</table>

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in the unit’s elements and performance criteria, range of conditions and foundation skills:

- follow environmental and sustainability best practice in an automotive workplace on three different occasions

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- environmental regulations and standards relevant to own automotive workplace, including commonwealth, state and territory legislation and local government by-laws and regulations
- procedures for reporting environmental damage and breaches
- procedures and processes that support environmental sustainability practices, including:
  - reducing waste
  - reusing materials
  - recycling waste
- types of waste produced by automotive workplaces and their impact on the environment, including:
  - vehicle wastes, including:
    - coolants
    - oils
    - exhaust emissions
    - evaporative fuel emissions
    - waste components, including tyres
  - noise
workplace wastes, including:
  - cleaning materials
  - paper waste
  - general rubbish
procedures for minimising waste
procedures for sorting and storing items for recycling or disposal
procedures for reducing resource consumption, including water, electricity, fossil fuels and chemicals
procedures for controlling hazards to stormwater and wastewater drainage systems, including:
  - capturing, storing and disposing of fluids released from vehicles
  - trapping spills, including the use of spill kits
  - preventing hazards entering stormwater and wastewater drainage systems, including bunding, grease traps and triple interceptors
procedures for protecting air quality and controlling noise hazards, including:
  - minimising the emission of airborne particles, gases and fumes
  - containing and redirecting airborne particles, gases and fumes
  - insulating noise from automotive workshops.

Assessment Conditions
Assessors must satisfy NVR/AQTF assessor requirements.
Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.
Assessment must include direct observation of tasks.
Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to having followed environmental and sustainability best practice in their automotive workplace, e.g. repair orders.
Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.
The following resources must be made available:
  - automotive workplace or simulated workplace
  - environmental regulations and standards relevant to own automotive workplace, including commonwealth, state and territory legislation and local government by-laws and regulations.
