AURPTA107 Service and repair post boring systems

Release: 1

AURPTA107 Service and repair post boring systems

Modification History

Release	Comments
Release 1	This version first released with AUR Automotive Retail, Service and Repair Training Package Version 6.0

Application

This unit describes the skills and knowledge required to service and repair faults in the post boring systems of outdoor power equipment according to manufacturer specifications. The unit involves preparing for the task, determining the service and repair requirements, carrying out the service and repair, performing post-repair testing, and completing workplace processes and documentation.

The unit applies to those working in the outdoor power equipment service and repair industry. The post boring systems may be stand-alone, or chainsaw attached, and petrol powered or electric powered.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Outdoor Power Equipment Technical

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to service and repair post boring system	1.1 Identify job requirements from workplace instructions 1.2 Source and interpret workplace service and repair procedures 1.3 Identify and manage hazards associated with the tasks 1.4 Select tools and equipment and check for serviceability
2. Determine service and repair requirements of post boring system	2.1 Inspect and test system according to manufacturer specifications, workplace procedures, and safety requirements 2.2 Identify faults and determine causes of faults 2.3 Report inspection findings and test results according to workplace procedures, and include recommendations for

ELEMENTS	PERFORMANCE CRITERIA
	necessary service, repair or adjustment 2.4 Obtain authorisation to proceed according to workplace procedures
3. Carry out service and repair activities	3.1 Analyse service and repair options and select those most appropriate to the circumstances 3.2 Select and check tools, equipment and materials 3.3 Remove components and inspect for serviceability according to manufacturer specifications, workplace procedures, and safety requirements 3.4 Fit and adjust reusable, repaired and replacement components according to manufacturer specifications and workplace procedures
4. Check post boring system for normal operation	4.1 Operate and compare system to manufacturer specifications according to workplace procedures and safety requirements 4.2 Make adjustments as required and re-test post boring system
5. Complete work processes	5.1 Conduct final inspection according to workplace procedures and confirm equipment is ready for use 5.2 Clear work area and dispose of or recycle materials according to workplace procedures 5.3 Complete documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	Locates required sources of information efficiently.
Numeracy	Calculates deviations and tolerances from manufacturer specifications using basic mathematical skills.
Reading	Interprets information from manufacturer and workshop literature when seeking post boring system specifications and procedures.
Planning and organising	- Plans own work requirements - Prioritises actions to achieve required outcomes - Ensures tasks are completed within workplace timeframes.

Unit Mapping Information

Supersedes and is equivalent to AURPTA007 Service and repair post boring systems.
