AUMGTM005 Read and interpret engineering drawings and determine requirements

Release: 2

AUMGT M005 Read and interpret engineering drawings and determine requirements

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGT M3005 Read and interpret engineering drawings and job specifications
Release 2	Updated for clarity and policy adherence

Application

This unit describes the performance outcomes required to determine production processes and materials from engineering drawings and specification sheets.

It applies to individuals in a manufacturing environment and involves the application of skills and knowledge at a specialist level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical - Manufacture

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare	1.1 Identify symbols, codes, legends and diagrams in engineering drawings 1.2 Identify and interpret manufacturing information, products, systems and components represented in engineering drawings 1.3 Determine work requirements and confirm with appropriate personnel
2. Determine processes	2.1 Identify specific customer and job requirements 2.2 Identify required manufacturing processes from drawing, and

Elements	Performance Criteria
	select materials according to job requirements and workplace procedures
3. Complete work processes	3.1 Prepare production order according to engineering drawings and workplace procedures 3.2 Record engineering drawing outcomes and workplace documents and store engineering drawings according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	- interpret engineering drawings, job specifications and workplace procedures - identify customer requirements.
Writing skills to:	legibly prepare production work orders.
Numeracy skills to:	- identify measurements and symbols in engineering drawings and job specifications - calculate material requirements.
Planning and organising skills to:	plan and organise the job, choosing from different options, identifying possible risks, and calculating and accessing relevant resources.
