<td>Release 1</td>
<td>New unit of competency.</td>
</tr>
</tbody>
</table>

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit’s elements, performance criteria, range of conditions and foundation skills:

- apply five of the following rust prevention and sound deadening materials to different vehicle body components:
  - fish oil
  - wax compounds
  - spray-on sound deadening
  - brush-on sound deadening
  - adhesive bonded sound deadening pads
  - joint and seam sealants.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to applying rust prevention and sound deadening materials to vehicle body components, including procedures for:
  - selecting and using personal protective equipment (PPE)
  - using technical data sheets (TDS) for sound deadening materials
  - using safety data sheets (SDS) for fish oil, sealers and adhesives
  - handling and storing rust prevention and sound deadening materials
  - using tools and equipment
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- sound deadening material manufacturer specifications
• types and uses of rust prevention and sound deadening materials
• rust prevention and sound deadening application methods and techniques
• types and uses of rust prevention and sound deadening equipment, including:
  • spray gun
  • heat gun
  • brush applicators
• procedures for protecting vehicle and components when applying rust protection and sound deadening materials
• procedures for final inspection of fitted sound deadening and rust prevention materials.

**Assessment Conditions**

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the rust prevention and sound deadening materials they have applied to vehicle body components, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

• automotive repair workplace or simulated workplace
• workplace instructions
• TDS for sound deadening materials
• SDS for fish oil, sealers and adhesives
• PPE to apply rust prevention and sound deadening materials
• rust prevention and sound deadening materials
• vehicle body components requiring the application of rust prevention and sound deadening materials specified in the performance evidence
• tools, equipment and materials appropriate for applying rust prevention and sound deadening materials to vehicle body components.
