Performance Evidence

Before competency can be determined, individuals must have competently achieved work production and quality goals on a minimum of two occasions.

Individuals must demonstrate they can:

- follow workplace procedures relating to production goals
- achieve production and built-in quality goals
- respond to changing work requirements and production goals
- contribute to cost-reduction initiatives relating to production goals
- identify production and quality problems.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- workplace procedures relating to contributing to production goals
- production schedules, work plans and job specifications relating to production goals
- workplace continuous improvement principles and production goals
- production methods and quality goals
- workplace cost reduction and waste avoidance practices relating to production.

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to activities that contribute to achieving workplace production goals.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- workplace procedures and instructions relevant to the work area and production goals
- production schedules, work plans and job specifications
- production indicators relating to production goals
- work sheets and documentation relating to production goals.
