Assessment Requirements for AUMABM001 Control Stock

Release: 1

Assessment Requirements for AUMABM001 Control Stock

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMABM4001 Control stock

Performance Evidence

Before competency can be determined, individuals must have competently controlled stock levels on a minimum of three occasions.

Individuals must demonstrate they can:

- order, control and administer a continuous stock supply
- conduct stocktake and detect stock discrepancies
- identify and deal with faulty and damaged stock
- maintain stock control documentation and computer records.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- stock ordering procedures
- stock level maintenance techniques
- stocktake procedures
- stock recording systems, including computerised and manual systems
- types of stock control documentation and systems
- reasons for stock loss, and damage and control methods.

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence of stock monitoring and distribution, e.g. stock control sheets.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- equipment required for the control of stock, including:
 - computerised stock control program
 - warehousing containing stocked components
 - stock control documentation
 - stock taking documentation
- a selection of parts and components that need to be stored.
