Assessment Requirements for AUMGTA011 Read and interpret work orders and working drawings

Release: 1

AUMASA011 Apply safe work practices in the automotive manufacturing environment

Modification History

Release	Comment
Release 1	New unit of competency

Performance Evidence

Before competency can be determined, individuals must competently read and interpret work orders and working drawings on a minimum of two occasions, in the manner described in the Performance Criteria of this unit.

Individuals must demonstrate they can:

- establish that a working drawing complies with job, and original equipment manufacturer (OEM) and material specifications
- determine job processes and requirements from work orders and working drawings, including:
 - customer requirements
 - original equipment manufacturer (OEM) procedures
 - material requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- workplace procedures relating to reading and interpreting work orders and working drawings
- types and layout of work orders and working drawings, including symbols, codes and legends
- procedures for identifying job specifications, processes and materials
- workplace procedures relating to work orders and working drawings, including:
 - continuous improvement practices
 - environmental requirements
 - quality guidelines
 - recording and reporting.

Assessment Conditions

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that they have interpreted work orders and working drawings, e.g. work sheets.

The following resources must be made available:

- manufacturing workplace or simulated workplace
- work orders, working drawings and specifications
- tools, equipment and materials required in the drawing process
- workplace procedures required to read and interpret work orders and working drawings
- work instructions to read and interpret work orders and working drawings.
