Assessment Requirements for AURTTL001 Inspect and service CNG fuel systems

Release: 1

Assessment Requirements for AURTTL001 Inspect and service CNG fuel systems

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- inspect and service the following compressed natural gas (CNG) fuel systems:
two different light vehicle CNG fuel systems or
two different heavy commercial vehicle CNG fuel systems or
 - two different forklift CNG fuel systems.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to inspecting and servicing CNG fuel systems, including procedures for:
 - working with a lighter-than-air flammable gas
 - avoiding cold burns
 - storing CNG
- environmental requirements, including procedures for preventing loss of gas to atmosphere
- licensing requirements for working on CNG systems
- identification and function of CNG fuel system components
- basic operation of CNG fuel systems
- requirements of AS/NZS 2739 Natural gas (NG) fuel systems for vehicle engines
- inspection procedures for CNG fuel systems, including:
 - leakage check
 - CNG container identity

- container life
- container recertification date
- container corrosion and damage
- container attachment
- automatic fuel shut-off device
- manual valves
- compartment and sub-compartment refuelling connection
- refuelling interlock device
- flexible piping and hoses
- ground clearances
- vehicle identification, including identification markers
- service and adjustment procedures for CNG fuel systems, including checking compliance of fuel system emissions
- post-service testing procedures for CNG fuel systems.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle CNG fuel systems that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- ASNZS 2739 Natural gas (NG) fuel systems for vehicle engines
- manufacturer servicing schedules and vehicle CNG fuel system specifications
- vehicles and machinery specified in the performance evidence with operating CNG fuel systems requiring servicing
- tools, equipment and materials appropriate for inspecting and servicing CNG fuel systems.
