AUMFQM001 Apply continuous improvement in automotive manufacturing

Release: 1

AUMFQM001 Apply continuous improvement in automotive manufacturing

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMFQM2001 Monitor and maintain continuous improvement of systems and processes

Application

This unit describes the performance outcomes required to apply continuous improvement systems and processes to products and processes in an automotive manufacturing environment.

It involves the application of skills and knowledge at a production worker level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency Field

Manufacturing - Passenger Vehicle

Unit Sector

Quality - Manufacture

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare for continuous improvement	1.1 Quality requirements are identified and applied 1.2 Manufacturing <i>systems and processes</i> are identified from workplace instructions
2. Apply continuous improvement	2.1 <i>Continuous improvement tools</i> and <i>problem-solving techniques</i> relevant to the process are identified and applied 2.2 Proposed improvements to processes are trialed, monitored

Elements	Performance Criteria
	<p>and evaluated</p> <p>2.3 <i>Waste</i> minimisation principles and processes are identified</p> <p>2.4 Recommendations are made according to <i>workplace procedures</i></p>
3. Monitor continuous improvement	<p>3.1 Continuous improvement requirements are monitored to ensure products and processes comply with workplace quality</p> <p>3.2 Workplace continuous improvement systems and processes are monitored on an ongoing basis to capitalise on identified opportunities</p> <p>3.3 Continuous improvement forms and work sheets are completed according to workplace procedures</p>

Foundation Skills

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Reading skills to:	<ul style="list-style-type: none"> identify manufacturing schedules and production quality requirements identify workplace waste-minimisation processes.
Writing skills to:	<ul style="list-style-type: none"> complete continuous improvement, work sheets and production improvement forms.
Oral communication skills to:	<ul style="list-style-type: none"> communicate workplace systems and processes with co-workers communicate improvement ideas at team meetings and with supervisors.
Initiative skills to:	<ul style="list-style-type: none"> identify improvement opportunities and take steps to share ideas.
Problem-solving skills to:	<ul style="list-style-type: none"> identify manufacturing problems and analyse them for improvement opportunities.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Systems and processes</i> must include:	<ul style="list-style-type: none"> • assembly sequence • batch building • established continuous improvement system, such as Kaizen or workplace equivalent • lean manufacturing processes • picking of parts, restocking and quality inspections.
<i>Continuous improvement tools</i> must include:	<ul style="list-style-type: none"> • balanced scorecards • benchmarking • cause and effect diagrams • fishbone diagram or workplace equivalent • lead time • performance measurement • plan-do-check-act (PDCA) or workplace equivalent • run charts • statistics • upstream and downstream customer feedback.
<i>Problem-solving techniques</i> must include:	<ul style="list-style-type: none"> • step-by-step process • use of measurement.
<i>Waste</i> must include:	<ul style="list-style-type: none"> • excess inventory and stock • excessive cycle time • activities that do not value add • over-processing • rejects • rework.
<i>Workplace procedures</i> must include:	<ul style="list-style-type: none"> • quality processes for ensuring that built-in quality requirements are met • standardisation • work health and safety (WHS) requirements • workplace instructions.

Unit Mapping Information

No equivalent unit.
