food safety requirements 1.3 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare the tempering equipment and process for operation	2.1 Fit machine components and related attachments and adjust to meet operating requirements 2.2 Enter processing and operating parameters to meet safety and production requirements 2.3 Check equipment performance and adjust according to operating procedures 2.4 Carry out pre-start checks according to work health and safety and operating procedures
3. Operate and monitor the tempering process	3.1 Start, operate and monitor the process for variation in operating conditions 3.2 Conduct and interpret temper tests and make required adjustments 3.3 Monitor the process to confirm that specifications are met 3.4 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.5 Follow and apply workplace housekeeping and environmental procedures
4. Shut down the tempering process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to work health and safety and operating procedures 4.3 Identify and report maintenance requirements according to workplace requirements 4.4 Maintain workplace records according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2052 Operate a chocolate tempering process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a chocolate tempering process on at least one occasion, including:

- accessing workplace information to identify tempering process requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting tempering process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - setting pump speeds
  - checking temperature/zone settings
  - checking chocolate temperatures
- monitoring supply and flow of materials to and from the tempering process and equipment operation to confirm process remains within specification
- conducting temper test, interpreting results and determining adjustments
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take tempering process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- conducting routine maintenance according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the tempering process, including:
  - basic understanding of the crystallisation behaviour of cocoa fat
  - relationship between crystal forms and melting points/temperatures
  - process stages, including heating, cooling, agitating, reheating and effect of each of these on outcomes
- basic operating principles of equipment for the tempering process, including:
  - main equipment components
  - temperature zones
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
- services required for the chocolate tempering process and action to take if services are not available
- the flow of the tempering process and the effect of outputs on downstream processes
- quality characteristics required of chocolate for tempering and the effect of variation on tempering process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the tempering process, including temper test procedures and the significance of results for tempering process adjustments
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the tempering process and related control measures
- common causes of variation related to the chocolate tempering process and corrective action required

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls related to the chocolate tempering process
- requirements of different shutdowns as appropriate to the tempering process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities relevant to the chocolate tempering process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the tempering process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for operating the chocolate tempering process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - process and related equipment and services
  - chocolate to be tempered
  - tempermeter
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - recipe/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a washing and drying process on at least one occasion, including:

- accessing workplace information to identify production requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary raw materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting washing and drying equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - operation of dosing equipment
  - tank/bath or flume water levels
  - related equipment operation (including pumps/conveyors)
  - immersion of raw materials
  - temperatures
  - water quality
  - flow rates
  - drying times

© Commonwealth of Australia, 2025 Skills Insight

    - weight (before and after drying)
- monitoring supply and flow of raw materials to the wash process and from the drying process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the washing and drying process, including water quality, the role of sanitisers in the washing process, and of drying technology, including the use of centrifugal force in a drying process
- basic operating principles of equipment used in the washing and drying process, including:
    - main equipment components
    - status and purpose of guards
    - equipment operating capacities and applications
    - purpose and location of sensors and related feedback instrumentation
- services (principally water) required and action to take if services are not available
- the flow of this process and the effect of outputs on downstream processes
- quality characteristics to be achieved by both the washing and drying stages, including consequences of out-of-specification moisture levels on further processing and final product
- quality requirements of raw materials and the effect of variation on process performance, including how variation in microbial load can affect the washing and drying process
- operating requirements, parameters and corrective action required where washing and drying operation is outside specified operating parameters
- typical equipment faults of the washing and drying process and related causes, including:
    - signs and symptoms of faulty equipment
    - early warning signs of potential problems
- methods used to monitor the washing and drying process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements

© Commonwealth of Australia, 2025 Skills Insight

- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- work health and safety hazards and controls relevant to operating a washing and drying process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities relevant to operating a washing and drying process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for operating a washing and drying process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - washing and drying equipment and services, including water and sanitiser
  - raw materials to be processed
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications and inspection or control points
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2054 Operate a water purification process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a water purification process on at least one occasion, including:

- accessing workplace information to identify water purification process requirements
- selecting, fitting and using personal protective clothing and/or equipment
- responding appropriately to hazards, including chemical spills
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for water purification process requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting water purification process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - flow rates
  - pressure
  - operation of dosing equipment
  - alarms
- monitoring supply and flow of materials to and from the water purification process
- taking corrective action in response to out-of-specification results
- maintaining a purification system free of physical, chemical and biological contaminants

© Commonwealth of Australia, 2025 Skills Insight

- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take water purification process and related equipment off-line in preparation for cleaning/back-flushing and/or maintenance within level of responsibility
- carrying out cleaning, sanitising, regenerating and back-flushing
- completing workplace records
- maintaining work area to meet housekeeping standards
- following relevant work health and safety procedures, including responding appropriately to hazards, including chemical spills.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the water purification process, including methods used to purify water appropriate to workplace requirements
- basic operating principles of equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the water purification process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the water purification process
- quality requirements of inputs to the purification process and the effect of variation on process performance
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including:
  - following troubleshooting and problem-solving guidelines
  - recognising signs and symptoms of faulty equipment and early warning signs of potential problems
- basic operating principles of process control as appropriate, including the relationship between control panels and systems and the physical equipment
- methods used to monitor the water purification process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the water purification process and the related procedures and recording requirements
- Good Manufacturing Practice (GMP)/food safety requirements (as appropriate) associated with the purification process and related control measures
- common causes of variation and corrective action required

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls
- requirements of different shutdowns as appropriate to the water purification process and workplace production requirements, including emergency and routine shutdowns
- isolation, lock-out and tag-out procedures and responsibilities
- cleaning and sanitation procedures
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the water purification process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - washing and drying equipment and services, including water and sanitiser
  - raw materials to be processed
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications and inspection or control points
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2056 Operate a freezing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a freezing process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- preparing materials
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting the freezing process and equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - tunnel and product temperatures
  - throughput
  - removal of frozen waste product from equipment
  - visually inspecting product
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results
- correctly following procedures to defrost tunnels

© Commonwealth of Australia, 2025 Skills Insight

- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of freezing, including the changes that occur to product during freezing
- basic operating principles of equipment used in the operation of a freezing process, including:
  - main equipment components
  - status and purpose of guards
  - basic principles and operation of refrigeration system
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
- the flow of the freezing process and the effect of product output on downstream processes
- quality characteristics to be achieved by the freezing process
- effect of raw material characteristics on the freezing process
- operating requirements and parameters of the freezing process and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- contamination and food safety risks associated with the freezing process and related control measures
- common causes of variation in the operation of the freezing process and corrective action required
- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities required for the operation of the freezing process
- procedures and responsibility for reporting production and performance information relevant to the freezing process

© Commonwealth of Australia, 2025 Skills Insight

- environmental issues and controls relevant to the freezing process, including waste collection and handling procedures
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for the freezing process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - freezing process and related equipment and services
  - materials to be frozen
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - production schedule and batch instructions
  - specifications, control points and processing parameters
  - information on equipment capacity and operating parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2057 Operate a membrane process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a membrane process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a membrane process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

	status according to work health and safety and food safety requirements 1.3 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare the membrane equipment and process for operation	2.1 Fit machine components and related attachments and adjust to meet operating requirements 2.2 Enter processing and operating parameters to meet safety and production requirements 2.3 Check equipment performance and adjust according to production requirements 2.4 Carry out pre-start checks according to work health and safety and operating procedures
3. Operate and monitor the membrane process	3.1 Start, operate and monitor the process according to work health and safety and operating procedures 3.2 Monitor the process to confirm that specifications are met 3.3 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.4 Follow and apply workplace housekeeping and environmental procedures
4. Shut down the membrane process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to work health and safety and operating procedures 4.3 Identify and report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a membrane process on at least one occasion, including:

- accessing workplace information to identify membrane processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start check, including:
  - inspecting equipment/membrane condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment, including pumps, valves and pipework, are clean and correctly configured for membrane processing requirements
  - sensors and controls are correctly positioned
  - any scheduled maintenance has been carried out
  - all safety guards are in place and operational
- starting, operating, monitoring and adjusting membrane processing equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including monitoring:
  - temperatures
  - flow rates
  - total solids
  - pressure/vacuum
- monitoring supply and flow of materials to and from the membrane process
- taking corrective action in response to out-of-specification results
- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment

- following isolation and lock-out/tag-out procedures to take membrane processing and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- following procedures to clean membranes
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of membrane processing, including:
  - components of milk
  - particle size of each component
  - effect on these components of membrane processing
  - methods used to achieve this outcome
- basic operating principles of membrane processing equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
  - material composition of membranes used in the workplace, and related operating, cleaning and storage requirements
- the flow of the membrane process, including the different processing streams and the effect of the membrane process outputs on downstream processes
- quality characteristics required of the membrane processing outputs
- the effect of variation in raw material characteristics on membrane processing performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including the effect of variation in processing parameters, including temperature, pressure, total solids and flow rates on membrane process performance
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor membrane processing, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination and food safety risks associated with the process and related control measures

© Commonwealth of Australia, 2025 Skills Insight

- common causes of variation and corrective action required when operating a membrane process
- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to membrane processing and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage and shutdown
- cleaning and sanitation requirements required for operating a membrane process
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting membrane processing production and performance information
- environmental issues and controls relevant to membrane processing, including waste collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - membrane processing and related equipment and services
  - materials required for membrane processing
  - sampling schedules and test procedures and equipment
  - cleaning and sanitation procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions
  - information on equipment capacity and operating parameters
  - production schedule and batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2059 Operate a continuous freezing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a continuous freezing process on at least one occasion, including:

- accessing workplace information to identify processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting appropriate settings and/or related parameters
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for processing requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting process equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including:
  - flow rates
  - churn speed
  - time/temperature
  - ingredient addition systems
  - pressures
  - equipment condition and performance
- monitoring supply and flow of materials to and from the process
- taking corrective action in response to out-of-specification results

© Commonwealth of Australia, 2025 Skills Insight

- responding to and/or reporting equipment failure within level of responsibility
- locating emergency stop functions on equipment
- follow isolation and lock-out/tag-out procedures to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the continuous freezing process, including the stages that occur during the churning and freezing process and the required physical and microstructure of the product
- basic operating principles of equipment required to operate a continuous freezing process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
- services required to operate a continuous freezing process and action to take if services are not available
- the flow of the freezing process and the effect of outputs on downstream processes
- additives and ingredients used in the continuous freezing process and their role in the product
- quality characteristics to be achieved by the freezing process
- quality requirements of materials/ingredients and effect of variation on process performance
- operating requirements and parameters and corrective action required where operation of the continuous freezing process is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, including inspecting, measuring and testing by the process
- inspection or test points (control points) in the continuous freezing process operation and the related procedures and recording requirements
- contamination/food safety risks associated with the continuous freezing process and related control measures
- common causes of variation in the operation of a continuous freezing process and corrective action required

© Commonwealth of Australia, 2025 Skills Insight

- work health and safety hazards and controls relevant to the operation of a continuous freezing process, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the continuous freezing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities required for the operation of a continuous freezing process
- procedures and responsibility for reporting production and performance information of the continuous freezing process
- environmental issues and controls relevant to the continuous freezing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of continuous freezing process control, including the relationship between control panels and systems and the physical equipment
- cleaning procedures required for the continuous freezing process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - freezing process and related equipment and services
  - materials/ingredients to be processed
  - sampling schedules and test procedures and equipment
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedules and batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2060 Operate an automated cutting process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down an automated cutting process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of an automated cutting process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

	status according to work health and safety and food safety requirements 1.3 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare the automated cutting equipment and process for operation	2.1 Fit machine components and related attachments, and adjust to meet operating requirements 2.2 Enter processing and operating parameters to meet safety and production requirements 2.3 Check equipment performance and adjust according to production requirements 2.4 Carry out pre-start checks according to work health and safety and operating procedures
3. Operate and monitor the automated cutting process	3.1 Inspect carcasses/pieces to confirm that quality requirements are met 3.2 Hang carcasses/pieces to meet production pace 3.3 Start, operate and monitor the process for variation in operating conditions 3.4 Monitor the process to confirm that temperature specifications are met 3.5 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.6 Follow and apply workplace housekeeping and environmental procedures
4. Shut down the automated cutting process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to work health and safety and operating procedures 4.3 Identify and report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role • Interpret production requirements
Writing	• Record operating, routine maintenance and shutdown information on paper-based and electronic media
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials to and from the process
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Communicate and report operational and safety information to relevant personnel • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Access and interpret process control panels and system • Maintain a clean and hazard-free work area • Identify out-of-specification standards and maintain quality specifications • Confirm equipment status and condition • Interpret process and equipment information to monitor process and respond to abnormal performance and variations

Assessment Requirements for FBPOPR2060 Operate an automated cutting process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated an automated cutting process on at least one occasion, including:

- accessing workplace information to identify cutting requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary carcasses/pieces and services, including inspecting and removing carcasses/pieces of unacceptable quality
- conducting pre-start checks, including:
  - inspecting equipment condition to identify blade sharpness and other signs of wear
  - selecting appropriate settings and/or related parameters according to bird size/type
  - cancelling isolation or lock-outs
  - confirming that equipment is clean and correctly configured for cutting process requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place, and operational and running
  - trialling cut to confirm accuracy/positioning where required
- starting, operating, monitoring and adjusting automated cutting process equipment to achieve required outcomes, including hanging carcasses/pieces to meet production pace, monitoring control points and conducting inspections to confirm cut accuracy within specification
- monitoring supply and flow of carcasses/pieces to and from the automated cutting process
- taking corrective action in response to out-of-specification results, including adjusting blades/knives within level of responsibility
- responding to and/or reporting equipment failure within level of responsibility
- following procedures to adjust equipment for bird/portion type/size
- locating emergency stop functions on equipment

© Commonwealth of Australia, 2025 Skills Insight

- following isolation and lock-out/tag-out procedures to take automated cutting process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records
- maintaining work area to meet housekeeping standards
- using process control systems according to workplace procedures
- cleaning and sanitising equipment according to workplace procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the automated cutting process
- basic operating principles of equipment required to operate an automated cutting process, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
- the flow of the automated cutting process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the automated cutting process, including quality specifications and ability to assess cut quality and determine any required adjustments
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the automated cutting process, including inspecting the quality of cuts
- inspection or test points (control points) in the automated cutting process and the related procedures and recording requirements, including recording information (e.g. temperatures and product codes)
- contamination/food safety risks associated with the automated cutting process and related control measures
- common causes of variation and corrective action required when operating an automated cutting process
- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the automated cutting process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities for an automated cutting process

© Commonwealth of Australia, 2025 Skills Insight

- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the automated cutting process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures required for the automated cutting process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - automated cutting process and related equipment and services
  - carcasses/pieces to be processed
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - specifications, control points and processing parameters
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2062 Work in a clean room environment

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has worked in a clean room environment on at least one occasion, including:

- accessing workplace information to determine clean room work requirements
- confirming that protective clothing and footwear are appropriate for use
- following procedures to fit and inspect protective clothing and footwear
- following procedures to enter a clean room environment, including following appropriate hand washing and disinfecting procedures, and fitting gloves as required
- conducting work to minimise risk of contamination
- exiting the clean room environment according to workplace procedures
- removing protective clothing and footwear in correct sequence and depositing for laundering according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of and conditions required in a clean room environment, including how the clean room maintains a clean environment and related air flow systems
- preparation and handling requirements for garments and footwear worn in a clean room environment, including:
  - garment features appropriate to a clean room environment
  - inspection procedures to confirm clothing and footwear are fit for use prior to fitting
- inspection points to confirm that clothing and footwear are correctly fitted according to workplace procedures
- procedures to follow if garments are not fit for use

© Commonwealth of Australia, 2025 Skills Insight

- clean room control measures and related monitoring requirements, including:
  - pressure differences between the clean room and change room and knowledge of location of pressure gauges
  - checking operating conditions of ventilation systems where required
- entry procedures
- requirements for conducting work in a clean room and consequences of not complying with these requirements (typically work is conducted slowly to minimise disturbance of particulates)
- procedures to follow to minimise risk of contamination, including cleaning, sanitation, sterilisation and disinfecting of equipment and surfaces
- conditions that can cause contamination, and control measures to avoid this occurring
- work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- procedures for exiting and de-gowning
- laundering requirements and procedures
- housekeeping requirements for work area
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a clean room environment
- resources, equipment and materials:
  - protective clothing, footwear and equipment appropriate to a clean room
- specifications:
  - work procedures relevant to working in a clean room environment, including those specific to entering and exiting the clean room and to carrying out the relevant work function.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2063 Clean equipment in place

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare process equipment for cleaning in place or in-line. It applies to food processing equipment that is fixed in place and cannot be moved to a cleaning station. It requires the operator to initiate, monitor and control variables during cleaning.

This unit applies to individuals who work in food processing facilities performing a defined range of activities, most of which are routine and predictable.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for cleaning	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify health and safety hazards in the workplace and tell supervisor 1.3 Wear appropriate personal protective equipment and ensure

Assessment Requirements for FBPOPR2063 Clean equipment in place

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively cleaned food processing equipment that is fixed in place, on a minimum of two occasions, including:

- shutting down equipment and preparing for cleaning
- preparing and using chemicals according to safe work requirements
- cleaning equipment to meet work standards
- monitoring cleaning and report or address any non-compliances
- flushing equipment and dispose of waste according to environmental guidelines
- completing required documentation
- applying safe work practices and identify health and safety hazards and controls in the workplace
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of cleaning in place (CIP), including the use and functions of caustic and acid solutions, and cleaning sequence and stages as required in the workplace
- purpose and use of cleaning equipment and chemicals used
- terminology relating to the chemical solutions used
- safe work procedures, including appropriate signage of cleaning activities, and safe handling and storage of cleaners and sanitisers used
- health and safety workplace procedures, including purpose and limitations of personal protective equipment
- cleaning and sanitising requirements, including different levels of cleaning requirements

© Commonwealth of Australia, 2025 Skills Insight

- characteristics of cleaning and sanitising chemicals used, including basic composition as well as compatibility of chemicals with types of equipment
- methods used to render equipment safe to clean, including the status and purpose of equipment guards, relevant lock out/tag out and isolation procedures
- equipment settings required for cleaning and operating
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- inspection points for cleaning and sanitising
- consequences of contamination of process flows by cleaning solutions and related safeguards
- types of waste generated by both the production and the cleaning process and related collection, treatment and disposal requirements
- environmental consequences of incorrect cleaning waste disposal procedures
- requirements to liaise with/advise related work areas
- reporting and recording systems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - personal protective clothing and equipment
  - equipment to be cleaned, and related CIP system
  - chemicals and/or automated chemical addition system
- specifications:
  - workplace standard operating procedures and task-related documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2064 Clean and sanitise equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to clean, sanitise and carry out related procedures for food processing production equipment.

This unit applies to individuals who are primarily responsible for cleaning or where a more detailed knowledge of cleaning and sanitation processes is required in order to carry out cleaning responsibilities. This unit applies to both wet and dry cleaning methods.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPOPR2064 Clean and sanitise equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively cleaned and sanitised a minimum of two different items of equipment, including:

- preparing equipment for cleaning
- preparing and use chemicals according to safe work requirements
- cleaning and sanitising equipment to meet work standards
- monitoring cleaning and reporting or addressing any non-compliances
- disposing of waste according to environmental guidelines
- completing required documentation
- applying safe work practices and identifying health and safety hazards and controls in the workplace
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose of cleaning and sanitation and importance in maintaining food safety
- functions of cleaners, sanitisers and related equipment
- safe work procedures, including appropriate signage of cleaning activities, safe handling and storage of cleaners and sanitisers used, safety when using cleaning methods
- health and safety requirements in the workplace, including purpose and limitations of personal protective equipment (PPE)
- cleaning and sanitation requirements relating to work responsibilities, including the need for different levels of cleaning where relevant
- procedures for preparing cleaners and sanitisers as required
- cleaning methods to be followed relating to workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

- other work areas/operators who need to be consulted/advised on timing of cleaning
- methods used to render equipment safe to clean, including understanding the status and purpose of equipment guards, relevant lock out/tag out and isolation procedures and related equipment settings for both cleaning and operating as required
- procedures for cleaning and sanitising
- types of waste generated by the cleaning process and related collection, treatment and disposal requirements
- potential environmental impact of incorrect waste handling
- inspection, cleaning and storage requirements of cleaning equipment used
- inspection points and methods for confirming the effectiveness of cleaning and sanitation, including visual inspection, and where required, recording of cleaning conducted
- inspection requirements to confirm equipment condition, including acceptable equipment condition, ability to identify faulty or unacceptable equipment, and take required corrective action
- recording requirements and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - cleaning and sanitising equipment according to workplace requirements
  - cleaning equipment and chemicals
  - PPE
- specifications:
  - workplace standard operating procedures and task-related documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2065 Conduct routine maintenance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to inspect equipment and carry out routine maintenance and adjustment using a limited range of hand tools.

This unit applies to individuals who perform routine maintenance in a food and beverage environment. It typically targets the production worker responsible for conducting simple and routine maintenance tasks to support the operation of machines or equipment.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Conduct routine inspection of plant and equipment	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify health and safety hazards in the workplace and tell supervisor 1.3 Wear appropriate personal protective equipment and ensure correct fit

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Inspect equipment to identify signs of wear 1.5 Assess the nature of maintenance requirement
2. Prepare to conduct routine maintenance	2.1 Assess the maintenance task to determine tools and services required 2.2 Prepare equipment for maintenance 2.3 Select hand tools according to task requirements 2.4 Check tools before use and report unsafe and faulty items 2.5 Plan and schedule maintenance in consultation with affected work areas to minimise disruption to production
3. Carry out routine maintenance	3.1 Carry out routine maintenance on equipment 3.2 Report maintenance activities in line with workplace procedures
4. Complete maintenance tasks	4.1 Return equipment to operating order when maintenance is complete 4.2 Store tools and materials 4.3 Notify the relevant personnel of maintenance completion 4.4 Maintain a clean and tidy workplace

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Interact effectively with staff members
Get the work done	• Make routine decisions to correct simple and familiar problems • Apply routine fault finding methods to trace and identify equipment faults and implement standard and familiar solutions

Assessment Requirements for FBPOPR2065 Conduct routine maintenance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively conducted routine maintenance on a minimum of two different items of plant and/or equipment, including:

- identifying routine maintenance tasks for machine or equipment
- monitoring operation and identifying need for maintenance tasks
- carrying out routine maintenance tasks according to workplace procedures
- on completion of maintenance tasks, returning equipment to operational order, including confirming that all equipment parts, nuts and bolts are accounted for and correctly tightened
- scheduling maintenance tasks that are beyond one's own job role and communicating requirements with affected personnel
- selecting and using appropriate tools to undertake routine maintenance within scope of own job role
- assessing readiness for returning machine or equipment to operation or referring for further attention
- completing maintenance documentation
- applying safe work practices and identifying health and safety hazards and controls in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems and programs in place to manage routine maintenance of plant and equipment in the workplace
- responsibilities for participating in the maintenance program, including operator role and the role of others
- procedures for raising maintenance orders where requirements are outside operator role

© Commonwealth of Australia, 2025 Skills Insight

- basic operating principles of equipment to be maintained
- signs and symptoms of faulty equipment and early warning signs of potential problems
- basic checks used to confirm the nature of maintenance requirements, including distinguishing between mechanical and electrical faults and identifying probable causes or conditions that may increase maintenance requirements of equipment used
- procedures for issuing, maintaining and storing tools used
- safe use of hand tools and measuring instrumentation relevant to maintenance responsibilities
- lubrication requirements, including requirements to use food grade lubricants as required, and consequences of using incorrect type or amount of lubricants
- safe work procedures, including appropriate signage of maintenance activities, use of appropriate personal protective equipment, and awareness of safety hazards and controls relating to maintenance tasks
- methods used to render equipment safe to work on or clean including lock out/tag out and isolation procedures (in some cases this may involve liaising with other maintenance operators)
- procedures and inspections to be carried out to confirm that equipment is in operating order and all parts are accounted for
- food safety risks arising from poor personal hygiene, cleaning and housekeeping practices and procedures associated with routine maintenance
- maintenance planning, scheduling and recording procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - maintenance tools and equipment
  - operational machinery and equipment
  - safety equipment
  - spares and consumables
- specifications:
  - operation procedures
  - service equipment and maintenance instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2066 Apply sampling procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively taken 10 samples, in line with the sampling plan, including:

- accessing and interpreting sampling plan to identify requirements
- selecting, fitting and using personal protective equipment
- preparing for sampling to ensure required tools, containers and labels are available
- following sampling procedures and the sampling plan to collect samples from the designated points, in the quantities and at the times specified
- identifying atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules
- completing sample records according to workplace requirements, such as labelling samples as required
- transferring samples for testing
- maintaining work area to meet housekeeping standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of personal protective equipment
- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples, and related handling and preparation requirements and responsibilities

© Commonwealth of Australia, 2025 Skills Insight

- characteristics of materials sampled, and common contaminants and related conditions under which contamination is likely to occur
- sampling techniques relevant to samples collected, such as sterilisation methods and procedures
- the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
- procedures and responsibility for reporting and recording sampling information, including legislative requirements
- procedures for preparing samples.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - sampling plan
  - recording and reporting system
  - sampling equipment and containers as required
  - product/source material to be sampled.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2067 Work in a food handling area for non-food handlers

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to conduct work in a food handling area where the work does not involve direct food contact.

This unit applies to individuals who typically work in stores, warehousing, cleaning and maintenance roles. This unit is not appropriate for a person who has direct contact with food or raw materials or ingredients. Where this is a requirement, refer to relevant food safety units.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Maintain food safety while working in a food handling area	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify health and safety hazards in the workplace and inform supervisor

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Wear appropriate personal protective equipment and ensure correct fit 1.4 Identify and follow food safety requirements related to work tasks 1.5 Carry out work responsibilities so that the safety of food is maintained 1.6 Identify and report procedures or practices which are inconsistent with requirements of the workplace food safety program
2. Maintain food handling area in clean and orderly state	2.1 Confirm that equipment and the food handling area meet the cleaning and sanitation requirements of workplace food safety program 2.2 Collect and dispose of waste according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Ask questions to clarify understanding or seek further information
Get the work done	• Maintain a clean and hazard-free work area

Assessment Requirements for FBPOPR2067 Work in a food handling area for non-food handlers

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked safely and effectively in a food handling area, in a non-food handling role, to effectively maintain food safety standards on at least two different occasions, including:

- accessing and applying workplace information on food safety policies and procedures relevant to own work
- fitting and using appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- checking own work area to identify food safety hazards
- carrying out work responsibilities to ensure that food safety is not compromised
- taking necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognising and reporting situations or procedures that could compromise food safety
- sorting and disposing of waste according to workplace procedure
- maintain workplace standards in work area.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of protective clothing and equipment
- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non-food handling areas

© Commonwealth of Australia, 2025 Skills Insight

- suitable standard for materials and equipment used in the food handling area, including materials that are unsuitable for use
- methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised
- the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring
- cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area
- waste collection, recycling and handling procedures
- workplace standards to be maintained in the work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - work area and related equipment to undertake work function
  - waste collection, treatment, recycling and/or disposal equipment
- specifications:
  - food safety policies and procedures relevant to work role
  - work procedures, including procedures for entering and exiting food handling areas.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2068 Operate a process control interface

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate a computer-based interface to modify and/or interrogate a control system.

This unit applies to individuals who work under general supervision. This includes identifying and providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Navigate the process control interface	1.1 Confirm the readiness of the control interface and related components for operation 1.2 Use the hardware provided to operate the interface 1.3 Use page links to move between screens 1.4 Acknowledge messages and alarms 1.5 Access required information from screen displays

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.6 Record interface system malfunctions and report to supervisor
2. Use interface system to operate and maintain a process within required parameters	2.1 Start, monitor and shut down individual items of equipment and processes using the control interface 2.2 Select equipment, alter status and enter settings to meet operating requirements 2.3 Activate sequences to initiate process operation 2.4 Recognise equipment giving a bad signal or bad measurements and take responsive action
3. Analyse data to predict and control performance	3.1 Select and analyse trends to identify performance patterns 3.2 Identify causes of abnormal or unacceptable performance and take corrective action 3.3 Record information in workplace format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Access and interpret process control panels and system
Numeracy	• Monitor and interpret production and process control indicators and data • Monitor supply and flow of materials and product
Navigate the world of work	• Ask questions to clarify understanding or seek further information

Assessment Requirements for FBPOPR2068 Operate a process control interface

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated a process control interface on at least two occasions, including:

- recognising and responding to error messages and alarms
- accessing relevant performance data using the control system, including locating and interpreting performance trend information
- recording log information using the interface system according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- processes and equipment being controlled, including required processing sequences
- operating principles of process control and interface system, including the relationship between control panels, systems and the physical equipment, and where relevant, operating conditions required for accurate information input from sensors and related instrumentation
- action required to respond to error messages and alarms
- typical faults that can occur when operating a process control interface and corrective action required
- performance data collected by the control interface system and its application to troubleshoot performance, including the ability to identify and investigate related trend data to track cause and effect
- recording requirements and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

© Commonwealth of Australia, 2025 Skills Insight

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - process control interface hardware and software
  - work station or equipment to be controlled
  - process to be controlled
  - communication systems and equipment
  - workplace information recording systems, requirements and procedures
- specifications:
  - operating procedures and related advice on equipment operation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2069 Use numerical applications in the workplace

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively used numerical applications for work purposes, on at least two different occasions, including:

- identifying whether a calculation or estimation is required to meet workplace requirements
- performing calculations involving basic addition, subtraction, division and multiplication to support work role (this may involve use of a calculator and conversion tables)
- using estimation techniques to check quantities, ratios, speed and other required data estimates
- using estimation techniques to check calculated results and workplace data
- recording calculations and measurement information accurately, according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- mathematical processes, including addition, subtraction, multiplication and division
- application of calculation and estimation techniques to meet work requirements
- units of measurement used in the workplace, including whole numbers, fractions and decimals to one decimal point (this may include use of conversion charts)
- representation of numerical information relevant to work requirements, including charts, graphs and tables
- recording requirements and responsibilities relevant to work role.

Assessment Conditions

Assessment of skills must take place under the following conditions:

© Commonwealth of Australia, 2025 Skills Insight

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - real or simulated work tasks requiring simple estimation and calculation
  - conversion tables, calculators and measuring instruments.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2073 Work in a socially diverse environment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to interact effectively with people in a socially diverse workplace environment.

This unit applies to individuals who facilitate communication with customers and colleagues from diverse backgrounds and allow for cultural considerations when identifying issues that may cause misunderstandings in the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use verbal and non-verbal communication in a culturally sensitive manner	1.1 Identify responsibilities according to the principles of anti-discrimination legislation 1.2 Treat people from all social and cultural groups with respect and sensitivity 1.3 Use verbal and non-verbal communication that takes into account social and cultural differences

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Make efforts to communicate through use of gestures or simple words where language barriers exist 1.5 Seek assistance from colleagues, specialist resources or outside organisations when cultural considerations could be affecting workplace communication
2. Respond to cross-cultural misunderstandings	2.1 Identify issues that may cause conflict or misunderstanding in the workplace 2.2 Consider possible cultural and social differences when difficulties or misunderstandings occur 2.3 Address difficulties with appropriate personnel in the workplace and seek assistance to facilitate understanding where required 2.4 Make efforts to resolve misunderstandings, taking into account cultural and social considerations 2.5 Refer potential issues and problems that cannot be resolved to appropriate personnel for follow-up in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Interact with others	• Treat people from differing backgrounds with respect and sensitivity

Assessment Requirements for FBPOPR2073 Work in a socially diverse environment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked effectively in a socially diverse environment on a minimum of two different occasions, including:

- recognising cultural and social differences in the workplace
- responding to cross-cultural or cross-social misunderstandings.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of equal employment opportunity (EEO) and anti-discrimination legislation as they apply to company and employee rights and responsibilities in the workplace
- recognition of differences between people from different cultural and social backgrounds, including those differing from own
- understanding of the basis of cultural difference, including behaviour or practices that can cause offence, and related strategies for interacting in ways that are culturally and socially sensitive
- communication strategies and styles appropriate to diverse audiences related to the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- specifications:

© Commonwealth of Australia, 2025 Skills Insight

- rights and responsibilities relating to anti-discrimination and EEO
- relevant company policies and procedures

- relationships (internal and/or external):
  - opportunities to interact with others using typical workplace communication processes
  - interactions with team members and supervisors or realistic scenarios or role plays.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR3001 Control contaminants and allergens in the workplace

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to control contaminants and allergens in the workplace.

This unit applies to individuals who work under broad direction and take responsibility for their own work in a food or beverage processing environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

FDFFS2001A Implement the food safety program and procedures

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess risk of physical contamination	1.1 Identify types and sources of physical contamination in the workplace

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Identify risks of physical contamination to operations, product and consumer 1.3 Identify control measures to eliminate or reduce risks of physical contamination 1.4 Assess workplace procedures and practices to determine level of risk for physical contaminants and identify opportunities for improvement
2. Assess risk of chemical contamination	2.1 Identify types and sources of chemical contamination in the workplace 2.2 Identify risks of chemical contamination to operations, product and consumer 2.3 Identify control measures to eliminate or reduce risks of chemical contamination 2.4 Assess workplace procedures and practices to determine level of risk for chemical contaminants and identify opportunities for improvement
3. Assess risk of microbiological contamination	3.1 Identify types and sources of microbiological contamination in the workplace 3.2 Identify risks of microbiological contamination to operations, product and consumer 3.3 Identify control measures to eliminate or reduce risks of microbiological contamination 3.4 Assess workplace procedures and practices to determine level of risk for microbiological contaminants and identify opportunities for improvement
4. Assess risk of allergens in the workplace	4.1 Identify types and sources of allergens in the workplace 4.2 Identify risks of allergens to operations, product and consumer 4.3 Identify control measures to eliminate or reduce risks of allergens 4.4 Assess workplace procedures and practices to determine level of risk for allergens and identify opportunities for improvement
5. Implement control measures to manage contaminants and allergens	5.1 Implement control measures to minimise contaminants and allergens as part of work operations 5.2 Identify emergency procedures and conditions for implementation 5.3 Identify and complete reporting and documentation associated

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	with controls, as required 5.4 Conduct control measures in accordance with workplace environmental guidelines

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	**Description**
Reading	• Interpret workplace and standard operating procedures relevant to job role • Read and interpret food safety program requirements • Interpret workplace food safety practices, procedures and control measures
Writing	• Record results of inspection, sampling and testing • Report contamination and allergen risk
Numeracy	• Monitor and interpret control indicators and data
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information
Interact with others	• Select and use communication strategies appropriate for purpose when interacting with work colleagues and customers • Use active listening, observational and questioning techniques to confirm information about food safety program • Identify and describe responsibilities, skills, knowledge and experience within context of job role • Seek and provide feedback on current work performance
Get the work done	• Maintain a clean and hazard-free work area • Manage and prioritise tasks and timelines • Make decisions and solve problems related to control of contaminants and allergens

Assessment Requirements for FBPOPR3001 Control contaminants and allergens in the workplace

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has controlled contaminants and allergens in the workplace on at least one occasion, including:

- identifying the types of physical, chemical and microbiological contaminants and allergens that present a risk in the workplace
- identifying sources of risks
- examining control measures
- describing the appropriate monitoring requirements for each risk, including:
  - method or procedure to be followed
  - frequency and timing
  - person responsible
  - information to be recorded (procedures to be followed would be typically specified in the form of a standard operating procedure or work instruction)
- describing corrective action requirements in the event that acceptable limits or requirements of controls are not met
- developing or reviewing documentation relating to the food safety program, including process flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- using oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- communicating food safety responsibilities within level of responsibility
- implementing control measures as part of work operations
- identifying emergency procedures and conditions for implementation
- following relevant work health and safety procedures.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and intent of food safety legislation and control measures for contaminants and allergens
- roles and responsibilities for development and maintenance of the control measures
- food processing methods used in the workplace or work area and the risks of contamination
- sources of technical expertise on contaminants and allergens
- the role of control measures in the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, including operating procedures
- main types of food safety contamination likely to occur given the type of product and processing methods used
- acceptable control methods for the hazards identified, and required corrective action when control requirements are not met
- validation and verification processes, techniques, and responsibilities to control contaminants and allergens in the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on monitoring requirements, control methods and corrective action for risks
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR3002 Prepare food products using basic cooking methods

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to prepare food products using basic cooking methods.

This unit applies to individuals who work under broad direction and take responsibility for their own work in a food processing environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

FDFFS2001A Implement the food safety program and procedures

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and handle cooking tools and equipment	1.1 Prepare work area for operations and confirm hygiene standards 1.2 Wear appropriate personal protective clothing and ensure correct fit

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Identify, handle and store cooking utensils required for work according to workplace procedures 1.4 Identify and prepare equipment and machinery required for cooking operation according to workplace procedures 1.5 Identify and implement maintenance requirements for knives and other utensils 1.6 Implement food safety requirements at all times when handling and using cooking utensils and equipment
2. Prepare ingredients	2.1 Examine recipe and identify required ingredients 2.2 Determine sequence for preparation 2.3 Select ingredients and confirm quantity and quality using measuring or weighing devices or sensory analysis techniques 2.4 Prepare and assemble ingredients according to recipe requirements 2.5 Store ingredients according to workplace procedures
3. Use basic cooking methods	3.1 Identify the range of basic cooking methods and their effect on quality, taste and nutritional value 3.2 Identify cooking methods required by recipe and determine sequence 3.3 Apply cooking method to achieve quality standards for food item 3.4 Identify and address typical problems as they arise 3.5 Use cooking utensils and equipment according to manufacturer instructions 3.6 Apply waste minimisation and environmental considerations during cooking process 3.7 Clean cooking area, utensils and equipment, and store according to workplace standards
4. Finish product	4.1 Transfer cooked ingredients for further processing 4.2 Assemble final product and present or pack according to recipe or operating requirements

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Estimate and calculate ingredient amounts • Determine preparation and cooking times from packaging and recipes • Measure quantities of ingredients
Reading	• Read cooking instructions from recipe books • Read and interpret hygiene and food safety requirements from food safety program information
Navigate the world of work	• Apply workplace procedures relevant to own responsibilities • Understand main tasks, responsibilities and boundaries of own role, including use of personal protective clothing and equipment, housekeeping standards and procedures, quality requirements and operating procedures
Interact with others	• Communicate and report operational and safety information to relevant persons • Select and use appropriate terminology when communicating with others • Cooperate with others to rectify work health and safety hazards and operational maintenance requirements • Participate in conversations relevant to role by responding, explaining, negotiating and persuading
Get the work done	• Safely use/operate cooking tools and equipment • Make routine decisions to correct familiar and routine problems • Identify and follow quality and hygiene requirements

Assessment Requirements for FBPOPR3002 Prepare food products using basic cooking methods

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has prepared two different food products using basic cooking methods on one or two occasions, including:

- identifying and accessing ingredients
- reading and interpreting recipe requirements
- safely and correctly using work utensils and equipment
- interpreting numerical information on quantities and conducting measurements
- applying safe work and food safety standards
- selecting, fitting and using personal protective clothing and equipment
- planning operations
- applying cooking method to achieve quality standards for food item
- identifying cooking problems and taking corrective action, including reporting abnormalities or problems, repeating processes and/or making required adjustments
- maintaining work area to meet housekeeping standards
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- uses and characteristics of basic food ingredients
- major food groups and classifications
- range of ingredients typically used in the workplace and their characteristics and effect on food quality and taste
- principles of basic cookery
- food safety standards in the workplace
- common terminology used in cooking

© Commonwealth of Australia, 2025 Skills Insight

- maintenance requirements for knives and other utensils
- basic cooking methods and their effect on quality, taste and nutritional value
- waste minimisation and environmental considerations related to preparing food products using basic cooking methods.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - ingredients, utensils and equipment to be used for preparation of food products
  - recipes
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR3003 Identify cultural, religious and dietary considerations for food production

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Application

This unit of competency describes the skills and knowledge required to identify cultural, religious and dietary considerations for food production.

This unit applies to individuals who work under broad direction and take responsibility for their own work in a food or beverage processing environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify requirements of customers with cultural and religious	1.1 Identify cultural and religious practices and events that influence food production requirements 1.2 Identify food production methods and food products that cater for

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
backgrounds	cultural and religious practices and events 1.3 Assess the suitability of current food production methods and current food products against cultural and religious requirements 1.4 Identify alternative processes and products for customers with cultural and religious requirements related to food production
2. Identify dietary requirements of customers	2.1 Identify a range of specific dietary requirements and their impact on food production 2.2 Identify food products that cater for specific dietary requirements 2.3 Assess the suitability of current food production methods and current food products against dietary requirements 2.4 Identify alternative processes and products for customers with dietary requirements related to food production
3. Identify requirements of customers with food-related allergies	3.1 Identify common food-related allergies 3.2 Conduct risk assessment of current products and processes against common food-related allergies 3.3 Identify food production procedures to avoid contamination with allergens

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	**Description**
Reading	• Interpret workplace and standard operating procedures relevant to job role
Writing	• Record routine information on paper-based and electronic media
Numeracy	• Calculate and estimate food quantities and pricing
Navigate the world of work	• Apply workplace procedures to own role and responsibilities • Identify skills, knowledge and experience required for performing own role in the workplace • Ask questions to clarify understanding or seek further information

© Commonwealth of Australia, 2025 Skills Insight

Skill	Description
	• Participate in development of knowledge of cultural and religious practices and events that influence food production requirements
Interact with others	• Communicate and report operational and safety information to relevant personnel • Ask questions and listen carefully to gather, interpret or evaluate information, to clarify understanding or to seek further information • Use modes of communication suitable to purpose to confirm understanding when conducting operational start-up and shutdown procedures
Get the work done	• Make decisions relating to appropriate communication and relationship-building strategies • Solve familiar and generally predictable cross-cultural problems and conflicts within workplace guidelines and using experience of past solutions

Assessment Requirements for FBPOPR3003 Identify cultural, religious and dietary considerations for food production

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has identified cultural, religious and dietary considerations for food production on at least two separate occasions, including:

- using communication skills to interpret customer requests, and suggesting appropriate products that meet customer requirements
- accessing information on cultural, religious and dietary needs
- applying product knowledge to determine appropriate food products and processes to comply with cultural, religious or dietary considerations
- identifying common food-related allergens
- identifying procedures to avoid food contamination.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- ingredients of available food products which can impact on specific cultural, religious and dietary requirements of customers
- food production processes of products which can impact on specific cultural, religious and dietary requirements of customer including:
  - food safety principles and regulations
  - food safety hazards and risks
  - food safety program requirements
  - client conditions and associated needs and requirements
- specific dietary requirements, including:
  - coeliac
  - diabetes
  - food allergies

© Commonwealth of Australia, 2025 Skills Insight

  - food intolerances
  - swallowing problems requiring food texture modification
  - malnutrition
- different cultural requirements that impact on food production processes, including:
  - halal
  - Hindu
  - kosher
  - vegetarian
  - vegan
- additional dietary guidelines for specific populations, including older people and unwell people
- key health and legal consequences of failing to address special food requirements including:
  - drug–food interactions
  - allergic reactions
  - anaphylaxis
  - food sensitivity or intolerance reactions
  - choking.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - production equipment appropriate to product type
  - materials/ingredients to meet recipe requirements
  - ingredient pricing information
  - personal protective clothing, equipment and material safety data sheets (MSDS)
  - cleaning procedures, materials and equipment
- specifications:
  - work procedures, including advice on relevant product requirements, safe work practices, food safety, quality and environmental requirements
  - recipes and customer specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR3004 Set up a production or packaging line for operation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up a production or packaging line on at least one occasion, in line with production schedule, including:

- conducting pre-start checks on machinery used for production to determine cleaning, maintenance and operation readiness
- determining production parameters and requirements
- setting up line according to production requirements
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records and communicate line status with other personnel as required
- applying safe work practices and identifying hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operating principles of equipment and related accessories, including equipment adjustment points, range and location/alignment requirements of sensors and related feedback instruments, and status and purpose of guards
- operating capacities of equipment used in the work area, including different types of equipment and/or components by processing operations
- nature of set-up/changeover requirements, including product compatibility and related cleaning requirements, impact of variation in materials or product on set-up requirements, and equipment and/or attachment changeovers related to given products
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- pre-start checks required by set-up/changeover

© Commonwealth of Australia, 2025 Skills Insight

- related processes and personnel dependent on line set-up, and communication responsibilities
- isolation, lock-out and tag out procedures and responsibilities
- health and safety hazards and controls in the workplace
- procedures and responsibility for reporting equipment performance information
- operating principles of process control, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - personal protective equipment
  - production/packaging schedule and related advice on setup/changeover requirements
  - process/packaging equipment and related accessories and services
  - materials/consumables required of the process
  - hand tools
- specifications:
  - information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR3005 Operate interrelated processes in a production system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and monitor interrelated processes in a production system.

This unit of competency describes the skills and knowledge required to set up, operate, adjust and monitor interrelated processes in a production system. A production system typically involves a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome.

This unit applies to individuals who have skills and knowledge the operational requirements of the production system for the industry in which it is applied. Individuals apply higher level planning and problem-solving skills, work under broad direction and take responsibility for their own work.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPOPR3005 Operate interrelated processes in a production system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated interrelated processes in a production system, on at least one occasion, including:

- conducting pre-start checks on production system components
- confirming machine set-up is ready to achieve production requirements
- applying safe work practices and identify hazards and controls
- selecting and fitting personal protective equipment (PPE)
- starting, operating, monitoring and adjusting process equipment throughout the system to achieve required quality outcomes
- identifying system problems and taking corrective action
- conducting operational handovers
- shutting down system
- identifying and investigating opportunities for operational improvements within areas of responsibility
- completing workplace records
- shutting down equipment according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the production system, including the system process flow, the interrelationships of each process to identify the impact of variation on related processes, and optimisation options
- basic operating principles of equipment and related accessories used by the system, including equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments

© Commonwealth of Australia, 2025 Skills Insight

- operating capacities of equipment used in the system, including different types of equipment and/or components by processing/packaging operations
- related systems and responsibilities for interaction, including related production systems, services supply, packaging/warehousing, maintenance, laboratory/quality assurance and planning and scheduling
- product characteristics and common types of variation in materials and/or ingredients used, including the effect of variation on each stage of the system and scope to adjust or correct
- typical production related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials, incorrect settings and poor operator control
- relevant procedures, specifications and operating parameters for the system and the individual processes
- isolation, lock-out and tag out procedures and responsibilities
- hazards, risks, controls and methods for monitoring processes within the system, including health and safety in the workplace, food safety, quality and environmental hazards and risks
- workplace system and approach to equipment maintenance
- process improvement procedures and related consultative arrangements
- troubleshooting procedures and problem-solving techniques
- communication responsibilities to inform related work areas/support functions and other shifts of operational status and production issues
- procedures and responsibility for reporting production and performance information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - PPE
  - production system equipment and related accessories and services
  - materials/consumables required by the process
  - communication and recording systems and procedures
- specifications:
  - production schedule and related advice on system requirements
  - information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR3006 Operate interrelated processes in a packaging system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated interrelated processes in a packaging system on at least two separate occasions, including:

- setting and/or adjusting equipment to meet packaging requirements
- inspecting equipment condition to identify any signs of wear
- confirming selection of appropriate settings and/or related parameters
- ensuring that isolation or lock outs are cancelled
- confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly
- ensuring any scheduled maintenance has been carried out
- confirming that all safety guards are in place and operational loading and/or positioning product, packaging components and consumables.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the packaging system, including:
  - the process flow and the interrelationships of each previous processes that can affect packaging outcomes, packaging technology, and packaging equipment components
- basic operating principles of equipment and related accessories used by the system, including:
  - equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments
- operating capacities of equipment used in the system, including different types of equipment and/or components by processing/packaging operations

© Commonwealth of Australia, 2025 Skills Insight

- related systems and responsibilities for interaction, including related production and further packaging/storage stages, services supply, maintenance, laboratory/quality assurance and planning and scheduling
- technical knowledge of product/packaging characteristics and the main factors that impact on shelf-life
- typical packaging related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials and finished product, incorrect settings and poor operator control
- relevant procedures, specifications and operating parameters for the system and the individual processes
- isolation, lock out and tag out procedures and responsibilities
- hazards, risks, controls and methods for monitoring processes within the system, including health and safety, food safety, quality and environmental hazards and risks in the workplace
- workplace system and approach to equipment maintenance
- process improvement procedures and related consultative arrangements
- troubleshooting procedures and problem-solving techniques
- communication responsibilities to inform related work areas/support functions and other shifts of operational status and production issues
- procedures and responsibility for reporting production and performance information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - personal protective equipment
  - production schedule and related advice on system requirements
  - packaging system equipment and related accessories and services
  - product, packaging components and consumables by the process
  - communication and recording systems and procedures
- specifications:
  - information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR4001 Apply principles of statistical process control

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to collect statistical information and interpret data in order to inform work processes.

This unit applies to individuals who are required to collect, interpret and record data to inform work. This typically includes plotting data on run charts and statistical process control (SPC) charts; and identifying trends and variations according to given limits.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	2.3 Determine corrective action requirements based on data 2.4 Document and store data according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Use statistical analysis techniques to calculate, compare and manipulate data
Writing	• Record data and present information in required format
Get the work done	• Make decisions based on analysis of available data • Use manual and computer-based methods to interpret data and identify trends

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has applied the principles of statistical process control to at least two different sets of data, including:

- identifying data needed for collection
- gathering and accurately recording required data
- applying statistical analysis techniques and identifying variations, trends and any necessary corrective actions
- presenting a range of statistical data in appropriate workplace format.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- data sampling methods, including the nature of the sample on which data is based, and the reasons for different sampling requirements that may apply in a given situation
- concept of variation, including the difference between common and special causes of variation, and consequent options for reducing variation and remaining within a given range
- the purpose and process of establishing targets and limits
- the concept of standard distribution/standard deviation
- methods used to interpret statistical data, including methods to determine the average, median and mean, and what these measures indicate
- a variety of calculations to determine unknown values
- using binomial theorem
- using variability and probability to estimate and interpret outcomes in both numerical and qualitative terms

© Commonwealth of Australia, 2025 Skills Insight

- situations in which corrective action is required.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - statistical process control data
  - related data collection and analysis systems
  - calculator.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively participated in work teams or groups of at least three people, on a minimum of two different occasions, including:

- actively participating in discussion about identifying team goals and expectations
- planning work to maximise outcomes for team
- applying communication skills to engage with other participants
- participating in and supporting the achievement of team goals.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to plan work to maximise outcomes for team
- appropriate communication skills to engage with other participants
- procedures for establishing team goals and performance standards
- methods used to measure achievement of personal and team goals
- team goals and personal role to achieving work outcomes
- common group communication processes, including:
  - basic negotiation skills
  - conflict resolution
  - giving and receiving feedback
- importance of team goals and expectations and personal role within the team
- oral communication skills and language, including:
  - questioning
  - active listening

Assessment Requirements for FBPPPL3001 Support and mentor individuals and groups

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has supported and mentored one individual on at least one occasion and a group on at least one other occasion, including:

- modelling behaviour and performance consistent with company policy and procedures
- supporting others in their behaviour and performance
- providing feedback on performance and taking appropriate action
- planning and organising group activities to engage participation
- determining, recording and implementing clear group process outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- company policies and procedures as they apply to the work area
- regulations and legislative requirements, including:
  - sexual discrimination
  - harassment and bullying
  - equal employment opportunity
  - anti-discrimination
  - racial vilification
  - work health and safety
  - food safety
  - environmental management
- industry awards and workplace agreements to develop an awareness of the main issues covered as they affect day-to-day work arrangements

© Commonwealth of Australia, 2025 Skills Insight

- techniques for structuring and explaining work-related information to meet the needs of people in the work area
- interpersonal skills, including appropriate questioning, listening and feedback techniques
- workplace arrangements for training/assessment and related responsibilities
- boundaries of responsibility and related procedures for feedback, counselling and disciplinary procedures
- formal arrangements and responsibilities for consulting others relating to work role
- meeting procedures and recording requirements as relevant in the workplace
- basic group process facilitation procedures, including:
  - planning group processes
  - identifying the purpose
  - confirming the appropriate attendance
  - decision making
  - documenting basic group processes
- communications skills relevant to working with individuals and groups.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - systems and programs in the workplace to support development and mentoring of others
  - relevant resources to support mentoring role and responsibilities
- specifications:
  - regulatory, licensing, and legislative requirements
  - industrial awards and agreements
  - workplace policies, codes of practice and procedures
  - workplace systems and procedures for consultation, feedback, counselling and discipline
  - information systems, including recording and retrieval systems
- relationships (internal and/or external):
  - opportunities to interact with others using typical workplace communication processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPPL3002 Establish compliance requirements for work area

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to establish compliance requirements that apply to work operations in a production environment where the experienced operator or supervisor is responsible for ensuring compliance requirements are identified for work operations in their area of responsibility.

This unit applies to individuals who would typically work under direction and is required to operate within established compliance procedures in relations to health and safety, food safety, feed safety or environmental management.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

People, Planning and Logistics (PPL)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify compliance requirements	1.1 Review existing operating procedures and specifications to identify compliance requirements 1.2 Make enquiries within the workplace to identify compliance requirements according to workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Access information from external organisations and regulatory authorities to determine compliance requirements 1.4 Assess the purpose and scope of compliance requirement and impact on work to be performed
2. Establish compliance arrangements in work area	2.1 Confirm and communicate compliance requirements to other staff in work area according to workplace procedures 2.2 Source briefings, training and other support from internal and external support staff to ensure compliance is understood 2.3 Identify procedures for achieving and monitoring compliance in own work area 2.4 Identify procedures to be followed for non-compliance events

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Reads and interprets procedures, specifications and other documentation from a variety of sources and consolidates information to determine requirements
Writing	• Accurately records and completes organisational documents using clear language and correct spelling, grammar and terminology
Oral communication	• Effectively participates in verbal exchanges using collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information
Navigate the world of work	• Ensures an up-to-date understanding of legislative requirements
Get the work done	• Contributes to continuous improvement of current work practices by applying basic principles of analysis • Takes responsibility for planning, sequencing, and prioritising tasks and workload for efficiency and effective outcomes • Addresses problems and initiates standard procedures in response,

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required for individuals to participate in auditing, where it occurs in an area that the person is not directly responsible for and where they are required to follow a formal, structured process. It is designed to support participation in auditing a range of programs designed to identify hazards, assess risk and implement control measures.

At this level, the person would typically work under direction and may be required to operate within established audit procedures. Participation implies that the person can participate in all stages of an audit but is not responsible for negotiating audit scope, allocating audit tasks to others or reporting on audit outcomes.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
an audit	1.2 Determine the purpose and scope of the audit 1.3 Identify and locate information and resources required for audit
2. Participate in conducting an audit	2.1 Collect information that is adequate, representative and meets audit requirements 2.2 Analyse information to assess adequacy of performance against program 2.3 Review program records to compare with the audit compliance requirements 2.4 Observe compliance with the program in the workplace 2.5 Identify areas requiring corrective action
3. Follow up audit outcomes and prepare action plans	3.1 Assess audit outcomes that present a risk to the program objectives 3.2 Develop a corrective action plan to address the audit outcomes 3.3 Prepare adjustments to work activities to address action plan 3.4 Communicate the results of the audit and required adjustments to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	**Description**
Reading	• Read, interpret and consolidate information from briefing notes and other data, and compare against defined criteria and requirements
Writing	• Accurately record and complete organisational documents using clear language and correct spelling, grammar and terminology
Oral communication	• Clearly explain detailed information using language, tone and pace appropriate to audience
Get the work done	• Contribute to continuous improvement of current work practices by applying basic principles of analysis

Assessment Requirements for FBPPPL3005 Participate in an audit process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has participated in an audit process on at least one occasion, including:

- collecting, assessing and providing information as required by the audit process
- acting on risk identified in the audit process
- following up on audit outcomes by developing action plans
- communicating outcomes to work personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements and procedures for participating in an audit
- the purpose and scope of an audit, including the stages involved in the audit process
- roles and responsibilities of individuals involved in an audit process
- types of information required for a range of audit situations, including:
  - health and safety in the workplace
  - quality
  - environmental
- techniques for collecting information, including options, relevance and strengths and weaknesses of each method to ensure data is adequate and representative
- data analysis methods relevant to the audit process
- communication skills and techniques appropriate to the workplace to inform other personnel of audit outcomes and modified work practices
- technical knowledge relevant to the program being audited in order to:

© Commonwealth of Australia, 2025 Skills Insight

  - verify compliance
  - assess adequacy of control measures
  - relevance to industry standards
- purpose and responsibilities for maintaining records
- process to transition audit deficiencies into corrective action plans.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace to collect data and observe compliance
- resources, equipment and materials:
  - workplace program documentation
  - information systems and data collection technology
- specifications:
  - audit procedures and standards as applied in the workplace
  - relevant legislation, industry standards and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPPL3006 Report on workplace performance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to collate and maintain workplace records to enable the monitoring and reporting of workplace performance.

The unit applies to individuals who work as team leaders with responsibility for monitoring and reporting on performance of a work area or section. This includes working in a range of known contexts and completing routine activities.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for FBPPPL3006 Report on workplace performance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has reported on workplace performance on at least one occasion, including:

- confirming the reporting and recording systems and procedures for a specific work area
- recording information on work performance in accordance with reporting procedures
- reporting variances and inconsistencies
- maintaining security of work documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and responsibilities for the information records and reports to be maintained or produced, including accuracy levels and timelines
- types of information to be recorded, including but not limited to:
  - timesheets
  - log sheets
  - recipes/specifications
  - operating procedures
  - production statistics
  - downtime
  - labour
  - materials usage levels
- techniques used to collate and assess information, including typical recording outcomes to identify unusual or incorrectly recorded information

FBPSUG2022 Operate a waste water treatment system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate waste water treatment systems to comply with workplace requirements, trade waste agreements and site environmental authority.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the waste water treatment process for operation	1.1 Confirm chemicals and test equipment are ready for use 1.2 Confirm services are available and ready for operation 1.3 Select, fit and use personal protective equipment according to workplace safety procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Conduct pre-operational checks according to operating procedures 1.5 Calibrate instrumentation and test equipment according to operating specifications 1.6 Identify and report health and safety hazards and maintenance requirements according to workplace safety procedures
2. Operate and monitor the waste water treatment process	2.1 Start the waste water treatment system according to operating procedures 2.2 Confirm operating condition is maintained within operating requirements 2.3 Monitor, test and adjust waste water quality according to operating procedures 2.4 Operate first flush systems during rainfall events 2.5 Ensure the work area is maintained to workplace cleaning standards
3. Analyse and respond to abnormal performance	3.1 Analyse water condition and plant operating conditions according to workplace procedures and manufacturer's guidelines 3.2 Take corrective action in response to hazards, out-of-specification test results and/or plant performance 3.3 Implement emergency procedures according to workplace safety procedures
4. Hand over waste water treatment system	4.1 Maintain workplace records according to workplace procedures 4.2 Carry out handover according to workplace procedures 4.3 Ensure operators are aware of system status and related equipment at completion of handover
5. Shut down the waste water treatment system	5.1 Safely shut down the system according to operating procedures 5.2 Prepare the system for storage in shutdown mode according to operating procedures 5.3 Identify and report operational maintenance requirements according to workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret information in workplace documentation
Numeracy	• Interpret production and process control indicators and data
Navigate the world of work	• Apply workplace procedures relevant to own role
Interact with others	• Apply workplace communication practices to report issues or provide information
Get the work done	• Access and interpret waste water treatment system process control panels and system • Make routine decisions to correct abnormal performance of waste water treatment system

Assessment Requirements for FBPSUG2022 Operate a waste water treatment system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a waste water treatment system in line with workplace contexts and demonstrated each of the following points at least once:

- conducted pre-start checks of equipment and services
- selected, fitted and used required personal protective equipment (PPE)
- operated, monitored and adjusted waste water treatment system according to operating procedures
- maintained work area to meet cleaning standards
- handled chemicals safely
- reported health and safety risks and maintenance requirements
- performed shutdown procedures
- conducted shift handover procedure
- taken corrective action in response to typical operating faults, out-of-specification results or non-compliance
- recorded waste water treatment information
- followed waste water system operating procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- equipment purpose and operating principles of waste water treatment equipment and methods
- water cycles for trade waste, storm water and sewerage, including sources and flow patterns
- purpose of chemicals used in waste water treatment systems
- purpose of first flush systems and their relationship with the waste water treatment system

© Commonwealth of Australia, 2025 Skills Insight

- typical causes of non-conforming water quality, and corrective action required
- key health and safety requirements for operating waste water treatment systems:
  - hazards related to waste water system operation, and associated control measures
  - correct use of PPE
  - lock-out, tag-out and isolation procedures
- procedures for operational and long-term shutdown
- environmental issues and controls for operating waste water treatment systems:
  - company policy relating to environmental performance
  - waste characteristics and treatment methods
  - waste handling requirements and procedures
- procedures and responsibility for reporting problems for operating waste water treatment systems
- recording requirements and procedures for operating waste water treatment systems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - waste water treatment system and related chemicals
  - water testing equipment
  - workplace information recording system
- specifications:
  - operating procedures and related advice on equipment operation
  - water quality sampling and test procedures
  - workplace cleaning standards and procedures
  - workplace information requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC3001 Apply raw materials, ingredient and process knowledge to production problems

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to apply an understanding of ingredients and processes to solve problems that typically occur during the preparation, processing or packaging of products.

The unit applies to operators who work under broad supervision and are responsible for the efficient operation of production equipment and processes, and are required to problem-solve issues relating to non-conforming raw materials, ingredients and processes.

No occupational licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Assessment Requirements for FBPTEC3001 Apply raw materials, ingredient and process knowledge to production problems

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively applied knowledge of raw materials, ingredient and process knowledge on at least one occasion, including:

- recognising quality characteristics of raw materials and ingredients in one production process
- identifying non-conforming raw materials and ingredients, and reasons why they exist in the production process
- identifying non-conformance as a result of processing and storage
- determining and undertaking corrective action for non-conformances
- completing workplace documentation and reporting non-conformances.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the composition and function of each main raw material and ingredient used, including an awareness of ingredient grades or types
- common causes of contamination and unacceptable quality in raw materials and ingredients
- methods used to confirm quality standard
- the effects of variation in raw materials and ingredients on processing stages and final product outcomes, including:
  - factors likely to cause variation
  - scope to adjust or correct for variation at each processing stage
- appropriate handling and storage requirements for raw materials, ingredients and final products, and the effects of poor storage conditions

© Commonwealth of Australia, 2025 Skills Insight

- changes and reactions that occur through processing stages, including the signs and symptoms of poor and unacceptable processing or equipment operation
- factors affecting the shelf-life of products
- the interrelationships between processing stages and the effect of variations in processing parameters on process outcomes and on final products, including:
  - factors likely to cause variations
  - scope to adjust or correct for variations at subsequent process stages
- procedures for identifying and isolating non-conforming products
- troubleshooting information and techniques
- procedures and related documentation required to amend or to introduce a new method or procedure
- reporting requirements and responsibilities
- test methods for confirming quality characteristics.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - ingredients and raw materials
  - final product, and related processing equipment and stores areas
- specifications:
  - ingredient/raw materials specifications
  - troubleshooting procedures relevant to workplace processes
  - sampling and test equipment and procedures as required.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC3002 Implement the pest prevention program

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to implement an existing pest prevention program in a food processing environment.

The unit applies to individuals who typically have responsibility for inspecting food products and implementing control procedures while working under broad direction and take responsibility for their own work, with limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Assessment Requirements for FBPTEC3002 Implement the pest prevention program

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a pest prevention program to effectively control pests in two different areas, including:

- conducting pest inspections
- identifying pest infestations and selecting suitable control measures
- implementing pest control measures in accordance with workplace procedures
- monitoring effectiveness of control measures
- assessing pest control methods and contributing to improvement of pest control
- completing records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic principles of integrated pest management including:
  - identification of pest hazards
  - establishment of pest elimination methods
  - monitoring of the effectiveness of these measures
- methods used to prevent pest invasion in the workplace
- housekeeping and cleaning standards to minimise conditions that attract pests
- food safety issues relating to the use of pesticides in a food handling area
- characteristics and behaviours of common pests in own workplace
- conditions required by common pests to survive and breed
- methods and procedures used to minimise pest resistance to elimination methods
- safety data sheets (SDS) for pesticides used in the workplace

© Commonwealth of Australia, 2025 Skills Insight

- legislation, codes of practice and procedures relating to the purchase, transport, storage, use and disposal of pesticides
- safe procedures for handling, using and storing pesticides
- the purpose, application and limitations of personal protective equipment (PPE).

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - access to work areas where pests are common
  - pesticide labels and SDS
  - PPE
  - pest control equipment
- specifications:
  - pest prevention program.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

HLTAID003 Provide first aid

Modification History

Release	Comments
Release 6	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 5	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 4	Updated mapping information. Equivalent outcome.
Release 3	Updated mapping information.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and manage immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer’s instructions 2.7 Monitor the casualty’s condition and respond in accordance with first aid principles
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
4. Evaluate the incident and own performance	4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents 4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Skills Insight

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

© Commonwealth of Australia, 2025 Skills Insight

  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

© Commonwealth of Australia, 2025 Skills Insight

  - unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid equipment according to manufacturers' instructions. 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

© Commonwealth of Australia, 2025 Skills Insight

3. Communicate details of the incident.	3.1. Accurately convey incident details to emergency services. 3.2. Report details of incident in line with appropriate workplace or site procedures. 3.3. Complete applicable workplace or site documentation, including incident report form. 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.	4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed
  - shock

© Commonwealth of Australia, 2025 Skills Insight

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally

© Commonwealth of Australia, 2025 Skills Insight

  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening and life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

© Commonwealth of Australia, 2025 Skills Insight

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

MEM13003B Work safely with industrial chemicals and materials

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using personal protective equipment (PPEs), identifying the particular hazards and emergency procedures, and observing safe working practices in that environment.

Application of the Unit

Application of the unit	This unit may be applied in a workplace in which materials and chemicals which are subject to codes and regulations are stored and used, for example, chemicals, solvents, dangerous materials, acids, noxious waste products etc. Evidence of competency is to encompass the satisfactory application of current State/Territory OHS legislation, standards and codes of practice, and the hierarchy of hazard control measures with elimination, substitution, isolation and engineering control measures being selected before safe work practices and PPEs. This unit describes the competencies which are beyond those safety requirements normally applied in the workplace as described in Unit MEM13014A (Apply principles of occupational health and safety in the work environment) or specifically described in individual units such as welding. **Band**: **A** **Unit Weight**: **2**

© Commonwealth of Australia, 2025 Skills Insight

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Use personal protective equipment	1.1. Correct and appropriate safety clothing including personal protective equipment is selected and used correctly based on information in relevant material safety data sheet (MSDS).
2. Identify emergency procedures	2.1. Emergency procedures and plan relevant to the particular work environment are documented, understood and demonstrated as laid down in approved safety instructions.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3. Observe safe working practices	3.1. Hazardous areas and materials are identified and special handling procedures are identified and understood. 3.2. Permits to work (if necessary) are obtained. 3.3. All equipment and hazardous materials are used in accordance with relevant OHS legislation, manufacturers' instructions and standard operating procedures. 3.4. All site-specific safety policies, safety signs, symbols and labels are correctly identified and understood. 3.5. Material safety data sheets are understood and applied. 3.6. Safe manual handling procedures (including equipment) are used. 3.7. Decanted chemicals and storage is to State/Territory dangerous goods and OHS legislation and requirements. 3.8. Housekeeping duties are performed according to standard operating procedures to maintain a safe working environment.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • undertaking risk assessment • communicating with others • performing proper manual handling techniques • interpreting safety signage, labelling and placarding
Required knowledge
Look for evidence that confirms knowledge of: • dangerous goods classification and labelling/placarding • testing, use and maintenance of PPE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• inherent hazardous properties of the chemicals to be used • interpretation of the relevant MSDS • basic fire fighting procedures • site-specific emergency plan procedures • chemical spill confinement procedures • dangerous occurrence (near miss) reporting procedures • hierarchy of control

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to work safely and efficiently with various chemicals.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with working safely with industrial chemicals and materials or other units requiring the exercise of the skills and knowledge covered by this unit.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Personal protective equipment	Personal protective may include appropriate: • goggles/face shields • respirators • air supplied or self-contained helmets • safety boots, gloves and appropriate clothes/garments
Safe working practices	• Environment is inspected • Hazards (and chemical reactive hazards) are assessed and controlled using hierarchy of hazard control • Properly maintained PPE is available • Emergency management plan is documented/understood

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• Work to be undertaken in safe 'thermal' environments and all possible ignition sources are to be identified and controlled
Storage	All storage containers (minor quantities and in consumer packages) are suitable for chemical exposure and are properly labelled and/or placarded. Chemical manifests are updated at completion of work activity
State or Territory legislative requirements	Appropriate OHS, dangerous goods acts and regulations, Australian standards, Australian Code for the Transport of Dangerous Goods by Road and Rail (ADGC), NOHSC codes of practice

MSL904002 Perform standard calibrations

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL904001 Perform standard calibrations. Foundation skills information added. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit of competency describes the skills and knowledge to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.

This unit applies to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil

Competency Field

Calibration

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare items for calibration**	1.1	Select the authorised calibration procedure in accordance with workplace procedures
		1.2	Identify hazards and use appropriate personal protective equipment (PPE), safety equipment and procedures
		1.3	Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure
		1.4	Assemble and set up specified reference standards and associated equipment prior to testing
		1.5	Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary
		1.6	Identify and minimise potential sources of measurement error
2	**Perform calibration**	2.1	Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement
		2.2	Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment)
		2.3	Adjust device under test to bring readings within specification and record data (as-left or after adjustment) where required
		2.4	Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results
		2.5	Seek appropriate advice when interpretation of results is outside authorised scope of approval
3	**Document results**	3.1	Estimate and document uncertainty of measurement in accordance with workplace procedures, where required

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	3.2	Document compliance/non-compliance with test requirements and/or specifications
	3.3	Record the results of each test/calibration accurately, unambiguously and objectively
	3.4	Ensure confidentiality of workplace information in accordance with workplace procedures
4 **Finalise calibration**	4.1	Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information
	4.2	Report any non-compliance and verify next course of action with supervisor
	4.3	Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in accordance with workplace procedures
	4.4	Store test equipment/measurement standards and results in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to:
  - perform calculations to give results in appropriate accuracy, precision and units
  - use statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL904001 Perform standard calibrations, Release 1.

Assessment Requirements for MSL904002 Perform standard calibrations

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL904001 Perform standard calibrations. Foundation skills information added. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely and accurately calibrated a minimum of 3 different items of test and/or measurement equipment from the following list:
  - balance
  - thermometer
  - thermocouple
  - pH meter
  - refractive index meter
  - viscosity meter
  - flow meter (including digital)
  - volumetric dispenser including auto-pipette (POVAs)
  - volumetric glass (once for life time)
  - spectrophotometer
  - incubator/oven/fridge
  - digestion block
  - biological safety cabinet
  - fume cupboard.

Calibrations must be carried out in accordance with standard calibration procedures and documented test methods.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures and applications
- National Association of Testing Authority's (NATA) and National Measurement Institute's (NMI) role in the measurement and testing system in Australia and registration/licensing requirements
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- Australian and international standards and codes covering requirements for the competence of testing and calibration laboratories
- standards imposed by regulatory and licensing bodies
- statistical analysis of quality control data, mean, median, mode, ranges and standard deviations
- hierarchy and appropriate selection of reference materials and instruments
- commonly used reference materials and working standards
- test equipment relevant to job role
- workplace procedures for:
  - non-conformance/non-compliance
  - equipment operation
  - calibration
  - troubleshooting for equipment and test methods
  - recording and reporting
  - handling, transport, storage and operation of reference and working standards
  - test methods and calibration (validated and authorised)
- different fields in which calibration work is conducted
- workplace and/or legal traceability requirements
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - specialised calibration/test equipment, reference standards and laboratory facilities
  - calibration methods, procedures and equipment specifications
  - workplace quality manual and procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL916010 Manage complex projects

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL916005 Manage complex projects. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to interpret complex technical briefs, determine project methodologies and resource requirements, establish project plans, manage projects to successful conclusions and evaluate project outcomes.

This unit applies to senior technical officers and laboratory supervisors working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil

Competency Field

Communication/organisation

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Interpret brief and design**	1.1 Interpret and confirm project objectives, deliverables, constraints and principal work activities

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	feasible project plan	1.2	Determine resource requirements, including personnel, equipment and materials, and access to operational systems
		1.3	Develop a detailed implementation plan for the project outlining methodology, milestones and budget
		1.4	Identify roles, responsibilities and required capabilities of project team members
		1.5	Analyse project plan and principal work activities to ensure compliance with relevant standards
		1.6	Develop risk management strategies and risk management plans to ensure successful and timely outcomes
		1.7	Secure project approval
2	**Establish and implement approved project plan**	2.1	Secure team members and brief them about the project and allocate roles and responsibilities, balancing job roles and skills development opportunities
		2.2	Secure necessary equipment, materials and access to operational systems
		2.3	Establish communication and reporting mechanisms
		2.4	Implement agreed time-management strategies to ensure milestones are met
		2.5	Apply agreed quality requirements to measure performance and outcomes
3	**Manage project**	3.1	Monitor and report progress of activities in relation to the project plan
		3.2	Ensure income and expenditure is in line with the agreed project plan and budget
		3.3	Work with the team to analyse and diagnose problems and to determine corrective actions

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	3.4	Make agreed variations to the plan to suit changing situations
	3.5	Maintain accurate records and communication with stakeholders and project team members
4 **Finalise project**	4.1	Ensure project objectives are met and deliverables are provided on time and within budget
	4.2	Complete all reporting requirements
5 **Evaluate project methodology**	5.1	Assess the effectiveness of resource management in delivering project outcomes
	5.2	Evaluate the effectiveness of communication processes used throughout the project
	5.3	Recommend improvements for future projects

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL916010 Manage complex projects

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL916005 Manage complex projects. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively managed at least 1 complex project to achieve objectives outlined in project plan, on time and within budget constraints.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how the project fits in with the laboratory's business goals and key performance indicators (KPIs)
- principles of project planning and management
- techniques for monitoring timelines, expenditure and team performance
- techniques for achieving effective communication and cooperation
- techniques for troubleshooting, problem solving and conflict resolution
- techniques for evaluation and continuous improvements
- reporting requirements
- types of complex projects that occur in a laboratory:
  - development or modification of products and services
  - acquisition and commissioning of new equipment or laboratory facilities
  - appraisal of supplies
  - development of applications for customers
  - validation of analytical methods and/or equipment
  - quality improvement or corrective action teams
  - restructuring of laboratory services
  - reclassification of staff and staffing levels

© Commonwealth of Australia, 2025 Skills Insight

- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - project management processes and procedures typically used by the workplace
  - sample business plans, project plans, budgets, reports and project management charts (e.g. GANTT)
- modelling of industry operating conditions, including:
  - interactions with laboratory work team.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL922001 Record and present data

Modification History

Release	Comments
Release 2	Unit codes updated in Assessment conditions. Equivalent outcome.
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 1.0.* Supersedes and is equivalent to MSL922001A Record and present data

Application

This unit of competency covers the ability to record and store data, perform simple calculations of scientific quantities and present information in tables and graphs. The unit of competency requires personnel to solve predictable problems using clear information or known solutions. Where alternatives exist, they are limited or apparent.

This unit of competency is applicable to production operators, field assistants and laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

essential outcomes.		demonstrate achievement of the element.	
1	**Record and check data**	1.1	Enter data into laboratory information system or record sheets as directed
		1.2	Check data to identify transcription errors or atypical entries
		1.3	Rectify errors in data using workplace procedures
2	**Calculate simple scientific quantities**	2.1	Calculate simple scientific quantities using given formulae and data
		2.2	Ensure calculated quantities are consistent with estimations and expectations
		2.3	Report all calculated quantities with appropriate precision and units
3	**Present data**	3.1	Present data accurately in tables, charts and graphs using given formats and scales
		3.2	Recognise and report obvious features and trends in data
4	**Store and retrieve data**	4.1	File and store data in accordance with workplace procedures
		4.2	Maintain workplace confidentiality standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance.

© Commonwealth of Australia, 2025 Skills Insight

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:

- relevant Australian and international standards, such as the international system of units (SI) and its application
- national measurement regulations and guidelines

Data

Data includes:

- worksheets, spreadsheets or databases linked to information management systems
- results of observations, tests and measurements, or surveys
- graphs, tables and control charts
- semi quantitative observations expressed on a scale e.g. 1 to 4 or + to ++++

Work health and safety (WHS) and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL922001 Record and present data

Modification History

Release	Comments
Release 2	Unit codes updated in Assessment conditions. Equivalent outcome.
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 1.0.* Supersedes and is equivalent to MSL922001A Record and present data

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accurately coding, checking, recording and storing data in the required format
- performing simple calculations involving scientific quantities, with or without a calculator or computer software. The following must be performed:
  - decimals, fractions, ratios, proportions and percentages
  - unit conversion, multiples and submultiples
  - use of significant figures, rounding off, estimation and approximation
  - substitution of data in formulae
  - conversions between SI units
  - performing at least five (5) of the following calculations:
  - perimeters
  - angles
  - areas (m^2) and volumes (mL, L, m^3) of regular shapes (e.g. packaging and moulds)
  - average mass, mass %, density, specific gravity, moisture, relative and absolute humidity
  - ratios, such as mass to mass, mass to volume and volume to volume percentages
  - industry specific ratios, such as g/cm^2 , kg/m^2
  - concentration (e.g. g/100mL, mg/L, mg/L)
  - dilution
  - statistical values, such as mean, median, mode and standard deviation
  - average count, colonies per swab surface and cell counts (live and dead/total)
  - process variables, such as pressure, velocity and flow rates

© Commonwealth of Australia, 2025 Skills Insight

    - % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
    - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability
- preparing and interpreting straightforward tables, graphs and charts of data
- recognising obvious features and trends in data, including:
    - maximum and minimum values
    - spread of data
    - increasing/decreasing data, rate of change
    - outliers, data beyond control limits or normal range
- presenting accurate results in the required format
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- concepts of metrology, including:
    - that all measurements are estimates
    - repeated measurements belong to a sample of the measured parameter
    - repeatability, precision, accuracy and significant figures
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and security of data

work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment, and assessment evidence must be relevant to the particular workplace context. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2025 Skills Insight

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in either case).
- This unit may be assessed with technical units, such as:
  - MSL973013 Perform basic tests
  - MSL973014 Prepare working solutions
  - MSL973019 Perform microscopic examination
- Holistic assessment methods include:
  - review of data worksheets, calculations, graphs and tables prepared by the candidate
  - review of records transcribed, maintained or stored by the candidate
  - feedback from supervisors and peers
  - observation of the candidate as they record data and perform calculations
  - questions to assess understanding of relevant procedures and trends in data.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - data sets and records
  - computer and relevant software or laboratory information system
  - relevant workplace procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience.
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL924003 Process and interpret data

Modification History

Release	Comments
Release 1	This version was released in M*SL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL924001 Process and interpret data. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to retrieve data, evaluate formulae and perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

This unit of competency applies to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Retrieve and check data**	1.1	Store and retrieve data using appropriate files and/or application software
		1.2	Verify the quality of data using workplace procedures
		1.3	Rectify errors in data using workplace procedures
2	**Calculate scientific quantities**	2.1	Calculate statistical values for given data
		2.2	Calculate scientific quantities using given formulae and data and estimate uncertainties
		2.3	Ensure calculated quantities are consistent with estimations and expectations
		2.4	Report all calculated quantities using the appropriate units and correct number of significant figures
3	**Present data**	3.1	Present data in clearly labelled tables, charts and graphs
		3.2	Graph data using appropriate scales to span the range of data or display trends
		3.3	Report all data using the appropriate units and number of significant figures
4	**Interpret data**	4.1	Interpret significant features of tables, charts and graphs, including gradients, intercepts, maximum and minimum values, and limit lines
		4.2	Recognise and report trends in data
5	**Keep accurate records**	5.1	Transcribe information accurately
		5.2	Verify the accuracy of records following workplace procedures

Assessment Requirements for MSL924003 Process and interpret data

Modification History

Release	Comments
Release 1	This version was released in M*SL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL924001 Process and interpret data. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- processed and interpreted different data sets
- calculated scientific and statistical quantities with or without a calculator or computer software, including the following items:
  - converting units involving multiples and submultiples
  - scientific notation, significant figures, round off, estimate and approximate
  - transposing and evaluating formulae
  - fractions, decimals, proportions and percentages
  - mean
  - median
  - mode
  - standard deviation
- performed at least 5 of the following calculations:
  - perimeters and angles
  - percentage and absolute uncertainties in measurements and test results
  - areas (m^2) and volumes (mL, L, m^3) of regular shapes, such as packaging
  - dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability
  - ratios, such as mass to mass, mass to volume and volume to volume percentages
  - concentration, such as molarity, g/100mL, mg/L, mg/L, ppm, ppb, dilution mL/L
  - average count, colonies per swab surface and cell counts, such as live and dead/total
  - process variables, such as pressure, gauge pressure, velocity and flow rates

© Commonwealth of Australia, 2025 Skills Insight

    - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability, % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
    - mechanical properties, such as stress, strain, moduli and force
    - presenting accurate results in the required format (significant figures, uncertainty units)
- prepared and presented data in the at least 5 of the following formats:
    - tables
    - graphs
    - line graphs
    - histograms
    - pie charts, bar charts and control charts
    - semi-quantitative observations expressed on a scale: 1 to 4 or + to ++++
- recognised and interpreted significant points, anomalies and trends in data.

Knowledge Evidence

- There must be evidence the candidate has knowledge of:
- concepts of metrology, including:
    - that all measurements are estimates
    - repeatability, precision, accuracy and significant figures
    - sources of error, and uncertainty associated with measurement steps
    - traceability
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- workplace procedures for:
    - coding, entering, storing, retrieving and communicating data
    - verifying data and rectifying mistakes
    - maintaining and filing records, and maintaining security of data
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - data sets and records
    - a calculator
    - spreadsheets, computer software, databases and statistical packages
    - computer and relevant software or laboratory information system
    - relevant workplace procedures.

MSL925004 Analyse data and report results

Modification History

Release	Comments
Release 1	This version was released *in MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL925001 Analyse data and report results. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to perform scientific calculations, analyse trends and uncertainty in data and report results within the required timeframe.

This unit of competency applies to technical officers and laboratory technicians working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL924003 Process and interpret data

Competency Field

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Perform scientific calculations**	1.1	Ensure raw data are consistent with expectations and reasonable ranges
		1.2	Calculate scientific quantities involving algebraic, power, exponential and/or logarithmic functions
		1.3	Ensure calculated quantities are consistent with estimations
		1.4	Present results using the appropriate units, uncertainties and number of significant figures
2	**Analyse trends and relationships in data**	2.1	Determine linear and non-linear relationships between sets of data
		2.2	Prepare and analyse control charts to determine if a process is in control
		2.3	Identify possible causes for out-of-control condition
		2.4	Follow workplace procedures to return process to in-control operation
3	**Determine variation and/or uncertainty in data distributions**	3.1	Organise raw data into appropriate frequency distributions
		3.2	Calculate means, medians, modes, ranges and standard deviations for ungrouped and grouped data
		3.3	Interpret frequency distributions to determine the characteristics of the sample or population
		3.4	Calculate standard deviations and confidence limits for means and replicates
		3.5	Estimate the uncertainty in measurements using statistical analysis
		3.6	Determine data acceptability using statistical tests and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
4	**Check for aberrant results**	4.1	Identify results that cannot be reconciled with sample, sample documentation, testing procedures and/or expected outcomes
		4.2	Determine appropriate actions in consultation with supervisor
5	**Report results**	5.1	Use charts, tables and graphs to present results in the required format
		5.2	Verify that entry of data and results are correct
		5.3	Prepare reports and records in a format and style consistent with their intended use and workplace guidelines
		5.4	Communicate results within the specified time and in accordance with workplace confidentiality and security guidelines

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Oral communication skills to interact effectively with others.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for MSL925004 Analyse data and report results

Modification History

Release	Comments
Release 1	This version was released *in MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL925001 Analyse data and report results. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- calculated scientific quantities of laboratory data, including at least five 4 of the following:
  - percentage and absolute uncertainties in measurements and test results
  - pH, [H+], [OH-], buffer calculations
  - Ka, pKa, Kb, pKb and Kw
  - solubility constants Ks and pKs
  - radioactivity (half life, dose, activity and exposure)
  - optical properties (absorbance/transmittance, path length, extinction coefficient, concentration (Beers law) and detection limits)
  - electrical properties (conductivity, resistivity and dielectric constants)
  - mechanical properties (stress, strain, elastic moduli, yield strength and hardness)
  - thermal properties (heat capacity, thermal expansion, thermal conductivity and thermal resistance)
  - food content (%) of water, ash, dietary and crude fibre, carbohydrate, protein, fat and specific vitamin
  - quantities associated with quality control monitoring, assessment and reporting
- used and interpreted statistical analysis and significance tests of laboratory data including at least 4 of the following:
  - mean, median, mode, range, variance and standard deviation
  - measures of central tendency and dispersion
  - histograms, frequency plots, stem and leaf plots, boxplots and scatter plots
  - probability and normal probability plots

© Commonwealth of Australia, 2025 Skills Insight

  - Pareto diagrams, Shewhart control charts and CuSum control charts
  - regression methods for calibration, linearity checks and comparing analytical methods
  - data acceptability tests, such as Q, T and Youden
  - t-test, f-test, analysis of variance (ANOVA)
- used and interpreted graphical analysis of laboratory data including at least 3 of the following:
  - preparation and interpretation of linear, semi-log and log-log graphs
  - determination of linear, logarithmic, exponential and power relationships
  - regression lines and interpretation of correlation coefficients
  - preparation of frequency distributions for given data
  - preparation of complex control charts.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- scientific and technical terminology: variables, dispersion, central tendency, process control, process stability, normal distribution, confidence level and replication
- the characteristics of a valid measurement
- relevance/importance of the national measurement legislation and guidelines to laboratory measurement
- sources and estimates of uncertainty in measurements
- workplace procedures for:
  - data traceability
  - verifying data and rectifying mistakes
  - maintaining and filing records, and maintaining security of data
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - data sets and records
  - calculator
  - computer and relevant software, including spreadsheets, databases and statistical packages or laboratory information system
  - relevant workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL933005 Maintain the laboratory/field workplace fit for purpose

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL933001 Maintain the laboratory/field workplace fit for purpose. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to clean laboratory work surfaces, clean and store laboratory equipment and monitor laboratory stocks under direct supervision.

This unit of competency applies to laboratory assistants and instrument operators working in all industry sectors. It forms a major part of the work of laboratory assistants, who work in accordance with work instructions and standard operating procedures (SOPs) which incorporate all relevant aspects of work health and safety (WHS) legislation and the codes, guidelines, regulations and Australian Standards applying to environmental hazards and dangerous goods.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Clean work preparation areas**	1.1	Clean preparation areas using appropriate cleaning agents and equipment according to workplace procedures
		1.2	Remove spillages using appropriate agents, personal protective equipment (PPE) and workplace procedures
		1.3	Collect and segregate wastes in accordance with workplace procedures, relevant codes and regulations
2	**Clean and store equipment**	2.1	Collect used equipment, inspect for faults and, where necessary, remove from service
		2.2	Use appropriate agents, apparatus and techniques to clean equipment
		2.3	Store clean equipment in the designated locations and manner
3	**Monitor stocks of materials and equipment**	3.1	Perform stock checks and maintain records of usage as directed
		3.2	Store labelled stocks for safe and efficient retrieval
		3.3	Inform appropriate personnel of impending stock shortages to maintain continuity of supply
4	**Maintain a safe work environment**	4.1	Use established safe work practices and PPE to ensure personal safety and that of other personnel
		4.2	Report potential hazards and/or maintenance issues in own work area to designated personnel
		4.3	Minimise the generation of waste and environmental impacts
		4.4	Dispose of waste in accordance with workplace procedures, relevant codes and regulations

Assessment Requirements for MSL933005 Maintain the laboratory/field workplace fit for purpose

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL933001 Maintain the laboratory/field workplace fit for purpose. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- appropriately cleaned laboratory work surfaces on 2 occasions
- cleaned 2 items of laboratory/field equipment
- monitored stocks of a workplace at least 2 separate occasions
- maintained a safe work environment.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant hazards, work health and safety (WHS) requirements
- workplace procedures for:
  - the cleaning of work preparation areas, materials and equipment
  - minimisation and disposal of waste
  - monitoring of laboratory stocks
- typical equipment used in a laboratory
- typical materials used in a laboratory
- typical hazards and risks presented in a laboratory
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and WHS requirements specific to the work task.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work preparation areas, stocks, materials and equipment, cleaning, decontamination and/or disinfection agents and equipment
  - personal protective equipment (PPE).

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Perform set-up and pre-use checks of laboratory equipment**	1.1	Perform laboratory equipment set-up and pre-use checks in accordance with workplace procedures
		1.2	Perform safety checks in accordance with relevant workplace and instrumental procedures
		1.3	Identify faulty or unsafe components and equipment and report to appropriate personnel
		1.4	Complete equipment log books/records to meet workplace requirements
2	**Perform calibration checks**	2.1	Start up equipment according to operating procedures
		2.2	Use specified standards for calibration check
		2.3	Check equipment in accordance with calibration procedures and schedules
		2.4	Record all calibration data accurately and legibly
		2.5	Compare data with specifications and/or previous records to identify non-compliant equipment
		2.6	Quarantine out-of-calibration equipment
3	**Assist with equipment maintenance**	3.1	Ensure all equipment work areas are clean during and after equipment use
		3.2	Perform basic maintenance in accordance with workplace procedures
		3.3	Clean and store equipment according to workplace and/or manufacturer's specifications/procedures
		3.4	Identify and replace, repair or dispose of damaged/worn equipment
4	**Maintain records**	4.1	Record maintenance details
		4.2	Report information on unsafe or faulty equipment

Assessment Requirements for MSL933008 Perform calibration checks on equipment and assist with its maintenance

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL933004 Perform calibration checks on equipment and assist with its maintenance. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- accurately performed set-up, pre-use and calibration checks for at least 2 different items of laboratory equipment using standard procedures
- performed appropriate cleaning and maintenance tasks for at least 2 different items of laboratory equipment.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- role and importance of regular calibration checks and maintenance of laboratory equipment
- function of key components of the laboratory equipment and details of the pre-use, calibration and safety checks and operating procedures for items of equipment used
- sources of uncertainty in laboratory equipment operation and their control
- basic equipment used for cleaning and maintaining laboratory equipment
- common sources of faults in the instruments or equipment used and details of their repair
- basic cleaning, maintenance and storage procedures for items of equipment used
- workplace procedures for recording calibration data and reporting results, communicating with service agents and suppliers and ordering stocks
- relevant hazards, work health and safety (WHS) and environmental management, and control measures
- good laboratory practice (GLP)
- legal and ethical requirements specific to the work task.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - standard laboratory equipped with appropriate equipment and reference materials; cleaning, decontamination and/or disinfection agents and equipment; and personal protective equipment (PPE)
  - workplace procedures, equipment manuals and information/records management system.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL934007 Maintain and control stocks

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL934003 Maintain and control stocks. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to order, maintain and control the use of laboratory materials and/or equipment in the work area.

This unit of competency applies to technicians and technical officers working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil

Competency Field

Quality

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Maintain and control stocks of**	1.1 Label, document and store stocks in accordance with relevant standards and specific safety requirements

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	materials or equipment	1.2	Follow stock rotation procedures to maximise use of stocks within permitted shelf life
		1.3	Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level
		1.4	Identify and replace damaged/worn equipment or arrange for repairs or disposal
		1.5	Visually check condition of stock and expiry dates and report to relevant personnel
2	**Order and receive materials and equipment**	2.1	Determine requirements of customers and suppliers using appropriate communication and interpersonal skills
		2.2	Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions
		2.3	Place and/or follow up approved orders using workplace systems and procedures
		2.4	Check condition of received goods and take appropriate action
3	**Maintain stock records**	3.1	Record all relevant details accurately using the specified forms/computer system
		3.2	Ensure that written information is legible and indelible
		3.3	File all records in the designated place
4	**Maintain a safe work environment**	4.1	Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
		4.2	Minimise the generation of wastes and environmental impacts
		4.3	Ensure the safe collection of redundant/outdated stocks

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	for subsequent disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL934007 Maintain and control stocks

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL934003 Maintain and control stocks. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively maintained stocks of materials and equipment at prescribed levels for the work area, within 2 different seasonal variations in stock usage.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- terminology associated with ordering and storage of stocks
- laboratory stock, product and service information relevant to job role
- workplace procedures for:
  - ordering, purchase and receipt of stocks
  - verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes)
  - organisation of compatible batch or lot numbers
  - storage of stocks, stock control and rotation of stock
  - monitoring of use by dates of standards and shelf life of reagents
  - recording and reporting
  - reporting non-conformances
- quality system requirements for stock control
- customer database and supplier catalogues, customer-specific requirements/standards, internal/external stock orders and overdue actions
- codes of practice and regulations concerning the labelling, handling, storage and transport of stock relevant to job role
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - stocks of materials and equipment
  - stock order forms and documentation
  - online information systems, inventories, print records, databases and catalogues
  - codes of practice and regulations concerning the handling, storage and transport of the stock.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL935005 Authorise the issue of test results

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to *MSL935003 Authorise the issue of test results*. Conditional/optional prerequisite removed. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to critically assess the accuracy of data and validity of test results prior to formally authorising their release to the client. It involves the statistical analysis of data and information generated during calibration, sampling and testing to determine whether quality and/or process parameters have been achieved. Personnel are required to investigate and, if necessary, rectify results that are not consistent with expected values.

This unit applies to laboratory personnel working in all industry sectors who are approved by their organisation to authorise the results obtained for specific test methods. In many instances, these personnel are known as 'signatories' or 'delegates' for the tests involved. The scope of tests authorised in each case will be determined by the specialised knowledge, technical competence and experience of the personnel involved.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL925004 Analyse data and report results

© Commonwealth of Australia, 2025 Skills Insight

Competency Field

Quality

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Verify the accuracy of data and technical records**	1.1	Access relevant job instructions, data and technical records in laboratory information management system (LIMS)
		1.2	Confirm that technical records provide sufficient information to ensure traceability for the tests involved
		1.3	Compare data with expected values and identify any outliers
		1.4	Inspect data records to check the integrity of data entry, alterations, transfers and calculations
		1.5	Correct and initial any incorrect data records
		1.6	Sign off data records as correct
2	**Determine if results are acceptable and within expectation**	2.1	Compare results with expected values and identify any significant differences
		2.2	Check the reliability of results by examining data, statistical analysis of data and results from repeat tests or duplicate samples
		2.3	Assess the significance of any documented observations of atypical test conditions or environment and/or sample appearance
		2.4	Check that all calculations are free from error
		2.5	Check that estimates of uncertainty are reasonable and consistent with the test method, client and/or product specification requirements
		2.6	Authorise the issue of results that meet the organisation's quality standards and are consistent with expectations

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
3	**Investigate unexpected or unacceptable results**	3.1 Examine records of pre-use checks and calibration performance to ensure that the equipment and/or instruments used meet test specifications and workplace requirements
		3.2 Establish whether human and/or environmental factors could have affected the reliability of results
		3.3 Check for obvious sources of interferences that may have occurred during measurements
		3.4 Retrieve stored samples (if available) and assess whether they are atypical or contaminated
		3.5 Perform control tests using the same, or new, samples to check unexpected results
		3.6 Authorise the issue of unexpected results that meet the organisation's quality standards
		3.7 Identify possible root causes of unacceptable results and appropriate preventative/corrective actions
		3.8 Report investigation outcomes and recommendations for improvements in accordance with workplace procedures
4	**Liaise with clients about results**	4.1 Establish whether sampling procedures used by the client could contribute to unexpected/unacceptable results
		4.2 Arrange for new samples and/or re-testing as necessary
		4.3 Explain investigation outcomes and confidence level for unexpected test results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Skills Insight

- Oral communication skills to recommend appropriate preventative/corrective actions to control potential/actual non-conforming work
- Numeracy skills to:
  - use statistical tests to estimate uncertainties and determine data acceptability
  - recognise unexpected or unacceptable data and results and then
  - rectifying results that are not consistent with expected values
- Problem-solving skills to use effective strategies to investigate unexpected occurrences in a logical and efficient manner.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Equivalent to MSL935003 Authorise the issue of test results, Release 1.

Assessment Requirements for MSL935005 Authorise the issue of test results

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to *MSL935003 Authorise the issue of test results*. Conditional/optional prerequisite removed. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- verified the accuracy and completeness of at least 1 set of data, results and technical records for specified tests
- issued at least 1 set of specified test results in accordance with authorisation and workplace procedures
- reviewed at least 1 set of records of sampling, sample preparation, testing and/or calibration activities to identify potential causes of unacceptable data/results.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for authorising the issue of specified test results
- relevant reporting requirements, such as the ISO Guide to the Expression of Uncertainty in Measurement, National Association of Testing Authorities (NATA) and/or test methods
- the confidence level required according to the National Measurement Act 1960 (e.g. 95% for most applications, but it may be higher)
- scientific and technical knowledge of the samples, procedures, equipment, materials and instrumentation used to generate the specified test results and data
- statistical tests used to estimate uncertainties and determine data acceptability
- estimates of uncertainty
- expected values for data and results and the uncertainty components for specified test methods

© Commonwealth of Australia, 2025 Skills Insight

- common sources of interference, human and environmental factors, sample preparation problems and relevant preventative/corrective actions associated with specified test result
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - sampling and test methods, description of test set-up, data sets, results and technical records
  - calculator
  - spreadsheets and databases
  - computer, relevant software or laboratory information system
  - workplace quality procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL935006 Assist in the maintenance of reference materials

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL935002 Assist in the maintenance of reference materials. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to assist in the maintenance of reference materials that can be used in tests and the identification of new specimens as part of quality control of laboratory procedures. The unit of competency does not cover the scientific identification of species or specimens.

This unit applies to technical officers and laboratory technicians working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Acquire reference materials**	1.1	Confirm that required transit conditions were maintained
		1.2	Apply quarantine or isolation arrangements as necessary
		1.3	Record data of accessioned reference material in the collection database
		1.4	Label material to ensure that its identity is maintained during storage and issue
2	**Maintain reference materials**	2.1	Monitor storage conditions to ensure that they comply with suppliers' warranty specifications
		2.2	Monitor storage conditions to ensure materials remain true to specification
		2.3	Test material during storage and before release to report on reference characteristics and specificity
		2.4	Report findings that suggest reference specimens may be deteriorating
3	**Dispense reference materials to clients**	3.1	Verify requests with supervisor before requests for reference materials are processed
		3.2	Supply reference material without contamination of stock material
		3.3	Keep records of materials issued in accordance with workplace procedures
4	**Maintain a safe work environment**	4.1	Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
		4.2	Follow safety protocols when handling and processing reference materials
		4.3	Minimise the generation of wastes and environmental impacts

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.4 Ensure the safe collection of redundant/outdated stocks for subsequent disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Oral communication skills to interact appropriately and effectively with customers.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for MSL935006 Assist in the maintenance of reference materials

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL935002 Assist in the maintenance of reference materials. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely and effectively maintained 2 different reference materials so that their reference characteristics and attributes are stable in storage and manifest in use after retrieval.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the nature and purpose of certified reference materials (i.e. what they are, when and why they should be used)
- the storage requirements of biological and non-biological materials
- quarantine or isolation procedures relevant to work area
- the labile nature of chemical and biological materials
- reasons for testing before accession and before issuing reference materials
- relevant reference materials
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment and materials related to the workplace task for which the reference material is relevant

© Commonwealth of Australia, 2025 Skills Insight

- reference materials
- standard operating procedures (SOPs).

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL952002 Handle and transport samples or equipment

Modification History

Release	Comments
Release 2	Unit codes in Assessment Conditions updated. Equivalent outcome.
Release 1	Supersedes and is equivalent to MSL952002A Handle and transport samples or equipment.

Application

This unit of competency covers the ability to pick up and transport samples or test/calibration equipment in a way that ensures the integrity of subsequent test results.

This unit of competency is applicable to couriers and laboratory and field assistants in all industry sectors. The person transporting the items is not necessarily responsible for sampling or testing. This unit does not cover sample collection or the ability to handle and transport animals as might be defined under prevailing animal care and ethics legislation and practices.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Prepare for pickup**	1.1	Confirm pickup sequence and any licence or permit requirements with supervisor
		1.2	Check that vehicle and communication devices are in working order
		1.3	Check that required transport containers and materials are in the vehicle
2	**Pick up and transport items**	2.1	Confirm the number and nature of items to be picked up on arrival
		2.2	Ensure items match documentation
		2.3	Apply workplace requirements to the transport of samples and/or equipment
		2.4	Alert laboratory personnel to any special needs that are identified on documents accompanying the items
		2.5	Complete required documentation at pickup point
		2.6	Stow items in the specified transport containers and under the required conditions
		2.7	Maintain sample integrity at all times
		2.8	Deliver items to reception point in accordance with workplace procedures
		2.9	Maintain confidentiality of information
3	**Maintain transport equipment**	3.1	Maintain vehicle according to workplace requirements
		3.2	Maintain state of transport containers to ensure they are fit for purpose
		3.3	Requisition stocks of consumable materials as required
		3.4	Replenish stocks of collecting equipment at collection centres as required
4	**Maintain a safe work**	4.1	Use established work safety practices and personal protective equipment (PPE) to ensure personal safety

© Commonwealth of Australia, 2025 Skills Insight

environment		and that of others
	4.2	Clean up spills, if they occur, using workplace procedures
	4.3	Minimise the generation of waste
	4.4	Dispose of all waste in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory safety; quality management and environmental management; and labelling, storage, transport and disposal of hazardous materials
- national work health and safety (WHS) standards and codes of practice, and national environmental protection measures
- specific codes, guidelines and procedures, such as Australian Dangerous Goods Code, Australia Post Guides and International Air Transport Association (IATA) Regulations
- workplace documents, such as standard operating procedures (SOPs); material safety data sheets (MSDS); safety procedures for specific materials and equipment; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; spillage and waste containment and disposal protocols; maps and site plans; protocols regarding customer liaison and use of communication devices; vehicle log books and incident/accident report forms

© Commonwealth of Australia, 2025 Skills Insight

Workplace requirements for the transport of samples and/or equipment

Workplace requirements for the transport of samples and/or equipment include, but are not limited to, one or more of:

- using appropriate sample containers (glass, plastic and opaque) and preservatives
- using appropriate sample and equipment boxes (insulated, shockproof and waterproof)
- wrapping containers in foil to exclude light
- using temperature control, which may involve prevention of direct contact between the sample and coolant
- restraining containers to prevent movement
- checking sample viability during transport while avoiding unnecessary handling

Work safety procedures

Work safety procedures include, but are not limited to, one or more of:

- using safe vehicle driving practices
- handling, labelling and storing hazardous material and equipment in accordance with labels, MSDS, manufacturer instructions and workplace procedures and regulations, and signage
- using PPE
- regular cleaning and/or decontamination of equipment and vehicle
- containing and cleaning up spillage or breakages
- using appropriate techniques and equipment to safely dispose of waste materials

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL952002 Handle and transport samples or equipment

Modification History

Release	Comments
Release 2	Unit codes in Assessment Conditions updated. Equivalent outcome.
Release 1	Supersedes and is equivalent to MSL952002A Handle and transport samples or equipment.

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
- planning the pickup of items in conjunction with a supervisor on at least one (1) occasion
- safely picking up and transporting samples or test/calibration equipment on at least two (2) occasions in a way that ensures the integrity of subsequent test results
- checking that the vehicle, transport containers and materials, and communication devices are present and fit for purpose prior to departure
- using communication devices to maintain contact between the courier, reception centre and routine pickup locations
- communicating effectively and courteously with individuals, customers, clients and reception staff
- maintaining confidentiality and reporting problems, accidents and incidents in accordance with procedures
- recording details of item exchange in relevant sections of chain of custody forms, as required
- maintaining stocks of consumables and collecting equipment at collection centres, as required
- cleaning up spills, if they occur, and minimising and disposing of waste in accordance with workplace procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- need for appropriate and timely transport and the importance of effective communication with clients and customers to workplace business
- nature of samples and/or equipment transported and the effects of changes in environmental conditions, vibration and shock on them
- control measures for minimising exposure to hazardous materials and equipment

© Commonwealth of Australia, 2025 Skills Insight

- procedures for safe, efficient containment and clean up of spillages and breakages and their disposal
- maintenance requirements of vehicle and equipment used in the handling and transporting samples and equipment
- workplace procedures for responding to emergencies
- relevant hazards, work health safety (WHS) and environment requirements

Additional knowledge requirements will apply for different industry sectors. For example for biomedical samples:

- labile nature of biological and environmental samples
- possible infectivity of biological materials
- effects of exposure to radioactive materials.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
  - MSL943004 Participate in laboratory or field workplace safety
- Holistic assessment methods include:
  - review of the candidate's job sheets or logs of completed activities
  - review of the quality of results traceable to the transport of samples or equipment by candidate
  - feedback from supervisors, other laboratory personnel and customers about the candidate's ability to communicate effectively and safely handle and transport samples and equipment in accordance with workplace procedures and schedules
  - direct observation of the candidate's work as a courier
  - oral or written questions to assess knowledge of workplace requirements for the handling and transport of samples and equipment
  - simulated role plays covering interactions between a courier and personnel at a reception desk or customer pickup centre.

© Commonwealth of Australia, 2025 Skills Insight

- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - transport vehicle, containers for transporting samples and test/calibration equipment, and communication devices
  - workplace protocols and procedures covering the handling and transport of samples or equipment.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience.
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL953003 Receive and prepare samples for testing

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL953001 Receive and prepare samples for testing. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to log samples, check sample documentation, and schedule and prepare samples for testing in accordance with workplace procedures. This unit does not include testing, tissue processing or similar techniques.

This unit of competency applies to field and laboratory assistants in all industry sectors who receive and prepare samples as part/all of their job in a sample reception area.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

			at workplace
		1.2	Check and match samples with request forms before they are accepted
		1.3	Enter details of samples into the laboratory information management system (LIMS)
		1.4	Apply required document tracking procedures
		1.5	Process 'urgent' test requests according to workplace requirements
		1.6	Ensure security and traceability of all information, laboratory data and records
2	**Address client and customer service issues**	2.1	Report to referring client/supervisor when samples and request forms do not comply with workplace requirements
		2.2	Maintain confidentiality of all client/workplace data and information
		2.3	Ensure that information provided to customers is accurate, relevant and authorised for release
		2.4	Deal with customers politely and efficiently and in accordance with workplace procedures
3	**Prepare samples for testing**	3.1	Perform physical separation of the samples, as required
		3.2	Prepare the required number of sub-samples
		3.3	Perform chemical separation of the samples, as required
		3.4	Place samples in appropriate transport media, as required
		3.5	Monitor and control sample conditions before, during and after processing

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
4	**Distribute samples**	4.1 Group samples requiring similar testing requirements 4.2 Distribute samples to workstations maintaining sample integrity 4.3 Distribute request forms for data entry or filing in accordance with workplace procedures 4.4 Check that samples and relevant request forms have been received by laboratory personnel
5	**Maintain a safe work area and environment**	5.1 Apply safe work practices to ensure personal safety and that of other laboratory personnel 5.2 Use appropriate personal protective equipment (PPE) to ensure personal safety when sampling, processing, transferring or disposing of samples 5.3 Report all accidents and spillages to supervisor 5.4 Clean up splashes and spillages immediately using appropriate techniques and precautions 5.5 Minimise the generation of wastes and environmental impacts 5.6 Ensure the safe disposal of hazardous materials and other laboratory wastes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Writing skills to accurately label samples.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for MSL953003 Receive and prepare samples for testing

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL953001 Receive and prepare samples for testing. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely received and registered at least 10 samples into a laboratory information management system LIMS (or simulated to reflect an actual LIMS), checking samples for history, acceptable transport conditions and complete documentation
- appropriately prepared at least 3 different types of samples for testing in accordance with workplace procedures, including:
  - accurately labelling, preparing, sub-sampling and storing samples to maintain sample integrity and traceability.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for the receipt, labelling, preparation, processing, documentation, distribution and storage of samples used in job role
- requirements of specified sample types for specific tests handled in job role
- potentially hazardous and unstable nature of samples
- importance of maintaining effective customer relations
- importance of and requirements for sample storage and transport to maintain sample integrity
- preparation processes for samples
- sample preparation equipment used in job role
- commonly identified non-conformances identified during sample reception and processing
- safe work practices that must be followed:

© Commonwealth of Australia, 2025 Skills Insight

  - handling, and storing hazardous materials and equipment in accordance with labels, (safety data sheets) SDS, manufacturer instructions, and workplace procedures and regulations
  - labelling of reagents and hazardous materials correctly
  - regularly cleaning and/or decontaminating equipment and work areas
  - using PPE, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all client information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a laboratory information management system (LIMS) system (or simulated to reflect an actual LIMS), and workplace procedures covering the receipt and preparation of samples for testing
  - sample containers, tubes, request forms and sample documentation
  - simulated samples when authentic samples are unavailable or inappropriate.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL954004 Obtain representative samples in accordance with sampling plan

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL954001 Obtain representative samples in accordance with sampling plan. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to obtain a range of samples that are representative of the source material and to prepare the samples for testing. All sampling activities are conducted in accordance with a defined sampling plan. This unit does not cover the subsequent testing of the samples.

This unit of competency applies to laboratory technicians in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Sampling

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for sampling**	1.1	Confirm the sampling location, number and type of samples, and timing and frequency of sampling from workplace or client's sampling plan
		1.2	Liaise with relevant personnel to arrange site access and all necessary clearances and/or permits as required
		1.3	Select sampling equipment and conditions to achieve representative samples and preserve sample integrity during collection, storage and transit
		1.4	Check that all procedures are in accordance with client or workplace requirements, relevant standards and codes
		1.5	Identify site and sampling hazards and review workplace safety procedures
		1.6	Assemble and check all sampling equipment, materials, containers and safety equipment
		1.7	Arrange suitable transport to, from and around site as required
2	**Conduct sampling and log samples**	2.1	Locate sampling sites
		2.2	Conduct representative sampling in accordance with sampling plan and defined procedures
		2.3	Record all information and label samples in accordance with traceability requirements
		2.4	Record environment or production conditions and any atypical observations made during sampling that may impact on sample representativeness or integrity
		2.5	Transport all samples back to base according to standard operating procedures (SOPs) and relevant codes
3	**Prepare samples for testing**	3.1	Prepare sub-samples and back-up sub-samples that are representative of the source
		3.2	Label all sub-samples to ensure traceability and store in

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
			accordance with SOPs
		3.3	Follow defined preparation and safety procedures to limit hazard or contamination to samples, self, work area and environment
		3.4	Distribute sub-samples to defined workstations maintaining sample integrity and traceability requirements
4	**Address client issues**	4.1	Enter approved information into laboratory information management system (LIMS), as required
		4.2	Report all relevant aspects of the sampling and preparation phases in accordance with workplace procedures
		4.3	Ensure that information provided to client is accurate, relevant and authorised for release
		4.4	Maintain security and confidentiality of all client/workplace data and information
5	**Maintain a safe work environment**	5.1	Clean all equipment, containers, work area and vehicles according to workplace procedures
		5.2	Check serviceability of all equipment before storage
		5.3	Use defined safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other personnel
		5.4	Minimise the generation of wastes and environment impacts
		5.5	Ensure the safe collection of all hazardous wastes for appropriate disposal

Assessment Requirements for MSL954004 Obtain representative samples in accordance with sampling plan

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL954001 Obtain representative samples in accordance with sampling plan. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- obtained samples from at least 3 different sampling points, that are representative of the source material and taken in accordance with a sampling plan.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles of representative sampling, including:
  - representative samples
  - preservation of integrity of samples
  - maintaining identification of samples relative to their source, workplace and legal traceability
  - cost-effectiveness of sampling
  - consistency of sampling procedures
- function of key sampling equipment/materials and principles of operation
- sampling principles, including random, systematic and stratified sampling
- characteristics of product/materials sampled as part of job role and likely contaminants
- methods to maintain the integrity of samples
- maps and site plans
- links between quality control, quality assurance, quality management systems and sampling procedures
- site and sampling hazards and the links between following WHS procedures and personal and environmental safety, particularly at high risk sites
- workplace and/or legal traceability requirements

© Commonwealth of Australia, 2025 Skills Insight

- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - source material
  - a variety of sample types
  - sampling plans and procedures, sampling containers and sampling equipment, and sample preparation materials and equipment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973013 Perform basic tests

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973001 Perform basic tests. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to prepare samples and perform tests and measurements using standard methods with access to readily available advice from supervisors.

This unit of competency applies to laboratory/field assistants working in all industry sectors. In general, they do not calibrate equipment and make only limited adjustments to the controls. They do not interpret or analyse results or troubleshoot equipment problems.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Interpret test requirements**	1.1	Review test request to identify samples to be tested, test method and equipment involved
		1.2	Identify hazards and workplace controls associated with the sample, preparation methods, reagents and/or equipment
2	**Prepare sample**	2.1	Record sample description, compare with specification, record and report discrepancies
		2.2	Prepare sample in accordance with appropriate standard methods
3	**Check equipment before use**	3.1	Set up test equipment in accordance with test method
		3.2	Perform pre-use and safety checks in accordance with workplace procedures and manufacturer instructions
		3.3	Identify faulty or unsafe equipment and report to appropriate personnel
		3.4	Check calibration status of equipment and report any out-of-calibration items to appropriate personnel
4	**Perform tests on samples**	4.1	Identify, prepare and weigh or measure sample and standards to be tested
		4.2	Conduct tests in accordance with workplace procedures
		4.3	Record data in accordance with workplace procedures
		4.4	Perform calculations on data as required
		4.5	Identify and report out of specification or atypical results promptly to appropriate personnel
		4.6	Shut down equipment in accordance with operating procedures
5	**Maintain a safe work environment**	5.1	Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
		5.2	Minimise the generation of wastes and environmental impacts
		5.3	Ensure safe disposal of laboratory and hazardous wastes

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	5.4 Clean, care for and store equipment and reagents as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to calculate simple quantities using appropriate equations, units, uncertainties and precision

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for MSL973013 Perform basic tests

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973001 Perform basic tests. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared samples using different processes
- performed at least 3 basic tests or measurements using standard methods and procedures.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concepts of metrology, including:
  - all measurements are estimates
  - measurements belong to a population of measurements of the measured parameters
  - precision, accuracy and significant figures
  - sources of error, uncertainty and repeatability
  - traceability
- international system of units (SI)
- purpose of tests performed as part of job role and principles of the standard methods/specifications used
- sample preparation processes relevant to job role
- typical basic tests and methods relevant to job role
- measurements used for typical tests
- function of key components of the test equipment, pre-use equipment and safety checks
- sources of uncertainty in measurement and methods for control
- workplace and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations
- procedures for recognising and reporting of unexpected or unusual results
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory equipped with basic test equipment, common measuring instruments, materials, standard methods, workplace procedures, SDS and equipment manuals.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973014 Prepare working solutions

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973002 Prepare working solutions. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to prepare working solutions and to check that existing stocks of solutions are suitable for use. Working solutions include those required to perform laboratory tests. Personnel are required to calculate quantities and make dilutions.

This unit of competency applies to laboratory assistants working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Assessment Requirements for MSL973014 Prepare working solutions

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973002 Prepare working solutions. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely prepared at least 5 examples of correctly labelled working solutions, including calculation of the quantities involved and any dilutions required
- checked existing stocks of working solutions and identified those unfit for use.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concepts of metrology, including:
  - all measurements are estimates
  - precision, accuracy and significant figures
  - sources of error, uncertainty and repeatability
  - traceability
- working solutions
- international system of units (SI)
- concentration terms, such as % w/w, % w/v, % v/v, ppm (mg/L) and molarity
- basic theory of acids, bases, salts, buffers and neutralisation
- what affects solubility
- difference between aqueous and organic solutions
- periodic table, symbols of the elements, atomic weights, and difference between elements and compounds
- chemical formulae
- workplace procedures for preparing solutions
- calculations required to prepare specified amounts of solutions of specified concentration

© Commonwealth of Australia, 2025 Skills Insight

- use of safety data sheets (SDS) and workplace procedures for preparing, handling and disposing of solutions and cleaning up spillages
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory equipped with appropriate reagents and equipment
  - standard methods and workplace procedures
  - containers and storage facilities.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973015 Prepare culture media

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973003 Prepare culture media. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to prepare culture media which is free of contamination to facilitate optimal growth of organisms and cells. It includes the ability to organise the materials, equipment and work environment and follow standard methods. Media may be prepared from formulated powders obtained from microbiological companies or by first principles under supervision of a technical officer or scientist.

This unit of competency applies to laboratory assistants in the biomedical, biological, environmental, food processing and pharmaceutical industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare culture media**	1.1	Prepare mixture of media and solvent to ensure solution and even settling of heat soluble materials
		1.2	Label media to allow tracking in subsequent processes
		1.3	Use a vessel large enough to endure adequate mixing and heating of the media
		1.4	Check pH of media where pH is critical
		1.5	Dispense media into vessels for sterilisation, leaving room for expansion during heating and cooling
2	**Sterilise media**	2.1	Load the steriliser in keeping with maximum permitted loads and appropriate positioning of materials
		2.2	Ensure a sterilisation indicator is correctly placed with the load to monitor sterilisation process
		2.3	Operate sterilisation cycle in accordance with manufacturer requirements to achieve sterilisation at the required settings
		2.4	Cool media to the temperature specified in the media formulation procedures
		2.5	Sterilise media and/or media additives using membrane filtration techniques
3	**Dispense or aliquote media**	3.1	Add labile constituents where necessary, under conditions that will not lead to their denaturation or contamination of media
		3.2	Ensure even mixing of additives and media before dispensing
		3.3	Aseptically dispense media to minimise occurrence of procedural contamination
		3.4	Label media to allow for selection, avoiding areas of the culture vessel required for examination of colony growth
4	**Label media**	4.1	Date batch media to ensure correct batch rotation
		4.2	Label media to allow for selection, avoiding areas of the

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
			culture vessel required for examination of colony growth
		4.3	Maintain records of batches of media
5	**Store and incubate media**	5.1	Incubate control plates as a sterility check
		5.2	Store media to maximise shelf life and minimise contamination
6	**Perform quality control checks**	6.1	Inspect media for any evidence of possible contamination or problems with structure or sterilisation
		6.2	Check useability of selective media by growth of expected organism
		6.3	Check stored stocks at regular intervals for conformance to required standards
7	**Maintain work area and equipment to prevent cross-infection and contamination**	7.1	Use personal protective equipment (PPE) and safe work practices to ensure personal safety and that of other laboratory personnel
		7.2	Place disposable and reusable items into relevant receptacles
		7.3	Clean and disinfect work area and equipment after use
		7.4	Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL973015 Prepare culture media

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973003 Prepare culture media. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively used standard methods to safely prepare at least 3 different batches of culture media that meet specifications and are free of contamination, including:
  - using appropriate sterilisation techniques, including maintaining adequate space between containers to prevent cross-contamination
  - performing quality assurance checks on media, including streaking out of cultures to a single colony
- effectively operated a pH meter.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic microbiological concepts and terminology, including growth rates in culture, and production of gas and haemolysis of red cells in media
- growth requirements of cells including microorganisms and tissue cells in terms of their laboratory culture
- purpose, content and features of culture media prepared in job role, and the relationship between the correct preparation of culture media and the optimal growth of organisms or cells
- nature, properties and use of a range of biological media
- cell culture:
  - agars, broths and solutions
  - slopes and deeps
  - common enriched media, differential media and selective media
  - common tissue culture media and transport media

© Commonwealth of Australia, 2025 Skills Insight

    - labile constituents including blood, hormones or antibiotics
- sterilisation techniques:
    - boiling, high temperature, high pressure steam and autoclaving
    - membrane filtration
    - radiation, gas and/or chemical treatments
- relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- the effect of physical requirements including pH and temperature on optimal growth of organisms and cells
- the effect of inappropriate storage on culture media quality and performance
- relevant hazards and how to deal with the risks presented:
    - microorganisms and reagents
    - sharps and broken glassware
    - sources of heat including ovens and burners
    - fluids under pressure including steam from autoclaves
    - UV radiation
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
    - a standard laboratory equipped with appropriate reagents and equipment, including pH meters; balances; stirrers, water baths and hot plates; burners, autoclave; measuring cylinders, flasks and glassware; Petri dishes; media storage bottles; self-refilling syringes; membrane filtration equipment; labelling equipment; distilled water apparatus; refrigerators; sterilisation equipment and indicators
    - workplace schedules and procedures, SDS and documented safe work practices.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973016 Perform aseptic techniques

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973004 Perform aseptic techniques. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to perform aseptic techniques to maintain the integrity of both the sample source and the sample. It applies to sampling techniques in tissue culture and to generic microbiological procedures.

This unit of competency applies to laboratory assistants and technicians working in the field or laboratory in the biomedical, biological, food processing and environmental industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for aseptic sampling or transfer**	1.1	Check the sampling procedure conforms with the required sampling plan
		1.2	Use specified personal protective equipment (PPE)
		1.3	Prepare the work area for safe and effective sample transfer
		1.4	Select equipment and materials specified by the procedure
		1.5	Organise equipment to minimise contamination during manipulations
		1.6	Label containers for clear identification
		1.7	Record details in relevant log or database
		1.8	Macroscopically assess media and/or reagents to confirm sterility before use
2	**Transfer materials aseptically**	2.1	Protect the integrity of the sample source
		2.2	Sterilise inoculating loops and/or pipette where used to prevent contamination
		2.3	Perform transfer while minimising opportunities for contamination and cross-infection
		2.4	Protect the integrity of the sample source and destination after transfer, and before sealing the transport or culture vessel
		2.5	Re-sterilise inoculating loops, minimising the generation of aerosols as required
		2.6	Perform quality control checks to confirm aseptic transfer was successful
		2.7	Label transport or culture vessels for clear identification
3	**Maintain work area and equipment to prevent cross-infection and**	3.1	Place disposable and reusable items into relevant receptacles
		3.2	Clean and disinfect work area and equipment after use
		3.3	Transport disposable and reusable contaminated

Assessment Requirements for MSL973016 Perform aseptic techniques

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973004 Perform aseptic techniques. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely and effectively performed aseptic techniques when performing at least 3 different types of sample transfers from the following list:
  - body fluids (or simulated body fluids)
  - sterile liquid culture media
  - water
  - soil
  - sterile pharmaceuticals
  - yeasts and moulds
  - milk and yoghurt
  - swabs and smears
  - propagation tissue
  - plant material
  - fermented foods
  - fermented beverages
  - bacterial cultures.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- growth requirements of microorganisms including bacteria and fungi in terms of their laboratory culture

© Commonwealth of Australia, 2025 Skills Insight

- relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- relationship between sterile practices and accurate test results
- importance of pure culture techniques and aseptic transfer to the successful microbiological investigation and correct interpretation of laboratory results
- cleaning and sanitising requirements of equipment and work area, and effects of physical and chemical agents on microbial growth and death
- sterilisation techniques:
  - flaming
  - high temperature, boiling and autoclaving
  - membrane filtration
  - radiation, gas and/or chemical treatments
- disinfection and sterilisation procedures used in the collection, processing and safe disposal of samples and materials
- principles of infection control related to work health and safety (WHS), and sampling and transfer of materials in microbiological investigations including how to minimise the generation of aerosols when flaming
- relevant hazards and how to deal with the risks presented:
  - injuries from sharps, burners, molten agar
  - ultraviolet (UV) light sources
  - exposure to hazardous substances and/or infectious agents
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and WHS requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory
  - test samples
  - appropriate equipment, including:
    - transfer equipment, such as inoculating loops, pipettes (quantitative and qualitative), flasks, tubes and spatulas
    - Sterilisation equipment such as bunsen burners, bench incinerators, autoclave and/or pressure cooker
    - Storage equipment such as incubators, water baths, refrigerators, freezers, anaerobic jars as required
    - laminar flow units or biohazard cabinets as required
    - swabs
  - appropriate materials, including:

© Commonwealth of Australia, 2025 Skills Insight

    - solid and/or liquid media
    - disinfecting and sterilising agents
    - consumables
    - receptacles for safe disposal of wastes and for processing of reusable materials
    - bar coding material and labels
- workplace schedules, procedures and standard methods, SDS and documented safe work practices.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973019 Perform microscopic examination

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973007 Perform microscopic examination. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to set up a light microscope for optimum resolution, to prepare routine samples and to observe, identify and report sample characteristics.

This unit of competency applies to laboratory or technical assistants in all industry sectors. The unit of competency covers limited interpretation and analysis of results. Troubleshooting of equipment and procedures is not required.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Prepare samples for examination**	1.1	Log and label samples according to workplace procedures to ensure traceability
		1.2	Follow documented standard operating procedures to prepare samples for microscopic examination
2	**Set up and use a light microscope**	2.1	Carry and use a microscope correctly preventing damage to the equipment and ensuring operator safety
		2.2	Perform pre-use and safety checks to ensure equipment is fit for purpose
		2.3	Check lenses to ensure they are clean
		2.4	Set up the microscope for optimum resolution and even illumination
		2.5	Select the appropriate objectives and filter for the sample being examined
		2.6	Place sample correctly on the stage
3	**Observe and identify sample characteristics**	3.1	Recognise and identify significant sample characteristics
		3.2	Perform required calculations accurately
4	**Maintain a safe work environment**	4.1	Ensure safety and minimise cross-contamination through the use of personal protective equipment (PPE)
		4.2	Handle all samples and equipment in accordance with workplace safety protocols
		4.4	Minimise generation of waste and environmental impacts
		4.5	Collect and dispose of all wastes safely

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to:
  - perform counts on samples using grids
  - take basic measurements
  - perform accurate calculations as required by the method, including:
    - dilutions
    - number of cells in original sample after dilution
    - calculation of cells/ml in a number of squares of a counting chamber
  - interpret and record test results reliably
  - log and track samples through all steps from sample receipt to completion of the examination and reporting.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL973007 Perform microscopic examination, Release 1.

Assessment Requirements for MSL973019 Perform microscopic examination

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL973007 Perform microscopic examination. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- set up a microscope for köhler illumination on 10x, 40x and 100x magnification on at least 3 occasions
- safely prepared and focused on at least 3 different sample types for examination with a compound light microscope including 3 from the following list:
  - preparing and staining a smear or film with a monolayer of cells
  - preparing a wet mount
  - loading a sample into a counting chamber
  - preparing hand cut samples
- observed, identified and reported the microscopic characteristics of at least 2 different sample types including at least 1 from the following list:
  - intact living or non-living organism
  - fixed and stained cells
  - wet mount
- taken basic measurements
- performed a count using a grid
- performed accurate calculations as required by the method, including:
  - dilutions
  - number of cells in original sample after dilution
  - calculation of cells/volume based cell counts.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- nature of samples, sample preparation methods, methods of examination and associated hazards
- parts and functions of a light microscope and steps taken to optimise the resolution of images
- procedures and reporting requirements for spills, faulty or unsafe equipment, hazards and incidents
- types of samples relating to job role
- causes and basic troubleshooting of common artefacts or incorrect results in microscopy
- vernier measurement and micrometry techniques
- sample characteristics restricted to what can be viewed by light microscopy:
  - shape and size of particles
  - presence of contamination
  - colour
  - consistency and variability
  - number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains)
  - type of cells
  - colour/staining and morphology
- applications of different types of microscopes/setups including compound light, dark field, phase contrast, fluorescent, electron, polarising and stereomicroscope (dissecting)
- awareness of environmental sustainability issues as they relate to the work task
- traceability requirements
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory equipped with appropriate equipment, including light microscopes and samples
  - workplace procedures, standard methods and materials
  - a light microscope.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL974020 Perform food tests

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL974004 Perform food tests. Changes to performance criteria. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to interpret food test requirements, prepare samples, conduct pre-use and calibration checks on equipment, and perform routine testing of raw food materials, in-process materials and final products. These tests will involve several measurement steps. The unit includes data processing and some interpretation of results and tracking of obvious test malfunctions where the procedure is standardised. However, personnel are not required to analyse data, optimise tests/procedures for specific samples or troubleshoot equipment problems where the solution is not apparent.

This unit applies to laboratory or technical assistants and instrument operators working in the food and beverage processing industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Interpret and schedule test requirements**	1.1	Review test request to identify samples to be tested, test method and equipment/instruments involved
		1.2	Identify hazards and workplace controls associated with the sample, preparation/test methods, reagents and/or equipment
		1.3	Plan parallel work sequences to optimise throughput of multiple sets of samples
2	**Receive and prepare food samples**	2.1	Log samples using standard operating procedures (SOPs)
		2.2	Record sample description, compare with specification and note and report discrepancies
		2.3	Prepare samples and standards in accordance with food testing requirements
3	**Check equipment before use**	3.1	Set up equipment/instruments in accordance with test method requirements
		3.2	Perform pre-use and safety checks in accordance with relevant workplace and operating procedures
		3.3	Check equipment calibration using specified standards and procedures
		3.4	Inspect reagents required for quality issues including visual checks and expiry
4	**Test samples to determine food components and characteristics**	4.1	Operate equipment/instruments in accordance with test method requirements
		4.2	Perform tests/procedures on all samples and standards in accordance with specified methods
		4.3	Shut down equipment/instruments in accordance with operating procedures

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

5	**Process data**	5.1	Record test data noting atypical observations
		5.2	Construct calibration graphs and compute results for all samples from these graphs
		5.3	Ensure calculated values are consistent with reference standards and expectations
		5.4	Record and report results in accordance with workplace procedures
		5.5	Determine if basic procedure or equipment problems have led to atypical data or results
6	**Maintain a safe work environment**	6.1	Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
		6.2	Minimise the generation of wastes and environmental impacts
		6.3	Ensure the safe collection of laboratory and hazardous waste for subsequent disposal
		6.4	Care for and store equipment and reagents as required
7	**Maintain laboratory records**	7.1	Make entries on report forms or into a laboratory information management system accurately calculating, recording or transcribing data as required
		7.2	Ensure traceability of sample from receipt to reporting of results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to:

© Commonwealth of Australia, 2025 Skills Insight

- process data, interpret gross features of data/results and make relevant conclusions
- prepare calibration graphs and calculate results using appropriate equations, units, uncertainties and precision

- Problem-solving skills to:
  - identify atypical results as either out-of-normal range or an artefact
  - trace and source obvious causes of an artefact, track obvious test malfunctions for standardised procedures, and troubleshoot basic equipment and methods.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL974004 Perform food tests, Release 1.

Assessment Requirements for MSL974020 Perform food tests

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL974004 Perform food tests. Changes to performance criteria. Foundation skill information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed at least 5 routine food tests or procedures involving several measurement steps including at least 4 of the following:
  - sensory tests
  - visual tests
  - package integrity and compatibility test
  - physical/mechanical tests
  - chemical tests
  - thermal tests including stability of products and effectiveness of heat treatments

- prepared samples using 3 different processes including at least 2 of the following:
  - grinding and milling
  - preparation of discs
  - digestion
  - extracting
  - refluxing
  - degassing
  - enzymatic treatment
  - washing and drying
  - ashing and temperature equilibration
  - precipitation and centrifugation
  - filtration
  - flocculation

© Commonwealth of Australia, 2025 Skills Insight

- evaporation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic principles and concepts underpinning the food tests or procedures including:
  - ions, atoms, molecules, bonding, affinities and related properties
  - chemical reactions (acid/base and complexiometric)
  - structure and properties of proteins, lipids, carbohydrates, vitamins and minerals
  - food additives, flavourings and essences
  - nutrient value of major food groups
  - interaction of water with food components
  - chemical and microbial changes in food
  - food preservation techniques including atmosphere and modified atmosphere in relation
  - basic biochemistry of fermentation reactions
  - function of packaging for product integrity and controlled atmosphere
  - electromagnetic spectrum and absorption, emission and refraction of light
  - quality control program for raw materials, process control and finished product inspection
- purpose of the food tests or procedures conducted
- basic principles and concepts related to equipment and instrument operation and tests or procedures implemented
- concepts of metrology, including:
  - all measurements are estimates
  - precision, accuracy and significant figures
  - sources of error, uncertainty and repeatability
  - traceability
- function of key components of the equipment/instrument used
- effects on the test of modifying equipment/instrument variables
- common sample preparation processes relevant to job role
- types of food tests and procedures:
  - sensory tests
  - visual tests of content and package
  - physical/mechanical tests
  - chemical analysis
  - microbiological tests
  - molecular tests
  - thermal tests including stability of products and effectiveness of heat treatments
- workplace and/or legal traceability requirements
- awareness of environmental sustainability issues as they relate to the work task

© Commonwealth of Australia, 2025 Skills Insight

- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory equipped with test equipment, instruments, standards and materials
  - workplace procedures and standard methods
  - records, including:
    - test and calibration results
    - equipment use, maintenance and servicing history.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL974021 Perform biological procedures

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL974006 Perform biological procedures. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to interpret work requirements, prepare samples, and perform routine biological procedures. These procedures may involve several steps and are used to classify organisms and biologically active compounds by analysing their biological and/or chemical characteristics. This unit includes interpretation of results and troubleshooting obvious departures from standard procedures.

This unit of competency applies to technical assistants working in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Assessment Requirements for MSL974021 Perform biological procedures

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL974006 Perform biological procedures. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- classify 2 organisms from 2 different kingdoms to species level using a dichotomous approach
- safely and accurately performed 3 multistep biological procedures, using a minimum of 2 different techniques from the following list:
  - multistep staining:
    - haematological
    - histological
    - microbiological
  - preparation and examination of samples to demonstrate mitosis microscopically
  - preparation and enumeration of microscopic samples
  - colorimetry
  - spectrophotometry
  - chromotography
  - electrophoresis
  - electrochemistry
  - multistep molecular technique
  - multistep immunological technique.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- biological principles and concepts underpinning tests and procedures associated with job role:
  - basic classification and taxonomy of organisms including prokaryotes and eukaryotes, bacteria, viruses, fungi, plants, animals, parasites and prions
  - interrelationships of biological systems including the carbon cycle and energy cycle
  - basic structure and function of a plant and animal cell and the respective organelles (plant and animal)
  - cell membrane activity, including diffusion (passive, facilitated and active), osmosis, tonicity and plasmolysis
  - plant and animal tissue types
  - phases of the cell cycle including phases of mitosis
  - mendelian genetics including inheritance, meiosis, karyotypes, dominant and recessive traits, genotypes, phenotypes, and pedigrees
  - basic structure and function of chromosomes, nucleic acids and proteins
  - chemical and physical characteristics of organic molecules
  - basic structure and function of including carbohydrates, fats and amino acids
  - basic role of biologically significance of ions, including calcium, iron, magnesium, sodium, potassium, chloride and phosphate
- purpose of procedures implemented (why they are used and what they demonstrate)
- calculation steps to give results in appropriate units and precision
- importance and appropriate use of controls and certified reference materials
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all clinical information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory equipped with appropriate test equipment and instruments, safety equipment, reagents and materials
  - standard operating procedures (SOPs) and testing methods
  - records, including:
    - test calibration results
    - equipment use, maintenance and servicing history
    - faulty or unsafe equipment
    - batch number, catalogue number and use-by-date for analytical kits.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL975035 Perform microbiological tests

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL975001 Perform microbiological tests. Changes to elements and performance criteria. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to contribute to the culture, isolation and identification of microorganisms, such as bacteria, fungi, viruses, protozoans, algae and parasites, in order to investigate the physiology and pathology of plants and animals, monitor the natural environment, and to assist in the production of foods, pharmaceutical goods and other manufactured materials.

This unit applies to laboratory technicians and technical officers working in the biomedical, biotechnology, environmental, manufacturing and food processing industry sectors. The results of work performed by technical personnel would normally be integrated, interpreted and reported on by scientists, medical, veterinary or plant pathologists or other responsible officers in a workplace. Although a supervisor may not always be present, the technician will follow standard operating procedures (SOPs) that will clearly describe the scope of permitted practice in modifying testing procedures, interpreting of data and for communicating test results to people outside the laboratory.

It applies to investigations as well as addressing the broader needs of biotechnology and tissue culture applications.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

MSL973019 Perform microscopic examination

MSL973016 Perform aseptic techniques

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Receive samples and process associated request forms**	1.1	Identify specimens and request forms that do not comply with minimum industry requirements for labelling, identification and test requests
		1.2	Record any discrepancies and indicate what action is required
		1.3	Log samples, recording details that allow accurate tracking and chain of custody
2	**Prepare for safe microbiological work and aseptic applications**	2.1	Apply principles of aseptic techniques to ensure sample and reagent integrity are maintained
		2.2	Apply principles of aseptic techniques to ensure personal and environmental safety
		2.3	Minimise the production and release of aerosols, using biological safety cabinets where necessary
		2.4	Safely dispose of biohazardous materials and other laboratory wastes in accordance with workplace procedures
3	**Process samples for direct examination**	3.1	Prepare thin smears of samples for subsequent staining to enable microscopic identification of cells
		3.2	Prepare liquid films of specimens for direct observation

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
			for motility or cell structure
		3.3	Prepare samples to concentrate material for subsequent staining or microscopy
4	**Prepare pure cultures for microbiological work and aseptic applications**	4.1	Select culture media to maximise growth and optimise production of pure microbial cultures
		4.2	Inoculate media aseptically, applying techniques suitable for purpose of culture
		4.3	Incubate inoculated media in conditions to optimise growth of organisms and cells
5	**Perform procedures that can assist in the identification of microorganisms**	5.1	Select staining techniques to demonstrate required cellular characteristics
		5.2	Stain prepared films to demonstrate diagnostically useful characteristics
		5.3	Inoculate and incubate media with pure cultures to assist in the biochemical and immunological identification of microorganisms
		5.4	Microscopic differentiation between, red blood cells, white blood cells, micro-organisms and epithelial cells
		5.5	Select and perform tests on pure cultures to determine the biochemical and immunological identification of microorganisms
		5.6	Perform antibiotic sensitivity testing
6	**Estimate the number and/or size of micro-organisms in samples**	6.1	Count cells in samples
		6.2	Prepare serial dilutions of samples aseptically for culture and colony counting
		6.3	Indicate the appropriate dilution necessary to reliably count organisms in a serially diluted sample

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	6.4	Count colonies for calculating number of viable organisms per unit volume
7 **Maintain records of laboratory work**	7.1	Record entries on report forms or into a laboratory information management system accurately calculating, recording or transcribing data as required
	7.2	Ensure traceability of sample from receipt to reporting of results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Oral communication skills to interact effectively with supervisors and managers (laboratory, quality and customer service), personnel in other laboratories in the workplace or in other workplaces to which work may be referred, customers, patients and clients, external auditors and accreditation agencies, such as National Association of Testing Authorities (NATA)
- Problem solving skills to identify artefacts or image aberrations attributable to misalignment or obstruction of light paths or condensers used in microscopy, or with other steps in microscopic examinations.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL975001 Perform microbiological tests, Release 1.

Assessment Requirements for MSL975035 Perform microbiological tests

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL975001 Perform microbiological tests. Changes to elements and performance criteria. Foundation skills information added. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 5 microorganisms to species based on colonial/microscopic morphology, biochemistry and/or immunological characteristics, including:
  - at least 1 identification must be from a mixed culture
  - at least 4 from the following list:
    - *Staphylococcus sp.*
    - *Streptococcus sp.*
    - *Pseudomonas sp.*
    - a member of the Enterobacteriaceae family
    - *Clostridium sp.* or another gram positive rod
- safely performed at least 8 microbiological tests/procedures for culturing, isolating, identifying and counting microorganisms, including:
  - consistently and accurately performing and interpreting Gram staining of bacteria
  - using and interpreting common enriched, differential and selective media
  - performing agglutination techniques
  - coagulase testing
  - oxidase testing
  - catalase testing
  - use a biochemical test system with statistical interpretation
  - antibiotic sensitivity testing and interpretation
- not contaminating self, other people, the work area, equipment or the samples or materials under test

© Commonwealth of Australia, 2025 Skills Insight

- not contaminating media or reagents during manipulations involving the transfer of cultures.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- microbiological terminology, including bacteriology, parasitology, virology and mycology
- disinfection and sterilisation as applied to practical aspects of microbiology
- relationship between sample microscopic and macroscopic appearance and indications of infection/contamination
- microbial diversity and taxonomy
- cell biology and chemistry related to laboratory phenomena, such as growth and isolation of organisms for identification
- sources of infection from food, environment, pharmaceuticals and medical equipment/facilities
- sources of contamination of food, environment, pharmaceuticals and medical equipment/facilities
- microorganisms of importance to job role
- transport and storage requirements for microbiological samples to ensure sample integrity prior and post testing
- the importance of maintaining reference cultures and the use of control in microbiological testing
- technological advances in microbiology including automation for identification, enumeration and sensitivity testing
- procedures and reporting requirements for microbiological spills
- purpose of biochemical test, media types and sensitivity testing implemented (why they are used and what they demonstrate)
- application of molecular and serological testing in microbiology
- importance of genetics in microbiology
- general criteria used for the identification of parasites
- general criteria used for the identification of fungi and yeast
- general criteria used for the identification of virus
- rationale for sample dilution and appropriate dilution selection when preparing materials for enumerating organisms and other pure culture work
- need for accurate identification of sample source (such as body, specimen, process line and field location)
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all clinical information, and laboratory data and records.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard microbiology laboratory with relevant samples; reagents; protective and physical containment equipment; sample preparation and storage equipment; test equipment, such as microscopes and counters; and sterilising equipment, such as autoclaves
  - workplace procedures, test methods and equipment manuals.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMENV172 Identify and minimise environmental hazards

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP172A Identify and minimise environmental hazards

Application

This unit of competency covers the skills and knowledge required to identify activities and/or materials that present an environmental threat and to take the appropriate action according to procedures.

This unit of competency applies to all personnel who are required to work within environmental regulatory requirements which are reflected in the organisation's policies and procedures.

It applies to an individual working alone or as part of a team or group and working in liaison with other team members and supervisors.

This unit of competency applies to all plants and areas of operation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element

© Commonwealth of Australia, 2025 Skills Insight

1	Identify environmental threats	1.1	Recognise the type and severity of environmental threat posed by the materials and processes used for own work
		1.2	Identify ways materials used may enter the environment
		1.3	Identify sensitive features of the local environment and their impact on work practice and procedures
		1.4	Recognise abnormal or unacceptable emission levels
2	Identify workplace procedures and policies to minimise environmental threats	2.1	Identify workplace policy for environmental protection
		2.2	Identify environmental protection measures within standard operating procedures (SOPs) relevant to work
		2.3	State contact procedures for personnel involved in environmental response teams
3	Follow procedures to minimise environmental threats	3.1	Implement environmental protection measures in relevant procedures
		3.2	Report abnormal emissions/environmental issues to appropriate personnel
		3.3	Apply containment procedures in accordance with SOPs, where appropriate
		3.4	Implement waste management procedures and practices
		3.5	Follow safety procedures and use personal protective equipment (PPE)

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Skills Insight

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- SOPs
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Tools and equipment

Tools and equipment include:

- personal protective equipment (PPE)
- spill kits

Emissions

Abnormal or unacceptable emission levels include one of more of the following:

- excessive noise
- light
- odours
- gases/vapours
- visible smoke/vapour
- liquid and solids

© Commonwealth of Australia, 2025 Skills Insight

- particulates
- fumes

Assessment Requirements for MSMENV172 Identify and minimise environmental hazards

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP172A Identify and minimise environmental hazards

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- recognise and report environmental threats
- communicate using in-plant reporting systems (verbal, electronic or written)
- select and use containment equipment
- select and use personal protective equipment (PPE).

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
  - environmental protection and reporting requirements
  - safety, emergency and hazard controls
- type and severity of environmental threats, including contribution to climate change and other macro threats that can arise from materials and work processes used
- environmental protection measures required to minimise threats
- types of emissions relevant to job role and permissible levels.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems

© Commonwealth of Australia, 2025 Skills Insight

    - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
    - walk-throughs
    - pilot plant operation
    - demonstration of skills
    - industry-based case studies/scenarios
    - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Application

This unit of competency covers the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices, and to implement improvements and monitor their effectiveness.

This unit of competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes identifying areas for improvement, developing plans to make improvements, and implementing and monitoring improvements in environmental performance.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	**Investigate current practices in relation to resource usage**	1.1	Identify environmental regulations applying to the enterprise
		1.2	Assess procedures for assessing compliance with environmental regulations
		1.3	Collect information on environmental and resource efficiency systems and procedures and provide to the work group, as required
		1.4	Measure and record current resource usage by members of the work group
		1.5	Analyse and record current purchasing strategies
		1.6	Analyse current work processes to access information and data, and assist in identifying areas for improvement
2	**Set targets for improvements**	2.1	Seek input from stakeholders, key personnel and specialists
		2.2	Access external sources of information and data as required
		2.3	Evaluate alternative solutions to workplace environmental issues
		2.4	Set efficiency targets
3	**Implement performance**	3.1	Source and use techniques/tools to assist in achieving targets

© Commonwealth of Australia, 2025 Skills Insight

	improvement strategies	3.2	Apply continuous improvement strategies to own work area of responsibility, and communicate ideas and possible solutions to the work group and management
		3.3	Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them
		3.4	Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate
		3.5	Implement costing strategies to fully value environmental assets
4	**Monitor performance**	4.1	Document outcomes and communicate reports on targets to key personnel and stakeholders
		4.2	Evaluate strategies and environmental performance, including breaches or potential breaches of regulations and occurrences outside of standard procedure which may lead to lower environmental performance
		4.3	Set new targets and investigate and apply new tools and strategies
		4.4	Promote successful strategies and reward participants where possible

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices

Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- investigate/analyse resource usage
- evaluate improvement alternatives and set targets
- implement improvements within the limit of own authority
- monitor the performance of improvements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant environmental and resource efficiency issues, specific to industry practices, including:
  - contribution to climate change and other macro threats that can arise from materials and work processes used
  - regulated environmental issues
  - issues relevant to licencing conditions
- best practice environmental approaches relevant to own area of responsibility
- methods for measuring and calculating resource usage.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - will typically include the use of appropriate tools, equipment and documents

© Commonwealth of Australia, 2025 Skills Insight

MSMSUP300 Identify and apply process improvements

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP300A Identify and implement opportunities to maximise production efficiencies.

Application

This unit covers the skills and knowledge required to identify, monitor and participate in strategies to improve production efficiencies.

This unit applies to all work environments and all operators across all functions, including experienced team leaders or supervisors, who are required to provide input into process improvement initiatives for a team or work area.

This unit applies to a wide range of processes and equipment. In large plants with multiple processes, it may apply to more than one process if those processes interact with each other.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Assessment Requirements for MSMSUP300 Identify and apply process improvements

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP300A Identify and implement opportunities to maximise production efficiencies.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified process efficiency issues, recommended improvements and contributed to the development, implementation and review of improvement strategies
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- duty of care
- organisation procedures
- information systems and data collation
- process inefficiencies
- measures of process efficiency
- problems and hazards that may arise in the work role and work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- relevant equipment and operational processes.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workplace documentation, forms and production reports

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMSUP303 Identify equipment faults

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP303A Identify equipment faults

Application

This unit of competency covers the skills and knowledge required to plan and carry out checks to identify and deal with equipment faults and to determine solutions.

This unit of competency applies to experienced personnel, such as experienced operators, team leaders or supervisors, who are required to apply knowledge of materials, product purpose and processes to identify and deal with routine and non-routine faults in equipment, propose solutions, carry out solutions within scope of authority and competence and complete logs and reports.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade-level skills. It is not intended that this competency would cover maintenance that is carried out in a workshop.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Identify scope of operational check	1.1	Identify and classify equipment components and operating systems
		1.2	Match appropriate checks and procedures to the equipment operating systems
		1.3	Identify special checking procedures and parameters in manufacturer specifications and procedures
		1.4	Identify sources of information and data relevant to key variables
		1.5	Identify and control hazards
		1.6	Observe and undertake checks on the physical condition of equipment in accordance with procedures
		1.7	Record preliminary observations
		1.8	Discuss checking procedures with appropriate personnel and obtain necessary permission where required
2	Plan operational checks	2.1	Check specifications and notes from preliminary observations and identify areas to be clarified
		2.2	Plan sequence for checks, noting areas where results and observations should be recorded
		2.3	Ensure area is safe for operational check
		2.4	Make arrangements for any additional resources, including other employees
3	Check unit through full	3.1	Undertake operational checks observing relevant safety and operational requirements

© Commonwealth of Australia, 2025 Skills Insight

	operational range	3.2	Confirm results and findings
		3.3	Identify faults to be dealt with
4	Identify faults and formulate recommendations	4.1	Identify impact of faults on work schedule
		4.2	Record proposals for equipment repair based on faults found, cost/time implications and workplace approval systems
		4.3	Explain proposals to relevant workplace personnel, including any options and recommendations
		4.4	Take appropriate action to return equipment to full operation in accordance with procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

© Commonwealth of Australia, 2025 Skills Insight

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- plant description manuals
- manufacturer instructions and specifications
- service manuals
- machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits
- any similar instructions provided for the smooth running of the plant

Tools and equipment

Tools and equipment include one or more of the following:

- hand tools specific for the task
- product testing equipment (e.g. flowmeter, scales, tape measure, micrometer, calliper and ultrasonic thickness)
- equipment checking equipment (e.g. vibration meter, tachometer, current tester, thermal imaging and temperature gauge)

Hazards

Hazards include one or more of the following:

- rotating and moving machinery
- process materials, solids, fluids and gases under pressure or flowing
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out-of-specification operation
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures

© Commonwealth of Australia, 2025 Skills Insight

- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Faults

Faults may arise from routine and non-routine causes and must be resolved by applying operational knowledge to apply existing, or develop new solutions, either individually or in collaboration with relevant experts to:

- determine faults needing action
- determine possible fault causes
- develop solutions to faults which do not have a known solution
- follow through items initiated until final resolution has occurred
- report faults outside area of responsibility/expertise to designated person

Non-routine faults are unexpected faults, or variations of previous faults and are associated with one or more of the following:

- out-of-specification product or variations
- response of equipment to materials variations
- new or changed materials
- changed equipment settings (e.g. higher speed or throughput)
- equipment breakdown or in need of maintenance

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information such as journals, engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

© Commonwealth of Australia, 2025 Skills Insight

Variables

Key variables to be monitored include one or more of the following:

- equipment performance (e.g. speed, output and variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired)

Sources of information and data

Sources of information and data include one or more of the following:

- plant data
- log sheets
- operational and performance reports
- physical aspects, such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures

Unit Mapping Information

Assessment Requirements for MSMSUP303 Identify equipment faults

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP303A Identify equipment faults

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- check and identify a fault within an item of equipment/plant
- ensure workplace is safe for checking and maintenance of equipment
- communicate effectively with personnel and all levels
- evaluate the impact of fault in terms of work schedule, cost/time and approvals needed and make recommendations for repairs
- apply operational knowledge to non-routine problems
- take appropriate action within scope of authority in accordance with procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
  - work permit systems
  - safety, emergency and hazard control
  - standard operating procedures (SOPs)
- hazards that may arise in the job/work environment, including:
- their possible causes
- potential consequences
- appropriate risk controls/ hierarchy of control
- principles of the operation of the equipment to be maintained:
  - operating principles for mechanical, hydraulic, pneumatic and electrical/electronic systems
  - functions and troubleshooting of internal components and their problems
  - routine and non-routine causes of equipment failures and the service conditions which may increase maintenance
- types and application of testing procedures and equipment.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.

© Commonwealth of Australia, 2025 Skills Insight

- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP330 Develop and adjust a production schedule

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP330A Develop and adjust a production schedule

Application

This unit of competency covers the skills and knowledge required to plan, schedule and prioritise production to meet operational requirements.

This unit of competency applies to experienced operators, team leaders or similar who are required to optimise plant production and costs of production using daily and weekly run plan guidelines/production schedules.

The person will have detailed operational and process knowledge but is not required to demonstrate 'hands on' operation of equipment as part of this competency.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Identify resources to meet production requirements	1.1	Determine demand for product
		1.2	Access and verify information on orders, stocks and delivery
		1.3	Determine plant/production equipment capacity
		1.4	Determine material requirements
		1.5	Determine human resource requirements
		1.6	Identify and control hazards
2	Develop schedules	2.1	Determine production priorities
		2.2	Identify production opportunities ('windows')
		2.3	Develop production schedules in accordance with procedures taking account of health, safety and environment (HSE) requirements
		2.4	Communicate and distribute production schedules to appropriate personnel
3	Monitor production schedules	3.1	Monitor production output against schedule
		3.2	Identify variations between production and schedule
		3.3	Record operational variation and discuss with appropriate personnel
		3.4	Identify possible cause of variation
4	Adjust schedules	4.1	Adjust schedules in response to operational variation

© Commonwealth of Australia, 2025 Skills Insight

4.2 Adjust schedules in response to unexpected events

4.3 Distribute adjusted/amended schedules to appropriate personnel

4.4 Maintain product output in accordance with production and HSE requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form,

© Commonwealth of Australia, 2025 Skills Insight

and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Hazards Hazards include one or more of the following:

- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Assessment Requirements for MSMSUP330 Develop and adjust a production schedule

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP330A Develop and adjust a production schedule

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify production objectives, priorities, targets and resource requirements
- plan, sequence and schedule production taking account of health, safety and environment (HSE) priorities
- monitor and adjust schedules in response to operational variations
- communicate effectively with other personnel.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures
- hazards that may arise in the job/work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
  - hierarchy of control
- customer and quality requirements
- routine and non-routine causes of production variation
- relevant equipment and operational processes
- types of adjustments that can be made and their likely impact on process/plant efficiencies and production outcomes/targets.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

MSS024018 Perform sampling and testing of water

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to sample natural, polluted and process water for both chemical and microbiological parameters and perform field measurements on them.

This unit applies to environmental technicians working in a range of industry sectors, including environmental services; clean water; natural resource management; water treatment, storm and wastewater management; environmental compliance, auditing and inspection; solid and hazardous waste management; site remediation; management of contaminated sites; geotechnical services and civil engineering.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Sampling and testing

Unit Sector

Environmental

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Confirm sampling and testing requirements**	1.1 Read the sampling plan to confirm the timing and frequency of sampling and the location, number and type of samples
		1.2 Check that all sampling and testing procedures are in accordance with client or workplace requirements, standards and codes

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2 **Prepare for water sampling**	2.1 Identify site and sampling hazards and safety requirements
	2.2 Liaise with personnel to arrange site access, clearances and permits
	2.3 Select sampling equipment and conditions to achieve representative samples and preserve sample integrity during collection, storage and transit
	2.4 Ensure all reagents, solutions, standards and blanks are obtained and prepared ready for field use
	2.5 Select field test equipment and instruments and check operation and calibration in accordance with procedures and manufacturer instructions
	2.6 Assemble and check all sampling equipment, field test equipment, materials, containers and safety equipment
	2.7 Arrange suitable transport to, from and around site
3 **Conduct sampling of water**	3.1 Locate sampling sites and services at the site
	3.2 Conduct representative sampling in accordance with sampling plan and defined procedures for field and laboratory testing
	3.3 Ensure all controls, blanks and replicate samples are correctly integrated into the sampling process
	3.4 Record all information and label samples in accordance with traceability requirements
	3.5 Record environmental conditions and any atypical observations made during sampling that may impact on sample representativeness or integrity
	3.6 Transport all samples back to base according to workplace procedures and codes

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
		3.7	Distribute samples or sub-samples to required destinations for testing, maintaining sample integrity, traceability and chain of custody requirements
4	**Conduct field testing of water**	4.1	Obtain sample or sub-sample for designated field test, or locate testing location for in-situ testing
		4.2	Check equipment and instrument set-up and reagents and calibrate to ensure safe operation and valid results
		4.3	Run quality control (QC) samples to check method validity
		4.4	Operate equipment and instruments in accordance with test method requirements
		4.5	Perform tests, procedures, observations on all samples, and standards in accordance with specified methods
		4.6	Record all field observations and results and ensure that they are accurately transferred to workplace information database
5	**Maintain a safe work environment**	5.1	Use defined safe work practices and personal protective equipment to ensure personal safety and that of others
		5.2	Minimise the generation of waste
		5.3	Rehabilitate sampling site to render it safe and minimise environmental impacts
		5.4	Clean all equipment, containers, work area and vehicles according to workplace procedures
		5.5	Check serviceability of all equipment before storage
		5.6	Safely collect all hazardous wastes for disposal

© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for MSS024018 Perform sampling and testing of water

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- sampled natural, polluted or process water for both chemical and microbiological parameters
- conducted field tests of at least 2 water samples.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- scientific terminology used in job role covering water chemistry, biology and microbiology
- hydrologic cycle
- fundamentals of aquatic chemistry, including:
  - physical and chemical properties of water
  - chemical equilibria in natural, polluted and process waters
  - biogeochemical processes in freshwater and marine systems
  - water analytical environmental chemistry
  - environmental contaminants in water (fate, transport and bioaccumulation)
- fundamentals of hydrobiology, including:
  - aquatic and benthic flora and fauna
  - aquatic microorganisms
  - marine, estuarine and freshwater ecosystems
  - stratification and eutrophication in water bodies
  - aquatic microbiology
- principles of representative sampling
- principles and procedures for random, systematic and stratified sampling, including consistency of sampling procedures
- laboratory and field test parameters and measurements
- preservation of the integrity of samples
- maintaining identification of samples relative to their source
- workplace and legal traceability requirements

© Commonwealth of Australia, 2025 Skills Insight

- cost-effectiveness of sampling
- common characteristics of water to be sampled and likely contaminants
- links between quality control, quality assurance, quality management systems and sampling procedures
- workplace procedures dealing with legislative requirements for the handling, labelling and transport of hazardous goods
- hazards for role
- health and safety and site environmental management requirements
- importance of personal and environmental safe work procedures particularly at high risk sites
- field test equipment

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
  - vehicle transport, survey or test equipment, water sampling and monitoring equipment, camera, consumables
  - documentation, including work program, maps and field protocols, codes of practice, user manuals, workplace safety procedures and sampling, test or survey methods.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS027018 Undertake complex environmental project work

Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to carry out complex environmental project activities and/or coordinate the activities of concurrent projects. Personnel are required to review and confirm the requirements of each project activity, organise and carry out project activities, oversee the progress of projects activities and finalise the work in each case. They may be responsible for all or some project deliverables, work in teams on aspects of projects, and may liaise with multiple clients.

This unit applies to environmental site coordinators, environmental managers and senior environmental officers working in all industry sectors. They may also work under the supervision of an environmental scientist or engineer, site manager or workplace environmental manager.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Review and**	1.1 Confirm own role, limits of responsibility and reporting

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
	confirm project requirements with manager	requirements for assigned projects
		1.2 Read and interpret workplace project management procedures and controls
		1.3 Read and interpret background information for each project to clarify intended outcomes, key stakeholders, drivers and likely constraints
		1.4 Read and interpret project plans and clarify roles and responsibilities of project team members, deliverables, timeframes, stakeholder involvement and available resources
		1.5 Negotiate changes to project plans in accordance with workplace project management procedures
		1.6 Update project plans with confirmed information for milestones, resources, team members and stakeholder details
2	**Organise and undertake project activities**	2.1 Use project management tools to achieve efficient integration and sequencing of projects activities
		2.2 Consolidate schedules of activities, timeframes and milestones on a single planning management framework to enable efficient monitoring of each project activity
		2.3 Identify possible and actual clashes in activities and negotiate alternatives with management
		2.4 Carry out own project tasks in accordance with project plans and manage any variations in accordance with workplace project management procedures
		2.5 Capture, record and store required project information and data
		2.6 Support project team members to achieve project milestones and assigned outputs with resources available
		2.7 Seek manager’s advice when challenges are beyond own technical competence or when input from environmental specialists is required

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
3	**Manage the progress of multiple projects**	3.1	Anticipate risks to progress or achievement of project outcomes and notify relevant personnel in accordance with risk management plans
		3.2	Monitor completion of project activities and progress against targets and milestones
		3.3	Negotiate and implement corrective actions with project team members and managers in accordance with workplace project management procedures and controls
		3.4	Develop solutions in response to project problems and unforeseen or changed circumstances in consultation with manager
		3.5	Provide regular project reports in accordance with project plans and workplace project management procedures
4	**Finalise project activities**	4.1	Provide deliverables for each project activity in accordance with the specified timeframe and quality standards
		4.2	Provide deliverables for each project activity in accordance with the specified timeframe and quality standards
		4.3	Ensure all project records are accurate and complete
		4.4	Evaluate project processes to identify unresolved issues and recommend opportunities for improvement of future project activities
		4.5	Write timely and accurate project reports in accordance with workplace project management procedures and using the specified style, language and formats
		4.6	Archive project information and return borrowed and unused resources in accordance with workplace project management procedures

© Commonwealth of Australia, 2025 Skills Insight

Assessment Requirements for MSS027018 Undertake complex environmental project work

Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- scoped, planned and managed at least 2 projects or project activities that involved complex environmental work (either individually or as part of a team), including managing or monitoring projects and activities associated with one or more of the following:
  - planning, operation or closure of construction, infrastructure, industrial and mining sites
  - rehabilitation of sites
  - revegetation of sites
  - management of pests
  - acid sulphate soils
  - acid rock drainage
  - wetlands
  - stormwater systems
  - air quality, dust and emissions or odours
  - water quality and water supply or use issues
  - contaminated sites
  - waste, stockpiles and waste rock dumps
  - protection of biodiversity
  - acquisition and commissioning of complex equipment
  - significant quality improvement projects
  - set-up and operation of remote sensing sites
  - set-up and operation of groundwater bores
  - investigating a multifaceted or difficult environmental complaint, non-conformance or incident.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- environmental protection and management terminology, concepts and principles used in job role
- legislative, regulatory, permit, licensing and approval requirements and processes relevant to site and project activities
- workplace business goals, key performance indicators and key result areas relevant to site and project activities
- site and project characteristics, nature of activities conducted at site, environmental management values, environmental issues, risks and impacts
- workplace environmental management plans, procedures, control measures and management actions for site and project activities
- project management principles
- project plan components
- project management software and tools
- project information and data
- workplace project management procedures and controls, including:
  - project governance requirements
  - stakeholder management
  - quality standards
  - risk management plans
  - record management and reporting, confidentiality and security of information
  - quotation, tendering, procurement and contract management procedures, and delegations
  - financial management procedures
  - human resource management procedures and industrial agreements
- solutions to project problems
- techniques for achieving effective communication, teamwork and cooperation; negotiating and resolving conflict
- troubleshooting and problem-solving techniques.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403011 Facilitate implementation of competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403011A Facilitate implementation of competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by individuals who facilitate, lead or mentor others in competitive systems and practices implementation in a work area.

This unit applies to people responsible for facilitating others in implementing competitive systems and practices in their work. It may apply to formally designated team leaders or people given special roles in the implementation process that go beyond their own work and which involve guiding, facilitating or mentoring others. The unit applies to competitive systems and practices implementation activities at the work area or section level.

The unit requires an individual to integrate a range of competitive systems and practices knowledge and skills as part of their role. The unit covers assisting others to understand and apply a holistic view of their job and their role within an organisation, including the objectives that must be met as part of competitive systems and practices used by the organisation.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, planning and organising, and self-management. This unit has a strong emphasis on planning and implementation, and also requires an ability to learn from experience and feed new information back into strategies to improve own performance and that of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

© Commonwealth of Australia, 2025 Skills Insight

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Facilitate the development of process and competitive systems and practices knowledge**	1.1	Ensure necessary technical documentation and information about the process and competitive systems and practices is available.
		1.2	Assist and mentor others in accessing information.
		1.3	Identify work activities which may inhibit the ongoing development of competitive systems and practices skills and knowledge of others.
		1.4	Arrange for the provision of workforce development and training for self and others, as appropriate.
		1.5	Encourage others to apply technical knowledge to the improvement process.
2	**Facilitate commitment to efficiency improvements**	2.1	Ensure budgets, operating procedures and other related documentation is available.
		2.2	Assist others to apply this information to their work responsibilities.
		2.3	Encourage the identification of waste.
		2.4	Encourage an environment where efficiency improvements are recommended by fellow employees.
3	**Encourage a competitive systems and**	3.1	Encourage and, where necessary, develop communications between specialists and work group members.

© Commonwealth of Australia, 2025 Skills Insight

	practices approach to work	3.2	Lead development of strategies to monitor and deal with identified waste issues.
		3.3	Resource and encourage other employees to identify and take action on potential problems.
		3.4	Arrange for workforce development and training for self and others, as required, in relevant competitive systems and practice procedures and techniques.
		3.5	Guide others in relating identified problems to the maintenance strategy, and developing any required changes, to ensure awareness, learning and commitment.
4	**Implement process and organisation improvements**	4.1	Plan the implementation of work group suggestions and externally suggested improvements.
		4.2	Facilitate commitment to, and involvement in, the implementation planning of improvements and to follow improvements to their conclusion.
		4.3	Encourage the application of the 'plan, do, measure, improve, control' approach to the job.
		4.4	Arrange for workforce development and training, as required, to facilitate continued involvement by others in improvement processes.
		4.5	Involve work group and other key personnel in identification of skill needs and means of skills acquisition to fill any identified gaps.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect

© Commonwealth of Australia, 2025 Skills Insight

performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Budgets include one or more of:	• financial • time • materials/products • other business plans which are relevant to the team and the work area.
Categories of waste include one or more of:	• excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers.
Key reliability issues	• cleanliness

© Commonwealth of Australia, 2025 Skills Insight

include one or more of:	• poor lubrication • incorrect adjustment • poor training and instructions for employees.

Unit Mapping Information

Assessment Requirements for MSS403011 Facilitate implementation of competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403011A Facilitate implementation of competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more organisation improvements which include the facilitation of competitive systems and practices, to:

- identify processes and products of the organisation and work area
- analyse future skill development needs of work group
- mentor effectively in a one-on-one situation
- facilitate communication between work group and external competitive systems and practices specialists and managers
- lead work group in identifying efficiency improvements and elimination of waste.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- information technology systems used in the organisation
- features of competitive operational practices in own work area
- monitoring and data gathering systems in work area (e.g. SCADA, ERP and MRP)
- methods of gathering data against key performance indicators (KPIs)
- facilitation techniques to encourage work group development and improvement.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency

© Commonwealth of Australia, 2025 Skills Insight

  - must include facilitation of competitive systems and practices implementation in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403013 Lead team culture improvement

Modification History

Release 1. Supersedes and is equivalent to MSS403013A Lead team culture improvement

Application

This unit of competency covers the skills and knowledge required by a team leader or other person responsible for developing a culture within a team appropriate for supporting competitive systems and practices.

This unit applies where an organisation has embarked on competitive systems and practices and a team leader or other responsible person is required to change or improve the team culture to maximise the benefits from competitive systems and practices.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, planning and organising, and self-management in order to provide leadership in a changing team environment. This unit has a strong emphasis on planning and change management, but also requires an ability to learn from experience and feed new information back into strategies to improve performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Facilitate the team's understanding of the competitive systems and practices strategy**	1.1	Communicate with all team members the objectives and benefits of the competitive systems and practices strategy.
		1.2	Review with team members the techniques and methods that will be used in achieving the competitive systems and practices strategy.
		1.3	Using a systems approach, help team members understand how the team fits into the organisation.
		1.4	Establish appropriate communication and teamwork within the team and with other teams.
		1.5	Develop a work structure with the team that allows for everyone to participate in the application of the competitive systems and practices strategy.
2	**Facilitate application of knowledge about the importance of controlling variation in competitive systems and practices**	2.1	Develop the application of a statistical approach by all team members to all relevant facets of the system with a view to reducing variation.
		2.2	Encourage the approach of building quality and ensuring team members assist each other in meeting requirements.
3	**Facilitate the development of skills and knowledge within the team**	3.1	Encourage appropriate training for all team members.
		3.2	Involve team members in identification of skill needs and skill gaps, and in development of a strategy for training, skills acquisition and self-improvement so as to ensure awareness, learning and commitment.
4	**Facilitate the development of commitment within the team to the competitive systems and practices strategy**	4.1	Ensure that the team has sufficient resources and adequate equipment available to meet the requirements of the competitive systems and practices strategy.
		4.2	Encourage the adoption of continuous improvement.
		4.3	Encourage employee acceptance of responsibility for the quality of own work.

© Commonwealth of Australia, 2025 Skills Insight

4.4	Provide continuous feedback and communication of progress at all levels in implementing the strategy.
4.5	Involve team members in relating identified problems and opportunities for improvement to the competitive systems and practices strategy, and involve them in developing any required changes, to ensure awareness, learning and commitment.
4.6	Establish and monitor indicators of team culture.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving

© Commonwealth of Australia, 2025 Skills Insight

	• run charts • standard procedures • current reality tree.
Systems approach includes consideration of the role and requirements of one or more of:	• customers • suppliers • employees • other value stream members • members of the public and community groups • other external individual, group or organisation • technical processes and equipment • statutory and regulatory requirements, including work health and safety (WHS) and environment legislation and regulations • quality standards.
Team culture can be monitored by one or more of:	• surveys • evaluation of toolbox or other regular meetings • direct discussion with team members • monitoring of other indicators (e.g. error rates and absenteeism) • analysis of root cause related to status of team culture.

Unit Mapping Information

Assessment Requirements for MSS403013 Lead team culture improvement

Modification History

Release 1. Supersedes and is equivalent to MSS403013A Lead team culture improvement

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more team culture changes, to:

- identify the competitive systems and practices used by the team
- identify changes to the work of the team flowing from the implementation of the relevant competitive systems and practices
- facilitate and monitor changes designed to improve team culture
- communicate effectively with team members providing relevant feedback.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- features of competitive operational practices in the team's work area
- principles of change management
- facilitation techniques to encourage team development and improvement.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).

© Commonwealth of Australia, 2025 Skills Insight

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Application

This unit of competency covers the skills and knowledge required to analyse manual handling in terms of its efficiency and safety.

This unit applies to an individual who is required to examine the manual handling component of a job and improve it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others or it may be for the person's own job.

This unit primarily requires the application of skills associated with problem solving, initiative and enterprise to identify safe and efficient manual handling, and planning and organising to ensure processes are implemented. This unit also requires communication with, and involvement of, others to ensure they understand the approach and to facilitate training.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Assess manual**	1.1	Identify manual handling hazards in work area.

© Commonwealth of Australia, 2025 Skills Insight

	handling risks	1.2	Assess risks arising from manual handling hazards.
2	**Analyse physical effort requirements of job**	2.1	Determine basic manual handling requirements of job.
		2.2	Analyse requirements in terms of components, such as lift, move, place and hold.
		2.3	Analyse items to be handled in terms such as weight, size, shape or other hazards.
3	**Determine time/effort components of physical effort**	3.1	Break required movement pattern down into movement components.
		3.2	Determine time and effort requirements for movements.
		3.3	Develop alternative movement patterns.
		3.4	Determine time and effort requirements for alternative movements.
		3.5	Determine handling aids required to assist movement.
		3.6	Determine preferred movement pattern.
4	**Analyse the ergonomics of physical effort**	4.1	Analyse the ergonomics of the preferred movement pattern.
		4.2	Develop substitute movements for any movement which is not ergonomically sound.
		4.3	Determine handling aids required to improve ergonomics of required movements.
5	**Optimise application of physical effort**	5.1	Select movement patterns which are ergonomically sound and time and effort efficient.
		5.2	Ensure all relevant people are trained to use these methods.
		5.3	Ensure procedures and practices reflect the optimum methods.

© Commonwealth of Australia, 2025 Skills Insight

5.4 Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Procedures (written,	• work instructions

© Commonwealth of Australia, 2025 Skills Insight

verbal, visual, computer based, etc.) include one or more of:	• standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Manual handling hazards include one or more of	• loads that pose a risk of injury • ergonomically unsound movements • hazard requirements as defined by relevant work health and safety (WHS) Acts and regulations, industry standards and best practice.
Ergonomically unsound movements include one or more of	• awkward and repetitive movements • carrying, pushing, pulling or lifting of heavy loads • carrying or movement of hard, sharp, slippery or other difficult to grasp loads.
Ergonomically sound movements include one or more of	• keeping loads close to the body and near the person's centre of gravity • using diagonal foot positions for lifting • moving loads at waist height rather than directly from the floor.

Assessment Requirements for MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for at least (1) one job/process, to:

- analyse manual handling requirements and risks
- distinguish between ergonomically sound and unsound movement
- analyse manual handling movements and risks for an individual
- relate manual handling requirements to job efficiency.

Knowledge Evidence

- Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:
- principles of ergonomics/safe movement
- principles of work analysis
- relevant work health and safety (WHS) Acts and regulations as they apply to manual handling
- principles of job and work method design as applied to efficient and safe movement
- aids that can assist with or substitute for manual handling.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include analysing manual handling processes in own workplace

© Commonwealth of Australia, 2025 Skills Insight

  - will typically include the use of appropriate manual handling guides, tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS407014 Prepare for and implement change

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required to establish the preconditions for the implementation of a change, such as a ‘step change’ or a change resulting from a problem-solving exercise, such as a kaizen blitz. This unit applies to a desired change that has already been identified.

The unit applies to subsections of an organisation, such as a team, area or department, or a small or medium sized enterprise (SME). This unit may also be applied in service organisations applying competitive systems and practices principles.

This unit applies to team leaders or managers with influence, authority and responsibility over change processes.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Define the change**	1.1	Determine the purpose of the change
		1.2	Identify key change project personnel

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
		1.3	Record the current state that the change is addressing
		1.4	Develop a consensus view of the intended future state, including indicators of a successful change
		1.5	Develop an agreed statement of the solution
		1.6	Identify the health, safety and environment (HSE) impacts of the change
		1.7	Determine the scope of the change project, including the impact of the solution on any codes of practice, standards, contracts and commercial or industrial agreements
		1.8	Obtain sign-off from key change project personnel
2	**Identify personnel required to implement the change and their roles**	2.1	Develop a high level change network map
		2.2	Identify employees, suppliers or customers who may be required to implement the change
		2.3	Identify other demands on these people during the change
		2.4	Investigate priorities, synergies and conflicts
		2.5	Resolve conflicts impacting implementation
3	**Assess and manage the change related risks**	3.1	Identify organisational capacity for the change, including available resources and ability to absorb any disruption during the change
		3.2	Clarify specific risk dimensions for this change
		3.3	Develop transition approach
4	**Build and write high level change**	4.1	Develop high level involvement plan
		4.2	Develop high level stakeholder communication plan

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	plans	4.3	Develop high level competency development plan for all implementers
		4.4	Develop high level alignment plan
5	**Implement and sustain the change**	5.1	Implement change plans and monitor to confirm change objectives have been met
		5.2	Transfer ownership of post-change operations from change agents
		5.3	Ensure support structures are in place
		5.4	Check alignments have been obtained
		5.5	Check competencies have been developed and will be maintained
		5.6	Ensure base line is defined for continuous improvement
		5.7	Review project and capture learning from the project
		5.8	Sustain improvement by standardising

Assessment Requirements for MSS407014 Prepare for and implement change

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned for and implemented change for at least 1 already identified change in an organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- competitive systems and practices principles
- change management and high level change plans
- high level change network
- key change personnel
- organisation change capacity
- specific risk dimensions
- transition approach to change
- methods of determining competency gaps in team members
- project planning and management.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS407015 Build relationships between teams in an operations environment

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required to develop respect and trust between individuals, teams, supervisors and management to develop a suitable culture for implementing and sustaining competitive systems and practices initiatives. This includes developing a 'whole of value stream' view so that there is not competition between individuals or teams, but rather cooperation to achieve organisation and value stream goals with competition being directed towards other organisations competing in the marketplace.

This unit applies to team leaders or managers with influence, authority and responsibility over teams and who have a role in assisting with implementing an organisation competitive systems and practices culture.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify organisational**	1.1	Map actual and intended process flows within and between teams

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	relationships	1.2	Map actual and intended communication, information and data flows within and between teams
		1.3	Identify and map other interactions (actual and intended) within and between teams
		1.4	Determine the consequences in terms of customer benefit of intended flows and interactions
		1.5	Determine the consequences in terms of customer benefit of the actual flows and interactions
2	**Foster cooperation within team**	2.1	Present relationships information to team members
		2.2	Discuss areas where greater cooperation would yield benefits
		2.3	Agree on ways to achieve greater cooperation in these areas
		2.4	Facilitate team implementation of agreed changes
3	**Foster cooperation between teams**	3.1	Present relationships information to teams and team representatives
		3.2	Discuss areas where greater cooperation would yield benefits
		3.3	Agree on ways to achieve greater cooperation in these areas
		3.4	Obtain approvals for proposed changes
		3.5	Facilitate implementation by teams of agreed changes
4	**Identify sources of tension, conflict or competition**	4.1	Examine team and individual key performance indicators (KPIs) for sources of conflict and competition
		4.2	Examine flows and interactions for sources of conflict and competition

© Commonwealth of Australia, 2025 Skills Insight

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	4.3	Observe interactions between team members and identify tensions, conflicts and competition
	4.4	Observe interactions between teams and identify tensions, conflicts and competition
	4.5	Observe response to change and resistance to change
5 **Reduce causes of tension, conflict or competition**	5.1	Draft modified KPIs to reduce causes of conflict and competition
	5.2	Draft modified systems causing conflicting flows and interactions
	5.3	Facilitate discussions within and between teams to identify causes of tensions, conflicts and competition
	5.4	Facilitate discussions to develop a consensus solution to identified causes of tensions, conflicts and competition
	5.5	Obtain any required approvals for suggested and drafted changes
	5.6	Facilitate the implementation of the agreed solutions
	5.7	Monitor implementation and take actions to ensure agreed changes become standard practice

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS407015 Build relationships between teams in an operations environment

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- critically examined and mapped relationships within and between downstream, upstream and support teams for at least 1 organisation
- identified sources of conflict, tensions and competitions and developed, implemented and monitored at least 1 consensus solution.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- competitive systems and practices principles, strategies and techniques
- organisational goals, products and processes
- types of KPIs, their applications and limits
- approval processes within organisation
- communication methods across a variety of media and formats, including preparation of formal proposals and negotiations
- continuous improvement
- process mapping, communication and people interaction mapping
- customer perception of value.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS408003 Develop models of future state operations practice

Modification History

Release 1. Supersedes and is equivalent to MSS408003A Develop models of future state operations practice

Application

This unit of competency covers the skills and knowledge required to establish processes for identifying future state models of best practice for operations that are then used as the template for both strategic decision making and goal setting. It may be applied to whole organisations or significant sections of the value stream.

This unit applies in an environment where operations practices are standardised and there is a culture that accepts sustaining improvements and building on them. It is intended for managers and people with a similar sphere of influence.

This unit applies to individuals who are familiar with competitive systems and practices, value stream mapping and culture improvement.

This unit may also be applied to non-production areas and service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Develop a shared future state model**	1.1	Establish an appropriate representative team.
		1.2	Analyse a value stream map of an appropriate section of the value stream.
		1.3	Determine the current state of practice across the value stream.
		1.4	Identify overall organisation strategy, direction and competitive systems and practices philosophy.
		1.5	Validate view with process/system owner.
2	**Develop and review a collaborative best practice model**	2.1	Develop a future state model of practice.
		2.2	Review model with process/system owners and other stakeholders across the value stream as appropriate.
		2.3	Modify model to deliver better results for the customer and reduce muda.
		2.4	Develop implementation plan in consultation with stakeholders.
3	**Provide the resources necessary to move to the future state**	3.1	Identify changes required to infrastructure.
		3.2	Determine benefit/cost for required changes.
		3.3	Prioritise required changes.
		3.4	Obtain required authorisations.
		3.5	Facilitate the provision of resources needed to implement plan.
4	**Review future state model**	4.1	Manage the implementation of improvements.
		4.2	Identify measures of progress towards agreed future state.

© Commonwealth of Australia, 2025 Skills Insight

4.3 Review progress towards future state.

4.4 Agree methods of improving areas which could progress better.

4.5 Agree on methods for evaluating future state.

4.6 Validate measures and methods with relevant managers.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures

	• current reality tree.
Organisation includes one or more of:	• any part of a manufacturing or service organisation • companies, government bodies or other body of people aiming to produce a product to service a customer.
Representative team includes members from one or more of:	• the value stream representing key parts of that chain • inside the organisation • outside the organisation.
Infrastructure includes consideration of all of:	• policies and procedures • plant and equipment • materials, energy, utilities and other consumables • workforce arrangements, including employee numbers, organisation structure, competencies and competency mix.
The purpose(s) of the future state model of practice includes consideration of all of:	• the required organisation strategy and philosophy • the direction of improvements and actions • forecasts of key indicators.
Measures of progress include one or more of:	• metrics and other indicators defined and agreed before the commencement of implementation • metrics which provide feedback on the progress towards the future state.
Manager includes one or more of:	• a person who has a formal, permanent position • a person with an ad hoc role in facilitating the function of multiple teams in a workplace, departments or entire organisations.

Assessment Requirements for MSS408003 Develop models of future state operations practice

Modification History

Release 1. Supersedes and is equivalent to MSS408003A Develop models of future state operations practice

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop one (1) or more models of future state operations practice and to:

- develop a shared future state model
- develop a collaborative best practice model
- facilitate the provision of resources allowing for the implementation of the improvement
- review progress towards the future state.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop models of future state operations practice, including knowledge of:

- key indications of current position or progress towards the future state, such as output quantities and qualities, variability in quality and quantity, uptime, investment hurdle rates and actual rates of return, sustainability indicators, reliability indicators, other key performance indicators (KPIs) appropriate to the organisation and its technology and processes
- value stream mapping and analysis
- types of muda (waste), causes and costs
- competitive systems and practices tools relevant to the organisation and process
- techniques for creating and evaluating future state models.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Skills Insight

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real activity developing models of future state operations practice for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSTGN3007 Monitor and operate trade waste

Modification History

Release 1. Supersedes and is equivalent to LMTGN3007B Monitor and operate trade waste

Application

This unit of competency covers the skills and knowledge required to monitor, operate, measure and report on trade waste system performance and process quality control.

This unit of competency applies to processing plant operations and inspection of work areas, monitoring, operating, measuring and reporting on trade waste systems.

Work may be conducted in restricted spaces or exposed conditions or controlled or open environments.

This unit of competency is applicable to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine job requirements**	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	**Monitor treatment plant performance**	2.1	Conduct and assess routine plant inspections in accordance with organisational and plant requirements
		2.2	Collect and conduct tests of process samples
		2.3	Collect and report process data according to organisational and plant requirements and workplace procedures
		2.4	Identify corrosion damage
3	**Control chemical use**	3.1	Use, handle and store chemicals in accordance with organisational and statutory requirements
		3.2	Prepare chemical dosing in accordance with plant processes and organisational and statutory requirements
		3.3	Maintain information related to chemical supply and usage in accordance with statutory requirements
		3.4	Interact and communicate with other employees and relevant authorities
4	**Operate and control processes**	4.1	Monitor processes to maintain parameters of operation
		4.2	Identify and report process faults and operational conditions of plant in accordance with organisational and statutory requirements

© Commonwealth of Australia, 2025 Skills Insight

4.3	Assess basic system adjustments to enhance system performance in accordance with organisational and statutory requirements
4.4	Compile reports compiled from plant and system data to meet organisational and statutory requirements

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices
Australian Standards include:	• the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Process includes, but is not limited to, one or more of the following:	• chemical precipitation • activated sludge • biodegradable reduction • solids handling

© Commonwealth of Australia, 2025 Skills Insight

Data includes, but is not limited to, one or more of the following:	• plant performance data • chemical usage
Tests include, but are not limited to, one or more of the following:	• settling tests • pH • dissolved oxygen
System adjustments include, but are not limited to, one or more of the following:	• pH correction • dissolved oxygen levels
Equipment includes, but is not limited to, one or more of the following:	• electronic monitoring and metering systems • manual chart recording systems • laboratory testing and sampling equipment • computerised equipment

Assessment Requirements for MSTGN3007 Monitor and operate trade waste

Modification History

Release 1. Supersedes and is equivalent to LMTGN3007B Monitor and operate trade waste

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- conducting routine plant inspections, assessing processes, and collecting and conducting tests of process samples, in accordance with organisational and plant requirements
- complying with organisational and statutory requirements to use, handle and store chemicals, prepare and apply chemical and biological dosing
- maintaining accurate records of test results/work records
- communicating effectively within the workplace and maintaining information related to chemical supply and usage
- interpreting and applying established procedures
- identifying and reporting process faults and operational conditions of plant in accordance with organisational and statutory requirements
- compiling reports compiled from plant and system data to meet organisational and statutory requirements
- applying workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry process and equipment
- system hydraulics and layout, control systems
- chemical dosing processes
- hazardous material handling procedures
- work health and safety (WHS) and environmental aspects of relevant testing processes
- workplace procedures and reporting processes
- quality practices
- workplace procedures
- recording and reporting practices.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in monitoring and operating trade waste, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The unit is applicable to all TCF sectors and assessment must ensure it is delivered to suit the industry it is being applied to.

NWPGEN006 Implement and manage environmental management policies

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to NWP505B Implement and monitor environmental management policies, plans, procedures and programs. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • Elements 2 and 3 merged • PC 3.1, 3.2 and 3.3 merged

Application

This unit describes the skills required to organise activities associated with the implementation and management of environmental management policies. The ability to consult with stakeholders effectively and interpret complex information is central to effective performance.

This unit applies to those working as managers with responsibility for environmental management within the organisation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, supervising staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

© Commonwealth of Australia, 2025 Skills Insight

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Gather environmental management information	1.1 Review and interpret the organisation environmental policies and plans against current environmental legislation and perceived stakeholder attitudes and expectations. 1.2 Identify all stakeholders and their relationship with the enterprise and their impact on, or relationship with, policies and plans. 1.3 Identify the available resources to implement policies and plans. 1.4 Confirm responsibilities and authorities as outlined in the policies and plans. 1.5 Establish best practice procedures for the implementation of management plans.
2. Implement and monitor environmental policies and plans	2.1 Develop and apply environmental management processes and workplace procedures to achieve policy. 2.2 Monitor the effectiveness of policies and plans against objectives, timelines and key performance indicators. 2.3 Audit environmental management processes and workplace procedures. 2.4 Review and modify processes and procedures to achieve policy and plan objectives. 2.5 Identify, quantify and report environmental risks as well as existing and potential events and or activities that may affect the environment.
3. Implement and monitor the procedures for quantifying environmental impacts and controlling risks	3.1 Implement work procedures to control risks or remedy damage. 3.2 Monitor risk control measures and report results. 3.3 Identify inadequacies in risk control measures, report to the appropriate authority and remedy. 3.4 Quantify and record environmental impacts. 3.5 Report adverse environmental impacts and make recommendations to minimise the impacts.
4. Implement and monitor procedures for dealing with	4.1 Implement workplace procedures for managing incidents of environmental significance or harm to ensure prompt control and remediation.

© Commonwealth of Australia, 2025 Skills Insight

environmental incidents	4.2 Investigate incidents of environmental impact to identify their cause. 4.3 Implement control measures to prevent recurrence and minimise risks of events. 4.4 Record and report incidences of environmental impact, significance or harm according to enterprise procedures and legislative requirements.
5. Maintain environmental records	5.1 Complete environmental management documentation for the work area. 5.2 Store environmental records for easy access and review. 5.3 Identify long term trends and impacts through review and assessment of environmental records. 5.4 Report results of record reviews.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5
Learning	Reading	Writing	Oral communication	Numeracy

Performance variables:

1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5
Support	Context	Text complexity	Task complexity

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP505B Implement and monitor environmental management policies, plans, procedures and programs.

Assessment Requirements for NWPGEN006 Implement and manage environmental management policies

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying relevant legislative requirements
- applying enterprise environmental policies
- consulting and communicating with internal and external groups and/or individuals
- assessing environmental risks
- applying control procedures
- responding to emergencies
- managing records
- managing activities associated with the implementation and management of environmental management policies, plans, procedures and programs
- gathering and interpreting information relating to environmental management
- implementing environmental management plans in consultation with relevant stakeholders
- monitoring the effective implementation of environmental management plans
- assessing and managing risks
- taking effective steps to ensure the remediation of environmental problems or impacts
- collecting, recording, assessing and reporting data associated with the performance of the environmental management plan

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

© Commonwealth of Australia, 2025 Skills Insight

- enterprise consultation processes
- economic systems and development needs
- enterprise emergency response requirements
- WHS legislation
- relevant legislation, policies and procedures

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPGEN008 Sample and test wastewater

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. • New unit • Created drawing upon information from deleted units NWP210B and NWP218B

Application

This unit describes the skills required to collect and prepare wastewater samples and to perform basic wastewater tests. This unit does not include off-site laboratory testing.

This unit applies to those working in field operations within the water industry, but might be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, while performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

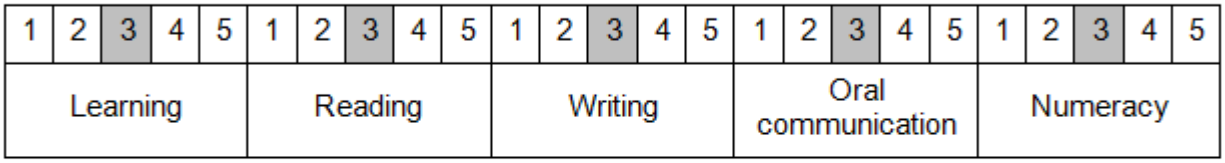
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for wastewater sampling and testing	1.1 Receive instructions for taking samples and conducting basic water quality tests. 1.2 Confirm and record samples and tests to comply with requirements. 1.3 Select, check and prepare equipment and resources. 1.4 Select and apply relevant sample preservation methods. 1.5 Select, fit and use personal protective equipment.
2. Conduct wastewater sampling and testing	2.1 Adopt hygienic work practices. 2.2 Collect samples ensuring that types, locations and times comply with requirements. 2.3 Prepare samples for off-site laboratory testing according to requirements. 2.4 Maintain integrity of samples during sampling and on-site testing. 2.5 Conduct basic on-site wastewater tests. 2.6 Assess and report abnormal characteristics and apply incident management principles. 2.7 Record samples and results of on-site analysis. 2.8 Limit hazards and contamination to self, work area and environment.
3. Finalise work	3.1 Apply chain of custody principles. 3.2 Report observations or measurements requiring further action. 3.3 Dispose of samples and clean and store test equipment. 3.4 Clear and restore work area.

Foundation Skills

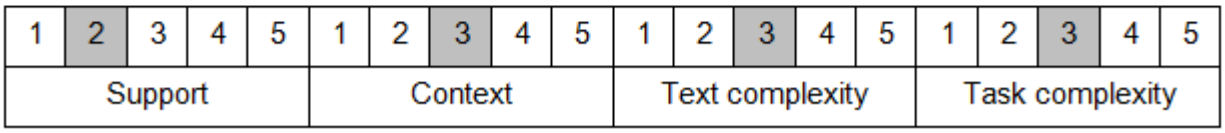
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Skills Insight

ACSF levels indicative of performance:



Performance variables:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

On-site test include:	• turbidity • pH • dissolved oxygen • electrical conductivity • temperature
Sampling conditions include:	• physical • microbial • chemical • radiological
Sampling methods include:	• automatic • manual

Unit Mapping Information

No equivalent unit.

Assessment Requirements for NWPGEN008 Sample and test wastewater

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. To be deemed competent the candidate must be assessed in a minimum of three of the types of tests, one of the types of condition and one of the types of methods listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- calibrating testing equipment
- interpreting sampling and testing requirements
- preparing, checking and using equipment
- preparing, collecting, labelling and preserving water samples
- disposing of waste and spent samples
- planning and preparing for water sampling tasks
- recording all required information

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

Basic knowledge of:

- chain of custody
- range and purpose of basic wastewater testing and sampling
- relevant policies and procedures
- blind sampling
- abnormal characteristics of water samples
- atypical test result data
- relevant work-related calculations
- maintenance and storage of reagents

© Commonwealth of Australia, 2025 Skills Insight

- requirements for maintaining sample integrity
- relevant legislative and organisational requirements
- water sample preparation
- work planning processes
- effects of weather and conditions on work
- hazards associated with collection of water samples
- incident management principles

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPNET023 Maintain and repair network assets for wastewater

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. • New unit, created drawing upon information from deleted units NWP255B, NWP257B, NWP253B and NWP229B

Application

This unit describes the skills required to maintain and repair pipes, drains and wastewater collection assets.

This unit applies to those working as field staff with specific responsibility for ensuring that repair and maintenance of wastewater assets is completed in a safe and timely manner.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, while performing routine tasks, in a familiar context, ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Networks

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA

the essential outcomes	achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Conduct risk assessment for environmental and safety factors. 1.2 Determine work requirements, materials and configuration from plans, specifications, instructions and/or organisational procedures. 1.3 Check coordination issues with relevant personnel, including isolations, licences and permits to work. 1.4 Identify networks system operation requirements. 1.5 Arrange remove site protection.
2. Conduct maintenance	2.1 Isolate the work area. 2.2 Determine appropriate repair method from job specifications and instructions. 2.3 Maintain and repair structural damage to assets. 2.4 Check maintenance and repairs to assets to ensure specifications are met. 2.5 Restore work site to meet environmental and organisational requirements.
3. Review, report and record work	3.1 Check, tag and report faulty equipment and tools. 3.2 Store equipment, tools and materials. 3.3 Complete and process workplace records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	**3**	4	5	1	2	**3**	4	5	1	2	3	**4**	5	1	2	**3**	4	5	1	2	3	**4**	5

Assessment Requirements for NWPNET023 Maintain and repair network assets for wastewater

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed on at least two of the network assets listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- planning work site i.e. personnel, equipment, materials
- requesting permits, approvals, other utilities diagrams and maps
- conducting risk implementing appropriate environmental controls
- using tools and specific wastewater equipment
- selecting and applying PPE
- preserving personal safety
- performing work-related calculations
- identifying and responding to operational problems including main, connection chokes, pump stations and faults
- using communication tools including phones and laptops
- interpreting plans, instructions and procedures
- determining location, size, utilities, services from plans, specifications and organisational procedures
- applying excavation techniques
- maintaining and repairing wastewater pipes and fittings by:
  - undertaking excavation
  - clearing chokes
  - undertaking CCTV inspection for roots intrusion, storm water ingress and infiltration
  - jet foaming
  - jet cleaning
  - installing connections
  - installing pipes and fittings
  - measuring and cutting pipes
  - making joints

© Commonwealth of Australia, 2025 Skills Insight

    - selecting and placing bedding and backfill material
    - locating and repairing chokes
    - repairing valves
    - controlling flows in gravity networks
- maintaining and repairing structures by:
    - undertaking excavation
    - repairing access chambers
    - maintaining pump stations

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- system hydraulics basics
- infiltration
- roots intrusion
- storm water ingress
- excavation techniques
- ground support systems
- environmental and health aspects and impacts
- relevant legislation, policies and procedures
- safety data sheets (SDS)
- landscape and ground structure of work area
- equipment operation, capacity and limitations
- control systems
- pipe systems and installation requirements
- characteristics of pipe materials
- testing and sampling systems
- methods of repairing concrete, brick and stone structures
- concrete placement techniques, including compaction
- relevant utilities and service bodies to identify allocation of road reserve
- effects of weather and conditions on construction site or plant
- requirements around excavation
- Cathodic Protection, Denso wrap, Stopaq

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPNET025 Coordinate and manage maintenance and repair of network assets

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to NWP303A Monitor and control maintenance of water and wastewater system assets. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • PC 3.1 removed

Application

This unit of competency describes the skills required to inspect asset condition, to plan for asset repairs and to monitor and report on maintenance and repair work completion. The ability to identify faults, gather data, interpret technical information, assess risks and produce technical work plans and reports are essential to performance.

This unit applies to those working as field staff with responsibility for ensuring that water collection, distribution, storage and transfer assets are regularly monitored and for conducting scheduled maintenance and repair work on assets.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, in a familiar context, while performing routine tasks ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

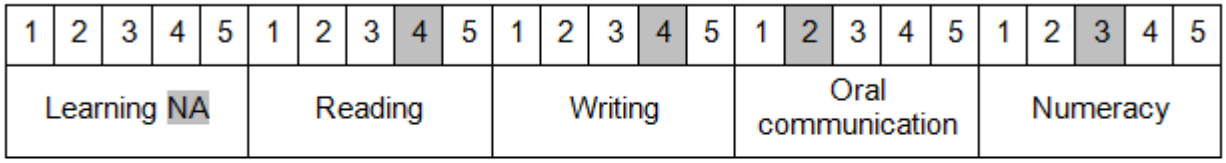
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Analyse asset condition and determine remedial action	1.1 Schedule routine inspections of assets and monitor fault reporting. 1.2 Collect and analyse data on asset and infrastructure condition. 1.3 Determine and cost asset maintenance and repair methods. 1.4 Select, fit and use equipment including personal protective equipment.
2. Plan and prepare for asset repair	2.1 Schedule and plan work site investigations and repair activities. 2.2 Develop repair plans and procedures and communicate to all stakeholders. 2.3 Assess and record environmental and WHS risks and specify appropriate preventative measures. 2.4 Select equipment, materials, prefabricated components and fittings and make available for use on site.
3. Monitor and report maintenance activities	3.1 Monitor repair and maintenance progress and keep records. 3.2 Inspect, confirm and report completion of repair and maintenance.
4. Complete records and reports	4.1 Complete workplace records and reports. 4.2 Make recommendations which contribute to the continuous improvement and quality of the organisation’s systems.

Foundation Skills

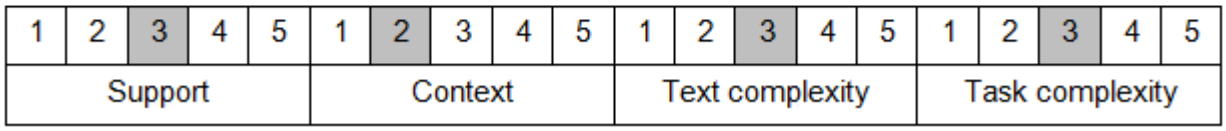
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Skills Insight

ACSF levels indicative of performance:



Performance variables:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP303A Monitor and control maintenance of water and wastewater system assets.

Assessment Requirements for NWPNET025 Coordinate and manage maintenance and repair of network assets

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and solving operational problems
- undertaking calculations
- determining work requirements
- monitoring system operations and processes
- producing reports and logs
- using safety equipment and personal protective equipment
- interpreting plans and instructions
- interpreting the organisation’s policies, standard operating procedures and standards for monitoring and maintenance of assets
- calculating water pressures and flows
- conducting operational and maintenance inspections
- monitoring fault reports
- collecting and analysing operational and mechanical data
- identifying and assessing work methods effectiveness
- planning investigations and repairs
- developing repair procedures
- assessing risks and specifying preventive methods
- selecting equipment, materials, prefabricated components and fittings

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- environmental aspects of water distribution systems and infrastructure
- WHS procedures
- lock out procedures for mechanical and electrical installations
- cleaning and protection of assets
- policies and standard operating procedures for monitoring and maintenance of assets
- relevant utilities and service bodies
- communication systems
- environment, landscape and ground structure of work area
- risk factors and potential hazards involved with water pressures and flows
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of supply infrastructure
- system pipes and fittings
- pumping and valving systems
- system layout, process, operation
- gravity systems
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPNET042 Monitor and operate wastewater collection and transfer systems

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to NWP311B Monitor and operate wastewater collection and transfer systems. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the outcomes required to monitor and coordinate the operation of wastewater collection and/or wastewater transfer systems and to measure and report on the operation of the system. The ability to interpret technical documentation, identify and investigate operational problems and to collect and analyse technical information is essential to performance.

This unit applies to those working as field staff and operators with a specific responsibility for inspecting and measuring the performance of wastewater collection and/or wastewater transfer systems and for ensuring that flows are regulated according to organisational specifications and system demands.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under indirect supervision, while performing routine tasks, in a familiar context, ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for NWPNET042 Monitor and operate wastewater collection and transfer systems

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- responding to and correcting operational problems
- interpreting plans, charts, service search diagrams, instructions, policies and specifications
- controlling system operations
- identifying control system faults
- monitoring and coordinating the operation of wastewater collection and/or wastewater transfer systems
- preparing equipment for monitoring and inspections
- monitoring the system and collecting, analysing and reporting data according to organisational procedures
- reviewing samples and records
- adjusting flow regulating systems
- monitoring volumes and flows
- controlling, integrating and optimising processes
- identifying and reporting process faults
- measuring wastewater flows
- completing relevant workplace documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

NWPTRT052 Operate and control hypochlorite disinfection processes

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to NWP268B Monitor, operate and report chlorine disinfection systems. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • Elements 2 and 3 reworded • One new PC added to Elements 1 and 3 • PC 2.3 removed • PC 3.1 revised and renumbered • PC 2.4 and 3.3 renumbered • PC 3.2 and 4.1 revised

Application

This unit describes the skills required to monitor and operate hypochlorite disinfection systems and report on process quality control. This includes the skills required to working safely with sodium hypochlorite solutions and calcium hypochlorite solids, including their safe handling, transport and storage and implementation of emergency response procedures.

This unit applies to those working as operational staff with specific responsibility for hypochlorite disinfection systems in water and wastewater treatment plants.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and handling of dangerous goods.

© Commonwealth of Australia, 2025 Skills Insight

Those undertaking this unit would work under supervision, while performing routine tasks, in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Treatment

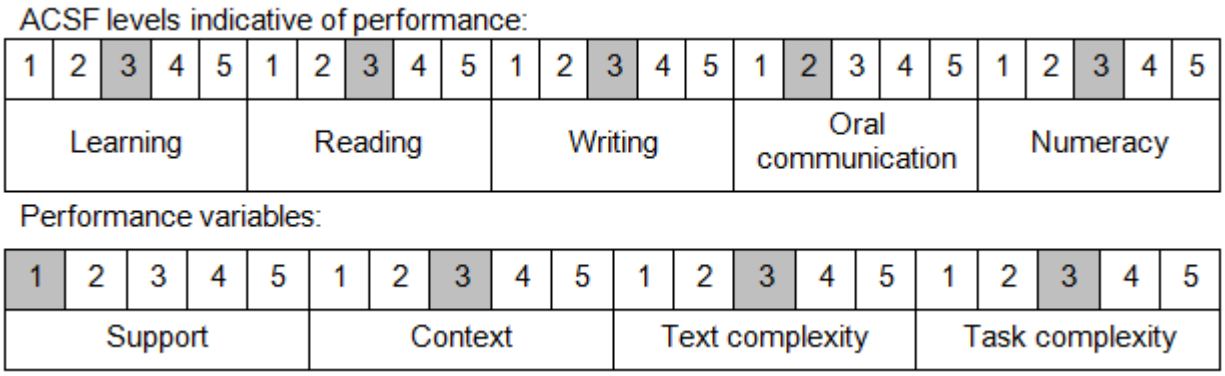
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Determine work requirements from job specification and plans. 1.2 Select and check equipment and hypochlorite supplies to meet safety requirements of task and site. 1.3 Select, fit and use personal protective equipment. 1.4 Handle and store hypochlorite chemicals to maximise shelf life and reduce loss of available chlorine. 1.5 Conduct the percentage available chlorine test.
2. Monitor process performance	2.1 Monitor hypochlorite disinfection ***processes*** according to agreed schedule and procedures. 2.2 Collect samples and conduct process tests. 2.3 Make process adjustments as required to maintain effectiveness of hypochlorite disinfection.
3. Apply chemical dosing	3.1 Prepare and apply hypochlorite chemicals. 3.2 Control hypochlorite ***dosing*** to maintain required residual.
4. Complete documentation	4.1 Maintain information relating to hypochlorite supply and usage. 4.2 Collect and record process data. 4.3 Report observations outside defined parameters for further action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Skills Insight



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

Processes include:	• sodium hypochlorite solution • sodium hypochlorite
Technologies include:	• calcium hypochlorite granules • calcium hypochlorite tablets
Dosing procedures include:	• chlorinator shutdown, start up and isolation • purging operations • leak testing • dosing pump checks

Unit Mapping Information

This unit supersedes and is equivalent to NWP268B Monitor, operate and report chlorine disinfection systems.

Assessment Requirements for NWPTRT052 Operate and control hypochlorite disinfection processes

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least one type of process, in at least one type of technology and in at least one type of dosing procedure listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying policies, standard operating procedures and regulatory standards
- performing work-related calculations
- identifying and responding to process faults and control system faults
- identifying hazards
- performing hypochlorite tests and chlorine residual sampling and testing
- interpreting safety data sheets (SDS)
- monitoring, operating and reporting on hypochlorite disinfection systems
- selecting and using appropriate tools and equipment, including personal protective equipment
- collecting and reporting process data
- preparing and applying hypochlorite dosing safely
- performing process calculations, including at least one of:
  - feed rate
  - dosage
  - Ct

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- properties and chemistry of hypochlorite chemicals
- effects of pH, time, temperature, UV exposure and impurities on hypochlorite breakdown
- microbiological guidelines
- reactions with water to produce hypochlorous acid/hypochlorite ion
- impact of pH
- chlorine demands, including:
  - ammonia
  - natural organic matter (NOM)
  - turbidity
  - iron, manganese and nitrite
- disinfection by-products (DBP)
- breakpoint
- contact time
- hypochlorite dosing system layout for sodium hypochlorite and/or calcium hypochlorite dosing systems
- hazardous substances handling
- risk factors and potential hazards associated with hypo chlorination
- work-related hypochlorite calculations
- hypochlorite dosing processes
- automatic feed rate control systems
- SDS

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Some components of this unit require assessment in a workplace environment therefore the unit is not suitable for fully external or electronic based assessment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPTRT054 Operate and control chloramination processes

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to NWP366A Monitor, operate and control chloramination disinfection processes. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • Elements reordered • One new PC added to Element 1

Application

This unit describes the skills required to monitor, operate and control chloramination processes; and to measure and report on system performance and process quality control. The ability to identify faults, determine and apply technical adjustments is essential to performance.

This unit applies to those working as operational staff with a specific responsibility for chloramination processes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those relating to storage and handling of hazardous substances and dangerous goods.

Those undertaking this unit would work under supervision, while performing routine tasks, within a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for NWPTRT054 Operate and control chloramination processes

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- operating control and chemical dosing equipment
- performing chloramination process calculations including at least one of:
  - chlorine and ammonia dose rate
  - chlorine to ammonia ratio
  - dichloramine concentration
- collecting samples and conducting tests including at least one of:
  - total chlorine
  - free chlorine
  - monochloramine
  - ammonia and hypochlorite strength
  - pH
- analysing tests
- identifying and reporting process and operational faults
- monitoring chloramination systems
- making appropriate system adjustments including at least one of:
  - flow rate
  - chlorine feed rate
  - ammonia feed rate
  - chlorine to ammonia ratio
  - calibration of chemical dosing equipment
- preparing and applying chloramination chemical dosing, including at least one of:

© Commonwealth of Australia, 2025 Skills Insight

- liquefied chlorine gas
- sodium hypochlorite
- anhydrous ammonia
- aqua ammonia
- pH correcting chemicals including lime soda ash
- sodium hydroxide

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- microbiological aspects of water quality
- chloramination process theory
- chlorine and ammonia dosing equipment
- operational problems including nitrification
- lockout procedures for mechanical and electrical installations
- risk factors and potential hazards associated with chloramination processes
- equipment operation, capacity and limitations
- control and communications systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Some components of this unit require assessment in a workplace environment therefore the unit is not suitable for fully external or electronic based assessment.

Consideration must be given to holistic assessment for this unit. Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. • New unit • Created drawing upon information from deleted units NWP262A, NWP263A and NWP346B

Application

This unit of competency describes the skills required to operate and control a wastewater treatment plant and report on system performance and process quality control. The ability to operate wastewater treatment processes to ensure that wastewater disposal or re use meets state or territory licensing requirements is essential to performance.

This unit applies to those working as operational staff in wastewater treatment plants with responsibility for the practical and safe operation of plant, equipment and processes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those relating to WHS.

Those undertaking this unit would work under supervision, performing routine tasks within a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Determine work requirements from work specifications and plans. 1.2 Select and check equipment required to meet safety requirements of task and site. 1.3 Select, fit and use safety equipment including personal protective equipment.
2. Operate and control processes	2.1 Carry out routine plant inspections according to the type of plant. 2.2 Identify and report process faults and the operational condition of the plant. 2.3 Collect samples and conduct standard tests. 2.4 Carry out basic adjustments to improve process performance.
3. Complete documentation	3.1 Collect, record and complete process data. 3.2 Identify data that falls outside normal parameters and report for further action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy					

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

© Commonwealth of Australia, 2025 Skills Insight

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

Current processes include:	• primary processes:
	  • screening
	  • grit removal
	  • primary sedimentation
	  • odour control
	• secondary processes:
	  • activated sludge
	  • nutrient removal
	  • trickling filters
	  • lagoons
	• tertiary processes:
	  • lagoons
	  • clarification
	  • membrane filters
	  • granular filters
	  • disinfection
	• solids management:
	  • aerobic/anaerobic
	  • dewatering
	  • gas management
	  • thickening

Unit Mapping Information

No equivalent unit.

Assessment Requirements for NWPTRT061 Operate and control wastewater processes

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least one of the processes listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- conducting routine plant inspections
- interpreting safety data sheets (SDS)
- applying basic mathematical formulae
- completing logs
- determining chemical dosing requirements

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- sources of wastewater
- water cycle
- basic hydraulics and organic loading in wastewater plants
- basic chemistry and microbiology
- types of components
- relevant technologies
- weather influence on wastewater plants
- odour control
- physical, chemical and microbiological characteristics and operating principles relating to wastewater treatment
- reasons for wastewater treatment
- types of wastewater treatment plant processes

© Commonwealth of Australia, 2025 Skills Insight

- major chemicals and equipment used
- risk factors and potential hazards relating to wastewater treatment
- chemical and biological principles that form the basis of wastewater treatment
- chemical dosing processes
- relevant guidelines and standards
-

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPTRT062 Operate and control reclaimed water irrigation

Modification History

Release	Comments
1	This unit was released in NWP National Water Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to NWP362B Monitor, operate and control reclaimed water irrigation. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes

Application

This unit describes the skills required to operate and control reclaimed water irrigation and the use of reclaimed water for irrigation practices.

This unit applies to those working as staff members with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, performing routine tasks in a familiar context, ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess sites for reclaimed water irrigation	1.1 Identify soil/water interactions and soil properties important for plant growth. 1.2 Identify soil sampling sites, collect samples and conduct soil testing. 1.3 Classify soils using field texture, pH and structure analysis. 1.4 Monitor and determine the water holding capacity of the soil.
2. Assess quality of reclaimed water for irrigation	2.1 Sample and test reclaimed water and interpret quality parameters. 2.2 Determine crops suitable for the quality of reclaimed water and site conditions.
3. Implement reclaimed water irrigation	3.1 Identify basic features of irrigation systems. 3.2 Operate and maintain irrigation equipment. 3.3 Identify and apply irrigation scheduling options for reclaimed water. 3.4 Produce water budgets using crop factors and climate data. 3.5 Apply irrigation water and collect and monitor tail water or runoff.
4. Respond to water or soil quality issues	4.1 Develop irrigation management options to respond to water quality issues. 4.2 Identify and apply requirements and options for soil ameliorants. 4.3 Monitor infiltration and drainage.
5. Compile reclaimed water irrigation records	5.1 Compile reports from system data. 5.2 Report observations outside defined parameters for further action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Assessment Requirements for NWPTRT062 Operate and control reclaimed water irrigation

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP National Water Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- monitoring and managing soil
- solving operational problems
- accessing, interpreting and applying relevant legislation
- apply environmental policies, plans and procedures
- assessing environmental risks at the work site
- identifying soil groups
- using safety and personal protective equipment
- sampling and testing soil and water
- monitoring, operating and controlling reclaimed water irrigation
- analysing critical aspects of reclaimed water reuse management relating to the project or site
- implementing reclaimed water reuse irrigation
- identifying environment, health and safety risks and impact on soil, stock and operators
- applying environmental procedures
- participating in and contributing to reviews of reclaimed water reuse procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- key principles of irrigation practices, including irrigation scheduling

© Commonwealth of Australia, 2025 Skills Insight

- key characteristics of reclaimed water
- relevant legislative requirements
- standard operating procedures
- primary agencies involved in drinking water quality management
- water quality performance indicators
- an overview of the water supply system
- water hazardous agents and preventative strategies
- community and agency roles and responsibilities in monitoring water quality
- best management practices for the use of reclaimed water for irrigation purposes
- reclaimed water usage licensing procedures and requirements
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site or plant
- interpretation and use of material safety data sheets
-

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain stock handling and storage	1.1.Maintain cleanliness of stock handling and storage areas. 1.2.Ensure correct environmental conditions for storage of

© Commonwealth of Australia, 2025 Skills Insight

areas.	perishable and other stock to prevent loss or damage as required. 1.3. Remove and dispose of waste to minimise safety risks and environmental impacts. 1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.	2.1. Check incoming stock quantities against order documentation. 2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel. 2.3. Record stock delivery, and report discrepancies with orders as required. 2.4. Unpack and handle stock according to manufacturer instructions and safe manual handing techniques to avoid personal health risk and stock damage. 2.5. Store or display stock promptly in designated location.
3. Replenish stock levels.	3.1. Rotate, replenish and present stock according to organisational requirements for stock levels. 3.2. Record stock waste or shrinkage according to organisational procedures. 3.3. Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to:	• interpret:
	  • plain English documents that outline organisational policies and procedures for stock control
	  • basic order and delivery documentation and stock labels.

Numeracy skills to:	• calculate stock levels.
Planning and organising skills to:	• complete stock control activities in a logical and time efficient sequence.
Technology skills to:	• use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
  - receive and process incoming stock
  - store retail stock
  - maintain retail stock levels
  - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
  - stock quality is poor
  - stock quantity errors
  - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
  - rotation and replenishment
  - product life cycle
- organisational stock control policies and procedures for:
  - receiving stock from suppliers
  - recording incoming stock
  - recording and reporting stock discrepancies and quality issues
  - recording stock waste and shrinkage
  - stock quality standards
  - unpacking, storage and display of stock
  - damaged or missing stock

© Commonwealth of Australia, 2025 Skills Insight

- key features of retail products that relate to handling and storage:
  - handling techniques to minimise damage
  - general care
  - optimum storage conditions
  - features of damaged or spoiled stock
  - correct disposal methods
- safe manual handing techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
  - delivery dockets
  - orders
  - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRINV002 Control stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor stock receipt and dispatch.	1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock. 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

© Commonwealth of Australia, 2025 Skills Insight

	correctly. 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards. 1.4. Act on variations to quantity and quality of delivered stock. 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.	2.1. Monitor stock and maintain stock at required levels. 2.2. Maintain, monitor and adjust stock reorder cycles as required. 2.3. Provide clear information to team members about individual stock recording responsibilities. 2.4. Maintain stock storage and movement records. 2.5. Record and report stock discrepancies. 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.	3.1. Process and raise stock orders according to organisational procedures. 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met. 3.3. Liaise with suppliers to ensure continuity of supply. 3.4. Resolve routine supply problems or refer to appropriate personnel for action. 3.5. Distribute stock within the organisation according to required allocations. 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.	4.1. Regularly check storage of stock and ensure its protection. 4.2. Identify, record and report stock losses. 4.3. Identify avoidable losses and establish reasons for them. 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.	5.1. Explain procedures for stocktake and cyclical counts to team members. 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task. 5.3. Provide team members with clear directions for performance of each task. 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.

Numeracy skills to:	• calculate:
	  • supplier costs and complex order costs
	  • complex details of stock on hand and stock losses and produce complex numerically-based reports
	• reconcile incoming stock and invoices against purchase orders.

Technology skills to:	• use business technology for inventory management.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)

© Commonwealth of Australia, 2025 Skills Insight

  - manual handling
  - licensing for mechanical movement of stock
- principles of stock control:
  - rotation and replenishment
  - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to coordinate store visual merchandising activities and ensure adherence to organisational standards, policies and procedures for the display of merchandise.

It applies to individuals working in frontline roles in a diverse range of retail industry sectors and business contexts that display retail products for sale. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Coordinate visual merchandise requirements.	1.1. Access and interpret organisational visual merchandising guidelines, and policies and procedures. 1.2. Communicate visual merchandising standards and display

© Commonwealth of Australia, 2025 Skills Insight

	requirements to team members. 1.3. Plan appropriate timing for producing and dismantling visual merchandise displays. 1.4. Communicate roles and responsibilities for visual merchandising to team members. 1.5. Plan and coordinate promotional and special event displays as directed by management.
2. Supervise visual merchandise activities.	2.1. Supervise construction and maintenance of displays to achieve balance and visual impact. 2.2. Ensure display information accurately depicts product or service being promoted. 2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow. 2.4. Ensure displays meet organisational standards and visual merchandise guidelines. 2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.
3. Review impact of visual merchandise activities.	3.1. Evaluate promotions or special event displays and determine impact on sales results. 3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Problem solving skills to:	• overcome difficulties relevant to the display of merchandise.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
  - an existing merchandise range
  - a new merchandise range
  - a seasonal merchandise range
  - a promotional event
  - discounted merchandise
- for each of the above visual merchandising activities:
  - communicate requirements with team members
  - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - merchandise labelling and pricing
  - required stock levels
  - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
  - Australian Consumer Law
  - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
  - types of displays and their impact

© Commonwealth of Australia, 2025 Skills Insight

    - display location
    - display lighting
    - display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
    - customer complaints
    - profitability
- safe work practices for displaying merchandise with particular emphasis on:
    - safe use of equipment
    - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
    - price
    - features
    - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
    - organisational visual merchandise display guidelines
    - organisational policies and procedures for:
        - merchandise labelling and pricing
        - required stock levels
        - merchandise rotation and replenishment
    - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
        - Australian Consumer Law
        - Work Health and Safety (WHS)
- team members; these can be:
    - individuals in an industry workplace, or

© Commonwealth of Australia, 2025 Skills Insight

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMRM001 Plan merchandise buying strategy

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan stock levels and purchase retail merchandise.

This unit applies to senior personnel working in a diverse range of retail sectors and business contexts. They operate independently and are responsible for making a range of operational business decisions and for the buying and planning of retail merchandise.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandise Management

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1.Undertake post trade analysis.	1.1.Complete a post trade analysis to review past performance against planned performance, identifying missed opportunities. 1.2.Analyse customer buying patterns, and predict future trends. 1.3. Review competitor activity within the local and global marketplace.

© Commonwealth of Australia, 2025 Skills Insight

	1.4.Consult relevant stakeholders for input on post trade analysis and future range strategy.
2. Determine strategy.	2.1 Determine range strategy for relevant future trading period based on post trade analysis.
	2.2 Determine price strategy, marketing strategy and product mix for the next trading period.
	2.3Communicate strategy to relevant personnel and seek input and approval as required.
3.Develop merchandise plan.	3.1.Review marketing calendar and new store openings and closures as required.
	3.2.Establish base line sales and gross margin requirements.
	3.3.Plan buying margin, markdowns, shrinkage and other reductions.
	3.4.Determine open to buy, weeks cover or other stock measures.
	3.5.Determine width and depth of range.
	3.6.Quantify products to be ordered.
4.Respond to trade.	4.1.Evaluate sales against plans and performance benchmarks and interpret impact to the forward plan.
	4.2.Manage merchandise plan in response to sales and account for variances in sales trends.
	4.3.Adjust purchases within the merchandise plan, and manage slow moving surplus stock or aged stock to minimise impact on overall margin.
	4.4.Consolidate stock as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Numeracy skills to:	• use mathematical formulas for the planning of merchandise.
Learning skills to:	• research the market place.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMRM001 Plan merchandise buying strategy

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- conduct a post trade analysis for one merchandise range or department
- determine and document the following details of the merchandise strategy based on the above post trade analysis, for the next trading period:
  - price strategy
  - marketing strategy
  - product mix
- develop a merchandise plan, for a specified trading period, based on the above post trade analysis and strategy that includes the following:
  - base line sales and gross margin requirements
  - buying margin, markdowns, shrinkage and other reductions
  - open to buy, weeks cover or other stock measures
  - width and depth of range
- take the appropriate action to respond to sales across the specified trading period.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational:
  - post trade results:
    - sales
    - Gross Profit
    - Gross Margin Return on Investment
    - sell through (or relevant measure)
    - rate of sale
    - average sale price
    - unit sales
    - purchase margin
    - markdown percentage

© Commonwealth of Australia, 2025 Skills Insight

    - sales plan
  - previous trading period data
  - sales and gross margin requirements
  - marketing calendar
- for the particular industry sector:
  - consumer buying patterns
  - competitor activity
  - customer needs
  - sales trends
  - trading periods
- merchandise strategy:
  - gross margin
  - production opportunities:
    - speed to market
    - purchase margin
  - markdown reduction
- management of stock in response to sales
  - forward cover
  - markdowns
  - purchases
  - aged stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- past performance data
- organisational marketing calendar
- store opening and closing information
- sales data
- stakeholders and suppliers with whom the individual can interact; these can be:
  - stakeholders and suppliers in an industry workplace, or
  - people who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment, clear registers, count money, calculate non cash transactions, and reconcile and record takings.

It applies to individuals working in frontline operational roles in a diverse range retail industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Retail Financials

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Balance and secure takings.	1.1. Perform register or terminal balance at designated times. 1.2. Separate cash float from takings prior to balancing and secure takings.

© Commonwealth of Australia, 2025 Skills Insight

	1.3. Supply change to register or terminal and accurately record. 1.4. Obtain and interpret register or terminal reading or print-out. 1.5. Secure cash and non cash documents according to organisational procedures.
2. Reconcile takings.	2.1. Count cash accurately. 2.2. Calculate non cash documents accurately. 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions. 2.4. Investigate or report discrepancies between register or terminal reading and sum of cash and non cash transactions to relevant personnel. 2.5. Record takings and file records according to organisational procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
  - balance a register or terminal on three occasions with complete accuracy
  - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
  - identify and resolve three different types of balancing discrepancies
  - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
  - opening and closing
  - balancing
  - clearance of terminal and transference of tender
  - recording takings
  - consumables required by system
  - security
- cash handling procedures:
  - counting cash
  - handling cash floats
  - change required, denominations of change and tendering change
  - security
- organisational policies and procedures for non-cash transactions:
  - credit cards
  - EFTPOS

© Commonwealth of Australia, 2025 Skills Insight

  - vouchers
- organisational policies and procedures for:
  - exchanges
  - refunds
  - lay-by
  - cash handling
  - cash float
  - operation of point-of-sale equipment
  - register or terminal balance
  - security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRRTF002 Monitor retail store financials

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to manage retail store financials by controlling costs, managing rosters and stock levels, and reviewing financial performance.

It applies to individuals working in frontline management roles in a diverse range of retail industry sectors and business contexts. They operate independently with some responsibility for others and decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Retail Financials

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Control cost of labour.	1.1. Develop rosters according to relevant industrial agreements and wage budgets and organisational policies and procedures. 1.2. Maximise operational and customer service efficiency while minimising wage costs.

© Commonwealth of Australia, 2025 Skills Insight

	1.3. Combine duties where appropriate to ensure effective use of team members. 1.4. Roster teams with most effective skills mix to meet operational requirements. 1.5. Use roster systems and equipment to administer rosters to team members. 1.6. Amend rosters and labour spend as required.
2. Control stock levels.	2.1. Manage stock levels to meet customer demand, maximise sales and minimise shrinkage. 2.2. Identify shrinkage costs and trends and take preventative action to minimise future shrinkage.
3. Review and address financial performance.	3.1. Analyse and report on budget and sales revenue and expenditure figures according to budget targets. 3.2. Interpret financial data to identify variations from budget, and take appropriate corrective action where deviations from budget occur. 3.3. Take action to minimise budget overspend and control costs. 3.4. Communicate to the team cost control measures within their area of responsibility.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Numeracy skills to:	• complete roster planning activities involving dates, times and staff ratios.
Problem-solving skills to:	• adjust rosters to account for changes to staffing requirements.
Technology skills to:	• use organisational software and equipment to monitor and plan retail financials.

Unit Mapping Information

Assessment Requirements for SIRRRTF002 Monitor retail store financials

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- implement and monitor a store budget over a store budgeting period by:
  - preparing and monitoring a staff roster
  - controlling stock levels
  - interpreting financial information and reporting on store performance
  - responding to three of the following situations:
    - significant deviations from budget occurs
    - scheduled labour is too high due to sales achievement below forecast
    - scheduled labour is too low due to sales achievement above forecast
    - shrinkage is high due to theft of goods
    - cost of goods is high due to markdowns
    - cost of goods is high due to damaged stock
    - sales targets consistently not achieved.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- relevant aspects of employment-related laws, as relevant to job role, covering rights and responsibilities of employees and employers:
  - Fair Work Act 2009: minimum workplace entitlements provided by the National Employment Standards (NES)
  - anti-discrimination and equal employment opportunity (EEO) law
- organisational policies and procedures for:
  - rosters
  - labour spend allowance
  - schedule amendment procedures
  - shrinkage concerns
  - human resource policies and procedures relevant to staff work hours and leave entitlements

© Commonwealth of Australia, 2025 Skills Insight

    - operational requirements of the business activity, department or event subject to rosters
    - wage budget for the business activity, department or event subject to rosters
- principles and techniques in:
    - interpreting store budgets
    - monitoring store budgets
    - controlling store costs
    - minimising shrinkage
- commercial impact of retail financials, both favourable and unfavourable:
    - customer service levels
    - stock levels to meet customer demand
    - shrinkage
    - labour spend to sales ratio
    - markdowns
    - theft
- sources of information on award and other industrial provisions
- key elements of applicable awards:
    - leave provisions
    - mandated breaks between shifts
    - maximum allowed shift hours
    - standard, overtime and penalty pay rates
- for the specific industry sector:
    - role of rosters in controlling labour costs
    - system capabilities and functions of roster software
    - formats for and inclusions of staff rosters
    - methods used to communicate rosters.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
    - store budgets
    - store financial reports
    - template store financial reporting documents
    - template store roster documents
    - current plain English guidelines issued by regulatory bodies covering:

© Commonwealth of Australia, 2025 Skills Insight

    - minimum workplace entitlements provided by the National Employment Standards (NES)
    - industrial awards for retail employees
- organisational policies and procedures for:
    - rosters
    - labour spend allowance
    - schedule amendment procedures
    - shrinkage concerns
    - human resource policies and procedures relevant to staff work hours and leave entitlements
    - operational requirements of the business activity, department or event subject to rosters
    - wage budget for the business activity, department or event subject to rosters.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for SIRXCEG003 Build customer relationships and loyalty

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information and assistance to four different customers regarding the following to build customer brand loyalty:
  - promotional activities
  - products and services
  - brand or business customer benefits
- identify trends in customer purchasing patterns and make recommendations that enhance customer service and loyalty
- take appropriate action to resolve two escalated customer complaints.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- techniques for:
  - providing personalised extemporary customer service
  - anticipating customer preferences, needs and expectations throughout the service experience
  - building customer loyalty
  - resolving escalated customer complaints
  - pacifying dissatisfied customers
- commercial benefits of building customer relationships and loyalty
- industry and organisational:
  - professional service standards
  - attitudes and attributes expected when engaging with customers
  - different customer service needs and expectations
  - types of customer benefits
  - essential features and use of customer databases
- key aspects of Australian consumer and privacy law as relevant to customer interactions.

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
  - monitoring adherence to organisational security policies and procedures
  - responding to two occurrences of non-adherence to security policies and procedures
  - communicating security policies and procedures to one team member
  - ensuring security equipment is utilised and in correct working order
  - reporting on opportunities for improved store security.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - use of security equipment
  - suspicious customer behaviour
  - suspicious team member behaviour
  - armed robbery
  - cash and non-cash security
  - merchandise security
  - theft
  - responding to security breaches
  - reporting security risks and breeches
  - surveillance of merchandise
  - personal security
  - general store security
  - team members' security training
  - security for opening and closing premises
  - reporting problems and faults
  - security of visitors, sales representatives, contractors and vendors
  - security risks likely to endanger customers or team members

© Commonwealth of Australia, 2025 Skills Insight

- legislation as relevant to store security and own level of responsibility:
  - privacy laws
  - Australian Consumer Law
  - reporting procedures
- impacts of security breaches on individuals and organisation:
  - emotional distress
  - financial loss
  - commercial impacts
- common security risks within the retail workplace and techniques to:
  - identify risk
  - minimise risk
- types of store alarms and security systems used in industry.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant equipment:
  - alarm systems
  - surveillance equipment
  - point-of-sale equipment
  - communication equipment
- relevant documentation:
  - current plain English regulatory documents distributed by government regulators legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
  - organisational policies and procedures as listed in the Knowledge Evidence
- customers and team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish customer needs.	1.1. Connect with the customer within designated response times and establish rapport. 1.2. Use questioning and active listening to facilitate effective two-way communication.

© Commonwealth of Australia, 2025 Skills Insight

	1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues. 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.	2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable. 2.2. Clearly explain and promote product and service features and benefits where relevant. 2.3. Advise on promotional events where relevant. 2.4. Provide additional information to address customer questions and objections. 2.5. Offer comparisons to competitor product or service range as required. 2.6. Collaborate with the customer to determine product or service option most suited to their needs. 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.	3.1. Select and use appropriate techniques to close sale. 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures. 3.3. Farewell customer on leaving, and invite to return. 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to:	• interpret:
	  • detailed in-house and supplier product information documents
	  • plain English documents that outline organisational customer service policy and procedures.

Numeracy skills to:	• interpret basic fee information from in-house documents and complete basic pricing calculations.
Problem-solving skills to:	• respond to customer objections and provide appropriate solutions to satisfy customer needs.
Technology skills to:	• use technologies equipped with search functionality and information systems to source product and service information.

Assessment Requirements for SIRXSLS001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
  - appropriate communication
  - establishment and clarification of customer needs, wants and expectations
  - product and/or service knowledge
  - appropriate sales approach to sell benefits and features of products and/or services
  - overcome objections and close sales
  - upsell and/or cross sell additional products and/or services that complement the sale
  - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
  - cultural diversity
  - special needs
- sales techniques:
  - opening techniques
  - recognising buying signals
  - strategies to focus customer on specific products and services
  - selling add-ons and complementary products
  - overcoming customer objections
  - closing techniques

© Commonwealth of Australia, 2025 Skills Insight

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
  - professional service standards and protocols for retail industry personnel
  - attitudes and attributes expected by the retail industry to work with customers
  - different customer service needs and expectations
- for the particular retail organisation:
  - product and service knowledge:
    - product and service range offering
    - product specifications, features and benefits
  - designated response times for providing customer service
  - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for:
    - customer service
    - sale of products and services
    - resolving customer complaints
    - collection and storage of customer details
  - organisational product information and price lists
  - supplier brochures, information sheets and price lists
  - promotional activity information
  - current plain English regulatory documents distributed by government regulators for:
    - consumer protection law
    - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

© Commonwealth of Australia, 2025 Skills Insight

- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Application

This unit describes the skills and knowledge required to contribute to the assessment process.

It applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role, and for whom collecting the evidence for assessment is an adjunct to principal work responsibilities. The unit applies to those involved in collecting evidence for assessment against units of competency or accredited courses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
1. Clarify role and responsibilities in the assessment process	1.1 Discuss and confirm the purpose of the assessment with relevant people 1.2 Discuss and confirm benchmarks for assessment with the qualified assessor 1.3 Access, read and clarify assessment plan with the qualified assessor 1.4 Discuss and agree with the qualified assessor specific responsibilities in gathering evidence, and the types of evidence to be gathered
2. Confirm organisational arrangements for evidence gathering	2.1 Access and confirm relevant assessment system policies and procedures, organisational, legal and ethical requirements, and other relevant advice on assessment 2.2 Clarify the nominated assessment tools and methods for collecting evidence with the qualified assessor, to ensure that the procedures to be followed, and the instruments to be used are clear 2.3 Discuss and confirm with the relevant people the assessment context, including the candidate's characteristics and any need for reasonable adjustments 2.4 Confirm and arrange resource requirements in consultation with relevant people
3. Collect evidence in accordance with the assessment plan	3.1 Explain the assessment process to the candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to the qualified assessor, prior to undertaking assessment activities 3.2 Use assessment instruments to gather quality evidence within the available time and resources, according to organisational, legal and ethical requirements
4. Record and report findings	4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to the assessment system's policies and procedures 4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment, and whether the evidence collected meets the rules of evidence 4.3 Document areas for improvement in collecting evidence for future assessment activities

© Commonwealth of Australia, 2025 Skills Insight

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.2	• Seeks feedback to build knowledge to improve process and professional practice
Reading	1.3, 2.1, 2.2, 2.4, 3.2	• Sources and interprets procedural, and compliance information
Writing	1.1, 1.2, 1.3, 2.1, 2.3, 2.4, 3.2, 4.1, 4.3	• Completes workplace documentation accurately using the appropriate language
Oral Communication	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.1	• Communicates information and process requirements clearly, based on techniques appropriate to the audience and environment • Uses appropriate speaking and listening techniques to obtain specific information, and to support the assessment process
Navigate the world of work	2.1, 2.2, 3.2, 4.1	• Accesses, confirms and takes responsibility for adherence to policies, procedures, and legal and ethical requirements
Interact with others	4.2	• Asks questions to clarify understanding, and seeks feedback and further information
Get the work done	3.1, 4.1	• Organises work according to defined requirements, taking some responsibility for decisions regarding the format of information

Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- clarifying the role to be taken during the assessment
- clarifying the assessment plan with the qualified assessor, including agreement about:
  - what evidence will be collected
  - how the evidence will be collected
- carrying out a minimum of three evidence-gathering activities and, on each occasion:
  - document evidence in a clear and concise manner
  - document feedback from others involved in the assessment

reporting findings to the qualified assessor, including an explanation of how the assessment meets the rules of evidence on each of the three occasions.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment
- the principles of assessment
- the rules of evidence
- the different purposes of assessment
- the diversity of assessment contexts
- different types of evidence
- evidence-gathering methods
- the purpose and features of assessment tools, and assessment plans

© Commonwealth of Australia, 2025 Skills Insight

- potential barriers and processes relating to evidence-gathering procedures, and assessment processes
- the organisational policies and procedures relevant to this unit of competency.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to qualified assessors for consultation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to plan the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system.

It applies to individuals with assessment planning responsibilities.

In planning activities and processes, individuals are required to identify the components of assessment tools, analyse and interpret assessment tools, and develop assessment instruments (also known as assessment tasks) and assessment plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine the assessment approach	1.1 Identify the candidate and confirm the purposes and context of the assessment with relevant people according to legal,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	organisational and ethical requirements 1.2 Identify and access applicable industry or workplace standards for the assessment, and any specific assessment requirements
2. Prepare the assessment plan	2.1 Analyse units of competency and assessment requirements to identify evidence needed to demonstrate competence, according to the rules of evidence 2.2 Select assessment methods and instruments to support the collection of defined evidence, taking into account the context in which the assessment will take place 2.3 Develop the assessment plan and gain approval from relevant stakeholders
3. Identify modification and contextualisation requirements	3.1 Use information from the candidate and, where relevant, the candidate's workplace to identify contextualisation needs 3.2 Check advice provided by the training package or course developer relevant to identified contextualisation needs 3.3 Analyse existing assessment tools and record amendments required to address identified contextualisation needs 3.4 Determine opportunities for integrated assessment activities and record any changes required to assessment tools
4. Develop the assessment instruments	4.1 Analyse available assessment instruments for their suitability for use, and identify any required modifications 4.2 Develop assessment instruments to meet the required standard and specific workplace/candidate needs 4.3 Map assessment instruments against the unit or course requirements 4.4 Write clear instructions for the candidate and assessor regarding the use of assessment instruments 4.5 Check and confirm that draft assessment instruments meet required standards and specific workplace/candidate needs and record outcomes of checks

Assessment Requirements for TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions

following organisational arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards

© Commonwealth of Australia, 2025 Skills Insight

- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency
- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to implement an assessment plan, and gather quality evidence to assess the competence of a candidate using compliant assessment tools.

It applies to teachers, trainers and assessors in enterprises and registered training organisations (RTOs) and those providing assessment advisory services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for the assessment	1.1 Interpret assessment planning documentation and applicable organisational, legal and ethical requirements for conducting the assessment and confirm with the relevant people 1.2 Access and interpret units of competency that are to be used as

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	benchmarks for assessment, and the nominated assessment tools, to confirm the requirements for the evidence to be collected 1.3 Determine opportunities for integrated assessment activities and document any changes to the assessment instruments, where required 1.4 Determine opportunities for evidence-gathering in actual or simulated activities, through consultation with the candidate and relevant personnel 1.5 Conduct a candidate briefing and explain, discuss and agree on the details of the planned assessment 1.6 Arrange identified material and physical resource requirements 1.7 Identify any specialist support requirements for the assessment, and organise if necessary
2. Gather quality evidence	2.1 Use agreed assessment methods and tools to gather, organise and document evidence in a format suitable for determining competence 2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence
3. Support the candidate	3.1 Discuss and guide candidates in gathering their own evidence to support the recognition of prior learning (RPL) 3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to individual differences and enables two-way feedback 3.3 Make decisions on reasonable adjustments with the candidate, based on the candidate's needs and characteristics 3.4 Access specialist support, if required, in accordance with the assessment plan 3.5 Address any workplace health and safety (WHS) risk to a person or equipment immediately
4. Make the assessment decision	4.1 Assess the collected evidence, and to evaluate whether it reflects the evidence required to demonstrate competence 4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence 4.3 Make the assessment decision in line with agreed assessment procedures and according to the agreed assessment plan 4.4 Provide clear and constructive feedback to the candidate regarding the assessment decision, and clearly document

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	follow-up, if required
5. Record and report the assessment decision	5.1 Record assessment outcomes promptly and accurately 5.2 Complete and submit required assessment documentation, according to assessment procedures and confidentiality conventions 5.3 Inform other relevant parties of the assessment decision, according to confidentiality conventions
6. Review the assessment process	6.1 Review the assessment process in consultation with candidates and other relevant people to improve future practice 6.2 Document and record the review according to relevant assessment system policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 4.1	• Accesses and interprets procedural and compliance documentation relevant to the assessment process • Examines and evaluates assessment evidence
Writing	1.1, 1.3, 1.5, 2.1, 3.1, 5.1, 5.2, 5.3, 6.2	• Completes workplace documentation accurately using appropriate language and following organisational requirements
Oral Communication	1.1, 1.4, 1.5, 3.1, 3.4, 4.4, 5.3, 6.1	• Communicates information and assessment process requirements clearly, using techniques appropriate to the audience and environment • Interacts appropriately with candidates to build rapport and understanding, and obtain specific information to support the assessment process
Navigate the world of work	1.1, 3.5, 5.3	• Identifies, confirms and takes responsibility for adherence to legal and ethical requirements • Recognises, and follows, explicit and implicit protocols and meets expectations associated with own role

© Commonwealth of Australia, 2025 Skills Insight

Interact with others	1.1, 1.4, 1.5, 3.1, 3.2, 3.4, 5.3, 6.1	• Adjusts personal communication style in recognition of the values and experiences of others to build rapport • Cooperates and collaborates with others and contributes to activities requiring joint responsibility and accountability
Get the work done	1.1, 1.2, 1.3, 1.4, 1.6, 1.7, 2.1, 2.2, 3.3, 3.4, 4.1, 4.2, 4.3, 6.1, 6.2	• Uses systematic, analytical processes in complex, non-routine situations, gathering information, and identifying and evaluating options against agreed criteria • Organises work according to specific requirements taking some responsibility for decisions regarding the format of information • With guidance, reviews the effectiveness of solutions in relation to the set goals

Assessment Requirements for TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements

reviewing the assessment process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- competency-based assessment, including:
  - VET as a competency-based system
  - how competency based assessment differs from other types of assessment
  - competency standards as the basis of qualifications
  - structure and application of competency standards
  - the principles of assessment and how they are applied
  - the distinction between assessment tools and assessment instruments
  - the rules of evidence and how they are applied
  - the range of assessment purposes and assessment contexts, including RPL
  - different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
  - reasonable adjustments and when they are applicable
  - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
  - the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations in assessment activities
- current legislative requirements relevant to the assessor and the assessment process
- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for the use of relevant personal protective equipment
  - the safe use and maintenance of relevant equipment
  - sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	materials for suitability and relevance, and seek assistance to interpret the contextual application 1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2 Follow the learning program and/or delivery plan to cover all learning objectives 2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training 2.4 Use delivery techniques to structure, pace and enhance learning 2.5 Apply coaching techniques to assist learning 2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7 Provide opportunities for practice during instruction and through work activities 2.8 Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge 3.2 Monitor learner progress and outcomes in consultation with the learner 3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs
4. Review personal training performance	4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2 Maintain, store and secure learner records, according to organisational and legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Skills Insight

Skill	Performance Criteria	Description
Learning	4.1	• Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	• Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	• Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	• Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	• Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes • Asks questions in order to clarify understanding, and to provide and seek feedback • Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	• Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

© Commonwealth of Australia, 2025 Skills Insight

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA2009 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete and check import and export documentation in accordance with the requirements of Customs and related legislation and workplace procedures.

It includes identifying procedures required for documenting import/export of goods, completing documentation to meet legislative and workplace requirements, checking documentation to ensure it meets legislative requirements and lodging documentation for processing.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments including small to large worksites in the customs broking and freight forwarding industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

essential outcomes.	demonstrate achievement of the element.
1 Identify procedures required for documentation for import/export of goods	1.1 Documents required for import/export of goods are identified
	1.2 Required documents are sourced
	1.3 Content requirements for each section of the documentation are applied
	1.4 Timelines for completion of documents are identified and noted
	1.5 Requirements for permits and other documentation (such as quarantine) are identified and implications are noted
	1.6 Procedures for obtaining clearances are identified and followed in accordance with the requirements of Customs, related legislation and workplace procedures
	1.7 Letters of credit are identified and implications of each are noted
	1.8 Assistance is sought as required to identify necessary documents and to commence process of assessing or completing these documents
	1.9 Documentation is lodged as required by legislation
2 Complete documentation to meet legislative and workplace requirements	2.1 Content requirements for each section of the documentation are identified and applied in accordance with the requirements of Customs, related legislation and workplace procedures
	2.2 Workplace procedures for authorisations are followed
	2.3 Data entry for documents is completed
	2.4 Problems arising in completing required documents are identified and assistance is sought to resolve these in accordance with the requirements of Customs, related legislation and workplace procedures
	2.5 Actions are taken to meet deadlines
	2.6 Assistance is sought as required in completing required documents
3 Check documentation to ensure it meets	3.1 Documents are collated and checked before forwarding to supervisor, manager or more senior personnel for checking within designated timelines, in accordance with the

Assessment Requirements for TLIA2009 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when completing import and export documentation
- completing and checking documentation and records to meet relevant Customs legislation, related legislation and workplace requirements
- completing and/or assessing accuracy of import and export documentation
- identifying procedures required for documentation for import/export of goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- providing customer/client service
- reading, interpreting and following import and export instructions, procedures and labels
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment when completing import and export documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes, conventions and regulations relevant to importing and exporting cargo and freight
- Customs Act 1901and related legislation
- documentation requirements for importing and exporting cargo and freight
- focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation

© Commonwealth of Australia, 2025 Skills Insight

- problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- workplace procedures and policies for completing import and export documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements and relevant regulations, as part of work activities within the transport and logistics industries.

It includes identifying products in a subsection of a warehouse or other storage area, examining quality, reporting on products, as well as using inventory and labelling systems to identify and locate products.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Assessment Requirements for TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in products and services in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when handling, transporting and storing products and providing information on products and services
- completing documentation related to work activities
- estimating the size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- reading and comprehending simple statements in English
- reading, interpreting and following instructions, procedures, information and signs relevant to handling, transporting, storing products and providing information on products and services
- selecting and using relevant communications, computing and load handling equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- Australian codes and regulations relevant to products being identified, handled, transported, stacked and/or stored as part of work operations
- categories or groups of products and requirements for special handling, stacking and storage
- documentation requirements including reports and records concerning damaged or contaminated goods
- focus of operation of work systems, equipment, management and site operating systems for packaging goods
- housekeeping standards and procedures
- purpose and use of cataloguing and labelling systems
- site layout and obstacles
- strategies to seek out sources of product knowledge and to use this information to inform work
- types of equipment and storage areas appropriate for different categories of goods including perishable, fragile, dangerous, composition/state goods
- workplace procedures and policies for identifying, handling, stacking and storing particular categories of products.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIA2021 Despatch stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to despatch stock in accordance with codes/regulations and workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes analysing orders to identify work requirements, following workplace order picking processes to prepare goods for despatch, and completing despatch tasks in accordance with workplace procedures and schedules.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

products	accordance with workplace procedures
	1.2 Products are categorised in terms of specified criteria in accordance with workplace requirements
2 Match products to locations based on specified criteria	2.1 Locations for products are determined based on specified criteria
	2.2 Labels, inventory systems and other information sources are used to assist in identifying products, and handling and storage requirements
3 Assist individuals to solve stock identification and location problems	3.1 New stock items are identified and particular product information is brought to the attention of relevant personnel
	3.2 Stock queries are predicted and team members are assisted to locate and assimilate information relevant to these products
	3.3 Personnel are assisted with routine and non-routine stock enquiries and actions are taken to update product information for relevant personnel
	3.4 Personnel are encouraged to maintain and build product knowledge by accessing product information and applying problem solving and information analysis skills
4 Identify appropriate transfer and handling requirements	4.1 Resources used to transfer different products through the storage zones are identified and evaluated
	4.2 Work in receival and despatch areas is supported by identifying and reporting variances
	4.3 Stock re-ordering is informed by knowledge of product source, frequency of pick destination or seasonality of products and potential for supply problems
	4.4 Relevant documentation is completed in accordance with workplace procedures
5 Contribute to continuous improvement	5.1 Knowledge of customer requirements is used to determine work design
	5.2 Potential problems are predicted and notified to appropriate personnel
	5.3 Opportunities for improvements to own work methods are identified and notified to appropriate personnel

Assessment Requirements for TLIA3017 Identify products and store to specifications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing, reading and interpreting relevant product information, policies and regulatory requirements
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in products and services in accordance with operating procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment
- using information on products/stock to determine, plan and organise processes used for receival, storage, goods movement, despatch, stock levels and re-ordering processes
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- codes of practice and regulations relevant to workplace activities
- documentation requirements including reports and records concerning damaged or contaminated goods
- housekeeping standards and procedures
- information on various categories or groups of products including their key characteristics and hazards, and any special handling, stacking and storage requirements
- operational work systems, equipment, management and site operating systems
- product sources, destinations and potential problems
- re-ordering procedures and just-in-time planning principles
- requirements for workplace documentation, inventory systems and records
- site layout and obstacles
- sources of product information
- strategies to seek out sources of product knowledge and to use this information to inform work
- types of equipment and storage areas appropriate for different types of goods including perishable, fragile and/or dangerous/hazardous goods
- workplace procedures and policies relevant to the application of product knowledge to the organisation of workplace operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Resources for assessment include:
- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIA3018 Organise despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise despatch operations in accordance with codes/regulations and workplace requirements in the transport and logistics industry.

It includes planning and organising despatch operations, organising the storage and despatch of stock, and completing all required documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan and organise despatch operations	1.1 Knowledge of product characteristics and workplace procedures are applied to stock analysis

© Commonwealth of Australia, 2025 Skills Insight

	1.2 Resources including manual handling equipment, employee competencies, storage areas and goods management equipment are identified to match product characteristics
	1.3 Deadlines are scheduled to meet order requirements
	1.4 Work processes are planned to meet deadlines
2 Organise the storage and despatch of stock	2.1 Employees, equipment and storage areas are allocated and supervised
	2.2 Individuals are informed of work requirements and deadlines
	2.3 Work processes are monitored to ensure that human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
	2.4 Stock discrepancies are noted and reported in accordance with company procedures
3 Complete documentation	3.1 Required despatch documentation and records are confirmed
	3.2 Required despatch documentation and records are completed clearly and proofread
	3.3 Required despatch documentation and records are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLIA3026 Monitor storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor storage facilities in accordance with relevant regulations and workplace requirements in the transport and logistics industry.

It includes determining site functions and operations, monitoring storage operations and taking appropriate action in response to identified discrepancies, changes to storage requirements or breaches in operational procedures.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

TLIA3038 Control and order stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to control and order stock for a workplace store in accordance with relevant codes of practice, regulations and workplace procedures.

It specifically covers maintaining stock levels and records, organising and administering stocktakes, identifying stock losses, processing stock orders and following up orders.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Maintain stock levels	1.1 Stock levels are monitored and maintained at levels

and records		prescribed by workplace specifications
	1.2	Stock security systems are monitored and adjusted as required
	1.3	Stock re-order cycles are maintained, monitored and adjusted as required
	1.4	Colleagues are informed about their individual responsibilities for recording stock
	1.5	Stock storage and movement records are maintained in accordance with workplace procedures
	1.6	Stock performance is monitored and fast/slow moving items are identified and reported in accordance with workplace procedures
2 Organise and administer stocktakes	2.1	Stocktakes are organised at the appropriate time and responsibilities are allocated to staff
	2.2	Accurate reports on stocktake data are produced within designated timelines
3 Identify stock losses	3.1	Losses are accurately identified, recorded and assessed against potential loss as forecast, on a regular basis
	3.2	Identified losses are reported in accordance with workplace procedures
	3.3	Avoidable losses are identified, reasons are established, and appropriate solutions are recommended and implemented to prevent future avoidable losses
4 Process stock orders	4.1	Orders for stock are accurately processed in accordance with workplace procedures
	4.2	Stock ordering and recording systems are accurately maintained
	4.3	Purchase and supply agreements are correctly used and appropriate details are recorded
	4.4	Negotiated purchase and supply agreements are recorded accurately and filed for retrieval
5 Follow up orders	5.1	Delivery process is monitored to meet agreed deadlines
	5.2	Appropriate liaison is undertaken with colleagues and suppliers to ensure continuity of supply

© Commonwealth of Australia, 2025 Skills Insight

	5.3 Routine supply problems are followed up or referred to the appropriate person in accordance with workplace policy
	5.4 Stock is distributed in accordance with agreed allocations
6 Complete documentation	6.1 Required records and documentation are confirmed
	6.2 Required records and documentation are completed clearly and proofread
	6.3 Required records and documentation are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

TLIA3039 Receive and store stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to receive and store stock for a workplace store in an enterprise/organisation in a transport, logistics, production, hospitality, retail or other relevant industry sector, in compliance with relevant codes of practice, regulations and workplace procedures.

Work must be carried out for receiving and storing stock in a workplace store. It specifically covers taking delivery of stock, storing, rotating and maintaining stock received, and completing documentation.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Assessment Requirements for TLIA3039 Receive and store stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant communications and computing equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- contacts and sources of information and documentation needed when receiving and storing stock
- customer service policies and procedures
- interpretation of workplace specifications and orders for supplies
- principles of stock control
- problems that may occur when receiving and storing stock and appropriate action that can be taken to resolve these problems
- procedures for operating electronic communications equipment
- protocols and procedures for liaising with supplier representatives, drivers and colleagues using appropriate technology

© Commonwealth of Australia, 2025 Skills Insight

- purpose and procedures for using relevant personal protective equipment
- relevant codes of practice and legislative requirements (for example dangerous goods regulations, health and hygiene regulations)
- relevant WHS/OHS and environmental procedures and regulations
- safe lifting and handling procedures
- site layout
- stock control documentation and systems used in workplace stores
- stock security systems
- systems for completing relevant records and documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA4025 Regulate temperature controlled stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to regulate temperature controlled stock in accordance with relevant regulations and workplace procedures within the transport and logistics industry.

It includes identifying goods requiring temperature control, monitoring temperature of goods, and identifying and rectifying identified problems.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 Identify goods requiring temperature control	1.1 Goods requiring temperature control are identified
	1.2 Temperature for short-term and long-term storage is selected to match product type
	1.3 Upper and lower limits for temperature control are identified
	1.4 Storage separations and co-storage applications are identified for products
2 Monitor temperature	2.1 Appropriate methods for determining temperature of goods are identified
	2.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	2.3 Storage areas are monitored for temperatures within range for product types
	2.4 Products are monitored to ensure compliance with temperature storage requirements
	2.5 Short-term storage times are identified for transit goods
	2.6 Documentation is completed in accordance with workplace procedures
3 Identify and rectify problems	3.1 Implications of incorrect temperature are identified
	3.2 Damaged goods are identified and appropriate action is taken in accordance with workplace procedures
	3.3 Causes of out-of-temperature range are identified
	3.4 Appropriate personnel are notified for problem rectification
	3.5 Goods handling workplace procedures for maintenance of stock under temperature control are identified and implemented

Assessment Requirements for TLIA4025 Regulate temperature controlled stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- checking refrigeration equipment operation in terms of maintenance schedule and standard operating procedures
- communicating effectively with others
- implementing contingency plans
- operating and adapting to differences in stock and equipment in accordance with workplace procedures
- reading and interpreting relevant instructions, procedures and labels
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment, processes and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- focus of operation of work systems, equipment, management and site operating systems for regulating temperature controlled stock
- hazards when regulating and working with temperature controlled stock and appropriate action to control the risks involved
- problems that can occur with temperature controlled stock and appropriate action that can be taken
- procedures for pre-cooling and snap freezing

© Commonwealth of Australia, 2025 Skills Insight

- relevant codes of practice, food safety standards and regulations for temperature controlled stock
- relevant work health safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- special handling, stacking and storage requirements for temperature controlled stock
- workplace procedures and policies for regulating temperature controlled stock.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and care for livestock in transit, in accordance with relevant regulations and industry codes of practice for caring for livestock in transit.

It includes preparing to transport livestock, caring for and controlling livestock in transit, using appropriate animal husbandry techniques, and completing relevant documentation as required.

Work is performed under limited or minimum supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to transport livestock	**1.1** Health condition and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

	1.2	Vehicle is checked that it is positioned correctly on loading dock, hazards are identified and required action is taken to minimise, control or eliminate identified hazards in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and workplace procedures
	1.3	Livestock crate drainage system is inspected to ensure drainage of livestock effluent from the vehicle is in accordance with regulatory requirements and workplace procedures
	1.4	Livestock crate is checked for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit in accordance with regulatory requirements and workplace procedures
	1.5	Poor quality livestock is identified and reported to specified person/s in accordance with workplace procedures
	1.6	Feed provisions and other requirements including veterinary products for livestock, prior to and during transit, are identified and organised
	1.7	Portable stockyards are assembled as required in accordance with regulatory requirements and workplace procedures
	1.8	National vendor declaration is obtained and checked for accuracy in accordance with regulatory requirements
	1.9	Loaded livestock is visually assessed to ensure correct density of livestock within the pen and adjustments are made as required in accordance with regulatory requirements and workplace procedures
2 Care for and control livestock in transit	**2.1**	Wellbeing of livestock is regularly monitored during loading, transit and unloading, and appropriate action is taken in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
	2.2	Relevant handling equipment is used to aid handling of livestock during loading and unloading operations, in accordance with regulations and workplace procedures
	2.3	Action is taken for care and wellbeing of livestock in an

© Commonwealth of Australia, 2025 Skills Insight

			accident during transit
		2.4	Distressed livestock is identified and handled in an appropriate manner in accordance with regulatory requirements and workplace procedures
3	**Use animal husbandry techniques**	**3.1**	Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
		3.2	Prescribed medication is administered to livestock in accordance with veterinary directions and workplace procedures
4	**Completion of documentation**	**4.1**	National vendor declaration transport section is completed correctly and clearly by transport operator
		4.2	National vendor declaration is given to the appropriate person upon reaching destination on the declaration

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3020 Care for livestock in transit.

Assessment Requirements for TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- inspecting vehicle to ensure livestock crate drainage system is in place and is effective in control of livestock effluent
- checking livestock crate for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit
- loading livestock to ensure correct density of livestock within the pen
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) requirements and guidelines and workplace procedures
- communicating effectively and working collaboratively with others in the care of livestock in transit
- completing relevant documentation including relevant sections of National Vendor declaration
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit

© Commonwealth of Australia, 2025 Skills Insight

- insurance rights and requirements of clients
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- WHS/OHS/OSH requirements and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances in accordance with relevant work health safety (WHS)/occupational health and safety (OHS) regulations concerning the safe handling of dangerous goods and hazardous substances, within the transport and logistics industry.

It includes identifying requirements for working with dangerous goods and/or hazardous substances, confirming site incident procedures and selecting handling techniques.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 Identify requirements for working with dangerous goods and/or hazardous substances	1.1 Dangerous goods/hazardous substances are identified from information including class labels, manifests and other documentation
	1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.3 Storage requirements for dangerous goods/hazardous substances are identified and applied
	1.4 Legislative requirements for dangerous goods/hazardous substances are used to plan work activities
	1.5 Handling procedures for different classes and characteristics of goods are observed
	1.6 Confirmation is sought from relevant personnel where dangerous goods/hazardous materials do not appear to be appropriately marked
2 Confirm site incident procedures	2.1 Incident reporting processes are identified
	2.2 Emergency equipment is located and checked in accordance with workplace procedures and statutory regulations
	2.3 Emergency procedures are identified and confirmed
3 Select handling techniques	3.1 Load handling and shifting procedures are selected in accordance with identified requirements for particular goods
	3.2 Handling equipment is checked for conformity with workplace requirements and manufacturer guidelines
	3.3 Suitable signage or placards are checked for compliance with workplace procedures, as required

Foundation Skills

Assessment Requirements for TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others
- completing relevant documentation
- determining required permits
- estimating weight and dimensions of load and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
- identifying and selecting safety requirements for handling dangerous goods/hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport storage selected
- identifying dangerous goods/hazardous substances using labels, International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- maintaining workplace records and documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule, predicting consequences and identifying improvements
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- recognising hazards and applying precautions and required action to minimise, control or eliminate recognised hazards
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems including PPE
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- permit and licence requirements
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- relevant aspects of current Australian Dangerous Goods (ADG) Code and relevant Australian Standards
- relevant regulations and codes concerning handling dangerous goods/hazardous substances
- risks when handling dangerous goods/hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods/hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Skills Insight

1	**Load and unload goods/cargo**	1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
		1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
		1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
		1.4 Load is packed/unpacked to make safe and effective use of available spaces
		1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
		1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
		1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
2	**Secure and protect load**	2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
		2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
		2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
		2.4 Load is protected in accordance with legal and workplace safety requirements
3	**Complete**	3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

© Commonwealth of Australia, 2025 Skills Insight

documentation		and current ADG Code, as required
	3.2	All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by driver
	1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures
3 Operate forklift to handle loads	3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
	3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures
4 Monitor site conditions	4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
	4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

© Commonwealth of Australia, 2025 Skills Insight

5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use
	5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
	5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, low level order pickers, conveyor systems and mechanised pallet movers.

It includes selecting appropriate mechanical moving equipment, moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning moving materials mechanically using automated equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Select load moving equipment	1.1 Mechanised handling equipment, route to be taken and procedures to be used are selected appropriate to goods characteristics
	1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, WHS/OHS requirements and workplace procedures
2 Move goods	2.1 Hazards are identified, risks are assessed and control measures are implemented
	2.2 Goods are moved using selected materials handling equipment in accordance with WHS/OHS regulations, manufacturer instructions and workplace procedures
	2.3 Problems moving goods and materials using automated equipment are identified and reported in accordance with workplace procedures
3 Check goods and complete documentation	3.1 Relocated goods are inspected for possible damage during transit/movement and appropriate action is taken
	3.2 Appropriate documentation is completed to track moved goods in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Skills Insight

Unit Mapping Information

This unit replaces and is equivalent to TLID2013A Move materials mechanically using automated equipment.

Links

Assessment Requirements for TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- ensuring servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- implementing contingency plans
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of automated equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for using automated equipment to move materials mechanically
- problems that may occur and appropriate action that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of automated materials moving equipment
- relevant regulations, workplace procedures and policies for using automated equipment to move materials mechanically
- relevant WHS/OHS and environmental protection procedures and guidelines
- risks when using automated equipment to move materials and related precautions to control the risks
- site layout and obstacles.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- automated equipment such as:
  - automatic guided vehicles
  - tow motors
  - low level order pickers
  - conveyor systems
  - mechanised pallet movers
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIE0002 Process workplace documentation

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to process workplace documentation and gather data in accordance with workplace requirements. Processing documentation/data is carried out as an integral part of work operations in the context of the workplace concerned.

It includes planning and completing documentation and data gathering to fulfil an identified purpose including legislative obligations.

Work may be performed in a team or autonomous working situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan documentation/data gathering	**1.1** Purpose of workplace documentation/data gathering is identified and confirmed in accordance with legislative obligations and workplace procedures
	1.2 Information needed for completing workplace

© Commonwealth of Australia, 2025 Skills Insight

		documentation/data is identified as required in accordance with legislative obligations and workplace procedures
2	**Complete documentation/data gathering**	**2.1** Data is gathered, required documentation is prepared and forms are completed, in accordance with workplace policies and procedures
		2.2 Information/data is gathered and entered into computerised system as required in accordance with regulatory requirements and workplace procedures
		2.3 Workplace documents and electronic applications and systems are maintained accurately and in a timely manner in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE2008 Process workplace documentation.

Assessment Requirements for TLIE0002 Process workplace documentation

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) legislation and workplace procedures
- completing workplace documentation and forms
- ensuring processed information and data is checked for relevance, accuracy and completion
- operating and adapting to differences in electronic applications and systems in accordance with standard operating procedures
- reading, interpreting and organising information and data needed for completing and processing workplace documentation and forms
- working collaboratively with others when completing and processing workplace documentation, data and forms
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- writing and entering information and data into electronic applications and systems in a timely manner.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- procedures for processing workplace documentation and data using relevant workplace technology
- relevant procedures and duty of care requirements
- relevant WHS/OHS/OSH legislation, regulatory requirements and workplace responsibilities
- requirements and sources for workplace documentation including:
  - data
  - forms
  - logs
  - diaries
- typical problems in processing workplace documentation and data and appropriate action and

TLIF3003 Implement and monitor work health and safety procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor work health and safety (WHS)/occupational health and safety (OHS) procedures, in compliance with relevant WHS/OHS regulations.

It includes accessing information about WHS/OHS workplace policies and procedures, and implementing and monitoring procedures for identifying and assessing hazards and controlling risks. It also includes planning and supervising housekeeping arrangements, and implementing and monitoring procedures for dealing with hazardous events.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Access information about WHS/OHS and workplace policies and procedures	1.1 Relevant provisions of WHS/OHS legislation and codes of practice are accurately followed
	1.2 Information on workplace WHS/OHS health and safety policies, procedures and programs is stored in a readily accessible location and manner
	1.3 Information is accurately and clearly explained to work team
	1.4 Information about risk identification outcomes and control procedures is provided to appropriate personnel
2 Implement and monitor procedures for identifying and assessing hazards	2.1 Existing and potential hazards in work area are identified and reported
	2.2 Identified hazards are assessed in relation to relative risk
	2.3 Appropriate action is initiated to minimise and control risks/hazards
3 Implement and monitor procedures for controlling risks	3.1 Incorporation of hierarchy of risk control measures within hazard register is checked
	3.2 Existing risk control measures are implemented, monitored and reviewed
	3.3 Work procedures to control risks are implemented and adherence to them by work group is monitored
	3.4 Required improvements to existing risk control measures are identified, including required resources for implementation, and reported to appropriate personnel
4 Plan and supervise housekeeping arrangements	4.1 Housekeeping tasks are identified and incorporated in enterprise work roles
	4.2 Housekeeping equipment is maintained
	4.3 Team members are allocated housekeeping tasks and are supervised in performing allocated tasks

© Commonwealth of Australia, 2025 Skills Insight

	4.4 Housekeeping practices are planned to conform with environmental and WHS/OHS health and safety requirements
5 Implement and monitor procedures for dealing with hazardous events	5.1 Workplace procedures for dealing with hazardous events are implemented as required to ensure prompt control action is taken
	5.2 Hazardous events are investigated to identify causes
	5.3 Risk control measures are implemented to prevent recurrence and to minimise risks of hazardous events or issues, and are reported to appropriate personnel for implementation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF3003A Implement and monitor occupational health and safety procedures.

Assessment Requirements for TLIF3003 Implement and monitor work health and safety procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- ensuring that precautions and required action are taken to minimise, control or eliminate identified hazards
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

- emergency and evacuation procedures
- HAZCHEM symbols and implications for safe work and storage
- hierarchy of risk controls
- housekeeping standards and procedures
- location and use of safety alarms, manifests, emergency shut-off systems, emergency communications systems
- manual and mechanically operated lifting and load shifting procedures
- procedures for storing and using flammable materials
- procedures for storing and using hazardous substances
- relevant WHS/OHS procedures and guidelines
- reporting procedures for unsafe situations, fire hazards, broken or damaged equipment or fittings, sickness and accidents
- risks when using manually-operated equipment to shift loads and related precautions to control these risks
- signs and signals for WHS/OHS warnings
- site layout and obstacles
- terms used in safety data sheets (SDSs)/material safety data sheets (MSDSs)
- transport requirements for transporting goods within a workplace.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use infotechnology devices in the workplace in accordance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures, within the transport and logistics industry.

It includes identifying infotechnology equipment and systems; setting up, using and shutting down computer based equipment and systems; and inputting, storing and presenting files/data. It also involves implementing workplace procedures for managing and securing data.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

K – Technology

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify infotechnology systems	1.1 Types of infotechnology equipment used in the

	work area are identified
	1.2 Functions of equipment, component parts and accessories are identified
	1.3 Applications for workplace activities of different infotechnology equipment and systems are interpreted
	1.4 Routine faults in operating systems, software applications and operator errors are identified
	1.5 Sources of information on rectifying/reporting faults with operating equipment, systems and application are identified
2 Access and operate computer-based equipment and systems	2.1 Work environments and equipment are adjusted to meet ergonomic requirements and workplace policies and procedures
	2.2 Systems are accessed and checked as required for viruses
	2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturers guidelines
	2.4 Infotechnology equipment and software operating manuals and/or help screens are used to inform work practices
	2.5 Required application software packages and accessories are selected and accessed
	2.6 Required file and/or data to be accessed is identified
	2.7 Files/data are filed in accordance with workplace procedures
	2.8 Shut-down procedures for files, applications and equipment are followed
3 Input, store and present files/data	3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader, touch screen or other system
	3.2 Accurate input is confirmed
	3.3 Files are accessed in accordance with workplace

© Commonwealth of Australia, 2025 Skills Insight

	procedures
	3.4 Data is manipulated to suit work requirements and is checked for accuracy
	3.5 Saved files are accessed through relevant directories
	3.6 Information and disk/s are stored as required
	3.7 Information is presented using computerised projection facilities as required
4 Implement workplace procedures for managing and securing data	4.1 Security procedures are followed in accordance with workplace procedures
	4.2 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIK2010A Use infotechnology devices in the workplace.

Assessment Requirements for TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and/or completing electronic documentation through the use of infotechnology devices in the workplace
- adapting to differences in software and equipment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices in the workplace
- applying relevant legislation and workplace procedures
- identifying and using computer equipment, software, processes and procedures required within the job context
- identifying fault-finding procedures
- implementing contingency plans when using infotechnology devices in the workplace including using security and backup software and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- operating infotechnology devices used within the workplace in accordance with operational requirements
- reading and interpreting instructions, procedures, information, operational instructions and manuals relevant to using infotechnology devices in the workplace
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Skills Insight

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- work health and safety (WHS)/occupational health and safety (OHS) risks and hazards when using computer equipment for work tasks, and ways of controlling these risks/hazards
- relevant WHS/OHS procedures and guidelines for using computer equipment in the workplace
- typical problems that can occur when using infotechnology devices, and computer applications in the workplace and related appropriate action that can be taken to prevent or solve these problems
- workplace procedures for using computer equipment and application software appropriate for work role.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

UEENEED101A Use computer applications relevant to a workplace

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

1) Scope:

1.1) Descriptor

This unit covers the basic use of personal computers application relevant to a work function. It encompasses switching the computer on, applying user preferences, selecting basic applications, entering and retrieving information and printing files.

Note:

This unit applies to all aspects of Electrotechnology – engineering applications only. For general competencies related to Information Technologies refer to the latest endorsed IT Training Package.

Application of the Unit

Application of the Unit

2)

This unit is intended for competency development entry-level employment-based programs incorporated in approved contracts of training. It may be used to augment previously acquired competencies.

Licensing/Regulatory Information

License to practice

3)

The skills and knowledge described in this unit do not require a license to practice in the workplace. However, practice in this unit is subject to regulations directly

© Commonwealth of Australia, 2025 Skills Insight

License to practice **3)**

related to occupational health and safety and where applicable contracts of training such as apprenticeships.

Pre-Requisites

Prerequisite Unit(s) **4)**

Competencies **4.1)**

Granting competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

UEENEEE101A	Apply Occupational Health Safety regulations, codes and practices in the workplace.

Literacy and numeracy skills **4.2)**

Participants are best equipped to achieve competency in this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 ‘Literacy and Numeracy’

Reading 3 Writing 3 Numeracy 3

Employability Skills Information

Employability Skills **5)**

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT		PERFORMANCE CRITERIA	
1	Prepare to use computer applications.	1.1	OHS procedures for a given work area are identified, obtained and understood through established routines and procedures.
		1.2	Established OHS risk control measures and procedures in relation to computer and keyboard use are followed.
		1.3	Information required for the use of the application is obtained from appropriate sources.
		1.4	Computer is started up and desktop icons are manipulated to access desired application, directories and files.
		1.5	On-screen instructions in relation to any anomaly such as a virus warning are followed.
		1.6	Help directory is used to resolve any straightforward start up or access issues or anomalies.
2	Use computer basic application.	2.1	Established OHS risk control measures and procedures for carrying out the work are followed.
		2.2	Information is added, altered or deleted as needed in accordance with application user instructions.
		2.3	Routine checks are made to ensure accuracy of information in accordance with quality requirements.
3	Output information	3.1	Completed files are stored appropriately in

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA	
from an application.		accordance with enterprise requirements.
	3.2	Files are printed for a formal record and/or to forward to others.
	3.3	Files are sent via email in a readable format.
4 Shut down computer.	4.1	Files are named, arranged, saved and backed up in accordance with enterprise requirements.
	4.2	Computer shutdown procedures are followed and computer switched off.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of safe working practices using basic computer applications relevant to a workplace.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-ED101A Basic Computer Applications

Evidence shall show an understanding of computer use basics to an extent indicated by the following aspects:

T1 Starting up

T2 Selecting application

T3 Entering information

T4 Saving

T5 Printing

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the unit and must be read in

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

conjunction with the performance criteria and the range statement of the unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this unit. It must be used in conjunction with all parts of this unit and performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment **9.1)**

Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment intervention. It is the industry-preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accordance with industry and regulatory policy.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Sources of evidence need to be ‘rich’ in nature to minimise error in judgment.

Activities associated with normal everyday work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its ‘richness’. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practised. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects of evidence required to demonstrate competency in this unit **9.2)**

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated performance criteria shall be demonstrated on at least two occasions in accordance with the 'Assessment Guidelines – UEE11'. Evidence shall also comprise:

- A representative body of work performance demonstrated within the timeframes typically expected of the discipline, work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:
  - Implement Occupational Health and Safety workplace procedures and practices, including the use of risk control measures as specified in the performance criteria and range statement
  - Apply sustainable energy principles and practices as specified in the performance criteria and range statement
  - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit. It may be required by some jurisdictions that RTOs provide a percentile graded result for the purpose of regulatory or licensing requirements.
  - Demonstrate an appropriate level of skills enabling employment
  - Conduct work observing the relevant Anti Discrimination legislation, regulations, polices and workplace procedures
- Demonstrated consistent performance across a representative range of contexts from the prescribed items below:
  - Use basic computer applications relevant to workplace as described in 8) and including:

A	Correctly starting-up a computer.
B	Dealing with anomalies appropriately.
C	Following application instructions to input and output information.
D	Storing information appropriately.

© Commonwealth of Australia, 2025 Skills Insight

E	Outputting information to a printer.
F	Forwarding information via email and/or web mail in a readable format.
G	Producing, storing and forwarding engineering related reports and/or results using at least three computer applications according to requirements
H	Shutting down a computer correctly
I	Dealing with unplanned events by drawing on essential knowledge and skills to provide appropriate solutions incorporated in a holistic assessment with the above listed items.

Note:

Successful completion of relevant vendor training may be used to contribute to evidence on which competency is deemed. In these cases the alignment of outcomes of vendor training with performance criteria and critical aspects of evidence shall be clearly identified.

Context of and specific resources for assessment

9.3)

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to undertake actual work as prescribed in this unit.

These should be used in the formal learning/assessment environment.

Note:

Where simulation is considered a suitable strategy for assessment, conditions for assessment must be authentic and as far as possible reproduce and replicate the workplace and be consistent with the approved industry simulation policy.

In addition to the resources listed above, evidence should show demonstrated competency to produce, store and forward engineering related reports and/or results using a range of

© Commonwealth of Australia, 2025 Skills Insight

computer applications.

Method of assessment **9.4)**

This unit shall be assessed by methods given in Volume 1, Part 3 'Assessment Guidelines'.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this unit applies. This requires assessment in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and skills described in this unit.

Concurrent assessment and relationship with other units **9.5)**

There are no concurrent assessment recommendations for this unit.

Range Statement

RANGE STATEMENT

10) This relates to the unit as a whole providing the range of contexts and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

This unit shall/may be demonstrated in relation to at least three of the following using computer applications to produce, store and forward engineering related reports and/or results at a basic level.

- Word processing
- Spread sheet
- Drawings
- Business management
- Apparatus set-up
- Note:

Apparatus set-up applications are invariably vendor specific and include

AMPSS00001 Animal Welfare Officer Skill Set

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 4.0. Updated unit code.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Description

This skill set describes the skills and knowledge to manage an animal welfare team.

Pathways Information

These units of competency comprising the Lairage Supervisor Skill Set are drawn from AQF levels II, III and IV in the qualifications, and can be counted towards other qualifications where this is in accordance with the qualification requirements.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AMPA2006 Apply animal welfare and handling requirements
- AMPA416 Oversee humane handling of animals.

Target Group

This skill set is for the Animal Welfare Officer is a company employee who manages the company's animal welfare team and therefore is able to:

- understand and articulate the regulatory and technical issues associated with animal welfare
- represent the company with regard to the approach taken to address animal welfare issues
- influence company policies, procedures, training regimes, Key Performance Indicators (KPIs) and Quality Assurance (QA) documentation as they relate to procedures impacting on animal welfare

© Commonwealth of Australia, 2025 Skills Insight

- review, as part of their duties, the results of the routine monitoring of procedures impacting on animal welfare
- review the results of internal and external audits to assess the performance of the company in relation to animal welfare
- oversee the implementation of corrective actions and preventative measures
- monitor the effectiveness of corrective actions and preventative measures
- implement animal welfare assessment criteria and perform an abattoir animal welfare assessment
- recognise operative training needs and implement training for animal handlers.

Suggested words for Statement of Attainment

These competencies from the *AMP Australian Meat Processing Training Package* meet the industry requirements for managing animal welfare.

AMPSS00037 Meat Industry Microbiological Testing Skill Set

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 4.0. Updated unit codes.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Description

This skill set describes the skills and knowledge to conduct rapid tests for pathogens in meat processing laboratories as described in the Department of Agriculture's approved methods for microbiological testing of meat and meat products.

Applicant students would preferably have completed Certificate III in Meat Processing (General) which includes some of the Units required. Alternatively, applicant students will have substantial experience at a meat processing plant, including work in Quality Assurance (QA) or a laboratory, and have demonstrated skills commensurate with AQF III.

Pathways Information

These units of competency can provide credit towards:

- MSL40118 Certificate IV in Laboratory Techniques and
- MSL50118 Diploma of Laboratory Technology.

Qualifications from the vocational training and education sector articulate directly into tertiary qualifications, so advanced standing would be given towards a degree level qualification.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- MSL924003 Process and interpret data
- MSL925004 Analyse data and report results
- MSL933005 Maintain the laboratory/field workplace fit for purpose
- MSL933008 Perform calibration checks on equipment and assist with its maintenance
- MSL934007 Maintain and control stocks

© Commonwealth of Australia, 2025 Skills Insight

- MSL935005 Authorise the issue of test results
- MSL935006 Assist in the maintenance of reference materials
- MSL953003 Receive and prepare samples for testing
- MSL973014 Prepare working solutions
- MSL973015 Prepare culture media
- MSL973016 Perform aseptic techniques
- MSL973019 Perform microscopic examination
- MSL974020 Perform food tests
- MSL974021 Perform biological procedures
- MSL975035 Perform microbiological tests

Target Group

This skill set is for meat industry laboratory workers who are required to perform rapid tests for pathogens as described in the Department of Agriculture approved methods for microbiological testing of meat and meat products.

Suggested words for Statement of Attainment

These competencies from the MSL Laboratory Operations Training Package Training Package meet the requirements for conducting rapid tests for pathogens in meat processing laboratories as described in the Department of Agriculture’s approved methods for microbiological testing of meat and meat products.
