

AUMATA002 Conduct post-production inspections and tests

Release: 1

AUMATA002 Conduct post-production inspections and tests

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMATA3002 Conduct final inspections and functional tests

Application

This unit describes the performance outcomes required to carry out post-production inspections and tests of vehicles, components and systems.

It applies to those in an automotive manufacturing environment and involves the application of skills and knowledge at a production worker level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency Field

Manufacturing - Common

Unit Sector

Technical

Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section	
1. Plan inspection and tests	1.1 Work order and specifications are reviewed and inspection and test requirements determined	
	1.2 Inspection and test procedures are identified and confirmed 1.3 Inspection test tools and equipment are selected and checked	
2. Conduct inspections and tests	2.1 Vehicles, components and systems are inspected and tested for functional operation to ensure specifications, tolerances and workplace standards are met	

Approved Page 2 of 4

Elements	Performance Criteria		
	2.2 Surfaces are inspected and tested against job specifications and workplace quality standards		
	2.3 Inspection is completed according to workplace procedures		
3. Identify faults	3.1 Vehicles, components and systems not meeting job specifications and workplace quality standards are identified 3.2 Faults are labelled according to workplace procedures		
4. Record and report findings	 4.1 Appropriate workplace forms are selected for recording faults 4.2 Job sheets and work orders are completed according to workplace procedures 4.3 Inspection and testing results are reported to appropriate personnel 		

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description	
Reading skills to:	identify work health and safety (WHS) requirements and workplace procedures relating to inspection and testing	
	interpret job specifications and tolerances	
	interpret workplace forms.	
Writing skills to:	legibly label faults	
	complete job sheets and work orders.	
Numeracy skills to:	• inspect and test vehicles, components and systems and compare findings to specifications.	

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Workplace procedures	•	inspection and testing of vehicles, components and systems
must include:	•	identifying faults
	•	pre- and post-use inspection of equipment
	•	recording and reporting inspection and test results

Approved Page 3 of 4

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

• WHS requirements.

Unit Mapping Information

No equivalent unit.
