AURJTA002 Remove and replace motorcycle components and accessories

Release: 1

AURJTA002 Remove and replace motorcycle components and accessories

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to remove and replace motorcycle components and accessories. It involves preparing for the work, removing and replacing the component, and completing workplace processes and documentation.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry. The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Mechanical - Motorcycle

Unit Sector

Technical

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to remove and replace motorcycle component or accessory	1.1 Task requirements are determined from workshop or activity instructions 1.2 Removal and replacement procedures and information are

	sourced and interpreted 1.3 Potential hazards and risks associated with the task are identified and reported to workplace supervisor 1.4 Tools, equipment and materials are selected and checked for serviceability
2. Remove component or accessory	2.1 Component or accessory is identified and removed according to manufacturer specifications and without causing damage to other components or systems 2.2 Inspection of component or accessory is carried out according to manufacturer specifications, workplace procedures, and safety and environmental requirements 2.3 Inspection findings are reported according to workplace procedures, including recommendations for replacement and minor adjustments
3. Replace component or accessory	3.1 Component or accessory is replaced according to manufacturer specifications and without causing damage to components or systems 3.2 Adjustments are made to component or accessory according to manufacturer specifications 3.3 Post-replacement testing is carried out according to workplace procedures and further adjustments are made as required
4. Complete work processes	4.1 Final inspection is made to ensure work meets task instructions and workplace standards 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
--------	-------------

Skills	Description
Learning skills to:	locate appropriate information.
Reading skills to:	interpret key information from manufacturer specifications, workplace procedures, and safety requirements relating to motorcycle components and accessories.
Writing skills to:	legibly and accurately fill out workplace documentation using correct industry terminology and conventions.
Oral communication skills to:	participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.
Numeracy skills to:	measure components and accessories, compare with specifications, and perform minor adjustments to them.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Safety and environmental requirements</i> must include:	- work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: - lifting and supporting motorcycles - selecting and using personal protective equipment (PPE) - avoiding entanglement when working with chains, sprockets, belts and pulleys - environmental requirements, including procedures for trapping, storing and disposing of lubricants, oils and fluids released during the adjustment process.
