**Assessment Requirements for AURPTA106
Inspect and service line trimming systems
and components**

Release: 1

Assessment Requirements for AURPTA106 Inspect and service line trimming systems and components

Modification History

Release	Comments
Release 1	This version first released with AUR Automotive Retail, Service and Repair Training Package Version 6.0

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- service one of each of the following line trimming systems:
 - auto line feed system
 - manual line feed system
 - bent and straight shaft systems.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods to locate and interpret information required to inspect and service line trimming systems and components, including:
 - information provided by customer and supervisors
 - manufacturer specifications and procedures or equivalent documentation
- workplace procedures required to inspect and service line trimming systems and components, including:
 - establishing serviceability of tools and equipment
 - documentation procedures
 - housekeeping procedures, including:
 - examination of tools and equipment
 - storage of equipment
 - identification, tagging and isolation of faulty equipment
 - disposal of excess materials
 - recycling procedures
- work health and safety (WHS) requirements relating to inspecting and servicing line trimming systems and components, including procedures for:

- starting and operating line trimming equipment
- adjusting and aligning line trimming systems
- using personal protective equipment (PPE) relevant to operating line trimmers
- application, and key features of line trimming systems, including:
 - overload protection
 - line sizes and types
 - auto and manual line feed systems
 - metal and composite blades
 - handles and harnesses
 - brush cutter angle drives
 - bent and straight shafts
 - protective guards and cowlings
 - stand-alone or fitted to other equipment systems
- types and application of lubricants, and lubricating methods
- inspection procedures for line trimming systems and components, including:
 - analysing component wear
 - checking bearings and housing condition
 - checking automatic and manual line feed systems
 - checking physical damage to protective guards and cowlings
- service and adjustment procedures for line trimming systems and components, including:
 - lubricating bent and straight shaft drive systems
 - testing automatic and manual line feed systems
 - testing overload devices
 - post-repair testing and re-testing procedures for line trimming systems and components, including operating line trimming system through full operating range.

Assessment Conditions

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the line trimming systems and components that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- outdoor power equipment repair workplace or simulated workplace
- workplace instructions
- manufacturer line trimming specifications

- outdoor power equipment line trimming system and components specified in the performance evidence and requiring servicing
- tools, equipment and materials appropriate for inspecting and servicing line trimming systems and components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
